This is the official bulletin of The Pennsylvania State University. Graduate program and Graduate Council requirements are those in effect at the time of admission to a graduate degree program.

The University reserves the right to change the requirements and regulations listed here and to determine whether a student has satisfactorily met requirements for admission or graduation, and to reject any applicant for any reason the University determines to be material to the applicant's qualifications to pursue higher education. Nothing in this material should be considered a guarantee that completion of a program and graduation from the University will result in employment.

The Graduate Council has responsibility for and authority over all academic information contained in the Graduate Degree Programs Bulletin.
History of Graduate Education at Penn State

For information, see www.gradsch.psu.edu/aboutus/history.html.
The Graduate Faculty

For information, see http://www.gradsch.psu.edu/facstaff/faculty.cfm.
Administration

For information, see www.gradsch.psu.edu/aboutus.
Program Locations

Programs of graduate study are offered at five locations in Pennsylvania:

- **Penn State Erie**  - pennstatebehrend.psu.edu
- **Penn State Harrisburg**  - www.hbg.psu.edu
- **College of Medicine**  - http://www.pennstatehershey.org/web/guest/education
- **Penn State Great Valley**  - www.gv.psu.edu
- **University Park Campus**  - www.gradsch.psu.edu

**Off-site courses**—Graduate degree programs based at any of the five administrative centers of the Graduate School listed previously, but offered at locations away from those centers, may be discontinued at any time. Degree candidates will be eligible to continue the program, but this may require attendance at courses offered only at the center where the program is based. The University will provide notice of the discontinuance of any program offered at an off-center site at least one semester in advance and furnish information concerning available options for continuance in the program.
GRADUATE LIFE

Current graduate enrollment at University Park campus is about 6,790 students, of whom 78 percent are engaged in graduate study full time, 47 percent are women, and 35 percent are residents of Pennsylvania. (Undergraduate enrollment at University Park campus exceeds 40,000.) International students make up about 35 percent of the graduate student population, and about 8 percent of enrolling graduate students report themselves as members of recognized U.S. ethnic minority groups.

University Park campus is one of the most naturally beautiful American campuses. On any given day of the semester, about 50,000 people will be on the campus: 38,000 students, 12,000 employees, and several hundred visitors. Although the size of the campus can be intimidating, graduate students soon find that its size and diversity afford a variety of stimulating activities. This variety reflects the University's view that a person's graduate experience should include, in addition to course work and research, living in a scholarly atmosphere, profiting from the perspectives of visiting scholars and artists, and engaging in informal discussions with faculty and fellow students. It also should mean participating in student affairs and University governance, and allowing time to reflect, to explore fields related to one's specialty, and to enjoy leisure activities.

Although the mailing address of the largest campus is University Park, PA 16802, this name ordinarily does not appear on maps. The University Park campus is located in State College, Pennsylvania, an area with a population of more than 67,000. State College is located on U.S. Highway 322, near Interstates 80 and 99, and can be reached directly by bus or airline service. The town retains a collegiate atmosphere enhanced by many small shops, restaurants, cinemas, and bookstores.

GRADUATE STUDENT ASSOCIATION

REGULATIONS AND CONDUCT STANDARDS FOR STUDENTS ENROLLED IN THE GRADUATE SCHOOL

It is the responsibility of students to be cognizant of the rules, regulations, and procedures of the University. This information is contained in the graduate school policies at [www.gradsch.psu.edu/policies](http://www.gradsch.psu.edu/policies) (Opens New Window).

MOTOR VEHICLE REGULATIONS
For information, see [guru.psu.edu/policies/BS04.html](http://guru.psu.edu/policies/BS04.html) (Opens New Window).

BICYCLE REGULATIONS
For information, see [guru.psu.edu/policies/SY16.html](http://guru.psu.edu/policies/SY16.html) (Opens New Window).

STANDARDS OF CONDUCT

By virtue of their maturity and experience, graduate students are expected to have learned the meaning and value of personal honesty and professional integrity before entering the Graduate School. Every student is expected to exhibit and promote the highest ethical and moral standards. A violation of such standards is regarded as a serious offense, raising grave doubt that the student is worthy of continued membership in the Graduate School community. The University Code of Conduct is found in Appendix I in this Bulletin. Violation of the Code may result in suspension or dismissal from the academic program and/or from the Graduate School. For additional information, please go to [www.sa.psu.edu/ja](http://www.sa.psu.edu/ja).

Research Integrity--Graduate students are expected to adhere to the highest standards of research integrity in the conduct of their research and other educational activities. They are subject to University policy AD-47, "General Standards of Professional Ethics," and RA-10 "Handling Inquiries/Investigations into Questions of Ethics in Research and in Other Scholarly Activities," which apply to all University personnel engaged in research activities. This policy may be accessed electronically through the University's General University Reference Utility (GURU). For information on Research Integrity, please go to [guru.psu.edu/policies/AD47.html](http://guru.psu.edu/policies/AD47.html). For more information on general standards of professional ethics, please go to [guru.psu.edu/policies/RA10.html](http://guru.psu.edu/policies/RA10.html).

RESOLUTION OF PROBLEMS
For information regarding procedures for resolving or appealing problems in the classroom and outside, see Appendix II in this bulletin.

OWNERSHIP OF INTELLECTUAL PROPERTY
For information, see [www.research.psu.edu/ipo](http://www.research.psu.edu/ipo) (Opens New Window) and [guru.psu.edu/policies/RA11.html](http://guru.psu.edu/policies/RA11.html) (Opens New Window).

RESEARCH PROTECTIONS
To ensure compliance with applicable federal and state laws, certain University activities require review and approval by appointed institutional review committees. Projects involving any of the following concerns must be reviewed and approved through the Office for Research Protections (ORP) before the project is initiated.

For information, see [www.research.psu.edu/orp](http://www.research.psu.edu/orp) (Opens New Window).

Conflict of Interest--See [guru.psu.edu/policies/RA20.html](http://guru.psu.edu/policies/RA20.html).

For policy statements on these issues, see [guru.psu.edu/policies/RA14.html](http://guru.psu.edu/policies/RA14.html) and [guru.psu.edu/policies/RA15.html](http://guru.psu.edu/policies/RA15.html). See also policies on safety issues at [guru.psu.edu/policies/SY24.html](http://guru.psu.edu/policies/SY24.html) (Opens New Window).

NOTE: The College of Medicine at the Penn State Milton S. Hershey Medical Center is a unique Penn State campus in that it maintains a separate IRB, IACUC, UBC, and UIC. Students conducting projects at Hershey should contact their local committees for approval of research.

DATE LAST REVISED: 05/18/07
Application and Admission Procedures

Each step of the educational process, from admission through graduation, requires continuing review and appropriate approval by University officials. The University, therefore, reserves the right to change the requirements and regulations contained in this bulletin and to determine whether a student has satisfactorily met its requirements for admission or graduation, and to reject any applicant for admission for any reason the University determines to be material to the applicant's qualification to pursue higher education.

An applicant for admission to the Graduate School should understand that graduate work is not a simple extension of an undergraduate program but, rather, demands scholarship of a higher order, and emphasizes research, creativity, and professional competence with a minimum of formal requirements and a maximum of student initiative and responsibility.

Objective--The objective of the admission process of the Graduate School is to identify and admit a qualified graduate student body up to the limit of the University's resources to provide outstanding graduate programs. In most programs, a student may begin graduate work in the fall or spring semester or in the summer session.

As at all universities, Penn State's staff, facilities, and other resources are limited, so that not all qualified persons can be admitted. The number accepted will vary by program and from semester to semester. In some graduate programs all vacancies will have been filled long before the deadline for submitting applications, so that even outstanding students cannot be accepted.

Degree Admission--Applicants interested in applying to a graduate program at Penn State should obtain information on individual program requirements via the website at www.gradsch.psu.edu/prospective/program.cfm. Applicants may apply for admission to only one program at a time.

Qualifications--For admission to the Graduate School, an applicant must hold either (1) a bachelor's degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution. Ordinarily, an entering student must have completed in a satisfactory manner a minimum of course work in designated areas, the specific courses and amount of work depending upon the intended field of advanced study. Scores on the Graduate Record Examinations (GRE) General Test are required by most programs. Individual program requirements for admission are included under the specific program descriptions. Information about GRE publications can be obtained by calling the Educational Testing Service in Princeton, New Jersey, USA at 1-866-473-4373 or writing to GRE, Educational Testing Service, P.O. Box 6000, Princeton, NJ USA 08541-6000. If you prefer, you may send an e-mail to gre-info@ets.org or order publications through the website at www.gre.org.

Provisional admission may be granted to applicants whose credentials are not complete at the time of application because the baccalaureate degree has not yet been conferred, grades for the current semester are not yet available, etc. Such admission is subject to cancellation if the complete credentials, on arrival, do not meet the requirements for admission. In the interim, certification of any earned credits will be withheld. If admission is canceled for any reason, the student is dropped automatically from the Graduate School. Completion of admission in such cases is dependent upon receipt of the missing credentials. (See Provisional Admission under Classification of Students.)

Admission is granted jointly by the Graduate School and the department or graduate program in which the student plans to study. The establishment of standards by which applicants are admitted is a departmental or program responsibility. Although the Graduate School has no fixed minimum grade-point requirement for admission, an applicant is generally expected to maintain a junior-senior grade-point average of at least 2.50 on Penn State's grading scale of A (4.00) to D (1.00). Individual programs often establish higher grade-point average requirements and use other criteria to judge candidates for admission. In exceptional cases, departments or major programs may also approve admission by reason of special backgrounds, abilities, and interests. Departmental or program requirements are given in the descriptive statements appearing under the graduate programs listed in the latter part of this publication.

A student who has been admitted to a program in which the doctorate is offered may begin working toward that degree but has no official status as a doctoral student and no assurance of acceptance as a doctoral candidate until a candidacy examination administered by the major department or committee has been passed. (See Candidacy Examination under Degree Requirements.)

Deadlines--Applicants should obtain application deadlines by contacting the individual graduate program. Because the admission process is time consuming, applications should be submitted as early as possible.

Pennsylvania Act 34 Clearance—Applicants should note that some programs may require clearance of students participating in internships/practicums in Pennsylvania school districts. Pennsylvania Act 34 of 1985 (Criminal History Record Information) specifies that employees of Pennsylvania public and private schools must undergo background checks. School districts accepting graduate students for internships/practicums increasingly require Act 34 clearance before permitting students to begin their practicums in the district, even though they are not employees. In addition, non-Pennsylvania residents are expected to present evidence of an FBI background information check. Applicants are encouraged to contact the program to which they are applying if they have questions as to this requirement and how it may affect them.

Nondegree Admission--If you do not intend to pursue a graduate degree, but want to take graduate-level courses for personal enrichment, professional development, permanent certification, or to apply for degree status at a later date, you can seek admission as a nondegree graduate student. Information on applying for nondegree graduate status may be obtained via the website at

The Pennsylvania State University
Changing from graduate nondegree status to regular status requires a new admission application. No more than 15 graduate credits of course work taken prior to admission to a graduate degree program may be applicable to a graduate program. (See "Nondegree Student" under Classification of Students.) However, admission as a nondegree graduate student neither guarantees nor implies subsequent admission to a degree program. Nondegree students are not eligible to receive fellowships or graduate assistantships and preference for courses is given to degree students. Programs control access to some courses.

Applicants for nondegree admission must have received from a regionally accredited institution a baccalaureate degree under residence and credit conditions substantially equivalent to those required by Penn State.

Minority Students--Minority students are encouraged to apply for admission to any of the programs offered in the Graduate School. Information concerning programs and financial aid can be obtained from the chair of the graduate program, the dean of the college of the student's major interest, or from the Office of Graduate Educational Equity, 304 Kern Building.

International Students--International applicants must hold the equivalent of an American four-year baccalaureate degree. They must submit official or attested university records, with certified translations if the records are not in English. Notarized copies are not sufficient.

English Proficiency--The language of instruction at Penn State is English. All international applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, or a total score of 80 with a 19 on the speaking section for the Internet-based test (iBT). Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires completion of specified remedial English courses ESL 114G (American Oral English for Academic Purposes) and/or ESL 116G (ESL/Composition for Academic Disciplines) and attainment of a grade of B or higher. The minimum acceptable composite score for the IELTS is 6.5.

Graduate programs may have more stringent requirements.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a graduate degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Please note that specific graduate programs may require all international applicants to submit a TOEFL or IELTS score, regardless of their academic background and country of origin.

Information about the TOEFL can be obtained by writing to the Educational Testing Service, Box 6155, Princeton, NJ 08541-6155 or visiting its website at www.toefl.org. Local administration at University Park campus of the TOEFL is handled by the IEEP. Information about the IELTS can be obtained by contacting IELTS International, 100 East Corson Street, Suite 200, Pasadena, CA 91103 or visiting its website at www.ielts.org.

Undergraduate Students--Any senior with a 3.50 grade-point average may be admitted to 500- or 800-level courses with the consent of the instructor; other seniors with a B average or better may be admitted to graduate courses with the consent of the instructor, the student's academic adviser, and the director of Graduate Enrollment Services. Forms to request permission to take 500- or 800-level courses are available in the Office of Graduate Enrollment Services, 114 Kern Building.

Undergraduate students in The Schreyer Honors College who undertake integrated undergraduate--graduate study (IUG) can pursue concurrent bachelor's and master's degrees. Information on IUG study can be obtained at the office of the dean of The Schreyer Honors College, 10 Schreyer Honors College.

In certain cases undergraduate students may subsequently apply credits they have earned in 400, 500, and 800 series courses toward an advanced degree at Penn State. After admission to the Graduate School, and with the approval of the major field, a maximum of 9 credits relevant to the graduate program of study that were not used to satisfy undergraduate requirements may be applied toward an advanced degree. The time limitation on the completion of a master's degree program applies to these as well as to other credits.

Postdoctoral Fellows, Scholars, and Guests of the University--Postdoctoral Fellow appointments are financed under a Postdoctoral Fellow Program of a granting agency outside the University. A Postdoctoral Scholar is the usual designation for all other postdoctoral appointments that meet the standards enumerated by the National Research Council. Postdoctoral appointments are considered appointments of a temporary nature that are intended to offer an opportunity for continued experience in research or teaching, usually, though not necessarily, under the supervision of a senior mentor.

Individuals holding the highest degree in their fields from Penn State or other accredited colleges and universities are invited to apply to the dean of the Graduate School for guest privileges for purposes of noncredit study. Guests may attend seminars and courses with the privileges of faculty members and, if space and facilities are available, carry on research. Individuals may also be appointed to temporary positions in all University ranks. All guests are expected to affiliate formally or informally with one of the departments, institutes, or other subdivisions of the University engaged in scholarly pursuits.

Policy on Second Doctorates--The Graduate School does not admit applicants to concurrent double Ph.D. degree programs, D.Ed. degree programs, or D.M.A. degree programs, or to concurrent doctoral degree programs in any combination (Ph.D., D.Ed., and/or D.M.A.). In general, the Graduate School discourages the pursuit of a second Ph.D., D.Ed., or D.M.A. degree. However, if an applicant who holds one of these degrees requests admission to a second doctoral degree program (either Ph.D., D.Ed., or D.M.A.), the applicant is asked to give the Graduate School the reason why the second doctorate is necessary (as opposed to taking course work or obtaining a master's degree in the second field or...
working in a postdoctoral appointment in the second field). The Graduate School then may solicit responses concerning 
the necessity of the second doctorate from representatives of the field at Penn State or elsewhere. This information is then 
given to the Dean of the Graduate School for the final decision. If approved, all Graduate School requirements for the 
second doctorate must be met de novo.

**Student Pennsylvania Resident Status**--When it appears that an applicant for admission is not a resident of Pennsylvania 
for tuition purposes, a non-Pennsylvanian classification is assigned. If the student who is thus admitted believes that 
circumstances do not justify classification as a non-Pennsylvanian, a petition may be addressed to the Fee Assessor, The 
Pennsylvania State University, 108 Shields Building, University Park, PA 16802 for reclassification. Penn State Harrisburg 
students may petition the Penn State Harrisburg financial officer.

A copy of the Policy for Determination of Eligibility for Reclassification as a Pennsylvania Resident for Tuition Purposes can be 
obtained in the office mentioned above or online and should be reviewed before requesting reclassification. Any 
reclassification resulting from a student's petition shall be effective for tuition purposes as of the date such petition was 
filed. A student who changes residency from Pennsylvania to another state must promptly give written notice to the 
University. See also **Appendix V** to this bulletin.

Updated: 4/6/12
TRANSFER CREDIT

Subject to the limitations given below, a maximum of 10 credits of high-quality graduate work (credits must be equivalent to 400-level or higher at Penn State) transferred from a regionally accredited U.S. institution or a recognized degree-granting international institution may be applied toward the requirements for a graduate degree. However, credits earned to complete a previous degree, whether at Penn State or elsewhere, may not be applied to a graduate degree program at Penn State, except for those students who are approved to double-count credits as part of an approved concurrent or integrated undergraduate-graduate degree or those students approved by the Graduate School to receive a master's degree along the way to a doctorate.

The student should distinguish carefully between the transferability of credit and its applicability in a particular degree program. Approval to apply any transferred credits toward a degree program must be granted by the student's academic adviser, the program head or graduate officer, and the Graduate School. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School of Penn State, must be of at least B quality (grades of B- are not transferable), and must appear on an official transcript of a regionally accredited U.S. institution or recognized degree-granting international institution.

Pass-fail grades are not transferable to a graduate degree program unless the "Pass" can be substantiated by the former institution as having at least B quality.

Forms for transfer of credit can be obtained from each graduate program. (See [www.gradsch.psu.edu/prospective/program.cfm](http://www.gradsch.psu.edu/prospective/program.cfm) for graduate program contact information.)

Updated: 4/3/12
Classification of Students

A graduate student may be admitted as a degree student, a certificate student, or a nondegree student, depending upon the student's objectives. A student who has held only nondegree status and who later wants to apply for degree status should contact his or her intended program of study. Admission as a nondegree student neither guarantees nor implies subsequent admission to a degree program. Any other change in classification must be arranged through the Office of Graduate Enrollment Services, 114 Kern Building.

Degree Student--A degree student is one who plans to become a candidate for an advanced degree at Penn State and who has been formally admitted for advanced studies in a particular program. The program of study is developed under the guidance of an adviser appointed by the head of the student's major program. A degree student who has passed a candidacy examination is classified as a doctoral candidate.

Provisional Admission--Provisional admission is a temporary classification in which an applicant may remain for a period of either one or two semesters (depending on the provisional type) following admission. If the conditions of provisional admission are not met within that time, the student may be dropped from the program. In addition, all provisional conditions must be met before a student reaches an academic benchmark. Benchmarks include completion of a master's program, the doctoral candidacy, comprehensive, and the final oral examinations. A student will not be permitted to graduate who has not met the conditions of his or her provisional admission.

Nondegree Student--If you do not intend to pursue a graduate degree, but want to take graduate-level courses for personal enrichment, professional development, permanent certification, or to apply for degree status at a later date, you can seek admission as a nondegree graduate student. Information on applying for nondegree graduate status may be obtained via the Web site at www.gradsch.psu.edu/prospective/apply.

A maximum of 15 graduate credits taken as a nondegree student prior to admission to a graduate degree program may be applied to a graduate program, with departmental approval. The credits must have been earned within five years preceding entry into the degree program. For additional information, see Transfer of Nondegree Graduate Credits, under Transfer Credits. Forms for transfer of nondegree credits may be obtained from the graduate program.

Applicants for nondegree admission must have received from a regionally accredited institution a baccalaureate degree earned under residence and credit conditions substantially equivalent to those required by Penn State.

Certificate Student--A certificate student is one who is engaged in a program of study leading to a certificate or equivalent recognition of accomplishment rather than a graduate degree program at Penn State. Certification students, i.e., candidates for Instructional, Supervisory, Educational Specialist, and Administrative certificates, have the same University privileges and responsibilities as graduate degree students. (See additional information under Pennsylvania Department of Education Certificate Candidates.)

Undergraduate Student--Such a student is not a graduate student because a baccalaureate degree has not been attained. The student may not register for graduate courses (500 or 800 series) unless he or she is a senior with at least a 3.50 cumulative GPA or with at least a 3.0 GPA and special permission from the Office of Graduate Enrollment Services. Forms to request permission to take 500- or 800-level courses are available in the Office of Graduate Enrollment Services, 114 Kern Building.

The Pennsylvania State University
CREDIT BY EXAMINATION

Examinations to establish credit for work done in absentia or without formal class work may be used to remove undergraduate deficiencies, but not to earn credits toward an advanced degree. Arrangements are made by the student directly with the major department head or program chair.
Student Aid

For general information regarding available sources of student aid, see www.psu.edu/studentaid and click on the link for Graduate Students.

Assistantships

For information, see www.gradsch.psu.edu/prospective/assistantships.html.

Fellowships and Traineeships

For information, see http://gradsch.psu.edu/fellowships.

For information about specific funding programs, see www.gradsch.psu.edu/fellowships/programs.

Veterans' Benefits

For information, see www.equity.psu.edu/veterans/outreach.asp.
THE UNIVERSITY LIBRARIES

The University Libraries constitute a major resource for students and researchers in all fields of study. The Libraries are ranked among the top ten research libraries in North America by the Association of Research Libraries and contain more than 53 million volumes, 6.9 million microforms, 88,668 serial subscriptions, plus more than 536 databases and 45,906 online full-text journals, and 100,000 e-books.

The University Libraries include a central facility and five other libraries at University Park campus, plus libraries at 23 Penn State locations throughout the state, including the Dickinson School of Law and the Milton S. Hershey Center and the Penn State affiliated Pennsylvania College of Technology. At University Park, the Arts and Humanities, Business, Education and Behavioral Sciences, Gateway Commons, Social Sciences, Maps, Life Sciences, Special Collections, and News and Microforms libraries are maintained in Pattee Library and Paterno Library. Other Libraries at University Park include the Architecture and Landscape Architecture, Earth and Mineral Sciences, Engineering, Law, and Physical and Mathematical Sciences libraries.

In addition Pattee Library houses Course Reserves Services, the Extended Hours Study Area, (now offering 24-hour service), and Library Services for Persons with Disabilities. The Special Collections Library in Paterno Library includes Historical Collections and Labor Archives, Rare Books and Manuscripts, and the Penn State University Archives. Additional library services include assigned carrels, photocopiers, a student lounge with vending machines, change machines, and Mackinnon’s Cafe.

Among special collections of national importance are those on Arnold Bennett, Kenneth Burke, Jean Giraudoux, John O’Hara, Vance Packard, Joseph Priestley, Conrad Richter; the Allison-Shelley collection of Anglo-Americana-Germanica; and materials on Utopian literature and on Australia. The Historical Collections and Labor Archives contain a wide variety of documentary sources, including the papers of Pennsylvania leaders and businesses and records of labor unions. The most notable of these documents are those of Richard Schweiker, William Scranton, the United Steelworkers of America, and the United Mine Workers of America. The Penn State University Archives house an extensive collection of materials about the University and the surrounding community.

Faculty members may recommend books and other library material purchases by contacting a subject specialist at www.libraries.psu.edu/psul/cataloging/services_policies/specialists.html.

. Faculty at locations other than University Park can also contact their head librarian.

Access to holdings is obtained through The CAT, a computerized catalog, part of the Library Information Access System (LIAS), available on the Web at www.libraries.psu.edu.

. LIAS is a dynamic, integrated information system that provides electronic access to a great variety of materials in many subject areas.

The Libraries maintain a comprehensive program of general and specialized reference and instructional services. The Libraries’ faculty teach credit courses as part of the Library Studies Program and offer a variety of topical seminars. Introductory sessions, offered by Library Learning Services, are scheduled on a regular basis to familiarize faculty, students, and other library users with LIAS. Class sessions designed for specific courses can be arranged in the library to help students learn how to find, use, and evaluate relevant books, articles, Web sites, and other information resources. Assistance is available to help design assignments that use library resources to enhance student research skills and critical thinking. Library instruction rooms (hands-on labs or traditional classrooms) can be reserved for on-site instruction in the use of library resources. For information, go to: www.libraries.psu.edu/psul/lls.html.

. Penn State holds membership in the Association of Research Libraries, the Consortium for Institutional Cooperation, and the Online Computer Library Center (OCLC). Participation in these organizations provides faculty and students with access to the collections of more than 2,500 libraries across the United States and internationally, including major research libraries. It is the largest research library in Pennsylvania and one of four resource libraries that provide service and collections to all other libraries and citizens of the Commonwealth.

The publication Guide to the University Libraries offers additional information on services and programs and is available at Libraries service desks and by calling 814-863-4240. More information is also available at www.libraries.psu.edu/psul/pram/publications.html.

. An Open House is held each fall semester.

Media and Technology Support Services (MediaTech), www.libraries.psu.edu/mtss/.

. a division of the University Libraries, has a collection of more than 24,000 films and videotapes and more than 5,000 pieces of technology and audio-visual equipment available to faculty, staff, and students. Titles in the Media Tech collection are listed in The CAT, the Libraries’ online catalog and in the MediaTech database at http://extranet.libraries.psu.edu/mtss/media/searchMedianet.html.

. Services include:

- Consultation for purchase of technology or audiovisual equipment: 814-863-0665
- Consultation for purchase of technology or audiovisual equipment: 814-863-0665
- Equipment scheduling: 814-863-5400, or 26 Willard Building: e-mail to mtsseq@psulias.psu.edu
- Media Duplication: Call 814-863-8144 or e-mail mjs149@psu.edu. Downloadable duplication order form (PDF) at www.libraries.psu.edu/mtss/services/duplication.html.

The Pennsylvania State University
Media Site Live: [link]
Preview facilities: 814-863-3202 and 814-865-5400, Wagner Annex
Program scheduling: 814-865-5400; e-mail to mtssmed@psulias.psu.edu
Repair and Installation Services: 814-863-4389
Video/Photo Production Studios: Students and faculty may reserve time and space in the studios to produce, edit, and export their video/audio projects. Green Screen is also available for use, with on-site staff available to answer questions and conduct demonstrations. Call 814-865-5400.
Video Taping Class Presentations: Schedule taping at least thirty-eight hours before the presentation by contacting MTSS Equipment at 814-865-5400 or mtsseq@psulias.psu.edu. Indicate desired format when scheduling—mini-DV tape or DVD (digital).
MediaTech Info Line: 814-863-1234 (touch-tone phones only). Includes current weather forecasts as provided by the Campus Weather Service, the University Calendar of Events, information on town and campus movies, JOBS-Penn State's employment information service, open house schedules for the Department of Astronomy, and construction barriers on or around the University Park campus.

For more information about services available from MediaTech, e-mail mtssmed@psulias.psu.edu or visit [link]
THE PENN STATE PRESS

The Penn State Press is a publisher of books and journals that contribute to the advancement of scholarship. It publishes in most areas of the humanities and social sciences, giving emphasis to art and architectural history, literature and literary criticism, philosophy, religious studies, history, political science, women's studies, sociology, Latin American studies, and East European and Russian studies. Its journals include the Chaucer Review, Journal of Nietzsche Studies, the Good Society, Philosophy and Rhetoric, Journal of General Education, Journal of Speculative Philosophy, Comparative Literature Studies, Journal of Policy History, Pennsylvania History, Book History, and Shaw: The Annual of Bernard Shaw Studies. The Press publishes eight series: Issues in Policy History (Editor: Donald T. Critchlow); Literature and Philosophy (Editor: Anthony J. Cascardi); Penn State Series in the History of the Book (Editor: James L. W. West III); Re-reading the Canon (Editor: Nancy Tuana); Studies of the Greater Philadelphia Philosophy Consortium (Editor: Michael Krausz); Rural Studies Series (Editor: Clare Hinrichs); Penn State Library of Jewish Literature (Editors: Baruch Halpern and Aminadav Dykman); American and European Philosophy Series (Editors: Charles Scott and John Stuhr); Buildings, Landscapes, and Societies; and Refiguring Modernism.
INFORMATION TECHNOLOGY SERVICES

Information Technology Services (ITS) ensures that faculty, students, and staff have the information technology tools and infrastructure necessary to carry out the University’s mission. ITS is working to achieve five broad goals: help faculty improve the way education is delivered; provide students with resources to enrich their educational experience; create and sustain an environment that enables leading-edge research; help to improve productivity; and establish the information technology infrastructure necessary to maintain Penn State’s preeminence in integrating high-quality programs in teaching, research, and outreach. For additional information, see its.psu.edu on the Web.
SPECIALIZED COMPUTING FACILITIES

Penn State also provides distributed computing and information systems. Many academic computing facilities exist to support the specialized research and instructional requirements of the colleges and the intercollege research programs. Some of these facilities are described below.

Colleges

College of Arts and Architecture

The School of Architecture and Landscape Architecture operates dedicated student computer labs and has integrated desktop computers into the studio environment. Students have access to high-performance networks via either wired or wireless connections. The school's computer labs, including the Stuckeman Center for Design Computing, are primarily used for teaching and research in such areas as computer graphics, computer-assisted drawing, design, GIS, and digital imaging, as well as exploration into computer visualization, virtual reality, and digital fabrication. A wide variety of available input and output equipment, such as large-format printers, color printers, scanners, a CNC laser cutter, site survey, and geographic computer laboratory, provides faculty and students opportunities to explore and master a variety of technologies and presentation techniques.

The Immersive Environments Lab (IEL) is a joint venture between Penn State's Information Technology Services (ITS) and the School of Architecture and Landscape Architecture (SALA). The IEL is a stereo visualization system consisting of a three-screen panorama display and a cluster of graphics workstations. Students have the capability of displaying a range of 2D and 3D presentations or they may launch 3D to a full three-screen stereo panorama for a group walk-through. Using virtual reality to visualize interior and exterior spaces allows students to follow the design process from conception to construction to completion.

The School of Music provides students and faculty in all disciplines within the school with a Macintosh-based electronic music laboratory and two computerized music rooms. These facilities afford faculty and students opportunities to create, analyze, and perform music as well as develop innovative music teaching materials.

The School of Theatre maintains lab facilities to support its technical theatre program, including set design, lighting, sound, and costume design. Interaction with common and professional applications affords students the opportunity to gain familiarity and experience with tools being used in the field. In addition, computers are regularly used in performance to control lighting and sound systems and to facilitate such complex tasks as moving scenery.

The School of Visual Arts computer facilities are customized for the advanced technological needs of students and faculty in the School of Visual Arts and the Department of Integrative Arts. Located in 302, 304, and 401 Patterson Building and maintained by Information Technology Services (ITS), the Patterson computer laboratories are specialized for design, animation, and high-end multimedia production. Within close proximity, the Graphic Design computer laboratory, 208 Visual Arts Building, is designed to meet the specific needs of students enrolled in the Graphic Design program. The Digital Design computer laboratory, 206 Patterson Building, provides students with access to a wide variety of software, including specialized design packages for visual effects, animation, and high-end multimedia production. The schools' computer labs, including the Stuckeman Center for Design Computing, are primarily used for teaching and research in such areas as computer graphics, computer-assisted drawing, design, GIS, and digital imaging, as well as exploration into computer visualization, virtual reality, and digital fabrication. A wide variety of available input and output equipment, such as large-format printers, color printers, scanners, a CNC laser cutter, site survey, and geographic computer laboratory, provides faculty and students opportunities to explore and master a variety of technologies and presentation techniques.

College of Earth and Mineral Sciences

The College of Earth and Mineral Sciences has installed a high-speed communications network that provides computer-to-computer communications within the college, as well as with external networks and computers via University facilities. Wireless access to this network is provided throughout the college. Computing facilities are distributed throughout the departments and institutes of the college, and include extensive local PC, UNIX/LINUX, and Macintosh computer laboratories accessible to undergraduate and graduate students. Many graduate students have a PC or UNIX computer supplied to their desktop. In addition to these distributed facilities, high-performance computing is available on high-end Linux clusters operated by the ITS GeARS group in concert with the college's departments and institutes.

College of Education

In the College of Education, the Education Technology Center, located in 201 Chambers Building, provides technical support services, multimedia and graphic design services, Web design and development services, and computer application training for College of Education faculty and staff. The Education Technology Center also maintains the Education Technology Demonstration Classroom and video conferencing services. The Demonstration Classroom is used by College of Education faculty for implementing technology into teaching and learning for undergraduate and graduate College of Education courses. It also provides a computer facility equipped to instruct College of Education students how to use technology in their teaching and learning experiences.

The IBM Personal Computer Lab, located in 202 Chambers Building and the Macintosh Computer Lab located in 205 Chambers provide microcomputer access to the University community. Thirty networked IBM and twenty-eight Macintosh computers are available for student and faculty use. (The labs are restricted during certain hours; check schedule outside each room.)

College of Engineering

The Pennsylvania State University
The College of Engineering at Penn State uses a network of Solaris, Linux, OS X, and Windows workstations and servers to support academic computing needs. Instruction is supported by pairs of Sun V240 and V880 servers. These servers act as application, Web, e-mail, and license servers for over 400 workstations in labs, graduate student offices, and faculty offices. Funded research efforts utilize any one of the departments nine High Performance Computing Clusters, totaling nearly 400 multi-processor compute nodes sharing IBA, DolpinNet, Myrinet, and GigE interconnection. Researchers currently share approximately 15TB of BlueArc NAS storage. Additionally, the department is constructing a cognition and perception lab with cutting edge computer vision technology. NSF CISE/Instrumentation, Infrastructure, and IGERT grants have funded much of CSE’s research equipment. Computing resources are connected via a fail-safe pair of 3Com 7700 Switching Routers. The routers provide GigE service to all backbone-connected devices, including all edge switching devices. CSE’s GigE connection to the campus backbone (including I and I2) is hosted with a resilient pair of interfaces through an HSRP enabled firewall. All of this equipment is housed in the Information Sciences and Technology building, Penn State’s new technology showcase building.

The Department of Computer Science and Engineering at Penn State uses a network of Solaris, Linux, OS X, and Windows workstations and servers to support academic computing needs. Each department maintains multiple laboratories that include various servers and workstations. These laboratories employ a number of Sun, PC, and Macintosh workstations running under the latest Solaris, LINUX or UNIX operating system. In addition to these general purpose facilities, several departments have faculty who maintain High-Performance Parallel Computing facilities with multiprocessor computing nodes for research initiatives. These facilities typically use PC-based systems running LINUX or Macintosh OS X servers running Open BSD in Beowulf clustering configurations. The University’s Information Technology Services also maintains a multidisciplinary High-Performance Parallel Computing facility for faculty and graduate student research. The College of Engineering also operates and maintains a Multimode High-Performance Computing cluster to support undergraduate and graduate education. The College system is available during non-peak usage times to support graduate research.

The Department of Kinesiology maintains several specialized computer systems dedicated to automated motion analyses, musculoskeletal modeling, medical imaging, physiological testing, and the generation of virtual reality environments for research initiatives. These facilities typically use PC-based systems running LINUX or Macintosh OS X servers running Open BSD in Beowulf clustering configurations. The University’s Information Technology Services also maintains a multidisciplinary High-Performance Parallel Computing facility for faculty and graduate student research. The College of Engineering also operates and maintains a Multimode High-Performance Computing cluster to support undergraduate and graduate education. The College system is available during non-peak usage times to support graduate research.

The Institute for Computational Science is a University-wide initiative conceived and chaired by a faculty member in the College of Engineering. The institute addresses the need for resources and computing power required for fields such as computational fluid dynamics, computational chemistry, computational meteorology, computational physics, artificial intelligence, computational materials science, business computing, etc. Annual conferences focus on collaboration among researchers in the aforementioned computational intensive programs.

Electronic and Computer Services (ECS) within the College of Engineering provides faculty and graduate students with engineering expertise and support in the areas of hardware and software system design, prototyping, and complete systems integration. ECS resources include high-performance workstations and design tools (ViewLogic, H-Spice, Cadence, LabView, AutoCAD, etc.). Also available are tools for embedded system development. Prototyping facilities consist of Xilinx and Altera systems for FPGA design. Distributed access to College, departmental, and ECS resources is through the College’s maintained high-speed secure data network. ECS maintains the College’s High-Performance computing cluster and network throughout 26 buildings; ECS also maintains and operates core College e-mail, Web and departmental servers, providing nightly backup services to these critical systems. Virtual Private Networking and secure wireless services throughout the College enables mobile computing and data access from anywhere Internet connectivity is available.

The College of Health and Human Development

The Department of Kinesiology maintains several specialized computer systems dedicated to automated motion analyses, musculoskeletal modeling, medical imaging, physiological testing, and the generation of virtual reality environments for experimental purposes.

Eberly College of Science

Within the Eberly College of Science, each department has an array of computer facilities.

- The Department of Astronomy and Astrophysics computing resources include a large and ever-expanding network of workstations and personal computers. The current census includes 50 Sun workstations, 12 Power Macs, and 70 PCs. Many of the workstations are configured for maximum processing power so that data sets from various ground- and space-based observing platforms from around the world can be intensively analyzed by faculty and graduate students. The Department has a 100-MB intranet with a fiber optic 100-MB connection to the University backbone. Ten terabytes of online disk space serves data to Department research teams.
- The Department of Biochemistry and Molecular Biology maintains a 100-Mbps Ethernet with ~500 IP addresses currently in use. Most of these serve desktop computers in individual research groups. Twelve desktop computers are maintained in one room for general or instructional use, and eight workstations are dedicated to special equipment for phosphorimaging, laser densitometry, analytical ultracentrifugation, surface plasmon resonance measurements, and X-ray crystallography. Laptops and projectors also are available for general use.
- The Department of Biology maintains two 100-MB fiber backbones that support nearly 500 PC and Macintosh machines. Most of these computers are used to run research machinery and for individual research label workstations. The department also houses thirteen servers, including a state-of-the-art firewall, two domain controllers, automated Windows patch management, automated antivirus system management, and an advanced Web application cluster. Licensed software within the department includes a wide array of Microsoft and Macintosh products.
- The Department of Chemistry provides network access for approximately 1,024 nodes comprising numerous PCs, workstations, and servers of varying operation systems, supported by 10/100/1000 MB Fast Ethernet. Chemistry also Penn State Wireless 2.0 access, VPN service and Web space for courses and research as well as computer an instrumentation repair services for Penn State-funded equipment. Several individual research groups within Chemistry boast their own PC clusters. Some of the computer-intensive research groups participate in the shared resources of the Graduate Educational and Research Services (GEaRs) and the Institute for High-Performance Computing Applications.
- The Department of Mathematics maintains a high-speed switched network of UNIX-based workstations and servers
for use by faculty, students, and staff. Most workstations are for use by individuals or small groups. A lab is maintained for use by undergraduates, graduates, faculty, and visitors. Supported operating systems are Solaris and OSX. Supported software includes Mathematica, Matlab, TeX, and LaTeX. Supported programming languages include C, C++, Java, Fortran, and Perl. Some research groups maintain their own computing equipment including a Beowulf cluster and computers used to control high-speed cameras.

- The Department of Physics maintains a high-speed switched network that provides several connections to each office and supports a wide variety of computing environments. In addition to this wired networking, the department provides wireless internet access in several areas. Many research groups have their own computing systems, which range from simple PCs to Beowulf clusters. At the departmental level, a group of UNIX and MAC servers supports mail, Web, printing, backup, etc. All department members are entitled to accounts on general access Windows XP, Linux, and Sun system with a variety of appropriate software. A computer lab, available to all department members, has workstations, printers, and scanners. The department hosts a Reconfigurable Advance Visualization Environment (RAVE) for stereoscopic visualization of simulation results.

- The Department of Statistics maintains computer systems and laboratories to provide facilities for both research and instruction. Equipment includes thirty Sun UNIX workstations, sixty PCs (operating Windows and LINUX), high-quality laser printers, color printers, a color scanner, and video-capture facilities. Faculty and students have computers in their offices. Software packages include BMDP, MINITAB, SAS, Splus, R, ArcInfo, Mathematica, FORTRAN, C, Java, TeX, and TeX. The department has two full-time system administrators to maintain a high-quality computer infrastructure.

Many colleges operate computing laboratories that provide students and faculty with microcomputing capabilities and/or batch and interactive access to the University's principal computers through Information Technology Services (ITS). Interdisciplinary—The Applied Research Laboratory (ARL) uses more than 2,000 computers in multiple networks of Microsoft Windows, LINUX, Solaris, and VAX workstations, with software supporting data acquisition and processing, process control, modeling and simulation, visualization, data fusion, interactive problem solving, and business applications. MATLAB is used extensively. A synthetic environment lab is available for 3-D visualization. High-performance computer resources include multiple Linux clusters and grids, and access to U.S. government HPC resources. Mechanical and printed circuit CAD software is used for design, and computer-aided manufacturing software is used extensively to run the shop's multi-axis CNC machines. Student access is dependant upon their relationship with ARL.

The Materials Research Institute (MRI, at www.mri.psu.edu), together with more than a dozen academic departments/units, offers students access to professionally staffed materials processing, characterization, and computer simulation facilities. MRI enables new opportunities for multidisciplinary education and research within the materials-related disciplines.

**Materials Simulation Center (MSC)**

A group of faculty and professional staff develop state-of-the-art atomic-scale materials modeling for design of high-performance alloys, evaluation of precursors for epitaxial growth, calculation of electronic and structural properties of nanoscale materials, and simulations for materials processing.

**Center for Computational Materials Design (CCMD)**

An NSF I/UCRC Center based on needs identified by CCMD members, which initially includes 13 organizations representing both large and small businesses and DOE and DOD laboratories. Faculty from Penn State and Georgia Tech will carry out short and long term research in innovative materials design. The proposed research will be at the interface of industrial relevance and scientific knowledge and will include interdisciplinary groups of materials science and engineering faculty and graduate students, as well as engineering systems design faculty, computer scientists, and applied mathematicians.

**Institute for Computational Science**

Computational science refers to the use of computers, networks, storage devices, software, and algorithms to solve problems, do simulations, build things, or create new knowledge.

The Penn State Institutes of Energy and the Environment (PSIE) at the Land and Water Research Building provide computing and network infrastructure to support the research of affiliated faculty, researchers, and graduate students. Resources include a firewalled local network as well as web servers and infrastructure for public presentation of research, applications, and data. Additionally, PSIE maintains a 25-person capacity videoconferencing facility for faculty and research use.
Academic Information and Procedures

It is each student's responsibility to know or seek out as needed the regulations and pertinent procedures of the Graduate School as set forth in the Graduate Degree Programs Bulletin and in the Thesis Guide and to meet the standards and requirements expressed by these regulations. The Graduate Bulletin is available online at www.psu.edu/bulletins/whitebook; the Thesis Guide is on the Thesis Office Web site at: forms.gradsch.psu.edu/thesis/thesisguide.pdf.

Graduate students are encouraged to contact the Office of Graduate Enrollment Services, 114 Kern Building (814-865-1795), for guidance if they have any questions, uncertainties, or difficulties concerning any procedure or regulation of the Graduate School or any procedure or regulation of the University as it may affect them.

In addition, all programs should have a graduate handbook, which provides students with information on specific program requirements and procedures from admission to degree completion (i.e., arrangement of courses in accordance with degree requirements including required courses and typical elective courses; appointment of advisors and/or committees; responsibilities of the student, advisor and committee; scheduling of exams; assistantship duties; etc.).

UNSATISFACTORY SCHOLARSHIP

A graduate student who fails to maintain satisfactory scholarship or to make acceptable progress in a degree program may be dropped from the University. One or more failing grades or a cumulative grade-point average below 3.00 for any semester or session or combination of semesters and/or sessions may be considered as evidence of failure to maintain satisfactory scholarship. Action may be initiated by the department or committee in charge of the graduate major or by the chair of the student's doctoral committee. The procedures to be followed in such action are found in Appendix III in this bulletin.

CONFIDENTIALITY OF STUDENTS’ RECORDS

The Pennsylvania State University collects and retains data and information about students for designated periods of time for the express purpose of facilitating the students’ educational development. The University recognizes the privacy rights of individuals in exerting control over what information about themselves may be disclosed and, at the same time, attempts to balance that right with the institution’s need for information relevant to the fulfillment of its educational missions.

The University further recognizes its obligation to inform the students of their rights under the Family Educational Rights and Privacy Act of 1978 (FERPA); to inform students of the existence and location of records as well as to define the purposes for which such information is obtained; to provide security for such material; to permit students access to, disclosure of, and challenge to this information as here-in described; and to discontinue such information when compelling reasons for its retention no longer exist.

Student Record Policy—No information from records, files and data directly related to a student shall be disclosed by any means (including telephone) to individuals or agencies outside the University without the written consent of the student, except pursuant to lawful subpoena or court order, or in the case of specifically designated educational and governmental officials as required by FERPA. Information contained in such records may be shared within the University by University officials with "legitimate educational interest" in such information.

A more complete description of the University’s policy on confidentiality of student records, including educational records and alumni records; disclosures to students, third parties, agencies and parents of dependent students; and challenges to entries, is contained in Policies and Rules, which is available at departmental and deans’ offices.
Programs and Advanced Degrees

PROGRAMS

Major Program--A student’s major program is the field of primary interest and the one in which the greater portion of graduate work is taken. Programs are designed to prepare students to assume positions of informed and responsible authority in their fields and to contribute creatively to them. They promote not only specialization, but also breadth of scholarship, the ability to study and think independently, and familiarity with the principal techniques and important literature in the field. The research undertaken by the candidate should deal with a problem that can yield a significant contribution to knowledge.

In general, departments of the University are identified with specific major programs. Thus, Aerospace Engineering is the program of study that is offered by the Department of Aerospace Engineering. In some cases, a single department offers work in more than one degree program. Occasionally, two or more departments within a college collaborate in offering an interdisciplinary program.

Intercollege Graduate Programs--When faculty members from departments in two or more colleges collaborate in offering a graduate major, the program is designated as an intercollege graduate degree program. A committee of graduate faculty members approved by the Graduate School is responsible for administering the program under a program chair. The University currently offers more than a dozen such programs, primarily at the doctoral level. They are included and identified in the listings at the beginning of this bulletin. Students interested in these programs should contact the program chair listed in the program description in this bulletin.

ADVANCED DEGREES OFFERED

The degrees of Doctor of Philosophy, Doctor of Education, and Doctor of Musical Arts are conferred by the University. The Ph.D. places a strong emphasis on research. The D.Ed. strongly emphasizes professional competence in a field of education. All require high attainment and productive scholarship.

The Master of Arts and the Master of Science degrees are academic in nature, the programs placing emphasis on basic knowledge and research. A number of professional master’s degrees also are conferred: Master of Accounting, Master of Agriculture, Master of Applied Statistics, Master of Architecture, Master of Biotechnology, Master of Business Administration, Master of Education, Master of Engineering, Master of Environmental Pollution Control, Master of Finance, Master of Fine Arts, Master of Forest Resources, Master of Geographic Information Systems, Master of Health Administration, Master of International Affairs, Master of Landscape Architecture, Master of Leadership Development, Master of Manufacturing Management, Master of Music, Master of Music Education, Master of Professional Studies, Master of Project Management, Master of Public Administration, and Master of Software Engineering.

Graduate degree programs are offered at five campuses of the University: University Park (State College); Penn State Erie, The Behrend College (Erie); Penn State Harrisburg (Harrisburg); the Penn State Milton S. Hershey Medical Center (Hershey); and Penn State Great Valley (Malvern). Some graduate programs also are offered online through Penn State’s World Campus at www.worldcampus.psu.edu.

CHANGE OF DEGREE OR PROGRAM

A graduate student who has been admitted for work in one major program but who wants to transfer to another should complete a “Resume Study/Change of Degree or Major” form and submit the request to the Office of Graduate Enrollment Services. The student’s credentials will be reviewed and the proposed new major department head or committee chair consulted. If the change is approved but the student is inadequately prepared for the new major, the student may be required to make up certain deficiencies.

A graduate student admitted for either an academic degree (M.A., M.S., or Ph.D.) or a professional degree (M.Acc., M.Agr., M.A.S., M.Arch., M.Biot., M.B.A., M.C.P., M.E.P.C., M.Ed., M.Eng., M.F.A., M.Fin., M.F.R., M.G.I.S., M.H.A., M.I.A.; M.L.A., M.L.D., M.M.E., M.M.M., M.Mus., M.P.A., M.P.M., M.P.S., M.S.E., D.Ed., or D.M.A.) who wants to change from one type of degree program to another must complete a “Resume Study/Change of Degree or Major” form and submit the request to the Office of Graduate Enrollment Services. Similarly, a student who has earned a master’s degree but who wants to earn a doctoral degree in a different field must complete a “Resume Study/Change of Degree or Major” form and submit the request to the Office of Graduate Enrollment Services. A student may be required to make up certain deficiencies if inadequately prepared for the new program.

CONCURRENT CANDIDACIES

In general, graduate students are best advised to focus on one degree objective at a time. However, a candidate for a master’s degree in one major field who wishes to begin work for either a master’s or a doctoral degree in a second field; or a candidate for a doctoral degree who wishes to begin work on a master’s degree in a second field while concurrently completing the doctoral program can petition to do so (approval will not be granted for any combination of concurrent double Ph.D., D.Ed., or D.M.A. degrees). The department heads of both fields and the director of Graduate Enrollment Services must approve any such plan. Guidelines for preparation of a proposal for concurrent candidacies have been established by the Graduate Council and are available in the Office of Graduate Enrollment Services, 114 Kern Building.
DUAL-TITLE DEGREE PROGRAMS

Students may apply for dual-title degrees in one of the dual-title programs approved by the Graduate Council. Students wishing to follow this course of action must already be enrolled in an existing graduate program and have a primary program in which the greater portion of the work will be conducted. The primary program will be supplemented by a secondary program in which substantial work is carried out under the supervision of a faculty adviser from the secondary program. Guidelines and information are available from the dean of the Graduate School.

Integrated Undergraduate-Graduate Study--The Schreyer Honors College offers selected baccalaureate degree candidates the opportunity to integrate undergraduate and graduate courses of study in a continuous program culminating in both a baccalaureate and a master's degree.

A University Scholar who is granted Integrated Undergraduate–Graduate (IUG) status will have dual enrollment in an undergraduate program and in the Graduate School. Some credits earned as an undergraduate may be applied to both degree programs. Guidelines and information are available from The Schreyer Honors College.

Other Integrated Undergraduate-Graduate Programs--A limited number of approved Integrated Undergraduate–Graduate programs other than those in The Schreyer Honors College are also offered. These programs allow students to work on an undergraduate and a graduate degree at the same time and are intended for exceptional students who can perform their academic studies at an accelerated pace and take on the challenges of graduate courses and research while still enrolled as undergraduates. Typically, a certain number of credits may be applied to both degrees, and the total time for completing both degrees is less than if the degrees were earned separately. These programs include those within a single department, such as the B.L.A./M.L.A. in Landscape Architecture, the B.Arch.-M.S.Arch. program, the B.A./M.A. in Comparative Literature, and B.A.E./M.A.E. in Architectural Engineering; and also those that are interdepartmental or intercollegiate programs, and the integrated five-year science/business B.S./M.B.A. program. Guidelines and information are available from the dean of the Graduate School.

Updated: 7/11/11
Registration

A graduate student who is in residence at the University is expected to be properly registered. In residence means that the student (whether full- or part-time, whether commuting to campus or other instructional site or living nearby or on campus) is pursuing graduate credits and/or an advanced degree by (a) attending classes or seminars for credit or audit; (b) doing a thesis, term project, independent study, or similar research or scholarly work in a University laboratory or other research facility; (c) consulting in person or by other means of communication with one or more faculty members on scholarly matters, research projects, or dissertation; (d) using the library, Computation Center, or other University information resources; or (e) using other University facilities provided for graduate study.

The responsibility for being properly registered rests first with the student and secondarily with the student’s adviser if the student has one (nondegree students may not). A student may register for course work or research or a combination of the two. In the case of research the number of credits shall be determined by the amount of time devoted to the investigation, with 1 credit representing approximately the equivalent of one week of full-time work. In the later stages of the program, the situation will determine the requirements for the student’s registration. (See Registration Near the Completion of a Program.)

International Students--Because international students on an F1 or J1 visa are required by the Department of Homeland Security regulation to be in residence, all international students need to be registered for full-time status (fall and spring semester), unless an exception to full-time enrollment has been approved by the University Office of Global Programs Directorate of International Student Advising (DISA). Students who fail to register may jeopardize their status.

Advisers--Advising is an important factor in enhancing the quality of a student's program. To assist the student in planning a coherent program and meeting all degree requirements, the head of the major department or program chair will designate a member of the faculty to serve as adviser. It is the student's responsibility to secure an adviser from the department or program and to seek a conference before each registration.

Time of Registration--Registration days are indicated in the calendar at the beginning of this bulletin. A student is expected to complete registration during the officially designated period and to attend the first meeting of all classes. If this is impossible because of some emergency or unusual circumstance, the student may be granted permission by the instructor to miss a few class meetings, if being understood that work missed will be made up subsequently. Under these conditions permission may be granted through the Office of Graduate Enrollment Services for the student to register late. In general, a student who receives permission to register late will be required to reduce the course load in proportion to the length of absence.

A student who fails to complete the process of registration within the officially designated registration period will be liable for the late registration charge, regardless of when the student begins attending classes.

Continuity of Registration--A student who is a degree candidate at any of the five graduate campuses of the University and who registers there without interruption for each fall and spring semester is considered to have maintained a normal continuity of registration. A student who has been admitted as a “summers only” D.Ed. candidate (see D.Ed. Residence Requirements) can maintain continuity by registering each summer for a six-week summer session.

Anyone who has interrupted such a normal sequence and now plans to return and register for course work is required to submit a request to the appropriate campus graduate admissions office using the form found at the corresponding links below:

- Penn State Great Valley School of Professional Studies
- Penn State Harrisburg
- All other campuses

The policy may be summarized for any specific semester or session as follows:

- **Summer Session**--Resume Study/Change of Degree or Major form required unless the student was registered for the preceding spring semester or the preceding summer session (if “summers only” student).
- **Fall Semester**--Resume Study/Change of Degree or Major form required unless the student was registered for the preceding summer session or the preceding spring semester.
- **Spring Semester--Resume Study/Change of Degree or Major form required unless the student was registered for the preceding fall semester.

Withdrawal--The dropping of all academic work for which a student is registered in any semester constitutes withdrawal from the University, and changes the student’s status to nondegree. A “Resume Study/Change of Degree or Major” form must then be submitted and approved if the student wants to enroll for further work toward a degree.

Procedure--For each registration, it is expected that the student, in consultation with the adviser, will prepare a schedule of courses and research designed to fit individual needs and meeting the pertinent credit limits. The registration process is completed in the manner specified for all students at the University.

Under certain conditions credit may be earned for work done away from the campus. A student contemplating such work should first consult with his or her adviser and then inquire at the Office of Graduate Enrollment Services about the procedures and conditions. The student must assume responsibility for the registration process, by accessing the Registrar’s Web site at www.registrar.psu.edu.

Registration must be completed before the close of central registration at University Park campus.

The Pennsylvania State University
A student must register for courses audited as well as those taken for credit.

**REGISTRATION NEAR THE COMPLETION OF A PROGRAM**

A candidate for the Ph.D. degree is required to register continuously for each semester from the time the comprehensive examination is passed and the two-semester residence requirement is met until the thesis is accepted by the doctoral committee, regardless of whether work is being done on the thesis during this interval. (See Registration and Continuous Registration.)

Although there is no general continuous registration requirement for D.Ed. degree candidates and master’s students, individual programs may require it. It should be noted, moreover, that (a) proper registration (see Registration) is expected of all graduate students; (b) graduate assistants must carry the prescribed credit loads (see Credit Loads and Academic Status); and (c) because of visa considerations, international students typically will register every semester, no matter what their degree objectives.

A master’s candidate is not required to register for the final semester in order to graduate or in order to make minor revisions to the thesis and/or to take a final examination for the degree, unless required to do so by the program.

4/16/12
Graduate Credits

Typically, a candidate for an advanced degree is required to earn a certain minimum number of credits at Penn State. Consequently, there is a limit to the number of credits that may be earned at another approved institution to meet the minimum requirements of the degree. Moreover, the department or committee in charge of a major program may require a student to do more of the work at the University than specified by the limitations set by the Graduate Faculty.

Full-time participation in graduate study involves a wide range of activities. The nature of these activities varies because of the diversity of programs throughout the University. The graduate student is responsible for ascertaining, through the adviser and/or program office, the range of total activity of his or her individual program that constitutes normal progress toward the degree.

A self-supported or fellowship student who is registered for at least 9 credits is considered to be engaged in full-time academic work for that semester. If such a student wishes to register for more than 15 credits, an exception to the normal maximum load must be granted through petition (with adviser's approval) to the Office of Graduate Enrollment Services.

Credit limits and full-time status for assistants and University employees are described under Assistantships and Credit Loads and Academic Status.

Graduate courses carry numbers from 500 to 599 and 800 to 899.

--A 500-level graduate course builds on advanced undergraduate and/or graduate courses, dealing with the frontiers of knowledge in the field. It is grounded in theories, hypotheses, and methodologies as expounded in current and/or primary literature sources. Synthesis of knowledge and independent analytical work by the student must be demonstrated. Significant interaction among students and with the instructor(s) is expected.

--An 800-level graduate course pertains to the most recently established knowledge and methodologies in a field of study, as applied to practice. It emphasizes analytical thinking and application of knowledge by the student in the context of providing pragmatic solutions for professionals. Significant interaction among students and with the instructor(s) is expected.

Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. Language courses used to meet foreign language requirements are exceptions, as are the ESL courses for international students.

No student is permitted to count audited credits toward the minimum credit load for full-time or part-time status.

Course-Numbering System--Courses in the series 1–399 are not listed in this bulletin because they are strictly undergraduate courses and yield no graduate credit. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Courses in the series 400–499 are for upperclass students with at least a junior standing and for graduate students. Only a limited number of credits earned in these courses may be counted toward the requirements for an advanced degree. Detailed regulations concerning the restrictions are given under the specific requirements for the various master's degrees.

Courses in the series 500–599 and 800-899 are restricted to students registered in the Graduate School, senior undergraduate students with an average of at least 3.50, and certain other students with averages of at least 3.00 who have been granted special permission to enroll through the Office of Graduate Enrollment Services. (See the introduction to Graduate Programs, Faculty, and Courses for a more detailed description of these courses.)

The numbers 600 (on campus) and 610 (off campus) are available for credit in thesis research in all graduate major programs. The numbers 601 and 611 do not denote conventional courses but are used for noncredit special registration for thesis preparation by a Ph.D. candidate. (Note that 596 course numbers may not be used for thesis research work.) Registration under these numbers will maintain status as a full-time (601) or part-time (611) student during the interval that begins at the time the student passes the comprehensive examination and meets the two-semester residence requirement and ends at the time the doctoral committee accepts the thesis. The student may register for 601 if engaged full-time in the preparation of a thesis or for 611 if engaged only part-time in thesis preparation. Candidates for the Ph.D. degree do not receive grades for noncredit registrations (601 and 611). [See also Ph.D.—Additional Specific Requirements and the common course descriptions in the introduction to Graduate Programs, Faculty, and Courses.]

Schedule of Courses--The most current information on courses that will be offered in any specific semester is at http://soc.our.psu.edu/soc.

- It gives the number of the class, the hours at which the class will meet, the location of the class, and in some cases the instructor's name.

Visiting and Auditing Classes--A graduate student registered for a given semester who wants to attend classes without receiving credit may secure permission either to visit or to audit courses during that semester.

As a visitor, a student may attend classes with the approval of the instructor but may not claim the usual privileges of class membership, such as participating in discussion, doing practicum work, or taking examinations. Registration is not required for the privilege of visiting, and no record appears on the student's transcript.

As an auditor, a student may participate in class discussion, do practicum work, take examinations, and generally enjoy the privileges of a class member. Registration procedures and fee payment are the same as for taking the course for credit. Attendance is required. No credit is given, either on completion of the course or at a later time; however, the number of credits assigned to the course appears on the grade report and on the student's transcript. Thus, when a
student receives an audit grade, the number of credits audited is shown. The symbol AU shall be used if attendance has been regular, the symbol W if attendance has been unsatisfactory.

A graduate assistant or Fellow who is required to register for a certain minimum number of credits is not permitted to count audited course credits toward the minimum credits needed. Undergraduate courses taken to meet foreign language or English requirements do count in the total credit load. The student may register for credit or audit beyond the required minimum but may not exceed the normal maximum without special permission.
Credit Loads and Academic Status

Graduate Assistants--Graduate assistants must be enrolled at Penn State as graduate students. More specifically, since assistantships are provided as aids to completion of advanced degrees, assistants must be degree-seeking and enrolled in residence for credit loads each semester that fall within the limits indicated in the table below. Maximum limits on permissible credit loads are indicated in order to assure that the student can give appropriate attention both to academic progress and assistantship responsibilities. These considerations give rise to the table of permissible credit loads below.

<table>
<thead>
<tr>
<th>Level of Assistantship</th>
<th>Credits Per Semester Minimum</th>
<th>Credits Per Semester Maximum</th>
<th>Credits per 6-Week Summer Session Minimum</th>
<th>Credits per 6-Week Summer Session Maximum</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quarter-time</td>
<td>9</td>
<td>14</td>
<td>5</td>
<td>7</td>
</tr>
<tr>
<td>Half-time</td>
<td>9</td>
<td>12</td>
<td>4</td>
<td>6</td>
</tr>
<tr>
<td>Three-quarter-time</td>
<td>6</td>
<td>8</td>
<td>3</td>
<td>4</td>
</tr>
</tbody>
</table>

*Credits taken during the Maymester and over both six-week summer sessions must total a minimum of 9 (for 1/4- and 1/2-time assistantships) or 6 (for 3/4-time assistantships) and cannot exceed a maximum of 8 (for 3/4-time assistantships), 12 (for 1/2-time assistantships), or 14 (for 1/4-time assistantships).

To provide for some flexibility, moderate exceptions to the specified limits may be made in particular cases. The credit limits specified above may only be increased or decreased in exceptional cases for a specific semester or summer session by permission of the assistantship supervisor, the student's academic adviser, and the dean of the Graduate School (requests should be submitted for the dean's approval via the Office of Graduate Enrollment Services). The Graduate School expects that an exception made in one semester or summer session will be compensated for by a suitably modified credit load in the subsequent semester or summer session, so that, on the average, normal progress is maintained at a rate falling within the limits above. Failure to do so may jeopardize the student's academic status. Maintenance of the established credit loads and responsibility for consequences of a graduate student's change of course load rest with the student and adviser. The course load is a factor in determining whether a graduate student is classified as a full-time or part-time student; has met residence requirements; and is eligible to hold a fellowship, traineeship, assistantship, or departmental or program appointment.

Full-Time Academic Status--Students holding fellowships, traineeships, or other awards based on academic excellence are required to carry 9 or more credits each semester (fall and spring). For awards that require full-time summer registration, students should register for a minimum cumulative total of 9 credits (over all summer sessions), or SUBJ 601 (in the case of post-comprehensive doctoral candidates). A graduate assistant whose semester or summer session credit load meets or exceeds the minima in the above credit table and whose assistantship duties are directly related to his or her degree objectives is considered by the Graduate School to be engaged in full-time academic work for that semester or summer. A post-comprehensive doctoral candidate who is registered for SUBJ 601 also is so considered.

Part-Time Academic Status--A student who in any semester or summer session is registered for study but who does not meet the criteria for full-time status is considered to be engaged in part-time academic work for that semester. This includes students registered for SUBJ 611.

Credit Loads for Internationals--The Department of Homeland Security requires that international students proceed in a timely fashion toward completion of their degrees, as established by the academic department and (usually) stated on their initial immigration document. Failure to maintain normal progress toward completion of the degree during this period will jeopardize the student's ability to continue academic study, adjust status, or seek future employment in the United States. Because of this, students should not be enrolled less than full-time during fall or spring semester without prior approval of the University Office of Global Programs Directorate of International Student Advising (DISA).

The U.S. Department of Homeland Security requires the DISA to report violations of status, including failure to maintain full-time enrollment. The following is intended to provide guidance for international graduate students and for DISA in determining full-time status:

- A graduate student is considered full-time if registered for a minimum of 9 credits, excluding courses taken for audit, or if a Ph.D. candidate who has successfully completed the comprehensive examination and is registered for SUBJ 601.
- On rare occasions, and under exceptional circumstances, international students in master's degree programs who have completed all required course work and, if applicable, research for their degree, may be granted an exception to the need to maintain full-time status as defined above, for a limited period (in no case to exceed two semesters), by special petition to DISA in advance of the semester in which the exception is needed. This request must be initiated by the student using the DISA eForm system. The academic adviser will be asked through this eForm system to justify the reduced course load.
- Under all circumstances, international students must be enrolled--either full-time or approved by DISA for a reduced course load. (See Academic Information and Procedures/Registration/International Students.)

Employment--Many students depend upon part-time employment to help meet their expenses. A student who is thus employed, whether on or off campus, must recognize the time demands of a work schedule in planning an academic program. A student holding a fellowship or scholarship may not accept employment of any kind for service beyond that.
specifically permitted by the appointment. A graduate assistant may assist in classroom or laboratory instruction, in research or in other work. The tasks assigned to a graduate assistant often are identical in nature to those required for the advanced degree sought. Additional compensation is paid to a graduate assistant by the University for additional hours of work only with special, advance approval of the administrative head of the academic unit in which the assistantship is held, and of the chair of the student’s graduate academic program, and provided that such compensation is not for additional hours of work on the assigned assistantship duties. A graduate assistant may not hold a concurrent appointment with the University other than a Fellowship Supplement.

For international students, guidelines for assistantships or employment are the same as for domestic students, with the following distinctions: (a) I-9 and W-4 forms must be processed through DISA; (b) vacation period employment may be up to forty hours per week; and (c) since Department of Homeland Security regulations on employment are subject to change, all employment off campus for international students must be cleared through DISA.

**Full-Time Employment Off Campus**—A candidate for the Ph.D. degree at a particular campus of the University may not count the work of any semester toward the residence requirement for this degree while engaged in full-time employment off campus or at a different campus of the University.

**Staff Employee Credit Status**—A full-time staff employee of the University may schedule up to 16 credits per academic year, either for credit or audit.

Full-time University employees may meet Ph.D. degree residence requirements by registering for 6 credits per semester or 4 credits per eight-week summer session and by obtaining certification from the department head as being principally engaged in activities directly relating to their degree objectives. A post-comprehensive full-time University employee may not register for SUBJ 601 (i.e., full-time thesis preparation), but may register for SUBJ 611 (part-time thesis preparation).

No academic employee above the rank of instructor or research assistant or equivalent may receive from the University a master’s degree or doctoral degree in any graduate program where the faculty member has membership, teaches courses, serves on master’s or doctoral committees, or has other supervisory responsibilities that might give rise to conflicts of interest. The faculty member should inform his/her department head of his/her intention to pursue an advanced degree. University staff employees who want to take graduate degree work must first be admitted to the Graduate School.

Updated: 4/15/12
Grading System

A grade is given solely on the basis of the instructor's judgment as to the student's scholarly attainment. The following grading system applies to graduate students: A (EXCELLENT) indicates exceptional achievement; B (GOOD) indicates substantial achievement; C (SATISFACTORY) indicates acceptable but substandard achievement; D (POOR) indicates inadequate achievement and is a failing grade for a graduate student—a required course in which a D has been obtained cannot be used to meet degree requirements and will not count toward total credits earned; and F (FAILURE) indicates work unworthy of any credit, and suggests that the student may not be capable of succeeding in graduate study. The grade-point equivalents for the above marks are: A, 4.00; B, 3.00; C, 2.00; D, 1.00; F, 0. A minimum grade-point average of 3.00 for work done at the University is required for all graduate degrees. In Fall 1995 a +/- grading system went into effect that includes A-, B+, B-, and C+. The grade-point equivalents are A-, 3.67; B+, 3.33; B-, 2.67; and C+, 2.33.

In addition to the quality grades listed above, three additional grade designations, DF (deferred), NG (no grade), and R, may appear on a student's transcript. If work is incomplete at the end of a semester because of extenuating circumstances, the instructor may report DF in place of a grade, which will appear temporarily on the student's record. It is not appropriate to use the DF either casually or routinely to extend a course beyond the end of the semester or to extend a course for a student who has failed so that the individual can do extra work to improve the grade. Required work should be completed and the DF resolved as soon as possible once assigned, but must be resolved (i.e., the course must be completed) no later than twenty-five weeks after the course end date as noted on the Registrar's Schedule of Courses. A deferred grade that is not resolved before the end of this period automatically converts to an F, unless an extension to a specified date is agreed upon by the instructor and student that allows for a completion deadline longer than 25 weeks. A memo with a justifying statement and the agreed-upon date must be submitted by the instructor to the Office of Graduate Enrollment Services in order to request an extension.

If an instructor does not submit a grade (including a quality grade, DF, or R) for a graduate student by the grade-reporting deadline, the designation NG (no grade) appears on the transcript. An NG that is not reconciled within twenty-five weeks following the posting of the NG automatically becomes an F.

It is to be emphasized that no deferred (DF), missing(*), or no grades (NG) may remain on the record at those times when a student reaches an academic benchmark. Benchmarks include completion of a degree program (e.g., master's completed for a student continuing through for a doctoral degree) and the doctoral candidacy, comprehensive, and final oral examinations. Graduate programs may add additional benchmarks.

It is further noted that there are only three circumstances under which a course grade, once assigned, can be changed: (1) if there was a calculational or recording error on the instructor's part in the original grade assignment (Senate Policy 48-30); (2) if it is a course for which an R grade has been approved and in which an initial R can be assigned and changed later to a quality grade; (3) if, as discussed above, a DF was assigned and the deadline for course completion has not yet passed.

Grade changes are governed by Senate Policy 48-30, found in Policies and Rules.

In the case of thesis work, either in progress or completed, and in certain courses (e.g., 590, 594, 595, 596, 597, 598, 599, 894, 895, 896, 897, 899, and a few others) approved by the Graduate Council, the instructor may report the symbol R in place of a grade. An R does not influence the grade-point average. It indicates that the student has devoted adequate effort to the work scheduled but gives no indication of its quality. The symbol may be used, for instance, in courses that are officially designed to extend over more than one semester or in courses for which a quality grade is not appropriate. An R in an approved graduate course need not be changed later to a quality grade. Graduate courses approved for R grading may be credited toward fulfilling graduation requirements. However, if the instructor deems it appropriate, the R grade may be changed to a quality grade when the course work has been completed. Normally, if a quality grade is to be assigned, the grade must be reported no later than the end of the following semester.

When reported for thesis work, an R will not influence the grade-point average and remains on the student's transcript if not converted to a quality grade within one semester of its recording. The Graduate Council has established upper limits of 6 credits of quality grades for master's thesis research and 12 credits for doctoral dissertation research. The remaining credits must be assigned Rs except in the case of academic or disciplinary sanctions, in which case an F or XF grade may be assigned, as appropriate, up to the total number of thesis research credits (600 or 610) on record. (See Senate Policy 49-20 and Procedures G-9, as well as Appendix II of this bulletin).

Pass-Fail (P/F) grading is used exclusively in certain graduate courses where it has been requested by the program and approved by the graduate dean following guidelines established by the Graduate Council. A grade of P does not influence the GPA, but an F does.

Revised by Graduate Council, April 2011
4/25/12
Thesis

**Thesis Research**—To register for thesis research in all graduate major programs, a student uses the appropriate number (600 for on campus, 610 for off campus) preceded by the abbreviation designating the major field. The Bursar’s office assesses charges for these courses at the current rate of tuition according to the student’s status at the time of registration.

Students registering for 600 or 610 should be aware that the Graduate Council has established limits on the total number of research credits that can be assigned letter grades in a student’s program (i.e., other than R): 6 credits for master’s candidates and 12 credits for doctoral candidates.

**Thesis Preparation**—The numbers 601 and 611 are available to Ph.D. degree candidates only and are used for special noncredit registration for thesis preparation work. Such candidates must have passed the comprehensive examination and must have met the two-semester residence requirement. A candidate registered for SUBJ 601 is classified as a full-time student, while one registered for SUBJ 611 is classified as a part-time student.

The numbers 600, 601, 610, and 611 may not always appear in the Schedule of Courses for each semester, but they are available for registration each semester.

**Thesis Deposit**—When a student completes a thesis or a dissertation, an archival copy must be submitted to the Graduate School (see Thesis Acceptance). After acceptance by the Graduate School, the document is available through the University Libraries.
Graduation

Students who plan to graduate at the end of the current semester/session are responsible for indicating an intent to graduate. A student must initiate an intent to graduate via eLion during the designated period for that semester. Any changes to a student’s graduation status after this time period must be made by contacting Graduate Enrollment Services at 814-865-1795.

Students who have been removed from the graduation list will need to initiate their intent to graduate again for the semester in which they plan to graduate.

A preliminary graduation list is prepared and reviewed by Graduate Enrollment Services soon after the deadline for each semester or summer session. Accepted theses, master’s papers, and project reports are noted as may be relevant. The records of candidates who appear to have met requirements are forwarded to major and minor department heads or program chairs for review and recommendation. The final list of approved candidates appears in the fall, spring, or summer commencement program.

Only those transfer credits that have been accepted by the Graduate School and entered upon the student’s transcript before the graduation deadline will be considered in evaluating a student for graduation at the end of that particular semester or summer session.

The University holds commencement exercises for graduate students three times a year: at the end of the fall and spring semesters and at the end of the summer session. Attendance at commencement exercises is expected. Diplomas are mailed to all students unable to participate in the commencement exercises. Information is available at the Office of the University Registrar, 112 Shields Building, or by accessing the Registrar’s Web site at www.registrar.psu.edu.

Even though the student’s name may appear in the commencement program, no degrees are conferred until final grade reports have been received and all requirements fulfilled. A student’s transcript or diploma, or both, may be withheld until any outstanding financial obligations to the University have been paid.
DOCTORAL DEGREES

The Doctor of Philosophy, an academic degree; the Doctor of Education and Doctor of Musical Arts, both professional degrees, are conferred by the University. Recognized as different in purpose, the three programs consequently have different requirements in certain respects.

ADMISSION

A student who has been admitted to the Graduate School and has been accepted by the department or committee in charge of a major program in which the doctorate is offered may begin working toward a doctoral degree. However, the student has no official status as a doctoral student and no assurance of acceptance as a doctoral candidate until the candidacy examination has been passed. This examination is administered by the major department or graduate program and is given early in the student's program.

It is the policy of the Graduate School not to encourage applicants to work for a second doctoral degree. (See Policy on Second Doctorates). However, the President, on recommendation of the dean of the Graduate School, will welcome, as guests, holders of earned doctoral degrees who may be visiting the University Park campus for purposes of noncredit study. Guest privileges apply to persons holding the degree from Penn State or other accredited colleges and universities. Guests may attend seminars and courses and, if space and facilities are available, carry on research. There will be no charge except for laboratory expenses. Arrangements should be made in advance with the dean of the Graduate School.

GENERAL REQUIREMENTS

No specified number of courses completed or credits earned will assure attainment of the doctorate. The general requirements are based upon a period of residence, the writing of a satisfactory dissertation acceptance by the doctoral committee and the Graduate School, and the passing of a comprehensive and a final oral examination. A doctoral program consists of such a combination of course seminars and individual study and research as meets the minimum requirements of the Graduate School and is approved by the doctoral committee for each individual student.

A master's degree is not a prerequisite for the doctorate in some major programs. However, the first year of graduate study leading to the Ph.D. may be substantially the same as that provided for the M.A. or M.S. degree. Similarly, the first year of the D.Ed. program may be essentially the same as that provided for the M.Ed. degree.

GRADE-POINT AVERAGE

A minimum grade-point average of 3.00 for work done at the University is required for doctoral candidacy, for admission to the comprehensive examination, the final oral examination, and for graduation.

TIME LIMITATION

A doctoral student is required to complete the program, including acceptance of the doctoral thesis, within eight years from the date of successful completion of the candidacy examination. Individual programs may set shorter time limits. Extensions may be granted by the Director of Graduate Enrollment Services in appropriate circumstances.

OFF-CAMPUS AND TRANSFER CREDIT

A maximum of 30 credits beyond the baccalaureate at a regionally accredited school not granting the doctorate in the student’s major program may be accepted by the Graduate School in partial fulfillment of the requirement for a D.Ed. degree at Penn State. A maximum of two full academic years of work (60 credits) beyond the baccalaureate at a regionally accredited graduate school that grants the doctorate in the candidate's major program may be accepted here to apply toward D.Ed. degree requirements. A completed master's degree may be transferred to a D.Ed. program with no intervening time limitation. Because there is no total-credit requirement for the Ph.D. degree program, advanced standing is not awarded for a master's degree. Advanced standing is awarded for only one master's degree.

Subject to the approval of the adviser and the head of the major department or program chair, a student may register for research to be done away from the University Park campus.

Academic work to be so transferred must meet the following criteria:

1. It must have been completed within five years prior to the date of first degree registration at the Graduate School of Penn State (see below);
2. It must appear on an official graduate transcript of an accredited or recognized degree-granting institution;
3. It must be equivalent to "B" quality or higher (grades of B- are not transferrable) on Penn State's grading system;
4. It must be deemed applicable to the student's program by the current academic adviser, approved in writing, and submitted to the Graduate School for approval and action.

Credits earned toward a previously completed postbaccalaureate professional degree program (law, medicine, etc.) are not transferrable. However, up to 10 credits can be transferred from a professional degree program if the degree has not been conferred. All transfer credit must be substantiated by the former institution as having at least B quality whatever grading system is in place (e.g., this includes P/F grading).
ADVISERS AND DOCTORAL COMMITTEES

Following admittance to a degree program, the student should confer with the head of that major department or program concerning procedures and the appointment of an academic adviser. Consultation or arrangement of the details of the student's semester-by-semester schedule is the function of the academic adviser. This person may be a member of the doctoral committee or someone else designated by the head of the major program for this specific duty. The academic adviser may be different from the dissertation adviser.

Doctoral Committee—General guidance of a doctoral candidate is the responsibility of a doctoral committee consisting of four or more active members of the Graduate Faculty, which includes at least two faculty members in the major field. The dissertation adviser must be a member of the doctoral committee. The dissertation adviser usually serves as chair, but this is not required. If the candidate is also pursuing a dual-title field of study, a co-chair representing the dual-title field must be appointed. In most cases, the same individual (e.g., dissertation adviser) is a member of the Graduate Faculty in both the major and dual-title fields, and in such cases may serve as sole chair. At least one regular member of the doctoral committee must represent a field outside the candidate's major field of study in order to provide a broader range of disciplinary perspectives and expertise. This committee member is referred to as the "Outside Field Member." In cases where the candidate is also pursuing a dual-title field of study, the dual-title representative to the committee may serve as the Outside Field Member. If the candidate has a minor, that field must be represented on the committee by a "Minor Field Member." (See also Major Program and Minor Field under D.Ed.—Additional Specific Requirements in this bulletin.) This committee is appointed by the graduate dean through the Office of Graduate Enrollment Services, upon recommendation of the head of the major program, soon after the student is admitted to candidacy. The dean may on occasion appoint one or more members of the committee in addition to those recommended by the program chair. A person not affiliated with Penn State who has particular expertise in the candidate's research area may be added as a "Special Member," upon recommendation by the head of the program and approval of the graduate dean (via the Office of Graduate Enrollment Services). A Special Member is expected to participate fully in the functions of the doctoral committee. If the Special Member is asked only to read and approve the doctoral dissertation, that person is designated a special signatory. Occasionally, special signatories may be drawn from within the Penn State faculty in particular situations.

The membership of doctoral committees should be periodically reviewed by the program chair to ensure that its members continue to qualify for service on the committee in their designated roles. For example, if appointments, employment at the University, etc., have changed since initial appointment to the committee, changes to the committee membership may be necessary. If changes are warranted, they should be made as soon as possible to prevent future problems that may delay academic progress for the student (e.g., ability to conduct the comprehensive or final examinations).

Chair—The chair or at least one co-chair must be a member of the graduate faculty of the specific doctoral program in which the candidate is enrolled. A retired or emeritus faculty member may chair a doctoral committee if he/she began chairing the committee prior to retirement and has the continuing approval of the department head or program chair. The primary duties of the chair are: (1) to maintain the academic standards of the doctoral program and the Graduate School and assure that all procedures are carried out fairly, (2) to ensure that the comprehensive and final examinations are conducted in a timely fashion, (3) to arrange and conduct all meetings, and (4) to ensure that requirements set forth by the committee are implemented in the final version of the thesis.

Responsibilities of Doctoral Committees—The doctoral committee is responsible for approving the broad outline of the student's program and should review the program as soon as possible after the student's admission to candidacy. Moreover, continuing communication among the student, the committee chair, the research supervisor, and the members of the committee is strongly recommended, to preclude misunderstandings and to develop a collegial relation between the candidate and the committee.

Doctoral Examination—The (entire) committee will prepare and administer the examination, and evaluate the candidate's performance on the examination. If a committee member is unable to attend the final oral defense, the member may sign as a special signatory. A revised committee appointment form will need to be sent to the Office of Graduate Enrollment Services, 114 Kern Building, removing the faculty member as a regular committee member and if it is desired to designate that individual as a special signatory, a revised committee form, requesting that the faculty member be moved to a special signatory. If there are then not enough members serving on the committee (i.e., four or more active members of the Graduate Faculty) another Penn State faculty member will need to replace that member to constitute a legitimate doctoral committee. (Substitutes are not permitted.) These changes and approvals shall occur before the actual examination takes place. The department or program head will notify the Office of Graduate Enrollment Services, providing two weeks' notice, when the candidate is ready to schedule the comprehensive and the final oral examinations and will report the results of these examinations to that office.

The dissertation adviser, as well as the chair of the doctoral committee (if not the same individual as the dissertation adviser), along with additional members of the committee to total a minimum of three (3), must be physically present at the final oral examination. The graduate student must also be physically present at the exam. (Thus for a five-person committee, two could participate via distance.) No more than one member may participate via telephone; a second member could participate via interactive videoconferencing. The examination request and a request for exceptions must be submitted to the director of Graduate Enrollment Services for approval at least two weeks prior to the date of the exam. Special arrangements, i.e., requirements for meeting participation via distance, must be communicated to the student and the doctoral committee members well in advance of the examination.

A favorable vote of at least two-thirds of the members of the committee is required for passing a comprehensive or a final oral examination. If a candidate fails an examination, it is the responsibility of the doctoral committee to determine whether another examination may be taken.

The committee examines the dissertation, administers the final oral examination, and signs the approval page of the dissertation. At least two-thirds of the committee must approve the dissertation.

The Pennsylvania State University
ENGLISH COMPETENCE

A candidate for the degree of Doctor of Philosophy is required to demonstrate high-level competence in the use of the English language, including reading, writing, and speaking, as part of the language and communication requirements for the Ph.D. Programs are expected to establish mechanisms for assessing and improving competence of both domestic and international students. Assessments should include pieces of original writing. Programs and advisers should identify any deficiencies before or at the candidacy examination and direct students into appropriate remedial activities. Competence must be formally attested by the program before the doctoral comprehensive examination is scheduled. (International students should note that passage of the minimal TOEFL or IELTS requirement does not demonstrate the level of competence expected of a Ph.D. from Penn State.)

COMMUNICATION AND FOREIGN LANGUAGE COMPETENCE

In addition to demonstrating competence in English as described above, each candidate for the Ph.D. must meet communication and foreign language requirements that have been established within the major program. The candidate should ascertain specific language requirements by contacting the professor in charge of the program, whose name appears with the program description under Graduate Programs, Faculty, and Courses.

Candidates for the Doctor of Education degree may be required to demonstrate competence in foreign languages.

CANDIDACY EXAMINATION

Every student who wishes to pursue a doctorate must take a candidacy examination administered by the Graduate Faculty in the graduate major program. The purpose of the candidacy examination should be to assess whether the student is capable of conducting doctoral research based on evidence of critical thinking or other measures that the Graduate Faculty of the program view as important to a successful doctoral student. It should be taken early in the student’s program. The nature of the examination varies with the program and may be the master’s examination if so prescribed by the program and understood by the student. The decision to admit or not to admit a student to candidacy must be made by the graduate faculty or a designated committee of graduate faculty in the program. The student must be registered as a full-time or part-time degree student for the semester (excluding summer session) in which the candidacy examination is taken, and the student’s academic record must be in good standing. If the student is seeking dual candidacy in an approved dual-title program, the dual-title field must be integrated into the student’s candidacy examination. The results of all candidacy examinations, pass or fail, must be reported to Graduate Enrollment Services via the Candidacy Reporting Form.

For the Ph.D. student, the examination may be given after at least 18 credits have been earned in graduate courses beyond the baccalaureate. The examination must be taken within three semesters (summer sessions do not count) of entry into the doctoral program.

For the D.Ed. student, the examination should be given when the student has earned a total of at least 30 credits toward the graduate degree, including the master’s program and graduate work done elsewhere. A student transferring from another graduate school with 30 or more credits earned toward a graduate degree must take the candidacy examination prior to earning more than 25 credits toward the graduate degree at Penn State.

For the D.M.A. student, the examination should be given when the student has completed two semesters in residence.

COMPREHENSIVE EXAMINATION

When a candidate for the Ph.D., D.Ed., or D.M.A. degree has substantially completed all course work, a comprehensive examination is given. The examination is intended to evaluate the candidate’s mastery of the major, and if appropriate, the minor field. Official requests to add a minor to a doctoral candidate’s academic record must be submitted to Graduate Enrollment Services prior to establishing the doctoral committee and prior to scheduling the comprehensive examination. For more information regarding minors, please see the following web pages.

--- For Ph.D. candidates:  
http://bulletins.psu.edu/bulletins/whitebook/degree_requirements.cfm?section=degreeReq2

--- For D.Ed. candidates:  
http://bulletins.psu.edu/bulletins/whitebook/degree_requirements.cfm?section=degreeReq3

--- For general information regarding minors:  
http://bulletins.psu.edu/bulletins/whitebook/minors.cfm

(Note: Some programs require students to pass various “area” examinations, “cumulative” examinations, and the like, or require presentation of a thesis proposal, prior to the comprehensive. These are matters of departmental or program policy, distinct from the general policies of Graduate Council described here.)

A candidate for the Ph.D. must have satisfied the English competence and the communication and foreign language requirement before taking the comprehensive examination.

All candidates are required to have a minimum grade-point average of 3.00 for work done at the University at the time the comprehensive examination is given, and may not have deferred or missing grades.

The student must be in good academic standing and must be registered as a full-time or part-time student for the semester in which the comprehensive examination is taken.

The examination is scheduled and announced officially by the Office of Graduate Enrollment Services upon recommendation of the department or program head, and must not be held without the official paperwork from the Graduate School. It is expected that the examination will take place at the campus location of the graduate center offering the program. Two weeks’ notice is required by the Office of Graduate Enrollment Services for scheduling this examination.

The Pennsylvania State University
which may be open to the University community and the public at the department's discretion. It is given and evaluated by
the entire doctoral committee. The format for the comprehensive examination may be entirely oral, or it may have both a
written and an oral component. A favorable vote of at least two-thirds of the members of the committee is required for
passing. In case of failure, it is the responsibility of the doctoral committee to determine whether the candidate may take
another examination. The results are reported to the Office of Graduate Enrollment Services.

The dissertation adviser, as well as the chair of the doctoral committee (if not the same individual as the dissertation
adviser), along with additional members of the committee to total a minimum of three (3), must be physically present at
the completion of the examination. The graduate student must also be physically present at the exam. (Thus for a
five-person committee, two could participate via distance.) No more than one member may participate via telephone; a
second member could participate via interactive videoconferencing. The examination request and a request for exceptions
must be submitted to the director of Graduate Enrollment Services for approval at least two weeks prior to the date of the
exam. Special arrangements, i.e., requirements for meeting participation via distance, must be communicated to the
student and the doctoral committee members well in advance of the examination.

When a period of more than six years has elapsed between the passing of the comprehensive examination and the
completion of the program, the student is required to pass a second comprehensive examination before the final oral
examination will be scheduled.

**FINAL ORAL EXAMINATION**

The doctoral candidate who has satisfied all other requirements for the degree will be scheduled by the Office of Graduate
Enrollment Services, on the recommendation of the department or program head, to take a final examination. Two weeks' notice is required by the Office of Graduate Enrollment Services for scheduling this examination. Normally the final oral examination may not be scheduled until at least three months have elapsed after the comprehensive examination was passed, although the director of Graduate Enrollment Services may grant a waiver in appropriate cases. It is the responsibility of the doctoral candidate to provide a copy of the dissertation to each member of the doctoral committee at least one week before the date of the scheduled examination.

Both the dissertation adviser and the student are responsible for ensuring the completion of a draft of the dissertation and for adequate consultation with members of the dissertation committee well in advance of the oral examination. Major revisions to the dissertation should be completed before this examination. The dissertation should be in its final draft, with appropriate notes, bibliography, tables, etc., at the time of the oral examination; both the content and style should be correct and polished by the time this final draft of the dissertation is in the hands of the committee.

The final examination of the doctoral candidate is an oral examination administered and evaluated by the entire doctoral committee. It consists of an oral presentation of the dissertation by the candidate and a period of questions and responses. These will relate in large part to the dissertation, but may cover the candidate's entire program of study, because a major purpose of the examination is also to assess the general scholarly attainments of the candidate. The portion of the examination in which the dissertation is presented is open to the University community and the public; therefore, it is expected that the examination will take place at the campus location of the graduate center offering the program.

The dissertation adviser, as well as the chair of the doctoral committee (if not the same individual as the dissertation adviser), along with additional members of the committee to total a minimum of three (3), must be physically present at the final oral examination. The graduate student must also be physically present at the exam. (Thus for a five-person committee, two could participate via distance.) No more than one member may participate via telephone; a second member could participate via interactive videoconferencing. Requests for exceptions must accompany the Examination Request Form, and must be submitted to the director of Graduate Enrollment Services for approval at least two weeks prior to the date of the exam. Special arrangements, i.e., requirements for meeting participation via distance, must be communicated to the student and the doctoral committee members well in advance of the examination.

All candidates are required to have a minimum grade-point average of 3.00 for work done at the University at the time the examination is given, and may not have deferred or missing grades. The student must be in good academic standing and must be registered as a full-time or part-time degree student for the semester in which the final oral examination is taken.

A favorable vote of at least two-thirds of the members of the committee is required for passing. The results of the examination are reported to the Office of Graduate Enrollment Services. If a candidate fails, it is the responsibility of the doctoral committee to determine whether another examination may be taken.

**DISSERTATION ACCEPTANCE**

Completion of the requirements of a doctoral degree program entails acceptance of the dissertation, as indicated by the signatures of at least two-thirds of the doctoral committee, including the dissertation adviser, committee chair, and the program chair or department head on its approval page, and by its acceptance as meeting the editorial standards of the Graduate School, so that it constitutes a suitable archival document for inclusion in the University Libraries. Thus it is to be noted that passage of the final oral examination is necessary but not sufficient for award of the degree; the dissertation must be accepted, as the ultimate step.

Updated: 12/14/11
Ph.D.--ADDITIONAL SPECIFIC REQUIREMENTS

The degree of Doctor of Philosophy is conferred in recognition of high attainment and productive scholarship in some special field of learning as evidenced by:

1. The satisfactory completion of a prescribed period of study and investigation;
2. The preparation and formal acceptance of a dissertation involving independent research;
3. The successful passing of examinations covering both the special subject and the general field of learning of which this subject forms a part.

Residence Requirements--There is no required minimum number of credits or semesters of study, but over some twelve-month period during the interval between admission to the Ph.D. program and completion of the Ph.D. program, the candidate must spend at least two semesters (summer sessions are not included) as a registered full-time student engaged in academic work at the University Park campus, the Penn State Milton S. Hershey Medical Center, or Penn State Harrisburg. Full-time University employees must be certified by the department as devoting half-time or more to graduate studies and/or thesis research to meet the degree requirements. Students should note that 601 cannot be used to meet the full-time residence requirement. (See Credit Loads and Academic Status.)

Continuous Registration--It is expected that all graduate students will be properly registered at a credit level appropriate to their degree of activity. (See Registration.) After a Ph.D. candidate has passed the comprehensive examination, the student must register continuously for each fall and spring semester until the final oral examination is passed. (Students who are in residence during summers must also register for summer sessions if they are using University facilities and/or faculty resources, except for Graduate Lecturers/Researchers, who are not required to enroll for any credits unless they are first-semester graduate students, or are required to be enrolled by their graduate program.)

Post-comprehensive Ph.D. students can maintain registration by registering for credits in the usual way, or by registering for noncredit 601 or 611, depending upon whether they are devoting full time or part time to thesis preparation. Students may take 601 plus up to 3 additional credits of course work for audit by paying only the dissertation fee. Students wishing to take up to 3 additional credits of course work for credit, i.e., 590, 602, etc., with 601 may do so by paying the dissertation fee and an additional flat fee. Enrolling for either 3 credits for audit or credit will be the maximum a student may take with SUBJ 601 without special approval by the Graduate School. NOTE: Registration for additional credits above this will incur an additional charge at the appropriate tuition per-credit rate (in state or out of state). Students wishing to take more than 3 additional credits of course work must register for 600 or 611 (i.e., not for 601, which is full-time thesis preparation).

Note that the least expensive way for a student to maintain full-time status while working on research and thesis preparation is to register for 601. This clearly is the procedure of choice for international students who need to maintain status as full-time students for visa purposes.

If a Ph.D. student will not be in residence for an extended period for compelling reasons, the director of Graduate Enrollment Services will consider a petition for a waiver of the continuous registration requirement. The petition must come from the doctoral committee chair and carry the endorsement of the department or program chair.

Minor Field--A Ph.D. candidate is not required by the Graduate Council to have a minor field of study. However, a department or a committee in charge of a major field may require a candidate to offer work in a minor field, or a student may elect such a program with the permission of the doctoral committee.

A doctoral minor consists of no fewer than 15 graduate credits of integrated or articulated work in one field related to, but different from, that of the major. Programs should consider that a doctoral minor should represent curriculum and study that reflect graduate-level concepts and scholarship, with a preponderance of courses at the 500-level, however, at a minimum, 6 credits must be at the 500-level. A minor may be taken in one of the approved graduate degree programs offered at Penn State, or in a formal graduate minor program that has been approved by the Graduate Council, such as those listed in this Bulletin on the following web page: http://bulletins.psu.edu/bulletins/whitebook/minors.cfm. The minor field chosen must have the approval of the departments or committees responsible for both the major program and the minor field. If more than one minor is being proposed, a separate group of courses must be taken for each (i.e., none of the courses may be used concurrently). If the student received a master’s minor in the same field as is being proposed for a doctoral minor, the 15 credits taken must be above and beyond those used for the master’s minor. However, credits earned in the master’s program over and above those applied to either the master’s minor or major may be applied to a minor in the Ph.D. program.

At least one faculty member from the minor field must be on the candidate’s doctoral committee.

Dissertation -- The ability to do independent research and competence in scholarly exposition must be demonstrated by the preparation of a dissertation on some topic related to the major subject. It should represent a significant contribution to knowledge, be presented in a scholarly manner, reveal an ability on the part of the candidate to do independent research of high quality, and indicate considerable experience in using a variety of research techniques. The contents and conclusions of the dissertation must be defended at the time of the final oral examination.

When a complete draft of the dissertation has been compiled, the student must submit it to the Thesis Office for format review. Submission for format review must be made by the announced deadline for the semester/session in which the degree will be conferred. After a successful defense and after signed approval by the advisers and/or committee members and the department head or graduate program chair, the final archival copy of the dissertation (incorporating any format changes requested by the Thesis Office), must be uploaded as an eTD (electronic dissertation) by the announced deadline for the semester/session in which the degree will be conferred. It is also expected that the student will provide a final archival copy of the dissertation to the office of the department or program head.

A Thesis Guide, which gives details concerning format and other requirements, can be accessed at:

The Pennsylvania State University
D.Ed.--Additional Specific Requirements

The D.Ed. degree is conferred in recognition of advanced preparation of a high order for work in the profession of education as evidenced by:

1. Satisfactory completion of a prescribed period of study;
2. Ability to apply scientific principles to practitioner problems in a variety of education endeavors;
3. Preparation of dissertation demonstrating ability to undertake an educational problem with originality and independent thought;
4. Successful performance on major and minor examinations, showing a satisfactory grasp of the field of specialization and its relation to allied education areas.

Residence Requirement--A minimum of 90 credits, of which at least 30 credits must be earned in residence at University Park campus, or Penn State Harrisburg if the degree is offered at that location, is required for the D.Ed. degree. The D.Ed. candidate may meet the requirements by attending summer sessions unless the major department requires a period of registration during the regular academic year. A candidate may register for a maximum of 30 credits of research in absentia, but none of these may count toward the minimum of 30 credits that must be earned at the University Park campus or Penn State Harrisburg if the degree is offered at that location. It is expected that students will register for a minimum of 15 credits of thesis research.

Major Program and Minor Field--The program of study includes a major and either a minor or a group of general studies. A majority of the courses offered in fulfillment of the requirements must be in the major program of study.

A candidate choosing to minor in a major outside the fields of professional education (such as history) shall have a minor consisting of no fewer than 15 graduate credits in professional education, as recommended to the director of Graduate Enrollment Services early in the major program with the approval of a faculty adviser from the major and minor areas.

A candidate choosing a major in one of the approved programs in professional education must also choose either a minor or a group of general studies with the approval of the major program chair. In this case, a minor consists of no fewer than 15 graduate credits in a field considered by the major program committee to provide valuable intellectual and/or professional depth and breadth for the candidate.

There must be at least one faculty member from the minor field on the candidate’s doctoral committee. The minor may include courses taken as part of a previous master’s degree program, if the minor is in an area different from the master’s, and if the courses were not a required part of the program, e.g., used to meet a total credit requirement.

An acceptable general studies group consists of at least 15 graduate credits, including those taken as part of a previous master’s degree (up to 6 credits), considered by the major program committee to provide valuable intellectual breadth for the candidate. (Note that a general studies group is not a minor and is not entered as such on the student’s transcript.)

A candidate entering with a master’s degree in a field that would normally be regarded as appropriate for a minor may petition the major program committee for a waiver of the minor requirement. If the program chair then approves, a request for a waiver may be submitted by the chair to the director of Graduate Enrollment Services. Waiving the minor requirement does not reduce the residence or total credit requirements for the D.Ed. degree.

Comprehensive Examination--In addition to demonstrating a high level of competence in the subject matter in the major program and minor field, each candidate must show, by a comprehensive examination, an understanding of current theories of education and the ability to apply the techniques and findings of educational research so far as they bear upon the teaching of the subject matter. The candidate must also be able to understand and contribute to the technical and professional literature in the field, and to criticize learned procedures in the light of historical trends and practices in this and other countries. Command of the tools for a thorough study of the problems of education is necessary and must include competence in the use of statistical methods. For certain students the requirements may include a reading knowledge of one or more foreign languages.

All candidates are required to have a minimum grade-point average of 3.00 for academic work done at the University at the time the comprehensive examination is given, and may not have deferred or missing grades. The student must be in good academic standing and must be registered as a full-time or part-time student for the semester in which the examination is taken.

Dissertation--Evidence of a high degree of scholarship, competence in scholarly exposition, and ability to select, organize, and apply knowledge must be presented by the candidate in the form of a written dissertation. The candidate must demonstrate a capacity for independent thought, as well as ability and originality in the application of educational principles or in the development of a new generalization under scientific controls. A dissertation may be based upon a product or project of a professional nature, provided scholarly research is involved. For example, it may be based upon the solution of a professional problem concerned with the development of a curriculum, or a product of creative effort related to education. However, in order to be acceptable as a dissertation, professional project must be accompanied by a written discourse demonstrating the nature of the research and including such theories, experiments, and other rational processes as were used in effecting the final result. The topic and outline of the proposed dissertation must have the approval of the doctoral committee.

When a complete draft of the dissertation has been compiled, the student must submit it to the Thesis Office for format review. Submission for format review must be made by the announced deadline for the semester/session in which the degree will be conferred. After a successful defense and after signed approval by the advisers and/or committee members and the department head or graduate program chair, the final archival copy of the dissertation (incorporating any format changes requested by the Thesis Office), must be uploaded as an eTD (electronic dissertation) by the announced deadline for the semester/session in which the degree will be conferred. It is also expected that the student will provide a final archival copy of the dissertation to the office of the department or program head.

A Thesis Guide, which gives details concerning format and other requirements, can be accessed at:

The Pennsylvania State University
Graduate Bulletin Archive - 2012

www.gradsch.psu.edu/current/thesis.html

Updated: 12/14/11
D.M.A.--Additional Specific Requirements

The Doctor of Musical Arts requires four semesters in residence. The degree is designed to provide students with a thorough background of preparation and experience in professional-level performance and in the literature of the instrument, while becoming sufficiently knowledgeable about the discipline of music as a whole, in order to teach at the collegiate or university level. This background knowledge would include, but not be limited to, music theory, analysis, and history. Sixty credits are required beyond the Master of Music; if an exceptional student is admitted before completion of a prior Master of Music degree, the student will complete a total of 30 credits in categories equivalent to those required for the M.Mus., in addition to the 60 required for the D.M.A. A candidacy examination will follow upon two semesters completed in residence. The comprehensive examination will occur upon the completion of course work, before the final recital. The culminating experience of the D.M.A. degree is a public performance: three memorized solo recitals are required (the final recital is prepared independently), and two recitals of chamber music. Although no written thesis is required, a lecture-recital is required, with a pre-approved monograph text.
Pennsylvania Department of Education Certificate Candidates

For information, see www.ed.psu.edu/certification.

PROFESSIONAL DEVELOPMENT CERTIFICATES

Postbaccalaureate candidates who want to pursue course work simply for their professional development and/or a permanent Level II certificate should apply to the Graduate School as special nondegree graduate students.
M.A. and M.S.--Additional Specific Requirements

The Master of Arts and the Master of Science degrees have similar requirements, the general major area determining which degree is conferred. Programs for both degrees are strongly oriented toward research.

A minimum of 30 graduate credits is required, of which at least 20 must be earned at the established graduate campus/center of the University where the program is offered. Some graduate programs require additional credits; the exact number can be determined by consulting the specific program description in the subsequent section, Graduate Programs, Faculty, and Courses. A minor is not required of all candidates for the M.A. or M.S. degree. A department or committee in charge of a major program may require a candidate to offer work in a minor field, or the minor may be elected with the permission of the student's committee.

Any member of the Penn State faculty with at least assistant professor rank may participate in the guidance and examination of master's candidates and sign master's thesis signatory pages. Special signatories occasionally are requested and approved for master's thesis. The supervisor of the master's work must be a member of the Graduate Faculty.

A master's minor consists of no fewer than 6 credits of integrated or articulated work in one field related to, but different from, that of the major. Programs should consider that a minor at the graduate level should represent curriculum and study that reflect graduate-level concepts and scholarship, with a preponderance of courses at the 500-level, however, at a minimum, 3 credits must be at the 500-level. A minor program must be in one of the approved graduate degree programs offered at Penn State and must have the approval of the departments or committees responsible for both the major program and the minor field. For more information regarding minors, please see http://bulletins.psu.edu/bulletins/whitebook/minors.cfm in this Bulletin.

The major department or the committee in charge of the major program is the judge as to the suitability of a field for the minor and of its relevance to the major. The minor field department has the responsibility of accepting or rejecting students, advising on courses to be taken by the candidate in the field, examining the candidate in the area of studies undertaken in the field, and certifying that the minor requirements have been met.

At least 18 credits in the 500 and 600 series, combined, must be included in the program. A minimum of 12 credits in course work (400, 500, and 800 series), as contrasted with research, must be completed in the major program, with a minimum number of 800-level credits as appropriate to the degree and as approved by the graduate program to be applied to degree requirements. A thesis is required of many candidates for these degrees. Details are given in the introductory paragraphs under the major program headings in the latter part of this bulletin. If a student is required to write a thesis, at least 6 credits in thesis research (600 or 610) must be included in the program. If no thesis is required, at least 18 credits must be in 500-level courses.

A thesis is prepared under the direction of the department or program in which the candidate's major work is taken. Under certain conditions a student may complete the thesis off campus. To do so, satisfactory arrangements must be made in advance with the adviser and the head of the major department or program.

When a complete draft of the thesis has been compiled, the student must submit it to the Thesis Office for format review. Submission for format review must be made by the announced deadline for the semester/session in which the degree will be conferred. After a successful defense and after signed approval by the advisers and/or committee members and the department head or graduate program chair, the final archival copy of the thesis (incorporating any format changes requested by the Thesis Office), must be deposited with the Thesis Office or uploaded to the eTD Web site by the announced deadline for the semester/session in which the degree will be conferred. It is also expected that the student will provide a final archival copy of the thesis to the office of the department or program head.

Candidates who are not required to write a thesis must present a suitable essay or paper. Its nature and extent shall be determined by the major program. The department head or program chair shall report to the Office of Graduate Enrollment Services that the student has met the approved requirement. The department or program is responsible for ensuring that the work is finalized by the published deadline for the semester/session. The program head may require one or more copies of the essay for the program's library or files.

Some programs in the field of education offer the M.S. degree but prefer to admit students into the M.Ed. degree program. Other programs that emphasize research prefer to admit only students interested in pursuing the Ph.D. degree.

Requirements for the M.A. degree at Penn State Harrisburg differ somewhat from the above and are outlined under the major programs in American Studies, Humanities, Community Psychology and Social Change, and Applied Psychology. These programs are available only at Penn State Harrisburg.

Updated: 12/14/11

The Pennsylvania State University
Master of Accounting (M.Acc.)

The Master of Accounting is designed to prepare students to enter careers in public accounting, corporate accounting, management accounting, governmental accounting, financial analysis, and law enforcement. The program is designed to allow students to complete the educational requirements for becoming a certified public accountant in Pennsylvania as well as most other states. A minimum of 30 graduate credits is required, with at least 18 credits earned in courses at the 500- or 800-level of which at least 6 credits must be earned in 500-level courses. A capstone course (with a final project) integrating material learned in the other program courses is required.
M.Agr.--Additional Specific Requirements

The Master of Agriculture is a professional degree with an industrial orientation. A student, according to individual objectives, may obtain intensive training encompassing a wide spectrum of subject matter area or intensive training in a specialized area. The program emphasizes the development of professional skills in the communication of technical knowledge and its application to the solution of current and future technical, economic, and social problems of individuals and groups.

The head of the department or program chair appoints a three-member committee to guide and monitor the candidate’s professional development. Members of this committee must represent at least two departments. The chair of the appointed committee serves as the candidate’s adviser. The candidate will inform the committee of personal aspirations and background early in the program. The committee will suggest to the student how best to achieve these goals and the standard of professional competence required for the Master of Agriculture degree.

A minimum of 30 graduate credits is required, of which 18 credits must be at the 500 level or above. A maximum of 10 credits may be earned in special problem-type courses.

Students in the Master of Agriculture degree program can major in Agricultural Economics, Agronomy, Animal Science, Forest Resources, Horticulture, Plant Pathology, Rural Sociology, Soil Science, or Wildlife and Fisheries Science.

The candidate must present an acceptable paper on a selected professional problem or a report of internship training. Up to 3 graduate credits will be given for an acceptable paper. The candidate may be required to provide one or more copies of the paper for the University.

The candidate’s committee shall report, through the department head or program chair, to the Office of Graduate Enrollment Services the title of the paper and that a draft of the work has been submitted by the published draft deadline for the semester. The department or program is responsible for ensuring that the work is finalized by the published deadline for the semester.
M.Arch.--Additional Specific Requirements

The Master of Architecture degree is a postprofessional degree intended for persons already holding an accredited Bachelor of Architecture degree. (Postprofessional architecture degrees are not eligible for NAAB accreditation.) The M.Arch. is a 30-credit program that requires 24 credits of course work and 6 credits of thesis or thesis project. At least 18 credits must be at the 500 or 600 levels, and at least 24 credits must be taken in residence at University Park. The core courses consist of a total of 12 credits. The capstone of the M.Arch. degree program is a master's thesis or thesis (design) project, requiring the student to identify and formulate an area of inquiry within which to do original research and then to complete a project or a written thesis.
M.A.S.--Additional Specific Requirements

The professional Master of Applied Statistics degree requires a minimum of 30 graduate credits of which 24 must be courses from the Department of Statistics. Twenty-one credits must be at the 500 level. The program has been approved for both in residence at University Park campus and online via the World Campus.
M.B.A.--Additional Specific Requirements

Master of Business Administration degree programs are offered at the University Park campus, Penn State Great Valley, Penn State Harrisburg, and Penn State Erie.

University Park Campus--The purpose of the MBA program at the University Park campus is to develop professional managerial knowledge and skills as these are applied to decisions in complex organizations. The curriculum was developed by the graduate business faculty to blend technical rigor, managerial theory, and integrative learning experiences through case studies and other teaching methods.

A minimum of 48 graduate credits is required, with a minimum of 42 credits at the 500 level. Twenty-six credits must be in specific core courses. Also required are 22 credits in portfolio and breadth electives. Work for this degree may be started in the fall semester only. Applications for this AACSB-accredited M.B.A program must include the results of the Graduate Management Admission Test.

Penn State Harrisburg--The goals of the Harrisburg MBA program are to provide graduates with a foundation for personal and professional growth and lifelong learning; a firm grounding in the academic disciplines underlying the field of business; participative strengths; and decision making, problem solving, and critical thinking skills. Major emphasis is placed on the social, legal, and ethical context of business—particularly ethical values needed in the conduct of business. Program faculty place high value on teaching and currency of curriculum, an emphasis on oral and written communication, collaborative learning, and cross-functional integration of concepts. The students served by the MBA program are, primarily, employees of area business, government, and not-for-profit organizations who reside within the Capital Region and study on a part-time basis. However, either full- or part-time study is possible. The M.B.A. is also offered as a concurrent MBA/Ph.D. program with the College of Medicine at the Penn State Milton S. Hershey Medical Center Department of Pharmacology, and concurrent MBA/J.D. degree program with The Dickinson School of Law.

The M.B.A. requires a minimum of 30 graduate credits, and is offered at the college's Middletown campus and in Lancaster, Pennsylvania. Eighteen of these credits are in prescribed areas of business, including accounting, finance, management, marketing, and information systems. An additional 12 credits are elective, permitting students to select courses in such areas as e-business, human resource management, financial analysis, or general business to meet their personal and professional goals. Depending on their level of preparation, some students may need to take additional course work beyond the baccalaureate to permit them to begin their advanced business studies with a common conceptual foundation and adequate understanding of the integrated nature of the business enterprise. Applications to this AACSB-accredited program must include results of the Graduate Management Admission Test and two letters of recommendation. In addition, applicants whose first language is not English or who have not received a prior degree from an institution in which the language of instruction was English must provide scores on the Test of English as a Foreign Language (TOEFL).

Penn State Erie--The Penn State Erie M.B.A. is a general degree emphasizing development of the planning and problem-solving skills crucial in middle and upper management. Course work emphasizes the integration of business functions and the practical application of theory in the business world, using simulated problems and actual situations students are experiencing at work. Many students are fully employed professionals who bring a wealth of knowledge and experience to the classroom. Both full- and part-time study is possible and the program can be completed by attending evening classes. The Master of Business Administration degree program consists of three parts:

1. Foundation Core Courses (18 credits): The courses introduce students to the ethical, legal, social, political, technological, and societal environment of business, accounting, economics, finance, management, marketing, operations management, and the application of quantitative methods to the analysis of business problems. The foundation core is required of all applicants who have not completed an undergraduate degree in business or previous undergraduate or graduate course work relevant to the foundation core requirements.

2. Advanced Required Courses (15 credits): These courses build on the knowledge base established in the foundation core and provide greater depth of knowledge in the subject areas included. This component of the MBA program consists of five 3-credit courses that cover advanced topics in cost management, information systems management, managing a diverse workforce, global operations and supply chain management, and strategic management and business policy.

3. Elective Courses (15 credits): All students are required to take 15 credits of elective courses covering advanced topics of their choice. Electives must include at least 3 credits of community outreach-oriented and 3 credits of internationally focused course work from the program-approved list of courses.

Penn State Great Valley--The M.B.A. at Great Valley's School of Graduate Professional Studies is designed to meet the needs of the working professional desiring to advance her or his career. The M.B.A. requires 45 credits for degree completion. Courses are categorized into four groups: core, advanced, elective, and capstone. Students may be exempt from up to 15 credits from the core courses based on academic preparation and test scores. Students entering the program are expected to meet preprogram requirements that build a foundation for effective communication skills and quantitative analysis.

In addition to the general M.B.A. program, options are available in Biotechnology and Health Industry Management, and New Ventures and Entrepreneurial Studies. Classes are offered evenings and Saturdays in seven-week sessions, and the program may be completed in as little as 18 months. M.B.A. students are admitted year-round at the beginning of each of the seven-week sessions. Applications must include the results of a Graduate Management Admissions Test. For more information, refer to the Web at http://www.gv.psu.edu.

The Pennsylvania State University
M.Ed.--Additional Specific Requirements

The programs leading to the degree of Master of Education provide preparation for increased professional competence in education. They should be distinguished carefully from the research-oriented programs that lead to the academic degrees of Master of Arts or Master of Science. In most major programs the requirements for admission include 18 credits in education and related fields.

A minimum of 30 graduate credits is required for the degree, of which at least 20 must be earned at the campus/center where the degree program is offered; at least 24 must be in course work. This degree is also offered in certain programs at Penn State Harrisburg and Penn State Great Valley.

Major Programs in the Fields of Education--A student can major in one of the approved programs in professional education and proceed under the guidance of a graduate faculty member of the appropriate major. At least 18 credits at the 500 level or above (with at least 6 credits in 500 level) must be included in the program. Most programs of this type require at least 6 credits to be earned outside the major as providing valuable breadth for the candidate. However, this policy differs among programs. Specific information about such requirements is found under the individual program listings in this bulletin or from the program's coordinator. It is important for potential students to obtain the degree requirements of the programs in which they are interested, because many programs specify degree requirements in excess of 30 credits and the manner in which credits are to be earned: required, elective, in or out of the major.

Major Programs Outside the Fields of Education--A student who wants to earn an M.Ed. in a specific subject-matter field, such as economics, mathematics, German, or a broader area, can choose such a program as a major and take a majority of work in it under the guidance of the department offering that major. The candidate is required to earn 6 credits in education as directed by the faculty of one of the approved graduate programs in professional education.

Culminating Experience--All M.Ed. programs require a significant culminating or “capstone” experience. Each program has established the specific manner for meeting the requirement, which may take the form of a thesis, production, paper, exhibition, comprehensive examination or other similar experience serving to demonstrate comprehensive and in-depth knowledge of the field of study. The nature and extent of this work and when it is to be undertaken within the program of study shall be determined by the major program and reported to the Office of Graduate Enrollment Services of the Graduate School.

Thesis or Paper--The thesis or paper must be of considerable proportion and must be clearly and definitively indicative of the capacity to describe a serious intellectual investigation, study, critical analysis, or evaluation; to acquire, integrate, and analyze information; to draw conclusions logically; and to present the experience adequately and professionally in writing. The requirements of the Graduate School regarding a thesis must be met. Programs may impose other requirements regarding the master's paper, including submission of more than one copy for disposition at the program level.

Exhibition or Production--The capstone experience must be of comparable rigor as that required for a thesis or master's paper. While the format of the experience will differ among programs, all such capstone experiences must result in definitive evidence of satisfaction of the above noted qualities. Some tangible written report is required, although the length and nature of this report are to be left to the department or program.

Other Capstone Experience--If the program wishes to use some other mechanism to demonstrate culminating evidence of analytical ability and synthesis of material, it may do so upon approval by the Graduate Council. The program or department must report to Graduate Enrollment Services evidence that the student has met the approved requirement.
M.E.M. -- Additional Specific Requirements

The Master of Engineering Management is developed for students with a background in engineering or science. Applicants with a four-year undergraduate degree in engineering, mathematics, physics, computer science, or a related discipline will be considered. All students in the Master of Engineering Management program must complete a minimum of 33 credits, including 18 credits in core courses at the 500 level and completion of the capstone course.
M.Eng.--Additional Specific Requirements

The Master of Engineering degree programs provide training for advanced professional competence in several fields of engineering. This professional master’s degree emphasizes practical application of knowledge for solving problems and should be distinguished carefully from the research-oriented programs that lead to the academic degree of Master of Science. A minimum of 30 graduate credits is required, of which 20 must be earned at the campus/center where the degree program is offered. At least 18 credits must be earned in graduate courses (500 series).

Culminating Experience--All M.Eng. Programs require a significant culminating or “capstone” experience. Each program has established the specific manner for meeting the requirement, which may take the form of a paper, writing portfolio, or other similar experience serving to demonstrate comprehensive and in-depth knowledge of the field of study. The nature and extent of this work and when it is to be undertaken within the program of study shall be determined by the major program and reported to the Office of Graduate Enrollment Services of the Graduate School.

Work for this degree is not required to be done specifically at the University Park campus. A complete program of study can be pursued at Penn State Harrisburg or Penn State Great Valley.
M.E.P.C.--Additional Specific Requirements

The Master of Environmental Pollution Control (M.E.P.C.) is an intercollege professional degree program designed to improve competence in various fields of the control, management, and prevention of environmental pollution. The degree should be distinguished from the research-oriented program that leads to the academic degree of master of science, since the M.E.P.C. emphasizes application, analysis, and synthesis of knowledge rather than creating new information through traditional research.

A minimum of 30 graduate credits is required, of which 20 must be earned at the campus where the degree program is offered. Special requirements include 1112 credits of core courses covering air pollution, water quality, solid/hazardous waste management, and policy/risk assessment. At least 18 credits at the 500 level or above (with at least 6 credits in 500 level) must be included in the program, which includes 1 credit of E P C 590 and up to 3 paper-writing (596) credits offered through the student's department of affiliation.

A scholarly master's paper must be completed by all M.E.P.C. candidates. It must be of considerable proportion and must demonstrate the ability to formulate objectives, acquire and document relevant information, critically analyze, draw logical conclusions, and relate findings to professional problems and practices.
M.F.A.--Additional Specific Requirements

The programs leading to the Master of Fine Arts degree provide professional training in art, creative writing, and theatre. The M.F.A. is one of two terminal degrees in the arts. (The other is the research-oriented Ph.D.) The M.F.A. is a 48- to 60-credit degree and usually requires two to three years to complete.

The greater number of credits in the major should be at the 500 level, but the needs of the student will be considered in arranging the best combination of courses and research for preparing the candidate in a particular field.

A professional creative project is required. This project will include a monograph (an artist's statement for the M.F.A. in studio art) in support of the creative or interpretative aspect of the program. Continuance in the program is dependent upon the student's academic and artistic progress as evaluated at the end of each semester.
M.Fin. -- Additional Specific Requirements

The Master of Finance (M.Fin.) degree is intended to provide an advanced and specialized graduate education in finance for individuals who have career interests in financial management, financial analysis, or financial consulting with a focused, intensive curriculum that will develop and expand their quantitative, analytical, and technical expertise.

The M.Fin. degree requires 30 graduate credits-18 in prescribed core courses, 9 in electives, and 3 for a capstone course, including a research paper, which provides a culminating experience for students to develop their analytical abilities to identify strategies that enhance value creation, building upon knowledge acquired from the core courses.
M.F.R.--Additional Specific Requirements

The Master of Forest Resources (M.F.R.) is a professional degree designed for students who want to specialize in fields of wood products marketing or industries, forest management, silviculture, urban forestry, watershed management, or wildlife and fisheries management. This degree differs from the research-oriented Master of Science degree programs in the School of Forest Resources, because the M.F.R. emphasizes applications, analysis, and synthesis of knowledge rather than creating new information through more traditional types of research. This program is especially attractive to returning students interested in gaining state-of-the-art information rather than thesis research in their specialized field.

Students who have baccalaureate degrees in forestry, wood products, or wildlife and fisheries may complete the M.F.R. degree requirements in one year, whereas those with degrees in related fields generally require longer because of deficiencies in prerequisite undergraduate courses.

A minimum of 30 graduate credits (400- to 500-level courses) is required, of which 20 credits must be earned at an established graduate campus of the University, with at least 18 credits as formal courses (excluding paper writing, colloquia, and independent studies) related to forest resources, wood products, and wildlife and fisheries. At least 18 credits at the 500 level or above (with at least 6 credits in 500 level) must be included in the program, including 6 credits of formal courses. A paper (3 to 6 credits of FOR/W P/W F S 596) and formal oral presentation (1 credit of FOR/W P/WFS 596) are required as part of the 30 credits that demonstrate ability to apply the knowledge gained during the program to the specialized field of interest. The program must also include 3 credits of statistics at the graduate level.
M.G.I.S.--Additional Specific Requirements

The Master of Geographic Information Systems (M.G.I.S.) degree program is for adult professionals who aspire to leadership in the GIS profession but who are able to study only part-time and at a distance.

MGIS is a 35-credit program. Six to 9 credits are earned through an independent project that culminates in a formal public presentation attended by the student's academic adviser. The independent project demonstrates students' ability to apply advanced knowledge and skills in a way that makes a substantial contribution to their professional work.

Designed in consultation with an advisory board of experienced professionals in industry, government, and private practice, the MGIS curriculum nurtures not only technical competence but also the articulacy, analytical skills, and professionalism required for leadership in any organization.

Throughout the program students create and maintain personal e-portfolios that chronicle their achievements, outline long-term professional development strategies, and foster meaningful interactions among fellow students and faculty members.
M.H.A.--Additional Specific Requirements

Penn State’s Department of Health Policy and Administration helps students prepare for positions in health care organizations, the nation’s second-largest and fastest-growing industry. Master of Health Administration (MHA) graduates become executives in hospitals, health systems, skilled nursing facilities, insurance companies, consulting firms, home health agencies, federal regulating agencies, medical group practices, health maintenance organizations, public health agencies, mental health agencies, and clinics. The curriculum emphasizes strategic thinking, management, communication, and a broad understanding of the U.S. health care system. Areas of study include health law, epidemiology management, payment mechanisms, ethics, managed care, long-term care, health care technology, marketing, and strategic planning.

Satisfactory scores on either the Graduate Management Test (GMAT) or the Graduate Record Examinations (GRE) are required for admission. In addition, a junior/senior grade-point average of 3.00 or better, a relevant personal statement, and two letters of recommendation are necessary. Some work experience in health care is preferred, but not required.

The MHA program is designed to be completed in twenty-one months of full-time study, although it may be completed on a part-time basis. A minimum of 49 credits is required for completion of the degree. Students take 46 preselected Health Policy and Administration credits and 3 credits of electives selected in consultation with an adviser. Students are required to complete a ten-week residency in a health care practice setting. For full-time students, this is completed during the summer between the first and second years of academic study.

Penn State Harrisburg--Based on eight prescribed core courses defined as the foundation of administration in health care, the degree program is designed for part-time professional students already engaged in, or interested in, health administration careers. Three years of relevant experience is an admission requirement. If the applicant’s GPA is less than 3.0, GRE or GMAT scores are required.
M.H.S.--Additional Specific Requirements

The M.H.S. is designed to provide students with broad training in issues surrounding homeland security. The target audience may include federal, state, and local public health officials, public affairs administrators, emergency management professionals, health care professionals, first responders, criminal justice and law enforcement personnel, military staff, and members of corporate security.

The Master of Homeland Security requires a minimum of 30 graduate credit hours, of which at least 18 must be in 500-level courses. Each candidate must complete a project report on a topic related to homeland security. The department head or program chair shall report, to the Office of Graduate Enrollment Services, the successful completion of the report and is responsible for ensuring that the work is finalized by the deadline for the semester in which the student intends to graduate.
M.I.A. -- Additional Specific Requirements

Students admitted to the Master of International Affairs program must take a total of 30 graduate credits, including 18 credits of required core courses with the remaining credits chosen from elective courses that will cluster around areas of concentration designed by the program faculty. A minimum of 18 credits must be at the 500 level or above. In addition to the core curriculum and elective courses, degree candidates must complete either (1) a master's paper or (2) a supervised internship placement. The master's paper will involve integrating and showing mastery of the subject matter of the student's curricular emphasis; the supervised internship placement must be of sufficient depth and professionalism to allow the student to experience the integration of his/her curricular studies in a professional environment. A reflective paper will be submitted as a part of this credit requirement.
M.L.A.--Additional Specific Requirements

The Master of Landscape Architecture program is structured as advanced scholarly inquiry within the professional discipline. The intent is to provide specialized expertise in a niche area of landscape architecture to individuals who already have completed a practice-oriented professional program. Prospective students must hold a degree from an accredited program (or foreign equivalent) in landscape architecture or architecture.

Penn State's MLA program offers particular opportunities for study in four expertise areas: community and urban design, through affiliation with the Hamer Center for Community Design Assistance; ecological issues with emphasis on watershed stewardship, through affiliation with the Center for Watershed Stewardship; design computing, through affiliation with the Stuckeman Center for Design Computing; and landscape history, through affiliation with the Historic Places Initiative.

Students may choose one of two curricular tracks in the MLA: a practicum-oriented option in one of the four centers, or pursuit of a unique independent study in conjunction with a center topic or faculty research. In both tracks, students pursue individual inquiry intended to contribute to advancement of the profession: a paper (or papers) in the option track, and in the independent track a major project that forms the focus of the student's curriculum.

A minimum of 44 credits is required, at least 34 credits at University Park campus: 19 credits are studio/research, 4 are in seminar, 21 are supporting electives. The majority of the course work must be at the 500 level.
M.L.D.--Additional Specific Requirements

The Master of Leadership Development is a 36-credit interdisciplinary professional graduate program that blends the social and behavioral sciences with ethical studies to develop outstanding organizational and community leaders. A series of cornerstone, competency, and context courses are required to provide all students with a common body of knowledge. All students must complete a capstone course (LEAD 582 Social Entrepreneurship and Community Leadership) that provides students with an opportunity to enact what is learned in the course work in the context of promoting a positive change in the community. The program is geared to individuals in mid- to upper levels of management and administration who have at least five years of related professional experience.
M.Mus.--Additional Specific Requirements

The program leading to the Master of Music degree provides training for increased professional competence in performance, pedagogy, conducting, composition. It should be distinguished carefully from the research-oriented program that leads to the academic degree of Master of Arts.

Admission requirements include an audition for performance and conducting applicants and submission of a composition portfolio for composition applicants.

A minimum of 36 credits is required, of which 30 must be earned at the University Park campus. At least one-half of the required credits must be at the 500 level.

Depending on the major option, a professional project in performance, conducting, or composition is required. A master's paper and a comprehensive examination also are required in certain areas.
**M.M.E.--Additional Specific Requirements**

The Master of Music Education degree provides opportunity for advanced study in the art of music, pedagogy, and systematic problem solving. In addition to the traditional academic year program, a "summer only" option is available.

A minimum of 30 credits is required, of which 20 must be earned at the University Park campus. At least 18 credits at the 500 level or above (with at least 6 credits in 500 level) must be included in the program.

Admission requires 12–15 credits in music education methods at the undergraduate level, successful teaching or student teaching experience, and a video taped demonstration of teaching and musical competence. Also required are a master's paper and a comprehensive examination.
M.P.A.--Additional Specific Requirements

The Master of Public Administration (MPA) program is intended for those with career interests in public management, health and human services, government, and other public service and nonprofit organizations. The MPA program is accredited by the National Association of Schools of Public Affairs and Administration. The M.P.A. degree is offered at Penn State Harrisburg.

The M.P.A. degree requires 36 graduate credits—18 in prescribed core courses, 15 in electives, and 3 for a professional master's project. In addition, a 9-credit internship is required of students who do not have at least three years of full-time, relevant work experience, which consists of supervisory, managerial, or professional work. The internship is waived for students with this experience before they enter the program or who gain it during the program.
M.P.M.--Additional Specific Requirements

The Master of Project Management is a 30-credit graduate program that emphasizes all aspects of project management theory and practice. The M.P.M. is interdisciplinary and utilizes problem-based learning as well as a combination of face-to-face and Web-based instructional methods to transcend time and space, and to support effective teaching and learning. The M.P.M. curriculum requires the completion of eight courses (24 credits) in which students are required to apply course concepts to project management situations in their employing organizations. In addition, an applied research project (6 credits) focusing on some aspect of project management is required.
M.P.S. -- Additional Specific Requirements

The Master of Professional Studies is a professional degree. Programs leading to the M.P.S. degree provide opportunities for students to increase their knowledge and competencies in specific careers (as practitioners). The M.P.S. is often considered the "terminal" degree in the field and students entering often need not have undergraduate training in the field, as the curriculum provides foundation material assuming a diversity of backgrounds.

A minimum of 30 graduate credits is required, of which at least 18 credits must be at the 500-level and above, with a minimum of 6 credits of 500-level course work. A significant culminating or "capstone" experience or other mechanism to demonstrate evidence of analytical ability and synthesis of material is required. These may typically include, but are not limited to, a paper, an internship, an exhibition, a production, a comprehensive examination, or a capstone course. The specific form of the culminating experience is determined by the major program.

The department head or program chair shall report to the Office of Graduate Enrollment Services the nature of the culminating experience and is responsible for ensuring that the work is finalized by the deadline for the semester in which the student intends to graduate.
M.S.E.--Additional Specific Requirements

The Master of Software Engineering degree is a professional degree that focuses on exploring and examining software engineering practices and solutions that address emerging industry issues, such as e-commerce and enterprise integration.

The program is designed to meet the educational needs of technical professionals who want to build upon their software engineering knowledge.

Applicants for admission should hold an undergraduate degree in an appropriate technical field. Applicants not holding a technical degree should present a minimum of three years’ work experience in the software profession. All applicants must have proficiency in a high-level language and in the principles of computer architecture, or complete prerequisite courses upon admission to the program.

The degree program requires completion of 36 credits of graduate course work, including a 3-credit advanced studio leading to the development of an actual software product, participation in a research institute, or a 3-credit professional paper.

For maximum career flexibility, students may broaden their study by selecting approved courses from allied fields, such as artificial intelligence, computer science and engineering, and management information systems.
University Course Descriptions

COURSE-NUMBERING SYSTEM

UNDERGRADUATE COURSES (1 to 399): General courses accepted in fulfillment of requirements for the bachelor's degrees.

ADVANCED UNDERGRADUATE COURSES (400 to 499): Courses open to graduate students and to juniors and seniors and, with the special written permission of the head of the department or the chair of the program sponsoring the course, to qualified students in earlier semesters.

GRADUATE COURSES (500 to 699; 800 to 899): Courses restricted to students registered in the Graduate School, seniors with an average of at least 3.50, and other students who have been granted permission to enroll by the dean of the Graduate School. These courses are described in the Penn State Graduate Degree Programs Bulletin.

MEDICAL COURSES (700-799): Courses restricted to students registered in the College of Medicine.

LAW COURSES (900-999): Courses restricted to students registered in The Dickinson School of Law.

COMMON COURSE NUMBERS

The following courses for which students may register have been set up for common use by major programs to encourage innovation and provide flexibility in designing graduate programs. For courses 594, 595, 596, 597, 598, and 599, special titles may be requested by a graduate program for a given semester, through the Senate Curriculum Coordinator, 101 Kern Building, University Park campus.

590. COLLOQUIUM--Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

594. RESEARCH TOPICS--Supervised student activities on research projects identified on an individual or small-group basis. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

595. INTERNSHIP--Supervised, research-oriented, off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc. Prerequisite: prior approval of proposed assignment by instructor.

596. INDIVIDUAL STUDIES--Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

597, 598. SPECIAL TOPICS--Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

599. FOREIGN STUDIES (1-2 per semester, maximum of 4) Courses offered in foreign countries by individual or group instruction. A specific title may be used in each instance and will be entered on the student’s transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

600, 610. THESIS RESEARCH--In registering for thesis research a student uses the appropriate number (600, 610) preceded by the abbreviation designating the major field. The numbers 600 (on campus) and 610 (off campus) are available for credit in thesis research in all graduate major programs. The bursar assesses charges for these courses at the current rate of tuition, according to the student’s status at the time of registration.

601, 611. THESIS PREPARATION--The numbers 601 and 611, with associated special fees, are available to Ph.D. degree candidates who have passed the comprehensive examination and met the two-semester residence requirement. They may be used for thesis preparation work during its later stages, when the academic activity of the candidate consists partly (611) or solely (601) of work on the completion of research and writing of the dissertation. (See also Course-Numbering System.)

SUBJ 601 and SUBJ 611 do not carry academic credit. They are entered on the academic transcript to indicate the registration and the nature of the candidate’s academic activity. A candidate registered for SUBJ 601 is classified as a full-time student, while one registered for SUBJ 611 is classified as a part-time student. (See also Thesis Preparation, in the General Information section of this bulletin.)

The numbers 600, 601, 610, and 611 may not appear in the Schedule of Courses for each semester.

602. SUPERVISED EXPERIENCE IN COLLEGE TEACHING--May be offered by any graduate program in a department that also offers undergraduate courses. A graduate program with no counterpart undergraduate program may offer SUBJ 602 when cooperative arrangements are made with an admin-istrative unit that does not offer graduate degrees but that uses graduate assistants in its teaching. SUBJ 602 may be offered in any semester and is subject to the following restrictions:

1. SUBJ 602 will not be counted in fulfilling any specific credit requirement for an advanced degree.
2. SUBJ 602 will be graded (A, B, C, D, F). The grade will appear on the student’s transcript.
3. SUBJ 602 will not be used in calculating grade-point averages.
4. SUBJ 602 shall be offered only in those graduate programs that want to provide opportunity for supervised and graded teaching experience. Enrollment will be restricted to students for whom the major program is prepared to offer the course.

The Pennsylvania State University
provide such experience.

5. SUBJ 602 will be counted as a part of the student’s credit load unless the program specifies otherwise.

SUBJ 603. FOREIGN ACADEMIC EXPERIENCE (1–12)—Foreign study and/or research approved by the graduate program for students enrolled in a foreign university constituting progress toward the degree.

890. COLLOQUIUM—Continuing, professionally oriented seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

894. CAPSTONE EXPERIENCE—Supervised, professionally oriented student activities that constitute the culminating experience for the program. A specific title may be used in each instance and will be entered on the student’s transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

895. INTERNSHIP—Supervised, professionally oriented, off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. A specific title may be used in each instance and will be entered on the student’s transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc. Prerequisite: prior approval of proposed assignment by instructor.

896. INDIVIDUAL STUDIES—Creative projects with a professional orientation, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. A specific title may be used in each instance and will be entered on the student’s transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

897, 898. SPECIAL TOPICS—Formal courses given on a topical or special interest subject with a professional orientation that may be offered infrequently; several different topics may be taught in one year or semester. A specific title may be used in each instance and will be entered on the student’s transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

899. FOREIGN STUDIES (1-2 per semester, maximum of 4) Courses with a professional orientation offered in foreign countries by individual or group instruction. A specific title may be used in each instance and will be entered on the student’s transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

COURSE ABBREVIATION CODES AND DESCRIPTIONS TO BE USED FOR TRANSFER OF CREDIT

NOTE: The following course abbreviation codes are for use by the Office of Graduate Enrollment Services in The Graduate School only and may appear on transcripts/degree audits.

EXTTR (EXT TRNSF FOR DGR RQ)
Course(s) transferred from an external institution to meet requirements toward a graduate degree.

EXTMJ (EXT TRNSF FOR MJR RQ)
Course(s) transferred from an external institution to meet program-specific requirements toward a graduate degree.

CIPTR (CIP TRNSF FOR DGR RQ)
Course(s) transferred from an external institution to meet requirements toward a collaborative institutional integrated undergraduate-graduate or concurrent graduate degree program.

CIPMJ (CIP TRNSF FOR MJR RQ)
Course(s) transferred from an external institution to meet program-specific requirements toward a collaborative institutional integrated undergraduate-graduate or concurrent graduate degree program.

4/25/12
Accounting (ACCTG)

ACCTG 403 Auditing (3) Financial compliance, internal, and operational audits; standards and procedures; sampling; EDP auditing; professional issues; application of concepts through written responses.
Effective: Spring 2008
Prerequisite:

ACCTG 403W Auditing (3) Financial, compliance, internal, and operational audits; standards and procedures; sampling; EDP auditing; professional issues; application of concepts through written responses.
Effective: Spring 2008
Prerequisite:

ACCTG 404 Managerial Accounting: Economic Perspective (3) Accounting techniques as planning, control, and motivating devices in business and other organizations; accounting data for decision making and performance evaluation.
Effective: Spring 2011
Prerequisite:

ACCTG 405 Principles of Taxation I (3) Elements of tax policy and tax-planning concepts for personal and business decision making; with emphasis on taxation of individuals.
Effective: Spring 2008
Prerequisite:

ACCTG 406 Principles of Taxation II (3) Impact of federal tax structure on business decisions, research methodology, tax planning; ethical considerations of tax practice.
Effective: Spring 2008
Prerequisite:

ACCTG 410 Federal Taxation II (3) An examination of the rules and forms used to compute the federal tax liability of corporations and partners.
Effective: Spring 2008
Prerequisite:

ACCTG 411 Accounting Practicum: VITA (3) Introduces students to practical aspects of tax preparation through the IRS' VITA program and completion of a tax research project.
Effective: Spring 2008
Prerequisite:

ACCTG 422 Accounting Systems (3) Understanding flow and documentation of accounting information and internal controls in the context of accounting cycles.
Effective: Spring 2008
Prerequisite:

ACCTG 426 Financial Statement Analysis (3) The exploration of conventional and advanced methods of analyzing financial statements, including the assessment of earnings quality.
Effective: Spring 2008
Prerequisite:

ACCTG 431 Advanced Auditing (3) Examination of legal liability, EDP, statistical sampling, SEC reporting, internal control, and financial reporting in specialized industries.
Effective: Spring 2008
Prerequisite:

ACCTG 432 Accounting Information Systems (3) Systems analysis tools and techniques; internal control concepts; development of computer control procedures.
Effective: Spring 2008
Prerequisite:

ACCTG 440 Advanced Management Accounting (3) Management accounting topics such as decision models, quantitative techniques, variance analysis, and their use in accounting.
Effective: Spring 2008
Prerequisite:

ACCTG 450 Advanced Accounting (3) Accounting theory and practice for business combinations, branches, international operations, partnerships, consolidated financial statements, corporate liquidations, nonprofit organizations, estates, and trusts.
Effective: Spring 2008
Prerequisite:

ACCTG 461 (IL) International Accounting (3) Study of international accounting issues with emphasis on need, use, and interpretation of financial accounting required in global business environment.
Effective: Spring 2008 Ending: Summer 2012
Prerequisite:

ACCTG 461 (IL) International Accounting (3) Study of international accounting issues with emphasis on need, use, and interpretation of financial accounting required in global business environment.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

ACCTG 462 Governmental and Not-for-Profit Accounting (3) Provides an understanding of governmental and not-for-profit accounting theory, procedures, and financial statements.
Effective: Spring 2010
Prerequisite:

Effective: Spring 2008
Prerequisite:

ACCTG 471 Intermediate Financial Accounting I (3) Theory and practice issues in income concepts and value measurement; GAAP; revenues, costs, assets, liabilities, and equities.
Effective: Spring 2008
Prerequisite:

ACCTG 472 Intermediate Financial Accounting II (3) Off-balance-sheet financing; special issues in cost capitalization, liabilities, and equities; matching; funds flow statements; statement analysis; inflation accounting.
Effective: Spring 2008
Prerequisite:

Effective: Spring 2010
Prerequisite:

Effective: Spring 2008
Prerequisite:

ACCTG 483 Forensic Accounting (3) Study of investigative accounting, consulting and litigation support activities undertaken in forensic accounting engagements.
Effective: Spring 2011
Prerequisite:

ACCTG 489 Seminar in Accounting (3) New trends and concepts in accounting; applications and impact on problem solving and decision making.
Effective: Spring 2008
Prerequisite:

ACCTG 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2003

ACCTG 494H Research Project (1-3 per semester/maximum of 6) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2005

ACCTG 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008
Prerequisite:

ACCTG 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

ACCTG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

ACCTG 497A Hot Topics in Tax (3) The course will highlight principles and concepts in US international tax, trusts and estates, and estate planning.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ACCTG 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2003

ACCTG 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007
ACCTG 501 Research Methods in Accounting (3) An introduction to the methods and techniques of contemporary research in accounting.
Effective: Fall 1992
Prerequisite:

ACCTG 504 Seminar in Managerial Accounting (3-6) Accounting and the managerial processes of planning, control, and decision making.
Effective: Fall 1992

ACCTG 507 Seminar in Financial Accounting (3) Theoretical basis of financial accounting.
Effective: Fall 1992

ACCTG 511 Financial and Managerial Accounting (3) Fundamental financial and managerial accounting concepts and issues from the viewpoint of the report user.
Effective: Fall 1992

ACCTG 512 Financial Accounting Theory and Reporting Problems (3) Measurement and reporting of financial information for external purposes, with particular attention to current problems in asset and income measurement.
Effective: Fall 1992
Prerequisite:

ACCTG 524 Managerial Accounting (3) Concepts and techniques of accounting for planning, control, and motivation.
Effective: Fall 1992
Prerequisite:

ACCTG 550 Taxation and Management Decisions (2) Framework for understanding the effects of taxes on business decisions and for devising effective tax planning strategies.
Effective: Summer 2002
Prerequisite:

ACCTG 560 Accounting and Business Analysis (2) Develop ability to assess the relation between accounting data in financial statements and the economic fundamentals represented.
Effective: Summer 2002
Prerequisite:

ACCTG 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1992

ACCTG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

ACCTG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 1992

ACCTG 597A Empirical Research in Accounting (4) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ACCTG 597K Research in Analytical Modeling (4) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ACCTG 599 (IL) Foreign Study—Accounting (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite:

ACCTG 600 Thesis Research (1-15) No description.
Effective: Fall 1992

ACCTG 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1992

ACCTG 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) The student assists in teaching one of the following courses: Acctg. 16, 101, 104, 201, 202, 206, or 400.
Effective: Fall 1992
ACCTG 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1992

ACCTG 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1992

ACCTG 803 Forensic Accounting and Litigation Support (3) Study of investigative accounting, consulting and litigation support activities undertaken in forensic accounting engagements.
Effective: Summer 2009
Prerequisite:

ACCTG 806 Taxes and Business Planning (3) Effects of tax regimes on decision-making, tax planning and market outcomes. Also, ethics, tax research, and policy.
Effective: Summer 2009
Prerequisite:

ACCTG 873 Advanced Topics in Financial Reporting (3) Financial disclosure and reporting for complex business enterprises and activities; current issues in financial reporting.
Effective: Summer 2009
Prerequisite:

ACCTG 881 Financial Statement Analysis (3) Analysis of financial reports to identify business strategy, assess performance and economic standing, and value claims.
Effective: Summer 2009
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Accounting - Behrend (ACNTG)

ACNTG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

ACNTG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

Last Import from UCM: June 2, 2012 12:27 PM
Accounting-CI (ACCT)

Prerequisite:

ACCT 504 Auditing Theory and Practice (3) Auditing theory pertaining to the regulatory environment, risk assessment, internal controls, materiality, computerization, analytical procedures, sampling, fraud, ethics, and professional responsibilities. Effective: Summer 2012
Prerequisite:

ACCT 510 Business Tax Planning Theory and Practice (3) Tax theory pertaining to corporations, partnerships and conduit entities, estates, trusts, ethics, and professional tax responsibilities. Effective: Summer 2012

ACCT 540 Accounting for Managerial Decisions (2) Application of accounting to monitoring and improving the internal operation of an organization. Effective: Fall 2005
Prerequisite:

ACCT 545 Strategic Cost Management (3) Current managerial accounting topics such as activity-based costing, theory of constraints, performance measures and their use in organizations. Effective: Spring 2002
Prerequisite:

ACCT 561 Financial Statement Analysis II (3) The exploration of conventional and advanced methods of analyzing financial statements, including earnings quality and financial distress assessment. Effective: Summer 2004
Prerequisite:

ACCT 571 Strategic Tax Planning (3) Study of strategic aspects of tax for planning business operations, growth, expansion, capital transactions, and transfer of wealth. Effective: Summer 2004
Prerequisite:

ACCT 572 Financial Reporting I (3) Accounting theory and practice for reporting consolidations, foreign currency transactions, and preparing financial statements for governmental and NGOs. Effective: Summer 2012
Prerequisite:

ACCT 573 Financial Reporting II (3) Topics involving consolidated financial statements, special purpose entities, derivative financial instruments, and use of the Financial Accounting Research System (FARS). Effective: Summer 2012
Prerequisite:

ACCT 574 Accounting and Management Control Systems (3) Study of theories, practices and issues associated with accounting and management control as reflected in relevant literature. Effective: Summer 2004
Prerequisite:

ACCT 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 2009

ACCT 596 Individual Studies (1-9) Creative projects, including research and design, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2002

ACCT 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 2002

Last Import from UCM: June 2, 2012 12:27 PM
Acoustics (ACS)

ACS 402 Introduction to Acoustics (3) Basic principles of acoustics and perception of sound; fundamentals of applications: electroacoustic transducers, noise measurement and control, architectural and building acoustics, underwater sound. Offered for science and engineering majors.
Effective: Fall 1983
Prerequisite:

ACS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

ACS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

ACS 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

ACS 501 Fundamentals of Acoustics I (2) Vibrational concepts of acoustics: natural frequency and modes, resonances of lumped parameter systems, strings, elastic rods, beams and membranes.
Effective: Spring 1991
Prerequisite:

ACS 502 Fundamentals of Acoustics II (2) Acoustical wave phenomena: propagation, transmission, reflection and energy; periodic and transient waves; plane, spherical, and standing waves.
Effective: Spring 1991
Prerequisite:

ACS 505 Experimental Techniques in Acoustics (2) Properties of acoustical and vibrational transducers, electronic and other instrumentation used in fundamental data measurement, acquisition and analysis.
Effective: Fall 1990
Prerequisite:

ACS 511 Underwater Sound Propagation (3) Theoretical and empirical treatment of sound propagation in the ocean, including effects of the environment, characteristics of targets, and transducers.
Effective: Winter 1978

Effective: Spring 1984

ACS 514 Electroacoustic Transducers (3) The theory, design, and calibration of passive, linear, reciprocal electroacoustic transducers for use in both air and water media.
Effective: Spring 2012
Prerequisite:

ACS 515 Acoustics in Fluid Media (3) Wave propagation in stationary and moving fluids; acoustic radiation and scattering; standing waves in ducts and cavities.
Effective: Spring 2012
Prerequisite:

ACS 516 Acoustical Data Measurement and Analysis (3) Presents the engineering applications of recent developments in correlation and spectral analysis to acoustical measurement problems.
Effective: Fall 1983

ACS 519 Sound-Structure Interaction (3) Acoustic radiation from and effects of fluid-loading on vibrating infinite and finite plates and shells. Acoustic transmission through and reflection from elastic plates and shells, acoustic excitation of elastic plates and coupling between panels and acoustic spaces.
Effective: Spring 2012
Prerequisite:

ACS 521 (E MCH 521) Stress Waves in Solids (3) Recent advances in Ultrasonic Nondestructive Evaluation: waves; reflection and refraction; horizontal shear; multi-layer structures; stress; viscoelastic media; testing principles.
Effective: Spring 1998
Prerequisite:

ACS 530 Flow-Induced Noise (3) Introduction to the basic and applied aspects of flow-induced noise created by subsonic flows of various complexities.
Effective: Summer 2004
Prerequisite:

ACS 537 **Noise Control Engineering I** (3) As the first of three courses, this course provides an orientation to the program and covers fundamentals of noise control.

Effective: Spring 2003
Prerequisite:

ACS 573 (M E 573) **Designing Quiet Structures** (3) Course integrates structural dynamics, acoustics and optimization into unified method for designing quiet structures virtually for early product development.

Effective: Fall 2007
Prerequisite:

ACS 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 1987

ACS 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2005

ACS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

ACS 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

ACS 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Spring 1986

ACS 600 **Thesis Research** (1-15) No description.

Effective: Fall 1983

ACS 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Fall 1983

ACS 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1983

ACS 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Adult Education (ADTED)

ADTED 456 Introduction to Family Literacy (3) Explores comprehensive family literacy models, focusing upon families, services, outcomes, and roles and responsibilities of individuals, organizations, and communities.
Effective: Spring 2008
Prerequisite:
ADTED 457 Adult Literacy (3) Surveys adult basic and literacy education programs and best practices; applies recent research on adult and family literacy.
Effective: Spring 2008
Prerequisite:
ADTED 458 Early Literacy Development and Parental Involvement (3) Focuses on young children’s language and literacy development, including parental and staff support, grounded in scientifically based reading research.
Effective: Spring 2008
Prerequisite:
ADTED 459 Interactive Literacy: Parents and Children (3) Focuses on literacy and language interactions between parents and their young children (including English language learners), implementing intentional/planned learning.
Effective: Spring 2008
Prerequisite:
ADTED 460 Introduction to Adult Education (3) History, methods, agencies, program areas, and problems of adult education in the United States.
Effective: Fall 2001

ADTED 470 (CI ED 470) Introduction to Distance Education (3) An introduction to the history, philosophy, organizations, learning theories, and instructional procedures used in American and foreign distance education.
Effective: Summer 1996

ADTED 496 Independent Studies (1-18) Creative projects supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1996

ADTED 497 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1996

ADTED 497A (CI ED 497A) The Environment, Culture, and Comparative Ways of Knowing and Learning (1-3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2012 Ending: Summer 2012

ADTED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

ADTED 501 Foundations of Medical Education (3) This course provides an overview of medical education, and considers how it operates as a specific form of adult education.
Effective: Summer 2010
Prerequisite:
ADTED 502 Program and Instructional Design in Medical Education (3) This course focuses on program planning and instructional design in a medical setting with an emphasis on teaching with simulation.
Effective: Spring 2011
Prerequisite:
ADTED 505 The Teaching of Adults (3) Examination of direct and indirect teaching; contracts, application of current technology, andragogy, motivation, evaluation; knowledge of research.
Effective: Summer 1996
Prerequisite:
ADTED 506 Program Planning in Adult Education (3) Intensive study of theoretical foundations, policies, evaluation models, methods, and materials in program planning in adult education.
Effective: Summer 1996
Prerequisite:
ADTED 507 Research and Evaluation in Adult Education (3) Guided discussion and reading in selected research and evaluation methods and trends as applied in adult education settings.
Effective: Summer 1996
Prerequisite:
ADTED 508 (CI ED 508) Globalization and Lifelong Learning (3) Examination of globalization discourses and their relationships, implications and impacts on lifelong learning processes and contexts.
Effective: Summer 2004

ADTED 509 (CI ED 509) Language, Literacy, Identity, and Culture in a Global Context (3) Examines the relationship between issues of language, identity and culture for adult learners in an increasingly global context.
Effective: Spring 2004
Prerequisite:

ADTED 510 Historical and Social Issues in Adult Education (3) Social and historical foundations of adult education in the United States and selected nations.
Effective: Summer 1996
Prerequisite:

ADTED 531 Course Design and Development in Distance Education (3) In depth study of the practices of designing courses taught by print, broadcast, and telecommunications media to adult distance learners.
Effective: Summer 1996
Prerequisite:

ADTED 532 Research and Evaluation in Distance Education (3) Study of previous, current, and needed research strategies, and issues concerning evaluation in distance education.
Effective: Fall 2001

ADTED 541 (WMNST 541) Women and Minorities in Adult Education (3) Seminar on women and minority adults as learners and leaders in the various contexts of adult education.
Effective: Spring 1998
Prerequisite:

ADTED 542 Perspectives on Adult Learning Theory (3) Introduction to adult education learning theory, principles, and models of adult learning by adults alone, in groups, and in communities.
Effective: Fall 1997

ADTED 549 (HI ED 549) Community Junior College and the Technical Institute (2-3) Distinctive contributions to meeting the need for postsecondary education; development, functions, curriculum and instruction, government, administration, and finance.
Effective: Summer 1996

ADTED 550 Qualitative Research in Adult Education (3) Introduction to the theory, principles, and practice of qualitative research.
Effective: Fall 1997

ADTED 551 Qualitative Data Analysis (3) Students learn to analyze data qualitatively by engaging in, and continuously reflecting on the process.
Effective: Summer 2004
Prerequisite:

ADTED 552 Participatory Action Research (3) Examines origins, historical development, main characteristics, methodological assumptions and models, practice of participatory action research adult education and community development.
Effective: Summer 2004

ADTED 560 (LL ED 560) Teaching Reading to College Students and Adults (3) Reading literacy for adults, including college reading, Adult Basic Education (ABE), and General Educational Development (GED) programs.
Effective: Summer 1996
Prerequisite:

ADTED 561 Family Literacy (3) Examines the research related to the four components of family literacy, program effectiveness, and theoretical underpinnings.
Effective: Summer 2004

ADTED 562 Politics, Language and Pedagogy: Applying Paulo Freire today (3) Examines the work of Paulo Freire as it applies to community action projects.
Effective: Fall 2011

ADTED 564 (CI ED 564) Social and Cultural Contexts of Learning and Work (3) Examines the relationship between learning and work with special attention given to how certain forms of learning are legitimized.
Effective: Summer 2004
Prerequisite:

ADTED 570 (CI ED 570) Comparative and International Adult Education (3) Critical and comparative analysis of adult education theory and practice outside North America, including international agency involvement.
Effective: Summer 1996
Prerequisite:
ADTED 572 (CI ED 572) **Policy Studies in Lifelong Learning** (3) Examine lifelong learning policies and the relationship between lifelong learning issues and problems, policy development, policy actors and institutional structures. Effective: Summer 2004

Prerequisite:

ADTED 575 **Administration of Adult Education** (3) Organization of a program of adult education; legal status, finances, selection of teachers, learning personnel, housing; other administrative problems. Effective: Summer 1996

Prerequisite:

ADTED 580 **Adult Education Research Seminar** (1-3) A seminar dealing with specific research topics and methods in adult education. Open to advanced students in adult education. Effective: Summer 1996

Prerequisite:

ADTED 588 **Professional Seminar: Research and Adult Education** (3) Review of research in adult education, current and past, with analysis of its directions, effects, methodology, quality, financing, and prospects. Effective: Summer 1996

Prerequisite:

ADTED 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Summer 1996

ADTED 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 1997

ADTED 595 **Internship in Adult Education** (3-9) Supervised student internship in adult education agency. Effective: Summer 1996

Prerequisite:

ADTED 596 **Individual Studies** (1-9) Creative projects including non-thesis research, supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1996

ADTED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Summer 1996

ADTED 597A **Cross-Cultural Research Methods in Education** (3) This course will assist in conducting research with diverse ethnic-cultural groups. The goal is to understand the co-variation or causal relations between cultural (societal and ecological) and behavioral variables. Effective: Summer 2012 Ending: Summer 2012

ADTED 597A **Comparative and International Trends and Issues in Literacy Education** (3) Examines regional and cross-national trends and issues in literacy education. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ADTED 597B (COMM 597D) **Special Topics: The Public Pedagogy of Consumerism and Consumption in American Culture** (3) This discussion-based course will focus on the connections among consumption, learning, politics, popular culture and everyday life. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ADTED 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 1996

ADTED 601 **Dissertation Research** Ph.D. Dissertation research. Effective: Summer 2004

Prerequisite:

ADTED 602 **College Teaching** (1-3) Experience in teaching in the Adult Education Program. Effective: Fall 2006

Prerequisite:

The Pennsylvania State University
ADTED 611 **Dissertation Research** Ph.D. dissertation research
Effective: Summer 2004
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Aerospace Engineering (AERSP)

AERSP 401A Spacecraft Design--Preliminary (3) Conceptual and preliminary design of a spacecraft, its constituent subsystems, and related systems, to satisfy a given set of specifications.
Effective: Spring 2007
Prerequisite:

AERSP 401B Spacecraft Design--Detailed (2) Detailed design of the constituent subsystems and related support systems for a spacecraft.
Effective: Spring 2007
Prerequisite:

AERSP 402A Aircraft Design--Preliminary (3) Conceptual and preliminary design of an aircraft, its constituent subsystems, and related systems, to satisfy a given set of specifications.
Effective: Spring 2007
Prerequisite:

AERSP 402B Aircraft Design--Detailed (2) Detailed design of the constituent subsystems and related support systems for an aircraft.
Effective: Spring 2007
Prerequisite:

AERSP 404H Flight Vehicle Design and Fabrication II (3 per semester/maximum of 12) Project management, design, fabrication, aerodynamic and structural testing, and flight evaluation of an advanced composite flight vehicle.
Effective: Spring 2000
Prerequisite:

AERSP 405 Experimental Methods and Projects (3) Experimental methods involving a variety of aerospace engineering topics; teams of students focus on advanced measurement techniques and project engineering.
Effective: Summer 2012
Prerequisite:

AERSP 406W Structures and Dynamics Laboratory (2) Experiments in static deformations and stresses, vibrations, and control of aerospace structures.
Effective: Spring 2007
Prerequisite:

AERSP 407 Aerodynamics of V/STOL Aircraft (3) Rotary wing aircraft; VTOL and STOL performance; propeller-wing combinations; jet flap; high lift devices.
Effective: Fall 1984
Prerequisite:

Effective: Fall 1983
Prerequisite:

AERSP 412 Turbulent Flow (3) Homogeneous turbulence; spectral transfer of energy, viscous dissipation; turbulent shear flow: mixing-length theory, eddy viscosity, scaling laws, energy budget.
Effective: Winter 1978
Prerequisite:

AERSP 413 Stability and Control of Aircraft (3) Static and dynamic stability and control of aircraft; open and closed loop systems.
Effective: Fall 1989
Prerequisite:

AERSP 420 Principles of Flight Testing (3) In-flight and analytical studies of airplane performance, stability, and control; reduction of data; instrumentation; flight test techniques.
Effective: Fall 1983
Prerequisite:

AERSP 423 Introduction to Numerical Methods in Fluid Dynamics (3) Finite difference methods applied to solving viscous/inviscid fluid dynamics problems, error control, numerical stability.
Effective: Spring 2008
Prerequisite:

AERSP 424 Advanced Computer Programming (3) Engineering and scientific programming topics: object oriented programming, parallel programming, and various modern languages (e.g. C++, Java, and Ada).
Effective: Spring 2008
Prerequisite:

AERSP 425 Theory of Flight (3) Advanced wing and airfoil theory, conformal mapping, slender body theory.
Effective: Spring 2001
Prerequisite:

AERSP 430 Space Propulsion and Power Systems (3) Analysis and performance of chemical and nuclear rockets, electric
propulsion systems. Introduction to solar, chemical, thermoelectric, and nuclear power sources.
Effective: Fall 2007
Prerequisite:

AERSP 440 *Introduction to Software Engineering for Aerospace Engineers* (3) Software engineering for safety- and mission-critical systems, including requirements, management, processes, designs, programming, validation/verification, and other aspects of software development.
Effective: Spring 2008
Prerequisite:

AERSP 450 *Orbit and Attitude Control of Spacecraft* (3) Principles of mechanics and vector analysis applied to basic concepts of satellite motion and control, rocket ballistics, and gyroscopic instruments.
Effective: Fall 1987
Prerequisite:

AERSP 460 *Aerospace Control Systems* (3) Design and analysis of feedback control systems for aerospace applications; stability, root locus, time- and frequency-domain, state-space methods.
Effective: Summer 2006
Prerequisite:

AERSP 470 *Advanced Aerospace Structures* (3) Design and analysis of aerospace structures. Plates and sandwich panels; composite materials; structural dynamics; aeroelasticity; damage tolerance.
Effective: Spring 2008
Prerequisite:

AERSP 473 (E MCH 473) *Composites Processing* (3) An introduction to the principles of mechanics governing manufacturing, computer-aided design, and testing of composite materials and structures.
Effective: Summer 1988
Prerequisite:

AERSP 490 (E E 471, NUC E 490) *Introduction to Plasmas* (3) Plasma oscillations; collisional phenomena; transport properties; orbit theory; typical electric discharge phenomena.
Effective: Spring 2008
Prerequisite:

AERSP 492 (E E 472) *Space Astronomy and Introduction to Space Science* (3) The physical nature of the objects in the solar system; the earth's atmosphere, ionosphere, radiation belts, magnetosphere, and orbital mechanics.
Effective: Spring 2008
Prerequisite:

AERSP 494 *Aerospace Undergraduate Thesis* (1-3 per semester/maximum of 6) Individual problem investigations reported in written thesis and seminar lectures. Cooperative research with faculty guidance on topics of current interest.
Effective: Fall 1992
Prerequisite:

AERSP 494H *Aerospace Undergraduate Thesis* (1-3 per semester/maximum of 6) Individual problem investigations reported in written thesis and seminar lectures. Cooperative research with faculty guidance on topics of current interest.
Effective: Fall 2007
Prerequisite:

AERSP 496 *Independent Studies* (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

AERSP 497 *Special Topics* (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1983

AERSP 497A *Structural Vibrations Laboratory* (3) Students will learn aerospace structure vibration theory, experimental techniques, and perform measurements on flight structures in a laboratory environment.
Effective: Summer 2012 Ending: Summer 2012

AERSP 497B *Experimental Methods and Projects* (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

AERSP 498 *Special Topics* (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2006

AERSP 499 (IL) *Foreign Studies* (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2008

AERSP 504 *Aerodynamics of V/STOL Aircraft* (3) Jet wings, high lift devices, propellers and ducted propellers, circulation and boundary layer control, unsteady airfoil theory.
AERSP 505 Aero- and Hydroelasticity (3) Interaction of elastic systems having several degrees of freedom with fluid flows in various configurations.

Effective: Winter 1978

Effective: Fall 2007

AERSP 507 Theory and Design of Turbomachinery (3) Theory and principles of machinery design: compressors, turbines, pumps, and rotating propulsors; opportunity to work out design examples.

Effective: Winter 1978

AERSP 508 Foundations of Fluid Mechanics (3) Mathematical review, fluid properties, kinematics, conservation laws, constitutive relations, similarity principles, the boundary layer, inviscid flow, vorticity dynamics, wave motion.

Effective: Spring 1972

AERSP 509 Dynamics of Ideal Fluids (3) Irrotational flow theory, two-dimensional and axisymmetric flows, airfoil theory, complex variables, unsteady phenomena; flow with vorticity, finite wing theory.

Effective: Winter 1978

AERSP 510 Compressible Flow (3) Classification and solution of compressible flow problems, high-speed gasdynamics, unsteady motion, transonic and hypersonic flows, atmospheric reentry.

Effective: Fall 1983

Effective: Winter 1978

AERSP 514 Stability of Laminar Flows (3) The stability of laminar motions in various geometries as influenced by boundary conditions and body forces of various kinds.

Effective: Winter 1978

AERSP 518 Dynamics and Control of Aerospace Vehicles (3) Dynamical problems of aircraft and missiles, including launch, trajectory, optimization, orbiting, reentry, stability and control, and automatic control.

Effective: Fall 1987

AERSP 524 (M E 524) Turbulence and Applications to CFD: DNS and LES (3) First of two courses: Scalings, decompositions, turbulence equations; scale representations, Direct and Large-Eddy Simulation modeling; pseudo-spectral methods; 3 computer projects.

Effective: Spring 2011

AERSP 525 (M E 525) Turbulence and Applications to CFD: RANS (3) Second in two courses: Scalings, decomposition, turbulence equations; Reynolds Averaged Navier Stokes (RANS) modeling; phenomenological models; 3 computer projects.

Effective: Spring 2011

AERSP 526 (M E 526) Computational Methods for Shear Layers (3) Study of numerical solution methods for steady and unsteady laminar or turbulent boundary-layer equations in two and three dimensions.

Effective: Fall 2007

AERSP 527 (M E 527) Computational Methods in Transonic Flow (3) Numerical solution of partial differential equations of mixed type, with emphasis on transonic flows and separating boundary layers.

Effective: Fall 2007

AERSP 530 Aerothermochemistry of Advanced Propulsion Systems (3) Physics and chemistry needed to analyze high performance rocket propulsion systems including reacting high temperature radiating gas and plasma flows.

Effective: Fall 2007

AERSP 535 (M E 535) Physics of Gases (3) An introduction to kinetic theory, statistical mechanics, quantum mechanics, atomic and molecular structure, chemical thermodynamics, and chemical kinetics of gases.

Effective: Spring 2010

AERSP 540 (NUC E 540) Theory of Plasma Waves (3) Solutions of the Boltzmann equation; waves in bounded and
unbounded plasmas; radiation and scattering from plasmas.
Effective: Spring 2012
Prerequisite:

AERSP 550 Astrodynamics (3) Applications of classical celestial mechanics to space flight planning. Determination and construction of orbital parameters by approximation methods. Perturbation techniques.
Effective: Fall 1987
Prerequisite:

Effective: Summer 2000
Prerequisite:

AERSP 571 (E MCH 571, M E 571) Foundations of Structural Dynamics and Vibration (3) Modeling approaches and analysis methods of structural dynamics and vibration.
Effective: Fall 2007
Prerequisite:

AERSP 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

AERSP 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

AERSP 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 1983

AERSP 597A Advanced Experimental Methods and Projects (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

AERSP 597E Estimation Theory (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

AERSP 597F Behavior of Advanced Structures (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

AERSP 597K Small Scale Turbomachinery Design (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

AERSP 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Fall 2008

AERSP 600 Thesis Research (1-15) No description.
Effective: Fall 1983

AERSP 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

AERSP 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Provides an opportunity for supervised and graded teaching experience in aerospace engineering courses.
Effective: Fall 1983

AERSP 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 2006

AERSP 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983
African Studies (AFR)

AFR 434 (IL) (PL SC 434) War and Development in Africa (3) This course will examine the relationship between war and development in sub-Saharan Africa in the post colonial era. Effective: Fall 2012 Future: Fall 2012
Prerequisite:

Prerequisite:

AFR 443 (IL) (PL SC 443) Ethnic Conflict in Africa (3) This course explores the various causes and impacts of ethnic conflicts in the African context. Effective: Fall 2012 Future: Fall 2012
Prerequisite:

Prerequisite:

Prerequisite:

Prerequisite:

AFR 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2012 Future: Fall 2012

AFR 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Fall 2012 Future: Fall 2012
Prerequisite:

AFR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 2012 Future: Fall 2012

AFR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2012 Future: Fall 2012

AFR 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Fall 2012 Future: Fall 2012

AFR 527 (SOC 527) Migration, Urbanization, and Policy in the Developing World (3) This course examines the dynamics of migration and urbanization processes, as well as their policy implications, in non-industrialized regions of the world. Effective: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
African and African American Studies (AAA S)

AAA S 401 Afro-American Studies Seminar (3) A seminar examining theoretical and methodological issues in Afro-American Studies.
Effective: Spring 2001 Ending: Summer 2012
Prerequisite:

AAA S 403 South Africa Today (3) A course examining the South African government's policy of apartheid: its history, why it exists, how it works, and the prospects for change.
Effective: Spring 2001
Prerequisite:

AAA S 405 African Studies Methodologies (3) Multidisciplinary research techniques for studying in and about Africa.
Effective: Spring 1997 Ending: Summer 2012
AAA S 409 (US) (SOC 409) Racial and Ethnic Inequality in America (3) The impact of inequality and discrimination on individual and group identity among various racial and ethnic groups.
Effective: Summer 2005 Ending: Fall 2012
Prerequisite:

AAA S 410 Spirit, Space, Survival: Contemporary Black Women (3) How recent Black women have used spirit and space to survive.
Effective: Summer 2011 Ending: Summer 2012
Prerequisite:

AAA S 412 (US;IL) (THEA 412) African American Theatre (3) Exploration of the development of African American theatre from its roots in Africa through the Diaspora to the present time.
Effective: Summer 2005 Ending: Fall 2012
Prerequisite:

AAA S 416 (US;IL) (S T S 416, WMNST 416) Race, Gender and Science (3) The class will focus on race and gender as products of science, and how societal values shape scientific activity.
Effective: Summer 2008 Ending: Fall 2012
Prerequisite:

AAA S 422 (US) (CAS 422) Contemporary African American Communication (3) A focused study on the continuities between African and African American culture and communication.
Effective: Summer 2005 Ending: Fall 2012
Prerequisite:

AAA S 431 (US;IL) (HIST 431) Black Liberation and American Foreign Policy (3) This course deals with American foreign policy and Black liberation in Africa since 1945.
Effective: Summer 2005 Ending: Summer 2012
Prerequisite:

AAA S 432 (IL) (HIST 432) Between Nation and Empire: The Caribbean in the 20th Century (3) An exploration of the political evolution of the Caribbean Region over the course of the 20th Century.
Effective: Summer 2005 Ending: Summer 2012
Prerequisite:

AAA S 434 (IL) (PL SC 434) War and Development in Africa (3) This course will examine the relationship between war and development in sub-Saharan Africa in the post colonial era.
Effective: Summer 2006 Ending: Summer 2012
Prerequisite:

AAA S 440 (US;IL) (PL SC 440, I B 440) Globalization and Its Implications (3) This course explores the socioeconomic implications of globalization.
Effective: Spring 2008 Ending: Fall 2012
Prerequisite:

AAA S 443 (IL) (PL SC 443) Ethnic Conflict in Africa (3) This course explores the various causes and impacts of ethnic conflicts in the African context.
Effective: Summer 2005 Ending: Summer 2012
Prerequisite:

AAA S 445Y (US) (LER 445Y, PL SC 445Y) Politics of Affirmative Action (3) Examines history, politics, and economics of the use of special programs to advance racial interests in the U.S.
Effective: Spring 2008 Ending: Summer 2012
Prerequisite:

Effective: Summer 2005 Ending: Summer 2012
Prerequisite:

AAA S 459 (IL) (PL SC 459) Culture and World Politics (3) Role of culture in world politics.

The Pennsylvania State University
AAA S 460 (US;IL) (PHIL 460) African American Philosophy (3) Major works by African American Philosophers, on topics of race, freedom, citizenship, nationhood, law and society. Effective: Fall 2009 Ending: Summer 2012

Prerequisite:

Prerequisite:

Prerequisite:

Prerequisite:

AAA S 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 1994

AAA S 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007 Ending: Summer 2012

AAA S 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Fall 2001 Ending: Summer 2012

Prerequisite:

AAA S 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1994 Ending: Summer 2012

AAA S 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 1994 Ending: Summer 2012

AAA S 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005 Ending: Summer 2012

AAA S 530 Globalization in Africa (3) Students will examine globalization and its socioeconomic implications in Africa. Effective: Fall 2008

AAA S 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1996

AAA S 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 1996

Last Import from UCM: June 2, 2012 12:27 PM

The Pennsylvania State University
Agricult Biosecurity (AGBIO)

AGBIO 520 (HLS 520) Agricultural Biosecurity: Protecting a Key Infrastructure (3) Course will explore intentional and unintentional threats to the agriculture-food system, history and current approaches for safeguarding this key infrastructure. Effective: Fall 2010
Prerequisite:

AGBIO 520 Agricultural Biosecurity: Protecting a Key Infrastructure (3) Course will explore intentional and unintentional threats to the agriculture-food system, history and current approaches for safeguarding this key infrastructure. Effective: Spring 2012
Prerequisite:

AGBIO 521 (FD SC 521) Food Defense: Prevention Planning for Food Processors (3) Course prepares current and aspiring professionals to learn, recognize and apply measures to prevent intentional contamination of the food supply. Effective: Summer 2010
Prerequisite:

AGBIO 594 Agricultural Biosecurity and Food Defense Capstone Experience (3) Culminating experience in the iMPS-HLS for the online Agricultural Biosecurity and Food Defense option. Effective: Summer 2012
Prerequisite:

AGBIO 801 (PATH 801) Veterinary Infectious Disease Diagnostic and Surveillance Systems (3) This course provides knowledge of diagnostic and surveillance systems used to detect infectious diseases and protect against animal agricultural biological attack. Effective: Summer 2010
Prerequisite:

AGBIO 802 (PPATH 802) Plant Protection: Responding to Introductions of Threatening Pests and Pathogens (3) This course provides knowledge of plant biosecurity, plant disease, regulations, and technologies using case study examples. Effective: Summer 2010
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Agricultural Economics & Rural Sociology (AEREC)

AEREC 502 Economics of Natural Resources and Rural Development (3) Emphasis will be placed on the application of economic concepts to problems and policies in rural areas. Effective: Spring 2011  
Prerequisite:

AEREC 503 Agricultural Marketing (3) Economic analysis of food marketing firms and institutions; identification and measurement of dimensions of market performance; public policy. Effective: Spring 2011  
Prerequisite:

AEREC 510 Econometrics I (3) General linear model, multicolinearity, specification error, autocorrelation, heteroskedasticity, restricted least squares, functional form, dummy variables, limited dependent variables. Effective: Spring 2011  
Prerequisite:

AEREC 511 Econometrics II (3) Stochastic regressors, distributed lag models, pooling cross-section and time-series data, simultaneous equation models. Effective: Spring 2011  

AEREC 519 Resource and Environmental Economics I (3) Theories and methods for economic analysis of natural resource and environmental policies with applications to current issues. Effective: Spring 2011  
Prerequisite:

AEREC 527 Quantitative Methods I (3) Quantitative techniques applied to agricultural economic issues. Effective: Spring 2011  
Prerequisite:

AEREC 533 (CEDEV 533) Rural Development Research Methods and Topics (3) Advanced theories and methods for rural economic development research. Effective: Spring 2011  
Prerequisite:

AEREC 534 Agricultural Production Economics II (3) Current problems and methods of analysis in production economics research. Effective: Spring 2011  
Prerequisite:

Prerequisite:

AEREC 541 Resource and Environmental Economics II (3) Key theories and analytical methods of resource and environmental economics. Effective: Spring 2011  
Prerequisite:

Prerequisite:

AEREC 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 2011

AEREC 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 2011

AEREC 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Spring 2011

AEREC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and fall outside the scope of formal courses. Effective: Spring 2011

AEREC 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject
which may be topical or of specific interest.
Effective: Spring 2011

AEREC 597A Applied Microeconometrics (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of specific interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

AEREC 597E Applied Microeconomics Theory (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of specific interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

AEREC 598 Special Topics (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2011

AEREC 599 (IL) Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2011

Effective: Spring 2011

AEREC 601 Thesis Preparation No description.
Effective: Spring 2011

AEREC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) No description.
Effective: Spring 2011

AEREC 610 Thesis Research Off Campus (1-15) No description.
Effective: Spring 2011

AEREC 611 Ph.D. Dissertation Part-Time No description.
Effective: Spring 2011

Last Import from UCM: June 2, 2012 12:27 PM
Agricultural and Biological Engineering (A B E)

A B E 500 Research Methods in Agricultural and Biological Engineering (3) Introduction to research philosophy(ies), methodologies, issues and policies; measures of research quality; research report writing; research ethics.
Effective: Spring 1997

A B E 504 Mechanics and Properties of Particulate Materials (3) Constitutive equations for cohesionless and cohesive particulate materials; measurement of properties; application to storage, flow, and consolidation.
Effective: Spring 1996

A B E 513 Applied Finite Element, Finite Difference, and Boundary Element Methods (3) Applications of numerical methods in the areas of structures, fluid dynamics, heat and mass transfer, and machine design.
Effective: Fall 1996

A B E 517 Surface Transport of Agricultural Pollutants (3) Understanding and modeling the surface transport processes of agricultural pollutants; particularly erosion, sediment transport, and movement of sediment-attached constituents.
Effective: Spring 1996

A B E 559 Biological and Agricultural Systems Simulation (3) Continuous simulation modeling of biological and physical systems, numerical simulation techniques, validation and verification, difference measures, sensitivity analysis.
Effective: Spring 2006
Prerequisite:
A B E 562 (E MCH 562) Boundary Element Analysis (3) Numerical solution of boundary value problems using fundamental solutions; application to problems in potential theory, diffusion, and elastostatics.
Effective: Spring 1996
Prerequisite:
A B E 568 Food Safety Engineering (3) Predictive microbiology and modeling, conventional and novel detection and enumeration methods, conventional and novel processing methods, applied to plant layout, construction materials, and equipment design for microbial food safety.
Effective: Spring 2008
Prerequisite:
A B E 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1996

A B E 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1996

A B E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1996

Effective: Spring 1996

A B E 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1996

A B E 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in development of instructional materials, organizing and conducting lectures, laboratories, and evaluating students in undergraduate Agricultural Engineering courses (1-499).
Effective: Spring 1996

Effective: Spring 1996

A B E 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 1996

Last Import from UCM: June 2, 2012 12:27 PM

The Pennsylvania State University
Agricultural and Extension Education (AEE)

AEE 400 Educational Programs in Agriculture for Developing Countries (3) Development and implementation of educational programs in agriculture in developing countries. Effective: Summer 1999

Prerequisite:

AEE 412 Methods of Teaching Agriculture and Environmental Science (4) Instructional strategies and media; directing individual and group learning activities; assessing student performance and quality of instruction in vocational agriculture. Effective: Fall 2001

AEE 413 Program Planning and Instructional Development (3-4) A course in planning, developing, and organizing school-based curriculum, summer programs, advisory councils, and facilities for environmental/ agricultural education. Effective: Fall 2001

AEE 414 Workforce Guidance in Agricultural Industry (1-4) Opportunities and developments in agricultural industry, on-farm agricultural work, professional agricultural positions, and off-farm, nonprofessional agricultural occupations. Effective: Spring 2000

AEE 415 Agricultural and Environmental Development (1-6) Intensive professional and technical treatment of various subject-matter fields to aid teachers in maintaining competence. Effective: Summer 1999

Prerequisite:

AEE 437 (AN SC 437) Equine Facilitated Therapy (3) Equine Facilitated Therapy uses equine-related activities to contribute positively to the wellbeing of people with disabilities. Effective: Spring 2002

AEE 440 Communication Methods and Media (3) Mass media techniques for reporting and promoting extension and related programs, including message preparation, presentation, and strategy development. Effective: Spring 2001

Prerequisite:

AEE 450 Program Design and Delivery (3) Principles, methods, and practices of extension education in agriculture, community resource development, family living, environmental affairs, 4-H, and youth programs. Effective: Spring 2004

Prerequisite:

AEE 460 Foundations in Leadership Development (3) This course explores historical and contemporary leadership theories, models and perspectives within social, cross-cultural, and political contexts. Effective: Spring 2001

Prerequisite:

AEE 465 Leadership Practices: Power, Influences, and Impact (3) Explores the leader role as it relates to issues of purpose, social responsibility, political influences, and legal constraints. Effective: Spring 2000

AEE 490 Colloquium (1-3) Seminars consisting of a series of individual lectures by faculty, students, or outside speakers. Effective: Summer 1999

AEE 495 Internship in Agricultural and Extension Education (1-15) Participation in the total program of instruction in agriculture in a selected high school. Effective: Summer 1999

Prerequisite:

AEE 495A Student Teaching in Agricultural Education (1-12) Student teaching experience required for students that are seeking agricultural education teacher certification. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

Prerequisite:

AEE 495C Student Teaching in Environmental Education (1-12) Student teaching experience for students that are seeking environmental science teacher certification. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

Prerequisite:

Prerequisite:

AEE 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

The Pennsylvania State University
AEE 497 Special Topics (1-9) Formal courses given on topical or special interest subjects which may be offered infrequently.
Effective: Fall 1999

AEE 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1999

AEE 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

AEE 501 Foundations of Agricultural and Extension Education (3) Historical development, social and philosophical foundations, and current status in relation to the total vocational-technical education program.
Effective: Spring 2000

AEE 505 (CEDEV 505) Leadership Development (3) Exploration, understanding, and application of leadership roles, strategies, and principles in group and community settings.
Effective: Spring 2010

AEE 508 Administration and Supervision of Agricultural and Extension Education (3) Basics of vocational funding, supervision, leadership, and management for agricultural education.
Effective: Spring 2004

AEE 509 Contemporary Research in Agricultural and Extension Education (1-6) Analysis of contemporary research issues in agricultural education and extension education through lecture, review of literature, discussion, speakers, and active participation.
Effective: Spring 2004

AEE 511 Youth Leadership Development in the Agricultural and Life Sciences (3) This course will address youth leadership development theories and emphasize formal and nonformal youth programs in agricultural and life sciences.
Effective: Summer 2006

AEE 515 Engagement Through Outreach Scholarship in Higher Education (3) To develop an understanding of outreach scholarship as a nonformal educational system and its relationship to relevant social systems.
Effective: Summer 2011
Prerequisite:

AEE 520 Scientific Method in the Study of Agricultural and Extension Education (1-4) Methods of procedure in investigation and experimentation in education, accompanied by a critical examination of studies made in agricultural education.
Effective: Spring 2000

AEE 521 Basic Applied Data Analysis in Agricultural and Extension Education (1-4) Continuation of AEE 520; emphasis upon statistical techniques for students’ individual problems.
Effective: Spring 2000

AEE 524 Change in Education (1-3) Analysis of occupational needs of students and employment prospects; organization of courses of study and other activities of teachers.
Effective: Spring 2000

AEE 530 Teaching and Learning in Agricultural Science (3-4) Organization, planning and delivery of effective college teaching methods, matching/learning styles, evaluation of instruction and learning.
Effective: Spring 2000

AEE 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2000

AEE 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2007
Prerequisite:

AEE 596 Individual Studies (1-9) Creative projects including non-thesis research, supervised on an individual basis and which fall outside the scope of formal courses.
AEE 596A **Agriculture in the Classroom** (1-3) Development of curriculum materials designed to integrate agricultural science concepts and principles into elementary and middle school curricula.

Effective: Fall 1999

AEE 596B **Curriculum for Agriscience Education: Animal Science** (1-6) CASE Institute is a professional development workshop to provide teachers training for the instruction related to Principles of Animal Science.

Effective: Summer 2012 Ending: Summer 2012

AEE 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 1999

AEE 597B **Seminar in Multivariate Techniques** (3) Examination of multivariate data analysis techniques.

AEE 600 **Thesis Research** (1-15) No description.

Effective: Fall 1999

AEE 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Fall 1999

AEE 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Involves experience in teaching undergraduate agricultural education courses under the supervision of the faculty.

Effective: Fall 1999

AEE 610 **Thesis Research Off-Campus** (1-15) No description.

Effective: Fall 1999

AEE 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Fall 1999

Last Import from UCM: June 2, 2012 12:27 PM
Agronomy (AGRO)

AGRO 410W Physiology of Agricultural Crops (4) Study of the relation of plants to their environment and the physiology of crop plant growth.
Effective: Fall 2011
Prerequisite:

AGRO 423 Forage Crop Management (3) Application of agronomic, ecological, and physiological principles to the production and management of pasture and forage crops.
Effective: Winter 1978
Prerequisite:

AGRO 425 Field Crop Management (3) Application of agronomic, ecological, and physiological principles to management systems for the efficient production of the major field crops.
Effective: Winter 1978
Prerequisite:

AGRO 438 (AGECO 438) Principles of Weed Management (4) Weedy plant taxonomy, biology and ecology of weedy plant populations, and integration of biological, chemical, cultural and biological controls.
Effective: Fall 2009
Prerequisite:

AGRO 460 (BIOTC 460) Advances and Applications of Plant Biotechnology (3) This course provides a comprehensive overview and current status of plant biotech research. The course provides knowledge of plant systems that fall in the category of GMOs.
Effective: Spring 2009
Prerequisite:

AGRO 489 Supervised Experience in College Teaching (1-3) Participate with instructors in teaching an undergraduate agronomy course; assist with teaching, evaluation, and development of instructional materials.
Effective: Summer 1996
Prerequisite:

AGRO 490 (SOILS 490) Colloquium (1) Continuing written and oral presentations developed by students in consultation with the course instructor.
Effective: Fall 1993
Prerequisite:

AGRO 495 Internship (1-5) Supervised field experience related to the student's major.
Effective: Fall 1981
Prerequisite:

AGRO 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

AGRO 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

AGRO 501 Graduate Student Dialogue (1) Orientation discussion group for incoming graduate students. Review departmental policies and learn about the diverse faculty programs in the department.
Effective: Summer 2009

AGRO 510 Ecology of Agricultural Systems (3) Examination of ecological concepts and research on agroecosystem processes and dynamics via discussion and analysis of review and research papers.
Effective: Summer 2006
Prerequisite:

AGRO 518 Responses of Crop Plants to Environmental Stress (3) Physiological and ecological aspects of the response of crop plants to environmental stresses in establishment, persistence, and reproduction.
Effective: Spring 1996
Prerequisite:

AGRO 555 Effective Scientific Communications (2) Instruction and practice in verbal communication of scientific information to technical and non-technical audiences through realistic exercises with invited audiences.
Effective: Spring 2011

AGRO 590 (SOILS 590) Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1993
AGRO 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

AGRO 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

AGRO 600 Thesis Research (1-15) No description.
Effective: Fall 1983

AGRO 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

AGRO 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised training in teaching methodology for classroom and laboratory type instruction. Supervision provided by faculty member responsible for course.
Effective: Fall 1983

AGRO 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

AGRO 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

AGRO 851 Applied Plant Population Biology (3) Lectures and exercises designed to develop student competency in plant selection to promote ecological diversity and genetically superior plants.
Effective: Summer 2010

Last Import from UCM: June 2, 2012 12:27 PM
American Studies (AM ST)

AM ST 400 Early America to 1765 (3) American society and culture in the colonial period. Effective: Fall 2007
Prerequisite:

AM ST 401 Revolution and Early Republic, 1765-1815 (3) American society and culture during the period of the Revolution and the Early Republic. Effective: Fall 2007
Prerequisite:

AM ST 402 Antebellum and Civil War Era, 1815-1876 (3) Social and cultural conditions, sectional rivalry, political crises, warfare, and Reconstruction from 1815 to 1876. Effective: Fall 2007
Prerequisite:

AM ST 404 Industrial America (3) An analysis of American politics, literature, society, and economics from the 1870s to World War II. Effective: Fall 2007
Prerequisite:

AM ST 405 Cold War (3) Examination of social and cultural currents in American life from World War II to 1990. Effective: Fall 2007
Prerequisite:

AM ST 406 Contemporary America (3) A study of the historic and cultural currents of life in the United States during the recent past. Effective: Fall 2007
Prerequisite:

AM ST 412 American Eras (3) Examination in depth of various and distinctive American time periods; subtitle expresses specific content. (May be repeated for credit.) Effective: Fall 2007
Prerequisite:

AM ST 417 American Beliefs and Myths (3) A study of symbols, beliefs, and myths in the American experience; subtitles express specific content. (May be repeated for credit.) Effective: Fall 2007
Prerequisite:

AM ST 421 (PHIL 401) American Philosophy (3) Survey of key figures and movements in American thought, including the Transcendentalists, the Pragmatists, and contemporary developments. Effective: Fall 2007
Prerequisite:

AM ST 422 (RL ST 422) Religion and American Culture (3 per semester, maximum of 6) Selected topics, problems, or historical movements in American religion; relation between religion and American culture. Effective: Summer 1996

Prerequisite:

AM ST 431 National Character (3) An examination of the characteristics of the American people and other national groups. Effective: Fall 2007
Prerequisite:

AM ST 432 Ethnicity and the American Experience (3) Theoretical and conceptual framework of ethnic studies: examination of specific issues related to major American ethnic and racial groups. Effective: Fall 2007

AM ST 435 Americans at Work (3) A study of occupational and organizational cultures in America. Effective: Fall 2007
Prerequisite:

AM ST 439 American Regional Cultures (3-6) An interdisciplinary study of the culture of a region of the United States, such as the south or the west. Effective: Fall 2007
Prerequisite:

AM ST 441 (US) (KINES 441) History of Sport in American Society (3) Background, establishment, and growth of sport in America from colonial times to the present. Effective: Fall 2007
AM ST 448 (ANTH 448) **Ethnography of the United States** (3) Ethnographic descriptions of various dimensions of life in the United States.
Effective: Fall 2007

AM ST 460 **American Art and Architecture of the Seventeenth and Eighteenth Centuries** (3) Survey of American painting, sculpture, decorative arts, and architecture of seventeenth and eighteenth centuries with special emphasis on non-British cultures.
Effective: Fall 2007

Effective: Fall 2007

Effective: Fall 2007

AM ST 472 (ENGL 434) **Topics in American Literature** (3) Focused study of a particular genre, theme, or problem in American literature. (May be repeated for credit.)
Effective: Fall 2007

AM ST 475 (US) (ENGL 431) **Black American Writers** (3 per semester, maximum of 6) A particular genre or historical period in the development of Black American literature.
Effective: Fall 2007

AM ST 476 (ENGL 492, WMNST 491) **American Women Writers** (3) A study of selected American women writers.
Effective: Spring 2008

AM ST 479 **American Expressive Forms** (3) Examination in depth of various and distinctive American expressive forms; subtitle expresses specific content. (May be repeated for credit.)
Effective: Fall 2007

AM ST 480 **Museum Studies** (3) An introduction to the basic purposes, philosophies, and functions of a museum, with emphasis on the problems of museum administration. (May be repeated for credit.)
Effective: Fall 2007

AM ST 481 **Historic Preservation** (3) A study of preservation practices and programs in America.
Effective: Fall 2007

AM ST 482 **Public Heritage** (3) A study of public heritage practices and programs in America. (May be repeated for credit.)
Effective: Fall 2007

AM ST 483 **Oral History** (3) A study of oral history techniques and issues in America.
Effective: Fall 2007

AM ST 491W **American Themes, American Eras** (3-6) Interdisciplinary American culture course on major themes and eras such as the American Revolutionary Era or the 1930s.
Effective: Fall 2007

AM ST 493 (ENGL 493) **The Folktale in American Literature** (3) A survey of the literary uses of the folktale and legendary materials, with particular concentration on the literature of America.
Effective: Spring 1986

AM ST 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

AM ST 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

AM ST 495 **Internship** (1-6) Supervised internship for undergraduate or graduate American Studies majors at a museum or another cultural, historical, or arts agency.

The Pennsylvania State University
Effective: Fall 2007
Prerequisite:

AM ST 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

AM ST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

AM ST 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

AM ST 500 Theory and Methods (3) Introduction to graduate work in American Studies through exploration of the approaches, materials, and interpretations of the field.
Effective: Fall 2007

AM ST 502 Problems in American Studies (3-6) A variable-content course, addressed each term to a specific problem, topic, or period in American culture.
Effective: Summer 1970

AM ST 510 U.S. Literature and Culture (3) Studies exploring the relationship between literature and culture in American Studies.
Effective: Summer 2007

AM ST 511 Pivotal Books (3-9) Exploration of a number of books which have been particularly influential in shaping thinking about American civilization.
Effective: Fall 2007

AM ST 520 Topics in Popular Culture (3) A detailed exploration of aspects of American popular culture, including popular culture's relationship to society and scholarship.
Effective: Summer 2007

AM ST 530 Topics in American Folklore (3) A detailed exploration of aspects of folklore and folklife in America.
Effective: Fall 2007

AM ST 531 Material Culture and Folklife (3) Investigation of American material culture and folklife, including topics such as traditional design, cultural landscape, architecture, art, craft and food.
Effective: Summer 2007

AM ST 533 American Civilization in the Eighteenth Century (3-9) Detailed investigation of specific topics in eighteenth-century American civilization.
Effective: Fall 2007

AM ST 534 American Civilization in the Nineteenth Century (3-9) Representative interdisciplinary investigation of social, historical, economic, and aesthetic forces predominant in nineteenth-century America.
Effective: Fall 2007

AM ST 535 American Civilization in the Twentieth Century (3-9) Detailed investigation of specific periods or topics in twentieth-century American civilization.
Effective: Fall 2007

Effective: Summer 2007

AM ST 540 Ethnography and Society (3) An advanced course on ethnographic theories, methods, and case studies, emphasizing current controversies and new strategies in field work.
Effective: Summer 2007

AM ST 550 Seminar in Public Heritage (3) A study of the ways Americans use and understand heritage in public settings.
Effective: Summer 2007
Prerequisite:

AM ST 551 Seminar in Local and Regional Studies (3) Detailed investigation of local and regional historical themes and
topics, emphasizing research methods.
Effective: Summer 2007

AM ST 560 Seminar in Race and Ethnicity (3) Studies exploring issues of race and ethnicity in America that can be addressed with theories and methods of American Studies.
Effective: Summer 2007

AM ST 561 Seminar in Gender and Culture (3) Thematic study of gender issues in American history and culture.
Effective: Summer 2007

AM ST 570 Topics in American Art (1-6) Various themes within the American arts will be explored under this rubric.
Effective: Fall 2007

AM ST 575 Museum Internship (3) A supervised museum internship experience featuring a "hands on" introduction into aspects of the curatorial profession.
Effective: Fall 2007

AM ST 579 Readings in American Studies (3-9) Directed readings in selected areas of American Studies.
Effective: Fall 2008
Prerequisite:

AM ST 580 Projects in American Studies (1-6) Independent exploration within American Studies; evidenced by major paper, film, exhibition or specialized examination.
Effective: Fall 2007

AM ST 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2007

AM ST 591 Seminar in American Studies (3) An advanced seminar covering particular themes and issues in American Studies.
Effective: Fall 2007
Prerequisite:

AM ST 592 Field Experience in American Studies (3) Field projects and study tours to off-campus sites using American Studies methodologies.
Effective: Summer 2007
Prerequisite:

AM ST 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

AM ST 595 Internship (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Fall 2008

AM ST 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

AM ST 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2007

AM ST 600 Thesis in American Studies (6) A thesis supervised by the American Studies Program.
Effective: Summer 2007
Prerequisite:

AM ST 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 2008

AM ST 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Fall 2008
Prerequisite:

Effective: Fall 2008
AM ST 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 2008

Last Import from UCM: June 2, 2012 12:27 PM
Anatomy-Hy (ANAT)

ANAT 503 Gross Anatomy (6) Gross structure, organization, and function of the human body with laboratories devoted to dissection of the human body.
Effective: Summer 1983

ANAT 505 Histology and Embryology I (2) Light and electron microscopic structure of cells, specialized tissues, organization, basic organogenesis, correlation between cellular structure and physiological function.
Effective: Spring 1995

ANAT 506 Histology and Embryology II (2) Continuation of ANAT 505; microscopic structure of cells, specialized tissues, organization, basic organogenesis, correlation between cellular structure and physiological function.
Effective: Summer 1994
Prerequisite:

ANAT 511 (NEURO 511) Neurobiology II (3) Structure and physiology of central and peripheral nervous system, including specific sense organs.
Effective: Summer 1987
Prerequisite:

ANAT 512 Human Embryology and Teratology (2) Study of developing human embryo including gamete production and fusion, implantation, organogenesis and major abnormalities of organ systems.
Effective: Fall 1983

ANAT 515 (NEURO 515) Developmental Neurobiology (2) Development of the nervous system in all its aspects.
Effective: Fall 1986

ANAT 584 (PHARM 584) Human Anatomy and Development A: Gross Human Anatomy (1) Explore gross human anatomy providing orientation to organs and the overall relationship of organs and structures within the human body.
Effective: Fall 2007

ANAT 585 (PHARM 585) Human Anatomy and Development B: Human Development (1) Explores human embryology and organogenesis beginning at the third week of gestation through parturition.
Effective: Fall 2007

ANAT 586 (PHARM 586) Human Anatomy and Development C: Stem Cell Biology and Regenerative Medicine (1) Exploration of stem cell biology and the role of stem cells in regenerative medicine.
Effective: Fall 2007

ANAT 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

ANAT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

ANAT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

ANAT 600 Thesis Research (1-15) No description.
Effective: Fall 1983

ANAT 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

ANAT 602 Supervised Experience in College Teaching (1-6 per semester/maximum of 99) Supervised experience in the development of instructional materials, the organization and conduct of lectures/laboratories, the evaluation and counseling of students.
Effective: Fall 2005

ANAT 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983
ANAT 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

ANAT 743 Musculoskeletal Advanced Anatomy (3) This course provides exposure to the relevancy of anatomy to the clinical setting and specifically covers topics related to musculoskeletal clinical presentations.
Effective: Spring 2012
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Anesthesiology-Hy (ANSTH)

ANSTH 700 Anesthesia for Third Year Students (5) Introduction to clinical anesthesia practice, local and general and cardiopulmonary resuscitation. Effective: Spring 2010
Prerequisite:

ANSTH 740 Anesthesia Acting Internship (5) The acting internship in anesthesia is designed to expand on the experiences obtained in courses ANSTH 700 and 770. Effective: Spring 2009
Prerequisite:

ANSTH 770 Anesthesiology Clinical Elective (5) The objectives for this course utilize the objectives of Ansth. 700 as a base. Effective: Winter 1978
Prerequisite:

ANSTH 772 Pain Management (5) Includes evaluation, diagnosis, and treatment of complex chronic pain problems in an outpatient model. A hands-on approach will be emphasized. Effective: Summer 1985
Prerequisite:

ANSTH 796 Anesthesia Individual Studies (5) Special studies program, usually involving investigative work, all hours and assignments by arrangement with a member of the anesthesia staff-faculty. Effective: Spring 2009
Prerequisite:

ANSTH 796A Anesthesiology Individual Studies (2.5) Anesthesiology Individual Studies for 3rd year medical students. Effective: Spring 2009
Prerequisite:

ANSTH 797 Anesthesia Special Topics (5) Anesthesia Special Topics Effective: Spring 2009
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Animal Science (AN SC)

AN SC 400 Application of Management Principles (1) Students will learn to apply business management skills to the animal production environment through interactive discussions and assignments.
Effective: Summer 1998
Prerequisite:

AN SC 405 Advanced Canine Nutrition and Management (3) Application of biological principles to the care and nutrition of dogs; interactive discussions of contemporary nutrition and management issues.
Effective: Spring 2002
Prerequisite:

AN SC 407 Advanced Horse Management (3) Detailed study of anatomy and physiology of the horse as related to nutrition, reproduction, athletic ability, unsoundness and control of diseases and parasites. Detailed discussion of management practices, facility design and contemporary issues.
Effective: Summer 1999
Prerequisite:

AN SC 410 Advanced Dairy Herd Management (4) Application of dairy herd management principles using case studies and actual dairy farm situations.
Effective: Spring 2004
Prerequisite:

AN SC 413 Transgenic Biology (3) The principles and concepts used to generate genetically engineered animals by pronuclear, knockout, and cloning methods; and applied biotechnology applications.
Effective: Summer 2002
Prerequisite:

AN SC 414 Comprehensive Animal Biotechnology (3) A comprehensive review of the multidisciplinary area of animal biotechnology examining historical developments, current progress, and future directions.
Effective: Spring 2003
Prerequisite:

AN SC 417 Horse Judging (2) Evaluation and selection of halter and performance horses, and presentation of oral reasons.
Effective: Spring 2002

Effective: Summer 2003

AN SC 419W Applied Animal Welfare (3) Assessment of management practices impacting animal welfare; devoted to livestock species, companion animals, captive exotic species, and animals in research.
Effective: Spring 2009
Prerequisite:

AN SC 420 Animal Nutrition and Feed Technology (4) Feedstuff evaluation, quality control, handling, storage: life cycle feeding of beef cattle, dairy cattle, sheep, swine, horses, and poultry.
Effective: Spring 1994
Prerequisite:

AN SC 421 Poultry Evaluation and Selection (2) Introduction and application of standards and principles used to evaluate live poultry and poultry products.
Effective: Summer 2004
Prerequisite:

AN SC 422 Dairy Cattle Evaluation and Selection (3) Methods used in evaluation of production and type traits and their role in selecting dairy breeding stock domestically and internationally.
Effective: Summer 1998
Prerequisite:

AN SC 423 Comparative Physiology of Domestic Animals (3) A comparative approach to understanding body function in domesticated avian and mammalian species.
Effective: Summer 1999
Prerequisite:

Effective: Summer 1999
Prerequisite:

AN SC 425 (VB SC 425) Principles of Avian Diseases (3) Principles of pathogenesis and control of diseases in poultry and other avian populations. Case material used where appropriate.
Effective: Spring 2009
AN SC 426 Advanced Judging and Selection (2 per semester, maximum of 4) Development of critical thinking and communication skills through evaluation and selection of animals and animal products. Effective: Summer 1998

AN SC 427 Milk Secretion (3) Development and physiology of the mammary gland and factors which affect the amount and composition of milk produced. Effective: Spring 2009

AN SC 429 Advanced Beef Cattle Production (3) Application of scientific and business principles to practical production and management issues using case studies or selected live settings. Effective: Summer 2010

AN SC 431W Physiology of Mammalian Reproduction (4) Physiological processes of reproduction in animals, including the use of current and emerging technologies. Effective: Summer 1999

AN SC 432 Techniques in Livestock Reproduction (2) Demonstration and practice in estrus detection, inseminating techniques, pregnancy detection, embryo recovery and transfer methods. Effective: Fall 2008

AN SC 437 (AEE 437) Equine Facilitated Therapy (3) Equine Facilitated Therapy uses equine-related activities to contribute positively to the wellbeing of people with disabilities. Effective: Spring 2002

AN SC 442 Quantitative Inheritance and Animal Breeding (3) Genes in populations: additive and nonadditive gene effects; selection and mating systems. Effective: Fall 1983

AN SC 447 Applied Equine Behavior (3) Theory and application of behavior principles as they apply to horses in free-running and domestic situations. Effective: Spring 2009

AN SC 450 Dairy Farm Management Systems (3) Capstone course emphasizing integration of dairy farm management principles into whole farm systems. Effective: Summer 1998

AN SC 451 Dairy Systems Analysis (1-2 per semester/maximum of 2) Students will evaluate all systems of a working dairy farm business. Effective: Spring 2011

AN SC 457 Equine Reproduction and Breeding Farm Management (3) Advanced aspects of equine reproduction will be covered, including collection of semen, processing it for shipment, and insemination of mares. Effective: Summer 2008

AN SC 467W Equine Nutrition and Feeding (3) Equine gastrointestinal anatomy and physiology; energy and nutrient requirements for body functions; applied interrelationships between nutrition, health, and performance. Effective: Spring 2012

AN SC 477 Riding Instructor Training (1) Management of equestrian riding lessons, teaching techniques, lesson plans, program planning, time management, and handling of mounted groups. Effective: Spring 2011

AN SC 479 (BIOL 479) General Endocrinology (3) Endocrine mechanisms regulating the morphogenesis, homeostasis, and functional integration of animals. Effective: Fall 2009

AN SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

AN SC 496A Animal Science Teaching Assistant (2) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
AN SC 496H AN SC Honors Independent Study (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

AN SC 496H AN SC Honors Independent Study (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

AN SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

AN SC 497A Poultry Diet Supplementation (1) Study the use of poultry manure as a dietary supplement and implications of its use.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

AN SC 497B Animal Genomics (3) Introduction to genomic structure and sequence, basic bioinformatics, and applications of genome information in animal breeding, reproduction, nutrition, and medicine.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

AN SC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

AN SC 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

AN SC 500 Foundation Readings in Animal Science (1 per semester/maximum of 2) Scientific articles that have significantly impacted the animal sciences will be read and discussed.
Effective: Summer 2009

AN SC 502 Scientific Scholarship (2) Consideration of the scientific method and thinking relative to scholarship, grantsmanship, and the mechanism of grantsmanship.
Effective: Summer 1996

AN SC 506 (NUTRN 506) Ruminology (3) Physiological, biochemical, and microbiological activities occurring within the rumen and the relation of rumen function to animal response.
Effective: Summer 1987 Ending: Summer 2012
Prerequisite:

AN SC 506 (NUTRN 506) Ruminology (3) Physiological, biochemical, and microbiological activities occurring within the rumen and the relation of rumen function to animal response.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

AN SC 515 Advanced Physiology of Reproduction in Farm Animals (1-6) Advanced physiology of reproduction in farm animals.
Effective: Fall 1983
Prerequisite:

AN SC 590 Colloquium (1-9; 1 per semester) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2009

AN SC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

AN SC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

AN SC 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1995

AN SC 600 Thesis Research (1-15) No description.

The Pennsylvania State University
AN SC 601 **Ph.D. Dissertation Full-Time** (0) No description. Effective: Fall 1983

AN SC 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Experience in developing, organizing, and conducting lectures/laboratories; evaluation and counseling students and related resident education activities. Effective: Fall 1983

AN SC 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. Effective: Fall 2008

AN SC 610 **Thesis Research Off Campus** (1-15) No description. Effective: Fall 1983

AN SC 611 **Ph.D. Dissertation Part-Time** (0) No description. Effective: Fall 1983

NOTE: Also see course listed under Animal Nutrition, Poultry Science, and Veterinary Science.

Last Import from UCM: June 2, 2012 12:27 PM
Anthropology (ANTH)

Prerequisite:

ANTH 405 Primatology (3) Nonhuman primate origins, evolution, comparative physical and behavioral characteristics, ecological context, phylogeny and taxonomy; and their importance in anthropology. Effective: Spring 2001
Prerequisite:

ANTH 408 Anthropological Demography (3) Analysis of demographic studies in traditional and very small populations. Effective: Fall 2003
Prerequisite:

ANTH 410 Osteology (4) Introduction to the systematic study of the human skeleton from an evolutionary developmental biological perspective. Effective: Spring 2007
Prerequisite:

ANTH 411 Skeletal Forensic Anthropology (3) An introduction to anthropological forensic science with an emphasis on what can be learned from human skeletons and archaeological recovery methods. Effective: Spring 2007
Prerequisite:

ANTH 412 Settlement Demography (3) Examination of the demography and ecology of human settlement systems in the preindustrial past. Effective: Summer 2008
Prerequisite:

ANTH 413 Molecular Forensic Anthropology (3) An introduction to the field of the application of DNA methods to estimating forensically useful phenotypes. Effective: Summer 2006
Prerequisite:

ANTH 420 (J ST 420) Archaeology of the Near East (3) Culture of the Near East and India from Paleolithic times through the Bronze Age. Effective: Summer 1999
Prerequisite:

ANTH 421 Intro to Geospatial Science in Anthropology and Archaeology (3) This course is a practical, data driven, introduction to applications of Geospatial tools in anthropological and archaeological research. Effective: Summer 2009
Prerequisite:

ANTH 422 Meso-American Archaeology and Ethnography (3) Survey of ethnohistorical and ethnographic patterns of Meso-American society; origin and development of ancient civilization in Mexico, Guatemala, and Honduras. Effective: Spring 1999
Prerequisite:

ANTH 423 The Evolution of American Indian Culture (3) Historic and archaeological sources used to trace American Indian lifestyles from the first immigrants to the period of Euro-American contact. Effective: Spring 1999
Prerequisite:

ANTH 424 Andean Ethnology and Archaeology (3) Cultures of the Andes from earliest settlements to Inka Empire; includes discussion of life in modern Andean communities. Effective: Spring 2002
Prerequisite:

ANTH 426W Archaeological Laboratory Analysis (3) Scientific laboratory methods used in the analysis of ceramic and lithic artifacts. Effective: Summer 2004
Prerequisite:

ANTH 427W Forensic Archaeology (3) Application of archaeological techniques to crime scene investigations, with practical experience in field and laboratory contexts. Effective: Summer 2007
Prerequisite:

ANTH 428 Archaeological Methods and Theory (3) Scientific methods as applied to archaeological data: evolution, ecology, diffusion, and cyclicism theory. Effective: Spring 1999
Prerequisite:

ANTH 429 Paleoenthobotany (3) Introductory course in paleoethnobotany, the study of the interrelationships between
people of the past, natural environment, and plant resources. 
Effective: Spring 2010
Prerequisite:

ANTH 431 Advanced Geospatial Science for Anthropologists and Archaeologists (3) This course is an intensive, data driven, treatment of the use of geographic information systems in anthropological and archaeological research. 
Effective: Summer 2009
Prerequisite:

ANTH 432 Environmental Archaeology (3) Introductory course in Environmental Archaeology, with emphasis on method and theory in the subfields archaeobotany, pedoarchaeology, and zooarchaeology. 
Effective: Spring 2010
Prerequisite:

ANTH 433 Archaeological Ethics and Law (3) Introductory course that examines prominent ethical and legal issues in archaeology integral to modern applied research and practice. 
Effective: Spring 2010
Prerequisite:

ANTH 440 South American Tribal Societies (3) Ethnographic survey of tribal societies in South America. Special emphasis on non-Andean area. 
Effective: Fall 1986

ANTH 441 (IL) From Stone Ax to Uzi: Tradition and Change in the New Guinea Highlands (3) This course explores cultural change and innovation among tribal peoples of Highland New Guinea from stone tool technology to globalization. 
Effective: Fall 2009
Prerequisite:

ANTH 444 Primitive Warfare (3) Critical overview of the ethnography and theory of primitive warfare. 
Effective: Summer 2002
Prerequisite:

ANTH 445W Ethnographic Film (3) Comparisons of written and visual ethnography; critical assessment of ethnographic film; cross-cultural variation. 
Effective: Summer 2000
Prerequisite:

ANTH 446 Mating and Marriage (3) An examination of human mating mainly from the viewpoint of behavioral ecology, centering on the species-typical institution of marriage. 
Effective: Summer 2006
Prerequisite:

ANTH 448 (AM ST 448) Ethnography of the United States (3) Ethnographic descriptions of various dimensions of life in the United States. 
Effective: Fall 2007
Prerequisite:

ANTH 450 Comparative Social Organization (3) Social structure and cultural change among nonliterate societies. 
Effective: Fall 1986
Prerequisite:

ANTH 450W Comparative Social Organization (3) Social structure and cultural change among nonliterate societies. 
Effective: Summer 1996
Prerequisite:

ANTH 451 Economic Anthropology (3) Different approaches to the study of the economics of non-Western societies, emphasizing the interrelationships between noneconomic factors and economic behavior. 
Effective: Fall 1986
Prerequisite:

ANTH 453 Anthropology of Religion (3) Traditional and modern religions and historical and contemporary religious movements from an anthropological perspective. 
Effective: Fall 2003
Prerequisite:

ANTH 455 Global Processes and Local Systems (3) Ethnographic, comparative, historic, evolutionary treatment of global economic, political, and cultural processes and their consequences for local systems. 
Effective: Fall 2001
Prerequisite:

ANTH 456 Cultural Ecology (3) Survey of the methods and concepts of cultural ecology, focusing on the interaction between cultural and geographical systems. 
Effective: Fall 1986
Prerequisite:

ANTH 457 (US:IL) (J ST 457, SOC 457) Jewish Communities: Identity, Survival, and Transformation in Unexpected Places (3) Examines the global array of smaller Jewish communities that have flourished outside the main urban centers of Jewish settlement. 
Effective: Summer 2006
Prerequisite:
ANTH 458 Ethnographic Field Methods (3) Course introduces students to ethnographic field methods, includes student projects and simple analyses that don’t require statistical sophistication.
Effective: Spring 2009
Prerequisite:

ANTH 459 Applied Anthropology (3) A survey of the development of applied anthropology and the current issues facing anthropologists working in non-academic settings.
Effective: Summer 2002
Prerequisite:

ANTH 460 (BIOL 460) Human Genetics (3) The human genome, its variation, origins, and relation to disease and other traits.
Effective: Fall 2011
Prerequisite:

ANTH 460H (BIOL 460H) Human Genetics (4) Gene mapping in humans; molecular basis of genetic disease; genomic structure; immunogenetics; and genetic evidence for human evolutionary history.
Effective: Fall 2001
Prerequisite:

ANTH 461 Molecular Anthropology (3) Provides framework to understand current issues in biology, genetics, and anthropology as they relate to the evolution of our species.
Effective: Spring 2005
Prerequisite:

ANTH 463 Quantitative Analysis of Morphological Data (3) The application of morphometric methods to anthropological data: phenotypes of organisms, artifacts, and traits.
Effective: Fall 2004
Prerequisite:

ANTH 465H Fifteen Great Biology Papers (3) Reading and discussion of the most influential papers in the history of biology that illustrate exceptional insight and elegant reasoning.
Effective: Spring 2003
Prerequisite:

ANTH 466 The Skull (3) Survey of the mammalian skull from many perspectives including evolution, development, anatomy, function, and variability of the skull.
Effective: Spring 2003
Prerequisite:

ANTH 470H Our Place in Nature (3) An evolutionary and genetic consideration of our understanding of human beings as a part of the natural world.
Effective: Fall 2001
Prerequisite:

ANTH 471H Biology, Evolution, and Society (3) Exploration of the genetic theory of evolution and development, its history and application within Biology and beyond.
Effective: Spring 2008
Prerequisite:

ANTH 476W Anthropology of Gender (3) Cross-cultural construction of gender and sex roles; theories of gender construction; case studies and practical effects.
Effective: Summer 2011
Prerequisite:

ANTH 477 (US;IL) Language, Culture, and Society (3) Relationships among language, culture and society, with an anthropological emphasis.
Effective: Spring 2007
Prerequisite:

ANTH 478 (IL) Cannibalism (3) Explores the cultural institution of cannibalism, uses of the "cannibal" label, and cannibalism’s meaning among those who practiced it.
Effective: Spring 2010
Prerequisite:

ANTH 492 Intermediate Field Methods (3-6) On-site experience in collecting archaeological, behavioral, or biological data.
Effective: Spring 2001
Prerequisite:

ANTH 493 Field Techniques (3-6) Training in techniques involving analyses of archaeological, behavioral, or biological data.
Effective: Spring 2001
Prerequisite:

ANTH 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994
ANTH 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

ANTH 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2000
Prerequisite:

ANTH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1986

ANTH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1986

ANTH 497A Climage, Landscape, and Civilization (3) Archaeology has along interest in the environment of past societies and human relationships with those environments.

ANTH 497B Zooarchaeology (3) This course examines the methods, techniques, and theory used to identify and interpret animal remains from archaeological sites.

ANTH 497C Evolution of Human Walking (3) Course will provide a multidisciplinary approach of the evolution of human bipedal walking and running and how it differs from that of our quadrupedal relative.

ANTH 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

ANTH 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Effective: Spring 2002
Prerequisite:

ANTH 508 Research Problems in Culture History (3-9) No description.
Effective: Spring 1987

Effective: Summer 1990
Prerequisite:

ANTH 521 Current Literature in Archaeology (1) Seminar designed to expand general knowledge of archaeology through exposure to current research and related issues in contemporary archaeology.
Effective: Fall 2000

ANTH 541 Current Literature in Cultural Anthropology (1) This seminar is designed to expand general knowledge of cultural anthropology through exposure to current research/related issues in contemporary cultural anthropology.
Effective: Spring 2002

ANTH 545 Seminar in Anthropology (1-9) Critical analysis of research in selected areas of anthropology.
Effective: Spring 1987

ANTH 556 Social Organization of Traditional Societies (3) Cultural bases of social organization of traditional societies.
Effective: Summer 1990

ANTH 559 Human Ecology (3) Ecological anthropology, emphasizing the adaptive aspects of subsistence, including foraging and settlement pattern.
Effective: Spring 2011
ANTH 560 History of Anthropological Theory (3) Survey of origin and development of anthropology in the Nineteenth Century and trends during the Twentieth Century.
Effective: Fall 1986
Prerequisite:

ANTH 562 Laboratory Methods in Anthropology (3-9) Supervised laboratory research, utilizing materials from physical anthropology or archaeology or cultural anthropology.
Effective: Spring 1987

ANTH 563 Current Literature in Biological Anthropology (1) Seminar designed to expand general knowledge of Biological Anthropology through exposure to current research and issues in contemporary Biological Anthropology.
Effective: Fall 2001

ANTH 566 Infectious Diseases in Anthropological Populations (3) Surveys infectious diseases in history and prehistory; introduces concepts from microbiology, immunology, and epidemiology, applies them to past human populations.
Effective: Spring 2002

Effective: Spring 2002

ANTH 575 Population, Food, and Traditional Farming (3) This course explores the relationship between demographic processes (fertility, mortality, migration) and traditional farming, especially farming near the subsistence level.
Effective: Summer 2009
Prerequisite:

ANTH 579 (SOC 579) Spatial Demography (3) This graduate course will expose students to spatial analysis tools and analytical methods applied to demographic research.
Effective: Spring 2008
Prerequisite:

ANTH 588 Method and Theory in Archaeology (3) Methodological strategies and tactics in archaeological research; major theories in cultural anthropology as applied to archaeological data.
Effective: Spring 2002

ANTH 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1987

ANTH 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2001

ANTH 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1987
Prerequisite:

ANTH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

ANTH 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

ANTH 600 Thesis Research (1-15) No description.
Effective: Fall 1986

ANTH 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1986

ANTH 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at the Pennsylvania State University.
Effective: Fall 2003

ANTH 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2002
ANTH 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1986

ANTH 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1986

Last Import from UCM: June 2, 2012 12:27 PM
Appellate Team (APTEM)

APTEM 995B Jessup International Law Team (2) See Handbook for description. Effective: Fall 1998

APTEM 995C National Appellate Moot Court Team (2) See Handbook for description. Effective: Fall 1998

APTEM 995D Environmental Law Team (2) See Handbook for description. Effective: Fall 1998

APTEM 995F Information and Privacy Law Team (2) See Handbook for description. Effective: Fall 1998

APTEM 995G Constitutional Law Team (2) See Handbook for description. Effective: Fall 1998

APTEM 995I Miscellaneous Appellate Moot Court Teams (2) See Handbook for description. Effective: Fall 1998

APTEM 995K BLSA Appellate Moot Court Team (2) See Handbook for description. Effective: Spring 2005

Last Import from UCM: June 2, 2012 12:27 PM
Applied Behavioral Analysis (ABA)

ABA 500 Experimental Analysis of Behavior (3) This course covers the scientific, conceptual, theoretical, and philosophical roots of the experimental analysis of behavior.
Effective: Summer 2003
Prerequisite:

ABA 511 Behavior Modification (3) Provides an overview of principles and procedures and use of behavior modification with individuals in diverse settings.
Effective: Spring 2009

ABA 522 Single Subject Research (3) This course aims to teach how to critique, design, and analyze single subject research.
Effective: Fall 2001
Prerequisite:

ABA 533 Applied Analysis of Behavior (3) Overview of the application of behavior analysis in education, rehabilitation, medicine, business, counseling, and therapy across the age range.
Effective: Summer 2006
Prerequisite:

ABA 555 Behavioral Intervention in Autism (3) Overview of the use of Behavior Analysis in the education, assessment, and treatment of individuals with autism.
Effective: Summer 2006
Prerequisite:

ABA 566 Behavioral Pediatrics (3) Overview of behavioral pediatrics and discusses the role of Behavior Analysis within this field.
Effective: Summer 2006
Prerequisite:

ABA 577 Behavioral Assessment and Treatment of Behavior Disorders (3) Overview of the use of Applied Behavior Analysis in the assessment and treatment of individuals with behavior and emotional disorders.
Effective: Summer 2006
Prerequisite:

ABA 588 Ethics and Legal Issues in Applied Behavior Analysis (3) This course will cover ethical and legal issues related to applied behavior analysis research and practice.
Effective: Spring 2004
Prerequisite:

ABA 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2001

ABA 594A Research Topics (3) Supervised research project in behavior analysis for degree candidates.
Effective: Fall 2001
Prerequisite:

ABA 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Fall 2001
Prerequisite:

ABA 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2001

Last Import from UCM: June 2, 2012 12:27 PM
Applied Linguistics (APLNG)

APLNG 412 Teaching Second Language Writing (3) This course provides opportunities for exploring various perspectives on theory, research, and pedagogical applications in second language writing. Effective: Summer 2003

APLNG 482Y (IL) Introduction to Applied Linguistics (3) Application of theories of language to psycholinguistics, philosophy of language, anthropological linguistics, sociolinguistics, bi/multilingualism, second language acquisition and teaching. Effective: Spring 2006

APLNG 484 Discourse-Functional Grammar (3) Develop a working knowledge of the structure of English and apply such knowledge to research and/or classroom situations. Effective: Fall 2004

APLNG 491 Theory: Second Language Acquisition (3) An investigation into current issues in the theoretical bases of second language acquisition. Effective: Fall 2006

APLNG 493 (IL) Teaching English as a Second Language (3) Theory, research, and pedagogy that focus on the teaching of English to speakers of other languages in varied contexts. Effective: Spring 2006

APLNG 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Spring 2001

APLNG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 2002

APLNG 497A Multilingual Identities (3) This course will explore the personal meanings of language learning as historically and culturally grounded experience. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

APLNG 500 Practice Teaching in ESL (3) Provides instructional support and professional mentoring for second language teachers during the practice teaching experience. Effective: Fall 2009

APLNG 510 Health and Aging in Multilingual Contexts (3) This course focuses on anthropological approaches to health and aging in multilingual contexts. Effective: Spring 2007

APLNG 511 Applied Linguistics and Health Sciences (3) A theoretical and practical introduction to concepts and methods associated with multilingualism and health care services and research. Effective: Summer 2006

APLNG 512 Language and Adult Lifespan Development (3) The effects of adult cognitive development and decline on the production and comprehension of language in mono- and multilinguals. Effective: Summer 2006

APLNG 570 Second Language Reading (3) Theoretical and practical introduction to concepts, methods and practices of research and instruction of second language reading development. Effective: Summer 2006

APLNG 571 'Foreign' Language Materials Development (3) This course focuses on the development and critical analysis of 'foreign' language teaching materials in applied linguistics and language learning. Effective: Summer 2005

The Pennsylvania State University
APLNG 572 Communication in Second Language Classrooms (3) The study of communication in second language classrooms.
Effective: Spring 2002

APLNG 573 Communicative Language Teaching (3) Cognitive, linguistic, and sociocultural foundations of communicative language teaching (CLT) as reflected in current international language teaching policies/practices.
Effective: Fall 2001

APLNG 574 World Englishes: Pluralizing Policy, Pedagogy, and Proficiency (3) This course explores the global spread of English, the diversification of its norms, and their pedagogical and policy implications.
Effective: Summer 2012

APLNG 575 Language Ideology (3) This course is designed to offer a range of perspectives on language ideology as an analytical construct.
Effective: Summer 2006

APLNG 576 Language Socialization across Home, School, and Community Contexts (3) A survey of research on language socialization from a variety of sociocultural groups across a range of sociolinguistic contexts.
Effective: Summer 2006

APLNG 577 Language Analysis (3) An overview of cognitive/conceptual/functional approaches to language analysis with applications to research, second language acquisition, and language pedagogy.
Effective: Fall 2011

APLNG 578 Computational and Statistical Methods for Corpus Analysis (3) A hands-on introduction to the core and advanced computational and statistical methods for analyzing corpus data.
Effective: Fall 2010

APLNG 580 Proseminar in Applied Linguistics (1) This team-taught seminar introduces PhD students to the scholarly areas and research perspectives in Applied Linguistics represented by department faculty.
Effective: Summer 2008

APLNG 581 (CAS 581) Discourse Analysis (3) Overview of theories and approaches to the analysis of spoken and/or written discourse.
Effective: Fall 2005

APLNG 582 Seminar in Approaches to Language Use (3) Examines the historical and contemporary landscape of research on language use.
Effective: Fall 2011

APLNG 583 Methods of Language Assessment (3) Introduces methodology for selecting, developing, applying, and analyzing tests and questionnaires for research and evaluation in communication and language education.
Effective: Spring 2002

APLNG 584 Sociocultural Theory and Second Language Learning (3) The course is an introduction to research on second language learning from a sociocultural theoretic perspective.
Effective: Spring 2004

APLNG 586 Analyzing Classroom Discourse (3) A theoretical and practical introduction to concepts and methods associated with the analysis of classroom discourse.
Effective: Summer 2006

APLNG 587 Theory & Research in L2 Teacher Education (3) Examines the historical and contemporary landscape of theory and research in second language teacher education.
Effective: Fall 2009

APLNG 588 Design and Research of Technology-Mediated Language Learning (3) Using computer and multimedia technologies to support materials development and second language acquisition research.
Effective: Spring 2010

APLNG 589 (CMLIT 589, GER 589, FR 589) Technology in Foreign Language Education: An Overview (3) Approaches to the uses and research applications of multimedia and other educational technologies applied to the teaching of foreign languages. (also crosslisted with SPAN 589)
Effective: Fall 2003

The Pennsylvania State University

APLNG 592 Qualitative Research in Applied Linguistics (3:2) This course offers an introduction to qualitative research methods in applied linguistics. Effective: Spring 2009

APLNG 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Fall 2001 Prerequisite:

APLNG 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 2001

APLNG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Fall 2001

APLNG 597A Making Cross-Cultural Comparisons with Qualitative Data (3) This course covers theory and method in making systematic comparisons of qualitative data collected in two or more cultural contexts in two or more languages. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

APLNG 597B Multilingual Identities (3) This course will explore the personal meanings of language learning as historically and culturally grounded experience. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

APLNG 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 2001

APLNG 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Students experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University. Effective: Fall 2001

APLNG 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 2001

APLNG 802 Focus on English: Teaching Form, Meaning and Use (3) Develops an understanding of the various domains of the English language as relevant for adult English language learning and teaching. Effective: Summer 2010

APLNG 804 Focus on Learners: Identity, Community and Language Learning (3) Explores how individual identities shaped by cultural differences, social positioning, institutional roles and structures influence English language learning and teaching. Effective: Summer 2010

APLNG 806 Focus on Classrooms: Planning and Supporting Language Learning (3) Develops a critical awareness of one’s teaching practice and highlights instructional planning and classroom interactions with adult English language learners. Effective: Summer 2010

APLNG 808 Focus on Instruction: Teaching and Assessing Language Learning (3) Develops an understanding of and
ability to use effective teaching and assessment practices that support adult English language learning.
Effective: Summer 2010

Last Import from UCM: June 2, 2012 12:27 PM
Applied Youth, Family and Community Education (AYFCE)

AYFCE 438 (US) Living in an Increasingly Diverse Society (1-3) Students in this course will explore selected dimensions of diversity through lecture, discussion, speakers, active participation, and experiential learning.
Effective: Spring 2011

AYFCE 439 Contemporary Youth Issues (3) This course focuses on empirically-supported interventions that promote resiliency and reduce risk for problem behaviors among youth in community settings.
Effective: Spring 2011
Prerequisite:

AYFCE 455 Extension Youth Development Programs and Volunteer Management (3) A study of 4-H/Extension youth programs and the variety of roles played by volunteer leaders.
Effective: Spring 2011
Prerequisite:

AYFCE 470 Consumer and Financial Skills (3) Consumer and financial issues formal and non formal educators need to be informed about to function in today’s society.
Effective: Spring 2011 Ending: Fall 2012
Prerequisite:

AYFCE 495 Internship in Youth and Family Education Programs (6-18) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships.
Effective: Spring 2011
Prerequisite:

AYFCE 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2011

AYFCE 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2011

AYFCE 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2011

AYFCE 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2011

AYFCE 535 Youth Civic Development (3) This course critically examines processes enabling youth to become members of local communities and "citizens" of nations and global societies.
Effective: Spring 2011

AYFCE 550 Program Development and Evaluation in Youth, Families and Communities (3) Examination of concepts, theories, models, and procedures relative to program development and evaluation in youth, families and communities.
Effective: Spring 2011
Prerequisite:

AYFCE 555 Volunteer Program Management (3) The study and application of concepts and principles of volunteerism and administration relevant to volunteer program management.
Effective: Spring 2011

AYFCE 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2011

AYFCE 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2011
Prerequisite:

AYFCE 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2011

AYFCE 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered

AYFCE 840 Applied Youth Development (3) Background and current issues related to youth development programs in their application to actual youth programs in community settings. Effective: Spring 2011

AYFCE 845 (CI ED 845) Intergenerational Programs and Practices (3) Background, intervention strategies, and issues related to developing intergenerational programs and practices aimed at addressing vital social and community issues. Effective: Fall 2011

Last Import from UCM: June 2, 2012 12:27 PM
Architectural Engineering (A E)

A E 401 Design of Steel and Wood Structures for Buildings (3) Application of principles of engineering mechanics to layout, analysis, design, and detailing of structural elements in steel and wood of simple buildings. Effective: Fall 2005
Prerequisite:

A E 402 Design of Concrete Structures for Buildings (3) Application of principles of engineering mechanics to layout, analysis, design, and detailing of structural elements in concrete of simple buildings. Effective: Fall 2005
Prerequisite:

A E 403 Advanced Steel Design for Buildings (3) Continuation of A.E. 401. Advanced analysis, design, and detail of the structural elements in wood and steel. Effective: Fall 2005
Prerequisite:

A E 404 Building Structural Systems in Steel and Concrete (3) Basic analysis, design, and detailing of steel and concrete structural elements for buildings, emphasizing systems design and comparisons. A E 404 is not permitted for AE Structural Option students or for Architecture students. Effective: Summer 2006
Prerequisite:

A E 421 Architectural Structural Systems I (3) Qualitative and quantitative analysis and design of architectural structures, force flow; structure configurations; measurement and experiments; design studio critique. Effective: Spring 1990
Prerequisite:

A E 422 Architectural Structural Systems II (3) Continuation of A E 421, with emphasis on structural configuration and construction assemblies. Effective: Spring 1990
Prerequisite:

A E 424 Environmental Control Systems I (3) Fundamental principles and applications of environmental systems in buildings. This course is intended for Architecture students. Effective: Fall 2005
Prerequisite:

A E 430 Indeterminate Structures (3) Classical methods of analysis for beams, frames, arches, and secondary stresses as applied to buildings; introduction to modern methods. Effective: Summer 1984
Prerequisite:

Prerequisite:

A E 432 Design of Masonry Structures (3) Analysis and design of unreinforced and reinforced masonry: non-bearing walls, bearing walls, shear walls, masonry building systems. Effective: Spring 2005
Prerequisite:

Prerequisite:

A E 444 Micro CADD Applications for Buildings (3) Application of microcomputer based CADD systems to architectural engineering problems including graphics, system customization, and AI programming techniques. Effective: Spring 2008
Prerequisite:

A E 454 Advanced Heating, Ventilating, and Air Conditioning (3) Engineering design and performance analysis procedures for complex commercial building systems, including energy conservation techniques; design project. Effective: Fall 1986
Prerequisite:

A E 455 Advanced Heating, Ventilating, and Air Conditioning System Design (3) Design of several different systems for a course project building; control strategy; economic comparisons using life-cycle cost techniques. Effective: Fall 1983
Prerequisite:

A E 456 Solar Energy Building System Design (3) Solar radiation, collectors, and thermal storage; design and analysis of a heating system using system-simulation computer program. Effective: Summer 1984
Prerequisite:
A E 457 HVAC Control Systems (3) Theory of automatic control. HVAC control applications. Control system components, control loops, development and documentation of control logic, control commissioning.
Effective: Summer 2006
Prerequisite:

A E 458 Advanced Architectural Acoustics and Noise Control (3) Advanced consideration of noise control in buildings; ventilating system noise and vibration; acoustic design variables.
Effective: Fall 1983
Prerequisite:

A E 461 Architectural Illumination Systems & Design (3) Lighting units & photometry; lighting equipment; design criteria, calculation methods; the design process; energy codes.
Effective: Fall 2005
Prerequisite:

A E 464 Advanced Architectural Illumination Systems & Design (3) Flux transfer theory; advanced lighting and control systems; emergency lighting; daylighting; visual performance issues; psychological aspects of lighting.
Effective: Fall 2005
Prerequisite:

A E 466 Computer Aided Lighting Design (3) Design and analysis for outdoor area; floodlighting; and interior applications, including design criteria; economic analysis; modeling algorithms; and visualization.
Effective: Fall 2005
Prerequisite:

A E 467 Advanced Building Electrical System Design (3) Design of electrical systems for commercial and industrial facilities emphasizing design practice and integration with codes and standards.
Effective: Spring 2008
Prerequisite:

A E 470 Residential Building Design and Construction (3) Managerial aspects; architectural and code considerations; cost estimating, design, and construction of structural, plumbing, HVAC, and electrical systems.
Effective: Spring 1989
Prerequisite:

A E 472 Building Construction Planning and Management (3) Construction organization and contracts; preconstruction services; estimating; scheduling; cash flow; site planning and preparation; building construction sequences; construction business presentations; value engineering.
Effective: Fall 2005
Prerequisite:

A E 473 Building Construction Management and Control (3) Building construction project planning; construction cost, schedule, quality and safety control systems; project cost accounting; change management; construction company management.
Effective: Fall 2005
Prerequisite:

Effective: Spring 2001
Prerequisite:

A E 475 Building Construction Engineering I (3) Project planning, supervision, inspection of architectural and structural operations in major buildings; mobilization, coordination of trades; offsite testing and fabrication.
Effective: Fall 2001 Ending: Summer 2012
Prerequisite:

A E 475 Building Construction Engineering I (3) Project planning, supervision, inspection of architectural and structural operations in major buildings; mobilization, coordination of trades; offsite testing and fabrication.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

A E 476 Building Construction Engineering II (3) Construction of mechanical and electrical systems in major buildings; fire protection, sound control, elevating; trade coordination; manufacturers' developments; computer application.
Effective: Fall 1983
Prerequisite:

A E 481W Comprehensive Architectural Engineering Senior Project I (4) Building project selection and preparation of overall plan; preliminary investigation of building design and construction issues; creation of individual Capstone Project Electronic Portfolio (CPEP) and project proposal required.
Effective: Fall 2005
Prerequisite:

A E 482 Comprehensive Architectural Engineering Senior Project II (4) Continuation of A E 481W. Engineering analysis of building systems; emphasis on analysis and design of building structural, mechanical, lighting/electrical, and construction related systems. Final written report, web-based project portfolio and verbal presentation are required.
Effective: Fall 2005
Prerequisite:

A E 486 Professional Engineering Practice (3) A study of the influences which affect the practice of architectural engineering, particularly codes, ethics, legal considerations, and contract documents.

The Pennsylvania State University
Effective: Fall 1983
Prerequisite:

A E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

A E 496A Ancient Rome and Medieval Structural Design (3) Study of structural design employed in ancient Rome and other medieval locations. Offered on location in Rome.
Effective: Summer 2012 Ending: Summer 2012

A E 496F Study of Urbanization in China (2) The course provides both local and regional background awareness for overseas students concerned with urbanisation and city development issues in contemporary China. Offered on location in Hong Kong.
Effective: Summer 2012 Ending: Summer 2012

A E 496G Building Project Case Studies (3) Study of the building developments in China using case studies of contemporary projects in China. The factors include economics, social/political, and technologies. Students will tour the projects and interact with on site personnel. Offered on location in China.
Effective: Summer 2012 Ending: Summer 2012

A E 496K International Construction Seminar (3) Seminar in project engineering in international construction. Offered on location in Beijing, China.
Effective: Summer 2012 Ending: Summer 2012

A E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

A E 497A Ancient Rome and Medieval Structural Design (3) Study of structural design employed in ancient Rome and other medieval locations. Offered on location in Rome.
Effective: Summer 2012 Ending: Summer 2012

A E 497A Ancient Rome and Medieval Structural Design (3) Study of structural design employed in ancient Rome and other medieval locations. Offered on location in Rome.

A E 497E Building Electrical and Communication Systems (3) This course addresses specialized topics in building electrical and communication systems that are typically the responsibility of the electrical engineer in a building design firm, including: emergency power, coordination and fault studies, alternate and sustainable power sources, fire alarm systems, voice, video and data communication systems, and HVAC control systems.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

A E 497F Load/Energy Simulation (3) Developing models of the time dependent loads on building system on the basis of fundamental conservation of energy and heat transfer relationships; energy utilization modeling skills that allow alternative building system designs to be explored.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

A E 497G BAE/MAE Capstone Management (1) Project management for capstone project for students in AE/MAE integrated program.

A E 498 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

Effective: Fall 1989
Prerequisite:

A E 530 Computer Modeling of Building Structures (3) Theory and application of structural analysis using the direct stiffness method. Modeling assumptions, validation, interpretation of computer output.
Effective: Summer 2011
Prerequisite:

A E 534 Analysis and Design of Steel Connections (3) Connection analysis and design for steel buildings with an emphasis on the AISC Specification.
Effective: Summer 2005

The Pennsylvania State University
Prerequisite:

A E 536 Stability of Building Structures (3) Elastic and inelastic buckling of beams, beam-columns, frames; applications to design of multi-story buildings.
Effective: Spring 1999
Prerequisite:

A E 537 Building Performance Failures and Forensic Techniques (3) This course provides a background in identification, evaluation, and analysis of a broad set of architectural and structural performance failures.
Effective: Summer 1999
Prerequisite:

A E 538 Earthquake Resistant Design of Buildings (3) Introductory engineering seismology, basic principles of structural dynamics, application of earthquake design provisions of model building codes to design of buildings.
Effective: Spring 2005
Prerequisite:

A E 542 (C E 542) Building Enclosure Science and Design (3) The building enclosure: nature, importance, loadings; building science: control of heat, moisture, air, hygrothermal analysis; design: walls, windows, roofs, joints.
Effective: Summer 2002

A E 543 Research Methods in Architectural Engineering (3) Research skills, critical thinking, academic writing, presentations, use of electronic media, and experimental design applied to AE research topics.
Effective: Spring 2012

A E 551 Combined Heat and Power System Design for Buildings (3) Thermodynamic and thermo-economic analyses methods for determination of optimal, on-site, total energy systems for commercial buildings.
Effective: Fall 2008
Prerequisite:

A E 552 Air Quality in Buildings (3) Indoor air pollutants, their sources and health effects; transport of pollutants; modelling of pollutant concentration in buildings.
Effective: Fall 2007
Prerequisite:

A E 553 Building Energy Analysis (3) Fundamentals of building energy dynamics and the simulation of energy flows in a building; validation of programs; practical applications.
Effective: Fall 2007
Prerequisite:

A E 554 Building Thermal Systems Design and Optimization (3) A study of building thermal comfort systems emphasizing analytical peak and off-peak design performance modeling, simulation, optimization and economics.
Effective: Fall 1989
Prerequisite:

A E 555 Building Automation and Control Systems (3) Advanced techniques in the theoretical analysis and practical design of the automatic comfort controls used in building thermal systems.
Effective: Fall 2011
Prerequisite:

Effective: Fall 2007
Prerequisite:

A E 557 Centralized Cooling Production and Distribution Systems (3) Central cooling plant and distribution components and systems; thermal, hydraulic, and economic modeling for planning and design.
Effective: Fall 2007
Prerequisite:

A E 558 Centralized Heating Production and Distribution Systems (3) Description and analysis of central heating plant and distribution components and systems; thermal and economic modeling for planning and design.
Effective: Fall 2007
Prerequisite:

A E 559 Computational Fluid Dynamics in Building Design (3) Theory and applications of building environmental modeling with Computational Fluid Dynamics (CFD).
Effective: Fall 2007
Prerequisite:

A E 561 Science of Light Sources (3) In-depth scientific principles of light generation in modern electric light sources, and the resultant characteristics that influence their use for buildings.
Effective: Spring 1999
Prerequisite:

A E 562 Luminous Flux Transfer (3) Radiative transfer applied to lighting analysis; methods for computing direct and interreflected illumination; nearfield photometry.
Effective: Spring 2008
Prerequisite:
A E 563 Luminaire Optics (3) Optical design of reflectors and refractors for lighting systems; manufacturing methods. Effective: Spring 1999
Prerequisite:

Prerequisite:

A E 565 Daylighting (3) Design concepts, solar position, sky luminance distribution models, integration of daylighting and electric lighting controls, physical modeling, computer analysis techniques. Effective: Fall 1996
Prerequisite:

A E 569 Research Topics in Illumination Engineering (3) Seminar on prior and current research in illumination engineering which define current recommendations and design practice. Effective: Spring 1999
Prerequisite:

A E 570 Production Management in Construction (3) Applications of production management tools to capital facility projects; theory of production systems in construction; development of production control manual. Effective: Fall 2007
Prerequisite:

A E 571 International Construction Management and Planning (3) Evaluation of international project environments and participants, modeling and planning international projects. Effective: Spring 2005
Prerequisite:

A E 572 Project Development and Delivery Planning (3) Methods employed by owners and developers to initiate capital facility projects; defining project objectives, constraints, participants, financing, and delivery methods. Effective: Summer 2006
Prerequisite:

A E 573 Strategic Management in Construction (3) Analysis tools and principles for design of effective construction organizations' strategy and structure in various markets. Effective: Spring 2002
Prerequisite:

A E 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

A E 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis. Effective: Spring 1987

A E 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

A E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 1987

A E 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 2006

A E 598C Sustainable Construction Project Management (3) Theory, methods, and practices of high performance building design and construction. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

A E 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Spring 1993

A E 602 **Supervised Experience in College Teaching** (1-3 per semester, maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the professional at the Pennsylvania State University.
Effective: Summer 2006

A E 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Summer 2004

A E 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

A E 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Spring 1993

A E 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2008

A E 897G **BAE/MAE Capstone Project** (3) Continuation of A E 487W for students in the BAE/MAE integrated program. Engineering analysis of building systems; emphasis on analysis and design of building structural, mechanical, lighting/electrical, and construction relate systems. Final written report, web-based project portfolio and verbal presentations are required.

Last Import from UCM: June 2, 2012 12:27 PM
Architecture (ARCH)

ARCH 417 The Language of Boundaries in Architecture and the Landscape (3) This course examines the development and significance of boundaries in the construction of human space and time. Students who have taken other courses from Architecture Visual Arts, Geography, or Philosophy that treat some aspect of spatial perception, conception, construction, or visualization, or who have completed equivalent study independently, may enroll with the permission of the program.

Effective: Summer 2009
Prerequisite:

ARCH 431 Architectural Design V (6) Continuation of ARCH 331 and 332, with design and research in program option areas.

Effective: Fall 2011
Prerequisite:

ARCH 431A (IL) Architectural Design V--Foreign Study (6) A studio offered in Rome, Italy, which emphasizes urban planning and architectural design in an urban context.

Effective: Fall 2011
Prerequisite: Concurrent: ARCH 499B and ARCH 499C

ARCH 432 Architectural Design VI (6) A continuation of ARCH 431, this course explores in greater depth urban planning and architectural design in an urban context.

Effective: Fall 2011
Prerequisite:

ARCH 432A (IL) Architectural Design VI--Foreign Study (6) A continuation of ARCH 431, this course explores urban planning and architectural design in an urban context in Rome, Italy.

Effective: Fall 2011
Prerequisite: Concurrent: ARCH 499B and ARCH 499C

ARCH 441 Architectural Design Analysis (3) Studies in principles and elements of design; planning for human use; the relationship of space to physical and social environment. Architectural Engineering majors only.

Effective: Spring 2008
Prerequisite:

ARCH 442 Architectural Design Analysis (3) Continuation of ARCH 441, with emphasis on functional relationship of space, form, structure, and building groups. Architectural Engineering majors only.

Effective: Spring 2008
Prerequisite:

ARCH 443 Architectural Design Analysis Inspection Trip (1) Faculty guided trip to metropolitan areas to investigate noteworthy architecture and building construction and to visit professional offices.

Effective: Spring 2001
Prerequisite:

Effective: Fall 2011
Concurrent: ARCH 491

ARCH 480 Technical Systems Integration (3) Presentations of buildings' analyses from a multiplicity of viewpoints: architectural, spatial, environmental, mechanical, construction assembly.

Effective: Fall 2011
Prerequisite: Concurrent: ARCH 492

ARCH 481 Digital Design Media (3) Advanced course in digital modeling, rendering, animation and non-linear video for architectural investigations.

Effective: Summer 2006
Prerequisite:

ARCH 491 Architectural Design VII-Thesis (6) Problems in architectural planning and design; programming and/or implementation methodologies and applications for various environmental design scales.

Effective: Fall 2011
Prerequisite: Concurrent: ARCH 451

ARCH 492H Architectural Design VIII-Thesis (6) Continuation of ARCH 491 with concentration and specialization options.

Effective: Summer 2012
Prerequisite: Concurrent: ARCH 480

ARCH 495 Advanced Architectural and Related Design/Construction Work Experience II (1-3 per semester/maximum of 6) Supervised off-campus, nongroup instruction including field experiences, practica, or architectural and related design/construction work experience.

Effective: Fall 2011
Prerequisite:

ARCH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an

ARCH 536 Design-Inquiry (1-12) Integration of research with the designing of architectural and urban settings. Effective: Fall 1995
Prerequisite:

ARCH 541 Topics in Theory (3) A series of presentations on the development of contemporary architectural theory. Effective: Summer 2002
Prerequisite:

ARCH 542 Topics in Community and Urban Design (3) Community and urban design as an area of design inquiry and interdisciplinary practice. Effective: Summer 2002
Prerequisite:

ARCH 543 Topics in Digital Design (3) Inquiry into digital design paradigms of architecture and related disciplines; exploration design principles and operations supported in digital/virtual design environments. Effective: Summer 2002
Prerequisite:

ARCH 545 Pedagogical Practices in Architectural Education (3) Review and application of pedagogical topics in studio teaching. Comparative evaluation of accepted and experimental practices. Effective: Summer 2010

ARCH 550 Ethics in Architecture (3) Ethics in Architecture focuses on the nature of human interactions with natural and artificial worlds. Effective: Summer 2002
Prerequisite:

ARCH 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Summer 1995

ARCH 591 Architectural Research (2-12) Guided research project. Effective: Winter 1978

ARCH 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

ARCH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Fall 1983

ARCH 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2006

ARCH 600 Thesis Research (1-15) No description. Effective: Fall 1983

ARCH 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. Effective: Summer 2007

ARCH 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 1983

ARCH 897 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject. Effective: Spring 2011

Last Import from UCM: June 2, 2012 12:27 PM
Art (ART)

ART 402 Portfolio Design and Professional Practices (3) This course emphasizes the development of presentation skills for digital artists in audience/client interactions. Effective: Summer 2010
Prerequisite:

ART 405 Advanced Studio Art (3 per semester/maximum of 9) Advanced work in drawing and painting, with an emphasis on individual development. Effective: Spring 2008
Prerequisite:

ART 409 (ART H 409) Museum Studies (3) An introduction to the professional activities that occur in art museums. Effective: Summer 2004
Prerequisite:

ART 411 (US) Seminar in Contemporary Art (3 per semester/maximum of 6) Trends in contemporary art investigated within the framework of studio visitations, museum tours, and through other related avenues of encounter. Effective: Fall 2006
Prerequisite:

Prerequisite:

ART 415 Integrating Media: Convergence in Practice (4 per semester/maximum of 12) A studio course concentrating on the integration of new media technologies in contemporary art practice. Effective: Fall 2006
Prerequisite:

Prerequisite:

ART 417 Metal Art/Technology III (4 per semester/maximum of 12) Advanced exploration of current and emerging metal art technologies and processes as medium for conceptual, aesthetic, and functional artworks. Effective: Spring 2005
Prerequisite:

ART 419 Advanced New Media: Capstone (4 per semester/maximum of 8) A new media and digital arts capstone course concentrating on the integration of art and technology in advanced thesis projects. Effective: Summer 2007
Prerequisite:

ART 421 Drawing (4 per semester/maximum of 12) Drawing for advanced students, with total emphasis on sustained individual approaches. Effective: Summer 1992
Prerequisite:

ART 422 Advanced Figure Drawing (4 per semester/maximum of 8) Concentrated work in recording and understanding the human figure. Effective: Fall 1998
Prerequisite:

ART 430 Advanced Sculpture (4 per semester/maximum of 12) Advanced work in sculpture, with an emphasis on individual development. Effective: Summer 1992
Prerequisite:

ART 431 Installation Art (4) Study and production of original visual statements through installation work as an art form. Effective: Spring 1998
Prerequisite:

ART 440 Advanced Printmaking (4 per semester/maximum of 12) Individual projects in one or more of the printmaking processes. Emphasis is on developing a portfolio of prints. Effective: Fall 1998
Prerequisite:

ART 446 Artists Books (4) Study and production of original visual statements through the book as an art form. Effective: Spring 2009
Prerequisite:

ART 447 Photo Based Printmaking (4) Study and production of original visual statements through photographic based printmaking as an art form. Effective: Spring 2000
ART 450 Advanced Painting (4 per semester/maximum of 12) Development of the artist through a series of commitments; each semester serves as a contractual agreement along professional lines. Effective: Summer 1992

Prerequisite:

ART 455 Advanced Painting Critique (4 per semester/maximum of 8) The painter in relation to his peers and his profession. Effective: Fall 1983

Prerequisite:

ART 465 Individual Approaches I (3) An advance studio where students are expected to explore personal themes and individual concepts in their art work. Effective: Spring 2007

Prerequisite:

ART 466W Individual Approaches II (6) An advance studio/lecture addressing the preparation for potential employment and/or entrance into graduate studies. Effective: Summer 2007

Prerequisite:

ART 468 The Intermediate Digital Medium (3) An advanced studio course using the computer as an artistic media. Effective: Spring 2007

Prerequisite:

ART 469 Methods and Materials II (3 per semester/maximum of 9) A studio course that focuses on specific media or techniques reflecting varied faculty expertise. Effective: Spring 2007

Prerequisite:

ART 475 (US) (ART H 475) Contemporary Women Artists (3) An interdisciplinary course that investigates women artists who were integral to the production of contemporary art primarily in the Americas, Europe, and Asia. Effective: Spring 2009

Prerequisite:

ART 476 (ART H 476) History and Theory of Digital Art (3) History and theories of contemporary digital art emphasizing humanistic approaches to technology. Effective: Spring 2007

Prerequisite:

ART 480 Advanced Ceramic Arts (4 per semester/maximum of 12) Individual exploration of ceramic materials and construction leading to graduate study or career development as a professional potter. Effective: Summer 1992

Prerequisite:

ART 481 Ceramic Materials and Glaze Calculation (3) The study of raw materials and their use in formulating clays and glazes. Effective: Fall 2006

Prerequisite:

ART 490 View Camera Photography (4) Experience with diverse camera formats and applications; particular emphasis on view camera. Effective: Summer 2002

Prerequisite:

ART 494H Research Projects Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 2012

ART 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Summer 1995

Prerequisite:

ART 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

ART 496H Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2012

ART 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

The Pennsylvania State University
ART 497A Art, Consciousness and Deep Ecology (3) Art reconnects and deepens our conscious and unconscious perception of our environment and ourselves. (ART, PSYCHOLOGY, BIOLOGY, INTEGRATIVE HEALTH).
Effective: Summer 2012 Ending: Summer 2012

ART 497A Art and Life-Where They Intersect (4) The connection between Life and Art will be explored from both a personal and cultural perspective. Will include reading, discussions and studio explorations.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ART 497A Ceramic Surface Decoration (3) Includes: A variety of strategies and techniques for ceramic surface development. Contemporary and historical ceramics will be examined.

ART 497B Function (4) Exploring the role of functional ceramic in todays world.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ART 497C Advanced Metal Cast/Mold (4) Advanced development of technical and conceptual skills through metal casting and mold-making processes.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ART 497D Advanced Body: Issues and Objects (4) Advanced creating representations of the human body and related objects as a means of sculptural expression.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ART 499 (IL) Foreign Studies--Art (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

ART 501 Art Research (2-6) Original study and practice in art relating to material, concept, or technique.
Effective: Winter 1978

ART 505 Graduate Seminar (2 per semester, maximum of 8) Seminar covering special topics at the graduate level, emphasizing interdisciplinary discourse including criticism and review of graduate work.
Effective: Summer 1999

ART 511 Issues in Contemporary Art (1-3 per semester, maximum of 6) A critical survey of issues in contemporary art.
Effective: Summer 1999

ART 515 New Media Art I (1-7 per semester/maximum of 14) Individual problems in new media arts practice leading to development of a body of work representative of the artist.
Effective: Spring 2008

ART 516 New Media Art II (1-7 per semester/maximum of 14) Individual problems in new media arts practice leading to development of a body of work representative of the artist.
Effective: Spring 2008
Prerequisite:
ART 530 Sculpture I (1-7 per semester/maximum of 14) Individual problems in sculpture leading to the development of a collection or body of work representative of the artist.
Effective: Spring 2000

ART 531 Sculpture II (1-7 per semester, maximum of 14) Individual problems in sculpture leading to the resolution of a collection or body of work representative of the artist.
Effective: Summer 1999
Prerequisite:
ART 545 Printmaking I (1-7 per semester/maximum of 14) Individual problems in printmaking leading to the development of a collection or body of work representative of the artist.
Effective: Spring 2000

ART 546 Printmaking II (1-7 per semester, maximum of 14) Individual problems in printmaking leading to the resolution of a collection or body of work representative of the artist.
Effective: Summer 1999
Prerequisite:
ART 550 Painting I (1-7 per semester/maximum of 14) Individual problems in painting leading to the development of a collection or body of work representative of the artist.
Effective: Spring 2000
ART 551 Painting II (1-7 per semester, maximum of 14) Individual problems in painting leading to the resolution of a collection or body of work representative of the artist. Effective: Summer 1999
Prerequisite:

ART 570 Graphic Design I (1-7 per semester/maximum of 14) Individual projects in design with special emphasis on specialized topics of graphic design. Effective: Spring 2000

ART 571 Graphic Design II (1-7 per semester, maximum of 14) Individual problems in design, with special emphasis on professional practice in the area of graphic design. Effective: Summer 1999
Prerequisite:

ART 580 Ceramics I (1-7 per semester/maximum of 14) Individual problems in ceramics leading to the development of a collection or body of work representative of the artist. Effective: Spring 2000

ART 581 Ceramics II (1-7 per semester, maximum of 14) Individual problems in ceramics leading to the resolution of a collection or body of work representative of the artist. Effective: Summer 1999
Prerequisite:

ART 592 Photography I (1-7 per semester/maximum of 14) Individual problems in photography leading to the development of a body of specialized work representative of the artist. Effective: Spring 2000
Prerequisite:

ART 593 Photography II (1-7 per semester, maximum of 14) Individual problems in photography leading to the resolution of a collection or body of work representative of the artist. Effective: Summer 1999
Prerequisite:

ART 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1988

ART 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 1999

ART 600 Thesis Research (1-15) No description. Effective: Fall 1983

ART 602 Supervised Experience and College Teaching (1-3 per semester/maximum of 6) Supervised and graded teaching experience. Effective: Spring 1990

ART 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Art Education (A ED)

A ED 401 Curricula, Pedagogy, and Assessment in Art Education (3) Preparation of curricula, pedagogical, and assessment strategies for elementary/secondary school and museum art education programs. Effective: Summer 2002
Prerequisite: A ED 440 Cultural Institutions (3) Role of the educator and educational programming in museums and other cultural institutions. Effective: Spring 2003
Prerequisite: A ED 488 Cultural Institutions Practicum (1-3) Supervised field experience in a museum or other cultural institution, including planning, implementation, and evaluation of an educational project. Effective: Summer 2002
Prerequisite: A ED 489 Advanced Practicum (3) Supervised observation, unit planning, and teaching in Saturday Morning Arts School: analysis of creative expressions and art programs for learners. Effective: Spring 2003
Prerequisite: A ED 490 Capstone Course in Art Education (3) Synthesis of preservice art education coursework; introduction to professional practices and standards; completion of teaching and learning portfolio. Effective: Spring 2009
Prerequisite: A ED 494H Schools and Museums (3) Museum education: issues, theories of aesthetic education and practices in schools, museums, and community art centers. Effective: Winter 1978
Prerequisite: A ED 495 Internship in Art Experiences (15) Comprehensive instruction in craft, health, cultural, museum, studio, gallery or social agency. Students supervised by University personnel and arts personnel. Effective: Spring 1989
Prerequisite: A ED 495A Art Education Student Teaching Practicum (7) The elementary student teaching practicum fulfills requirements for Pennsylvania certification to teach Art in both elementary and secondary schools. Effective: Summer 2006
Prerequisite: A ED 495B Art Education Student Teaching Practicum (8) The secondary student teaching practicum fulfills requirements for Pennsylvania certification to teach Art in both elementary and secondary schools. Effective: Summer 2006
Prerequisite: A ED 495C Art Education Student Teaching Practicum (7) The elementary student teaching practicum fulfills requirements for Pennsylvania certification to teach Art in both elementary and secondary schools. Effective: Summer 2006
Prerequisite: A ED 495D Art Education Student Teaching Practicum (8) The secondary student teaching practicum fulfills requirements for Pennsylvania certification to teach Art in both elementary and secondary schools. Effective: Summer 2006
Prerequisite: A ED 495E Internship in Museums and Cultural Institutions (15) Twelve week, full time supervised internship in education in museums or other cultural institutions. Effective: Summer 2006
Prerequisite: A ED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983
Prerequisite: A ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983
A ED 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2006

A ED 502 Research in Art Education (3) Examination of past and present research in art education, an introduction to general methods of research, and critical evaluation of research in art education.
Effective: Summer 1995

A ED 505 Foundations of Art Education (3) An examination of classic theories in art education and their relevance to current developments.
Effective: Summer 1987

A ED 536 Curriculum Development in Art Education (3) Factors affecting art curriculum decisions, analysis, selection, organization, preparation of curriculum. Evaluation and sources of art curriculum improvement and innovation.
Effective: Winter 1978
Prerequisite:

A ED 541 Theories of Child Art (3) Study of current theories of child art; application of recent psychological and anthropological theories to understanding child art.
Effective: Winter 1978
Prerequisite:

A ED 570 Artistic Creation and Theories of Knowing (3) A thematically organized course that makes connections between art-making and art as a way of knowing and inquiry.
Effective: Spring 1995

A ED 588 History of Art Education (3) Historical development of philosophies in art education in the United States and abroad.
Effective: Winter 1978

A ED 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

A ED 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1995

A ED 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Fall 1995

A ED 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1995

A ED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1995

A ED 597A Visual Culture and the Construction of Childhood in the 21st Century; Art & Childhoods (3) An exploration of the role of visual, material, and media cultures in the construction of experience for and by children.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

A ED 597A The Performance and Practice of Research (3) Course will explore ways in which research in Art Education corresponds with cultural performance, performactivity and performance art.

A ED 600 Thesis Research (1-15) No description.
Effective: Fall 1983

A ED 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

A ED 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Teaching of undergraduate art education classes under the supervision of two members of the graduate faculty.
Effective: Fall 1983
Prerequisite:
A ED 603 Foreign Academic Experience (1-12) Foreign study and/or research approved by the graduate program for students enrolled in a foreign university constituting progress toward the degree. Effective: Fall 2003

A ED 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 1983

A ED 811 New Media and Pedagogy (3) Exploration of relationships between communication technologies and beliefs about the nature of knowledge and the nature of art. Effective: Summer 2010

A ED 813 Public Pedagogy (3) Inquiry into the public pedagogy of contemporary visual culture for relevancy to museum and K-12 art education contexts. Effective: Summer 2010

A ED 814 Informal Learning (3) Pedagogy and contexts for learning in museums and other cultural institutions. Effective: Summer 2010

A ED 815 Action Research in Art Education (3) Develop a reflective process to improve strategies, practices, and knowledge of the environments within which art education is practiced. Effective: Summer 2010

Last Import from UCM: June 2, 2012 12:27 PM
Art History (ART H)

ART H 401 (IL) Greek Art and Architecture (3-9) Developments in Greek art and architecture, tenth century B.C. to first century B.C.; emphasis on the importance of Greek sanctuaries.
Effective: Spring 2006
Prerequisite:

ART H 402 (IL) The Illuminated Manuscript (3) Specific stylistic periods in manuscript painting from A.D. 500-1500 in Western Europe and Byzantium.
Effective: Spring 2006
Prerequisite:

ART H 405 (US;IL) Pioneers of Modern Architecture (3 per semester/maximum of 6) Selected period or theme in the development of modern architecture during the nineteenth and/or early twentieth centuries.
Effective: Spring 2006
Prerequisite:

ART H 409 (ART 409) Museum Studies (3) An introduction to the professional activities that occur in art museums.
Effective: Summer 2004
Prerequisite:

ART H 410 Taste and Criticism in Art (3) History and literature of art criticism demonstrating the varied philosophic, cultural, iconographic, technical, and visual approaches.
Effective: Summer 1999
Prerequisite:

ART H 411 (IL) Roman Art (3-9) Roman sculpture and painting from Augustus to Constantine.
Effective: Spring 2006
Prerequisite:

ART H 412 (IL) The Gothic Cathedral (3) Specific aspects of Romanesque and Gothic church architecture of western Europe, especially France and England, between 1000-1500.
Effective: Spring 2006
Prerequisite:

ART H 414 (IL) Italian Baroque Painting (3) Survey of Italian Baroque painting from sixteenth-century proto-Baroque masters to painters of the late Baroque and Rococo periods.
Effective: Spring 2006
Prerequisite:

ART H 415 (US) The Skyscraper (3) Origin and evolution of the skyscraper as seen against the background of cultural conditions and technological factors.
Effective: Spring 2006
Prerequisite:

ART H 416 (US) American Painting: 1876-1913 (3) Art in the United States between 1876 and 1913; emergence of an American art and transition to the modern styles.
Effective: Spring 2006
Prerequisite:

ART H 420 (IL) Russian Architecture (3) Russian architecture from the first Orthodox churches of the late tenth century to the end of the Soviet Union.
Effective: Spring 2006
Prerequisite:

ART H 422 (IL) Studies in Medieval Sculpture (3-9) Specific studies of western European sculpture, 300-1500, with attention to sources, styles, type, and iconography.
Effective: Spring 2006
Prerequisite:

ART H 423 (IL) Studies in Italian Renaissance Art (3-9) Specific studies of Italian Renaissance art, including the work of artists such as Leonardo da Vinci, Michaelangelo, and Raphael.
Effective: Spring 2006
Prerequisite:

ART H 424 (IL) Masters of Northern Baroque Art (3) Seventeenth-century painters in Flanders and Holland, including the works of artists such as Rubens, Rembrandt, and Vermeer.
Effective: Spring 2006
Prerequisite:

ART H 426 (US;IL) Iconoclasm: Powerful Images and their Destruction (3) Iconoclasm: exploring the political, religious, and social motivations behind the destruction of powerful imagery throughout history.
Effective: Summer 2009
Prerequisite:

ART H 429 (IL) Studies in Baroque Art (3) Selected topics in the painting, sculpture, and architecture of seventeenth-century Italy, France, Flanders, Holland, and Spain.
Effective: Spring 2009
Prerequisite:

ART H 435 (IL) Studies in Modern Art (3-6) Lectures focusing on a selected movement of nineteenth- or twentieth-century art.
Effective: Spring 2006
Prerequisite:

ART H 440 (IL) Monuments of Asia (3-9 per semester/maximum of 9) An exploration of major Asian sites and monuments through a focus on their historical and cultural significance.
Effective: Summer 2010
Prerequisite:

ART H 442 (IL) Late Antique and Early Christian Art (3) Survey of the architecture, painting, and minor arts of Christian society from the beginning to the mid-sixth century.
Effective: Spring 2006
Prerequisite:

ART H 445 (IL) Oceanic Art (3) Survey of the arts of Oceania (Polynesia, Micronesia, Melanesia), including masks, sculpture, textiles, architecture and other art forms.
Effective: Summer 2012
Prerequisite:

ART H 446 (IL) Topics in African Art (3 per semester/maximum of 9) Topics vary from “Arts of Eastern and Southern Africa” to “Arts of West Africa.”
Effective: Summer 2012
Prerequisite:

ART H 447 (IL) Topics in the Art of the African Diaspora (3 per semester/maximum of 6) Selected topics in arts of the African Diaspora (South America, Caribbean, USA) including masquerades, textiles, architecture and other art forms.
Effective: Summer 2012
Prerequisite:

ART H 450 (US;IL) The History of Photography (3) The history of photography from 1839, with particular emphasis on the relationship with the plastic arts.
Effective: Spring 2006
Prerequisite:

ART H 452 (IL) Byzantine Art (3) Monumental and minor arts of Byzantium and related areas from the reign of Justinian to the Turkish conquest of Constantinople.
Effective: Spring 2006
Prerequisite:

ART H 454 (IL) Spanish Baroque Art (3) Survey of seventeenth-century Spanish painting and sculpture, with an emphasis on Velasquez, Murillo, Ribera, and Zurbaran.
Effective: Spring 2006
Prerequisite:

ART H 456 (IL) Renaissance and Baroque Palaces (3) This course examines palace architecture and decoration in Italy, France, England, and Germany from 1450-1700.
Effective: Spring 2011
Prerequisite:

ART H 458 (IL) Baroque Capitals of Europe (3) This course examines the architecture and urbanism of European capital cities from 1600-1800.
Effective: Spring 2010
Prerequisite:

ART H 460 (IL) Art and Empire: Aztec, Inca and Spanish (3) This course is a comparative study of the artistic production used in Aztec, Inca and Spanish empires.
Effective: Summer 2012
Prerequisite:

ART H 462 (IL) Studies in Latin American Art (3 per semester/maximum of 6) Specific studies of the visual and material culture created in Latin America from the colonial through the modern era.
Effective: Summer 2012
Prerequisite:

ART H 464 (IL) French Baroque Painting (3) Examination of seventeenth-century French painting, including Italian influences; the provincial, Classical, and official styles in France.
Effective: Spring 2006
Prerequisite:

ART H 470 (US) American Painting and Sculpture Since 1940 (3) Painting and sculpture in the United States from the origins of Abstract Expressionism through the present.
Effective: Spring 2006
Prerequisite:

ART H 475 (US) (ART 475) Contemporary Women Artists (3) An interdisciplinary course that investigates women artists who are integral to the production of contemporary art primarily in the Americas, Europe, and Asia.
Effective: Spring 2009
Prerequisite:

**ART H 476 (ART 476) History and Theory of Digital Art** (3) History and theories of contemporary digital art emphasizing humanistic approaches to technology.
Effective: Spring 2007

Prerequisite:

**ART H 494H Research Projects - Honors** (1-12 per semester/maximum of 12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Spring 2012

**ART H 496 Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

**ART H 496H Independent Studies - Honors** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012

**ART H 497 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

**ART H 497A Oceanic Art** (3) Survey of the sculpture, textile, architecture and other traditional artforms of Oceania, covering the areas of Melanesia, Micronesia and Polynesia.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

**ART H 497A Medieval Art and Architecture in Southern Italy and Sicily** (3) Art and Architecture in the Norman Kingdom of Sicily and South Italy from the 11th through the 13th Centuries.

**ART H 497B Forging Alliances: Post-War Japanese Art** (3) Culminating in an exhibition at the Palmer Museum, this course examines art as a catalyst in international relations.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

**ART H 497B Northern Renaissance Sculpture** (3) Northern Renaissance micro-sculpture in wood and ivory: power and longing in the miniature.

**ART H 497C End of the World: The History of Apocalyptic Thought** (3) This course investigates centuries of apocalyptic thought, from western roots to Maya prophecies, the Spanish conquest, and today’s 2012 craze.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

**ART H 498 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

**ART H 499 (IL) Foreign Study--Art History** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

**ART H 511 Seminar in Ancient Art** (3-12) Selected topics from the history of Greek and Roman art.
Effective: Fall 1983

**ART H 512 Seminar in Medieval Art** (3-12) Original research into problems dealing with the art of the Middle Ages.
Effective: Fall 1983

**ART H 513 Seminar in Renaissance Art** (3-12) Investigations in the area of Renaissance art, centering around major masters and monuments.
Effective: Winter 1978

**ART H 514 Seminar in Baroque Art** (3-12) Investigations in the area of baroque art, centering around major masters and monuments.
Effective: Winter 1978

**ART H 515 Seminar in Modern Art** (3-12) Lectures, readings, reports, and discussions in the field of modern art.
Effective: Winter 1978

The Pennsylvania State University
ART H 522 Seminar in Byzantine Art (3-12) Specific iconographical and stylistic problems in Byzantine art and its relation to classical antiquity, the medieval West, and Islam.
Effective: Winter 1978

ART H 525 Seminar in Modern Architecture (3-12) Investigation into the works and problems of modern architecture as they relate to the culture of our times.
Effective: Winter 1978

ART H 551 Historiography of Art History (1-6) The relationship between the definition of, and approach to, art-historical problems from Vasari to the present.
Effective: Winter 1978

ART H 552 Problems in Connoisseurship (3) A study of the problems of authenticating, attributing, and dating paintings and sculpture through internal evidence.
Effective: Winter 1978

ART H 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

ART H 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

ART H 597A Colonial Urbanism South Asia (3) An exploration of theories and spatial practices centered on colonial and postcolonial architecture and urbanism in South Asia.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ART H 597B Color & Culture (3) An in-depth, historical investigation of the aesthetics and science of color from antiquity to the present.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ART H 600 Thesis Research (1-15) No description.
Effective: Fall 1983

ART H 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

ART H 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience for teaching assistants in art history.
Effective: Fall 1983

Effective: Fall 1983

ART H 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Asian Studies (ASIA)

ASIA 401 East Asian Studies (3-6) An interdisciplinary, variable content, lecture-discussion course on the history, culture, politics, and international relations of China, Japan, and Korea. Effective: Spring 2010
Prerequisite:

ASIA 404 (IL) (CMLIT 404) Topics in Asian Literature (3) Selected works from the major poetry, fiction, and drama of such countries as India, China, Japan. Effective: Fall 2010
Prerequisite:

ASIA 405Y (IL) Seminar in Asian Studies (3-6 per semester/maximum of 6) An advanced, writing-focused seminar in Asian Studies. Effective: Fall 2009
Prerequisite:

ASIA 440 (IL) (ART H 440) Monuments of Asia (3-9 per semester/maximum of 9) An exploration of major Asian sites and monuments through a focus on their historical and cultural significance. Effective: Summer 2010
Prerequisite:

ASIA 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2010

ASIA 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 2010

ASIA 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Spring 2010

ASIA 501 Proseminar in Asian Studies I (1-3) A seminar for graduate students in the Asian Studies dual-degree PhD programs. Effective: Summer 2009

ASIA 502 Proseminar in Asian Studies II (1-3) Introduction to theories, methods, and disciplines of Asian Studies. Effective: Fall 2009

ASIA 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 2009

ASIA 595 Internship (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Summer 2009

ASIA 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2009

ASIA 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Summer 2009

ASIA 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2009

ASIA 600 Thesis Research (1-15 per semester/maximum of 99) No description. Effective: Summer 2009
Astrobiology (ABIOI)

ABIOI 570 Astrobiology Field Experience (2) Geological field excursions to sites where the early evolution of life and the environment is revealed and to modern analogues.
Effective: Summer 2004

ABIOI 574 Planetary Habitability (3) Aspects of star and planet formation, habitable zones, biospheric evolution, life in extreme environments, planet and life detection.
Effective: Summer 2004

ABIOI 590 Astrobiology Seminar (2) Student-led presentations and discussions of current and classic literatures relevant to the themes of Astrobiology.
Effective: Summer 2004

ABIOI 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2005

Last Import from UCM: June 2, 2012 12:27 PM
Astronomy and Astrophysics (ASTRO)

ASTRO 400H Honors Seminar (1 per semester, maximum of 2) Presentations of various branches and modes of modern astrophysical research, based on lectures, visits to telescopes and facilities, and discussions.
Effective: Spring 2003
Prerequisite:

ASTRO 410 Computational Astrophysics (3) Applications of numerical methods and computer programming to astrophysics, including stellar physics and cosmology.
Effective: Spring 2008
Prerequisite:

ASTRO 414 Stellar Structure and Evolution (3) Theory of Stellar structure and evolution including energy generation and transport and an examination of stellar models.
Effective: Summer 2010
Prerequisite:

ASTRO 420W Planets and Planetary System Formation (3) Solar system properties, star formation, protoplanetary disks and planet formation, solar system model, extrasolar planets, and astrobiology.
Effective: Summer 2004
Prerequisite:

ASTRO 440 Introduction to Astrophysics (3) Theoretical investigation of physical processes in astronomical objects and systems; modern physical interpretation of astronomical phenomena.
Effective: Spring 1994
Prerequisite:

ASTRO 451 Astronomical Techniques (3) Practical methods of modern observational astronomy, detectors, filters, instrumentation for both ground-based and space observations, and data analysis.
Effective: Fall 2008
Prerequisite:

ASTRO 475W Stars and Galaxies (3) Astronomical studies concerning the distribution and evolution of stars and gas in our and other galaxies.
Effective: Fall 1993
Prerequisite:

ASTRO 480 Nebulae, Galaxies, and Cosmology (3) Emission-line spectroscopy, structure and evolution of galaxies, physics of galactic nuclei and quasars, observational cosmology.
Effective: Spring 2002
Prerequisite:

ASTRO 485 Introduction to High-Energy Astronomy (3) The study of black holes, neutron stars, white dwarfs, supernova remnants, and extragalactic objects through x-ray and gamma ray observations.
Effective: Spring 1994
Prerequisite:

ASTRO 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1991

ASTRO 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1991

ASTRO 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

ASTRO 501 Fundamental Astronomy (3) Concepts, tools and techniques, and essential background in stellar, Galactic, extragalactic astronomy and cosmology.
Effective: Fall 2008

ASTRO 502 Fundamental Astrophysics (3) Fundamental tools and results of modern astrophysical theory. Gravitation; gas dynamics; radiation processes; radiative transfer; atomic structure and transitions.
Effective: Fall 2008

ASTRO 504 Extragalactic Astronomy (3) Properties and evolution of galaxies including their stellar, interstellar, black hole and Dark Matter components.
Effective: Fall 2008
Prerequisite:

ASTRO 513 Observational Techniques in Astronomy (3) Theoretical and practical aspects of modern multiwavelength...
observational astrophysics including detector physics, imaging techniques, spectroscopic techniques, and data analysis principles.
Effective: Spring 2008
Prerequisite:

ASTRO 527 (PHYS 527) **Computational Physics and Astrophysics** (3) Introduction to numerical methods for modeling physical phenomena in condensed matter, atomic and high energy physics, gravitation, cosmology and astrophysics.
Effective: Fall 2008

ASTRO 530 **Stellar Atmospheres** (3) The structure, physics and observational manifestations of atmospheres of stars.
Effective: Fall 2008
Prerequisite:

ASTRO 534 **Stellar Structure and Evolution** (3) Physics of stellar interiors, stellar structure, and evolutionary changes of stars from pre-main sequence through final states.
Effective: Fall 2008
Prerequisite:

ASTRO 542 **Interstellar Medium and Star Formation** (3) Theory and observation of the interstellar medium of our Galaxy and the process of star and planet formation.
Effective: Spring 2012

ASTRO 545 (PHYS 545) **Cosmology** (3) Modern cosmology of the early universe, including inflation, the cosmic microwave background, nucleosynthesis, dark matter and energy.
Effective: Spring 2009

ASTRO 550 **High Energy Astrophysics** (3) Theory and observations of X-rays, gamma-rays and other high energy radiation from Galactic and extragalactic sources.
Effective: Fall 2008 Ending: Fall 2012
Prerequisite:

ASTRO 550 **High Energy Astrophysics** (3) Theory and observations of X-rays, gamma-rays and other high energy radiation from Galactic and extragalactic sources.
Effective: Spring 2013 Future: Spring 2013

ASTRO 585 **Topics in Astronomy and Astrophysics** (3) Advanced study of issues in planetary, stellar, galactic, extragalactic and theoretical astronomy and astrophysics.
Effective: Summer 2008
Prerequisite:

ASTRO 589 **Seminar in Current Astronomical Research** (1) Contemporary issues in instrumental, observational and theoretical astronomy and astrophysics.
Effective: Summer 2008
Prerequisite:

ASTRO 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1991

ASTRO 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1991

ASTRO 597 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1991

ASTRO 600 **Thesis Research** (1-15) No description.
Effective: Summer 1991

ASTRO 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 1991

ASTRO 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description.
Effective: Summer 1991

ASTRO 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 1991

ASTRO 611 **Ph.D. Dissertation Part-Time** (0) No description.
ASTRO 801 Planets, Stars, Galaxies, and the Universe (3) Overview of the structure, formation, and evolution of planets, stars, galaxies, and the universe.
Effective: Summer 2008

ASTRO 897 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2007

ASTRO 897A Black Holes for Educators (2) Take yourself deep inside black holes and modern ideas about gravity, space, time, and solar system formation.
Effective: Summer 2012 Ending: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
Bar Preparation (BPREP)

BPREP 900 Fundamental Skills for the Bar Examination (2) The course provides students with a substantive review of selected material routinely tested on the bar exam, primarily through problems and exercises in a bar exam format designed to familiarize students with the exam and techniques for answering multiple choice questions. Individualized feedback is provided every week to assist each student identify areas of strength and weakness. The goal is to enhance student ability to prepare for the bar exam and is intended to supplement, not replace, commercial bar preparation courses. This course is not focused on any particular state, so all students will benefit regardless of where they are sitting for the bar exam. Students enrolled in BPREP 900 are not permitted to use laptops, phones or other devices during class. This course is not recommended for students ranked in the top third of their class. BPREP 900 is graded on a pass/fail basis but is not subject in any other respect to the Pass/Fail Option. Effective: Fall 2011

BPREP 997 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 2009

Last Import from UCM: June 2, 2012 12:27 PM
Behavior Influ Hlth (BIH)

BIH 722 Behavioral Influences on Health (3) Fundamental course addressing the physician's role in teaching the importance of individual choice and responsibility in maintaining health.
Effective: Fall 2008
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Behavioral Sci-Hy (BEHSC)

BEHSC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

BEHSC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be OFFERED INFREQUENTLY.
Effective: Spring 1987

Last Import from UCM: June 2, 2012 12:27 PM
Biobehavioral Health (BB H)

BB H 402 (IL) African Health & Development (3) Course will address African health and development strategies in the context of health promotion programs.
Effective: Summer 2010
Prerequisite:

BB H 407 (IL) Global Health Equity (3) Health, social disparities, and equity in the global environment.
Effective: Summer 2010

BB H 410 Developmental and Health Genetics (3) Discussion of genetic influences on development and the interrelationships between genetics and health.
Effective: Spring 2008
Prerequisite:

BB H 411W Research and Applications in Biobehavioral Health (3) Research methods, multi-level analyses, and applications in biobehavioral health.
Effective: Spring 2011
Prerequisite:

BB H 416 Health Promotion II: Planning, Implementation, and Evaluation (3) Planning, implementation, and evaluation of health promotion, prevention, and intervention programs; emphasizing evaluation.
Effective: Fall 2010
Prerequisite:

BB H 417 Advanced Applications in Health Promotion (3) Advanced learning experience in health promotion applications in which students will actively participate in planning, implementing, evaluating health programs.
Effective: Spring 2000
Prerequisite:

BB H 420 Developing Stress Management Programs (3) Planning, developing, and implementing strategies for stress management programs for health education professionals in school, community, and corporate settings.
Effective: Spring 1998

BB H 432 Biobehavioral Aspects of Stress (3) Comprehensive discussion on the mechanisms of stress-induced diseases.
Effective: Fall 2010
Prerequisite:

BB H 440 (US;IL) (H P A 440) Principles of Epidemiology (3) Theory of epidemiology and significant case studies; potential applications to health care.
Effective: Fall 2008
Prerequisite:

BB H 440U (US;IL) (H P A 440U) Principles of Epidemiology (3) Theory of epidemiology and significant case studies; potential applications to health care.
Prerequisite:

BB H 446 Human Sexuality as a Health Concern (3) Examination of human sexuality as an integral part of basic health education and health care for persons of all ages.
Effective: Fall 2001
Prerequisite:

BB H 451 Pharmacological Influences on Health (3) Biological and behavioral aspects of therapeutic and recreational drug use and misuse, and their relationships to health.
Effective: Fall 2001
Prerequisite:

BB H 452 (US) (NURS 452, WMNST 452) Women’s Health Issues (3) Exploration of major health issues concerning women today, with an emphasis on social, cultural, and medical influences.
Effective: Summer 2005
Prerequisite:

BB H 458 (WMNST 458) Critical Issues in Reproduction (3) Examination and analysis of the new reproductive technologies from the standpoint of medical ethics, feminism, and sociocultural influences.
Effective: Spring 2007
Prerequisite:

BB H 468 Neuroanatomical Bases for Disorders of Behavior and Health (3) An examination of the anatomical/cellular/molecular bases for human central nervous system disorders and their impacts on victims/families/caregivers.
Effective: Spring 2007
Prerequisite:

BB H 469 (BIOL 469) Neurobiology (3) Comprehensive examination of neuroanatomy and physiology designed to
integrate the principles of neurochemistry, neuroendocrinology and molecular biology.

Effective: Fall 1994
Prerequisite:

BB H 470 (BIOL 470) **Functional and Integrative Neuroscience** (3) Neurobiological function in motivated behaviors, motor and sensory function, learning and memory, development, sexual differentiation, and pathology.

Effective: Summer 1995
Prerequisite:

BB H 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1995

BB H 494H **Senior Honors Thesis** (1-6) Independent study related to a student's interests directed by a faculty supervisor and culminating in the production of a thesis.

Effective: Summer 2005
Prerequisite:

BB H 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 1995

BB H 496H **Independent Honors Study in BB H** (1-3 per semester/maximum of 6) For non-thesis independent study/research by Schreyer Honors College scholars.

Effective: Summer 2011

BB H 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 1995

BB H 497A **Clinic Volunteer Training** (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

BB H 497B **Health Works** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

BB H 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2009

BB H 501 **Biobehavioral Systems in Health and Development: Theory and Processes** (3) Examination of theories and basic processes for understanding individuals as dynamic biobehavioral complex systems functioning through continual interactions.

Effective: Spring 2001
Prerequisite:

BB H 502 (PSY 502) **Health: Biobehavioral Perspectives** (3) Introduction to the role of psychology in maintaining health and in treating nonpsychiatric disorders.

Effective: Spring 1992

BB H 503 **Biobehavioral Systems in Health and Development: Processes and Integration** (3) Examination and integration of basic processes for understanding individuals as dynamic biobehavioral complex systems functioning through continual interactions.

Effective: Spring 2001
Prerequisite:

BB H 504 **Behavioral Health Intervention Strategies** (3) Evaluation of intervention strategies from a biobehavioral health context. Theories of change processes as they pertain to health are analyzed.

Effective: Spring 1991
Prerequisite:

BB H 505 **Behavioral Health Research Strategies** (3) Research strategies in behavioral health investigations are examined. Designs and data analytic models relevant to biobehavioral research are included.

Effective: Spring 1991
Prerequisite:

BB H 521 **Structural Equatino Modeling** (3) Structural Equation Modeling with LISREL and Amos. Confirmatory factor analysis; regression and path analysis with manifest/latent variables; special applications.

Effective: Summer 2002
Prerequisite:

BB H 551 **World Health Promotion** (3) Analysis of the various health problems that affect humans throughout the world;

The Pennsylvania State University
emphasize will be placed on personal health issues.
Effective: Spring 1998

BB H 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1991

BB H 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Spring 1991

BB H 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 1991

BB H 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1991

BB H 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1991

BB H 597A (S PSY 597A) Neural Systems and Human Behavior (3) This is a course in basic neuroscience and neurological bases of behavior. This course will provide students with fundamental knowledge about brain-behavioral systems as well as prepare the student to read and understand the current neuroscience literature relevant to his or her professional field.
Effective: Summer 2012 Ending: Summer 2012

BB H 597A Missing Data: Analysis and Design (1) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:
BB H 600 THESIS RESEARCH (1-15) NO DESCRIPTION.
Effective: Spring 1991

BB H 601 PH.D. DISSERTATION FULL-TIME (0) NO DESCRIPTION.
Effective: Spring 1991

BB H 602 SUPERVISED EXPERIENCE IN COLLEGE TEACHING (1-3 PER SEMESTER, MAXIMUM OF 6) NO DESCRIPTION.
Effective: Spring 1991

Effective: Spring 1991

BB H 611 PH.D. DISSERTATION PART-TIME (0) NO DESCRIPTION.
Effective: Spring 1991

Last Import from UCM: June 2, 2012 12:27 PM
Biochm Micrb & Molbi (BMMB)

Prerequisite:

B M B 401 General Biochemistry (3) Principles of the structure and function of biological molecules, including carbohydrates, lipids, membranes, proteins, and enzymes. Students may not receive credit for both CHEM 476 and B M B 401. Effective: Fall 2009

Prerequisite:

B M B 401H General Biochemistry (3) Principles of the structure and function of biological molecules, including carbohydrates, lipids, membranes, proteins, and enzymes. Students may not receive credit for both CHEM 476 and B M B 401H. Effective: Fall 2009

Prerequisite:

Prerequisite:

Prerequisite:

B M B 403 Biochemistry Laboratory (1) An introduction to techniques of experimental biochemistry, illustrating principles covered in B M B 402. Effective: Spring 2010

Prerequisite:

Prerequisite:

B M B 408 Laboratory Instructional Practice (1-2) Participation in the instruction of undergraduate laboratory courses, including classroom preparation; discussion of principles and objectives of each exercise. Effective: Spring 1995

Prerequisite:

B M B 411 Survey of Biochemistry and Molecular Biology Literature (1) An introduction to readings and oral presentations in biochemistry and molecular biology. Effective: Spring 1995

Prerequisite:

B M B 428 Physical Chemistry with Biological Applications (3) Chemical thermodynamics and kinetics with applications to biological problems. Effective: Summer 2007

Prerequisite:

B M B 430 (BIOL 430, ENT 430) Developmental Biology (3) Molecular and genetic analyses of mechanisms involved in differentiation and determination in biological systems. Effective: Summer 1994

Prerequisite:

B M B 432 (MICRB 432, VB SC 432) Advanced Immunology: Signaling in the Immune System (3) The study of signaling pathways that regulate the immune response. Effective: Fall 2007

Prerequisite:

B M B 433 (VB SC 433) Molecular and Cellular Toxicology (3) In-depth coverage of processes by which drugs/chemicals interact with biological systems and the experimental approaches used to study these interactions. Effective: Fall 2007

Prerequisite:

B M B 435 (MICRB 435, VB SC 435) Viral Pathogenesis (2) A study of the molecular, immunological and pathological aspects of viral diseases as well as laboratory methods of diagnosis. Effective: Fall 2007

Prerequisite:

B M B 437 Physiological Biochemistry (2) Physiological aspects of biochemistry, with emphasis on mammalian metabolism, specialized tissue and fluid functions, detoxification mechanisms, energetics, and physiological interrelationships. Effective: Spring 1995
Prerequisite:

**B M B 442 Laboratory in Proteins, Nucleic Acids, and Molecular Cloning** (3) Laboratory in enzyme purifications and assay techniques; nucleic acid isolation and characterization, including plasmid preparation.
Effective: Summer 2012
Prerequisite:

**B M B 443W Laboratory in Protein Purification and Enzymology** (3) Laboratory in protein isolation methodology, enzyme kinetics, and physico-chemical properties of proteins.
Effective: Spring 2009
Prerequisite:

**B M B 444 Laboratory in Carbohydrates and Lipids** (1) Laboratory in the isolation, quantification, and characterization of carbohydrates and lipids.
Effective: Spring 2009
Prerequisite:

**B M B 445W Laboratory in Molecular Genetics I** (2) Laboratory in molecular techniques in gene analysis and microbial genetics, emphasizing in vitro methodologies.
Effective: Spring 2009
Prerequisite:

**B M B 446 Laboratory in Molecular Genetics II** (1) Laboratory in gene analysis and microbial genetics, emphasizing in vivo methodologies.
Effective: Spring 2009
Prerequisite:

**B M B 450 (MICRB 450) Microbial/Molecular Genetics** (2) Genetic phenomena, with emphasis on molecular mechanisms: gene transfer, recombination, gene conversion, gene fusion, suppression, transposons.
Effective: Fall 2010
Prerequisite:

**B M B 460 (MICRB 460) Cell Growth and Differentiation** (3) Mechanisms and regulation of protein trafficking, organelle biosynthesis, cell development, signaling and cell cycle control. Emphasizes experimental design and analysis.
Effective: Spring 2006
Prerequisite:

**B M B 464 Molecular Medicine** (3) An exploration of the impact of advances in molecular biology on understanding disease mechanisms, medical diagnosis, and therapeutics.
Effective: Spring 1999
Prerequisite:

**B M B 465 Protein Structure and Function** (3) A study of the relationship between structure and function of proteins; internet analysis to predict structure and function is included.
Effective: Fall 2007
Prerequisite:

**B M B 474 Analytical Biochemistry** (3) Physical/chemical theory and techniques that emphasize purification and characterization of biological macromolecules, including proteins, lipids and nucleic acids.
Effective: Fall 2008
Prerequisite:

**B M B 480 (MICRB 480) Tumor Viruses and Oncogenes** (3) Oncogenes, DNA and RNA tumor viruses, and relevant experimental techniques with emphasis on molecular basis of carcinogenesis and gene regulation.
Effective: Spring 2001
Prerequisite:

**B M B 496 Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1995

**B M B 497 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1995

**B M B 497B Functional Genomics** (3) Exploration of biochemical, genetic and evolutionary approaches to comprehensive discovery of functional DNA segments in genomes, including genes and the DNA sequences needed for regulating their expression.
Prerequisite:

**B M B 498 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1995

**B M B 498A (MICRB 498A) Antibiotics: Development and Resistance** (2) Students will investigate and discuss research advances, ethical issues, and societal implications related to antibiotic development and resistance.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
**B M B 498A (MICRB 498A) Antibiotics: Development and Resistance** (2) The goal of this course is to achieve a holistic understanding of science through investigation of specific issues pertaining to antibiotic development and resistance.

**B M B 498B Cell Biology Methods** (2) Advanced laboratory in the visualization and analysis of organelles, genetic mechanisms, and metabolic processes in eukaryotes.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

**B M B 498C Genetics Control of Organogenesis** (2) This is a new experimental course that integrates primary research in genetics of organ formation with a seminar to focus on methods in modern genetics and topics in genetics and organogenesis of interest to students. Participation in 498C is application based. Applications are taken at the start of every semester.

**B M B 499 (IL) Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

**BMMB 501 Core Concepts in Biomolecular Science** (5) Introduction to broaden one's understanding of biochemical and biophysical principles and the basic aspects of eukaryotic and prokaryotic cell biology.
Effective: Summer 2007
Prerequisite:

**BMMB 507 Seminar in Biochemistry, Microbiology, and Molecular Biology** (1 per semester) No description.
Effective: Spring 1996

**BMMB 509 Ethics in Biomedical Science** (1) Discussion of ethical issues relevant to scientific research in the biomedical sciences.
Effective: Summer 1995

**BMMB 510 Current Literature in Molecular Biology** (1) Discussion and analysis of recent scientific papers that form the core of current literature in molecular biology and related disciplines.
Effective: Spring 1996

**BMMB 511 (IBIOS 511, VB SC 511) Molecular Immunology** (2) The study of molecular and biochemical events that influence immune responses and define current questions in immunology.
Effective: Spring 2008
Prerequisite:

**BMMB 515 (VB SC 515) Macrophage Biology** (2) The role of macrophages at the interface between innate and adaptive immunity.
Effective: Spring 2008
Prerequisite:

**BMMB 516 (VB SC 516) Viral Evasion of Immune Responses** (2) To gain a better understanding of how virus and cells interact and mechanisms that permit viruses to escape immunity.
Effective: Spring 2008
Prerequisite:

**BMMB 518 (VB SC 518) T Cell Recognition and Development** (2) An in-depth analysis of the mechanisms of T cell recognition, activation and development, and the acquired immune response.
Effective: Spring 2008
Prerequisite:

**BMMB 519 (VB SC 519) Development of the Hematopoietic/Vascular System** (2) An in-depth analysis of current research in the development of the hematopoietic and vascular system during embryogenesis and fetal development.
Effective: Spring 2008
Prerequisite:

**BMMB 541 Molecular Biology of Animal Development** (3) The course emphasizes comparative molecular genetic analyses of developmental gene networks using vertebrate and Drosophila model systems.
Effective: Summer 2007

**BMMB 551 (IBIOS 551) Genomics** (3) Structure and function of genomes including use of some current web-based tools and resources for studies and research in genomics.
Effective: Summer 2007

The Pennsylvania State University
BMMB 572 (CHEM 572) **Nucleic Acids Chemistry** (3) Biophysical and biochemical approaches for studying structure-function relationships in nucleic acids. 
Effective: Spring 2013 Future: Spring 2013 
Prerequisite: 
BMMB 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. 
Effective: Spring 1996

BMMB 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. 
Effective: Spring 1996

BMMB 597B **Bioinorganic Chemistry** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. 
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

BMMB 597C **Computers in Molecular Biology** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. 
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

BMMB 597D **Bioinformatics: Analyzing High Throughput Sequencing Data** (2) This course introduces students with biology background to the computational analysis and interpretation of high-throughput sequencing data. 
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

BMMB 597E **Protein Evolution** (2) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. 
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

BMMB 597G **Mechanistic Bioorganic Chemistry** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. 
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

BMMB 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. 
Effective: Summer 2001

BMMB 598B **Critical Analysis of Scientific Literature** (1) This course will provide experience in critical analysis of papers from the Biochemistry/Molecular Biology literature. 

BMMB 598C **Microbial Biology I** (4) Course will address fundamental questions about bacteria and fungi, and their interactions with humans, plants, other microorganisms, and the environment. 

BMMB 598D **Eukaryotic Cell Biology** (3) Will cover topics central to cutting edge research in cell biology. Focus on processes affecting cell as a whole. 

BMMB 598E **Biomolecular Structure** (2) To understand the methods used to determine macromolecular structure at atomic resolution and how the three-dimensional structures of bio-molecules relate to their function. 

BMMB 598K **Advanced Gene Expression** (3) Course intended to bring students up to the leading edge of research in gene regulation. 

BMMB 600 **Thesis Research** (1-15) No description. 
Effective: Spring 1996

BMMB 601 **Ph.D. Dissertation Full-Time** (0) No description. 
Effective: Spring 1996

BMMB 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching of biochemistry undergraduate laboratory and recitation classes under faculty supervision. 

The Pennsylvania State University
BMMB 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Spring 1996

BMMB 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Spring 1996

Last Import from UCM: June 2, 2012 12:27 PM
Bioengineering (BIOE)

BIOE 401 **Introduction to Bioengineering Research and Design** (3) Challenges and constraints of bioengineering research and design. Emphasis on immunoresponse, tissue mechanics, biological transport phenomena, and biomaterials. Effective: Spring 2007
Prerequisite: Concurrent: BIOE 404

BIOE 402 **Biomedical Instrumentation and Measurements** (3) Biomedical measurements, including consideration of techniques, equipment, and safety. Effective: Spring 2008
Prerequisite:

BIOE 403 **Biomedical Instrumentation Laboratory** (1) Biomedical measurements laboratory including measurement of bioptentials, experiments in medical imaging techniques, and use of cardiovascular and pulmonary system instrumentation. Effective: Spring 2007
Prerequisite:

BIOE 404 **Data Analysis and Experiment Design** (1) Statistical measures of data, and selection of experiment sample size to meet criteria. Effective: Summer 2006
Prerequisite: Concurrent: BIOE 401

BIOE 406 **Medical Imaging** (3) Physical principles and clinical applications of medical imaging methods. Effective: Summer 2000
Prerequisite:

BIOE 409 **Biofluid Mechanics** (3) The fundamental relations in fluid mechanics and their application to biofluids including steady/unsteady flows, diseased states, devices and biorheology. Effective: Summer 2006
Prerequisite:

BIOE 410 **Biomedical Applications of Microfluidics** (3) Study of fluid mechanics at small length scales. Low Reynolds number flow, electrokinetic flows, bio separations in microfluidic devices. Effective: Fall 2007
Prerequisite:

BIOE 413 **Bioengineering Transport Phenomena** (3) An integrated study of the fundamentals of mass transport processes with emphasis on the analysis of physiological systems. Effective: Summer 2007
Prerequisite:

BIOE 419 **Artificial Organs and Prosthetic Devices** (3) Analysis of function and consideration of design concerns for biomedical implants, including prosthetic joints, electrical stimulators, and cardiovascular pumps. Effective: Fall 2007
Prerequisite:

BIOE 423 **Reaction Kinetics of Biological Systems** (3) Chemical kinetics and reaction equilibria with applications to the analysis of physiological function and the design of synthetic organs. Effective: Spring 2007
Prerequisite:

BIOE 440 **Clinical Corelations** (1) Engineering analysis applied to common disease states and therapies. Effective: Summer 2000
Prerequisite:

BIOE 443 (MATSE 403) **Biomedical Materials** (3) Describe properties of materials and composites and their in vivo interactions. Effective: Spring 2007
Prerequisite:

BIOE 444 (IL) (MATSE 404) **Surfaces and the Biological Response to Materials** (3) Focus is on special properties of surface as an important causative and mediating agent in the biological response to materials. Effective: Summer 2007
Prerequisite:

BIOE 445 **Tissue Engineering: Concepts, Calculations and Applications** (3) Introduction to interdisciplinary tissue engineering concepts, associated biochemical and biomechanical engineering calculations, and cardiovascular, musculoskeletal, and other tissue application examples. Effective: Spring 2011
Prerequisite:

BIOE 450W **Bioengineering Senior Design** (3) Application of engineering and physiological principles to design of artificial organs and life supportive devices. Effective: Spring 2009
Prerequisite:
BIOE 490 Colloquium (1) Technical presentations related to research and industry concerns, and by students doing senior projects. Effective: Summer 2000
Prerequisite:

BIOE 494H Honors Thesis (1-3 per semester/maximum of 3) Independent study research and design, leading towards honors thesis. Effective: Spring 2012 Ending: Fall 2012
Prerequisite:

BIOE 494H Honors Thesis (1-3 per semester/maximum of 6) Independent study research and design, leading towards honors thesis. Effective: Spring 2013 Future: Spring 2013
Prerequisite:

BIOE 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

BIOE 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

BIOE 497K Bioengineering Mechanics and Techniques Laboratory (3) Experimental laboratory that includes measurements related to biomechanical phenomena (e.g. tissue viscoelasticity and blood flow) and blood separation. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

BIOE 499 Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2008

BIOE 501 (CH E 501) Bioengineering Transport Phenomena (3) Application of the equations of mass, energy, and momentum conservation to physiological phenomena and to the design of artificial organs. Effective: Summer 1990

BIOE 503 (CH E 503) Fluid Mechanics of Bioengineering Systems (3) Cardiovascular system and blood flow, non-Newtonian fluid description, vessel flows, unsteady flows and wave motion, windkessel theory, transmission line theory. Effective: Summer 1990

BIOE 505 Bioengineering Mechanics (3) Passive and active mechanical properties of tissues, rheological materials, models of muscle contraction, pulmonary mechanics, forces in muscular-skeletal system. Effective: Winter 1978

BIOE 506 Medical Imaging (3) Medical diagnostic imaging techniques, including generation and detection of ultrasound, x-ray, and nuclear radiation; instrumentation and biological effects. Effective: Fall 1983
Prerequisite:

BIOE 508 (MATSE 508) Biomedical Materials (3) Properties and methods of producing metallic, ceramic, and polymeric materials used for biomedical applications. Effective: Spring 2003

BIOE 510 Biomedical Applications of Microelectromechanical Systems (BioMEMS) and Bionanotechnology (3) Introduction to BioMEMS and Bionanotechnology. Topics include: electromechanical and chemical biosensors, microfluidics microscale separations, and surface patterning for cellular engineering. Effective: Spring 2008
Prerequisite:

BIOE 512 Cell and Molecular Bioengineering (3) Graduate level cell and molecular biology course for engineers emphasizing molecular mechanisms. Effective: Summer 2004

BIOE 513 Bioengineering Laboratory Techniques (3) Laboratory techniques in cell molecular biology, protein biochemistry and cell culture with an emphasis on engineering analysis and quantification. Effective: Summer 2008
Prerequisite:

BIOE 515 Cell Mechanics and Biophysics (3) Advanced topics and recent developments in cellular engineering; applications of engineering science to cell biology. Effective: Spring 1997
Prerequisite:
BIOE 517 (MATSE 507) **Biomaterials Surface Science** (3) Special properties of surfaces as an important causative and mediating agent in the biological response to materials.  
Effective: Spring 2003

BIOE 519 **Artificial Organs Design** (3) Basic techniques and principles of a multidiscipline approach to artificial organs design.  
Effective: Spring 1991

BIOE 520 **Biophotonics** (3) Physical and engineering underpinning of different modalities of laser microscopy and spectroscopy in biophysics, biomedical engineering, and life science applications.  
Effective: Fall 2007  
Prerequisite:  
BIOE 552 (IE 552) **Mechanics of the Musculoskeletal System** (3) Structure and biomechanics of bone, cartilage, and skeletal muscle; dynamics and control of musculoskeletal system models.  
Effective: Summer 1998  
Prerequisite:  
BIOE 553 (IE 553) **Engineering of Human Work** (3) Physics and physiology of humans at work; models of muscle strength, dynamic movements; neural control; physical work capacity; rest allocation.  
Effective: Summer 1985  
Prerequisite:  
BIOE 576 **Bioengineering of the Cardiovascular System** (3) Experimental and analytical studies of network branching patterns, regional blood flow, rheology and mechanics of blood cells and vessels.  
Effective: Summer 1991  
Prerequisite:  
BIOE 590 **Bioengineering Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.  
Effective: Spring 1991

BIOE 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Spring 1987

BIOE 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.  
Effective: Spring 1987

BIOE 597F **Applications of Soft Lithography in Bionanotechnology** (3) Soft lithography techniques and applications in biological sciences with an emphasis on studies of mechanobiology, tissue engineering, and biochemical pathways.  
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

BIOE 597I **Bioengineering Ethics and Professional Development** (1) Problem solving methods in ethical decision making, best practices in research communication, and strategies for professional development.  

BIOE 597K **Regenerative Medicine** (3) Introduction to regenerative medicine, the integration of cell biology with biomaterials and engineering to develop strategies for regeneration of tissues.  
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

BIOE 599 **Foreign Studies** (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.  
Effective: Fall 2008

BIOE 600 **Thesis Research** (1-15) No description.  
Effective: Fall 1983

BIOE 601 **Ph.D. Dissertation Full-Time** (0) No description.  
Effective: Fall 1983

BIOE 610 **Thesis Research Off Campus** (1-15) No description.  
Effective: Fall 1983

BIOE 611 **Ph.D. Dissertation Part-Time** (0) No description.  
Effective: Fall 1983
Bioethics (BIOET)

BIOET 501 (PHIL 571) **Perspectives and Methods in Bioethics** (3) This course explores a variety of theories and methods in bioethics and applies them to a selection of current topics. Effective: Fall 2011

BIOET 502 (PHIL 572) **Perspectives in Macro-Bioethics** (3) This course explores systemic and structural issues in bioethics, and the theories and methodologies required to address them. Effective: Fall 2011

BIOET 503 (PHIL 573) **Ethics and the Responsible Conduct of Biomedical Research** (3) Provides an understanding of ethical issues arising in the responsible conduct of biomedical research and frameworks for critically analyzing them. Effective: Fall 2011

BIOET 590 **Bioethics Colloquium** (1-3 per semester/maximum of 36) Continuing seminars in bioethics that consist of a series of individual presentations by faculty, students, or outside speakers. Effective: Fall 2011

BIOET 594 **Research Topics** (1-12 per semester/maximum of 15) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2011

BIOET 595 **Internship** (1-12 per semester/maximum of 12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships related to bioethics. Effective: Fall 2011

BIOET 596 **Individual Studies** (1-9 per semester/maximum of 9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 2011

BIOET 597 **Special Topics** (1-9 per semester/maximum of 9) Formal courses given infrequently to explore a topic or topics in bioethics in depth. Effective: Fall 2011

BIOET 598 **Special Topics** (1-9 per semester/maximum of 9) Formal courses given infrequently to explore a topic or topics in bioethics in depth. Effective: Fall 2011

BIOET 599 **Foreign Studies** (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction. Effective: Fall 2011

BIOET 600 **Thesis Research** (1-12 per semester/maximum of 99) Thesis Research in Bioethics. Effective: Fall 2011

BIOET 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Students will teach lower-level undergraduate courses in bioethics, including courses on the undergraduate minor in bioethics and medical humanities. Effective: Fall 2011

BIOET 603 **Foreign Academic Experience** (1-9 per semester/maximum of 18) Foreign study and/or research approved by the graduate program for students enrolled in a foreign university constituting progress toward the degree. Effective: Fall 2011

BIOET 610 **Thesis Research Off-Campus** (1-12 per semester/maximum of 99) Thesis Research, Off Campus. Effective: Fall 2011

Bioinformatics (BIIFM)

BIIFM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2004

BIIFM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2003

BIIFM 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2003

BIIFM 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2003

BIIFM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2003

Last Import from UCM: June 2, 2012 12:27 PM
Biological Basis-Dis (BBD)

BBD 716 Biological Basis of Disease (6) This integrated course includes topics in microbiology, immunology, pathology, pharmacology, and human genetics.
Effective: Summer 1997
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Biological Chem-Hy (BCHEM)

BCHEM 505 Biological Chemistry II (2) A continuation of BCHEM 502. Emphasis on interrelations of metabolic pathways, catabolic end products, and regulation.
Effective: Spring 2011

BCHEM 510 Carcinogenesis and Chemoprevention (2) Mechanisms of cancer induction by environmental carcinogens and chemoprevention by natural and synthetic agents.
Effective: Spring 2011
Prerequisite:

BCHEM 521 Biochemistry: Structure/Function/Regulation of Biological Molecules (3) The fundamentals of biochemistry in evaluating the forces that govern inter- and intra-molecular interactions are studied.
Effective: Summer 2011
Prerequisite:

BCHEM 522 Molecular Genetics: Genes to Genomes (3) This course focuses on concepts of molecular genetics and genomics, and DNA- protein interactions and their functions within macromolecular complexes.
Effective: Summer 2011
Prerequisite:

Effective: Fall 2007

Effective: Fall 2007

Effective: Fall 2007

BCHEM 584 Glycobiology A: Carbohydrate Chemistry (1) Graduate course for students interested in carbohydrates.
Effective: Fall 2007
Prerequisite:

BCHEM 585 Glycobiology B: Glycoconjugates (1) Graduate course for students interested in carbohydrates.
Effective: Fall 2007
Prerequisite:

BCHEM 586 Glycobiology C: Glycans in Health and Disease (1) Graduate course for students interested in carbohydrates.
Effective: Fall 2007
Prerequisite:

BCHEM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

BCHEM 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

BCHEM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

BCHEM 600 Thesis Research (1-15) No description.
Effective: Fall 1983

BCHEM 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

BCHEM 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983
Biology (BIOL)

BIOL 400 Teaching in Biology (1-3) This course will train biology teaching assistants to teach in the laboratory/recitation setting with emphasis on critical thinking skills. Enrollment will be limited to students of at least fifth semester standing that have been accepted as teaching assistants for biology. Effective: Fall 2006
Prerequisite:

BIOL 402W Biological Experimental Design (3) Discussion of experimental design, analysis and presentation, with a practicum providing for student design, analysis and presentation of biological experiments. Students may not take this course if they have taken BIOBD 350W. Effective: Fall 2007
Prerequisite:

BIOL 404 Cellular Mechanisms in Vertebrate Physiology (3) This course considers cellular mechanisms governing physiological aspects of vertebrate cell signaling and their adaptation to particular organismal functions. Effective: Spring 2001
Prerequisite:

BIOL 405 Molecular Evolution (3) Introduction to concepts and techniques of analysis of molecular sequence data from an evolutionary point of view. Effective: Fall 1994
Prerequisite:

BIOL 406 Symbiosis (3) This course covers a variety of different types of symbiotic relationships between unicellular symbionts and plants, fungi, or animals. Effective: Summer 1998
Prerequisite:

BIOL 407 Plant Developmental Anatomy (3) This course will examine the development of basic vascular plant anatomical structures including leaves, stems, roots, and flowers. Effective: Fall 2005
Prerequisite:

BIOL 408 Contributions of Women to the Biological Sciences: Past and Present (3) A study of the contributions that women scientists have made and continue to make in the biological sciences. Effective: Spring 2005
Prerequisite:

Prerequisite:

BIOL 411 Medical Embryology (3) Develops an understanding of human reproductive physiology, embryological processes, their time frames, and the development of major human body systems. The course emphasizes clinical correlations and the medical consequences of developmental abnormalities. Effective: Summer 1998
Prerequisite:

BIOL 412 Ecology of Infectious Diseases (3) This course examines how ecological processes impact upon the epidemiology of infectious diseases. Effective: Fall 2004
Prerequisite:

BIOL 413 Cell Signaling and Regulation (3) Introduction to the themes of cellular signaling and regulation through critical review of primary literature. Effective: Spring 1998
Prerequisite:

BIOL 414 Taxonomy of Seed Plants (3) Basic principles and procedures in the practice of angiosperm systematics. Effective: Fall 1994
Prerequisite:

BIOL 415 Ecotoxicology (3) Major concepts and controversies in the interdisciplinary field of ecological toxicology; toxicity analysis, remediation, and case studies of environmental pollution. Effective: Spring 1995
Prerequisite:

BIOL 416 Biology of Cancer (3) This course intends to illustrate biological basis of cancer development, and discusses aspects on prevention, detection, and treatment of cancer. Effective: Spring 1999
Prerequisite:

BIOL 417 Invertebrate Zoology (4) Function and form of major invertebrate phyla. Effective: Fall 1994

The Pennsylvania State University
Prerequisite:

BIOL 419 Ecological and Environmental Problem Solving (3) Overview of processes involved in solving environmental problems. Provides students with toolkit for understanding ecological and environmental problems. Effective: Spring 2004

Prerequisite:

BIOL 420 (GEOSC 420) Paleobotany (3) Classification, morphology, phylogeny, and stratigraphic occurrence of fossil plants; practicum includes field trips and study of paleobotanical techniques and specimens. Effective: Spring 2005

Prerequisite:

Prerequisite:

BIOL 422 Advanced Genetics (3) Chromosomal mechanism of heredity; cytoplasmic and polygenic inheritance, chemical genetics, genomics, and experimental evolution. Effective: Fall 2010

Prerequisite:

BIOL 424 Seeds of Change: The Uses of Plants (3) Interdisciplinary approach to the biology, chemistry, history, and culture of the interactions between plants and people. Effective: Spring 2009

Prerequisite:

Prerequisite:

BIOL 426 Developmental Neurobiology (3) Overview of basic developmental processes as they apply to the central nervous system. Effective: Spring 2004

Prerequisite:

BIOL 427 Evolution (3) Selected topics on the evolution of life. Effective: Spring 1995

Prerequisite:

Prerequisite:

BIOL 429 Animal Behavior (3) Physiological mechanisms, ecological relevance, and adaptive significance of animal behavior. Effective: Spring 1999

Prerequisite:

BIOL 430 (B M B 430, ENT 430) Developmental Biology (3) Molecular and genetic analyses of mechanisms involved in differentiation and determination in biological systems. Effective: Summer 1994

Prerequisite:

BIOL 432 Developmental Genetics (3) An advanced course in developmental biology, focusing on the use of genetics techniques to study fundamental questions of animal development. Effective: Summer 1999

Prerequisite:

BIOL 435 Ecology of Lakes and Streams (3-4) Physical, chemical, and biological characteristics of freshwater environments, with special emphasis on factors regulating productivity in freshwater ecosystems. Effective: Fall 2011

Prerequisite:

BIOL 436 Population Ecology and Global Climate Change (3) Ecological responses of individuals, populations, and communities to environmental variation, with emphasis on climate change. Effective: Spring 2004

Prerequisite:

BIOL 437 Histology (4) Microscopic structure of the tissue of the animal body. Effective: Fall 1994

Prerequisite:

BIOL 438 Theoretical Population Ecology (3) Theoretical discussions of demographics, population and metapopulation growth models, life histories, and species interactions such as competition, predation, host-parasitoid relationships. Effective: Fall 2007

Prerequisite:

BIOL 439 Practical Bioinformatics (3) Practical aspects of retrieving and analyzing biological information residing in...
common databases.

Effective: Spring 2004
Prerequisite:

Biol 441 Plant Physiology (3) Classical and current concepts in plant constituents, mineral nutrition, water relations, respiration, photosynthesis, photoperiodism, plant hormones, growth, and development.
Effective: Spring 1995
Prerequisite:

Biol 443 Evo-devo: Evolution of Developmental Mechanisms (3) How evolution of animals and plants can be traced to changes in the regulation and/or interactions of genes controlling development.
Effective: Spring 2004
Prerequisite:

Biol 444 Field Ecology (3) This field course will explore the flora and fauna of the mid-Atlantic area.
Effective: Fall 2007
Prerequisite:

Biol 446 Physiological Ecology (3) The physiological abilities of plants and animals to adapt to their abiotic environment.
Effective: Fall 1994
Prerequisite:

Biol 448 Ecology of Plant Reproduction (3) Analysis of the ecology, evolution, and natural history of angiosperm reproduction, including pollination, fruit-set, dispersal, and relevant plant-animal interactions.
Effective: Fall 1994
Prerequisite:

Biol 450W Experimental Field Biology (3-5) A practical introduction to modern experimental techniques for ecological study of terrestrial, marine, and fresh water habitats.
Effective: Fall 2007
Prerequisite:

Biol 459 (Biotec 459, Hort 459) Plant Tissue Culture and Biotechnology (3) Principles and techniques for the in vitro culture, propagation, and genetic manipulations of plant cells.
Effective: Fall 1999
Prerequisite:

Biol 460 (Anth 460) Human Genetics (3) The human genome, its variation, origins, and relation to disease and other traits.
Effective: Fall 2011
Prerequisite:

Biol 460H (Anth 460H) Human Genetics (4) Gene mapping in humans; molecular basis of genetic disease; gnomic structure; immunogenetics; and genetic evidence for human evolutionary history.
Effective: Fall 2001
Prerequisite:

Biol 461 Contemporary Issues in Science and Medicine (3) Current/classical issues relating to health, research, agriculture, environment, and biotechnology. Active exploration of the impact of science on society.
Effective: Spring 2003
Prerequisite:

Biol 463 General Ecology (3) Illustrates science of ecology, from individual, population, and community-level perspectives, discusses applications of this science to issues of conservation of biodiversity.
Effective: Spring 2002
Prerequisite:

Biol 464 Sociobiology (3) The study of the adaptive function of social behavior, the comparative analysis of social organization, and the ecology of sociality.
Effective: Summer 2012
Prerequisite:

Biol 465 General Cytology (3) Structure and function of organelles of plant and animal cells, mitosis, meiosis, cytological techniques.
Effective: Fall 1988
Prerequisite:

Biol 469 (BB H 469) Neurobiology (3) Comprehensive examination of neuroanatomy and physiology designed to integrate the principles of neurochemistry, neuroendocrinology, and molecular biology.
Effective: Spring 1995
Prerequisite:

Biol 470 (BB H 470) Functional and Integrative Neurosciences (3) Neurobiological function in motivated behaviors, motor and sensory functions, learning and memory development, sexual differentiation, and pathology.
Effective: Summer 1995
Prerequisite:

Biol 471 Molecular Neurobiology/Cell Biology Laboratory (3) Introduction to modern molecular and cellular methodologies. The course is designed to integrate the principles of molecular cell biology with neurochemistry and neuroendocrinology.
Effective: Summer 1995
Prerequisite:

BIOL 472 **Mammalian Physiology** (3) Mechanisms concerned with normal animal function, with special emphasis on humans.
Effective: Summer 2007
Prerequisite:

BIOL 473 **Laboratory in Mammalian Physiology** (2) Laboratory experiments demonstrating fundamentals in physiology.
Effective: Summer 1985
Prerequisite:

BIOL 474 (GEOSC 474) **Astrobiology** (3) In depth treatment of principles/concepts of biochemical evolution, the origin/evolution of life; evaluation of distribution of life in the universe.
Effective: Summer 2007
Prerequisite:

BIOL 479 (AN SC 479) **General Endocrinology** (3) Endocrine mechanisms regulating the morphogenesis, homeostasis, and functional integration of animals.
Effective: Fall 2009
Prerequisite:

BIOL 482 **Coastal Biology** (3-4) Marine organisms, their interactions with each other, and their relationships with several coastal habitats.
Effective: Spring 2010
Prerequisite:

BIOL 492 **Senior Seminar in Biology** (1) Discussion of selected topics from recent biological literature; reports on current research or internship experiences.
Effective: Fall 2007
Prerequisite:

BIOL 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2010

BIOL 495 **Internship in Biology** (3-12) Practical off-campus experience in Biology under the supervision of a professional and a faculty member.
Effective: Fall 2007 Ending: Fall 2012

BIOL 495 **Internship in Biology** (1-12) Practical off-campus experience in Biology under the supervision of a professional and a faculty member.
Effective: Spring 2013 Future: Spring 2013

BIOL 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

BIOL 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

BIOL 497A **Global Climate Change: A Field Practicum in Panama** (1) Students must complete: 1) a field-based trip experience (approximately two and one-half weeks in duration with the Smithsonian Tropical Research Institute (STRI) in selected biological field stations throughout Panama) that includes hands-on conservation experiences, journal keeping, inquiry-based research on real-world environmental issues, participation in group discussion forums and panel discussions, two species assignments, a formal group research presentation, and independent field exploration; and 2) post-trip online assignments that encourage the integration and application of key concepts learned. Note that these students must also lead a group discussion forum on a course related topic approved by instructors.
Effective: Summer 2012 Ending: Summer 2012

BIOL 497A **Biology of RNA** (3) This course will explore the biological functions that RNA plays in diverse organisms, including transcription, translation, virology, and RNA-interference.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

BIOL 497C **Emerging & Re-emerging Diseases** (3) This course examines emerging and re-emerging diseases with case studies and viral, bacterial and eukaryotic pathogens.
Effective: Summer 2012 Ending: Summer 2012

BIOL 497F **Cell Development and Cancer Biology** (3) This course will be taught mid-summer in Beijing, China. It focuses on molecular, cellular and developmental basis of tumorigenesis.
Effective: Summer 2012 Ending: Summer 2012
Biology of special topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1993

Biology of global climate change: sustainability of select topics and aquatic ecosystems (3) Students must complete: 1) innovative online pre-trip assignments that provide essential background knowledge on topics and areas to be explored. These students must also research a course related topic (approved by instructor), and prepare and deliver a 15-minute presentation to course instructors.
Effective: Summer 2012 Ending: Summer 2012

Biology of foreign studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Biology of tropical field ecology (3) An intensive introduction to tropical biodiversity to be taught in Belize, Central America.
Effective: Summer 2005
Prerequisite:

Biology of statistical methods in evolutionary genetics (3) Statistical methods that are used for analyzing and interpreting genetic data in molecular evolution will be discussed.
Effective: Spring 1994
Prerequisite:

Biology of topics in systematics and evolution (2) Discussion of pertinent current literature in systematic biology and evolution.
Effective: Spring 1995

Biology of ecological and environmental problem solving (4) Overview of processes involved in solving environmental problems. Provides students with toolkit for understanding ecological and environmental problems.
Effective: Spring 2005
Prerequisite:

Biology of ecology of populations (3) Ecological responses of organisms to environmental variables (food, etc.) that determine population behavior. Demography, competition, predation, and community principles.
Effective: Summer 1991

Biology of animal physiology (3) Mammalian cardiovascular, respiratory, renal, and gastrointestinal systems.
Effective: Summer 1985
Prerequisite:

Biology of animal physiology II (3) Mammalian nervous, endocrine, metabolic, and reproductive systems.
Effective: Summer 1985
Prerequisite:

Biology of colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2005

Biology of molecular evolutionary biology seminar (1) Continuing seminars in Molecular Evolutionary Biology consisting of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1995

Biology of critical evaluation of literature in biology (1) Weekly readings and critiques of recent papers from primary literature are used to teach independent thinking and effective scientific communication.
Effective: Fall 2001
Prerequisite:

Biology of individual studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1994

Biology of special topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1990

Biology of special topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2001

Effective: Fall 1983
BIOL 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

BIOL 602 **Supervised Experience in College Teaching** (1-3) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Summer 1997

BIOL 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

BIOL 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

BIOL 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2007

Last Import from UCM: June 2, 2012 12:27 PM
Biomedical Sci-Hy (BMS)

BMS 501 Regulation of Cellular & Systemic Energy Metabolism (3) Teaches biochemical and signal transduction concepts while exploring the control of bioenergetic processes.
Effective: Fall 2007

BMS 502 Cell and Systems Biology (3) Explores the cellular and intracellular organization of biology, assembly of cells into tissues, and further integration into biological systems.
Effective: Fall 2007

BMS 503 Flow of Cellular Information (3) Teaches concepts underlying the inheritance, transmission and translation of genetic information.
Effective: Fall 2007

BMS 504 Art of Scientific Communication I (1) Introduction to scientific analysis, writing, and oral presentation using primary literature sources.
Effective: Summer 2011
Concurrent: BMS 502 BMS 503 BMS 501

BMS 505 Art of Scientific Communication II (1) Advanced topics in scientific analysis, writing, and oral presentation using primary literature sources.
Effective: Summer 2011
Prerequisite:

BMS 520 Human Integrative Physiology (3) This course explores whole organ physiology emphasizing skeletal muscle and exercise physiology, cardiovascular, renal and urinary, respiratory, gastrointestinal, and endocrine.
Effective: Summer 2011
Prerequisite:

BMS 571 Graduate Clinical Rotation (1-3) This course allows graduate students at Hershey and University Park to gain experience in the clinical arena.
Effective: Spring 2009
Prerequisite:

BMS 581 Molecular and Translational Approaches to Human Disease (3) This course teaches students the scientific process used to understand the molecular bases of diseases and the development of novel therapies.
Effective: Summer 2011
Prerequisite:

BMS 590 Colloquium (1 per semester/maximum of 4) A series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2011

BMS 591 Biomedical Research Ethics (1) Education in research ethics for biomedical scientists. Meets U.S. Public Health standards for education in responsible conduct of research.
Effective: Fall 2011

BMS 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

BMS 595 Internship (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2008

BMS 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2008

BMS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2008

BMS 600 Thesis Research (1-9 per semester/maximum of 36) Laboratory work on thesis project.
Effective: Fall 2011

The Pennsylvania State University
Business (BUS)

BUS 500 Negotiation, Communication, Teamwork (2) Experience-based learning approach to developing effective teams and work organizations; emphasis on developing reflective thinking and interpersonal skill sets. Effective: Summer 2004
Prerequisite:

Prerequisite:

Prerequisite:

BUS 505 Data Analysis for Business Decisions (2) Selection and application of statistical methods, and use of business databases, to support managerial decision-making; interpretation and presentation. Effective: Spring 2005
Prerequisite:

BUS 515 Business Ethics and Corporate Governance (2) Social, legal and ethical obligations of key organizational participants; organizational structure and goals; conduct in global and multicultural contexts. Effective: Summer 2004
Prerequisite:

BUS 554 Master's Project (3) Development of an original master's project in the student's professional field of interest and preparation of a paper. Effective: Spring 1987
Prerequisite:

BUS 555 International Business (3) Studying theories and practices of international business activities, strategies, structures and operations of multinational companies across nations. Effective: Fall 2000

BUS 584 Business in a Global Society (3) Business sector and society relations; international and cultural issues; corporate values and ethics; relationship to stakeholders; social, political, legal environments. Effective: Spring 2012

BUS 588 Strategic Management (2) Analysis of current theory and practice for the formulation and implementation of organizational strategies in complex dynamic environments; capstone course. Effective: Fall 2005
Prerequisite:

BUS 589 Strategic Venture Planning and Innovation (2) Development and presentation of a venture plan including product development; market research; competitive analysis; financing and capitalization; organizational structure. Effective: Spring 2005
Prerequisite:

BUS 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

BUS 595 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Spring 2001
Prerequisite:

BUS 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

BUS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 1987
Business Admin (B ADM)

Effective: Spring 2004

Effective: Fall 2003

B ADM 502 Demand, Operations, and Firm Performance (6) A project-oriented investigation into the critical principles of management, marketing, and operations.
Effective: Fall 2003

B ADM 503 Integrated Business Analysis (3) Overview of the statistical analyses of a variety of business problems.
Effective: Fall 2003
Prerequisite:

B ADM 510 Cost Management for Decision Making and Control (3) The study and use of accounting information for cost management, product costing, planning and controlling operations, and managerial decision making.
Effective: Fall 2003
Prerequisite:

B ADM 511 Information Systems Management and Strategy (3) Fundamental uses of IS/T and guiding principles associated with the development and management of IS/T as a strategic organizational asset.
Effective: Fall 2003

B ADM 512 Managing a Diverse Workforce (3) Analysis of human resources and diversity priorities in organizations.
Effective: Fall 2003 Ending: Summer 2012
Prerequisite:

B ADM 512 Managing Effective Organizations (3) Understanding the critical and changing role of management in contemporary organizations.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

B ADM 513 Global Operations and Supply Chain Management (3) Effective management of the flow of goods, services, and information through the supply chain.
Effective: Spring 2007 Ending: Summer 2012
Prerequisite:

B ADM 513 Quantitative Methods for Business (3) This course is designed to provide a systematic understanding of design, operation, and control of business processes that transform inputs into outputs.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

B ADM 514 Strategic Planning and Business Policy (3) Formulation of objectives and the implementation of programs to promote long-range success of the organization in a changing environment.
Effective: Spring 2008 Ending: Summer 2012
Prerequisite:

B ADM 514 Strategic Planning and Business Policy (3) Formulation of objectives and the implementation of programs to promote long-range success of the organization in a changing environment.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

B ADM 520 Entrepreneurial Ventures (3) The contribution of the entrepreneur to the enterprise system, supporting public policies and personal requirements for entrepreneurial success.
Effective: Spring 2004
Prerequisite:

B ADM 521 Leadership Seminar (3) Experiential problem-based seminar providing leadership opportunities and practice.
Effective: Fall 2003
Prerequisite:

B ADM 522 Business Solutions (3) Practicum experience in solving problems in real business situations.
Effective: Fall 2003
Prerequisite:

Effective: Fall 2003

</table>
B ADM 597B **New Products Management** (3) Learn how to develop creative products and market them; study public policy concerns allow for new product development.
Effective: Summer 2012 Ending: Summer 2012

B ADM 597C **Business Processes** (3) Formal courses given on a topic or special interest subject which may be offered infrequently.
Effective: Summer 2012 Ending: Summer 2012

B ADM 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester
Effective: Fall 2003

B ADM 599 (IL) **Foreign Studies** (1-12 per semester, maximum of 24) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 2, 2012 12:27 PM
Business Admin (BUSAD)

BUSAD 501 **Statistical Analysis for Managerial Decision Making** (3) Use of statistical methods for managerial decision making, with emphasis on problem formulation, data analysis and interpretation, and business applications.
Effective: Summer 2006

BUSAD 511 **New Ventures 1** (3) Introduction to the issues involved in the development of new ventures within existing business organizations or from start-up.
Effective: Spring 2005
Prerequisite:

BUSAD 515 **Acquiring the Existing Enterprise** (3) The process of acquiring an existing company as an alternative to starting a new venture is explored.
Effective: Spring 2005
Prerequisite:

BUSAD 519 (LEAD 519) **Developing Creative High Performance Organizations** (3) This course focuses on how to create high performing organizations based on models provided by business, science and the arts.
Effective: Spring 2007
Prerequisite:

BUSAD 522 **New Ventures 2** (3) Examines the financial and legal issues that are critical in the formation, development, and management of new ventures.
Effective: Spring 2005
Prerequisite:

BUSAD 523 **Prices and Markets** (3) A survey of analytical concepts and techniques essential to an understanding of the business environment.
Effective: Summer 2002
Prerequisite:

BUSAD 525 **Quantitative Methods in Finance** (3) Study of quantitative methods used in financial and investment analysis and modeling.
Effective: Summer 2006

BUSAD 526 **Current Issues in Corporate Finance** (3) Finance topics involving strategic financial decisions, including capital structure and cost of capital, financial forecasting, valuation, and corporate control.
Effective: Spring 2011
Prerequisite:

BUSAD 527 **Fixed Income Securities** (3) Analysis and valuation of fixed income securities and interest rate derivatives.
Effective: Summer 2006
Prerequisite:

BUSAD 528 **Mergers and Acquisitions** (3) Survey of drivers of success in M&A and develop knowledge and skills in the design and evaluation of M&A transactions.
Effective: Fall 2011
Prerequisite:

BUSAD 530 **Biotechnology and Health Industry Overview** (3) Organization, financing, policy, trends, problems and issues in the biotechnology, pharmaceutical, and health industries. Overview of cost, quality, access issues.
Effective: Fall 2002

BUSAD 534 **Ethical Dimensions of Management in the Biotechnology and Health Industry** (3) Ethical managerial decision-making in biotechnology, pharmaceuticals, and health including ethical implications of technological/scientific advances, medical interventions, and business decisions.
Effective: Summer 2002
Prerequisite:

BUSAD 537 **Management Information Systems** (3) Information system theories and methods applied to administrative structures and management decisions in organizations.
Effective: Summer 2006
Prerequisite:

BUSAD 542 **Global Intercultural Management** (3) This course develops students' global cross-cultural competencies and cultural intelligence to enhance ability to manage global organizations and work interculturally.
Effective: Summer 2009
Prerequisite:

BUSAD 545 **Negotiation Strategies** (3) This course covers strategies and tactics for understanding conflicts, for negotiating effectively, and for dealing successfully with power in organizations.
Effective: Spring 2003
Prerequisite:
BUSAD 551 Business, Ethics, and Society (2-3) The course focuses upon the exploration and analysis of the ethical, political, technological, social, legal and regulatory environments of business.
Effective: Fall 2011
Prerequisite:

BUSAD 555 (LEAD 555) Full Range Leadership Development (3) Development of behavioral skills associated with outstanding leadership of individuals, teams, and organizations through advanced information technology, experimental exercises, and case analysis.
Effective: Fall 2010
Prerequisite:

BUSAD 556 (LEAD 556) Diversity Leadership (3) Analysis and application of models, theories, and strategies for managing an increasingly diverse workforce and customer base.
Effective: Fall 2005
Prerequisite:

BUSAD 558 Knowledge Management (3) This course examines the strategic value of knowledge and how organizations can manage their knowledge assets for competitive advantage.
Effective: Summer 2008
Prerequisite:

BUSAD 559 Career Management (3) Provides students with a conceptual understanding of careers/career design making through an examination/discussion of the literature in career management.
Effective: Spring 2002
Prerequisite:

BUSAD 575 High Tech Venture Development (3) How high tech entrepreneurs and intrapreneurs design, develop, and market new information technology products (e.g., software) and services.
Effective: Spring 2002
Prerequisite:

BUSAD 576 Ethical Issues in Information Technology (3) Exploration of ethical issues affected by IT: privacy, free speech, computer crime, intellectual property, IT professionalism, and software product liability.
Effective: Spring 2012
Prerequisite:

BUSAD 577 Management of Information Technology (3) This course focuses upon the challenges of aligning IT strategy with organizational goals.
Effective: Spring 2012
Prerequisite:

Effective: Spring 2011
Prerequisite:

BUSAD 581 Venture Strategy, Planning and Development (3) This is the capstone course in the New Ventures option of the MBA program. Students develop a strategic or operational plan for a new venture.
Effective: Spring 2005
Prerequisite:

BUSAD 582 (LEAD 582) Social Entrepreneurship and Community Leadership (3) This course will provide an opportunity for students to explore concepts of developing and leading businesses that create social value.
Effective: Fall 2011
Prerequisite:

BUSAD 583 Future of the Biotechnology and Health Industry: Strategic Implications (3) Strategy in biotechnology, pharmaceutical, and health industries; impact of technological innovation and economic, social, political trends, and events.
Effective: Summer 2002
Prerequisite:

Effective: Summer 2006
Prerequisite:

BUSAD 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2001

BUSAD 597A Organizational Power & Politics (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

BUSAD 802 Cornerstone of Sustainability (3) In-depth exploration of the social, environmental, and organizational sustainability challenges facing business leaders in the 21st Century.
Effective: Summer 2012

The Pennsylvania State University
BUSD 809 Triple Bottom Line Accounting (3) In-depth exploration of the issues related to implementing measurement, reward and reporting systems for economic, social, and environmental impacts.
Effective: Summer 2012

BUSD 824 Finance and Investment for Sustainable Growth (3) In-depth exploration of the methods of financing available for sustainable growth in developed and emerging markets.
Effective: Summer 2012

BUSD 835 Commercialization of Biopharmaceuticals (3) Review organizational processes, regulatory, and environmental issues in the development and commercialization of biopharmaceuticals in the United States and globally.
Effective: Spring 2011
Prerequisite:

BUSD 879 Sustainable Products and Service Development (3) In-depth exploration of the creation and development of sustainable products and services.
Effective: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
Business Administration (B A)

B A 411 Analyzing Business and Industry (3) Prepares students to obtain an enterprise-wide view of business and industry by integrating operational and financial decisions in a team and learning environment.
Effective: Fall 2011
Prerequisite:

B A 412H Honors Integration and Research (2-3) The integration of the business core into a detailed financial, strategy and market analysis of actual companies selected by student teams.
Effective: Spring 2011
Prerequisite:

B A 420 Planning for Internship, Collaborative Project, and Research in Business (1) Planning, preparation, and decision making for students enrolling in either B A 495A, 495B, or 495C courses in their final semester.
Effective: Summer 2002 Ending: Fall 2012
Prerequisite:

B A 420 Preparation for Career Management (1) This course emphasizes effective career planning by closely examining oneself, the business world, communication styles and strategies.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

B A 421 Project Management and Planning for Business (1-2) Planning and preparation for field experience internship, senior thesis, or group project supplemented with exercises in project management.
Effective: Spring 2003 Ending: Fall 2012
Prerequisite:

B A 421 Project Management (3) Introduction to Project Management covering all phases of a project including proposal development, planning, execution, and closing.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

B A 422W Strategic Business Planning (3) Presentations and discussion of contemporary business issues by students and visiting professionals; emphasis on effective business communications.
Effective: Spring 2008 Ending: Fall 2012
Prerequisite:

B A 422W Strategic Business Planning (3) Study of strategic planning and implementation in multi-industry, multi-cultural, and multi-national settings with emphasis on sustaining competitive advantages.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

B A 454H Business Honors Thesis/Project (3) An opportunity to pursue an advanced research thesis or project to integrate studies within Business Administration.
Effective: Spring 2008
Prerequisite:

B A 462 Business Strategy (3) Interpretation of business concept in the analysis of problems related to the successful management of a company, institution, or organization.
Effective: Spring 2008
Prerequisite:

B A 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

B A 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

B A 495A Internship in Business (3-9) Guided professional practicum in business administration involving an internship with a business organization; practice of business skills in field setting.
Effective: Spring 2003 Ending: Fall 2012
Prerequisite:

B A 495A Business Internship (3-6 per semester/maximum of 6) Guided professional practicum in business consisting of 3 or 6 credits of supervised fieldwork in business.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

B A 495B Collaborative Project in Business (3-9) Guided professional practicum in business administration involving a group project; application of business skills in collaborative setting.
Effective: Spring 2003 Ending: Fall 2012
Prerequisite:
B A 495B Undergraduate Research in Business (3-6 per semester/maximum of 6) Guided student research in business, culminating in the presentation of the research project at a professional conference. Effective: Spring 2013 Future: Spring 2013
Prerequisite:

B A 495C Undergraduate Research in Business (3-9) Guided student research in business administration; application of analytical or research techniques to business problems. Effective: Spring 2003
Prerequisite:

B A 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

B A 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

B A 499 (IL) Foreign Study--Business Administration (1-18) Study in selected countries of business institutions, functions, and current business problems. Effective: Spring 2011
Prerequisite:

B A 500 Marketing Management (1-3) An examination of the role of the market place in company management. Effective: Fall 2008

B A 501 Management (2) Examination and application of concepts of human behavior and organization to managing people in work organizations. Effective: Spring 2002

B A 502 Team Process and Performance (1-3) Development of managerial skills and techniques for diagnosing, intervening and leading effective teams. Effective: Fall 2008

B A 504 Ethical Leadership (2) This course introduces students to their ethical responsibilities as business leaders. Effective: Fall 2008
Prerequisite:

B A 505 Negotiation Theory and Skills (1-3) Development of managerial skills for distributive and integrative negotiations at the two-party and team levels. Effective: Summer 2010

B A 510 Supply Chain and Operations Management (1-3) Introduction to the organizational processes and methods used to create and deliver goods and services. Effective: Fall 2008

B A 511 Financial Accounting (1-3) Basic concepts and principles (i.e. the jargon) underlying financial accounting practices. Effective: Fall 2008

B A 515 Business Statistics for Contemporary Decision Making (2) Conceptual understanding of statistics through both numerical and applied approach. Effective: Summer 2008

B A 517 Communication Skills for Management (1-3) Development of communication skills required for management; audience awareness, style, individual and group presentations. Effective: Fall 1983
Prerequisite:

B A 521 Introduction to Managerial Accounting (2) Cost accounting and the design of management accounting systems for planning and controlling operations, and for motivating personnel. Effective: Fall 2001

B A 523 IT Strategy (2) An introduction to information technologies critical to business organizations. Effective: Spring 2009
B A 528 **Business Simulation** (1-3) A team-based course during which students will manage a simulated firm. Effective: Summer 2008

B A 531 **Introduction to Finance** (1-3) An examination of the techniques available to aid the financial manager in decision making. Effective: Fall 2008

B A 533 **Economics for Managers** (2) An introduction to the tools of economic decision making and a consideration of firm, industry, and global economic influences on economic decision making. Effective: Spring 2002

B A 535 **Global Perspectives** (1) An overview of the global business environment. Effective: Fall 2001

B A 536 **Global Immersion** (1-3) Exploration of the opportunities and the challenges of doing business in another economic region. Effective: Spring 2011

B A 545 **Business, Government and International Economics** (2) Understand how macroeconomic events and policies affect the global economy and business decisions. Effective: Summer 2008

B A 565 **Strategic Leadership** (1-3) Presents a senior executive perspective on key opportunities and challenges faced by business leaders. Effective: Summer 2008

B A 571 **Strategic Management** (1-3) Analysis and application of concepts and techniques aimed at successfully developing and implementing competitive strategy in a complex business environment. Effective: Fall 2008

B A 572 **Introduction to Business Research** (3) An introduction to issues involved in framing, defending, and evaluating business research programs. Effective: Spring 2004

Prerequisite:

B A 574 **Business Research** (1-3) A project paper, comparable in quality and scope of work to a graduate thesis, on problems of a company. Effective: Winter 1978

Prerequisite:

B A 575 **Capstone Business Case** (4) A team-based project course that requires students to analyze an actual business problem from a firm or nonprofit organization. Effective: Summer 2008

B A 578 **Entrepreneurship** (3) Study of the development or acquisition of a business appropriate to the objectives and resources of the individual entrepreneur. Effective: Winter 1978

B A 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

B A 591 **Applied Communications** (1) Develop oral and written communication strategies to succeed in professional and academic contexts. Effective: Spring 2010

Prerequisite:

B A 595 **Internship** (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Summer 2008

B A 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
B A 596A The Impact of Work-Life Variables on Career Aspirations (3) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2012 Ending: Summer 2012

B A 596B Ethical Issues in Information Technology (3) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2012 Ending: Summer 2012

B A 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 1987

B A 597A Six Sigma Statistics (2) Statistics course designed as an introduction to the MBA Six Sigma course. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

B A 597D Advanced Microeconomic Analysis (3) Topics in advanced microeconomic analysis including competitive analysis, game theory, and mechanism design. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

B A 599 (IL) Foreign Study--Business Administration (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established. Effective: Summer 2005 Prerequisite:

B A 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 1983

B A 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. Effective: Fall 1999

B A 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Business Economics (BUSEC)

BUSEC 502 Prices, Markets and Competitive Strategy (2) Determination of outputs and prices in markets used by the firm; market structure and the design of competitive strategy. Effective: Summer 2004
Prerequisite:

BUSEC 503 Economic Environment of Business (2) Analysis of the regulatory and global economic environment within which the firm operates and its implications for business strategy. Effective: Summer 2004
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Business Law (B LAW)

B LAW 424 (R M 424) Real Estate Law (3) Analyze contemporary law applicable to various types of ownership interests and rights, methods of transferring ownership, and use of real property.
Effective: Spring 2012
Prerequisite:

B LAW 425 (R M 425) Business and Environmental Regulation (3) Examines the interplay between environmental regulation and commercial activities, including property interests.
Effective: Spring 2012
Prerequisite:

Effective: Fall 2011
Prerequisite:

B LAW 444 Advanced UCC and Commercial Transactions (3) All articles of the Uniform Commercial Code, banking relationships, debtor-creditor law, and bankruptcy law.
Effective: Fall 2011
Prerequisite:

B LAW 445 Advanced Intellectual Property and Competition Law (3) Copyrights, trademarks, patents, and trade secrets followed by related topics in the regulation of competition.
Effective: Fall 2011
Prerequisite:

B LAW 446 Employment Law (3) Examines the legal and regulatory environment of employment relationships. Topics include anti-discrimination; worker health and safety; and labor relations laws.
Effective: Summer 2012
Prerequisite:

B LAW 471 (CRIMJ 471) Legal Rights, Duties, Liabilities of Criminal Justice Personnel (3) Civil law issues within a justice agency and between criminal justice agencies and members of the public.
Effective: Summer 2011
Prerequisite:

B LAW 473 (CRIMJ 473) Criminal Procedure and Evidence in the Business Community (3) Law of evidence and proof, constitutional constraints on police procedures (arrest, search, etc.) in society and the business community.
Effective: Summer 2011
Prerequisite:

B LAW 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2011

B LAW 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2011

B LAW 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

B LAW 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

B LAW 497A Employment Law (3) Intro to laws and regulations governing employment relationships.

B LAW 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

B LAW 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2011

B LAW 525 Business Law for Innovation and Competition (2) Nature of intellectual property rights, as well as process for obtaining and enforcing them.

The Pennsylvania State University
B LAW 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

B LAW 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2011

Effective: Summer 2011

Effective: Summer 2011

Last Import from UCM: June 2, 2012 12:27 PM
Business Logistics (B LOG)

B LOG 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Winter 1978

B LOG 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

B LOG 597 **Special Topics** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1997

B LOG 599 (IL) **Foreign Study--Business Logistics** (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Cardiology-Hy (CAR)

CAR 722 Cardiology (4.5) These areas will be studied: Symptoms and Signs; Systemic Arterial Hypertension; Atherosclerosis; Heart Failure; Congenital Heart Disease; Infectious, Inflammatory, and Immunologic Disease; Connective Tissue Disorders; Electrical Abnormalities; and Lipid Disorders.

Effective: Fall 2001

Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Cell & Molec Biol-Hy (CMBIO)

CMBIO 506 Biological Basis of Human Health and Disease (2) Biological basis of human health and disease by cellular, molecular, genetic, and biochemical basis of organ function pathology.
Effective: Summer 2004

CMBIO 590 Colloquium (1-3) Continuing seminars which consist of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2011
Prerequisite:

CMBIO 594 Research topics (1-18) Supervised student activities on research projects identified on an individual or group basis.
Effective: Spring 2011
Prerequisite:

CMBIO 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2007

CMBIO 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 2011
Prerequisite:

CMBIO 600 Thesis Research (1-15) No description.
Effective: Spring 2007

CMBIO 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 2007

CMBIO 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1986

CMBIO 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 2011
Prerequisite:

Last import from UCM: June 2, 2012 12:27 PM
Cellular/Mollec Bas (CMBMP)

CMBMP 711 Cellular and Molecular Basis of Medical Practice (7) This integrated course includes topics in biochemistry, physiology, pharmacology, and molecular genetics. Effective: Summer 1997
Prerequisite:

CMBMP 712 Cellular and Molecular Basis of Medical Practice (7) Continuation of CMBMP 711. Effective: Summer 1997
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Ceramic Science (CERSC)

CERSC 590 Colloquium (1-3) Current developments in ceramic science and related fields. Required of all graduate students in ceramic science. Effective: Summer 1988

CERSC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

CERSC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 1987

CERSC 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 1983

CERSC 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Chemical Engineering (CH E)

CH E 410 **Mass Transfer Operations** (3) Introduction to principles and applications of mass transfer, with focus on the design of equilibrium stage and continuous contacting separation processes. Effective: Spring 2006
Prerequisite:

CH E 430 **Chemical Reaction Engineering** (3) Chemical reaction rates and equilibria, reactors, reactor design; emphasis on industrial chemical processes. Effective: Spring 2006
Prerequisite:

CH E 432 (F SC 432) **Petroleum Processing** (3) A study of physical and chemical processes to convert crude oil into desired products with an outlook from present to future. Effective: Summer 2007
Prerequisite:

CH E 438 **Bioprocess Engineering** (3) Introduction to the biotechnology field including consideration of upstream and downstream processing of biochemicals. Effective: Summer 2007
Prerequisite:

CH E 441 **Polymer Processing** (3) Application of principles of heat, mass, and momentum transfer to the analysis of polymer processing problems. Effective: Spring 2006
Prerequisite:

CH E 442 (MATSE 448) **Polymer Processing Technology** (3) Basic principles of polymer melt processing are reviewed and subsequently applied to the most important industrial processing operations. Effective: Fall 2006
Prerequisite:

CH E 446 **Transport Phenomena** (3) Fundamental treatment of mass, heat, and momentum transfer; emphasis on transport properties and mathematical models of chemical engineering transport processes. Effective: Spring 2006
Prerequisite:

CH E 448 **Advanced Mass Transfer Operations** (3) Diffusion and mass transfer as applied to stagewise and continuous contact operations, including equipment design. Effective: Spring 2006
Prerequisite:

CH E 449 **Bioseparations** (3) Analysis and design of separation processes for the purification of biological molecules. Effective: Spring 2006
Prerequisite:

CH E 450 **Process Dynamics and Control** (3) Analysis of time-dependent variables in chemical process plants; reactor design and control; computer applications. Effective: Spring 2006
Prerequisite:

CH E 452 **Chemical Process Safety** (3) This course provides an overview of Process Safety in the Chemical Industry, focusing on the nature of chemical plant addidents. Effective: Spring 2007
Prerequisite:

CH E 456 **Design Projects in Chemical Engineering** (1-6) Problems in design and/or synthesis of chemical engineering processes and/or systems, including a final report on project results. Effective: Spring 2006
Prerequisite:

CH E 470 **Design of Chemical Plants** (3) Lectures and practicum on methods and calculations, including economic evaluations for the design of chemical plants; formal technical report required. Effective: Spring 2006
Prerequisite:

CH E 480M **Chemical Engineering Laboratory (Honors)** (3) Data interpretation and analysis from student-operated experiments on pilot-plant equipment. Individual written and oral technical reports. Effective: Spring 2008
Prerequisite:

CH E 480W **Chemical Engineering Laboratory** (3) Data interpretation and correlation from student-operated experiments on pilot-plant equipment. Individual written and oral technical reports. Effective: Spring 2006
Prerequisite:

CH E 494 **Research Projects in Chemical Engineering** (1-6) An original problem, including a search of the literature,
CH 494H **Research Projects in Chemical Engineering (Honors)** (1-6) An original problem, including a search of the literature, experimental investigation, and preparation in formal thesis form.
Effective: Spring 2008
Prerequisite:

CH 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 1996

CH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

CH 497A **Polymers** (3) Introduction to synthesis, structure, characterization and processing of polymers. Single molecule properties, polymer solutions, glasses, crystals and blends.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CH 497A **Chemical Energy Technology** (3) Survey of current and alternative chemical energy sources and conversion approaches.
Prerequisite:

CH 497B Bioremediation and Green Chemistry (3) Application of engineering and biological principles toward remediation of hazardous wastes. Degradation and synthesis of chemicals using genetically engineered microorganisms.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

CH 497B **Polymer and Complex Fluids** (3) Introduction to the field of complex fluids or "fluids with stuff in them" polymer melts and solutions (rubber cement, mucus, molten plastics, Silly Putty, DNA), self-assembled fluids (soap suspensions, foams, micromulsions, cell membranes), and colloidal suspensions (milk, paint, ink, blood).

CH 497C Chemical Energy Technology (3) Survey of current and alternative chemical energy sources and conversion approaches.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

CH 497C Bioremediation and Green Chemistry (3) Application of engineering and biological principles toward remediation of hazardous wastes. Degradation and synthesis of chemicals using genetically engineered microorganisms.
Prerequisite:

CH 497D Engineering Product Design (3) Students develop skills and techniques for managing and executing engineering design projects that are applied to projects sponsored by industry.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

CH 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Fall 2007

CH 501 (BIOE 501) Bioengineering Transport Phenomena (3) Application of the equations of mass, energy, and momentum conservation to physiological phenomena and to the design of artificial organs.
Effective: Summer 1990

CH 503 (BIOE 503) Fluid Mechanics of Bioengineering Systems (3) Cardiovascular system and blood flow, non-Newtonian fluid description, vessel flows, unsteady flows and wave motion, windkessel theory, transmission line theory.
Effective: Summer 1990

CH 524 Chemical Engineering, Application of Thermodynamics (3) Elements of thermochemistry and thermodynamics of greatest importance in chemical engineering.
Effective: Fall 1983

CH 528 Colloidal Forces and Thermodynamics (3) Unified treatment of formation, growth and stability of colloids based on principles of intermolecular and colloidal forces and thermodynamics.
Effective: Summer 2007
Prerequisite:

CH 535 Chemical Reaction Engineering (3) Optimal design of batch and continuous chemical reactors and reactor
batteries; effect of mixing on reactor operation.

Effective: Winter 1978

CH E 536 **Heterogeneous Catalysis** (3) Thermodynamics and kinetics of adsorption and reactions on solid surfaces, heat and mass transfer effects, theory and correlations in catalysis.

Effective: Summer 2007

Prerequisite:

CH E 544 **General Transport Phenomena** (3) Formulation and solution of transport problems involving momentum, heat, and mass transfer, with chemical engineering applications.

Effective: Spring 2007

Prerequisite:

CH E 545 **Transport Phenomena I** (3) Momentum transport, laminar and turbulent flow, boundary layer analysis, non-Newtonian flow, mechanical energy balance, chemical engineering applications.

Effective: Fall 1982

CH E 546 **Transport Phenomena II** (3) Heat and mass transfer, steady and unsteady state, coupling, molecular diffusion, moving boundaries, transfer coefficients, chemical engineering applications.

Effective: Fall 1982

CH E 576 (C E 576) **Environmental Transport Processes** (3) Fundamentals of chemical transport in engineered environments, such as biofilm reactors, and natural systems including aquifers and rivers.

Effective: Fall 2001

Prerequisite:

CH E 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Summer 1988

CH E 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2004

CH E 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

CH E 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

CH E 597A **Math and Numerical Methods** (3) Application of advanced mathematical and computational techniques to the solution of problems in the core areas of chemical engineering.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CH E 597A **Surface Characterization** (3) This course studies physical and chemical principles as well as applications of characterization techniques widely used in surface science and nanotechnology.

CH E 597B **Research Topics in Chemical Engineering** (1) Lecture and Discussion by visiting faculty and engineers on the most recent topics in Chemical Engineering.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CH E 597B **Research Topics in Chemical Engineering** (1) Lecture and discussion by visiting faculty and engineers on the most recent topics in Chemical Engineering.

CH E 597C **Optimization in Biological Networks** (3) Introduction and application of optimization based techniques in the reconstruction, analysis and redesign of metabolic, signaling and regulatory networks.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CH E 597D **Cellular Biophysics** (3) Physics of cellular structure and function. Self-assembly, random and directed motion, cell motility; mechanical properties of biopolymers.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CH E 599 **Foreign Studies** (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.

The Pennsylvania State University
Effective: Fall 2007

CH E 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

CH E 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

CH E 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Opportunity for supervised and graded teaching experience for graduate students in chemical engineering.
Effective: Fall 1983
Prerequisite:

CH E 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

CH E 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Chemistry (CHEM)

CHEM 400 Chemical Literature (1) Instruction in use of the library and of the literature of chemistry.
Effective: Summer 2007
Prerequisite:

CHEM 402 Chemistry in the Environment (3) Chemistry of the atmosphere, natural waters, and the land surface with particular focus on human influence on processes occurring therein.
Effective: Summer 2007
Prerequisite:

CHEM 406 (NUC E 405) Nuclear and Radiochemistry (3) Theory of radioactive decay processes, nuclear properties and structure, nuclear reactions, interactions of radiation with matter, biological effects of radiation.
Effective: Summer 2007
Prerequisite:

CHEM 408 Computational Chemistry (3) Introduction to numerical and nonnumerical computer uses in physical science.
Effective: Summer 2007
Prerequisite:

CHEM 410 Inorganic Chemistry (3) Conceptual and descriptive aspects of nontransition elements, covering structural, thermodynamic, and kinetic features.
Effective: Summer 2007
Prerequisite:

CHEM 412 Transition Metal Chemistry (3) Structure and bonding of compounds containing transition metals.
Effective: Summer 2007
Prerequisite:

CHEM 413 Chemistry of the Elements (4) Theoretical and descriptive chemistry of the elements; laboratory synthesis and measurements in inorganic, coordination, and transition metal chemistry.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

CHEM 413W Chemistry of the Elements (4) Theoretical and descriptive chemistry of the elements; laboratory synthesis and measurements in inorganic, coordination, and transition metal chemistry.
Effective: Summer 2007 Ending: Summer 2012
Prerequisite:

CHEM 423W Chemical Spectroscopy (4) Modern methods and instruments of spectroscopy and their applications to problems of chemical structure and analysis.
Effective: Spring 2011 Ending: Fall 2012
Prerequisite:

CHEM 425 Chromatography and Electrochemistry (3) Gas, liquid, and other forms of chromatography; important techniques of electrochemistry.
Effective: Summer 2007 Ending: Fall 2012
Prerequisite:

CHEM 425 Chromatography and Electrochemistry (3) Gas, liquid, and other forms of chromatography; important techniques of electrochemistry.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

CHEM 427W (FRNSC 427W) Forensic Chemistry (4) Analytical and instrumental methods used in the forensic sciences with special emphasis on the analysis and characterization of trace evidence.
Effective: Fall 2011 Ending: Summer 2012
Prerequisite:

CHEM 427W (FRNSC 427W) Forensic Chemistry (4) Analytical and instrumental methods used in the forensic sciences with special emphasis on the analysis and characterization of trace evidence.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

CHEM 430 Structural Analysis of Organic Compounds (3) Spectroscopic methods as tools in gross and detailed structural analysis and interpretation within the framework of modern theory.
Effective: Fall 2010
Prerequisite: Concurrent: CHEM 213

CHEM 431W Organic and Inorganic Preparations (4) Preparation, purification, and characterization of both organic and inorganic compounds by modern methods.
Effective: Fall 2010
Prerequisite:

CHEM 432 Organic Reaction Mechanisms (3) The study, evaluation, and discussion of the mechanisms of selected organic reactions.
Effective: Summer 2012
Prerequisite:

CHEM 440 Instrumental Analysis (3) General instrumental theory and methods used in common atomic and molecular analyses.
Effective: Summer 2007
Prerequisite:

CHEM 441 Elemental Analysis and Instrumental Design Laboratory (1) An introduction to the use of modern instruments for problems in chemical structure and analysis.
Effective: Summer 2007
Prerequisite:

CHEM 443 Electrochemistry and Chromatography Laboratory (1) An introduction to the use of modern instruments for problems in chemical structure and analysis.
Effective: Summer 2007
Prerequisite:

CHEM 445 Atomic and Molecular Spectroscopy Laboratory (1) An introduction to the use of modern instruments for problems in chemical structure and analysis.
Effective: Summer 2007
Prerequisite:

CHEM 448 Surface Chemistry (3) Surface chemistry, emphasizing the physical and chemical aspects of surfaces important for applications in colloids, catalysis, microelectronics and biocompatibility.
Effective: Summer 2007
Prerequisite:

CHEM 450 Physical Chemistry - Thermodynamics (3) Introduction to physical chemistry with primary emphasis on chemical thermodynamics and its molecular interpretation. (Graduate credit not allowed for students majoring in Biochemistry and Molecular Biology, Chemistry, or Chemical Engineering.)
Effective: Summer 2007
Prerequisite:

CHEM 452 Physical Chemistry - Quantum Chemistry (3) Introduction to physical chemistry with primary emphasis on molecular structure, spectroscopy, and chemical kinetics. (Graduate credit not allowed for students majoring in Biochemistry and Molecular Biology, Chemistry, or Chemical Engineering.)
Graduate credit not allowed for student majoring in BioChemistry, Chemistry, or Chemical Engineering. Effective: Summer 2007
Prerequisite:

CHEM 457 Experimental Physical Chemistry (2) Laboratory experiments designed to illustrate the principles of physical chemistry and teach techniques of error analysis and the presentation of quantitative data. (Graduate credit not allowed for students majoring in Biochemistry and Molecular Biology, Chemistry, or Chemical Engineering.)
Graduate credit not allowed for student majoring in BioChemistry, Chemistry, or Chemical Engineering. Effective: Summer 2007 Ending: Summer 2012
Prerequisite:

CHEM 457 Experimental Physical Chemistry (1-2 per semester/maximum of 2) Laboratory experiments designed to illustrate the principles of physical chemistry and teach techniques of error analysis and the presentation of quantitative data. (Graduate credit not allowed for students majoring in Biochemistry and Molecular Biology, Chemistry, or Chemical Engineering.)
Graduate credit not allowed for student majoring in BioChemistry, Chemistry, or Chemical Engineering. Effective: Fall 2012
Prerequisite:

CHEM 459W Advanced Experimental Physical Chemistry (4) Laboratory experiments and projects for students interested in advanced study in physical chemistry.
Effective: Summer 2010
Prerequisite:

CHEM 460 Advanced Thermodynamics (3) Chemical thermodynamics, with applications to pure phases, solutions, and chemical reactions.
Effective: Spring 2009
Prerequisite:

CHEM 462 Advanced Quantum Chemistry (3) Introduction to quantum chemistry, with emphasis on atomic and molecular structure.
Effective: Summer 2007
Prerequisite:

CHEM 464 Chemical Kinetics and Dynamics (3) Introduction to chemical kinetics and molecular dynamics.
Effective: Spring 2009
Prerequisite:

CHEM 466 Molecular Thermodynamics (3) Introduction to physical chemistry with a primary emphasis on the statistical and molecular interpretation of thermodynamics.
Effective: Summer 2007
Prerequisite:

CHEM 472 General Biochemistry I (3) Basic structure and function of cellular components; principles of enzyme kinetics and regulation.
Effective: Summer 2007
Prerequisite:

CHEM 474 Organic Synthesis (3) Theory and methodology of organic synthesis applied to complex organic molecules.
Effective: Spring 2007
Prerequisite:

CHEM 476 Biological Chemistry (3) Fundamentals of Biochemistry for Chemists. Students cannot receive credit for both CHEM 476 and B M B 401.
Effective: Fall 2009
Prerequisite: Concurrent: CHEM 452

CHEM 494 Chemical Research (1-10 per semester/maximum of 20) Experimental investigation of an original research problem. Preparation of a formal thesis is optional. (Credit not allowed for graduate students in Biochemistry, Chemistry or Chemical Engineering.)
Effective: Summer 2007

CHEM 494H Chemical Research (1-10 per semester/maximum of 20) Experimental investigation of an original research problem. Preparation of a formal thesis is optional. (Credit not allowed for graduate students in Biochemistry, Chemistry or Chemical Engineering.)
Effective: Fall 2007

CHEM 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2007
Prerequisite:

CHEM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1988

CHEM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1982

CHEM 497A Organic Reaction Mechanisms (3) This course focuses on the study and analysis of selected electron-pushing mechanisms of organic reactions.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

CHEM 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

CHEM 499A (IL) Green Chemistry: New Technologies and How to Present Them in the Classroom (3) This is a course covering new developments in chemistry. After preparatory work involving background material and lab technique review, students will spend 10 days in southwest England at the University of Bristol.
Effective: Summer 2012 Ending: Summer 2012

CHEM 499C (IL) Green Chemistry for Educators (3) This course covers green chemistry technology that can enhance students chemistry background and give them the opportunity to analyze results using the sophisticated technology of a major research university. Emphasis will be on developing lessons for classroom instruction.
Effective: Summer 2012 Ending: Summer 2012

CHEM 500 Seminar in Chemistry (1-2 per semester) No description.
Effective: Spring 2001

CHEM 516 Inorganic Chemistry (3) Systematic treatment of inorganic chemistry in terms of modern concepts.
Effective: Winter 1978 Ending: Fall 2012

CHEM 516 Inorganic Chemistry (3) Overview of systematic inorganic chemistry including main group, transition metal, lanthanide, and actinide chemistry.
Effective: Spring 2013 Future: Spring 2013

The Pennsylvania State University
CHEM 517 Organometallic Chemistry (3) Organometallic compounds and their use in catalysis and organic synthesis. Effective: Summer 1990

CHEM 518 Physical Methods in Inorganic Chemistry (3 per semester) Elements of group theory, transition metal electronic spectroscopy, vibrational spectroscopy, magnetic resonance, magnetism, x-ray and photoelectron spectroscopy, x-ray structure. Effective: Summer 1990 Ending: Fall 2012

CHEM 518 Symmetry and Spectroscopy in Inorganic Chemistry (3 per semester) Group theoretical methods and spectroscopies of importance in modern inorganic chemistry. Effective: Spring 2013 Future: Spring 2013 Prerequisite:

CHEM 524 Electroanalytical Chemistry (3) Modern instrumental methods of analysis; electrochemistry. Effective: Spring 1987 Ending: Fall 2012

CHEM 524 Electroanalytical Chemistry (3) Electrochemical principles, techniques, and analytical applications. Effective: Spring 2013 Future: Spring 2013

CHEM 525 Analytical Separations (3) Modern instrumental analysis, including chromatography and other separation methods. Effective: Spring 1987

CHEM 526 Spectroscopic Analysis (3) Modern instrumental analysis, including absorption, emission, electronic, and magnetic spectroscopies. Effective: Spring 1987

CHEM 535 Organic Reaction Mechanisms I (3) Reaction mechanisms and their determination by kinetic and nonkinetic methods. Reactive intermediates. Effective: Spring 2009 Prerequisite:

CHEM 536 Organic Reaction Mechanisms II (3) Reaction mechanisms and their determination by kinetic and nonkinetic methods. Reactive intermediates. Effective: Summer 2007 Prerequisite:

CHEM 537 Synthesis in Organic Chemistry (3) Theory and methods of directed syntheses, including stereospecific and stereoselected schemes; biologically inspired syntheses. Effective: Winter 1978 Prerequisite:

CHEM 539 Mechanistic Bioorganic Chemistry (3) Advanced organic reaction mechanisms, particularly those applicable to biological systems. Effective: Fall 1983 Prerequisite:

CHEM 540 Biophysical Chemistry (3) Structure of biomacromolecules, physical techniques for the study of structure and function, thermodynamic and kinetic studies of biomacromolecules in solution. Effective: Summer 1991 Prerequisite:

CHEM 543 (MATSE 543) Polymer Chemistry (3) This graduate course discusses the new advances in polymer chemistry that leads to new polymeric materials with interesting structures and properties. Effective: Spring 2005 Prerequisite:

CHEM 544 Chemical Thermodynamics (3) Development of thermodynamic theory, with special reference to common physical changes and chemical reactions. Effective: Fall 1984 Prerequisite:

CHEM 545 Statistical Thermodynamics (3) Basic principles of statistical mechanics with application to the calculation of thermodynamic properties of gases and condensed phases. Effective: Summer 2007 Prerequisite:

CHEM 560 Topics in Physical Chemistry (2-6) No description. Effective: Fall 1983

CHEM 563 Chemical Dynamics (3) Molecular dynamics of chemical reaction, energy transfer, and scattering. Reaction rate theory and experiment.
CHEM 565 Quantum Chemistry I (3) An introduction to the principles of quantum mechanics and their applications to chemistry.
Prerequisite: CHEM 565
Effective: Fall 1986

CHEM 566 Quantum Chemistry II (3) Modern techniques in quantum mechanics, with applications to problems in molecular structure and interactions.
Prerequisite: CHEM 566
Effective: Fall 1986

CHEM 567 Molecular Spectroscopy (3) Principles and methods of molecular spectroscopy and their applications to chemical problems.
Prerequisite: CHEM 567
Effective: Fall 1986

CHEM 572 Nucleic Acids Chemistry (3) Biophysical and biochemical approaches for studying structure-function relationships in nucleic acids.
Prerequisite: CHEM 572
Effective: Fall 2011 Ending: Fall 2012

CHEM 572 (BMMB 572) Nucleic Acids Chemistry (3) Biophysical and biochemical approaches for studying structure-function relationships in nucleic acids.
Prerequisite: CHEM 572
Effective: Spring 2013 Future: Spring 2013

CHEM 589 Studies in Chemistry (1-9) Theoretical research, experimental research, or a critical survey of the literature in an area of chemistry.
Prerequisite: CHEM 589
Effective: Winter 1978

CHEM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Prerequisite: CHEM 597
Effective: Spring 1987

CHEM 597B Bioinorganic Chemistry (3) This course will cover principles of biochemistry for chemists, principles of coordination chemistry of biochemists, spectroscopy, and metallobiochemistry.
Prerequisite: CHEM 597B
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CHEM 600 Thesis Research (1-15) No description.
Prerequisite: CHEM 600
Effective: Fall 1983

CHEM 601 Ph.D. Dissertation Full-Time (0) No description.
Prerequisite: CHEM 601
Effective: Fall 1983

CHEM 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Teaching of chemistry undergraduate laboratory and recitation classes with senior faculty instruction supervision.
Prerequisite: CHEM 602
Effective: Fall 1983

CHEM 610 Thesis Research Off Campus (1-15) No description.
Prerequisite: CHEM 610
Effective: Fall 1983

CHEM 611 Ph.D. Dissertation Part-Time (0) No description.
Prerequisite: CHEM 611
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Chinese (CHNS)

CHNS 401 (IL) Level Three Chinese A (4) Emphasis on oral proficiency through discussions of aspects of contemporary Chinese culture.
Effective: Spring 2011
Prerequisite:

CHNS 402 (IL) Level Three Chinese B (4) Readings in representative works of traditional and modern literature; practice in composition; study of aspects of Chinese culture.
Effective: Spring 2011
Prerequisite:

CHNS 403W Practical Written Communication: Chinese for Professional and Academic Purposes (3) Discussions, presentations, readings, and compositions emphasizing written styles used in newspapers, magazines, business reports, academic writing, and other texts.
Effective: Spring 2010 Ending: Summer 2012
Prerequisite:

CHNS 404 Level Four Chinese A (4) Continuation of CHNS 402. Aims to improve students' proficiency in all four language skills, with a special emphasis on writing.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

CHNS 404 Level Four Chinese B (4) Continuation of CHNS 403W. Aims to improve students' proficiency in all four language skills through content-based language learning.
Effective: Spring 2012
Prerequisite:

CHNS 421 (IL) China Beyond China (3) Study of modern and contemporary Chinese culture in its diversity and its intercultural contexts.
Effective: Summer 2011
Prerequisite:

CHNS 422 (IL) Gender and Sexuality in China (3) Study of gender roles and the imaginary of sexuality in the literary, filmic, and artistic production of modern China.
Effective: Summer 2011
Prerequisite:

CHNS 423 (IL) The Warrior, the Courtesan and the Ghost in Classical Chinese Novels (3) This course provides an introduction to major classical Chinese novels by focusing on three character types: the warrior, the courtesan, and the ghost.
Effective: Spring 2012
Prerequisite:

CHNS 426 (IL) The Chinese Rhetorical Tradition (3 per semester/maximum of 6) Study of the rhetorical works in ancient China as well as multiple facets of modern Chinese rhetoric.
Effective: Summer 2011
Prerequisite: Concurrent: ENGL 471

CHNS 452 (IL) Contemporary China: Culture and Trends (3 per semester/maximum of 6) Survey of aspects of the contemporary Chinese-speaking world. Includes readings from Chinese newspapers, magazines, and fiction. Topics may vary each semester.
Effective: Spring 2010
Prerequisite:

CHNS 453 (IL) Chinese Film (3 per semester/maximum of 6) Selected films and directors representing various aspects of Chinese culture and cinema. Topics may vary each semester. Taught in Chinese.
Effective: Spring 2010
Prerequisite:

CHNS 454 (IL) Introduction to Classical Chinese (3 per semester/maximum of 6) Basic patterns and structures of Classical Chinese to the first millennium B.C. to the 19th century.
Effective: Spring 2010
Prerequisite:

CHNS 455 (IL) Masterpieces of Traditional Chinese Literature (3) Survey of traditional Chinese literature, including poetry, historical narratives, philosophical texts, and drama and novel.
Effective: Spring 2010
Prerequisite:

CHNS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2010

CHNS 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or
CHNS 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Spring 2010

CHNS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Spring 2010

CHNS 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Spring 2010

CHNS 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.  
Effective: Spring 2010

CHNS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Summer 1997

CHNS 600 **Thesis Research** (1-15) No description.  
Effective: Fall 1983

CHNS 610 **Thesis Research Off Campus** (1-15) No description.  
Effective: Fall 1983
Civil Engineering (C E)

C E 410W **Sustainable Residential Subdivision Design** (3) Residential subdivision process; site selection; conservation and neo-traditional design; utility design and layout; best management practices for erosion and stormwater.
Effective: Fall 2001
Prerequisite:

C E 421W **Transportation Design** (3) Design of streets and highway facilities; emphasis on geometric elements, intersections and interchanges, roadway drainage, and pavement design.
Effective: Spring 2002
Prerequisite:

C E 422 **Transportation Planning** (3) Transportation systems planning, programming, and management; modeling and simulation, data collection, analysis, and forecasting.
Effective: Spring 2002
Prerequisite:

C E 423 **Traffic Operations** (3) The highway capacity manual, concepts and analyses, freeway operations, signalized and unsignalized intersections, signal coordination, traffic impact studies.
Effective: Spring 1997
Prerequisite:

C E 432 **Construction Project Management** (3) Fundamentals of project management, construction scheduling using the CPM technique, construction project preplanning, and control of quality, safety, and costs.
Effective: Fall 2007
Prerequisite:

C E 435 **Foundation Engineering** (3) Bearing capacity, settlement, and structural design of shallow foundations; lateral earth pressure; retaining and sheet-pile walls; introduction to deep foundations
Effective: Fall 2001
Prerequisite:

C E 436 **Construction Engineering Materials** (3) Design, production, application, specification, and quality control of construction materials unique to civil engineering.
Effective: Fall 2001
Prerequisite:

C E 438W **Construction Engineering Capstone Design** (3) Construction project integrating geotechnical reports; materials specifications; quality control; equipment; estimation; scheduling; design details: excavations, foundations, retaining walls, formwork, pavements.
Effective: Fall 2007
Prerequisite:

C E 441 **Structural Design of Foundations** (3) Design of concentrically and eccentrically loaded square, rectangular, and combined footings; analysis and design of mat foundations; retaining walls; piles caps; flexible retaining design, and caissons.
Effective: Summer 2009 Ending: Fall 2012
Prerequisite: Concurrent: C E 342

C E 441 **Structural Design of Foundations** (3) Design of concentrically and eccentrically loaded square, rectangular, and combined footings; analysis and design of mat foundations; retaining walls; piles caps; flexible retaining design, and caissons.
Effective: Spring 2013 Future: Spring 2013
Prerequisite: Concurrent: C E 342

Effective: Spring 2008
Prerequisite:

C E 447 **Structural Analysis by Matrix Methods** (3) Analysis of truss and frame structures using flexibility and stiffness methods of matrix analysis. Computer applications.
Effective: Fall 1992
Prerequisite:

C E 448W **Advanced Structural Design** (3) Wind, snow, seismic, bridge loads; building design using steel, concrete, and prestressed concrete; advanced steel connections; capstone project; computer applications.
Effective: Spring 2002 Ending: Fall 2012
Prerequisite:

C E 448W **Advanced Structural Design** (3) Wind, snow, seismic, bridge loads; building design using steel, concrete, and prestressed concrete; advanced steel connections; capstone project; computer applications.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

C E 449 **Advanced Structural Design** (3) Special systems, frames and bracing in steel, wood and reinforced or precast
concrete. Introduction to composite construction.
Effective: Spring 2008
Prerequisite:

C E 454 Safety (3) This course will focus on safety issues as they relate to OSHA.
Effective: Spring 2008
Prerequisite:

C E 456 Planning and Scheduling (3) Theory and practice used in planning and scheduling projects; defining task and resources, creating logic diagrams, and monitoring the projects.
Effective: Spring 2008
Prerequisite:

C E 458 Construction Management II (3) Procedures in construction organization including procurement, ethics, field supervision, legal and managerial problems, personnel, cost accounting, and construction business practices.
Effective: Spring 2008
Prerequisite:

C E 461 Water-resource Engineering (3) Qualitative and quantitative description of the hydrologic cycle, flood and drought frequency analysis, climate and land use change impacts, risk analysis and uncertainty, water resource management at regional, national and global scale.
Effective: Spring 2010
Prerequisite:

C E 462 Open Channel Hydraulics (3) Free surface flow in rivers, canals, steep chutes, stilling basins, and transitions.
Effective: Spring 2002
Prerequisite:

C E 465W Water Resources Capstone Course (3) Hydraulic design of river structures and open channels including supercritical and spatially varied flow; hydrologic/hydraulic computer modeling; design project.
Effective: Fall 2007
Prerequisite:

C E 472W Environmental Engineering Capstone Design (3) Principles and design of unit operations for water; domestic and industrial wastewater treatment; equipment selection and application.
Effective: Spring 2002
Prerequisite:

C E 475 Water Quality Chemistry (4) Chemistry applicable to the understanding and analysis of water quality, pollution, and treatment.
Effective: Spring 2011
Prerequisite:

C E 476 Solid and Hazardous Wastes (3) Characteristics and treatment of solid wastes and hazardous wastes.
Effective: Spring 2002
Prerequisite:

C E 479 Environmental Microbiology for Engineers (3) Intro microbiology for engineers; microbe structure, function, and diversity; environmental ecosystems; diagnostic labs.
Effective: Spring 2011
Prerequisite:

C E 488C Capstone Project - Construction (4) This course consists of a project either selected by the students with approval or assigned by the instructor.
Effective: Spring 2008
Prerequisite:

C E 488D Capstone Project - Structural Design (4) This course consists of a structural design project either selected by the students with approval or assigned by the instructor.
Effective: Spring 2008
Prerequisite:

C E 494 Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.
Effective: Fall 1992

C E 494H Honors Senior Thesis (1-6) Investigation of an original project in the area of Civil Engineering.
Effective: Summer 2006

C E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

C E 496A PHRC Standards for Residential Site Development (3) Research and data collection for updating guidance documents for the PHRC Standards for Residential Site Development.
Effective: Summer 2012 Ending: Summer 2012

C E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject
which may be topical or of special interest.

Effective: Fall 1992

C E 497A Analysis of Transportation Policy: Larson Lectures (3) The analysis of different areas of transportation policy, including current transportation challenges, strategic planning and performance measurement; financing; energy and climate issues; changing patterns of travel demand; public transportation and passenger rail; freight transportation, intelligent transportation systems, and safety through a series of guest lectures by prominent experts in the transportation field.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

C E 497B Engineering Materials for Sustainability (3) Introduction to simple scientific techniques for optimum design of materials to improve their performance while minimize their cost and environment impact.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

C E 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

C E 511 Engineering Soil Characteristics (3) Applications of physico-chemical principles in soil engineering; soil composition; factors influencing engineering soil properties.
Effective: Fall 1992
Prerequisite:

C E 512 Soil Mechanics II (2-5) Evaluation of strength parameters and compressibility of soils; elastic analysis of stress and strain; techniques of forecasting foundation settlement; slope stability analysis.
Effective: Fall 1992

C E 513 Advanced Foundation Engineering (3) Practical applications of soil mechanics principles to geotechnical engineering problems; dewatering techniques; design of deep foundations and retaining structures.
Effective: Fall 1992
Prerequisite:

C E 521 Transportation Networks and Systems Analysis (3) Techniques of transportation network, user, stochastic user, and variable demand equilibrium; transportation activity system; computer simulation techniques and forecasting methods.
Effective: Fall 1992
Prerequisite:

C E 522 Traffic Simulation and Control (3) Simulation theory, traffic modeling using GPSS, traffic signal optimization using TEXAS, EVIPAS, PASSERII, TRANSYT-7F, TRAF-NETSIM, FRESIM and CORFLO.
Effective: Summer 1997
Prerequisite:

C E 523 Analysis of Transportation Demand (3) Theories of travel behavior, least squares and maximum likelihood estimation methods, continuous dependent variable models, utility maximization, discrete econometric techniques.
Effective: Fall 1992
Prerequisite:

C E 524 Advanced Problems in Civil Engineering Materials (2-6) Study in the literature and by laboratory investigation of selected topics on field-controlled civil engineering materials.
Effective: Summer 2011

C E 525 Traffic Flow Theory (3) Microscopic and macroscopic traffic flow characteristics; traffic stream models; shockwaves and queuing for traffic operations.
Effective: Spring 1997
Prerequisite:

C E 526 Highway and Street Design (3) Technical analysis of the design elements of roadways, alignment, cross-section features, and intersection and interchange design considerations.
Effective: Spring 1994
Prerequisite:

C E 527 Roadside Design and Management (3) Roadside safety and design, safety management, pavement management, lighting, signs, signals, and markings, clear zone, guiderail, impact attenuators.
Effective: Spring 1996
Prerequisite:

C E 528 Transportation Safety Analysis (3) Issues and methods in transportation safety analysis; factors contributing to crashes; crash causation; modeling accident occurrence; identifying sites for treatment.
Effective: Spring 2005
Prerequisite:

C E 531 Legal Aspects of Engineering and Construction (3) Basic legal doctrines, contractual relationships between parties, analysis of construction contract clauses, contract performance, and professional practice problems.
Effective: Fall 2001
Prerequisite:
C E 533 **Construction Productivity Analysis and Performance Evaluation** (3) Construction productivity concepts and models; productivity measurement, control, and forecasting; analysis of factors affecting productivity; methods improvement techniques.
Effective: Fall 1992
Prerequisite:

C E 539 **Approximate Methods of Structural Analysis** (3) Structural analysis through the application of initial-value methods, Newmark's method, Fourier series, finite difference techniques, and work and energy procedures.
Effective: Fall 1992
Prerequisite:

C E 540 **Statically Indeterminate Structures** (3) Analysis of statically indeterminate straight/curved beams, grids, 2D/3D frames, arches, cables, and shells using classical and modern techniques.
Effective: Spring 2005

C E 541 **Structural Analysis** (3) Theory of various finite elements as applied to civil engineering structures. Term paper required.
Effective: Fall 1992
Prerequisite:

C E 542 (A E 542) **Building Enclosure Science and Design** (3) The building enclosure: nature, importance, loadings; building science: control of heat, moisture, air, hygrothermal analysis; design: walls, windows, roofs, joints.
Effective: Summer 2002

C E 543 **Prestressed Concrete Behavior and Design** (3) Design and behavior of prestressed concrete structures: materials and systems losses, flexure, shear, bond, deflections, partial prestressing, continuous beams.
Effective: Summer 2003
Prerequisite:

C E 544 **Design of Reinforced Concrete Structures** (3) Advanced topics in design of reinforced concrete structures. Torsion and shear; beam moment-curvature; two-way slab systems; slender columns; strut- and-tie methodology.
Effective: Spring 2007

C E 545 **Metal Structure Behavior and Design** (3) Design philosophies and basis; seismic loading; fatigue; bending, column, plate, and beam-column stability; tapered members; torsion; connections; bracing; frame stability.
Effective: Spring 2007

C E 546 **Reinforced Concrete Slabs** (3) Behavior, analysis, and design of floor systems; elastic, ACI Code method, yield line theory; two-way, flat slab, flat plate.
Effective: Fall 1992
Prerequisite:

C E 548 **Structural Design for Dynamic Loads** (3) Dynamic behavior of structural systems of one and more degrees of freedom; earthquake, blast-resistant analysis, and design of structures.
Effective: Spring 2008
Prerequisite:

C E 549 **Bridge Engineering I** (3) Engineering of modern steel and concrete bridge structures; loading; analysis; design.
Effective: Spring 2000
Prerequisite:

C E 550 **Engineering Construction Management** (3) Management fundamentals for construction contracting; organization, project planning, scheduling and control, bonding and insurance, labor legislation and regulation, cost and control.
Effective: Fall 1992
Prerequisite:

C E 551 **Random Processes in Hydrologic Systems** (3) Hydrologic systems analysis, simulation; design using probability, time series and dynamical systems; formulating models, parameter estimation, environmental impact, resource assessment.
Effective: Summer 1996
Prerequisite:

C E 552 **Coastal and Nearshore Processes** (3) Hydrodynamics of the near-shore environment, including waves, currents, and storm surges. Coastal response, sediment transport, engineering structures.
Effective: Summer 2004
Prerequisite:

C E 555 **Groundwater Hydrology: Analysis and Modeling** (3) Introduction to groundwater resource analysis, model formulation, simulation, and design of water resource systems using symbolic and numerical methods.
Effective: Spring 1996
Prerequisite:

C E 561 **Surface Hydrology** (3) Quantification of the processes that govern the movement and storage of water near the land-surface including precipitation, evapotranspiration, and runoff.
Effective: Spring 2005
Effective: Spring 2005

C E 564 Sediment Transport in Alluvial Streams (3) River flow, river channel formation, the physical characteristics of rivers, responses of rivers to natural and human-made changes.
Effective: Spring 2005
Prerequisite:

C E 566 Uncertainty and Reliability in Civil Engineering (3) Introduction to probabilistic modeling, simulation, uncertainty analysis, and reliability estimates applied to civil engineering.
Effective: Spring 2005

C E 567 River Engineering (3) Introduction to river mechanics and fluvial geomorphology applied to problems of sediment transport and channel morphology.
Effective: Fall 1999

C E 570 Environmental Aquatic Chemistry (3) Speciation, reactivity, and distribution of contaminants in water, with emphasis in inorganic chemicals.
Effective: Fall 1992
Prerequisite:

C E 571 Physical-Chemical Treatment Processes (3) The theory of physical-chemical processes used in the treatment of potable water and municipal and industrial wastewaters.
Effective: Fall 1992
Prerequisite:

C E 572 Biological Treatment Processes (3) The theory and application of biological processes to treat organic wastes, including wastewater, solid residuals, and toxic priority pollutants.
Effective: Summer 2011
Prerequisite:

C E 573 Environmental Organic Chemistry (3) Theory, measurement, and estimation of the characteristics and environmental transformations of hazardous materials.
Effective: Spring 2000
Prerequisite:

C E 574 Laboratory Analyses in Water Quality Control (3) Experiments illustrating current chemical and biochemical methods of water and waste treatment and analytical methods used in research and control.
Effective: Fall 1992
Prerequisite:

C E 575 Industrial Waste Management (3) Surveys and analysis, pollution prevention, regulatory requirements, treatment and disposal of liquid, gaseous and solid residues.
Effective: Spring 1997
Prerequisite:

C E 576 (CH E 576) Environmental Transport Processes (3) Fundamentals of chemical transport in engineered environments, such as biofilm reactors, and natural systems including aquifers and rivers.
Effective: Fall 2001
Prerequisite:

C E 577 Treatment Plant Design (1-6) Design of works for the treatment of water and wastewater for municipalities and industries.
Effective: Fall 1992
Prerequisite:

C E 578 Groundwater Remediation (3) Application of fundamental physical/chemical/biological processes in natural and engineered systems for remediation of contaminated soil and groundwater.
Effective: Summer 2011
Prerequisite:

C E 579 Environmental Pollution Microbiology (3) Fundamentals of microorganisms in water and wastewater treatment; indicators of pollution; activities of microorganisms in polluted waters, including biogeochemical cycles.
Effective: Summer 2011

Effective: Spring 2005

C E 581 Pavement Management and Rehabilitation (3) Techniques of network and project level pavement management, field evaluation methods and equipment, maintenance and rehabilitation strategies, overlay design procedures.
Effective: Fall 1992
Prerequisite:
C E 582 Pavement Design and Analysis (3) Viscoelastic analysis; non-linear analysis; fatigue and permanent deformation; back-calculation of layer moduli; mechanistic-empirical design methods.
Effective: Summer 1998

C E 583 Bituminous Materials and Mixtures (3) Composition, physical behavior, production, and performance of bituminous materials and mixtures.
Effective: Spring 1998

C E 584 Concrete Materials and Properties (3) Study of concrete properties and associated variables, prediction models, testing, preventative measures, pozzolans, admixtures.
Effective: Spring 1997
Prerequisite:
C E 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2012

C E 591 Environmental Engineering Seminar (1) Seminar topics selected by faculty and students based on research interests on topics related to environmental engineering and science.
Effective: Spring 2005

C E 592 Environmental Engineering & Science Topics (1) Current topics in environmental engineering and science.
Effective: Spring 2005

C E 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

Effective: Summer 2012 Ending: Summer 2012

C E 596B Concrete Structures (2) Analysis, behavior and design of reinforced concrete slabs and liquid retaining structures. Analysis of two-way action by finite element and simplified methods of analysis.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

C E 596C City and Regional Planning for Transportation (3) Aspects of city and regional planning as they influence the planning, design, and operations of surface transportation systems.
Effective: Summer 2012 Ending: Summer 2012

C E 596C Traffic Simulation and Control (3) Traffic detection and control systems, simulation theory, model calibration and validation, traffic signal coordination and optimization, simulation applications using HCS, Synchro, and VISSIM.
Effective: Summer 2012 Ending: Summer 2012

C E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 1992

C E 597A How to Initiate Your Academic Career (1) This class will prepare students to generate competitive application materials for academic positions and educate them about the academic hiring process.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

C E 597B Introduction to ITS (3) Concepts underlying development of Intelligent Transportation Systems; use of computers, communications systems, data bases, GPS, GIS, control devices for additional information dissemination.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

C E 597C Transportation Asset Management (3) Monitoring, nondestructive evaluation, performance prediction, life-cycle assessment of highways, airports, pavements, earth structures, roadsides, bridges, guidance, utilities.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

C E 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1996
C E 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction. Effective: Spring 2008

C E 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 1992

C E 603 Foreign Academic Experience (1-9 per semester/maximum of 18) Foreign study and/or research contributing progress towards the degree at a foreign university. Effective: Fall 2011

C E 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 1992

Last Import from UCM: June 2, 2012 12:27 PM
Classics and Ancient Mediterranean Studies (CAMS)

CAMS 400W Comparative Study of the Ancient Mediterranean World (3) Comparative study of ancient Mediterranean civilizations.
Effective: Spring 2001
Prerequisite:

CAMS 405 (IL) Law & Economy in the Ancient Near East (3) This course is an overview of the legal and economic texts and institutions in the Ancient Near East.
Effective: Spring 2009
Prerequisite:

CAMS 410 Classical Epic (3) Homer, Hellenistic Epic, and Vergil; influences on later epic.
Effective: Spring 1998

CAMS 411W Classical Drama (3) Masterpieces of Greek tragedy (Aeschylus, Sophocles, Euripides) and comedy (Aristophanes, Menander); their influence on Roman writers.
Effective: Spring 2001

CAMS 420 Introductory Targumic Aramaic (3) Fundamentals of Aramaic grammar, syntax, and vocabulary.
Effective: Spring 2007

CAMS 440W Studies in Classical and Ancient Mediterranean Archaeology (3-6) Selected topics in the literary sources and material evidence for classical and ancient Mediterranean society.
Effective: Summer 2000
Prerequisite:

CAMS 442 (IL) (KINES 442) Sport in Ancient Greece and Rome (3) An examination of the continuity of sport in Greek and Roman societies.
Effective: Spring 2008
Prerequisite:

CAMS 470 (IL) Languages and Cultures of the Ancient Near East (3) This course is an overview of the languages and cultures that populated the Ancient Near East.
Effective: Spring 2009
Prerequisite:

CAMS 471 Sumerian (3) Introduction to the Sumerian language and the cuneiform writing system.
Effective: Spring 2009
Prerequisite:

CAMS 472 Akkadian (3) Introduction to the Akkadian language (Babylonian & Assyrian) and the cuneiform writing system.
Effective: Spring 2009
Prerequisite:

CAMS 480 (J ST 480) Greeks and Persians (3) Development and achievements of the Achaemenid kingdom; relationships between Persians and Greeks.
Effective: Spring 2001
Prerequisite:

CAMS 481 (IL) Introduction to Middle Egyptian & Hieroglyphics (3) An introduction to the language and script of Ancient Egypt, familiarizing the student with grammar, syntax and lexicon.
Effective: Summer 2012
Prerequisite:

CAMS 490 Ancient Mediterranean Languages (3-6) Variable topic study of an ancient language of the Mediterranean basin and related areas, other than Greek, Latin, or Hebrew.
Effective: Summer 2011
Prerequisite:

CAMS 492 Intermediate Field Methods (3-6) On-site experience in archaeological fieldwork in the ancient Mediterranean region.
Effective: Spring 2000
Prerequisite:

CAMS 493 Intermediate Field Analysis (3-6) On-site experience in archaeological analysis in the ancient Mediterranean region.
Effective: Spring 2000
Prerequisite:

CAMS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1997

The Pennsylvania State University
CAMS 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2001

CAMS 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Summer 1999

CAMS 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Fall 1996

CAMS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 1997

CAMS 497A Akhenaten and Tutankhamun: Heresy on the Nile (3) An introduction to cross-cultural, cutting-edge research being conducted into the origins and nature of early iconoclastic Monotheism and expressionist art. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CAMS 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

CAMS 501 Comparative Greek and Latin Grammar (3) The evolution of the phonological, morphological, syntactic and lexical structures of Greek and Latin from Proto-Indo-European. Effective: Summer 2011 Prerequisite:

CAMS 503 Seminar on Ancient Mediterranean Languages (3 per semester, maximum of 6) An in-depth examination of the ancient languages of the Mediterranean basin, including Indo-European and non-Indo-European languages. Effective: Summer 2011 Prerequisite:

CAMS 504 Topography of Ancient Rome (3) Lectures and readings on physical development of the ancient city of Rome from earliest habitation to time of later empire. Effective: Spring 2007

CAMS 520 Advanced Sumerian (3) Advanced study of Sumerian grammar and cuneiform writing through the reading of Sumerian literary texts. Effective: Summer 2009

CAMS 521 Advanced Akkadian (3) Advanced study of Akkadian grammar and the cuneiform script through the reading of texts in various dialects. Effective: Summer 2009

CAMS 522 Comparative Semitics (3) Overview of the Semitic language family and introduction to its comparative linguistic study. Effective: Summer 2009

CAMS 592 Proseminar (3) Introduction to the history, research methods, historiography of modern scholarship on ancient Mediterranean studies. Effective: Summer 2008

CAMS 593 Research Seminar (3-6) Significant research experience in the fields represented by CAMS; guided supervision in the preparation of a scholarly article. Effective: Summer 2008 Prerequisite:

CAMS 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1997

CAMS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Fall 2001

CAMS 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at an
overseas institution with whom linkages have been established. Effective: Summer 2005

CAMS 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. Effective: Spring 2002

Last Import from UCM: June 2, 2012 12:27 PM
Clinical Lrng Compet (CLC)

CLC 712 Clinical Learning Competencies I (3) This course will begin to develop the medical students' basic clinical reasoning methods, self-learning concepts and the development of clinical competencies.
Effective: Fall 2008
Prerequisite: Concurrent: Cellular and Molecular Basis of Medical Practice Biological Basis of Disease

CLC 721 Clinical Learning and Competencies II (8) This course will continue the development of medical students' basic clinical reasoning methods, self-learning concepts and development of clinical competencies that were provided in CLC 721.
Effective: Fall 2008
Prerequisite: Concurrent: HEM 721 CAR 722 PLM 726 REN 728 GI 729

CLC 722 Clinical Learning and Competencies III (5) This course will continue the development of medical students' basic clinical reasoning methods, self-learning concepts and development of clinical competencies that were provided in CLC 721.
Effective: Fall 2008
Prerequisite: Concurrent: NBS 725 MSC 727 DERM 720 REP 730 END 731 FCM 723 Behavioral Influences on Health

Last Import from UCM: June 2, 2012 12:27 PM
Co-Curricular Activ (COCUR)

COCUR 900 Moot Court Board (1 per semester/maximum of 6) See Handbook for Description. Effective: Fall 2009

COCUR 901A Member Arbitration L Rev (1 per semester/maximum of 6) See handbook for description. Effective: Spring 2011

COCUR 901E Member Environmental Law Review (1 per semester/maximum of 6) See handbook for description. Effective: Fall 2009

COCUR 901I Member Journal of Law and International Affairs (1 per semester/maximum of 6) See handbook for description. Effective: Fall 2011

COCUR 901P Member Penn State Law Review (1 per semester/maximum of 6) See handbook for description. Effective: Fall 2009

COCUR 902E Editor Environmental Law Review (2 per semester/maximum of 8) See handbook for description. Effective: Fall 2009

COCUR 902I Editor Journal of Law and International Affairs (2 per semester/maximum of 4) See handbook for description. Effective: Fall 2011

COCUR 902P Editor Penn State Law Review (2 per semester/maximum of 8) See handbook for description. Effective: Fall 2009

COCUR 995D Appellate Moot Court Board (2) See Handbook for description. Effective: Fall 1998

College Student Affs (CSA)

CSA 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2009

CSA 501 Introduction to Student Affairs (3) An introduction to student affairs in higher education with consideration of various functional areas of the profession.
Effective: Spring 2004

CSA 502 Organization and Administration in Student Affairs (3) Formulation of policies as guides to the student personnel service programs; integration of program elements; research; current problems and trends.
Effective: Spring 2004

CSA 503 Student Development in College Environments (3) This course covers the knowledge and methods of human development theories and their applications in college settings.
Effective: Fall 2003

CSA 504 Research and Assessment in Student Affairs (3) This course provides the basic knowledge and skills necessary to plan, design, implement, and evaluation assessment programs in student affairs.
Effective: Fall 2003

CSA 505 Capstone Seminar (2) This seminar provides advanced students an opportunity to apply concepts from previous course work to current issues facing student affairs.
Effective: Summer 2004

CSA 506 Campus Environments (3) Examination of theoretical concepts and empirical findings that describe the college environment and explain its impact on students and staff.
Effective: Summer 2009

CSA 507 Social Justice Issues in Higher Education (3) Exploration of diverse student population, their different experiences, and the value university communities place on these differences.
Effective: Fall 2010

CSA 594 Research Topics (1-9) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2005

CSA 595 Internship (1-9) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2005

CSA 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2005

CSA 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2005

CSA 597A Helping Skills for CSA Professionals (4) This course is designed to develop basic helping skills for student affairs practitioners. It will help students identify the differences between helping skills and counseling and provide an opportunity for students to learn and practice basic helping skills. In addition, this course will serve as a first class for students who may be interested in pursuing advanced coursework in counseling. Helping Skills for CSA Professionals is an Experiential course. Therefore, students are expected to actively participate in activities and exercise inside and outside of the classroom. Students are also expected to reflect on their personal and professional growth, focusing on the attitudes, beliefs, biases, and values they bring to their helping relationships.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

Communication (COMMU)

COMMU 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

COMMU 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

Last Import from UCM: June 2, 2012 12:27 PM
Communication Arts and Sciences (CAS)

CAS 402 *Speech and Human Behavior* (3) General semantics, thought, and human behavior; not offered at University Park campus.
Effective: Spring 2003

CAS 403 *Interpersonal Communication Theory and Research* (3) Examining behavior within interpersonal encounters, with emphasis on both theoretical/applied explanations for how and why people act during such interactions.
Effective: Spring 2003
Prerequisite:

CAS 404 *Conflict Resolution and Negotiation* (3) Theories and strategies important for conceptualizing, developing, and managing conflict negotiation, mediation, and third-party intervention.
Effective: Spring 2003
Prerequisite:

CAS 405 *Family Communication Theory and Research* (3) Explores the nature and functions of communication in family life; emphasis on meaning, patterns, and styles of family communication.
Effective: Summer 2002
Prerequisite:

CAS 406H *Honors Course in Communication Arts and Sciences* (3) Individual study and seminar in selected areas or issues of speech communication.
Effective: Spring 2003
Prerequisite:

CAS 410W *Mother-Daughter Communication* (3) Explores the mother-daughter relationship with an emphasis on understanding mother-daughter communication.
Effective: Summer 2010
Prerequisite:

CAS 411 *Rhetorical Criticism* (3) Principles of rhetorical criticism examined through analysis of selected texts and critics.
Effective: Spring 2003
Prerequisite:

CAS 415 *Rhetoric of Film and Television* (3) Rhetorical analysis of the artistic forms and cultural structures of film and television; intensive study of selected examples.
Effective: Spring 2003
Prerequisite:

CAS 420 *Rhetorical Theory* (3) Ancient, medieval, Renaissance, Enlightenment, and contemporary theories of rhetoric.
Effective: Spring 2003
Prerequisite:

CAS 421 *Communication and Aging* (3) Concentrates on the pivotal role that communication plays in the social process of aging.
Effective: Summer 2007
Prerequisite:

CAS 422 (US) (AAA S 422) *Contemporary African American Communication* (3) A focused study on the continuities between African and African American culture and communication.
Effective: Summer 2005 Ending: Fall 2012
Prerequisite:

CAS 422 (US) (AF AM 422) *Contemporary African American Communication* (3) A focused study on the continuities between African and African American culture and communication.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

CAS 426W *Communication Ethics* (3) Ethical issues in public and private communication; role of communication in expressing and realizing individual and social values.
Effective: Spring 2003
Prerequisite:

CAS 438 *Rhetoric of Documentary* (3) Rhetorical analysis of the documentary in film, television, and other media; historical and critical analysis of functions and form.
Effective: Spring 2003
Prerequisite:

CAS 450W *Group Communication Theory and Research* (3) Selected theories of problem solving through group discussion emphasizing participation and leadership.
Effective: Spring 2003
Prerequisite:

CAS 452 *Organizational Communication Theory and Research* (3) Explores the nature and functions of communication in organizations; emphasis on concepts, tools, and skills for effective management of communication.
Effective: Spring 2003
Prerequisite:

CAS 452W Organizational Communication Theory and Research (3) Explores the nature and functions of communication in organizations; emphasis on writing and exploring concepts, tools, and skills for effective management of communication.
Effective: Spring 2004
Prerequisite:

CAS 453 Health Communication Theory and Research (3) Principles of communication about health across the lifespan and within health-care contexts.
Effective: Spring 2006
Prerequisite:

CAS 455 (US) (WMNST 455) Gender Roles in Communication (3) Explores the literature on gender research in the discipline of human communication.
Effective: Summer 2005
Prerequisite:

CAS 470 Nonverbal Communication (3) Examining ways nonverbal messages, such as gestures, posture, vocal intonation, and facial expressions, affect us on a daily basis.
Effective: Spring 2003
Prerequisite:

CAS 471 (US;IL) Intercultural Communication Theory and Research (3) Intercultural and cross-cultural communication research theory and practice as applied within and across national boundaries.
Effective: Summer 2005
Prerequisite:

CAS 475 Studies in Public Address (3) History and criticism of public discourse; intensive analysis of selected public addresses and social movements.
Effective: Spring 2003
Prerequisite:

CAS 478 Contemporary American Political Rhetoric (3) Analysis of selected speeches, debates, and persuasive campaigns and movements in recent American political history.
Effective: Spring 2003
Prerequisite:

CAS 480 Group Performance of Literature (3) Applying storytelling skills and performance theory to the group presentation of literature; criticism of literature through group presentations.
Effective: Spring 2003
Prerequisite:

CAS 483 Communication and Information Technology II (3) Theory and application of interactive internet-based communication and information management; for students who want a Liberal Arts approach.
Effective: Fall 2003
Prerequisite:

CAS 494 Research Topics (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2003
Prerequisite:

CAS 494H Research Topics (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Summer 2008
Prerequisite:

CAS 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2003
Prerequisite:

CAS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2002

CAS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2002

CAS 497A Qualitative Research Methods (3) The course introduces qualitative inquiry in the social sciences and enables students to conduct and critique research that uses qualitative methodology.
Effective: Summer 2012 Ending: Summer 2012

CAS 497A (PL SC 497A) Political Deliberation (3) This course showcases of contemporary deliberative practices and explores the shortcomings of modern politics by the deliberative democratic standard.
CAS 497B Political Rhetoric and Popular Music (3) This course covers the history of music associated with the politics of a given time, starting in early 20th Century with a heavier focus on the 1960s to the present. The instructor and students will identify major songs from each period, what political issues those songs addressed, etc. Looking across the decades, the course will examine how songs have changed over time, how they are received and marketed, and the culture shift in relationship to changing communication modes. Assignments include exams, papers, and presentations.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CAS 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2002

CAS 498A LGBTQ Culture, Identity and Communication (3) Critical exploration of the history of sexuality, focusing especially on the emergence of modern lesbian and gay identities.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CAS 498B Issues of Freedom of Expression (3) Theories, doctrines, statutes and cases related to the First Amendment guarantee of freedom of expression.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CAS 498C Communication, Training, and Development (3) Instruction in the knowledge and skills needed to effectively design and deliver customized training programs; specific focus on the role of communication systems and rhetoric in this process.

CAS 498D Culture and the Signs of Communication (3) This course teaches students how to understand communication practices (in all its cultural contexts) as a semiotic process and event.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CAS 499 (IL) Foreign Studies (1-9) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

CAS 500 Historical Public Address (3 per semester, maximum of 9) Special topics in American public address, 1765-1900; emphasis on rhetoric of revolution, reform, and reaction.
Effective: Spring 2003

CAS 503 Rhetorical Criticism (3 per semester/maximum of 6) An advanced seminar in the history, theory, methods, and practice of rhetorical criticism.
Effective: Spring 2003
Prerequisite:

CAS 504 Contemporary Public Address (3 per semester, maximum of 9) Special topics in recent history of American public address, including speeches, debates, persuasive campaigns, and social movements in America 1900-present.
Effective: Summer 2002

CAS 505 Historical Development of Rhetorical Theory (3 per semester/maximum of 9) Study of one or more periods of rhetorical theory from Greek antiquity to 1900.
Effective: Spring 2005
Prerequisite:

CAS 506 Contemporary Rhetorical Theory (3 per semester/maximum of 6) A study of rhetorical theory from 1930 to the present, focusing on semantic, political, sociological, symbolic, and philosophical perspectives.
Effective: Spring 2005
Prerequisite:

CAS 507 Issues in Rhetorical Theory (3 per semester, maximum of 6) Theoretical, analytical, philosophical, and critical problems in human communication, with application of humanistic and social scientific research framework.
Effective: Fall 2003
Prerequisite:

CAS 515 Rhetoric and Media (3 per semester, maximum of 9) Seminar in the application of rhetorical theory and criticism to television, film, and other media.
Effective: Spring 2003

CAS 530 Political Communication and Media (3) Study of rhetorical and communicative dimensions of contemporary political communication with particular attention to electronic media.
Effective: Spring 2004

The Pennsylvania State University
CAS 550 Social Influence (3 per semester/maximum of 6) Theory and devices of persuasion; analysis of persuasive discourse.
Effective: Spring 2003
Prerequisite:

CAS 553 (PHP 553) Disaster Communication (3) This seminar provides students with a comprehensive understanding of the multifaceted nature of disaster communication across phases of a disaster.
Effective: Spring 2012

CAS 554 Small Group Communication (3 per semester/maximum of 6) Communication variables in small groups. Experimental research and innovations in communication in vocational, therapeutic, and educational groups.
Effective: Fall 2003

CAS 555 Interpersonal Communication (3 per semester/maximum of 6) Investigation of the communicative management of ongoing relationships; examination of how communication both creates and responds to exigencies of friendship.
Effective: Spring 2003
Prerequisite:

CAS 556 Relational Communication (3) Examines theories and research focused on understanding communication in intimate (or potentially intimate) relationships.
Effective: Spring 2003
Prerequisite:

CAS 557 Health Communication (3) Provides experience in making decisions about planning, implementing, and evaluating communication in community-based health campaigns to achieve health promotion/education.
Effective: Summer 2002
Prerequisite:

CAS 558 Family Communication (3) Examines theories and research focused on understanding communication in family contexts.
Effective: Spring 2003
Prerequisite:

CAS 559 Lifespan Communication (3) How various communication processes such as language skills, interpersonal relationship definition and management, social support change cross the lifespan.
Effective: Spring 2003
Prerequisite:

CAS 560 Communication Theory (3) This course introduces graduate students to the philosophical underpinnings of communication research and develops skills in theory construction.
Effective: Summer 2002
Prerequisite:

CAS 561 Quantitative Research Methods (3) Introduces graduate students to principles, issues, and design considerations underlying social scientific methodology; material is applied to communication research.
Effective: Summer 2002
Prerequisite:

CAS 562 Qualitative Research Methods (3) Qualitative approaches to investigating human experience using tools such as interviewing and observation.
Effective: Spring 2008

CAS 581 (APLNG 581) Discourse Analysis (3) Overview of theories and approaches to the analysis of spoken and/or written discourse.
Effective: Spring 2004

CAS 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2004

CAS 594 Research Topics (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Spring 2004
Prerequisite:

CAS 595 Internship (1-9) Supervised off-campus, nongroup instruction.
Effective: Spring 2004
Prerequisite:

CAS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2004

CAS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
CAS 597A **International Health Campaigns** (3) Experiences with health, influence, and intercultural communication theory and research; analyze current and design future campaigns internationally.
Effective: Fall 2002 Ending: Fall 2012 Future: Fall 2012

CAS 597A **Conceptualization and Assessment in Communication Science** (3) An application of the principles of social science to the development of theoretical concepts and their empirical assessment.

CAS 597B **Textual Criticism: Disciplinary Norms and Critical Practices** (3) An investigation into the norms of critical interpretation or hermeneutics in the field of Rhetoric.

CAS 600 **Thesis Research** (1-15) No description.
Effective: Spring 2004

CAS 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Spring 2004

CAS 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Students enrolled will, under supervision, teach SPCOM 100--introduction to speech communication: formal speaking, group discussion, analysis and evaluation of messages.
Effective: Spring 2004

CAS 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2004

CAS 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Spring 2004

CAS 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Spring 2004
Communication Disorders (CMDIS)

CMDIS 610 Thesis Research Off Campus (1-15) No description. 
Effective: Spring 1992

CMDIS 611 Ph.D. Dissertation Part-Time (0) No description. 
Effective: Spring 1992

Last Import from UCM: June 2, 2012 12:27 PM
Communication Sciences and Disorders (CSD)

CSD 433 Aural Rehabilitation (3) Methods for improving receptive skills of persons with hearing impairments; clinical observation and practice.
Effective: Fall 2003
Prerequisite:

CSD 442 Introduction to Disorders of Articulation and Phonology (3) Etiology, diagnosis, and treatment of articulation disorders.
Effective: Fall 2010
Prerequisite:

CSD 444 Introduction to Organic Disorders of Speech and Language (3) Etiology, diagnosis, and principles of treatment of stuttering, and of speech-language disorders having organic bases.
Effective: Fall 2010
Prerequisite:

CSD 461 An Introduction to Augmentative and Alternative Communication (3) Examination of assessment and intervention issues in augmentative and alternative communication techniques with persons with severe communication disorders.
Effective: Fall 2010
Prerequisite:

CSD 494H Senior Honors Thesis (1-6) Independent study related to a student's interests directed by a faculty super supervisor and culminating in the production of a thesis.
Effective: Spring 2006
Prerequisite:

CSD 495A Speech Therapy Practicum (1-6) Demonstration and practice in examination, diagnosis, and treatment of speech problems.
Effective: Fall 2003
Prerequisite:

CSD 495B Audiology Practicum (1-5) Demonstration and practice in examination, diagnosis, and treatment of hearing impairment problems.
Effective: Fall 2003
Prerequisite:

CSD 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2003

CSD 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2003

CSD 500 Research Methods in Communication Sciences and Disorders (3) Methodology necessary for understanding and conducting research in communication disorders.
Effective: Spring 2004
Prerequisite:

Effective: Spring 2004
Prerequisite:

Effective: Spring 2006
Prerequisite:

CSD 541 The Voice and Its Disorders (3) Physical, physiological, and psychological bases of voice production; causes, nature, and symptoms of its disorders; current clinical methods in voice improvement.
Effective: Spring 2006
Prerequisite:

CSD 542 **Stuttering** (3) Modern theories of causes of disorders of rhythm; methods of examination, diagnosis, and treatment.
Effective: Spring 2004
Prerequisite:

CSD 545 **Neuromotor Disorders of Speech** (3) Etiology and symptomatology of dysarthric and apraxic speech: diagnosis, treatment, and the team rehabilitative program approach to these disorders.
Effective: Spring 2006
Prerequisite:

Effective: Spring 2004
Prerequisite:

Effective: Spring 2006
Prerequisite:

CSD 548 **Dysphagia** (3) Understanding the process of the swallowing mechanism and the management and treatment of swallowing disorders.
Effective: Summer 2006
Prerequisite:

CSD 549 **Speech-Language Pathologists in the Schools** (3) Topics concerning service delivery in the school setting; legislation related to service delivery, special education enrollment, collaboration, caseload management, special populations.
Effective: Summer 2006

CSD 550 **Seminar in Communication Sciences and Disorders** (1-6) Advanced study of special problems and new developments in communication sciences and disorders.
Effective: Spring 2006

CSD 551 **Assessment and Intervention in Augmentative and Alternative Communication** (3) Research results in augmentative and alternative communication (AAC); implications for assessment, prescription of AAC systems, and intervention planning in AAC.
Effective: Spring 2006

CSD 595A **Speech/Language Intervention** (1-3) Instruction in and application of therapy procedures, including a weekly class and direct therapeutic intervention with individuals across the lifespan.
Effective: Spring 2006

CSD 595C **Speech/Language Therapy Externship** (7-15) Full-time clinical experience in speech/language intervention and assessment procedures at an off-campus site.
Effective: Spring 2006
Prerequisite:

CSD 595E **Audiology Practicum** (1-5) No description.
Effective: Spring 2012

CSD 595G **Speech/Language Diagnostics Practicum** (1-2) Instruction in and application of assessment procedures, including pre- and post-evaluation meetings and direct assessment with individuals across the lifespan.
Effective: Spring 2006

CSD 595I **Speech Pathology Mini-Placement** (1-6) Part-time clinical experience in speech/language intervention and assessment procedures at an off-campus site.
Effective: Spring 2006

CSD 595J **Audiology Third Site** (1-2) Internship course.
Effective: Spring 2004

CSD 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2004

CSD 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2003
CSD 600 Thesis Research (1-15) No description.
Effective: Spring 2005

CSD 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 2005

CSD 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) No description.
Effective: Spring 2005
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Communications (COMM)

COMM 401 Mass Media in History (3) Relationship of news media to social, economic, and political developments in the Western world. Effective: Fall 1986

COMM 402 International Reporting (3) International Reporting is an advanced level course in the College of Communications designed to give student journalists experience in reporting the news in a foreign country. Effective: Summer 2011
Prerequisite:

COMM 403 Law of Mass Communications (3) Nature and theories of law; the Supreme Court and press freedom; legal problems of the mass media. Effective: Fall 1986

COMM 403H Law of Mass Communications (3) Nature and theories of law; the Supreme Court and press freedom; legal problems of the mass media. Effective: Spring 2006

COMM 405 Political Economy of Communications (3) Structure and functions of American and other mass communications systems and their relationship to political and economic systems. Effective: Spring 2011
Prerequisite:

COMM 405H Political Economy of Communications (3) Structure and functions of American and other mass communications systems and their relationship to political and economic systems. Effective: Spring 2011
Prerequisite:

COMM 406 Electronic News Gathering and Editing (3) Intermediate level skills in creating and editing television news packages. Effective: Spring 2008
Prerequisite:

COMM 407A Media and Government (3) This course examines the relationship between politics, governance, and news media, and provides a foundation for understanding media's role in public policy. Effective: Summer 2012
Prerequisite:

COMM 407B Perspectives on American Journalism (3) The course examines a number of current issues and topics surrounding journalism including: ethics, state of the industry, and news vs. entertainment. Effective: Summer 2012
Prerequisite:

COMM 408 (S T S 408) Cultural Foundations of Communications (3) Examination of oral, scribal, print, industrial, and electronic cultures; analysis of impact of technology on communications and social structure. Effective: Spring 2009
Prerequisite:

COMM 409 News Media Ethics (3) Ethical problems in the practice of journalism; principal public criticisms of news media; case study approach. Effective: Fall 2006

COMM 409H News Media Ethics (3) Ethical problems in the practice of journalism; principal public criticisms of news media; case study approach. Effective: Fall 2006

COMM 410 (IL) International Mass Communications (3) The role of international media in communication among and between nations and people. Complement to COMM 419. Effective: Spring 2009
Prerequisite:

COMM 411 Cultural Aspects of the Mass Media (3) The mass media as creators and critics of mass culture in American life; relationships between the media and mass culture. Effective: Spring 2009
Prerequisite:

COMM 411H Cultural Aspects of the Mass Media (3) The mass media as creators and critics of mass culture in American life; relationships between the media and mass culture. Effective: Spring 2009
Prerequisite:
COMM 412 Sports, Media and Society (3) Sport and media relationship in American culture. Effective: Summer 2006

COMM 413 The Mass Media and the Public (3) Nature of mass communications, relationships between mass media and public, media influences on opinion; social pressures on the media. Effective: Spring 2009

COMM 413W The Mass Media and the Public (3) Social-level and political theories of the relationships between media and public; media influences on public opinion; social pressure on the media; political communications. Effective: Spring 2011

COMM 414 Media Management (3) Theoretical bases and practical approaches for management and administration of communications projects, organizations, and resources. Effective: Spring 2008

COMM 415 Advanced Photography for Communications (3) Advanced applications in documentary photography emphasizing the narrative qualities of imagery, and utilizing digital technologies. Effective: Fall 2010

COMM 417 Ethics and Regulation in Advertising and Public Relations (3) Ethical issues in practice of advertising and public relations; legal and regulatory issues; case studies. Effective: Spring 2007

COMM 418 Media Effects: Theory and Research (3) Investigation of social and psychological effects of media messages and technologies via theories and empirical evidence pertaining to processes of effects. Effective: Spring 2007

COMM 419 (US; IL) World Media Systems (3) Comparative study of modern media systems of mass communications in selected foreign countries. Effective: Spring 2009

COMM 419H (US; IL) World Media Systems (3) Comparative study of modern media systems of mass communications in selected foreign countries. Effective: Spring 2009

COMM 420 Research Methods in Advertising and Public Relations (3) Primary and secondary research methods used in the development of solutions to advertising and public relations problems. Effective: Summer 2002

COMM 421W Advertising Creative Strategies (3) Planning, designing, writing advertisements; introduction to graphics and production techniques and processes; layout and copywriting practice and critiques. Effective: Spring 2004

COMM 422 Advertising Media Planning (3) Analysis, selection, and scheduling of advertising media; examination of algorithms, technologies, and software used in media planning. Effective: Fall 1986

COMM 424 Advertising Campaigns (3) Advertising campaign problems from the viewpoint of the national advertiser and advertising agency; production of a complete advertising campaign. Effective: Spring 2007

COMM 425 Advertising Message Strategy (3) Advanced work in developing message strategies for advertising campaigns; presentation and defense of strategic plans; extensive practice in creating advertisements. Effective: Spring 2001 Ending: Fall 2012

COMM 425 Advanced Advertising Campaigns (3) An academic option for student AAF members who will develop an integrated advertising campaign to be presented in District competition. Effective: Spring 2013 Future: Spring 2013

COMM 426 International and Intercultural Strategic Communication (3) Advertising and public relations in the international and intercultural arenas; multicultural strategic communications strategies. Effective: Summer 2006

COMM 427 Client/Agency Relations (3) Building and maintaining client/agency relationships in advertising, public relations and direct response agency business functions.
Effective: Summer 2006
Prerequisite:

COMM 428A Principles of Strategic Communications (3) Principles of Strategic Communications provides an overview of the various media and communications methods that comprise modern integrated marketing campaigns.
Effective: Summer 2012
Prerequisite: Concurrent: COMM 260W

COMM 428B Strategic Communications Law (3) Analysis of laws and regulations affecting online advertising and strategic communications.
Effective: Summer 2012
Prerequisite:

COMM 428C Strategic Communications in a Global Environment (3) Strategic Communications in a Global Environment will provide students with a framework for applying public relations and advertising tools across media platforms and across cultures.
Effective: Summer 2012
Prerequisite:

COMM 428D Research & Analytics (3) This course covers online research methods for strategic communication, including web analytics, online surveys, online interviews, and content analysis.
Effective: Summer 2012
Prerequisite:

COMM 428E Social Media Strategies (3) This course covers social media theory, tools and best practices to prepare students for current and future use of social media.
Effective: Summer 2012
Prerequisite:

COMM 430 Mass Media and Politics (3) Study of mass media as institutions and the effects of the mass media on politics, public policy, and citizens.
Effective: Spring 2008
Prerequisite:

COMM 433 Film History for Filmmakers II: The Development of the Cinema from 1960 to the Present (3) History of the art, industry, economics, culture, and technology of cinema from 1960 to the present.
Effective: Summer 2010
Prerequisite:

COMM 436 Advanced Audio Production (3) Advanced concepts and techniques of audio production in analog and digital formats with hands-on experience in recording, mixing and editing.
Effective: Spring 2008
Prerequisite:

COMM 437 Advanced Documentary Production (3 per semester/maximum of 6) Advanced exploration of documentary production techniques and aesthetics through the completion of a short video project.
Effective: Spring 2011
Prerequisite:

COMM 438 Advanced Narrative Production (3 per semester/maximum of 6) Advanced exploration of narrative production techniques and aesthetics through the completion of a short film or video project.
Effective: Spring 2011
Prerequisite:

COMM 439 Advanced Alternative Production (3 per semester/maximum of 6) Advanced exploration in experimental and animation forms through the production of a film or video project.
Effective: Spring 2011
Prerequisite:

COMM 440 Advanced Cinematography and Lighting Techniques (3) Advanced exploration in camera, lighting, audio, and color-grading techniques, emphasizing technical skills as well as aesthetics.
Effective: Spring 2011
Prerequisite:

COMM 441 Advanced Graphic Design for Communications (3) Theory and practice designing graphic visual communication in commercial, non-commercial, and fine art formats for print and on-line media.
Effective: Spring 2011
Prerequisite:

COMM 442 Advanced Audio Video Production (3) Advanced techniques in video production applied to narrative, non-narrative and short documentary formats.
Effective: Summer 2011

COMM 443 Producing Workshop (3) This course will immerse students in the language and practice of producing film and video projects.
Effective: Spring 2011
Prerequisite:

COMM 444 Advanced Post-Production Techniques (3) This course offers intensive practical experience in editing, motion graphics and sound mixing techniques, emphasizing both technical skills and aesthetics.
Effective: Summer 2010
Prerequisite:

COMM 445 Directing Workshop (3) An advanced aesthetic and skill production course in directing for the screen.
Effective: Spring 2011
Prerequisite:

COMM 446 Writing for the Screen II (3) An advanced course in screenwriting that further develops elements of storytelling technique.
Effective: Spring 1994
Prerequisite:

COMM 448 Advanced Group Production I (3) A two semester advanced production course emphasizing intensive collaborative film-video production from script through post-production.
Effective: Spring 2011
Prerequisite:

COMM 449 Advanced Group Production II (3) Continuation of advanced production course emphasizing intensive collaborative film-video production from script through post-production.
Effective: Spring 2011
Prerequisite:

COMM 451 Topics in American Film (3 per semester, maximum of 6) Critical and historical studies of American films. Analysis of directing, cinematography, editing, screenwriting, and acting.
Effective: Summer 1989
Prerequisite:

COMM 452 Topics in International Cinema (3 per semester, maximum of 6) Critical and historical studies of topics in non-American film. Analysis of theory, direction, cinematography, editing, and screenwriting.
Effective: Summer 1989
Prerequisite:

COMM 453 (IL) (CMLIT 453) Narrative Theory: Film and Literature (3) Comparative study of the aesthetics and techniques of film and literature; close analyses of masters of each art form.
Effective: Fall 2006
Prerequisite:

COMM 454 Documentary in Film and Television (3 per semester, maximum of 6) Study of representative films from various documentary movements, examining form, technique, trends, and audience objectives.
Effective: Spring 2001
Prerequisite:

COMM 455 Advanced Film Theory and Criticism (3 per semester, maximum of 6) Close examination of classic and contemporary film theory and critical perspectives.
Effective: Summer 1989
Prerequisite:

COMM 456 Media Criticism and Theory (3) Critical and theoretical approaches to the analysis of media and communication.
Effective: Spring 2008
Prerequisite:

COMM 457 Media Audiences and Contexts (3) Survey of the ways media attempt to influence audience reception and how audiences hold sway over media content.
Effective: Spring 2008
Prerequisite:

COMM 458 Media Law and Ethics (3) The study and practice of key issues in media law and ethics, including libel law, conflict of interest, truth in advertising.
Effective: Spring 2008
Prerequisite:

COMM 459 Cultural Effects of Interactive and Online Media (3) Study of the global social impact and rhetorical limitations of converging media, emphasizing cross-cultural media influences.
Effective: Spring 2008
Prerequisite:

COMM 460W Reporting Methods (3) Techniques in reporting news and trends at the local, regional, and county levels. Emphasis on both deadline and interpretive reporting.
Effective: Fall 1990
Prerequisite:

COMM 461 Professional Journalism Seminar (3 per semester/maximum of 6) Problems of research, content, and form in journalistic specializations; topics of specialization announced each semester course is offered.
Effective: Spring 1988 Ending: Fall 2012
Prerequisite:

COMM 461 Magazine Writing (3 per semester/maximum of 6) Students will learn about idea conception, writing, and editing of magazine stories.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:
COMM 462 Feature Writing (3) Reporting and writing the human interest article for newspapers and magazines.  
Effective: Spring 2008  
Prerequisite: 

COMM 463 Newspaper Design (3) This course will cover newspaper design. Students will learn to solve design problems, edit photos, and work with industry software.  
Effective: Spring 2009  
Prerequisite: 

COMM 464W Editorial, Opinion and Commentary Writing (3) Introduces techniques of editorial, opinion and commentary writing.  
Effective: Spring 2008  
Prerequisite: 

COMM 465 Television Reporting (3) Television news reporting and production.  
Effective: Spring 2008  
Prerequisite: 

COMM 466 Public Affairs Broadcasting (3) Producing radio and television magazine programs featuring individually-produced mini-documentaries and public affairs interviews.  
Effective: Summer 1990  
Prerequisite: 

COMM 467 News Editing and Evaluation (3) Concepts and procedures involved in processing news for various news media, but with emphasis on print media editing.  
Effective: Spring 2001  
Prerequisite: 

COMM 468 Graphic Applications in Print Communications (3) Issues, concepts, and practice identified with contemporary design strategies for print journalism, advertising, and public relations.  
Effective: Summer 1988  
Prerequisite: 

COMM 469 Photography for the Mass Media (3) Development of an informed and critical approach to photocommunication; individual and team projects, seminars, and critiques.  
Effective: Fall 1986  
Prerequisite: 

COMM 470A Convergent Media News Service: Newspaper Production (3) Practicum emphasizing newsgathering and reporting for newspaper and for additional media formats.  
Effective: Summer 2002  
Prerequisite: 

COMM 470B Convergent Media News Service: TV (3) Practicum emphasizing television news package production for periodic campus news program and for additional media formats.  
Effective: Summer 2002  
Prerequisite: 

COMM 470C Convergent Media News Service: Radio and Online Publications (3) Practicum emphasizing streaming radio news package production or production of news pieces for online publications and for additional media formats.  
Effective: Fall 2008  
Prerequisite: 

COMM 471 Public Relations Media and Methods (3) Analyzing media and audiences for public relations purposes; planning, designing, and writing public relations communications; press relations and publicity methods.  
Effective: Spring 2004  
Prerequisite: 

COMM 472 Public Relations Event Planning (3) Effective planning, organization, implementation and evaluation of events planning.  
Effective: Spring 2008  
Prerequisite: 

COMM 473 Public Relations Campaigns (3) Case studies and problems in publicity and public relations in industry, government, and institutions.  
Effective: Spring 2012  
Prerequisite: 

COMM 474 Depth Reporting (3) Exploration of strategies for developing indepth newspaper or magazine articles, with an emphasis on gathering information and long-form writing.  
Effective: Spring 2004  
Prerequisite: 

COMM 475 Issues for Newsroom Managers (3) Newspaper and television management, the state of the industry and topics that prospective employees should know about.  
Effective: Spring 2004  
Prerequisite: 

COMM 476 Sports Writing (3) Techniques in sports reporting and writing for newspapers and magazines.  
Effective: Summer 2005
Prerequisite:

COMM 477 **Sports Broadcasting** (3) Techniques of sports broadcasting for radio and television.
Effective: Summer 2005
Prerequisite:

COMM 478 **Sports Information** (3) Techniques of effective media relations used in a sports information office.
Effective: Summer 2005
Prerequisite:

COMM 479 **Telecommunication Economics** (3) Economic, regulatory/business issues in the design/operation of large-scale telecommunication networks such as telephone, cable, wireless, and computer networks.
Effective: Fall 2011
Prerequisite:

COMM 480 **Television News** (6) Produce a weekly television newscast.
Effective: Fall 2011
Prerequisite:

COMM 481 **Advanced Multimedia Production** (3) Advanced work in multimedia production using web authoring, video editing, audio editing, image editing and animation software.
Effective: Fall 2010
Prerequisite:

COMM 482 **Advanced Communication Workshop** (4) Conceptualization, planning, and execution of a visual product on a selected topic utilizing an intensive group project-oriented laboratory approach.
Effective: Spring 2008
Prerequisite:

COMM 483 **Wireless Communications Industry** (3) A broad examination of the wireless phone industry including its development, current structure and future.
Effective: Spring 2011
Prerequisite:

COMM 484 **Emerging Telecommunications Technologies** (3) Overview of technology of electronic media and related societal issues.
Effective: Spring 1992
Prerequisite:

COMM 484H **Emerging Telecommunications Technologies** (3) Overview of technology of electronic media and related societal issues.
Effective: Spring 2005
Prerequisite:

COMM 485 **Analysis of Broadcast-Cable Policy** (3) Analysis of current policy issues in Broadcast/Cable. Standards and methods for evaluating telecomm policy processes and outcomes.
Effective: Fall 2001
Prerequisite:

COMM 486 **Telecommunications Ethics** (3) Drawing on normative theory and political philosophy, this course explores problems in ethics and social responsibility in telecommunications.
Effective: Summer 2011
Prerequisite:

COMM 487 **Advanced Telecommunications Management and Leadership** (3) Strategic management, leadership and ethics issues including marketing, financing, entrepreneurship, and innovation.
Effective: Fall 2011
Prerequisite:

COMM 488 **Writers’ Seminar** (3) Workshop designed for advanced students interested in professional writing, involving extensive mutual and self-criticism.
Effective: Spring 2008
Prerequisite:

COMM 489W **Media and Information Industries** (3) The structure, conduct and performance of firms and industries in the electronic media and information sectors.
Effective: Spring 2004
Prerequisite:

COMM 490 **Issues in Electronic Commerce: Policy and Implementation** (3) Analysis of policy, strategic issues, and implications raised by the rapid growth of electronic commerce over the Internet.
Effective: Fall 2001
Prerequisite:

COMM 490A **Convergent Media Seminar** (3) This seminar examines media convergence issues, trends, and effects on society through discussions, presentations, and creation of a capstone project.
Effective: Summer 2002
Prerequisite:

COMM 491 **International Telecommunications and Trade Policy** (3) Development in the law, policy, and business of international telecommunications; emphasis on multilateral forums--International Telecommunications Union and World
Trade Organization.
Effective: Fall 2001
Prerequisite:

COMM 492 Internet Law and Policy (3) Development in the law, policy, and business of Internet-mediated communications and commerce; emphasis on impact on existing legal, regulatory, and economic models.
Effective: Fall 2001
Prerequisite:

COMM 493 Entrepreneurship in the Information Age: Senior Seminar (3) Provides students with knowledge/tools to take their innovation/technology idea through the business planning, capital, and operations budgeting processes.
Effective: Fall 2001
Prerequisite:

COMM 494 Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1994

COMM 494H Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

COMM 495 Internship (1-3 per semester/maximum of 6) Supervised practicum with newspapers, broadcasting stations, public relations, and advertising agencies.
Effective: Spring 2008
Prerequisite:

COMM 495A Internship (1-6 per semester/maximum of 6) Supervised practicum with newspapers, broadcasting stations, public relations, and advertising agencies.
Effective: Spring 2008
Prerequisite:

COMM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1986

COMM 496H Honors Independent Studies (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

COMM 496H Honors Independent Studies (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

COMM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1986

COMM 497A Social Media for Public Relations (3) This course will explore social media technologies and how to effectively use social media to communicate strategic public relations messages.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

COMM 497C Globalization and the Media (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

COMM 497D Media and Government (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

COMM 497E Campaigns, Elections and the Media (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

COMM 497F Perspectives on American Journalism (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

COMM 497G Joe Paterno: Communications & the Media (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
COMM 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2001

COMM 498A In the Game (3) Produce half-hour sports magazine style show to air on College HD channel and Web. Students will produce, report, anchor and direct the show. Registration by application.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

COMM 498B Diversity Communications (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

COMM 498E We Are: The Millennials (3) Broadcast Journalism, Telecom, and Film/Video students will gain valuable HD production skills when they produce a magazine style series with an emphasis on short form documentary storytelling. The series, now in its 5th season, will air on WPSU-TV, ComMediaHD 98.1, statewide on Comcast VOD, and web platforms. Email Topher Yorks to apply: topher@psu.edu.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

COMM 499 (IL) Foreign Study--Mass Communications (1-12) Study of mass communication systems and practices in selected foreign countries.
Effective: Summer 2005
Prerequisite:

COMM 501 Proseminar in Mass Communications (3 per semester/maximum of 99) Overview of paradigms in mass communications research
Effective: Spring 2003
Prerequisite:

COMM 502 Pedagogy in Communications (3) The purpose of this seminar is to train doctoral students to teach in the communications discipline at the college/university level.
Effective: Spring 2004

COMM 504 Seminar in the History of Mass Communication (3) No description.
Effective: Fall 1986

COMM 505 International Communication Problems (3) Legal and communications problems of the international flow of news and opinion; international press codes.
Effective: Fall 1986

COMM 506 Introduction to Mass Communications Research (3) The scientific method; survey of basic concepts of theoretical and empirical research; variety of methodology; criteria for adequate research.
Effective: Fall 1986

COMM 507 News Media and Public Opinion (3) Problems in the function, techniques, and responsibilities of press, radio, and television in forming and interpreting opinion.
Effective: Fall 1986

COMM 508 The Literature of Journalism (3) No description.
Effective: Fall 1986

COMM 510 Comparative Theories of Press Systems (3) Institutional structure and normative functions of press systems in modern societies, as shaped by prevailing world view and social organization.
Effective: Fall 1986

COMM 511 Mass Communications Research Methods II (3) Problems of bibliographical research; evaluation of sources and materials in mass communications history, biography, structure, ethics, and other areas.
Effective: Fall 1986
Prerequisite:

COMM 512 Government and Mass Communications (3) Problems of freedom of information; governmental efforts to control mass communication agencies; government news coverage; public information agencies.
Effective: Fall 1986

COMM 513 Constitutional Problems of the News Media (3) Problems involving conflict between guarantees of press freedom in the First and Fourteenth Amendments and rights and privileges of others.
Effective: Fall 1986

The Pennsylvania State University
COMM 514 Political Economy of Communications (3) Structure and functions of United States and global media systems and their relationship to political and economic systems.
Effective: Fall 2003

COMM 515 MA Proseminar in Mass Communications (3) An introduction to graduate studies for MA students in Media Studies and Telecommunications Studies.
Effective: Fall 2003
Prerequisite:

COMM 516 Introduction to Data Analysis in Communications (3) To understand and be able to use data analysis techniques common to research in communications.
Effective: Spring 2004
Prerequisite:

COMM 517 Psychological Aspects of Communication Technology (3) Investigation of psychological aspects of human-computer interaction (HCI) and computer-mediated communication (CMC).
Effective: Spring 2007
Prerequisite:

COMM 518 Media Effects (3) Advanced study of the effects of media messages and technologies via theories and empirical evidence pertaining to processes of effects.
Effective: Spring 2005
Prerequisite:

COMM 520 Seminar in Advertising Problems (3) No description.
Effective: Fall 1986

COMM 521 Advertising Perspectives (3) An overview of advertising in industrial societies including institutional issues; socio-demographic issues; public policy issues; and ethical issues.
Effective: Spring 1992

COMM 522 Social and Cultural Aspects of Advertising (3) Analysis of advertising from a cultural/literary perspective; emphasis on semiotic and hermeneutic analysis; advertising as social communication.
Effective: Spring 1992

COMM 550 Film Theory and Criticism (3) Studies in traditional and contemporary film theory and criticism.
Effective: Spring 2005

COMM 553 Special Problems in Film and TV (1-3) No description.
Effective: Fall 1986

COMM 580 Seminar in Telecommunications (3) Study of the historical and contemporary issues and problems in telecommunications.
Effective: Fall 1986

COMM 582 Ethics and Emerging Communications Technology (3) Identification and analysis of ethical issues raised by electronic communications technologies.
Effective: Spring 2004

COMM 583 Seminar on United States Telecommunications Policy (3) Examination of the United States telecommunications policy process and current issues.
Effective: Spring 2004

COMM 584 International Telecommunications and Trade Policy (3) An interdisciplinary perspective that investigates contemporary debates and ongoing or anticipated conflicts in international telecommunications and trade policy.
Effective: Fall 2000

COMM 585 Media & Telecommunications Industries (3) Study the structure and performance of media, telecommunications and information industries applying principles and ideas from microeconomics, finance and communications.
Effective: Spring 2005

COMM 587 Internet Law and Policy (3) Examination of legal, policy and business developments in Internet-mediated communications emphasizing the impact on existing regulatory and economic models.
Effective: Summer 2003

COMM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or
outside speakers.
Effective: Spring 1987

COMM 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2000

COMM 594A Telecommunications Studies Masters Paper (3) A significant research paper completed under the direction of a faculty adviser.
Effective: Spring 2002
Prerequisite:

COMM 594B Research Project Apprenticeship (1-3 per semester, maximum of 3) Provides opportunities for doctoral students to enhance their knowledge of comparative research methods by working on established faculty research projects.
Effective: Spring 2002
Prerequisite:

COMM 595 Internship (1-18) Supervised off-campus, non-group instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2000

COMM 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1986

COMM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1997

COMM 597A Social Media Research Seminar (3) As social media are rapidly changing human interaction, this graduate seminar aims to explore selected theories and concepts that may be applied to social media research, including those pertaining to effects on users’ media use, psychological well-being and civic participation. The goal is to familiarize you with prior and latest social media research and identify areas that deem further empirical research.
Effective: Summer 2012 Ending: Summer 2012

COMM 597A Media and Cultural Technologies (3) Drawing on cultural and critical theories of media and technology, we will consider what constitutes a cultural technology and how media constructs, reinforces and challenges the work of cultural technologies. Course readings and assignments will focus on the cultural work of communication technologies and media, some digital, some analogue.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

COMM 597B Advanced Data Analysis (3) An examination of advanced data analytic techniques in communications, with an emphasis on applied understanding and hands-on application of data-analysis software.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

COMM 597C Audience Bias and Rationality in Strategic Communication (3) The class questions the assumption of rationality in audience response to strategic communication campaigns embedded in some prominent theoretical models which guide communication research. We will compare those perspectives with alternative views which postulate that in the majority of cases people respond to persuasion in non-rational, biased and yet predictable ways.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

COMM 597D (ADTED 597B) Special Topics: The Public Pedagogy of Consumerism and Consumption in American Culture (3) This discussion-based course will focus on the connections among consumption, learning, politics, popular culture and everyday life.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

COMM 600 Thesis Research (1-15) No description.
Effective: Fall 1986

COMM 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1990

COMM 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Teaching or assisting in School of Communication courses by graduate students with previous news-editorial, advertising, and broadcasting experience.
Effective: Fall 1986

COMM 610 Thesis Research Off Campus (1-15) No description.

The Pennsylvania State University
COMM 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1990

Last Import from UCM: June 2, 2012 12:27 PM
Communications-CI (COMMS)

COMMS 438 **Magazine Editing** (3) Study and practice of the editing and design of magazines and newsletters.  
Effective: Spring 2008

COMMS 500 **Communications and Cultural Theory** (3) This course is designed to provide students a broad background in communications and cultural theory.  
Effective: Summer 2011

COMMS 503 **Research Methods in Communications** (3) This course prepares students to conduct research in communications using both qualitative and quantitative research methods.  
Effective: Summer 2011

COMMS 519 **Communication Technology and Culture in History** (3) An advanced study of various interpretive approaches and methodological tools that are central to the analysis of cultural artifacts.  
Effective: Summer 2011

COMMS 525 **Advanced Writer's Seminar** (3-9 per semester/maximum of 9) This course supports the development of advanced writing projects in a range of different genres.  
Effective: Summer 2011

COMMS 555 **Media Discourse Analysis** (3) This course provides students with advanced theoretical approaches and methodological tools to analyze a variety of media discourses.  
Effective: Summer 2011

COMMS 560 **Seminar on Global Culture and Communication** (3) This course explores the globalization of communication and communication technologies within a broad political, economic and cultural context.  
Effective: Summer 2011

COMMS 568 **Media Production Workshop** (3-9 per semester/maximum of 9) This course prepares students for the creation of advanced media projects in traditional and digital media.  
Effective: Summer 2011

COMMS 580 **Communications Master's Project** (3-6 per semester/maximum of 6) An original master's paper or creative production with critical paper.  
Effective: Summer 2011  
Prerequisite:  
COMMS 600 **Thesis Research** (1-15 per semester/maximum of 99) No description.  
Effective: Fall 2010

COMMS 610 **Thesis Research** (1-15 per semester/maximum of 99) No description.  
Effective: Fall 2010

Last Import from UCM: June 2, 2012 12:27 PM
Community Psychology (CMPSY)

CMPSY 500 Theories and Issues in Community Psychology (3) Contemporary issues in community psychology will be discussed within the framework of its development from clinical and social psychology. Effective: Spring 1997

CMPSY 510 Change Processes (3) Social change as it takes place within institutions and communities. Effective: Spring 1997

CMPSY 511 Social Impacts on Psychological Functioning (3) Psychological functioning, as it is affected by social contexts. Effective: Fall 1996
Prerequisite:

CMPSY 519 Research Methods I (3) In-depth examination of research methods utilized by community psychologists and social change activists; course followed by CMPSY 520. Effective: Fall 1999
Prerequisite:

CMPSY 520 Research Methods II (3) In-depth examination of research methods utilized by community psychologists and social change activists. (Continuation of CMPSY 519). Effective: Summer 2000
Prerequisite:

CMPSY 521 Roles and Methods in Community Psychology (3) Advanced course entailing the development of Master's Projects with both fieldwork and research; each student writes a formal proposal. Effective: Spring 1997
Prerequisite:

CMPSY 522 Practicum (3-6) Fieldwork implementing planned change. Effective: Fall 1996
Prerequisite:

CMPSY 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 1996

CMPSY 594 Research (3-6) Supervised research on a master's paper. Effective: Spring 1997
Prerequisite:

CMPSY 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1996

CMPSY 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 1997

Last Import from UCM: June 2, 2012 12:27 PM
Community S P & D (CSP D)

CSP D 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

CSP D 596 (H P A 596) Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1987

Effective: Fall 1983

CSP D 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

CSP D 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised and graded teaching experience in undergraduate Community Development, Health Planning and Administration, and Law Enforcement and Corrections courses.
Effective: Fall 1983
Prerequisite:

Effective: Fall 1983

CSP D 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Community and Economic Development (CEDEV)

Prerequisite:

CEDEV 430 Principles of Local Economic Development (3) Concepts, strategies, and techniques of local economic analysis, planning, and development; case studies and decision-making exercises. Effective: Fall 2012 Future: Fall 2012
Prerequisite:

CEDEV 452 Community Structure, Processes and Capacity (3) Social organization, processes and change in communities; use of sociological principles in analysis of community problems and development. Effective: Spring 2012
Prerequisite:

CEDEV 500 Community & Economic Development and Leadership (3) Understanding principles and strategies of community and economic development in relation to general systems theory, community decision making, and leadership strategies and roles in group and community settings. Effective: Spring 2004 Ending: Summer 2012
Prerequisite:

CEDEV 500 Community and Economic Development: Theory and Practice (3) Understanding theories, concepts, and frameworks of community and economic development and community decision-making models in application to community development practice and issues. Effective: Fall 2012 Future: Fall 2012

CEDEV 505 (R SOC 505, AEE 505) Leadership Development (3) Exploration, understanding, and application of leadership roles, strategies, and principles in group and community settings. Effective: Spring 2010

CEDEV 509 Population, Land Use, and Municipal Finance (3) Understanding the interaction of population characteristics, land use, municipal funds, and taxation in a locality and how they impact the operation and management of government jurisdictions. Effective: Fall 2000
Prerequisite:

CEDEV 516 (R SOC 516) Change in Rural Society (3) Social change in rural society, emphasizing prediction and control of the change process; even years. Effective: Fall 2000
Prerequisite:

CEDEV 517 (R SOC 517) International Rural Social Change (3) Implications of planned change for international rural societies, considering basic structural constraints, known institutional linkages, and potential synergetic consequences. Effective: Fall 2000
Prerequisite:

CEDEV 533 (AEREC 533) Rural Development Research Methods and Topics (3) Advanced theories and methods for rural economic development research. Effective: Spring 2011
Prerequisite:

CEDEV 560 Regional Development: Principles, Policy, and Practice (3) Regional growth and development, focusing on challenges to theory, policy, and practice, emphasizing change in metropolitan, micropolitan, and rural areas. Effective: Summer 2012
Prerequisite:

CEDEV 567 Resilient Communities and Environments (3) Understanding connections between communities and surrounding ecosystems; exploration of management techniques for building adaptive, resilient, and sustainable communities and environments. Effective: Summer 2012
Prerequisite:

CEDEV 575 Methods and Techniques for Community and Economic Development (3) Understanding and applying methods and hands-on experience with techniques used in community and economic development. Lab. Effective: Fall 2000
Prerequisite:

Prerequisite:

The Pennsylvania State University
CEDEV 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Fall 2000

CEDEV 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2000

CEDEV 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2000

CEDEV 599 (IL) **Foreign Studies** (1-12, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005

CEDEV 600 **Thesis Research** (1-15) No description.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CEDEV 602 **Supervised Experience in College Teaching** (1-3) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Fall 2000

Last Import from UCM: June 2, 2012 12:27 PM
Comparative Literature (CMLIT)

CMLIT 400Y (US;IL) **Senior Seminar in Literary Criticism and Theory** (3) Discussions of theories of literature, of literary criticism, and particularly of the distinct methods of comparative study; individual projects.
Effective: Spring 2006
Prerequisite:

CMLIT 401Y (IL) **The Western Literary Heritage I** (3) Major literary movements and authors in the literature of the Western world from the beginnings through the early Renaissance.
Effective: Spring 2006
Prerequisite:

CMLIT 402Y (US;IL) **The Western Literary Heritage II** (3) Major literary movements and authors in the literature of the Western world from the late Renaissance to the present time.
Effective: Spring 2006
Prerequisite:

CMLIT 403 (US) (LTNST 403) **Latino/a Literature and Culture** (3) Literary and other forms of cultural expression (film, music, art, and theater) are compared across different Latina/o communities.
Effective: Spring 2011
Prerequisite:

CMLIT 404 (IL) (ASIA 404) **Topics in Asian Literature** (3) Selected works from the major poetry, fiction, and drama of such countries as India, China, Japan.
Effective: Spring 2011
Prerequisite:

CMLIT 405 (US;IL) **Inter-American Literature** (3) This course examines the development of literature in Canada, the United States, Spanish America, the Caribbean area, and Brazil.
Effective: Spring 2006
Prerequisite:

CMLIT 406 (IL) **Women and World Literature** (3) Literature written by women, especially women from non-Western cultures; the spectrum of genres in which women writers have excelled.
Effective: Spring 2006
Prerequisite:

CMLIT 408 (IL) **Heroic Literature** (3) Traditional heroes, their traits and adventures; typical themes and examples chosen from the epics and sagas of world literature.
Effective: Spring 2006
Prerequisite:

CMLIT 410 (IL) **Literary Translation: Theory and Practice** (3) Emphasizing literary translation, a study of the theoretical and practical problems encountered in the processes of translation, transmission, and interpretation.
Effective: Spring 2011
Prerequisite:

CMLIT 415 (GH;US;IL) **World Graphic Novels** (3) Critical analyses of form, genre, medium, and discourse of the graphic novel and its historical precedents in an international and comparative context.
Effective: Summer 2010
Prerequisite:

CMLIT 422 (IL) **African Drama** (3) Traditional and popular drama forms; modern anglophone and francophone drama; nationalism and social criticism in contemporary African drama.
Effective: Spring 2006

CMLIT 423 (IL) **African Novel** (3) From traditional oral narratives to modern autobiographical, historical, satirical, sociological, and allegorical forms; novelist as social critic.
Effective: Spring 2006

CMLIT 429 (ENGL 429) **New Media and Literature** (3) New media literary genres; critical discussion of creative works in digital media.
Effective: Summer 2010

CMLIT 430 (IL) **Global Modernisms** (3) A comparative investigation of global Modernisms, with an emphasis on the relations between modernism, modernity, and modernization.
Effective: Summer 2010
Prerequisite:

CMLIT 435 (IL) **Cultures of Globalization** (3) Cultural and literary effects of the process of globalization, with an emphasis on world literatures and transnationalism.
Effective: Summer 2010
Prerequisite:
CMLIT 438 (IL) Fantastic Worlds: International and Comparative Perspectives (3) A comparative, international study of fantastic worlds in literature and visual culture.
Effective: Summer 2010
Prerequisite:

CMLIT 443 (US;IL) Transatlantic Literature (3 per semester/maximum of 6) Comparative literary and cultural relations across the Atlantic Ocean; may include Europe, Africa, the Americas, and/or the Caribbean.
Effective: Spring 2011
Prerequisite:

CMLIT 446 (IL) Postcolonial Literature and Culture (3) Postcolonial literature and theory in a comparative and international context.
Effective: Summer 2010
Prerequisite:

CMLIT 448 (IL) Literary Cultures of Buddhism (3) Comparative exploration of various Buddhist literary cultures, from the classical Indian subcontinent to modern movements like the Beats and dalit writing.
Effective: Summer 2010
Prerequisite:

CMLIT 449 (IL) Literary Cultures of Islam (3) Comparative discussion of the literary cultures of Islam from the seventh century to the present.
Effective: Summer 2010
Prerequisite:

CMLIT 453 (IL) (COMM 453) Narrative Theory: Film and Literature (3) Comparative study of the aesthetics and techniques of film and literature; close analyses of masters of each art form.
Effective: Fall 2006
Prerequisite:

CMLIT 455 (IL) Ethics, Justice, and Rights in World Literature (3) Concepts of ethics, justice, and rights, appearing in world literature and/or film.
Effective: Summer 2010
Prerequisite:

CMLIT 459 Topics in Theory (3) Selected topics in this history of theory and literary criticism within a global, comparative context.
Effective: Summer 2010
Prerequisite:

CMLIT 470 (IL) The Modern Novel (3) Major novels of Joyce, Proust, Kafka, Thomas Mann, Nabokov, and others; their contributions to the art of the novel.
Effective: Spring 2011
Prerequisite:

CMLIT 471 (IL) Poetry and Poetics (3) Theoretical and practical concepts in the comparative, global history of poetry and/or poetics.
Effective: Summer 2010
Prerequisite:

CMLIT 480 (IL) The International Folktale (3) Traditional tales from various parts of the world: their origin, characteristics, forms; their transmission as oral narrative and written literature.
Effective: Spring 2006
Prerequisite:

CMLIT 486 (IL) Tragedy (3) Development of tragic drama and its relationship to social background and philosophical theory.
Effective: Spring 2006

CMLIT 487 (IL) Comedy (3) Development of comic drama and its relationship to social background and philosophical theory.
Effective: Spring 2006

CMLIT 488 (IL) (ENGL 488) Modern Continental Drama (3) From Ibsen to the drama of today: Strindberg, Chekhov, Hauptmann, Pirandello, Ionesco, Beckett, Genet, and others.
Effective: Spring 2006
Prerequisite:

CMLIT 489 (IL) Contemporary World Fiction (3) A survey of developments in contemporary world fiction in translation.
Effective: Spring 2012
Prerequisite:

CMLIT 490 Video Game Studies (3) A comparative look at the nature and history of video games as cultural artifacts, from Pond to online role-playing.
Effective: Summer 2010
Prerequisite:

CMLIT 491 (IL) Literary Adaptation: International and Comparative Perspectives (3) A comparative, international study of adaptations between literature and other media (film, theater, photography, music).
Effective: Summer 2010
Prerequisite:

CMLIT 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1995

CMLIT 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

CMLIT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1995

CMLIT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1995

CMLIT 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1995

CMLIT 499 (IL) Foreign Study--Comparative Literature (3-6) Advanced courses offered on comparative literary topics as part of a foreign-study program.
Effective: Summer 2005
Prerequisite:

CMLIT 501 Comparative Method in Literary Studies (1-6 per semester/maximum of 6) Bibliography, research methods, and studies in comparative literature.
Effective: Spring 2012

CMLIT 502 Comparative Criticism I: Classical to Neoclassical (1-3 per semester/maximum of 3) Issues in literary criticism from Plato and Aristotle to the mid-eighteenth century.
Effective: Spring 2012

CMLIT 503 Comparative Criticism II: Romantic to Contemporary (1-3 per semester/maximum of 3) Principles and theories of literary criticism from eighteenth- and nineteenth-century beginnings to twentieth-century expansion and application.
Effective: Spring 2012

CMLIT 504 Studies in Literary Genres (3-6) The concept of genre and the evolution of genre theory; application to a specific genre, e.g., the lyric or the novel.
Effective: Summer 1995

CMLIT 505 Studies in Literary Periods and Movements (3-6) Comparative approaches to cohesive units within literary history, e.g., the Renaissance, the Enlightenment, Romanticism, Surrealism.
Effective: Summer 1995

CMLIT 506 Studies in Literary Themes and Motifs (3-6) Comparative approaches to recurrent literary themes and motifs; application to a specific example, e.g., literary Utopias or the Faust theme.
Effective: Summer 1995

CMLIT 507 Comparative Poetics (3 per semester/maximum of 6) Theoretical and practical concepts in the comparative, global history of poetry and/or poetics.
Effective: Summer 2010

CMLIT 508 Global Visual Culture (3-6 per semester/maximum of 6) Comparative study of transnational forms of visual cultural production; e.g. new media, cinema, television, public culture.
Effective: Fall 2011

CMLIT 509 Comparative Modernisms (3-6 per semester/maximum of 6) Aesthetic and historical development of Modernism in diverse cultures.
Effective: Fall 2011

CMLIT 510 Theory and Practice of Translation (3) Theories of translation and interpretation; importance of translation in literary transmission; application of theoretical concepts to individual translation projects.
Effective: Summer 1995

Prerequisite:

CMLIT 521 Comparative Seminar in Inter-American Literatures (1-12) Comparative topics presenting literary works of the Americas--North America, South America, and the Caribbean--from early to present times.
Effective: Summer 2000

CMLIT 522 Comparative Seminar in Asian Literatures (1-12) Comparative topics presenting literary works of Asia, from the origins of literature in Asia to the present time.
Effective: Summer 2000

CMLIT 523 Comparative Seminar in African Literatures (1-12) Comparative topics presenting literary works of Africa, from the origins of literature in Africa to the present time.
Effective: Summer 2000

CMLIT 543 Literary Relations (3 per semester/maximum of 6) Mutual influences among specific literatures and cultures; for example, German-American, French-American, Inter-American, or East-West literary relations.
Effective: Summer 1995

CMLIT 570 Forces in Contemporary Literature (3-6) Intellectual currents and experimental forms in contemporary world literature.
Effective: Summer 1995

CMLIT 580 Contemporary Literary Theory (3) Major issues in contemporary literary theory and their significance for criticism, with emphasis on continental European theorists and their influence.
Effective: Summer 1995

CMLIT 589 (FR 589, GER 589, SPAN 589) Technology in Foreign Language Education: An Overview (3) Approaches to the uses and research applications of multimedia and other educational technologies applied to the teaching of foreign languages. (also crosslisted with APLNG 589)
Effective: Spring 2004

CMLIT 590 Colloquium (1-3) Continuing seminars which consist of a series of lectures by faculty, students or outside speakers.
Effective: Summer 1995

CMLIT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1995

CMLIT 596A (PORT 596A) Jorge Amado (1) This short course examines four important novels of the Brazilian author Jorge Amado (1912-2001) at the centennial of this birth.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CMLIT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1995

CMLIT 599 (IL) Foreign Study--Comparative Literature (1-12) Graduate-level courses offered on comparative literary topics as part of a foreign-study experience approved by the program head.
Effective: Summer 2005
Prerequisite:

CMLIT 600 Thesis Research (1-15) No description.
Effective: Summer 1995

CMLIT 601 Ph.D. Dissertation Full Time (0) No description.
Effective: Summer 1995

CMLIT 602 Supervised Experience in College Teaching (1-3 per semester, maximum of 6) Supervision of teaching; consideration of instructional aims and objectives, methods of lecturing and leading discussions, evaluation of student work.
Effective: Summer 1995

CMLIT 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2000

The Pennsylvania State University
Effective: Summer 1995

CMLIT 611 PH.D. Dissertation Part-Time (0) No description.  
Effective: Summer 1995

Last Import from UCM: June 2, 2012 12:27 PM
Comparative Med-Hy (C MED)

C MED 501 Biology and Care of Laboratory Animals (3) Presentation of the anatomic and physiologic characteristics of the commonly used laboratory animal species and their relation to biomedical research.
Effective: Fall 1984

C MED 503 Laboratory Animal Genetics (3) Genetic principles applied to laboratory animals used for investigations of diseases that may be controlled or influenced by genetic factors.
Effective: Fall 1984

C MED 507 Techniques of Laboratory Animal Experimentation (3) Techniques of drug administration, infusion, and collection of body fluids and materials; gnotobiology; use of radioisotopes and bioinstrumentation.
Effective: Fall 1984

C MED 515 Experimental Surgery of Laboratory Animals (3) Surgical techniques, including nephrectomy and Goldblatt clamp, bladder and gastric pouches, bile duct cannulation, intraventricular operation, cardiac and cerebrovascular catheterization.
Effective: Winter 1978

C MED 530 Diseases of Laboratory Animals I (3) Physiological and pathological expressions of both infectious and metabolic- degenerative diseases of rodents, with emphasis on diagnostic and control methods.
Effective: Winter 1978

C MED 531 Diseases of Laboratory Animals II (3) Physiological and pathological expressions of both infectious and metabolig- degenerative diseases of nonhuman primates and other species of animals.
Effective: Winter 1978

C MED 535 Comparative Pathology (3) Comparative pathologic characteristics of infectious and metabolic diseases of animals and man.
Effective: Fall 1983

C MED 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

C MED 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

C MED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

Effective: Fall 1983

C MED 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Comparative and International Education (CI ED)

CI ED 401 (IL) (EDTHP 401) *Introduction to Comparative Education* (3) Origins, nature, scope, basic literature, and methodology of comparative education. Study of sample topics.
Effective: Fall 2007
Prerequisite:

CI ED 440 (EDTHP 440) *Introduction to Philosophy of Education* (3) Introduction to the examination of educational theory and practice from philosophical perspectives, classical and contemporary.
Effective: Fall 2007 Ending: Fall 2012
Prerequisite:

CI ED 440 (EDTHP 440) *Introduction to Philosophy of Education* (3) Introduction to the examination of educational theory and practice from philosophical perspectives, classical and contemporary.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

CI ED 444 (WL ED 444) *Language, Culture and the Classroom: Issues for Practitioners* (3) Critical understanding of cultural linguistic diversity to facilitate the inclusion of English Language Learners in a globalized classroom.
Effective: Fall 2007
Prerequisite:

CI ED 457 (AGECO 457) *Principles of Integrated Pest Management* (3) Integrated study of pest complexes and their management, emphasizing ecological principles drawing on examples from a range of agricultural, forestry and urban systems. This course is designed for sixth, seventh, and eighth semester and graduate students.
Effective: Spring 2010
Prerequisite:

CI ED 497 *Special Topics* (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998

CI ED 497A (ADTED 497A) *The Environment, Culture, and Comparative Ways of Knowing and Learning* (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2012 Ending: Summer 2012

CI ED 497A *Immigration, Ethnicity, and the School* (3) This class is an introduction to theories and empirical research on various immigrant and race/ethnic groups and their schooling experience.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CI ED 497B *Humphrey Seminar* (3) Humphrey seminar is intended to ensure that Humphrey fellows have an adequate understanding of U.S. environment and institutions in which they would be working.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CI ED 500 *Comparative Education Proseminar I* (3) Methods of comparative education and case studies of governance and administration; first of two part sequence.
Effective: Spring 1995

CI ED 503 (EDTHP 507, HI ED 503) *Ethnicity, National Identity, and Education* (3) Surveys group-oriented education policies internationally, especially comparing those of Britain, Taiwan, India.
Effective: Summer 1995

CI ED 504 *Perspectives in African Education* (3) Educational systems in selected African countries are examined with respect to colonial history, social, political, and cultural factors.
Effective: Spring 2012

CI ED 508 (ADTED 508) *Globalization and Lifelong Learning* (3) Examination of globalization discourses and their relationships, implications and impacts on lifelong learning processes and contexts.
Effective: Summer 2004

CI ED 509 (ADTED 509) *Language, Literacy, Identity, and Culture in a Global Context* (3) Examines the relationship between issues of language, identity, and culture for adult learners in an increasingly global context.
Effective: Spring 2004
Prerequisite:

CI ED 516 (EDTHP 516) *Education and Demographic Change in the United States and Abroad* (3) Interrelationship between schooling and employment, marriage, fertility, and migration. Focus comparatively on the United States and developing countries.
CI ED 541 (EDTHP 541) **Contemporary Philosophies of Education** (3) Educational theory and practice in relation to contemporary movements in philosophy.
Effective: Spring 2008

CI ED 542 (LL ED 542) **Issues in Literacy Education** (3) Discussion of philosophical, sociological, historical, and curricular issues in literacy education.
Effective: Spring 1997

CI ED 553 (EDTHP 553, HI ED 553, SOC 553) **Educational Mobility in Comparative Perspective** (3) Role of education in social mobility, using quantitative, qualitative, and historical methods; focuses comparatively on Britain, East Asia, and South America.
Effective: Spring 2003

CI ED 555 (EDPSY 555) **Validity of Assessment Results** (3) Concepts, issues, and methods of validation of educational and psychological assessment including models and approaches to validation, bias, and utility.
Effective: Spring 2008
Prerequisite:

CI ED 564 (ADTED 564) **Social and Cultural Contexts of Learning and Work** (3) Examines the relationship between learning and work with special attention given to how certain forms of learning are legitimized.
Effective: Summer 2004
Prerequisite:

CI ED 570 (ADTED 570) **Comparative and International Adult Education** (3) Critical and comparative analysis of adult education theory and practice outside North America, including international agency involvement.
Effective: Spring 1995
Prerequisite:

CI ED 571 (HI ED 571) **Comparative Higher Education** (3) Comparative methods of studying structural variations in systems of higher education in principal industrialized nations and other selected countries.
Effective: Spring 1995

CI ED 572 (ADTED 572) **Policy Studies in Lifelong Learning** (3) Examine lifelong learning policies and the relationship between lifelong learning issues and problems, policy development, policy actors and institutional structures.
Effective: Summer 2004
Prerequisite:

CI ED 587 (E C E 587) **Curriculum, Culture, and Child Development** (3) Examines human development and cultural factors in planning, designing, and implementing curriculum and instruction in early childhood and childhood education.
Effective: Spring 2012
Prerequisite:

CI ED 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1995

CI ED 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1995

CI ED 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1995

CI ED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1995

CI ED 597A **Cross-Cultural Research Methods in Education** (3) This course will expose students to comparative and cross-cultural research methods and how this methodology can assist in conducting research with diverse ethnic/cultural groups.
Effective: Summer 2012 Ending: Summer 2012

CI ED 597A (E C E 597A) **Educational Ethnography** (3) This seminar will show students how to use ethnographic methods for education research.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CI ED 597C (EDTHP 597C) **Education of Immigrants' Children** (3) This course is designed to give students a broad
familiarity with sociological perspectives and research on immigration and schooling for children.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CI ED 597G (EDTHP 597G) **Research in Comparative Education** (3) This course introduces large-scale international assessment databases and demonstrates how to use these data to conduct comparative education research.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CI ED 845 (AYFCE 845) **Intergenerational Programs and Practices** (3) Background, intervention strategies, and issues related to developing intergenerational programs and practices aimed at addressing vital social and community issues.
Effective: Fall 2011

Last Import from UCM: June 2, 2012 12:27 PM
Complemt Alter Medic (CAM)

CAM 742 Herbal and Natural Products as Therapeutics (5) This course will assess safety, efficacy, and applicability of natural products as therapeutic options for management of common medical conditions. Effective: Fall 2008
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Computer Science (CMPSC)

CMPSC 402 UNIX and C (3) UNIX OS including file system, utilities, and shell scripting; C programming, including I/O, pointers, arrays, dynamic memory, macros, and libraries.
Effective: Fall 2010
Prerequisite:

CMPSC 421 Net-centric Computing (3) This course introduces JavaScript and AJAX for creating Rich Internet Applications, and XML for client-server communication and Web Services.
Effective: Spring 2011
Prerequisite:

CMPSC 425 Advanced Object-Oriented Programming (3) Advanced object-oriented programming paradigm, exception handling, application programming interface, secure programming, network programming, threads and synchronization.
Effective: Spring 2010
Prerequisite:

CMPSC 426 Object-oriented Design (3) Object-oriented analysis and design; design patterns such as creational, structural, and behavioral patterns; UML; and unified process.
Effective: Fall 2010
Prerequisite:

CMPSC 428 Programming in Ada (3) Structured program design using Ada; strong typing, data abstraction, packages, subprograms, separate compilation, visibility, exceptions, generic units.
Effective: Fall 2010
Prerequisite:

CMPSC 430 Database Design (3) Relational database model, query languages, integrity, reliability, normal forms for design.
Effective: Fall 2010
Prerequisite:

CMPSC 431 Database Management Systems (3) Database system concepts: file organizations and retrieval algorithms; the three data models (relational, hierarchical, and network) and their database implementations.
Effective: Spring 2008
Prerequisite:

CMPSC 431W Database Management Systems (3) Database system concepts: file organizations and retrieval algorithms; the three data models (relational, hierarchical, and network) and their database implementations.
Effective: Spring 2008
Prerequisite:

CMPSC 436 Communications and Networking (3) Data transmission, basic signaling, data encoding, error control, communication protocols, security, network topologies, routing, switching, internetworking, emerging high speed networks.
Effective: Spring 2008
Prerequisite:

CMPSC 438 Computer Network Architecture and Programming (3) Network architectures, communication protocols, internetworking, network security, client-server computing, web application development, programming with APIs.
Effective: Spring 2010
Prerequisite:

CMPSC 441 Artificial Intelligence (3) Problem solving, search techniques including local search and genetic algorithms, knowledge representation, planning, learning, and neural networks.
Effective: Fall 2010
Prerequisite:

CMPSC 442 Artificial Intelligence (3) Introduction to the theory, research paradigms, implementation techniques, and philosophies of artificial intelligence.
Effective: Spring 2008
Prerequisite: Concurrent: CMPSC 465

CMPSC 443 Introduction to Computer and Network Security (3) Introduction to theory and practice of computer security with an emphasis on Internet and operating system applications.
Effective: Spring 2008
Prerequisite:

CMPSC 450 Concurrent Scientific Programming (3) Problems of synchronization, concurrent execution, and their solution techniques. Design and implementation of concurrent software in a distributed system.
Effective: Spring 2008
Prerequisite:

CMPSC 451 (MATH 451) Numerical Computations (3) Algorithms for interpolation, approximation, integration, nonlinear equations, linear systems, fast FOURIER transform, and differential equations emphasizing computational properties and implementation. Students may take only one course for credit from CSE/MATH 451 and CSE/MATH 455.
Effective: Spring 2008
Prerequisite:

**CMPSC 452** Numerical Analysis (3) Algorithm efficiency and accuracy, function interpolation and polynomial approximation, numerical differentiation and integration, initial-value problems, and approximation of eigenvalues.
Effective: Fall 2010
Prerequisite:

**CMPSC 455 (MATH 455)** Introduction to Numerical Analysis I (3) Floating point computation, numerical rootfinding, interpolation, numerical quadrature, direct methods for linear systems. Students may take only one course for credit from CMPSC (MATH) 451 and CMPSC (MATH) 455.
Effective: Spring 2008
Prerequisite:

**CMPSC 456 (MATH 456)** Introduction to Numerical Analysis II (3) Polynomials and piecewise polynomial approximation; matrix least square problems; numerical solution of eigenvalue problems; numerical solutions of ordinary differential equations.
Effective: Spring 2008
Prerequisite:

Effective: Fall 2010
Prerequisite:

Effective: Spring 2008
Prerequisite:

**CMPSC 459** Scientific Visualization (3) Visualization techniques for data analysis and presentation. Applying visualization and perceptual theory. Using extending platform independent visualization software.
Effective: Spring 2008
Prerequisite:

**CMPSC 460** Principles of Programming Languages (3) Design and implementation of high level programming languages and survey of language paradigms including imperative, functional, and object-oriented programming.
Effective: Fall 2010
Prerequisite:

**CMPSC 461** Programming Language Concepts (3) Fundamental concepts of programming language design, specifications, and implementation; programming language paradigms and features; program verification.
Effective: Spring 2008
Prerequisite:

**CMPSC 461H** Honors Programming Language Concepts (3) Honors course in fundamental concepts of programming language design, specification, and implementation; programming language paradigms and features; program verification.
Effective: Spring 2008
Prerequisite:

**CMPSC 462** Data Structures (3) In-depth theoretical study of data structures such as balanced trees, hash tables, priority queues, B-trees, binomial heaps, and Fibonacci heaps.
Effective: Fall 2010
Prerequisite: Concurrent: MATH 315

**CMPSC 463** Design and Analysis of Algorithms (3) Recurrences, algorithms design techniques, searching, sorting, selection, graph algorithms, NP-completeness, approximation algorithms, local optimization algorithms.
Effective: Fall 2010
Prerequisite: Concurrent: MATH 414 or STAT 301

**CMPSC 464** Introduction to the Theory of Computation (3) Computability/Complexity: finite automata, regular & context-free languages, Turing machines, Church-Turing Thesis, undecidability, reducibility, completeness, time/space complexity, P versus NP.
Effective: Fall 2009
Prerequisite:

**CMPSC 465** Data Structures and Algorithms (3) Fundamental concepts of computer science: data structures, analysis of algorithms, recursion, trees, sets, graphs, sorting.
Effective: Spring 2008 Ending: Summer 2012
Prerequisite:

**CMPSC 465** Data Structures and Algorithms (3) Fundamental concepts of computer science: data structures, analysis of algorithms, recursion, trees, sets, graphs, sorting.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

**CMPSC 467 (MATH 467)** Factorization and Primality Testing (3) Prime sieves, factoring, computer numeration systems, congruences, multiplicative functions, primitive roots, cryptography, quadratic residues. Students who have passed MATH 465 may not schedule this course.
Effective: Spring 2008

The Pennsylvania State University
Prerequisite:

**CMPSC 469** Formal Languages with Applications (3) Regular, context free, recursive, and recursively enumerable languages; associated machine models; applications.
Effective: Fall 2010
Prerequisite:

**CMPSC 470** Compiler Construction (3) Compiler design and implementation; scanning, parsing, semantic analysis, optimization (including static analysis), code generation, garbage collection, and error detection.
Effective: Fall 2010
Prerequisite:

**CMPSC 471** Introduction to Compiler Construction (3) Design and implementation of compilers; lexical analysis, parsing, semantic actions, optimization, and code generation.
Effective: Spring 2008
Prerequisite:

**CMPSC 472** Operating System Concepts (3) Theoretical and practical issues of operating systems design and implementation, process management, concurrent programming, memory management, scheduling, I/O, and security.
Effective: Fall 2010
Prerequisite:

**CMPSC 473** Operating Systems Design & Construction (3) Design and implementation of computer operating systems; management of various system resources: processes, memory, processors, files, input/output devices.
Effective: Spring 2008
Prerequisite:

**CMPSC 474** Operating System & Systems Programming (3) Operating Systems overview and principles; processes and signals; concurrency and synchronization; memory and file management; client-server computing; scripts; systems-programming.
Effective: Spring 2008
Prerequisite:

**CMPSC 479** Language Translation (3) Design and implementation of compilers, lexical analysis, syntax/semantic analysis, optimization, and code generation.
Effective: Spring 2008
Prerequisite:

**CMPSC 483W** Software Design Methods (3) Applications of scientific knowledge and methods in the design and construction of computer software using engineering concepts.
Effective: Spring 2008
Prerequisite:

**CMPSC 484** Computer Science Senior Project I (2) Computer science capstone project with documentation emphasis.
Effective: Spring 2008
Prerequisite:

**CMPSC 485W** Computer Science Senior Project II (3) Computer science capstone project with documentation emphasis.
Effective: Spring 2008
Prerequisite:

**CMPSC 487W** Software Engineering and Design (3) Software development process, life cycle; requirements analysis, specification, design, prototyping, testing, project management, and documentation.
Effective: Fall 2010
Prerequisite:

**CMPSC 494H** Senior Honors Thesis (1-6) Supervised Honors thesis research in computer science and engineering.
Effective: Spring 2008
Prerequisite:

**CMPSC 495** Internship (1-18) Supervised off-campus, nongroup instruction including field experience, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008
Prerequisite:

**CMPSC 496** Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2008

**CMPSC 496A** Implementation and Security of a Microsoft Server (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2012 Ending: Summer 2012

**CMPSC 496A (MATH 496A)** Introduction to Numerical Analysis II (1-6) Polynomial and piecewise polynomial approximation, matrix least squares problems, numerical solution of eigenvalue problems, numerical solution of ordinary differential equations.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:
CMPSC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2008

CMPSC 497A Applications Programming (3) Development of software for devices including smart phones, tablets, handheld units, and other general purpose computing platforms.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

CMPSC 497A Algorithms Lab (1.5) Programming with common algorithm design techniques; divide and conquer, greedy method, dynamic programming, and tree and graphy traversals.
Prerequisite:

CMPSC 497B Contest Problems (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CMPSC 497B Application Development for Mobile Devices (3) Application development for tablet PC's, smart phones and other mobile devices; IDE's emulators and other tools; mobile device user interfaces.
Prerequisite:

CMPSC 497C Data Structures Lab (1.5) Programming with common data structures; recursion; stacks, queues, dictionaries, priority queues; string searching and manipulation; sorting trees; combinatorics.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Concurrent: CMPSC 462

CMPSC 497D Secure Programming (3) Secure software design principles/practice, common threats, applied cryptography, trust management, input validation, OS-/programming language- specific issues, software validation.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

CMPSC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2008

CMPSC 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

CMPSC 598 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest; several different topics may be taught in one year or semester.
Effective: Summer 1993

CMPSC 600 Thesis Research (1-15) No description.
Effective: Fall 1995

CMPSC 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1995

CMPSC 602 Supervised Experience in College Teaching (1-3 per semester, maximum of 6) Teaching of computer science undergraduate sections with senior faculty instruction supervision.
Effective: Fall 1989
Prerequisite:

Effective: Fall 1983

CMPSC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Computer Science and Engineering (CSE)

CSE 511 Operating Systems Design (3) Concurrent programming; design of I/O subsystem, memory management, and user interface; kernel design; deadlocks, protection and security; case studies.
Effective: Spring 2008
Prerequisite:

CSE 513 Distributed Systems (3) Protocol hierarchies; routing and flow control algorithms; distributed operating systems; communication and synchronization mechanisms; resource allocation problems.
Effective: Spring 2009
Prerequisite:

CSE 514 Computer Networks (3) Network subsystems, ARPANET, SNA, DECNET, network protocols (physical databank, network, transport, sessions, presentation, application), routing and congestion control, network optimization.
Effective: Spring 2011
Prerequisite:

CSE 515 (E E 565) Reliable Data Communications (3) Discussion of problems and solutions for ensuring reliable and efficient communication over wired and wireless links and data networks.
Effective: Spring 2008
Prerequisite:

CSE 516 Mobile Networking (3) Algorithms, systems and design of mobile telecommunication voice and data networks.
Effective: Fall 2010

CSE 517 Performance Evaluation (3) Tools and techniques for PE, Analytical and Simulation models, evaluation of multiprocessors, multicomputer and LANs, scheduling policies, case studies.
Effective: Fall 1995

CSE 520 Science of Computer Programming (4) Weakest preconditions, nondeterminism, terminating constructs, formal derivation of some often used algorithms, correctness of programs, formal specification of large systems.
Effective: Spring 2008
Prerequisite:

CSE 521 Compiler Construction (3) Design and implementation of compilers.
Effective: Spring 2001

CSE 522 Semantics of Programming Languages (3) Operational, axiomatic, and denotational semantics of programming languages; fixpoint theory of computation, verification of recursive programs; goto statements and continuations.
Effective: Spring 2008
Prerequisite:

CSE 530 Fundamentals of Computer Architecture (3) Advances in computer architecture, Pipelining, parallelism, and multiprocessing.
Effective: Spring 2008
Prerequisite:

CSE 531 Parallel Processors and Processing (3) Parallel processor organization; basic algorithms suitable for such systems; parallel sorting and interconnection networks; applications and discussion of specific processors.
Effective: Fall 1995
Prerequisite:

CSE 532 Multiprocessor Architecture (3) Fundamental structures of multiprocessors; interprocess communications, system deadlocks and protection, scheduling strategies, and parallel algorithms; example multiprocessor systems.
Effective: Fall 1995
Prerequisite:

CSE 536 Fault Tolerant Systems (3) Attributes of fault-tolerant systems and their definitions; realability and availability techniques; maintainability and testing techniques; practice of reliable system design.
Effective: Fall 1995
Prerequisite:

CSE 537 Interconnection Networks in Highly Parallel Computers (3) Study and comparative analysis of various classes of interconnection networks; routing problem; fault tolerance issue; performance evaluation; VLSI implementation.
Effective: Summer 1997
Prerequisite:

CSE 539 Topics in Computer Architecture (3) Study of current advanced issues in design, implementation and applications of complex computer systems.
Effective: Fall 1995
Prerequisite:

CSE 541 Database Systems I (3) Data models and relational database design; database integrity and concurrency control; distributed database design and concurrency control; query optimization.
CSE 542 Database Systems II (3) Important in-depth issues relating to data engineering such as distributed databases, information management for engineering design, data models.

CSE 543 Computer Security (3) Specification and design of secure systems; security models, architectural issues, verification and validation, and applications in secure database management systems.

CSE 544 System Security (3) Review current research in computer and operating system security.

CSE 545 Network Security (3) Advanced methods and technologies for network security.

CSE 546 Cryptography (3) Introduction to the theory and techniques of modern cryptography, with emphasis on rigorous analysis and mathematical foundations.

CSE 550 (MATH 550) Numerical Linear Algebra (3) Solution of linear systems, sparse matrix techniques, linear least squares, singular value decomposition, numerical computation of eigenvalues and eigenvectors.

CSE 553 (MATH 553) Introduction to Approximation Theory (3) Interpolation; remainder theory; approximation of functions; error analysis; orthogonal polynomials; approximation of linear functionals; functional analysis applied to numerical analysis.

CSE 554 (E E 564) Error Correcting Codes for Computers and Communication (3) Block, cyclic, and convolutional codes. Circuits and algorithms for decoding. Application to reliable communication and fault-tolerant computing.

CSE 555 (MATH 555) Numerical Optimization Techniques (3) Unconstrained and constrained optimization methods, linear and quadratic programming, software issues, ellipsoid and Karmarkar’s algorithm, global optimization, parallelism in optimization.

CSE 556 (MATH 556) Finite Element Methods (3) Sobolev spaces, variational formulations of boundary value problems; piecewise polynomial approximation theory, convergence and stability, special methods and applications.

CSE 557 Concurrent Matrix Computation (3) This course discusses matrix computations on architectures that exploit concurrency. It will draw upon recent research in the field.

CSE 560 Theory of Graphs and Networks (3) Theory and applications of graphs, including structure of graphs, network analysis, and algorithms for computer solution of graph-theoretic problems.

CSE 562 Probabilistic Algorithms (3) Design and analysis of probabilistic algorithms, reliability problems, probabilistic complexity classes, lower bounds.

CSE 563 Parallel Algorithms (3) Computational aspects of VLSI: synthesis/analysis of efficient parallel and distributed algorithms; computational structures; models of parallel computers and their interrelationships.
Effective: Fall 1995
Prerequisite:

CSE 564 **Complexity of Combinatorial Problems** (3) NP-completeness theory; approximation and heuristic techniques; discrete scheduling; additional complexity classes.
Effective: Fall 1995
Prerequisite:

CSE 565 **Algorithm Design and Analysis** (4) An introduction to algorithmic design and analysis.
Effective: Spring 2008 Ending: Summer 2012
Prerequisite: Concurrent: CSE 468

CSE 565 **Algorithm Design and Analysis** (4) An introduction to algorithmic design and analysis.
Effective: Fall 2012 Future: Fall 2012
Prerequisite: Concurrent: CMPSC 464

CSE 572 **Microprocessors and Systems Design** (3) Contemporary design issues in microprocessors, including advanced features and system integration issues.
Effective: Spring 2008
Prerequisite:

CSE 575 **Architecture of Arithmetic Processors** (3) Algorithms and techniques for designing arithmetic processors; conventional algorithms and processor design; high-speed algorithms and resulting architectural structures.
Effective: Spring 1998
Prerequisite:

CSE 577 **VLSI Systems Design** (3) Engineering design of large-scale integrated circuits, systems, and applications; study of advanced design techniques, architectures, and CAD methodologies.
Effective: Fall 1995 Ending: Fall 2012
Prerequisite:

CSE 577 **VLSI Systems Design** (3) Engineering design of large-scale integrated circuits, systems, and applications; study of advanced design techniques, architectures, and CAD methodologies.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

CSE 578 **VLSI Computer-Aided Design Tools** (3) VLSI circuit design tools: placement, routing, extraction, design rule checking, graphic editors, simulation, verification, minimization, silicon compilation, test pattern generation.
Effective: Fall 1995
Prerequisite:

CSE 583 (E E 552) **Pattern Recognition--Principles and Applications** (3) Decision-theoretic classification, discriminant functions, pattern processing and feature selection, syntactic pattern recognition, shape analysis and recognition.
Effective: Spring 2008

CSE 585 (E E 555) **Digital Image Processing II** (3) Advanced treatment of image processing techniques; image restoration, image segmentation, texture, and mathematical morphology.
Effective: Spring 2008
Prerequisite:

CSE 586 (E E 554) **Topics in Computer Vision** (3) Discussion of recent advances and current research trends in computer vision theory, algorithms, and their applications.
Effective: Spring 2008
Prerequisite:

CSE 588 (MATH 588) **Complexity in Computer Algebra** (3) Complexity of integer multiplication, polynomial multiplication, fast Fourier transform, division, and calculating the greatest common divisor of polynomials.
Effective: Spring 2008
Prerequisite:

CSE 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1997

CSE 591 **Research Experience in Computer Science and Engineering** (1) Research experience for new doctoral students in computer science and engineering. Research is performed in conjunction with another 500-level CSE course.
Effective: Spring 1998
Concurrent: enrollment in another 500-level CSE course

CSE 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1997

CSE 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1996
CSE 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 1996

CSE 597A Algebra Graph Theory (3) Algebraic Graph Theory studies the relationship between graph properties and algebraic objects like the spectrum or the chromatic polynomial of a graph.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CSE 597B Theory Seminar (1.5) Talks on recent advanced in theoretical computer science: algorithms combinatorics, cryptography, quantum computing, complexity theory, computation, learning theory.
Effective: Fall 2012 Ending: Fall 2012 Future: Spring 2013

CSE 597C Machine Learning Seminar (1.5) Talks about current research in machine learning, statistics, information retrieval, and related areas.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CSE 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1996

CSE 598A Machine Learning (3) Machine learning is a subfield of AI that studies how a computer system can learn from data.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CSE 598C Vision-Based Tracking (3) Introduction to Bayesian filtering, tracking and data association, with an emphasis on algorithms for single and multiple object tracking.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CSE 598D Computational Regularity on Interdisciplinary, Large Data Sets (3) This is a course on computational methods from real world digital data, across scale, modality and application domains, for pattern discovery, comparison and learning. The content is based on a unique combination of group theory, statistical learning theory, and human/animal perception, with an emphasis on discovering visually appealing patterns automatically and hands-on trainings on large data sets.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CSE 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2008

CSE 600 Thesis Research (1-15) No description.
Effective: Spring 1995

CSE 601 Ph.d. Dissertation Full-Time (0) No description.
Effective: Spring 1995

CSE 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Spring 1995

Effective: Spring 1995

CSE 611 Ph.d. Dissertation Part-Time (0) No description.
Effective: Spring 1995
Computer Science-Cl (COMP)

COMP 505 Theory of Computation (3) Topics in discrete mathematics, discrete probability, first order logic and models of computation.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

COMP 511 Design and Analysis of Algorithms (3) Amortized analysis, graph algorithms, NP-complete problems, approximation algorithms, parallel algorithms.
Effective: Spring 2008 Ending: Fall 2012
Prerequisite:

COMP 512 Advanced Operating Systems (3) A study of the principles and practice of distributed system design, including communication, synchronization, processes, file systems, and memory management.
Effective: Spring 2008
Prerequisite:

COMP 513 Formal Methods for Software Engineering (3) Object-oriented software development, formal specification techniques and related CASE tools, software re-use, verification and validation, transformational development.
Effective: Spring 2008
Prerequisite:

COMP 516 Advanced Programming Languages (3) Programming paradigms and styles, object-oriented programming, formal semantics, programming language design.
Effective: Spring 2008
Prerequisite:

COMP 517 Computer Security (3) Introduction to the area of computer security and current issues associated with computer security.
Effective: Spring 2007
Prerequisite:

COMP 519 Advanced Topics in Database Management Systems (3) Concurrency control, crash recovery, query processing, semantic data models, advanced file access, distributed database systems, performance, case studies, advanced applications.
Effective: Spring 2008
Prerequisite:

COMP 520 Advanced Artificial Intelligence (3) Problem solving, knowledge representation, language understanding, perception, learning, artificial neural networks.
Effective: Spring 1998 Ending: Fall 2012
Prerequisite:

COMP 520 Artificial Intelligence (3) Problem solving, knowledge representation, language understanding, perception, learning, artificial neural networks.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

COMP 524 Evolutionary Computation (3) Topics in evolutionary algorithms and genetic algorithms.
Effective: Spring 1998
Prerequisite:

COMP 545 Computer Architecture (3) Cache, pipelining, memory design, interconnection networks, multiprocessor systems.
Effective: Spring 2008
Prerequisite:

COMP 580 Master’s Project (3 per semester/maximum of 6) Research into a specific computer science problem, development of a scholarly written paper, and oral defense of the work.
Effective: Spring 1998
Prerequisite:

COMP 594 Master’s Studies (3) Presentation of various research techniques, in-depth study of a specific computer science problem, development of a written paper or project, and an oral defense.
Effective: Fall 2003
Prerequisite:

COMP 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1997
COMP 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1997

COMP 597A Secure Programming (3) Secure software design principles/practice, common threats, applied cryptography, trust management, input validation, OS-/programming language-specific issues, software validation.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

COMP 597A Application Development for Mobile Devices (3) Application development for tablet PCs, smart phones and other mobile devices; IDE's emulators and other tools; mobile device user interfaces.

COMP 600 Thesis Research (1-6) Research into a specific computer science problem, development of a scholarly written paper, and an oral defense.
Effective: Fall 2003
Prerequisite:
 Constit Law/Civil Rgt (CL&CR)

CL&CR 956 Civil Liberties Litigation (3) This course examines the protection of individual rights afforded by the Constitution by analyzing litigation involving violations of individual rights by the government and its officers. The principal substantive areas addressed are prisoners' rights, police misconduct, and political surveillance. In the process of examining the substantive civil rights issues, the course will analyze advanced concepts of civil procedure, constitutional law, federal jurisdiction, and trial practice.
Effective: Summer 2011

CL&CR 957 The Constitutional Law of Religion (3) This course examines current constitutional doctrine concerning religion under the First Amendment to the Constitution. The focus will be on the essential cases and principles of the Free Exercise and Establishment Clauses of the First Amendment. These cases and principles are organized along three thematic lines: (1) the regulation of religions activity (free exercise and neutrality, governmental interests, legislative accommodation), (2) the funding of religions activity (establishment and neutrality, governmental support of religious institutions), and (3) the treatment of religion in government's culture shaping activities (public schools, school curriculum, religious speech). The course ends with a discussion of the definition of "religion" for purposes of federal constitutional law.
Effective: Summer 2011

CL&CR 963 Constitutional Law II (3) This course studies the development of equal protection law under the 5th and 14th Amendments, the state action issue, and the free exercise and establishment clauses of the 1st amendment.
Effective: Fall 2009

CL&CR 965 First Amendment-Free Speech (2) This course examines the values and functions of free speech, the regulation of political speech, expression in public places, symbolic expression, commercial speech, obscenity, and the special problems of reputation and privacy.
Effective: Fall 1998 Ending: Summer 2012

CL&CR 965 First Amendment-Free Speech (3) This course examines the history, values and function of free expression, advocacy of illegal action, expression that provokes a hostile audience reaction, defamation, commercial advertising, obscenity, hate speech and pornography, expression in public places, symbolic speech, campaign finance laws, and speech in restricted environments.
Effective: Fall 2012 Future: Fall 2012

CL&CR 976 Advanced Torts (3) This course focuses on torts not involving physical injury, such as misrepresentation, defamation, invasion of privacy, interference with business relations, and misuse of legal procedure. These subjects are not ordinarily covered in the four-hour Torts course required in the first year, but have become burgeoning areas of potential liability due to the emergence of electronic communications. An effort will be made to integrate substantive doctrine and practice implications with legal, economic, political and social theory.
Effective: Summer 2011

CL&CR 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2008

Last Import from UCM: June 2, 2012 12:27 PM
Core Courses (CORE)

CORE 900 Civil Procedure (4) Civil Procedure concerns the rules and principles that govern the litigation of a civil case. The course addresses systemic issues related to how and where a lawsuit is filed including: personal and subject matter jurisdiction; venue; the notice required once a lawsuit has been filed; and which substantive law--state or federal--should apply in federal court. The course also familiarizes the student with the stages of a lawsuit including: pleading; structuring the lawsuit; discovery; termination of a lawsuit without trial; trial; and actions that may be taken after a jury verdict or bench trial. Although reference is made to state laws, the course concentrates on the Federal Rules of Civil Procedure.
Effective: Summer 1999

CORE 902 Elements of Law (3) Elements of Law orients students to legal research and reasoning through caselaw, statutory interpretation, and legal history, processes, and institutions. The course covers topics across many substantive areas of law, and addresses legal methodology as it arises in the legal profession.
Effective: Summer 2011

CORE 903 Constitutional Law I (3) This course examines the roles of the executive, legislative, and judicial branches in determining limits of national and state powers and protection of the individual and civil rights provided in the United States Constitution.
Effective: Fall 2009

CORE 905 Contracts (4) Contracts is concerned with the formation of contracts. The traditional offer and acceptance are analyzed in light of problems presented by modern bargaining techniques. Voidability of contracts formed by fraud, mistake, illegality, and unconscionable advantage is also stressed. The performance of contracts and the parol evidence rule are discussed.
Effective: Summer 1999

CORE 907 Criminal Procedure (3) The Criminal Procedure course explores the interface between the criminal justice system and the United States Constitution. The course examines constitutional limits on police investigation and interrogation as well as the circumstances under which indigent defendants are guaranteed the assistance of counsel. In addition to introducing students to constitutional analysis, the course previews the ethical dimensions of defending persons accused of crime. The class also views a trial during the criminal term at the Court of Common Pleas.
Effective: Summer 2011

CORE 910 Criminal Law (3) This course deals with what is called substantive criminal law, i.e. crimes. Numerous crimes such as homicide, theft, and conspiracy are examined, and defenses such as self-defense and insanity are scrutinized. A primary focus of the course is the utilization and interpretation of criminal statutes.
Effective: Summer 2006

CORE 912 Legal Analysis, Research and Writing I (2) The Legal Analysis, Research & Writing (LARW) course is designed to teach each student to think, write, and speak like a lawyer. Students must learn to solve clients problems by using effective research techniques, accurate and in-depth legal analysis, and clear and concise written and oral communication. These skills will improve only with practice. Therefore, the LARW course uses a problem-solving approach through which students will represent a fictional client and provide those clients with legal advice. Through this approach, students will learn essential skills of successful lawyers, including researching legal authorities, applying the law to a client’s situation, and communicating that analysis in writing and verbally.
Effective: Summer 2011

CORE 914 Legal Analysis, Research and Writing II (2) LARW II continues to build on the skills learned in LARW I. Students continue to analyze clients’ problems using various sources of legal authority, to use additional research sources, and to further refine their writing style. However, LARW II focuses on persuasive writing, so students will learn to draft documents that are submitted to a court called “briefs” or “memoranda of law.” Students also will learn to present an oral argument to a court. LARW II continues to implement the problem-solving approach to teach persuasive writing, and students continue to receive individualized feedback throughout the course.
Effective: Summer 2011
Prerequisite:

CORE 920 Property (4) This course introduces the basic concepts and principles in the law of property. Topics include: acquisition and allocation of property rights; restrictions on owners’ rights to use, limit access to, and sell or dispose of their property; and the relationships among multiple owners of rights in the same property. The emphasis is on real property, although the course also addresses intellectual property and other types of personal property.
Effective: Summer 1999

CORE 925 Torts (4) Tort law seeks to remedy civil wrongs that result in harm to person or property. The class will focus on basic concepts such as the international torts, negligence, strict liability, and products liability.
Effective: Summer 1999
CORE 934 **Professional Responsibility** (3) Through the use of hypothetical situations, this course attempts to generate student sensitivity to ethical problems faced by lawyers in various kinds of practice. The ABA Model Rules of Professional Conduct and the older Code of Professional Responsibility are the basic tools, but discussion centers as well on case law, ABA opinions and standards, statutes, and the dictates of conscience. Discipline and professional malpractice are also treated.
Effective: Fall 2011
Corp & Comm Law (CCLAW)

CCLAW 952 Secured Transactions (3) This course deals with the creation, enforcement, and priorities of personal property security interests under Article 9 of the Uniform Commercial Code and related statutes. It addresses: (a) encumbrances on consumer, commercial, and industrial goods, (b) inventory and receivables financing for manufacturers, distributors, and dealers, and (c) personal property agricultural financing. Relevant provisions of other articles of the UCC and other state and federal statutes are integrated into the course as required. Effective: Fall 2008

CCLAW 954 Nonprofit Organizations (3) This course provides an overview of laws and policies that affect that nonprofit sector, a vital component of national and international economics. It covers alternative organizational structures, including the creation and operation of a nonprofit corporation under U.S. laws. The course examines the status, rights and fiduciary obligations of directors and members. The course introduces tax laws applicable to nonprofit organizations, including the importance of obtaining and maintaining tax exempt status, public charity or private foundation status, and the taxable status of "unrelated business income." The course looks at the laws governing charitable giving. Effective: Spring 2012

CCLAW 955 Agency, Partnerships, and Limited Liability Entities (3) This course surveys the law of unincorporated business entities. The agency law part of the course will focus on agents' powers and responsibilities, liabilities of principals for acts of agents, and termination of the agency relationship. The partnership law part of the course will cover the fiduciary obligations of partners, partners' management and property rights, and partnership dissolutions. The final part of the course will examine the "new" limited liability entities now provided for by the law of all states; with emphasis on the formation, organization, and dissolution of limited liability companies. Although not a prerequisite, this course is strongly recommended for students planning to enroll in Corporations. Effective: Fall 2011

CCLAW 956 Agricultural Law (3) This course will introduce students to the range of current and emerging issues that confront agricultural producers, agri-business firms, and other segments of that broader sector of the economy referred to as the "food industry." The course will address a variety of issues including the history and objectives of agricultural policy, land use planning for agricultural activities, resource use and allocation, industrialization in the agricultural sector, intergenerational transfers of farm businesses, international trade, and ethical issues that confront practitioners. Effective: Summer 2011

CCLAW 957 Banking Regulation (2) This course will focus on banks as financial intermediaries and compare them to other depository institutions and to both the securities and insurance industries. The dual banking system of state and federal regulation will be covered as to bank formation, powers, antitrust considerations, mergers, and geographic restrictions on business location. The course will explore the types of ownership of banks and the regulation of bankholding companies and their subsidiaries engaged in nontraditional banking activities. The course will include deposit insurance systems and the problems of troubled banks. Effective: Fall 1998 Ending: Summer 2012

CCLAW 957 Banking Regulation (2) This course will focus on banks as financial intermediaries and compare them to both the securities and insurance industries. The dual banking system of state and federal regulation will be explored as to bank formation, supervision and regulation. The course will explore the ownership and control issues affecting banks and the supervision and regulation of bank holding companies and their subsidiaries engaged in nontraditional banking activities. The causes of the financial crisis of 2007-2009, together with the reaction of financial institutions, the states, the U.S. Congress and the regulators to the crisis, will also be examined. The course will include an assessment of the deposit insurance system and the problems associated with troubled and failed banks. The course will emphasize the potential administrative enforcement, civil and criminal exposure of both regulated entities and individuals involved within those industries. Effective: Fall 2012 Future: Fall 2012

CCLAW 958 Business Planning for Small Business Enterprises (3) Selected practical problems involving the planning of business transactions, with emphasis upon the small business enterprise, are examined. Topics include: organization of close corporations, partnerships and LLCs; employee compensation; sexual harassment and discrimination issues; executive hiring negotiations; and raising capital through the sale of securities. This course is strongly suggested for anyone who plans on representing businesses. Effective: Spring 2012

Prerequisite:

CCLAW 959 Business Reorganizations (3) This course is a study of the law governing the reorganization of businesses under chapter 11 and related provisions of the U.S. bankruptcy code. It includes such topics as prepetition planning, the filing of a business reorganization case (either voluntary or involuntary), jurisdiction and venue, the automatic stay and "adequate protection," the bankruptcy estate, "first day" orders, use of cash collateral, postpetition financing, wage payment orders, rights of utilities, reclamation rights, executory contracts, employment and payment of professionals, professional responsibility in the bankruptcy context, creditors' (and other) committees, chapter 11 trustees and examiners, substantive consolidation, chapter 11 plans and disclosure statements, plan confirmation, claims objections, avoidance actions, coordination of international insolvency cases.
CCLAW 960 Consumer Protection (2) This course will deal with federal and state statutes and regulations that primarily protect the consumer. Federal laws covered in detail are the Magnuson-Moss Warranty-Federal Trade Commission Improvement Act, the Consumer Credit Protection Act, and federal tax lien statutes. State laws on false and misleading advertisements and full disclosure will be examined, along with state procedures for attachments in the enforcement of money judgments.
Effective: Summer 2012
Prerequisite:

CCLAW 961 Bankruptcy (3) The rights, duties, and remedies of both debtor and creditor are examined. The course covers the collection process, enforcement of money judgments and insolvency proceedings. Federal bankruptcy law is emphasized.
Effective: Summer 2011

CCLAW 963 Corporations (3) This course primarily addresses organization and operation of commercial organizations in the Anglo-American community. Preliminarily, sole proprietorships and partnerships are considered, after which corporations-for-profit are emphasized with some attention to business trusts and non-profit corporations. In the corporate context, duties of promoters, directors, officers, and other insiders are considered. Availability in the U.S. of the derivative action is treated in terms of both unincorporated and corporate forms of organization. Also treated are the basics of securities regulation at the federal and state levels in the U.S. and the provincial level in Canada.
Effective: Spring 2003

CCLAW 964 Business Planning for Mergers and Acquisitions I (3) This course first focuses on various topics that are important in M&A transactions involving both closely-held corporations, including directors duties, shareholder voting and dissenters' rights, basic issues under the Federal securities laws, fundamentals of Federal income taxation and accounting, use of modern valuation techniques, including DCF and CAPM, in M&A, and basic issues in antitrust and pre-merger notification. The course then turns to an analysis of various forms of negotiated acquisition, including acquisitions of stock and assets of closely-held corporations and acquisitions of publicly-held corporations in negotiated transactions. The course is based on the first half of Thompson, Business Planning for Mergers and Acquisitions: Corporate, Securities, Tax, Antitrust, International, and Related Aspects (2008).
Effective: Summer 2011 Ending: Summer 2012
Prerequisite:

CCLAW 965 Business Planning for Mergers and Acquisitions II (3) This course builds on the topics covered in Business Planning for Mergers and Acquisition I, and is based on the second half of Thompson, Business Planning for Mergers and Acquisitions: Corporate, Securities, Tax, Antitrust, International, and Related Aspects (2008). The course starts with an examination of leveraged buyouts, and then focuses on the drafting of various types of acquisition agreements. The course then looks at proxy contests and then turns to hostile takeovers and going private transactions regulated by the Williams Act provisions of the Securities Exchange Act of 1934. The course then looks at special topics in M&A, including spin-offs, international M&A, bank acquisitions, acquisitions of public utilities, bankruptcy acquisitions, joint ventures and ethics issues in M&A.
Effective: Spring 2012
Prerequisite:

CCLAW 969 Insurance Law (3) A study of special legal principles applicable to insurance contracts is undertaken with an examination of the insurance industry and insurance marketing, the identity of persons and interests protected, the nature and selection of risks, the rights and duties of the contracting parties, and the enforcement of claims.
Effective: Spring 2009

CCLAW 971 International Business Transactions (3) This course concentrates on private business transactions that cross national boundaries. It is a practical "hands on" course that involves the student in actual contract drafting and interpretation, negotiation of business transactions and resolution of international commercial disputes.
Effective: Fall 2011

CCLAW 973 International Trade Law (3) Coverage of the principal laws that govern business transactions across international borders.
Effective: Fall 2005

CCLAW 977 Mergers, Acquisitions, and Divestitures (2) Antitrust, tax, contract, ERISA, environmental, corporate, and securities laws considerations in the context of a merger and acquisition are reviewed. Spin-offs and divestitures will also be examined. Emphasis will be placed on the Business Judgment Rule and securities law compliance in connection with a
negotiated transaction, an unfriendly tender offer, sale of the enterprise, and a spin-off or divestiture. State anti-takeover laws and provisions in corporate documents will also be discussed.

Effective: Fall 1998
Prerequisite:

CCLAW 978 Payment Systems (2) In the modern economy commercial parties use a variety of payment mechanisms. This course provides an overview of different payment systems (including checks, credit and debit cards, wire transfers, and letters of credit), the credit system, and the devices that enhance creditworthiness (including notes, guaranties, and standby letters of credit). Classroom discussion is devoted almost exclusively to developing analyses of written problems contained in the course text. Because this course requires familiarity with the Uniform Commercial Code, students should take another Uniform Commercial Code course prior to or concurrently with this course.

Effective: Summer 2011 Ending: Summer 2012

CCLAW 978 Payment Systems and Financial Transactions (3) Payment Systems and Financial Transactions is a general overview of the law of negotiable instruments (e.g., checks) and other mechanisms for making payments, including credit cards, debit cards, ACH payments, and wire transfers. The course also will cover credit enhancement systems such as guaranties and letters of credit. The course will address both uniform state law (UCC Articles 3, 4, 4A, and 5), and applicable federal statutes and regulations (such as the Expedited Funds Availability Act, the Truth-in-Lending Act, and the Electronic Fund Transfer Act).

Effective: Fall 2012 Future: Fall 2012

CCLAW 982 Products Liability (2) This course incorporates and expands the concepts derived from the basic Torts, Contracts, and Uniform Commercial Code coverage of products liability. Emphasis will be on the substantive and procedural law of contract, negligence, and strict liability developed by courts and administrative tribunals. Proposals for legislative reforms will also be studied.

Effective: Fall 1998

CCLAW 984 Sales (3) Article Two of the Uniform Commercial Code is an integrated body of statutory law that prescribes the rights and obligations of parties involved in transactions in goods. Although we will review general principles of contract law and contrast them with the approach adopted in Article Two, this course emphasizes the special techniques of statutory construction utilized in interpreting a code as opposed to an isolated statute. Classroom discussion is devoted almost exclusively to developing analyses of written problems distributed to the students in advance of the class. The problems require students to fashion arguments based on the statutory language. The problems also require students to develop an understanding of the legal and commercial context based on the assigned readings, and then to interpret the statutory language in light of the context.

Effective: Summer 2011

CCLAW 986 Federal Securities Regulation (3) This course is intended to provide an overview of the federal securities laws. Securities regulation plays a crucial role in many different fields of business law, and every lawyer should have at least a basic knowledge of its general principles. The course focuses on issues such as the offering of securities, civil liabilities connected with the sale and purchase of financial instruments, insider trading, proxy voting and M&As, takeovers, stock exchanges and brokers/dealers regulation. Specific attention is devoted to securities litigation aspects, including class actions.

Effective: Fall 2011

CCLAW 991 Antitrust (3) This course is principally an examination of antitrust law and policy in the U.S. as evolved through prosecutions by the U.S. Department of Justice and the Federal Trade Commission. There is brief coverage of: (a) European Union and Canadian competition laws plus evolving proposals for supranational norms; and (b) leading market regulatory schemes such as those affecting marketing of foods, drugs, textiles, toxic substances, securities, and consumer products. In the antitrust area, commercial conduct alleged to violate price fixing, market allocation, tying, exclusive dealing, asset acquisition, and price discrimination norms are considered at length with some attention to state antitrust law.

Effective: Spring 2001

Prerequisite:

CCLAW 993 Merger Finance and Economics (2) The purposes of the course are to provide the student with (1) a fundamental understanding of the finance and economics of the M&A marketplace, and (2) the basic skills needed to succeed in various professional capacities in the M&A marketplace, such as investment banker, management consultant, strategic planner, and lawyer.

Effective: Spring 2010

CCLAW 994 Telecommunications Law and Regulation (3) This course will examine and debate a series of legal and regulatory issues raised by spectrum management, broadcasting, cable television, common carrier, Internet, resource allocation, and technology planning topics.

Effective: Spring 2012

CCLAW 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 2007

CCLAW 997A Commercial Litigation (2) Using basic antitrust law as a foundation, this course will explore the myriad
procedural, tactical, and strategic issues that arise in the prosecution or defense of modern "big case" commercial litigation. After covering the basic antitrust concepts, the course will follow a major case through its principal phases, from drafting the complaint and answer, to discovery of expert witnesses, to preparing and presenting summary judgment motions, to working with jury consultants, to settlement efforts, to trial preparation and presentation.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CCLAW 997B Insurance and Real Estate Transactions (2) Title insurance is an integral component in almost every real estate transaction in the United States. This course examines the practical role of Title Insurance pertaining to the conveyance and/or financing of real estate. An emphasis on pragmatic solutions to some of the challenges that arise in the normal course of working with real estate will be explored in this highly interactive class.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CCLAW 997C Financial Accounting (2) You'll learn why financial accounting is a system for measuring and communicating the outcomes of business activities to parties outside the firm. The purposes of this course are to: 1) provide you with a basic understanding of the concepts and principles (i.e. the jargon) underlying financial accounting practices 2) make you comfortable with financial data (in particular, opening a 10K or annual report) 3) enable you to have a conversation with your company's accountants 4) make you aware of the care that must be taken when using financial accounting data as a source of information for making decisions 5) provide you with the technical tools and references to analyze how a particular transaction affects a firm's financial statements.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

Last Import from UCM: June 2, 2012 12:27 PM
Counseling Psychology (CNPSY)

CNPSY 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2011

CNPSY 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

CNPSY 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2011

CNPSY 502 (CN ED 502) Advanced Counseling Theory and Method (3) Assessment, intervention, and evaluation procedures for counseling problems frequently encountered in school, college, and rehabilitation settings.
Effective: Summer 2011
Prerequisite:

CNPSY 515 Family Systems Therapy: Theory, Research and Practice (3) Examines theory, research, and interventions grounded in family systems framework (e.g., Bowenian, Structural Strategic, etc.) from a psychological perspective.
Effective: Summer 2011
Prerequisite:

CNPSY 554 (CN ED 554) Cross-Cultural Counseling (3) Examines theory, research, and models of counseling relationships between counselors and clients of different racial and sociocultural backgrounds.
Effective: Summer 2011
Prerequisite:

CNPSY 555 (CN ED 555) Career Counseling (3) The examination of historical, legislative, and current models of career counseling and the development of pertinent individual and group techniques.
Effective: Summer 2011
Prerequisite:

CNPSY 582 (CN ED 582) Advanced Group Psychotherapy (3) Study of group psychotherapy and interventions, with an experiential component. Available only to majors in CN ED and CNPSY.
Effective: Summer 2011

CNPSY 589 (CN ED 589) Seminar on Counseling Supervision (1) Study of research about and theoretical models of clinical supervision of counselors; includes preparation for a practicum in counseling supervision.
Effective: Summer 2011
Prerequisite:

CNPSY 594 Research in Counseling (2-6) The design, implementation, and evaluation of counseling research projects.
Effective: Summer 2011

CNPSY 595A Counseling Psychology Practicum (1-3 per semester, maximum of 12) Practice in the application of counseling psychology principles and methods to cases counseled under supervision; case conferences.
Effective: Summer 2011
Prerequisite:

CNPSY 595D (CN ED 595D) Supervision of Counselors (3-9) Practical experience in supervising and evaluating work of counselors.
Effective: Summer 2011
Prerequisite:

CNPSY 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

CNPSY 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2011

CNPSY 600 THESIS RESEARCH (1-15) NO DESCRIPTION.
Effective: Summer 2011

CNPSY 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 2011
CNPSY 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) No description available. Effective: Summer 2011

CNPSY 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Summer 2011

Last Import from UCM: June 2, 2012 12:27 PM
Counselor Education (CN ED)

CN ED 401 Foundations of Chemical Dependency Counseling (3) An overview of diagnosis and assessment, models for chemical dependency prevention, counseling, and recovery; contexts of chemical dependency treatment.
Effective: Summer 2011
Prerequisite:

CN ED 404 Group Procedures in Guidance and Counseling (3) The nature and functioning of groups in educational and agency settings. Provides prospective counselors with experience in the group process.
Effective: Summer 2011
Prerequisite:

CN ED 415 Counseling Adults (3) Roles of counselors and counseling in the resolution of educational and career problems and opportunities of adults.
Effective: Summer 2011
Prerequisite:

CN ED 416 Interpersonal Relationships and Alcohol and Other Drugs (AOD) Dependency (3) This course examines families with chemically dependent members, dynamics, appropriate interventions, and treatment.
Effective: Summer 2011
Prerequisite:

CN ED 420 Chemical Dependency: Youth at Risk (3) Study of youth who are at-risk of developing chemical dependency including the characteristics and factors related to chemical dependency.
Effective: Summer 2011
Prerequisite:

CN ED 421 Counseling Strategies for Preventing Chemical Dependency (3) Examines helping professional’s role in primary and secondary prevention of substance abuse, and related problems like delinquency, suicide, and pregnancy.
Effective: Summer 2011
Prerequisite:

CN ED 422 Foundations of Addictions Counseling (3) Study of the fundamental principles of counseling individuals with a wide variety of addictions.
Effective: Summer 2011
Prerequisite:

CN ED 423 Student Assistance Programs (3) Exploration of early stages of adolescent "at-risk" behavior and skills for student assessment and intervention within schools and communities.
Effective: Summer 2011
Prerequisite:

CN ED 424 (WF ED 424) Facilitating Career Development (3) This course provides individuals with relevant skills and knowledge to assist others in planning careers and obtaining meaningful work.
Effective: Summer 2012
Prerequisite:

CN ED 430 Couples and Family Counseling (3) The theory and practice of counseling with couples and families emphasizing family development and major intervention approaches.
Effective: Summer 2011
Prerequisite:

CN ED 431 Counseling and Teaching Youth at Risk (3) This course is focused on how to counsel and/or teach youth at risk for a variety of social, emotions, and educational problems.
Effective: Summer 2011
Prerequisite:

CN ED 432 Ethical, Legal, and Professional Issues in Counseling (3) Examination of the current ethical and legal issues related to professional counselors and counseling.
Effective: Summer 2011
Prerequisite:

CN ED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

CN ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

CN ED 497A Understanding Adoption (3) Introduce students to the concepts, research, and policies associated with contemporary adoption practice.
Effective: Summer 2012 Ending: Summer 2012
CN ED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

CN ED 498A Counseling Strategies for Treating Sex Offenders (3) This course will provide an overview of research based assessment and treatment of sex offenders in the community.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CN ED 500 Introduction to Counseling and Development (3) Introduces students to the profession of counseling and to the major models of human growth and development.
Effective: Summer 2011

CN ED 501 Counseling Theory and Method (3) Survey of psychodynamic, humanistic, behavioral and cognitive-behavioral approaches to counseling individuals.
Effective: Summer 2011

Effective: Summer 2011
Prerequisite:

CN ED 503 Guidance Services in Elementary Education (3) Guidance services to elementary school students; guidance opportunities for elementary teachers and principals.
Effective: Summer 2011

CN ED 504 Guidance Services in Secondary Education (3) Nature and scope of guidance in secondary schools--services, models, and strategies; the counselor as an agent of change.
Effective: Summer 2011

CN ED 505 Foundations of Career Development and Counseling Information (3) Accelerating change in economic, psychological, social, educational influences upon counselees. Utilization of information systems in effecting counselee change.
Effective: Summer 2011

CN ED 506 Individual Counseling Procedures (3) Training in listening, responding, challenging skills, and action-oriented techniques for individual counseling.
Effective: Summer 2011
Prerequisite:

CN ED 507 Multicultural Counseling: Foundations (3) Provide foundational information that controverts, complements and extends traditional psychology and counseling theory and practice.
Effective: Summer 2011

CN ED 508 Organization and Administration of Pupil Services (3) Principles, organization, personnel, functions, integration with school programs, evaluation.
Effective: Summer 2011
Prerequisite:

CN ED 509 Introduction to Rehabilitation Counseling (3) Provides information about rehabilitation history, legislation, philosophy, and agencies, as well as an overview of a variety of disabling conditions.
Effective: Summer 2011

CN ED 516 Helping Skills for Student Affairs Professionals (3) Develop beginning content knowledge and skills related to practice of active listening, attending, and referral necessary for student affairs work.
Effective: Summer 2011
Prerequisite: Concurrent: CN ED 501

CN ED 523 Counseling Children (3) Provides school and clinic approaches for school counselors and others mental health professionals to help children with developmental problems.
Effective: Summer 2011

CN ED 524 Counseling Adolescents (3) Provides approaches for school counselors and others working with a variety of adolescent obstacles and developmental needs
Effective: Summer 2011

CN ED 525 Applied Testing in Counseling (3) Using counseling assessments effectively and ethically in applied settings, with an emphasis on test analysis and evaluation of psychometric properties.
Effective: Summer 2011
Prerequisite:
CN ED 526 Research in Counselor Education (3) Evaluating counselor education research from scientist-practitioner perspective; emphasis on how to develop and use research with an applied focus.
Effective: Summer 2011

CN ED 530 Family Counseling: Theory and Practice (3) Conceptualization and application of family counseling frameworks to EC-12 school settings are learned in this course.
Effective: Summer 2011
Prerequisite:

CN ED 542 Dual Diagnosis (3) Examines issues related to diagnosis and treatment of individuals who have both a mental disorder and a substance abuse disorder.
Effective: Summer 2011

CN ED 554 (CNPSY 554) Multicultural Counseling (3) Examines theory, research, and models of counseling relationships between counselors and clients of different racial and sociocultural backgrounds.
Effective: Summer 2011
Prerequisite:

CN ED 555 (CNPSY 555) Career Counseling (3) The examination of historical, legislative, and current models of career counseling and the development of pertinent individual and group techniques.
Effective: Summer 2011
Prerequisite:

CN ED 550 Psychosocial Aspects of Disability (3) Psychological models of reaction to disability and social consequences in adulthood; generalizations to other life crises; implications for counselor interventions.
Effective: Summer 2011
Prerequisite:

CN ED 561 Job Development and Employment of Persons with Disabilities (3) Assessing client readiness for work, job-seeking skills training, job placement strategies, modifications to the worksite, methods for employer development.
Effective: Summer 2011
Prerequisite:

CN ED 562 Current Issues in Rehabilitation Counseling (3) Forum for advanced graduate students in rehabilitation counseling and related fields to discuss, review, analyze current trends in rehabilitation.
Effective: Summer 2011
Prerequisite:

CN ED 580 Foundations: History and Trends in Counselor Education (3) Overview of the foundations and issues relevant to the counseling profession and counselor education. Course available only to majors in CN ED.
Effective: Summer 2011

CN ED 581 Professional Issues in Counselor Education (3) Forum for doctoral students to examine and analyze issues relevant for counselor educators. Available only to majors in CN ED.
Effective: Summer 2011
Prerequisite:

CN ED 582 (CNPSY 582) Advanced Group Psychotherapy (3) Study of group psychotherapy and interventions, with an experiential component. Available only to majors in CN ED and CNPSY.
Effective: Summer 2011

CN ED 589 (CNPSY 589) Seminar on Counseling Supervision (1) Study of research about and theoretical models of clinical supervision of counselors; includes preparation for a practicum in counseling supervision.
Effective: Summer 2011
Prerequisite:

CN ED 595A Counseling Practicum (1-6) Practice in the application of guidance principles and methods to cases counseled under supervision; case conferences; seminar in guidance techniques.
Effective: Summer 2011
Prerequisite:

CN ED 595B Supervised Practicum in Rehabilitation Counseling (1-6) Application of principles and techniques of rehabilitation counseling to cases involving people with disabilities.
Effective: Summer 2011
Prerequisite:

CN ED 595C Professional Experience in Rehabilitation Counseling (1-15) Supervised internship, with responsibility for a regular case load.
Effective: Summer 2011
Prerequisite:

CN ED 595D (CNPSY 595D) Supervision of Counselors (3-9) Practical experience in supervising and evaluating work of counselors.
Effective: Summer 2011
Prerequisite:

CN ED 595E Elementary School Counseling Internship and Seminar (1-3 PER SEMESTER/MAXIMUM OF 6) Off-campus,
supervised internships in elementary school settings with supplementary related topics, discussion, and skills training in on-campus seminars.
Effective: Summer 2011
Prerequisite:

CN ED 595F Secondary School Counseling Internship and Seminar (1-3 PER SEMESTER/MAXIMUM OF 6) Off-campus, supervised internships in secondary school settings with supplementary related topics, discussion, and skills training seminars.
Effective: Summer 2011
Prerequisite:

CN ED 595G Student Personnel Internship and Integrative Seminar (1-6 per semester/maximum of 9) Off-campus, supervised internships in postsecondary/related college student personnel settings with pertinent topics, discussion; skills training seminars on campus.
Effective: Summer 2011
Prerequisite:

CN ED 595I Counselor Education Doctoral Teaching Internship (3) Practical experience in undergraduate and graduate level teaching under supervision. Available only to CN ED doctoral students.
Effective: Summer 2011
Prerequisite:

CN ED 595K Counselor Education Doctoral Counseling Internship (3) Supervised internship, with responsibility for a regular counseling caseload. Available only to CN ED doctoral Students.
Effective: Summer 2011
Prerequisite:

CN ED 595P Counselor Education Doctoral Counseling Practicum (3) Practice in the application of counselor education principles and methods to cases counseled under supervision; case conferences. Available only to CN ED doctoral students.
Effective: Summer 2011

CN ED 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

CN ED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2011

CN ED 597A Mental Health in Community & Schools (3) This course provides an introduction to the profession of clinical mental health counseling. Course topics address professional identity, clinical mental health settings and services, public mental health policy and related client advocacy strategies, as well as current trends and issues impacting clinical mental health counseling practice.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CN ED 597B Counseling Internship and Integrative Seminar (3-6) This course is intended to help you effectively develop and apply skills and knowledge gained from your program of study, your practicum, and your personal development. The focus is on developing your counseling, administrative, and program development skills.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CN ED 597C Diagnosis Counseling (3) Course examines the rudiments of diagnosis for counselors. Focuses on role of identification and assessment of symptoms and behaviors in determining appropriate diagnoses.
Effective: Summer 2012 Ending: Summer 2012

CN ED 600 Thesis Research (1-15) No description.
Effective: Summer 2011

CN ED 601 Thesis Preparation No description.
Effective: Summer 2011

CN ED 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Teaching of counselor education laboratory, clinical practice, and recitation classes under senior faculty supervision.
Effective: Summer 2011

CN ED 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 2011

CN ED 840 Trends and Issues in Addiction Counseling (3) This course provides an overview of current professional and ethical issues facing the addictions field.
Effective: Summer 2011
CN ED 843 (S PSY 843) **Prevention Strategies and Programming** (3) Addresses prevention program development, implementation, and evaluation, along with theoretical and empirical underpinnings, ethical and multicultural issues related to prevention.
Effective: Summer 2011

Last Import from UCM: June 2, 2012 12:27 PM
Cp-Legal Services (FPLSC)

Criminal Justice (CRIMJ)

CRIMJ 406 (SOC 406, CRIM 406) Sociology of Deviance (3) Theory and research concerning behaviors and lifestyles viewed as significant departures from a group’s normative expectations.
Effective: Spring 2008
Prerequisite:

CRIMJ 407 (US) (CRIM 407) Victimology (3) This course will explore the legal, emotional, and social responses to the process of victimization by offenders and third parties.
Effective: Spring 2008

CRIMJ 408 Police Administration (3) Principles of administration as they relate to a police organization; and policy development.
Effective: Spring 2008
Prerequisite:

CRIMJ 410 The Pennsylvania Court System (3) Tracing the steps of criminal cases through the investigative stage, arrest, trial, sentencing and appellate review in Pennsylvania.
Effective: Spring 2004
Prerequisite:

CRIMJ 412 (SOC 412, CRIM 412) Crime, Social Control, and the Legal System (3) Legal and extralegal control; public opinion on crime; criminal justice and correctional processes; legal sanctions; control strategies. Field trip.
Effective: Spring 2008
Prerequisite:

CRIMJ 413 (CRIM 413, SOC 413) Advanced Criminological Theory (3) This course provides an in-depth look at theories of crime and examines influential empirical studies designed to these theories.
Effective: Spring 2008
Prerequisite:

CRIMJ 414 (SOC 414, CRIM 414) Criminal Careers and the Organization of Crime (3) Research on and theory of criminal careers and crime organizations, emphasizing recruitment and disengagement; offender characteristics and lifestyles; policy implications.
Effective: Spring 2008
Prerequisite:

CRIMJ 415 (PUBPL 415) Drug Control Policy in Comparative Perspective (3) Examines the history of drug control policy in the United States; comparisons and contrasts with other countries' experiences.
Effective: Summer 2004
Prerequisite:

CRIMJ 420 Criminal Law and Procedure (3) Common law and statutory crimes; constitutional rights of accused persons, liability of criminal justice professionals.
Effective: Spring 2008
Prerequisite:

CRIMJ 421 (CRIM 421) Violent Crime in the United States (3) The impact of violent crime on victims, their families, and communities; the police process as it relates to violent crime.
Effective: Spring 2008
Prerequisite:

CRIMJ 421W Violent Crime in the United States (3) The impact of violent crime on victims, their families, and communities; the police process as it relates to violent crime.
Effective: Spring 2008
Prerequisite:

CRIMJ 422 (CRIM 422) Victimization (3) Examines the history, how victimization is measured/studied in social sciences, public policy implications of victimization movement in U.S.
Effective: Spring 2008
Prerequisite:

CRIMJ 423 (US) (WMNST 423, CRIM 423) Sexual and Domestic Violence (3) Legal, sociological, and psychological perspectives on sexual and domestic violence.
Effective: Spring 2008
Prerequisite:

CRIMJ 424 (CRIM 424) Drugs and Crime (3) Analysis of international narcotics trafficking in the twentieth century.
Effective: Spring 2008
Prerequisite:

CRIMJ 424W Drugs and Crime (3) Analysis of international narcotics trafficking in the twentieth century.
Effective: Spring 2008
Prerequisite:

CRIMJ 425 (CRIM 425) Organized Crime (3) This course examines organized crime in terms of historical antecedents,
structure, related theories, and policy issues.

Effective: Spring 2008

Prerequisite:

CRIMJ 426 Special Offender Types (3-6) Study of special offender types; relationships with criminal justice system (drug abuse, victimless crime, white collar crime considered different semesters).

Effective: Spring 2008

Prerequisite:

CRIMJ 430 Alternatives to Incarceration (3) Control and treatment of offenders in the community, probation and parole organizations, diversion programs, innovative sentences, supervision techniques.

Effective: Spring 2008

Prerequisite:

CRIMJ 431 Offender and Prisoner Rights (3) The identification of correctional problems and the setting of objectives as reflective of court rulings, legislative change, and administrative law.

Effective: Spring 2008

Prerequisite:

CRIMJ 432 (CRIM 432) Crime and the American Court System (3) This course examines the American court system including structure and the way courts process offenders with special focus on sentencing.

Effective: Spring 2008

Prerequisite:

CRIMJ 435 Border Security (3) This course provides knowledge about government organizations charged with American border security, guiding laws and policies.

Effective: Summer 2011

Prerequisite:

CRIMJ 439 (PL SC 439) The Politics of Terrorism (3) Analysis of political terrorism as a violent alternative for peaceful change and traditional warfare in the nuclear age.

Effective: Spring 2008

Prerequisite:

CRIMJ 440 (US) The Juvenile Justice System (3) Historical and contemporary view of the juvenile justice system. Focus on analyzing components of the system, their interactions, processing, and handling of youths.

Effective: Spring 2008

Prerequisite:

CRIMJ 441W The Juvenile Justice System (3) Historical and contemporary view of the juvenile justice system. Focus on analyzing components of the system, their interactions, processing, and handling of youths.

Effective: Spring 2008

Prerequisite:

CRIMJ 450W Senior Seminar (3 per semester/maximum of 6) Capstone course exploring past, current and future developments in criminal justice.

Effective: Spring 2008

Prerequisite:

CRIMJ 451 (US) Race, Crime, and Justice (3) This course focuses on the significance of race, class, and ethnicity to criminal justice processing and criminal offending.

Effective: Spring 2008

Prerequisite:

CRIMJ 453 (US) Women and the Criminal Justice System (3) This course focuses on the experiences of women as offenders, victims, and professionals in the criminal justice system.

Effective: Spring 2008

Prerequisite:

CRIMJ 460 History and Function of Criminal Justice Components (3) Historical development of criminal justice system components (police, courts, corrections) related to formulation and function of the state.

Effective: Spring 2008

CRIMJ 462 Comparative Criminal Justice Systems (3) A comparison of American and selected foreign justice systems to illustrate the variety of possible responses to crime.

Effective: Spring 2008

Prerequisite:

CRIMJ 465 Ethics in Criminal Justice (3) Ethical behavior in the criminal justice system.

Effective: Spring 2008

Prerequisite:

CRIMJ 467 (SOC 467, CRIM 467) Law and Society (3) Law and society studies the social origins of law and legal systems; occupational careers, and decision-making of legal officials.

Effective: Spring 2008

Prerequisite:

CRIMJ 469 (HIST 469) Drugs and Drug Policy in the United States (3) Examines the history and dimensions of drug use and analyzes the impact of drug policy.

Effective: Spring 2008

The Pennsylvania State University
Prerequisite:

CRIMJ 471 (B LAW 471) Legal Rights, Duties, Liabilities of Criminal Justice Personnel (3) Civil law issues within a justice agency and between criminal justice agencies and members of the public.
Effective: Spring 2008
Prerequisite:

CRIMJ 473 (B LAW 473) Criminal Procedure and Evidence in the Business Community (3) Law of evidence and proof, constitutional constraints on police procedures (arrest, search, etc.) in society and the business community.
Effective: Spring 2008
Prerequisite:

CRIMJ 472 (CRIM 482) Seminar, Criminal Justice Agency Administration (3) Relates organizational and public policy management approaches to police, courts, and correctional institutions.
Effective: Spring 2008
Prerequisite:

CRIMJ 489W Victimology: Predatory Crime (3) This course uses medical, social scientific and legal research to study the complexities of predatory crime.
Effective: Spring 2004
Prerequisite:

CRIMJ 494 Research Topics (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2002

CRIMJ 494H Research Topics (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

CRIMJ 495 Internship in Criminal Justice (3-12) Experience with a criminal justice agency coordinated through readings and discussion.
Effective: Spring 2008
Prerequisite:

CRIMJ 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 1987

CRIMJ 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1987

CRIMJ 497A Death Penalty (3) A historical overview of US death penalty practices; pertinent court cases and contemporary issues will be examined.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CRIMJ 499 (IL) Foreign Studies (6) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2008

CRIMJ 500 Advanced Criminological Theory (3) This course reviews and critiques the major theories of crime causation.
Effective: Summer 2002
Prerequisite:

CRIMJ 501 Quantitative Methods for Criminal Justice (3) Advanced research methodology for criminal justice and criminology.
Effective: Summer 2002
Concurrent: CRIMJ 503

CRIMJ 502 Public Policy and the Criminal Justice System (3) This course studies the concepts and methods of political and legal activity within the criminal justice system and their impact on society.
Effective: Summer 2002
Prerequisite:

CRIMJ 503 Advanced Statistics in Criminal Justice (3) Advanced statistics in criminal justice and criminology.
Effective: Summer 2002
Concurrent: CRIMJ 501

CRIMJ 504 Criminal Justice Organization and Management (3) The course will be a broad overview of the structure and management of criminal justice organizations.
Effective: Summer 2002
Prerequisite:

CRIMJ 563 Concepts and Practices in Police Administration (3) Discusses application of police research and management principles to the contemporary policing context.
CRIMJ 564 Administrative and Legal Aspects of Corrections (3) This course addresses historical and contemporary correctional policy, accountability, and possible remedial alternatives.

CRIMJ 565 Courts in the Criminal Justice System (3) An analysis of the function and role of the courts and the personnel involved in the American criminal justice system.

CRIMJ 567 Juvenile Justice: Issues and Practice (3) The systematic application of the juvenile justice system and issues related to juvenile delinquency and constitutional law.

CRIMJ 568 Qualitative Methods for Criminal Justice (3) This course examines the many facets of qualitative research methodology.

CRIMJ 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

CRIMJ 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.

CRIMJ 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

CRIMJ 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

CRIMJ 600 Thesis Research (1-15) No description.

CRIMJ 610 Thesis Research Off Campus (1-15) No description.
Criminal Law (CRIML)

CRIML 953 Advanced Criminal Procedure (2) This course examines issues that arise in the formal processing of a criminal case. Statutes, case law, and rules will be discussed concerning bail and preventive detention, discretion to prosecute, speedy trial, discovery, double jeopardy, plea bargaining, trial by jury, confrontation, cross examination, and the exercise at trial of the privilege against compelled self-incrimination.
Effective: Fall 1998 Ending: Summer 2012

CRIML 953 Advanced Criminal Procedure (3) This course examines the constitutional, statutory and rule-based issues that arise in the formal processing of a criminal case. Subject include the decision to charge, prosecutorial discretion, grand jury and preliminary hearing, joinder and severance, bail and pretrial release, discovery, plea bargaining and guilty pleas, speedy trial, jury composition and selection, pre-trial publicity, confrontation, cross-examination and the privilege against self-incrimination.
Effective: Fall 2012 Future: Fall 2012

CRIML 970 International Criminal Law (3) A study of the principles, history, procedures and substance of international criminal law.
Effective: Summer 2005

CRIML 972 Criminal Procedure (3) The Criminal Procedure course explores the interface between the criminal justice system and the United States Constitution. The course examines constitutional limits on police investigation and interrogation as well as the circumstances under which indigent defendants are guaranteed the assistance of counsel. In addition to introducing students to constitutional analysis, the course previews the ethical dimensions of defending persons accused of crime. The class also views a trial during the criminal term at the Court of Common Pleas.
Effective: Fall 2006

CRIML 974 Juvenile Law (2) This course examines the legal position of the child in society and the extent to which the child may be legally controlled by parent(s) or state. Subject matters include the right of the child to control reproductive decision- making, child support and paternity issues, child pornography and minors’ access to pornography, child abuse and neglect, foster care, termination of parental rights, adoption, medical treatment of juveniles, and medical experimentation on juveniles. The course also examines the delinquency jurisdiction of juvenile court, the constitutional protections afforded the child accused of criminal activity, adjudications of delinquency, punishment or placement of the child in the dispositional phase of juvenile proceedings, and treatment of the child as an adult offender.
Effective: Spring 2012

CRIML 981 Pennsylvania Criminal Law Practice (2) This course is a step-by-step analysis of the procedure, planning, tactics, and strategy in defending and prosecuting a criminal case in Pennsylvania from pre-arrest through appeal. Special emphasis is placed on all aspects of the procedure and law relating to the suppression of evidence.
Effective: Fall 1998

CRIML 984 Post-Conviction Process (2) This is a study of guilty pleas and sentencing alternatives, post-conviction remedies, parole, probation, commutation, and pardon. The course will also examine the law of corrections and prisoners’ rights.
Effective: Fall 1998

CRIML 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2008

CRIML 998 White-Collar Crime (3) This course will cover the substantive law and procedures of major white-collar crimes, including conspiracy, fraud, the Racketeer Influenced and Corrupt Organizations law (RICO), money laundering, public corruption, and economic crimes. It will also examine their civil counterparts and civil and administrative consequences and analyze the theory and policies of these hybrid criminal statutes. Finally, the class will learn and practice skills associated with white-collar crime cases, for example, investigative techniques, negotiation, and development of effective theories of the case.
Effective: Fall 1998
Criminology (CRIM)

CRIM 406 (CRIMJ 406, SOC 406) Sociology of Deviance (3) Theory and research concerning behaviors and lifestyles viewed as significant departures from a group's normative expectations. Effective: Spring 2008
Prerequisite:

CRIM 407 (CRIMJ 407) Victimology (3) This course will explore the legal, emotional, and social responses to the process of victimization by offenders and third parties. Effective: Spring 2008

Prerequisite:

CRIM 413 (SOC 413, CRIMJ 413) Advanced Criminological Theory (3) This course provides an in-depth look at theories of crime and examines influential empirical studies designed to test these theories. Effective: Spring 2008
Prerequisite:

CRIM 414 (CRIMJ 414, CRIM 414) Criminal Careers and the Organization of Crime (3) Research on and theory of criminal careers and crime organizations, emphasizing recruitment and disengagement; offender characteristics and lifestyles; policy implications. Effective: Spring 2008
Prerequisite:

CRIM 421 (CRIMJ 421) Violent Crime (3) Examines the nature and causes of violence. Several theoretical perspectives are reviewed including biological, psychological, social, and cultural. Effective: Spring 2008
Prerequisite:

CRIM 422 (CRIMJ 422) Victimization (3) Examines the history, how victimization is measured/studied in social sciences, public policy implications of victimization movement in U.S. Effective: Spring 2008
Prerequisite:

Prerequisite:

Prerequisite:

CRIM 425 (CRIMJ 425) Organized Crime (3) This course examines organized crime in terms of historical antecedents, structure, related theories, and policy issues. Effective: Spring 2008
Prerequisite:

CRIM 429 Seminar in Criminal Behavior (3-4 per semester/maximum of 7) This course explores the study of the application of criminological theories to our understanding of various forms of criminal behavior. Effective: Spring 2008
Prerequisite:

CRIM 430 American Correctional System (3) Study of corrections from probation, intermediate punishment, adult and juvenile correctional institutions to parole. Effective: Spring 2008
Prerequisite:

CRIM 432 (CRIMJ 432) Crime and the American Court System (3) This course examines the American court system including structure and the way courts process offenders with special focus on sentencing. Effective: Spring 2008
Prerequisite:

CRIM 433 Sentencing (3) This course studies sentencing from prosecutorial charging decisions through revocation of probation, and the complex goals and responsibilities at sentencing. Effective: Spring 2008
Prerequisite:

CRIM 435 Policing in America (3) This course will focus on current, historical, theoretical, and research issues surrounding law enforcement in the United States. Effective: Spring 2008
Prerequisite:
CRIM 441 (US) (CRIMJ 441) Delinquency and Juvenile Justice (3) Course examines delinquency and the juvenile justice system including delinquency’s nature, causes, and prevention and the processing of juveniles. Effective: Spring 2008
Prerequisite:

CRIM 449 Seminar in Criminal Justice (3-4 per semester/maximum of 7) Examines criminal justice decision-making and operation such as the role of contemporary movements in law enforcement, the courts and corrections. Effective: Spring 2008
Prerequisite:

CRIM 451 (US) (CRIMJ 451) Race, Crime, and Justice (3) This course focuses on the significance of race, class, and ethnicity to criminal justice processing and criminal offending. Effective: Spring 2008
Prerequisite:

CRIM 453 (US) (WMNST 453, CRIMJ 453) Women and the Criminal Justice System (3) This course focuses on the experiences of women as offenders, victims, and professionals in the criminal justice system. Effective: Spring 2008
Prerequisite:

CRIM 467 (SOC 467, CRIMJ 467) Law and Society (3) Law and society studies the social origins of law and legal systems; occupational careers, and decision-making of legal officials. Effective: Spring 2008
Prerequisite:

CRIM 469 Seminar in the Law (3-4 per semester/maximum of 7) The focus of this seminar is the law such as the laws of sentencing, appellate course decisions and their impact. Effective: Spring 2008
Prerequisite:

CRIM 480H Research Topics in Crime, Law, and Justice (1) Students are exposed to a variety of research topics related to crime, law, and justice. Effective: Spring 2008
Prerequisite:

CRIM 481H Information Literacy in Crime, Law, and Justice (1) Students are exposed to a variety of information sources related to crime, law, and justice. Effective: Spring 2008
Prerequisite:

CRIM 482 (CRIMJ 482) Seminar, Criminal Justice Agency Administration (3) Relates organizational and public policy management approaches to police, courts, and correctional institutions. Effective: Spring 2008
Prerequisite:

CRIM 490 Crime Policy (3) This course focuses on criminal justice policy and the factors that influence policy development and implementation. Effective: Spring 2008
Prerequisite:

CRIM 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 2008

CRIM 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Spring 2008

CRIM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 2008

CRIM 497A Communities and Crime (3) This course provides an overview of research and theory on the social ecology of crime and social control. Effective: Summer 2012 Ending: Summer 2012

CRIM 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Spring 2008

CRIM 805 (HLS 805) Violence, Threats, Terror, and Insurgency (3) This course provides an overview of the domestic and global issues related to homeland security. Effective: Summer 2010

Last Import from UCM: June 2, 2012 12:27 PM

The Pennsylvania State University
Curriculum and Instruction (C I)

C I 400 **Introduction to Research Literature** (3) Introduction to research literature and methodology; stress on interpretation, sources, and research reporting.
Effective: Fall 1981
Prerequisite:

C I 405 (EDLDR 405) **Strategies in Classroom Management** (3) Managing and coping with disruptive student behavior in instructional settings so that they support the teaching/learning process.
Effective: Fall 2008
Prerequisite:

C I 412W **Secondary Teaching** (3) Study of the teacher’s responsibilities, steps in planning instruction, and various strategies for implementing and assessing teaching.
Effective: Spring 2007
Prerequisite:

C I 494H **Research Techniques in Curriculum and Instruction** (1-3) Examination, application, assessment, and presentation of research modes and techniques in Curriculum and Instruction. Limited to University scholars in the College of Education.
Effective: Spring 1988
Prerequisite:

C I 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Fall 2001
Prerequisite:

C I 495A **Clinical Application of Instruction--Early Childhood Education** (3) Practicum situation for demonstration of selected instructional strategies and management skills acquired in professional training. To be offered only for Satisfactory/Unsatisfactory grading.
Effective: Spring 1997
Prerequisite: Concurrent: regular professional methods courses in area of certification.

C I 495B **Clinical Application of Instruction--Elementary and Kindergarten Education** (3) Practicum situation for demonstration of selected instructional strategies and management skills acquired in professional training. To be offered only for Satisfactory/Unsatisfactory grading.
Effective: Spring 1997
Prerequisite: Concurrent: MTHED 420 SCIED 458 SS ED 430W

C I 495C **Clinical Application of Instruction--Secondary Education** (3) Practicum situation for demonstration of selected instructional strategies and management skills acquired in professional training. To be offered only for Satisfactory/Unsatisfactory grading.
Effective: Spring 1997
Prerequisite: Concurrent: C I 412 and special methods course(s) in area of certification

C I 495D **Practicum in Student Teaching--Elementary and Kindergarten Education** (12) Full-time classroom instruction in early childhood and elementary education. Students supervised by University personnel and practicing teachers. No concurrent courses other than C I 495F permitted.
Effective: Spring 1997
Prerequisite:

Effective: Spring 1997
Prerequisite:

C I 495F **Professional Development Practicum** (3) Instruction concurrent with student teaching practicum. Students focus on the solution of instructional problems identified at the practicum site.
Effective: Spring 1997
Prerequisite: Concurrent: C I 495D

C I 495G **Practicum in Student Teaching - Secondary Education** (9) Full-time professional development internship in secondary English education. Students supervised by University personnel and practicing teachers.

C I 495K **English as a Second Language Field Experiences** (1) Field experiences provide students with guided exposure to learning situations and school settings related to English language learners.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:

C I 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983
C I 496A Teaching English to English Language Learners (3) Pedagogical strategies with English Language Learners. Effective: Summer 2012 Ending: Summer 2012

C I 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

C I 497B Elementary Education Disciplinary Block (12) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

C I 497B CEAED Discipline Inquiry Block (12) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

C I 497E Teaching Reading and Writing to English Language Learners (3) The course focuses on conceptually and pedagogically effective ways to teach reading and writing for English language learners in the US. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

C I 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

C I 500 Multiple and Mixed Methods in Curriculum Inquiry (3) Multiple and mixed methods of inquiry to investigate problems in the practice of curriculum and instruction. Effective: Summer 2007

C I 501 Teaching as Inquiry (3) Course guides teachers to develop systematic inquires into effective teaching and learning. Effective: Summer 1998

C I 502 Qualitative Research in Curriculum and Instruction I (3) Presentation of theoretical and practical issues related to designing and proposing qualitative research concerning curriculum, teaching and/or learning. Effective: Summer 1998

C I 503 Qualitative Research in Curriculum and Instruction II (3) Considers forms of qualitative data, data analyses, procedures to generate data relationships, interpretation, and presentation of data. Effective: Summer 1998

C I 534 Historical Research in the Curriculum (3) The course addresses the practice of historical research in curriculum, burrowing from the techniques of historians, journalists, and educators. Effective: Spring 1999

C I 550 Overview of Contemporary School Curriculum (3) Current school programs and options and their impact on pupils; problems in introducing new content into the curriculum. Effective: Fall 1981

C I 580 (LL ED 580) Media Literacy, Language, and Literacy in Schools (3) Theories of media literacy, issues of non-print technology in language and literacy. Effective: Spring 1997

C I 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

C I 595 Internship in Curriculum, Supervision, or Instruction (1-6) Internship in schools or other educational settings under supervision of graduate faculty in student's area of specialization. Effective: Spring 1987

C I 596 Individual Studies (1-9) Creative projects including nonthesis research, supervised on an individual basis and approved by the graduate program. Effective: Spring 1987 Future: Spring 1987
which fall outside the scope of formal courses.
Effective: Spring 1987

CI 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered frequently.
Effective: Spring 1987

CI 597A Reforming Public Schools: An Analysis of High Stakes Test Driven Accountability (3) This course will critically examine the public school reform movement and critique the idea of "failing schools."
Effective: Summer 2012 Ending: Summer 2012

CI 597A Introduction to Language, Culture and Society Doctoral Studies (3) Introduction to doctoral studies within Language, Culture and Society emphasis area of Curriculum and Instruction. Preparation for Candidacy.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CI 597A Key Issues in English Language Learners Teacher Education (3) The course examines key issues of preparing teachers for teaching English language learners.

CI 597B Core Readings in Vygotsky (3) Reading seminar works by Vygotsky, his colleagues, and leading interpreters to arrive at understanding of socio-/cultural historical theory.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CI 597B Writing the Research Article in C&I (3) Students will learn to frame, revise and edit a scholarly article for submission to a journal.

CI 597C Theories of Identity (3) Doctoral level survey of Western theories of cultural identity, including post-colonial, critical race, psychoanalytic, Marxist, feminist, and queer.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CI 597C Differentiated Curriculum in Secondary Schools (3) Curricular theory and design of literacy activities for students with varying abilities and needs mainstreamed in inclusive classroom settings.

CI 597D Foundations of New Literacy Studies (3) Traces the emergence of NLS (theoretical, sociological, historical and cultural roots) through its contemporary contributions to qualitative research and theory.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CI 597D Science Fiction Genre as Culture and Social Education (3) Study of sci-fi genre and how these media texts convey meanings about culture and society across present, past and future.

CI 597E Girls' Culture and Popular Cultures Created for and by Girls (3) This participatory seminar uses a historical approach to girlhood cultures to explore educational implications in different popular cultures created for and by girls.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CI 597E (ECE 597A) Mutant Methodology: Graphic Novels as a Research Medium (3) This seminar examines the emergence of graphic novels as a "mutant methodology" and explores the use of this visual medium for conceptualizing and representing graphic scholarship.

CI 597F (ECE 597A) Video Ethnography of Education (3) Show students how to use video ethnography in education research. Course is rooted in Preschool in Three Cultures method (formally known as video-cued multivocal ethnography).
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

CI 597F The Place of Place(s) in Learning and Teaching (3) Interdisciplinary study of place, focused on how place shapes learning and teaching, particularly with respect to schooling.

CI 597I Theories of Childhood (3) The study of childhood from cultural, historical, psychological and philosophical perspectives.
Effective: Summer 2012 Ending: Summer 2012

CI 597I Theories of Childhood (3) The study of childhood from cultural, historical, psychological and philosophical perspectives.

The Pennsylvania State University
C I 597K **Becoming a Professor: Entering the Field** (3) Doctoral seminar on individual lectures by faculty, students and/or guest speakers on professional expectations in the professoriate. 
**Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012**

C I 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. 
**Effective: Summer 2005**

C I 600 **Thesis Research** (1-15) No description. 
**Effective: Fall 1983**

C I 601 **Ph.D. Dissertation Full-Time** (0) No description. 
**Effective: Fall 1983**

C I 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching experience in Curriculum and Instruction undergraduate faculty supervision. 
**Effective: Fall 1983**
**Prerequisite:**
C I 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. 
**Effective: Summer 2000**

C I 610 **Thesis Research Off Campus** (1-15) No description. 
**Effective: Fall 1983**

C I 611 **Ph.D. Dissertation Part-Time** (0) No description. 
**Effective: Fall 1983**

Last Import from UCM: June 2, 2012 12:27 PM
Curriculum and Supervision (C & S)

Prerequisite:

C & S 497A Classroom Instruction that Works (3) Designed for educators interested in learning about teaching strategies that, when used effectively, have a measurable difference in student achievement. Effective: Summer 2012 Ending: Summer 2012

C & S 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

Prerequisite:

C & S 553 (EDLDR 553) Issues in Curriculum (3 per semester/maximum of 6) In-depth study of issues and trends in the understanding and practice of curriculum. Effective: Spring 2011

Prerequisite:

C & S 555 Development of Teacher Education Programs (3) Study of the components and design of teacher education programs within the constraints of institutional, professional, and legal contexts. Effective: Spring 2012

Prerequisite:

C & S 557 (EDLDR 557) Seminar in Curriculum Research (3) Analysis of particular curriculum studies, methods and paradigms, and the general status of current research in the general curriculum field. Effective: Spring 2011

Prerequisite:

C & S 558 Standard Works in Curriculum and Instruction (3) Study of significant empirical, historical, evaluative, philosophical, and critical works having an impact on curriculum and instruction practice. Effective: Spring 2012

Prerequisite:

C & S 560 (EDLDR 560) Principles of Instructional Supervision (3) Social and institutional settings for instructional supervision; functions, activities, and practices of supervision; supervisory case studies. Effective: Spring 2011

Prerequisite:

C & S 562 (EDLDR 562) Methods of Classroom Supervision and Coaching (3) Strategies and techniques for supervision/coaching of instruction intended to enhance teacher reflection, self-direction, and autonomy. Effective: Spring 2011

Prerequisite:

C & S 563 (EDLDR 563) Designing Staff Development Programs (3) Designing, implementing, and evaluating effective staff development programs for personnel in educational settings. Effective: Spring 2011

Prerequisite:

Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Demography (DEMOG)

DEMOG 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
   Effective: Fall 1987

DEMOG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
   Effective: Fall 1987

DEMOG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
   Effective: Fall 1987

Last Import from UCM: June 2, 2012 12:27 PM
Dermatology (DERM)

DERM 720 Dermatology (3) Interdisciplinary - Medical Education Course
Effective: Spring 2008
Prerequisite:

DERM 732 Dermatology Elective (5) Designed to provide students with an extensive, in-depth exposure to clinical dermatology; involved in the evaluation and management of patients in dermatology clinics.
Effective: Fall 2003
Prerequisite:

DERM 740 Dermatology/Pathology Elective (5) Intended for students pursuing a career in dermatology or pathology; involves the study of the pathology of cutaneous disorders. The elective complements what is learned in dermatology and pathology rotations.
Effective: Summer 2009
Prerequisite:

DERM 796 Dermatology Individual Studies (5) This course provides an opportunity for senior medical students to pursue individual dermatology research projects with a supervising faculty dermatologist.
Effective: Fall 2008
Prerequisite:

DERM 796A Dermatology Individual Studies for 3rd Year Students (2.5) Dermatology Individual Studies for 3rd Year Students.
Effective: Spring 2009

DERM 797 Dermatology Special Topics (5) Dermatology Special Topics.
Effective: Spring 2010
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
E-Business (EBIZ)

EBIZ 543 (MKTG 543) e-Marketing (2) Using the Internet and related technologies to enhance and transform marketing functions and processes.
Effective: Spring 2012

EBIZ 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2002

Last Import from UCM: June 2, 2012 12:27 PM
Early Childhood Education (E C E)

Prerequisite:

E C E 452 Approaches to Contemporary Early Childhood Education Programs (3) Description and analysis of early childhood programs; cycles, trends, progressions in early childhood education. Effective: Spring 1992
Prerequisite:

E C E 453 parent Involvement in Home, Center, and Classroom Instruction (2-3) Parent involvement, programs, and methodologies that strengthen bonds between home and community for educators of children. Effective: Spring 1992
Prerequisite:

E C E 454 (HD FS 454) Development and Administration of Child Service Programs (3) Planning, administering, and evaluating child service programs at several administrative levels using methods from relevant disciplines. Effective: Spring 1992
Prerequisite:

E C E 479 The Young Child’s Play as Educative Processes (3) Young child’s play as educative processes and uses of materials in curricular settings are examined. Effective: Spring 2007
Prerequisite:

E C E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1991

E C E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Summer 1991

E C E 497A Environmental Design for Diverse Learners in Early Childhood Education (3) This course introduces students to planning, designing, building and facilitating learning for diverse learners using child-centered enviornmentl designs and activities. Effective: Summer 2012 Ending: Summer 2012

E C E 497B Multimodal Learning and Literacy in Early Childhood (3) This course explores the processes of visual, auditory and embodied ways of knowing as a foundation for children's meaning making. Effective: Summer 2012 Ending: Summer 2012

E C E 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 1992

E C E 572 Issues and Trends in Early Childhood Education (3 per semester/maximum of 9) Research, experimental programs, and emerging trends in early childhood education; relationships between educational experiences and later intellectual and emotional development. Effective: Spring 1992
Prerequisite:

E C E 580 Young Multilingual/Multicultural Learners (3) Multilingual/multicultural dimensions of young learners; language, cultural-ethnic social milieu and family, school, community, religious impacts, and acculturation philosophies. Effective: Summer 1993
Prerequisite:

Prerequisite:

E C E 588 Educational Role of the Family (3) Parent-child-teacher relationships, cognitive socialization, and academic attainments; proximal/distal variables: family structure, history, processes, content, community, culture. Effective: Summer 1992
Prerequisite:

E C E 589 Play and Early Childhood Education (3) Developmental significance of play, processes, and development; role of the adult in child’s play; educational practices.
Effective: Spring 2007
Prerequisite:

E C E 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1995

E C E 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1991

E C E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1991

E C E 597A (CI ED 597A) Educational Ethnography (3) This seminar will show students how to use ethnographic methods for education research.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

E C E 597A (CI 597E) Mutant Methodology: Graphic Novels as a Research Medium (3) This seminar examines the emergence of graphic novels as a "mutant methodology" and explores the use of this visual medium for conceptualizing and representing graphic scholarship.
Early Start Program (ESPRG)

ESPRG 997 Special Topics (0.5) Early Start Program Course.
Effective: Summer 2008

Last Import from UCM: June 2, 2012 12:27 PM
Earth Sciences (EARTH)

EARTH 400 Earth Sciences Seminar (3) Interdisciplinary study of environmental problems in the earth sciences. Effective: Spring 2001
Prerequisite:

EARTH 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Spring 2001
Prerequisite:

EARTH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

EARTH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

EARTH 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

EARTH 501 Contemporary Controversies in the Earth Sciences (3) Exploration of current areas of research in the Earth Sciences. Effective: Summer 2008

EARTH 520 Plate Tectonics and People: Foundations of Solid Earth Science (3) Solid Earth geophysics and geological hazards presented within the grand unifying theory of plate tectonics. Effective: Summer 2008

EARTH 530 Earth Surface Processes in the Critical Zone (3) Introduction to Earth surface processes including weathering and soils, geomorphology, erosion and sedimentation, hydrogeology, low-temperature geochemistry and Earth systems. Effective: Summer 2008

EARTH 540 Essentials of Oceanography for Educators (3) Chemical and physical principles of the oceans and their interaction with the biosphere, atmosphere and the solid Earth. Effective: Summer 2008

EARTH 591 Individual Studies: Research Project (3) Development of a capstone project, supervised on an individual basis outside the scope of formal courses. Effective: Summer 2008
Prerequisite:

EARTH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 1994

EARTH 597A Energy Generation (2) This course highlights the human use of energy beginning with the controlled use of fire up to modern power production methods and associated consequences. Effective: Summer 2012 Ending: Summer 2012

EARTH 597B Engaging Your Students in Astronomy (2) This course engages teachers in innovative approaches to teaching solar system phenomena, while learning new astronomy themselves. Effective: Summer 2012 Ending: Summer 2012

EARTH 597C Plate Tectonics (2) This course is designed to develop both practical and conceptual knowledge of plate tectonics as well as to promote innovative approaches to teaching earth science. Effective: Summer 2012 Ending: Summer 2012

EARTH 597D Special Topics in the Earth Sciences (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 2012 Ending: Summer 2012

EARTH 600 Thesis Research (1-15) No description.
EARTH 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Earth and Mineral Sciences (EM SC)

EM SC 420 (SOC 420, S T S 420) Energy and Modern Society (3) Technology and economics of energy resources, production, and consumption; environmental factors, exhaustion, new technology. Effective: Fall 1986

EM SC 440 Science Diving (4) Advanced scuba diving skills applied to underwater research. Effective: Spring 2012
Prerequisite:

EM SC 441 Advanced Science Diving (4) Advanced scuba diving skills applied to underwater data collection and research. Effective: Summer 2011
Prerequisite:

EM SC 470W Undergraduate Collaborative Research in Earth and Materials Sciences (3-6) Interdisciplinary research seminar involving students in the process of discovery, writing, and debate on issues of broad interest to Earth and Materials Sciences. Effective: Spring 1998 Ending: Fall 2012

EM SC 470W Undergraduate Collaborative Research in Earth and Materials Sciences (1-6 per semester/maximum of 6) Interdisciplinary research seminar involving students in the process of discovery, writing, and debate on issues of broad interest to Earth and Materials Sciences. Effective: Spring 2013 Future: Spring 2013

EM SC 494 Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 1994

EM SC 494H Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007

EM SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2003

EM SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 1992

EM SC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

EM SC 602 Supervised Experience in College Teaching (2-3) Students enrolled will lead discussion sections, grade papers and examinations, give an occasional lecture, and assist instructors in planning survey level courses. Effective: Fall 2004

Last Import from UCM: June 2, 2012 12:27 PM
Ecology (ECLGY)

Effective: Fall 2008

ECLGY 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2005

ECLGY 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2004

ECLGY 597C Flora of the Central Appalachian Region (1) Class days will be divided between time in the lab, becoming familiar with plant structures and the use of botanical keys, and field trips to various local ecosystems to see identify plants in the field. A quiz list will be developed throughout the class with the species students will be expected to know. The final exam will consist of two parts: keying out unknown specimens, and sight recognition in the field of species from the quiz list (Latin names will be used).
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ECLGY 597F Everything You Need to Know but Nobody Told You About: Taking Charge of Your Graduate Career (1) The contemporary job market scenario is more competitive than ever, and finding jobs and succeeding in a science career depends not only on talent, but also on being well informed and prepared to navigate this world. This course will explore important issues that affect the professional development and success of graduate students choosing Ecology and Biology careers. The goal is to better inform students about requirements of different career paths, grant writing skills, peer review process, collaboration and work ethics, cover-letter preparation, scientific writing, among related topics. The class is formatted as a discussion group.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ECLGY 600 Thesis Research (1-15) No description.
Effective: Fall 1983

ECLGY 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

Effective: Fall 1983

ECLGY 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Economics (ECNMS)

ECNMS 510 Managerial Economics (3) Economic analysis of demand for the firm's output and production costs; implications of various market structures; government regulation.
Effective: Summer 1995
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Economics (ECON)

ECON 400M Honors Seminar in Economics (3-12) Readings, discussion, and oral and written reports on selected topics in economics.
Effective: Spring 1993
Prerequisite:

ECON 401 History of Economic Thought (3) Survey of economic ideas from Greco-Roman times to the present.
Effective: Spring 2001
Prerequisite:

ECON 402 Decision Making and Strategy in Economics (3) Development and application of the tools for decision making under uncertainty and for game theoretic analysis of economic problems.
Effective: Spring 2007
Prerequisite:

ECON 403W The Economics of Arts and Entertainment (3) Supply and demand of creative goods and services; industry structure; role of information; policy issues.
Effective: Summer 2008
Prerequisite:

ECON 404W Current Economic Issues (3) An analytical survey of significant problems of current economic policy and the application of economic analysis to important social issues.
Effective: Spring 1993
Prerequisite:

ECON 406W The Economics of Social Conflict (3) Economic theory of the resolution of social conflicts: social choice theory, voting, noncooperative games, voluntary trade, and allocation by force.
Effective: Summer 2008
Prerequisite:

ECON 407W Political Economy (3) Applications of the tools of game theory to analyze topics in collective decision making.
Effective: Summer 2008
Prerequisite:

ECON 408W Intellectual Property (3) A comparative and cost-benefit analysis of intellectual property that examines patents, copyrights, government supported research, and prizes.
Effective: Summer 2008
Prerequisite:

ECON 409W Economics of Terrorism (3) Terrorism throughout history; economic causes, costs, sources, and consequences.
Effective: Summer 2008
Prerequisite:

ECON 410 Economics of Labor Markets (3) Economic analysis of the employment relationship from the microeconomic perspective, with emphasis on current labor-market problems and public policy issues.
Effective: Spring 2011
Prerequisite:

ECON 411W Behavioral Economics (3) Topics in behavioral economics; selected games; evolutionary models of social behavior; culture and social behavior; herding; overconfidence.
Effective: Summer 2008
Prerequisite:

Effective: Spring 2009
Prerequisite:

ECON 413W Economic Growth and the Challenge of World Poverty (3) Economic prosperity in historical perspective; recent successes (East Asia, China, India); ongoing challenges (the bottom billion; sub-Saharan Africa).
Effective: Summer 2008
Prerequisite:

ECON 414W The Economic Way of Looking at Life (3) Economics/life according to Gary Becker: criminal behavior; economics of the family (marriage, divorce, intrahousehold resource allocation, bequests), policy issues.
Effective: Summer 2008
Prerequisite:

ECON 415W The Economics of Global Climate Change (3) Evidence on climate change; economic models of the environment and market failure; cost-benefit analysis of policy options; carbon markets.
Effective: Summer 2008
Prerequisite:

ECON 417W The Economics of Uncertainty (3) Uncertainty is examined in contracts, with an emphasis on limited liability.
Symmetric information and economic puzzles are also considered.

Prerequisite:

ECON 418W A Comparative and Cost-Benefit Analysis of State Government Activities (3) This course examines federalism with a particular focus on the activities undertaken by the state of Pennsylvania.

Effective: Summer 2008

Prerequisite:

ECON 421 Analysis of Economic Data (3) Economic analysis of data: sources, variable definitions, miscodings, missing observations, censoring and truncation, applications.

Effective: Summer 2008

Prerequisite:

ECON 422W Applying Monetary Theory to Monetary History (3) Monetary history is examined. Special attention is paid to commodity-based systems, private money, and government monopolies on currency.

Effective: Summer 2008

Prerequisite:

ECON 424 Income Distribution (3) Inequality and poverty in the United States, measurement problems, determinants of inequality, arguments for and against equality, impact of redistributive policies.

Effective: Fall 1992

Prerequisite:

ECON 425 Economics of Public Expenditures (3) Analytic and policy aspects of public expenditure decisions; applications from areas of contemporary public interest.

Effective: Summer 1992

Prerequisite:

ECON 428 Environmental Economics (3) Environmental pollution, the market economy, and optimal resource allocation; alternative control procedures; levels of environmental protection and public policy.

Effective: Summer 1992

Prerequisite:

ECON 429 Public Finance and Fiscal Policy (3) Analysis of public revenue and expenditure structure primarily at the federal level; federalism; fiscal policy and public debt.

Effective: Fall 1983

Prerequisite:

ECON 430 Regional Economic Analysis (3) Analysis of personal and industrial location decisions, regional economic growth, migration patterns, and regional policy; emphasis on tools and techniques.

Effective: Spring 2011

Prerequisite:

ECON 432 Urban Economics (3) Theories and methods for economic analysis of such urban problems as housing, segregation, government services, and transportation.

Effective: Summer 1992

Prerequisite:

ECON 433 Advanced International Trade Theory and Policy (3) Causes/consequences of trade; effects of tariffs and quotas; strategic trade policy; political economy of trade restrictions and other topics.

Effective: Summer 1992

Prerequisite:

ECON 434 International Finance and Open Economy Macroeconomics (3) Trade balance movements, exchange rate determination; monetary and fiscal policies in open economies; international policy coordination; the world monetary system.

Effective: Spring 1992

Prerequisite:

ECON 436W (US) Economics of Discrimination (3) Analysis of the economic characteristics of women and minorities, with examination of race and sex discrimination and related government policies.

Effective: Fall 2007

Prerequisite:

ECON 437W Multinationals and the Globalization of Production (3) This course will focus on trade, multinationals and offshoring, and explore their implications for the U.S. and developing countries.

Effective: Summer 2008

Prerequisite:

ECON 438W Winners and Losers from Globalization (3) The economic effects of globalization on individuals, governments, nation-states and business.

Effective: Summer 2008

Prerequisite:

ECON 439 Economics of Technology Diffusion (3) Technology Diffusion: Globalization, productivity measurement, intellectual property.

Effective: Summer 2008

Prerequisite:

ECON 440 Trade and Labor Markets (3) International trade and its impacts on markets in industrialized and development
economies; low-skilled workers in the emerging global economy.
Effective: Summer 2008
Prerequisite:

ECON 442 Managerial Economics (3) Application of economic theory to managerial decision making; risk, uncertainty; models and statistical techniques.
Effective: Spring 2011
Prerequisite:

ECON 443 Economics of Law and Regulation (3) An economic analysis of property rights, contractual arrangements, illegal activities, and regulation; competitive problems due to externalities and market failure.
Effective: Summer 1992
Prerequisite:

ECON 444 Economics of the Corporation (3) Coordination and incentive issues within a corporation. Topics include employment contracts, performance incentives and pricing of financial assets.
Effective: Summer 1997
Prerequisite:

ECON 445 (H P A 445) Health Economics (3) Economic analysis of U.S. health care system; planning, organization, and financing; current public policy issues and alternatives.
Effective: Spring 1994
Prerequisite:

Effective: Spring 2008
Prerequisite:

ECON 446W Economics of Industry Evolution (3) Dynamics of industry evolution; empirical evidence and theoretical modeling of firm entry, growth, and exit; entrepreneurship; investment and strategic behavior.
Effective: Summer 2008
Prerequisite:

ECON 447W Economics of Sports (3) Examination of economic issues pertaining to professional and collegiate sports, including analysis of industrial organization, labor markets, and local economies.
Effective: Spring 2009
Prerequisite:

ECON 448W Economics of Auctions and Procurements (3) Theoretical and empirical analyses of auctions and procurements; different modeling environments; econometric analysis of auction and procurement data.
Effective: Summer 2008
Prerequisite:

ECON 449W Economics of Collusion (3) Theoretical and empirical analysis of collusion among firms, case studies of cartel behavior, bidding behavior at auctions and procurements.
Effective: Spring 2008
Prerequisite:

ECON 450 The Business Cycle (3) Measurement and theories of the business cycle; stabilization policies; forecasting.
Effective: Summer 1992
Prerequisite:

ECON 451 Monetary Theory and Policy (3) Monetary and income theory; monetary and fiscal policy.
Effective: Winter 1978
Prerequisite:

ECON 452W Financial Crises (3) Examination of causes and consequences of financial crises; asset pricing theory, market efficiency, speculative bubbles; policy considerations.
Effective: Summer 2008
Prerequisite:

ECON 453 Monopolization and Vertical Restraints (3) Monopolization and vertical restraints: exclusive dealing, bundling, tying, predation and entry deterrence; empirical evaluation.
Effective: Summer 2008
Prerequisite:

ECON 454 Economics of Mergers (3) Economic analysis of horizontal and vertical mergers; econometric issues in measurement of unilateral and coordinated effects; policy issues.
Effective: Summer 2008
Prerequisite:

ECON 455W Economics of the Internet (3) Economics of the Internet; electronic commerce and network economics; pricing issues; intellectual property.
Effective: Summer 2008
Prerequisite:

ECON 457W Economics of Organizations (3) An advanced course in the economics of organizations. The focus is on coordination, incentives, contracts, and information in corporations.
Effective: Summer 2008
Prerequisite:
ECON 463 (IL) Economic Demography (3) Microeconomics of demographic behavior; interrelationships between demographic and economic factors, in developing and industrialized economies; economic welfare and policy implications.
Effective: Spring 2006
Prerequisite:

ECON 463W Economic Demography (3) Microeconomics of demographic behavior; interrelationships between demographic and economic factors, in developing and industrialized economies; economic welfare and policy implications.
Effective: Summer 2008
Prerequisite:

ECON 465W Cross Sectional Econometrics (3) Discrete choice models, censored and truncated regression models, longitudinal models, applications.
Effective: Summer 2008
Prerequisite:

ECON 466W Panel Data Models (3) Random and fixed effects, endogeneity, balanced and unbalanced panels, censoring of spells, differences in differences, applications.
Effective: Summer 2008
Prerequisite:

ECON 470 (IL) International Trade and Finance (3) Economic analysis of why nations trade, barriers to trade, the international monetary system, and macroeconomic policy in an open economy.
Effective: Spring 2011
Prerequisite:

ECON 471 Growth and Development (3) Problems of capital formation, institutional considerations, theories of economic growth.
Effective: Summer 2011
Prerequisite:

ECON 472 Transition to Market Economies (3) Economics of transition to a market economy; problems of former Soviet-type economies; privatization, stabilization, and institutional change.
Effective: Fall 2005
Prerequisite:

Effective: Spring 2011
Prerequisite:

ECON 475W Migration and Development (3) Human Capital Approach to Migration; Economics of Family Migration; Evidence: Micro and Macro Perspectives; Migration Policies.
Effective: Summer 2008
Prerequisite:

ECON 476W The Economics of Fertility in the Developing World (3) Demand for children, supply of children, and costs of fertility regulation; fertility transition; public policies to affect fertility.
Effective: Summer 2008
Prerequisite:

ECON 477 Labor Markets in Developing Countries (3) Labor demand and supply in developing countries; urban and rural labor markets, modern and informal sectors; policy issues.
Effective: Summer 2008
Prerequisite:

ECON 478 Incomplete Markets (3) Rural land markets, fragmented credit markets, risk and insurance, human capital and labor markets, innovation and technology spillovers, coordination failures.
Effective: Summer 2008
Prerequisite:

ECON 479W Economics of Matching (3) Economic application of matching to employment, marriage, organ markets, and medical residents.
Effective: Summer 2008
Prerequisite:

ECON 480 Mathematical Economics (3) Mathematical techniques employed in economic analysis; formal development of economic relationships.
Effective: Summer 1992
Prerequisite:

ECON 481 Business Forecasting Techniques (3) A survey of contemporary business forecasting techniques, with emphasis on smoothing, decomposition, and regression techniques.
Effective: Spring 2008
Prerequisite:

ECON 483 Economic Forecasting (3) Forecasting time series, using linear regression models and econometric software; useful forecasting models; financial and seasonal time series; trends.
Effective: Summer 2008
ECON 485 Econometric Techniques (3) Applying statistical techniques to test and explain economic relationships; integration of economic theory with observed economic phenomena.  
Effective: Spring 2011

Prerequisite:

ECON 489M Honors Thesis (1-6) No description.  
Effective: Spring 1993

Prerequisite:

ECON 490 Introduction to Econometrics (3) Use of simple and multiple regression models in measuring and testing economic relationships. Problems including multicollinearity, heteroskedasticity, and serial correlation.  
Effective: Summer 2000

Prerequisite:

ECON 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.  
Effective: Summer 1994

ECON 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.  
Effective: Fall 2007

ECON 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.  
Effective: Summer 1995

Prerequisite:

ECON 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Fall 1983

ECON 496A Economics of a Dairy Farm (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ECON 496B Myths in Sports (1-7) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ECON 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Fall 1983

ECON 497B Economics of Sports (3) Examination of economic issues pertaining to professional and collegiate sports, including analysis of industrial organization, labor markets, and local economics.  
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ECON 499 (IL) Foreign Study--Economics (2-6) Study in selected countries of economic institutions and current economic problems.  
Effective: Spring 2011

Prerequisite:

ECON 500 Introduction to Mathematical Economics (3) Mathematical Economics: Applications of Mathematical Techniques to Economics.  
Effective: Spring 1990

ECON 501 Econometrics (3) Econometrics: Applications of Statistical Techniques to Economics  
Effective: Summer 1989

ECON 502 Microeconomic Analysis (3) Economic behavior under pure and imperfect competition; price and output determination in product markets; prices and employment in factor markets.  
Effective: Winter 1978

ECON 503 Macroeconomic Analysis (3) National income accounts; determination of income, employment, interest rates, and the price level; stabilization policy.  
Effective: Winter 1978

ECON 507 International Trade (3-6) Theory of international trade and investment; effect of commercial policy on trade
and income distribution; multinational corporations and international trade.
Effective: Spring 1993

ECON 510 Econometrics I (3) General linear model, multicolinearity, specification error, autocorrelation, heteroskedasticity, restricted least squares, functional form, dummy variables, limited dependent variables.
Effective: Fall 2003
Prerequisite:

ECON 511 Econometrics II (3) Stochastic regressors, distributed lag models, pooling cross-section and time-series data, simultaneous equation models.
Effective: Fall 2003
Prerequisite:

ECON 512 Empirical Methods in Economics (3-6) The course will introduce students to computational methods used to numerically solve and simulate economic models and program econometric estimators.
Effective: Spring 2012
Prerequisite:

ECON 515 Labor Economics I (3) Labor supply and income maintenance; human capital, job search and training; labor demand, minimum wage, and discrimination.
Effective: Fall 1983

ECON 516 Labor Economics II (3) Earnings differentials, unemployment, and related policy. Institutional aspects of labor economics, including dual labor markets, collective bargaining, and unionism.
Effective: Fall 1983

ECON 517 Open Economy Macroeconomics and International Finance (3-6) The balance of payments, portfolio allocation, monetary and fiscal policy in an open economy, exchange rate regimes, selected policy issues.
Effective: Spring 1993

ECON 521 Advanced Microeconomic Theory (3-6) Theory of consumer behavior; theory of the firm; price determination in product and factor markets; introduction to welfare economics.
Effective: Fall 1983

ECON 522 Advanced Macroeconomic Theory (3-6) Measurement of income; theories of consumption, investment, and money holdings; static determination of income and employment; introduction to dynamic analysis.
Effective: Winter 1978

ECON 529 Public Finance (3-6) Effects of taxes, expenditures, debt on allocation, employment, distribution; cost-benefit analysis; collective decision mechanisms; fiscal federalism; current fiscal policy problems.
Effective: Fall 1983

ECON 534 Game Theory (3) Foundations of current research in game theory.
Effective: Summer 2006
Prerequisite:

ECON 543 Industrial Organization and Public Policy (3-6) The structure of American industry; performance and behavior; public policies toward business.
Effective: Summer 1980

ECON 558 Development of Monetary Theory (3) Classical and neoclassical quantity theories of money and contemporary criticism; Keynesian monetary theory and its critics.
Effective: Fall 1983

ECON 559 Current Monetary Theory and Policy (3) Post-Keynesian reformulation of quantity and Keynesian theories of money; liquidity and general equilibrium approaches; current issues in theory and policy.
Effective: Fall 1983

ECON 570 Development Economics (3-6) Resources and institutions; quantitative measures; theories of economic growth in developing areas; developmental policies.
Effective: Summer 1997

ECON 589 Seminar in Econometric Theory (3) Theories and methods relevant to the application of statistical methods to economics.
Effective: Fall 2003
Prerequisite:

ECON 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987
ECON 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.  
Effective: Spring 1987

ECON 600 **Thesis Research** (1-15) No description.  
Effective: Fall 1983

ECON 601 **Ph.D. Dissertation Full-Time** (0) No description.  
Effective: Fall 1983

ECON 610 **Thesis Research Off Campus** (1-15) No description.  
Effective: Fall 1983

ECON 611 **Ph.D. Dissertation Part-Time** (0) No description.  
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Economics-Behrend (ECNS)

ECNS 596 **INDIVIDUAL STUDIES** (1-9) CREATIVE PROJECTS, INCLUDING NONTHESIS RESEARCH, WHICH ARE SUPERVISED ON AN INDIVIDUAL BASIS AND WHICH FALL OUTSIDE THE SCOPE OF FORMAL COURSES.
Effective: Spring 1987

ECNS 597 **SPECIAL TOPICS** (1-9) FORMAL COURSES GIVEN ON A TOPICAL OR SPECIAL INTEREST SUBJECT WHICH MAY BE OFFERED INFREQUENTLY; SEVERAL DIFFERENT TOPICS MAY BE TAUGHT IN ONE YEAR OR SEMESTER.
Effective: Spring 1987

Last Import from UCM: June 2, 2012 12:27 PM
**Educ Leadership Prog (EDLDR)**

**EDLDR 405 (C I 405) Strategies in Classroom Management** (3) Managing and coping with disruptive student behavior in instructional settings so that they support the teaching/learning process.
Effective: Fall 2008
Prerequisite:

**EDLDR 409 Leadership Studies in Popular Film** (3) In-depth analysis of leadership dynamics revealed in popular film. Focus on cinematic depictions of theory and practical application of leadership.
Effective: Spring 2012
Prerequisite:

**EDLDR 476 The Teacher and the Law** (3) An introduction to education law as it affects the teacher.
Effective: Fall 2004
Prerequisite:

**EDLDR 480 Introduction to Educational Leadership** (3) Development of educational leadership. Relationships among local, state, and federal agencies. Introduction to current concepts and theories.
Effective: Fall 2004
Prerequisite:

**EDLDR 485 Principal as Instructional Leader** (3) Knowledge and skills principals need to lead instructional design and implementation.
Effective: Fall 2004
Prerequisite:

**EDLDR 496 Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012

**EDLDR 497 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2012

**EDLDR 498 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2004

**EDLDR 528 Educational Politics in the United States** (3) Social and institutional forces which shape the public school system and determine national, state, and local educational policy and politics.
Effective: Fall 2004

**EDLDR 530 Leadership for Inclusive Education** (3) In-depth analysis and discussion of the school leaders's role in creating and sustaining an inclusive learning enviroment for all.
Effective: Spring 2012

**EDLDR 531 Leadership and Diversity** (3) This course examines what it means to lead educational orgnaizations in an increasingly diverse society.
Effective: Spring 2012

**EDLDR 533 The Politics of Local School Districts** (3) Theory and practice of the politics and governance of local school districts; issues and methods in studying political decision making.
Effective: Fall 2004

**EDLDR 535 Interagency Relations in Education** (3) This course examines historical and contemporary relationships between schools and other service agencies interacting with the education of American youth.
Effective: Spring 2012

**EDLDR 536 Federal Role in Education** (3) This course examines the Federal role in education, emphasizing relationships between the Federal government and states, tribes and schools.
Effective: Spring 2012

**EDLDR 540 Technology Applications in Educational Leadership** (3) Development and use of information technology applications to analyze common problems faced by educational administrators.
Effective: Spring 2008

**EDLDR 549 School District Improvement and Systemic Change** (3) This course focuses on understanding and leading
systemic district improvement efforts.

Effective: Spring 2012

Prerequisite:

EDLDR 551 (C & S 551) **Curriculum Design: Theory and Practice** (3) The analysis and use of the foundations which underlie models of curriculum design.

Effective: Spring 2012

Prerequisite:

EDLDR 553 (C & S 553) **Issues in Curriculum** (3 per semester/maximum of 6) In-depth study of issues and trends in the understanding and practice of curriculum.

Effective: Spring 2012

Prerequisite:

EDLDR 557 (C & S 557) **Seminar in Curriculum Research** (3) Analysis of particular curriculum studies, methods and paradigms, and the general status of current research in the general curriculum field.

Effective: Spring 2012

Prerequisite:

EDLDR 559 **School Improvement** (3) The course examines how educational leaders at all levels can determine, promote, support, and achieve successful school improvement.

Effective: Spring 2012

EDLDR 560 (C & S 560) **Principles of Instructional Supervision** (3) Social and institutional settings for instructional supervision; functions, activities, and practices of supervision; supervisory case studies.

Effective: Spring 2012

Prerequisite:

EDLDR 562 (C & S 562) **Methods of Classroom Supervision and Coaching** (3) Strategies and techniques for supervision/coaching of instruction intended to enhance teacher reflection, self-direction, and autonomy.

Effective: Spring 2012

Prerequisite:

EDLDR 563 (C & S 563) **Designing Staff Development Programs** (3) Designing, implementing, and evaluating effective staff development programs for personnel in educational settings.

Effective: Spring 2012

Prerequisite:

EDLDR 565 **Personnel Management and Contract Administration** (3) Practice and theory of personnel supervision at the central office and building level, including contract administration and grievance handling.

Effective: Fall 2004

Prerequisite:

EDLDR 567 **Organizational Supervision** (3) Principles and practices of supervision in schools related to instructional and support personnel.

Effective: Fall 2004

Prerequisite:

EDLDR 568 **The Principalship** (3) Principles and practices of administration of elementary and secondary schools.

Effective: Fall 2004

EDLDR 569 **Decision Making in Educational Organizations** (3) Decision making in organizational and environmental contexts; case studies of administrative problems; application of decision making models.

Effective: Fall 2004

Prerequisite:

EDLDR 573 **Public School Finance** (3) Financing of public education, including values underlying system, revenue sources and taxation, school funding formulas, equity, and school finance reform.

Effective: Fall 2004

Prerequisite:

EDLDR 575 **Ethics in Educational Leadership** (3) Course explores the moral and ethical dimensions of the work of educational leaders.

Effective: Spring 2012

EDLDR 576 **The Law and Education** (3) Legal bases for education; rights and responsibilities of school board members, administrators, teachers, students, and parents; due process.

Effective: Fall 2004

Prerequisite:

EDLDR 577 **Law and Ethics in Education** (3) Course focuses on legal and ethical dimensions issues for educational leaders and their impact on best interests of the students.

Effective: Spring 2012

EDLDR 578 **Schools as Organizations** (3) Intraorganizational relationships; administration and the school in its organizational and environmental contexts.

Effective: Fall 2004

The Pennsylvania State University
Prerequisite:

EDLDR 580 **The Use of Theory in Educational Administration** (3) Critical analysis of current theories; problem finding and hypothesis formulation. Effective: Fall 2004
Prerequisite:

EDLDR 581 **Field Research in Educational Leadership** (3) Field study and qualitative methods in research on educational organizations. Effective: Fall 2004
Prerequisite:

EDLDR 583 **Current Administrative Practice** (3) Practice oriented skills and experiences facilitating effective administration. Effective: Fall 2004
Prerequisite:

EDLDR 584 **Evaluation in Educational Organizations** (3) Naturalistic and empirical evaluation methods and procedures for educational organizations. Effective: Fall 2004
Prerequisite:

EDLDR 585 (HI ED 585, EDTHP 585) **Research Design: Implications for Decisions in Higher Education** (3) A capstone course on research design and analytical approaches to support decision-making in administration and policy-making. Effective: Fall 2004
Prerequisite:

EDLDR 586 (EDTHP 586, HI ED 586) **Qualitative Methods in Educational Research** (3) Exploration of the theoretical framework undergirding qualitative research and its attendant practices and techniques. Effective: Fall 2004

EDLDR 587 (HI ED 587, EDTHP 587) **Education Policy and Politics** (3) The political economy and bureaucratic politics of educational organizations, with special attention to the policy making, implementation, and evaluation processes. Effective: Fall 2004

EDLDR 588 (HI ED 588, EDTHP 588) **Qualitative Methods in Educational Research II** (3) Advanced study of methods involved in executing and analyzing qualitative research in education. Effective: Spring 2012
Prerequisite:

EDLDR 589 **Mixed Methods in Educational and Social Scientific Research** (3) This course considers the epistemological and paradigmatic implications of mixed methods research within educational and other social scientific research contexts. Effective: Spring 2012

EDLDR 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 2012

EDLDR 594 **Seminar in School Law** (3) Research in substantive issues in school law. Effective: Fall 2004
Prerequisite:

EDLDR 595 **Internship** (1-15) Guided experience in a school or other educational organization in which the student is not regularly employed, under supervision of a graduate faculty member. Effective: Fall 2004
Prerequisite:

EDLDR 595A **Principal Internship** (3) Internship field experience required in order to become certified as a K-12 principal. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

EDLDR 595B **Superintendent Internship** (3) Internship field experience required for the letter of eligibility certificate. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

EDLDR 596 **Individual Studies** (1-9) Creative projects including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2012

EDLDR 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
EDLDR 597A (EDTHP 597A) **Education Policy: Learning Through Doing** (3) Learning the real-life skills necessary to become engaged in the political and policy making process in education.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:

EDLDR 597A **Doctoral Pro-Seminar in Educational Leadership** (3) Orientation to doctoral students in EDLDR, includes all the requirements and information needed to complete their doctoral degrees.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EDLDR 597B **Using and Understanding Data Used in Education** (3) Class is designed for anyone who uses data on a regular basis and wants to learn how to use it correctly.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EDLDR 597C **Advanced Seminar in Educational Policy Topic** (3) This class involves original research in an educational policy topic. Student must already be engaged in education policy research project.
Effective: Summer 2012 Ending: Summer 2012

EDLDR 597D **The Law and Education** (3) The law and education course educates administrators and other educators about legal issues.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EDLDR 600 **Thesis Research** (1-15) No description.
Effective: Fall 2004

EDLDR 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 2004

EDLDR 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 2004

EDLDR 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 2004

EDLDR 801 **Introduction to Teacher Leadership** (3) This course focuses on understanding teacher leadership and its function with the school system.
Effective: Spring 2012

EDLDR 802 **How Schools Work** (3) Course focuses on understanding schools as learning organizations and how teacher leadership works in such organizations.
Effective: Spring 2012

EDLDR 894A **Capstone Inquiry Project** (3) Completion and public presentation of an inquiry project reflecting an understanding of the five leadership strands.
Effective: Spring 2012
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Education (EDUC)

EDUC 400 Diversity and Cultural Awareness Practices in the K-12 Classroom (3) This course addresses diversity, cultural awareness and sensitivity about cultures, concepts and methods in society, communities and educational settings. Effective: Summer 2008

EDUC 401 Early Childhood Education (3) Organization, methodology, and materials for nursery school and kindergarten programs. Effective: Winter 1981

EDUC 403 Curriculum for Early Childhood (3) Examining early childhood programs and methodology, focusing on areas of social studies, mathematics, and science. Effective: Winter 1981

EDUC 405 Early Childhood Education: Infancy and Toddlerhood (3) Models of infant development with focus on the first three years of life--cognitive and socio-emotional milestones will be analyzed. Effective: Spring 2005

EDUC 408 Administration of Early Childhood Education Programs (3) The role of the early childhood administrator as it relates to regulations, staffing, management, funding and curriculum. Effective: Winter 1981

Prerequisite:

EDUC 410 The Child and Social Institutions (3) The effects of the family on a child’s development, especially in the infancy and preschool years. Effective: Winter 1981

EDUC 412 Early Literacy Intervention I (3) Participants will better understand factors affecting early reading behavior through diagnostic techniques, observation techniques, and literacy intervention strategies. Effective: Summer 1996

Prerequisite:

EDUC 413 Early Literacy Intervention II (3) Participants will continue to learn skills, knowledge, and experience processes to implement the early literacy intervention program. Effective: Summer 1996

Prerequisite:

EDUC 415 Teaching Secondary Social Studies (3) Study of the objectives, content, methods, and evaluation of procedures of social studies. Students design units and lesson plans. Effective: Spring 2011

Prerequisite:

EDUC 416 Teaching Secondary English and the Humanities (3) Study of the objectives, content, and methods of English and humanities courses. Effective: Spring 2011

Prerequisite:

EDUC 417 Teaching Secondary Mathematics (3) Study of the objectives, content, methods, and evaluation procedures of mathematics. Effective: Spring 2011

Prerequisite:

EDUC 418 Positive Classroom Climate for Positive Attitudes About Learning (3) Participants will learn strategies for creating classroom climates which encourage positive attitudes toward learning while preventing and correcting student misbehavior.
Effective: Summer 1995
Prerequisite:

EDUC 421 Children's Literature (3) Knowledge of literature appropriate for elementary school children and utilization of literature-related activities in teaching reading.
Effective: Spring 2001
Prerequisite:

EDUC 422 Literature for Children and Adolescents (3) Literature for children and adolescents, approaches for using such literature in the school curriculum.
Effective: Fall 2008

EDUC 425 Literacy Assessment (3) This course emphasizes alternative literacy measures focusing on portfolio assessment and performance assessments.
Effective: Spring 1997
Prerequisite:

EDUC 432 Children's Literature in Teaching Writing (3) Introduction to introduces methods for transferring writing skills and literary devices from literature to student writing in all subject areas.
Effective: Summer 2008

EDUC 435 Addressing the Needs of Special Learners (1) An examination of attitudes toward, barriers experienced by, and special needs of special learners in the schools.
Effective: Spring 2001
Prerequisite:

EDUC 436 Inclusion Practices in Education (3) The educational, social, and political foundations for inclusion practices in public education.
Effective: Summer 1995
Prerequisite:

EDUC 440 Educational Statistics and Measurements (3) Descriptive statistics, correlation, reliability, validity, scaling techniques, and introduction to item analysis.
Effective: Winter 1981

EDUC 450 Current Topics in Education (1-15) No description.
Effective: Fall 1983

EDUC 452 Teaching Writing (3) Techniques for teaching the writing process, kindergarten through grade 12, including writing in content areas; workshop format.
Effective: Fall 1983

EDUC 458 Behavior Management Strategies for Inclusive Classrooms (3) Provides knowledge and skills essential for designing positive learning environments in secondary classrooms with the inclusion of exceptional learners.
Effective: Summer 2009
Prerequisite:

EDUC 459 Strategies for Effective Teaching in Inclusive Classrooms (3) Course examines effective strategies for accommodating and adapting instruction for exceptional learners in secondary classrooms.
Effective: Spring 2011 Ending: Summer 2012
Prerequisite:

EDUC 459 Strategies for Effective Teaching in Inclusive Classrooms (3) Course examines effective strategies for accommodating and adapting instruction for exceptional learners in secondary classrooms.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

EDUC 460 Field Study in Ecology (4) Study and analysis of the ecology of various regions of the world. May be repeated for credit.
Effective: Summer 1995
Prerequisite:

EDUC 462 Computers for Classroom Teachers (3) An introduction: microcomputers and their educational applications.
Effective: Spring 2001
Prerequisite:

EDUC 463 The Internet and K-12 Education (3) Relates educational theory and practice to applications of the Internet, applying content from educational foundations, curriculum, and research.
Effective: Spring 2003
Prerequisite:

EDUC 464 Technology and the Learning Process (3) Evaluates the relationship between technology-based resources and learning theories through design, implementation, and evaluation of online instructional modules.
Effective: Spring 2003
Prerequisite:
EDUC 465 Serving Culturally and Linguistically Diverse (CLD) Learners (3) The course provides teachers with knowledge, understandings, and skills to engage culturally and linguistically diverse (CLD) students in mainstream classrooms.
Effective: Spring 2009

EDUC 466 Foundations of Teaching English as a Second Language (3) Overview of various legal, historical, and socio-cultural implications of teaching and learning English as a Second Language.
Effective: Summer 2006
Prerequisite:

EDUC 467 English Language Structure for English as a Second Language Teachers (3) An in-depth study and review of general linguistic concepts and their application to ESL pedagogy.
Effective: Summer 2006
Prerequisite:

EDUC 468 Language Acquisition for English as a Second Language Teachers (3) Study of the theory, research, and processes involved in first and second language development, acquisition, and assessment.
Effective: Summer 2006
Prerequisite:

EDUC 469 Teaching Methods and Assessment of English as a Second Language (3) Integration of theory, research, and practice about ESL curriculum, instructional methods, assessment, and literacy development.
Effective: Summer 2006
Prerequisite:

EDUC 470W Higher-Order Thinking for Educators (3) Presentation of strategies, techniques, and principles of higher-order thinking which are grounded in relevant research and practice will be presented.
Effective: Fall 2006
Prerequisite:

EDUC 471 Best Practices in Literacy (3) An application of best literacy practices to classroom instruction and assessment of reading, writing, listening, and speaking.
Effective: Spring 2003
Prerequisite:

EDUC 472 Teaching Reading Through the Content Areas (3) Designed to enable teachers of content areas to improve the reading/study skills needed by their students.
Effective: Winter 1981

EDUC 475 ESL Leadership, Research and Advocacy (3) Teachers will develop their skills as instructional leaders and researchers by conducting school-based action research projects.
Effective: Summer 2010
Prerequisite:

EDUC 477 Teaching Struggling Readers and Writers (3) A comprehensive overview of learning problems and effective strategies for teaching K-12 students who have difficulties reading and writing.
Effective: Spring 2008

EDUC 484 School Law for Teachers (3) This course will focus on increasing teacher awareness of law and how it impacts on daily performance and job security.
Effective: Summer 1995
Prerequisite:

EDUC 490 Student Teaching (1-12) Observation and teaching in selected elementary or secondary schools under direction of cooperating classroom teachers and University supervisors. Regular seminars. GPA 3.0 or higher. Passing scores on required Praxis I tests.
Effective: Fall 2003
Prerequisite:

EDUC 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1994

EDUC 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

EDUC 495 Internship (1-15) Supervised off-campus, non-group instruction including individual field experiences, practicums or internships. Written and oral critique of activity required.
Effective: Fall 1983
Prerequisite:

EDUC 495A Junior Field Experience (1) Second semester juniors assigned to a suburban elementary school for the purpose of actively participating in classroom activities.
Effective: Summer 2003
Prerequisite:
EDUC 495B **Senior Field Experience** (1) First semester seniors assigned to an urban elementary school for the purpose of actively participating in classroom activities.
Effective: Summer 2003
Prerequisite:

EDUC 495C **Early Childhood Field Experience** (1) First semester seniors assigned to an urban elementary school for the purpose of actively participating in an early childhood classroom.
Effective: Summer 2003
Prerequisite:

EDUC 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 1983

EDUC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1983

EDUC 497A **Technology and the Highly Engaged Classroom** (3) The focus of this course is on technology and fostering engagement in the classroom. Engagement is one of the core factors of the H.E.A.T Framework developed by LoTi and is a key ingredient of effective teaching.
Effective: Summer 2012 Ending: Summer 2012

EDUC 497A **Teacher Action Research** (3) Students will develop action research plans for their own new practice on student performance.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

EDUC 497A **Teacher Leadership** (2) Develop findings of research and prepare manuscript for submission for publication and presentation at education conferences.
Prerequisite:

EDUC 497B **High-Impact Literacy Practices: Comprehension Going Forward** (3) This course is designed to explore a variety of methods to improve and modify instructional strategies to promote maximum engagement and increase effective teaching principles. This course will assist the participants in developing a knowledge and subsequent use of research-based models of high-impact literacy practices and areas of: responsive teaching and differentiation, assessment, and professional collaboration.
Effective: Summer 2012 Ending: Summer 2012

EDUC 497B **Action Research Implementation** (2) Use observational and interview data gathered to analyze results.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

EDUC 497C **Myths and Truths: American History for the Classroom** (3) An examination of how American history has been taught over the last 200 years and ways to engage K-12 students.
Effective: Summer 2012 Ending: Summer 2012

EDUC 497D **International Field Experience: Germany** (0.5-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2012 Ending: Summer 2012

EDUC 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1995

EDUC 498A **Advanced Institute: "Unlocking the Power of Poetry"** (3) Course will explore poetic techniques and esthetics and the connection between poetry and the domains of writing.
Effective: Summer 2012 Ending: Summer 2012

EDUC 499 (IL) **Foreign Studies** (1-12) Study of educational topics in a country other than the United States.
Effective: Summer 2007
Prerequisite:

EDUC 500 **Professional Learning Communities** (3) Defines elements of effective learning communities and explores educators’ roles as consumers and creators of research, theory, and best practices.
Effective: Spring 2008
Prerequisite:

EDUC 501 **History of American Education** (3) An examination of the rise and transformation of American public schools from pre-colonial America to the present.
Effective: Spring 1998

The Pennsylvania State University
Prerequisite:
EDUC 503 Cultural and Ethnic Groups Education (3) Approaches to teaching in an environment of differing cultures and ethnic groups.
Effective: Spring 1998
Prerequisite:
EDUC 505 Curriculum Foundations (3) Provides a comprehensive overview of the philosophical, historical, psychological, and social foundations that affect the school curriculum.
Effective: Spring 2010
Prerequisite:
EDUC 506 Curriculum Development and Instructional Design (3) Examination of theory, issues, problems, organization, and application of instructional design in planning and developing a curriculum.
Effective: Fall 2008
Prerequisite:
EDUC 508 Teaching Gifted Students in Heterogeneous Groups (3) This course is designed to help regular classroom teachers to meet the needs of gifted students in a heterogeneous classroom.
Effective: Summer 1997
Prerequisite:
EDUC 520 Learning Theory for the Classroom (3) An application of learning theories from psychological, sociological, and physiological disciplines to educational settings for children and adolescents.
Effective: Spring 2011
Prerequisite:
EDUC 539 Educational Assessment (3) This course will prepare students with the knowledge and skills necessary to monitor, assess, and report student achievement.
Effective: Fall 2008
Prerequisite:
EDUC 560 Classroom Management (3) Analysis of teaching styles, classroom behavior and interaction, organization and correlation of classroom activities and subject areas. (Requires practical application in an actual teaching situation.)
Effective: Winter 1981

EDUC 561 Psychology of Reading (3) Examination of the theoretical bases for reading which have direct practical implication for teaching reading.
Effective: Fall 2008
Prerequisite:
EDUC 562 Diagnostic Evaluation of Reading Problems (3) Utilization of formal and informal instruments and techniques appropriate in analyzing reading disabilities, grade K through 12; includes practicum.
Effective: Spring 2009
Prerequisite:
EDUC 563 Methods in Teaching Reading (3) Development of advanced diagnostic and instructional techniques for teaching reading, with emphasis on individual and small group instruction.
Effective: Fall 2008
Prerequisite:
EDUC 564 Reading Clinic (6) Culminating course for the M.Ed. degree in literacy education requiring demonstration of competency in working with children possessing reading problems.
Effective: Fall 2008
Prerequisite:
EDUC 565 Literacy and Leadership (3) Principles of supervision, organization, management, and evaluation of literacy programs will be presented.
Effective: Spring 2009
Prerequisite:
EDUC 571 Great Teachers (3) Study of one or more great teachers, e.g., Socrates, Comenius, Locke, Rousseau, Pestalozzi, Herbart, Froebel, Dewey, Kilpatrick.
Effective: Winter 1981

EDUC 572 Comparative Education: World Perspectives (3) An evaluative comparison of American education with Western and non-Western educational systems.
Effective: Winter 1981

EDUC 582 (HLHED 582) Spirituality and Culture in Health and Education Professions (3) This course focuses on the cultural aspects of spirituality and its place in the health and education professions.
Effective: Summer 2009

EDUC 583 Problems in Teaching: Selected Subject Areas (3) An analysis of a teaching problem with review of research literature to seek solutions to that problem.
Effective: Fall 1983

The Pennsylvania State University
EDUC 584 Analysis of Research: Selected Topics (3) A review and analysis of research in a specified area.
Effective: Fall 1983
Prerequisite:

EDUC 586 Educational Research Designs (3) Focuses on methods of research in educational settings to help participants become informed consumers of the educational research literature.
Effective: Fall 2008
Prerequisite:

EDUC 587 Master's Project (3) The development of an original master's project (paper, essay, production, practicum) supervised and judged by an appropriate faculty committee.
Effective: Fall 1983

EDUC 589 Problems in Urban Education (3) Independent study of selected topics related to urban education.
Effective: Fall 1983

EDUC 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

EDUC 591 Education Seminar (1-6) The capstone seminar course for the M.Ed. degree requiring an appropriate scholarly term paper.
Effective: Spring 2011
Prerequisite:

EDUC 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

EDUC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

EDUC 597C Neuroscience and Embodied Learning in the Health and Education Professions (3) Drawing from current neuroscience and cognitive science, this course explores how learning occurs through the body, in late adolescent and adult learners, with implications for the health and education professions.
Effective: Summer 2012 Ending: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
Educational Psychology (EDPSY)

EDPSY 400 Introduction to Statistics in Educational Research (3) The foundations of statistical techniques used in educational research; distributions, central tendency, variability, correlation, regression, probability, sampling, hypothesis testing.
Effective: Summer 2011

EDPSY 406 Applied Statistical Inference for the Behavioral Sciences (3) Common techniques (parametric) covered through two-factor analysis of variance (independent samples); hypothesis testing, confidence interval, power, robustness; MINITAB frequently used.
Effective: Summer 2011
Prerequisite:

EDPSY 408 (SPLED 408) Meeting Instructional Needs of English Language Learners with Special Needs (3) The course content and activities focus on instruction and assessment for English Language Learners with special needs.
Effective: Summer 2011
Prerequisite:

EDPSY 421 Learning Processes in Relation to Educational Practices (3) An introduction to the empirical study of variables and conditions that influence school learning.
Effective: Summer 2011
Prerequisite:

EDPSY 450 (PSYCH 404) Principles of Measurement (3) Scale transformation, norms, standardization, validation procedures, estimation of reliability.
Effective: Summer 2011
Prerequisite:

EDPSY 475 Introduction to Educational Research (3) Scientific method; classes of variables in educational research; the measurement of classroom behavior; survey, predictive, and experimental studies.
Effective: Summer 2011
Prerequisite:

EDPSY 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

EDPSY 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

EDPSY 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

EDPSY 506 Advanced Techniques for Analyzing Educational Experiments (3) Analytical and experimental control considerations for designs involving nested and/or crossed subjects. Analysis of variance and multiple comparisons via computers.
Effective: Summer 2011
Prerequisite:

EDPSY 507 Multivariate Procedures in Educational Research (3) Introduction to matrix algebra, computer programming, multiple regression analysis, multiple and canonical correlation, multiple discriminant analysis, classification procedures, factor analysis.
Effective: Summer 2011
Prerequisite:

EDPSY 512 Group Processes in the Classroom (3) Basic concepts and perspectives in the study of group processes; instructional group interaction; analysis of classroom behavior.
Effective: Summer 2011

EDPSY 513 Individual and Group Differences (3) Description, causes, and interpretation of individual variation over the life-span, with application to school and institutional practices.
Effective: Summer 2011
Prerequisite:

EDPSY 523 Concept Learning and Problem Solving (3-4) Theoretical-empirical trends in concept learning, problem solving, and creativity related to instructional psychology.
Effective: Summer 2011
Prerequisite:
EDPSY 524 Theories of Learning and Instruction (3) Study of major classical theories of learning and recent developments in learning and instructional theory. 
Effective: Summer 2011 
Prerequisite:

EDPSY 526 The Psychology of Reading (3) Psychological principles underlying the process of reading and comprehending, with application to instruction. 
Effective: Spring 2012 
Prerequisite:

EDPSY 527 Psychology of Adults as Learners (3) Psychological principles related to learning by adults, with application to instruction and other educational practices. 
Effective: Summer 2011 
Prerequisite:

EDPSY 528 Instructional Psychology (3) Application to instructional design of current developments in research on human development, information processing, learning strategies, memory structures, instructional processes. 
Effective: Summer 2011 
Prerequisite:

EDPSY 530 Achievement Motivation (3) Within a seminar format, this course addresses both theoretical and empirical approaches to motivation and other related affective constructs. 
Effective: Summer 2011 
Prerequisite:

EDPSY 550 Design and Construction of Psychological Measures (3) Lecture-practicum involving planning, construction, administration, and analysis of a psychological test; lectures stress construct validity, item analysis, and predictive validity. 
Effective: Summer 2011 
Prerequisite:

EDPSY 554 Theories of Psychological Measurement (3) Basic true-score and error models; their extensions to test reliability and test validity; problems of item analysis and weighting. 
Effective: Summer 2011 
Prerequisite:

EDPSY 555 (CI ED 555) Validity of Assessment Results (3) Concepts, issues, and methods of validation of educational and psychological assessment including models and approaches to validation, bias, and utility. 
Effective: Summer 2011 
Prerequisite:

EDPSY 556 Foundations and Applications of Item Response Theory (3) Unidimensional models for dichotomously scored and polytomously scored items and their applications in instrument/test development. 
Effective: Summer 2011 
Prerequisite:

EDPSY 558 Foundations and Applications of Structural Equation Modeling (3) Model specification, identification, estimation, evaluation, and modification for measurement models, path models, and full structural models. 
Effective: Summer 2012 
Prerequisite:

EDPSY 560 Contemporary Issues in the Evaluation of Educational Programs (3) Practical and theoretical issues in the planning, execution, and interpretation of program evaluations. 
Effective: Summer 2011 
Prerequisite:

EDPSY 575 Seminar in Educational Psychology (1-6) A seminar dealing with specific topics in educational psychology. Open to advanced students in the behavioral sciences. 
Effective: Summer 2011

EDPSY 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Summer 2011

EDPSY 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. 
Effective: Summer 2011

EDPSY 597A Data Analysis Workshop (3) This course is designed for students with a desire to increase their conceptual understanding of basic statistics and their proficiency with analytical techniques. This course will be held in a computer lab and the primary statistical analysis package used will be SPSS. 
Effective: Summer 2012 Ending: Summer 2012

EDPSY 597A Structural Equation Modeling (3) This course covers basic issues in Structural Equation Modeling (SEM). 
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EDPSY 600 Thesis Research (1-15) No description.

The Pennsylvania State University
EDPSY 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 2011

EDPSY 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching of Educational Psychology classes under senior faculty supervision.
Effective: Summer 2011

EDPSY 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 2011

EDPSY 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Summer 2011

Last Import from UCM: June 2, 2012 12:27 PM
Educational Technology (EDTEC)

EDTEC 400 Introduction to Instructional Technology for Educators (1-3) Use of microcomputers, video, and other media in education; models use technologies including video, audio, print, computer, and telephone.
Effective: Fall 2005
Prerequisite:

EDTEC 440 Educational Technology Integration (3) Technology integration in educational settings.
Effective: Fall 2008
Prerequisite:

EDTEC 448 Using the Internet in the Classroom (3) This course introduces students to methods and models of using the Internet effectively in their classroom.
Effective: Fall 2005
Prerequisite:

EDTEC 449 Using Video in the Classroom (3) Skills and knowledge needed to direct the use of video technologies in educational settings.
Effective: Fall 2011
Prerequisite:

EDTEC 461 Designing Computer Networks for Education (3) Applying fundamental concepts of computer networking to design effective networks for educational purposes.
Effective: Fall 2005 Ending: Fall 2012
Prerequisite:

EDTEC 462 Coordinating Technology Use in Education (3) Skills and knowledge needed to direct the use of learning technologies in educational settings.
Effective: Fall 2005 Ending: Fall 2012
Prerequisite:

EDTEC 462 Coordinating Technology Use in Education (3) Skills and knowledge needed to direct the use of learning technologies in educational settings.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

EDTEC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2010

EDTEC 498A Emerging Web 2.0 technologies and Learning (3) This course examines emerging Web 2.0 technologies and explores their application to learning and education.
Effective: Summer 2012 Ending: Summer 2012

EDTEC 561 Measuring the Impact of Technology on Learning (3) Prepares teachers to evaluate the effects of technology use.
Effective: Summer 2005
Prerequisite:

EDTEC 566 Computers as Learning Tools (3) Amplifying thinking or organizing mental functions with computers.
Effective: Fall 2006
Prerequisite:

EDTEC 594 Research Topics (1-9) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2010
Prerequisite:

EDTEC 594A Data Collection for EDTEC 566 Research Studies (1) Implement EDTEC 566 research study, collect data, and begin data analysis. IRB approval of research proposal is required.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:

EDTEC 594A Data Collection for EDTEC 566 Research Studies (1) Implement EDTEC 566 Research Study, collect data, and then begin data analysis. IRB approval of research proposal is required.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

EDTEC 594B Data Analysis for EDTEC 566 Research Studies (1) Complete data analysis for EDTEC 566 research study and begin writing research reports.

The Pennsylvania State University
EDTEC 594B Data Analysis for EDTEC 566 Research Studies (1) Complete data analysis for EDTEC 566 Research Study and begin writing research reports.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:
EDTEC 594C Research Reports for EDTEC 566 Research Studies (1) Complete research reports for EDTEC 566 research study.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:
EDTEC 594D Data Collection for EDTEC 567 Research Studies (1) Implement EDTEC 567 research study, collect data, and begin data analysis. IRB approval of research proposal is required.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:
EDTEC 594E Data Analysis for EDTEC 567 Research Studies (1) Complete data analysis for EDTEC 567 research study and begin writing research reports.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:
EDTEC 594F Research Reports for EDTEC 567 Research Studies (1) Complete Research reports for EDTEC 567 research study.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:
EDTEC 595 Internship (1-9) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships.
Effective: Summer 2010

EDTEC 596 Independent Studies (1-9) Creative projects, including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2010
Educational Theory and Policy (EDTHP)

EDTHP 401 (IL) (CI ED 401) Introduction to Comparative Education (3) Origins, nature, scope, basic literature, and methodology of comparative education. Study of sample topics.
Effective: Fall 2007
Prerequisite:

EDTHP 411 (US) Ethnic Minorities and Schools in the United States (3) Analysis of the social and cultural factors which affect educational outcomes among minority pupils, especially Blacks, Hispanics, and Indians.
Effective: Spring 2006

Effective: Spring 2005

EDTHP 416 (US) (SOC 416) Sociology of Education (3) The theoretical, conceptual, and descriptive contributions of sociology to education.
Effective: Spring 2006

EDTHP 420 Education and Public Policy (3) Focus on the development and analysis of education policy, and policy's influence on schools.
Effective: Fall 2011
Prerequisite:

EDTHP 425 Anthropology of Education (3) This course will review the origins and development of anthropology of education and its role in educational research and reform.
Effective: Summer 2007
Prerequisite:

EDTHP 427 Intelligence and Educational Policy (3) This course explores the concept of intelligence and its assessment from historical, psychological, educational and policy perspectives.
Effective: Spring 2006
Prerequisite:

EDTHP 430 History of Education in the United States (3) American educational ideas and practice critically examined in terms of their historical development and contemporary significance.
Effective: Summer 1995

EDTHP 434H Honors Teaching Experience in Leadership Jumpstart (1) Guided instruction and practical experience for teaching assistants to the Honors Leadership Jumpstart course (EDTHP 234H).
Effective: Fall 2006
Prerequisite:

EDTHP 440 (CI ED 440) Introduction to Philosophy of Education (3) Introduction to the examination of educational theory and practice from philosophical perspectives, classical and contemporary.
Effective: Fall 2007 Ending: Fall 2012
Prerequisite:

EDTHP 441 Education, Schooling, and Values (3) Studies in education and schooling as problems in value; axiological problems and positions; examination of practical applications, including moral education.
Effective: Summer 1995

EDTHP 496 Individual Studies (1-18) Creative projects supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1995

EDTHP 497 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1995

EDTHP 497A Preparing Educators for Family & Community Engagement (3) This course will explore effective family and community engagement strategies identified through research, policy and practice.
Effective: Summer 2012 Ending: Summer 2012
EDTHP 497A (CI ED 497A) **Immigration, Ethnicity, and the School** (3) This class is an introduction to theories and empirical research on various immigrant and race/ethnic groups and their schooling experience.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EDTHP 497B **Gender Issues in Education and Family** (3) From historical philosophical, and sociological perspectives, this course helps students explore relationships between gender, education, and families. With a focus on the experience of diverse groups, considerable attention is paid to questions of educational access, the history of men and women as teachers, gender bias, gender role development and families, gender and children’s literature, and strategies for teaching boys and girls in elementary classrooms. Students who have already taken EDTHP 412 may NOT take this course.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EDTHP 497D (SOC 497D) **Sociology of Family, Community, and Education** (3) This course uses sociological research to examines the roles of families, communities and the educational system in American society.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EDTHP 498 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1995

EDTHP 500 **Proseminar in Educational Theory and Policy** (3) An introduction to disciplinary and interdisciplinary studies in educational theory and policy.
Effective: Spring 2002

EDTHP 507 (CI ED 503, HI ED 503) **Ethnicity, National Identity, and Education** (3) Surveys group-oriented education policies internationally, especially comparing those of Britain, Taiwan, India.
Effective: Summer 1995

EDTHP 516 (CI ED 516) **Education and Demographic Change in the United State and Abroad** (3) Interrelationship between schooling and employment, marriage, fertility, and migration. Focus comparatively on the United States and developing countries.
Effective: Spring 1998

EDTHP 518 **Analysis of U. S. Educational Policy** (3) The interaction between educational theory and social structure, focusing on the role of practicing intellectuals in contemporary institutional settings.
Effective: Summer 1995

EDTHP 520 **Perspectives on Contemporary School Reform** (3) Examination of contemporary U.S. school reform, with a focus on contrasting theoretical perspectives and the application of policy analysis principles.
Effective: Spring 2006

EDTHP 525 **Alternative Assessment of National Educational and Health Policies** (3) Overview of alternative research strategies in education, nursing and health education studies used to study impact of national policies.
Effective: Spring 2006

EDTHP 527 **Testing and Educational Equity** (3) This course considers testing, the reasons that policymakers have widely adopted testing, and implications of testing for educational equity.
Effective: Spring 2006

EDTHP 533 **Social History and Education Policy** (3) Historical study of social dimensions in the formation of education policy.
Effective: Summer 1995

EDTHP 536 **Studies in Educational Thought** (3) Studies in the historical development of educational theory.
Effective: Summer 1995

EDTHP 538 (SOC 538) **Sociology of Education** (3) Provides students with an overview of dominant sociological theoretical perspectives on schools, schooling, and education in modern society.
Effective: Spring 2008

EDTHP 541 (CI ED 541) **Contemporary Philosophies of Education** (3) Educational theory and practice in relation to contemporary movements in philosophy.
Effective: Spring 2008

EDTHP 553 (CI ED 553, HI ED 553, SOC 553) **Educational Mobility in Comparative Perspective** (3) Role of education in social mobility, using quantitative, qualitative, and historical methods; focuses comparatively on Britain, East Asia, and South America.
EDTHP 557 (HI ED 557, SOC 557) Sociology of Higher Education (3) Reviews theory and current sociology research on student access, achievement, and governance in postsecondary education, with applications to policy analysis.
Effective: Fall 2000
Prerequisite:

EDTHP 580 Improving Educational Writing (3) Focus on components of high quality academic writing for educational research, with a special emphasis on improving the writing process.
Effective: Summer 2009

EDTHP 585 (EDLDR 585, HI ED 585) Research Design: Implications for Decisions in Higher Education (3) A capstone course on research design and analytical approaches to support decision-making in administration and policy-making.
Effective: Fall 2004
Prerequisite:

EDTHP 586 (EDLDR 586, HI ED 586) Qualitative Methods in Educational Research (3) Exploration of the theoretical framework undergirding qualitative research and its attendant practices and techniques.
Effective: Fall 2004

EDTHP 587 (EDLDR 587, HI ED 587) Education Policy and Politics (3) The political economy and bureaucratic politics of educational organizations, with special attention to the policy-making, implementation, and evaluation process.
Effective: Fall 2004

EDTHP 588 (EDLDR 588, HI ED 588) Qualitative Methods in Educational Research II (3) Advanced study of methods involved in executing and analyzing qualitative research in education.
Effective: Summer 2007
Prerequisite:

EDTHP 596 Individual Studies (1-9) Creative projects including non-thesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1995

EDTHP 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1995

Effective: Summer 2012 Ending: Summer 2012
Prerequisite:

EDTHP 597A Quantitative Studies for Education (3) Reviews existing quantitative studies in education with the emphasis on methods used, theoretical and practical implications.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EDTHP 597B City Schools and Urban Districts (3) This course focuses on key questions and issues regarding American urban districts, using historical, policy, and practitioner perspectives.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EDTHP 597C (CI ED 597C) Education of Immigrant's Children (3) This course is designed to give students a broad familiarity with sociological perspectives and research on immigration and schooling for children.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EDTHP 597D Data Analysis for Education Research (3) This course bridges applied statistics and practical work with real data. It emphasizes hands-on data preparation and analysis.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EDTHP 597E (HI ED 597E) Reviewing and Editing Education Policy and Research Journals (3) Provide advanced doctoral students with a systematic introduction to reviewing and editing policy and research journals in the field of education.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EDTHP 597G Research in Sociology of Education (3) Students will conduct research in sociology of education including extended literature review and quantitative analysis of large educational data sets.
Effective: Summer 2012 Ending: Summer 2012

EDTHP 597G Research in Comparative Education (3) This course introduces large-scale international assessment databases and demonstrates how to use these data to conduct comparative education research.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

The Pennsylvania State University
EDTHP 600 Thesis Research (1-15) No description.
Effective: Summer 1995

EDTHP 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 1995

EDTHP 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Summer 2002

EDTHP 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 1995

EDTHP 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 1995

Last Import from UCM: June 2, 2012 12:27 PM
Electrical Engineering (E E)

E E 400 Engineering Design Concepts (3) Engineering design and modelling, engineering economy, project planning, capstone project selection, and technical communication skills.
Effective: Spring 2008
Prerequisite:

E E 401 Electrical Design Projects (3) Group design projects in the areas of electronics and electrical/computer systems.
Effective: Spring 2008
Prerequisite:

E E 403M Senior Project Design (3) Project designs of electrical engineering systems, encompassing various subdisciplines within Electrical Engineering, with an emphasis on technical communications skills.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite: Concurrent: ENGL 202C

E E 403W Senior Project Design (3) Project designs of electrical engineering systems, encompassing various subdisciplines within Electrical Engineering, with an emphasis on technical communications skills.
Effective: Spring 2008
Prerequisite: Concurrent: ENGL 202C

E E 405 Capstone Proposal Preparation (1) Performing the initial research needed for the capstone course, and the preparation of the written project proposal.
Effective: Spring 2008 Ending: Summer 2012
Prerequisite:

E E 405 Capstone Proposal Preparation (1) Performing the initial research needed for the capstone course, and the preparation of the written project proposal.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

E E 406W Electrical Engineering Capstone Design (3) Project designs of analog and digital systems, interfacing, and relevant electronic circuits, with an emphasis on technical communications skills.
Effective: Spring 2008 Ending: Summer 2012
Prerequisite:

E E 406W Electrical Engineering Capstone Design (3) Project designs of analog and digital systems, interfacing, and relevant electronic circuits, with an emphasis on technical communications skills.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

E E 410 Linear Electronic Design (3) Linear circuit design via integrated circuit processes; A/D converters, switched capacitor filters, phase lock loops, multipliers, and voltage-controlled oscillators.
Effective: Spring 2008
Prerequisite:

E E 413 Power Electronics (3) Switch-mode electrical power converters. Electrical characteristics and thermal limits of semiconductor switches.
Effective: Spring 2008 Ending: Summer 2012
Prerequisite:

E E 413 Power Electronics (3) Switch-mode electrical power converters. Electrical characteristics and thermal limits of semiconductor switches.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

E E 416 (CMPEN 416) Digital Integrated Circuits (3) Analyses and design of digital integrated circuit building blocks, including logic gates, flip-flops, memory elements, analog switches, multiplexers, and converters.
Effective: Spring 2008
Prerequisite:

E E 417 (CMPEN 417) Digital Design Using Field Programmable Devices (3) Field programmable device architectures and technologies; rapid prototyping using top down design techniques; quick response systems.
Effective: Spring 2008
Prerequisite:

E E 420 Electro-optics: Principles and Devices (3) Spatially linear system and transform; diffraction theory, partial coherence theory, optical image detection, storage and display, holography.
Effective: Spring 1997
Prerequisite:

E E 421 Optical Fiber Communications (3) Operational principles of optical components, including sources, fibers and detectors, and the whole systems in optical fiber communications.
Effective: Spring 2008
Prerequisite:

E E 422 Optical Engineering Laboratory (3) Hands-on experience covering areas of optical transforms, electro-optics
devices, signal processing, fiber optics transmission, and holography.

Effective: Fall 1993
Prerequisite:

E E 424 Principles and Applications of Lasers (3) Principles of lasers—generation, propagation, detection and modulation; applications in fiber optics communication, remote sensing, holography, optical switching and processing.
Effective: Spring 2008
Prerequisite:

E E 430 Principles of Electromagnetic Fields (3) Laws of electrodynamics, boundary value problems, relativistic effects, waves in dielectrics and ferrites, diffraction and equivalence theorems.
Effective: Spring 2008
Prerequisite:

E E 432 UHF and Microwave Engineering (3) Transmission line and wave guide characteristics and components; design of UHF-microwave amplifiers, oscillators, and filters; measurement techniques; design projects.
Effective: Spring 1998
Prerequisite:

E E 438 Antenna Engineering (3) Radiation from small antennas, linear antenna characteristics, arrays of antennas, impedance concepts and measurements, multifrequency antennas, and aperture antennas.
Effective: Spring 2001
Prerequisite:

E E 439 Radiowave Propagation in Communications (3) Radiowave propagation in mobile, terrestrial, and satellite communications; applications at microwave and lower frequencies.
Effective: Spring 2008
Prerequisite:

E E 441 Semiconductor Integrated Circuit Technology (3) An overview of fundamentals of processes involved in silicon integrated circuit fabrication through class lectures and hands-on laboratory.
Effective: Spring 2008
Prerequisite:

E E 442 Solid State Devices (3) The physics of semiconductors as related to the characteristics and design of solid state electronic devices.
Effective: Spring 2008
Prerequisite:

E E 450 Signal and Image Processing (3) Linear system analysis in one-dimension and two-dimensions, emphasis on filtering; multi-dimensional signal analysis; image enhancement and reconstruction; computer simulation applications.
Effective: Spring 2008
Prerequisite:

E E 453 Fundamentals of Digital Signal Processing (3) Design of FIR and IIR filters; DFT and its computation via FFT; applications of DFT; filter implementation; finite arithmetic effects.
Effective: Spring 2008
Prerequisite:

E E 454 (CMPEN 454) Fundamentals of Computer Vision (3) Introduction to topics such as image formation, segmentation, feature extraction, shape recovery, object recognition, and dynamic scene analysis.
Effective: Spring 2008
Prerequisite:

E E 455 (CMPEN 455) An Introduction to Digital Image Processing (3) Overview of digital image processing techniques and their applications; image sampling, enhancement, restoration, and analysis; computer projects.
Effective: Spring 2008
Prerequisite:

E E 456 (E SC 456, EGEE 456) Introduction to Neural Networks (3) Artificial Neural Networks as a solving tool for difficult problems for which conventional methods are not applicable.
Effective: Spring 2008
Prerequisite:

E E 458 Digital Image Processing and Computer Vision (3) Principles of DSP and computer vision, including sensing preprocessing, segmentation, description, recognition, and interpretation.
Effective: Spring 2008
Prerequisite:

E E 460 Communication Systems II (3) Probability fundamentals, digital/analog modulation/demodulation, system noise analysis, SNR and BER calculations, optimal receiver design concepts, introductory information theory.
Effective: Spring 2008
Prerequisite:

E E 461 Communications I (4) Element of analog and digital communication systems, AM, FM, and digital modulation techniques, receivers, transmitters, and transmission systems, noise.
Effective: Spring 2008
Prerequisite:

E E 471 (AERSP 490, NUC E 490) Introduction to Plasmas (3) Plasma oscillations; collisional phenomena; transport properties; orbit theory; typical electric discharge phenomena.
Effective: Spring 2008
Prerequisite:

E E 472 (AERSP 492) **Space Astronomy and Introduction to Space Science** (3) The physical nature of the objects in the solar system; the earth's atmosphere, ionosphere, radiation belts, magnetosphere, and orbital mechanics.
Effective: Spring 2008
Prerequisite:

E E 474 **Satellite Communications Systems** (3) Overview of satellite communications systems, principles, space platforms, orbital mechanics, up/down links and link budgets, modulation techniques.
Effective: Spring 2008
Prerequisite:

E E 477 (METEO 477) **Fundamentals of Remote Sensing Systems** (3) The review of fundamental physical properties leads into discussions of various techniques, including imaging, spectroscopy, radiometry, and active sensing.
Effective: Spring 2008
Prerequisite:

E E 480 **Linear Systems: Time Domain and Transform Analysis** (3) Signals and systems representations, classifications, and analysis using: Difference and Differential equations, Laplace transform, z-transform, Fourier series, FT, FFT, DFT.
Effective: Spring 2008
Prerequisite:

E E 481 **Control Systems** (4) Classical/modern approaches to system analysis/design; time/frequency domain modeling, stability, response, optimization, and compensation.
Effective: Spring 2008
Prerequisite:

E E 482 **Introduction to Digital Control Systems** (3) Sampling and hold operations; A/D and D/A conversions; modeling of digital systems; response evaluation; stability; basis of digital control; examples.
Effective: Spring 2008
Prerequisite:

E E 483 **Introduction to Automation and Robotics Systems** (3) Introduction to robotics systems with emphasis on robotic motion and control, and robotic components such as actuators and sensors.
Effective: Summer 2008
Prerequisite:

E E 484 **Control System Design** (3) Analysis and design of automatic control systems using time, frequency domain and state variable methods.
Effective: Spring 2008
Prerequisite:

E E 485 **Energy Systems and Conversion** (3) Overview of energy alternatives available, and study of theory of operation and models of major energy conversion devices.
Effective: Spring 2008
Prerequisite:

E E 487 **Electric Machinery and Drives** (3) Analysis of variable-speed drives comprised of AC electric machines, power converters, and control systems.
Effective: Summer 2007
Prerequisite:

E E 488 **Power Systems Analysis I** (3) Fundamentals, power transformers, transmission lines, power flow, fault calculations, power system controls.
Effective: Spring 2008
Prerequisite:

E E 489 **Power Systems Analysis II** (3) Symmetrical components, unbalanced networks, unsymmetrical faults, unbalanced operation of rotating machines, transient transmission line modeling, system protection.
Effective: Spring 2008
Prerequisite:

E E 494 **Senior Thesis** (1-9) Students must have approval of a thesis adviser before scheduling this course.
Effective: Fall 1993

E E 494H **Senior Thesis** (1-9) Students must have approval of a thesis adviser before scheduling this course.
Effective: Spring 2008

E E 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008
Prerequisite:

E E 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1993

The Pennsylvania State University
E E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1993

E E 497A Principles of Signal Integrity (3) Transmission lines and reflections, lossy lines, rise time, material properties, cross talk in transmission lines. Time and frequency domain measurements.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

E E 497B IC Based Electronics Design (3) Design and applications of electronic circuits and systems using operational amplifiers and analog integrated circuits.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite: Concurrent: E E 311

E E 497B Probability and Stochastic Processes for Electrical Engineers (3) This statistics elective, specifically for EE students, presents probability theory/applications used in communications and other areas of EE.
Prerequisite:

E E 497E Space Systems Engineering Seminar (1) This 1-credit seminar course is part of the Space Systems Engineering Certificate program.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

E E 497E Software-Defined Radio (3) Software-defined Radio (SDR) combines elements of communication systems and digital signal processing to create a software-based communication system.
Prerequisite: Concurrent: E E 453

E E 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

E E 500 Colloquium (1) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2008

E E 510 Linear Integrated Circuits (3) Design of monolithic, thin-film, and hybrid linear integrated circuits; D.C., video, tuned, r.f., and microwave applications. Emphasis on reliability.
Effective: Spring 2008
Prerequisite:

Effective: Summer 1997
Prerequisite:

E E 521 Fiber Optics and Integrated Optics (3) Theories and applications of linear and nonlinear optical phenomena in optical fibers and integrated optical devices.
Effective: Spring 2008
Prerequisite:

E E 522 Electro-Optics Laboratory (3) Basic concepts and fundamentals of light diffraction, optical signal processing, and holography.
Effective: Fall 1993
Prerequisite:

E E 524 Lasers and Optical Electronics (3) Study of several advanced nonlinear optical phenomena, laser propagation, optical and optoelectronic devices, principles, and applications.
Effective: Spring 2008
Prerequisite:

E E 526 Nonlinear Optical Materials (3) Mechanisms of polarization nonlinearity, nonlinear optical processes and analyses, optoelectronic materials and their device application.
Effective: Spring 2012
Prerequisite:

E E 531 Engineering Electromagnetics (3) Electromagnetic field theory fundamentals with application to transmission lines, waveguides, cavities, antennas, radar, and radio propagation.
Effective: Spring 2008
Prerequisite:

E E 534 Conformal Antennas (3) Introduction to advanced analysis and design techniques as well as applications for conformal antennas mounted on planar and curved surfaces.
Effective: Spring 2008
Prerequisite:

E E 535 Boundary Value Methods of Electromagnetics (3) Theory and application of boundary value problems in engineering electromagnetics; topics include microwave and optical waveguides, radiation, and scattering.
Effective: Spring 2008
Prerequisite:

E E 537 Numerical and Asymptotic Methods of Electromagnetics (3) Finite difference time domain, geometric theory of diffraction and method of moments applied to antennas and scattering.
Effective: Summer 1995

E E 538 Antenna Engineering (3) In-depth studies of synthesis methods, aperture sources, broadband antennas, and signal-processing arrays.
Effective: Fall 1993
Prerequisite:

E E 541 Manufacturing Methods in Microelectronics (3) Methods, tools, and materials used to process advanced silicon integrated circuits.
Effective: Spring 2008
Prerequisite:

E E 542 Semiconductor Devices (3) Characteristics and limitations of bipolar transistors, diodes, transit time, and bulk-effect devices.
Effective: Spring 2008
Prerequisite:

E E 543 Ferroelectric Devices (3) Theoretical background of ferroelectric devices, practical materials, device designs, drive/control techniques, and typical applications.
Effective: Summer 2009

E E 544 Micromechatronics (3) Theoretical background of solid state actuators, practical materials, device designs, drive/control techniques and typical applications.
Effective: Summer 2009

E E 546 Field-Effect Devices (3) The physical background, characteristics, and limitations of surface field-effect and junction field-effect devices and related structures.
Effective: Spring 2008
Prerequisite:

E E 547 Dielectric Devices (3) Applications of insulator physics and devices based on insulator properties.
Effective: Spring 2008
Prerequisite:

E E 549 Acoustic Wave Devices (3) Examines materials commonly used for acoustic wave devices, fundamentals of acoustic waves and resonance modes, and characteristics of these devices.
Effective: Fall 2008
Prerequisite:

E E 550 (M E 550) Foundations of Engineering Systems Analysis (3) Analytical methods are developed using the vector space approach for solving control and estimation problems; examples from different engineering applications.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

E E 551 Wavelets, Filter Banks, and Multi-resolution Analysis (3) Gram-Schmidt orthogonalization and orthonormal bases, filter banks, orthogonal wavelets and multiresolution analysis, fast wavelet transforms, various applications.
Effective: Spring 2008
Prerequisite:

E E 552 (CSE 583) Pattern Recognition--Principles and Applications (3) Principles and applications decision-theoretic classification, discriminant functions, pattern processing and feature selection, syntactic pattern recognition, shape analysis and recognition.
Effective: Spring 2008

E E 553 Topics in Digital Signal Processing (3) Parametric modeling, spectral estimation, efficient transforms and convolution algorithms, multirate processing, and selected applications involving non-linear and time-variant filters.
Effective: Fall 1993
Prerequisite:

E E 554 (CSE 586) Topics in Computer Vision (3) Discussion of recent advances and current research trends in computer vision theory, algorithms, and their applications.
Effective: Spring 2008
Prerequisite:

E E 555 (CSE 585) Digital Image Processing II (3) Advanced treatment of image processing techniques; image restoration, image segmentation, texture, and mathematical morphology.
Effective: Spring 2008
Prerequisite:

E E 556 Graphs, Algorithms, and Neural Networks (3) Examine neural networks by exploiting graph theory for offering alternate solutions to classical problems in signal processing and control.
Effective: Spring 1996
Effective: Fall 1993
Prerequisite:

Effective: Spring 2008
Prerequisite:

E E 561 Information Theory (3) Mathematical measurement of information; information transfer in discrete systems; redundancy, efficiency, and channel capacity; encoding systems.
Effective: Spring 2008
Prerequisite:

Effective: Summer 2000
Prerequisite:

E E 564 (CSE 554) Error Correcting Codes for Computers and Communication (3) Block, cyclic and convolutional codes; circuits and algorithms for decoding; application to reliable communication and fault-tolerant computing.
Effective: Spring 2008
Prerequisite:

E E 565 (CSE 515) Reliable Data Communications (3) Discussion of problems and solutions for ensuring reliable and efficient communication over wired and wireless links and data networks.
Effective: Spring 2008
Prerequisite:

E E 567 Wireless and Mobile Communications (3) Development of key wireless networks systems analysis and design tools utilizing telecommunications principles; current and emerging mobile wireless techniques.
Effective: Spring 2008
Prerequisite:

E E 568 Digital Communications I (3) Linear and nonlinear digital modulation techniques; performance in additive Gaussian noise channel; continuous phase modulation; carrier acquisition and recovery.
Effective: Spring 2008
Prerequisite: Concurrent: E E 560

E E 569 Digital Communications II (3) Baseband pulse transmission; baseband systems optimization; bandlimited channels performance in ISI; equalization; MLSE and ISI; fading channels; diversity; CDMA.
Effective: Spring 2008
Prerequisite:

E E 573 Constitution of the Ionosphere (3) Properties of neutral and ionized atmosphere above 60 km; photochemical processes; solar, meteoric perturbations of the ionosphere; large-scale movements in ionization.
Effective: Spring 2008

E E 574 Propagation Through Random Media (3) RF/optical wave propagation through turbulent, turbid, and heterogeneous media (atmosphere/ionosphere/sea). Impacts and mitigation discussed for various scenarios.
Effective: Spring 2008
Prerequisite:

E E 576 Inversion Techniques in Remote Sensing (3) Introduce skills to address a wide variety of inverse problems such as found in atmospheric sensing, geosciences, and acoustics.
Effective: Spring 2008
Prerequisite:

Effective: Spring 2008
Prerequisite:

E E 580 Linear Control Systems (3) Continuous and discrete-time linear control systems; state variable models; analytical design for deterministic and random inputs; time-varying systems stability.
Effective: Spring 2008
Prerequisite:

E E 581 Optimal Control (3) Variational methods in control system design; classical calculus of variations, dynamic programming, maximum principle; optimal digital control systems; state estimation.
Effective: Spring 2008
Prerequisite:

E E 582 Adaptive and Learning Systems (3) Adaptive and learning control systems; system identification; performance indices; gradient, stochastic approximation, controlled random search methods; introduction to pattern recognition.
Effective: Spring 2008
Prerequisite:

E E 584 (M E 558) Robust Control Theory (3) Fundamentals of Robust Control Theory with emphasis on stability, performance analysis, and design.
Effective: Spring 2008
Prerequisite:

E E 587 (M E 559) Nonlinear Control and Stability (3) Design of nonlinear automatic control systems; phase-plane methods; describing functions; optimum switched systems; Liapunov stability; special topics in stability.
Effective: Spring 2008
Prerequisite:

E E 588 Power System Control and Operation (3) Steady-state and dynamic model of synchronous machines, excitation systems, unit commitment, control of generation, optimal power flow.
Effective: Spring 2008
Prerequisite:

E E 594 Research Projects (1-3) Supervision of individual research projects leading to M.S. or M.Eng. papers. Written and oral reports are required.
Effective: Summer 1998

E E 596 Individual Studies (1-9) Creative projects including non-thesis research which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1993

E E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 1993

E E 597A Organic Optoelectronics (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

E E 597A Semiconductor Device Fundamentals (3) Fundamentals of semiconductor materials and devices; recent advances, especially in organic and polymeric devices; nano-semiconductor devices.
Prerequisite:

E E 597C Advanced Semiconductor Material Systems (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

E E 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2008

Effective: Fall 1993

E E 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1993

E E 602 Supervised Experience in College Teaching (3 per semester/maximum of 6) College Teaching Experience
Effective: Summer 2012

Effective: Fall 1993

E E 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1993

Last Import from UCM: June 2, 2012 12:27 PM
Elements Of Clin Res (ELCLR)

ELCLR 700 Elements of Clinical Research (3) This interactive course covers the fundamentals of clinical research, logistic and ethical issues, manuscript and grant writing, and presentation training.

Effective: Fall 1999

Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Emergency Med-Hy (EMED)

EMED 740 Emergency Medicine Ultrasound (5) This course provides hands-on exposure to bedside ultrasound image acquisition and interpretation in the Emergency Department.
Effective: Spring 2010
Prerequisite:

EMED 752 Emergency Medicine Acting Internship (5) Supervised experience in the management of acute medical and surgical conditions in the emergency care unit.
Effective: Fall 2008
Prerequisite:

EMED 754 Toxicology Elective (5) Toxicology admissions and consults; weekly two-hour conferences; poison center sign-out rounds; exposure to the most common toxicologic poisonings; research opportunities.
Effective: Spring 2002
Prerequisite:

EMED 756 Emergency Medicine Elective for Third Year Students (2.5) Introduction for the 3rd year medical student to various aspects of Emergency Medicine.
Effective: Summer 2009
Prerequisite:

EMED 796 Emergency Medicine Independent Studies (5) Emergency Medicine Independent Studies
Effective: Fall 2008
Prerequisite:

EMED 797 Emergency Medicine Special Topics (5) Emergency Medicine Special Topics
Effective: Fall 2008
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Endocrinology-Hy (END)

END 731 Endocrinology (3) These areas will be studied: Pituitary Disease; Thyroid Disease; Hyper-thyroidism; Sexual Development; disorders of Calcium and Phosphorous; Adrenal Disease; Diabetes Mellitus; Hypoglycemia; and Normal and Abnormal Growth.
Effective: Fall 2001
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Energy and Geo-Environmental Engineering (EGEE)

EGEE 401 Energy in a Changing World (3) Energy is in transition, with increased international energy demand and increasing environmental pressures. Energy transitions, approaches, and outcomes are addressed. Effective: Spring 2008
Prerequisite:

EGEE 411 Energy Science and Engineering Lab (3) A comprehensive introduction to classic and modern laboratory skills and experimentation of relevance to energy science and engineering practice. Effective: Spring 2008
Prerequisite:

EGEE 412 Green Engineering & Environmental Compliance (3) Material and energy flows as they relate to industrial systems, environmental concerns, pollution prevention, and the development of clean technologies. Effective: Summer 2007
Prerequisite:

EGEE 420 Hydrogen and Fuel Cells (3) Course will cover the fundamental principles of electrochemical engineering, hydrogen production and storage, and the design and application of the main types of fuel cells. Effective: Fall 2009
Prerequisite:

EGEE 430 (M E 430) Introduction to Combustion (3) Concepts related to laminar and turbulent premixed and nonpremixed combustion with applications to propulsion and stationary systems. Effective: Fall 2009
Prerequisite:

Prerequisite:

EGEE 436 Modern Thermodynamics for Energy Systems (3) Thermodynamics of external fields, theory of stability and fluctuations, irreversible and non-linear thermodynamics, and bifurcation theory and their applications in energy and environmental processes are discussed. Effective: Fall 2009
Prerequisite:

EGEE 437 Design of Solar Energy Conversion Systems (3) A review of fundamental concepts in solar energy conversion including photovoltaic (PV) and solar thermal conversion systems. Effective: Spring 2010
Prerequisite:

EGEE 438 Wind and Hydropower Energy Conversion (3) Principles of sustainability and renewable energy conversion with emphasis on wind and hydrokinetic energy resources. Effective: Spring 2012
Prerequisite:

EGEE 441 Electrochemical Energy Conversion (3) Course covers fundamental principles of electrochemistry, including electrochemical thermodynamics, kinetics, catalysis, and corrosion and focuses on applications such as fuel cells, batteries, and photovoltaics. Each application covers: principles of method, criteria determining performance, present state of development, and advantages/disadvantages. Laboratory demonstration of the performance (current-voltage) measurements of an electrochemical converter is scheduled in this course. Effective: Fall 2009 Ending: Summer 2012
Prerequisite:

EGEE 441 Electrochemical Engineering Fundamentals (3) Course covers fundamental principles of electrochemistry, including electrochemical thermodynamics, kinetics, catalysis, and corrosion and focuses on applications such as fuel cells, batteries, and photovoltaics. Each application covers: principles of method, criteria determining performance, present state of development, and advantages/disadvantages. Laboratory demonstration of the performance (current-voltage) measurements of an electrochemical converter is scheduled in this course. Effective: Fall 2012 Future: Fall 2012
Prerequisite:

EGEE 451 Energy Conversion Processes (3) Emphasizes processes for conversion of fossil fuels, nuclear and biomass to other fuel forms as transportation fuels and electricity. Effective: Summer 2007
Prerequisite:

EGEE 455 Materials for Energy Applications (3) Overview of key principles and technologies for materials relevant to energy applications, including membranes, catalysis, supercapacitors, adsorbents, and semi-conductors. Effective: Summer 2007
Prerequisite:

EGEE 456 (E E 456, E SC 456) Introduction to Neural Networks (3) Artificial Neural Networks as a solving tool for difficult problems for which conventional methods are not applicable.
Effective: Spring 2008  
Prerequisite:  
EGEE 464W Energy Design Project (3) A team and capstone design project on an industrial energy-related problem.  
Effective: Spring 2008  
Prerequisite:  
EGEE 470 Air Pollutants from Combustion Sources (3) Generation of pollutants in combustion chambers; reduction by combustion control; pre- and post-combustion treatment of fuels and effluents.  
Effective: Fall 2009  
Prerequisite:  
EGEE 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.  
Effective: Summer 1999  

EGEE 494A Research Project (2) Supervised research on a selected topic of energy science and engineering and preparation of written and oral presentation of the research results.  
Effective: Summer 2007  
Prerequisite:  

EGEE 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.  
Effective: Fall 2007  

EGEE 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.  
Effective: Summer 1999  

EGEE 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Summer 1999  

EGEE 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.  
Effective: Summer 1999  

EGEE 497A Chemistry and Processing of Biomass for Alternative Fuel Production (3) The course introduces the chemistry and processing of various biomass sources in order to produce liquid fuels and materials.  
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012  

EGEE 497B Mine Transportation and Haulage Systems (2) Introduction to various mining loading and haulage systems.  
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012  

EGEE 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.  
Effective: Summer 1999  

EGEE 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.  
Effective: Summer 2005  

EGEE 500 Engineering Physics of Energy and Geo-Environmental Systems (3) Momentum, heat and mass transport phenomena in fluids and solids, including phase equilibria.  
Effective: Spring 2005  
Prerequisite:  

EGEE 510 Engineering Chemistry of Energy and Geo-Environmental Systems (3) Chemical and electrochemical equilibria, surface and interfacial phenomena and chemical kinetics, in natural and engineered systems.  
Effective: Spring 2005  
Prerequisite:  

EGEE 520 Mathematical Modeling of Energy and Geo-Environmental Systems (3) Physical and reactive chemical modeling, model formulation and solution, validation and verification.  
Effective: Spring 2005  
Prerequisite:  

EGEE 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.  
Effective: Summer 1999  

EGEE 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or
EGEE 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1999

EGEE 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1999

EGEE 597A **Advanced Electrochemical Engineering** (3) This course is for graduate students who would like to improve their skills and knowledge in electrochemical engineering and methods.
Effective: Summer 2012 Ending: Summer 2012

EGEE 597B **Solar Energy Conversion** (3) A review of fundamental concepts and systems dynamics simulations in solar energy conversion including photovoltaic and solar thermal systems.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EGEE 597D (MATSE 597D) **Nanoscale Energy and Environmental Engineering** (3) The course will cover the synthesis, characterization and applications of nanomaterials to energy generation, storage, conversion, conservation, control and environmental engineering. Selected topics in nanomaterial toxicity and nanomedicine will be included.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EGEE 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1999

EGEE 599 (IL) **Foreign Studies** (1-2 per semester, maximum of 24) Full-time graduate-level foreign study at overseas.
Effective: Summer 2005

EGEE 600 **Thesis Research** (1-15) No description.
Effective: Summer 2005

EGEE 602 **Supervised Experience in College Teaching** (1-3 per semester, maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Summer 2004

EGEE 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 2006

Last Import from UCM: June 2, 2012 12:27 PM
Energy and Mineral Engineering (EME)

EME 407 **Electrochemical Energy Storage** (3) Electrochemical concepts in energy storage devices, cell construction and materials involved in batteries and capacitors, electrochemical testing methods and applications.
Effective: Spring 2012
Prerequisite:

EME 432 (GEOG 432) **Energy Policy** (3) Analysis, formulation, implementation, and impacts of energy-related policies, regulations, and initiatives.
Effective: Summer 2010
Prerequisite:

EME 444 **Global Energy Enterprise** (3) Industry perspective on the resources, technologies, engineering approaches and externalities involved in satisfying worldwide energy demand profitably and sustainably.
Effective: Summer 2010
Prerequisite:

EME 460 **Geo-resource Evaluation and Investment Analysis** (3) The course covers engineering evaluation of geo-resources, present value and rate of return analysis, mineral property and reserve estimation, and cost estimation and engineering economy concepts applied to geo-resources including energy and minerals.
Effective: Spring 2011
Prerequisite:

EME 466 **Energy and Sustainability in Society** (3) Capstone course in energy technology and policy options for reduced-carbon communities. Covering agent/stakeholder relations, sustainability, communication and public engagement.
Effective: Summer 2010
Prerequisite:

EME 500 **Energy and Mineral Project Investment Evaluation** (3) Emphasizes enterprise level cost review, estimation, and prediction methodology and investment evaluation as a means for project engineering management.
Effective: Spring 2009

EME 510 **Health and Safety Engineering** (3) Develop the ability to use scientific and engineering principles to evaluate and control health and safety hazards in the workplace.
Effective: Spring 2009

EME 525 **Theory and Practice of Policy Analysis for Engineers** (3) The course provides a broad introduction to analytical methods commonly used in science, technology, and energy policy analysis.
Effective: Summer 2008

EME 570 (MATSE 570) **Catalytic Materials** (3) Preparation and characterization of solid catalytic materials and the relationships between their surface, defect, and electronic properties and catalytic activity.
Effective: Summer 2008
Prerequisite:

EME 580 **Integrative Design of EME Systems** (5) Problem-based, integrative, and collaborative learning to solve interdisciplinary problems on energy and mineral systems based on engineering and business principles.
Effective: Spring 2009 Ending: Summer 2012
Prerequisite:

EME 580 **Interdisciplinary Team Project in EME Systems** (3) Problem-based, integrative, and collaborative learning to solve interdisciplinary problems on energy and mineral systems based on engineering and business principles.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

EME 581 **Research and Geostatistics Methods** (3) Presents methods essential for the conduct and analysis of scientific research and spatial characterization in energy and mineral engineering disciplines.
Effective: Summer 2012

EME 590 (F SC 590, MNG 590, P N G 590) **Colloquium** (1-3) Continuing seminars that consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.
Effective: Spring 2009

EME 600 **Thesis Research** (1-12) Thesis research culminating into the doctoral degree in Energy and Mineral Engineering.
Effective: Summer 2008

EME 601 **Thesis Preparation** (0) Thesis research after successful comprehensive exam culminating into the doctoral degree in Energy and Mineral Engineering.
Effective: Summer 2008

The Pennsylvania State University
Energy, Environmental, and Mineral Economics (ENNEC)

ENNEC 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2002
Prerequisite:

ENNEC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2002

ENNEC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2001

ENNEC 497A Electricity Demand Response (2) This class explores electricity demand response, where customers utilize the "smart grid" to reduce demand during periods of high prices.
Effective: Summer 2012 Ending: Summer 2012

ENNEC 499 (IL) Foreign Study--Mineral Industries (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

ENNEC 540 Economic Analysis of Energy Markets (3) This course uses economic analysis to explain the history of world energy and its regulation since 1945.
Effective: Spring 2002
Prerequisite:

ENNEC 541 Economics of Energy and the Environment (3) Economic analysis of topics such as global warming, alternative energy sources and new technologies, and resources and sustainable development.
Effective: Spring 2002
Prerequisite:

Effective: Spring 2002
Prerequisite:

ENNEC 590 (I H S 590) Colloquium (1-3) Continuing seminars which consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.
Effective: Spring 2009

ENNEC 596 Individual Studies (1-9) Creative projects, including nonthesis research which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2002

ENNEC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 2002

ENNEC 600 Thesis Research (1-15) No description.
Effective: Spring 2002

ENNEC 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 2002

ENNEC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised and graded teaching experience.
Effective: Spring 2002

ENNEC 610 Thesis Research Off Campus (1-15) No description.
Effective: Spring 2002

ENNEC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 2002
Engineering (ENGR)

ENGR 407 Technology-Based Entrepreneurship (3) Technology innovation coupled with business planning and development. Effective: Spring 2011
Prerequisite:

ENGR 408 (US) Leadership Principles (2) An introduction to an exploration of theories and principles of leadership, supplemented by presentations given by industry and government leaders. Effective: Spring 2006

ENGR 409 (US) Leadership in Organizations (3) Development of leadership skills essential for engineers to guide colleagues or an organization in a productive direction. Effective: Spring 2006

ENGR 411 Entrepreneurship Business Basics (3) Three critical entrepreneurship skills are covered for non-business majors: business finance, intellectual property, and marketing. Effective: Summer 2002
Prerequisite:

ENGR 421 Materials Properties Measurements II (4) Materials powder characterization, compaction and densification techniques, density measurements, micro structural evaluation, thermal and electrical properties of materials. Effective: Summer 2010
Prerequisite:

ENGR 425 (IST 425, MGMT 425) New Venture Creation (3) Via problem-based learning, teams define new business ventures to meet current market needs, develop business plans, and present to investors. Effective: Spring 2011
Prerequisite:

ENGR 426 (IST 426, MGMT 426) Invention Commercialization (3) Working with Penn State inventions selected by the Intellectual Property Office, student teams define an optimum commercialization path each technology. Effective: Spring 2011
Prerequisite:

ENGR 450 Materials Design and Applications (3) Engineering design considerations for materials selection, organization of property trends of materials families, materials design strategies and property compatibility. Effective: Summer 2010
Prerequisite:

ENGR 490W Senior Design I (1) Analysis of environmental impacts on a design, designing products for the global environment and discussion on engineering ethics and professionalism. Effective: Summer 2010 Ending: Summer 2012
Prerequisite:

ENGR 490W Senior Design I (1) Analysis of environmental impacts on a design, designing products for the global environment and discussion on engineering ethics and professionalism. Effective: Fall 2012 Future: Fall 2012
Prerequisite:

ENGR 491W Senior Design II (3) Capstone of research projects from conception to prototype through industry sponsored collaboration on common technical interests between faculty and student. Effective: Summer 2010
Prerequisite:

ENGR 493 Individual Leadership Experience (1) Approved individual project or internship for students to practice the leadership skills developed in the Engineering Leadership Development Minor. Effective: Fall 2007
Prerequisite:

ENGR 494 Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 1994

ENGR 494H Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007

ENGR 495 Engineering Co-Op Work Experience III (1-3) A supervised work experience where the student is employed in an engineering position in industry or government. (To be offered only for SA/Un grading.) Effective: Fall 1987
Prerequisite:
ENGR 495A **Engineering Cooperative Education** (1-3 per semester) A supervised work experience in research, industry or government relevant to a student's major.
Effective: Summer 2003
Prerequisite:

ENGR 495I (IL) **Engineering International Cooperative Education** (1-3 per semester) A supervised work experience in research, industry or government relevant to a student's major.
Effective: Spring 2006
Prerequisite:

ENGR 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 1993

ENGR 496A **Independent Study in Engineering Leadership Topics** (0.5) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ENGR 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1988

ENGR 497A **HESE Reflection and Research Dissemination** (3) This post-travel course focuses on reflection on topics related to HESE ethics and grassroots diplomacy and workshops on research dissemination.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

ENGR 497C **Global Engineering Teams Seminar** (1) Preparation for a career in international engineering enterprise. Prerequisite for students traveling internationally with the Engineering Leadership Development Program. Students must earn a B or better in this class to qualify for travel.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

ENGR 497D **International Leadership of Enterprise and Development Practicum -- Hungary** (0.5) This practicum is hosted by Corvinus University in Budapest; students attend presentations on Entrepreneurship/Leadership/Business by invited lecturers, tours of local businesses and collaborative activities by PSU and Corvinus University students.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:

ENGR 497F (SCIED 497F) **Fundamentals of Science, Technology & Engineering** (3) A course focusing on physics content, engineering design principles, and elementary science education pedagogy.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ENGR 497I **Seminar for Teaching Interns** (0.5) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ENGR 497K **Social Entrepreneurship** (3) Explore intricacies of social innovation. Work in teams to develop feasibility plans for social ventures in the US, Asia and Africa.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

ENGR 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

ENGR 594 **Master's Paper Research** (1-3) Investigation of a specific engineering problem and development of a scholarly written report in partial fulfillment of requirements for a master's degree in engineering.
Effective: Fall 1985

ENGR 595 **Engineering Internship** (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2011

ENGR 595A **Engineering Internship** (1 per semester/maximum of 4) A supervised work experience in a professionally relevant position in research, industry, or government.
Effective: Spring 2005

ENGR 595I **International Engineering Internship** (1 per semester/maximum of 4) A supervised work experience in a professionally relevant position in research, industry, or government.
Effective: Spring 2005 Ending: Summer 2012
ENGR 595 International Engineering Internship (0.5 per semester/maximum of 4) A supervised work experience in a professionally relevant position in research, industry, government or service sector.
Effective: Fall 2012 Future: Fall 2012

ENGR 596 Independent Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2011

ENGR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1993

ENGR 597A Principles of Engineering Systems (3) Engineering systems at the intersection of technology, management, and public policy.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ENGR 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2011

ENGR 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2008

ENGR 600 Thesis Research (1-15) No description.
Effective: Fall 1983

ENGR 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Opportunity for supervised and graded experience for graduate students in the College of Engineering.
Effective: Fall 1983

ENGR 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

ENGR 888 Seminar for Engineering Teaching Assistants (1) Study of recently established knowledge and methodologies as applied to practice. Significant interaction among students and with instructor is expected.
Effective: Fall 2009

ENGR 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2008

Last Import from UCM: June 2, 2012 12:27 PM
Engineering Design (EDSGN)

EDSGN 401 Engineering Systems Design (3) Design requirements for complex systems: trade-offs between market opportunities and technology; translation of priorities and needs into an operational concept.
Effective: Spring 2012
Prerequisite:

EDSGN 410 Robotics Design and Applications (4) Introduction to robotics, with emphasis on the design of robotics systems through multidisciplinary integration of electrical, mechanical, and software components.
Effective: Spring 2012
Prerequisite:

EDSGN 452 Projects in Community Service Engineering (1-2) Students engage in research and design of appropriate solutions to real-life community-based problems and project management of such projects.
Effective: Summer 2008
Prerequisite:

EDSGN 479 (IE 479) Human Centered Product Design and Innovation (3) Consumer product design for a global market, incorporating human factors principles and user desires in a multicultural perspective.
Effective: Summer 2010
Prerequisite:

EDSGN 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2004

EDSGN 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

EDSGN 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2004

EDSGN 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2004

EDSGN 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2004

EDSGN 497A HESE Field Experience (0.5) The HESE Field Experience is a hands-on integrated learning, research and entrepreneurial engagement experience for students that have been working on various HESE ventures in the Spring semester.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:

EDSGN 497B Solidworks Fundamentals (3) Fundamentals of solidworks.
Effective: Summer 2012 Ending: Summer 2012

EDSGN 497C Design for Developing Communities (1) A seminar series related to the context and integrated design of HESE ventures in US, Kenya, Tanzania, Nicaragua and India.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EDSGN 497D Open Source 3D Printing (3) Students build, test, and redesign open-course 3D printers, design models, and run a 3D printing service.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

EDSGN 497E Sensor and Controller System (3) Hands-on course covers the interfacing of various sensors and actuators to computers to build proof-of-concept prototypes of innovative products.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

EDSGN 497G Current CAD Applications (3) Students will use the latest version of AutoCAD as a design tool for 2D and
EDSGN 497G Current CAD Applications (3) Students will use the latest version of AutoCAD as a design tool for 2D and 3D applications in a variety of disciplines.
Effective: Summer 2012 Ending: Summer 2012

EDSGN 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2008

EDSGN 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

EDSGN 547 (M E 547) Designing for Human Variability (3) Statistics, optimization, and robust design methodologies to design products and environments that are robust to variability in users.
Effective: Summer 2009

EDSGN 549 (I E 549) Design Decision Making (3) Complexity of design-making; state-of-the-art methods and tools.
Effective: Summer 2011

EDSGN 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2004

EDSGN 594 Research Topics (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2004

EDSGN 595 Internship (1-9) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2004

EDSGN 596 Individual Studies (1-9) Creative projects, including nontesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2004

EDSGN 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2004

EDSGN 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2004

EDSGN 599 (IL) Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 2, 2012 12:27 PM
Engineering Mechanics (E MCH)

E MCH 400 Advanced Strength of Materials and Design (3) Combined stresses; energy methods; special problems in bending and torsion; plates; thin-walled structures; buckling and stability; design projects.
Effective: Spring 2008
Prerequisite:

E MCH 402 Applied and Experimental Stress Analysis (3) Experimental design of structural and machine components; photoelasticity, electrical resistance strain gauge techniques, Moire techniques, interferometry, holography.
Effective: Spring 2008
Prerequisite:

E MCH 403 Strength Design in Materials and Structures (4) Determination, interpretation, significance, and application of mechanical properties such as plastic flow, fatigue strength, creep resistance, and dynamic properties.
Effective: Spring 2008
Prerequisite:

Effective: Spring 2008
Prerequisite:

E MCH 409 Advanced Mechanics (3) Continuation of E MCH 012; Euler's equations for the rotation of a rigid body, gyroscopic motion, impulsive motion, Lagrangian mechanics.
Effective: Spring 2008
Prerequisite:

E MCH 412 Experimental Methods in Vibrations (3) Systems of one or more degrees of freedom, mechanical vibrations, vibration properties of materials, vibration techniques in nondestructive testing.
Effective: Fall 2007
Prerequisite:

E MCH 416H Failure and Failure Analysis of Solids (3) Examination and analysis of the various modes of failure of solid materials.
Effective: Spring 2008
Prerequisite:

E MCH 440 (MATSE 440) Nondestructive Evaluation of Flaws (3) Methods and limitations of nondestructive evaluation of mechanical flaws; optical, acoustical, electromagnetic, x-ray, radiography, thermography, and dye techniques.
Effective: Spring 2008
Prerequisite:

Effective: Spring 2008
Prerequisite:

E MCH 461 (M E 461) Finite Elements in Engineering (3) Computer modeling and fundamental analysis of solid, fluid, and heat flow problems using existing computer codes.
Effective: Spring 2011
Prerequisite:

E MCH 470 (M E 470) Analysis and Design in Vibration Engineering (3) Application of Lagrange's equations to mechanical system modeling, multiple-degree-of-freedom systems, experimental and computer methods; some emphasis on design applications.
Effective: Spring 2008
Prerequisite:

E MCH 471 Engineering Composite Materials (3) Properties, manufacture, forms of composites; micromechanics; orthotropic lamina properties; laminate analysis; theories; failure analysis; thermal, environmental effects.
Effective: Spring 2008
Prerequisite:

E MCH 473 (AERSP 473) Composites Processing (3) An introduction to the principles of mechanics governing manufacturing, computer-aided design, and testing of composite materials and structures.
Effective: Summer 1988
Prerequisite:

E MCH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

E MCH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject
which may be topical or of special interest.

Effective: Fall 1983

E MCH 500 (M E 560) **Solid Mechanics** (3) Introduction to continuum mechanics, variational methods, and finite element formulations; application to bars, beams, cylinders, disks, and plates.

Effective: Fall 2007

E MCH 506 **Experimental Stress Analysis** (3) Experimental methods of stress determination, including photoelasticity, stress coat, and electric strain gauge techniques; stress analogies; strain rosettes for combined stress determinations.

Effective: Summer 2011

Prerequisite:

E MCH 507 **Theory of Elasticity and Applications** (3) Equations of equilibrium and compatibility; stresses and strains in beams, curved members, rotating discs, thick cylinders, torsion and structural members.

Effective: Spring 2008

Prerequisite:

E MCH 509 **Theory of Plates and Shells** (3) Bending and buckling of plates; elastic foundations; deformation of shells, multilayer shells, stress and stability analysis, weight optimization, application problems.

Effective: Spring 2008

Prerequisite:

E MCH 514 (E SC 514) **Engineering Science and Mechanics Seminar** (1 per semester) Current literature and special problems in engineering mechanics.

Effective: Spring 1999

E MCH 516 **Mathematical Theory of Elasticity** (3) Fundamental equations and problems of elasticity theory; uniqueness theorems and variational principles; methods of stress functions and displacement potential; applications.

Effective: Winter 1978

Prerequisite:

E MCH 520 **Advanced Dynamics** (3) Dynamics of a particle and of rigid bodies; Newtonian equations in moving coordinate systems; Lagrange's and Hamilton's equations of motion; special problems in vibrations and dynamics.

Effective: Spring 2008

Prerequisite:

E MCH 521 (ACS 521) **Stress Waves in Solids** (3) Recent advances in Ultrasonic Nondestructive Evaluation: waves; reflection and refraction; horizontal shear; multi-layer structures; stress; viscoelastic media; testing principles.

Effective: Spring 1998

Prerequisite:

E MCH 523 **Ultrasonic Nondestructive Evaluation** (3) Methods, techniques, applications of Ultrasonic Nondestructive Evaluation wave propagation; signal processing and pattern recognition applied to UNDE; practical laboratory demonstrations.

Effective: Spring 1998

E MCH 524A **Mathematical Methods in Engineering** (3) Special functions, boundary value problems, eigenfunctions and eigenvalue problems; applications to engineering systems in mechanics, vibrations, and other fields.

Effective: Spring 1999

Prerequisite:

E MCH 524B **Mathematical Methods in Engineering** (3) Boundary-value problems in curvilinear coordinates, integral transforms; application to diffusion, vibration, Laplace and Helmholtz equations in engineering systems.

Effective: Spring 1999

Prerequisite:

E MCH 524C **Mathematical Methods in Engineering** (3) Green's functions applied to problems in potentials, vibration, wave propagation and diffusion with special emphasis on asymptotic methods.

Effective: Spring 1999

Prerequisite:

E MCH 527 **Structural Dynamics** (3) Dynamic behavior of structural systems; normal modes; input spectra; finite element representation of frameworks, plates, and shells; impedance; elastic-plastic response.

Effective: Fall 2007

Prerequisite:

E MCH 528 **Experimental Methods in Vibrations** (3) Investigation of one or more degrees of freedom, free and forced mechanical vibrations, vibration properties of materials, nondestructive testing.

Effective: Fall 2007

Prerequisite:

E MCH 530 **Mechanical Behavior of Materials** (3) Engineering materials mechanical responses; stress/strain in service context of temperature, time, chemical environment; mechanical testing characterization; design applications.

Effective: Spring 1999

E MCH 531 **Theory of Plasticity and Applications** (3) Yield condition; plastic stress-strain relations; theory of slip-line
fields; applications to bending, torsion, axially symmetric bodies, metal processing.

Effective: Winter 1978
Prerequisite:

E MCH 532 Fracture Mechanics (3) Stress analysis of cracks; stable and unstable crack growth in structures and materials; materials fracture resistance.
Effective: Fall 1983
Prerequisite:

E MCH 533 Scanned Image Microscopy (3) Imaging principles, quantitative data acquisition techniques, and applications for scanned image microscopy are discussed.
Effective: Summer 2003
Prerequisite:

E MCH 534 (MATSE 563) Micromechanisms of Fracture (3) Mechanisms of fracture and their relationship to loading conditions, environment, flow behavior, processing history, and microstructure.
Effective: Spring 2003
Prerequisite:

E MCH 535 (MATSE 564) Deformation Mechanisms in Materials (3) Deformation of crystalline/amorphous solids and relationship to structure; elastic, viscoelastic and plastic response over a range of temperatures and strain rates.
Effective: Fall 2004
Prerequisite:

E MCH 540 Introduction to Continuum Mechanics (3) Algebra and analysis of tensors; balance equations of classical physics; the linear theories of continuum mechanics.
Effective: Winter 1978

E MCH 546 Theory of Viscoelasticity and Applications (3) Linear and nonlinear viscoelastic theories; generalized isotropic and anisotropic viscoelastic stress-strain relations.
Effective: Winter 1978
Prerequisite:

E MCH 550 Variational and Energy Methods in Engineering (3) Application of variational calculus and Hamilton’s principle to various conservative and nonconservative systems; closed form and approximate technique.
Effective: Spring 1984
Prerequisite:

E MCH 560 Finite Element Analysis (3) General theory; application to statics and dynamics of solids, structures, fluids, and heat flow; use of existing computer codes.
Effective: Spring 2008
Prerequisite:

E MCH 562 (A B E 562) Boundary Element Analysis (3) Numerical solution of boundary value problems using fundamental solutions; application to problems in potential theory, diffusion, and elastostatics.
Effective: Spring 1996
Prerequisite:

E MCH 563 (M E 563) Nonlinear Finite Elements (3) Advanced theory of semidiscrete formulations for continua and structures; emphasizes dynamic and nonlinear problems.
Effective: Spring 1996
Prerequisite:

E MCH 571 (AERSP 571, M E 571) Foundations of Structural Dynamics and Vibration (3) Modeling approaches and analysis methods of structural dynamics and vibration.
Effective: Fall 2007
Prerequisite:

E MCH 581 Micromechanics of Composites (3) A rigorous application of mechanics to the understanding of relationships between microstructure and thermomechanical properties of composites.
Effective: Summer 2011
Prerequisite:

E MCH 582 Metal Matrix Composites (3) Processing and properties of metal matrix composites, with emphasis on fabrication techniques, interfaces, fatigue, fracture, and micromechanics.
Effective: Fall 1988
Prerequisite:

E MCH 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1996

E MCH 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

E MCH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
E MCH 600 Thesis Research (1-15) No description.
Effective: Fall 1983

E MCH 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

E MCH 602 (E SC 602) Supervised Experience in College Teaching (1-3 per semester/maximum of 6) No description.
Effective: Fall 2003

Effective: Fall 1983

E MCH 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Engineering Mgmt (ENGMT)

ENGMT 501 Engineering Management Science (3) Mathematical models involving optimization, simulation and forecasting to provide quantitative solutions to engineering management problems; scheduling, distribution, inventory control.
Effective: Summer 2009

ENGMT 510 Economics and Financial Studies for Engineers (3) Economic feasibility of projects, systems and products. Project budgets, estimation, return on investment, supply and demand, and earned value management.
Effective: Summer 2009

ENGMT 530 Engineering Law (3) Overview of the legal system and legal issues applied to engineering: contracts, bidding, proposals, torts, professional liability, the intellectual property.
Effective: Summer 2009

ENGMT 539 Engineering Management Strategy (3) Project- and discussion-based capstone to the engineering management program.
Effective: Summer 2009
Prerequisite:

ENGMT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2011

ENGMT 597A Special Topics: Engineering for Energy and the Environment (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Engineering Science (E SC)

E SC 400H Electromagnetic Fields (3) Irrotational and solenoidal fields, potentials, vector and scalar field and wave equations, harmonic and wave functions in various coordinates, radiation.
 Effective: Fall 2003
 Prerequisite:

E SC 404H Analysis in Engineering Science (3) Unified application of coordinate transformations; Laplace’s, heat, and wave equations to boundary value problems and problems of continua in engineering.
 Effective: Spring 2001
 Prerequisite:

 Effective: Fall 1993
 Prerequisite:

 Effective: Spring 2007
 Prerequisite: Concurrent: MATH 220

E SC 410H Senior Design Project, Honors (3) Design and synthesis in the context of a specific design project undertaken during the senior year.
 Effective: Summer 1998
 Prerequisite:

E SC 411H Senior Research and Design Project II, Honors (3) Design and synthesis in the context of a specific design project undertaken during the senior year.
 Effective: Spring 2007
 Prerequisite:

E SC 414M Elements of Material Engineering (3) Structure and imperfections in engineered materials; their influence on properties, behavior, and processing. Applications of metals, ceramics, polymers, and composites.
 Effective: Spring 2008
 Prerequisite:

E SC 417 (MATSE 417) Electrical and Magnetic Properties (3) Electrical conductivity, dielectric properties, piezoelectric and ferroelectric phenomena; magnetic properties of ceramics.
 Effective: Summer 2006
 Prerequisite:

E SC 419 Electronic Properties and Applications of Materials (3) The course covers the electrical, optoelectronic, dielectric, and other electron-based properties of solids, semiconductors in particular, and their engineering/ device applications.
 Effective: Summer 2006
 Prerequisite:

E SC 433H Engineering Science Research Laboratory Experience (1) Hands-on lab experience and exposure to campus-wide interdisciplinary experimental research. Experimental probability and statistics. Applications across all Engineering Science disciplines.
 Effective: Spring 2007
 Prerequisite:

E SC 445 Semiconductor Optoelectronic Devices (3) The course will present the basic engineering science and technology involved in modern semiconductor optoelectronic devices.
 Effective: Spring 2007
 Prerequisite:

E SC 450 (MATSE 450) Synthesis and Processing of Electronic and Photonic Materials (3) The materials science of applying thin film coatings, etching, and bulk crystal growth; includes materials transport, accumulation, epitaxy, and defects.
 Effective: Fall 2005
 Prerequisite:

E SC 455 Electrochemical Methods in Corrosion Science and Engineering (3) The objective of the course is to give students hands-on experience in assessing environmental degradation of engineering materials.
 Effective: Summer 2011
 Prerequisite:

E SC 456 (E E 456, EGEE 456) Introduction to Neural Networks (3) Artificial Neural Networks as a solving tool for difficult problems for which conventional methods are not available.
 Effective: Spring 2008
 Prerequisite:

The Pennsylvania State University
E SC 475 (MATSE 475) **Particulate Materials Processing** (3) Fundamentals of processing particulate materials including production, characterization, handling, compaction, and sintering of metal, carbide, intermetallic, and composite powders.
Effective: Spring 2008
Prerequisite:

E SC 481 **Elements of Nano/Micro-electromechanical Systems Processing and Design** (3) Interdisciplinary fundamentals of nano/microelectromechanical systems (NEMS/ MEMS), including design, fabrication and machining of miniature systems. Draws from mechanics, science and materials.
Effective: Spring 2008
Prerequisite:

E SC 482 **Micro-Optoelectromechanical Systems (MOEMS) and Nanophotonics** (3) Principles and applications of Micro-Optoelectromechanical and Nanophotonic devices and systems.
Effective: Summer 2006
Prerequisite:

E SC 483 (MATSE 483) **Simulation and Design of Nanostructures** (3) Introduction to computer simulation techniques and their applications at the physical/life sciences interface.
Effective: Fall 2007
Prerequisite:

E SC 484 **Biologically Inspired Nanomaterials** (3) Advances in biomolecular-based Science and technology at the physical/life sciences interface.
Effective: Summer 2006
Prerequisite:

E SC 494 **Senior Thesis** (1-9) Students must have approval of a thesis adviser before scheduling this course.
Effective: Summer 1986

E SC 494H **Senior Thesis** (1-9) Students must have approval of a thesis adviser before scheduling this course.
Effective: Fall 2007

E SC 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

E SC 496A **Business Opportunities in Engineering Independent Study** (1) The principal goal of this course is to inform engineering students of business opportunities in Engineering.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

E SC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

E SC 497A **Business Opportunities in Engineering** (2) The principal goal of this course is to inform engineering students of business opportunities in Engineering.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

E SC 497B **Multidisciplinary Design Project** (3) Multidisciplinary teams engage students from other departments to provide a broad perspective typical of real-life experiences.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

Effective: Spring 2008
Prerequisite:

E SC 502 **Semiconductor Heterojunctions and Applications** (3) Theory, fabrication techniques, and electronic applications of semiconductor heterojunctions, including metal-semiconductor and electrolyte-semiconductor junctions.
Effective: Fall 1989
Prerequisite:

E SC 511 **Engineering Materials for Energy Conversion and Storage** (3) This course treats engineering materials and systems employed in conventional and unconventional direct energy conversion and energy storage.
Effective: Summer 1981

E SC 514 (E MCH 514) **Engineering Science and Mechanics Seminar** (1 per semester) Current literature and special problems in engineering mechanics.
Effective: Summer 1998

E SC 536 **Wave Propagation and Scattering** (4) Survey of analytical and numerical methods for solving acoustic, elec-
magnetic and elastic wave propagation and scattering problems. 
Effective: Spring 1988

Prerequisite:

E SC 537 Multiple Scattering Theories and Dynamic Properties of Composite Materials (3) Acoustic, dielectric, elastic dynamic properties; periodic, random composites; wave propagation and scattering; attenuation, dispersion; super-viscous absorption; sonar, optical, ultrasonic applications.
Effective: Summer 1988

E SC 540 Laser Optics Fundamentals (3) Selected topics in optics and laser physics, and their application in laser-materials processing.
Effective: Spring 2005

E SC 541 Laser-Materials Interactions (3) Laser beam interactions with metallic, ceramic, polymeric and biological materials: effects of wavelength, power, spatial and temporal distributions of intensity.
Effective: Spring 2005

E SC 542 Laser-Integrated Manufacturing (3) Integration of lasers into manufacturing processes: laser-assisted surface modifications; laser joining; laser-based material shaping processes.
Effective: Spring 2005
Prerequisite:

Effective: Spring 2005
Prerequisite:

E SC 544 Laser Laboratory (3) Laser systems for materials processing, safety, critical processing parameters, diagnostic measurements, automation, sensing and control.
Effective: Spring 2005
Prerequisite:

E SC 577 Engineered Thin Films (3) Broad overview of the preparation-characterization-property relations for thin films used in a wide range of industrial applications.
Effective: Spring 1993
Prerequisite:

E SC 581 Microelectromechanical Systems/Smart Structures (3) Methods of micromachining, smart structure fabrication. Design, modeling for physical, chemical, biomedical microsensors/actuators. Smart structures and microsystems packaging/integration.
Effective: Spring 1998
Prerequisite:

E SC 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1996

E SC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

E SC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

E SC 597A Neural Engineering: Fundamentals of Interfacing with Brain (3) This will give an overview of the field of neural engineering with a focus on the fundamentals of neural interfaces and their applications.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

E SC 597B Fundamentals of Data Analysis in Neuroscience (3) This course will introduce modern mathematical and computational techniques used to analyze electrophysiological and optical neural data.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

E SC 597C Multiscale Modeling of Materials (3) This course aims at familiarizing the students with different modeling techniques in materials science.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

E SC 597E Acoustofluidics and Optofluidics (3) Fundamentals and latest technologies in the fields of acoustofluidics (microfluidics and acoustics) and optofluidics (microfluidics and optics).
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

The Pennsylvania State University
E SC 597F Fundamentals of Bio-Architecture: Materials, Shapes, Branches and Flow (3) Biological architecture observed in nature with emphasis on symmetry and topology will be discussed with several examples from recent literature. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

E SC 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 1983

E SC 602 (E MCH 602) Supervised Experience in College Teaching (1-3 per semester/maximum of 6) No description. Effective: Fall 2003

E SC 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
English (ENGL)

ENGL 400 **Authors, Texts, Contexts** (3 per semester, maximum of 6) Styles, cultural milieus, critical perspectives toward particular English-language authors and/or movements they represent, and the idea of authorship. (Section subtitles may appear in the Schedule of Courses.)
Effective: Fall 1997
Prerequisite:

ENGL 401 **Studies in Genre** (3 per semester, maximum of 6) English-language texts exemplifying particular genres, with attention to critical theories, historical development, rhetorical strategies, and social, cultural, and aesthetic values. (Section subtitles may appear in the Schedule of Courses.)
Effective: Fall 1997
Prerequisite:

ENGL 401W **Creative Writing Theory** (3) Theories of art and creativity which inform the making of literary works.
Effective: Fall 2007
Prerequisite:

ENGL 402 **Literature and Society** (3 per semester, maximum of 6) Texts confronting social, political, technological, or other issues in the English-speaking world. (Section subtitles may appear in the Schedule of Courses.)
Effective: Fall 1997
Prerequisite:

ENGL 403 **Literature and Culture** (3 per semester, maximum of 6) Historical, theoretical, and practical issues within cultural studies in relation to English-speaking texts. (Section subtitles may appear in the Schedule of Courses.)
Effective: Fall 1997
Prerequisite:

ENGL 404 **Mapping Identity, Difference, and Place** (3 per semester, maximum of 6) Ethnicity, gender, class, race with reference to theoretical inquiry into identity, difference, and place in English-language literatures. (Section subtitles may appear in the Schedule of Courses.)
Effective: Fall 1997
Prerequisite:

ENGL 405 **Taking Shakespeare From Page to Stage** (3) Students experience a Shakespeare play as a text to be explicated and as a script to be performed.
Effective: Summer 2003
Prerequisite:

ENGL 407 **History of the English Language** (3) Historical and structural study of developments in English sounds, forms, inflections, syntax, derivations, and meanings.
Effective: Spring 1987
Prerequisite:

ENGL 409 **Composition Theory and Practice for Teachers** (3) An overview of the theory and practice of writing for teachers, with emphasis on the writing process.
Effective: Summer 2000
Prerequisite: Concurrent: EDUC 452

ENGL 412 **Advanced Fiction Writing** (3 per semester/maximum of 6) Advanced study of the techniques of fiction writing; regular practice in writing the short story; group discussion of student work.
Effective: Spring 1992
Prerequisite:

ENGL 413 **Advanced Poetry Writing** (3 per semester/maximum of 6) Advanced study of the techniques of poetic composition; regular practice in writing poetry; group discussion of student work.
Effective: Spring 1992
Prerequisite:

ENGL 414 **Biographical Writing** (3) Writing of biography and autobiography, character sketches, “profiles,” and literary portraits; analysis and interpretations of source materials.
Effective: Spring 1997
Prerequisite:

ENGL 415 **Advanced Nonfiction Writing** (3 per semester/maximum of 6) Advanced study of the principles of nonfiction; substantial practice in writing and submitting magazine articles for publication.
Effective: Spring 1992
Prerequisite:

ENGL 416 **Science Writing** (3 per semester/maximum of 6) Prepares scientists and writers to gather, interpret, and present scientific information to the layman with clarity and accuracy.
Effective: Spring 2001
Prerequisite:

ENGL 417 **The Editorial Process** (3) The process of editing from typescript through final proof.
Effective: Summer 2011
Prerequisite:

ENGL 418 Advanced Technical Writing and Editing (3 per semester/maximum of 6) Preparing and editing professional papers for subject specialists and for others interested in careers as writers or editors.
Effective: Fall 1987
Prerequisite:

ENGL 419 Advanced Business Writing (3) Preparing and editing reports and presentations common to business, industry, and government.
Effective: Fall 1987
Prerequisite:

ENGL 420 Writing for the Web (3) Analysis and composition of informative, persuasive, and "creative" Web texts, based on rhetorical principles; no prior Web writing experience required.
Effective: Spring 2002
Prerequisite:

ENGL 421 Advanced Expository Writing (3) Develops skill in writing expository essays, with particular attention to style. Intended for liberal arts majors.
Effective: Spring 1987
Prerequisite:

ENGL 422 Fiction Workshop (3 per semester/maximum of 6) Practice and criticism in the composition of the short story and the novel.
Effective: Spring 1985
Prerequisite:

ENGL 423 Poetry Writing Workshop (3 per semester/maximum of 6) Extensive practice in writing poetry; consideration of contemporary poetic forms; selected readings.
Effective: Spring 1985
Prerequisite:

ENGL 424 (ENVST 424) Creative Writing and the Natural World (3) Creative writing workshop focused on the environment and related issues.
Effective: Summer 2011
Prerequisite:

ENGL 425 Nonfiction Workshop (3 per semester/maximum of 6) Extensive writing of nonfiction for publication; an introduction to the principles of writing the nonfiction book.
Effective: Spring 1985
Prerequisite:

ENGL 426 (US) (LTNST 426) Chicana and Chicano Cultural Production: Literature, Film, Music (3) An in-depth study of Chicana/Chicano literature, film, and music from the inception of the Chicano Movement (1965-1975) to the present.
Effective: Spring 2007
Prerequisite:

ENGL 427 (J ST 427) Topics in Jewish American Literature (3) An in-depth examination of important themes, writers, and/or historical developments in Jewish Literature of the United States.
Effective: Spring 2009
Prerequisite:

ENGL 428 (US) (AAS 428) Asian American Literatures (3 per semester/maximum of 6) A seminar on the literatures and cultures of Asian America, with attention to forms of geographic, historical, and ethnic diversity.
Effective: Summer 2010

ENGL 429 (CMLIT 429) New Media and Literature (3) New media literary genres; critical discussion of creative works in digital media.
Effective: Summer 2010

ENGL 430 The American Renaissance (3) Studies in the works and the interrelationships of writers such as Emerson, Hawthorne, Poe, Thoreau, Whitman, Melville, and Dickinson.
Effective: Spring 1995
Prerequisite:

ENGL 431 (US) (AM ST 475) Black American Writers (3 per semester, maximum of 6) A particular genre or historical period in the development of Black American literature.
Effective: Fall 2007
Prerequisite:

ENGL 432 The American Novel to 1900 (3) Such writers as Hawthorne, Melville, Stowe, Mark Twain, James, Crane, Chopin, and others.
Effective: Spring 1992
Prerequisite:

ENGL 433 The American Novel: 1900-1945 (3) Such writers as Wharton, Dreiser, Cather, Fitzgerald, Faulkner, Hemingway, Hurston, Wright, and others.
Effective: Spring 1992
Prerequisite:
ENGL 434 (AM ST 472) **Topics in American Literature** (3 per semester) Focused study of a particular genre, theme, or problem in American literature. (May be repeated for credit.)
Effective: Fall 2007
Prerequisite:

ENGL 435 **The American Short Story** (3) Development of the short story as a recognized art form, with emphasis on major writers.
Effective: Spring 1984
Prerequisite:

ENGL 436 **American Fiction Since 1945** (3) Representative fiction by such writers as Barth, Bellow, Ellison, Heller, Mailer, Morrison, Nabokov, Oates, O’Connor, Pynchon, Updike, Walker.
Effective: Spring 1992
Prerequisite:

ENGL 437 **The Poet in America** (3) American poets such as Bradstreet, Taylor, Poe, Emerson, Whitman, Dickinson, Frost, Eliot, Stevens, Hughes, Brooks, Moore, Williams, Plath, Rich, Lowell.
Effective: Spring 1992
Prerequisite:

ENGL 438 **American Drama** (3) Development from the colonial period to playwrights such as O’Neill, Wilder, Hellman, Miller, Williams, Albee, Shepard, Norman, Wilson, and others.
Effective: Spring 1992
Prerequisite:

ENGL 439 **American Nonfiction Prose** (3) Major prose writers such as Franklin, Emerson, Thoreau, Fuller, Henry Adams, Mailer, Baldwin, McCarthy, Dillard, Didion, Angelou, and others.
Effective: Spring 1992
Prerequisite:

ENGL 440 **Studies in Shakespeare** (3) Intensive study of a single genre, topic, or critical approach to selected plays.
Effective: Summer 1991
Prerequisite:

ENGL 441 **Chaucer** (3) The principal narrative poems and their background.
Effective: Spring 1984
Prerequisite:

ENGL 442 **Medieval English Literature** (3) Study of major works and genres of medieval English literature, exclusive of Chaucer.
Effective: Spring 1992
Prerequisite:

ENGL 443 **The English Renaissance** (3) Such writers as More, Sidney, Spenser, Shakespeare, Donne, Jonson, Bacon, and Marvell.
Effective: Spring 1984
Prerequisite:

ENGL 444 **Shakespeare** (3) Selected tragedies, comedies, and histories.
Effective: Spring 1984
Prerequisite:

ENGL 445 **Shakespeare’s Contemporaries** (3) Selected plays by Shakespeare’s major predecessors and contemporaries: Kyd, Marlowe, Jonson, Webster, Marston, Middleton, and others.
Effective: Spring 1984
Prerequisite:

ENGL 446 **Milton** (3) Analysis of principal poems and their background.
Effective: Spring 1984
Prerequisite:

Effective: Spring 1995
Prerequisite:

ENGL 448 **The English Novel to Jane Austen** (3) Novelists such as Defoe, Richardson, Fielding, Smollett, Sterne, and Austen.
Effective: Spring 1995
Prerequisite:

ENGL 449 (US;IL) **Women Poets** (3) Study of major writings by women poets; instructor chooses emphasis, language, and period.
Effective: Fall 2007
Prerequisite:

ENGL 450 **The Romantics** (3) Poets such as Blake, Wordsworth, Coleridge, Keats, Shelley, and Byron; also prose by writers such as Hazlitt, Lamb, and DeQuincey.
Effective: Spring 1995
Prerequisite:
ENGL 451 Literary Modernism in English (3) Survey of literary modernism in English and English translation in a variety of genres, including poetry, fiction, and drama. 
Effective: Fall 2007
Prerequisite:

ENGL 452 The Victorians (3) Poets such as Tennyson, Browning, Arnold, and Hopkins; also prose by writers such as Carlyle, Mill, Ruskin, and Arnold.
Effective: Spring 1995
Prerequisite:

ENGL 453 Victorian Novel (3) Novelists such as the Brontes, Thackeray, Dickens, George Eliot, Meredith, and Hardy.
Effective: Spring 1995
Prerequisite:

ENGL 454 Modern British and Irish Drama (3) From Wilde and Shaw to the present season.
Effective: Fall 2004
Prerequisite:

ENGL 455 Topics in British Literature (3) Focused study of a particular genre, theme, or problem in British literature. (May be repeated for credit.)
Effective: Fall 2001
Prerequisite:

ENGL 456 British Fiction, 1900-1945 (3) Major writers such as Conrad, Lawrence, Mansfield, Forster, Joyce, Woolf, Waugh, Greene, Bowen, Beckett, and others.
Effective: Spring 1995
Prerequisite:

ENGL 457 British Fiction Since 1945 (3) Readings in British fiction since World War II.
Effective: Spring 1995
Prerequisite:

ENGL 458 Twentieth-Century Poetry (3) Poets writing in English such as Yeats, Pound, Eliot, Frost, Auden, Stevens, Plath, Bishop, Brooks, H.D., and others.
Effective: Spring 1995
Prerequisite:

ENGL 461 (US) The Vernacular Roots of African American Literature (3) The relationship between oral tradition and literary texts and the double consciousness of African American voice in "print."
Effective: Summer 2005
Prerequisite:

ENGL 462 (US) (WMNST 462) Reading Black, Reading Feminist (3) Female identity and its construction in textual representations of gender, class, color, and cultural difference in English-language literatures.
Effective: Summer 2005
Prerequisite:

Effective: Summer 2005
Prerequisite:

ENGL 466 (US) African American Novel I (3) Thematic, structural, and stylistic characteristics of the African American novel from residually oral forms to satiric realism.
Effective: Summer 2005
Prerequisite:

ENGL 467 (US) African American Novel II (3) Thematic, stylistic, and structural characteristics of the African American novel from naturalism to modernism and postmodernism.
Effective: Summer 2005
Prerequisite:

ENGL 468 (US) African American Poetry (3) African American poetry within the contexts of the black oral tradition and transformed European literary tradition.
Effective: Summer 2005
Prerequisite:

ENGL 469 (US) (AAA S 469) Slavery and the Literary Imagination (3) The impact of slavery on the petitions, poetry, slave narratives, autobiographies, and novels of African Americans.
Effective: Summer 2005 Ending: Summer 2012
Prerequisite:

ENGL 469 (US) (AF AM 469) Slavery and the Literary Imagination (3) The impact of slavery on the petitions, poetry, slave narratives, autobiographies, and novels of African Americans.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

ENGL 470 Rhetorical Theory and Practice (3) Application of certain rhetorical principles to problems in composition. Writing exercise. Designed as preparation for the teaching of composition.
Effective: Spring 1995
Prerequisite:
ENGL 471 Rhetorical Traditions (3 per semester, maximum of 6) Introduces major traditions of rhetorical inquiry and their relevance for English studies. (Section subtitles may appear in the Schedule of Courses.) Effective: Fall 1997
Prerequisite:

ENGL 472 Current Theories of Writing and Reading (3 per semester, maximum of 6) Investigates models of textual production and reception current within English studies. (Section subtitles may appear in the Schedule of Courses.) Effective: Fall 1997
Prerequisite:

ENGL 473 Rhetorical Approaches to Discourse (3 per semester, maximum of 6) Practices the criticism of written texts from selected rhetorical perspectives. (Section subtitles may appear in the Schedule of Courses.) Effective: Fall 1997
Prerequisite:

ENGL 474 Issues in Rhetoric and Composition (3 per semester, maximum of 6) Examines selected topics in the field of rhetoric and composition. (Section subtitles may appear in the Schedule of Courses.) Effective: Fall 1997
Prerequisite:

ENGL 477 Teaching Children's Literature (3) Teaching Children's Literature in light of recent literary pedagogy, the history of childhood, and critical approaches to Children's Literature. Effective: Fall 2007
Prerequisite:

ENGL 479 Business or Technical Writing Practicum (1-3) Practical experience applying business or technical writing principles, working with advanced business, science, or engineering students on classroom projects. Effective: Fall 2007
Prerequisite:

ENGL 480 Communication Design for Writers (3) This course explores visual design, non-verbal communication, and software packages used in professional settings to most effectively present written communications. Effective: Summer 2005
Prerequisite:

ENGL 481 Literary Theory: Historical Perspectives (3) Selected topics in the history of literary criticism and theory within the English-language tradition. Effective: Summer 1994
Prerequisite:

ENGL 482 Contemporary Literary Theory and Practice (3 per semester, maximum of 6) Contemporary literary theories and their implication for critical practice as applied to British, American, and other English-language literary works. Effective: Summer 1992
Prerequisite:

ENGL 482W Contemporary Literary and Cultural Theory (3) Contemporary literary and cultural theories and their implication for critical practice as applies to a variety of texts, e.g. literary, linguistic, visual, multimedia, and/or popular. Effective: Fall 2007
Prerequisite:

ENGL 483 Problems in Critical Theory and Practice (3) Intensive study of one or more recent theoretical approaches as applied to British, American, and other English-language literary works. Effective: Summer 1994
Prerequisite:

ENGL 484 James Joyce (3) Analysis of principal works and their background. Effective: Fall 2007
Prerequisite:

ENGL 485 Australian and New Zealand Literature and Culture (3) Questions of nationality, identity, gender, race, class, colonialism, and postcolonialism in these literatures. Effective: Summer 1995
Prerequisite:

ENGL 486 (IL) The World Novel in English (3) Studies in the novel, written in English, by writers outside of the United States and Great Britain. Effective: Fall 2007
Prerequisite:

ENGL 487W Senior Seminar (3) Issues, themes, periods, critical theories, etc., that invite students to use prior English studies, limited to seniors majoring in English. Effective: Summer 1997
Prerequisite:

ENGL 488 (IL) (CMLIT 488) Modern Continental Drama (3) From Ibsen to the drama of today: Strindberg, Chekhov, Hauptmann, Pirandello, Ionesco, Beckett, Genet, and others. Effective: Spring 2006
Prerequisite:

ENGL 489 (WMNST 489) British Women Writers (3) A study of selected British women writers.
ENGL 490 (US;IL) (WMNST 490) **Women Writers and Their Worlds** (3) American and British literature written from the perspective of women.

**Prerequisite:**

ENGL 491 **The Capstone Course in Professional Writing** (3) This culminating course for Professional Writing majors concentrates on reflective analyses, design, and presentation of documents in the development of professional portfolios.

**Prerequisite:**

ENGL 492 (AM ST 476, WMNST 491) **American Women Writers** (3) A study of selected American women writers.

**Prerequisite:**

ENGL 493 (AM ST 493) **The Folktale in American Literature** (3) A survey of the literary uses of the folktale and legendary materials, with particular concentration on the literature of America.

**Prerequisite:**

ENGL 494 **Senior Thesis in English** (1-6) Senior English (ELISH) majors write a thesis arranged with in-charge person and submit it to a faculty committee for appraisal.

**Prerequisite:**

ENGL 494H **Senior Thesis in English** (1-6) Senior English (ELISH) majors write a thesis arranged with in-charge person and submit it to a faculty committee for appraisal.

**Prerequisite:**

ENGL 495 **Internship** (3-12) Supervised practicum in fields appropriate to the English major.

**Effective:** Spring 2008

**Prerequisite:**

ENGL 496 **Independent Studies** (1-18) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

**Effective:** Fall 1983

ENGL 496A **Autors, Texts, Contexts** (1-6) Study the styles, cultural milieus, critical perspectives and literary contexts of English language and English-in-translation authors and films.

**Effective:** Summer 2012 Ending: Summer 2012

ENGL 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

**Effective:** Fall 1983

ENGL 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

**Effective:** Fall 1992

ENGL 499 (IL) **Foreign Study--English** (3-6) Studies abroad in English language and/or literature.

**Effective:** Summer 2005

ENGL 501 **Materials and Methods of Research** (3) Materials and techniques of research in English and American literary history; form and content of these. Required of all graduate students with an English major.

**Effective:** Fall 1983

ENGL 502 **Theory and Teaching of Composition** (3) Study of grammar, logic, rhetoric, and style in their applicability to teaching composition.

**Effective:** Winter 1978

ENGL 503 (LL ED 503) **Research Methods in Composition** (3) Introduction to the issues and methods of empirical research in composition.

**Effective:** Fall 1993

ENGL 504 **Rhetoric and Poetics** (3) Historical relations between rhetorical theory and poetics; approaches to rhetorical criticism of poetic discourse.

**Effective:** Summer 1995

ENGL 506 **The English Language** (3) A problem-centered approach to literary and oral forms of English, utilizing
historical and analytic perspectives.
Effective: Winter 1978

ENGL 507 English Composition Studies (3) An overview of composition studies, with particular attention to the schools of writing pedagogy.
Effective: Spring 2001
Prerequisite:

ENGL 510 Scholarly Editing: Theory and Practice (3) Study of editorial theory from McKerrow and Greg to the present; experience in scholarly editing and manuscript study.
Effective: Fall 1989
Prerequisite:

ENGL 511 Thesis Workshop and Professional Writing (3) Professional writing for graduate students.
Effective: Summer 2008

ENGL 512 The Writing of Fiction (3 per semester/maximum of 15) Supervised workshop in advanced techniques of writing fiction.
Effective: Fall 1996

ENGL 513 The Writing of Poetry (3 per semester/maximum of 15) For the student with considerable experience in writing poetry; a workshop devoted to advanced poetic technique.
Effective: Fall 1996

ENGL 515 The Writing of Nonfiction (3 per semester/maximum of 15) Supervised workshop in advanced nonfiction techniques.
Effective: Fall 1996

ENGL 521 Old English Language (3) An introduction to the main features of the Old English language; readings in simple Old English prose and poetry.
Effective: Winter 1978

ENGL 522 Beowulf (3) Reading and critical analysis.
Effective: Winter 1978
Prerequisite:

ENGL 530 The Literature of Biography and Autobiography (1-3 per semester, maximum of 6) Study of biographical and autobiographical theory and practice through analysis of major English and American works in each genre.
Effective: Spring 1992

ENGL 540 Studies in Elizabethan Prose and Poetry (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include figures such as Spenser and Sidney.
Effective: Summer 1997

ENGL 541 Medieval Studies (1-3 per semester, maximum of 12) Studies in medieval English literature. Topics studied might include medieval romances, drama, or major figures aside from Chaucer.
Effective: Summer 1997

ENGL 543 Studies in Early Seventeenth-Century Literature (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Donne, Herbert, Jonson, Bacon.
Effective: Summer 1997

ENGL 545 Chaucer (1-3 per semester, maximum of 12) Major and minor works of Geoffrey Chaucer. The works studied will vary from year to year.
Effective: Summer 1997

ENGL 546 Milton (3) The poetry and prose of John Milton.
Effective: Winter 1978

ENGL 548 Elizabethan and Jacobean Drama (1-3 per semester, maximum of 12) English drama from 1558 to 1642, exclusive of Shakespeare.
Effective: Summer 1997

ENGL 549 Shakespeare (1-3 per semester, maximum of 12) Special problems of sources, chronology, text, characterization, and motivation in the drama.
Effective: Summer 1997

The Pennsylvania State University
ENGL 550 **English Literature 1660-1800** (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Dryden, Swift, Pope, Johnson, Fielding, Gibbon.
Effective: Summer 1997

ENGL 553 **Literacy Studies** (3) An overview of current research on literacy, with particular attention to language, thought, and learning and their applications to writing.
Effective: Spring 2001
Prerequisite:

ENGL 554 **Studies in Early American Literature** (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Bradstreet, Taylor, Mather, Franklin, Edwards, Paine.
Effective: Summer 1997

ENGL 558 **Nineteenth-Century British Fiction** (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Dickens, Thackeray, the Brontes, George Eliot, Hardy.
Effective: Summer 1997

ENGL 560 **American Romanticism** (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Hawthorne, Melville, Emerson, Thoreau, Whitman.
Effective: Summer 1997

ENGL 566 **Genre Studies in African-American Literature** (3 per semester/maximum of 9) Genre will vary from year to year, but will include categories such as poetry, fiction, essays, sermons, autobiographies, short stories.
Effective: Spring 1998

ENGL 573 **Studies in Twentieth-Century British Literature** (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Yeats, Conrad, Joyce, Shaw, Lawrence, Auden.
Effective: Summer 1997

ENGL 574 **Studies in Twentieth-Century American Literature** (1-3 per semester, maximum of 12) Figures studied will vary from year to year. Writers studied might include Dreiser, Wharton, Eliot, Hemingway, Fitzgerald, Faulkner, O’Neill, Williams.
Effective: Summer 1997

The Pennsylvania State University
ENGL 575 Experimentation and Modernism in Twentieth-Century British and American Fiction (1-3 per semester, maximum of 12) Figures studied will be drawn from the era of Joyce and Virginia Woolf to the present. Effective: Summer 1997

ENGL 576 Studies in Twentieth-Century American Fiction (1-3 per semester, maximum of 12) Concentrated study in such major American writers as Hemingway, Faulkner, and Fitzgerald. Effective: Summer 1997

ENGL 577 Contemporary Fiction (1-3 per semester, maximum of 12) Exploration of contemporary English language fiction. Effective: Summer 1997

ENGL 582 Survey of Contemporary Literary Theory (3) Exploration of the dimensions of discourse as reflected in recent theories of rhetoric, poetics, and literary criticism. Effective: Summer 1990

ENGL 583 Studies in Critical Theory (1-3 per semester/maximum of 12) Study of specific contemporary critical approaches to literature and application to English and/or American literary works. Effective: Summer 1997

ENGL 584 Studies in Rhetoric (1-3 per semester/maximum of 12) Specific rhetorical problems, issues, or figures; topics will change from year to year. Effective: Summer 1997

ENGL 585 Studies in British Fiction (1-3 per semester, maximum of 6) No description. Effective: Spring 1988

ENGL 586 Readings in Literature (1-12) Programs of readings designed to meet specific needs of individual students. Effective: Winter 1978

ENGL 588 Studies in American Fiction (1-3 per semester, maximum of 12) No description. Effective: Summer 1997

ENGL 589 Studies in American Poetry (1-3 per semester, maximum of 12) No description. Effective: Summer 1997

ENGL 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Summer 1996

ENGL 596 Individual Studies (1-12) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 2009

ENGL 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 1987

ENGL 597B American Writers and the City (3) Representations of and responses to the city in the works of major American authors. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ENGL 597C Pro-Seminar in British and American Modernism (3) Intensive reading of British and American literary modernism (in multiple genres) alongside study of its intellectual, socioeconomic, and political contexts.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ENGL 597C The Exegesis Exegesis: The Dharma of Philip K. Dick (3) This class will explore the context and content of Philip K. Dick's massive and mostly hand written manuscript, The Exegesis.

ENGL 597D Critical Whiteness Studies (3) This course examines several theoretical approaches to critical whiteness studies. For more information please go to http://english.la.psu.edu/
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ENGL 597D Magical Formalism (3) This course studies experimental poetry movements and theories of the 19th and 20th centuries that privilege formal innovation and constraint.

ENGL 600 Thesis Research (1-15) No description.
Effective: Fall 1983

ENGL 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

ENGL 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Fall 1983

ENGL 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2000

ENGL 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

ENGL 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983
Enterprise Architecture (EA)

EA 870 Scholarship in Enterprise Architecture (1) Foundations, methods and conduct for EA Research Scholarship
Effective: Summer 2012

EA 871 Enterprise Architecture Foundations I (3) Theoretical foundations and practice of enterprise architecture.
Effective: Fall 2012 Future: Fall 2012

EA 872 Enterprise Architecture Foundations II (3) Develops additional capabilities for justifying Enterprise Architecture decision making.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

EA 873 Enterprise Modeling (3) Theoretical foundations and practice of enterprise modeling.
Effective: Summer 2012
Prerequisite:

EA 874 Enterprise Information Technology Architecture (3) Theoretical foundations and practice of the enterprise information technology architecture.
Effective: Summer 2012
Prerequisite:

EA 875 Enterprise Architecture Leadership (3) Develops additional capabilities for leading, communicating, and implementing Enterprise Architecture.
Effective: Summer 2012
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Entomology (ENT)

ENT 402W (VB SC 402W) **Biology of Animal Parasites** (3) An introduction to animal parasitology. Emphasizes placed on host/parasite interactions, parasites of zoonotic importance, control programs and taxonomy. Effect: Spring 2010
Prerequisite:

ENT 410 **Insect Structure and Function** (3) Integrated physiology and anatomy of insects; emphasis on unique adaptations, genetic regulation of development, insects as model systems, environmental physiology. Effective: Summer 1994
Prerequisite:

ENT 420 **Introduction to Population Dynamics** (3) Principles of population regulation, demographic analysis, modeling of dynamic processes are discussed; laboratories involve the exploration of population growth models. Effective: Summer 1994
Prerequisite:

ENT 425 **Freshwater Entomology** (3) Collection and identification of insects and other arthropods in freshwater ecosystems; field study of habitats. Effective: Fall 2000

ENT 430 (BIOL 430, B M B 430) **Developmental Biology** (3) Molecular and genetic analyses of mechanisms involved in differentiation and determination in biological systems. Effective: Summer 1994
Prerequisite:

ENT 445 **Evolution of Insect Societies** (3) Basic principles of Darwinian theory and their application to understanding the evolution of complex social behavior in insects are addressed. Effective: Spring 2012
Prerequisite:

ENT 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

ENT 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

ENT 497A **Evolution Biology of Insects** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ENT 497B **Insect Biodiversity and Evolution** (4) This course is designed to teach students about insect taxonomy, evolutionary relationships, collection and preservation techniques, morphology, and natural history. The focus will mostly be on adult forms and emphasize insects found in Pennsylvania. In the lab, students will learn how to handle specimens, use diagnostic keys, and identify insects by sight. Collection techniques will be honed during multiple field trips. The primary instructor is Dr. Andrew R. Deans. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ENT 497B **Sensory Biology of Insects** (3) The goal of this course is to give students an understanding of insect sensory systems that contribute to the behaviors that we see insects performing for their survival and reproduction. Students will gain knowledge about the sensory mechanisms underlying mate-finding and courtship, host-finding and oviposition, and feeding/recruitment. Emphasis will be placed on understanding the neuroethology of insect orientation, communication, learning, and in particular cases, the evolutionary pressures that may have shaped these behaviors and their underlying sensory systems. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

ENT 497C **Medical Entomology** (3) Course will cover biology, ecology and epidemiology of arthropods of medical, veterinary and forensic importance. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

ENT 518 **Insect Natural History** (2) Experiential learning in field ecology highlighting insect dynamics, diversity and adaptations in terrestrial and aquatic systems. Effective: Spring 2012
Prerequisite:

ENT 520 **Frontiers in Insect Science** (4) This graduate course is designed to provide an overview of the diversity of subjects that fall within the subject of entomology.
Effective: Fall 2011

ENT 522 **Critical Thinking and Professional Development in Entomology** (6) This is a required course for Entomology graduate students focusing on developing the professional skills needed for a successful career in basic or applied research.
Effective: Spring 2012

ENT 530 **Seminar in Insect Science** (1 per semester/maximum of 4) Seminar in insect science. Topics range from insect phys & immunology to chemical ecology & epidemiology.
Effective: Spring 2012
Prerequisite:

ENT 535 **Statistical Techniques in Entomology** (3) Research methods course covering experimental design and analysis in entomology, ecology, and the agricultural science.
Effective: Summer 2012

ENT 539 **Chemical Ecology of Insects** (3) Interactions of insects with environmental chemicals, including natural and synthetic compounds; host finding and other behavior modifying cues.
Effective: Spring 1986

ENT 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

ENT 595 **Internship** (10-12) Supervised field experience and study related to the student's major professional interest. Written and oral critique of activity required. Limited to Master of Agriculture degree in entomology.
Effective: Spring 1987
Prerequisite:

ENT 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses
Effective: Spring 1987

ENT 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

ENT 597A **Insect Biodiversity and Evolution** (4) This course is designed to teach students about insect taxonomy, relationships, collection and preservation techniques, morphology, and natural history.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ENT 597B **Molecular Ecology** (4) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ENT 597C **Insect Collection, Identification, and Curation** (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ENT 597D **Insect Chemical Ecology** (3) Discussion of basic evolutionary and applied aspects of chemical signaling affecting insect behavior, physiology, interactions with plants and other organisms.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

ENT 597G **Applied Statistical Technology** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ENT 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

ENT 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

ENT 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience in development of instructional materials, organizing and conducting lectures, laboratories, and evaluating students in Entomology courses (1-599).
Effective: Fall 1983
ENT 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. 
Effective: Fall 2008

ENT 610 **Thesis Research Off Campus** (1-15) No description. 
Effective: Fall 1983

ENT 611 **Ph.D. Dissertation Part-Time** (0) No description. 
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Entrepreneurship (ENTR)

ENTR 400 Financing Entrepreneurial Ventures (3) Overview of alternative forms of financing including seed capital, valuing a company, going public, partnerships, and acquisitions.
Effective: Summer 2000
Prerequisite:

ENTR 410 Entrepreneurial Marketing (3) Principles of Internet marketing and strategies for marketing new ventures on the Web.
Effective: Spring 2007
Prerequisite:

ENTR 420 Leadership and Growth of New Ventures (3) Leadership of an entrepreneurial organization, including organizational effectiveness, stages of entrepreneurial growth, strategies for the future, and developing people.
Effective: Summer 2000
Prerequisite:

ENTR 430 Entrepreneurship and New Product Development (3) Examines the process of designing, testing and launching new products, and developing a strategy for commercialization of the technology.
Effective: Summer 2000
Prerequisite:

ENTR 440 Entrepreneurship and Franchising (3) Overview of the entire franchising process with a focus on licensing and distributorship, trade marks, strategy, and growing the enterprise.
Effective: Summer 2000
Prerequisite:

ENTR 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2000

ENTR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2000

ENTR 497A Sheetz Fellows Program (1) This course is an introduction to the Sheetz Fellows Program. It prepares students with an entrepreneurial mindset for leadership roles by providing them with mentoring opportunities, academic challenges, and resources. Topic areas include; servant leadership, business networking, social networking, study abroad exploration, and resume development. The Sheetz Fellows experience offers “an education for leadership” in the best tradition of the Business program. It molds well-rounded students who are ready for the world and prepares students for citizenship and for life-long learning.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

ENTR 500 Innovation and Entrepreneurship (1-3) Practical and theoretical insights into analyzing a new business opportunity that you have created.
Effective: Summer 2008

ENTR 501 Opportunity Creation and Launch (2) Identify a new opportunity, quantify its potential, understand key competitive factors, and develop presentations to secure venture financing.
Effective: Summer 2002

ENTR 502 Starting and Growing a New Business (2) An overview of traditional entrepreneurship considerations including competition, management teams, financing, and exit plans.
Effective: Summer 2002

ENTR 503 Garber Venture Capital Practicum (1-2) Structure investment opportunities, conduct due diligence, and potentially invest funds from the Smeal College of Business Garber Venture Capital Fund.
Effective: Summer 2002

ENTR 504 Essentials of Business Planning (2) Create a concise and coherent business plan for a start-up or a new corporate initiative.
Effective: Spring 2011

ENTR 571 Strategic Innovation in Corporate Networks (2) Capstone course integrating themes related to innovation by exploring entrepreneurship as strategic force throughout a full range of corporate entities.
Effective: Spring 2010

The Pennsylvania State University
ENTR 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2002

ENTR 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2002

ENTR 597C **Technology Commercialization** (2) Technology Commercialization will use prototypes to set up problem-based learning projects on how to commercialize technology both within corporations and as spin offs/startups.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

Last Import from UCM: June 2, 2012 12:27 PM
Envirn Poll Control (E P C)

E P C 590 Colloquium (1) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1996

Effective: Fall 1983

Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Environmental Engineering (ENVE)

ENVE 401 Occupational Safety and Environmental Health (1) Regulations, management practices, hazard identification, exposure assessment, monitoring, employee protection, and program management for occupational safety and health. Effective: Fall 2011
Prerequisite:

ENVE 411 Water Supply and Pollution Control (3) Water supply, wastewater characteristics, design of unit processes for water and wastewater treatment, sludge processing, and related new technologies. Effective: Fall 2011
Prerequisite:

ENVE 413W Operation and Control of Treatment Systems (3) Wastewater treatment, water treatment, solids handling, hazardous waste site control and operations, operator certification, report writing. Effective: Fall 2011
Prerequisite: Concurrent: ENVE 416

ENVE 415 Hydrology (3) Watershed response to rainfall events; hydrologic systems; ground water flow. Effective: Fall 2011
Prerequisite:

ENVE 416 Treatment Plant Design (3) Design of treatment facilities for water and waste water based on regulatory requirements and standards. Effective: Fall 2011
Prerequisite: Concurrent: ENVE 417

ENVE 417 Hydraulic Design (3) Design of water and waste water conveyance systems and storage facilities. Effective: Fall 2011
Prerequisite:

ENVE 424 Solid Waste Management (3) Solid waste collection and disposal techniques; recycling and design optimization; including content analysis, legislation, and planning. Effective: Fall 1998
Prerequisite:

ENVE 425 Hazardous Waste Management (3) Overview of regulations, risk assessment, waste minimization and pollution prevention, treatment of hazardous waste, and remediation of contaminated sites. Effective: Fall 2011
Prerequisite:

ENVE 430 Sustainable Engineering (3) A course on engineering which uses ecological principles to minimize waste and maximally use input materials. Effective: Summer 2003
Prerequisite:

ENVE 460 Environmental Law (3) This course provides a survey of Federal and State environmental laws, including statutory, common and administrative law. May not be taken for graduate credit by Dickinson School of Law students in the concurrent J.D./EPC programs. Effective: Summer 2003
Prerequisite:

ENVE 470 Air Quality (3) Overview of air quality issues with regard to the sources, measurements, effects, transport and control of potential air contaminants. Effective: Fall 2007
Prerequisite:

ENVE 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 2005

ENVE 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007

ENVE 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Spring 2005

ENVE 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 1996

ENVE 550 Chemical Fate and Transport (3) Chemical fate and transport modeling of environmental systems as applied to

The Pennsylvania State University
ENVE 569 Environmental Risk Assessment (3) Overview of ecological and human risk, including hazard identification, dose response, exposure assessment, and risk characterization.
Effective: Summer 2004

ENVE 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2003

ENVE 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2003

ENVE 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2001

ENVE 599 (IL) Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2005

Last Import from UCM: June 2, 2012 12:27 PM
Evid-Based Medicine (EBM)

EBM 713 Evidence-based Medicine I (1) This is fundamentally a course about applying the basic principles of clinical epidemiology/biostatistics to clinical medicine. Physicians need to be knowledgeable consumers of medical literature/information whatever the source. Physicians need to be able to judge the validity of scientific evidence and apply it to patient care.
Effective: Spring 2008

EBM 723 Evidence-based Medicine II (1) This is fundamentally a course about applying the basic principles of clinical epidemiology/biostatistics to clinical medicine. Physicians need to be knowledgeable consumers of medical literature/information whatever the source. Physicians need to be able to judge the validity of scientific evidence and apply it to patient care.
Effective: Spring 2008

Last Import from UCM: June 2, 2012 12:27 PM
Exercise/Sport Scien (EXSCI)

EXSCI 595 (PHSIO 595) Internship in Exercise Physiology and Cardiac Rehabilitation (1-15) Clinical and related research aspects of exercise physiology and exercise prescription with respect to cardiac and cardiovascular rehabilitation. Effective: Spring 1988

Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Family Law/Est Plan (FMEST)

FMEST 960 Trusts and Estates (3) This course examines the disposition of property at death by intestate succession and by will. The execution, revocation, construction, and contest of wills, as well as limits on the power to dispose of property by will, are studied. This course also examines the creation, purposes and termination of trusts, including informal trusts, and the interrelationship between trusts and wills.
Effective: Fall 1998

FMEST 962 Family Law (3) This course studies legal problems pertaining to the organization, operation, and dissolution of the family. It includes material on privacy, alternative families, marriage and annulment, child and spousal support, termination of parental rights, adoption and care of the child, divorce, alimony, property distribution at divorce, and custody of children.
Effective: Summer 2011

FMEST 963 Elder Law (2-3) Introduction to modern elder law, including Medicaid, Social Security, advance planning documents and protection laws targeting fraud and elder abuse.
Effective: Fall 2005

FMEST 964 Estate Planning and Wealth Transfer Transactions I (2) This course is open only to third-year law students. This course will acquaint students with federal estate and gift tax laws that must be considered in estate planning, and it will provide a general overview of state systems of wealth transfer taxation. Matters covered include the gross estate, deductions and credits, generation skipping transfer taxes, transactions subject to gift taxe, and exclusions and credits available to shelter lifetime wealth transfers. Also covered will be non-tax issues to be considered in estate planning, probate issues and probate avoidance, forms of property ownership, and issues about the attorney-client relationship. Although not required, students are encouraged to take TAX 950 Advanced Federal Income Taxation (which is a prerequisite for Estate Planning and Wealth Transfer Transactions II) or another advanced tax elective in their second year before enrolling.
Effective: Summer 2011 Ending: Summer 2012
Prerequisite:

FMEST 964 Estate Planning (3) Studies the concepts and techniques required to develop estate plans. Topics include the initial client interview, drafting of wills and trusts, powers of attorney, living wills, disability planning and income taxation of trusts and estates. The psychological and ethical aspects of estate planning will be covered. The course will also survey the federal gift, estate and generation skipping taxes. The course is intended to be an introduction to estate planning, valuable to both the person intending to specialize in the field and the general practitioner.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

FMEST 970 Probate Practice (2) This course deals primarily with the handling of estates following the decedent’s death. Emphasis is thus placed on accounts and distribution, the responsibilities of estate administrators and personal representatives, inheritance tax problems and will contests. Other topics include avoidance of probate and the drafting of wills.
Effective: Fall 1998
Prerequisite:

FMEST 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2008
Family/Community Med-Hy (FCMED)

FCMED 722 Family Medicine Acting Internship (5) The goal of the inpatient experience is to allow the fourth-year medical student to accept responsibility for the planning and execution of ongoing care of hospitalized patients, evaluate patients in the emergency room to determine if hospitalization is necessary and to perform the duties of an admitting physician. The student will work as a member of the family medicine inpatient service team and will remain in the hospital until the day's work is completed. The student will have one weekend free. Three weekends will be spent working with the inpatient team. Effective: Spring 2003
Prerequisite:

FCMED 730 Advanced Communications Elective - Paired Observation & Video Editing (POVE) (5) Provides the opportunity for students working together to advance their communication skills in clinical settings. Effective: Fall 2010
Prerequisite:

FCMED 771 Family & Community Medicine Clerkship (5) Student participation in ambulatory clinical care of the patient in his own environment and in a variety of health care centers. Effective: Spring 2009

FCMED 796 Family & Community Medicine Individual Studies (5) Creative projects including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2010
Prerequisite:

FCMED 796A Family & Community Medicine Individual Studies for 3rd Year (2.5) Family & Community Medicine Individual Studies for 3rd Year. Effective: Spring 2009

FCMED 797 Family & Community Medicine Special Topics (5) Advanced training in interpersonal communication skills, community health, rural health, ambulatory care analysis, clinical nutrition, geriatrics, and other topics. Effective: Spring 2009
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Field Placement Clini (FPC)

FPC 998 Special Topics (1-12) Externship Placements offer students the opportunity to work and learn in a variety of settings outside the Law School under the supervision of a full-time faculty member.
Effective: Spring 2012
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Finance (FIN)

FIN 405 Advanced Financial Management (3) An examination of the development and application of decision rules for major long-term financial and investment problems of the firm. Effective: Summer 1993

FIN 406 Security Analysis and Portfolio Management (3) Advanced valuation theory; fundamentals of security analysis; portfolio construction and management. Effective: Spring 2011

FIN 406H Security Analysis and Portfolio Management (Honors) (3) Advanced valuation theory; fundamentals of security analysis; portfolio construction and management. Effective: Spring 2011

FIN 407 Multinational Financial Management (3) Analysis of the international aspects of managerial finance; emphasis on the impact of the international financial environment on firm operations. Effective: Spring 2005

FIN 408 Financial Markets and Institutions (3) Functional analysis of major credit institutions; sources and uses of funds; impact of government regulation. Effective: Fall 1994

FIN 408H Financial Markets and Institutions (Honors) (3) Introduction to bonds, equities, derivatives, and financial institutions including insurance, pension funds and mutual funds. Effective: Spring 2012

FIN 409 Real Estate Finance and Investment (3) The sources and uses of credit; instruments and methods of financing; the theory and practice or real estate investment analysis. Effective: Summer 2011

FIN 410 Derivative Markets (3) Functions, techniques, and impact of speculation conducted through forward markets; the nature of speculative transactions, pricing, and methods of trading. Effective: Spring 2011

FIN 412 Commercial Bank Management (3) Fundamental principles underlying management of a commercial bank; capital funds; asset and liability management; value maximization; legal and operational constraints. Effective: Fall 1994

FIN 414 Financial Trading and Applications (3) This course focuses on financial modeling and analysis of trading strategies. Bloomberg, Reuters, spreadsheets and trading simulations are used extensively. Effective: Summer 2007

FIN 415 Advanced Financial Modeling (3) Develop financial models using spreadsheets, VBA programming, and trading room applications such as Bloomberg and @Risk. Effective: Spring 2011

FIN 420 Investment and Portfolio Analysis (3) Investment and risk, types of security investments, sources of investment information, the broker, the stock market, portfolio management. Effective: Spring 2008

FIN 427 Derivative Securities (3) Introduction to futures contracts and options, leading to a working understanding of their importance in financial management applications. Effective: Spring 2008

FIN 430 Estate Planning (3) Liquidity planning, titling and transfer of property, trusts, federal unified tax system, gifting, incapacity planning, legal documents. Effective: Spring 2008

FIN 450 Retirement Planning (3) Retirement planning: qualified and non-qualified plans, characteristics, provisions,
FIN 451 Intermediate Financial Management (3) Case studies are used to develop skills in solving a variety of financial management problems. Effective: Spring 2008
Prerequisite:

FIN 456 (IL) International Capital Markets (3) This course develops understanding of international capital markets by striking a balance between institutional details, theoretical foundation and practical application. Effective: Spring 2008
Prerequisite:

Prerequisite:

FIN 461 Portfolio Management and Analysis (3) Investement policy and process, modern portfolio theory, portfolio construction, and portfolio performance measurement and evaluation. Effective: Fall 2011
Prerequisite:

FIN 470 (R M 470) Real Estate and Capital Markets (3) Analysis of publicly-traded real estate of both the equity, (REITs) and debt (MBSs) sides. The course also provides international perspectives. Effective: Spring 2012
Prerequisite:

FIN 471 International Finance (3) Financial decision making in an international environment. Emphasis on topics relevant to small businesses and entrepreneurs. Effective: Spring 2010
Prerequisite:

FIN 475 Financial Decision Making (3) Problems and cases in financial decision making for non-financial corporations and financial institutions. Effective: Fall 2009
Prerequisite:

FIN 481 Advanced Financial Analysis (3) Capstone course integrating financial analysis coursework. This course is based on the case study method which provides a challenging setting in which to apply business concepts. Effective: Spring 2009
Prerequisite:

FIN 489 Seminar in Finance (3) In-depth study of new trends, concepts, and practices in financial or portfolio management. Effective: Spring 2008
Prerequisite:

FIN 491 Financial Planning Capstone (3) Critical thinking and decision-making about personal financial planning topics in the context of the financial planning process. Effective: Summer 2012
Prerequisite:

FIN 494 Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 2003

FIN 494H Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 2008

FIN 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Spring 2008
Prerequisite:

FIN 495A Nittany Lion Fund -- Lead Fund Manager Practicum (3 per semester/maximum of 6) Advanced work with the Nittany Lion Fund. Lead Fund Managers are accountable for sector and stock performance as well as reports. Students delegate work to Associate Fund Managers while focusing a great amount of attention to all aspects of stock pitches, weekly and quarterly reports, along with conducting weekly training session for new analysts. Effective: Summer 2011
Prerequisite:

FIN 495B Nittany Lion Fund - Executive Board Practicum (3 per semester/maximum of 6) Oversight of the Nittany Lion Fund (NLF) and its overall performance. Executive Board members and Directors are accountable for all aspects of the Nittany Lion Fund. Students interact with investors and are responsible for delivering professionally developed performance reports, weekly information updates, and annual shareholder meetings. Executive Board members assume specific duties within the NLF associated with their position, along with a shared responsibility for being a spokesperson.
FIN 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

FIN 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

FIN 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2003

FIN 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

FIN 504 Problems in Finance (3-6) Planned individual projects involving library, laboratory, or field work.
Effective: Winter 1978

FIN 505 Multinational Managerial Finance (3) Analysis of the international aspects of managerial finance. Emphasis on the environmental and institutional factors influencing capital acquisition and allocation.
Effective: Spring 2012
Prerequisite:

FIN 506 Portfolio Theory and Policy (3) Rigorous examination and analysis of asset-holder behavior under conditions of risk and uncertainty.
Effective: Winter 1978

Effective: Winter 1978

FIN 513 Speculative Markets (3) Analysis of derivative securities covering options, forwards, futures, OTC derivatives; topics include valuation, trading, hedging. Involves computer analysis.
Effective: Spring 1998
Prerequisite:

FIN 515 Nittany Lion Fund Manager (3) Focuses on applied issues and topics in the management of investments.
Effective: Summer 2008

FIN 531 Financial Management (3) An intensive examination of techniques available to aid the financial manager in decision making.
Effective: Spring 2006
Prerequisite:

FIN 532 Financial Decision Processes (3) Financial decision making under uncertainty; positive and normative models and current issues in financial management.
Effective: Winter 1978

FIN 541 Security Analysis (3) Discussion and application of analytical techniques in security valuation, including use of computers.
Effective: Winter 1978

FIN 550 Financial Analysis and Valuation (2) Builds upon and reinforces the theoretical and institutional finance frameworks learned in introductory business finance.
Effective: Summer 2002
Prerequisite:

Effective: Fall 2008
Prerequisite:

FIN 563 Financial Management Simulation and Corporate Interaction (2) An immersion experience in financial decision-making through a simulation exercise and interaction with senior financial officers.
Effective: Summer 2002
Prerequisite:

FIN 565 Investment Management Portfolio Analysis Immersion (2) An intensive familiarization with the Smeal College
Trading Room in combination with a visit to Wall Street trading rooms.

FIN 570 Financial Modeling (2) Introduces and applies equity, debt, derivative models and computational techniques using Excel and Visual Basic for Applications.

FIN 571 Strategic Financial Management (2) Comprehensive course in corporate finance and the strategic implications of various financial decisions.

FIN 577 Financial Engineering and Corporate Strategy (2) Study and application of derivative strategies, financial innovation, and modern financial techniques to re-engineer risk exposure and enhance strategic opportunities.

FIN 581 Fundamentals of Financial Markets (2) Operation, structure of money, bond markets and concepts; and techniques used in evaluating and managing fixed income portfolios.

FIN 572 Financial Innovation and Portfolio Risk Management (2) Introduction to fundamental derivatives, standard valuation models, and practical applications to portfolio management; recognition, measurement, and management of portfolio risk.

FIN 583 Modern Portfolio Management: Theory and Practice (2) Theoretical foundations and tools needed for structuring, managing, and monitoring the performance of an investment portfolio.

FIN 584 Investment Management I (1) Applied issues and topics in the management of investments.

FIN 585 Investment Management II (1) Complex applied issues and topics in the management of investments.

FIN 586 Individual Studies (1-9) Creative projects, including non-thesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

FIN 587 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

FIN 587B Corporate Finance I (3) Doctoral seminar which will cover the fundamental topics in corporate finance, covering both theoretical and empirical work in corporate finance.

FIN 587E Corporate Finance II (3) Doctoral seminar focused mostly on recent articles in empirical corporate finance.

FIN 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

FIN 596 Individual Studies (1-9) Creative projects, including non-thesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

FIN 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

FIN 597B Corporate Finance I (3) Doctoral seminar which will cover the fundamental topics in corporate finance, covering both theoretical and empirical work in corporate finance.

FIN 597E Corporate Finance II (3) Doctoral seminar focused mostly on recent articles in empirical corporate finance.

FIN 599 (IL) FOREIGN STUDY--FINANCE (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.

FIN 600 Thesis Research (1-15) No description.

FIN 601 PH.D. DISSERTATION FULL-TIME (0) NO DESCRIPTION.

FIN 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Graduate students will be
assigned on a selective basis teaching responsibilities in FIN 301, 305, and 306.
Effective: Spring 1984

FIN 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

FIN 611 PH.D. DISSERTATION PART-TIME (0) NO DESCRIPTION.
Effective: Summer 1993
Finance - Behrend (FNC)

FNC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

FNC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year of semester.
Effective: Spring 1987

Last Import from UCM: June 2, 2012 12:27 PM
Financial Analysis (FINAN)

FINAN 518 Financial Markets and the Economy (3) Operation, regulation, use, and evaluation of principal financial markets and institutions; monetary policy, asset pricing, and their effects on business. Effective: Spring 2005
Prerequisite:

FINAN 521 Corporate Finance (3) An in-depth analysis of concepts and techniques of corporate financial management. Effective: Spring 1996
Prerequisite:

FINAN 522 Investment and Portfolio Management (3) Investment analysis and portfolio management theory and applications. Effective: Spring 1997
Prerequisite:

Prerequisite:

FINAN 526 International Finance (3) Basics of corporate finance extended to the international environment through a special consideration of exchange rate behavior and its management. Effective: Spring 1996
Prerequisite:

FINAN 527 Derivative Securities (3) Use of financial futures, options, and swaps for risk management and investment; pricing models, trading strategies hedging price risk. Effective: Spring 2002
Prerequisite:

Prerequisite:

FINAN 575 Seminar in Current Issues in Finance (3) In depth analysis of current issues in financial management; topics will be rotated to reflect the current needs of managers. Effective: Summer 2002
Prerequisite:

FINAN 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 2009

FINAN 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1999

FINAN 597 Special topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 1999
Fid Plcmnt Int Just (FPIJP)

FPIJP 995 International Justice Externship Program (10) The International Justice Externship Program will provide students with the opportunity to spend a semester at the Hague in the Netherlands earning 10 hours of academic credit for approximately 30 hours of supervised work. Students will work in the Office of the Special Prosecutor at the Hague. The externship will enable students to pursue advanced practical training and research opportunities in international criminal law beyond our curricular offerings. Students will have the opportunity to analyze sophisticated areas of international law in a real world context. Each student participating in the Hague semester is required to enroll in a concurrent two-credit seminar. The seminar component will address international trial investigative techniques, tribunal jurisdiction and procedure, and areas of international civil and criminal law that are most relevant to legal practice before international tribunals.
Effective: Summer 2011
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
**Fld Plcmt Harrisburg (FPHBG)**

FPHBG 995 *Field Placement Harrisburg Program* (8) Program will provide experiential learning opportunities for law students relating to legislative and administrative law practice and the formulation of public policy at the state government level.

Effective: Fall 2010
Concurrent: GOVMT 987 and FPHBG 996

FPHBG 996 *Field Placement Harrisburg Program* (1) Guided reflection component of the Harrisburg Externship Program.

Effective: Fall 2010
Concurrent: GOVMT 987 and FPHBG 995

Last Import from UCM: June 2, 2012 12:27 PM
Food Science (FD SC)

FD SC 400 Food Chemistry (4) Chemical properties of food constituents as influenced by processing and storage. Effective: Fall 2009
Prerequisite:

FD SC 404 Sensory Evaluation of Foods (3) Sensory evaluation of food, methods of test analyses, panel selection and training, taste sensation theory, consumer testing methods. Effective: Spring 2001
Prerequisite:

FD SC 405 Food Engineering Principles (3) Engineering principles of importance to food manufacturing, including units, dimensions, mass and energy balance, fluid flow, rheology, heat transfer, and psychrometrics. Effective: Spring 2009
Prerequisite:

FD SC 406 Physiology of Nutrition (3) Physiological mechanisms involved in thirst and appetite, digestion, absorption, utilization of nutrients, respiration, and body temperature regulation. Effective: Spring 2001
Prerequisite:

FD SC 407 Food Toxins (2) Microbiological and chemical aspects of food poisoning; toxicological principles; case histories and prevention of problems. Effective: Winter 1978
Prerequisite:

FD SC 408 Food Microbiology (2) Significance of microorganisms in food commodities, microbial spoilage, food- borne infections, and intoxication; methods of preservation, processing, and control. Effective: Fall 2009
Prerequisite:

FD SC 409W Laboratory in Food Microbiology (3) Methods of isolation, detection of spoilage, pathogenic microorganisms in foods; effects of processing and preservation on survival of food microorganisms. Effective: Fall 2009
Prerequisite:

FD SC 410 Chemical Methods of Food Analysis (3) Qualitative and quantitative determinations of food constituents. Effective: Spring 2001
Prerequisite:

FD SC 411 Managing Food Quality (2) Principles and applications of Hazard Analysis Critical Control Points. Statistical tools for the control and improvement of food quality. Effective: Summer 1999
Prerequisite:

FD SC 413 Science and Technology of Plant Foods (3) Physical and chemical behavior of plant-based raw materials and ingredients, with emphasis on parameters influencing finished product quality. Effective: Fall 2009
Prerequisite:

FD SC 414 Science and Technology of Dairy Foods (3) Physical and chemical behavior of dairy-based raw materials and ingredients, with emphasis on parameters influencing finished product specifications. Effective: Fall 2009
Prerequisite:

FD SC 415 Science and Technology of Muscle Foods (3) Physical and chemical properties of muscle food commodities, with emphasis on muscle-based ingredients in formulated foods. Effective: Fall 2009
Prerequisite:

Prerequisite:

FD SC 430 Unit Operations in Food Processing (3) Thermal processing, refrigeration, freezing, dehydration, and concentration in the food industry, including effects on food quality; food packaging; waste management. Effective: Fall 2009
Prerequisite:

FD SC 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Summer 1992
Prerequisite:

FD SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

The Pennsylvania State University
FD SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

FD SC 500A Fundamentals of Food Science - Microbiology (1) Overview of the field of Food Science with the focus on microbiology.
Effective: Spring 2011

FD SC 500B Fundamentals of Food Science - Engineering (1) Overview of the field of Food Science with the focus on engineering.
Effective: Spring 2011

FD SC 500C Fundamentals of Food Science - Chemistry (1) Overview of the field of Food Science with the focus on chemistry.
Effective: Spring 2011

FD SC 500D Fundamentals of Food Science - Nutrition (1) Overview of the applications of nutrition in the field of Food Science.
Effective: Spring 2011

FD SC 501 Research Methods in Food Science (2) Planning and conducting research in food science including: problem definition, experimental design, collecting and recording data, and effective communication.
Effective: Summer 2002

FD SC 506 Flavor Chemistry (3) Formation, analysis and release of flavors in food systems.
Effective: Fall 2003
Prerequisite:

FD SC 507 Advanced Food Microbiology (3) Roles of microorganisms in food preservation, spoilage, health and disease. Recent advances in detection, tracking and control of foodborne pathogens.
Effective: Fall 2011
Prerequisite:

FD SC 510 Carbohydrate Hydrocolloids (3) Physicochemical behavior of edible carbohydrate hydrocolloids, with emphasis on starch and selected exudates, extracts, flours, and fermentation products.
Effective: Fall 1988
Prerequisite:

FD SC 514 Food Physical Chemistry (3) Physical principles underlying food structure and quality.
Effective: Fall 2011
Prerequisite:

FD SC 521 (AGBio 521) Food Defense: Prevention Planning for Food Processors (3) Course prepares current and aspiring professionals to learn, recognize and apply measures to prevent intentional contamination of the food supply.
Effective: Summer 2010
Prerequisite:

FD SC 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students or outside speakers.
Effective: Spring 1987

FD SC 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on individual basis and fall outside the scope of formal courses.
Effective: Spring 1987

FD SC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

FD SC 597E Advanced Topics in Food Toxins, Mutagens, and Carcinogens (1) Chemical and biochemical aspects of toxic, mutagenic and carcinogenic compounds in foods. Course covers primary literature on the sources, chemistry, and human health implications of these compounds.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite: Concurrent: FD SC 407

FD SC 597G Readings in Ingestive Behavior (1) Students lead discussion of original research in the field of ingestive behavior with a focus on food intake in particular.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Effective: Fall 1983

FD SC 601 Ph.D. Dissertation Full Time (0) No description.
Effective: Fall 1983

FD SC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in the development of instructional materials, the organization and conduct of lectures/laboratories, the evaluation and counseling of students.
Effective: Fall 1983

FD SC 603 Foreign Academic Experience (1-12) Foreign study and/or research approved by the food science program constituting progress toward the degree.
Effective: Fall 2010

Effective: Fall 1983

FD SC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Forensic Science (FRNSC)

FRNSC 400 Courtroom Proceedings and Testimony (1) Introduction to courtroom proceedings and testimony as they related to forensic science.
Effective: Fall 2011 Ending: Summer 2012
Prerequisite:

FRNSC 400 Courtroom Proceedings and Testimony (1) Introduction to courtroom proceedings and testimony as they related to forensic science.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

FRNSC 401W Criminalistics II - Advanced Analysis and Crime Scene Investigation (4) Advanced concepts in criminalistics as they apply to criminal and civil investigations.
Effective: Fall 2011 Ending: Fall 2012
Prerequisite:

FRNSC 410 A Scientific Approach to Crime Scene Investigation (2) Principles of crime scene investigation with emphasis on scientific philosophy, concepts, and procedures.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

FRNSC 411 Criminalistics: Trace and Impression Evidence (3) Laboratory-based examination of forensic evidence; microscopy, classification and identification.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

FRNSC 413 Criminalistics: Biology (3) Laboratory-based examination of forensic evidence; biological fluid identification, hair microscopy.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

FRNSC 415W Laboratory in Crime Scene Investigation (2) Laboratory course covering crime scene investigation with emphasis on scientific philosophy, concepts, procedures, problem solving, and hands-on activities.
Effective: Summer 2012
Prerequisite:

FRNSC 421W Forensic Molecular Biology (3) Concepts and application of serology of molecular biology techniques to analyze biological evidence collected at crime scenes.
Effective: Fall 2011 Ending: Summer 2012
Prerequisite:

FRNSC 421W Forensic Molecular Biology (3) Concepts and application of serology of molecular biology techniques to analyze biological evidence collected at crime scenes.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

FRNSC 427W (CHEM 427W) Forensic Chemistry (4) Analytical and instrumental methods used in the forensic sciences with special emphasis on the analysis and characterization of trace evidence.
Effective: Fall 2011 Ending: Summer 2012
Prerequisite:

FRNSC 427W (CHEM 427W) Forensic Chemistry (4) Analytical and instrumental methods used in the forensic sciences with special emphasis on the analysis and characterization of trace evidence.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

FRNSC 475 Forensic Science Seminar (1) Presentation and discussion of special issues in forensic science; extension and application of background knowledge to unusual topics and cases.
Effective: Spring 2008
Prerequisite:

FRNSC 485W Coalescence of Forensic Science Concepts. (4) Advanced concepts in criminalistics as they apply to criminal and civil investigations.
Effective: Spring 2013 Future: Spring 2013
Prerequisite: Concurrent: FRNSC 421W FRNSC 427W

FRNSC 494 Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

FRNSC 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2008
FRNSC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2006

FRNSC 500 **Scientific Crime Scene Investigation and Advanced Evidence Analysis** (4) Principles and logic of crime scene investigation, scene reconstruction, evidence analysis and scene management.
Effective: Spring 2012
Prerequisite:

FRNSC 501 **Criminalistics IIA** (3) Advanced concepts of criminalistics and the role of the criminalist in a forensic investigation.
Effective: Spring 2012
Prerequisite:

FRNSC 502 **Criminalistics IIB** (3) Advanced laboratory analysis of biological evidence obtained from crime scenes and the role of a forensic biologist in forensic investigation.
Effective: Summer 2011
Prerequisite:

FRNSC 532 **Drug Chemistry and Toxicology** (3) Chemical and toxicological properties of therapeutic and non-therapeutic drugs and the analytical and instrumental methods of their identification and quantification.
Effective: Spring 2010

FRNSC 541 **Forensic Seminar Series** (1) Advanced concepts in forensic science through presentation of journal articles, case studies, and research findings.
Effective: Spring 2009

FRNSC 561 **Ethics in forensic Science** (1) The ethics of forensic science, including issues of evidence handling, data analysis, and courtroom testimony.
Effective: Spring 2009

FRNSC 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2006

FRNSC 801 **Criminalistics III** (4) Advanced CSI investigation, criminalistics, and scene reconstruction with mock courtroom testimony.
Effective: Spring 2011
Prerequisite:

FRNSC 821 **Forensic Molecular Biology II** (4) Advanced concepts and application of molecular biology techniques to the analysis of biological evidence collected at crime scenes.
Effective: Spring 2008
Prerequisite:

FRNSC 831 **Forensic Chemistry II** (3) Advanced chemical techniques in forensic science, including examination of complex trace evidence and advanced instrumental analysis.
Effective: Spring 2008
Prerequisite:

FRNSC 832 **Forensic Drug Chemistry** (3) Advanced chemical techniques in forensic science, including analytical and instrumental methods used in the analysis and characterization of drugs.
Effective: Spring 2007
Prerequisite:

FRNSC 833 **Forensic Toxicology** (3) Advanced chemical techniques in forensic science, including the elements of industrial and environmental toxicology.
Effective: Spring 2007
Prerequisite:

FRNSC 894 **Research Projects in Forensic Science** (1-12) Supervised student research projects identified on an individual or small-group basis.
Effective: Spring 2007

FRNSC 895 **Internship** (1-6) Supervised off-campus, non-group instruction, including field experiences, a practicum, or internships; written and oral critique of activity required.
Effective: Spring 2007

FRNSC 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 2007
Forestry (FOR)

FOR 401 Urban Forest Management (3) Uses and values of urban vegetation, open space, and wildlife; planning, financing, support, management, and administration of urban forestry programs.
   Effective: Summer 1992
   Prerequisite:

FOR 409 Tree Physiology (2) Fundamentals of the relationship of the basic physiological functions of forest trees to form.
   Effective: Spring 1995
   Prerequisite:

FOR 410 Elements of Forest Ecosystem Management (3) Fundamentals of forest ecosystem management for goods and services.
   Effective: Summer 1995
   Prerequisite:

FOR 416 Forest Recreation (3) The management and administration of multiple-use forest lands and wilderness for forest recreational experiences, with emphasis on public forests.
   Effective: Spring 2001
   Prerequisite:

FOR 418 (US;IL) Agroforestry: Science, Design, and Practice (3) Agroforestry integrates trees in agricultural landscapes, and/or agriculture products into forested areas for multiple benefits.
   Effective: Spring 2006

FOR 421 Silviculture (3) The application of the principles of forest ecology to control of establishment, composition, and growth of forest stands.
   Effective: Fall 1984
   Prerequisite:

FOR 430 (W F S 430) Conservation Biology (3) The application of biological principles to issues in the conservation of biodiversity.
   Effective: Spring 1995
   Prerequisite:

FOR 439 Timber Sale Administration (2) Practical aspects of the logistical, environmental, managerial, and regulatory oversight of active and retired timber sales.
   Effective: Fall 2012 Future: Fall 2012
   Prerequisite:

FOR 440 Forest Economics and Finance (3) The application of economic theory to forest resources systems, with emphasis on production and investment analyses.
   Effective: Spring 2011 Ending: Fall 2012
   Prerequisite:

FOR 440 Forest and Conservation Economics (3) The role and application of economics and finance to forest resource conservation and management.
   Effective: Spring 2013 Future: Spring 2013
   Prerequisite:

FOR 451 Artificial Intelligence and Expert Systems for Agriculture and Natural Resource Management (3) Application of artificial intelligence in agriculture and natural resources, with emphasis on expert systems.
   Effective: Summer 2011
   Prerequisite:

FOR 455 Remote Sensing and Spatial Data Handling (3) Remote sensing systems, with emphasis on application to forest ecosystem analysis. Includes introduction to computer systems for spatial data handling.
   Effective: Summer 2000
   Prerequisite:

FOR 466W Forest Resource Management (3) Optimum use of forest's tangible and intangible resources by application of financial and administrative management principles and management science techniques.
   Effective: Spring 2001
   Prerequisite:

FOR 470 Watershed Management (3) Management of wild land watersheds for control of the amount and timing of water yield, water quality, erosion, and sedimentation.
   Effective: Summer 2000
   Prerequisite:

FOR 471 Watershed Management Laboratory (1) Introduction to hydrologic and climatic measurements and computations useful in watershed management.
   Effective: Spring 1992
   Prerequisite:
FOR 475 Principles of Forest Soils Management (3) Effect of current forest management practices on the properties and productive capacity of forest soils.
Effective: Spring 1985
Prerequisite:

FOR 480 Policy and Administration (3) Forest resources policy objectives; criteria and goals of society; policy implementation by ownership classes; planning, administration, and evaluation of programs.
Effective: Spring 2001
Prerequisite:

FOR 488Y (IL) International Forestry (3) Forestry in global context, emphasizing developing countries: ecological, economic, technological, and political aspects.
Effective: Spring 2006 Ending: Fall 2012
Prerequisite:

FOR 488Y (IL) Global Forest Conservation (3) Ecological, economic, technological, and political aspects of forested ecosystems in a global context, emphasizing tropical and developing countries.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

FOR 494 Forestry Research (3) Introduction to the theory, principles, and practices of forestry research; supervised research experience.
Effective: Summer 1995
Prerequisite:

FOR 494H Forestry Research (3) Introduction to the theory, principles, and practices of forestry research; supervised research experience.
Effective: Fall 2007
Prerequisite:

FOR 495 Forestry Internship (1-6) Supervised field experience related to the student's major.
Effective: Fall 1981
Prerequisite:

FOR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

FOR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

FOR 497F Invasive Forest Plants (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

FOR 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

FOR 508 Forest Ecology (3) The forest ecosystem, variations in space and time, classification, ordination techniques, dynamic aspects such as energy flow and nutrient cycling.
Effective: Winter 1978

FOR 517 Forest Microclimatology (3) A quantitative treatment of climate near the ground, with special reference to the role of forests and terrain.
Effective: Fall 2001
Prerequisite:

FOR 520 Snow Hydrology (2) Role of snow and ice in the hydrologic cycle, with special emphasis on effects of forests and land use.
Effective: Fall 1983
Prerequisite:

FOR 521 Advanced Silviculture (3) Specific silvicultural practices for the establishment and manipulation of forest stands with respect to recent developments and research needs.
Effective: Fall 1984
Prerequisite:

FOR 530 Conservation Genetics (3) Discussion of the use of genetic principles and technologies in the conservation and management of biological diversity.
Effective: Spring 2005
Prerequisite:

FOR 550 Multivariate Analysis in Forestry Research (3) Analysis and interpretation of research data involving several response variables. Includes computational considerations for large data sets.
Effective: Fall 1983

The Pennsylvania State University
FOR 555 Multispectral Remote Sensing (3) Computer analysis of data from nonimaging remote sensors as applied to mapping of natural resources and land use. Effective: Fall 2001
Prerequisite:

FOR 565 GIS Based Socio-Ecological Landscape Analysis (3) GIS-based socio-ecological analysis of landscape context for natural resources in relations to present and prospective patterns of land use. Effective: Spring 2009
Prerequisite:

FOR 570 Watershed Stewardship Practicum I (3) Application of integrated community-based watershed planning for water resources management. Effective: Spring 2000
Prerequisite:

FOR 571 Watershed Stewardship Practicum II (3) Application of integrated community-based watershed planning for water resources management. Effective: Spring 2000
Prerequisite:

FOR 590 (W F S 590) Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 2007

Prerequisite:

Prerequisite:

FOR 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

FOR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 1987

FOR 597A (GEOG 597A) Topics in Remote Sensing (1-3) Topics include land surface characterization, hypertemporal remote sensing, change detection, lidar for vegetation characterization, and other selected by participants. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

FOR 597B Science as a Process (2) This course addresses the philosophy of science and offers a foundation in first principles that ensures success in research projects. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

FOR 600 Thesis Research (1-15) No description. Effective: Fall 1983

FOR 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 1983

FOR 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Provides an opportunity for supervised and graded teaching experience in forestry courses. Effective: Fall 1983

FOR 603 Foreign Academic Experience (1-12) Foreign study and/or research approved by the graduate program for students enrolled in a foreign university constituting progress toward the degree. Effective: Spring 2011

FOR 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 1983

FOR 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 1983
Found Clinical Med (FCM)

FCM 713 Foundations of Clinical Medicine I (2) Foundational course that teaches the basics of physical diagnosis, clinical interviewing and the doctor-patient relationship.
Effective: Summer 2007
Prerequisite:

FCM 714 Foundations of Clinical Medicine I (2) Foundational course that teaches the basics of physical diagnosis, clinical interviewing and the doctor-patient relationship.
Effective: Summer 2007
Prerequisite:

FCM 723 Foundations of Clinical Medicine II (2) Advanced course that teaches the basics of physical diagnosis, clinical interviewing and the doctor-patient relationship.
Effective: Summer 2007
Prerequisite:

FCM 724 Foundations of Clinical Medicine II (2) Advanced course that teaches the basics of physical diagnosis, clinical interviewing and the doctor-patient relationship.
Effective: Summer 2007
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Fp - Health Law Clin (FPHLC)

Last Import from UCM: June 2, 2012 12:27 PM
Fp - Higher Educatio (FPHED)

FPHED 995 Field Placement - Higher Education (2-3) Externships in Penn State's offices at University Park and other campuses where appropriate.
Effective: Fall 2006

Last Import from UCM: June 2, 2012 12:27 PM
Fp - Intnal Crim Tri (FPICT)

FPICT 995A Field Placement - International Criminal Tribunal (7) Externship in the office of the Prosecutor of the International Criminal Tribunal for the former Yugoslavia.
Effective: Spring 2007
Prerequisite:

FPICT 995B Field Placement - International Criminal Tribunal (3) Externship in the office of the Prosecutor of the International Criminal Tribunal for the former Yugoslavia.
Effective: Spring 2007
Prerequisite:

FPICT 995C Field Placement - International Criminal Tribunal (3) Externship in the office of the Prosecutor of the International Criminal Tribunal for the former Yugoslavia.
Effective: Spring 2007
Prerequisite:

Fp- W Dc Seminar Pro (FPWDC)

FPWDC 995 Washington D.C. Externship Program (10) The Washington semester externship will provide students with the opportunity to spend a semester in Washington, D.C. earning academic credit for approximately 32 hours of supervised work. Students will work in one of several selected and approved governmental or nonprofit entities.
Effective: Spring 2011
Prerequisite:

Effective: Spring 2007

FPWDC 995B Field-Placement Clinic: U.S. Department of the Treasury, Office of Foreign Assets Control (9-10) An intensive semester-long field placement with the Office of Foreign Assets Control of the U.S. Department of the Treasury.
Effective: Spring 2007

Effective: Spring 2007

FPWDC 995D Field-Placement Clinic: U.S. Department of Health and Human Services, Office for Civil Rights (9-10) An intensive semester-long field placement with the Office for Civil Rights of the United States Department of Health and Human Services.
Effective: Spring 2007

Effective: Spring 2007

FPWDC 995F Field-Placement Clinic: United States House of Representatives (9-10) An intensive semester-long field placement with a United States Congressman.
Effective: Spring 2007

Effective: Spring 2007

FPWDC 997 Special Topics (9-10) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2007

Last Import from UCM: June 2, 2012 12:27 PM

Fp-Misc Summer Extn (FPEXT)

FPEXT 995 Externship Placement (2-6 per semester/maximum of 9) Externship Placements offer students the opportunity to work and learn in a variety of settings outside the Law School under the supervision of a full-time faculty member. Placements are in public service or nonprofit offices, including local, state and federal government and judicial offices. Students work with experienced supervisors in those offices to develop skills in legislative drafting, opinion writing, client counseling, research, administrative and criminal practice, statutory analysis and interpretation, and application and enforcement of regulations. Through their work and class discussions, students are expected to develop a heightened awareness of the methods and functions of the legislative, regulatory, judicial, and public interest representation functions.
Effective: Summer 2011
Prerequisite:

Effective: Spring 2004

FPEXT 997 Special Topics (1-10) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

French (FR)

FR 401 (IL) **Advanced Oral Communication** (3) Emphasis on speaking and listening comprehension through discussion of current issues, using journalistic materials.
Effective: Spring 2006
Prerequisite:

Effective: Spring 2006
Prerequisite:

FR 407 (IL) **Business Writing in French** (3) Common forms of business communication; writing of reports and abstracts.
Effective: Spring 2007
Prerequisite:

FR 408 (IL) **French-American Business Translation** (3) Translation from French to English of actual documents from the business world; theoretical consideration and systematic vocabulary building.
Effective: Spring 2007
Prerequisite:

FR 409 (IL) **Commercial and Technical Translation** (3) Translation from English to French of commercial and technical materials; vocabulary building; writing of abstracts and summaries.
Effective: Spring 2006
Prerequisite:

FR 410 (IL) **French Press** (3) Extensive readings of selected French daily and weekly newspapers and magazines, along with newscast viewings.
Effective: Spring 2007
Prerequisite:

FR 416 (IL) **Introduction to French Linguistics** (3) Introduction to the theory and methods of linguistics as they apply to the major subfields.
Effective: Spring 2006

FR 417 (IL) **French Phonology** (3) A formal study of the sound pattern of French.
Effective: Spring 2007
Prerequisite:

FR 418 (IL) **French Syntax** (3) A formal theory of word order and related issues in French grammar.
Effective: Spring 2006
Prerequisite:

FR 419 **French Semantics** (3) The study of meaning in human language with a special focus on how it is encoded in French.
Effective: Summer 2011
Prerequisite:

FR 422 (IL) **Old French Literature** (3) Medieval masterpieces in original and modern French versions.
Effective: Fall 2006
Prerequisite:

FR 426Y (IL) **French Literature of the Renaissance** (3) Survey of key texts from sixteenth century France, with attention to historical and philosophical currents of French social thought.
Effective: Fall 2006
Prerequisite:

FR 430 (IL) **Contemporary France** (3) Study of contemporary French society, politics, and culture from 1870 to the present.
Effective: Spring 2006
Prerequisite:

Effective: Fall 2006
Prerequisite:

FR 440 (IL) **Teaching of Romance Languages** (3) Theories of second language acquisition. Current classroom practices in the teaching of Romance languages.
Effective: Spring 2006
Prerequisite:

FR 445Y (IL) **Self and Society in Eighteenth-Century France** (3) The changing relationship of the individual to society in pre-Revolutionary France will be explored in texts by major writers.
Effective: Spring 2006
Prerequisite:
FR 452Y (IL) Nineteenth-Century French Literature (3) Selected readings in romanticism, realism, and symbolism, including Balzac, Stendhal, Sand, Baudelaire, and others, with emphasis on cultural issues.
Effective: Fall 2006
Prerequisite:

Effective: Fall 2006
Prerequisite:

FR 458 (IL) African Literature of French Expression (3) Genesis of Franco-African literature in the 1930s; phases of the negritude movement; colonial and national literature.
Effective: Fall 2006
Prerequisite:

FR 460 (IL) Contemporary French Literature (3) Major authors and movements in French novel, drama, and poetry from Proust to the present.
Effective: Fall 2006
Prerequisite:

FR 470 (IL) Race and Gender Issues in Literatures in French (3) A critical presentation, taught in French, of changing ideas and values on race and gender in French and Francophone literatures.
Effective: Summer 2005
Prerequisite:

FR 471 (IL) Francophone Women in Literature and Culture (3) Women's issues in literatures and cultures of French-speaking countries in Europe, the Mediterranean, Africa, the Caribbean, and Quebec.
Effective: Summer 2005
Prerequisite:

FR 487 (IL) Topics in French Film History and Theory I: 1895-1945 (3) Provide background needed to understand the broad outlines of French film history and theory in their first fifty years (1895-1945).
Effective: Spring 2006
Prerequisite:

FR 488 (IL) Topics in French Film History and Theory II: 1945-2002 (3) Provide background needed to understand the broad outlines of French film history and theory in their second half-century (1945-2002).
Effective: Spring 2006
Prerequisite:

FR 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

FR 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

FR 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1998
Prerequisite:

FR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

FR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

FR 499 (IL) Foreign Study--French (3-12) Advanced studies in French language and literature.
Effective: Summer 2005
Prerequisite:

FR 500 History of the French Language (3) Evolution of French from its origins to the present-day, with emphasis on Old French philology.
Effective: Fall 1984

FR 502 Introduction to French Linguistics (3) An overview of the major subfields of linguistics as they apply to the French language.
Effective: Spring 1997

FR 503 French Phonology (3) A theoretical approach to the sound structure of French.

FR 505 Semantics of French (3) An in-depth study of how meaning is computed based on French data. Effective: Spring 2007

FR 510 Stylistique Avancée (3) An introduction to literary creativity through practice of textual analysis, interpretation, and to basic concepts of contemporary poetics. Effective: Summer 1999

FR 529 Seminar in Renaissance Literature (3 per semester/maximum of 6) Intensive study of various French Renaissance writers in relation to selected artistic issues of the period. Effective: Fall 1983

FR 530 La France Contemporaine (3) A comprehensive cross-sectional view of French society and its institutions since World War II. Effective: Winter 1980

FR 531 Francophone Culture (3 per semester/maximum of 6) Concept of francophone; French minorities in Europe and North America; role of French language in Africa, Middle East, Far East. Effective: Fall 1983

FR 532 French Regions and Regionalisms (3) Interdisciplinary perspectives on the culture, history, and geography of the French regions and their regionalist identity movements. Effective: Spring 1992

FR 533 Baroque Aesthetics in Seventeenth-Century French Literature and Intellectual History (3) Based on the Foucauldian notion of episteme, the course analyzes major literary texts and intellectual trends. Effective: Fall 1999

FR 535 Texts and Performances (3) Based upon current theories of theater, the course focuses on problematics of French drama from the Seventeenth-Century to the present. Effective: Summer 1999

FR 540 Eighteenth-Century French Novel (3) Examination of the rise of the genre including formal considerations of narrative technique as well as historical context. Effective: Summer 1999

FR 545 Analysis of French Civilization (3 per semester/maximum of 6) French cultural aspects, other than language and literature, conducted in French with the collaboration of specialists outside the French department. Effective: Summer 1990

FR 547 Modernism and Postmodernism (3-6) Interdisciplinary approaches to these concepts, with a focus on artistic and literary objects in the French context. Effective: Spring 1994 Prerequisite:

FR 558 African Novel in French (3) Development of novel in French from colonial era to independence; Africanization of genre with African verbal artforms. Effective: Spring 1986

FR 559 Issues in Francophone Literatures (3) Diversity issues in Francophone literatures explored through various literary genres: variable focus may combine genre and topic. Effective: Spring 1997

FR 562 French Romanticism and Realism (3) Romanticism, realism, and their variations in the context of social and political revolution. Effective: Spring 1998
FR 564 **Figures of Alterity in Nineteenth-Century French Literature** (3) Representations of otherness in nineteenth-century French literature examined through race, gender, religion, and class paradigms.
Effective: Spring 1998

FR 565 **Seminar: Nineteenth-Century Studies** (1-6) Various nineteenth-century French writers considered in relation to selected esthetic and cultural problems raised during the period.
Effective: Fall 1983

FR 566 **Women Writers in Nineteenth-Century France** (3) Women's literary production in nineteenth-century France, including novels, poetry, travel narratives, children's literature, and essays.
Effective: Spring 1995

FR 569 **Major Texts of Twentieth-Century French Literature** (3-6) Established contemporary literary texts, figures, and aesthetic movements in various genres from Proust to Sartre and from Genet to Conde.
Effective: Summer 1999

FR 570 **Modern French Poetry** (3 per semester/maximum of 6) Exploration of the poetic genre and its diversification through poetic prose, free verse, and metaphorical narrative, from Baudelaire to Cixous.
Effective: Summer 1999

FR 571 **French Literary Theory and Criticism** (3) Major trends in contemporary theory and criticism from genre debates to socio-political approaches to literature, post-structuralism, deconstruction, and reception theories.
Effective: Summer 1999

FR 572 **Seminar: Twentieth-Century French Literature** (3 per semester/maximum of 6) Specialized consideration of contemporary writers; for advanced students.
Effective: Fall 1983

FR 574 **French Folklore and Popular Culture** (3) Historical survey of French folklore and popular culture, with an emphasis on the modern period.
Effective: Summer 1993

FR 580 **Approaches to French Civilization** (3) French interdisciplinary methods of cultural analysis and cultural history, with applications to French cultural artifacts.
Effective: Spring 1992

FR 581 **Theory and Techniques of Teaching French** (1-6) No description.
Effective: Fall 1983

FR 589 (CMLIT 589, GER 589, SPAN 589) **Technology in Foreign Language Education: An Overview** (3) Approaches to the uses and research applications of multimedia and other educational technologies applied to the teaching of foreign languages. (also crosslisted with APLNG 589)
Effective: Spring 2004

FR 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

FR 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

Effective: Fall 1983

FR 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

FR 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Activities to be included in the teaching assignment will be lecturing, leading discussions, conducting recitations, correcting and grading student papers and examinations.
Effective: Fall 1983

FR 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.

The Pennsylvania State University
Effective: Fall 1999

Effective: Fall 1983

FR 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Fuel Science (F SC)

F SC 401 Introduction to Fuel Technology (3) An introduction to the scientific and engineering principles of fuel technology. For non-fuel science majors; fuel science majors will not receive credit.
Effective: Summer 2007
Prerequisite:

F SC 431 The Chemistry of Fuels (3) Nature and properties of fossil and other fuels, including aerospace, in relation to use; preparation of fuels; by-products; fuel analysis.
Effective: Spring 2008
Prerequisite:

F SC 432 (CH E 432) Petroleum Processing (3) A study of physical and chemical processes to convert crude oil into desired products with an outlook from present to future.
Effective: Summer 2007
Prerequisite:

F SC 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2000

F SC 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

F SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

F SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1999

F SC 503 Analytical Methods in Fuel Science (3) Analytical and characterization methods used in fuel science and applied to fuel processing, combustion, and conversion are emphasized.
Effective: Spring 2009
Prerequisite:

F SC 504 Problems in Fuels Engineering (3) A problem-based, active learning course on the utilization of fossil fuels and renewable energy.
Effective: Fall 2009
Prerequisite:

F SC 506 Carbon Reactions (3) Current approaches to heterogeneous reactions in combustion and gasification of carbonaceous solids, including those derived from coal and petroleum sources.
Effective: Spring 1999
Prerequisite:

F SC 590 (EME 590, MNG 590, P N G 590) Colloquium (1-3) Continuing seminars which consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.
Effective: Spring 2009

F SC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

F SC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1999

Effective: Spring 1999

F SC 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1999

Effective: Spring 1999
F SC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 1999

Last Import from UCM: June 2, 2012 12:27 PM
Gastroenterology-Hy (GI)

GI 729 Gastroenterology (5) Some of the areas studied will be: smooth muscle physiology; peristalsis and sphincter function; neuro-homonal control of motility; psychophysiologic interaction in the gut; and symptoms of altered GI motility.

Effective: Fall 2001
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Genetics (GENET)

Prerequisite:

GENET 582 Genetics of Model Organisms: Molecular Genetic Analysis of Signaling Pathways: B (1) Examines uses and interrelationships of genetic studies with model systems from yeast to mice in elucidating signaling pathways. Effective: Fall 2007
Prerequisite:

GENET 583 Genetics of Model Organisms: Genetic Analysis of Cancer and Cancer-related Phenotypes: C (1) Examines uses and interrelationships of genetic studies with model eukaryotes in understanding biological processes. Effective: Fall 2007
Prerequisite:

GENET 584 Human Genetics A: Human Chromosomes (1) This course explores the human chromosome analysis and disease gene identification for simple mendelian disorders. Effective: Fall 2007
Prerequisite:

GENET 585 Human Genetics B: Non-mendelian Genetics (1) This course explores genetic disease mechanisms that alter chromosome behavior or show non-mendelian patterns of inheritance. Effective: Fall 2007
Prerequisite:

GENET 586 Human Genetics C: Complex Traits (1) This course explores the human genome landscape, how individuals vary, and gene identification for multigenic traits and disorders. Effective: Fall 2007
Prerequisite:

GENET 587 Genetic Approaches to Biomedical Problems (3) Advanced training of students with interest in genetic approaches to problem solving. Effective: Spring 2010
Prerequisite:

GENET 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

GENET 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1990

GENET 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 1990

GENET 597A Molecular Genetic Analysis of Model Organisms (1) This is a seminar-based course that introduces different model systems for using genetic analysis to address biological problems. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GENET 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 1996

GENET 600 Thesis Research (1-15) No description. Effective: Fall 1983

GENET 601 Ph.D. Dissertation Full Time (0) No description. Effective: Fall 1983

GENET 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 1983

GENET 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 1983

The Pennsylvania State University
Geo-Environmental Engineering (GEOEE)

GEOEE 408 Contaminant Hydrology (3) Groundwater flow and transport; agents of contamination; aquifer characterization and remediation; case studies. Effective: Spring 2002 Ending: Summer 2012
Prerequisite:

GEOEE 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Summer 1999

GEOEE 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1999

GEOEE 597 Special Topics (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1999

GEOEE 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Spring 2000

GEOEE 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Spring 2000

Last Import from UCM: June 2, 2012 12:27 PM
Geography (GEOG)

GEOG 411 Forest Geography (3) This course studies processes that control spatial and temporal change in forests. Effective: Fall 2007
Prerequisite:

GEOG 411W Forest Geography (3) This course studies processes that control spatial and temporal change in forests. Effective: Fall 2007
Prerequisite:

GEOG 412W Climatic Change and Variability (3) Theories and observations of past, present, and future climatic change and variability; introduction to techniques used in climatic change research. Effective: Spring 2007
Prerequisite:

GEOG 417 Satellite Climatology (3) A discussion of the application of satellite data to current and planned large-scale climate experiments. Effective: Spring 2007
Prerequisite:

GEOG 420Y (US;IL) Comparative Urbanism (3) This course investigates selected urban issues through the lens of comparative urbanism. Effective: Fall 2011
Prerequisite:

GEOG 423Y (US) Historical Geography of North America (3) Exploration, settlement, and changing patterns of human occupancy from the seventeenth century to the 1930s. Effective: Fall 2011
Prerequisite:

GEOG 424 (US;IL) Geography of the Global Economy (3) Focus on industrial location theory, factors in industrial location, studies of selected industries and problems of industrial development. Effective: Spring 2011
Prerequisite:

GEOG 425 (US) Geography of Race, Class, and Poverty in America (3) This class examines the spatial interactions of race, class and poverty in the United States. Effective: Fall 2011
Prerequisite:

GEOG 426Y (US;IL) (WMNST 426Y) Gender and Geography (3) Description and explanation of the links between gender relations and spatial structures. Effective: Summer 2011
Prerequisite:

GEOG 427 (US;IL) Urban Historical Geography (3) Study of the development and transformation of the historical urban built environment. Effective: Spring 2007
Prerequisite:

GEOG 428 (US) Political Geography (3) Geographical foundations of political phenomena; significant geographic factors in growth and development of states, boundary problems, population distribution, colonies, and internal and international regional problems. Effective: Spring 2007
Prerequisite:

GEOG 428Y (US;IL) Political Geography (3) Geographical foundations of political phenomena; significant geographic factors in growth and development of states, boundary problems, population distribution, colonies, and internal and international regional problems. Effective: Spring 2012
Prerequisite:

GEOG 429 (US;IL) Geographic Perspectives on Global Urbanization (3) This course reflects critically on a number of issues related to global urbanization, including the culture and political economy of urban space. Effective: Spring 2012
Prerequisite:

GEOG 430 Human Use of Environment (3) The human use of resources and ecosystems and social causes and consequences of environmental degradation in different parts of the world; development of environmental policy and management strategies. Effective: Fall 2008
Prerequisite:

GEOG 431 Geography of Water Resources (3) Perspectives on water as a resource and hazard for human society; water resource issues in environmental and regional planning. Effective: Spring 2007

The Pennsylvania State University
Prerequisite:

GEOG 432 (EME 432) Energy Policy (3) Analysis, formulation, implementation, and impacts of energy-related policies, regulations, and initiatives.
Effective: Summer 2010
Prerequisite:

GEOG 434 Politics of the Environment (3) This course explores politics related to the use, transformation, valuation, and representation of the environment.
Effective: Spring 2007
Prerequisite:

GEOG 435H (IL) Global Change and Sustainability - Bulgaria (3) Sustainability in the context of climate change, global socioeconomic change and regional transformation in Bulgaria; embedded foreign fieldwork (honors).
Effective: Summer 2008
Prerequisite:

GEOG 436 Ecology, Economy, and Society (3) Analyses of major themes in ecology and economic development, poverty-alleviation, and sustainability.
Effective: Summer 2006
Prerequisite:

Effective: Spring 2012
Prerequisite:

GEOG 439 Property and the Global Environment (3) This course reviews theoretical and empirical relationships between multiple legal, economic, and cultural approaches to property, and environmental quality and conflicts.
Effective: Summer 2006
Prerequisite:

GEOG 440 Topics in Regional Geography (3) Analysis of historical, contemporary and future environmental and societal issues in a specified world region from a geographical perspective.
Effective: Summer 2006
Prerequisite:

GEOG 444 African Resources and Development (3) Ecological and cultural factors in the geography of Africa; natural resources and development.
Effective: Spring 2001
Prerequisite:

GEOG 461W Dynamic Cartographic Representation (3) Theory and practice of mapping and geo-representation in a dynamic media context. Applications in science, policy, travel, and education.
Effective: Spring 2010
Prerequisite:

GEOG 463 Geospatial Information Management (3) This course examines geospatial data representations and algorithmic techniques that apply to spatially-organized data in digital form.
Effective: Fall 2011
Prerequisite:

GEOG 464 Advanced Spatial Analysis (3) Skills and knowledge for applying quantitative methods to analyze information with spatial distributions.
Effective: Spring 2012
Prerequisite:

GEOG 467 Applied Cartographic Design (3) Project-based map production problems with emphasis on map design and advanced mapping tools in geographic information systems.
Effective: Fall 2011
Prerequisite:

GEOG 468 Geographic Information Systems Design and Evaluation (3) Design and evaluation of Geographic Information Systems and other forms of integrated spatial data systems.
Effective: Spring 2007
Prerequisite:

GEOG 469 Energy Industry Applications of GIS (3) Roles of geographic information systems in energy siting decisions focusing on electric energy transmission networks.
Effective: Summer 2010
Prerequisite:

GEOG 475H (LER 475H) Labor in the Global Economy: U.S. and South African Perspectives (3) This course focuses on how the nature of work is changing in the global economy, and the implications for economic opportunity and inequality in both.
Effective: Spring 2008
Prerequisite:

GEOG 482 The Nature of Geographic Information (2) Orientation to the properties of geographic data and the practice of distance learning.
Effective: Summer 2004

The Pennsylvania State University
Prerequisite:

**GEOG 483 Problem-Solving with GIS** (3) How geographic information systems facilitate data analysis and communication to address common geographic problems.
Effective: Summer 2004
Prerequisite:

**GEOG 484 GIS Database Development** (3) Database design, creation, maintenance, and data integration using desktop GIS software.
Effective: Summer 2004
Prerequisite:

**GEOG 485 GIS Programming and Customization** (3) Customizing GIS software to extend its built-in functionality and to automate repetitive tasks.
Effective: Fall 2007
Prerequisite:

**GEOG 486 Cartography and Visualization** (3) Theory and practice of cartographic design emphasizing effective visual thinking and visual communication with geographic information systems.
Effective: Summer 2004
Prerequisite:

**GEOG 487 Environmental Applications of GIS** (3) Real-world applications of GIS and spatial analysis to investigate a variety of current environmental issues.
Effective: Spring 2010
Prerequisite:

**GEOG 488 Acquiring and Integrating Geospatial Data** (3) Advanced technical, legal, ethical and institutional problems related to data acquisition for geospatial information systems.
Effective: Summer 2004
Prerequisite:

**GEOG 489 GIS Application Development** (3) Advanced topics in GIS customization, including the Systems Development Life Cycle, packaging and deployment, and consuming Web services.
Effective: Summer 2004
Prerequisite:

**GEOG 493 Service Learning** (3-12) Classroom instruction with supervised student activity on a group community service project.
Effective: Summer 2006
Prerequisite:

**GEOG 494 Research Project in Geography** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2006
Prerequisite:

**GEOG 494H Research Project in Geography** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007
Prerequisite:

**GEOG 495 Internship** (1-13) Supervised off-campus, non-group instruction including individual field experience, practicums, or internships. Written and oral critique of activity required.
Effective: Fall 1981
Prerequisite:

**GEOG 495B Geography Teaching Internship** (1-10) Supervised undergraduate teaching experience in which students serve as peer tutors, laboratory assistants, or course material developers.
Effective: Summer 2004

**GEOG 495C Internship Supervision and Mentoring** (1) Candidates for the Master of GIS degree sponsor a GIS-related internship for students in Penn State's resident undergraduate program.
Effective: Summer 2004

**GEOG 495G GIScience Internship** (1-10) Supervised research experience within the Department of Geography's GeoVISTA Center, Gould Center, or an appropriate external agency.
Effective: Spring 2007
Prerequisite:

**GEOG 496 Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

**GEOG 496C Individual Studies** (3) Individual project work supervised by a faculty member on a topic of mutual interest in geography and geographic information science.
Effective: Summer 2012 Ending: Summer 2012

The Pennsylvania State University
GEOG 496C Individual Studies (3) Individual project work supervised by a faculty member on a topic of mutual interest in geography and geographic information science.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GEOG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

GEOG 497A Climate Change and Variability (3) This course looks at climate change and variability over multiple time scales, focusing on future global warming.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

GEOG 497B Location Intelligence for Business (3) Understanding location technology and geospatial analysis to support an efficient and effective pathway to better business decisions.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GEOG 497C Object-oriented Modeling and Programming for GIScience (3) Introduction to object-oriented modeling and programming in JAVA for application in GIS, GIScience, and spatial information processing in general.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

GEOG 497D Lidar Technology and Applications (3) Understanding lidar systems’ design, operation, data processing techniques, and product generation to address typical application scenarios faced by the geospatial professional.
Effective: Summer 2012 Ending: Summer 2012

GEOG 497D Lidar Technology and Applications (3) Understanding lidar systems’ design, operation, data processing techniques, and product generation to address typical application scenarios faced by the geospatial professional.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GEOG 497G Exploring Imagery and Elevation Data in GIS Applications (3) Using imagery and elevation data in typical application scenarios faced by the geospatial professional.
Effective: Summer 2012 Ending: Summer 2012

GEOG 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1998

GEOG 498A Managing Planet Earth (3) This course focuses on theoretical, practical and philosophical arguments surrounding the global sustainability debates and how we “manage” our planet.
Effective: Summer 2012 Ending: Summer 2012

GEOG 498B A Sustainable Jamaica: What Do Islands Have To Teach Us? (3) This course focuses on collaborative efforts, replicable strategies, appropriate innovation and audience specific communication as they relate to sustainable systems.
Effective: Summer 2012 Ending: Summer 2012

GEOG 498C How To Fit A Ship Into A Bottle (3) This course is project based and will provide students with tools for tackling seemingly impossible and overwhelming sustainability challenges.
Effective: Summer 2012 Ending: Summer 2012

GEOG 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2006
Prerequisite:

GEOG 500 Introduction to Geographic Research (1-3) No description.
Effective: Spring 1981

GEOG 501A Research Perspectives in Physical Geography (1) This course presents contemporary perspectives on Physical Geography, emphasizing the major issues and integrative themes of the sub-discipline.
Effective: Summer 2008

GEOG 501B Research Perspectives in Human Geography (1) This course presents contemporary perspectives on Human Geography, emphasizing the major issues and integrative themes of the sub-discipline.
Effective: Fall 2007

GEOG 501C Research Perspectives in Human-Environment Geography (1) Contemporary perspectives on Human-Environment Geography, emphasizing major issues and integrative themes of the sub-discipline.
GEOG 501D Research Perspectives in GIScience (1) This course presents contemporary perspectives on Geographic Information Science, emphasizing the major issues and integrative themes of the sub-discipline.

GEOG 502 Research Scholarship in Geography (3) Learning the craft of scholarly research in geography.

GEOG 510 Seminar in Physical Geography (3 per semester/maximum of 18) Analysis of current literature in physical geography focusing on theoretical and methodological debates.

GEOG 520 Seminar in Human Geography (3 per semester/maximum of 18) Analysis of current literature in human geography focusing on theoretical and methodological debates.

GEOG 521 Map Symbolization and Design Theory (3) Introduction to theoretical issues in map design and symbolization with emphasis on current research trends and practical application of research. Students who have passed GEOG 421 may not schedule this course for credit.

GEOG 530 Human-Environment Seminar (3 per semester/maximum of 18) Theory and method in human-environment interaction subfields; may be re-taken when topics vary; readings, discussions, research.

GEOG 560 Seminar in Geographic Information Science (3 per semester/maximum of 18) Geographic information science problems/theory, e.g. GIS, cartography, remote sensing, spatial analysis, modeling.

GEOG 565 Selected Topics in Geographic Information Science (3) Examination of geographic information science topics: GIS, cartography, remote sensing, spatial analysis, modeling, spatial cognition, geospatial semantics, geovisualization.

GEOG 580 Spatial Data Structures and Algorithms (3) In-depth examination of geographic information system components; representation and storage of spatial data, spatial algorithms, input-output considerations. Students who have passed GEOG 480 may not schedule this course for credit.

GEOG 583 Geospatial System Analysis and Design (3) Systematic approach to requirements acquisition, specification, design and implementation of geospatial information systems.

GEOG 584 Geospatial Technology Project Management (3) Principles of effective project management applied to the design and implementation of geospatial information systems.

GEOG 585 Open Web Mapping (3) Design, development, and implementation of web mapping applications using OGC standards and open source software.

GEOG 586 Geographical Information Analysis (3) Choosing and applying analytical methods for geospatial data, including point pattern analysis, interpolation, surface analysis, overlay analysis, and spatial autocorrelation.

GEOG 587 Conservation GIS (3) Conservation GIS applies geospatial problem solving to ecological research and resource management issues to enhance conservation planning.

GEOG 588 Planning GIS for Emergency Management (3) Requirements analysis and proposal writing to plan and implement GIS solutions supporting emergency management activities of government agencies and contractors.

GEOG 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or
outside speakers.

Effective: Spring 1987

GEOG 594A Culminating Experiences in Geospatial Intelligence (1-3 per semester/maximum of 3) Culminating experiences in current professional and ethical problems facing the geospatial intelligence professional.

Effective: Spring 2011

Prerequisite:

GEOG 594B Geospatial Intelligence Capstone Experience (2) Culminating experience in the iMPS-HLS for the online geospatial intelligence option.

Effective: Summer 2012

Prerequisite:

GEOG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

GEOG 596A Individual Studies -- Peer Review (3) Preparation and presentation of a proposal for an individual capstone project, and reviews of presentation by student peers.

Effective: Summer 2012 Ending: Summer 2012

GEOG 596A Individual Studies -- Peer Review (3) Preparation and presentation of a proposal for an individual capstone project, and reviews of presentation by student peers.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GEOG 596B Individual Studies -- Capstone Project (3) Preparation and delivery of a formal professional presentation of the results of an individual capstone project.

Effective: Summer 2012 Ending: Summer 2012

GEOG 596B Individual Studies -- Capstone Project (3) Preparation and delivery of a formal professional presentation of the results of an individual capstone project.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GEOG 596C Individual Studies (3) Individual project work supervised by a graduate faculty adviser.

Effective: Summer 2012 Ending: Summer 2012

GEOG 596C Individual Studies (3) Individual project work supervised by a graduate faculty adviser.

Effective: Fall 2012 Ending: Fall 2012

GEOG 596I Independent Study in Geospatial Intelligence (1-3) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2012 Ending: Summer 2012

GEOG 596I Independent Study in Geospatial Intelligence (1-3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GEOG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

GEOG 597A (FOR 597A) Topics in Remote Sensing (1-3) Topics include land surface characterization, hypertemporal remote sensing, change detection, and lidar for vegetation characterization, and others selected by participants.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GEOG 597I Geospatial Intelligence Capstone Experience (2) Culminating experience in the iMPS-HLS for the Geospatial Intelligence option.

Effective: Summer 2012 Ending: Summer 2012

Prerequisite:

GEOG 597K GIS for Analysis of Health (3) The role of geographic information systems in understanding disease, including relevant spatial analysis and cartographic visualization techniques.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GEOG 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2006

The Pennsylvania State University
GEOG 897A **Cultural Intelligence, Applied Geography, and Homeland Security** (3) The process of geographically analyzing social, political, economic, and demographic information to understand human history, institutions, and behaviors.  
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GEOG 897B **Special Topics/GIS** (3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Summer 2012 Ending: Summer 2012

GEOG 897B **Special Topics/GIS** (3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GEOG 897C **Cloud and Server GIS** (3) Students will evaluate and implement GIS which use cloud and server resources, using infrastructure, platform, and software service models.  
Effective: Summer 2012 Ending: Summer 2012

GEOG 897E **Emerging Trends in Remote Sensing and Advanced Image Analysis** (3) Advanced topics in remote sensing and image processing, including new sensors, applications, and decision making.  
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

Effective: Summer 2012 Ending: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
Geosciences (GEOSC)

GEOSC 402Y (IL) Natural Disasters (3) Case studies of the causes and consequences of natural disasters; analysis of disaster impact in different economic, cultural, and social conditions. Effective: Summer 2005
Prerequisite:

GEOSC 405 (SOILS 405) Hydropedology (3) Soil and water interactions across scales, integrated studies of landscape-soil-water relationships, fundamental processes of water flow and chemical transport. Effective: Spring 2008
Prerequisite:

GEOSC 409W Geomicrobiology (3) Investigation of modern and ancient microbial interactions with soils, sediments, the atmosphere, minerals, rocks, nutrients, and pollutants. Effective: Summer 2008
Prerequisite:

GEOSC 410 Marine Biogeochemistry (3) Exploration of the ways in which life influences and is influenced by chemical, physical, and geological processes in the ocean. Effective: Summer 2007
Prerequisite:

GEOSC 412 Water Resources Geochemistry (3) Aqueous geochemistry of silica, alumina, carbonate minerals, and selected metals; organic species in water; isotope geochemistry applied to water. Effective: Summer 2007
Prerequisite:

GEOSC 413W Techniques in Environmental Geochemistry (3) This course teaches techniques needed for the collection, chemical analysis, and data analysis of environmental geochemical measurements. This course has one or more required field trips for which a fee is charged to the student. Effective: Spring 2002
Prerequisite:

GEOSC 415 Geochemistry (3) Element abundance and genesis, application of chemical principles to earth materials, element fractionation in geologic processes. Effective: Spring 2011
Prerequisite:

Prerequisite:

GEOSC 418 (SOILS 419) Soil Environmental Chemistry (3) Introduction to chemical constituents and processes occurring in soils. Topics include mineral weathering, soil solution chemistry and adsorption of solutes. Effective: Summer 2007
Prerequisite:

GEOSC 419 The Organic Geochemistry of Natural Waters and Sediments (3) Composition, sources, and fates of particulate and dissolved organic matter in natural environments; biogeochemical processes; organic geochemistry of anthropogenic contaminants. Effective: Summer 2007
Prerequisite:

GEOSC 420 (BIOL 420) Paleobotany (3) Classification, morphology, phylogeny, and stratigraphic occurrence of fossil plants; practicum includes field trips and study of paleobotanical techniques and specimens. Effective: Spring 2005
Prerequisite:

GEOSC 422 Vertebrate Paleontology (3) Course covers scientific thinking and skills in scientific writing, the history of vertebrates, and modern evolutionary theory applied to vertebrates. This course contains from one to several field trips for which an additional charge will be made to cover transportation. Effective: Spring 2009
Prerequisite:

GEOSC 424 Paleontology and Fossils (3) Concepts and procedures using fossils to solve problems in systematics, evolution, biostratigraphy, correlation, sedimentation, paleoecology, and global change. Effective: Spring 2001
Prerequisite:

GEOSC 428 Micropaleontology (4) Biology and ecology of microfaunas and microfloras (e.g., foraminifera, coccolithophores, radiolaria, diatoms, dinoflagellates) and applications in biostratigraphy and paleoenvironmental reconstruction. Effective: Summer 2004
Prerequisite:
GEOSC 434 Volcanology (3) Phenomena and products of volcanic eruptions; physical characteristics of lava and pyroclastic material.
Effective: Spring 2011
Prerequisite:

GEOSC 439 Principles of Stratigraphy (3) An introduction to the description and genesis of sedimentary rock bodies, the determination of their stratal geometries, and their correlation. (This course includes from one to several field trips for which an additional charge will be made to cover transportation.)
This course contains from one to several field trips for which an additional charge will be made to cover transportation.
Effective: Spring 2001
Prerequisite:

GEOSC 440 Marine Geology (3) Chemical and physical processes affecting the topography and sediments of the sea floor.
Effective: Spring 2001
Prerequisite:

Effective: Spring 2009
Prerequisite:

GEOSC 445 Coastal Geology (4) A field course dealing with the processes operative in the environmental systems of a segment of the mid-Atlantic coast.
Effective: Spring 2001
Prerequisite:

GEOSC 450 Risk Analysis in the Earth Sciences (3) An introduction to concepts and methods of quantitative risk analysis with focus on water, climate, and energy related risks.
Effective: Spring 2010
Prerequisite:

GEOSC 451 Natural Resources: Origins, Economics and Environmental Impact (3) Geologic, economic and environmental issues related to exploitation of non-renewable natural resources (metals, minerals, rocks, and fossil fuels).
Effective: Fall 2006
Prerequisite:

GEOSC 452 Hydrogeology (3) Hydrologic cycle: occurrence, movement, quality, and quantity of groundwater; solute transport; quantitative hydrogeologic methods: role of water in geologic processes. This course has one or more required field trips for which a fee may be charged to the student.
Effective: Spring 2008
Prerequisite:

GEOSC 454 Geology of Oil and Gas (3) Properties, origin, migration, and occurrence of oil and gas. This course has one or more required field trips for which a fee is charged to the student.
Effective: Spring 2002
Prerequisite:

GEOSC 461 Geology of North America (3) Evolution of structural-stratigraphic framework of continent; interpretation of relevant data obtained from field, experimental, and geophysical observation.
Effective: Spring 2001
Prerequisite:

GEOSC 465 Structural Geology (4) Effects and mechanics of deformation of the earth’s crust; practicum includes field trips and studies of maps and structural problems. This course has one or more field trips for which a fee is charged to the student.
Effective: Spring 2002
Prerequisite:

GEOSC 470W Introduction to Field Geology (3) Field interpretation of geologic features; principles and techniques of geologic mapping; interpretation of geologic maps and diagrams. This course has one or more required field trips for which a fee is charged to the student.
Effective: Spring 2002
Prerequisite:

GEOSC 472A Field Geology I (Introduction to Field Methods) (3) Introduction to geologic field methods and the 3-D characterization of earth structure and the reconstruction of geologic histories. This course includes travel outside the University for which an additional charge will be made to cover transportation, food, and lodging.
Effective: Summer 2005
Prerequisite:

GEOSC 472B Field Geology II (Advanced Field Methods) (3) Advanced application of geologic field methods to the 3-D characterization of earth structure and the reconstruction of geologic histories. This course includes travel outside the University for which an additional charge will be made to cover transportation, food, and lodging.
Effective: Summer 2005
Prerequisite:

GEOSC 474 (BIOL 474) Astrobiology (3) In depth treatment of principles/concepts of biochemical evolution, the origin/evolution of life; evaluation of distribution of life in the universe.
Effective: Summer 2007
GEOSC 479 Advanced Stratigraphy (3) Modern topics of sequence stratigraphy are addressed, with a heavy emphasis on field and laboratory data analysis and interpretation. Effective: Spring 1999

Prerequisite:

GEOSC 483 Environmental Geophysics (3) This course presents the principles and applications of the variety of techniques geophysicists use to address environmental problems. Effective: Fall 2001

Prerequisite:

GEOSC 487 Analysis of Time Series (3) Nonstatistical approach to data analysis; spectral and correlation analysis; filter theory; signal-to-noise improvement applied to geoscience data. Effective: Fall 2010

Prerequisite:

GEOSC 488 An Introduction to Seismology (4) An overview of the observations, methods, and frameworks used in seismogram analysis for earthquake and earth-structure investigations (includes laboratory). Effective: Spring 2003

Prerequisite:

GEOSC 489 Dynamics of the Earth (4) Constitution and dynamics of the solid earth; mechanics and consequences of Plate Tectonic processes. Effective: Fall 2001

Prerequisite:

GEOSC 494M Senior Thesis (1-4) Supervised student activities on research projects identified on an individual or small group basis. Effective: Fall 2007

Prerequisite:

GEOSC 494W Senior Thesis (1-4) Supervised student activities on research projects identified on an individual or small group basis. Effective: Spring 2001

Prerequisite:

GEOSC 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Spring 2001

GEOSC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

GEOSC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1998

GEOSC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 1997

GEOSC 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

GEOSC 500 Issues in Geosciences (3) Introduction of first year graduate students to issues in geosciences. Effective: Summer 2003

Prerequisite:

GEOSC 502 Evolution of the Biosphere (4) The geologic history of the co-evolution of life and the surface environment is examined from a systems perspective. Effective: Spring 1999

Prerequisite:

GEOSC 505 Quantitative Physical Sedimentology (3) Principles of fluid mechanics and mathematical modeling; their use in describing sediment transport, sedimentary structures, and sedimentary environments. Effective: Summer 1996

GEOSC 508 Mechanics of Earthquakes and Faulting (3) An in-depth treatment of fundamental concepts in brittle faulting and earthquake mechanics with emphasis on physical processes. Effective: Spring 2005

Prerequisite:

GEOSC 511B (MATSE 511B) Transmission Electron Microscopy (1) Principles and practice of transmission electron
microscope operation. Students undertake individual projects.

Effective: Spring 2005

GEOSC 512 (MATSE 512) **Principles of Crystal Chemistry** (3) Relation of structure to ionic size and nature; influence of pressure and temperature on structure; chemical-structural defects, crystalline solutions, phase-transitions.
Effective: Spring 2003

GEOSC 514 **Data Inversion in the Earth Sciences** (3) This course focuses on how one finds theoretical parameters to explain observed data using discrete inverse theory.
Effective: Spring 1999
Prerequisite:

GEOSC 518 **Stable Isotope Geochemistry** (3) Theory of isotope fractionation mechanisms; its application to a wide range of problems in the earth and planetary sciences.
Effective: Fall 1989

GEOSC 519 **Mineral Equilibria** (3) A thermodynamic treatment of minerals and their reactions under geochemically important conditions of temperature and pressure.
Effective: Summer 2007
Prerequisite:

GEOSC 521 **Thermal State of the Earth** (2-3) Analytical and numerical solutions to earth-related heat conduction and convection problems; geothermal energy; earth’s heat flow and temperature.
Effective: Spring 1998

GEOSC 522 **Geochemistry of Aqueous Systems** (2-3) Ionic and molecular equilibria related to stabilities and solubilities of minerals, with applications to ground water, sea water, and hydrothermal fluids.
Effective: Summer 2007
Prerequisite:

GEOSC 533 **Sedimentary Geochemistry** (2) Kinetics and thermodynamics of low-temperature processes in sediments. Applications to weathering processes, natural waters, deposition of sediments, and diagenesis.
Effective: Summer 1996

GEOSC 529 **Paleontology** (1-6 per semester/maximum of 9) Morphology and distribution of significant fossil groups; sampling, preparation, and applications to biostratigraphy, evolution, paleoecology, sedimentation, and petrography.
Effective: Fall 1989

GEOSC 533 **Principles of Geochemistry** (3) A comprehensive treatment of the principles of geochemistry applied to a wide variety of geologic settings and scales.
Effective: Summer 2007
Prerequisite:

GEOSC 540 **Ore Deposits I** (3) Geochemistry and geology of ore deposits formed by igneous and high-temperature hydrothermal processes.
Effective: Fall 1989
Prerequisite:

GEOSC 541 **Ore Deposits II** (3) Geochemistry and geology of ore deposits formed by low-temperature hydrothermal, sedimentary, and metamorphic processes; continuation of GEOSC 540.
Effective: Fall 1989
Prerequisite:

GEOSC 542 **Quantitative Methods in Hydrogeology** (1-4) Investigation of groundwater systems and resources, emphasizing both the practical use and limitations of modeling techniques.
Effective: Fall 1989
Prerequisite:

GEOSC 545 **Glacial Geology** (3) Glaciers: their characteristics, causes, deposits, landforms, effects in periglacial regions.
Effective: Fall 1989

GEOSC 548 **Surface Processes** (3) Principles, application, and interpretation of Quaternary geochronology, surface process studies, and landscape evolution.
Effective: Spring 1999
Prerequisite:

GEOSC 555 **Advanced Structure and Petrofabrics** (1-3) Macroscopic and mesoscopic recognition, measurement, and interpretation of small-scale rock structures and mineral orientation patterns in deformed rocks.
Effective: Fall 1989

GEOSC 558 **Multi-channel Seismic Processing and Interpretation** (4) This course covers the basics of seismic energy propagation, modern 2- and 3-D multi-channel seismic data acquisition methods, and data processing.
Effective: Spring 1999

The Pennsylvania State University
Prerequisite:
GEOSC 559 Seismology II (3) Rigorously covers the methods of computing wave fields for point and distributed seismic sources in vertically inhomogeneous elastic media.
Effective: Spring 2005
Prerequisite:
GEOSC 560 Kinetics of Geological Processes (3) General development of the kinetic theory of crystal growth, diffusion, irreversible thermodynamics, and heterogeneous reactions needed for geosciences and related fields with applications to current problems.
Effective: Summer 2007
Prerequisite:
GEOSC 561 Mathematical Modeling in the Geosciences (4) The process of transforming a conceptual geoscience model into a numerical model is presented; students create and solve numerical models.
Effective: Spring 2000
Prerequisite:
GEOSC 565 Tectonic Geomorphology (3) Tectonic geomorphology examines interactions between tectonic and surface processes, paleoseismology, geodesy, structure, active deformation, and landform evolution.
Effective: Summer 1998
Prerequisite:
GEOSC 572 Field Stratigraphy (1-2) This course introduces students to field techniques used by stratigraphers, with the capstone experience being a field trip during May.
Effective: Fall 2005
Prerequisite:
GEOSC 584 Clastic Depositional Environments (3) Readings, group discussions, and field work on processes and sedimentary responses of common rock-forming environments.
Effective: Fall 1989
Prerequisite:
GEOSC 585 Sedimentary Geology (3) An integrated approach to the study of modern and ancient sedimentary environments and their deposits.
Effective: Spring 2000
Prerequisite:
GEOSC 587 Preparing for an Academic Career in the Geosciences (3) The course focuses on successful strategies for the academic job market and for launching an academic career.
Effective: Spring 2009
Prerequisite:
GEOSC 589 Seminar in Aqueous Geochemistry (1) A seminar aimed at reading current articles in aqueous geochemistry and biogeochemistry.
Effective: Fall 2001
Prerequisite:
GEOSC 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1989

GEOSC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1989

GEOSC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1988

GEOSC 597A Topics in Earth System Science (2) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GEOSC 597B Paleobiology Seminar (1) Discussion of current topics in paleobiology.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GEOSC 597C Petroleum Geosystems (3) Provides an understanding of all phases of hydrocarbon exploration and production through a combination of team-based problems, field trips, industry lectures and site-visits. Required for Petroleum Geosystems emphasis.

GEOSC 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 1999
GEOSC 600 **Thesis Research** (1-15) No description.  
Effective: Spring 1989

GEOSC 601 **Ph.D. Dissertation Full-Time** (0) No description.  
Effective: Spring 1989

GEOSC 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience in teaching geosciences courses.  
Effective: Fall 1983

GEOSC 610 **Thesis Research Off Campus** (1-15) No description.  
Effective: Spring 1989

GEOSC 611 **Ph.D. Dissertation Part-Time** (0) No description.  
Effective: Spring 1989

GEOSC 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.  
Effective: Summer 2008

GEOSC 897A **Astrobiology Analogs in Canada** (2) This field trip to Canada will feature Precambrian sequence and investigate "the Great Oxidation Event". We will also visit other sites which have provided important clues for the evolution of the early biosphere.  
Effective: Summer 2012 Ending: Summer 2012

GEOSC 897B **Astrobiology - The Interdisciplinary Search for Life in the Cosmos** (2) Join faculty from the Penn State Astrobiology Research Center and examine how scientists work to detect and characterize life on the early Earth, in extreme environments, and in extraterrestrial settings. The latest research in astrobiology, NASA missions, and related hands-on activities will be highlighted.  
Effective: Summer 2012 Ending: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
German (GER)

GER 401Y (IL) **Advanced Composition** (3) Intensive practice in writing different text types in German. Effective: Spring 2012
Prerequisite:

GER 408 (IL) **Advanced German Business Communications** (3) Study of German business organization, forms of business communications, business terminology; writing of reports and abstracts. Effective: Spring 2006
Prerequisite:

GER 411 **The Teaching of German** (3) Theory, methods, techniques, materials, bibliography; use of inter-active media; contributions of linguistics or psychology to language learning. Effective: Summer 1994
Prerequisite:

GER 412 (IL) **Contrastive Analysis of Modern German and English** (3) Structural comparison of the German and English grammatical systems; morphology, syntax, phonology. Effective: Spring 2006
Prerequisite:

GER 420 (IL) **Genre** (3-9) Special studies in a particular literary genre in German literature, such as lyrical poetry, drama, or narrative prose. Effective: Spring 2006
Prerequisite:

GER 430 (IL) **History of the German Language** (3) Development of German from its earliest stages, including historical and cultural aspects. Effective: Fall 2007
Prerequisite:

GER 431 (IL) **History of German Literature and Culture I** (3) Significant works of German literature before the mid-eighteenth century considered in their cultural context. Effective: Spring 2006
Prerequisite:

GER 432 (IL) **History of German Literature and Culture II** (3) Significant works of German literature from the mid-eighteenth century to the present considered in their cultural context. Effective: Spring 2006
Prerequisite:

GER 440 (IL) **Seminar in German Culture** (3-6) Seminar devoted to a special topic in the field of German culture and civilization. Effective: Spring 2006
Prerequisite:

GER 472 (IL) **Romanticism** (3) A study of both early and late romanticism, including such writers as Novalis, the Schlegels, E.T.A. Hoffmann, and Heine. Effective: Spring 2006
Prerequisite:

GER 489 **Introduction to German Film History and Theory in Context** (3) Introduces films in German since the 1960s and addresses issues relevant to German and European cultures and politics. Effective: Spring 2005
Prerequisite:

GER 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 1994

GER 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007

GER 495 **Internship** (3-9) Supervised off-campus, non-group instruction including individual field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Summer 1981
Prerequisite:

GER 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

GER 496A **Teaching German** (3) Theory and techniques for post-secondary German instruction.
GER 496B Alt Pennsylvania German (3) Linguistic study of PA German.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GER 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1985

GER 499 (IL) Foreign Study--German (3-12) Advanced studies in German language, literature, and culture.
Prerequisite:

GER 510 Literary Theory: An Introduction (3) Introduction to the major theoretical approaches to the contemporary study of culture (literature, film, art and politics).
Effective: Spring 2004

GER 511 The Teaching of College German (3) Theory, methods, techniques, materials, bibliography contributions of linguistics and psychology to language learning; methods of teaching post-secondary German.
Effective: Fall 2005

GER 512 Introduction to German Linguistics (3) An overview of the major subfields of linguistics as they apply to the German language.
Effective: Summer 2002

GER 513 German Phonetics and Phonology (3) This course examines German speech sounds and their organization into a linguistic system.
Effective: Spring 2009

GER 514 German Syntax (3) This course provides an overview of morphosyntactic processes in German.
Effective: Spring 2009

GER 515 Introduction to German Applied Linguistics (3) Introduction to the major areas of the broad field of Applied Linguistics as relevant to the study of German.
Effective: Spring 2003

GER 516 The Acquisition of German and Dutch (3) This course examines how children and adult learners acquire German and Dutch in naturalistic settings (i.e. non-classroom situations).
Effective: Spring 2009

GER 520 Introduction to Middle High German (3) Descriptive and historical grammar; readings in simple Middle High German texts.
Effective: Winter 1978

GER 523 Gothic (3) Introduction to the historical and comparative Germanic grammar; emphasis on the Gothic language and texts. Suitable for advanced students in English.
Effective: Winter 1978

GER 540 Seminar in German Culture and Civilization (3-12) Examination of special problems in German culture and civilization.
Effective: Fall 1997

GER 541 German Literature of the Renaissance and Baroque (3) Intensive survey and review of German literature between 1450 and 1700.
Effective: Fall 1997

GER 551 German Literature from the Early Enlightenment to Storm and Stress (3) Advanced overview of major developments in German literature from the early to the late 18th century.
Effective: Fall 1997

GER 552 German Classicism and Romanticism (3) Intensive survey of German literature from the late 18th through the first third of the 19th centuries.
Effective: Spring 1997

GER 561 German Literature of the 19th Century--From Beidermeier to Realism (3) Survey of major developments in...
German literature from the mid- to the late-19th century.
Effective: Fall 1997

GER 571 German Literature from the Turn of the Century to 1945 (3) Advanced survey of German literature from the era of Naturalism to that of Exile literature.
Effective: Fall 1997

GER 572 Post-War and Contemporary German Literature (3) Intensive survey of German literature from Gruppe 47 through the literature of the GDR and down to the present.
Effective: Spring 1997

GER 581 Topics in Literary Genres (3-12) Special studies in the German lyric, drama, short story, and novel.
Effective: Fall 1997

GER 582 Topics in Germanic Philology and German Linguistics (3 per semester, maximum of 12) Special studies of modern or older Germanic languages.
Effective: Summer 1997

GER 589 (CMLIT 589, FR 589, SPAN 589) Technology in Foreign Language Education: An Overview (3) Approaches to the uses and research applications of multimedia and other educational technologies applied to the teaching of foreign languages. (also crosslisted with APLNG 589)
Effective: Spring 2004

GER 591 German Literary Theory and Criticism (3-6) Examination of major movements in literary theory and criticism with special reference to German literary thought.
Effective: Fall 1997

GER 592 Seminar in German Literature (3 per semester, maximum of 12) Focused investigation of a major figure or theme in German literature.
Effective: Summer 1997

GER 593 Seminar in German Philology and German Linguistics (3 per semester, maximum of 12) Focused investigation of a major topic in Germanic philology or linguistics.
Effective: Summer 1997

GER 596 Individual Studies (1-9) Creative projects including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

GER 596A PA German (3) Linguistics study of Pennsylvania German.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

GER 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

GER 600 Thesis Research (1-15) No description.
Effective: Fall 1983

GER 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

GER 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Instruction of lower division German courses with observation by the supervisor and attendance at regular meetings to discuss classroom techniques.
Effective: Fall 1983

GER 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2000

Effective: Fall 1983

GER 611 Ph.D. Dissertation Part-Time (0) No description.
Global Health (GH)

GH 717 Global Health Scholars First Year Elective (1-5) This course provides exposure to basic concepts of global health, tailored to first year medical students with a focus on community health assessment and engagement.  
Effective: Spring 2010  
Prerequisite:

GH 727 Global Health Scholars Second Year Elective (1-5) This course provides exposure to basic concepts of global health, designed for the second year medical students, with a focus on the global burden of disease and community-oriented participatory research. Students will utilize the knowledge and skills gained during this year, guided by faculty, to develop a health improvement intervention for the host site (e.g. San Pablo, Ecuador). This elective does not meet graduation requirements. It is offered as part of the Global Health Scholars Program.  
Effective: Spring 2010  
Prerequisite:

GH 747 Global Health Scholars Fourth Year Elective (4) Global Health Scholars 4th year elective.  
Effective: Summer 2011  
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
GOVMT 952 Administrative Law (3) The administrative process, rules and rule making, inspections and investigations, administrative hearings, rules of evidence, presumptions, burden of proof, formal and informal actions, orders, the right to, methods of obtaining, and scope of judicial review are examined.
Effective: Fall 1998

GOVMT 954 Election Law (2) This course covers federal and state election law and will examine the constitutional basis for the regulation of elections, the development of the law in this area over the last 30 years, as well as criminal and civil enforcement of the law, the role of the Federal Election Commission, the formation and regulation of political action committees, as well as related federal tax law provisions impacting operation of political committees and advocacy organizations. The course will also examine the intersection of the election law with congressional ethics rules, lobbying regulations and representation of political candidates and entities in election law matters.
Effective: Spring 2012

GOVMT 965 Federal Contract Law (2) This course deals with the basic principles of contracting with the federal government and emphasizes the differences between commercial and federal government contracts. It examines the relationship between the Uniform Commercial Code and government contracting methods of procurement, types of contracts, specialized clauses, award, protest, and other dispute remedies and procedures.
Effective: Fall 1998

GOVMT 970 Legislation (3) This course deals with the enactment and construction of statutes with specific attention to the organization, procedures and powers of federal and state legislative bodies, to statutory drafting and construction, and to lobbying.
Effective: Summer 2011

GOVMT 971 Statutory Interpretation (3) The course covers the wide variety of tools that lawyers and judges use to interpret statutes. A basic introduction to the legislative process and how important aspects of that process are relevant to statutory interpretation is also included. Students will be introduced to important techniques of statutory interpretation and the theoretical support for varying approaches to how judges do and should interpret statutes.
Effective: Summer 2011

GOVMT 985 Aviation Law (2) This course seeks to give the students a firm grounding in the law governing the domestic use of airspace for transportation and recreation. The licensing requirements of pilots, the struggle of the aviation industry to adapt to the market, the safety and security of passengers and the problems involved in building airports are just a few of the topics covered. The course provides an opportunity for those students who are interested in aviation to apply many of the subject they have studied in law school to a particular area of human activity. The cases studied in the course involve, inter alia: Administrative Law, Antitrust, Bankruptcy, Conflicts of Law, Contracts, Local Government Law, Environmental Law, Labor Law, Property Sales, Taxation and Torts.
Effective: Summer 2011

GOVMT 987 State and Local Government Law (3) Important issues in governmental organization and management are surveyed. Emphasis is placed on intergovernmental relations, the legislative process, personnel issues, financing, and contracting. The course will conclude with a consideration of recent trends toward metropolitan regionalism.
Effective: Fall 1998

GOVMT 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2008

Last Import from UCM: June 2, 2012 12:27 PM
Greek (GREEK)

Knowledge of Greek or Latin not required. See also CLASSICS AND ANCIENT MEDITERRANEAN STUDIES and LATIN.

GREEK 401 Introductory Reading in Greek Literature (3-6) Analysis of selected passages of ancient Greek literature; attention will be paid to grammatical as well as literary details. Effective: Summer 2011
Prerequisite:

GREEK 420 Greek Prose Authors (3-6) Readings in representative authors. Effective: Summer 2011

GREEK 425 Greek Historians (3-6) Translation and study of one or more of the ancient Greek historians. Effective: Summer 2011
Prerequisite:

GREEK 430 Greek Poetry (3-6) Translation and analysis of selected readings in Greek poetry. Effective: Summer 2011
Prerequisite:

GREEK 440 Greek Drama (3-6) Translation and study of a selected play. Effective: Summer 2011
Prerequisite:

GREEK 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 1994

GREEK 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007

GREEK 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

GREEK 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

GREEK 499 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

GREEK 509 Greek Seminar (3-9) No description. Effective: Fall 1983

GREEK 520 Greek Mythography (3) This graduate seminar focuses on ancient Greek mythographic authors from the beginnings of the genre (6th C.B.C.E.) to the Roman period. Effective: Fall 2008

GREEK 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2000

GREEK 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established. Effective: Summer 2005

Last Import from UCM: June 2, 2012 12:27 PM
Health Administration (H ADM)

H ADM 503 (P ADM 503) Research Methods (3) Examination of research methodologies relevant to administration, planning, and public policy.
Effective: Spring 2006 Ending: Summer 2012
Prerequisite:

H ADM 503 (P ADM 503) Research Methods (3) Examination of research methodologies relevant to administration, planning, and public policy.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

H ADM 506 (P ADM 506) Management Information Systems for Public and Health Administration (3) The design, implementation, and purpose of computerized management information systems in health and non-profit organizations.
Effective: Spring 2003

H ADM 510 (P ADM 510) Organization Behavior (3) Examines the concepts of human behavior in formal organizations, systems analysis, conceptual models, and decision processes.
Effective: Spring 2003

H ADM 539 Health Systems Organization (3) Health care delivery presented as a socio-technical systems focusing upon resources, policy issues, institutions, technology, and innovations.
Effective: Fall 1997
Prerequisite:

H ADM 540 Health Administrative Policy Formulation (3) Analysis of administrative problems from a total organization viewpoint. Case studies of actual organizations are used for analysis.
Effective: Summer 1997
Prerequisite:

Effective: Summer 1997
Prerequisite:

H ADM 542 Health Care Politics and Policy (3) This course reviews political considerations and the policy process as they pertain to health care in the United States.
Effective: Summer 1997
Prerequisite:

H ADM 543 Long-Term Care Administration and Policy (3) This course reviews theory and practice related to long-term care administration and policy.
Effective: Summer 1997
Prerequisite:

H ADM 545 Health Financial Management (3) Theory and techniques of financial management applied to health organizations; forecasting, control systems, working capital, capital budgeting, and institutional financing.
Effective: Summer 1997
Prerequisite:

H ADM 546 Health Planning for Public Administration (3) Comprehensive planning and program planning for health services, facilities, and manpower; social, economic, and political considerations; methodological problems.
Effective: Summer 1997
Prerequisite:

H ADM 548 Health Care Quality Assurance (3) This course reviews theory, methods, outcomes, and management of quality assurance in health care organizations.
Effective: Summer 1997
Prerequisite:

H ADM 551 Health Care Law (3) Course on health law for administrators with coverage including hospital governance, taxation, licensure, liability, malpractice, patients’ rights, anti-trust.
Effective: Summer 1997
Prerequisite:

H ADM 552 Health Delivery Systems (3) This course discusses design and implementation of health care delivery systems and the pressure and stakeholders which impact those systems.
Effective: Spring 2005
Prerequisite:

H ADM 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1998

The Pennsylvania State University
H ADM 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1997

H ADM 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1999

H ADM 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2006

H ADM 897A **Health Financial Management** (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2012 Ending: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
Health Education (HL ED)

HL ED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

HL ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

HL ED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1993

HL ED 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1992

HL ED 596 Individual Studies (1-9) Individual studies course.
Effective: Spring 1987

HL ED 597 Special Topics (1-9) Special topics course.
Effective: Spring 1987

HL ED 600 Thesis Research (1-15) No description.
Effective: Fall 1983

HL ED 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

HL ED 602 Supervised Experience in College Teaching (1-3 per semester maximum of 6) Preparation and presentation of materials in lecture and laboratory classes under the supervision of a full-time faculty member.
Effective: Fall 1983
Prerequisite:

Effective: Fall 1983

HL ED 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Health Education (HLHED)

HLHED 406 Human Sexuality (3) Examination of physiology, diseases, attitudes, morality, and controversial topics related to human sexuality.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

HLHED 415 Planning and Developing Health Education Programs (3) Premises and strategies for planning, implementing, and evaluating wellness programs in corporate, hospital, and community agency settings.
Effective: Fall 1997
Prerequisite:

HLHED 420 Development of Stress Management Programs for Health Education (3) Planning, development, and implementing strategies for stress management programs for health education professionals in school, community, and corporate settings.
Effective: Fall 1997
Prerequisite:

HLHED 443 Alcohol and Drug Education (3) Principles of integration and coordination of alcohol and drug education programs for health education and other social service professions.
Effective: Fall 1997
Prerequisite:

HLHED 456 Advanced Techniques in School and Community Health Education (3) Public health, mental health, nutrition, dental school health, physical education, accident prevention, health teaching; projects, consultation, visitation, discussions, and resources.
Effective: Fall 1997
Prerequisite:

HLHED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1997

HLHED 501 World Health Promotion (3) Analysis of the various health problems that affect humans throughout the world; emphasis will be placed on personal health issues.
Effective: Fall 1997

HLHED 516 Evaluation of Health Education and Promotion Programs (3) Criteria and strategies to assess the impact of health education and health promotion programs in school, community, and corporate settings.
Effective: Fall 1997

HLHED 530 Research Techniques in Health Education (3) Research techniques, including methods, research design, techniques for data collection, as applied to relevant problems in the health education field.
Effective: Fall 1997

HLHED 552 Current Health Education Issues (3) Analysis of scientific and political foundations of current issues within health education tasks, with emphasis on research and action implications.
Effective: Fall 1997

HLHED 553 Multicultural Health Issues (3) This course is designed to explore cultural factors influencing the health status among racial/ethnic groups in the United States.
Effective: Summer 2002

HLHED 582 (EDUC 582) Spirituality and Culture in Health and Education Professions (3) This course focuses on the cultural aspects of spirituality and its place in the health and education professions.
Effective: Summer 2009

HLHED 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1997

HLHED 591 Capstone Seminar in Health Education (3) Culminating or capstone experience for students in the M. Ed. program in Health Education.
Effective: Fall 1997
Prerequisite:

HLHED 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
HLHED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Fall 1997
Health Law (HLTHL)

HLTHL 960 Food and Drug Law (3) This survey course covers the federal regulation of food, human and animal drugs, medical devices, cosmetics, biologies, and agricultural biotechnology. The primary focus will be on the Federal Food, Drug, and Cosmetic Act and the operations of the U.S. Food and Drug Administration. The course will also cover related status implemented by the U.S. Department of Agriculture, the interaction between federal regulation and private tort litigation, and international trade in FDA-regulated products.
Effective: Spring 2012
Prerequisite:

HLTHL 961 Bioethics and Public Health Law (3) The course will focus on the laws governing ethical issues that arise in the course of providing medical care and ensuring public health. Specific topics include treatment at the end of life, reproductive rights, organ transplantation, genetic testing, human experimentation, and infectious disease control and prevention. A central theme is the conflict between patients' interests and the interests of others and/or social interests. This course also explores the intersection of ethics and economics in terms of the social right to care and the rationing of limited medical resources.
Effective: Summer 2012

HLTHL 963 Healthcare Organization and Finance (3) This introductory health law course will examine how the law influences the regulation, structure, financing, and delivery of healthcare in the United States. We will also consider the challenges facing healthcare providers, regulators, and consumers. Issues to be addressed include private health insurance and managed care, ERISA, COBRA, HIPAA, Medicare, Medicaid, fraud and abuse, and antitrust.
Effective: Summer 2012

HLTHL 971 Law and Medicine (3) This course focuses on law concerning the physician-patient relationship as well as bioethical issues that arise in that relationship. It covers confidentiality, medical malpractice, informed consent, the duty to treat, refusing life-sustaining medical treatment, physicians and patients on matters relating to patient care.
Effective: Fall 2008

HLTHL 975 Health Care Industry Regulation (2) This course focuses on federal and state regulation of the major players in the health care industry–hospitals, nursing homes, physicians, health insurers, and managed care organizations. It covers liability of hospitals and managed care organizations for negligence, the duty to treat as applied to hospitals and managed care networks, the regulation of private health insurers, Medicare and Medicaid, false claims statutes, federal fraud and abuse regulation, and more. The course will expose students to issues and regulations that government and corporate health care lawyers regularly address.
Effective: Fall 2001

HLTHL 997 Special Topics (1-9) Special topics in the Health Law field.
Effective: Spring 2008

HLTHL 997B Healthcare Organization and Finance (3) This introductory health law course will examine how the law influences the regulation, structure, financing, and delivery of healthcare in the United States. We will also consider the challenges facing healthcare providers, regulators, and consumers. Issues to be addressed include private health insurance and managed care, ERISA, COBRA, HIPAA, Medicare, Medicaid, fraud and abuse and antitrust.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

Last Import from UCM: June 2, 2012 12:27 PM

The Pennsylvania State University
Health Policy and Administration (HPA)

HPA 401 (IL) Comparative Health Systems (3) Comparative analysis of health services in selected developed and developing countries.
Effective: Summer 2011

HPA 410 Principles of Public Health Administration (3) The rationale for, and the patterns of, public health service at all levels of government in the United States.
Effective: Summer 2011

HPA 420 Principles of Managed Care (3) Survey of managed health care, including history, typology, current issues, management challenges, and impacts on patients, providers, and special populations.
Effective: Summer 2011

HPA 433 Administration of Hospital and Health Service Systems (3) Analysis of administrative structures and interorganizational arrangements among hospitals and other health care organizations.
Effective: Spring 1998
Prerequisite:

HPA 440 (US;IL) (BBH 440) Principles of Epidemiology (3) Theory of epidemiology and significant case studies. Potential application to health care.
Effective: Fall 2008
Prerequisite:

HPA 440U (US;IL) (BBH 440U) Principles of Epidemiology (3) Theory of epidemiology and significant case studies. Potential application to health care.
Prerequisite:

HPA 442 Long-Term Care Management (3) Management and policy issues for institutional, community, and home settings for chronic care services.
Effective: Spring 1998
Prerequisite:

HPA 445 (ECON 445) Health Economics (3) Economic analysis of U.S. health care system; planning, organization, and financing; current public policy issues and alternatives.
Effective: Spring 1994
Prerequisite:

Effective: Spring 2008
Prerequisite:

HPA 447 Financing Health Care (3) Analysis of financial flows, third party payment programs, and reimbursement practices in the health services sector.
Effective: Fall 2011
Prerequisite:

HPA 450 Healthcare Policies and Politics (3) Survey of health care's political contexts: formulation, implementation, and modification stages of policy process; politics of private interests (associations) at national and state levels.
Effective: Summer 2011
Prerequisite:

HPA 455 Strategic Planning and Marketing for Health Services (3) Introduction to principles and methods of strategic planning and marketing.
Effective: Spring 1998
Prerequisite:

HPA 460 Human Resource Management in Health Care Organizations (3) Foundations of human resource management applied to health care organizations, including hospitals, long-term care facilities, and community health organizations.
Effective: Spring 1998
Prerequisite:

HPA 470 Health Care Information Management (3) This course introduces information systems terminology, data structures, software applications, and their management functions in health services organizations.
Effective: Summer 2000
Prerequisite:

HPA 490 Physician Practice Management (3) Development of skills needed to effectively manage physician practices.
Effective: Spring 2012
Prerequisite:
H P A 494H **Senior Honors Thesis** (1-6) Independent study related to student's interests directed by a faculty supervisor and culminating in the production of a thesis.  
Effective: Summer 2006  
Prerequisite:  

H P A 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Fall 1983  

H P A 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Fall 1983  

H P A 497A **Insurance Healthcare Quality** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Summer 2012 Ending: Summer 2012  

H P A 497A **Healthcare Leadership** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012  

H P A 497A **Healthcare Leadership II** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  

H P A 497B **Physician Practice Management** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012  

H P A 503 **Health Services Organizational Behavior** (3) A systematic application of the principles of organizational behavior to understanding professional roles in health services organizations.  
Effective: Spring 2011  

H P A 510 **Health Services Financing and Policy** (3) Introduction to health policy focusing on health services financing, insurance and other current health policy topics.  
Effective: Spring 2011  

H P A 511 **Research Seminar on Health Services Financing and Policy** (3) An examination of seminal and current research on health services financing, insurance and health policy.  
Effective: Spring 2011  
Prerequisite: Concurrent: H P A 510  

H P A 520 **Introduction to Health Services Organizations and Delivery** (3) Introduction to health systems, health services organization and health care delivery focused on trends, problems and issues.  
Effective: Spring 2011  

H P A 521 **Research Seminar on Health Services Organization and Delivery** (3) An examination of seminal and current research on health services organization and delivery, emphasizing costs, access and quality.  
Effective: Spring 2011  
Prerequisite: Concurrent: H P A 520  

H P A 523 **Managerial Epidemiology** (3) Introduction to the principles and methods of managerial epidemiology and its application to health care.  
Effective: Spring 2011  
Prerequisite:  

H P A 524 **Management of Health Services Organizations** (3) A systematic study of the roles of health services managers and the organizational and environmental context within which they work.  
Effective: Spring 2011  

H P A 526 (SOC 526) **Health Disparities** (3) This course provides an overview of social factors that lead to demographic disparities in health.  
Effective: Summer 2012  

H P A 528 **Health Data Analysis for Research** (3) Introduction to data sources and use of software for data management and analysis in health services research.  
Effective: Spring 2011  
Prerequisite:  

H P A 531 **Health Problem Analysis** (3) Logic of empirical inquiry in study of community problems in health; integration
of theory and practice, technical data, and values.
Effective: Summer 1995

H P A 540 Epidemiological Applications in Health Services Research (3) The course emphasizes theoretical as well as practical issues relating to applying advanced methods of epidemiology in health services research.
Effective: Fall 2001
Prerequisite:

H P A 541 Poverty, Race, Ethnicity and Child Health (3) Seminar focusing on disparities in infant, child, and adolescent health, and policies and programs impacting these disparities.
Effective: Spring 2011

H P A 545 Introduction to Health Economics (3) Survey of the application of economics to the roles of markets and government in health care.
Effective: Spring 2011

H P A 547 Health Services Reimbursement (3) Analysis of third party reimbursement of health care providers.
Effective: Summer 1992
Prerequisite:

H P A 551 Quality Improvement in Healthcare (3) Examination of major approaches to performance improvement in contemporary healthcare systems.
Effective: Summer 2010

H P A 556 Strategy Development in Health Services Organization (3) Integration of prior course work in the program to develop a strategic plan for a health services organization.
Effective: Spring 2011
Prerequisite:

H P A 551 Introduction to Research Design in Health Services Research (3) Review and critical analysis of state-of-the-art health services research methods.
Effective: Summer 1999

H P A 562 Economics Applications in Health Services Research (3) Application of theoretical and empirical tools of microeconomics to issues in health services utilization and delivery.
Effective: Spring 2011
Prerequisite:

H P A 563 Organizational Studies in Health Services Research (3) Applications of theoretical and empirical tools of organizational studies in the delivery of health care.
Effective: Spring 2011
Prerequisite:

H P A 564 Research Methods in Health Services Research (3) Introduction to regression models in health services research, including violations and tests of model assumptions and solutions for those violations.
Effective: Spring 2011
Prerequisite:

H P A 566 Advanced Methods in Health Services Research I (3) Advanced topics course focusing on extensions of the ordinary least squares regression model and nonlinear methods in health services research.
Effective: Summer 2010
Prerequisite:

H P A 590 Colloquium (1-3) Introduction to the field of health services research.
Effective: Summer 1998

H P A 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 1990
Prerequisite:

H P A 596 (CSP D 596) Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1987

H P A 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1987

H P A 597A Advanced Method Health Services Research II (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
H P A 597B **Program Evaluation** (3) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

H P A 600 **THESIS RESEARCH** (1-15) NO DESCRIPTION. Effective: Summer 1992

H P A 601 **PH.D. DISSERTATION FULL-TIME** (0) NO DESCRIPTION. Effective: Summer 1992

H P A 602 **Supervised Experience in College Teaching** (1-3 per semester, maximum of 6) Supervised and graded teaching experience in selected undergraduate Health Policy and Administration courses. Effective: Fall 1989

H P A 610 **THESIS RESEARCH OFF-CAMPUS** (1-15) NO DESCRIPTION. Effective: Summer 1992

H P A 611 **PH.D. DISSERTATION PART-TIME** (0) NO DESCRIPTION. Effective: Summer 1992

H P A 805 **Change Leadership in Health Services Organizations** (3) Exploration of diagnostic and intervention strategies employed in planned change in health services organizations and programs. Effective: Spring 2011

H P A 822 **Clinical Issues for Health Services Management** (3) Introduction to current clinical issues in health services organizations focusing on the role of managers. Effective: Spring 2011

H P A 835 **Financial Management in Health Institutions** (3) The financial environment of health institutions; financial aspects of management decision making; emphasis on revenue sources, budgeting, and cost control. Effective: Fall 2009

H P A 836 **Health Law** (3) The legal process as it applies to the health administrator, health organization, medical provider, and patient. Effective: Spring 2011

H P A 850 **Health Care Marketing** (3) Introduction to the theory, concepts, skills, and principles of marketing applied to health related organizations and networks. Effective: Spring 2011

H P A 855 **Information Systems in Health Services Administration** (3) Foundations of information systems for supporting clinical services, quality improvement, and administrative functions in health services management. Effective: Summer 2010

H P A 895 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Summer 2010

H P A 896 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2009

H P A 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Summer 2008

H P A 897A **Health Data Analysis (Operations Management)** (3) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

Last Import from UCM: June 2, 2012 12:27 PM
Hebrew (HEBR)

HEBR 401 Advanced Hebrew--Conversation Emphasis (3 per semester, maximum of 6) Development of oral proficiency through discussions focusing on issues in contemporary Jewish culture. Effective: Summer 2011

HEBR 402 Advanced Hebrew--Reading Emphasis (3 per semester, maximum of 6) Readings in representative works of traditional and modern literature; practice in composition; study of aspects of Jewish culture. Effective: Summer 2011

HEBR 451 Advanced Biblical Hebrew (3) Translation and analysis of selected readings in Biblical Hebrew texts; attention will be paid to grammatical as well as literary details. Effective: Spring 2007

HEBR 452 Readings in Biblical Hebrew (3) Translation and analysis of selected readings in Biblical Hebrew texts; attention will be paid to grammatical as well as literary details. Effective: Spring 2007

HEBR 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 1994

HEBR 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007

HEBR 496 Independent Studies (1-18) Creative projects including research and design which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1982

HEBR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester. Effective: Fall 1983

HEBR 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 1992

HEBR 499 (IL) Foreign Study--Advanced Hebrew (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

HEBR 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1997

HEBR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Summer 2003
Hematology-Hy (HEM)

HEM 721 Hematology (3) Some of the areas studied will be: Erythrocyte Disorders; Hemostasis; Myeloid Stem Cell Disorders; Lymphoproliferative and Immunoproliferative Diseases; Blood Banking; and Hematology Laboratory.
Effective: Fall 2001
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
**Higher Education (HI ED)**

**HI ED 497** Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1995

**HI ED 497A** Pro Seminar: Topics in the Study of Higher Education for HIED MED Students (3) An orientation to graduate study in HI ED, exploration of foundational topics in HI ED, the identification of careers for HI ED MED.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

**HI ED 498** Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1995

**HI ED 503 (CI ED 503, EDTHP 507)** Ethnicity, National Identity, and Education (3) Surveys group-oriented education policies internationally, especially comparing those of Britain, Taiwan, India.
Effective: Summer 1995

**HI ED 545** Higher Education in the United States (3) Introduction to the educational context and major organizational and academic characteristics of postsecondary education; analysis of issues and future trends.
Effective: Summer 1995

**HI ED 546** College Teaching (2-3) Principles involved in teaching at the college level; effective use of teaching aids; criteria used in evaluation.
Effective: Summer 1995

**HI ED 548** Curriculums in Higher Education (2-3) Various types of curriculums and philosophies underlying them; ways in which curriculums are developed; elective versus required courses; evaluation of achievement.
Effective: Summer 1995

**HI ED 549 (ADTED 549)** Community Junior College and the Technical Institute (2-3) Distinctive contributions to meeting the need for postsecondary education; development, functions, curriculum and instruction, government, administration, and finance.
Effective: Summer 1995

**HI ED 552** Administration in Higher Education (3) Philosophy of administration; principles of scientific management and their application in colleges and universities; case studies of administrative problems.
Effective: Summer 1995
Prerequisite:

**HI ED 553 (CI ED 553, EDTHP 553, SOC 553)** Educational Mobility in Comparative Perspective (3) Role of education in social mobility, using quantitative, qualitative, and historical methods; focuses comparatively on Britain, East Asia, and South America.
Effective: Spring 2003

**HI ED 554** The History of American Higher Education (3) An examination of the development of American higher education against the background of influential social, political, economic, and intellectual issues.
Effective: Summer 1995

**HI ED 556** Higher Education Students and Clientele (3) Characteristics of higher postsecondary education students and other clientele; changes during postsecondary education years and during college; educational challenges and responses.
Effective: Summer 1995

**HI ED 557 (EDTHP 557, SOC 557)** Sociology of Higher Education (3) Reviews theory and current sociology research on student access, achievement, and governance in postsecondary education, with applications to policy analysis.
Effective: Fall 2000
Prerequisite:

**HI ED 560** Legal Issues in Higher Education (3) A process for analyzing case law on issues of access, student rights, employment, collective bargaining, church/state, private sector, and liability.
Effective: Summer 1995

**HI ED 562** Organizational Theory and Higher Education (3) Application of social science theory and research to postsecondary education organizations and administration; use of research in administrative practice.
Effective: Summer 1995
Prerequisite:

HI ED 571 (CI ED 571) **Comparative Higher Education** (3) Comparative methods of studying structural variations in systems of higher education in principal industrialized nations and other selected countries.
Effective: Spring 1995

HI ED 585 (EDLDR 585, EDTO 585) **Research Design: Implications for Decisions in Higher Education** (3) A capstone course on research design and analytical approaches to support decision-making in administration and policy-making.
Effective: Fall 2004
Prerequisite:

HI ED 586 (EDLDR 586, EDTO 586) **Qualitative Methods in Educational Research** (3) Exploration of the theoretical framework undergirding qualitative research and its attendant practices and techniques.
Effective: Fall 2004
Prerequisite:

HI ED 587 (EDLDR 587, EDTO 587) **Education Policy and Politics** (3) The political economy and bureaucratic politics of educational organizations, with special attention to the policy-making, implementation, and evaluation processes.
Effective: Fall 2004

HI ED 588 (EDLDR 588, EDTO 588) **Qualitative Methods in Educational Research II** (3) Advanced study of methods involved in executing and analyzing qualitative research in education.
Effective: Summer 2007
Prerequisite:

HI ED 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1995

HI ED 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1995

HI ED 595 **Internship in Higher Education** (1-9) Supervised experience in administrative offices, in research, on instructional teams, and in college teaching.
Effective: Summer 1995

HI ED 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and fall outside the scope of formal courses.
Effective: Summer 1995

HI ED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 1995

HI ED 597B **Higher Education Engagement and Outreach** (3) This course will explore perspectives and issues associated with the outward-facing mission embraced by many institutions of higher education.
Effective: Summer 2012 Ending: Summer 2012

HI ED 597A **Campus Environment** (3) This course is intended to show how environments can have a powerful, and often an unconscious influence.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HI ED 597B **Higher Education Quantitative Analysis and Interpretation** (3) Practical course covering empirically analyzing higher education topics, including conceptualization, data management/analysis using SPSS, presenting results, and preparing conference proposals.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:

HI ED 597E (EDTHP 597E) **Reviewing and Editing Education Policy and Research Journals** (3) Provide advance doctoral students with a systematic introduction to reviewing and editing policy and research journals in the field of education.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HI ED 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2005

HI ED 600 **Thesis Research** (1-15) No description.
Effective: Summer 1995
HI ED 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 1995

HI ED 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 1995

HI ED 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Summer 1995

HI ED 801 **Foundations of Institutional Research** (3) Survey course explores fundamental methods and research on campus decisions, enrollment management, faculty work analysis, institutional effectiveness, accreditation, student outcomes.
Effective: Spring 2010

HI ED 810 **Planning and Resource Management in Higher Education** (3) Strategic planning and resource management in higher education through institutional research.
Effective: Spring 2010

HI ED 820 **Studying Students & Student Affairs Program** (3) Studying the relationship of college activities to academic success by students.
Effective: Spring 2010

HI ED 830 **Designing Institutional Research Studies** (3) Develop skills to design and execute IR studies using quantitative and qualitative research methods.
Effective: Spring 2010

HI ED 840 **Assessing Student Outcomes & Evaluating Academic Programs** (3) Academic program assessment/student outcomes in accountability and accreditation processes.
Effective: Spring 2010

HI ED 850 **Analyzing Faculty Workload, Performance, and Compensation** (3) Develop research skills to analyze faculty workload and performance in teaching, research, outreach, and compensation.
Effective: Spring 2010

HI ED 860 **Conducting Enrollment Management Studies** (3) Studies three stages of enrollment management: Pre-admission, initial student experience, and student success and completion.
Effective: Spring 2010

Last Import from UCM: June 2, 2012 12:27 PM
History (HIST)

HIST 400 Research in Ancient Sources (3) Guided research in the literature of ancient Mediterranean civilizations. Effective: Spring 2008
Prerequisite:

HIST 401 (IL) (J ST 401) Ancient Technologies and Socio-cultural History in the Ancient Levant (3) Social and intellectual development in the Ancient Levant as they affected and were affected by technological development. Effective: Spring 2006
Prerequisite:

Prerequisite:

HIST 403 (IL) Alexander the Great and the Hellenistic World (3) The career of Alexander, his impact on his own time, and the Hellenistic legacy. Effective: Spring 2006
Prerequisite:

HIST 404Y (IL) Rome and Hellenism (3) The impact of traditional Greek culture on ancient Italian society in the age (ca. 300-30 B.C.) of Roman imperial expansion. Effective: Spring 2006
Prerequisite:

HIST 405Y (IL) The Roman Empire (3) The political and social history of the Roman empire; economic institutions and religious groups which influenced Roman administration. Effective: Spring 2006
Prerequisite:

HIST 406W Research in Medieval Sources (3) Guided research in the literature of medieval Europe. Effective: Spring 2008
Prerequisite:

HIST 407 (IL) Early Medieval Society (3) Rise of European nations and evolution of their social and political institutions from the time of Constantine to the Crusades. Effective: Spring 2006
Prerequisite:

HIST 408 (IL) Church and State in the High Middle Ages (3) European political, institutional, and social history in light of church-state tensions from the Crusades to the Renaissance. Effective: Spring 2006
Prerequisite:

HIST 409Y (IL) (J ST 409Y, RL ST 407Y) European Anti-Semitism from Antiquity to the Present (3) Surveys the history of anti-Semitism in Europe from antiquity through the Middle Ages to the present. Effective: Summer 2005

HIST 411 (IL) (MEDVL 411) Medieval Britain (3) Political, cultural, and economic history of Britain from circa 400 to 1485 with an emphasis on the kingdom of England. Effective: Spring 2006
Prerequisite:

HIST 412 (IL) Intellectual History of the Middle Ages (3) Intensive study of selected topics, such as philosophy, mysticism, heresy, the church, literary and artistic expression, and science. Effective: Spring 2006
Prerequisite:

HIST 413 (IL) (MEDVL 413) Medieval Celtic Studies (3) Celtic civilization from antiquity to the end of the middle ages. Effective: Spring 2006
Prerequisite:

HIST 414 (IL) Renaissance and Reformation (3) The transformation of consciousness from medieval to modern times, with special emphasis on Renaissance Italy and Reformation Germany. Effective: Spring 2006
Prerequisite:

HIST 415 (US;IL) Race, Gender, and Politics in the United States and South Africa (3) This thematic course will compare key issues, figures, and events in the historical development of the United States and South Africa. Effective: Summer 2011 Ending: Summer 2012

The Pennsylvania State University
Prerequisite:

HIST 415 (US;IL) **Race, Gender, and Politics in the United States and South Africa** (3) This thematic course will compare key issues, figures, and events in the historical development of the United States and South Africa.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

HIST 416 (J ST 416) **Zionist History 1890-1948** (3) History of Zionist thought and politics to the foundation of Israel 1948.
Effective: Summer 1997

HIST 417 (IL) **The Age of Absolutism** (3) Seventeenth- and eighteenth-century royal absolutism in France, Prussia, and Austria; concurrent economic, social, and scientific developments; the Enlightenment.
Effective: Spring 2006
Prerequisite:

HIST 418 (IL) **The French Revolution and the Napoleonic Era** (3) Development of revolutionary France and the First French Empire and their impact on Europe from 1789 to the Vienna settlement.
Effective: Spring 2006
Prerequisite:

HIST 418W (IL) **The French Revolution and the Napoleonic Era** (3) Developments of revolutionary France and the First French Empire and their impact on Europe from 1789 to the Vienna settlement.
Effective: Spring 2008
Prerequisite:

HIST 419 (US;IL) **The History of Feminist Thought** (3) A critical analysis of European and United States feminist thought from the renaissance to the present.
Effective: Summer 2011
Prerequisite:

HIST 420 (IL) **Recent European History** (3) Impact of two World Wars in twentieth century; social conflict and economic catastrophe; political radicalism; post-1945 recovery and cooperation.
Effective: Spring 2006
Prerequisite:

HIST 420W (IL) **Recent European History** (3) Impact of two World Wars in twentieth century; social conflict and economic catastrophe; political radicalism; post-1945 recovery and cooperation.
Effective: Spring 2008
Prerequisite:

HIST 421 (IL) (WMNST 421) **The History of European Women** (3) European women's lives from the Middle Ages to the present.
Effective: Spring 2006
Prerequisite:

HIST 422 (IL) **Modernity and Its Critics: European Thought Since 1870** (3) Perceptions and critiques of modernity as seen in works of European cultural criticism, social theory, philosophy, and literature.
Effective: Spring 2006
Prerequisite:

Effective: Spring 2006
Prerequisite:

HIST 473 (IL) The Contemporary Middle East (3) Political, economic, and social changes in Turkey, Iran, Israel, and the Arab countries in the twentieth century; Arab-Israeli conflict.
Effective: Spring 2006

HIST 475Y (IL) The Making and Emergence of Modern India (3) India's transition to social, economic, and political modernity through the experience of British colonial rule and the nationalist struggle.
Effective: Spring 2006
Prerequisite:

HIST 477 American Military History to 1900 (3) Development of United States military policy, 1776-1900, emphasizing conduct of wars, interrelationship of civil and military authority.
Effective: Spring 2008
Prerequisite:

HIST 478 American Military History Since 1900 (3) Development of United States military policy in the 20th and 21st centuries, emphasizing conduct of wars, interrelationship of civil and military authority.
Effective: Spring 2008
Prerequisite:

HIST 479 (IL) History of Imperialism and Nationalism in Africa (3) Theories and types of imperialism; varied patterns of colonial administration; initial African responses; nationalism; decolonization and independence.
Effective: Spring 2006
Prerequisite:
HIST 480 (IL) Medieval Japan (3) An overview of Japan between 1150-1550, a period of political decentralization, cultural efflorescence, and social change. Effective: Spring 2006
Prerequisite:

HIST 481 (IL) Modern Japan Since 1800 (3) The transformation of Japan from a pre-modern, isolated, and agricultural nation into a highly industrialized world power. Effective: Spring 2006
Prerequisite:

HIST 483 (IL) Chinese Society and Culture to 1800 (3) The social, political, and cultural issues and developments from ancient to the late-imperial times. Effective: Spring 2006
Prerequisite:

HIST 484Y (IL) History of Chinese Thought (3) A study of the dynamic historical development of Chinese thought with its diverse expressions from antiquity to the present. Effective: Spring 2006
Prerequisite:

HIST 485Y (IL) Nineteenth-Century China (3) Ch'ing society and institutions; "opening" to the west; imperialism; domestic upheaval and its effect upon Chinese society; reform movements. Effective: Spring 2006
Prerequisite:

HIST 486 (IL) Twentieth-Century China (3) China from the Republican Revolution of 1911 to the present; nationalism, cultural change; development of communism. Effective: Spring 2006
Prerequisite:

HIST 487 American Diplomacy, 1776-1914 (3) Developments in the foreign policy of the United States from independence to the eve of World War I. Effective: Spring 2008
Prerequisite:

HIST 488 American Diplomacy Since 1914 (3) Developments in the foreign policy of the United States since the eve of World War I. Effective: Spring 2008
Prerequisite:

HIST 490 (L ST 490) Archival Management (1-3) Introduction to the principles and procedures in the management of archives and historical manuscripts. Effective: Fall 1978

HIST 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 1994

HIST 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007

HIST 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships. Effective: Summer 1986
Prerequisite:

HIST 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

HIST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

HIST 497A The War of 1812: The Second War for Independence (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HIST 497B (WMNST 497B) Women and Gender in East Asia (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

The Pennsylvania State University

HIST 497C Black Women's History from Slavery to the Present (3) African American women's history from slavery to the present, exploring the ways that these women engaged in local/national freedom struggles. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HIST 497D History of Immigration and Refugee Resettlement in the United States from World War II to the Present (3) This course is designed for students to explore the history of immigration and refugee resettlement in the United States since World War II. It is both a policy history course and a social history course, meaning that we will look at laws related to immigration and refugee resettlement and the ways individuals, families, and communities experience them. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HIST 497E The Orthodox Christian Tradition (3) History, culture, and beliefs of the Eastern Orthodox religious tradition with special reference to Russia. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HIST 497H Major Interpretations in US History (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HIST 499 (IL) Foreign Study--History (1-6) Study in selected foreign countries of various periods and topics in history. Effective: Summer 2005

HIST 502 Historiography (3) No description. Effective: Winter 1978

HIST 503 Studies in Greek History (3-6) No description. Effective: Winter 1978

HIST 504 Studies in Roman History (3-6) No description. Effective: Winter 1978

HIST 505 (J ST 505) Biblical Historiography in its Ancient Setting (3 per semester/maximum of 6) Methods of historical reconstruction in Biblical and other historiography from the earliest Mesopotamian records through those of the 6th century B.C.E. Effective: Spring 1995

HIST 509 Medieval Civilization (3-9) No description. Effective: Winter 1978

HIST 511 Topics in Medieval Britain (3 per semester, maximum of 6) Readings and research in major themes of the history of medieval Britain. Effective: Summer 1994

HIST 512 Church and State in Medieval Europe (3) This course provides students with an overview of the political developments of church and secular government in medieval Europe. Effective: Fall 2011

HIST 514 The Early Modern World: Empires, Trade, and Religion (3) This course provides an overview of early modern history, with an emphasis on cultural encounters between the different global regions. Effective: Summer 2012

HIST 515 Early Modern Europe (3-6) A graduate seminar examining selected topics in early modern European history through readings, discussions, and research papers. Effective: Spring 1987

HIST 520 **Studies in Twentieth-Century Europe** (3-6) No description.  
Effective: Winter 1978

HIST 522 **Studies in Modern European Intellectual History** (3-6) A seminar examining developments in modern European intellectual history through readings, class discussions, and research papers.  
Effective: Summer 1986

HIST 525 **Imperial Borderlands in Modern Europe** (3) This course provides students with an overview of the processes of constructing borders in a variety of forms, ethnic, religious, trade, and linguistic, in a European imperial context.  
Effective: Summer 2012

HIST 527 **Societies, Citizens, and Violence in Modern Europe** (3) The social and cultural history of warfare in modern Europe, with specific emphasis on the First and Second World Wars.  
Effective: Fall 2011

HIST 529 **Methods in Modern Social History** (3 per semester, maximum of 6) Sources, interpretations, research methods, and current debates in modern social history.  
Effective: Summer 1994

HIST 530 **Methods in the History of Science and Technology** (3 per semester, maximum of 6) Modern research methods and historiographical controversies in the history of science and technology.  
Effective: Summer 1994

HIST 531 **Religion and State-Making in the Early Modern World, 1400-1800** (3) This course provides students with an overview of the process of state-making in relationship to religious convictions in the Early Modern era, ca. 1400-1800.  
Effective: Summer 2012

HIST 533 **Studies in Russian and Soviet History** (3-6) No description.  
Effective: Winter 1978

HIST 534 **The Catholic World 1540-1770** (3) This course examines the relationship between world history and Catholicism.  
Effective: Summer 2012

HIST 535 **History of the Body** (3) This course provides students with an overview of the contribution of intellectual and cultural historians to the field of "body history."  
Effective: Summer 2012

HIST 537 **Studies in British History** (3-6) No description.  
Effective: Winter 1978

HIST 539 **Topics in Military History** (3 per semester, maximum of 9) Studies in the history of wars and of the political, social, economic, diplomatic, and theoretical foundations of warfare.  
Effective: Summer 1994

HIST 540 **Studies in Colonial and Revolutionary America** (3-6) No description.  
Effective: Fall 1983

HIST 541 **War in the Early Modern and Modern World** (3) The study of the causes, conduct, and political, social, diplomatic, cultural, and economic consequences of war from 1500 to the present.  
Effective: Summer 2012

HIST 542 **The United States and Global Migration 1815-1924** (3) Students study the impact of immigration on American society in a global setting.  
Effective: Fall 2011

HIST 543 **Topics in Antebellum America** (3 per semester, maximum of 6) Social, intellectual, and cultural developments from the period after the nation's founding until the start of the Civil War.  
Effective: Summer 1994

HIST 544 **Topics in the Civil War and Reconstruction** (3 per semester, maximum of 6) Background and impact of the Civil War and the two succeeding decades, with emphasis on historiography and selected topics.  
Effective: Summer 1994
HIST 545 **Topics in Gilded Age and Progressive Era America, 1877-1919** (3 per semester, maximum of 6) Social, political, economic, and cultural history of the United States from the Gilded Age through Progressivism and World War I. Effective: Summer 1994

HIST 546 **Topics in United States History Since 1919** (3 per semester, maximum of 6) Readings and research in major themes of the history of the United States in the twentieth century. Effective: Summer 1994

HIST 547 **Slavery in the Americas** (3) Slavery in South America, the Caribbean, and North America from 16th century European colonization through the 19th century abolition movement. Effective: Summer 2012

HIST 548 **Topics in United States South** (3 per semester, maximum of 6) Major themes of southern United States history. Effective: Summer 1994

HIST 549 **Topics in African-American History** (3 per semester, maximum of 6) Readings, research, and methods in the study of African-American history. Effective: Summer 1994

HIST 551 **The African American Freedom Struggle in the Twentieth Century** (3) Theory and history of African American freedom movements for social and political change in the 20th century US. Effective: Summer 2012

HIST 552 **Late Modern America Society, Culture, and Politics 1975-2008** (3) This course considers the political, cultural and social history of the United States from 1975 to the present. Effective: Summer 2012

HIST 555 **Topics in American Labor History** (3 per semester/maximum of 6) American working-class experience from its artisanal and agricultural roots through the rise, maturation, and transformations of industrial capitalism. Effective: Spring 2012

HIST 556 **Social Movements in the Twentieth Century US** (3) Students study the theory and history of movements for social and political change in the 20th century US. Effective: Summer 2012

HIST 557 **Goals in American Religion** (3 per semester, maximum of 6) The social, political, and intellectual contexts of American religious thought. Effective: Spring 2012

HIST 566 (RL ST 566) **Islamic Studies** (3) Studies in Islamic history, historiography, theology, law, and religious life. Effective: Spring 1997 Ending: Fall 2012

HIST 567 **Latin American Social History, 1500-1900** (3) This course provides students with an overview of the social history of Latin America, 1500-1900. Effective: Summer 2012

HIST 568 **Early Modern Iberia and the Americas** (3) This course studies the creation of Portugal, Spain, and their empires in the Americas in the fifteenth to seventeenth centuries. Effective: Summer 2012

HIST 569 **Seminar in Latin-American History** (3-6) No description. Effective: Winter 1978

HIST 570 **Modern Latin American and Caribbean History** (3) This course provides students with an overview of the historiography of modern Latin America and the Caribbean. Effective: Summer 2012

HIST 571 **History of the US-Mexico Borderlands** (3) This course examines the history and historiography of the US-Mexico Borderlands from the mid-nineteenth century to the mid-twentieth century. Effective: Summer 2012

HIST 572 **Race and Empire in the Americas, Caribbean & Pacific** (3) An overview of the US as an empire in Latin America, the Caribbean and Pacific in the modern era.
HIST 580 **Pre-modern China** (3) This course provides students with an overview of the literature and themes in pre-modern Chinese history.  
*Effective: Summer 2012*

HIST 581 **Late Imperial and Modern China** (3) This course provides students with an overview of the literature and themes in late imperial and modern Chinese history.  
*Effective: Summer 2012*

HIST 582 **Women and Gender in Modern Chinese History** (3) Examines the historical literature on women and gender in late imperial and twentieth century China.  
*Effective: Summer 2012*

HIST 586 **Modern Japan** (3) This course provides students with an overview of the literature and themes in modern Japanese history.  
*Effective: Summer 2012*

HIST 587 **Topics in Modern South Asian History** (3 per semester, maximum of 6) Research and readings in the history of South Asia since the late eighteenth century.  
*Effective: Summer 1994*

HIST 588 **Ethnicity and Borderlands in Late Imperial China** (3) An examination and overview of literature and themes related to ethnicity, borderlands, and governance in late imperial China.  
*Effective: Summer 2012*

HIST 589 **World History: Themes and Approaches** (3) This course provides students with the thematic and theoretical foundation for the study and teaching of world history.  
*Effective: Summer 2012*

HIST 591 **Archives Practicum** (3-6) Training and supervised work experience in archival activities--Option A: Archival Management; Option B: Oral History.  
*Effective: Winter 1978*  
*Prerequisite:*

HIST 592 **Proseminar** (3-9) Readings in fundamental historical works; different sections will treat such topics as United States History and Early Modern History.  
*Effective: Summer 1998*

HIST 593 **Research Seminar** (3) Seminar in research methods of the discipline.  
*Effective: Summer 2009*  
*Prerequisite:*

HIST 595 **Internship** (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.  
*Effective: Spring 1987*  
*Prerequisite:*

HIST 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.  
*Effective: Spring 1987*

HIST 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.  
*Effective: Spring 1987*

HIST 597A **Theory, Method and the Practice of History** (3) An examination of the theory and methodologies of the historical discipline and classic works of historiography.  
*Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012*

HIST 597B **Modern Latin American and Caribbean History** (3) This course provides students with an overview of the historiography of modern Latin America and the Caribbean.  
*Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012*

HIST 597C **Pre-Modern China** (3) This course provides students with an overview of the literature of themes in pre-modern Chinese history.  
*Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012*
HIST 600 Thesis Research (1-15) No description.
Effective: Fall 1983

HIST 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

HIST 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Students enrolled will lead discussion sections, grade papers and examinations, given an occasional lecture, and assist instructors in planning survey level courses.
Effective: Fall 1983

HIST 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2002

HIST 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

HIST 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Homeland Security (HLS)

HLS 410 (PHP 410) Public Health Preparedness for Disaster and Terrorist Emergencies I (3) Analyzes the history of terrorism and explores the preparation and response to specific terrorist threats, natural disasters, and conventional catastrophes.
Effective: Spring 2011
Prerequisite:

HLS 530 (PHP 530) Critical Infrastructure Protection of Health Care Delivery Systems (3) Investigates the impact that terrorist incidents may have on healthcare facilities or their ability to deliver healthcare services.
Effective: Spring 2012
Prerequisite:

HLS 558 (PSY 558, PHP 558) Disaster Psychology (3) Explores psychological impact of disasters and terrorist attacks on victims, families, rescuers, and society and methods of reducing negative effects.
Effective: Spring 2012
Prerequisite:

HLS 594 (PHP 594) Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2012
Prerequisite:

HLS 801 (P ADM 801) Homeland Security Administration: Policies and Programs (3) Foundation for understanding homeland security history, the development of homeland security policies and organizations, and current management approaches.
Effective: Summer 2010

HLS 803 (PHIL 803) Homeland Security: Social and Ethical Issues (3) This course will examine the social, political, legal, and ethical issues that arise in the context of homeland security.
Effective: Summer 2010

HLS 805 (CRIM 805) Violence, Threats, Terror, and Insurgency (3) This course provides overview of the domestic and global issues related to homeland security.
Effective: Summer 2010

Last Import from UCM: June 2, 2012 12:27 PM
Horticulture (HORT)

HORT 402W Plant Nutrition (3) Mineral nutrition of higher plants, including nutrient acquisition, transport, metabolism, and practical implications.
Effective: Spring 2003
Prerequisite:

HORT 407 Plant Breeding (3) The scientific principles and techniques of utilizing genetic variability in improving the heredity of plants for specific purposes.
Effective: Spring 2003

HORT 408 Landscape Plant Establishment and Maintenance (4) The principles and practices involved in the establishment of plants in the landscape, and their subsequent maintenance.
Effective: Summer 1998
Prerequisite:

HORT 409 Landscape Plant Establishment and Maintenance Laboratory (1) Students will actively participate in the practices involved in the establishment of plants in the landscape, and their subsequent maintenance.
Effective: Summer 1998
Prerequisite:

HORT 410W Issues in Landscape Contracting (3) This will be a survey of business management, regulatory, and environmental issues facing the landscape contracting profession. Laboratory.
Effective: Summer 1998
Prerequisite:

HORT 412W Post-Harvest Physiology (3) Harvesting, handling, storage, and transportation of horticultural crops; primary emphasis on physiological response to pre- and post-harvest environmental factors.
Effective: Spring 2001
Prerequisite:

HORT 420 Plant Growth Regulators (3) Plant growth regulators, their chemical and physical properties; general principles, practices, and applications in regulating plant growth and development.
Effective: Spring 2001
Prerequisite:

HORT 431 Small Fruit Culture (3) Cultural requirements and production practices of the principal small fruit crops: strawberries, grapes, blueberries, brambles, and cranberries.
Effective: Spring 2001
Prerequisite:

HORT 432 Deciduous Tree Fruits (3) Science, art, and techniques of regulated cropping; orchard designs and management systems.
Effective: Spring 2001
Prerequisite:

HORT 433 Vegetable Crops (3) Cultural requirements of important vegetable crops in conjunction with physiological processes and problems related to commercial production.
Effective: Spring 2001
Prerequisite:

HORT 440W Plant Water Relations (3) Fundamentals of plant water relations including acquisition, transport, conservation, response to drought, measurement of water status, relationship to productivity, interaction with mineral nutrition, and use of equipment.
Effective: Spring 2003
Prerequisite:

HORT 445 Plant Ecology (3) Advanced lectures on plant ecology which stress integration of physiological, population-level and community-level phenomena, and ecology in agriculture.
Effective: Fall 1999
Prerequisite:

HORT 450 Greenhouse Management (3) Maintenance and manipulation of the greenhouse production systems including structures, covers, light, temperature, carbon dioxide, water, growing media, fertilizer and greenhouse cost accounting.
Effective: Spring 2001
Prerequisite:

HORT 453 Flower Crop Production and Management (3) Production of greenhouse flower and foliage plants; development of management skills for a greenhouse business.
Effective: Spring 2001
Prerequisite:

HORT 455 Retail Horticulture Business Management (3) The nature, operation, and management of retail horticulture business, emphasizing retail greenhouses, nurseries, and flower shops.
Effective: Spring 2001
HORT 457 Interior Plantscaping (3) Foliage identification, environmental factors affecting plants, concepts of interior plant design, installation and maintenance.
Effective: Summer 2004
Prerequisite:

HORT 459 (BIOTC 459, BIOL 459) Plant Tissue Culture and Biotechnology (3) Principles and techniques for the in vitro culture, propagation, and genetic manipulations of plant cells.
Effective: Fall 2003
Prerequisite:

HORT 464 Landscape Construction I (4) Standards, processes, and computations for site grading, drainage, earthwork, vehicular circulation, parking; detailing, and finishing of landscape construction materials.
Effective: Spring 2001
Prerequisite:

HORT 466 Landscape Construction II (5) Project scheduling methods, plant installation techniques, and field layout principles and practices. Implications of site preparation.
Effective: Summer 1988
Prerequisite:

HORT 468 Landscape Estimating and Bidding (2) Reading and interpreting contract drawings and specifications, quantity take-offs, cost estimating, and bid document preparation.
Effective: Spring 2001
Prerequisite:

HORT 490 Senior Seminar (1) Exploration of the interrelationships of horticulture, science, and society; evaluation of attributes and abilities related to various career opportunities.
Effective: Spring 1993
Prerequisite:

HORT 495 Internship (1-13) Supervised off campus experience in a public or commercial horticultural enterprise. Written and oral critique of activity required.
Effective: Fall 1983
Prerequisite:

HORT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

HORT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

HORT 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

HORT 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

HORT 514 (PLBIO 514) Modern Techniques and Concepts in Plant Ecophysiology (2) An intensive introduction to concepts of plant ecophysiology and modern techniques used in this field.
Effective: Spring 2007
Prerequisite:

HORT 517 Ecology of Plant Roots (2) Form and function of roots from an ecological perspective using examples from both wild and crop plants.
Effective: Spring 2012

HORT 520 Advanced Plant Growth Regulators (2) Advanced topics in plant growth regulators, their chemical and physical properties; physiological, biochemical and molecular regulation of plant growth and development.
Effective: Spring 1998
Prerequisite:

HORT 524 Experimental Procedures in Plant Science Research (3) Experimental methods, computer techniques, interpretation of statistical analyses, and communication of research results.
Effective: Fall 1983
Prerequisite:

HORT 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1990
HORT 596 Individual Studies (1-9) Creative projects including non-thesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

HORT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

HORT 600 Thesis Research (1-15) No description.
Effective: Fall 1983

HORT 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

HORT 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Provides an opportunity for horticulture graduate students to gain experience in teaching under the supervision of a faculty member.
Effective: Fall 1983

HORT 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2009

HORT 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

HORT 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Hotel, Restaurant, and Institutional Management (HRIM)

HRIM 411 **Beverage Management and Wine Selection** (3) Management issues in beverage service and products. Students taste wines, brews, and distilled spirits.
Effective: Spring 2004
Prerequisite:

HRIM 413 **New Product Development for Commercial Foodservice** (3) This course introduces students to a new product development process that requires coordination, communication, and integration throughout the organization.
Effective: Spring 2010
Prerequisite:

HRIM 415 **International Cuisine** (3) Cooking and eating practices of cultures around the world, including historical, religious, cultural, geographic, and political influences on each cuisine.
Effective: Spring 2007
Prerequisite:

HRIM 430 **Advanced Food Production and Service Management** (3) Simulation and application of technical, conceptual, interpersonal skills. Emphasis on group dynamics; improvement in managerial skills; management team functions.
Effective: Spring 2007
Prerequisite:

HRIM 435 **Financial Management in Hospitality Operations** (3) Fiscal techniques in the development, management, and control of hospitality establishments.
Effective: Spring 2011
Prerequisite:

HRIM 437 **Hospitality Project Evaluation and Funding** (3) Current techniques for project evaluation in the hospitality industry; trends in hospitality project funding.
Effective: Spring 2004
Prerequisite:

HRIM 438 **Cases in Financial Analysis** (3) Financial analysis and decision making is examined through a series of hospitality-oriented cases.
Effective: Spring 2004
Prerequisite:

HRIM 442 **Hospitality Marketing** (3) Marketing management in the hospitality industry, including analyzing the market through market research and developing a marketing plan.
Effective: Fall 2010
Prerequisite:

HRIM 443 **Sales Planning and Advertising for Hospitality Operations** (3) Elements of sales management, advertising, promotion, and public relations as applied to hospitality organizations.
Effective: Fall 2010
Prerequisite:

HRIM 456 **Casino Operations Management** (3) Historical and current perspective of the gaming industry. Management principles of casino operations, including coordination with traditional hospitality services.
Effective: Spring 2004

HRIM 466 (US) **Human Resource Management in the Hospitality Industry** (3) Recruitment, selection, training, performance appraisal, and compensation of hospitality human resources in today's culturally diverse work force.
Effective: Fall 2010
Prerequisite:

HRIM 467 **Management of Hotel and Restaurant Employee Relations** (3) Survey and analysis of managerial strategies for employee relations in hospitality operations.
Effective: Fall 2010
Prerequisite:

HRIM 471 **Evaluation of Hospitality Technology** (3) This course provides students with an understanding of the variety of information technologies used in the hospitality industry.
Effective: Spring 2012
Prerequisite:

HRIM 480 **Advanced Hotel Management** (3) Advanced hotel operations, internal control systems, and service philosophy. Integrates management, departmental operations, law, technology applications, marketing and managerial accounting.
Effective: Spring 2007
Prerequisite:

HRIM 482 **Hospitality Real Estate** (3) The course focuses on commercial real estate concepts related to the hospitality industry.
Effective: Fall 2010
Prerequisite:

The Pennsylvania State University
HRIM 483 Revenue Management (3) Students learn how to effectively implement revenue management strategies and techniques in the hospitality industry.
Effective: Spring 2011
Prerequisite:

HRIM 486 Casino Marketing (3) Students will learn marketing techniques for casinos which take into account the external environment, individual consumer choices, and ethical considerations.
Effective: Summer 2010
Prerequisite: Concurrent: HRIM 487

HRIM 487 Casino Operations and Societal Impact of Gaming (3) Students will learn the structure, culture, and ethical responsibility toward disordered gambling and other lifestyle issues of modern casinos.
Effective: Summer 2010
Prerequisite: Concurrent: HRIM 486

HRIM 490W Strategic Hospitality Management (3) This capstone writing-intensive class integrates content from throughout the previous curriculum, focusing on strategic application to current industry issues.
Effective: Fall 2010
Prerequisite:

HRIM 492 Advanced Professional Seminar in Hotel, Restaurant and Institutional Management (1) Course prepares senior HR&IM students to assume leadership positions in the hospitality industry (Focus on careers, leadership, ethics, lifelong learning).
Effective: Spring 2004
Prerequisite: Concurrent: HRIM 430 HRIM 466 HRIM 490

HRIM 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2004
Prerequisite:

HRIM 495A Hotel Internships-PS Hospitality Services Internship (3) Students will participate in a supervised internship with Penn State Hospitality Services.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

HRIM 495A Hotel Internships-PS Hospitality Services Internship (3) Students will participate in a supervised internship with Penn State Hospitality Services.
Prerequisite:

HRIM 495B Executive Internship-NLI (3) Students will participate in a supervised internship with the Nittany Lion Inn.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

HRIM 495B Executive Internship-NLI (3) Students will participate in a supervised internship with the Nittany Lion Inn.
Prerequisite:

HRIM 495C International Internship (3) Students will participate in a supervised international internship with an approved site participant. Internships are typically one semester in length.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:

HRIM 495D HRIM Teaching Assistant (1-6) Student performs as a teaching assistant for an HRIM course. Assists faculty member with class.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:

HRIM 495D HRIM Teaching Assistant (1-6) Student performs as a teaching assistant for an HRIM course. Assists faculty member with class.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

HRIM 495D HRIM Teaching Assistant (1-6) Student performs as a teaching assistant for an HRIM course. Assists faculty member with class.
Prerequisite:

HRIM 495E External/Off Campus Internship (1-6) Students will participate in a supervised internship with an approved site participant. Internships are typically one semester in length.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:

HRIM 495E External/Off Campus Internship (1-6) Students will participate in a supervised internship with an approved site participant. Internships are typically one semester in length.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

HRIM 495E External/Off Campus Internship (1-6) Students will participate in a supervised internship with an approved site participant. Internships are typically one semester in length.
HRIM 495F Housing & Food Service Interns (3) Students will participate in a supervised internship with a faculty within PSU Housing & Food Service.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

HRIM 495F Housing & Food Service Internship (3) Students will participate in a supervised internship with a facility within PSU Housing & Food Service.
Prerequisite:

HRIM 495G Supervisory Internship (6) Students will participate in a supervised internship with an approved site location.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

HRIM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2004

HRIM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2004

HRIM 497A Advanced Meeting Planning (3) Students will apply advanced concepts and applications to Event & Meeting Planning and implement an event plan.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

HRIM 497B Special Topics in Hotel Management (3) Students, through research and on-line activities, will discuss special or current interest in the hotel industry.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HRIM 497C Advanced Issues in Managing Continuing Care Retirement Communities (3) This course encompasses information on hospitality services designed to meet and exceed the expectations of mature consumers residing in CCRCs.

HRIM 497F Entrepreneurship in the Hospitality Industry (3) This course will explore the characteristics of the successful entrepreneur and the process of starting a new business.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HRIM 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2008

HRIM 498C Spanish for Hospitality International (1-4) This course is designed to expose students to international hospitality management, organization, practices, and structures in a Caribbean setting.
Effective: Summer 2012 Ending: Summer 2012

HRIM 498D International Hospitality Management/Puerto Rico (3) This course is designed to expose students to international hospitality management, organization, practices, and structures in a Caribbean setting.
Effective: Summer 2012 Ending: Summer 2012

HRIM 498F International Food Service Management and Cuisine (3) This course is designed to cover major European cuisines and oenology in a European setting.
Effective: Summer 2012 Ending: Summer 2012

HRIM 498G French Cuisine and Culture (3) Program will include intensive classes on language and culture, products, cuisine, wine, and also design and atmosphere.
Effective: Summer 2012 Ending: Summer 2012

HRIM 498I International Hospitality Management/Europe (3) This course is designed to expose students to international hospitality management, organization, practices, and structures in a European setting.
Effective: Summer 2012 Ending: Summer 2012

HRIM 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Fall 2007

The Pennsylvania State University
HRIM 503 Research Methods in Hotel, Restaurant, and Institutional Management (3) An introduction to the process of research; problem-solving approaches; the research proposal and the development of the research question. Effective: Fall 2003
Prerequisite:

HRIM 511 Services Marketing for the Hospitality Industry (3) Hospitality services marketing. Effective: Spring 2003

HRIM 585 Seminar in Hotel, Restaurant, and Institutional Management (1-9) This course is a doctoral seminar in HR&IM that addresses the conceptual foundations of the HR&IM knowledge base. Effective: Fall 2003

HRIM 586 Research Methods and Evaluation in Hotel, Restaurant, and Institutional Management (1-9) This course is a doctoral seminar in HR&IM that addresses various research methodologies and evaluation procedures that are applicable to HR&IM. Effective: Fall 2003

HRIM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 2003

HRIM 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis. Effective: Fall 2003

HRIM 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Fall 2003

HRIM 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 2003

HRIM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Fall 2003

HRIM 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction. Effective: Fall 2007

HRIM 600 Thesis Research (1-15) No description. Effective: Fall 2004

HRIM 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 2004

HRIM 602 Supervised Experience in College Teaching (1-3 per semester, maximum of 6) No description. Effective: Fall 2004

HRIM 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 2004

HRIM 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 2004

Last Import from UCM: June 2, 2012 12:27 PM
Hum Dim Nat Res Env (HDNRE)

HDNRE 574 *Integrated Perspectives in Human Dimensions of Natural Resources and the Environment* (3) Introduction to the integration and application of interdisciplinary concepts to contemporary natural resource and environmental issues.
Effective: Fall 2008

HDNRE 575 **Ethical Issues in Human Dimensions of Natural Resources and the Environment** (3) Introduction to ethical issues in human dimensions of natural resources and the environment.
Effective: Spring 2009

HDNRE 590 **Human Dimensions in Natural Resources and the Environment Colloquium** (1) Professional socialization and training, development, and assessment of meta-theoretical frameworks and cohort building.
Effective: Fall 2008
Prerequisite:

HDNRE 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2009

HDNRE 600 **Thesis Research** (1-15 per semester/max of 99) No description.
Effective: Summer 2009

Last Import from UCM: June 2, 2012 12:27 PM
Hum Res & Empmnt Rel (HRER)

HRER 500 **Topics in Comparative Industrial Relations** (3 per semester/maximum of 6) Similarities and differences of various aspects in industrial relations assessed within the political, economic, and historical contexts. Effective: Spring 2008

HRER 501 **Labor and Employment Law** (3) Legal context of employment in the United States. Effective: Spring 2008

HRER 502 **Organization of the Workplace** (3) Organization and transformations of the workplace and the labor process, including Taylorism, Fordism, and flexible forms. Effective: Spring 2008

HRER 504 **Seminar in Industrial Relations** (3) Theory, process, and issues of industrial relations, including collective bargaining and contract administration. Effective: Spring 2011 Ending: Summer 2012

HRER 504 **Seminar in Employment Relations** (3) Theory, process, and issues of employment relations, including collective bargaining and contract administration. Effective: Fall 2012 Future: Fall 2012

HRER 505 **Seminar in Human Resources** (3) Current human resource topics in the context of organizational strategy, planning, and responsibility. Effective: Spring 2011

HRER 510 **Introduction to Graduate Studies in Human Resources and Employment Relations** (1) An overview of professional development and research activities of scholars of Human Resources and Employment Relations. Effective: Spring 2008

HRER 512 **Research Methods in Human Resources and Employment Relations I** (3) Research design, sampling design, data collection, and analysis; modeling, means and comparison of means, correlation analysis; and case study. Effective: Spring 2008 Prerequisite:

HRER 513 **Research Methods in Human Resources and Employment Relations II** (3) Continuation of research design, validity and reliability; experimental design and ANOVA; survey design, and multiple regression models. Effective: Spring 2012

HRER 516 **Labor Market Analysis** (3) Neoclassical, institutional and systemic theories of external and internal labor markets and their dynamics. Effective: Spring 2008

HRER 536 **Diversity in the Workplace** (3) Women and minorities in the workplace. Effective: Spring 2008

HRER 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 2008

HRER 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Spring 2008

HRER 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2008

HRER 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 2008

HRER 597A **Seminar in International Human Resources** (3) This course will explore the practice of human resource management in an international context.
HRER 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at overseas institution with whom linkages have been established. Effective: Spring 2008

HRER 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. Effective: Spring 2008

HRER 800 International and Comparative Employment Relations (3) This course examines employment relations systems in the world today and the influence of globalization on employment relations practice. Effective: Fall 2007

HRER 802 Organizations in the Workplace (3) This course provides students with an overview of selected managerial behavior and career topics in modern organizations. Effective: Fall 2007

HRER 811 Labor and Employment Law II (3) Advanced topics in labor and employment law; such areas as immigration, unemployment compensation, and safety/health. Effective: Fall 2011
Prerequisite:
HRER 816 Labor Market Analysis (3) Neoclassical economic and institutional theoretical perspectives on labor supply, demand for labor, internal labor markets, wage determination and labor policies. Effective: Fall 2007

HRER 836 Diversity in the Workplace (3) This course examines workplace diversity, gender and race challenges facing employers and employees, and the skills for managing diversity. Effective: Fall 2007

HRER 894 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007

HRER 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 2010
Human Development (H DEV)

H DEV 600 Thesis Research (1-15) No description. Effective: Fall 1993

H DEV 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 1993

Last Import from UCM: June 2, 2012 12:27 PM
Human Development and Family Studies (HD FS)

HD FS 401 *Project Planning, Implementation, and Evaluation in the Human Services* (3) Exercises and activities related to the design, planning, implementation and management, and evaluation of projects and programs in the human services.
Effective: Fall 2006
Prerequisite:

HD FS 402 *Human Services Seminar* (4) Presentations and discussion of contemporary human issues by students and visiting professionals.
Effective: Summer 1997
Prerequisite:

HD FS 405 (US) *Gender and Social Development* (3) A review of gender-related patterns of social development over the lifespan, as influenced by biological, sociological, and psychological factors.
Effective: Spring 2006
Prerequisite:

HD FS 410 *Communities and Families* (3) Family and community interaction, emphasizing strategies for intervention to solve family-community problems.
Effective: Spring 1996
Prerequisite:

HD FS 411 *The Helping Relationship* (3) Theory and research related to interpersonal conditions which facilitate personal growth; intensive interpersonal competency training.
Effective: Spring 1996
Prerequisite:

HD FS 412 *Adult-Child Relationships* (3) Theories, research, and application of adult behavior for maximizing adult-child relationships and optimizing child socialization and self-development.
Effective: Spring 2007
Prerequisite:

HD FS 413 *Developmental Problems in Adulthood* (3) Analysis of individual developmental problems from young adulthood through old age and their prevention and modification.
Effective: Spring 2001
Prerequisite:

HD FS 414 *Resolving Human Development and Family Problems* (3) Strategies for, and roles of professional specialists in, the solution of problems in human development and family functioning.
Effective: Spring 1996
Prerequisite:

HD FS 415 *Program Development in Family Relationships* (3) Methods for planning, developing, and evaluating human service programs for families across the life span.
Effective: Spring 2001
Prerequisite:

HD FS 416 (US) (SOC 411) *Racial and Ethnic Diversity and the American Family* (3) This course will explore the nature and determinants of racial and ethnic variation in family processes in the United States.
Effective: Spring 2005
Prerequisite:

HD FS 417 (US;IL) *Biocultural Studies of Family Organization* (3) Study of variability in family organization with an emphasis on cultural and economic factors influencing household organization and family roles.
Effective: Spring 2006
Prerequisite:

HD FS 418 *Family Relationships* (3) Dynamics of family interaction; effects of parenthood, sibling and intergeneration relationships on family solidarity.
Effective: Spring 2001
Prerequisite:

HD FS 420 *Laboratory in Individual and Family Enhancement* (3) Supervised practice in methods of assessment, intervention, and evaluation to enhance individual and family development.
Effective: Spring 1996
Prerequisite:

HD FS 424 (US) *Family Development in an Economic Context* (3) Economic conditions influencing family functioning; familial effects on the economy; strategies to enhance work-family relations.
Effective: Spring 2006
Prerequisite:

HD FS 425 (US) *Work as a Context for Human Development* (3) Theory and research on role of work in adult development; interrelationships between work and family; workplace interventions to enhance development.
Effective: Spring 2006

The Pennsylvania State University
HD FS 427 (KINES 427) Developmental Sport & Exercise Psychology (3) Developmental changes in the antecedents and consequences of physical activity across the lifespan. Effective: Spring 2008

HD FS 428 Infant Development (3) Conceptual analysis, assessment, and empirical investigation of normal and deviant development, prenatal through first two years of life. Effective: Spring 2007

HD FS 430 Experience in Preschool Groups (6) Guided practicum experience in planning and facilitating developmentally appropriate activities for young children. Effective: Spring 2007

HD FS 431 (SOC 431) Family Disorganization: Stress Points in the Contemporary Family (3) Focuses on divorce, remarriage, incest, family violence as well as problems associated with family formation and parent-child relations. Effective: Spring 1996

HD FS 432 Developmental Problems in Childhood and Adolescence (3) Analysis of problems in individual development from infancy through adolescence; prevention and modification of developmental difficulties. Effective: Spring 2007

HD FS 433 Developmental Transition to Adulthood (3) Conceptual analysis and empirical investigation of interrelationships between developmental processes during the period of pubertal growth. Effective: Spring 1996

HD FS 434 (SOC 435) Perspectives on Aging (3) An analysis of the demographic, social, and cultural factors affecting the aged population in American society. Effective: Fall 2007

HD FS 446 Programs and Services in Gerontology (3) Theoretical and historical views of the conceptualization and delivery of programs and services to older persons within a multidisciplinary developmental framework. Effective: Spring 1996

HD FS 450 Developmental Child Programs and Services (3) Current and historical views of the conceptualization and delivery of child programs and services within a multidisciplinary developmental framework. Effective: Spring 2007

HD FS 453 Family Participation and Involvement in Child Services (3) Current and historical perspectives of roles and functions of family members in designing, delivering, and evaluating of child service programs. Effective: Spring 2001

HD FS 454 (C E 454) Development and Administration of Child Service Programs (3) Planning, administering, and evaluating child service programs at several administrative levels using methods from relevant disciplines. Effective: Spring 1996

HD FS 455 Development and Administration of Human Services Programs (3) Fundamentals of program development and administration of human service programs in community settings; emphasis given to program content, strategies, and the overall planning process. Effective: Fall 2009

The Pennsylvania State University
HD FS 468 Biological Bases of Behavioral Development (3) Biological, genetic, and experiential influences in development through the lifespan.
Effective: Spring 2007
Prerequisite:

HD FS 469U (IL) Family Change in the Global Economy (3) Exploration of how family life, quality, and structures in each region of the world are affected by the new global economy.
Effective: Fall 2005
Prerequisite:

HD FS 477 Analysis of Family Problems (3) Analysis of families' behavioral, managerial, interpersonal, and financial problems and their interrelationships.
Effective: Spring 2001
Prerequisite:

HD FS 490 Introduction to Internship Experience (2) Planning and preparation for field experience in human service setting. Analysis of human service system and arrangement of site.
Effective: Spring 1996
Prerequisite:

HD FS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2000

HD FS 494A Research Practicum (3) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HD FS 494B Research Paper (3) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HD FS 494C Strengthening Families (1-3) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HD FS 494H Senior Honors Thesis (1-6) Independent study under the direction of the thesis advisor of topics related to the interests of the student, culminating in presentation of a thesis.
Effective: Summer 1997
Prerequisite:

HD FS 495A Internship: Advanced Experience (9) Full-time, one semester experiential training in human service settings. Open to HD FS majors only.
Effective: Fall 2006
Prerequisite:

HD FS 495B Internship: Advanced Project (3) Implementation of internship projects or scholarly paper. Open to HD FS majors only.
Effective: Fall 2006
Prerequisite:

HD FS 495C Professional Practicum in Human Services (3-8) Guided professional practicum in human services, usually in the form of a project related to a human services issue.
Effective: Summer 1997
Prerequisite:

HD FS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1990

HD FS 496B Infant Temperment (1-3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HD FS 496C Marcellus Shale Family Project (1-3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HD FS 496D Project SIESTA (1-3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
HD FS 496F Family Care Project (1-3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012

HD FS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1990

HD FS 497A Service Learning Immersion in the Republic of Korea (3) Experiential course which blends academic issues with an applied field setting.
Effective: Summer 2012 Ending: Summer 2012

HD FS 497A Child Maltreatment (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HD FS 497B Mental Health Practicum with Children (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HD FS 497C Peer Consultation (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2012 Ending: Summer 2012

HD FS 497C Peer Consultation (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HD FS 497H Professional Development (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HD FS 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

HD FS 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Fall 2007

HD FS 499A (IL) Early Childhood in Italy (3) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2012 Ending: Summer 2012

HD FS 499B (IL) Historical Roots of the Modern Italian Family (3) Courses offered in foreign countries by individual of group instruction.
Effective: Summer 2012 Ending: Summer 2012

HD FS 499C (IL) Italian Relationships: Both Cultural and Familial (3) Courses offered in foreign countries by individual of group instruction.
Effective: Summer 2012 Ending: Summer 2012

HD FS 501 Human Development Across the Lifespan (3) Multidisciplinary study of theories and research on human development across the lifespan.
Effective: Spring 2002

HD FS 503 Human Development Intervention: Analysis of Theories and Approaches (3) Theoretical and empirical analyses of multilevel approaches for enhancing development of individuals and families.
Effective: Spring 1993
Prerequisite:

HD FS 504 Consultation in Human Development Intervention (3) Principles of consultative and collaborative practice with human development intervention programs in formal or informal community settings.
Effective: Spring 1993
Prerequisite:

HD FS 506 Design and Evaluation of Prevention Programs Across the Life Span (3) An introduction to the theory and application of program evaluation; both process and outcome evaluation strategies are addressed.
Effective: Spring 2002
Prerequisite:

HD FS 507 Women, Families, and Society (3) Analysis and critique of research and theory on women's development and role in family and society. Effective: Spring 2002

HD FS 508 Best Practices in Preventive Intervention (1-6) Implementing empirically validated preventative programs; discussion and evaluation of theory and techniques. Effective: Spring 2002
Prerequisite:

HD FS 516 Methods of Research in Human Development (3) Review of basic research methods and statistics as applied to human development and family studies. Effective: Fall 2001

HD FS 517 Multivariate Study of Change and Human Development (3) Models of development and change derived from empirical research utilizing multivariate research design and procedures. Effective: Spring 1992
Prerequisite:

HD FS 518 Applied Statistics Laboratory (1) This course provides graduate students with practical skills in data entry, data management, and applied statistical analyses. Effective: Fall 2001

HD FS 519 Methods of Statistical Analysis in Human Development (3) An overview of basic statistical concepts, models, and methods for the analysis of development and change. Effective: Summer 1990
Prerequisite:

HD FS 520 Seminar in Prenatal and Infant Development (1-6) Prenatal and infant development, with emphasis on multiple determinants of early development and their relationship to later behavior. Effective: Summer 1990
Prerequisite:

HD FS 522 Risk and Resilience in Human Development: Foundation for Prevention (3) Reviews the concepts of risk, protection, resilience, and competence; examines these concepts in intervention and longitudinal studies. Effective: Spring 2002
Prerequisite:

HD FS 523 Strategies for Data Analysis in Developmental Research (3) This course provides the skills necessary to confront the data analytic issues presented in the Human Development and Family Studies methodology core curriculum. Effective: Spring 1996
Prerequisite:

HD FS 524 Work as a Context for Human Development (3) The interconnections between work, family life, and individual development. Effective: Spring 2002
Prerequisite:

HD FS 525 Introduction to Family Studies (3) Introduction to current theory and research about micro and macro forces related to family relationships and development. Effective: Spring 2002

Prerequisite:

HD FS 527 Social Epidemiology (3) Application of epidemiological methods to issues in the study of human development. Effective: Fall 2001
Prerequisite:

Prerequisite:
HD FS 529 (PSY 529) Seminar in Child Development (1-6) Readings and reports on recent findings in child development. Effective: Summer 1990
Prerequisite:

HD FS 531 (SOC 531) Family Disorganization: Stress Points in the Contemporary Family (3) Focuses on divorce, remarriage, incest, family violence as well as problems associated with family formation and parent-child relations. Effective: Summer 1994

HD FS 532 (NUTR 532) Childhood Obesity (3) This course addresses how genetic predispositions, behavioral and environmental factors affect children’s obesity risk and examines strategies for obesity prevention. Effective: Spring 2012

HD FS 533 (NUTR 533) Adult Obesity (3) Important current and emerging topics in obesity research relevant to government policy and general public education; emphasis on adult obesity. Effective: Spring 2012

Prerequisite:

HD FS 537 (SOC 537) Biosocial Perspectives on the Family (3) The implications of knowledge from behavioral endocrinology, behavior genetics, and evolutionary psychology for understanding family relationships and child development. Effective: Summer 2002

HD FS 539 Seminar in Adolescent Development (1-6) Cultural, psychological, and biological aspects of the developmental transition to adulthood. Effective: Summer 1990
Prerequisite:

HD FS 544 Seminar in Dysfunctional Patterns in Family Organization (1-6) Processes of familial dysfunction and disorganization and their explanation in economic, social-psychological, and managerial terms. Effective: Summer 1990
Prerequisite:

HD FS 545 Families and Socioeconomic Systems (1-6) Functional interrelationships between families and social and economic systems. Effective: Summer 1990
Prerequisite:

HD FS 546 Seminar in Family Relationships (1-9) Interpersonal interaction within family systems throughout the life cycle. Effective: Summer 1990
Prerequisite:

HD FS 549 (PSY 549) Developmental Theory (3) Conceptual frameworks and major contributions to the study of individual development across the life-span. Effective: Summer 1990
Prerequisite:

HD FS 569 Seminar on Development in Middle Age (1-6) Interdisciplinary approach to study of human development in middle age, including psychological, cultural, and biological aspects. Effective: Fall 2001
Prerequisite:

HD FS 577 Poverty, Policies, and Child Development (3) Focuses on interrelationships among families, poverty, and social policies. Effective: Fall 2001
Prerequisite:

HD FS 579 Seminar in Adult Development and Aging (1-9) A seminar dealing with specific topics concerning adult development and aging. Effective: Summer 1990
Prerequisite:

HD FS 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Summer 1990

HD FS 595 Field Projects in Individual and Family Studies (1-9) Supervised research or internship in human services
HD FS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1990

HD FS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Summer 1990

HD FS 597A Latent Class Analysis for Cross-Sectional and Repeated Measures Data (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HD FS 597B Parenting (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HD FS 597C Developmental Cognitive Neuroscience of Adolescence (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HD FS 597D Quantitative Methods for Intervention Science (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HD FS 597F Person-Centered Methods: Advanced Contingency Table Analysis (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

HD FS 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Summer 1990

HD FS 602 Supervised Experience in College Teaching (1-3 per semester, maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University. Effective: Summer 2004

HD FS 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. Effective: Fall 2006

HD FS 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Summer 1990

Last Import from UCM: June 2, 2012 12:27 PM
Humanities (HUM)

HUM 500 Research Methods and Scholarly Inquiry in the Humanities (3) Study of the methods and materials of scholarship, use of reference tools, evaluation of evidence, and writing of research papers.
Effective: Spring 1989

HUM 515 Seminar (3 per semester/maximum of 9) A seminar focusing on typical methods and approaches of a single discipline within the humanities.
Effective: Summer 1988

HUM 525 Studies in Aesthetics (3) Philosophical investigation into the nature of art, aesthetic experience, artistic meaning, criticism, grounds for judgment, and history of aesthetic theory.
Effective: Spring 1989

HUM 530 Seminar in Comparative Arts (3 per semester/maximum of 9) A seminar focusing on selected periods or artists in two or more disciplines within the humanities.
Effective: Summer 1988

HUM 535 Topics in Cultural and Intellectual History (3 per semester/maximum of 9) Study of methods, issues, and selected topics in the history of thought, social values, and creative expression.
Effective: Summer 1988

HUM 550 Junior College Teaching Internship (3) Teaching humanities courses in a two-year college under a faculty supervisor, who will direct, criticize, and evaluate the intern.
Effective: Summer 1988
Prerequisite:

HUM 560 Interrelations in the Humanities (3) The study and practice of conducting interdisciplinary research and of investigating and supporting inter-art analogies.
Effective: Spring 1989
Prerequisite:

HUM 580 Master's Production (1-6) An original scholarly master's paper or creative production initiated by the student, supervised by an appropriate professor, and judged by a committee.
Effective: Winter 1981

HUM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

HUM 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

HUM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

Last Import from UCM: June 2, 2012 12:27 PM
Humanities (HUMAN)

HUMAN 600 Thesis Research (1-15) No description. Effective: Fall 1983

HUMAN 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Humanities-Hy (HMN)

HMN 713 Medical Humanities (5) Medical Humanities introduces the first-year student of medicine to topics which explore questions of value and meaning in and around medicine.
Effective: Summer 2007
Prerequisite:

HMN 740 Folk and Alternative Health Systems (2.5) Critical examination of alternative/folk health systems and some of the ways in which they influence current health care delivery.
Effective: Spring 1999

HMN 741 Education for Physicians on End of Life Care (EPEC) (2.5) This course introduces the essential clinical competencies required to provide quality end-of-life care.
Effective: Fall 2009
Prerequisite:

HMN 742 Putting It Into Words: A Right-Brain Retrospective of Formative Moments in Medical School (PIW) (2.5) This creative writing workshop requires MS IVs to convey their reflections as medical students in a variety of genres which, collectively, result in a portfolio and publication.
Effective: Fall 2009
Prerequisite:

HMN 743 Graphic Storytelling and Medical Narratives (2.5) In this course, students will explore the use of graphic storytelling (or Comics) as a medium for communicating medical narratives.
Effective: Fall 2009

HMN 744 Humanities: Patients as Teachers, Students as Filmmakers Video Project: The Video Slam (2.5) This course teaches medical students about the full impact of illness and serious procedures on patients and their families.
Effective: Fall 2009
Prerequisite:

HMN 745 Medicine and Ethics Under Pressure (2.5) This course explores situational and systemic challenges to ethical behavior in biomedical research and the practice of medicine.
Effective: Fall 2009

HMN 746 CAM and Integrative Holistic Medicine (2.5) This course presents current topics in Integrative Holistic Medicine and discusses the transition from Complementary and Alternative Medicine.
Effective: Fall 2009
Prerequisite:

HMN 747 Contemporary Issues in Bioethics (2.5) In this course, students will conduct in-depth examinations of current issues in bioethics. Topics will include. Organ transplantation; PVS & the Value of a Human Being; Childhood Immunizations; Mistakes; What Counts as Medically Necessary?; Child Abuse; Physician-Assisted Death; Genetics.
Effective: Fall 2009
Prerequisite:

HMN 748 Controlling Human Heredity: Lessons From History (2.5) This course reviews the key steps in the development of our thoughts and practices relating to childbirth and medical genetics over the past 400 years.
Effective: Spring 2010
Prerequisite:

HMN 749 Sufferers and Healers: Lessons From History (2.5) This course reviews the key steps in the development of medicine from its supernatural beginnings steeped in magic and religion through the creation of medical science.
Effective: Fall 2009
Prerequisite:

HMN 750 Creativity, Art, and Healing (CAH) (2.5) This course introduces students to the core components of the creative arts and healing.
Effective: Fall 2009
Prerequisite:

HMN 751 The Narratives of Aging: Exploring Creative Approaches to Dementia Care (2.5) This course invites students to examine brain aging in an historical and cultural context, and contrast dominant reductionist understandings of dementia with a more humanistic, biopsychosocial model of care resurgent in recent years that places greater relative emphasis on the remaining strengths, capacities, and creativity of persons with dementia rather than focusing on deficits and losses.
Effective: Spring 2012
Prerequisite:

HMN 752 Chronic Disease and the Self (2.5) Utilizes published autobiographical patient narratives and live patient interviews to explore the impact of illness.
Effective: Spring 2011
Prerequisite:
HMN 753 Finding 'Right' Answers: Solving Ethical Dilemmas in Medical Practice (2.5) At the end of the four weeks students will be equipped with four cognitive frameworks for thinking about and solving ethical issues in their clinical practice. 
Effective: Spring 2012
Prerequisite:

HMN 796 Individual Studies (1-15) Studies outside the scope of formal courses, supervised on an individual basis.
Effective: Spring 1988
Prerequisite:

HMN 797 Special Topics (1-6) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1988

Last Import from UCM: June 2, 2012 12:27 PM
Ihc - Appellate (IHAPP)

IHAPP 995 Civil Rights Appellate Clinic (4 per semester maximum of 8) This clinical offering will provide intensive training in appellate advocacy by involving students in non criminal civil rights cases before the state appellate courts, federal courts of appeal and the United States Supreme Court. Students will assist in case selection, the development of substantive legal positions, provide research, assist in appellate strategy development and draft briefs. As this is a new clinical offering an initial focus will be an amicus briefs, however the driving decision for case selection will be which cases, during any particular clinic session, offer the best pedagogical value. In working on these cases students will have exposure to top civil rights and appellate litigators in the country.

Effective: Summer 2011
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Ihc - Immigration (IHIMM)

IHIMM 995 Center for Immigrants' Rights - Course Component (3) Students will acquire the skills necessary to be an effective immigration advocate and attorney. Students will work on innovative projects relating to U.S. immigration policy and immigrants' rights.
Effective: Spring 2011
Prerequisite:

IHIMM 995A Center for Immigrants' Rights: Course Component (5) The course component of the Center teaches students the skills necessary to be an effective immigration advocate and attorney.
Effective: Spring 2011
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Ihc - Refugee Law (IHREF)

IHREF 995A In-House Clinic - Refugee Law Clinic (3) Representation of foreign nationals seeking political asylum or related forms of relief in US Courts.
Effective: Fall 2008
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
IHASE 995A In-House Clinic--Art, Sports, and Entertainment Law (1-2 per semester/maximum of 4) This clinic is designed to acquaint students with the unique yet pragmatic knowledge and skills incident to rendering quality legal service in the art, sports, and entertainment professions.
Effective: Spring 2011
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Ihc-Children'S Advoc (IHCAD)

IHCAD 995A In-House Clinic-Children’s Advocacy (4 per semester/maximum of 8) The course will provide instruction to students in the legal representation of children in various civil matters, including dependency, adoption and custody actions. Students will be managing a caseload of clients. Students will meet directly with their clients, and correspond with agencies and opposing counsel. Students will appear at all court appearances with a supervising attorney. The supervising attorney will meet with students individually on a regular basis for case reviews. The classroom component of the course will focus on various substantive and skills issues, including lectures on child interviewing skills and lectures from physicians on the medical aspects of child abuse, etc.
Effective: Summer 2011
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Ihc-Disability Law (IHDIS)

IHDIS 995A In-House Clinic--Disability Law (4 per semester/maximum of 8) Up to four students per semester represent indigent persons with disabilities who have legal concerns related to those disabilities. The bulk of the work consists of administrative hearings before the Social Security Administration and judicial review in federal court. Matters handled include Social Security and Supplemental Security Income, special education, disability discrimination, and Medicare and Medicaid claims. Students are obligated to work 12 hours per week in the Clinic, and there are weekly meetings with the supervisor, either individually or as a group. This course is graded.

Effective: Spring 2011

Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Ihc-Elder Law (IHELD)

IHELD 995A In-House Clinic--Elder Law and Consumer Protection (4 per semester/maximum of 8) This course is supervised by Law School faculty and experienced practitioners, using a clinical model of learning, with students serving as "certified legal interns" providing legal advice and courtroom representation for clients aged 60 and over. Regular travel to downtown Harrisburg and throughout central Pennsylvania is required. The students are required to work at least 16 hours per week.
Effective: Summer 2011 Ending: Summer 2012
Prerequisite:

IHELD 995A Elder Protection Clinic (4 per semester/maximum of 8) This course is supervised by Law School faculty and experienced practitioners, using a clinical model of learning, with students serving as "certified legal interns" providing legal advice and courtroom representation for clients aged 60 and over. Regular travel to downtown Harrisburg and throughout central Pennsylvania is required. The students are required to work at least 16 hours per week.

**Ihc-Family Law (IHFAM)**

IHFAM 995A *In-House Clinic--Family Law* (4 per semester/maximum of 8) In this clinic, up to twelve students per semester represent indigent clients, primarily before the Court of Common Please of Cumberland County, in domestic matters. Cases include divorce, child support, spousal support, custody and visitation, dependency (neglect), domestic violence, and related matters. Students are required to work 16 hours a week at the Clinic, and there are weekly clinic meetings, either as a group or individually with supervisors.

Effective: Summer 2011
Prerequisite:

IHFAM 995B *Family Law Clinic* (5 per semester/maximum of 10) In this clinic, up to seven students per semester represent indigent clients and domestic abuse victims in family law cases. All cases are in the Court of Common Pleas of Centre County. The work includes divorce, child support, spousal support, custody/visitation, domestic violence, and related matters. Students should expect to work as much time as is necessary to represent their clients successfully, which will be an average of twenty hours per week. Students also participate in a weekly clinic seminar which includes skills training, theoretical examination of clinical work, and case rounds. Each student also meets individually with the clinic supervisor to discuss their case work and their progress in the clinic. Only third-year law students are admitted in the Fall Semester. Students earn 5 graded credits.

Effective: Spring 2012
Prerequisite:
Immun&Infest Disease (I I D)

I I D 600 Thesis Research (1-9 per semester/maximum of 36) Laboratory work on thesis project. Effective: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
In Hse Rur Econ Dev (IHRED)

IHRED 995 Rural Economic Development Clinic (4) The Rural Economic Development Clinic will provide students with practical legal experience representing individuals and entities in Pennsylvania’s rural communities, primarily within the broad fields of agricultural, food, and energy law. Students will work with agricultural producers, businesses, landowners, and nonprofit organizations on specific projects that will involve transactional work such as preparing/reviewing contracts, addressing basic business entity issues, and providing general legal counsel.

Effective: Spring 2012
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
In-House Clinic (IHCLN)

IHCLN 997 Special Topics (1-8) Faculty approval required.
Effective: Fall 2010

IHCLN 997A International Sustainable Development Projects Law Clinic (1) Law students work collaboratively with interdisciplinary teams to develop, design, and implement humanitarian ventures in the developing world. As full-integrated partners on project teams, Clinic students will cooperate with engineering, business, and students of other disciplines. Law students are responsible for ascertaining and evaluating potential legal obstacles to implementation of innovations, advising stakeholders, and proactively facilitating solutions. Participation in the Clinic is a year-long commitment, beginning in the spring semester. The Clinic will allow law students to learn about and practice bringing ideas to fruition and to market in an international, interdisciplinary setting.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:

IHCLN 997A International Sustainable Development Projects Law Clinic (4) Law students work collaboratively with teams to develop, design, and implement humanitarian ventures in the developing world. In-House Inmate (IHINM)

IHINM 995B In-House Clinic - Inmate Assistance (2) The clinic provides legal advice to inmates in state and county prisons relating to civil and criminal matters.
Effective: Fall 2008
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
In-Hse Comm Lw Clin (IHCLC)

IHCLC 995 Community Law Clinic (4 per semester/maximum of 8) A general civil litigation clinic, which includes various forms of medication, negotiation, etc., in addition to civil hearings and traditional courtroom litigation. Due to the litigation component of this clinic, it will serve only students residing in Carlisle. Areas of law which students will be exposed to include: divorce, custody, support, protection from abuse, adoption, social security and supplemental security income claims, guardianships, special education, American with Disabilities Act claims, civil rights actions, and health care directives. Cases will be selected based on educational value to students and expertise of the clinical faculty.
Effective: Summer 2012
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Industrial Engineering (I E)

I E 402 Advanced Engineering Economy (3) Concepts and techniques of analyses useful in evaluating engineering projects under deterministic and uncertain conditions.
Effective: Summer 1995
Prerequisite:

I E 405 Linear Programming (3) An introduction to the theory and application of the simplex method in solving the linear programming and dual problem.
Effective: Spring 2001
Prerequisite:

I E 408 Cognitive Work Design (3) Design and evaluation of cognitive work, including the human/computer interface, visual displays, software design, and automated system monitoring, with emphasis on human performance.
Effective: Spring 2006
Prerequisite:

I E 418 Human/Computer Interface Design (3) Design and evaluation of the human/computer interface, including human performance, visual displays, software design, and automated system monitoring.
Effective: Spring 2008
Prerequisite:

I E 419 Work Design - Productivity and Safety (3) Methods improvement, physical work design, productivity, work measurement; principles and practice of safety.
Effective: Spring 2006
Prerequisite:

I E 423 Quality Control and Reliability (3) Application of statistical methods to the control of quality, sampling inspection, and reliability engineering.
Effective: Summer 1995
Prerequisite:

I E 424 Process Quality Engineering (3) Statistical methods for engineering process characterization and improvement. For non-Industrial Engineering majors.
Effective: Summer 1994
Prerequisite:

I E 425 Introduction to Operations Research (3) An introduction to the method and techniques of mathematical decision making, including inventory, replacement, allocation, and waiting line problems.
Effective: Spring 2006
Prerequisite: Concurrent: I E 405

I E 428 Metal Casting (3) Application of engineering principles to the design of castings; casting of ferrous and nonferrous alloys; laboratory and simulation projects.
Effective: Summer 1995
Prerequisite:

I E 430 Industrial Project (3) A project is carried out in conjunction with an industrial company and supplemented by tutorials.
Effective: Fall 1992
Prerequisite:

I E 433 Regression Analysis and Design of Experiments (3) Theory and Application of Regression Analysis and Design of Experiments to build models and optimize process and product parameters.
Effective: Summer 2005
Prerequisite:

I E 434 Statistical Quality Control (3) Statistical techniques for univariate and multivariate monitoring of independent and autocorrelated processes; foundations of quality control and improvement.
Effective: Summer 2007
Prerequisite:

I E 436 Six Sigma Methodology (3) Techniques for structured problem-solving to improve the quality and cost of products and processes.
Effective: Spring 2010
Prerequisite:

Effective: Spring 2008
Prerequisite:

I E 453 Simulation Modeling for Decision Support (3) Introduction of concepts of simulation modeling and analysis, with application to manufacturing and production systems.
Effective: Fall 2009
Prerequisite:

IE 454 Applied Decision Analysis (3) Theory and practice of decision analysis applied to engineering problems. Effective: Fall 1992

Prerequisite:

IE 455 Production Planning and Control (3) Production planning/control methods from aggregate to detailed levels; includes underlying theories and principles and industrial applications. Effective: Spring 2001

Prerequisite:

IE 456 (ME 456) Industrial Robot Applications (3) Introduction to robotics, with emphasis on robot selection, programming, and economic justification for manufacturing applications. Effective: Spring 2011

Prerequisite:

IE 460 Service Systems Engineering (3) Use of quantitative models and methods for analysis, design and control of service systems. Effective: Spring 2011

Prerequisite:

IE 462 Introduction to Expert Systems (3) Building expert systems in general; emphasis on knowledge representation and inference mechanisms in the manufacturing domain. Effective: Fall 2009

Prerequisite:

Prerequisite:

IE 464 Assembly of Printed Circuit Boards (3) Manufacturing processes and principles for assembly of printed circuit boards with surface mount and through-hole technology. Effective: Spring 2008

Prerequisite:

IE 466 Concurrent Engineering (3) Concurrent engineering methods for product/process development, capturing customer requirements, insuring manufacturability and serviceability. Effective: Summer 1996

Prerequisite:

IE 467 Facility Layout and Material Handling (3) Analytical, simulation and computer-aided graphical methods to generate effective layout designs; design and integration of material handling systems and equipment. For Industrial Engineering majors. Effective: Fall 2007

Prerequisite:

IE 468 Optimization Modeling and Methods (3) Mathematical modeling of linear, integer, and nonlinear programming problems and computational methods for solving these classes of problems. Effective: Fall 2001

Prerequisite:

IE 469 Global Industrial Engineering Experience (1) Students will learn how to prepare for a short term, professional exchange in a foreign nation. Students will then travel to a designated university within a foreign nation for the purpose of a five day cultural and professional exchange. Effective: Summer 2009

Prerequisite:

IE 470 Manufacturing System Design and Analysis (3) Contemporary design and analysis methodologies used to organize systems for economic manufacture of products. Effective: Spring 2012

Prerequisite:

Prerequisite:

IE 478 Retail Services Engineering (3) Introduction to retail services operations, process models, and application of information technologies to enhance productivity and profitability. Effective: Spring 2010

Prerequisite:

IE 479 (EDSGN 479) Human Centered Product Design and Innovation (3) Consumer product design for a global market, incorporating human factors principles and user desires in a multicultural perspective. Effective: Summer 2010

Prerequisite:

IE 480W Capstone Design Project (3) Industry-based senior capstone design project emphasizing manufacturing systems, service systems, and information systems in an interdisciplinary setting. Effective: Spring 2009
Prerequisite:

IE 494H **Senior Honors Thesis** (1-9) Students must have approval of a thesis adviser before scheduling this course. Effective: Spring 2000

IE 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1992

IE 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

IE 497B **Logistics and Supply Chain Engineering** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

IE 497D **Micro/Nano Fabrication** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

IE 499 (IL) **Foreign Studies--Industrial Engineering** (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

IE 505 **Linear Programming** (3) An accelerated treatment of the main theorems of linear programming and duality structures plus introduction to numerical and computational aspects of solving large-scale problems. Effective: Fall 1992

Prerequisite:

IE 507 **Operations Research: Scheduling Models** (3) Scheduling models with simultaneous job arrival and probabilistic job arrival, network scheduling, and scheduling simulation techniques. Effective: Fall 1992

Prerequisite:

IE 509 **Operations Research: Waiting Line Models** (3) Waiting line models including models with infinite queues, finite queues, single and multiple servers under various priorities and disciplines. Effective: Spring 1994

Prerequisite:

IE 510 **Integer Programming** (3) Study of advanced topics in mathematical programming; emphasis on large-scale systems involving integer variables. Effective: Spring 1994

Prerequisite:

IE 511 **Experimental Design in Engineering** (3) Statistical design and analysis of experiments in engineering; experimental models and experimental designs using the analysis of variance. Effective: Fall 1992

Prerequisite:

IE 512 **Graph Theory and Networks in Management** (3) Graph and network theory; application to problems of flows in networks, transportation and assignment problems, pert/CPM, facilities planning. Effective: Spring 1994

Prerequisite:

IE 516 (SC&IS 516) **Applied Stochastic Processes** (3) Study of stochastic processes and their applications to engineering and supply chain and information systems. Effective: Spring 2006

Prerequisite:

IE 518 **Materials, Forming Processes, and Quality** (3) Study of the principles and mechanisms of conventional and developing manufacturing processes and the methods of determining work piece quality and properties. Effective: Summer 1995

Prerequisite:

IE 519 (SC&IS 519) **Dynamic Programming** (3) Theory and application of dynamic programming; Markov decision processes with emphasis on applications in engineering systems, supply chain and information systems. Effective: Spring 2006

Prerequisite:

IE 520 **Multiple Criteria Optimization** (3) Study of concepts and methods in analysis of systems involving multiple objectives with applications to engineering, economic, and environmental systems. Effective: Spring 2000

Prerequisite:
I E 521 Nonlinear Programming (3) Fundamental theory of optimization including classical optimization, convex analysis, optimality conditions and duality, algorithmic solution strategies, variational methods in optimization.  
Effective: Spring 1994  
Prerequisite:

I E 522 Discrete Event Systems Simulation (3) Fundamentals of discrete event simulation, including event scheduling, time advance mechanisms, random variate generation, and output analysis.  
Effective: Spring 2002  
Prerequisite:

I E 528 Metal Cutting Theory (3) Study of the theory of metal cutting, contemporary and future problems of metal removal processes; critical analysis of current literature.  
Effective: Summer 2011

I E 530 Financial Engineering (3) Financial option pricing and portfolio design relevant to investment decision making.  
Effective: Fall 2010  
Prerequisite:

I E 532 Reliability Engineering (3) Mathematical definition of concepts in reliability engineering; methods of system reliability calculation; reliability modeling, estimation, and acceptance testing procedures.  
Effective: Fall 1992  
Prerequisite:

Effective: Spring 1998  
Prerequisite:

I E 546 (M E 546) Designing Product Families (3) Product families, product platforms, mass customization, product variety, modularity, commonality, robust design, product architectures.  
Effective: Fall 2007  
Prerequisite:

I E 547 (EDSGN 547, M E 547) Designing for Human Variability (3) Statistics, optimization, and robust design methodologies to design products and environments that are robust to variability in users.  
Effective: Summer 2009

I E 549 (EDSGN 549) Design Decision Making (3) Complexity of design decision-making; state-of-the-art methods and tools.  
Effective: Summer 2011

I E 550 Manufacturing Systems (3) Fundamental theory for analyzing manufacturing systems including structural analysis, optimization and economics of manufacturing systems, automated and computer-aided manufacturing.  
Effective: Fall 1992  
Prerequisite:

Effective: Summer 2011

I E 552 (BIOE 552) Mechanics of the Musculoskeletal System (3) Structure and biomechanics of bone, cartilage, and skeletal muscle; dynamics and control of musculoskeletal system models.  
Effective: Summer 1998  
Prerequisite:

I E 553 (BIOE 553) Engineering of Human Work (3) Physics and physiology of humans at work; models of muscle strength, dynamic movements; neural control; physical work capacity; rest allocation.  
Effective: Fall 1992  
Prerequisite:

I E 554 Production, Planning, and Control (3) Analysis of research literature for topics including scheduling, capacity planning, and lot sizing applied to manufacturing and production.  
Effective: Spring 1996  
Prerequisite:

I E 555 Statistical Process Monitoring and Analysis (3) Statistical techniques for univariate and multivariate monitoring of dependent and autocorrelated processes; theoretical and numerical approaches for analyzing performance.  
Effective: Spring 2008

I E 556 (M E 556) Robotic Concepts (3) Analysis of robotic systems; end effectors, vision systems, sensors, stability and control, off-line programming, simulation of robotic systems.  
Effective: Fall 1992  
Prerequisite:

I E 557 Human-in-the-Loop Simulation (3) Design and programming of simulations that facilitate human control, real-time discrete-event simulation, supervisory control of dynamic system.
Effective: Spring 2009
Prerequisite:

I E 558 **Engineering of Cognitive Work** (3) Information processing and decision making models of the human in the modern workplace, emphasizing visual inspection and other industrial applications.
Effective: Fall 1992
Prerequisite:

I E 559 **Law and Technology: Products Liability** (3) A seminar course on one area of law and technology, products liability.
Effective: Spring 2008

I E 562 **Expert Systems Design in Industrial Engineering** (3) Methodological aspects of expert systems design and review of some existing systems with emphasis on manufacturing and industrial engineering.
Effective: Fall 1992
Prerequisite:

I E 563 **Computer-Aided Design for Manufacturing** (3) Study of CAD systems and concepts including 3D wireframe and solid modeling systems, emphasizing manufacturing applications.
Effective: Fall 1992
Prerequisite:

I E 566 **Quality Control** (3) Advanced quality assurance and control topics, including multivariate methods, economic design for control and acceptance, dimensioning, tolerancing, and error analysis.
Effective: Fall 1992
Prerequisite:

I E 567 **Distributed Systems and Control** (3) Advances in distributed control and decision-making in enterprises and supply chains with emphasis on computing, algorithms, and dynamics.
Effective: Spring 2006

I E 570 (SC&IS 570) **Operations Research in Supply Chains** (3) Use of operations research models and methods for solving problems in supply chain systems.
Effective: Summer 2006
Prerequisite:

I E 582 **Information Technology for Industrial and Manufacturing Engineering** (3) Students will learn advanced information technology concepts, tools, and techniques for designing and implementing manufacturing systems.
Effective: Spring 2008
Prerequisite:

I E 583 **Response Surface Methodology and Process Optimization** (3) Response Surface Methodologies used for sequential experimentation and optimization of production processes. Statistical design and analysis of such experiments.
Effective: Spring 2002
Prerequisite:

Effective: Spring 2002
Prerequisite:

I E 588 **Nonlinear Networks and the Price of Anarchy** (3) Introduction to congestion games, including elements of non-cooperative game theory, equilibrium network flows, Braess paradox, and the price of anarchy.
Effective: Fall 2010
Prerequisite:

I E 589 **Dynamic Optimization and Differential Games** (3) Dynamic optimization and dynamic non-cooperative games emphasizing industrial applications.
Effective: Fall 2007
Prerequisite: Concurrent: I E 521

I E 590 **I E Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1993
Prerequisite:

I E 594A **Technical Paper Presentation** (1) Preparation of a paper in a technical journal format based upon the student's course work project.
Effective: Spring 2000
Prerequisite:

I E 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

I E 597 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

The Pennsylvania State University
I E 597A **Financial Services Engineering** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

I E 597A **Convex Optimization** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

I E 597B **Manufacturing with Materials** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

I E 597C **Global Manufacturing** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

I E 597C **Service Networks: Empirical Analysis, Modeling and Management** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

I E 597D **Healthcare Systems Engineering** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

I E 597D **System Informatics and Control for Complex Systems** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

I E 597E **Workforce Engineering** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

I E 597F **Sustainable Manufacturing** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

I E 597G **Stochastic Optimization** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1992

I E 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1992

I E 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1992

I E 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1992

Last Import from UCM: June 2, 2012 12:27 PM
Industrial Health and Safety (I H S)

I H S 400 Safety Engineering (3) An examination of the engineering aspects of the safety discipline and its management in the work environment.
Effective: Fall 2009 Ending: Summer 2012
Prerequisite:

I H S 500 Occupational Safety Engineering (3) Provides a basis to assist students in understanding/applying the scientific and engineering principles associated with the field of safety.
Effective: Summer 2002
Prerequisite:

I H S 510 Occupational Health (3) Introduction to Occupational Health including history, general concepts, hazardous workplace exposures, occupational disorders, and prevention of occupational disease.
Effective: Summer 2002
Prerequisite:

I H S 520 Contemporary Issues in Industrial Health and Safety (3) Evaluation of industrial processes, hazards, labor, and corporate structure, so that hazard control programs and implementation plans can be formulated.
Effective: Summer 2002
Prerequisite:

I H S 590 (ENNEC 590) Colloquium (1-3) Continuing seminars that consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.
Effective: Spring 2009

I H S 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2002

I H S 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2002

Effective: Summer 2002

Effective: Summer 2002

Last Import from UCM: June 2, 2012 12:27 PM
Information Science (IN SC)

IN SC 431 Information Systems Architecture (3) Principles and priorities of enterprise system design, middleware and service-oriented architectures and web services.
Effective: Summer 2005

IN SC 463 Languages of the Web (3) Taxonomy of programming languages and frameworks used in the development of web-based information systems.
Effective: Summer 2005

IN SC 480 Software Development Lifecycle (3) Modern Software Development Techniques and Processes. Software Paradigms including OO and lifecycle modeling and improvement.
Effective: Summer 2005

IN SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that they may be topical or of special interest.
Effective: Spring 1998

IN SC 497A Business Intelligence (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that they may be topical or of special interest.
Effective: Summer 2012 Ending: Summer 2012

IN SC 497A Fundamentals of Telecommunications (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that they may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

IN SC 497B Networks Management II (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that they may be topical or of special interest.
Effective: Summer 2012 Ending: Summer 2012

IN SC 497C Fundamentals of Information Security (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that they may be topical or of special interest.
Effective: Summer 2012 Ending: Summer 2012

IN SC 521 Database Design Concepts (3) The requirements capture, design, and development of relational database applications; analysis of business requirements and development of appropriate database systems.
Effective: Summer 2002
Prerequisite:

IN SC 525 Applied Data Mining (3) Functional overviews of algorithms used in data mining will be presented and contemporary data mining software used to conduct a project.
Effective: Spring 2006
Prerequisite:

IN SC 531 Information Technology Law (3) Examines the legal concepts/issues applicable to the field of information technology and to information technology, software engineering, and computer professionals.
Effective: Summer 2002
Prerequisite:

IN SC 535 Information Technology: Economic Aspects (3) Course examines how changes in information technology affect established organizations and the development of new firms, products, and markets.
Effective: Summer 2002
Prerequisite:

IN SC 536 Information Technology: Economic Aspects Seminar (3) Course examines the start up of new technology firms or the transformation of old economy companies into Internet companies.
Effective: Fall 2003
Prerequisite:

IN SC 539 IT Systems Seminar (3) A culminating, integrative capstone experience for IN SC students, including a formal technical paper and in-class presentation.
Effective: Spring 2001
Prerequisite:

IN SC 561 Web Security and Privacy (3) A web-centric look at the latest techniques and practices in computer security as they apply to the Internet.
Effective: Spring 2010
Prerequisite:
IN SC 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1999

IN SC 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1999

IN SC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

IN SC 597 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998

Last Import from UCM: June 2, 2012 12:27 PM
Information Sciences And Technology (IST)

IST 402 Emerging Issues and Technologies (3 per semester/maximum of 9) Introduction to emerging issues, technology forecasting and analysis; overview of emerging issues and leading technologies in IST and how they impact information systems, users, the IT labor force and society.
Effective: Fall 2006
Prerequisite:

IST 411 Distributed-Object Computing (3) Introduction to distributed-object computing and its use in client/server and real-world computing applications.
Effective: Summer 1999
Prerequisite:

IST 412 The Engineering of Complex Software Systems (3) Introduction to the engineering of complex software systems including software system specification, design and implementation, integration and test, and evolution.
Effective: Summer 1999
Prerequisite:

IST 413 Usability Engineering (3) This course addresses activities in the system development process that ensure usability. It considers the emerging concept of usability, requirements gathering and analysis, activity design, information design, interaction design, documentation design, user testing and usability evaluation.
Effective: Spring 2007
Prerequisite:

IST 420 Fundamentals of Systems and Enterprise Integration (3) Introductory course on integration of information technology into different venues, including the planning, development, and implementation of the integration.
Effective: Summer 2003
Prerequisite:

IST 421 Advanced Enterprise Integration: Technologies and Applications (3) Advanced course on the integration of information technology into systems applications.
Effective: Spring 2004
Prerequisite:

IST 425 (MGMT 425, ENGR 425) New Venture Creation (3) Via problem-based learning, teams define new business ventures to meet current market needs, develop business plans, and present to investors.
Effective: Spring 2011
Prerequisite:

IST 426 (ENGR 426, MGMT 426) Invention Commercialization (3) Working with Penn State inventions selected by the Intellectual Property Office, student teams define an optimum commercialization path each technology.
Effective: Spring 2011
Prerequisite:

IST 431 The Information Environment (3) Survey of social environment of information technology themes: Community, sovereignty, privacy, ethics, economics, and knowledge management.
Effective: Fall 2004
Prerequisite:

IST 432 Legal and Regulatory Environment of Information Science and Technology (3) Legal environment of information technology, constitutional/political issues, intellectual property, management, e-commerce, privacy, access, computer contracting, cyberspace regulation.
Effective: Spring 2007
Prerequisite:

IST 440W Information Sciences and Technology Integration and Problem Solving (3) Problem-based approach to technology integration by focusing on real-life problems faced by an organization.
Effective: Fall 2002
Prerequisite:

IST 441 Information Retrieval and Organization (3) Introductory course for seniors and graduate students covering the practices, issues, and theoretical foundations of organizing and analyzing information and information content for the purpose of providing access to textual and nontextual information resources. Introduces students to the principles of information storage and retrieval systems and databases.
Effective: Spring 2004
Prerequisite:

IST 442 (IL) Information Technology in an International Context (3) International concepts to improve strategies for the design, dissemination, and use of information technology.
Effective: Summer 2006
Prerequisite:

IST 443 IT Professional Services Theory and Practice (3) Explores and applies the basic concepts, methodologies, tools, and techniques of consulting and professional service organizations in information sciences and technology.
Effective: Spring 2006
Prerequisite:
IST 444 Advanced IT Professional Services (3) Explores advanced IT professional services topics, and the unique application of consulting methods in various industry sectors. Effective: Summer 2005
Prerequisite:

IST 445H Globalization Trends and World Issues (3) This course covers trends in globalization and their influence on U.S. policy making as well as the role of the U.S. in international issues. Effective: Summer 2005
Prerequisite:

IST 446 An Introduction to Building Computer/Video Games (3) An interdisciplinary course that introduces students to process and techniques involved in developing a video or computer game. Effective: Summer 2006
Prerequisite:

Prerequisite:

IST 452 Legal and Regulatory Environment of Privacy and Security (3) Exploration of legal, regulatory, public policy, and ethical issues related to security and privacy for information technology professionals in public institutions, private enterprise, and IT services. Effective: Spring 2012
Prerequisite:

IST 453 Legal, Regulatory, Policy Environment of Cyber Forensics (3) Legal, regulatory and public policy environment of computer and network forensics that constrain investigatory and monitoring activities in computer and network environments. Effective: Summer 2006
Prerequisite:

IST 454 Computer and Cyber Forensics (3) Fundamental issues and concepts of computer forensics; aspects of computer and cyber crime; methods to uncover, protect, exploit, and document digital evidence; tools, techniques, and procedure to perform computer and cyber crime investigation. Effective: Spring 2012
Prerequisite:

IST 456 Security and Risk Management (3) Contemporary Security Issues; security management processes, architecture and models; risk analysis and management; security planning, analysis and safeguards; security policies development and administration; contingency planning, incidence handling and response; and security standards and certification processes. Effective: Spring 2012
Prerequisite:

IST 461 Database Management and Administration (3) Introduces advanced topics in database management systems that are fundamental to effective administration of enterprise information systems. Effective: Spring 2006
Prerequisite:

IST 462 Database Modeling and Applications (3) This course introduces advanced topics in database modeling and applications. Effective: Spring 2006
Prerequisite:

IST 489H Research Methods for the Information Sciences and Technology (3) Seminar course focused on approaches to studying information and communication technologies and writing theses and other research reports. Effective: Summer 2006
Prerequisite:

IST 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Fall 1999
Prerequisite:

IST 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Spring 2000

IST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 2000

IST 497A Introduction to Enterprise Architecture (2) Provides a first exposure to Enterprise Architecture and sets a common language and understanding of EA and its business value. Effective: Summer 2012 Ending: Summer 2012
IST 497A Introduction to Enterprise Architecture (2) Provides a first exposure to Enterprise Architecture and sets a common language and understanding of EA and its business value.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

IST 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2001

IST 501 Integrative Theories and Methods of the Information Sciences and Technology (3) An integrative treatment of research and theories on how technologies are used to meet information needs at multiple levels of analysis.
Effective: Fall 2001

IST 503 Foundations for IST Research (3) Study of major methodological, normative, and theoretical issues in philosophy of science related to research in information sciences and technology.
Effective: Spring 2007
Concurrent: IST 501

IST 511 Information Management: Information and Technology (3) Introduction to theoretical, computational, and practical issues involved in managing textual, spatial, temporal, and multimedia information in a computerized system.
Effective: Fall 2001
Prerequisite:

IST 512 Information Processing Architecture and Technology (3) This course introduces the core theories, concepts, and methods regarding information and technology from an information processing point of view.
Effective: Summer 2005

IST 515 Information Security and Assurance (3) This course covers theoretical, conceptual, and methodological foundations of information security and assurance.
Effective: Spring 2011
Prerequisite:

IST 516 Web and Internet Information Retrieval (3) The course addresses aspects of searching, retrieving and modeling the Web/Internet as information repositories using mathematical and probabilistic treatments.
Effective: Spring 2007
Prerequisite:

IST 521 Human-Computer Interaction: The User and Technology (3) Users, models of users, developing the models, technology for creating interfaces; examples of good research and implications for Human-Computer Interface (HCI) design.
Effective: Fall 2001
Prerequisite:

IST 522 Models and Theories of Human-Computer Interaction (3) This course covers the theoretical foundations of human-computer interaction that prepares students in planning and conducting research in HCI.
Effective: Summer 2005

IST 525 Computer-Supported Cooperative Work (3) IST 525 introduces theories, empirical findings, evaluation methods, and design frameworks in computer-supported cooperative work.
Effective: Spring 2007
Prerequisite:

IST 526 Development Tools and Visualizations for Human-Computer Interaction (3) IST 526 addresses concepts and tools for developing working user interface software and prototypes to provide effective information visualizations.
Effective: Spring 2007
Prerequisite:

IST 531 Human Information Behavior: Information and the User (3) Introduction to research into the nature of human information and communication processes at the individual, social, and organizational levels.
Effective: Fall 2001
Prerequisite:

IST 532 Organizational Informatics (3) Researching Information and Information Systems in Organizations.
Effective: Summer 2005
Prerequisite:

IST 535 Information Technology Valuation, Markets and Innovation (3) This course covers the economic aspects of information technology and innovations.
Effective: Summer 2006
Prerequisite:

IST 536 Public and Community Informatics (3) Theories and uses of ICT in public sector and community organizations.
Effective: Spring 2007
Prerequisite:

IST 541 Qualitative Research in Information Sciences and Technology (3) Assists IST researchers in their efforts to learn about and employ appropriate qualitative methods in their research.
IST 552 Data and Knowledge Management (3) This course introduces the computational foundations, methodologies and tools for data and knowledge management. Effective: Summer 2009

IST 554 Network Management and Security (3) Essential skills and knowledge for effectively utilizing networks and Internet technologies to facilitate, manage and secure data communications and applications. Effective: Summer 2009

IST 555 Intelligent Agents and Distributed Decision Making (3) Distributed decision making theories and agent-based technologies, models and systems with applications in command and control, emergency and resource management. Effective: Summer 2009

IST 557 (STAT 557) Data Mining I (3) This course introduces data mining and statistical/machine learning, and their applications in information retrieval, database management, and image analysis. Effective: Summer 2009

IST 558 (STAT 558) Data Mining II (3) Advanced data mining techniques: temporal pattern mining, network mining, boosting, discriminative models, generative models, data warehouse, and choosing mining algorithms. Effective: Summer 2010

IST 562 Theoretical Foundations of Information Science (3) This course introduces the theoretical foundations of information science, with applications in communication, signal processing, machine learning, and pattern recognition. Effective: Summer 2009

IST 564 Crisis, Disaster and Risk Management (3) This course examines the fundamental elements of crisis, disaster, risk and emergency management. Effective: Summer 2009

IST 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 2000

IST 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis. Effective: Fall 2001

IST 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2000

IST 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 2000

IST 597A Community, Society and Social Media (3) The concept of community from psychology and sociology, the history of community informatics, current online interactions associated with community-like experiences. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

IST 597J Web Analytics (3) This course is an applied methods course on web analytics addressing collecting, preparing and analyzing web textual data in a variety of forms. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

IST 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Fall 2001

IST 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 2001

The Pennsylvania State University
IST 602 **Supervised Experience in College Teaching** (1-3 per semester, maximum of 6) No description.
Effective: Fall 2001

IST 610 **Thesis Research Off-Campus** (1-15) No description.
Effective: Fall 2001

IST 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 2001

IST 841 **Search Engines & Information Retrieval** (3) Introductory course on search engines and information retrieval. Search, indexing, ranking, and search evaluation are formally defined, explained, and used.
Effective: Summer 2010

IST 868 **Topics in Visual Analytics for Security Intelligence** (3) Introduce visual analytic techniques for security informatics and intelligence. Survey technical approaches for data analysis, threats and vulnerability, communicating risk.
Effective: Fall 2010
Prerequisite:

IST 871 **Enterprise Architecture Foundations I** (3) Theoretical foundations and practice of enterprise architecture.
Effective: Fall 2011 Ending: Summer 2012

IST 872 **Enterprise Architecture Foundations II** (3) Develops additional capabilities for justifying Enterprise Architecture decision making.
Effective: Fall 2011 Ending: Summer 2012
Prerequisite:

IST 885 **Introduction to Multisensor Data Fusion** (3) Understanding the concepts, techniques, and issues surrounding the fusion of information from multiple sensors and sources of data.
Effective: Summer 2009

IST 896 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

IST 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2011

IST 897B **Scholarship in Enterprise Architecture** (3) Course is intended to provide the Enterprise Architecture practitioner the skills to engage in research projects.
Effective: Summer 2012 Ending: Summer 2012

IST 897B **Scholarship in Enterprise Architecture** (3) Course is intended to provide the Enterprise Architecture practitioner the skills to engage in research projects.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

IST 897C **Special Topics in Enterprise Architecture** (3) This course will discuss special topics in EA that provide skills in research review and special projects.
Effective: Summer 2012 Ending: Summer 2012

IST 897C **Special Topics in Enterprise Architecture** (3) This course will discuss special topics in EA that provide skills in research review and special projects.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

IST 898 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2011
# Information Systems (INFSY)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
<th>Effective Date</th>
<th>Prerequisite</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFSY 535</td>
<td>Object-Oriented Design and Program Development in Business</td>
<td>3</td>
<td>Overview of key concepts in object design and the application of these concepts in business software development.</td>
<td>Fall 2001</td>
<td>INFSY 540</td>
</tr>
<tr>
<td>INFSY 540</td>
<td>Information Technology and Knowledge Management</td>
<td>3</td>
<td>Information systems management, enterprise models of information technology, information technology and knowledge management.</td>
<td>Spring 2005</td>
<td>INFSY 543</td>
</tr>
<tr>
<td>INFSY 543</td>
<td>Electronic Commerce</td>
<td>3</td>
<td>Overview of key aspects of E-Commerce within an organizational context including coverage of managerial issues and supporting technology.</td>
<td>Spring 2004</td>
<td>INFSY 544</td>
</tr>
<tr>
<td>INFSY 544</td>
<td>Design, Development, and Management of E-business</td>
<td>3</td>
<td>Advanced topics in e-business including effective design, development, and management of E-business.</td>
<td>Summer 2004</td>
<td>INFSY 545</td>
</tr>
<tr>
<td>INFSY 545</td>
<td>Program, Data, and File Structures</td>
<td>3</td>
<td>Program, data, and file structures are studied as they relate to management of data in information systems.</td>
<td>Fall 2001</td>
<td>INFSY 547</td>
</tr>
<tr>
<td>INFSY 547</td>
<td>WEB Enabled Technologies</td>
<td>3</td>
<td>Integrating design principles and applying technologies that support business related, web-based applications.</td>
<td>Fall 2001</td>
<td>INFSY 554</td>
</tr>
<tr>
<td>INFSY 554</td>
<td>Master's Project</td>
<td>3</td>
<td>Development of an original master's project in the student's field of interest and preparation of a paper.</td>
<td>Spring 1992</td>
<td>INFSY 555</td>
</tr>
<tr>
<td>INFSY 555</td>
<td>Data Management Systems</td>
<td>3</td>
<td>Concepts and theory of database management systems explored through data modeling and planning techniques.</td>
<td>Fall 2001</td>
<td>INFSY 556</td>
</tr>
<tr>
<td>INFSY 556</td>
<td>Data Warehousing</td>
<td>3</td>
<td>The study of the requirements collection, design, and development of data warehouses.</td>
<td>Fall 2001</td>
<td>INFSY 560</td>
</tr>
<tr>
<td>INFSY 560</td>
<td>Data Communications Systems and Networks</td>
<td>3</td>
<td>Hardware and software concepts relevant to current communications and networking technology. The importance of telecommunications is emphasized.</td>
<td>Spring 1992</td>
<td>INFSY 563</td>
</tr>
<tr>
<td>INFSY 563</td>
<td>Network Security</td>
<td>3</td>
<td>This is a study of network security concepts, technology and issues. Authentication, privacy and integrity of messages are analyzed.</td>
<td>Summer 2004</td>
<td>INFSY 564</td>
</tr>
<tr>
<td>INFSY 564</td>
<td>Wireless Networks</td>
<td>3</td>
<td>This course is a study of wireless network standards, technology and applications. Both local and wide area networks are covered.</td>
<td>Summer 2004</td>
<td>INFSY 565</td>
</tr>
<tr>
<td>INFSY 565</td>
<td>Intelligent Systems in Business</td>
<td>3</td>
<td>This course will emphasize the analysis, design, and application of intelligent systems within organizational settings.</td>
<td>Fall 2001</td>
<td>INFSY 566</td>
</tr>
<tr>
<td>INFSY 566</td>
<td>Data Mining and Knowledge Discovery</td>
<td>3</td>
<td>The study and application of data mining techniques used to mine patterns in large transactional databases.</td>
<td>Fall 2001</td>
<td>INFSY 570</td>
</tr>
<tr>
<td>INFSY 570</td>
<td>Software Engineering in the Analysis and Design of Information Systems</td>
<td>3</td>
<td>Software engineering concepts, specifically the analysis and design of structured information systems using computer-aided software engineering (CASE).</td>
<td>Spring 2001</td>
<td>INFSY 540</td>
</tr>
</tbody>
</table>

The Pennsylvania State University
INFSY 575 **Seminar in Information Technology Management** (3) Examination of selected topics relevant to current and future managerial and organizational issues of information technology.  
Effective: Spring 1992
Prerequisite:

INFSY 585 **Applications in Medical Informatics** (3) Analysis of complex systems specific to the support of healthcare management and delivery applications.  
Effective: Summer 2004
Prerequisite:

INFSY 587 **Global Information Technology** (3) Comprehensive coverage of components, applications, and issues of global information technology management in organizations worldwide.  
Effective: Summer 1997
Prerequisite:

INFSY 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.  
Effective: Fall 2009

INFSY 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experience, practicums, or internships. Written and oral critique of activity required.  
Effective: Spring 1997

INFSY 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Spring 1992

INFSY 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.  
Effective: Spring 1999

Last Import from UCM: June 2, 2012 12:27 PM
Instructional Systems (INSYS)

INSYS 415 Systematic Instructional Development (3) Preparation in the use of a nine-step model for systematically analyzing instructional problems and developing validated, practical solutions.
Effective: Summer 1996

INSYS 415B Systematic Instructional Development for Teachers (3) Preparation of teachers to use a systematic model to design learning environments for K-12 classrooms.
Effective: Summer 2012
Prerequisite:

INSYS 441 Design, Development, and Evaluation of Internet Resources (3) Design, production, and evaluation of instructional materials for delivery on the Internet.
Effective: Fall 2001

INSYS 442 Innovative Instructional Applications of Microcomputer Technology (3) Educators experience and develop innovative instructional applications of text-processing, database management, spreadsheet, and telecommunication software in their classrooms.
Effective: Fall 2008
Prerequisite:

INSYS 447 Instructional Design for Multimedia Technologies (3) State of the art multimedia technology hardware such as interactive video, CD-ROM and digitizing audio and video.
Effective: Fall 2001

INSYS 471 Introduction to Educational System Design (3) Investigates systems theory and how components of educational systems interact; develops insights on current issues and models in Educational System Design.
Effective: Summer 1996

INSYS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1996

INSYS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1996

INSYS 497A Teaching Online in Higher Education and Corporations (3) This course provides an introduction to the underlying theories, techniques and strategies for teaching a web-enhanced, blended, or online course.
Effective: Summer 2012 Ending: Summer 2012

INSYS 497B Teaching Online in K-12 Schools (3) Skills for teaching and learning online in the K-12 setting to include cybercharters, online courses, and integration of online resources in traditional K-12 classrooms.
Effective: Summer 2012 Ending: Summer 2012

INSYS 497C Apps for Education I: Introduction to Design and Development for iPad/iPhone (3) We will examine the design, development, and evaluation of mobile technology. Students will develop iOS-based software including apps that can be used to support teaching and learning. Students should have some experience with rudimentary programming principles.
Effective: Summer 2012 Ending: Summer 2012

INSYS 497D Apps for Education II: Intermediate Design and Development for iPad/iPhone (3) In this course we will examine the design, development, and evaluation of mobile technology. This seminar will be an opportunity for participants to explore app development at an intermediate/advanced level. Students should have some experience with iOS programming or programming for other mobile devices.
Effective: Summer 2012 Ending: Summer 2012

INSYS 497E Technology in Higher Education (3) An overview of technologies currently implemented in higher education - from LMSs to apps, and corresponding research, theory and critiques.
Effective: Summer 2012 Ending: Summer 2012

INSYS 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

The Pennsylvania State University
INSYS 521 **Instructional Systems Analysis** (3) Conducting needs analysis, performance analysis, task analysis, learner analysis, and environmental analysis in preparation for instructional design.
Effective: Fall 2001
Prerequisite:

INSYS 522 **Analyzing Outcomes and Learners** (3) Analyzing instructional outcomes, analyzing tasks, and writing objectives for the instructional design; analyzing learners' characteristics.
Effective: Summer 1998
Prerequisite:

INSYS 525 **Instructional Design Models, Strategies, and Tactics** (3) Application of instructional design models and design of appropriate instructional strategies and tactics.
Effective: Spring 1999
Prerequisite:

INSYS 527 **Designing Constructivist Learning Environments** (3) Designing learning environments based on constructivist principles of learning that provide modeling, coaching, and scaffolding.
Effective: Summer 1996
Prerequisite:

INSYS 544 **Designing Video for Instruction and Training** (3) The application of theory to the design of visual instruction for multimedia instruction.
Effective: Summer 1996
Prerequisite:

INSYS 545 **Research in Instructional Computing** (3) The critical analysis of research in instructional computing and the application of research methodologies in instructional computing research.
Effective: Fall 2001
Prerequisite:

INSYS 549 **Current Topics in Emerging Technologies** (3) An in-depth seminar on the instructional and training design implications of specific new technologies as they emerge.
Effective: Fall 2001
Prerequisite:

INSYS 551 **Performance Technology for Instructional Designers** (3) Methods of identifying human performance problems in organizations and developing instructional and non-instructional interventions.
Effective: Summer 1996
Prerequisite:

INSYS 553 **Managing and Consulting for Instructional Development** (3) Knowledge and skills in managing and coordinating an instructional development project and consulting with subject matter experts and clients.
Effective: Summer 1996
Prerequisite:

INSYS 574 **Applied Qualitative Research for Work Practice, Innovation, and Systems Design** (3) Investigates qualitative research paradigms and methodologies; develops skills in use of ethnographic methods in work practice, innovation and systems design.
Effective: Summer 2000
Prerequisite:

INSYS 575 **Designing Experimental Research in Instructional Systems** (3) Designing research studies in Instructional Systems of a quantitative and experimental nature. Will result in a research proposal.
Effective: Spring 2007

INSYS 581 **Theoretical Foundations of Instructional Systems** (3) Analysis of theoretical foundations of the instructional systems (systems and cybernetics, communications, cognitive psychology, sociological, constructivist, ecological) for doctoral students.
Effective: Summer 1996
Prerequisite:

INSYS 583 **Survey of Research in Instructional Systems and Technology** (3) Analysis and evaluation of research in domains of instructional systems and technology.
Effective: Summer 1996
Prerequisite:

INSYS 586 **Diffusion and Adoption of Innovations** (3) Understanding change process in educational contexts, comparing various models, tailoring them to individual needs, and creating personalized model of change.
Effective: Summer 1998
Prerequisite:

INSYS 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1996

INSYS 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2003
INSYS 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 1996

INSYS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1996

INSYS 596A Learning Technologies in E-Learning Solutions (3) This design strategies course is intended to work out strategic thinking and creative design.
Effective: Summer 2012 Ending: Summer 2012

INSYS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1996

INSYS 597B Design Studio (3) Designing and developing multimedia projects for education.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

INSYS 597D Design Based Research Methods (3) This course is designed to acquaint students with methods of research collectively referred to as design-based research. One of the distinguishing features of design-based research is that development and deployment are active components of a research agenda. Whereas many research methods seek to minimize researcher “intrusion” in the sites of research (e.g., the adoption of an observational stance), design-based researchers actively and purposively engage in the construction of learning environments in which their research is conducted. This course is intended to understand the strengths and limitations of design base research methods in educational settings.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

INSYS 600 Thesis Research (1-15) No description.
Effective: Summer 1996

INSYS 601 PH.D. DISSERTATION FULL-TIME (0) NO DESCRIPTION.
Effective: Summer 1996

INSYS 602 SUPERVISED EXPERIENCE IN COLLEGE TEACHING (1-3 PER SEMESTER, MAXIMUM OF 6) NO DESCRIPTION.
Effective: Summer 1996

INSYS 610 THESIS RESEARCH OFF-CAMPUS (1-15) NO DESCRIPTION.
Effective: Summer 1996

INSYS 611 PH.D. DISSERTATION PART-TIME (0) NO DESCRIPTION.
Effective: Summer 1996

Last Import from UCM: June 2, 2012 12:27 PM
Insurance (INS)

INS 575 Risk Management (2) Develop an understanding of the risks facing corporations and the methods available to deal with those risks.
Effective: Summer 2011
Prerequisite:

INS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

INS 599 (IL) Foreign Study--Insurance (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2011
Prerequisite:

INS 600 Thesis Research (1-15) No description.
Effective: Summer 2011

INS 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 2011

Last Import from UCM: June 2, 2012 12:27 PM
Integrative Biosc (IBIOS)

IBIOS 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Summer 1997

IBIOS 511 (BM MB 511, VB SC 511) Molecular Immunology (2) The study of molecular and biochemical events that influence immune responses and define current questions in immunology. Effective: Spring 2008 Prerequisite:

IBIOS 530 (VB SC 530) Regulation of gene expression by xenobiotics (3) The mechanisms by which foreign chemicals alter gene expression and the techniques used to examine this effect are examined. Effective: Spring 2008 Prerequisite:

IBIOS 532 (VB SC 532) Developmental and Reproductive Toxicology (3) Effects of environmental chemicals, nutrients and drugs on embryo/fetal development and maternal/paternal toxicity. Effective: Spring 2008 Prerequisite:

IBIOS 551 (BM MB 551) Genomics (3) Structure and function of genomes including use of some current web-based tools and resources for studies and research in genomics. Effective: Summer 2007

IBIOS 570 Molecular Toxicology Seminar Series (2) This course provides an opportunity for students in the Cellular and Molecular Mechanisms of Toxicity program to interact with leading scientists. Effective: Spring 1999

IBIOS 571 Current Issues in Biotechnology (2) Lecture-discussion series by academic and industry experts on the cutting-edge of science, business, intellectual property, legal, social, and ethical issues in biotechnology. The course also requires a group project, involving case studies or market research on various areas of biotechnology. Effective: Spring 2006

IBIOS 572 Benchmark Papers (2) Discussion of current literature on molecular, cellular and developmental biology. Effective: Summer 2007

IBIOS 580 Critical Reading in Immunobiology (1) Literature review of cellular, molecular, genetic and biochemical analysis of in vitro and in vivo immunology. Effective: Summer 2004 Prerequisite:

IBIOS 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Summer 1997

IBIOS 591 Ethics in the Life Sciences (1) An examination of integrity and misconduct in life sciences research, including issues of data collection, publication, authorship, and peer review. Effective: Spring 1999

IBIOS 592 Current Research Seminar (2) This course uses a weekly biological seminar as a springboard for discussion of a research topic of high current interest. Effective: Spring 1999

IBIOS 593 Molecular biology Laboratory (3) An intensive laboratory course on the principles and techniques of nucleic acid purification, analysis by restriction enzymes, gel electrophoresis, nucleic acid labeling and hybridization, cloning, sequencing, PCR amplification, and analysis of cloned heterologous gene expression by western blotting. Effective: Spring 2000

IBIOS 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 2000

IBIOS 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Summer 1997
IBIOS 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1997

IBIOS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1997

IBIOS 597C Techniques in the Life Sciences I (Fall semester) (1-3) This is a modular laboratory rotation in the various Shared Technology Facilities of the Huck Institutes of the Life Sciences, or in research laboratories of specific interest to the student. This is a strongly recommended elective, especially for students who intend to pursue research and development careers.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

IBIOS 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1999

IBIOS 598E Tutorials in Bioinformatics and Genomics (1) Review of current scientific literature in the area of bioinformatics and genomics.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

IBIOS 598E Tutorials in Bioinformatics and Genomics (1) Review of current scientific literature in the area of bioinformatics and genomics.

IBIOS 600 Thesis Research (1-15) No description.
Effective: Spring 1998

IBIOS 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1998

IBIOS 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Summer 1997

IBIOS 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 2002

IBIOS 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 2002

Last Import from UCM: June 2, 2012 12:27 PM
Intercollege Mba (IMBA)

IMBA 501 Markets, Industry Analysis, and Business Strategy (3) How markets determine prices and activity in the business firm; the firm’s microeconomic and macroeconomic environments; formulation of competitive strategy. Effective: Summer 2008
Prerequisite:

IMBA 502 Financial and Accounting Tools (3) Introduction to financial systems and reports, ability to analyze financial information, apply financial tools, and communicate financial information. Effective: Summer 2008
Prerequisite:

Prerequisite:

IMBA 515 Accounting for External Reporting (2) Ability to read financial reports and analyze their content. Effective: Summer 2008
Prerequisite:

IMBA 516 Organizational Behavior and Performance (2) Analysis of conceptual models, systems, and decision processes consistent with high levels of individual, group, and organizational performance. Effective: Summer 2008
Prerequisite:

IMBA 517 Corporate Governance (2) Study of interrelationships among shareholders, boards of directors, and managers (owner agents) and other stakeholders in a modern public corporation. Effective: Summer 2008
Prerequisite:

IMBA 520 Managing Culture, Visions, Mission and Values (2) Processes and models related to organizational culture and climate, leadership, and mentoring. Effective: Spring 2005
Prerequisite:

IMBA 521 Strategic Analysis (2) Analysis of a company case; development of the ability to draw sound conclusions on business strategies and performance. Effective: Summer 2008
Prerequisite:

IMBA 522 Financial Management (2) Analyze capital investment projects, examine the general principles of asset valuation, and study the valuation of stocks and bonds. Effective: Summer 2008
Prerequisite:

IMBA 523 Organizational Development, Intervention and Change (2) Analysis and assessment of conceptual models, systems, and decision processes for organizational development, intervention and change; transformation and reengineering processes. Effective: Summer 2008
Prerequisite:

IMBA 530 Marketing in a Global Environment (3) Global marketing planning and strategic formulation for profit and non-profit firms in creation, promotion, pricing, and distribution of goods and services. Effective: Summer 2008
Prerequisite:

IMBA 531 Project Management (2) A problem-based, interdisciplinary course in project management skills and techniques needed to manage projects in a modern business environment. Effective: Summer 2008
Prerequisite:

IMBA 543 Accounting for Internal Decision Making (2) Covers basic concepts, issues, tools, and techniques in the use of accounting information for internal decision making. Effective: Summer 2008
Prerequisite:

IMBA 544 Managing Human Resources (3) Processes and issues related to staffing and retaining human resources. Effective: Summer 2008
Prerequisite:

IMBA 545 Research for Marketing Decisions (1) Marketing research concepts/applications dealing with gathering, processing, and interpretation of primary/secondary data in identifying the needs/wants of prospective consumers. Effective: Fall 2001
Prerequisite:

IMBA 550 Corporate Information Strategy (3) Information technology supporting management decision making,
operations, and creation of new products and services; electronic commerce in global markets.

Effective: Summer 2008

Prerequisite:

IMBA 560 Corporate Innovative Strategies (3) Formulation and implementation of a corporate innovation or technology strategy.

Effective: Summer 2008

Prerequisite:

IMBA 561 Global Operations and Supply Chain Management (3) Effective management of the flow of goods and services.

Effective: Summer 2008

Prerequisite:

IMBA 562 Global Business Management (3) Establishing and expanding businesses in global markets and managing multinational firm strategies and operations.

Effective: Summer 2008

Prerequisite:

IMBA 573 Strategic Planning (3) Application of knowledge in creating and sustaining competitive advantage; development of skills necessary for writing a strategic plan.

Effective: Summer 2008

Prerequisite:

IMBA 574 Strategic Financial Decisions (3) Advanced capital project analysis; evaluating levered investments; application of option valuation principles to strategic decisions.

Effective: Fall 2008

Prerequisite:

IMBA 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2004

IMBA 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2004

Last Import from UCM: June 2, 2012 12:27 PM
Intern Agric Develop (INTAD)

INTAD 820 International Agricultural Development Seminar (3-6 per semester/maximum of 6) Students will examine international agricultural development issues through observation of systems, methods, and policies. Effective: Summer 2011

Last Import from UCM: June 2, 2012 12:27 PM
International Affair (INTAF)

INTAF 590 Colloquium (3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2010

INTAF 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2008

INTAF 595 Internship (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2008

INTAF 596 Individual Studies (1-9) Creative projects, including nuthesis research, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2008

INTAF 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2008

INTAF 597A Domestic Influences on Foreign Policy (3) This course will examine how domestic politics influences the formulation and implementation of foreign policy in the United States and other major powers. The role of lobbyists, ethnic groups, special interests, bureaucratic politics and other factors will be considered.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

INTAF 597B Energy, International Security, and the Global Economy (3) This course focuses on the economic, political, and strategic implications of ongoing trends in global energy markets. The course concentrates on oil and gas markets; it also looks at the international nuclear industry and the related challenge of nuclear proliferation.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

INTAF 597C Politics of the Maintenance of International Peace and Security (3) This course will examine the main characteristics of the relationships between States; their motivations and aims; conflicts between them, and how they are typically resolved or adjusted; the legal and political framework within which those relationships take place; the underlying conflict between interests and principles; the question of whether or not States are interested in peace and security, as against 'winning'; the main threats to peace and security, both military and non-military; and the role of non-State actors, such as global corporations and terrorist groups.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

INTAF 597D Introduction to Research Design (3) This course provides an accessible approach to developing the research, empirical and analysis skills necessary for International Affairs careers and research. The approach is hands-on, with a focus on providing practical skills for evaluating real-world arguments and policies.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

INTAF 597E Strategy, Conflict, Peace (3) Thsi course provides the analytical tools required to understand strategic interaction between agents, be they individuals, firms, or states. The objective is to understand under what circumstances such interaction leads to cooperative outcomes (peace), when it issues in adversarial interaction (conflict), and what and why might be the optimal forms of strategy under such alternative conditions. The basis of the analysis will be game theory.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

INTAF 597F The United States and the Middle East (3) American engagement in the Middle East, one of the world's most important regions, is and will continue to be a powerful factor shaping the character of contemporary international affairs. To help students deepen their understanding of U.S. foreign policy and the modern Middle East, this course explores two related sets of issues: 1) the strategic challenges facing U.S. policymakers in the Middle East and how policymakers have sought to address these challenges; and 2) Middle Eastern responses to U.S. engagement in the region.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

INTAF 597G Member Journal of Law and International Affairs (1) See handbook for description.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

INTAF 597I Hazards Disasters & International Affairs (3) Hotspots, tipping points, and international approach to prepare for respond to and recover from hazards, disasters and complex humanitarian emergencies.
INTAF 597K  **Estimative Analysis in International Strategy**  (3) This course provides a background in the art of estimative intelligence; the difference between prediction and statements of judgment; identifying key questions; developing plausible and useful scenarios; and integrating complex quantitative and qualitative information from a variety of sources (physical sciences, engineering, medicine, economics, sociology, anthropology, and many others). Emphasis is placed on integrating and translating this complex information into reports accessible to the educated generalist audience as is found in senior leadership positions in government and industry, who must use this information for strategic decision making.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

INTAF 598  **Special Topics**  (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Fall 2008

INTAF 598A  **Editor Journal of Law and International Affairs**  (2) See handbook for description.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

INTAF 801  **Actors, Institutions, and Legal Frameworks in International Affairs**  (3) Addresses the principal actors, institutions, and legal frameworks which operate in international relations.

Effective: Summer 2008

INTAF 802  **Foundations of Diplomacy and International Relations Theory**  (3) Addresses the central tenets of diplomacy and international relations and theories and concepts that underpin the study of international relations.

Effective: Summer 2008

INTAF 803  **Multi-sector and Quantitative Analysis**  (3) Introduces students to quantitative methods applicable to various issue areas, including international relations, economics, business, law, education, health, and environment.

Effective: Summer 2008

INTAF 804  **Global Cultures and Leadership**  (3) Introduces students to cultural theories and to an understanding of how socio-cultural beliefs may impede or accelerate social change.

Effective: Fall 2011

INTAF 805  **International Economics: Principles, Policies, and Practices**  (3) Addresses principles, policies, and practices in international trade and finance that are fundamental for understanding international economic relations.

Effective: Summer 2008

Last Import from UCM: June 2, 2012 12:27 PM
International Bus (INT B)

INT B 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

INT B 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

Last Import from UCM: June 2, 2012 12:27 PM
International Business (I B)

I B 403 International Business and National Policies (3) Evaluation of national economic policies in the light of international economic theory; their impacts on operations of the international business firm.
Effective: Summer 2011
Prerequisite:

I B 404 Contemporary Issues in International Business (3) Investigation of issues in international business practice interpreted from the foundations of the social sciences. Topics will be chosen from contemporary issues in global business and economics.
Effective: Summer 2011
Prerequisite:

I B 440 (US;IL) (AAA S 440, PL SC 440) Globalization and Its Implications (3) This course explores the socioeconomic implications of globalization.
Effective: Summer 2011 Ending: Fall 2012
Prerequisite:

I B 440 (US;IL) (AFR 440, PL SC 440) Globalization and Its Implications (3) This course explores the socioeconomic implications of globalization.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

I B 450 The Business Environment of Europe (3) This course provides an overview of the economic, institutional, and regulatory environment in Europe at the EU and national levels.
Effective: Summer 2011
Prerequisite:

I B 460 International Business in Emerging Nations (3) An overview of international business strategies and economic environments of emerging nations with a specific focus on markets in China, India, and Southeast Asia.
Effective: Summer 2011
Prerequisite: Concurrent: I B 303

I B 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2011
Prerequisite:

I B 494H Honors Research Project (1-3 per semester/maximum of 6) Supervised honors student research projects identified on an individual or small-group basis.
Effective: Summer 2011
Prerequisite:

I B 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

I B 497 Special Topics (1-9) Formal courses given infrequently to explore in depth, a comparatively narrow subject interest.
Effective: Summer 2011

I B 497A International Development in African Context (3) Examines Africa’s current development agenda from a historical background, past interventions and current issues as related to international business.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

I B 497B International Real Estate Markets (3) International perspectives on real estate as property, evaluation of land use regulations, and differences in real estate markets across countries.

I B 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2011

I B 500 International Business Management (3) Concepts and institutions affecting the international conduct of business; interface between nations and international firms; alternative policies businesses employ internationally.
Effective: Summer 2011
I B 515 (R EST 515) **Property Rights in a Global Economy** (2) Analysis of economic, financial, legal, and political factors affecting international real estate decision making.
Effective: Summer 2011

I B 555 (FIN 555) **Global Finance** (1-3) Analyze international business finance problems, impact of evolving international payment systems on business, financial management in modern multinational enterprise.
Effective: Summer 2011
Prerequisite:

I B 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2011

I B 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

I B 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2011

I B 599 (IL) **Foreign Study--International Business** (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2011
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Internatl & Comp Law (INTER)

INTER 950 International Air and Space Law (2) This course will examine with an international perspective the legal status of national air space and outer space and the legal problems surrounding man's activities in these environments. The law governing international and domestic air transport will be surveyed, and the course will conclude with a look at law on the "high frontier."
Effective: Spring 2007

INTER 951 Introduction to Transnational Law and Legal Issues (3) This course will introduce the student to the nature of transnational law and to issues that lawyers will confront when legal issues transcend national borders. The course commences with an examination of the legal complexities of interactions (including economic transactions, civil litigation, and movement of people) in which national law, international law and private law may all simultaneously play a part. It examines the way in which private law, national law and international play a role in a number of different sorts of transactions, from simple organizations in regulating private behavior on a global basis.
Effective: Summer 2011

INTER 952 Law of the Sea (2) Address all central aspects of the law of the sea as a branch of public international law.
Effective: Summer 2007

INTER 953 Law of Treaties (2) Treaties are the foundation of public and private international law and national foreign affairs law. This course examines: historical development of law of treaties; concept of treaty; treaty as source of international and national law; stages of concluding treaty; reservations; accession to treaties, functions of depositary; publication of treaties; breach of treaty obligations; invalidity, termination, and suspension of treaties; denunciation and other withdrawal from treaties; treaties and jus cogens; treaties and customary rules of international law; treaties and third States; treaties and municipal law; interpretation of treaties; languages and authentic texts of treaties.
Effective: Summer 2011

INTER 954 Foreign Investment in Russia and the CIS (2) Addresses principal aspects of the legal framework for foreign investment in Russia and other CIS countries.
Effective: Summer 2007

INTER 957 Comparative Constitutional Law (2) The purpose of the course is to bring the techniques and goals of comparative law to bear on the study of different structures for organizing a government, and different approaches to the conception of a just, effective, and stable form of government. The course starts with an introduction to the issues and methodologies of comparative constitutional law. We then consider the role and structure of constitutional courts. The course covers some or all of the following issues: (i) the role of constitutional courts in policing or enforcing boundaries of power among different organs of government; (ii) federalism and constitutionalism; (iii) the protection of the rights of territorial, linguistic, racial, religious, or other minorities within the nation; (iv) protection of religious freedom; (v) protection of speech; (vi) protection of social and economic rights.
Effective: Summer 2002

INTER 958 Comparative Constitutional & Public Law (3) The principal objective of this course is to provide students with a greater understanding of how their country's body of constitutional law is shaped by history, institutions, and current values. The comparative project, by focusing on narrow differences between two very similar countries, allows students to move beyond an acceptance of basic premises of constitutional law as "natural" or "inherent." As an important dividend, students will gain basic knowledge of foundational concepts in the legal landscape of their country's largest trading partner, hopefully providing students with a comparative advantage in seeking employment with government offices and private firms whose clients engage in substantial cross-border transactions.
Effective: Summer 2011

INTER 959 Russian Law (2) This 2-credit course is concerned with the development of the law, legal system, and legal institutions of what is popularly known as Russia but also correctly and officially known as the Russian Federation within the boundaries presently occupied and, historically, within the boundaries of the Russian Empire. By "law" we mean formal legislation, customary rules, relevant international legal rules, legal doctrine, and anything else regarded by the Russian State or by Russian jurists as comprising part of the "law." For our purposes "legal institutions" encompass all law enforcement agencies or any other agencies of the State or empowered by the state which are concerned with the law in any manner whatsoever, including educational institutions.
Effective: Summer 2011

INTER 961 Asylum and Refugee Law (3) This class surveys the laws of political asylum and related protection for those fleeing danger in their home countries. It examines asylum and refugee law and policy in the United States, and sets forth the legal grounds for barring someone from asylum. It also explores the politics driving immigration policy, including asylum and refugee policy, and the federal agencies that implement those policies.
Effective: Summer 2011

INTER 965 Immigration Law (3) This course is intended to provide students with a general knowledge of immigration law,
including such critical subjects as the constitutional powers of the federal government over immigration matters, admission and exclusion, entry, deportation, and political asylum.

Effective: Summer 1999

INTER 966 International Litigation and Arbitration (3) This course is intended to acquaint students with the impact of globalization upon the process of litigation. It focuses upon the adjudicatory resolution of disputes created by international contracts and global business transactions through the standard legal trial process and arbitration. Various basic topics are treated, including (1) the certification and training of international lawyers; (2) the liability exposure of multinational enterprises; (3) the State as an actor in global commerce; (4) problems of comparative jurisdiction, service of process and evidence-gathering, proof of foreign law, and the enforcement of foreign judgments; (5) the extraterritorial application of national law; and (6) attempts to establish a transborder law and legal process. The course also provides a thorough introduction to international arbitration and investor-state arbitration.

Effective: Fall 2011

INTER 968 Comparative Antitrust Law (3) This course focuses on the antitrust law of the European Union and selected other jurisdictions. It will cover international mergers, monopolies, price fixing cartels, distribution restraints, and related topics. The course examines principles of comity and cooperation among international enforcers investigating cases with a multi-national impact. We also review the antitrust laws of other selected jurisdictions, focusing on proposed and recently enacted competition laws including those of selected new entrants to the European Union and China, and on laws of other jurisdictions with an important impact on U.S. firms such as Japan. Finally, the course will consider issues such as advising multi-national clients, obtaining discovery internationally, and litigating complex cases.

Effective: Summer 2011

INTER 969 International Organizations (2) International organizations play an influential role in the world today. Just a few of the fields they address are peacemaking and peacekeeping, labor relations, food production and distribution, education, health, economic development, monetary affairs, international trade, civil aviation, tele-communications, protection of intellectual property and nuclear energy. This course will examine lawmaking and regulation by international organizations, the regulatory impact of governance by these organizations, issues of legal personality, membership, participation, rights of members and termination of membership, as well as enforcement and dispute settlement. Focus will be on the United Nations and its specialized agencies, including the World Health Organization, the Food and Agriculture Organization, UNESCO and the Inter-national Labor Organization.

Effective: Summer 2002

INTER 971 International Law (3) This course introduces students to key concepts and doctrines of international law. It examines the sources of international law such as custom and treaty, the bases of international jurisdiction, issues of statehood, recognition and succession, nationality, international agreements, and United States participation in the international legal system. The course provides students with the basics needed for both public and private international law practice.

Effective: Spring 2011

INTER 973 Comparative Corporate Law (2) This course attempts a comparative analysis of American and European approaches to the regulation of business enterprises operating in corporate form. The goal is to provide the student with a basic understanding of the fundamental, and perhaps fundamentally different, approaches taken by governments in the United States and in the European communities to the regulation of the corporation. The course materials concentrate on the formal sources of law and thereafter highlight some ways in which the difference in approach is manifested in actual regulation.

Effective: Summer 2000

Prerequisite:

INTER 974 Civil Law From Empire to Union (3) The most important issue of Civil Law today is its Worldview and its perspectives on Citizenship as well as on International Justice. In other words, particularities of the Civil Law sustain a worldview that stems from Roman Law-traditions and practices of the Roman Empire. These pertain to more recent legal developments taking place in a unifying Europe. The profiles of the major functionaries in today's Civil Law domain: judges, attorneys, EU civil servants and administrators mirror such traditions. This course is not restricted to a traditional comparative perspective. Means are provided for a correct and effective transnational communication between legal professionals. To study Civil Law and EU Law implies an approach, understanding and management of the electronic means to communicate with its citizens, institutions and courts. The EU website is an outstanding instrument to understand the structures within lawyers must operate.

Effective: Summer 2011

INTER 975 History of the Western Legal Tradition (3) This course will provide an overview of Western legal systems in ancient, medieval, early modern and modern times.

Effective: Summer 2010

INTER 976 Maritime Law (3) Initial consideration of peculiarly American Admiralty jurisdiction and practice, after which a survey of substantive rules of the general maritime law respected by shipping and trading nations is essayed. Carriage of goods by water (including bills of lading, charter parties, and general average), collisions, salvage, and seafarers' personal injuries are treated as discrete subjects with warranties of seaworthiness, applicability of multilateral treaties, harmonizing effects of worldwide London insurance markets, and modern English precedent being recurring themes.

Effective: Spring 2002
INTER 983 Applied Human Rights (3-4) An advanced international human rights law course in which students engage in faculty-supervised research on projects for human rights organizations.
Effective: Spring 2008
Prerequisite:
INTER 984 International Commercial Arbitration (3) By some measures up to 90% of all international and transnational contracts include agreements to resolve disputes between the parties through arbitration. For all its success, the international arbitration system is not a simple organism. It is the product of a complex interaction of national laws, contractual agreements, specialized procedural rules, and international treaties, customs and norms. The system is designed to balance party autonomy with the sovereign and transnational regulatory interests that are implicated in disputes. This course explores the amalgam of sources that undergrid the international arbitration system, as well as the strategic considerations, practical skills and policy implications that are involved.
Effective: Summer 2011

INTER 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2006

INTER 997A Energy, International Security, and the Global Economy (3) This course focuses on the economic, political, and strategic implications of ongoing trends in global energy markets. The course concentrates on oil and gas markets; it also looks at the international nuclear industry and the related challenge of nuclear proliferation.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

INTER 997B Introduction to Research Design (3) This course provides an accessible approach to developing the research, empirical and analysis skills necessary for International Affairs careers and research. The approach is hands-on, with a focus on providing practical skills for evaluating real-world arguments and policies.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
**Intl Prop/Media Law (INTPR)**

**INTPR 950 Communications Law** (2) This course will explore current issues in communications law including First Amendment constraints on the regulation of the content of telephone calls and television advertising, cable TV monopolies, and telecommunications regulations and deregulation. Course materials explore regulatory, constitutional, and antitrust law principles as they apply to broadcast, cable, and telecommunications activities.

Effective: Fall 1998

**INTPR 951 Internet Law** (3) This course presents the range of legal issues arising from the emergence of cyberspace. The course considers how the law has reacted to challenges posed by the Internet as well as how the law is shaping its future. Specific areas covered include jurisdictional analysis, First Amendment/free speech, digital copyrights, trademarks and domain names, electronic privacy, e-commerce, and Internet governance.

Effective: Spring 2008

**INTPR 960 Copyrights** (3) The course addresses the legal protection afforded to authors and artists under common law and statutory copyright. It considers the rights granted, procedure for their procurement, and protection through litigation. The course also deals with international rights, conveyancing, and interface with the antitrust laws.

Effective: Fall 2009

**INTPR 980 Patent Law** (3) This course is an examination of the legal requirements for obtaining patent protection for an invention. The statutory foundations of United States patent law are examined through an analysis of patent prosecution practice and patent litigation. The course also considers United States patent practice in the context of international intellectual property law.

Effective: Fall 2008

**INTPR 982 Licensing of Intellectual Property** (3) The retention of the intellectual property or the absolute transfer of such interests to other for purposes of economic exploitation is, however, declining in use and popularity. Rather, it has evolved that maximization of the holder's value in the intellectual property may, in some circumstances, be better achieved by sharing some of the rights, while retaining others. This is the topic of the course in the licensing of intellectual property. The offering explores the myriad business, legal, and negotiating issues involved in the drafting and use of intellectual property licensing agreements.

Effective: Summer 2011

Prerequisite:

**INTPR 985 Trademarks** (2) The law of trademarks is central to the concept of fair dealing in the commercial environment. The history of common law and statutory trademarks is explored as well as registration, conveyancing and foreign rights. The course deals with the duty of the merchant to compete honestly and remedies for failure to do so.

Effective: Spring 2011

**INTPR 997 Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Summer 2008

Last Import from UCM: June 2, 2012 12:27 PM
Italian (IT)

IT 412 Theory and Practice of Translation (3) Advanced practicum in Italian explores the technical, artistic, and practical applications of translation between Italian and American cultures. Effective: Summer 2004
Prerequisite:

IT 415 Dante (3) Readings in the Divina Commedia and the related lesser works of Dante Alighieri. Effective: Summer 2011

IT 422 Topics in the Italian Renaissance (3) Topics vary by year and may include "Theories of Love," "Magic, Witchcraft, Alchemy, and the Emergence of Modern Science," etc. Effective: Fall 2005
Prerequisite:

IT 450 Nineteenth-Century Italian Literature (3) Italian romanticism, Verismo and neoclassicism, their origin and development in the novel, poetry, and drama. Effective: Winter 1978
Prerequisite:

IT 460 Twentieth-Century Italian Literature (3) Modern and contemporary Italian prose, drama, and poetry. Effective: Winter 1978
Prerequisite:

IT 475 Modern Italian Literature and Cinema (3) Focus on silent films, fascism, WWII, Resistance, Neorealism, and reactions against Neorealism. Effective: Spring 2003

IT 480 Italian Women Writers Through the Centuries (3) Analysis of the works of women authors in their historical and literary contexts. Effective: Spring 2005
Prerequisite:

IT 485 Italian-American Cultural Studies (3) In-depth exploration of Italian-American cultural contributions. Effective: Spring 2005
Prerequisite:

IT 490 Dante in Translation (3) The reading of Dante's Divine Comedy and selected minor works. Effective: Fall 1983
Prerequisite:

IT 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 1994

IT 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007

IT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

IT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

IT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

IT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Summer 1988

IT 600 Thesis Research (1-15) No description. Effective: Fall 1983
IT 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

IT 801 Fundamentals of Reading Italian for Research (3) This course provides the fundamental skills for reading Italian prose to graduate students with special interests in conducting research using Italian materials.
Effective: Spring 2010

Last Import from UCM: June 2, 2012 12:27 PM
Japanese (JAPNS)

JAPNS 401 (IL) **Level Three Japanese A** (4) Further acquisition of the four language skills in Japanese—reading, writing, speaking and listening comprehension. Effective: Spring 2011

Prerequisite:

JAPNS 402 (IL) **Level Three Japanese B** (4) Exclusively for study abroad returnees. To further develop Japanese proficiency in speaking, listening, reading, and writing. Effective: Spring 2011

Prerequisite:

JAPNS 403Y (IL) **Practical Written Communication: Japanese for Professional and Academic Purposes I** (3) Discussions, presentations, readings, and compositions emphasizing written styles used in newspapers, magazines, business reports, academic writing, and other texts. Effective: Spring 2010 Ending: Summer 2012

Prerequisite:

JAPNS 404 (IL) **Practical Written Communication: Japanese for Professional and Academic Purposes II** (3) Continuation of emphasis on written styles used in newspapers, magazines, business reports, academic writing, and other texts; aspects of translation. Effective: Spring 2010 Ending: Summer 2012

Prerequisite:

JAPNS 404 (IL) **Level Four Japanese A** (4) Continuation of JAPNS 402. Aims to improve students' proficiency in all four language skills, with a special emphasis on writing. Effective: Fall 2012 Future: Fall 2012

Prerequisite:

JAPNS 404 (IL) **Level Four Japanese B** (3) Continuation of JAPNS 403Y. Aims to improve students' proficiency in all four language skills through content-based language learning. Effective: Fall 2012 Future: Fall 2012

Prerequisite:

JAPNS 421 (IL) **Courtly Japan** (3) Focused study of aristocratic society and culture of Heian period Japan. Effective: Spring 2012

Prerequisite:

JAPNS 422 (IL) **War and the Warrior in Japan** (3) Survey of the role of warfare and the warrior in Japan, with attention to changing cultural settings. Taught in English. Effective: Summer 2011

Prerequisite:

JAPNS 423 (IL) **Men, Women, and Animals** (3) Japanese history and culture through the lens of relations between men and women and between humans and animals. Effective: Summer 2011

Prerequisite:

JAPNS 424 (IL) **Traveling Voices** (3) Transnational Writings of Japan: from Modern to Contemporary Eras . Effective: Spring 2012

Prerequisite:

JAPNS 425 Beyond Anime (3) Selected works from the history of illustrated narrative from scrolls to chapbook, through film and anime; topics may vary. This seminar-style study of Japanese visual culture will help students see Japanese visual arts in terms that are local to Japanese aesthetics and through those that transcend local cultures. Effective: Spring 2011

Prerequisite:

JAPNS 452 (IL) **Contemporary Japan: Cultures, Lifestyles, Trends** (3 per semester/maximum of 6) Survey of aspects of modern Japanese society; includes readings from Japanese newspapers, magazines, and fiction; topics may vary each semester. Effective: Spring 2010

Prerequisite:

JAPNS 453 (IL) **Japanese Film** (3 per semester/maximum of 6) Selected films and directors representing various aspects of Japanese culture and cinema; topics may vary each semester. Effective: Spring 2010

Prerequisite:

JAPNS 454 (IL) **Japanese Literature** (3 per semester/maximum of 6) Selected works from important Japanese texts representing genres such as autobiography, poetry, fiction, and drama; topics may vary each semester. Effective: Spring 2010

Prerequisite:

JAPNS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
JAPNS 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2010

JAPNS 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2010

JAPNS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1995

JAPNS 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2010

JAPNS 499 (IL) **Foreign Study--Advanced Japanese** (1-15) Small group instruction in spoken and written modern Japanese at the advanced level.
Effective: Spring 2010
Prerequisite:

JAPNS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1997

JAPNS 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2003

Last Import from UCM: June 2, 2012 12:27 PM
Jewish Studies (J ST)

J ST 401 (IL) (HIST 401) Ancient Technologies and Socio-cultural History in the Ancient Levant (3) Social and intellectual development in the Ancient Levant as they affected and were affected by technological development.
Effective: Spring 2006
Prerequisite:

J ST 405 (IL) (RL ST 405) Ancient Jewish Traditions and Modern Food Movements (3) Jewish laws, customs and attitudes with regard to food production, agricultural policy and eating from biblical to modern times.
Effective: Spring 2012

J ST 409Y (IL) (HIST 409Y, RL ST 407Y) European Anti-Semitism from Antiquity to the Present (3) Surveys the history of anti-Semitism in Europe from antiquity through the Middle Ages to the present.
Effective: Summer 2005

J ST 410 (US;IL) (HIST 410, RL ST 410) Jews in the Medieval World (3) Trends in medieval Jewish society under Islam and Western Christendom.
Effective: Spring 2006

J ST 411 (US;IL) (RL ST 411) Jewish Studies (3) Study of the life and thought of a particular period or movement in the history of Judaism.
Effective: Spring 2006
Prerequisite:

J ST 412 (RL ST 412) American Judaism (3) The development of Jewish religion and culture in America from the colonial era to the present.
Effective: Summer 1999
Prerequisite:

J ST 416 (HIST 416) Zionist History 1890-1948 (3) History of Zionist thought and politics to the foundation of Israel 1948.
Effective: Summer 1997

J ST 420 (ANTH 420) Archaeology of the Near East (3) Culture of the Near East and India from Paleolithic times through the Bronze Age.
Effective: Spring 1999
Prerequisite:

J ST 424H (HIST 424H, PHIL 434H, RL ST 424H) Monotheism and the Birth of the West (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.
Effective: Spring 2002 Ending: Summer 2012
Prerequisite:

J ST 424H (HIST 424H, RL ST 424H) Monotheism and the Birth of the West (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

J ST 426 (US) (ADM J 426, HIST 426) Jewish/American Organized Crime in New York City (3) History of Jewish/American organized crime in New York City from 1890 through the Great Depression.
Effective: Spring 2006

J ST 427 (ENGL 427) Topics in Jewish American Literature (3) An in-depth examination of important themes, writers, and/or historical developments in Jewish Literature of the United States.
Effective: Spring 2009
Prerequisite:

J ST 433 Introduction to Jewish Music and Art (3) Introduction to the study of Jewish music and art from antiquity to the present.
Effective: Summer 2011
Prerequisite:

J ST 434 Media and the American Jewish Experience (3) Study of United States Jewish history through film and accompanying written text.
Effective: Summer 2011
Prerequisite:

J ST 457 (US;IL) (ANTH 457, SOC 457) Jewish Communities: Identity, Survival, and Transformation in Unexpected Places (3) Examines the global array of smaller Jewish communities that have flourished outside the main urban centers of Jewish settlement.
Effective: Summer 2006
Prerequisite:

J ST 468 Modern Jewish Philosophy (3) Explores the major figures in modern Jewish philosophy and their influences on contemporary philosophy.
Effective: Summer 2012
Prerequisite:

J ST 478 (RL ST 478) Ethics After the Holocaust (3) Explores the philosophical effects of the Holocaust for thinking about the primary question: Is ethics possible?
Effective: Summer 2012
Prerequisite:

J ST 480 (CAMS 480) Greeks and Persians (3) Development and achievements of the Achaemenid kingdom; relationships between Persians and Greeks.
Effective: Spring 2001
Prerequisite:

J ST 494 Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1998

J ST 494H Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

J ST 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 1998
Prerequisite:

J ST 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 1994

J ST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1994

J ST 497A Narratives of Conflict: Israel/Palestine on Screen, in Literature, and in the Visual Arts (3) The Israeli-Palestinian conflict as the site of clashing narratives concerning the nature of national identity and right to the land.

J ST 497B (HIST 497B) Holocaust: Its Origins and its Impact on the Jewish Diaspora (3) The history of the Holocaust, its impact on the Jewish Diaspora, and also Jewish responses to the Holocaust.

J ST 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998

J ST 499 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

J ST 505 (HIST 505) Biblical Historiography in its Ancient Setting (3 per semester/maximum of 6) Methods of historical reconstruction in Biblical and other historiography from the earliest Mesopotamian records through those of the 6th century B.C.E.
Effective: Spring 1995
Prerequisite:

J ST 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1998

J ST 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998
Kinesiology (KINES)

PROFESSIONAL COURSES

The following courses are designed for the major in Kinesiology and related disciplines as designated in the various curricular programs. They are pedagogically oriented and do not fulfill the Health Sciences and Physical Education (GPE) component of General Education.

KINES 400 Adapted Physical Education (3) Basic concepts of planning and conducting physical education programs for children with physical, sensory, and/or intellectual impairments. Effective: Fall 2001
Prerequisite: KINES 300

KINES 403 Emergency Medical Technology (4) Theoretical and practical aspects of emergency medical techniques as applied in the pre-hospital environment. Effective: Spring 1998
Prerequisite: KINES 300

KINES 404 Emergency Medical Technology Instructor (2) Educational concepts and skills necessary to present instruction in emergency care; lesson planning, methods of instruction, and evaluation techniques. Effective: Summer 1997
Prerequisite: KINES 300

KINES 411 Introduction to Musculoskeletal Injury and Rehabilitation (3) This course is designed to provide an overview of common musculoskeletal injuries and rehabilitation for pre-allied health and fitness professionals. Effective: Summer 2011
Prerequisite: KINES 300

KINES 420 Psychosocial Dimensions of Physical Activity (3) Discussion of theoretical and empirical findings, structuring a frame of reference for exploring man's involvement in physical activity. Effective: Spring 2001
Prerequisite: KINES 300

KINES 421 Exercise Psychology (3) Psychological antecedents and consequences of physical activity behaviors. Effective: Spring 2008
Prerequisite: KINES 300

Prerequisite: KINES 300

Prerequisite: KINES 300

KINES 424 (US) (WMNST 424) Women and Sport (3) An interdisciplinarian approach to contemporary issues related to women and sport from historical, physiological, psychological, and sociological perspectives. Effective: Spring 2007
Prerequisite: KINES 300

KINES 427 (HD FS 427) Developmental Sport & Exercise Psychology (3) Developmental changes in the antecedents and consequences of physical activity across the lifespan. Effective: Spring 2008
Prerequisite: KINES 300

KINES 428 Motivation and Emotion in Movement (3) Theories of motivational and emotional processes and their applications in movement settings. Effective: Spring 2008
Prerequisite: KINES 300

Prerequisite: KINES 300

KINES 434 Rehabilitation of Injuries to the Lower Extremities (3) Theoretical foundation and laboratory experience in manual therapy techniques and therapeutic exercises for the lower extremities. Effective: Fall 2006
Prerequisite: Concurrent: KINES 335 KINES 395F

KINES 435 Rehabilitation of Injuries to the Trunk and Upper Extremities (3) Theoretical foundation and laboratory experience in manual therapy techniques and therapeutic exercises for the trunk and upper extremities. Effective: Fall 2006
Prerequisite: Concurrent: KINES 336 KINES 435 KINES 395G

KINES 436 Therapeutic Modalities in Athletic Training (4) Lecture and laboratory course exploring physiological principles and clinical evidence to the use of therapeutic modalities in athletic training.
Graduate Bulletin Archive - 2012

Effective: Fall 2006
Prerequisite: Concurrent: KINES 395G KINES 336 KINES 435;

KINES 438W Administration and Issues in Athletic Training (3) Theoretical and practical aspects for management of an Athletic Training professional practice and identifying contemporary issues related to the profession.
Effective: Fall 2006
Prerequisite: Concurrent: KINES 395I

KINES 439W Ethics in Sport and Sport Management (3) Analysis of moral dilemmas in sport and sport management utilizing the tools of ethics.
Effective: Spring 2001
Prerequisite:

KINES 440 Philosophy and Sport (3) An examination of human nature from the perspective of our participation in sport.
Effective: Spring 2001
Prerequisite:

KINES 441 (US) (AM ST 441) History of Sport in American Society (3) Background, establishment, and growth of sport in America from colonial times to the present.
Effective: Fall 2007
Prerequisite:

KINES 442 (IL) (CAMS 442) Sport in Ancient Greece and Rome (3) An examination of the continuity of sport in ancient Greek and Roman societies.
Effective: Spring 2008
Prerequisite:

KINES 443 (IL) The Modern Olympic Games (3) An analysis of the modern Olympic Games from their inception through the current festival.
Effective: Spring 2006
Prerequisite:

KINES 444 (US) History of Athletics in Higher Education (3) Origin and development of athletics in American higher education from colonial times to the present.
Effective: Spring 2006
Prerequisite:

KINES 445 Alcohol and Drug Education (3) Principles of integration and coordination of alcohol and drug education programs for health education and other health related professions.
Effective: Spring 1998
Prerequisite:

KINES 446 (IL) History of Sport in the Modern World (3) History of sport in modern world, ca. A.D. 1500 to present; concentrates on role of sport in societies outside United States.
Effective: Summer 2005
Prerequisite:

KINES 448 Coping with Life After Sport (1) Psychosocial concerns affecting student-athletes as they enter the transition period following sport disengagement, focusing on coping interventions.
Effective: Summer 2002
Prerequisite:

KINES 452 Applied Cardiovascular Physiology (3) In-depth study of cardiovascular regulation during postural, environmental, and exercise stress.
Effective: Spring 2010
Prerequisite:

KINES 454 Women’s Health and Exercise Across the Lifespan (3) In-depth study of the physiological role of exercise in modulating the health of girls and women during different phases of the lifespan.
Effective: Summer 2010
Prerequisite:

KINES 456 Physical Fitness Appraisal (4) The basic components of physical fitness, how it can be measured, and how it can be developed.
Effective: Summer 1996
Prerequisite:

KINES 457 Exercise Prescription and Case Studies (3) Principles of exercise prescription; application of fitness appraisal based on current practices using evaluation and discussion of case studies.
Effective: Spring 2002
Prerequisite:

KINES 460 Movement Disorders (3) Major peripheral and central movement disorders and methods of their treatment.
Effective: Summer 1999
Prerequisite:

KINES 461W Preparation for Research Project (2) Planning and preparation for research project.
Effective: Fall 2006
Prerequisite:

KINES 462W Research Project (2) Completion of research topic.

The Pennsylvania State University
Effective: Fall 2006  
Prerequisite:

KINES 463 Acquisition of Motor Skills (3) Examination of principles of motor learning; the application of strategic factors such as: practice types, schedules, augmented information, and motivation.
Effective: Summer 2000  
Prerequisite:

KINES 464 Children’s Physical Education Curriculum and Practicum (3) Curriculum for elementary school physical education emphasizing the skill theme approach.
Effective: Fall 2006  
Prerequisite:

KINES 465 Neurobiology of Sensorimotor Stroke Rehabilitation (3) This course is designed to expose students to the recent topics in motor stroke rehabilitation research through literature.
Effective: Spring 2011  
Prerequisite:

KINES 466 Assessment and Evaluation in Physical Education and Health Education (2) Explores measurement as an important and distinct component in a variety of physical education and health education contexts.
Effective: Spring 2006  
Prerequisite:

KINES 468 Health Instruction in the School--Content and Method (3) Methods, materials, and units of instruction.
Effective: Fall 2006  
Prerequisite:

KINES 469W Curriculum Development in Health and Physical Education (3) The content and process of K-12 school health and physical education curriculum development for public school students.
Effective: Fall 2006  
Prerequisite:

KINES 481W Scientific Basis of Exercise for Older Adults (3) Study of age-associated physical changes and the effects of exercise on the aging process.
Effective: Spring 2001  
Prerequisite:

KINES 483 Motor Patterns of Children (3) Development of motor patterns. Fundamentals of movement, basic motor skills, and adaptation of the body to external forces.
Effective: Summer 1996  
Prerequisite:

KINES 484 Advanced Biomechanics (3) The use of advanced biomechanics to provide an in-depth understanding of the principles which underpin human movement.
Effective: Spring 1999  
Prerequisite:

KINES 485 Science of Training Athletes (3) Application of scientific data knowledge to analyze sport training.
Effective: Fall 1996  
Prerequisite:

KINES 486 Legal Issues in Sport (3) Contemporary legal issues in sport and their implications for sport managers.
Effective: Summer 1996  
Prerequisite:

KINES 488 Mechanics of Locomotion (3) This course examines the forces and motions characteristic of locomotion, with emphasis on walking, the most common human activity.
Effective: Summer 2002  
Prerequisite:

KINES 492W Programming for Business and Agencies (3) Fundamentals of program development applied to corporate and private physical fitness businesses.
Effective: Fall 2006  
Prerequisite:

KINES 493 Principles and Ethics of Coaching (3) Integration of the practical and theoretical knowledge necessary for effective coaching through classroom and field experiences.
Effective: Fall 2006  
Prerequisite:

KINES 494H Senior Honors Thesis (1-6) Independent study directed by a faculty supervisor that culminates in the production of a thesis.
Effective: Summer 2008  
Prerequisite:

KINES 495A Practicum in Student Teaching (12) Supervised teaching of health and physical education in K-12 public schools with seminars focused on transition from student to professional.
Effective: Fall 2006  
Prerequisite:

KINES 495B Field and/or Research Practicum in Kinesiology (6) Participation under supervision in a field or research
KINES 495C Exercise Science Practicum (3 per semester/maximum of 6) Participation under supervision in a health and fitness setting. 
Effective: Fall 2006 
Prerequisite: 

KINES 495D Expanded Field and/or Research Practicum in Kinesiology (1-6) Additional participation under supervision in a field or research practicum. 
Effective: Spring 2006 
Concurrent: KINES 495B 

KINES 495F Field Practicum in Athletic Training (3) Participation under supervision in a field practicum. 
Effective: Summer 1996 

KINES 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Summer 1996 

KINES 496A Independent Study Athletic Training (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Summer 2012 Ending: Summer 2012 

KINES 496A Independent Study Athletic Training (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012 

KINES 496B Independent Study Biomechanics (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Summer 2012 Ending: Summer 2012 

KINES 496B Independent Study Biomechanics (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012 

KINES 496C Independent Study Exercise Physiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Summer 2012 Ending: Summer 2012 

KINES 496C Independent Study Exercise Physiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012 

KINES 496D Independent Study History and Philosophy of Sport (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Summer 2012 Ending: Summer 2012 

KINES 496D Independent Study History and Philosophy of Sport (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012 

KINES 496E Independent Study Motor Control (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Summer 2012 Ending: Summer 2012 

KINES 496E Independent Study Motor Control (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012 

KINES 496F Independent Study Psychology of Movement and Sport (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Summer 2012 Ending: Summer 2012 

KINES 496F Independent Study Psychology of Movement and Sport (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012 

The Pennsylvania State University
KINES 496G Independent Study Teaching and Coaching (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2012 Ending: Summer 2012

KINES 496G Independent Study Teaching and Coaching (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 496K Independent Study Applied Kinesiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2012 Ending: Summer 2012

KINES 496K Independent Study Applied Kinesiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

KINES 497A Genetics and Human Performance (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 497B Exercise as Medicine (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

KINES 497C Physical Activity in Diverse Populations (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 497D Representing Sport in Popular Film (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

KINES 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

KINES 498A EMS Assistant Instructor (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 498B EMS Teaching Practicum (1-2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 498C Introduction to Ambulance Operations (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 498D Emergency Vehicle Operators Course (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 498E EMS Field Practicum (1-2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 498F ALS Assistant Tech (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
KINES 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Spring 2011

KINES 530 Experimental Design and Methodology in Kinesiology (3) Research techniques, including methods, research design, techniques for data collection, as applied to relevant problems in Kinesiology. Effective: Spring 1999
Prerequisite:

KINES 531 Issues in Athletic Training (3) Analysis of professional/academic issues related to athletic training; includes medical considerations, legal and professional developments, and current research. Effective: Spring 2000

KINES 532 Pathoetiology of Musculoskeletal Injuries (3) In-depth study of physiological, mechanical, and neuromuscular mechanisms of common musculoskeletal injuries with applications for injury prevention, evaluation, and treatment. Effective: Summer 2000
Prerequisite:

KINES 534 Seminar in Motor Control (3) The course will address contemporary theories and methods in motor control as reflected in recently published scientific papers. Effective: Fall 2011

KINES 555 Neurophysiological Basis of Movement (3) The basic understanding of neurophysiological structures and mechanisms involved in the generation of human voluntary movement. Effective: Spring 1997

KINES 556 Psychophysiology of Movement (3) Basic concepts and principles of psychophysiology and their application for analyses of human movements. Effective: Summer 1997

KINES 557 (PHSIO 557) Advanced Exercise Physiology (3) Physiological changes during exercise with emphasis on the effects of physical conditioning and training. Effective: Fall 1996
Prerequisite:

KINES 574 Modeling in Biomechanics (3) Examination of the philosophies and tools used in biomechanical modeling and the insights into the musculo-skeletal system these provide. Effective: Spring 2000
Prerequisite:

KINES 575 Experimental Methods in Biomechanics and Motor Control (3) Introduces the theory and practice behind the primary experimental methods used in biomechanics and motor control. Effective: Summer 2005
Prerequisite:

KINES 577 (PHSIO 577) Cardiovascular Physiology (3) In-depth study of the heart and circulatory system with emphasis on the effects of exercise on cardiovascular function. Effective: Fall 1997
Prerequisite:

KINES 578 (PHSIO 578) Physiology and Mechanical Behavior of Skeletal Tissues (3) In-depth examination of the structure, composition, and material behavior of the basic skeletal tissues, including bone, cartilage, tendon, and ligament. Effective: Spring 1999
Prerequisite:

KINES 579 Advanced Biomechanics of Human Motion (3) Biomechanical foundation of human movement and injury prevention. Effective: Summer 1997
Prerequisite:

KINES 588 Scientific Writing in Kinesiology (3) Instruct students in writing grant proposals, abstracts, manuscripts, and effective presentations in their respective scientific fields of study in Kinesology. Effective: Spring 2005

KINES 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students or outside speakers. Effective: Fall 1996

KINES 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 2008
KINES 596 Individual Studies (1-9) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1996

KINES 596A Independent Study in Athletic Training (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2012 Ending: Summer 2012

KINES 596A Independent Study in Athletic Training of Sports Medicine (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012

KINES 596B Independent Study in Biomechanics (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2012 Ending: Summer 2012

KINES 596B Independent Study in Biomechanics (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 596C Independent Study in Exercise Physiology (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2012 Ending: Summer 2012

KINES 596C Independent Study in Exercise Physiology (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 596D Independent Study in History and Philosophy of Sport (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2012 Ending: Summer 2012

KINES 596D Independent Study in History of Philosophy and Sport (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 596E Independent Study in Motor Control (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2012 Ending: Summer 2012

KINES 596E Independent Study in Motor Control (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 596F Independent Study in Psychology of Movement and Sport (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2012 Ending: Summer 2012

KINES 596F Independent Study in Psychology of Movement and Sport (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1996

KINES 597A Exercise Physiology Seminar (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 597C Advanced Anatomy - Cadaver Dissection (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
KINES 597D **History of Sport Seminar: National Pasttimes** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

KINES 600 **Thesis Research** (1-15) No description.
Effective: Fall 1996

KINES 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1996

KINES 602 **Supervised Experience in College Teaching** (1-2 per semester, maximum of 6) Preparation and presentation of materials in lecture and laboratory classes under the supervision of a full time faculty member.
Effective: Fall 1996
Prerequisite:

KINES 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1996

KINES 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1996

Last Import from UCM: June 2, 2012 12:27 PM
Labor & Employment Law (LABOR)

LABOR 962 Employment Law Survey Part I - Basic Common Law and Workplace Health and Safety (3) This course will cover: common law employment doctrines, including at-will employment, contract and tort erros of at-will employment, employee duties, including the duty of loyalty and trade secrets, noncompetition agreements, and rights to employee inventions and workplace injuries, including workers compensation, OSHA, and criminal and tort approaches to promoting a safe workplace.
Effective: Summer 2011

LABOR 963 Employment Law Survey Part II - Privacy, Wage, ERISA, Anti-Discrimination Law (3) This course will cover workplace privacy issues, including free speech and political protections, and defamation and related torts; anti-discrimination laws; and wage, hour, and benefits legislation, including unemployment compensation; the WARN Act, the Family and Medical Leave Act; and NLRA issues commonly encountered in the unorganized workplace.
Effective: Summer 2011

LABOR 964 Employment Discrimination (3) This course will provide an overview of significant doctrinal issues in employment discrimination law, and will seek to develop students' skills through a rigorous examination of statutory law, regulations and court decisions. It will introduce students to the fundamental legal theories underlying the substantive coverage of the most significant federal equal employment opportunity laws, and legal issues regarding their application.
Effective: Summer 2011

LABOR 965 Worker's Compensation Law (3) This course will explore the history and development of, public policy considerations for, and state and federal systems for delivery of medical and wage benefits to injured workers.
Effective: Spring 2012

LABOR 966 The Law of Employee Benefits (3) Employe-provided pension and health care programs play a critical role in the lives of individuals, families, and communities. They also affect corporations, financial markets, and the economy as a whole. Employee benefit programs are, in short, an important staple of modern law practice. This course surveys the Employee Retirement Income Security Act and relevant portions of the Internal Revenue Code. Classes examine what benefit plans must do regarding reporting and disclosure, accrual, vesting, funding, and fiduciary standards. The course covers health care reform, the shift from defined benefit to defined contribution programs, and the effect of stock market volatility on benefit programs. Throughout the semester, students examine the policy goals underpinning federal benefits law. The course surveys major issues in ERISA litigation, including that statute's claims and remedies provisions, as well as its preemption of state law.
Effective: Summer 2012

LABOR 970 Labor Law (3) This course is an extended study of the federal National Labor Relations Act focusing on the right to form and join labor organizations, strikes, boycotts and picketing, collective bargaining, and the enforcement of collective bargaining agreements.
Effective: Fall 1998

LABOR 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2008

LABOR 997A The Law of Employee Benefits (3) Employer-provided pension and health care programs play a critical role in the lives of individuals, families, and communities. They also affect corporations, financial markets, and the economy as a whole. Employee benefit programs are, in short, an important staple of modern law practice. This course surveys the Employee Retirement Income Security Act and relevant portions of the Internal Revenue Code. Classes examine what benefit plans must do regarding reporting and disclosure, accrual, vesting, funding, and fiduciary standards. The course covers health care reform, the shift from defined benefit to defined contribution programs, and the effect of stock market volatility on benefit programs. Throughout the semester, students examine the policy goals underpinning federal benefits law. The course surveys major issues in ERISA litigation, including that statute's claims and remedies provisions, as well as its preemption of state law.

Labor and Industrial Relations (L I R)

L I R 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1988

L I R 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1988

Last Import from UCM: June 2, 2012 12:27 PM
Landscape Architecture (LARCH)

LARCH 400 Introduction to Design and Theory (IUG) (5) Introductory landscape architectural design and applied theory for IUG students.
Effective: Summer 1998
Prerequisite: Concurrent: LARCH 400A

LARCH 400A Introduction to Design Theory Seminar (IUG) (1) Introductory landscape architectural design theory seminar for IUG students.
Effective: Spring 2001
Prerequisite: Concurrent: LARCH 400

LARCH 414 Design and Theory V: Advanced Landscape Architectural Design (5 per semester/maximum of 15) Review of landscape architectural theories and issues; supports development of comprehensive design study and/or independent honors (Thesis-Based) design projects. LARCH Majors only.
Effective: Spring 2007
Prerequisite:

LARCH 424 Design Theory Seminar (3 per semester/maximum of 9) Inquiry-based reading and discussion of design theory literature relevant to contemporary landscape architecture issues. Topics vary each semester.
Effective: Spring 2012
Prerequisite:

LARCH 431 Landscape Architectural Design Implementation III (3) Introduces the principles and techniques of stormwater management and drainage design, including instruction in proper construction documentation, calculations and estimations. For Landscape Architecture majors only.
Effective: Spring 2012
Prerequisite:

LARCH 450 Interactive Digital Design: Information Technology for Designers (3) A student centered paperless interactive digital design studio.
Effective: Spring 2007 Ending: Summer 2012

LARCH 450 Geodesign: Geospatial Technology for Design (3) Interactive geodesign and digital design studio.
Effective: Fall 2012 Future: Fall 2012

LARCH 494H Research Projects - Honors (1-12 per semester/maximum of 12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2012

LARCH 495 Internship (1-13) Supervised off-campus, non-group instruction including individual field experiences, practicums or internships. Written and oral critique of activity required.
Effective: Fall 1981
Prerequisite:

LARCH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

LARCH 496H Independent Studies - Honors (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012

LARCH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

LARCH 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

LARCH 499A (IL) Design Theory Seminar (1) Inquiry-based reading and discussion of design theory literature relevant to the focus and content of the associated design studio course, LARCH 499B. LARCH majors only.
Effective: Spring 2007
Prerequisite: Concurrent: LARCH 499B LARCH 499C LARCH 499D

LARCH 499B (IL) Design and Theory VI: Contemporary/International Landscape Architectural Design Issues (5) Study of and design for sites, programs, and social groups associated with ongoing contemporary landscape architectural concerns. LARCH majors only.
Effective: Spring 2012

The Pennsylvania State University
LARCH 499D (IL) **Contemporary/International Special Topics** (3) Special topics related to, and study in conjunction with 499B. Landscape Architecture majors only.
Effective: Spring 2012
Prerequisite: Concurrent: LARCH 499B

LARCH 499E (IL) **People and Protected Areas** (3) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2012 Ending: Summer 2012

LARCH 499F (IL) **Studio: Community Design in the Vivinity of Udzungwa Mountains National Park** (5) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2012 Ending: Summer 2012

LARCH 499G (IL) **Colloquium: The Contribution of Service-Learning to Students and Community** (1) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2012 Ending: Summer 2012

LARCH 500 **Environmental and Ecological Conditions in Regional Landscape** (1) Landscape architectural field trips within the Centre Region.
Effective: Summer 1996
Prerequisite:

LARCH 501 **Research and Writing in Landscape Architecture** (3) Landscape architectural research methods and writing techniques.
Effective: Fall 2009

LARCH 502 **Intellectual History and Theory of Landscape Architecture** (3) Introductory theory seminar covering the intellectual history of landscape architecture and theoretical contributions from related disciplines.
Effective: Spring 2009

LARCH 510 **Graduate Seminar in Landscape Architecture** (3) Landscape architectural theory exploration through readings and discussions.
Effective: Fall 2011
Prerequisite:

LARCH 515 **Design and Theory I: Introduction** (5) Introductory landscape architectural design and applied theory for MLA students.
Effective: Summer 2011

LARCH 520 **Design and Theory II: Introduction to Issues of Place** (5) Studio design with a focus in addressing issues of nature and culture.
Effective: Spring 2012
Prerequisite:

LARCH 530 **Design and Theory III: Landscape Systems** (5) An introduction to regional planning, management, and design.
Effective: Spring 2012
Prerequisite:

LARCH 531 **Option Studio I** (4) Studio inquiry in community and urban design.
Effective: Spring 2006
Prerequisite:

LARCH 540 **Design and Theory IV: Site and Community Design** (5) Large site and Community Design.
Effective: Spring 2012
Prerequisite:

LARCH 541 **OPTION STUDIO II** (4) Continued studio inquiry in community and urban design.
Effective: Spring 2012
Prerequisite:

LARCH 550 **Graduate Studio IV** (7) Landscape architectural research or research and design inquiry.
Effective: Summer 1996
Prerequisite:

LARCH 560 **Landscape Architecture Inquiry** (1-9) Research, planning, and/or design inquiry into landscape architectural issues.
Effective: Summer 1996
Prerequisite:

LARCH 590 **Colloquium** (1-3 per semester/maximum of 6) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1988

The Pennsylvania State University
LARCH 596 Independent Studies (1-9) Independent study opportunities open for graduate students covering topics which fall outside the scope of formal courses (non thesis).
Effective: Spring 2009

LARCH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

LARCH 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2006

LARCH 600 Thesis Research (On Campus) (1-15) No description.
Effective: Spring 1988

LARCH 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Opportunity for students to obtain supervised and graded teaching experience.
Effective: Spring 1988

LARCH 610 Thesis Research (Off Campus) (1-15) No description.
Effective: Spring 1988

Last Import from UCM: June 2, 2012 12:27 PM
Language and Literacy Education (LL ED)

LL ED 400 Teaching Reading in the Elementary School (3) Introduction to the reading program; acquaintance with materials and techniques; observations of reading instruction; correlation with human growth and development. Effective: Spring 2007
Prerequisite: Concurrent: LL ED 401 LL ED 402 for EK ED majors

LL ED 401 Teaching Language arts in Elementary School (3) Principles, problems, materials, and techniques involved in teaching speaking, listening, writing, and reading in the elementary school. Effective: Spring 2007
Prerequisite: Concurrent: LL ED 400 LL ED 402 for EK ED majors

LL ED 402 Teaching Children’s Literature (3) Survey of children’s literature with an emphasis on the importance of literature in the development of the elementary school curriculum. Effective: Spring 2007
Prerequisite: Concurrent: LL ED 400 LL ED 401 for EK ED majors.

LL ED 411 Teaching Language Arts in Secondary Schools I (3) Exploration of language, literacy, and culture and development of curricular designs for teaching language arts in secondary schools. Effective: Spring 1994
Prerequisite: Concurrent: LL ED 420

LL ED 412W Teaching Language Arts in Secondary Schools II (3) Exploration of language, literacy, and culture and development of curricular designs for teaching language arts in secondary schools. Effective: Summer 2010
Prerequisite: Concurrent: CI 412W

LL ED 420 Adolescent Literature and Literacy (3) Exploration of adolescent literacy and curricular designs for using the diversity of cultural voices in adolescent literature in secondary schools. Effective: Spring 1992
Concurrent: LL ED 411

LL ED 445 Teaching English in Bilingual/Dialectal Education (3) Theories, techniques, materials for teaching English speaking, reading, and writing to bilingual and nonnative speakers in elementary and secondary schools. Effective: Summer 2011

LL ED 450 Content Area Reading (3) Study of reading skills and materials for specific content areas; diagnostic and instructional procedures for classroom teachers. Effective: Spring 2007
Prerequisite:

LL ED 462 The Art of the Picturebook 3 An in-depth study of picturebooks as art objects providing aesthetic experiences and contributing to our aesthetic development in literacy education. Effective: Summer 2009
Prerequisite:

LL ED 465 Fantasy Literature for Children (3) A study of fantasy literature for children looking at a variety of fantasy stories and examining them from different perspectives. Effective: Summer 2010
Prerequisite:

LL ED 480 Media Literacy in the Classroom (3) Exploration of media languages and literacy in classrooms, learning in an electronic age; issues, ideas, and teaching strategies. Effective: Spring 2005
Concurrent: LL ED 411 LL ED 420

LL ED 495 School Practicum in Reading (1-18) Supervised practicum providing field experiences at any grade level, with opportunities to assume various teaching roles. Effective: Spring 1992
Prerequisite:

LL ED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1992

LL ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 1992

LL ED 497A Elementary Education Literacy Block (15) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2012 Ending: Summer 2012
LL ED 497A Elementary Education Literacy Block (15) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012

LL ED 497A CEAED PK-4 Literacy Block (15) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

LL ED 497B 4-8 Education Literacy Block (9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

LL ED 497B CEAED 4-8 Literacy Block (9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

LL ED 497C Picture Story Book in Classroom (3) Emphasizes theories & practices of sharing picturebook with children. Discuss understandings of roles illustrations play and how these may enable us to construct meanings from our encounters with texts.
Effective: Summer 2012

LL ED 497D Digital Tools for Literacy Learning (3) Utilization of digital tools for Mac and PC to support the construction of literacy skills and practices in school classrooms.
Effective: Summer 2012

LL ED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

LL ED 498A AP English Literature (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2012

LL ED 498B AP Spanish Language (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2012

LL ED 498C AP Spanish Literature (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2012

LL ED 500 The Reading and Writing Classroom (3) Analysis of reading and writing processes and the development of integrated language arts programs for elementary schools.
Effective: Summer 1993
Prerequisite:

LL ED 501 Teaching Writing in Elementary and Secondary Schools (3) In depth examination of writing development and the development of writing components of language arts programs K-12.
Effective: Summer 1993
Prerequisite:

LL ED 502 Studies in Literature for Children (3) Study of various genres of children's literature from various critical perspectives; emphasis on role of literature in children's lives.
Effective: Summer 1992
Prerequisite:

LL ED 503 (ENGL 503) Research Methods in Composition (3) Introduction to the issues and methods of empirical research in composition.
Effective: Fall 1993

LL ED 512 Teaching Language, Literacy, and Literature in Secondary Schools (3) Collaborative inquiry into the curricular design and experience of language, literacy, media, and literature in adolescents' personal and social lives.
Effective: Summer 2010
Prerequisite:

LL ED 520 Literature for Adolescents (3) Critical study of adolescent literature, its diversity of cultural voices, and designs for its use in secondary school classrooms.
Effective: Summer 1992
Prerequisite:
LL ED 541 Adolescent and Children's Literature Related to Ethnic and Social Issues (3) Literature, K-12; study of literary symbolism, ethnic literature, issues, e.g., sex, death, adoption, divorce in trade books.
Effective: Summer 1993
Prerequisite:

LL ED 542 (CI ED 542) Issues in Literacy Education (3 per semester/maximum of 6) Discussion of philosophical, sociological, historical, and curricular issues in literacy education.
Effective: Fall 1997

LL ED 544 Cross-Cultural Research in Bilingual Education (3) Analysis of cross-cultural research methodology in bilingual education.
Effective: Spring 1993
Prerequisite:

LL ED 545 LITERACY AND LANGUAGE ASSESSMENT FOR INSTRUCTIONAL DECISIONS (3) Diagnosis of reading difficulties; genesis of reading problems; achievement, diagnostic, and capacity tests; application in simulation activities.
Effective: Summer 1993
Prerequisite:

LL ED 550 Theory and Practicum in Assessment and Remediation of Reading Difficulties (3) Links theory and practice in supervised practicum involving design and analysis of appropriate assessment and instructional procedures for elementary and secondary students.
Effective: Fall 1993
Prerequisite:

LL ED 560 (ADTED 560) Teaching Reading to College Students and Adults (3) Reading literacy for adults, including college reading, Adult Basic Education (ABE), and General Educational Development (GED) programs.
Effective: Spring 1993
Prerequisite:

LL ED 561 Cultural Pluralism in Children's and Adolescent Literature (3) Reading/discussing literature from multicultural/critical multicultural lenses and how this impacts literacy.
Effective: Summer 2012

LL ED 563 Myths and Folktales in Children's Literature (3) An in-depth study of myths and folktales shared with children and how these stories are remade and disseminated today.
Effective: Spring 2010
Prerequisite:

LL ED 565 Analysis of Theory and Practice in Bilingual Education Program (3) Classroom analysis, observation, and research of instructional procedures, materials, and evaluation strategies used in bilingual education.
Effective: Summer 2011
Prerequisite:

LL ED 566 Bilingual Education and the Hispanic Child (3) Analysis of the research and literature related to teaching bilingual Hispanic students; examines problems, issues, and strategies.
Effective: Spring 1993
Prerequisite:

LL ED 567 Politics of Bilingual Education (3) To critically analyze the contemporary and historical political context of an education that is bilingual and bicultural.
Effective: Spring 2000

LL ED 568 Doing Research in Children's Literature (3) An examination of research traditions used to frame research in children's literature studies and preparation to write the master's paper.
Effective: Summer 2010
Prerequisite:

LL ED 577 (CI 577) Multicultural Issues in Literacy Education (3) Explores research questions, and theoretical frameworks, and analyzes multicultural issues in popular media in the context of American schools.
Effective: Spring 1997
Prerequisite:

LL ED 580 (CI 580) Media Literacy, Language, and Literacy in Schools (3) Theories of media literacy, issues of non-print technology in language and literacy.
Effective: Spring 1997
Prerequisite:

LL ED 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1996

LL ED 594 Research in Language and Literacy Education (3) Cooperative design and study of research in language and literacy education.
Effective: Spring 1993
Prerequisite:
LL ED 595A Practicum: Remedial Procedures and Diagnosis (3-6) Advanced practicum; diagnostic testing and remedial instruction of more severe types of reading disability; supervisory experiences, if appropriate.
Effective: Summer 1993
Prerequisite:

LL ED 595B Advanced Practicum in Bilingual Education (1-6) Advanced internship in curriculum, supervision, and instruction in a bilingual education setting.
Effective: Spring 1993
Prerequisite:

LL ED 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1993

LL ED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1993

LL ED 597A Trends and Issues in Children's Literature Studies (3) Examination of recent scholarship in children's literature studies including new media, cultural criticism, literary theory, and pedagogy.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

LL ED 597B Digital Tools for Literacy Learning (3) Utilization of digital tools for Mac and PC to support the construction of literacy skills and practices in school classrooms.
Effective: Summer 2012 Ending: Summer 2012

LL ED 597C Readings and Research in Writing and Literacy (3) Focused literature review and data analysis for research in writing; for members of teacher-writer research team.
Effective: Summer 2012 Ending: Summer 2012

LL ED 597E Cultural Pluralism in Children's and Adolescent Literature (3) A critical exploration of literature that addresses multicultural issues; emphasis on cultural diversity in children's lives.
Effective: Summer 2012 Ending: Summer 2012

LL ED 597E Cultural Pluralism in Children's and Adolescent Literature (3) A critical exploration of literature that addresses multicultural issues; emphasis on cultural diversity in children's lives.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

LL ED 597G Writing for Children (3) Supervised workshop in the craft and techniques of creating picture books, short stories, longer fiction and nonfiction literature for children.
Effective: Summer 2012 Ending: Summer 2012

LL ED 597G Writing for Children (3) Supervised workshop in the craft and techniques of creating picture books, short stories, longer fiction and nonfiction literature for children.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

Last Import from UCM: June 2, 2012 12:27 PM
Languages (LANG)

LANG 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2007

LANG 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2007

LANG 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

LANG 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2007

Last Import from UCM: June 2, 2012 12:27 PM
Latin (LATIN)

Knowledge of Greek or Latin not required. See also CLASSICS AND ANCIENT MEDITERRANEAN STUDIES and GREEK.

LATIN 402 Republican Literature (3-12) Selected works by Plautus, Lucretius, Catullus, Cicero (content varies).
Effective: Summer 1995
Prerequisite:

LATIN 403 Augustan Age Literature (3-12) Selected works by Virgil, Horace, Propertius, Tibullus, Ovid, Livy (content varies).
Effective: Summer 1995
Prerequisite:

LATIN 404 Silver Age Literature (3-12) Selected works by Petronius, Seneca, Tacitus, Juvenal, Martial, Pliny the Younger (content varies).
Effective: Summer 1995
Prerequisite:

LATIN 420 Medieval Latin Literature (3-6) Survey of Medieval Latin literature.
Effective: Spring 1995
Prerequisite:

LATIN 450W History of Latin (3) History of the Latin language and its speakers, from their origins to the 2nd century C.E.
Effective: Summer 1994
Prerequisite:

LATIN 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

LATIN 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

LATIN 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

LATIN 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

LATIN 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

LATIN 510 Latin Seminar (3-6) No description.
Effective: Winter 1978

LATIN 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2000

LATIN 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005

Last Import from UCM: June 2, 2012 12:27 PM
Law (LAW)

LAW 903 Visiting Away Semester (1-17) Student approved by the law school to visit away for the semester. Course work successfully completed will transfer as progress toward the law degree.
Effective: Summer 2008

Last Import from UCM: June 2, 2012 12:27 PM
LEAD 501 Leadership Across the Lifespan (3) Analysis and application of models, theories and strategies for developing an individual’s full leadership potential at different life stages. Effective: Summer 2004

LEAD 519 (BUSAD 519) Developing Creative High Performance Organizations (3) This course focuses on how to create high performing organizations based on models provided by business, science and the arts. Effective: Spring 2007

LEAD 555 (BUSAD 555) Full Range Leadership Development (3) Development of behavioral skills associated with outstanding leadership of individuals, teams, and organizations through advanced information technology, experimental exercises, and case analysis. Effective: Spring 2011

LEAD 556 (BUSAD 556) Diversity Leadership (3) Analysis and application of models, theories, and strategies for managing an increasingly diverse workforce and customer base. Effective: Fall 2005

LEAD 557 Leadership Models and Methods (3) Design, analysis and application of leadership models and research methods for solving organizational problems. Effective: Summer 2010

LEAD 561 Dynamic Communication in Leadership Contexts (3) Articulating and promoting a vision; facilitating interaction and communicating with groups; theory and techniques of persuasion. Effective: Fall 2005

LEAD 562 Strategic Leadership (3) Executive-level leadership of larger systems and organizations. Impact of developing human, intellectual, social, structural, financial and reputational capital as strategic tools. Effective: Summer 2004

LEAD 582 (BUSAD 582) Social Entrepreneurship and Community Leadership (3) This course will provide an opportunity for students to explore concepts of developing and leading businesses that create social value. Effective: Fall 2011

LEAD 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2005

LEAD 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Summer 2005

Last Import from UCM: June 2, 2012 12:27 PM
**LINGuistics (LING)**

**LING 402 Syntax I** (3) Principles of grammatical analysis in the generative framework; an overview of syntactic structures across languages.
Effective: Fall 2001

**LING 404 Phonology I** (3) The analysis of the sound systems of human languages; focus on common phonological processes across languages and on phonetics-phonology interface.
Effective: Fall 2001

**LING 429 (PSYCH 426) Language and Thought** (3) Relations between language and cognition; cognitive implications of normal and impaired language development; cognition and bilingualism.
Effective: Spring 2007

**LING 446 (PSYCH 427) L1 Acquisition** (3) How children learn their first language; psycholinguistic aspects of lexical, syntactic, semantic, and phonological development.
Effective: Spring 2010

**LING 447 Bilingualism** (3) Explores the social and psychological aspects of bilingualism; topics include languages in contact, transference, maintenance, and loss.
Effective: Fall 2001

**LING 448 Sociolinguistics** (3) Issues in the study of language in its sociocultural context; analysis of social dialects and speech styles.
Effective: Fall 2001

**LING 449 Semantics I** (3) The study of meaning in human language; methods of analysis; study of sense, reference, compositionality, quantification, presupposition, and sentence-level meaning.
Effective: Fall 2001

**LING 493 Field Methods** (3) Primary linguistic investigation of a language different from English; field work with a native speaker; data gathering; linguistic analysis.
Effective: Fall 2001

**LING 494 Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

**LING 494H Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

**LING 496 Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

**LING 497 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1983

**LING 497B Psychology of Language** (3) Overview of psychological research and theory on language processes, including speech perception, word recognition, meaning prepresentation, comprehension, and language acquisition.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

**LING 498 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1992

**LING 499 (IL) Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

**LING 500 Syntax II** (3) Advanced topics in syntactic analysis and theory.

The Pennsylvania State University
LING 502 **Historical Linguistics** (3) Principles of comparative linguistics; language families; reconstruction of lost languages. 
Effective: Spring 2002

LING 504 **Phonology II** (3) Advanced topics in phonological analysis and theory. 
Effective: Spring 2002

LING 520 (PSY 520) **Seminar in Psycholinguistics** (3 per semester/maximum of 9) Consideration of theoretical and research issues relevant to psychological aspects of language sounds, syntax and semantics, and other cognitive support. 
Effective: Spring 2004

LING 521 **Proseminar in the Language Science of Bilingualism** (3) This course provides a cross-disciplinary overview of language science approaches to bilingualism and second language learning. 
Effective: Spring 2010

LING 522 **Proseminar in Professional Issues in Language Science** (3) This course addresses issues of professional development in the language sciences with special attention to cross-disciplinary research. 
Effective: Spring 2010

LING 525 **Experimental Research Methods in Psycholinguistics** (3) This course provides an overview of experimental research techniques used in language science. 
Effective: Spring 2010

LING 548 **Sociolinguistics** (3) Study of social and linguistic aspects of language change, varieties, policy, social inequality, language communities, language, society, and thought. 
Effective: Spring 2002

LING 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Spring 1987

LING 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. 
Effective: Spring 1987

LING 600 **Thesis Research** (1-15) No description. 
Effective: Fall 1983

LING 601 **Ph.D. Dissertation Full-Time** (0) No description. 
Effective: Fall 1983

Lit/Dispt Res/Skills (SKILS)

SKILS 950 Advocacy I (4) This course introduces the fundamental skills of trial advocacy applicable in civil and criminal trials in any jurisdiction. In keeping with the theory that trial advocacy is best learned by "doing," each student will conduct written and oral exercises concerning the various stages of the trial process- pleadings, pretrial motions, discovery, settlement negotiations, trial preparation, jury selection, opening statements, direct and cross examination of lay witnesses, examination of expert witnesses, trial motions, and closing arguments. Students are able to evaluate their own progress through viewing videotapes of their performances. The class meets jointly for lectures, while the oral trial exercises are conducted in small sections. Effective: Summer 2011
Prerequisite:

SKILS 950L Advocacy I (4) Advocacy I teaches pretrial and trial skills through a combination of lecture, written and oral courtroom exercises, and videotape review. Effective: Fall 2007
Prerequisite:

SKILS 950R Advocacy I Advocacy I teaches pretrial and trial skills through a combination of lecture, written and oral courtroom exercises, and videotape review. Effective: Fall 2007
Prerequisite:

SKILS 951 Advocacy II (3) Students synthesize the individual trial skills learned in Advocacy I by preparing and conducting an entire case, from the initial interview of the client through a trial on the merits. Each case is tried before a jury and judge from a Pennsylvania or federal court. All trials are videotaped in their entirety. Effective: Fall 1998
Prerequisite:

SKILS 952 Strategic Legal Research (2) The process and techniques of research necessary for the practice of law are explored from historic, conceptual, and practical perspectives. The tools of legal research, including technology based sources, are investigated in detail. Skills needed to research factual issues will also be developed. Effective: Fall 2010 Ending: Summer 2012
Prerequisite:

SKILS 953 Appellate Practice (2) A required brief-writing and appellate argument exercise before a panel of faculty and attorney judges follows a series of lectures and videotapes on the appellate process and appellate advocacy. Effective: Fall 2006
Prerequisite:

SKILS 954 Pretrial Advocacy (2) Students work with case files through written exercises and classroom simulations to gain a thorough understanding of the procedural rules and advocacy tools used in the pretrial stages of litigation. The course grade is based upon class participation and the written exercises. Effective: Spring 2010
Prerequisite:

SKILS 955 Evidence (3) This course presents evidence in trials under the Federal Rules of Evidence, at common law and in equity and with reference to administrative bodies. The reasoning from which rules arise in areas including relevancy, competency, privilege, examination of witnesses, writing, the hearsay rule and its exceptions, burden of proof, presumptions, judicial notice, and constitutional evidence problems is also addressed. Effective: Fall 2006
Prerequisite:

SKILS 957 Conflict of Laws (3) How do we resolve problems when the substantive law or procedural rules of states or nations conflict? For example, if Hawaii enacts a statute permitting same-sex marriages, must other states recognize such a marriage? If an American-owned factory explodes in India, may the injured pursue claims under American tort law? The Pennsylvania State University
SKILS 959 Mediation (3) This course examines the legal and ethical issues involved in mediation and develops students' skills as mediators and as attorneys representing clients in the process.
Effective: Fall 2004
Prerequisite:

SKILS 960 Negotiation/Mediation (3) This course combines the law and ethics of negotiation, mediation and settlement with economic and psychological bargaining theory and regular hands-on practice in representing clients in negotiation and mediation. Bargaining theory (including distributive and integrative bargaining), relevant socio-psychological research, negotiation and mediation ethics, the law of settlement, and the basics of contract drafting are all introduced. Instruction consists of assigned reading, a series of simulations and exercises (including drafting a resulting contract), written negotiation planning and self-evaluation, feedback, and group discussion.
Effective: Summer 2011

SKILS 962 The U.S. Law of Arbitration (3) This course provides an introduction to the domestic law and practice of arbitration. It assess the statutory and decisional law basis for arbitration, especially the provisions of the Federal Arbitration Act. It investigates the central doctrinal issues in the field: the enforceability of unilaterally-imposed arbitration agreements, the arbitrability of statutory rights - in particular, civil rights matters, and the use of contract to establish the law of arbitration between the arbitrating parties. Emphasis is placed upon practical problems that have emerged in the practice of arbitration law: the selection of arbitrators, the use of discovery and evidence-gathering in arbitral proceedings, and the content of arbitration agreements. The course also addresses the new uses of arbitration in the consumer, health, and employment fields.
Effective: Spring 2010

SKILS 964 Intensive Legal Writing and Drafting (2) This course develops students' skills in common legal writing formats other than memos and briefs. Not intended as a remedial course, this course rather provides an opportunity for students to sharpen legal writing skills with an emphasis on clarity and precision of expression. Weekly writing assignments include a few fully drafted documents (e.g., short will, a short contract, a statute), as well as letters, short pleadings, jury instructions, and other short pieces. Students will concentrate on re-writing and editing their work.
Effective: Summer 2011
Prerequisite:

SKILS 965 Federal Courts (3) This course addresses the relationship of federal courts to administrative agencies and state courts.
Effective: Fall 2005

SKILS 966 Arbitration Workshop (3) The first part is the drafting of arbitral clauses in a variety of circumstantial settings (maritime, labor, commercial, consumer, and employment) in regard to CPR best practices standards and addressing the authority of the arbitrators and the configuration of the arbitral procedure. This process would take several sessions. The second branch would be to view and then construct an arbitration pursuant to one or several of the arbitral clauses. This would require the conduct and architecture of an arbitral trial along with the protocol for its management, both with the arbitrators and the parties. This would take some time as well. Third, the students would be asked to participate in a statutory drafting workshop that reflects their experiences in the two previous branches. They would be asked to evaluate the UNCITRAL Model Law and several national laws of arbitration and arrive at a new and better model law.
Effective: Summer 2011
Prerequisite:

SKILS 967 Federal Court Practice (2) This course introduces contemporary issues in several topical areas of particular interest to litigating in federal courts. The course topics are varied, with the unifying theme being that each topic possesses either particular prominence or exclusive jurisdiction within the country's federal court system. These topics include: the history and organization of the federal courts, the courts' relationship with Congress, the practical dynamics of federal procedure, strategic considerations involved in a litigant's choice of federal court, employment discrimination, federal criminal matters, sentencing, civil rights cases, and habeas.
Effective: Fall 2011

SKILS 968 Written Advocacy and Judicial Opinions (3) The bulk of advocacy is in the form of written submissions to the courts, and the vast majority of judicial decisions are written. In order to advocate effectively, lawyers must communicate their arguments clearly and persuasively to the courts. In order to resolve cases and establish useful precedent, judges must communicate their reasoning clearly and authoritatively. This course will explore both forms of written communication and develop the writing skills associated with each.
Effective: Summer 2012
Prerequisite:

SKILS 970 Law Firm Leadership and Management Skills (2) Introduction to applied behavior analysis in the business setting of legal practice.
Effective: Spring 2010

SKILS 982 Pennsylvania Practice (2) This class will acquaint the student with civil procedure at the state trial court level. Using Pennsylvania as the model, the course traces a civil case from service of process to trial and includes discussion of
venue, pleadings, discovery and dispositive motions. The course also deals with other important aspects of civil practice including statutes of limitation, comparative negligence, compulsory arbitration and settlement.
Effective: Summer 2011

SKILS 983 Writing and Editing for Lawyers (2) The goal of the course is to improve the legal reading, writing, and editing skills of students. The course will reinforce rules of grammar, punctuation, sentence structure, usage, voice, tone, style, and organization. The emphasis will be on the application of these rules in the context of legal writing. Students will learn how to craft sentences that are accurate, brief, clear, precise, and sometimes persuasive.
Effective: Summer 2011
Prerequisite:

SKILS 986 Remedies (3) Remedial devices focusing on the theory and application of legal and equitable relief are analyzed comparatively. The course covers the procedural and substantive law elements of damages, specific performance, injunctions, declaratory judgments, reformation, rescission, and restitution.
Effective: Fall 1998

SKILS 987 Writing Workshop (2) The goal of this course is to improve the legal writing and editing skills of students. By engaging in the process of directed writing and editing, students will learn to write clearly, succinctly, precisely, and sometimes persuasively. Emphasis will be given to organization and integration of procedural and substantive aspects of cases.
Effective: Summer 2011
Prerequisite:

SKILS 988 Legal Problems of Indigents (2) This course is an introduction to law relevant to assisting people in poverty including law addressing public benefits, housing, consumer issues, custody, domestic violence, and private rights of action. It will also address realities of existence for people in poverty and consider historical and policy perspectives. Finally, the course will focus on some practical skills, and students will participate in mock hearings and/or mock interviews.
Effective: Spring 2011

SKILS 997 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2008

SKILS 997A Legal Journalism (2) Instruction and practice in journalistic writing styles will prepare students to contribute to the media as legal analysts or to work as professional journalists covering courts or legal news. Students will learn to write accurate and accessible prose for lay audiences. For legal trade publication work, the emphasis will be on readability and appropriate depth for the professional audience. Students will learn journalistic standards of truth and interviewing techniques. Live broadcast techniques will also be covered.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

Management (MANGT)

MANGT 510 Project Management (3) A problem-based, interdisciplinary course in project management skills and techniques needed to manage projects in a modern business environment.
Effective: Fall 2000
Prerequisite:

MANGT 515 Cost and Value Management (3) A problem-based course that emphasizes project cost control and teaches students to apply techniques to control projects in business.
Effective: Summer 2002
Prerequisite:

MANGT 520 Planning and Resource Management (3) A problem-based course that addresses techniques for planning the project development process, including securing resources and resource management.
Effective: Summer 2002
Prerequisite:

MANGT 525 Commercial Law and Project Procurement (3) A problem-based course that addresses elements of commercial law and procurement practices and their implications for project management.
Effective: Spring 2005
Prerequisite:

MANGT 531 Organizations (3) An examination of organizational theories and processes of organizational behavior.
Effective: Spring 1986

MANGT 535 Interpersonal and Group Behavior (3) A human relations-based course that identifies the significant challenges that managing individuals on project teams represents.
Effective: Summer 2003
Prerequisite:

MANGT 540 Strategy: Corporate, Business and Project (3) A problem-based course that focuses on linking projects to overall corporate strategy.
Effective: Summer 2003
Prerequisite:

MANGT 545 Project Team Leadership (3) This course focuses on development of team leadership skills and the ability to solve team problems related to human interaction.
Effective: Summer 2010
Prerequisite:

MANGT 575 Management of Projects (3) A problem-based capstone course that integrates the themes necessary to appreciate the overall challenge of project management.
Effective: Summer 2003
Prerequisite:

MANGT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

MANGT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

Last Import from UCM: June 2, 2012 12:27 PM
Management (MGMT)

MGMT 400 Organization Development (3) A study of organizational change and methodologies related with change and improvement. Examination of planned change on processes, strategies, people and culture in organizations.
Effective: Spring 2008
Prerequisite:

MGMT 401 Contemporary Issues in Management (3) Advanced treatment of topics of current managerial significance. Issues examined will differ by instructor, section, and semester. Consult departmental office.
Effective: Spring 2008
Prerequisite:

MGMT 402 Experiences in Organizational Relations (3) An experiential approach to study of behavior in organizations, applying concepts and theories of management to interpersonal situations.
Effective: Spring 2008
Prerequisite:

MGMT 409 Project Management for Engineers (3) The course provides a real-time experience to students in engineering and engineering technology in project management with a focus on leadership behavior and decision making.
Effective: Spring 2008
Prerequisite:

MGMT 410 Project Management (3) A problem-based, interdisciplinary course in project management skills and techniques needed to manage projects in a modern business environment.
Effective: Spring 2008
Prerequisite:

MGMT 420 Negotiation and Conflict Management (3) An exploration of the sources of interpersonal conflict and strategies of resolution in the managerial context.
Effective: Fall 2010
Prerequisite:

MGMT 424 Interpersonal Relationships in Organizations (3) Developing individual skills in interpersonal and group settings and experience-based and conceptual training in relating effectively to other people.
Effective: Spring 2008
Prerequisite:

MGMT 425 (IST 425, ENGR 425) New Venture Creation (3) Via problem-based learning, teams define new business ventures to meet current market needs, develop business plans, and present to investors.
Effective: Spring 2011
Prerequisite:

MGMT 426 (ENGR 426, IST 426) Invention Commercialization (3) Working with Penn State inventions selected by the Intellectual Property Office, student teams define an optimum commercialization path each technology.
Effective: Spring 2011
Prerequisite:

MGMT 427 Managing an Entrepreneurial Start-Up Company (3) Exploration of the tensions and experiences of starting and growing a new company.
Effective: Spring 2011
Prerequisite:

MGMT 431 Entrepreneurship and Small Business Management (3) Entrepreneurship, new ventures, and management of small firms.
Effective: Spring 2008
Prerequisite:

MGMT 432 Small Business Field Study (3) Supervised field study with a small firm.
Effective: Spring 2008
Prerequisite:

MGMT 433 Leadership and Team Building (3) Team-based learning approach to developing conceptual knowledge, skills sets, and personal competencies needed for leading and managing organizations.
Effective: Spring 2008
Prerequisite:

MGMT 440 Advanced Human Resource Management (3) In depth study of human resource management and personnel administration functions and processes.
Effective: Spring 2008
Prerequisite:

MGMT 441 Organizational Staffing and Development (3) This course focuses on the skills and methods managers need to manage staffing and development activities in organizations.
Effective: Spring 2011
Prerequisite:

MGMT 443 Performance Management (3) This course focuses on skills and methods managers need to enhance the
contribution of employees to organizational performance and effectiveness.

Effective: Spring 2011

Prerequisite:

MGMT 445 (US) Managing Differences in Organizations (3) This course focuses on developing knowledge and skills for dealing with demographic, functional, occupational and identity-based differences within and among organizations.
Effective: Spring 2008

Prerequisite:

MGMT 450 Labor Management Relations (3) Study of the key concepts and processes involved in current American labor/management relations.
Effective: Spring 2008

Prerequisite:

MGMT 451W Business, Ethics, and Society (3) Advanced examination of social, ethical, legal, economic, equity, environmental, public policy, and political influences on managerial decisions and strategies.
Effective: Spring 2004

Prerequisite:

MGMT 453 Creativity and Innovation (3) Analysis of the process of innovation in organizations and of how creativity and other variables influence the process.
Effective: Summer 2007

Prerequisite:

MGMT 460 (IL) International Management (3) Examines issues of nations and cultures including motivation, communication, negotiation, leadership, ethics and social responsibility, and women in management.
Effective: Spring 2008

Prerequisite:

MGMT 466 Organizational Learning and Knowledge Management (3) Examination of the social processes through which organizations continuously develop, acquire, interpret, and apply information and knowledge for performance enhancement and continuous improvement.
Effective: Spring 2008

Prerequisite:

MGMT 471 Strategic Management (3) Issues that influence the competitive performance of the firm are identified and examined.
Effective: Spring 2004

Prerequisite:

MGMT 471W Strategic Management and Business Policy (3) Study of strategic management and business policy formulation and implementation processes.
Effective: Spring 2008

Prerequisite:

MGMT 475W Strategic Product Development (3) Study of an organization, industry, and evaluation of the introduction to a new product. Preparation of proposal for industry product.
Effective: Summer 2008

Prerequisite:

MGMT 476 Product Realization Capstone (3) Study of an organization, industry, and evaluation of the introduction of a new product. Preparation of proposal for industry product.
Effective: Summer 2008

Prerequisite:

MGMT 483 Compliance and Fairness in Organizations (3) Compliance with employment laws with respect to managing human resources and fair treatment in employer-employee relationships.
Effective: Summer 2007

Prerequisite:

MGMT 489 Seminar in Management (3) A capstone course in management for students of high academic achievement. Emphasis on in-depth research of current interest.
Effective: Spring 2008

Prerequisite:

MGMT 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2003

MGMT 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

MGMT 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008

Prerequisite:

MGMT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an
individual basis and which fall outside the scope of formal courses.
Effective: Fall 1989

MGMT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1989

MGMT 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2003

MGMT 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

MGMT 501 Behavioral Science in Business (3) Application of behavioral science concepts and analytical methods to problems in business organizations. Analysis of administrative behavior and decision making.
Effective: Fall 1989

MGMT 520 Team Facilitation (2) To gain an in-depth understanding of team dynamics and develop skills for facilitating teams to achieve effective performance.
Effective: Summer 2002

MGMT 521 Complex Negotiations (2) Develop concepts and strategies for analyzing and conducting multiparty negotiations.
Effective: Spring 2003

MGMT 523 Organizational Change: Theory and Practice (3) Analysis of research, theory, and practice in dynamics of organizational change. Research literature reviewed for evaluation of concepts and methods.
Effective: Fall 1989

MGMT 528 Seminar in Organizational Behavior (3) Current theoretical and research issues applicable to the study of individual and group behavior within organizational settings.
Effective: Fall 1989

MGMT 531 Strategy Implementation and Organizational Change (2) Assess gap between current organization and that needed to implement new strategy or execute change; identify process for closing gap.
Effective: Summer 2002

MGMT 534 Leadership and Change in Organizations (2) Understanding yourself as a leader, particularly as a leader in organizations and especially a leader of organizations undergoing change.
Effective: Summer 2008

MGMT 535 The Upper Echelons Perspective: Theory and Research (3) To learn to evaluate and conduct research on top executives and their influence on organizational strategy, structure and performance.
Effective: Summer 2004
Prerequisite:

MGMT 538 Seminar in Organization Theory (3) Current theoretical and research issues applicable to the study of design and management of complex organizations.
Effective: Fall 1989

MGMT 539 Seminar in Organizational Social Networks (3) Learn theory, concepts and methods for research on organizational social networks.
Effective: Summer 2004
Prerequisite:

MGMT 541 Human Resource Management (3) An in-depth examination of the strategic planning and implementation of human resource management, including staffing, development, appraisal, and rewards.
Effective: Summer 1990

MGMT 551 Growth and Innovation Strategy (2) Identify opportunities for growth and profitability through technological and organizational innovations and market independently or with strategic partners.
Effective: Summer 2002
Prerequisite:

MGMT 558 Seminar in Organizational Decision Making (3) An in-depth examination of decision making, including bounded rationality, political behaviors, choice and post-decision processes.
Effective: Spring 1990

The Pennsylvania State University
MGMT 561 Global Strategy and Organization (1-3) Course focuses on three major aspects of international business: competitive strategy, organization design, and management processes. Effective: Fall 2008
Prerequisite:

MGMT 565 Power and Influence (2) Provides a pragmatic and ethical framework for analyzing the sources of power in organizations and its effective use. Effective: Summer 2008

MGMT 571 Strategic Management (3) This capstone course provides analysis and application of strategy concepts and techniques in business organizations. Effective: Spring 2002
Prerequisite:

MGMT 573 Corporate Innovation Strategies (3) Survey of managerial issues involved in formulating and implementing a corporate innovation or technology strategy. Effective: Summer 1991

MGMT 578 Seminar in Corporate Strategy (3) Current theoretical and research issues applicable to the study of corporate strategy formulation and implementation. Effective: Fall 1989

MGMT 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 1989

MGMT 591 Organizational Research Design (3) Experience in designing research for organizational science, to maximize the validity of eventual conclusions; methodological choices, constraints, and compromises (tradesoffs). Effective: Summer 2004
Prerequisite:

MGMT 592 Qualitative Research Methods (3) This course provides students with an introduction to and experience with qualitative research methods employed in organizational contexts. Effective: Summer 2004
Prerequisite:

MGMT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1989

MGMT 597 Special Topics (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1989

MGMT 597A Developing Global Leaders: European Management Perspectives (3) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2012 Ending: Summer 2012

MGMT 597B Team Facilitation Team Labs (1) Lab to work with 1st year teams. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MGMT 599 (IL) FOREIGN STUDY--MANAGEMENT (1-12) Full-yime graduate-level foreign study at an overseas institution with whom linkages have been established. Effective: Summer 2005
Prerequisite:

MGMT 601 PH.D. DISSERTATION FULL-TIME (0) NO DESCRIPTION. Effective: Summer 1991

MGMT 602 SUPERVISED EXPERIENCE IN COLLEGE TEACHING (1-3 PER SEMESTER, MAXIMUM OF 6) COURSE INVOLVES SERVING AS A TEACHING ASSISTANT IN A SPECIFIED UNDERGRADUATE COURSE UNDER THE SUPERVISION OF A FACULTY MEMBER, REQUIRES PLANNING, DISCUSSION, AND APPLICATION OF ITS APPROACH. Effective: Spring 1991

MGMT 610 Thesis Research Off Campus (1-15) No description.
MGMT 611 **PH.D. DISSERTATION PART-TIME** (0) NO DESCRIPTION.
Effective: Summer 1991

Last Import from UCM: June 2, 2012 12:27 PM
Management Information Systems (M I S)

M I S 538 Decision Support Systems (3) Analysis of information requirements for planning, decision making, and performance measurement in organizations.
Effective: Spring 2006
Prerequisite:

M I S 539 Management of MIS (3) Organizational issues in managing computer-based information systems.
Effective: Spring 2006
Prerequisite:

M I S 590 Management Information Systems Colloquium (1-3) This seminar will deal with current research areas dealing with the development and management of management information systems within organizations.
Effective: Spring 2006
Prerequisite:

M I S 596 Individual Studies (1-9) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

M I S 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

M I S 599 (IL) Foreign Study--Management and Information Systems (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Management Science and Information Systems (MS&IS)

MS&IS 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1998

MS&IS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1998

MS&IS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1998

MS&IS 599 (IL) Foreign Study--Management Science and Information Systems (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite:
MS&IS 602 Supervised Experience in College Teaching 1-3 per semester/maximum of 6 No description.
Effective: Spring 1998

Last Import from UCM: June 2, 2012 12:27 PM
Management CI (MNGMT)

MNGMT 505 Managing Human Resources (3) Issues in human resource management including recruitment and selection, employee development, performance management, employee and labor relations, and employee safety.
Effective: Spring 2001
Prerequisite:

MNGMT 511 Organizational Behavior (2) Individual and group behavior in organizations; motivation, performance and rewards, job satisfaction, decision processes, conflict resolution; job and organizational design.
Effective: Summer 2004
Prerequisite:

MNGMT 514 Organizational Learning (2) Structural, strategic, technical, and ecological approaches, including institutional, resource dependence, and discontinuous improvement models; evaluating and institutionalizing learning.
Effective: Summer 2004
Prerequisite:

MNGMT 515 (P ADM 515) Labor Management Relations (3) Labor relations issues; collective bargaining agreement, negotiations, and administration; legal framework of collective bargaining; labor relations in larger social context.
Effective: Fall 2011
Prerequisite:

MNGMT 520 Organizational Transformation (3) Treats methods, practices, and theory of organizational empowerment, quality management, process redesign, re-engineering, restructuring, and planned change.
Effective: Spring 2005
Prerequisite:

MNGMT 522 Operations and Supply Chain Management (3) Design, development, management of manufacturing systems in a supply chain context; tools, techniques, and applications at tactical and strategic levels.
Effective: Spring 2005
Prerequisite:

MNGMT 523 Service Operations Management (3) Design, development, and management of service systems. Tools and techniques for non-manufacturing operations at tactical and strategic levels.
Effective: Summer 2004
Prerequisite:

MNGMT 545 Employment Law for Business (3) The regulation of the employer-employee relationship, discrimination in employment, and the employment environment with respect to managing human resources.
Effective: Summer 2004
Prerequisite:

MNGMT 570 Leadership Development (3) Experientially based skill-building for development of managerial and leadership competencies.
Effective: Spring 2012

MNGMT 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2009

MNGMT 596 Individual studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1999

MNGMT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1999

MNGMT 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2007

Last Import from UCM: June 2, 2012 12:27 PM
Manufacturing Sys Eng (MFGSE)

MFGSE 520 **Analytical Techniques in Manufacturing and Design** (3) Applied statistics, QC, SPC, design for experiments, six sigma, design tolerance and process optimization.
Effective: Fall 2000
Prerequisite:

MFGSE 550 **Design for Manufacturability I** (3) Introduction to DFM, a review of enabling technologies and the systematic use of quality tools during the DFM process.
Effective: Fall 2000
Prerequisite:

MFGSE 580 **Masters Project** (1-3) Manufacturing capstone or technology study utilizing both manufacturing and management skills.
Effective: Fall 2000
Prerequisite:

MFGSE 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2000

MFGSE 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2000

Last Import from UCM: June 2, 2012 12:27 PM
Marketing (MKTG)

MKTG 410 Personal Selling (3) Principles underlying the selling process and practical application of these principles to selling situations.
Effective: Spring 2008
Prerequisite:

MKTG 420 Direct Marketing (3) Applies principles of marketing management to the direct marketing of products by mail, telephone, print, and broadcast media.
Effective: Spring 2002
Prerequisite:

MKTG 422 Advertising and Sales Promotion Management (3) Perspectives and models of the key decisions involved in managing advertising and sales promotion campaigns.
Effective: Spring 2008
Prerequisite:

MKTG 426 Business Marketing (3) Developing marketing strategies and programs. The course emphasizes the special nature of the business and organizational markets.
Effective: Spring 2002
Prerequisite:

MKTG 428 Advanced Sales Management (3) Approaches to planning, organizing, staffing, training, directing, and controlling the sales force in support of marketing objectives.
Effective: Spring 2008
Prerequisite:

MKTG 435 Marketing and Society (3) Analysis of marketing's impact on and obligation to social and environmental issues, marketing and ethics, and the regulation of marketing.
Effective: Spring 2002
Prerequisite:

MKTG 437 Advanced Retailing and Merchandise Management (3) Analyzing planning and controlling the retail merchandising effort, including procurement, resource selection, vendor relations, product presentation, inventory control.
Effective: Spring 2002
Prerequisite:

MKTG 440 Services Marketing (3) Marketing theory and methods applied to profit and nonprofit service industries such as health care, finance, transportation, tourism, arts and consulting.
Effective: Spring 2002
Prerequisite:

MKTG 443 Sports Marketing (3) This course will focus on how companies develop, execute and measure marketing strategies and tactics to use sports teams, families, leagues and other organizations to market their products and services domestically and internationally to consumers and business partners. The course will examine the marketing strategies employed by sports teams and leagues.
Effective: Summer 2010
Prerequisite:

MKTG 445 (IL) Global Marketing (3) Role of international marketing in the global environment; political, economic, geographic, historical, cultural conditions; developing and implementing international marketing strategies.
Effective: Spring 2008
Prerequisite:

MKTG 450W Marketing Strategy (3) Market-oriented problems of the firm; identification and selection of market opportunities; formulation of competitive strategies; marketing policies and programs.
Effective: Spring 2008
Prerequisite:

MKTG 475 Innovation and Product Management (3) This course is an application-oriented interdisciplinary course on new product development concepts, and innovation management.
Effective: Spring 2011
Prerequisite:

MKTG 476 Sales Management (3) Application of modern management principles to field sales force planning, organization, and administration; selection, training, and compensation plans.
Effective: Spring 2008
Prerequisite:

MKTG 478 Services Marketing Management (3) Conceptual understanding of services and the analytical tools that are used in solving strategic services marketing problems.
Effective: Spring 2008
Prerequisite:

MKTG 485 Business-to-Business Marketing (3) Application of marketing principles to commercial enterprises, industrial
firms, government, and other non-profit institutions.
Effective: Spring 2008
Prerequisite:

MKTG 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2003

MKTG 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2003

MKTG 495 Internship (1-18) Supervised off campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008
Prerequisite:

MKTG 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

MKTG 496A Analyzing the Changing Role of Women Overtime (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MKTG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

MKTG 497A Non-Profit and Public Marketing (3) To apply marketing principles to services and programs offered in public and non-profit settings. To understand the dynamics of social marketing campaigns to achieve public sector initiatives. To explore how businesses can work with non-profits in an effective manner to achieve mutual goals.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

MKTG 497B Sustainability for Consumers, Firms, and Societies (3) This course will introduce the audience to the role of sustainability in business, such as innovation.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MKTG 497C Sports Business (3) This course explores how the sports business operates. The class teaches students the business operations of teams, leagues, agencies and media companies including cable, wireless and digital. Both traditional and new marketing and revenues will be studied including products, promotion, pricing, distribution, and single revenue and revenue-sharing models. Sports business activities are included through instructor presentations, dialogue, student study of media coverage and reading a sports business trade journal. Student presentations will be created based on current sports business topics.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

MKTG 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2003

MKTG 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

MKTG 500 Marketing Management (3) Development of a marketing management focus, including market analysis, competition analysis, and decisions in pricing, product, promotion, and distribution channels.
Effective: Spring 2002
Prerequisite:

MKTG 512 Consumer and Market Behavior (3) Application of buyer behavior concepts from the behavioral sciences, including utility, culture, life cycle, personality, attitudes, learning, decision making.

The Pennsylvania State University
MKTG 513 Market Research (3) User-oriented analysis of marketing research process, including problem definition, design, data collection, data analysis, interpretation, and presentation.

MKTG 515 Business Marketing (3) Study of marketing of goods and services to business, institutions, and government. Focus on organizational buying, market planning and analysis, and development of marketing mix.

MKTG 516 Product Development and Management (3) Marketing and product strategies for new and old products are covered in this course.

MKTG 518 Global Marketing (3) Role of international marketing in the global business environment; development of marketing plans and implementation strategies under differing socio-economic conditions.

MKTG 521 Scientific Marketing Analysis and Implementation (2) An introduction to the tools used, rationale for, and the practice and implementation of a variety of current marketing techniques.

MKTG 532 Brand Management (2) To examine and understand the processes of building, designing, measuring, and maintaining brand equity.

MKTG 533 Business Marketing (2) Study of marketing of goods and services to business, institutions, and government.

MKTG 534 Integrated Market Communications (2) Provides the frameworks for thinking, tools, language, and skills for strategic management of integrated market communications.

MKTG 541 Consumer Behavior (2) Introduce theories and concepts from psychology, sociology, economics, and other disciplines that are useful in understanding and marketing to consumers.

MKTG 542 New Product Development and Management (2) Identify business opportunity, understand potential customer needs, and develop a new product from concept to virtual prototype.

MKTG 543 (EBIZ 543) e-Marketing (2) Using the Internet and related technologies to enhance and transform marketing functions and processes.

MKTG 551 Theoretical Perspectives on Buyer Behavior (3) Review of marketing and social sciences research related to understanding consumer and market behavior.

MKTG 554 Research Methods in Marketing (3) Philosophical, methodological, and measurement issues involved in designing, conducting, analyzing, and interpreting research in marketing.

MKTG 555 Marketing Models (3) Topics in the model building approach to marketing decision making, focusing on current research issues.

MKTG 556 Marketing Management (3) To explore the conceptual and applied dimensions of marketing management.

MKTG 571 Marketing Strategy (2) Examines business-level marketing issues and solutions to problems in competitive business environments.
MKTG 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2008

MKTG 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

MKTG 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

MKTG 597A **Sustainable Marketing** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MKTG 597A **Empirical Economics Models for Marketing Management** (3) Recognizing strategic interactions among firms, this course will focus on empirical models (i.e., structural) for these strategic interactions (i.e., game theory) with emphases on topics important for marketing management. Specific models include demand models, static game models, and dynamic game models. Emphases would be both on development and estimation of these models.

MKTG 599 (IL) **Foreign Study--Marketing** (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite:

MKTG 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

MKTG 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 1983

MKTG 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description available.
Effective: Fall 1982

MKTG 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Marketing-Bd (MRKTG)

MRKTG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

MRKTG 597 special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

Last Import from UCM: June 2, 2012 12:27 PM
Marketing-Cl (MRKT)

MRKT 513 Marketing Management: Structures and Processes (2) This course examines concepts, techniques, and developments of strategic marketing plans and programs within domestic and international market environments. Effective: Summer 2004
Prerequisite:

MRKT 514 Marketing Management: Relationships and Institutions (2) Examination of relationships formation with customers and distribution channels; traditional and on-line marketing issues. Effective: Summer 2004
Prerequisite:

MRKT 570 Marketing Strategy and Planning (3) Analysis of management's marketing problems, including marketing analyses, pricing, channels of distribution, promotion, competition, product strategies, and marketing research. Effective: Spring 2011
Prerequisite:

MRKT 571 Consumer Behavior (3) Factors influencing buyer behavior; contributions of the behavioral sciences to the study of selected phenomena. Effective: Spring 2005
Prerequisite:

MRKT 572 Marketing Research (3) Management information needs, evaluation of research proposals and findings, methods of data collection and analysis, integration of research and decisions. Effective: Spring 2005
Prerequisite:

MRKT 585 Business-to-Business Marketing (3) Marketing of products and services to other businesses and organizations including strategy, planning, research, communications, pricing, distribution, and global issues. Effective: Spring 2005
Prerequisite:

MRKT 586 Internet Marketing (3) Concepts, techniques, and applications of Internet marketing; buyer behavior; Web site design; marketing plans; legal, ethical, and international environments. Effective: Summer 2004
Prerequisite:

MRKT 587 Global Marketing (3) Exploration of strategic marketing planning concepts and techniques from a global perspective within diverse overseas market environments. Effective: Spring 2005
Prerequisite:

MRKT 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 2009

MRKT 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1999

MRKT 597 Special topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 1999

Last Import from UCM: June 2, 2012 12:27 PM
Materials (MATL)

MATL 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1992

MATL 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1992

MATL 597 Special Topics (1-9) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1991

MATL 600 Thesis Research (1-15) No description.
Effective: Spring 1992

MATL 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1992

MATL 602 SUPERVISED EXPERIENCE IN COLLEGE TEACHING (1-3 PER SEMESTER, MAXIMUM OF 6) NO DESCRIPTION.
Effective: Summer 1991

MATL 610 Thesis Research Off Campus (1-15) No description.
Effective: Spring 1992

MATL 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 1992

Last Import from UCM: June 2, 2012 12:27 PM
Materials Science and Engineering (MATSE)

MATSE 400 Crystal Chemistry (3) Principles of crystal chemistry applied to structures, structural defects and properties of organic, inorganic, intermetallic, and metallic crystals. Effective: Summer 2007
Prerequisite:

MATSE 401 Thermodynamics of Materials (3) Review of equilibrium thermodynamics and applications to metallurgical and material systems. Effective: Summer 2007 Ending: Summer 2012
Prerequisite:

MATSE 401 Thermodynamics of Materials (3) Review of equilibrium thermodynamics and applications to metallurgical and material systems. Effective: Fall 2012 Future: Fall 2012
Prerequisite:

Prerequisite:

MATSE 402 Materials Process Kinetics (3) A treatment of process kinetics including chemical reaction kinetics and momentum, energy and mass transport. Effective: Fall 2012 Future: Fall 2012
Prerequisite:

MATSE 403 (BIOE 443) Biomedical Materials (3) Describe properties of materials and composites and their in vivo interactions. Effective: Spring 2007
Prerequisite:

MATSE 404 (IL) (BIOE 444) Surfaces and the Biological Response to Materials (3) Focus is on the special properties of surfaces as an important causative and mediating agent in the biological response to materials. Effective: Summer 2007
Prerequisite:

Prerequisite:

MATSE 410 Phase Relations in Materials Systems (3) Phase rule; construction and interpretations of equilibrium diagrams; importance of nonequilibrium in materials. Effective: Fall 2006
Prerequisite: Concurrent: MATSE 201 MATSE 400 MATSE 430

MATSE 411 Processing of Ceramics (3) Principles of ceramic processing, including powder preparation and characterization, forming operations, and the basic phenomena underlying these operations. Effective: Fall 2005
Prerequisite:

MATSE 412 Thermal Properties of Materials (3) Generation of high temperatures, measurement of temperature, heat transfer and furnace design, thermal stability of ceramic materials, applied thermodynamics. Effective: Fall 2005
Prerequisite: Concurrent: MATSE 401

MATSE 413 Solid-State Materials (3) Structures of metallic, ionic, and covalent solids, amorphous materials, and surfaces; electronic structure; electronic properties of solids and their manipulation. Effective: Spring 2001
Prerequisite:

MATSE 415 Introduction to Glass Science (3) Composition, melting, fabrication, properties, and uses of glass; combinations of glass with metals and other materials. Effective: Summer 2002
Prerequisite:

MATSE 417 (E SC 417) Electrical and Magnetic Properties (3) Electrical conductivity, dielectric properties, piezoelectric and ferroelectric phenomena; magnetic properties of ceramics. Effective: Spring 2007
Prerequisite:

MATSE 419 Computational Materials Science and Engineering (3) Introduction to computational material science and engineering. Overview of the computational methods for materials, from atomistic to the continuum scale. Effective: Spring 2012
Prerequisite:
MATSE 421 Corrosion Engineering (3) Industrial forms of corrosion and preventive methods, and their description in terms of basic thermodynamic and kinetic considerations.
   Effective: Summer 2007
   Prerequisite:

MATSE 422 Thermochemical Processing (3) Physico-chemical aspects of high temperature extraction and processing of metals and alloys. Design and evaluation of processes and process options.
   Effective: Summer 2002
   Prerequisite:

MATSE 424 Materials Selection and Design (1) Introduction to the selection and design of materials for structural applications.
   Effective: Summer 2002
   Prerequisite:

MATSE 425 Processing of Metals (3) Modern methods of shaping metals in liquid and solid states: casting, joining, powder and deformation processing. Design of new technology.
   Effective: Fall 2006
   Prerequisite:

MATSE 426 (MN PR 426) Aqueous Processing (3) A study of the chemical and engineering principles pertinent to metal processing in aqueous systems: hydrometallurgical extraction, plating, materials preparation.
   Effective: Fall 2009
   Prerequisite:

MATSE 430 Materials Characterization (3) Elements of crystallography and the characterization of crystalline and non-crystalline materials using x-ray diffraction, electron microscopic, and other instrumental techniques.
   Effective: Spring 2001
   Prerequisite:

   Effective: Spring 1996
   Prerequisite:

MATSE 436 Mechanical Properties of Materials (3) Fundamental relationships between structure and mechanical behavior of materials.
   Effective: Summer 2002 Ending: Summer 2012
   Prerequisite:

MATSE 440 (E MCH 440) Nondestructive Evaluation of Flaws (3) Methods and limitations of nondestructive evaluation of mechanical flaws; optical, acoustical, electromagnetic, x-ray, radiography, thermography, and dye techniques.
   Effective: Spring 2008
   Prerequisite:

MATSE 441 Polymeric Materials I (3) Manufacture of industrially significant polymers together with discussion of their major chemical, physical, and mechanical properties.
   Effective: Summer 2007 Ending: Summer 2012
   Prerequisite:

MATSE 441 Polymeric Materials I (3) Manufacture of industrially significant polymers together with discussion of their major chemical, physical, and mechanical properties.
   Effective: Fall 2012 Future: Fall 2012
   Prerequisite:

MATSE 443 Introduction to the Materials Science of Polymers (3) Introduction to the nature and structure of high polymers. Characteristics of polymers and polymer systems.
   Effective: Summer 2007 Ending: Summer 2012
   Prerequisite:

MATSE 443 Introduction to the Materials Science of Polymers (3) Introduction to the nature and structure of high polymers. Characteristics of polymers and polymer systems.
   Effective: Fall 2012 Future: Fall 2012
   Prerequisite:

   Effective: Spring 2003
   Prerequisite:

MATSE 445 Thermodynamics, Microstructure, and Characterization of Polymers (3) The properties of individual polymer chains. Theoretical and experimental techniques pertaining to the characterization of polymeric microstructure.
   Effective: Fall 2002
   Prerequisite:

MATSE 446 Mechanical and Electrical Properties of Polymers and Composites (3) The mechanical (viscoelastic) and
electric properties of polymers and poly-based composites.

Effective: Spring 2003
Prerequisite:

MATSE 447 **Rheology and Processing of Polymers** (3) This course deals with the fluid mechanics, rheology, and processing of polymeric materials.
Effective: Fall 2002
Prerequisite:

MATSE 448 (CH E 442) **Polymer Processing Technology** (3) Basic principles of polymer melt processing are reviewed and subsequently applied to the most important industrial processing operations.
Effective: Spring 2006
Prerequisite:

MATSE 450 (E SC 450) **Synthesis and Processing of Electronic and Photonic Materials** (3) The materials science of applying thin film coatings, etching, and bulk crystal growth; includes materials transport, accumulation, epitaxy, and defects.
Effective: Fall 2005
Prerequisite:

MATSE 455 **Properties and Characterization of Electronic and Photonic Materials** (3) Materials characterization in general; electrical properties of crystals, contacts, films; optical properties of single phase materials, waveguide, and multilayer stacks.
Effective: Fall 2005
Prerequisite:

MATSE 460 **Introductory Laboratory in Materials** (1) An introduction to comparative physical properties and characteristics of various materials including mechanical, electrical thermal, and structure/morphology.
Effective: Spring 2001
Prerequisite:

MATSE 462 **General Properties Laboratory in Materials** (1) An introduction to comparative physical properties of various materials including mechanical, thermal electrical properties and the measurement of said properties.
Effective: Spring 2005
Prerequisite:

MATSE 463 **Characterization and Processing of Electronic and Photonic Materials Laboratory** (1) Provides experience with key processing methods for EPM materials and advanced characterization methods for EPM materials and simple device structures.
Effective: Spring 2009
Prerequisite: Concurrent: MATSE 450 MATSE 455

MATSE 468 **Ceramics Laboratory III** (1) Ceramic processing and powder characteristics.
Effective: Spring 2009
Prerequisite:

MATSE 471 **Metallurgy Laboratory I** (1) A laboratory integrating experimental aspects of material contained in MATSE 402, 413, and 410, e.g. phase diagram determination, solidification micro-structures, etc.
Effective: Fall 2005
Prerequisite:

MATSE 472 **Metallurgy Laboratory II** (1) Application of principles of mechanical metallurgy, pyroprocessing, corrosion and metal processing.
Effective: Fall 2006
Prerequisite:

MATSE 473 **Polymeric Materials Laboratory--Synthesis** (1) Principles and practices of polymerization, including condensation, free radical (bulk, solution, suspension, emulsion), ionic, and Zeigler-Natta procedures.
Effective: Spring 2003
Prerequisite:

MATSE 474 **Polymeric Materials Laboratory--Characterization** (1) Principles and practices involved in determination of properties, structure and morphology, employing thermal, mechanical, spectroscopic, viscometric and computer techniques.
Effective: Spring 2003
Prerequisite:

MATSE 475 (E SC 475) **Particulate Materials Processing** (3) Fundamentals of processing particulate materials including production, characterization, handling, compaction, and sintering of metal, carbide, intermetallic, and composite powders.
Effective: Spring 2008
Prerequisite:

MATSE 483 (E SC 483) **Simulation and Design of Nanostructures** (3) Introduction to computer simulation techniques and their applications at the physical/life sciences interface.
Effective: Fall 2007
Prerequisite:

MATSE 484W (IL) **International Internship in Materials: Research Definition and Methodology** (3) A course focused on international research, specific design and methodology, facilitated through the International Internship in Materials and Program.

---

The Pennsylvania State University
Effective: Summer 2006
Prerequisite:

MATSE 485W (IL) **International Internship in Materials: Experimentation and Documentation** (3) A course focused on international research, specifically experimentation and documentation, facilitated through the International Internship in Materials Program.
Effective: Summer 2006
Prerequisite:

MATSE 492W **Materials Engineering Methodology and Design** (3) Designed to familiarize students with the literature and technology developments in the use of, and design with, materials in industrial applications.
Effective: Fall 2005
Prerequisite:

MATSE 493W **Materials Science and Engineering Multidisciplinary Capstone Design Project** (3) This course focuses on multidisciplinary industry-sponsored and community service-based design projects offered in conjunction with the College of Engineering’s Learning Factory.
Effective: Summer 2012
Prerequisite:

MATSE 494M **Research and Design Senior Project** (1-3) Continuation of a research problem in materials culminating in a bound thesis describing the work.
Effective: Fall 2007

MATSE 494W **Research and Design Senior Project** (1-3) Continuation of a research problem in materials culminating in a bound thesis describing the work.
Effective: Spring 2006

MATSE 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1994

MATSE 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1994

MATSE 497A **Microstructure Design of Structural Metals** (3) Understanding the physical metallurgy principles of steel, titanium, and aluminum, and using this knowledge for alloy selection and design.

MATSE 497B **Materials Sustainability and the Environment** (3) The goal of this course is to educate students about the process of LCA, used as a problem solving tool, in the context of the history of environmental movements and legislation and the availability of resources to create materials and useful products in a sustainable manner.

MATSE 497C **Materials Science and Engineering Multidisciplinary Capstone Design Project** (3) This course focuses on multidisciplinary industry-sponsored and community service-based design projects offered in conjunction with the College of Engineering’s Learning Factory.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

MATSE 497C **Materials Science and Engineering Multidisciplinary Capstone Design Project** (3) This course focuses on multidisciplinary industry-sponsored and community service-based design projects offered in conjunction with the College of Engineering’s Learning Factory.
Prerequisite:

MATSE 501 **Thermodynamics of Materials** (3) Application of thermodynamics to materials equilibria and processes, including solution theory, electrochemical processes, capillarity, and the effect of stresses.
Effective: Spring 2004
Prerequisite:

MATSE 503 **Kinetics of Materials Processes** (3) Introduction to application of transition state theory and mass transfer to the kinetics of materials and mineral processes.
Effective: Summer 2007
Prerequisite:

MATSE 505 **Irreversible and Statistical Thermodynamics of Materials** (3) Introduction to statistical and irreversible thermodynamics as applied to chemical and materials systems.
Effective: Spring 2007
Prerequisite:

MATSE 506 **Interfacial Electrochemical Processes** (3) Survey of thermodynamic and kinetic fundamentals of electrochemical processes at interfaces.
Effective: Spring 2006
MATSE 507 (BIOE 517) **Biomaterials Surface Science** (3) Special properties of surfaces as an important causative and mediating agent in the biological response to materials.  
Effective: Fall 2003

MATSE 508 (BIOE 508) **Biomedical Materials** (3) Properties and methods of producing metallic, ceramic, and polymeric materials used for biomedical applications.  
Effective: Spring 2003

MATSE 511A **Powder X-Ray Diffraction** (1) Compound identification, lattice parameter measurement, and other applications of the powder diffraction method.  
Effective: Spring 2012

MATSE 511B (GEOSC 511B) **Transmission Electron Microscopy** (1) Principles and practice of transmission electron microscope operation. Students undertake individual projects.  
Effective: Spring 2005

MATSE 511E **Scanning Electron Microscopy** (1) Principles and practice of scanning electron microscope operation. Students undertake individual projects.  
Effective: Spring 2012

MATSE 511G **Analytical Electron Microscopy** (1) Modern analytical electron microscope techniques: scanning transmission electron microscopy; electron energy loss spectroscopy; energy dispersive analysis of x-rays.  
Effective: Spring 2012  
Prerequisite:

MATSE 512 (GEOSC 512) **Principles of Crystal Chemistry** (3) Relation of structure to ionic size and nature; influence of pressure and temperature on structure; chemical-structural defects, crystalline solutions, phase-transitions.  
Effective: Spring 2004

MATSE 514 **Characterization of Materials** (3) Classical and new (microprobe, scanning microscope, magnetic resonance, and Mossbauer) techniques for the characterization of composition, structure, defects, and surfaces.  
Effective: Fall 2003

MATSE 518 **Wetting Properties of Materials: Theory and Practice** (3) Fundamentals of water wetting phenomenon are developed with special emphasis on thermodynamics of absorption and adhesion.  
Effective: Summer 2004

MATSE 523 (NUC E 523) **Environmental Degradation of Materials in Nuclear Power Plants** (3) Degradation of materials performance when exposed to the combination of high temperature, neutron irradiation, and aggressive electrochemistry found in nuclear reactors.  
Effective: Spring 2011  
Prerequisite:

MATSE 530 **X-Ray Crystallography and Diffraction** (3) Reciprocal lattices and the Ewald sphere construction; crystal structure determination by powder and single crystal techniques; space groups.  
Effective: Fall 2003  
Prerequisite:

MATSE 531 **Transmission Electron Microscopy** (3) Diffraction pattern analysis and simple contrast theory applied to the structures of materials; analytical techniques in the microscope.  
Effective: Fall 2003

MATSE 535 **Geometrical Crystallography** (3) Derivation of lattices, types, point groups, and space groups; and group theory applied to crystallography and spectroscopy.  
Effective: Spring 2003

MATSE 540 **Crystal Anisotropy** (3) Symmetry aspects of crystals and physical properties. Matrix and tensor methods.  
Effective: Spring 2003  
Prerequisite:

MATSE 542 **Polymeric Materials: The Solid State** (3) Introduction to the fundamental concepts necessary to understand solid state structure and properties of polymer materials.  
Effective: Summer 2004  
Prerequisite:

MATSE 543 (CHEM 543) **Polymer Chemistry** (3) This graduate course discusses recent advances in polymer chemistry that leads to new polymeric materials with interesting structures and properties.  
Effective: Spring 2005  
Prerequisite:
MATSE 544 Computational Materials Science of Soft Materials (3) Pursue applications of computational modeling methods to soft materials; explore use of these methods to different research areas.
Effective: Summer 2009

MATSE 547 Thermophysical Properties of Ceramics (3) Heat capacity, heat of fusion, thermal conductivity, and thermal expansion in relation to macroscopic measurements and basic atomic concepts applied to ceramic materials.
Effective: Spring 2003

MATSE 548 Dielectric and Other Electroceramics (3) Preparation and properties of ceramic semiconductors, dielectrics, and magnetic materials.
Effective: Spring 2003

MATSE 552 Sintering of Ceramics (3) Design and interpretation of ceramic microstructures through an understanding of the physics and chemistry of sintering and grain growth.
Effective: Spring 2003
Prerequisite:
MATSE 555 (PHYS 555) Polymer Physics I (3) Introduction to the fundamental concepts needed to understand the physics applicable to polymer melts, solutions and gels.
Effective: Spring 2006

MATSE 560 (MN PR 507) Hydrometallurgical Processing (3) Fundamental physico-chemical factors underlying the aqueous extraction and recovery of metals and nonmetals from ores, minerals, and scrap metal.
Effective: Fall 2003
Prerequisite:
MATSE 561 Metal Electrode Reactions (2-3) Evaluation of electrode reaction mechanisms and kinetics at metal/electrolyte interfaces relevant to corrosion and industrial electrolyte processes.
Effective: Spring 2003
Prerequisite:
MATSE 562 Solid to Solid Phase Transformations (3) Mechanisms and rate-determining factors in solid-phase reactions in metals; diffusion processes, nucleation theory, precipitations from solid solution, eutectoid decomposition and order-disorder phenomena.
Effective: Spring 2003

MATSE 563 (E MCH 534) Micromechanisms of Fracture (3) Mechanisms of fracture and their relationship to loading conditions, environment, flow behavior, processing history, and microstructure.
Effective: Spring 2003
Prerequisite:
MATSE 564 (E MCH 535) Deformation Mechanisms in Materials (3) Deformation of crystalline/amorphous solids and relationship to structure; elastic, viscoelastic and plastic response over a range of temperatures and strain rates.
Effective: Fall 2004
Prerequisite:
MATSE 565 Metals in Electronics (3) Processing and performance of metals in electronics, covering electrical resistivity, metal film deposition, metal/semiconductor contacts, interconnects, and electronic packaging.
Effective: Summer 2002

MATSE 570 (EME 570) Catalytic Materials (3) Preparation and characterization of solid catalytic materials and the relationships between their surface, defect, and electronic properties and catalytic activity.
Effective: Fall 2008
Prerequisite:
MATSE 575 Functional Polymeric Materials (3) In-depth discussions of structure/property relationships in functional polymers and modern concepts of polymerization methods.
Effective: Spring 2006

MATSE 580 Computational Thermodynamics (3) The integration of fundamental principles and advanced computational approaches in the thermodynamics of materials, including hands-on computation, theory and application.
Effective: Summer 2007
Prerequisite:
MATSE 581 Computational Materials Science II: Continuum, Mesocale Simulations (3) This course will focus on computational techniques and fundamentals of phase transformation simulations on the continuum, mesocale level.
Effective: Spring 2008
Prerequisite:
MATSE 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2004
MATSE 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2004

MATSE 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 2003

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MATSE 597A Surface Characterization (3) This course studies physical and chemical principles as well as applications of characterization techniques widely used in surface science and nanotechnology.

MATSE 597B Quantum Mechanics for Material Scientist and Engineers (3) Introduction to the concepts of quantum mechanics and application to problems in materials and engineering sciences.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MATSE 597D (EGEE 597D) Nanoscale Energy and Environmental Engineering (3) The course will cover the synthesis, characterization and applications of nanomaterials to energy generation, storage, conversion, conservation, control and environmental engineering. Selected topics in nanomaterial toxicity and nanomedicine will be included.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MATSE 597D Professional Development (1) Professional principles in the conduct and ethics of research management, research dissemination/publication, and intellectual property.

MATSE 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 2003

MATSE 600 Thesis Research (1-15) No description.
Effective: Spring 2004

MATSE 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 2004

MATSE 602 Supervised experience in college teaching (1-3 per semester/maximum of 6) Supervised assistance with the teaching program in metallurgy.
Effective: Spring 2004

MATSE 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 2007

MATSE 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2008

Last Import from UCM: June 2, 2012 12:27 PM
Mathematical Sciences (MA SC)

MA SC 505 **Concrete Mathematics** (3) Topics in discrete mathematics, discrete probability, first order logic and models of computation.
Effective: Spring 2007 Ending: Fall 2012
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Mathematics (MATH)

MATH 401 Introduction to Analysis I (3) Review of calculus, properties of real numbers, infinite series, uniform convergence, power series. Students who have passed Math. 403 may not schedule this course.
Effective: Fall 1983
Prerequisite:

MATH 403 Classical Analysis I (3) Topology of R^n, compactness, continuity of functions, uniform convergence, Arzela-Ascoli theorem in the plane, Stone-Wierstrass theorem.
Effective: Spring 1996
Prerequisite:

MATH 403H Honors Classical Analysis I (3) Development of a thorough understanding and technical mastery of foundations of classical analysis in the framework of metric spaces.
Effective: Spring 2010
Prerequisite:

MATH 404 Classical Analysis II (3) Differentiation of functions from R^n to R^m, implicit function theorem, Riemann integration, Fubini's theorem, Fourier analysis.
Effective: Fall 1985
Prerequisite:

MATH 405 Advanced Calculus for Engineers and Scientists I (3) Vector calculus, linear algebra, ordinary and partial differential equations. Students who have passed MATH 411 or 412 may not take this course for credit.
Effective: Spring 1994
Prerequisite:

MATH 406 Advanced Calculus for Engineers and Scientists II (3) Complex analytic functions, sequences and series, residues, Fourier and Laplace transforms. Students who have passed MATH 421 may not take this course for credit.
Effective: Spring 1994
Prerequisite:

MATH 408 Advanced Calculus (3) Differential and integral calculus of functions of several variables, line and surface integrals, infinite series, series of functions, power series.
Effective: Spring 2007
Prerequisite:

MATH 411 Ordinary Differential Equations (3) Linear ordinary differential equations; existence and uniqueness questions; series solutions; special functions; eigenvalue problems; Laplace transforms; additional topics and applications.
Effective: Fall 1983
Prerequisite:

MATH 412 Fourier Series and Partial Differential Equations (3) Orthogonal systems and Fourier series; derivation and classification of partial differential equations; eigenvalue function method and its applications; additional topics.
Effective: Spring 2009
Prerequisite:

MATH 414 (STAT 414) Introduction to Probability Theory (3) Probability spaces, discrete and continuous random variables, transformations, expectations, generating functions, conditional distributions, law of large numbers, central limit theorems. Students may take only one course from MATH(STAT) 414 and 418 for credit.
Effective: Fall 2001
Prerequisite:

MATH 415 (STAT 415) Introduction to Mathematical Statistics (3) A theoretical treatment of statistical inference, including sufficiency, estimation, testing, regression, analysis of variance, and chi-square tests.
Effective: Fall 1989
Prerequisite:

Effective: Spring 1984
Prerequisite:

Effective: Spring 2009
Prerequisite:

MATH 418 (STAT 418) Introduction to Probability and Stochastic Processes for Engineering (3) Introduction to probability axioms, combinatorics, random variables, limit laws, and stochastic processes. Students may take only one course from MATH(STAT) 414 and 418 for credit.
Effective: Fall 2011
Prerequisite:

MATH 419 (PHYS 419) Theoretical Mechanics (3) Principles of Newtonian, Lagrangian, and Hamiltonian mechanics of
particles with applications to vibrations, rotations, orbital motion, and collisions.
Effective: Spring 2007
Prerequisite:

MATH 421 Complex Analysis (3) Infinite sequences and series; algebra and geometry of complex numbers; analytic functions; integration; power series; residue calculus; conformal mapping, applications.
Effective: Summer 1993
Prerequisite:

MATH 422 Wavelets and Fourier Analysis: Theory and Applications (3) Fundamental mathematical issues of the theory of wavelets for senior undergraduate and graduate students in mathematics, engineering, physics, and computer science.
Effective: Summer 2000
Prerequisite:

MATH 425 Introduction to Operations Research (3) Nature of operations research, problem formulation, model construction, deriving solution from models, allocation problems, general linear allocation problem, inventory problems.
Effective: Spring 2012
Prerequisite:

MATH 426 Introduction to Modern Geometry (3) Plane and space curves; space surfaces; curvature; intrinsic geometry of surfaces; Gauss-Bonnet theorem; covariant differentiation; tensor analysis.
Effective: Spring 1994
Prerequisite:

MATH 427 Foundations of Geometry (3) Euclidean and various non-Euclidean geometries and their development from postulate systems. Students who have passed MATH 427 may not schedule MATH 471.
Effective: Spring 1994
Prerequisite:

MATH 428 Geometry for Teachers (1) Research in mathematics education using ideas from Euclidean and non-Euclidean geometry. Students who have passed MATH 471 may not schedule MTHBD 478.
Effective: Spring 2007
Prerequisite:

Effective: Spring 1994
Prerequisite:

MATH 430 Linear Algebra and Discrete Models I (3) Vector spaces, linear transformations, matrices determinants, characteristic values and vectors, systems of linear equations, applications to discrete models.
Effective: Spring 2010
Prerequisite:

MATH 431 Linear Algebra and Discrete Models II (3) Vector spaces and linear transformations, matrices, determinants, characteristics values and vectors, systems of linear equations, applications to discrete models.
Effective: Spring 2007
Prerequisite:

MATH 435 Basic Abstract Algebra (3) Elementary theory of groups, rings, and fields. Students who have passed MATH 435 may not schedule MATH 470.
Effective: Fall 1983
Prerequisite:

MATH 435 Basic Abstract Algebra (3) Elementary theory of groups, rings, and fields. Students who have passed MATH 435 may not schedule MATH 470.
Effective: Spring 2010
Prerequisite:

MATH 436 Linear Algebra (3) Vector spaces and linear transformations, canonical forms of matrices, elementary divisors, invariant factors; applications. Students who have passed MATH 436 may not schedule MATH 441.
Effective: Fall 1983
Prerequisite:

MATH 437 Algebraic Geometry (3) Study of curves in the plane defined by polynomial equations p(x,y)= 0. Projective equivalence, singular points, classification of cubics.
Effective: Spring 2009
Prerequisite:

MATH 441 Matrix Algebra (3) Determinants, matrices, linear equations, characteristic roots, quadratic forms, vector spaces. Students who have passed Math 436 may not schedule this course.
Effective: Fall 1985
Prerequisite:

MATH 444 Mathematical Statistics and Applications I (3) Distributions of random variables, special distributions, limiting distributions, sampling, statistical inference, point and interval estimation, orthogonal polynomials, and least squares.
Effective: Spring 2007
Prerequisite:

MATH 445 Mathematical Statistics and Applications II (3) Further topics in point estimation, statistical hypotheses,
MATH 446 Introduction to Applied Statistics I (3) Descriptive statistics, probability theory, discrete and continuous probability distributions, statistical inferences for means and proportions.
Effective: Spring 2007
Prerequisite:

MATH 447 Introduction to Applied Statistics II (3) Regression, correlation, analysis of variance, contingency tables, nonparametric methods, time series, index numbers.
Effective: Spring 2007

MATH 449 Applied Ordinary Differential Equations (3) Differential and difference equations and their application to biology, chemistry, and physics; techniques in dynamical systems theory.
Effective: Spring 2007
Prerequisite:

MATH 450 Mathematical Modeling (3) Constructing mathematical models of physical phenomena; topics include pendulum motion, polymer fluids, chemical reactions, waves, flight, and chaos.
Effective: Spring 2007
Prerequisite:

MATH 451 (CMPSC 451) Numerical Computations (3) Algorithms for interpolation, approximation, integration, nonlinear equations, linear systems, fast FOURIER transform, and differential equations emphasizing computational properties and implementation. Students may take only one course for credit from MATH 451 and 455.
Effective: Spring 2008
Prerequisite:

MATH 455 (CMPSC 455) Introduction to Numerical Analysis I (3) Floating point computation, numerical rootfinding, interpolation, numerical quadrature, direct methods for linear systems. Students may take only one course for credit from MATH 451 and MATH 455.
Effective: Spring 2008
Prerequisite:

MATH 456 (CMPSC 456) Introduction to Numerical Analysis II (3) Polynomial and piecewise polynomial approximation, matrix least squares problems, numerical solution of eigenvalue problems, numerical solution of ordinary differential equations.
Effective: Spring 2008
Prerequisite:

MATH 457 Introduction to Mathematical Logic (3) Propositional logic, first-order predicate logic, axioms and rules of inference, structures, models, definability, completeness, compactness.
Effective: Summer 2011
Prerequisite:

Effective: Fall 1986
Prerequisite:

MATH 465 Number Theory (3) Elements, divisibility of numbers, congruences, residues, and forms.
Effective: Spring 2009
Prerequisite:

MATH 467 (CMPSC 467) Factorization and Primality Testing (3) Prime sieves, factoring, computer numeration systems, congruences, multiplicative functions, primitive roots, cryptography, quadratic residues. Students who have passed MATH 465 may not schedule this course.
Effective: Spring 1995
Prerequisite:

MATH 468 Mathematical Coding Theory (3) Shannon's theorem, block codes, linear codes, Hamming codes, Hadamard codes, Golay codes, Reed-Muller codes, bounds on codes, cyclic codes.
Effective: Fall 1983
Prerequisite:

MATH 470 Algebra for Teachers (3) An introduction to algebraic structures and to the axiomatic approach, including the elements of linear algebra. Designed for teachers and prospective teachers. Students who have passed Math 435 may not schedule this course.
Effective: Fall 1988
Prerequisite:

MATH 471 Geometry for Teachers (4) Problem solving oriented introduction to Euclidean and non-Euclidean geometries; construction problems and geometrical transformations via "Geometer's Sketchpad" software. Intended primarily for those seeking teacher certification in secondary mathematics. Students who have passed MATH 427 may not schedule this course.
Effective: Spring 1996
Prerequisite:

MATH 475 (US;IL) Introduction to the History of Mathematics (3) A global survey of the history of mathematics as
viewed as a human response to cultural, political, economic, and societal pressures.
Effective: Spring 2010
Prerequisite:

MATH 475W (US;IL) History of Mathematics (3) A global survey of the history of mathematics as viewed as a human response to cultural, political, economic, and societal pressures.
Effective: Spring 2012
Prerequisite:

MATH 479 (PHYS 479) Special and General Relativity (3) Mathematical description, physical concepts, and experimental tests of special and general relativity.
Effective: Spring 2007
Prerequisite:

MATH 482 Mathematical Methods of Operations Research (3) Survey of linear and nonlinear programming; mathematics of optimization; queues; simulation.
Effective: Spring 2007
Prerequisite:

MATH 484 Linear Programs and Related Problems (3) Introduction to theory and applications of linear programming; the simplex algorithm and newer methods of solution; duality theory.
Effective: Spring 1987
Prerequisite:

MATH 485 Graph Theory (3) Introduction to the theory and applications of graphs and directed graphs. Emphasis on the fundamental theorems and their proofs.
Effective: Spring 1987
Prerequisite:

MATH 486 Mathematical Theory of Games (3) Basic theorems, concepts, and methods in the mathematical study of games of strategy; determination of optimal play when possible.
Effective: Spring 2006
Prerequisite:

MATH 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1995

MATH 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

MATH 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2007
Prerequisite:

MATH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

MATH 496A (CMPSC 496A) Introduction to Numerical Analysis II (1-6) Polynomial and piecewise polynomial approximation, matrix least squares problems, numerical solution of eigenvalue problems, numerical solution of ordinary differential equations.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

MATH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

MATH 497A Honors Algebra (4) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MATH 497A Complex Analysis of Mathematics and Engineering (3) Complex analysis with applications to science and engineering, complex algebra, analytic functions, complex contour integrals, series representations, residue theory.
Prerequisite:

MATH 497B Random Walk and Brownian Motion (4) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MATH 497C An Introduction to Geometric Topology in Dynamics (4) Formal courses given infrequently to explore, in
depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MATH 497D Complex Analysis for Mathematics and Engineering (3) Complex analysis with applications to science and engineering, complex algebra, analytic functions, complex contour integrals, series representations, residue theory.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

MATH 497E MASS Honors Colloquium (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MATH 497F Financial mathematics (3) Theory of interest, stochastic processes, option pricing, hedging, portfolio optimization.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

MATH 497M MASS Interdisciplinary Seminar (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MATH 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

MATH 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

MATH 501 Complex and Real Analysis I (3) Cauchy's theorem, Laurent expansion, residue calculus, harmonic functions, conformal mapping, measure and integration, convergence theorems, LP spaces, Hilbert spaces.
Effective: Spring 1994 Ending: Fall 2012
Prerequisite:

Effective: Spring 2013 Future: Spring 2013
Prerequisite:

MATH 502 Complex and Real Analysis II (3) Fourier analysis, Fubini's theorem, Hahn-Banach theorem, open mapping theorem, uniform boundedness principle, dual spaces, selected topics from functional analysis.
Effective: Spring 1992 Ending: Fall 2012
Prerequisite:

Effective: Spring 2013 Future: Spring 2013
Prerequisite:

MATH 503 Functional Analysis (3) Topological vector spaces, completeness, convexity, duality, banach algebras, bounded operators on Hilbert space, the spectral theorem, unbounded operators, applications.
Effective: Spring 1992 Ending: Fall 2012
Prerequisite:

Effective: Spring 2013 Future: Spring 2013
Prerequisite:

MATH 504 Analysis in Euclidean Space (3) The Fourier transform in L1 and L2 and applications, interpolation of operators, Riesz and Marcinkiewics theorems, singular integral operators.
Effective: Spring 1992
Prerequisite:

MATH 505 Mathematical Fluid Mechanics (3) Kinematics, balance laws, constitutive equations; ideal fluids, viscous flows, boundary layers, lubrication; gas dynamics.
Effective: Spring 1992
Prerequisite:

MATH 506 Ergodic Theory (3) Measure-preserving transformations and flows, ergodic theorems, ergodicity, mixing, weak mixing, spectral invariants, measurable partitions, entropy, ornstein isomorphism theory.
Effective: Spring 1992
Prerequisite:

MATH 507 Dynamical Systems I (3) Fundamental concepts; extensive survey of examples; equivalence and classification of dynamical systems, principal classes of asymptotic invariants, circle maps.
Effective: Spring 1992

The Pennsylvania State University
Prerequisite:

MATH 508 **Dynamical Systems II** (3) Hyperbolic theory: stable manifolds, hyperbolic sets, attractors, Anosov systems, shadowing, structural stability, entropy, pressure, Lyapunov characteristic exponents and non-uniform hyperbolicity.
Effective: Spring 1992
Prerequisite:

MATH 511 **Ordinary Differential Equations I** (3) Existence and uniqueness, linear systems, series methods, Poincare-Bendixson theory, stability.
Effective: Spring 1992
Prerequisite:

MATH 512 **Ordinary Differential Equations II** (3) Floquet theory, regular and singular boundary value problems, Green's functions, eigenfunction expansions.
Effective: Spring 1992
Prerequisite:

MATH 513 **Partial Differential Equations I** (3) First order equations, the Cauchy problem, Cauchy-Kowalevski theorem, Laplace equation, wave equation, heat equation.
Effective: Spring 1992
Prerequisite:

MATH 514 **Partial Differential Equations II** (3) Sobolev spaces and Elliptic boundary value problems, Schauder estimates. Quasilinear symmetric hyperbolic systems, conservation laws.
Effective: Spring 1992
Prerequisite:

MATH 515 **Classical Mechanics and Variational Methods** (3) Introduction to the calculus of variations, variational formulation of Lagrangian mechanics, symmetry in mechanical systems, Legendre transformation, Hamiltonian mechanics, completely integrable systems.
Effective: Spring 1992
Prerequisite:

MATH 516 **Stochastic Processes** (3) Markov chains; generating functions; limit theorems; continuous time and renewal processes; martingales, submartingales, and supermartingales; diffusion processes; applications.
Effective: Summer 1995
Prerequisite:

MATH 517 (STAT 517) **Probability Theory** (3) Measure theoretic foundation of probability, distribution functions and laws, types of convergence, central limit problem, conditional probability, special topics.
Effective: Summer 2000
Prerequisite:

MATH 518 (STAT 518) **Probability Theory** (3) Measure theoretic foundation of probability, distribution functions and laws, types of convergence, central limit problem, conditional probability, special topics.
Effective: Fall 1983
Prerequisite:

MATH 519 (STAT 519) **Topics in Stochastic Processes** (3) Selected topics in stochastic processes, including Markov and Wiener processes; stochastic integrals, optimization, and control; optimal filtering.
Effective: Fall 1984
Prerequisite:

MATH 521 **Complex Analysis: Theory and Applications I** (3) Conformal mappings, Schwarz-Cristoffel transformations, Dirichlet and Neumann problems, electrostatics and fluid flow, transform methods, asymptotic methods, Runge approximation theorems.
Effective: Spring 1992
Prerequisite:

MATH 523 **Numerical Analysis I** (3) Approximation and interpolation, numerical quadrature, direct methods of numerical linear algebra, numerical solutions of nonlinear systems and optimization.
Effective: Summer 2002
Prerequisite:

MATH 524 **Numerical Analysis II** (3) Iterative methods in linear algebra, numerical solution of ordinary and partial differential equations.
Effective: Summer 2002 Ending: Fall 2012
Prerequisite:

Effective: Spring 2013 Future: Spring 2013
Prerequisite:

MATH 527 **Geometry and Topology I** (3) Topological spaces and continuous mappings, connectedness, compactness and separation, fundamental groups, Jordan curve theorem, singular homology, Brouwer fixed point theorem.
Effective: Spring 1992 Ending: Fall 2012
Prerequisite:

MATH 527 **Metric and Topological Spaces** (3) Metric spaces, continuous maps, compactness, connectedness, and completeness. Topological spaces, products, quotients, homotopy, fundamental group, simple applications.
Effective: Spring 1992 Ending: Fall 2012
Prerequisite:

Effective: Spring 2013 Future: Spring 2013
Prerequisite:

MATH 529 Algebraic Topology (3) Manifolds, Poincare duality, vector bundles, Thom isomorphism, characteristic classes, classifying spaces for vector bundles, discussion of bordism, as time allows.
Effective: Spring 1992
Prerequisite:

MATH 530 Differential Geometry (3) Distributions and Frobenius theorem, curvature of curves and surfaces, Riemannian geometry, connections, curvature, Gauss-Bonnet theorem, geodesic and completeness.
Effective: Spring 1992
Prerequisite:

MATH 531 Differential Topology (3) DeRham's theorem, geometry of smooth mappings, critical values, Sard's theorem, Morse functions, degree of mappings, smooth fiber bundles.
Effective: Spring 1992
Prerequisite:

MATH 533 Lie Theory I (3) Lie groups, lie algebras, exponential mappings, subgroups, subalgebras, simply connected groups, adjoint representation, semisimple groups, infinitesimal theory, Cartan's criterion.
Effective: Spring 1992
Prerequisite:

MATH 534 Lie Theory II (3) Representations of compact lie groups and semisimple lie algebras, characters, orthogonality, Peter-Weyl theorem, Cartan-Weyl highest weight theory.
Effective: Spring 1992
Prerequisite:

MATH 535 Algebra (3) Permutation groups, Sylow theorems, Jordan-Holder theorem, polynomial rings, unique factorization domains, algebraic and transcendental field extensions, Galois theory.
Effective: Fall 1983 Ending: Fall 2012
Prerequisite:

Effective: Spring 2013 Future: Spring 2013
Prerequisite:

MATH 536 Algebra (3) Permutation groups, Sylow theorems, Jordan-Holder theorem, polynomial rings, unique factorization domains, algebraic and transcendental field extensions, Galois theory.
Effective: Fall 1983 Ending: Fall 2012
Prerequisite:

Effective: Spring 2013 Future: Spring 2013
Prerequisite:

MATH 537 Field Theory (3) Finite and infinite algebraic extensions; cyclotomic fields; transcendental extensions; bases of transcendence, Luroth's theorem, ordered fields, valuations; formally real fields.
Effective: Fall 1983
Prerequisite:

MATH 538 Commutative Algebra (3) Topics selected from Noetherian rings and modules, primary decompositions, Dedekind domains and ideal theory, other special types of commutative rings or fields.
Effective: Winter 1978
Prerequisite:

MATH 542 Group Theory I (3) Topics selected by instructor from abelian, solvable, and nilpotent groups; finite presentations; free products; group extensions; group representations.
Effective: Fall 1983
Prerequisite:

MATH 547 Algebraic Geometry I (3) Affine and projective algebraic varieties; Zariski topology; Hilbert Nullstellensatz; regular functions and maps; birationality; smooth varieties normalization; dimension.
Effective: Spring 1992
Prerequisite:

MATH 548 Algebraic Geometry II (3) Topics may include algebraic curves, Riemann-Roch theorem, linear systems and divisors, intersection theory, schemes, sheaf cohomology, algebraic groups.
MATH 550 (CSE 550) **Numerical Linear Algebra** (3) Solution of linear systems, sparse matrix techniques, linear least squares, singular value decomposition, numerical computation of eigenvalues and eigenvectors.

MATH 551 (CSE 551) **Numerical Solution of Ordinary Differential Equations** (3) Methods for initial value and boundary value problems; convergence and stability analysis, automatic error control, stiff systems, boundary value problems.

MATH 552 (CSE 552) **Numerical Solution of Partial Differential Equations** (3) Finite difference methods for elliptic, parabolic, and hyperbolic differential equations; solutions techniques for discretized systems; finite element methods for elliptic problems.

MATH 553 (CSE 553) **Introduction to Approximation Theory** (3) Interpolation; remainder theory; approximation of functions; error analysis; orthogonal polynomials; approximation of linear functionals; functional analysis applied to numerical analysis.

MATH 554 **Approximation Theory** (3) Approximation in normed spaces; existence, uniqueness, characterization, computation of best approximations; error bounds; degree of approximation; approximation of linear functionals.

MATH 555 (CSE 555) **Numerical Optimization Techniques** (3) unconstrained and constrained optimization methods, linear and quadratic programming, software issues, ellipsoid and Karmarkar's algorithm, global optimization, parallelism in optimization.

MATH 556 (CSE 556) **Finite Element Methods** (3) Sobolev spaces, variational formulations of boundary value problems; piecewise polynomial approximation theory, convergence and stability, special methods and applications.

MATH 557 **Mathematical Logic** (3) The predicate calculus; completeness and compactness; Godel's first and second incompleteness theorems; introduction to model theory; introduction to proof theory.

MATH 558 **Foundations of Mathematics I** (3) Decidability of the real numbers; computability; undecidability of the natural numbers; models of set theory; axiom of choice; continuum hypothesis.

MATH 559 **Recursion Theory I** (3) Recursive functions; degrees of unsolvability; hyperarithmetic theory; applications to Borel combinatorics. Computational complexity. Combinatory logic and the Lambda calculus.

MATH 561 **Set Theory I** (3) Models of set theory. Inner models, forcing, large cardinals, determinacy. Descriptive set theory. Applications to analysis.

MATH 565 **Foundations of Mathematics II** (3) Subsystems of second order arithmetic; set existence axioms; reverse mathematics; foundations of analysis and algebra.

MATH 567 **Number Theory I** (3) Congruences, quadratic residues, arithmetic functions, partitions, classical multiplicative ideal theory, valuations and p-adic numbers; primes in arithmetic progression, distribution of primes.

MATH 568 **Number Theory II** (3) Congruences, quadratic residues, arithmetic functions, partitions, classical multiplicative ideal theory, valuations and p-adic numbers; primes in arithmetic progression, distribution of primes.

MATH 569 **Algebraic Number Theory I** (3) Dedekind rings; cyclotomic and Kummer extensions; valuations; ramification, decomposition, inertial groups; Galois extensions; locally compact groups of number theory.

The Pennsylvania State University
MATH 570 **Algebraic Number Theory II** (3) Topics chosen from class field theory; integral quadratic forms; algebraic and arithmetic groups; algebraic function of one variable.
Effective: Spring 1992
Prerequisite:

MATH 571 **Analytic Number Theory I** (3) Improvements of the prime number theorem, L-functions and class numbers, asymptotic and arithmetic properties of coefficients of modular forms.
Effective: Spring 1994
Prerequisite:

MATH 572 **Analytic Number Theory II** (3) Distribution of primes, analytic number theory in algebraic number fields, transcendental numbers, advanced theory of partitions.
Effective: Spring 1992
Prerequisite:

MATH 574 **Topics in Logic and Foundations** (3-6 per semester) Topics in mathematical logic and the foundations of mathematics.
Effective: Spring 1992
Prerequisite:

MATH 577 (M E 577) **Stochastic Systems for Science and Engineering** (3) The course develops the theory of stochastic processes and linear and nonlinear stochastic differential equations for applications to science and engineering.
Effective: Summer 1998
Prerequisite:

MATH 578 (M E 578) **Theory & Applications of Wavelets** (3) Theory and physical interpretation of continuous and discrete wavelet transforms for applications in different disciplines.
Effective: Spring 2012
Prerequisite:

MATH 580 **Introduction to Applied Mathematics I** (3) A graduate course of fundamental techniques including tensor, ordinary and partial differential equations, and linear transforms.
Effective: Fall 2003
Prerequisite:

MATH 581 **Introduction to Applied Mathematics II** (3) A graduate course of fundamental techniques including Ordinary, Partial, and Stochastic Differential Equations, Wavelet Analysis, and Perturbation Theory.
Effective: Summer 2003
Prerequisite:

MATH 582 **Introduction to C* Algebra Theory** (3) Basic properties of C* algebras, representation theory, group C* algebras and crossed products, tensor products, nuclearity and exactness.
Effective: Summer 2006
Prerequisite:

Effective: Summer 2006
Prerequisite:

MATH 584 **Introduction to von Neumann Algebras** (3) Comparison of projections, traces, tensor products, ITPFI factors and crossed products, the Jones index, modular theory, free probability.
Effective: Summer 2006
Prerequisite:

MATH 585 **Topics in Mathematical Modeling** (3) Introduction to mathematical modeling, covering the basic modeling and common mathematical techniques for problems from physical, biological and social sciences.
Effective: Summer 2012
Prerequisite:

MATH 588 (CSE 588) **Complexity in Computer Algebra** (3) Complexity of integer multiplication, polynomial multiplication, fast Fourier transform, division, calculating the greatest common divisor of polynomials.
Effective: Spring 2008
Prerequisite:

MATH 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

MATH 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

MATH 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

MATH 597A **Symplectic & Poisson Geometry** (3) Formal courses given on a topical or special interest subject which may
be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MATH 597B Modular Curves & Shimura Varieties (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MATH 597C Discrete Differential Geometry & Applications (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MATH 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1994

MATH 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005

MATH 600 Thesis Research (1-15) No description.
Effective: Fall 1983

MATH 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Winter 1978

MATH 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Teaching of mathematics undergraduate recitation classes with senior faculty instruction supervision.
Effective: Fall 1983

MATH 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

MATH 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Winter 1978

NOTE: Courses in computer science and statistics are listed separately.
Last Import from UCM: June 2, 2012 12:27 PM
Mathematics Education (MTHED)

MTHED 411 **Teaching Secondary Mathematics I** (3) Conditions for learning mathematics; problem solving; subject matter types; curriculum; learning goals; nature and history of mathematics at secondary level
Effective: Spring 2007
Prerequisite: Concurrent: MTHED 427

MTHED 412W **Teaching Secondary Mathematics II** (3) Assessing learning and instruction; methods of evaluation and grading; long-term planning; accommodating needs of diverse learners; connecting theory and practice.
Effective: Summer 2010
Prerequisite: Concurrent: C I 412W C I 495C

MTHED 420 **Teaching Mathematics in the Elementary Schools** (3) Strategies for teaching mathematics at the elementary school level; analysis of the philosophy and content of contemporary programs of instruction.
Effective: Spring 2007
Prerequisite: Concurrent: C I 495A or C I 495B; SCIED 458 SS ED 430W

MTHED 424 **Contemporary School Mathematics Programs** (3) In-depth analysis of school mathematics programs and the factors and forces influencing them; contemporary curriculum developments.
Effective: Summer 2010
Prerequisite:

MTHED 427 **Teaching Mathematics in Technology-Intensive Environments** (3) Interaction among pedagogy, content, and technology in mathematics teaching and learning in technology-intensive environments; secondary, early college curricula; laboratory experience.
Effective: Spring 2007
Prerequisite: Concurrent: MTHED 411

MTHED 430 **Students' Mathematical Thinking** (3 per semester, maximum of 6) Develop abilities in planning, conducting, and interpreting mathematics interviews to gain an understanding of students' thinking processes and current knowledge.
Effective: Summer 1994
Prerequisite:

MTHED 431 **Data Analysis in Secondary School Mathematics** (3) Intense development of foundations of data analysis for secondary mathematics as a process using statistical concepts for predictions and inferences.
Effective: Summer 2006
Prerequisite:

MTHED 432 **Mathematical Modeling in Secondary School Mathematics** (3) Students work from teaching and curricular perspective to explore and apply school and undergraduate mathematics to model real-world phenomena.
Effective: Summer 2006
Prerequisite:

MTHED 433 **Function Concept in Secondary School Mathematics** (3) This course develops the concept of function as an essential topic that underlies and connects school and collegiate mathematics.
Effective: Summer 2006
Prerequisite:

MTHED 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

MTHED 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MTHED 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

MTHED 498A **AP Statistics** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2012 Ending: Summer 2012

MTHED 498B **AP Calculus AB** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2012 Ending: Summer 2012

The Pennsylvania State University
MTHED 501 Foundations of Mathematics Education I: Learning (3) This course focuses on understanding and application of theories of mathematical thinking and learning in research and practice. Effective: Summer 2007
Prerequisite:

MTHED 502 Foundations of Mathematics Education II: Teaching (3) Teaching is the object of study encountered through connections among classical and contemporary theories of teaching and research on teaching. Effective: Summer 2007
Prerequisite:

MTHED 503 Foundations of Mathematics Education III: Curriculum (3) Study of mathematics curriculum blends historical trends and current issues with research literature and techniques to study effects of innovations. Effective: Summer 2007
Prerequisite:

Prerequisite:

MTHED 520 Analysis of Research in Mathematics Education (3) Survey of the status of knowledge about mathematics learning and instruction, K-12; analysis of research procedures; instruments for evaluating research. Effective: Summer 2010
Prerequisite:

MTHED 523 Projects in Mathematics Education Research, Curriculum Development, and Evaluation (1-3 per semester, maximum of 24) Conceptualizing, designing, conducting, and reporting mathematics education research, curriculum development and/or evaluation projects. Effective: Spring 1997
Prerequisite:

MTHED 525 Research Participation in School Mathematics Curriculum Construction (3) Development of theoretical bases for the construction of instructional materials in mathematics; research participation in preparing and testing curriculum materials. Effective: Fall 1983

MTHED 527 Research on the Use of Technology in Mathematics Education (3) Reviewing, critiquing, designing, and conducting research on mathematics learning and teaching in technology intensive environments. Effective: Spring 1997
Prerequisite:

MTHED 530 Mathematical Thinking at the Secondary and Early College Levels (3) Exploring and applying theories of advanced mathematical thinking; reviewing, conducting research on mathematical thinking at secondary and early college levels. Effective: Spring 1997
Prerequisite:

MTHED 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 1996

MTHED 595 Advanced Clinical Internship in Mathematics Learning (3) Supervised internship in advanced procedures for the implementation of diagnostic/prescriptive approaches as a strategy for improving mathematics learning. Effective: Spring 1987
Prerequisite:

MTHED 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

MTHED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 1987

Last Import from UCM: June 2, 2012 12:27 PM
Md Clkship Island-Hy (MCLKS)

MCLKS 701 Advanced Clinical Diagnostics (1) Advanced instruction for third-year medical students in laboratory medicine, neurology, ophthalmology, radiology and motivational interviewing.
Effective: Summer 2005
Prerequisite:

MCLKS 702 Clinical Therapeutics (1) Skill development: discussion of end of life issues; pain management; clinical pharmacology including use of antibiotics, nutrition, cost of medical care and reducing medical errors.
Effective: Summer 2005
Prerequisite:

MCLKS 704 Improving Healthcare (1) Skill development: discussion of end of life issues; pain management; medical literature evaluation’ effective utilization and improvement of medical systems.
Effective: Fall 2008
Prerequisite:

MCLKS 705 Transition to Internship (1) Provide review of clinical skills prior to internship training, and introduce new skills in team building, education and time management.
Effective: Spring 2009
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Mechanical Engineering (M E)

M E 400 Thermodynamics of Propulsion and Power Systems (3) Analysis and modeling of propulsion and power systems, including combustion, compressible flow through nozzles, chemical equilibrium, and moist air systems. Effective: Fall 2007
Prerequisite:

M E 401 Refrigeration and Air Conditioning (3) Theoretical principles, design, performance, and selection of various refrigeration and air-conditioning systems; building heat and cooling loads; solar heating. Effective: Fall 2007
Prerequisite:

M E 402 Power Plants (3) A study of fossil-fuel steam generation and utility plants, including cogeneration, gas turbine, and combined cycles. Effective: Fall 2007
Prerequisite:

M E 403 Polymer Electrolyte Fuel Cell Engines (3) Introduction to Fundamentals of Polymer Electrolyte Fuel Cells (PEFCs). Includes fundamentals of electrochemistry, thermodynamics, fluid mechanics, heat transfer materials, and manufacturing issues of PEFCs. A brief survey of other fuel cell types is also included. Effective: Spring 2011
Prerequisite: Concurrent: M E 410 or equivalent

M E 404 Gas Turbines (3) Thermodynamic cycles relating to gas turbines; analysis and performance of compressors, combustion chambers, single- and multi-stage turbines; recent developments. Effective: Fall 2007
Prerequisite:

M E 405 Indoor Air Quality Engineering (3) Prediction of the motion of contaminants (both gaseous particulate) in gas streams; analysis of ventilation systems and air pollution control systems; comparison of experimental sampling techniques. Effective: Fall 2007
Prerequisite:

M E 406 (NUC E 406) Introduction to Statistical Thermodynamics (3) Statistical description of systems composed of large numbers of particles in the context of classical and quantum mechanics; basic concepts of probability theory and thermodynamics as they relate to statistical mechanics. Effective: Fall 2007
Prerequisite:

M E 408 Energy Systems (3) Theory, analysis, design, selection, and application of energy conversion systems. Effective: Fall 2011
Prerequisite:

M E 410 Heat Transfer (3) Thermal energy transfer mechanisms: conduction (steady, transient), convection (internal, external), radiation; lumped parameter method; heat exchangers; introduction to numerical methods. Effective: Spring 2011
Prerequisite:

M E 411 Heat-Exchanger Design (3) Thermal design and application of different heat-exchanger types, including surface selection and design optimization. Effective: Fall 2007
Prerequisite:

M E 420 Compressible Flow I (3) Introductory compressible flow (gas dynamics), mathematical background, and physical concepts of isentropic flow, shock waves, expansion waves, and applications. Effective: Fall 2007
Prerequisite:

M E 421 Viscous Flow Analysis and Computation (3) Apply analytical and computational methods to solve the differential equations describing fluid flow. Incompressible external flows past objects and internal flows in pipes and ducts are some problems considered. Effective: Spring 2011
Prerequisite:

M E 422 Principles of Turbomachinery (3) Application of Newton’s laws of motion and basic laws of thermodynamics to analysis of fluid flow in turbomachinery. Effective: Fall 2007
Prerequisite:

M E 427 Incompressible Aerodynamics (3) Analysis of lift and drag using potential flow theory, effects of viscosity on potential flow calculations, wind tunnel testing. Effective: Fall 2007
Prerequisite:

M E 428 Applied Computational Fluid Dynamics (3) Introduction to theory and application of computational techniques
for solving fluid flow and heat transfer.
Effective: Fall 2011
Prerequisite:
M E 430 (EGEE 430) **Introduction to Combustion** (3) Concepts related to laminar and turbulent premixed and nonpremixed combustion with applications to propulsion and stationary systems.
Effective: Fall 2009
Prerequisite:
M E 431 **Internal Combustion Engines** (3) Thermodynamic aspects of internal combustion engine design and performance; two- and four-stroke cycle, supercharged and non-supercharged, diesel and spark-ignition types.
Effective: Fall 2007
Prerequisite:
M E 432 **Rocket Propulsion** (3) Design and performance of rocket propulsion components and systems; thermodynamics, solid and liquid fuels, heat transfer, materials, controls, and instrumentation.
Effective: Fall 2007
Prerequisite:
M E 433 **Fundamentals of Air Pollution** (3) Natural and man-made sources of pollution; atmospheric dispersion; biological and health effects; control systems; legislation and regulations.
Effective: Fall 2007
Prerequisite:
M E 440W **Mechanical Systems Design Project** (3) Design and analysis of mechanical components and systems. Application of fundamental design and analysis methods to open ended engineering problems.
Effective: Fall 2007
Prerequisite:
M E 441W **Thermal Systems Design Project** (3) Design of thermal systems through component design and/or selection, system simulation and optimization. Assessment of system economics and energy efficiency.
Effective: Fall 2007
Prerequisite:
M E 442W **Advanced Vehicle Design I** (2) Part one of a two course sequence; applications of design and analysis methods to open-ended advanced transportation vehicles. Two semester course; satisfies Senior Design or ME Technical Elective requirements (when combined with M E 443W).
Effective: Summer 2010
Prerequisite: Concurrent: M E 410
M E 443W **Advanced Vehicle Design II** (1) Part two of a two course sequence; applications of design and analysis methods to open-ended advanced transportation vehicles. Two semester course; satisfies Senior Design or ME Technical Elective requirements (when combined with M E 442W).
Effective: Summer 2010
Prerequisite:
M E 444 **Engineering Optimization** (3) Problem formulation, algorithms and computer solution of various engineering optimization problems.
Effective: Spring 2010
Prerequisite:
M E 445 **Microcomputer Interfacing for Mechanical Engineers** (4) Interfacing of electro-mechanical systems to microcomputers for data acquisition, data analysis and digital control.
Effective: Fall 2007
Prerequisite:
Effective: Spring 2011
Prerequisite:
M E 448 **Engineering Design Concepts** (3) Engineering design and modelling, engineering economic analysis techniques, technical communication skills, project planning and design.
Effective: Fall 2011
Prerequisite: Concurrent: M E 367 M E 410
M E 449 **Mechanical Design Projects** (3) Group or individual design projects in the areas of mechanical engineering.
Effective: Fall 2007
Prerequisite:
Effective: Fall 2007
Prerequisite:
M E 452 **Vehicle Road Dynamics** (3) Investigations of three-dimensional dynamics and design into the study of vehicle dynamics including tire forces, suspension, and stability.
Effective: Fall 2007 Ending: Summer 2012
Prerequisite:
M E 452 Vehicle Road Dynamics (3) Investigations of three-dimensional dynamics and design into the study of vehicle dynamics including tire forces, suspension, and stability. Effective: Fall 2012 Future: Fall 2012
Prerequisite:

M E 455 Automatic Control Systems (3) Dynamic analysis of systems involving automatic control of position, speed, power, flow, pressure, temperature, and other physical quantities. Effective: Fall 2007
Prerequisite:

M E 456 (I E 456) Industrial Robot Applications (3) Introduction to robotics, with emphasis on robot selection, programming, and economic justification for manufacturing applications. Effective: Spring 2011
Prerequisite:

M E 460 Advanced Machine Design Problems (3) Special machine design problems in unusual types of springs; gear problems and involutometry; cam design and application; multiple diameter shaft deflections and ball bearings. Effective: Fall 2007
Prerequisite:

M E 461 (E MCH 461) Finite Elements in Engineering (3) Computer modeling and fundamental analysis of solid, fluid, and heat flow problems using existing computer codes. Effective: Spring 2011
Prerequisite:

M E 462 Lubrication in Machine Design (3) Lubricants and lubrication with applications to design aspects of machines and mechanisms including bearings, gears, cams, and automotive engines. Effective: Fall 2007
Prerequisite:

M E 465 Introduction to Manufacturing Laboratory (1) A laboratory-based introduction to manufacturing processes including material removal, forming, casting and joining for metals and non-metals. Effective: Fall 2011
Prerequisite: Concurrent: M E 468

M E 467 Applied Finite Element Analysis (3) Review of matrix algebra; discretization; finite element formulation; application of finite element computer codes. Effective: Fall 2011
Prerequisite:

M E 468 Engineering for Manufacturing (3) Manufacturability, the selection of the most effective materials and processes, and quality assurance. Effective: Spring 2009
Prerequisite:

M E 469 Metallic Manufacturing Processes (3) Principles of metal working and introduction to current theories; analysis of deformation, joining, and metal removal processes. Effective: Fall 2011
Prerequisite:

M E 470 (E MCH 470) Analysis and Design in Vibration Engineering (3) Application of Lagrange's equations to mechanical system modeling, multiple-degree-of-freedom systems, experimental and computer methods; some emphasis on design applications. Effective: Spring 2008
Prerequisite:

Prerequisite:

M E 480 Mechanism Design and Analysis (3) Design and analysis of mechanical linkages including kinematic synthesis and dynamic analysis. Linkages for a variety of applications are considered. Effective: Spring 2011
Prerequisite:

Prerequisite:

M E 491 Bioengineering Applications of Mechanical Engineering (3) Application of mechanical engineering knowledge in the context of life sciences. Effective: Fall 2011
Prerequisite:

M E 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007
M E 494H Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course. Effective: Spring 2007
Prerequisite:

M E 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Fall 2007
Prerequisite:

M E 496 Independent Studies (1-18) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

M E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

M E 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2008

M E 504 Advanced Engineering Thermodynamics (3) Pure and applied thermodynamics including its application to advanced engineering problems; collateral reading and discussion of the classical works on the subject. Effective: Fall 2007

M E 505 Design of Air Pollution Control Systems (3) Advanced principles of design drawn from professional literature, including mechanical collectors, electrostatic precipitators, filters, scrubbers, and industrial ventilation systems. Effective: Fall 1983
Prerequisite:

M E 512 Heat Transfer--Conduction (3) One- and two-dimensional conduction heat transfer for steady state and transient systems with varying boundary conditions. Effective: Fall 1983

M E 513 Heat Transfer--Convection (3) Laminar and turbulent flow heat transfer in natural and forced convection systems. Effective: Fall 1983

M E 514 Heat Transfer--Radiation (3) Thermal radiation fundamentals; specular and diffuse systems; differential and integral methods; numerical techniques; industrial applications. Effective: Fall 1983

M E 515 Two-Phase Heat Transfer (3) Heat transfer processes involving evaporation, boiling, and condensation. Effective: Winter 1978

M E 517 Techniques for Heat Transfer Enhancement (3) Study of advanced concepts in convective and two-phase heat transfer, with emphasis on techniques of heat transfer enhancement. Effective: Fall 2007
Prerequisite:

M E 520 Compressible Flow II (3) Two-dimensional subsonic flow; similarity rules; theory of characteristics; supersonic and hypersonic flows; nonsteady flow; oblique shock waves. Effective: Fall 2007
Prerequisite:

M E 521 Foundations of Fluid Mechanics I (3) First semester of core sequence in fluid mechanics; Navier-Stokes equations, potential flow, low Re flow, laminar boundary layers. Effective: Fall 2007
Prerequisite:

Prerequisite:

M E 524 (AERSP 524) Turbulence and Applications to CFD: DNS and LES (3) First of two courses: Scalings, decompositions, turbulence equations; scale representations, Direct and Large-Eddy Simulation; modeling; pseudo-spectral methods; 3 computer projects. Effective: Spring 2011
**Prerequisite:**

M E 525 (AERSP 525) *Turbulence and Applications to CFD: RANS* (3) Second of two courses: scalings, decomposition, turbulence equations; Reynolds Averaged Navier Stokes (RANS) modeling; phenomenological models; 3 computer projects. Effective: Spring 2011

Prerequisite:

M E 526 (AERSP 526) *Computational Methods for Shear Layers* (3) Study of numerical solution methods for steady and unsteady laminar or turbulent boundary-layer equations in two and three dimensions. Effective: Fall 2007

Prerequisite:

Prerequisite:

M E 530 *Fundamentals of Combustion* (3) Theoretical formulations and methods of solution of engineering problems and physical/chemical processes in various propulsion systems. Effective: Fall 2007

M E 531 *Species Measurements in Combustion Systems* (1-3) Study of modern instrumentation techniques for determination of species concentrations in combustion systems. Effective: Fall 2007

M E 532 *Turbulent and Two-Phase Combustion* (3) Fundamentals of chemically reacting turbulent flows in homogeneous systems including turbulent flames, spray combustion, ignition, reacting boundary layers. Effective: Fall 2007

Prerequisite:

M E 533 *Solid Propellant Combustion* (3) Introduction to phenomena of solid propellant combustion, analytical techniques for modeling propellant ignition and combustion behavior, experimental methods. Effective: Fall 2007

Prerequisite:

Prerequisite:

M E 546 (I E 546) *Designing Product Families* (3) Product families, product platforms, mass customization, product variety, modularity, commonality, robust design, product architectures. Effective: Fall 2007

Prerequisite:

M E 547 (EDSGN 547, I E 547) *Designing for Human Variability* (3) Statistics, optimization and robust design methodologies to design products and environments that are robust to variability in users. Effective: Summer 2009

M E 550 *Foundations of Engineering Systems Analysis* (3) Analytical methods are developed using the vector space approach for solving control and estimation problems; examples from different engineering applications. Effective: Fall 1996 Ending: Summer 2012

Prerequisite:

M E 550 (E E 550) *Foundations of Engineering Systems Analysis* (3) Analytical methods are developed using the vector space approach for solving control and estimation problems; examples from different engineering applications. Effective: Fall 2012 Future: Fall 2012

Prerequisite:

M E 554 *Digital Process Control* (3) Analysis and design of control systems with digital controllers, including PID, finite settling time, state feedback, and minimum variance algorithms. Effective: Fall 2007

Prerequisite:

M E 555 *Automatic Control Systems* (3) Advanced problems and techniques in the design of automatic control systems with emphasis on stability, controller design, and optimum performance. Effective: Winter 1978

Prerequisite:

M E 556 (I E 556) *Robotic Concepts* (3) Analysis of robotic systems; end effectors, vision systems, sensors, stability and control, off-line programming, simulation of robotic systems. Effective: Fall 1983

Prerequisite:
M E 558 (E E 584) **Robust Control Theory** (3) Fundamentals of Robust Control Theory with emphasis on stability and performance analysis and design.
Effective: Spring 2008
Prerequisite:

M E 559 (E E 587) **Nonlinear Control and Stability** (3) Design of nonlinear automatic control systems; phase-plane methods; describing functions; optimum switched systems; Liapunov stability; special topics in stability.
Effective: Spring 2008
Prerequisite:

M E 560 (E MCH 500) **Solid Mechanics** (3) Introduction to continuum mechanics, variational methods, and finite element formulations; application to bars, beams, cylinders, disks, and plates.
Effective: Fall 2007

M E 561 **Structural Optimization Using Variational and Numerical Methods** (3) Shape and size optimization of elastic structures, continuous and discrete solution methods and numerical algorithms, design of compliant mechanisms.
Effective: Summer 2004
Prerequisite:

M E 563 (E MCH 563) **Nonlinear Finite Elements** (3) Advanced theory of semidiscrete formulations for continua and structures; emphasizes dynamic and nonlinear problems.
Effective: Spring 1996
Prerequisite:

M E 564 **Elastic and Dynamic Stability of Structures** (3) An introduction to the concept and analysis methods of structural stability; structures under static/dynamic loading and high speed conditions.
Effective: Spring 2008
Prerequisite:

M E 565 **Optimal Design of Mechanical and Structural Systems** (3) Application of numerical optimization techniques to design mechanical and structural systems; design sensitivity analysis.
Effective: Summer 1988

M E 571 (AERSP 571, E MCH 571) **Foundations of Structural Dynamics and Vibration** (3) Modeling approaches and analysis methods of structural dynamics and vibration.
Effective: Fall 2007
Prerequisite:

M E 572 **Experimental Modal Analysis** (3) The development of structural dynamic models from experimental data, analytical and experimental vibration, analysis methods, laboratory techniques.
Effective: Fall 2007
Prerequisite:

M E 573 (ACS 573) **Designing Quiet Structures** (3) Course integrates structural dynamics, acoustics and optimization into unified method for designing quiet structures virtually for early product development.
Effective: Fall 2007
Prerequisite:

M E 577 (MATH 577) **Stochastic Systems for Science and Engineering** (3) The course develops the theory of stochastic processes and linear and nonlinear stochastic differential equations for applications to science and engineering.
Effective: Summer 1998
Prerequisite:

M E 578 (MATH 578) **Theory and Applications of Wavelets** (3) Theory and physical interpretation of continuous and discrete wavelet transforms for applications in different engineering disciplines.
Effective: Spring 2012
Prerequisite:

M E 580 **Advanced Dynamics of Machines** (3) Linear and torsional vibrations in and balancing of rotating and reciprocating machinery; exact analysis of stresses produced by these and other dynamic forces in machine parts.
Effective: Spring 2008
Prerequisite:

M E 581 **Simulation of Mechanical Systems** (3) Introduces computational fundamentals, including digital logic; programming language, basic numerical analysis and data processing, as applied to mechanical simulation techniques.
Effective: Fall 2007
Prerequisite:

M E 582 **Mechanism Synthesis** (3) Geometrical and algebraic methods for synthesizing planar and spatial mechanisms, dynamics of spatial mechanism.
Effective: Fall 2007

M E 590 **Colloquium** (1) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2009
M E 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

M E 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

M E 597F **Vehicle Hardware in the Loops Methods** (3) This course is required for the Graduate Automotive Technology Education (GATE) Program in High Power, In-Vehicle Energy Storage.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

Effective: Fall 1983

M E 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

M E 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) For graduate students helping to teach the beginning thermodynamics course, M.E. 22. Must have taken M.E. 504.
Effective: Fall 1983

M E 603 **Foreign Academic Experience** (1 per semester/maximum of 12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 2002

M E 610 **Thesis Research Off Campus** (1-15) No Description.
Effective: Fall 1983

M E 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983
Medical Ethics Profe (MEP)

MEP 721 **Medical Ethics and Professionalism** (3) This course provides an introduction to bioethics and professionalism and provides a framework for understanding ethical issues in medicine.

Effective: Summer 2009

Prerequisite: Concurrent: CAR 722 REN 728 PLM 726 GI 729

Last Import from UCM: June 2, 2012 12:27 PM
Medical Home Curricu (MHC)

MHC 797 Medical Home Longitudinal Curriculum - Pilot (2) Medical Home Longitudinal Curriculum (3rd year pilot course).
Effective: Summer 2011
Prerequisite:

MHC 797A Medical Home Longitudinal Advanced Elective (5) The Medical Home Longitudinal Advanced Elective will provide continuity experiences for students to learn and witness the natural progression of illnesses, develop treatment options over time in a team format, as well as develop empathetic healing relationship with patients.
Effective: Summer 2011
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Medical Triag&Resusc (MEDTR)

MEDTR 743 Triage and Resuscitation (5) This course provides knowledge and skills necessary for recognition and initial management of the patient with a potentially life-threatening illness or injury. Effective: Spring 2010
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Medicine-Hy (MED)

MED 700 Clinical Clerkship in Medicine (15) To provide supervised clinical experience in the management of patients with acute and chronic illness.
Effective: Winter 1978
Prerequisite:

MED 715 Clinical Elective in Infectious Disease (5-10) Principles of human-host defense mechanism, host-parasite interactions, manifestations of various infections, systematic approach to problem solving, rational use of antibiotics.
Effective: Winter 1978
Prerequisite:

MED 721 Cardiology Elective for 3rd Year Students (5) Students learn non-invasive and invasive cardiology procedures, then work as clinical clerks on an in-patient cardiology service.
Effective: Spring 2010
Prerequisite:

MED 722 Medicine Acting Internship (5) Active participation on an advanced level in the diagnosis and management of patients admitted to the General Internal Medicine Services. More responsibility for decision-making and patient management is afforded subinterns than clinical clerks.
Effective: Spring 2009
Prerequisite:

MED 723 Clinical Elective in Gastroenterology (5-15) A program in clinical gastroenterology to expose student to basic GI physiology, pathophysiology, and management of gastrointestinal and liver problems.
Effective: Winter 1978
Prerequisite:

MED 724 Clinical Elective in Hematology (5-15) Provides students with the basic understanding of the fundamental problems of hematology.
Effective: Winter 1978
Prerequisite:

MED 725 Clinical Elective in Medical Oncology (5-15) Introduces students to cancer chemotherapy and immunotherapy with emphasis on workings of lymphoma and solid tumor patients.
Effective: Winter 1978
Prerequisite:

MED 727 Elective in Pulmonary Medicine (5-15) A clinical program in pulmonary medicine with emphasis in pulmonary physiology, pathophysiology, and patient diagnosis and management.
Effective: Winter 1978
Prerequisite:

MED 728 Clinical Program in Nephrology (5-10) Problems in clinical nephrology with emphasis placed on a pathophysiological approach. Introduction to renal biopsy, peritoneal dialysis, and hemodialysis.
Effective: Spring 1992

MED 733 Cardiology Acting Internship (5) Advanced training in cardiovascular pathophysiology and diseases for fourth-year students functioning as acting interns.
Effective: Spring 2009
Prerequisite:

MED 734 Clinical Elective in Endocrinology (5-15) Expose students to a large number of clinical endocrine problems, familiarize them with diagnostic laboratory procedures used in evaluating patients.
Effective: Winter 1978
Prerequisite:

MED 736 Clinical Management of Obesity (5) This course provides exposure to the multifaceted area of obesity management, including diabetes, bariatric surgery, medical management and pediatrics.
Effective: Fall 2008
Prerequisite:

MED 738 Clinical Elective in Cardiology--Consultation Service (5) Students evaluate and follow in-patients on general non-cardiology services with cardiac problems referred to the Cardiology Consult Service.
Effective: Spring 1997
Prerequisite:

MED 742A Allergy and Immunology Clinical Elective for 3rd Year Students (2.5) Allergy and Immunology Clinical Elective for 3rd year students.
Effective: Spring 2009
Prerequisite:

MED 745 Geriatric Elective (5) Students will perform assessments and develop care plans for hospitalized elders who are transitioning to home or long-term care setting.
Effective: Fall 2008
Prerequisite:

MED 747 **Clinical Elective in Allergy, Asthma and Immunology** (5) The fourth year student rotating on this four week allergy service will experience an active and up to date Allergy and Immunology clinical service.
Effective: Summer 2009

Prerequisite:

MED 748 **Adult Rheumatology Elective** (5) This course provides exposure to concepts utilized in the diagnosis and management of rheumatic diseases in adults.
Effective: Spring 2009

Prerequisite:

MED 749 **Medical Intensive Care Acting Internship (4th year)** (5) Senior students assume Acting Intern responsibilities for Medical ICU level patients. This intense training is recommended for highly motivated students interested in a "hands-on" experience in the critical care unit.
Effective: Spring 2009

Prerequisite:

MED 757 **Hematology-Oncology Subinternship** (5) Students will function as acting interns in the inpatient hematology/oncology unit under the direction of senior housestaff fellows and faculty.
Effective: Spring 1993

Prerequisite:

MED 796 **Medicine Individual Studies** (5) Clinical or laboratory research on a selected topic by special arrangement with member of faculty who will act as preceptor.
Effective: Spring 2009

Prerequisite:

MED 796A **Medicine Individual Studies for 3rd Year** (2.5) Medicine individual studies for 3rd year.
Effective: Spring 2009

MED 797 **Medicine Special Topics** (5) Advanced clinical training in internal medicine or subspecialty --neurology, cardiology, clinical pharmacology, hematology, gastroenterology, endocrinology, pulmonary medicine, renal disease.
Effective: Spring 2010

Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Medieval Studies (MEDVL)

MEDVL 411 (IL) (HIST 411) Medieval Britain (3) Political, cultural, and economic history of Britain from circa 400 to 1485 with an emphasis on the kingdom of England.
Effective: Spring 2006
Prerequisite:

MEDVL 413 (IL) (HIST 413) Medieval Celtic Studies (3) Celtic civilization from antiquity to the end of the middle ages.
Effective: Spring 2006
Prerequisite:

MEDVL 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

MEDVL 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

MEDVL 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2002
Prerequisite:

MEDVL 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 1995

MEDVL 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1995

MEDVL 499 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

MEDVL 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2002

MEDVL 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2002

MEDVL 595 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2002

MEDVL 596 Individual Studies (1-9) Creative projects, including nonthesis research that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2002

MEDVL 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2002

MEDVL 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2002

MEDVL 599 (IL) Foreign Studies (1-12 per semester; maximum of 24) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

MEDVL 600 Thesis Research (1-15) No description.
Effective: Summer 2002
MEDVL 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 2002

MEDVL 602 **Supervised Experience in College Teaching** (1-3 per semester, maximum of 6) Students experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Summer 2002

MEDVL 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Summer 2002

MEDVL 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 2002

MEDVL 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Summer 2002

Last Import from UCM: June 2, 2012 12:27 PM
Meteorology (METEO)

METEO 410 Advanced Topics in Weather Forecasting (3) Exploring highly specialized topics and techniques in weather forecasting that span from mesoscale to planetary spatial scales and short-term to long-range time scales. Effective: Spring 2004
Prerequisite:

METEO 411 Synoptic Meteorology Laboratory (4) Techniques of analyzing synoptic scale weather situations; introduction to weather forecasting. Effective: Spring 2004
Prerequisite:

METEO 413 Map Analysis (3) Analysis of actual surface weather observations, with emphasis on the Norwegian cyclone model, missing or bad data, and mesoscale phenomena. Effective: Fall 2002
Prerequisite:

METEO 414 Mesoscale Meteorology (4) A survey of conceptual models and analysis techniques for mesoscale atmospheric features. Effective: Summer 1996
Prerequisite:

METEO 415 Forecasting Practicum (3) Modern techniques in weather analysis and forecasting. Effective: Spring 2011
Prerequisite:

METEO 416 Advanced Forecasting (3) Competitive, simulated, operational, real-time forecasting is covered. Effective: Spring 1998
Prerequisite:

METEO 418W Topics in Mesoscale Meteorology (3) Topics in mesoscale meteorology will be investigated in an independent study environment through computer-based modules, papers, and semester project. Effective: Fall 1995
Prerequisite:

METEO 419 Air Quality Forecasting (3) Issues relating to the prediction and dispersion of air pollutants as discussed. Effective: Summer 2010
Prerequisite:

METEO 421 Atmospheric Dynamics (4) Balanced and unbalanced flows, vorticity, circulation and potential vorticity, an introduction to wave dynamics and stability analysis, and a quantitative discussion of the general circulation. Effective: Fall 2009
Prerequisite: Concurrent: METEO 431 MATH 251 PHYS 212

METEO 422 Advanced Atmospheric Dynamics (3) Survey of advanced dynamical topics including instabilities, numerical modeling, and others of current interest. Effective: Fall 2009
Prerequisite:

METEO 431 Atmospheric Thermodynamics (3) Classical thermodynamics applied to both the dry and the moist atmosphere. Effective: Spring 2001
Prerequisite:

METEO 434 Radar Meteorology (3) Fundamental operating principles of radars, with application to observation of meteorological phenomena. Effective: Fall 2001
Prerequisite: Concurrent: METEO 414

METEO 436 Radiation and Climate (3) Elements of earth-sun geometry, radiative transfer, photochemistry, remote sensing of the atmosphere, physical climatology, climate forcing. Effective: Fall 2009 Ending: Fall 2012
Concurrent: METEO 431

METEO 436 Radiation and Climate (3) Elements of earth-sun geometry, radiative transfer, photochemistry, remote sensing of the atmosphere, physical climatology, climate forcing. Effective: Spring 2013 Future: Spring 2013
Prerequisite: Concurrent: METEO 431

METEO 437 Atmospheric Chemistry and Cloud Physics (3) Properties of aerosols and clouds, cloud nucleation and precipitation processes, atmospheric electricity, cloud and precipitation chemistry, biogeochemical cycles. Effective: Fall 2009 Ending: Fall 2012
Prerequisite:

Prerequisite:

METEO 440W Principles of Atmospheric Measurements (3) Theory and practices used in measurement and analysis of meteorological variables.
Effective: Fall 2010
Prerequisite:

METEO 445 Laboratory in Atmospheric Physics I (1) Measurement practices, data analysis and management, radiometry lidars and radars, trace gas measurements.
Effective: Spring 1991
Prerequisite:

METEO 446 Laboratory in Atmospheric Physics II (1) Experimental practices in cloud and aerosol physics, atmospheric electricity, atmospheric chemistry, radar meteorology.
Effective: Spring 1991
Prerequisite:

METEO 451 Introduction to Physical Oceanography (3) Air-sea interaction, wind-driven and thermohaline circulations, upwelling, El Nino, waves, and tides.
Effective: Spring 2007
Prerequisite:

METEO 452 Tropical Meteorology (3) Atmospheric processes in the tropics; mass, heat, energy, momentum, and water vapor budgets, cumulus convection, hurricanes and other disturbances.
Effective: Fall 1983
Prerequisite:

METEO 454 Introduction to Micrometeorology (3) The basic principles of atmospheric flow, introduction to the modeling of turbulent diffusion, and the use of EPA dispersion models.
Effective: Spring 2011
Prerequisite:

METEO 460 Weather Risk and Financial Markets (3) This course will introduce the role that weather plays as a source of financial and operational risk for businesses, market and other institutions.
Effective: Spring 2012
Prerequisite:

METEO 465 Middle Atmosphere Meteorology (3) A topical survey of physical, chemical, and dynamical processes at work in the stratosphere and mesosphere (middle atmosphere).
Effective: Spring 1988
Prerequisite:

METEO 466 Planetary Atmospheres (3) A survey of planetary atmospheres and the chemical and physical processes by which they form and evolve.
Effective: Spring 2001
Prerequisite:

METEO 469 From Meteorology to Mitigation: Understanding Global Warming (3) Introduction to global warming and climate change: the basic, science, projected impacts, and approaches to mitigation.
Effective: Summer 2010
Prerequisite:

METEO 470 Climate Dynamics (3) The fundamental principles that govern Earth's climate and their relevance to past and future climate change.
Effective: Spring 2002 Ending: Fall 2012
Prerequisite: Concurrent: METEO 436

METEO 470 Climate Dynamics (3) The fundamental principles that govern Earth's climate and their relevance to past and future climate change.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

METEO 471W Observing Meteorological Phenomena (3) Teaching the observational and interpretative skills needed to read the sky.
Effective: Spring 1999
Prerequisite:

METEO 473 Application of Computers to Meteorology (3) Application of statistical and numerical methods to practical problems in meteorology.
Effective: Spring 2008
Prerequisite:

METEO 474 Computer Methods of Meteorological Analysis and Forecasting (3) Distribution of scalars and vectors; sampling; regression and correlation in two and three dimensions; time series, statistical forecasting; forecast verification.
Effective: Summer 2010
Prerequisite:
METEO 477 (E E 477) Fundamentals of Remote Sensing Systems (3) The review of fundamental physical properties leads into discussions of various techniques, including imaging, spectroscopy, radiometry, and active sensing. Effective: Spring 2008
Prerequisite:

Prerequisite:

METEO 480W Undergraduate Research (3) A research thesis will be prepared. A written and oral presentation required. Effective: Summer 1991
Prerequisite:

METEO 481 Weather Communications I (3) Multi-instructor weather communications survey including forecasting, science teaching and writing, television and radio broadcasting, climate studies, forensics, industrial applications. Effective: Spring 2004
Prerequisite:

METEO 482 Weather Communications II (3) Multi-instructor workshop designed to mimic real-life applications of weather communications in industry, broadcasting, the courtroom, and the classroom. Effective: Spring 2002
Prerequisite:

METEO 483 Weather Communications III (3) Individualized course designed for in-depth study of weather communications in industry, broadcasting, the courtroom and/or the classroom. Effective: Spring 2002
Prerequisite:

METEO 484 Weather Communications Apprenticeship (3) Mentor-led course that focuses on a specific issue of problem in weather communications related to broadcasting, climate or industry. Effective: Summer 2003
Prerequisite:

METEO 485 National Weather Service Operations (2-3) Joint instruction with lead personnel from the State College National Weather Service Office on a variety of operational weather topics. Effective: Summer 2003
Prerequisite:

METEO 486 Pennsylvania Climate Studies (1-2 per semester/maximum of 3) An overview of the Pennsylvania State Climate Office and an introduction to various aspects of its operations. Effective: Spring 2011
Prerequisite:

METEO 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 2010

METEO 495A Meteorology Communications Internship (3 per semester/maximum of 6) Internship focusing on communication of weather forecasts or other meteorological information. Effective: Summer 2010
Prerequisite:

METEO 495B Meteorology Private Sector Internship (3 per semester/maximum of 6) Internship focusing on meteorological problems and applications pursued by private sector companies. Effective: Summer 2010
Prerequisite:

METEO 495C Meteorological Operations Internship (3 per semester/maximum of 6) Internship focusing on time-sensitive meteorological applications such as weather or climate forecasts that are produced. Effective: Summer 2010
Prerequisite:

METEO 495D Meteorological International Internship (3 per semester/maximum of 6) Meteorological internship in an international setting. Effective: Summer 2010
Prerequisite:

METEO 495E Meteorological Off-Campus Research Internship (3 per semester/maximum of 6) Off-campus meteorological internship focusing on a research project. Effective: Summer 2010
Prerequisite:

METEO 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1983

METEO 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

The Pennsylvania State University
METEO 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

METEO 501 Atmospheric Phenomena (3) Overview of the complex interactions within the atmosphere, ranging from molecular to global scale.
Effective: Spring 1998

METEO 511 The Weather From Global to Micro Scales (3) Conceptual models and underlying physics for weather phenomena on scales from the global general circulation to turbulence.
Effective: Fall 2010
Prerequisite:

METEO 512 Topics in Synoptic Meteorology (3) Application of atmospheric dynamics to the diagnosis and prediction of synoptic-scale weather.
Effective: Spring 2011
Prerequisite:

METEO 516 Mesoscale Forecasting (3) Competitive, simulated, operational, real-time forecasting is covered.
Effective: Summer 2005
Prerequisite:

METEO 520 Geophysical Fluid Dynamics (3) Fundamentals of fluid dynamics with an emphasis on basic concepts that are important for atmospheric and oceanic flows.
Effective: Spring 2009
Prerequisite:

METEO 521 Dynamic Meteorology (3) An overview of the major large-scale atmospheric motions of weather and climate.
Effective: Spring 1996
Prerequisite:

METEO 523 Modeling the Climate System (3) An introduction to the mathematical description and modeling of atmospheric and oceanic motions.
Effective: Summer 2005

METEO 526 Numerical Weather Prediction (3) Finite difference and spectral methods, barotropic and baroclinic models, filtered and primitive equation models, synoptic-scale and mesoscale models.
Effective: Fall 1983
Prerequisite:

METEO 527 Atmospheric Wave Motion (3) From classical and physical hydrodynamics to the numerical prediction of wave motion in a baroclinic atmosphere.
Effective: Spring 1988
Prerequisite:

METEO 529 Mesoscale Dynamics (3) A survey of concepts of mesoscale systems including frontogenesis, symmetric instability, mountain waves, wave CISK, and frontal waves.
Effective: Spring 1988
Prerequisite:

METEO 531 Atmospheric Thermal Physics (3) Advanced treatment of thermodynamic principles as they relate to atmospheric cloud physics, radiation and dynamics.
Effective: Fall 2010

METEO 532 Chemistry of the Atmosphere (3) Review of chemical principles in gaseous and multiphase environments; characteristics of key atmospheric components and chemical systems in the lower and middle atmosphere.
Effective: Summer 2007
Prerequisite:

METEO 533 Cloud Physics (3) Overview of cloud systems; theories of phase changes in clouds and micro-physical mechanisms of precipitation formation; cloud electrification.
Effective: Fall 1993
Prerequisite:

METEO 535 Radiative Transfer (3) Fundamentals of electromagnetic radiation and its interaction with matter; radiation and climate, atmospheric remote sensing, and observable atmospheric optical phenomena.
Effective: Spring 1996

METEO 538 Atmospheric Convection (3) Properties of shallow and deep atmospheric convection and interactions between convection, the boundary layer, and larger-scale weather systems.
Effective: Summer 1995
METEO 554 Atmospheric Turbulence (3) An introduction to the physics, structure, modeling, representation, and measurement of atmospheric turbulence.
Effective: Spring 1996
Prerequisite:

METEO 563 Bioclimatology (3) Climatic phenomena in their relation to life.
Effective: Fall 1988

METEO 565 Physics of the Upper Atmosphere (3) Graduate version of material that is covered in METEO 465.
Effective: Fall 1983
Prerequisite:

METEO 574 Atmospheric Dynamics Seminar (1-3 per semester/maximum of 15) A weekly seminar course that focuses on current and past research problems in dynamic meteorology and oceanography.
Effective: Spring 1988

METEO 575 Climate Dynamics Seminar (1-3 per semester/maximum of 15) Review of evolving climate dynamics and earth system science, including ongoing departmental research.
Effective: Spring 1988

METEO 580 Communication of Meteorological Research (1) Methods for effective written and oral presentation of meteorological research are reviewed.
Effective: Spring 1994

METEO 581 Topics in Atmospheric Chemistry (1-3 per semester/maximum of 15) Discussion of recent research papers in, and concepts pertinent to, acidic deposition, photochemical air pollution, and global chemical budgets.
Effective: Spring 1988

METEO 582 Ice and Snow Physics (1-3 per semester/maximum of 15) Structure of ice and its electrical, optical, mechanical, and surface properties; snow formation in the atmosphere.
Effective: Fall 1991

METEO 588 Oceans and Climate Seminar (2) A focussed discussion on some aspect of the ocean's role in the climate system. Theme to vary from semester to semester.
Effective: Spring 2012

METEO 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1988

METEO 591 Development and Ethics in the Atmospheric Sciences (1) Provide a forum for discussion of scholarship and research integrity as well as critical components of professional development.
Effective: Fall 2010

METEO 592 Research Proposal Preparation in the Atmospheric Sciences (1) This course familiarizes graduate students with research rigor, proposals, and processes.
Effective: Fall 2010

METEO 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

METEO 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

METEO 597A The Atmospheric Boundary Layer (3) This course will cover the structure of the atmospheric boundary layer, its governing equations, and current observational and numerical methods.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

METEO 597A General Circulation and Climate (3) Students gain insight into primary general circulation processes through theory and experiment, with applications to climate and climate change emphasized.

METEO 597B Remote Sensing of the Earth's Atmosphere (3) Techniques and uncertainties in atmospheric composition and surface property measurements, satellite data analysis and applications, fundamentals of radiative transfer.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

The Pennsylvania State University
METEO 600 **Thesis Research** (1-15) No description.  
Effective: Fall 1983

METEO 601 **Ph.D. Dissertation Full-Time** (0) No description.  
Effective: Fall 1983

METEO 602 **Supervised Experiences in College Teaching** (1-3 per semester/maximum of 6) No description.  
Effective: Fall 1983

METEO 610 **Thesis Research Off Campus** (1-15) No description.  
Effective: Fall 1983

METEO 611 **Ph.D. Dissertation Part-Time** (0) No description.  
Effective: Fall 1983

METEO 801 **Understanding Weather Forecasting for Educators** (3) Fundamental principles of synoptic and physical meteorology, remote sensing and data analysis in the setting of mid-latitude weather forecasting.  
Effective: Summer 2008

METEO 802 **Fundamentals of Tropical Forecasting for Educators** (3) Applying atmospheric principles to the tropics, with an emphasis on the development, structure, prediction, and destructive impact of hurricanes.  
Effective: Summer 2008  
Prerequisite:

METEO 803 **Fundamentals of Mesoscale Weather Forecasting for Educators** (3) Applying atmospheric principles to small-scale weather systems, with an emphasis on the conceptual modeling and short-range prediction of severe thunderstorms.  
Effective: Summer 2008  
Prerequisite:

METEO 804 **Special Topics in Weather Forecasting for Educators** (3) Exploring specialized weather forecasting topics and techniques spanning from mesoscale to planetary spatial scales and short-term to long-range time scales.  
Effective: Summer 2008  
Prerequisite:

METEO 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.  
Effective: Summer 2007

Microbiology-Hy (MICRO)

MICRO 550 Medical Microbiology (2) Principles of medical microbiology: host-parasite relationships; structure and function of viruses, bacteria, and fungi as agents causing human disease.
Effective: Fall 1984

MICRO 551 Medical Microbiology (3) Principles of medical microbiology: host-parasite relationships; structure and function of viruses, bacteria, and fungi as agents causing human disease.
Effective: Fall 1984
Prerequisite:
MICRO 553 Science of Virology (4) Replication of viruses and effects on host cells, including oncogenic properties of viruses and cellular growth and survival pathways disrupted.
Effective: Fall 2011

MICRO 554 Principles of Immunology (2) Study of immune response. Nature of antigens, structure, function of antibodies, hypersensitivity, transplantation and tumor immunology, autoimmunity, and immunosuppression.
Effective: Fall 1983

MICRO 560 Concepts in Immunology (4) Selected lectures/readings in advanced immunological concepts; emphasis on lymphocyte function and applications to anti-viral/tumor immunity.
Effective: Fall 2011
Prerequisite:
MICRO 572 Literature Reports (1 per semester) Weekly analysis of current literature in microbiology.
Effective: Fall 1983

MICRO 581 Immunology A: Basic Concepts in Innate and Adaptive Immunity (1) Discuss innate immune mechanisms and the basic concepts and molecular/cellular components of adaptive immune system.
Effective: Fall 2007

MICRO 582 Immunology B: Adaptive Immunity (1) Discuss adaptive immune mechanisms.
Effective: Fall 2007
Prerequisite:
MICRO 583 Viral Vectors (1) Use and design of viral vectors in research land use in gene therapy; exploration of viral vector strengths and limitations.
Effective: Fall 2007
Prerequisite:
MICRO 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

MICRO 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

MICRO 597 Special Topics (1-9) Formal courses on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

MICRO 600 Thesis Research (1-15) No description.
Effective: Summer 1983

MICRO 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 1983

MICRO 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Teaching students laboratory techniques and tests that are used to identify microorganisms and to aid in the diagnosis of disease.
Effective: Spring 2005

MICRO 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 1983

MICRO 611 Ph.D. Dissertation Part-Time (0) No description.

The Pennsylvania State University
Mineral Engr Mgmt (M E M)

M E M 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1994

M E M 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005

Effective: Fall 1983

Effective: Fall 1983

Mineral Processing (MN PR)

MN PR 401 Mineral Process Engineering (3) Unit operations for processing particulate materials: comminution, screening, classification, slurry pumping, thickening, filtration, etc.; application to mineral processing plant design. Effective: Spring 2001
Prerequisite:

MN PR 413 Mineral Processing Laboratory (1) A laboratory study of the chemical and physical principles involved in practical mineral processing operations. Effective: Spring 1999
Prerequisite:

MN PR 424 Coal Preparation (3) Unit operations, flowsheets, and testing methods used in preparation of coal. Effective: Spring 1999
Prerequisite:

MN PR 425 Interfacial Phenomena and Flotation (3) Surface and interfacial phenomena related to flotation agglomeration, flocculation, and dispersion of particles. Application to mineral separation and related processes. Effective: Fall 2009
Prerequisite:

MN PR 426 (MATSE 426) Aqueous Processing (3) A study of the chemical and engineering principles pertinent to metal processing in aqueous systems: hydrometallurgical extraction, plating, materials preparation. Effective: Fall 2009
Prerequisite:

MN PR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1999

MN PR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 1999

MN PR 505 Physical Separations in Mineral Processing (3) Intensive study of theory and applications of gravity, magnetic, electrostatic, centrifugal, and other methods of mineral processing. Effective: Spring 1999
Prerequisite:

MN PR 507 (MATSE 560) Hydrometallurgical Processing (3) Fundamental physico-chemical factors underlying the aqueous extraction and recovery of metals and nonmetals from ores, minerals, and scrap metal. Effective: Spring 2003
Prerequisite:

MN PR 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1999

MN PR 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1999

MN PR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 1999

MN PR 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 1999

MN PR 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Spring 1999

MN PR 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in development of instructional materials, organizing and conducting lectures and laboratories and evaluating students in undergraduate level courses (1-499).

The Pennsylvania State University

MN PR 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Spring 1999

Mining (MNG)

MNG 401 Introduction to Mining Operations (1) An introduction to underground and surface mining methods; selection of extraction equipment; relevant auxiliary operations. Not intended for Mining Engineering majors.
Effective: Spring 2008
Prerequisite:

MNG 404 Mine Materials Handling Systems (2) Analysis and design of materials-handling systems in mining, such as belt conveyors, locomotives, and hoisting.
Effective: Spring 2011

MNG 410 Underground Coal Extraction (2) Underground coal-mine design; extraction techniques; description of the various auxiliary operations as they relate to the mining methods.
Effective: Spring 1999 Ending: Summer 2012
Prerequisite:

MNG 410 Underground Mining (3) Underground mine design; extraction techniques; description of auxiliary operations as they relate to the mining methods.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

MNG 411 Mine Systems Engineering (2) Applied operations research and systems methods for decision making in mine operations; time and systems studies to improve productivity.
Effective: Spring 1999
Prerequisite:

MNG 412 Mineral Property Evaluation (3) Ore reserve estimation using statistics and geostatistics, mine cost estimation, engineering economy concepts applied to mineral deposits.
Effective: Spring 1999
Prerequisite:

MNG 422 Mine Ventilation and Air Conditioning (3) Quality, quantity, and temperature-humidity control of the mine atmosphere; general mine environmental control.
Effective: Fall 2007
Prerequisite:

MNG 431 Rock Mechanics (3) Ground stresses, laboratory rock properties, laboratory and field instrumentation, rock mass characteristics, subsidence, slope stability, design of mine workings.
Effective: Fall 2003 Ending: Summer 2012
Prerequisite:

MNG 441 Surface Mining Systems and Design (3) Design of surface mining for noncoal and coal minerals; emphasis on quarry and strip mining planning parameters: unit operations, systems, haulroads, draglines, spoil stability, reclamation, legal requirements, and health and safety.
Effective: Spring 1999
Prerequisite:

MNG 451W Mining Engineering Project (1-5) Independent and integrative design and report of specific mine evaluation, layout, equipment selection, environmental control, permitting, and financial analysis.
Effective: Spring 1999
Prerequisite:

MNG 460 Mine Maintenance Engineering (3) Mine maintenance system design; maintenance planning and management; safety and cost analysis of maintenance programs.
Effective: Spring 1999

MNG 470 Mining and Geologic Structures (3) Study of geologic structures and their impacts on mining operations.
Effective: Summer 2009
Prerequisite:

MNG 497 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2008

MNG 515 Mine Systems Simulation (3) Principles and practices of probabilistic and deterministic simulation in the analysis of operating systems related to mills and mines.
Effective: Spring 1999
Prerequisite:

MNG 541 Surface Mine Equipment Selection Analysis (3) Design analysis and selection criteria for principal surface mine equipment, their interaction in operation, and auxiliary equipment requirements.
Effective: Spring 1999
Prerequisite:
MNG 554 **Rock Mechanics Design** (3) Engineering design process; design of mines, tunnels, slopes, and underground chambers; guided design concept; creativity and innovation; group design project.
Effective: Spring 1999
Prerequisite: MNG 590 (EME 590, F SC 590, P N G 590) **Colloquium** (1-3) Continuing seminars which consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.
Effective: Spring 2009

MNG 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

MNG 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1999

MNG 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1999

MNG 599 (IL) **Foreign Study** (1-12 maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005

MNG 600 **Thesis Research** (1-15) No description.
Effective: Spring 1999

MNG 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Spring 1999

MNG 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Spring 1999

MNG 611 **Ph.D. Dissertation Part Time** (0) No description.
Effective: Spring 1999

Mngmt Info Systms-Bd (MISBD)

MISBD 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

MISBD 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

Last Import from UCM: June 2, 2012 12:27 PM
Molecular Medicine (M M)

M M 600 Thesis Research (1-9 per semester/maximum of 36) Laboratory work on thesis project. Effective: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
Molecular Toxicology (MT)

MT 596 Individual Studies (1-3 per semester/maximum of 6) Laboratory Rotations for first year students.
Effective: Summer 2012

MT 600 Thesis Research (1-9 per semester/maximum of 36) Laboratory work on thesis project.
Effective: Summer 2012

MT 601 Thesis Preparation (0) MT full time thesis preparation.
Effective: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
Mstr Law Courses (LLMLW)

LLMLW 900 Introduction to U.S. Legal Systems (2) To develop a good foundation for the LL.M. student's other course work, this course introduces the United States court system, the role of the Constitution in the United States legal system, and other foundation materials in United States law. The goal is to introduce students to distinctive aspects and/or fundamental principles in U.S. law. Enrollment in this course is limited to LL.M. candidates.
   Effective: Fall 2011
   Concurrent: LLMLW 901

LLMLW 901 LLM Legal Analysis, Writing and Research (2) This course explores U.S. common law analytic methods and discourse. Students will analyze cases and statutes to solve client problems. Students will draft objective memoranda and other documents to communicate their legal analysis in writing. Students will also learn the basics of U.S. legal research.
   Effective: Fall 2011

LLMLW 902 Advanced LLM Legal Analysis Writing & Research (2) Building on the LLM. Legal Analysis, Writing and Research course, students will develop common law communication and research skills in the persuasive writing/advocacy context. Students will also develop effective client letter writing skills in a U.S. legal setting. The final portion of the course will contract drafting.
   Effective: Spring 2012
   Prerequisite:

LLMLW 903 Legal English Communication (2) The course covers foundational principles of US common law, statutory analysis, and legal methods with an emphasis on development of English communication skills for legal professionals. Students develop writing, speaking and listening skills and gain experience and confidence in English communication in law school, and in legal professional contexts. Only LL.M. students may enroll, and only with the permission of the Director of Graduate and International Programs.
   Effective: Summer 2012

LLMLW 904 US Common Law Methods (4) The course is for LL.M. students who speak English as a second language. It serves as a companion to [a substantive law course, e.g. Constitutional Law I]. Students will build skills in analyzing cases, applying case holdings to hypothetical facts and understanding the material presented in the substantive law course. Also, students will learn and practice skills necessary for success in law school, e.g., preparation of effective case briefs, class notes, and course outlines.
   Effective: Summer 2012

LLMLW 997 Special Topics (4) Special Topics
   Effective: Spring 2012

Last Import from UCM: June 2, 2012 12:27 PM
Muscul Medicine-Hy (MSC)

MSC 727 Musculoskeletal Medicine (3) Interdisciplinary - Medical Education
Effective: Spring 2003
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Music (MUSIC)

Individual instruction in technique, literature, and pedagogy is offered in six categories covering eighteen instruments:

- **BRASS**: Trumpet, French horn, trombone, euphonium, tuba
- **KEYBOARD**: Piano, organ
- **STRINGS**: Violin, viola, violoncello, doublebass
- **WOODWINDS**: Flute, oboe, clarinet, bassoon, saxophone
- **PERCUSSION**
- **VOICE**

For each instrument individual instruction in offered to different types of students at different levels:

- **Primary instrument**: Student in B.A. (Music) and B.S. (Music Ed) Levels I-VII
- **Performance instrument**: Students in B.Mus. Level I-VII
- **Secondary instrument**: Nonmajor students or others using this as secondary instrument.

The courses are designated according to a particular pattern for identification on the student’s transcript and in the *Schedule of Classes*. Applied music fees are required for individualized instruction: $175 for a 1-credit course; $250 for a 2-credit course; $250 for a 3-credit course. Examples of listings:

**MUSIC 400 Solo Recital** (1) Required recital for Performer’s Certificate.
Effective: Spring 1994 Ending: Summer 2012
Prerequisite:

**MUSIC 400J Solo Recital** (1) Required recital for Performer’s Certificate.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

**MUSIC 412 Jazz Pedagogy** (2) The development of advanced skills in pedagogy for teaching jazz bands.
Effective: Summer 1994
Prerequisite:
MUSIC 414 String Pedagogy (1-2) The development of skills in pedagogy for teaching strings.
Effective: Spring 1992
Prerequisite:

MUSIC 415 Woodwind Pedagogy (1-2) The development of skills in pedagogy for teaching woodwinds.
Effective: Spring 1992
Prerequisite:

MUSIC 416 Brass Pedagogy (1-2) The development of skills in pedagogy for teaching brass.
Effective: Spring 1992
Prerequisite:

MUSIC 417 Percussion Pedagogy (1-2) The development of advanced skills in pedagogy for teaching percussion.
Effective: Summer 1992
Prerequisite:

MUSIC 418 Voice Pedagogy (2) Analysis of techniques of teaching voice and studies of related music literature and pedagogical writings.
Effective: Spring 2004
Prerequisite:

MUSIC 419 Piano Pedagogy I (2) Analysis of beginning teaching methods and teaching strategies for children.
Effective: Spring 1997
Prerequisite:

MUSIC 420 Song Writing and Recording (3) Song composition, arranging and recording in a variety of style genres.
Effective: Spring 2011
Prerequisite:

MUSIC 421 Jazz Combo Class (1) Study and performance of small group jazz.
Effective: Summer 1994
Prerequisite:

MUSIC 422 Jazz Harmony and Arranging (3) Analysis and composition of jazz tunes and chord progressions; instrumental and vocal arranging in the jazz idiom.
Effective: Fall 1983
Prerequisite:

MUSIC 424 Piano Pedagogy II (2) Analysis of techniques of teaching intermediate-early advanced level piano and studies of music literature and pedagogical writings.
Effective: Spring 1997
Prerequisite:

MUSIC 425 Advanced Voice Pedagogy (2) Analysis of techniques of teaching voice, supervised teaching, studies of studio materials and related topics.
Effective: Spring 2004
Prerequisite:

MUSIC 429 Aural Review for Graduate Students (1) An intensive review of the aural skills required for a theoretical understanding of 18th- and 19th-century music.
Effective: Summer 1994
Prerequisite:

MUSIC 431 ADVANCED TONAL ANALYSIS (2-3) Advanced techniques of musical analysis.
Effective: Fall 1996
Prerequisite:

MUSIC 432 Graduate Review of Twentieth-Century Analysis (2-3) The theory and analysis of style in music of the twentieth century.
Effective: Fall 1997
Prerequisite:

MUSIC 433 Advanced Analysis of Twentieth Century Music (2-3) In-depth studies of selected twentieth-century repertoires and/or analytical models.
Effective: Summer 1996
Prerequisite:

MUSIC 435 Score Reading (1) Introduction in score reading at the keyboard.
Effective: Spring 1991
Prerequisite:

MUSIC 441W Emphasis in Elementary General and Choral Music (3) Selection and application of materials, methods, teaching and assessment strategies for elementary general and choral music settings.
Effective: Spring 2011
Prerequisite:

MUSIC 442W Capstone Experience in Middle School General and Choral Music (3) Capstone experience to teaching in general and choral middle school settings.
Effective: Fall 2007
Prerequisite:

MUSIC 444W Emphasis in Elementary and Intermediate Band (3) Examination and application of teaching strategies and
materials for students planning to teach band in the elementary and middle schools.

Effective: Spring 2011
Prerequisite:

MUSIC 445W Emphasis in High School Band (3) Examination and application of teaching strategies and materials for students planning to teach high school bands.

Effective: Spring 2011
Prerequisite:

MUSIC 446W Emphasis in Strings and Orchestra (3) Development of teaching techniques for instructing elementary and secondary string/orchestra student musicians for music education majors.

Effective: Spring 2011
Prerequisite:

MUSIC 450 Teaching Marching Band (2) Traditional and contemporary drill design principles, show development strategies, instructional techniques, and organizational procedures involved in teaching marching band.

Effective: Fall 2007
Prerequisite:

MUSIC 451 Computer Programming for Musicians (3 per semester/maximum of 12) In-depth study of music programming techniques.

Effective: Spring 2011
Prerequisite:

MUSIC 455 Technology in Music (1-3:1.5:1.5) Survey of how musical information is stored and processed in computer systems.

Effective: Spring 2008
Prerequisite:

MUSIC 458 Electronic Music Composition (3) An introduction to the art of composition in the electronic audio medium.

Effective: Spring 2011
Prerequisite:

MUSIC 460 Teaching Musical Cultures (2) Exploration of the world's musical cultures and the implication of and procedures for teaching multicultural music. Limited to upper division music majors or permission of program.

Effective: Summer 2006
Prerequisite:

MUSIC 461W Studies in Music History: Antiquity to 1600 (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from antiquity to 1600, with emphasis on writing and research.

Effective: Fall 2010
Prerequisite:

MUSIC 462W Studies in Music History: 1550-1750 (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from 1550-1750, with emphasis on writing and research.

Effective: Fall 2010
Prerequisite:

MUSIC 463W Studies in Music History: 1700-1900 (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from 1700-1900, with emphasis on writing and research.

Effective: Fall 2010
Prerequisite:

MUSIC 464W Studies in Music History: 1850-Present (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from 1850 to the present, with emphasis on writing and research.

Effective: Fall 2010
Prerequisite:

MUSIC 465 Advanced Conducting I (3) Advanced instruction in conducting; conducting techniques specific to instrumental or choral music; emphasis on score study and rehearsal technique.

Effective: Summer 1994
Prerequisite:

MUSIC 466 Advanced Conducting II (2 per semester/maximum of 8) Standard scores of symphonies, tone poems, operas, oratorios, and shorter vocal and instrumental works studied from the viewpoint of the conductor.

Effective: Spring 1995
Prerequisite:

MUSIC 467 Opera Workshop (1-3 per semester/maximum of 6) History, analysis, and production of operas from sixteenth century to present.

Effective: Spring 2001
Prerequisite:

MUSIC 468 Acting for Singers (2 per semester/maximum of 4) To help students develop authentic and specific characters/portrayals on stage through physical and emotional awareness.

Effective: Fall 2008
Prerequisite:

MUSIC 471 Structural and Sixteenth-Century Counterpoint (2) Advanced species counterpoint and its application to the sixteenth-century style.

Effective: Fall 1983
Prerequisite:

MUSIC 472 Eighteenth-Century Counterpoint (2) Imitative and nonimitative counterpoint in the style of Bach.
Effective: Fall 1983
Prerequisite:

MUSIC 473 Composition VII (3) Composition instruction for fourth-year composition majors.
Effective: Spring 1998 Ending: Summer 2012
Prerequisite:

MUSIC 473J Composition VII (3) Composition instruction for fourth-year composition majors.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

MUSIC 474 Composition VIII (3) Composition instruction for fourth-year composition majors.
Effective: Spring 1998 Ending: Summer 2012
Prerequisite:

MUSIC 474J Composition VIII (3) Composition instruction for fourth-year composition majors.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

MUSIC 476W B.A. Senior Project (3) A semester project appropriate to student's option in B.A. program (e.g., research paper, performance with program notes, or related paper).
Effective: Spring 1992
Prerequisite:

MUSIC 478 Vocal Literature (3) Introduction to the literature for solo voice in opera, oratorio, cantata, art song, and chamber music from the baroque to the present.
Effective: Spring 1997
Prerequisite:

MUSIC 480 Opera Literature (3) Studies in the development of the opera from 1600 to the present, treating both libretto and music.
Effective: Spring 1997
Prerequisite:

MUSIC 481 Keyboard Literature (3) Studies in the development of keyboard music and instruments; a survey of all eras using listening, analysis, and performance.
Effective: Spring 1997
Prerequisite:

MUSIC 483 Seminar in Voice Pedagogy (2) Survey of literature relevant to the teaching of voice from historical sources through recent pedagogical scholarship.
Effective: Spring 2004
Prerequisite:

MUSIC 485 Chamber Music Literature (3) Survey of chamber music for strings, winds, and brass instruments from the mid-16th century to the present day.
Effective: Spring 1997
Prerequisite:

MUSIC 487 Orchestral Literature (3) Survey of orchestral literature.
Effective: Spring 1997
Prerequisite:

MUSIC 488 Studies in the Major Performance Area (1-2) Selected studies in music literature specific to the student's major performance area. Will include research, analysis and performance.
Effective: Spring 2011

MUSIC 489 Studio and Recital Accompaniment (1 per semester/maximum of 4) Advanced keyboard accompaniment of student soloists in the studio and in public performance under faculty supervision.
Effective: Fall 1983
Prerequisite:

MUSIC 493 Sonata Duos (1 per semester/maximum of 4) Preparation for performance of advanced sonata literature for various individual instruments with keyboard.
Effective: Fall 1983
Prerequisite:

MUSIC 494 Research Topics (1-3) Supervised research leading to senior thesis or project.
Effective: Fall 1983 Ending: Summer 2012

MUSIC 494 Research Topics (1-3 per semester/maximum of 6) Supervised research leading to senior thesis or project.
Effective: Fall 2012 Future: Fall 2012

MUSIC 494H Research Topics (1-3) Supervised research leading to senior thesis or project.
Effective: Fall 2007 Ending: Summer 2012

The Pennsylvania State University
MUSIC 494H Research Topics (1-3 per semester/maximum of 6) Supervised research leading to senior thesis or project. Effective: Fall 2012 Future: Fall 2012

MUSIC 495A Student Teaching: General Music (5-7) Observation and teaching under supervision. Effective: Fall 2001
Prerequisite: Concurrent: MUSIC 442

MUSIC 495B Student Teaching: Choral Music (5-7) Observation and teaching under supervision. Effective: Fall 2001
Prerequisite: Concurrent: MUSIC 443

MUSIC 495C Student Teaching: Instrumental Music (5-7) Observation and teaching under supervision. Effective: Fall 2001
Prerequisite: Concurrent: MUSIC 444

MUSIC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

MUSIC 496H Independent Studies - Honors (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2011

MUSIC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

MUSIC 497A Review of Harmony/Analysis (2) Devoted to in-depth study of tonal harmony and analysis, beginning with a review of diatonic progressions and continuing with chromatic harmony. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MUSIC 497B Survey Music History (3) For graduate students who need remedial work in music history. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MUSIC 497B Clarinet Literature (1) Selected studies in music literature specific to the clarinet. Will include research, analysis, and performance. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

MUSIC 497C iEnsemble (1) Theoretical, compositional, and application of I technology. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MUSIC 497C Business of Music (1) Survey of topics related to a career in music performance-including auditions, competitions, finances, work abroad, etc. Guest lecturers included. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

MUSIC 497D Double Bass Excerpts (1) This course is designed to study in depth a series of double bass excerpts from the standard orchestral and opera repertoire. We will look at how to prepare a mock audition behind a screen at the end of the semester. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

MUSIC 497E Horn Literature (1-2) Selected studies in music literature specific to the french horn. Will include research, analysis, and performance. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

MUSIC 497F Double Bass Excerpts (1) This course is designed to study in depth a series of double bass excerpts from the standard orchestral and opera repertoire. We will look at how to prepare a mock audition behind a screen at the end of the semester. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013
MUSIC 497G Early Childhood Practicum (1) Students will plan and deliver weekly music classes for preschool children at the benefit family center and complete a case study on one child they observe throughout the semester. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

MUSIC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

MUSIC 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Spring 2007

MUSIC 500 Introduction to Music Reference and Research Materials (2) A study of musicological reference and research materials in English and Western European languages, with exercises in their use. Effective: Fall 1983

MUSIC 502 Early Music Ensemble (1) Ensemble for the performance and study of Renaissance and Baroque music on instruments of the era. Effective: Summer 2002 Ending: Fall 2012

MUSIC 503 Concert Choir (1 per semester, maximum of 4) Rehearsal and performance of choral repertoire appropriate to mixed-voice ensemble of approximately sixty voices. Effective: Spring 1993 Ending: Fall 2012

MUSIC 505 Symphonic Wind Ensemble (1 per semester, maximum of 4) Rehearsal and performance of wind repertoire and concert band literature. Effective: Spring 1993

MUSIC 506 Symphonic Band (1 per semester, maximum of 4) Rehearsal and performance of symphonic band literature. A select group using standard instrumentation. Effective: Spring 1993 Ending: Fall 2012

MUSIC 507 Philharmonic Orchestra (1 per semester, maximum of 4) Orchestra rehearsal and performance. Effective: Spring 1993

MUSIC 508 Chamber Orchestra (1 per semester, maximum of 4) Chamber orchestra rehearsal and performance. Effective: Spring 1993

MUSIC 509 Centre Dimensions (1 per semester, maximum of 4) The rehearsal and performance of large jazz band literature ("charts") along with individualized formal study of jazz improvisation. Effective: Spring 1993 Ending: Fall 2012

MUSIC 511 Percussion Ensemble (1 per semester, maximum of 4) Study and performance of percussion chamber music in various instrumental combinations focusing on the classical and contemporary repertoire. Effective: Spring 1993 Ending: Fall 2012

MUSIC 519 Graduate Seminar in Intermediate Piano Pedagogy (2) Graduate seminar in intermediate teaching repertoire and strategies for piano from the Baroque to the 21st century. Effective: Summer 2008

MUSIC 520 Chamber Music for Strings (1 per semester, maximum of 4) Preparation for performance of (advanced) chamber music literature involving primarily stringed instruments--quartets and quintets. Effective: Spring 1993

MUSIC 521 Chamber Music for Woodwinds (1 per semester, maximum of 4) Preparation for performance of (advanced) chamber music literature involving primarily woodwind instruments--quartets and quintets. Effective: Spring 1993

MUSIC 522 Chamber Music for Brass (1 per semester, maximum of 4) Preparation for performance of (advanced) chamber music literature involving primarily brass instruments--quartets and quintets. Effective: Spring 1993

MUSIC 523 Sonata Duos (1 per semester, maximum of 4) Preparation for performance of (advanced) sonata literature for various individual instruments with keyboard.

The Pennsylvania State University
MUSIC 524 Graduate Seminar in Advanced Piano Pedagogy (2) Graduate seminar in advanced repertoire, history of piano pedagogy, and strategies for piano from the Baroque to the 21st century.
Effective: Summer 2008
Prerequisite:

MUSIC 531 Analytical Techniques (3) Twentieth-century theories of tonal music other than Schenker; emphasis on motivic, thematic, metric, and rhythmic analysis.
Effective: Spring 1992
Prerequisite:

MUSIC 532 Schenkerian Analysis (3) An intensive introduction to the analytical method developed by the Twentieth-century Austrian theorist and musicologist, Heinrich Schenker.
Effective: Summer 2011
Prerequisite:

MUSIC 533 The Pedagogy of Undergraduate Theory and History (2) A study of approaches to the teaching and learning of music theory (written and aural skills) and history.
Effective: Summer 1995
Prerequisite:

MUSIC 535 Composition (1-4) Composition of vocal, instrumental, and electronic media and preparation of compositions for performance.
Effective: Fall 1998 Ending: Fall 2012
Prerequisite:

MUSIC 535J Composition (1-4) Composition of vocal, instrumental, and electronic media and preparation of compositions for performance.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

MUSIC 560 Choral Conducting (2-4 per semester, maximum of 16) Study of choral conducting techniques, comprehensive score analysis, and supervised rehearsal and performance practicum.
Effective: Summer 1995 Ending: Fall 2012
Prerequisite:

MUSIC 560J Choral Conducting (2 per semester/maximum of 16) Study of choral conducting techniques, comprehensive score analysis, and supervised rehearsal and performance practicum.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

MUSIC 561 Orchestral Conducting (2-4 per semester, maximum of 8) Study of orchestral conducting technique, comprehensive score analysis, and supervised rehearsal and performance practicum.
Effective: Spring 2008
Prerequisite:

MUSIC 562 Band/Wind Ensemble Conducting (2-4 per semester, maximum of 16) Study of band and wind ensemble conducting, comprehensive score analysis, and supervised rehearsal and performance practicum.
Effective: Summer 1998 Ending: Fall 2012

MUSIC 562J Band/Wind Ensemble Conducting (2 per semester/maximum of 16) Study of band and wind ensemble conducting, comprehensive score analysis, and supervised rehearsal and performance practicum.
Effective: Spring 2013 Future: Spring 2013

MUSIC 565 Studio and Recital Accompaniment (1 per semester, maximum of 4) Keyboard accompaniment of student soloists in the studio and in public performance, under faculty supervision.
Effective: Spring 1993
Prerequisite:

MUSIC 572 Seminar in Musicology (3 per semester/maximum of 9) Research in selected areas of music history.
Effective: Fall 1983

MUSIC 573 Integrative Seminar in Music Theory and History (3 per semester/maximum of 9) Special topics (composer, style, genre) taught from both theoretical and historical perspectives.
Effective: Fall 2000
Prerequisite:

MUSIC 574 Seminar in Music Theory (3) Study of analytical techniques, aesthetics, writings, in music theory, music cognition, musical sketches, and mathematical models taught from a theory perspective.
Effective: Spring 2001
Prerequisite:

MUSIC 575 Integrative Conducting Seminar (1 per semester/maximum of 2) A seminar for choral, orchestral, and band/wind ensemble graduate conducting majors, taught by conducting faculty in all three areas.
Effective: Summer 1998
MUSIC 580 *Studies in Orchestral Literature* (1-3 per semester/maximum of 8) Selected studies in orchestral literature from the seventeenth century to the present.
Effective: Spring 2008 Ending: Fall 2012

MUSIC 580 *Studies in Orchestral Literature* (2 per semester/maximum of 8) Selected studies in orchestral literature from the seventeenth century to the present.
Effective: Spring 2013 Future: Spring 2013

MUSIC 582 *Studies in Band/Wind Ensemble Literature* (2-3 per semester/maximum of 8) Selected studies in band and wind ensemble literature from the Renaissance to the present.
Effective: Summer 1998 Ending: Fall 2012

MUSIC 582 *Studies in Band/Wind Ensemble Literature* (2 per semester/maximum of 8) Selected studies in band and wind ensemble literature from the Renaissance to the present.
Effective: Spring 2013 Future: Spring 2013

MUSIC 583 *Studies in Choral Literature* (2-3 per semester, maximum of 20) Selected studies in choral literature of all types from the Renaissance to the present.
Effective: Spring 1992 Ending: Summer 2012

MUSIC 583 *Studies in Choral Literature* (2 per semester, maximum of 8) Selected studies in choral literature of all types from the Renaissance to the present.
Effective: Fall 2012 Future: Fall 2012

MUSIC 585 *Graduate Seminar in Keyboard Music 1710 to 1820* (2) Seminar in music for keyboards (organ, harpsichord, pianoforte) from the early works of J.S. Bach (c. 1710) to late Beethoven.
Effective: Summer 2008
Prerequisite:

MUSIC 586 *Graduate Seminar in Piano Music 1820-1920* (2) Seminar in music for pianoforte from the early works of Schubert, circa 1820, to Rachmaninoff (Romantic and post-Romantic).
Effective: Summer 2008
Prerequisite:

MUSIC 587 *Graduate Seminar in Piano Music 1890-Present* (2) Seminar in modern music for pianoforte from the early works of Debussy (circa 1890) to the present day.
Effective: Summer 2008
Prerequisite:

MUSIC 588 *Seminar in Music Literature of the Major Performance Area* (1-3) Selected studies in music literature specific to the student's major performance area. Will include research, analysis, and performance.
Effective: Summer 1991

MUSIC 589 *Seminar in Piano Pedagogy* (2) Selected variable topics in piano pedagogy; includes research, performance and discussion of appropriate literature, and class participation.
Effective: Summer 1992
Prerequisite:

MUSIC 590 *Colloquium* (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1995

MUSIC 591 *Graduate Degree Performance* (1) A juried recital performance for students majoring in performance, composition, or conducting.
Effective: Spring 1985 Ending: Fall 2012
Prerequisite:

MUSIC 594 *Master's Paper Research* (1-6) Investigation of a specific problem in music or music education.
Effective: Fall 1983

MUSIC 595 *Internship* (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 1994
Prerequisite:

MUSIC 595B *Internship in College Teaching* (2) Identify goals for undergraduate courses in general music; develop and structure learning experience in music for students in higher education.
Prerequisite:

MUSIC 596 *Individual Studies* (1-9) Creative projects, including nonthesis research, which are supervised on an individual

The Pennsylvania State University
basis and which fall outside the scope of formal courses.
Effective: Spring 1987

MUSIC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

MUSIC 600 Thesis Research (1-15) No description.
Effective: Fall 1983

MUSIC 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

MUSIC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience for teaching assistants in music.
Effective: Fall 1983

Effective: Fall 1983

MUSIC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

MUSIC 801 Doctoral Solo Recital (DMA) (2 per semester/maximum of 4) Culminating solo recital(s) of artist-level repertoire; may be repeated with different repertoire.
Effective: Summer 2008 Ending: Fall 2012
Prerequisite:
MUSIC 801J Doctoral Solo Recital (DMA) (2 per semester/maximum of 4) Culminating solo recital(s) of artist-level repertoire; may be repeated with different repertoire.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:
MUSIC 802 DMA Lecture-Recital Monograph (1) Preparation of a monograph to be text of the DMA lecture-recital; must be approved prior to performance.
Effective: Summer 2008 Ending: Summer 2012
Prerequisite:
MUSIC 802J DMA Lecture-Recital Monograph (1) Preparation of a monograph to be text of the DMA lecture-recital; must be approved prior to performance.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:
MUSIC 803 Performance of the DMA Lecture-Recital (2) Performance of the D.M.A. lecture-recital (the lecture monograph to be pre-approved as MUSIC 802).
Effective: Summer 2008 Ending: Summer 2012
Prerequisite:
MUSIC 803J Performance of the DMA Lecture-Recital (2) Performance of the D.M.A. lecture-recital (the lecture monograph to be pre-approved as MUSIC 802).
Effective: Fall 2012 Future: Fall 2012
Prerequisite:
MUSIC 804 Chamber Music Recital (DMA) (1 per semester/maximum of 2) Recital devoted to chamber music (including song groups or cycles for voice and piano). May be repeated.
Effective: Summer 2008 Ending: Fall 2012
Prerequisite:
MUSIC 804J Chamber Music Recital (DMA) (1 per semester/maximum of 2) Recital devoted to chamber music (including song groups or cycles for voice and piano). May be repeated.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:
MUSIC 805 DMA Final Recital (3) Final, culminating solo recital of artist-level repertoire; independently prepared.
Effective: Summer 2008 Ending: Summer 2012
Prerequisite:
MUSIC 805J DMA Final Recital (3) Final, culminating solo recital of artist-level repertoire; independently prepared.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:
MUSIC 810 Choral Ensemble (1 per semester/maximum of 4) Rehearsal and performance of choral music.
Effective: Spring 2012
MUSIC 811 Instrumental Ensemble (1 per semester/maximum of 6) Rehearsal and performance of instrumental music.
Effective: Summer 2012

MUSIC 891J Graduate Degree Performance (1) A juried recital performance for students majoring in performance, composition, or conducting.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Music - Brass (BRASS)

BRASS 420J **Trumpet: Primary VII** (2) Individual instruction in trumpet one hour per week. For School of Music B.A. and B.S. majors.  
Effective: Fall 1983  
Prerequisite:

BRASS 421J **French Horn: Primary VII** (2) Individual instruction in French horn one hour per week. For School of Music B.A. and B.S. majors.  
Effective: Fall 1983  
Prerequisite:

BRASS 422J **Trombone: Primary VII** (2) Individual instruction in trombone one hour per week. For School of Music B.A. and B.S. majors.  
Effective: Fall 1983  
Prerequisite:

BRASS 423J **Euphonium: Primary VII** (2) Individual instruction in euphonium/baritone one hour per week. For School of Music B.A. and B.S. majors; other qualified students.  
Effective: Fall 1983  
Prerequisite:

BRASS 424J **Tuba: Primary VII** (2) Individual instruction in tuba one hour per week. For School of Music B.A. and B.S. majors; other qualified students.  
Effective: Fall 1983  
Prerequisite:

BRASS 430J **Trumpet: Performance VII** (3) Individual instruction in trumpet one hour per week. For B.Mus. trumpet performance majors.  
Effective: Fall 1983  
Prerequisite:

BRASS 431J **French Horn: Performance VII** (3) Individual instruction in French horn one hour per week. For B.Mus. French horn performance majors.  
Effective: Fall 1983  
Prerequisite:

BRASS 432J **Trombone: Performance VII** (3) Individual instruction in trombone one hour per week. For B.Mus. trombone majors.  
Effective: Fall 1983  
Prerequisite:

BRASS 433J **Euphonium: Performance VII** (3) Individual instruction in euphonium/baritone one hour per week. For B.Mus. euphonium/baritone majors.  
Effective: Fall 1983  
Prerequisite:

BRASS 434J **Tuba: Performance VII** (3) Individual instruction in tuba one hour per week. For B.Mus. tuba majors.  
Effective: Fall 1983  
Prerequisite:

BRASS 470J **Trumpet: Primary VIII** (2) Individual instruction in trumpet one hour per week. For School of Music B.A. and B.S. majors.  
Effective: Fall 1983  
Prerequisite:

BRASS 471J **French Horn: Primary VIII** (2) Individual instruction in French horn one hour per week. For School of Music B.A. and B.S. majors.  
Effective: Fall 1983  
Prerequisite:

BRASS 472J **Trombone: Primary VIII** (2) Individual instruction in trombone one hour per week. For School of Music B.A. and B.S. majors.  
Effective: Fall 1983  
Prerequisite:

BRASS 473J **Euphonium: Primary VIII** (2) Individual instruction in euphonium/baritone one hour per week. For School of Music B.A. and B.S. majors.  
Effective: Fall 1983  
Prerequisite:

BRASS 474J **Tuba: Primary VIII** (2) Individual instruction in tuba one hour per week. For School of Music B.A. and B.S. majors.  
Effective: Fall 1983  
Prerequisite:

BRASS 480J **Trumpet: Performance VIII** (3) Individual instruction in trumpet one hour per week. For B.Mus. trumpet performance majors.

The Pennsylvania State University
performance majors.
Effective: Fall 1983
Prerequisite:

BRASS 481J French Horn: Performance VIII (3) Individual instruction in French horn one hour per week. For B.Mus. French horn performance majors.
Effective: Fall 1983
Prerequisite:

BRASS 482J Trombone: Performance VIII (3) Individual instruction in trombone one hour per week. For B.Mus. trombone majors.
Effective: Fall 1983
Prerequisite:

BRASS 483J Euphonium: Performance VIII (3) Individual instruction in euphonium/baritone one hour per week. For B.Mus. euphonium/baritone majors.
Effective: Fall 1983
Prerequisite:

BRASS 484J Tuba: Performance VIII (3) Individual instruction in tuba one hour per week. For B.Mus. tuba majors.
Effective: Fall 1983
Prerequisite:

BRASS 500J Trumpet: Secondary (1) Individual instruction in trumpet one-half hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 501J French Horn: Secondary (1) Individual instruction in French horn one-half hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 502J Trombone: Secondary (1) Individual instruction in trombone one-half hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 503J Euphonium: Secondary (1) Individual instruction in euphonium/baritone one-half hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 504J Tuba: Secondary (1) Individual instruction in tuba one-half hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 510J Trumpet: Secondary (2) Individual instruction in trumpet one hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 511J French Horn: Secondary (2) Individual instruction in French horn one hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 512J Trombone: Secondary (2) Individual instruction in trombone one hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 513J Euphonium: Secondary (2) Individual instruction in euphonium/baritone one hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 514J Tuba: Secondary (2) Individual instruction in tuba one hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 530J Trumpet: Performance (4 per semester/maximum of 16) Individual instruction in trumpet one hour per week.
For graduate trumpet performance majors.
Effective: Fall 1986
Prerequisite:

BRASS 531J French Horn: Performance (4 per semester/maximum of 16) Individual instruction in French Horn one hour per week. For graduate French horn performance majors.
Effective: Fall 1986
Prerequisite:

BRASS 532J Trombone: Performance (4 per semester/maximum of 16) Individual instruction in trombone one hour per week. For graduate trombone majors.
Effective: Fall 1986
Prerequisite:

BRASS 533J Euphonium: Performance (4 per semester, maximum of 16) Individual instruction in euphonium one hour per week. For graduate euphonium majors.
Effective: Spring 1992
Prerequisite:
BRASS 534J Tuba: Performance (4 per semester/maximum of 16) Individual instruction in tuba two sessions per week. For graduate tuba performance majors.
Effective: Fall 1986
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Music - Keyboard (KEYBD)

KEYBD 420J **Piano: Primary VII** (2) Individual instruction in piano one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

KEYBD 430J **Piano: Performance VII** (3) Individual instruction in piano one hour per week. For B.Mus. piano performance majors.
Effective: Fall 1983
Prerequisite:

KEYBD 470J **Piano: Primary VIII** (2) Individual instruction in piano one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

KEYBD 480J **Piano: Performance VIII** (3) Individual instruction in piano one hour per week. For B.Mus. piano performance majors.
Effective: Fall 1983
Prerequisite:

KEYBD 500J **Piano: Secondary** (1) Individual instruction in piano one-half hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

KEYBD 501J **Organ: Secondary** (1) Individual instruction in pipe organ one-half hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

KEYBD 510J **Piano: Secondary** (1) Individual instruction in piano one hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

KEYBD 530J **Piano: Performance** (4 per semester/maximum of 16) Individual instruction in piano one hour per week. For graduate piano performance majors.
Effective: Fall 1986
Prerequisite:

KEYBD 580J **Piano Performance Doctoral/Artist Level** (4) One-hour weekly piano lessons with jury examination at end of each semester; repeatable course; four semesters required.
Effective: Summer 2008

Last Import from UCM: June 2, 2012 12:27 PM
Music - Percussion (PERCN)

PERCN 420J Percussion: Primary VII (2) Individual instruction in percussion one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

PERCN 430J Percussion: Performance VII (3) Individual instruction in percussion one hour per week. For B.Mus. percussion majors.
Effective: Fall 1983
Prerequisite:

PERCN 470J Percussion: Primary VIII (2) Individual instruction in percussion one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

PERCN 480J Percussion: Performance VIII (3) Individual instruction in percussion one hour per week. For B.Mus. percussion majors.
Effective: Fall 1983
Prerequisite:

PERCN 500J Percussion: Secondary (1) Individual instruction in percussion one-half hour per week.
Effective: Fall 1983
Prerequisite:

PERCN 510J Percussion: Secondary (2) Individual instruction in percussion one hour per week.
Effective: Fall 1983
Prerequisite:

PERCN 530J Percussion: Performance (4 per semester/maximum of 16) Individual instruction in percussion one hour per week. For graduate percussion performance majors.
Effective: Fall 1986
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
**Music - String (STRNG)**

**STRNG 420J Violin: Primary VII** (2) Individual instruction in violin one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

**STRNG 421J Viola: Primary VII** (2) Individual instruction in viola one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

**STRNG 422J Violoncello: Primary VII** (2) Individual instruction in violoncello one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

**STRNG 423J Double Bass: Primary VII** (2) Individual instruction in double bass one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

**STRNG 430J Violin: Performance VII** (3) Individual instruction in violin one hour per week. For B.Mus. violin performance majors.
Effective: Fall 1983
Prerequisite:

**STRNG 431J Viola: Performance VII** (3) Individual instruction in viola one hour per week. For B.Mus. viola performance majors.
Effective: Fall 1983
Prerequisite:

**STRNG 432J Violoncello: Performance VII** (3) Individual instruction in violoncello one hour per week. For B.Mus. violoncello performance majors.
Effective: Fall 1983
Prerequisite:

**STRNG 433J Double Bass: Performance VII** (3) Individual instruction in double bass one hour per week. For B.Mus. double bass performance majors.
Effective: Fall 1983
Prerequisite:

**STRNG 470J Violin: Primary VIII** (2) Individual instruction in violin one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

**STRNG 471J Viola: Primary VIII** (2) Individual instruction in viola one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

**STRNG 472J Violoncello: Primary VIII** (2) Individual instruction in violoncello one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

**STRNG 473J Double Bass: Primary VIII** (2) Individual instruction in double bass one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

**STRNG 480J Violin: Performance VIII** (3) Individual instruction in violin one hour per week. For B.Mus. violin performance majors.
Effective: Fall 1983
Prerequisite:

**STRNG 481J Viola: Performance VIII** (3) Individual instruction in viola one hour per week. For B.Mus. viola performance majors.
Effective: Fall 1983
Prerequisite:

**STRNG 482J Violoncello: Performance VIII** (3) Individual instruction in violoncello one hour per week. For B.Mus. violoncello performance majors.
Effective: Fall 1983
Prerequisite:
Effective: Fall 1983
Prerequisite:

STRING 500J Violin: Secondary (1) Individual instruction in violin one-half hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRING 501J Viola: Secondary (1) Individual instruction in viola one-half hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRING 502J Violoncello: Secondary (1) Individual instruction in violoncello one-half hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRING 503J Double Bass: Secondary (1) Individual instruction in double bass one-half hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRING 510J Violin: Secondary (2) Individual instruction in violin one hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRING 511J Viola: Secondary (2) Individual instruction in viola one hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRING 512J Violoncello: Secondary (2) Individual instruction in violoncello one hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRING 513J Double Bass: Secondary (2) Individual instruction in double bass one hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRING 530J Violin: Performance (4 per semester/maximum of 16) Individual instruction in violin one hour per week. For graduate violin performance majors.
Effective: Fall 1986
Prerequisite:

STRING 531J Viola: Performance (4 per semester/maximum of 16) Individual instruction in viola one hour per week. For graduate viola performance majors.
Effective: Fall 1986
Prerequisite:

STRING 532J Violoncello: Performance (4 per semester/maximum of 16) Individual instruction in violoncello one hour per week. For graduate violoncello performance majors.
Effective: Fall 1986
Prerequisite:

STRING 533J Double Bass: Performance (4 per semester/maximum of 16) Individual instruction in double bass one hour per week. For graduate double bass performance majors.
Effective: Fall 1986

Music - Voice (VOICE)

   Effective: Fall 2006
   Prerequisite:

VOICE 420J Voice: Primary VII (2) Individual instruction in voice one hour per week. For School of Music B.A. and B.S. majors.
   Effective: Fall 1983
   Prerequisite:

VOICE 430J Voice: Performance VII (3) Individual instruction in voice one hour per week. For B.Mus. voice performance majors.
   Effective: Fall 1983
   Prerequisite:

   Effective: Fall 2006
   Prerequisite:

VOICE 470J Voice: Primary VIII (2) Individual instruction in voice one hour per week. For School of Music B.A. and B.S. majors.
   Effective: Fall 1983
   Prerequisite:

VOICE 480J Voice: Performance VIII (3) Individual instruction in voice one hour per week. For B.Mus. voice performance majors.
   Effective: Fall 1983
   Prerequisite:

VOICE 500J Voice: Secondary (1) Individual instruction in voice one-half hour per week.
   Effective: Fall 1983
   Prerequisite:

VOICE 510J Voice: Secondary (2) Individual instruction in voice one hour per week.
   Effective: Fall 1983
   Prerequisite:

VOICE 530J Voice: Performance (4 per semester/maximum of 16) Individual instruction in voice one and one-half hours per week. For graduate voice performance majors.
   Effective: Fall 1986
   Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Music - Woodwinds (WWNDS)

WWNDS 420J **Flute: Primary VII** (2) Individual instruction in flute one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

WWNDS 421J **Oboe: Primary VII** (2) Individual instruction in oboe one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

WWNDS 422J **Clarinet: Primary VII** (2) Individual instruction in clarinet one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

WWNDS 423J **Bassoon: Primary VII** (2) Individual instruction in bassoon one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

WWNDS 424J **Saxophone: Primary VII** (2) Individual instruction in saxophone one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

WWNDS 430J **Flute: Performance VII** (3) Individual instruction in flute one hour per week. For B.Mus. flute performance majors.
Effective: Fall 1983
Prerequisite:

WWNDS 431J **Oboe: Performance VII** (3) Individual instruction in oboe one hour per week. For B.Mus. oboe majors.
Effective: Fall 1983
Prerequisite:

WWNDS 432J **Clarinet: Performance VII** (3) Individual instruction in clarinet one hour per week. For B.Mus. clarinet majors.
Effective: Fall 1983
Prerequisite:

WWNDS 433J **Bassoon: Performance VII** (3) Individual instruction in bassoon one hour per week. For B.Mus. bassoon performance majors.
Effective: Fall 1983
Prerequisite:

WWNDS 434J **Saxophone: Performance VII** (3) Individual instruction in saxophone one hour per week. For B.Mus. saxophone performance majors.
Effective: Fall 1983
Prerequisite:

WWNDS 470J **Flute: Primary VIII** (2) Individual instruction in flute one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

WWNDS 471J **Oboe: Primary VIII** (2) Individual instruction in oboe one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

WWNDS 472J **Clarinet: Primary VIII** (2) Individual instruction in clarinet one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

WWNDS 473J **Bassoon: Primary VIII** (2) Individual instruction in bassoon one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

WWNDS 474J **Saxophone: Primary VIII** (2) Individual instruction in saxophone one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

WWNDS 480J **Flute: Performance VIII** (3) Individual instruction in flute one hour per week. For B.Mus. flute performance majors.
Effective: Fall 1983
Prerequisite:

WWNDS 481J Oboe: Performance VIII (3) Individual instruction in oboe one hour per week. For B.Mus. oboe majors. Effective: Fall 1983
Prerequisite:

WWNDS 482J Clarinet: Performance VIII (3) Individual instruction in clarinet one hour per week. For B.Mus. clarinet majors. Effective: Fall 1983
Prerequisite:

Prerequisite:

WWNDS 484J Saxophone: Performance VIII (3) Individual instruction in saxophone one hour per week. For B.Mus. saxophone performance majors. Effective: Fall 1983
Prerequisite:

WWNDS 500J Flute: Secondary (1) Individual instruction in flute one-half hour per week. Effective: Fall 1983
Prerequisite:

WWNDS 501J Oboe: Secondary (1) Individual instruction in oboe one-half hour per week. Effective: Fall 1983
Prerequisite:

WWNDS 502J Clarinet: Secondary (1) Individual instruction in clarinet one-half hour per week. Effective: Fall 1983
Prerequisite:

WWNDS 503J Bassoon: Secondary (1) Individual instruction in bassoon one-half hour per week. Effective: Fall 1983
Prerequisite:

WWNDS 504J Saxophone: Secondary (1) Individual instruction in saxophone one-half hour per week. Effective: Fall 1983
Prerequisite:

WWNDS 510J Flute: Secondary (2) Individual instruction in flute one hour per week. Effective: Fall 1983
Prerequisite:

WWNDS 511J Oboe: Secondary (2) Individual instruction in oboe one hour per week. Effective: Fall 1983
Prerequisite:

WWNDS 512J Clarinet: Secondary (2) Individual instruction in clarinet one hour per week. Effective: Fall 1983
Prerequisite:

WWNDS 513J Bassoon: Secondary (2) Individual instruction in bassoon one hour per week. Effective: Fall 1983
Prerequisite:

WWNDS 514J Saxophone: Secondary (2) Individual instruction in saxophone one hour per week. Effective: Fall 1983
Prerequisite:

WWNDS 530J Flute: Performance (4 per semester/maximum of 16) Individual instruction in flute one and one-half hour per week. For graduate flute performance majors. Effective: Fall 1986
Prerequisite:

WWNDS 531J Oboe: Performance (4 per semester/maximum of 16) Individual instruction in oboe one hour per week. For graduate oboe performance majors. Effective: Fall 1986
Prerequisite:

WWNDS 532J Clarinet: Performance (4 per semester/maximum of 16) Individual instruction in clarinet one hour per week. For graduate clarinet performance majors. Effective: Fall 1986
Prerequisite:

WWNDS 533J Bassoon: Performance (4 per semester/maximum of 16) Individual instruction in bassoon one hour per week. For graduate bassoon performance majors. Effective: Fall 1986
Prerequisite:
WWNDS 534J **Saxophone: Performance** (4 per semester/maximum of 16) Individual instruction in saxophone one hour per week. For graduate saxophone performance majors.

Effective: Fall 1986

Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Music Education (MU ED)

MU ED 440 Music Learning and Development (2) Psychological principles related to music learning processes and applications of those to teaching music.
Effective: Spring 2010
Prerequisite:
MU ED 540 Reflective Practice and Inquiry I (2) This course will develop students' reflection in and on teaching through gaining understanding of systematic inquiry and reflection paradigms.
Effective: Spring 2010

MU ED 541 Developing Music Curricula (2) Introduction to the process for developing music curricula for grades K-12 that reflects current theories/research data as well as state/national guidelines.
Effective: Fall 2009

MU ED 545 Psychological Foundations of Musical Behavior (3) Study of psychoacoustical effects of musical stimuli; emphasis on responses affecting learning musical ability, musical taste, and aesthetic reactions.
Effective: Fall 2009

MU ED 546 Assessment of Music Learning (2) Exploration of the unique processes, techniques, and challenges involved in the assessment of music learning.
Effective: Fall 2009

MU ED 547 Mentoring Novice Teachers (1 per semester/maximum of 2) Strategies for mentoring novice music teachers in peer teaching experiences and in K-12 school field experiences.
Effective: Summer 2010

MU ED 550 Reflective Practice and Inquiry II (2) This course will use systematic inquiry and reflection to assist students' in understanding the relevance of research methods in music education.
Effective: Spring 2010
Prerequisite:
MU ED 555 Doctoral Seminar in Music Education (1 per semester, maximum of 6) Forum for the discussion of problems in theory and design encountered in individual and group research projects.
Effective: Fall 2009
Prerequisite:
MU ED 557 Readings in the History of American Music Education (2) Intensive reading course on the history of American music education and the social, theological, and educational influences on the profession.
Effective: Fall 2009

MU ED 559 Contemporary Issues in Music Education (1-2) Consideration of the current political and pedagogical issues that influence curriculum development, teaching, and administration of K-12 music programs.
Effective: Fall 2009

MU ED 895 Practicum in Music Teaching (1 per semester/maximum of 4) Field experiences in music teaching for graduate students in music education.
Effective: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
Neural & Behav Sci (NBS)

NBS 725 Neural and Behavioral Science (13) Organized around the neural and behavioral sciences; builds on Year I knowledge.
Effective: Fall 1998
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Neuroscience-Hy (NEURO)

NEURO 511 (ANAT 511) Neurobiology II (3) Structure and physiology of central and peripheral nervous system, including specific sense organs.
Effective: Summer 1987
Prerequisite:
NEURO 515 (ANAT 515) Developmental Neurobiology (2) Development of the nervous system in all its aspects.
Effective: Fall 1986

NEURO 520 Cellular and Molecular Neuroscience (3) An introduction to neurons, glia, and the molecular basis of brain function.
Effective: Fall 1998

NEURO 521 Systems Neuroscience (3) An introduction to the major neural systems and their integrative functions.
Effective: Spring 2007

NEURO 522 Seminars in Neuroscience I (2) Study at the cellular, molecular, and metabolic level of selected subjects in neuroscience.
Effective: Spring 2007

NEURO 523 Seminars in Neuroscience II (2) Study at the cellular, molecular, and metabolic level of selected subjects in neuroscience.
Effective: Spring 2007

NEURO 530 Professional Development and Responsible Conduct in Science (1) An introduction to the professional skills necessary for careers in biomedical sciences.
Effective: Spring 1999

NEURO 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students or outside speakers.
Effective: Spring 1987

NEURO 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Spring 1987

NEURO 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

NEURO 596A Introduction to Neuroscience Research (2) Overview of neuroscience and neurological disorders. Open to Neuro students in a neuro lab or MD, PhD student or medical student entering a residency program in neurology.
Effective: Summer 2012 Ending: Summer 2012

NEURO 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

NEURO 597A Neuroscience Seminar (2) This class examines issues in neuroscience related to the research presented by invited speakers in the Neuroscience Seminar series. This course is for first-year neuroscience students. The intent is to generate discussion that aids in the understanding of the general research questions reflected in the work of the various speakers, and the techniques and conclusions drawn from experiments ranging from molecular to human behavior. Class participation is expected during discussions and oral presentations of topic areas will be expected.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

NEURO 597B Comparative Neuroanatomy (4) This course is aimed at graduate students in the brain-related sciences who want to acquire an in-depth understanding of neuroanatomy and the evolutionary principles that have guided the phylogenetic development of the vertebrate nervous system. A systems-level approach is used to analyze brain structure at the macroscopic level. Although the course is focused on elucidating the organization of the primate central nervous system, brain organization in other vertebrates is also discussed. Each week included two 75-minute lectures and a 75-minute laboratory session. Reading assignments include book chapters and landmark research articles on neuroanatomy. The laboratory is aimed at developing a 3D understanding of brain organization and will involve human brain dissections, as well as analysis of histological sections of images obtained from non-invasive scanning.

The Pennsylvania State University
NEURO 600 Thesis Research (1-15) No Description.
Effective: Spring 1987

NEURO 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1987

NEURO 610 Thesis Research Off Campus (1-15) No Description.
Effective: Spring 1987

NEURO 611 Ph. D. Dissertation Part-Time (0) No Description.
Effective: Spring 1987

NEURO 740 Neurology Clerkship (5) To teach the principles and skills underlying the recognition and management of the neurologic diseases that a general medical practitioner is most likely to encounter in practice.
Effective: Summer 2006
Prerequisite:

NEURO 796 Neurology Individual Studies (5) Neurology individual studies.
Effective: Spring 2009
Prerequisite:

NEURO 796A Neurology Individual Studies for 3rd Year (2.5) Neurology individual studies 3rd year.
Effective: Spring 2009

NEURO 797 Neurology Special Topics (5) Neurology Special Topics.
Effective: Spring 2009
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Neurosurgery (NSURG)

NSURG 750 Neurosurgery Acting Internship (5) Neurosurgery Acting Internship.
Effective: Spring 2010
Prerequisite:

NSURG 750A Neurosurgery Elective for 3rd Year Medical Students (2.5) Neurosurgery Elective for 3rd Year Medical Students.
Effective: Spring 2010
Prerequisite:

Effective: Spring 2010

NSURG 797 Neurosurgery Special Topics (5) Neurosurgery Special Topics.
Effective: Spring 2010
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Nuclear Engineering (NUC E)

NUC E 401 Introduction to Nuclear Engineering (3) Fundamental concepts of nuclear engineering, including fission, reactor theory, shielding, and radioisotopes; intended for other than nuclear engineering students.
Effective: Fall 2001
Prerequisite:

NUC E 403 Advanced Reactor Design (3) Physical principles and computational methods for reactor analysis and design. Multigroup diffusion theory; determination of fast and thermal group constants; cell calculations for heterogeneous core lattices.
Effective: Fall 1983
Prerequisite:

NUC E 405 (CHEM 406) Nuclear and Radiochemistry (3) Theory of radioactive decay processes, nuclear properties and structure, nuclear reactions, interactions of radiation with matter, biological effects of radiation.
Effective: Spring 2007
Prerequisite:

NUC E 406 (ME 406) Introduction to Statistical Thermodynamics (3) Statistical description of systems composed of large numbers of particles in the context of classical and quantum mechanics; basic concepts of probability theory and thermodynamics as they relate to statistical mechanics.
Effective: Fall 2007
Prerequisite:

NUC E 408 Radiation Shielding (3) Radiation sources in reactor systems; attenuation of gamma rays and neutrons; point kernel methods; deep penetration theories; Monte Carlo methods.
Effective: Spring 1985
Prerequisite:

NUC E 409 (MATSE 409) Nuclear Materials (3) Nuclear reactor materials: relationship between changes in material properties and microstructural evolution of nuclear cladding and fuel under irradiation.
Effective: Spring 2003
Prerequisite:

NUC E 420 Radiological Safety (3) Ionizing radiation, biological effects, radiation measurement, dose computational techniques, local and federal regulations, exposure control.
Effective: Spring 1997
Prerequisite:

Effective: Spring 1997
Prerequisite:

NUC E 430 Design Principles of Reactor Systems (3) Nuclear power cycles; heat removal problems; kinetic behavior of nuclear systems; material and structural design problems.
Effective: Fall 2007
Prerequisite:

NUC E 431W Nuclear Reactor Core Design Synthesis (4) Technical and economic optimization of nuclear systems.
Effective: Spring 1994
Prerequisite:

Effective: Spring 2011
Prerequisite:

NUC E 450 Radiation Detection and Measurement (3) Theory and laboratory applications of radiation detectors, including proton, neutron, charged particle detectors, NIM devices, and pulse-height analysis.
Effective: Spring 2001
Prerequisite:

NUC E 451 Experiments in Reactor Physics (3) Acquisition and processing of nuclear and atomic data; application to nucleonic phenomena of importance in nuclear engineering.
Effective: Spring 2008
Prerequisite:

NUC E 470 Power Plant Simulation (3) Basic knowledge necessary for intelligent simulation and interpretation of simulations of transients in nuclear power plants.
Effective: Fall 2007
Prerequisite:

NUC E 490 (AERSP 490, EE 471) Introduction to Plasmas (3) Plasma oscillations; collisional phenomena; transport properties; orbit theory; typical electric discharge phenomena.
Graduate Bulletin Archive - 2012

Effective: Spring 2008
Prerequisite:

NUC E 494H Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.
Effective: Spring 2007
Prerequisite:

NUC E 496 Independent studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

NUC E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

NUC E 497A Fundamentals of Nuclear Engineering (3) An intensive course providing introduction to Nuclear Engineering to undergraduate co-op students, non-NuCE graduate, and returning students.
Effective: Summer 2012 Ending: Summer 2012

NUC E 497A Fundamentals of Nuclear Engineering (3) An intensive course providing introduction to Nuclear Engineering to undergraduate co-op students, non-NuCE graduate, and returning students.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

NUC E 497D Radiation Detection Measurement Lab (1) Theory and laboratory applications of radiation detectors, including proton, neutron, charged particle detectors, NIM devices, and pulse-height analysis.
Effective: Summer 2012 Ending: Summer 2012

NUC E 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2008

NUC E 501 Reactor Engineering (3) Thermal hydraulic fundamentals applied to power reactors, thermal analysis of fuel elements and two-phase heat transfer in heated channels.
Effective: Spring 1992
Prerequisite:

NUC E 502 Reactor Core Thermal-Hydraulics (3) In-depth analysis of the reactor core thermal hydraulics; computational methods and practical applications.
Effective: Fall 2010
Prerequisite:

NUC E 505 Reactor Instrumentation and Control (3) Reactor control principles; classical control methods; operational control problems; control simulation using modern mainframe and microcomputer software packages; reactor instrumentation.
Effective: Spring 1992
Prerequisite:

NUC E 506 Nuclear Chemistry (3) Energetics, kinematics, and models of nuclear reactions; nuclear processes as chemical probes, mossbauer effect and perturbed angular correlation spectroscopy.
Effective: Summer 1991

NUC E 511 Nuclear Reactor Kinetics and Dynamics (3) Analytical kinetics and dynamics modeling for reactivity-induced transients; reactor accident kinetics methods for simple and complex geometries; experimental methods.
Effective: Spring 2011
Prerequisite:

NUC E 512 Nuclear Fuel Management (3) Nuclear fuel inventory determination and economic value through the fuel cycle. Emphasis on calculational techniques in reactor, optimization, and design.
Effective: Fall 1983
Prerequisite:

NUC E 521 Neutron Transport Theory (3) Derivation of Boltzmann equation for neutron transport; techniques of approximate and exact solution for the monoenergetic and spectrum regenerating cases.
Effective: Fall 1986
Prerequisite:

NUC E 523 (MATSE 523) Environmental Degradation of Materials in Nuclear Power Plants (3) Degradation of materials performance when exposed to the combination of high temperature, neutron irradiation, and aggressive electrochemistry found in nuclear reactors.
Effective: Spring 2011
Prerequisite:

NUC E 525 Monte Carlo Methods (3) Fundamentals of the probability theory and statistics, analog and non-analog Monte Carlo methods and their applications, random processes, and numbers.
Effective: Summer 1993

The Pennsylvania State University
Prerequisite:

NUC E 530 **Parallel/Vector Algorithms for Scientific Applications** (3) Development/analysis of parallel/vector algorithms (finite-differencing of PDEs and Monte Carlo methods) for engineering/scientific applications for shared and distributed memory architectures.
Effective: Spring 2008
Prerequisite:

NUC E 540 (AERSP 540) **Theory of Plasma Waves** (3) Solutions of the Boltzmann equation; waves in bounded and unbounded plasmas; radiation and scattering from plasmas.
Effective: Spring 2012
Prerequisite:

NUC E 541 **Plasma Theory** (3) Advanced topics in kinetic theory, fluctuation theory, microinstability, and turbulence.
Effective: Spring 2012
Prerequisite:

NUC E 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1991

NUC E 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

NUC E 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

NUC E 597F **Nuclear Fusion** (3) Production of energy from controlled thermonuclear fusion. Nuclear fusion reactions, plasma physics, magnetic and inertial confinement, and fusion reactor technology.
Effective: Summer 2012 Ending: Summer 2012

NUC E 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

NUC E 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

NUC E 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Graduate assistants receive credit for teaching lower level courses while under the direct supervision of a graduate faculty member.
Effective: Fall 1983
Prerequisite:

NUC E 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

NUC E 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Nursing (NURS)

NURS 401 (IL) **Concepts of Health** (3) Exploration of current and ancient concepts of health and their respective modes of intervention. Effective: Fall 2008

NURS 402 (US;IL) **Holistic Health** (3) Examination of emerging conceptualizations of health and therapy based on a holistic view of human beings. Effective: Fall 2008

NURS 403 **School Health and Emergency Care of Children and Adolescents** (3) Techniques for higher-level care for school health and emergency situations and application-based education. Effective: Spring 2010

NURS 404 **Cardiac Dysrhythmias: Interpretation, Treatment, and Nursing Management** (1) An introductory course with a focus on dysrhythmia recognition and interpretation of abnormal 12-lead electrocardiograms (EKG, ECG). Effective: Fall 2008

NURS 405A **Nursing Care of the Adult Client with Complex Health Problems: Part A** (4) In-depth study of care of patients with acute and complex health problems, utilizing evidence based practice. Effective: Spring 2011 Ending: Summer 2012

NURS 405B **Nursing Care of the Adult Client with Complex Health Problems: Part B** (4) In-depth study of care of patients with acute and complex health problems, utilizing evidence based practice. Effective: Spring 2011 Ending: Summer 2012

NURS 407 **Drugs of Abuse and Mental Health Issues** (3) Examines the health care needs across the lifespan of clients who have an alcohol or other drug disorder. Effective: Fall 2008

NURS 408 **Clinical Application of Pharmacological Concepts** (1) Study of the application of pharmacological concepts to the clinical setting. Effective: Spring 2011

NURS 409 **Introduction to Forensic Nursing** (3) Provides an introduction to the forensic health sciences, forensic nursing, and the nursing role in the scientific investigation of violence. Effective: Spring 2011

NURS 415 (US;IL) **Community and Family Health Nursing** (4) Therapeutic nursing care and health promotion concepts to families, groups and populations in the community. Effective: Spring 2011 Ending: Summer 2012

NURS 417 (US;IL) **Family and Community Health Concepts** (4) Study of the concepts of family and community based nursing care emphasizing multicultural influences on health practices. Effective: Fall 2008

NURS 420 **Mental Health Nursing** (4) Emphasizes clinical application of mental health theory in nursing care of patients with acute and chronic mental health problems. Effective: Spring 2011 Ending: Summer 2012
NURS 420 Mental Health Nursing (4) Emphasizes clinical application of mental health theory in nursing care of patients with acute and chronic mental health problems.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

NURS 430 Organization and Administration for the Nurse Manager (3) Introduction to organizational theory and principles of practice in the administration of nursing services and patient care.
Effective: Spring 2011 Ending: Fall 2012
Prerequisite:

NURS 430 Organization and Administration for the Nurse Manager (3) Introduction to organizational theory and principles of practice in the administration of nursing services and patient care.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

NURS 431 Data Management for Nurse Managers (3) Analysis of information systems to manage nursing service organizations; includes financial management, the budgeting processes, and productivity measurement.
Effective: Spring 2011 Ending: Fall 2012
Prerequisite:

NURS 431 Data Management for Nurse Managers (3) Analysis of information systems to manage nursing service organizations; includes financial management, the budgeting processes, and productivity measurement.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

NURS 432 Nursing Management of Human Resources (3) Human resource management and related factors in nursing service organizations.
Effective: Spring 2011 Ending: Fall 2012
Prerequisite:

NURS 432 Nursing Management of Human Resources (3) Human resource management and related factors in nursing service organizations.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

NURS 433 Seminar for Nurse Managers (3) Course focuses on the application of management principles in the role of the nurse manager.
Effective: Spring 2011 Ending: Fall 2012
Prerequisite:

NURS 433 Seminar for Nurse Managers (3) Course focuses on the application of management principles in the role of the nurse manager.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

NURS 440 Trauma/Critical Care Nursing (3) Focuses on the impact of and the nursing care of persons experiencing acute trauma and/or critical illness.
Effective: Spring 2011
Prerequisite:

NURS 450A Professional Role Development III: Leadership and Management (2) Study of leadership roles and various styles of nursing management and their implications for the professional nurse.
Effective: Spring 2011 Ending: Summer 2012
Prerequisite:

NURS 450A Professional Role Development III: Leadership and Management (2) Study of leadership roles and various styles of nursing management and their implications for the professional nurse.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

NURS 450B Professional Role Development III: Clinical Capstone (3) Senior level clinical capstone course that emphasizes the integration and application of theory and evidence based practice.
Effective: Summer 2010 Ending: Summer 2012
Prerequisite:

NURS 450B Professional Role Development III: Clinical Capstone (3) Senior level clinical capstone course that emphasizes the integration and application of theory and evidence based practice.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

NURS 452 (US) (BB H 452, WMNST 452) Women’s Health Issues (3) Exploration of major health issues concerning women today, with an emphasis on social, cultural, and medical influences.
Effective: Fall 2008
Prerequisite:

NURS 458 Ethical Challenges in Healthcare Informatics (3) A case based collaboratory designed for the exploration and analysis of the ethical dilemmas facing healthcare informatics practitioners.
Effective: Spring 2011

NURS 459 Legal and Professional Issues in School Nursing (3) Legal and professional issues of school nurses and
delivery impact of health care in school environment.

Effective: Spring 2010
Prerequisite:

NURS 460 Advanced Concepts in Clinical Nursing Informatics (3) An exploration of clinical informatics tools to support informatics practice.
Effective: Summer 2012
Prerequisite: Concurrent: NURS 458

NURS 461 Perioperative Nursing (4) Comprehensive introduction regarding fundamental principles and practices of the Operating Room Nurse when managing the care of the surgical patient.
Effective: Summer 2011
Prerequisite:

NURS 462 Psychotropic Drugs and Children/Adolescents (1) Study of psychotropic medications used to treat children and adolescents, including indications, actions, adverse reactions and implications for school nurses.
Effective: Summer 2011
Prerequisite:

NURS 463 Compassionate Counseling for Children/Adolescents Dealing with Dying, Death, Other Life Crises (3) Compassionate Counseling for Children and Adolescents Dealing with Dying, Death, and Other Life Crises.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

NURS 464 (US/IL) Dying and Death (3) Explores attitudes toward death and dying; concept of grief; responsibilities to the dying person and the family.
Effective: Fall 2008
Prerequisite:

NURS 465 Health Concepts for Adults with Complex Health Care Needs (3) In-depth study and application of the theoretical principles and roles of adult clients and families with complex healthcare needs.
Effective: Spring 2011
Prerequisite:

NURS 467 Medication Update and Health Teaching Interventions for School Nurses (1) Study of current pharmacologic concepts, including health teaching, prescribed for acute and chronic conditions commonly encountered in school nursing.
Effective: Summer 2011
Prerequisite:

NURS 468 Client Education Strategies for Nurses and Other Health Care Providers (3) Explores current and emerging roles of client education in the knowledge era.
Effective: Summer 2011
Prerequisite:

NURS 471 Issues in Bullying for Health Professionals (1) Explores the impact of bullying on individuals, schools, teachers, families, of the target and the bully.
Effective: Summer 2012
Prerequisite:

NURS 475 Integrated Concepts in Nursing Practice (3) Project-based capstone course for application of nursing concepts to health promotion/disease prevention in populations.
Effective: Spring 2011
Prerequisite:

NURS 492 Emergency Care and Safety (3) A comprehensive first aid course designed to provide knowledge of prehospital emergency care at the First Responder level.
Effective: Fall 2008
Prerequisite:

NURS 494H Honors Thesis (1-6 per semester/maximum of 6) Independent honors research project related to student's interests directed by faculty supervisor and culminating in production of thesis.
Effective: Summer 2010
Prerequisite:

NURS 495 Nursing study in Specialized Setting (1-12) Designed to provide student with in-depth study and practice in clinical specialty area of choice.
Effective: Fall 2008
Prerequisite:

NURS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2008

NURS 496A Study of Patients with Cerebrovascular Accident (1-6) Creative projects, including research and design,
which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2012 Ending: Summer 2012

NURS 496A Nurse Residency 1 (1) Introduction to methods and philosophy of empirical inquiry as applied to research in nursing and application to practice.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

NURS 496B Graduate Nurse Residency II (2) This course covers concepts to enhance the transition into professional nursing practice in areas of leadership, professionalism and clinical practice.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:

NURS 496B Nurse Residency 2 (2) This course continues these concepts from NURS 496 Graduate Nurse Residency I and integrates them into a quality or evidence based practice project.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

NURS 496C Neonatal Intensive Care Indepth Study (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2012 Ending: Summer 2012

NURS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2008

NURS 497A Relational Aggression in the Healthcare Setting (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2012 Ending: Summer 2012

NURS 497A Relational Aggression in the Healthcare Setting (3) Explores issue of relational aggression in healthcare workforce with specific focus on nursing profession. Examine research/impact of this problem.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

NURS 497B Bullying: Identification and Intervention (1) Explores the impact of bullying on individuals, schools, teachers, families of the target and the bully.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:

NURS 497B Principles of Precepting Pre-licensure Nursing Students (3) Course outlines the principles of clinical precepting and application to nursing students. Identification of learning styles, effective teaching strategies, and evaluation form the basis of this course.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

NURS 497C Autism Spectrum Disorders; Care Overview (1) An overview of autism spectrum disorders.
Effective: Summer 2012 Ending: Summer 2012
Prerequisite:

NURS 497D Mental Health Movies and Madness (3) Clinical application of mental health theory in nursing care of patients with acute/chronic mental health problems and use of film.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

NURS 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2008

NURS 499 (IL) Foreign Study--Nursing (1-9) Study of nursing issues in a foreign country.
Effective: Fall 2008

NURS 501 Issues in Nursing and Health Care (3) Analysis and evaluation of the health care system with emphasis on health policy and economic issues affecting nursing practice.
Effective: Fall 2008

NURS 502 Advanced Health Assessment of Adult Populations (3) Advanced nursing assessment and diagnosis of physical, psychosocial and developmental health for adults and families across the adult age spectrum.
Effective: Spring 2012

NURS 502A Advanced Health Assessment of Pediatric Populations (1) Advanced nursing assessment and diagnosis of physical, psychosocial and development health for individuals and families across the pediatric age spectrum.
Effective: Fall 2011

The Pennsylvania State University
NURS 502 Pathophysiology (3) Integration of advanced physiology, genetics, and pathophysiology as related to specific disease entities and alterations in functioning.
Effective: Fall 2008

NURS 504 Pharmacologic Therapy (3) Use of pharmacologic therapies in advanced practice nursing.
Effective: Fall 2008

NURS 508 Perspectives in Population-Based Health (3) Theories and strategies for promoting health in community aggregates with emphasis on vulnerable and underserved populations of diverse backgrounds.
Effective: Fall 2008

NURS 510 Theoretical Foundations of Nursing (3) Current conceptual and theoretical models in nursing including relationship to practice and research in development of nursing science.
Effective: Fall 2008

NURS 512 Nursing Research (3) A nursing research course with emphasis on research design, data collection methods, and evaluation of research studies.
Effective: Fall 2008
Prerequisite:

NURS 522 Comprehensive Assessment of the Older Adult (3) Advanced nursing assessment of biological, physical, clinical, functional, cognitive, psychological, and social changes associated with aging.
Effective: Summer 2009
Prerequisite:

NURS 523 Interventions for Common Health Problems in Older Adults (3) Discussion of common acute and chronic health problems experienced by older adults and development of evidence-based interventions for management.
Effective: Fall 2011
Prerequisite:

NURS 527 Promoting Healthy Lifestyles in the School-Age Population (3) This course will focus on promoting health lifestyles for the school age population.
Effective: Summer 2011

NURS 574 Family Nurse Practitioner Rural Integrative Practicum (2-8 per semester/maximum of 8) Advanced nursing practicum with individuals and families integrating community and specialty content.
Effective: Fall 2008 Ending: Summer 2012
Prerequisite:

NURS 574A Adult Nurse Practitioner Integrative Practicum (3-6 per semester/maximum of 6) Advanced nursing practicum in the health care of adolescents and adults within the family context, integrating community/specialty content.
Effective: Fall 2008 Ending: Summer 2012
Prerequisite:

NURS 580 Epistemology of Nursing Science (3) Examines the development and organization of nursing knowledge; nursing theories are critically analyzed in relationship to the substantive structure of nursing science.
Effective: Fall 2008
Prerequisite:

NURS 581 Developing Theoretical Constructs Relevant to Nursing (3) This course provides experience in concept analysis as one mechanism facilitating the development of nursing knowledge.
Effective: Fall 2008
Prerequisite:

NURS 582 Scientific Basis for Nursing Practice (3) Critical appraisal of the scientific basis of selected areas of nursing practice.
Effective: Fall 2008
Prerequisite:

NURS 583 Advanced Seminar in Nursing Science (3) Intense interactive seminar for synthesizing prior content into the design of dissertation research.
Effective: Fall 2008
Prerequisite:

NURS 585 Qualitative Methods in Health Research (3) Provides an overview of advanced qualitative research methodologies useful in the conduct of social and behavioral health research.
Effective: Spring 2012

NURS 586 Quantitative Methods in Health Research (3) An overview of methodological considerations specific to quantitative health research.
Effective: Spring 2012
Prerequisite:
NURS 587 Ethics in Nursing Research (1) Provides the theoretical and practical knowledge needed to design and conduct ethically responsible social and behavioral health research.
Effective: Fall 2008
Prerequisite:

NURS 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2008

NURS 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2008

NURS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2008

NURS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2008

NURS 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2008

NURS 600 Thesis Research (1-15) No description.
Effective: Fall 2008

NURS 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 2008

NURS 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Provides an opportunity for supervised and graded teaching experience in undergraduate nursing courses.
Effective: Fall 2008

Effective: Fall 2008

NURS 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 2008

Effective: Spring 2012
Prerequisite:

NURS 819 Clinical Nurse Specialist II: Analysis and Application (4) Analysis and application of nursing interventions for individuals, families, and aggregate groups in varied health care delivery settings.
Effective: Summer 2012
Prerequisite:

NURS 821 Nurse Practicum: Clinical Nurse Specialist (4-8 per semester/maximum of 8) Integration and synthesis of specialty knowledge and theories into the CNS role.
Effective: Summer 2012
Prerequisite:

NURS 823 Interventions for Common Health Problems in the Adult/Older Adult (4) Discussion of common health problems experienced by adults/older adults and development of evidence-based interventions for management.
Effective: Fall 2011
Prerequisite:

NURS 840 Nursing Education Theories and Strategies (3) Theoretical foundation and evidence-based strategies for nursing education.
Effective: Summer 2012

NURS 841 Assessment and Evaluation in Nursing Education (3) Methods for assessment, measurement, and evaluation of student learning in academic and clinical settings.
Effective: Summer 2012
Prerequisite:
NURS 842 **Curriculum and Program Development in Nursing Education** (3) Curriculum design and evaluation, educational program development, and accreditation.
Effective: Summer 2012
Prerequisite:

NURS 843 **Synthesis and Application of the Nurse Educator Role** (4) Practicum in the application of the nurse educator role in academic and healthcare settings.
Effective: Summer 2012
Prerequisite:

Effective: Summer 2012

Effective: Summer 2012
Prerequisite:

NURS 848 **Synthesis and Application of the Nurse Administrator Role** (4) Practicum in the application of the nurse administrator role in health care settings.
Effective: Summer 2012
Prerequisite:

NURS 860 **Adult Gerontology Acute Care Nurse Practitioner Role I** (3) Acute Care Nurse Practitioner role across the continuum of care with adults and older adults with complex acute, critical, and chronic health conditions to restore or maximize health.
Effective: Summer 2012
Prerequisite: Concurrent: NURS 862

NURS 861 **Adult Gerontology Acute Care Nurse Practitioner Role II** (3) Continuation of Acute Care Nurse Practitioner role across the continuum of care with adults and older adults with complex acute, critical, and chronic health conditions to restore or maximize health.
Effective: Summer 2012
Prerequisite: Concurrent: NURS 863

NURS 862 **Adult Gerontology Acute Care Nurse Practitioner Practicum I** (4) Adult Gerontology Acute Care Nurse Practitioner practicum with patients across the continuum of care with adults and older adults with complex acute, critical, and chronic health conditions.
Effective: Summer 2012
Prerequisite: Concurrent: NURS 860

NURS 863 **Adult Gerontology Acute Care Nurse Practitioner Practicum II** (4) Adult Gerontology Acute Care Nurse Practitioner practicum across the continuum of care with adults and older adults with complex acute, critical, and chronic health conditions.
Effective: Summer 2012
Prerequisite: Concurrent: NURS 861

NURS 864 **Adult Gerontology Acute Care Nurse Practitioner Integrative Practicum** (6) Adult Gerontology Acute Care Nurse Practitioner integrative practicum across the continuum of care with adults and older adults with complex acute, critical, and chronic health conditions.
Effective: Summer 2012
Prerequisite:

NURS 865 **Pharmacology for Acute Care Nurse Practitioners** (1) Principles of clinical pharmacology as applied to management of complex acute, critical, and chronically ill adult and older adult patients.
Effective: Summer 2012
Concurrent: NURS 504

NURS 866 **Health Assessment of the Adult Gerontology Population in Acute Care** (1) Physical assessment and diagnostics for physical and psychosocial health of adult and older adult individuals and families with acute and critical illness.
Effective: Summer 2012
Concurrent: NURS 502

NURS 870 **Nurse Practitioner Role with Healthy Individuals and Families** (3) Nurse Practitioner role to promote health, prevent illness, and manage common acute/episodic health problems across the adult-older adult age spectrum.
Effective: Spring 2012
Prerequisite: Concurrent: NURS 872 or NURS 872A

NURS 871 **Nurse Practitioner Role with Individuals and Families with Complex and/or Chronic Health Problems** (3) Nurse Practitioner role with individuals and families to maximize health and manage complex and/or chronic health problems.
Effective: Spring 2012
Prerequisite: Concurrent: NURS 873 or NURS 873A

NURS 872 **Family Nurse Practitioner Practicum I** (3) Family Nurse Practitioner practicum with individuals and families across the life span experiencing common acute/episodic health problems.
Effective: Spring 2012
NURS 872A Adult Gerontology Primary Care Nurse Practitioner Practicum I (4) Adult Gerontology Primary Care Nurse Practitioner practicum with individuals and families across the adult/older adult age spectrum experiencing common acute/episodic health problems.
Effective: Fall 2011
Prerequisite: Concurrent: NURS 870

NURS 873 Family Nurse Practitioner Practicum II (4) Family Nurse Practitioner practicum with individuals and families across the life span experiencing complex and/or chronic health problems.
Effective: Spring 2012
Prerequisite: Concurrent: NURS 871

NURS 873A Adult Gerontology Primary Care Nurse Practitioner Practicum II (4) Adult Gerontology Primary Care Nurse Practitioner practicum with individual/families across the adult/older adult age spectrum experiencing complex and/or chronic health problems.
Effective: Fall 2011
Prerequisite: Concurrent: NURS 871

NURS 874 Family Nurse Practitioner Integrative Practicum (6) Family Nurse Practitioner integrative practicum with communities and individuals/families across the life span experiencing health and illness.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

NURS 874A Adult Gerontology Primary Care Nurse Practitioner Integrative Practicum (6) Adult Gerontology Primary Care Nurse Practitioner integrative practicum with communities and individuals/families experiencing health and illness.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

NURS 875 Nurse Practitioner Role with Children and Families (2) Nurse Practitioner role with children and their families to promote health, prevent illness, and manage acute or chronic health problems.
Effective: Spring 2012
Prerequisite: Concurrent: NURS 576

NURS 876 Family Nurse Practitioner Practicum with Pediatric Populations (2) Family Nurse Practitioner practicum with pediatric populations/families during health or experiencing acute and chronic health problems.
Effective: Spring 2012
Prerequisite: Concurrent: NURS 870 NURS 872

Last Import from UCM: June 2, 2012 12:27 PM
Nutrition (NUTR)

NUTR 400 Introduction to Nutrition Counseling (1) No description.
  Effective: Fall 1998
  Prerequisite:

NUTR 401 Nutrition Clinic Practicum (1-3) To provide qualified nutrition students with the opportunity to practically apply nutrition counseling skills in a supervised environment.
  Effective: Spring 2002
  Prerequisite:

NUTR 407 Nutrition for Exercise and Sports (3) Interactions between nutrition, food selection, and timing of eating as they apply to exercise training and recreational physical activity.
  Effective: Summer 2012
  Prerequisite:

NUTR 421 (US;IL) Food Culture and Health Trends (3) Social-political, historic, and geographic roots of food patterns, featuring specific cuisine areas and nutritional disease patterns; includes foods laboratory.
  Effective: Summer 2005
  Prerequisite:

NUTR 430 (IL) (S T S 430) Global Food Strategies: Problems and Prospects for Reducing World Hunger (3) Technological, social, and political solutions to providing basic food needs; food resources, population, and the environment; current issues.
  Effective: Summer 2005

NUTR 445 Nutrient Metabolism I (3) Nutrients, their sources, metabolism, interrelationships and requirements with focus on carbohydrates, lipids, and proteins.
  Effective: Spring 2001
  Prerequisite:

NUTR 446 Nutrient Metabolism II (3) Continuation of NUTR 445; nutrients, their sources, metabolism, inter-relationships and requirements with focus on vitamins and minerals.
  Effective: Summer 1994
  Prerequisite:

NUTR 451 Nutrition throughout the Life Cycle (3) Application of basic principles of nutrition to nutritional and physiological needs throughout the life cycle from prenatal to aging.
  Effective: Spring 2001
  Prerequisite:

NUTR 452 Nutritional Aspects of Disease (3) Disturbances in metabolism related to human disease processes; principles of nutrition in therapy.
  Effective: Spring 1995
  Prerequisite:

NUTR 453 Diet in Disease (3) Nutrient and energy controlled diet programs. Implications for nutrition counseling and education.
  Effective: Spring 1995
  Prerequisite:

NUTR 456 Community Nutrition (2) Programs and policies of nutrition-related activities of community agencies; factors pertinent to nutrition education.
  Effective: Spring 1992 Ending: Summer 2012
  Prerequisite:

NUTR 456 (US) Community Nutrition (3) Programs and policies of nutrition-related activities of community agencies; factors pertinent to nutrition education; relationship of cultural and social identity to foods and nutrition.
  Effective: Fall 2012 Future: Fall 2012
  Prerequisite:

NUTR 490W Nutrition Seminar (3) Use of selected materials from the scientific literature to prepare a term paper and an oral report.
  Effective: Spring 1995
  Prerequisite:

NUTR 494H Senior Honors Thesis (1-6) Independent study related to a student's interests directed by a faculty supervisor and culminating in the production of a thesis.
  Effective: Summer 2006
  Prerequisite:

NUTR 495 Advanced Field Experience in Nutrition (1-6) Supervised off-campus, non-group instruction including individual field experiences, practicums or internships. Written and oral critique of activity is required.
  Effective: Spring 2001
  Prerequisite:
NUTR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1992

NUTR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1992

NUTR 497F Macronutrient Metabolism for Non-Nutrition Majors (3) Nutrients, their sources, metabolism, interrelationships and requirements with focus on carbohydrates, lipids, and proteins for non-nutrition majors.
Effective: Summer 2012 Ending: Summer 2012

NUTR 497G Community Food Security (3) Through active learning, students explore how communities can reshape food systems, increasing access to wholesome food while increasing economic opportunities.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

NUTR 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

NUTR 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

NUTR 502 Regulation of Nutrient Metabolism II (3) Complementary to NUTR 501 with an emphasis on metabolic roles of vitamin and mineral elements.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:
NUTR 506 (AN SC 506) Ruminology (3) Physiological, biochemical, and microbial activities occurring within the rumen and the relation of rumen function to animal response.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:
NUTR 511 Maternal and Infant Nutrition (2) Physiological and psychosocial factors affecting human nutritional needs and feeding practices during the life cycle stages of pregnancy, lactation, and infancy.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:
NUTR 512 Nutrition and Aging (2) Consideration of physiological and psychological changes influencing nutritional status of aged; nutrient requirements; nutrient-disease interactions; nutritional care of elderly.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:
NUTR 513 Atherosclerosis and Nutrition (2) The etiology and pathophysiology of atherosclerotic cardiovascular disease, with emphasis on nutritionally-related aspects.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:
Effective: Fall 2012 Future: Fall 2012
Prerequisite:
NUTR 515 Mathematical Modeling in Nutrition (2) Study of the theory and application of mathematical modeling of the tracer and tracee kinetics of nutrients and their metabolites in animals and man.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:
NUTR 520 Readings in Nutrition (1 per semester/maximum of 2) Readings and reports of selected topics in nutrition.
Effective: Spring 2013 Future: Spring 2013

NUTR 521 National Nutrition Policy (1) Description of major structures, factors, and issues in national nutrition policy. Implications for nutrition research and services.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

NUTR 532 (HD FS 532) Childhood Obesity (3) This course addresses how genetic predispositions, behavioral and environmental factors affect children’s obesity risk and examines strategies for obesity prevention.
Effective: Spring 2012

NUTR 533 (HD FS 533) Adult Obesity (3) Important current and emerging topics in obesity research relevant to government policy and general public education; emphasis on adult obesity.

The Pennsylvania State University
NUTR 551 Seminar in Nutrition (1-6) Selected topics and recent advances in nutrition.
Effective: Fall 2012 Future: Fall 2012

NUTR 581 Regulation of Nutrient Metabolism I (4) Integration of nutritional, biomedical, biochemical, physiological, and hormonal processes involved in carbohydrate, lipid, and protein metabolism.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

NUTR 583 Nutritional Epidemiology (3) Epidemiological principles and methodology to study nutritional determinants of disease.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

NUTR 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2012

NUTR 595A Application of Community Nutrition -- Internship (3) Application and integration of community nutrition theories in a practicum environment under the supervision of preceptors in community agencies.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

NUTR 595B Application of Food Service Management -- Internship (3) Application and integration of food service management principles and motivation theories in a practicum environment under the supervision of preceptor.
Effective: Fall 2012 Future: Fall 2012

NUTR 595C Dietetic Enrichment Experience - Dietetic Internship (1) The enrichment experience is designed for interns to plan and implement a rotation of interest in the nutrition field.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

NUTR 595D Application Clinical Nutrition -- Internship (6) Application and integration of clinical nutrition theories in a practicum environment under the supervision of preceptor who is a registered dietitian.
Effective: Fall 2012 Future: Fall 2012

NUTR 595E Introduction to Nutrition Research -- Internship (1) Introduction of nutrition research to assist in the understanding of planning and conducting research studies in a variety of nutrition research laboratories.
Effective: Fall 2012 Future: Fall 2012

NUTR 595F Professional Portfolio Internship (1) Designing and completing a professional portfolio to assist in the employment process in the field of dietetics.
Effective: Fall 2012 Future: Fall 2012

NUTR 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012 Future: Fall 2012

NUTR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2012

NUTR 597D Critical Readings in Molecular Nutrition (1.5) Critical Readings in Molecular Nutrition uses a guided readings approach to critically evaluate current topics in molecular nutrition.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

NUTR 597G Readings in Ingestive Behavior (1) Students lead discussion of original research in the field of ingestive behavior with a focus on food intake in particular.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

NUTR 600 Thesis Research (1-15) No description.
Effective: Fall 2012 Future: Fall 2012

NUTR 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 2012 Future: Fall 2012

NUTR 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Provides an opportunity for a
supervised and graded experience for graduate students in teaching undergraduate courses in nutrition.
Effective: Summer 2012

Effective: Fall 2012 Future: Fall 2012

NUTR 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
Nutrition-Id (NUTRN)

NUTRN 506 (AN SC 506) Ruminology (3) Physiological, biochemical, and microbiological activities occurring within the rumen and the relation of rumen function to animal response. Effective: Spring 1992 Ending: Summer 2012
Prerequisite:

NUTRN 511 Maternal and Infant Nutrition (2) Physiological and psychosocial factors affecting human nutritional needs and feeding practices during the life cycle stages of pregnancy, lactation, and infancy. Effective: Spring 1992 Ending: Summer 2012
Prerequisite:

NUTRN 512 Nutrition and Aging (2) Consideration of physiological and psychological changes influencing nutritional status of aged; nutrient requirements; nutrient-disease interactions; nutritional care of elderly. Effective: Summer 1986 Ending: Summer 2012
Prerequisite:

Prerequisite:

Prerequisite:

Prerequisite:

NUTRN 520 Readings in Nutrition (0.5) Readings and reports of selected topics in nutrition. Effective: Spring 1994 Ending: Fall 2012

NUTRN 521 National Nutrition Policy (1) Description of major structures, factors, and issues in national nutrition policy. Implications for nutrition research and services. Effective: Spring 1992 Ending: Summer 2012

NUTRN 581 Regulation of Nutrient Metabolism I (4) Integration of nutritional, biomedical, biochemical, physiological, and hormonal processes involved in carbohydrate, lipid, and protein metabolism. Effective: Spring 1994 Ending: Summer 2012
Prerequisite:

NUTRN 582 Regulation of Nutrient Metabolism II (3) Complementary to NUTRN 581 with an emphasis on metabolic roles of vitamin and mineral elements. Effective: Spring 1994 Ending: Summer 2012
Prerequisite:

NUTRN 583 Nutritional Epidemiology (3) Epidemiological principles and methodology to study nutritional determinants of disease. Effective: Spring 2009 Ending: Summer 2012
Prerequisite:

NUTRN 595A Application of Community Nutrition -- Internship (3) Application and integration of community nutrition theories in a practicum environment under the supervision of preceptors in community agencies. Effective: Fall 2011 Ending: Summer 2012
Prerequisite:

NUTRN 595B Application of Food Service Management -- Internship (3) Application and integration of food service management principles and motivation theories in a practicum environment under the supervision of preceptor. Effective: Fall 2003 Ending: Summer 2012

NUTRN 595C Dietetic Enrichment Experience - Dietetic Internship (1) The enrichment experience is designed for interns to plan and implement a rotation of interest in the nutrition field. Effective: Fall 2011 Ending: Summer 2012
Prerequisite:

NUTRN 595D Application Clinical Nutrition -- Internship (6) Application and integration of clinical nutrition theories in
NUTRN 595E Introduction to Nutrition Research -- Internship (1) Introduction of nutrition research to assist in the understanding of planning and conducting research studies in a variety of nutrition research laboratories.
Effective: Fall 2003 Ending: Summer 2012

NUTRN 595F Professional Portfolio Internship (1) Designing and completing a professional portfolio to assist in the employment process in the field of dietetics.
Effective: Fall 2003 Ending: Summer 2012

NUTRN 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1992 Ending: Summer 2012

NUTRN 600 Thesis Research (1-15) No description.
Effective: Spring 1992 Ending: Summer 2012

NUTRN 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1992 Ending: Summer 2012

NUTRN 610 Thesis Research Off Campus (1-15) No description.
Effective: Spring 1992 Ending: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
Obstet/Gynecology-Hy (OBGYN)

OBGYN 700 Obstetrics and Gynecology (10) Required clerkship providing supervised clinical experience in obstetrics and gynecology.
Effective: Winter 1978
Prerequisite:

OBGYN 701 OBGYN Externship/Subinternship (5) An elective to provide advanced clinical experience involving community hospital OB/GYN, ambulatory OB/GYN, or selected subspecialties.
Effective: Summer 1985
Prerequisite:

OBGYN 710 Clinical Gynecologic Oncology (5) Active participation in evaluation and management of patients with gynecologic malignancies.
Effective: Summer 1988
Prerequisite:

OBGYN 720 Ambulatory and Adolescent Gynecology Elective (5) This course involves active participation in a community outpatient obstetric and gynecology practice.
Effective: Spring 2009
Prerequisite:

OBGYN 720A Reproductive Endocrinology & Infertility Elective (2.5) This course provides exposure to basic concepts of diagnosis and management of infertility, and of reproductive endocrinologic disorders of women including hyperandrogenicity and anovulation.
Effective: Summer 2006
Prerequisite:

OBGYN 721 Clinical Endocrinology/Infertility (5) Active participation in evaluation and management of outpatient/endocrinology/infertility problems.
Effective: Spring 1989
Prerequisite:

OBGYN 722 Clinical Perinatal Medicine Elective (5) Management of women with pregnancies complicated by maternal and/or fetal disease will be learned in a high-risk pregnancy environment.
Effective: Spring 1990
Prerequisite:

OBGYN 722A Perinatology Elective (2.5) This course provides exposure to basic concepts of management of high risk pregnancies and medical complications of pregnancy.
Effective: Summer 2006
Prerequisite:

OBGYN 796 OB/GYN Individual Studies (5) A forum for collaborative research on an individual basis in areas of obstetrics and gynecology, including reproductive biology and endocrinology.
Effective: Spring 2009
Prerequisite:

OBGYN 796A OB/GYN Individual Studies for 3rd Year (2.5) OBGYN individual studies for 3rd year.
Effective: Spring 2009

OBGYN 797 OB/GYN Special Topics (5) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 2009
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Operations Management (OPMGT)

OPMGT 510 Operations Management (3) Integration and application of decision making to operational and policy problems within the business firm.
Effective: Fall 1993

OPMGT 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1992

OPMGT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

OPMGT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 1992

OPMGT 599 (IL) Foreign Study--Operations Management (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite:

OPMGT 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) No description.
Effective: Fall 1992

Last Import from UCM: June 2, 2012 12:27 PM
Operations Mmgt-Bd (OPMAN)

OPMAN 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

OPMAN 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 1987

Last Import from UCM: June 2, 2012 12:27 PM
Operations Research (O R)

O R 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

Last Import from UCM: June 2, 2012 12:27 PM
Ophthalmology (OPHTH)

OPHTH 760 Ophthalmology Elective (5) This course is designed to provide a broad experience in ophthalmology for any students, regardless of their future career goals.
Effective: Fall 2008
Prerequisite:

OPHTH 796 Ophthalmology Individual Studies (5) Ophthalmology Individual Studies
Effective: Spring 2010
Prerequisite:

OPHTH 796A Ophthalmology Individual Studies 3rd Year (2.5) Ophthalmology Individual Studies for Year 3 Medical Students.
Effective: Spring 2010
Prerequisite:

OPHTH 797 Ophthalmology Special Topics (5) Ophthalmology Special Topics
Effective: Spring 2010
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Orthopaedics (ORTHO)

ORTHO 710 **Adult Orthopaedics for Third Year Students** (5-15) An in-depth experience in general adult orthopaedics that can be tailored for students interested in orthopaedics or in primary care.
Effective: Summer 2002
Prerequisite:

ORTHO 711 **Pediatric Orthopaedics for Third Year Students** (5) An in-depth experience in pediatric orthopaedics that can be tailored for students interested in orthopaedics or in primary care.
Effective: Summer 2002
Prerequisite:

ORTHO 730 **Adult Orthopaedics Acting Internship** (5) An in-depth experience in general adult orthopaedics that can be tailored for students interested in orthopaedics or in primary care.
Effective: Spring 2009
Prerequisite:

ORTHO 731 **Pediatric Orthopaedics Acting Internship** (5) An in-depth experience in pediatric orthopaedics that can be tailored for students interested in orthopaedics or in primary care.
Effective: Spring 2009
Prerequisite:

ORTHO 740 **Rehabilitation Medicine Elective** (5) An in-depth experience in rehabilitation medicine providing clinical experience in both the outpatient clinics and the inpatient unit.
Effective: Summer 2009
Prerequisite:

ORTHO 741 **York-Orthopedic Sports Medicine Elective 3rd or 4th Year Elective** (5) Course provides 4 week exposures to basic concepts for diagnosis and management of sports related injuries and conditions.
Effective: Fall 2010
Prerequisite:

ORTHO 741A **York-Orthopedic Sports Medicine Elective (3rd Year)** (2.5) Course provides 2 week exposure to basic concepts for diagnosis and management of sports related injuries and conditions
Effective: Fall 2010
Prerequisite:

ORTHO 796 **Orthopaedics Individual Studies Elective** (5) Creative projects including non-thesis research supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2002
Prerequisite:

ORTHO 796A **Orthopaedics Individual Studies for 3rd Year** (2.5) Orthopaedics individual studies for 3rd year students.
Effective: Spring 2009

ORTHO 797 **Orthopaedics Special Topics Elective** (5) Formal courses given on a topical or special interest subject which may be offered infrequently and/or offered off-campus.
Effective: Summer 2002
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
P-Based Learn Fac-Hy (PBL)

PBL 720 Case Development in Medical Education (5) This course will teach the major steps in creating a clinical case scenario.
Effective: Spring 2009
Prerequisite:

PBL 743 Problem-based Learning Facilitation (5) Development of skills in facilitation of small group learning (PBL) and introductory understanding of educational theory supporting PBL.
Effective: Fall 2008
Prerequisite:
Pathology-Hy (PATH)

PATH 520 Biology of Neoplasia (5) Detailed examination of the initiation and pathogenesis of animal neoplasms with emphasis on the relationship to human neoplasia.
Effective: Spring 2004
Prerequisite:

PATH 590 Colloquium (1) Continuing seminars which consist of a series of individual lectures by faculty, students or outside speakers.
Effective: Spring 2006

PATH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

PATH 770 Anatomic Pathology (1-15) Study of tissues received daily by the surgical pathology laboratory. Students will assist in and then perform autopsies under supervision.
Effective: Fall 2008

PATH 796 Pathology Individual Studies (5) Creative projects including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2009
Prerequisite:

PATH 796A Pathology Individual Studies for 3rd Year (2.5) Pathology individual studies for 3rd year students.
Effective: Spring 2009

PATH 797 Pathology Special Topics (5) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2009
Prerequisite:

PATH 801 (AGBIO 801) Veterinary Infectious Disease Diagnostic and Surveillance Systems (3) This course provides knowledge of diagnostic and surveillance systems used to detect infectious diseases and protect against animal agricultural biological attack.
Effective: Summer 2010
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Pediatrics-Hy (PED)

PED 700 Pediatric Clinical Clerkship (10) Clinical experience in the management of the newborn, of the normal infant, and children with acute and chronic illness.
Effective: Winter 1978
Prerequisite:

Effective: Spring 2009
Prerequisite:

PED 710A Pediatric Hematology/Oncology Elective (3rd year) (2.5) This course provides exposure to the pediatric cancer patient and the field of Pediatric Oncology by closely following several patients through their full range of illness experiences.
Effective: Summer 2006
Prerequisite:

PED 715 Infectious Disease (5-10) Principles of host defense mechanisms, parasite interactions, manifestations of infections in children, systematic approach to the problem-solving, rational use of antibiotics.
Effective: Winter 1978
Prerequisite:

PED 720 Pediatric Endocrinology (5) Clinical applications of basic endocrine concepts, gland functions, and effects upon growth; evaluation of endocrine tests in disease states.
Effective: Winter 1978
Prerequisite:

PED 726 Clinical Genetics (5-10) Mendelian and molecular principles of human genetics; genetic bases of human disease, quantitative human genetics, prenatal diagnosis, genetic counseling.
Effective: Summer 1991

PED 727 Neonatology Acting Internship (5) Acting Internship emphasizing physiology of the newborn infant; concepts, practice, and procedures of intensive perinatal life support.
Effective: Spring 2009
Prerequisite:

PED 728 Pediatrics--Milton Hershey School Elective (5) This is an outpatient exposure to primary care medical problems of children in grades K-4 through 12.
Effective: Spring 1990
Prerequisite:

PED 739 Pediatric Cardiology Elective with Global Health Experience (5) This course provides exposure to basic concepts for diagnosis and management of children with cardiovascular diseases and cardiac abnormalities with a global health experience.
Effective: Spring 2012
Prerequisite:

PED 740 Pediatric Cardiology Elective (4th year) (5) This course provides exposure to basic concepts for diagnosis and management of children with cardiovascular diseases and cardiac abnormalities.
Effective: Spring 2012
Prerequisite:

PED 741 Pediatric Pulmonary and Sleep Medicine Elective (5) This course provides experience in basic concepts of the pathophysiology and clinical management of children with respiratory conditions and sleep neurobehavioral abnormalities.
Effective: Spring 2012
Prerequisite:

PED 745 (SURG 745) Pediatric Cardiothoracic Surgery Elective (5) This fourth-year elective provides an introduction to the operative repair and peri-operative management of simple and complex congenital heart disease.
Effective: Summer 2009
Prerequisite:

PED 750 Pediatric Nephrology/Diabetes (5-10) Outpatient and inpatient clinical concepts/diagnosis and management of children with acute and chronic renal disease or renal electrolyte abnormalities.
Effective: Summer 1990
Prerequisite:

PED 750A Pediatric Nephrology Elective (3rd year) (2.5) This course provides exposure to basic concepts for diagnosis management of children with kidney disease or fluid/electrolyte abnormalities.
Effective: Summer 2006
Prerequisite:

PED 765 Pediatric Neurology (5-10) Rounds, conferences, and clinics and experience in electroencephalography,

The Pennsylvania State University
electromyography, neuroradiology, neuro-ophthalmology, psychometric testing, and otolaryngology, as clinically appropriate.

Effective: Fall 2008
Prerequisite:

PED 770 **Pediatric Critical Care Medicine Acting Internship** (5) Experience in pediatric critical care medicine.
Effective: Spring 2009
Prerequisite:

PED 780 **Pediatrics Acting Internship** (5) Reinforces and expands the principles of inpatient pediatric care for fourth-year medical students motivated to perform as acting interns.
Effective: Spring 2009
Prerequisite:

PED 796 **Pediatric Individual Studies** (5) Individually supervised creative projects, including basic or clinical pediatric research.
Effective: Spring 2009
Prerequisite:

PED 796A **Pediatric Individual Studies for 3rd Year Medical Students** (2.5) Pediatrics Individual Studies for 3rd Year Medical Students.
Effective: Spring 2010
Prerequisite:

PED 797 **Pediatrics Special Topics** (5) Basic or clinical electives in pediatrics at non-affiliated institutions.
Effective: Spring 2009
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Perspectives (PERSP)

PERSP 949 Higher Education Law (3) This course examines the legal issues applicable to American colleges and universities. Topics include academic freedom and tenure, affirmative action in admissions decisions, intercollegiate athletics, issues of student privacy, sexual harassment, and intellectual property.
Effective: Summer 2007

PERSP 972 Sports and Public Policy (3) The course introduces students to fundamental concepts of law, economics, and business strategy necessary to understand and evaluate legal doctrine and public regulatory policy with regard to professional and major intercollegiate sports.
Effective: Spring 2011
Prerequisite:

PERSP 973 Biotechnology Law (3) This course will provide students a comprehensive understanding of the legal issues posed by developments in genetic technologies. The course will provide an overview of the history and technical foundations of the field and examine the legal dimensions of biotechnology. Generally, the course will examine how the law reacts to legal problems that arise from new technologies and examine whether the law is capable of anticipating such problems and acting prospectively.
Effective: Spring 2003

PERSP 978 Native American Law (3) This course has several segments covering such matters as federal and state power over Native American affairs; personal rights and liberties under tribal law; and the history of treaties with and legislation concerning Native Americans.
Effective: Spring 2003

PERSP 979 Animal Law (3) In this course we will address how legal systems and administrative agencies make decisions that affect nonhuman animals. The course will focus on the origins, background, and evolution of animal law and address specific substantive areas involving animals such as the concept of animals as property; contract and tort issues related to animals, animal protection laws; constitutional law issues; animal exploitation and the government regulation of animals.
Effective: Summer 2011

PERSP 982 Economic Analysis of Law (3) This course will introduce students to the economic analysis of law and legal issues. No prior training in economics is assumed, though students with such training are welcome to enroll. Students will be instructed in the nature of economic reasoning and will learn to use fundamental principles of economics to explain legal doctrines and solve legal problems. The course will focus primarily on a positive analysis, investigating whether legal doctrines can best be explained as attempts to promote efficiency, and only secondarily on the normative question of whether law ought to promote efficiency. After a brief survey of microeconomics, the course will address the major common law areas of property, contracts, torts, and criminal law as well as the legal process.
Effective: Summer 2011

PERSP 994 The Right To (1) This minicourse will consider the notion of right in the context of personal choice. It will examine costs to individuation, both necessary and excessive, that are exacted in the process of establishing and perpetuating the uniformity and stability of legal and political regimes. Topics that will be considered include relative definitions of normalcy and privacy, physical characteristics and their exploitation, religious activities, prostitution, obscenity/pornography and personal expression, racial identity and discrimination, gambling, controlled substances, the use of force, and terrorism.
Effective: Fall 1998

PERSP 995 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2007

PERSP 996 Independent Study (1-4) In this course the student, under the supervision of a full-time member of the faculty, will be permitted to do research and write a paper of a substantial nature on a significant subject.
Effective: Summer 2011

PERSP 997 Special Topics (1-9) Special topics.
Effective: Spring 2011

PERSP 997A Essential Themes in Jewish, Christian and Islamic Jurisprudence (3) This course will explore essential themes in Jewish, Christian and Islamic jurisprudence. Focusing on each religion, but also mindful of comparative dimensions, the course will underscore seminal legal doctrines and principles of all three traditions. The course will conclude with several case studies analyzing how these religious legal systems approach specific substantive issues (e.g., topics in family and customary law).
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
PERSP 997B *Information Privacy and Security Law* (3) As information technology advances, the legal issues surrounding information privacy and security grow increasingly complicated. This course will explore information privacy and security issues arising from technological change to provide an overview of the current legal regime in the United States meant to address such issues. The overview will take into account constitutional, statutory, contract, and common law sources of information privacy and security law, at both the federal and state level. 
*Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012*

PERSP 999 *Sports Law* (3) This course explores how various areas of the law impact the sports industry. The "law" that is used by most sports lawyers is principally the application of settled principles of other legal fields to the sports industry: contract law, labor law, tax law, products liability law, intellectual property law, etc. The Sports Law course then focuses on important areas that provide the foundational principles that drive the outcome of most legal disputes arising in the sports industry. The course also examines certain areas of the law such as antitrust, labor, and constitutional law, that have specific and unique applications to sports. 
*Effective: Summer 2011*
Petrol & Min Enginer (P M E)

P M E 590 Colloquium (1) Courses teaches students how to engineer their technical presentations.
Effective: Spring 2006

Last Import from UCM: June 2, 2012 12:27 PM
Petroleum and Natural Gas Engineering (P N G)

P N G 405 Rock and Fluid Properties (3) Reservoir rock properties, rock and fluid properties (interaction between rock and fluids), flow behavior in reservoir, and fluid properties.
Effective: Spring 2002
Prerequisite:

P N G 406 Rock and Fluid Laboratory (1) Systematic study of oil reservoir rocks and fluids; their interrelation applied to petroleum engineering.
Effective: Spring 2001
Prerequisite: Concurrent: P N G 405

Effective: Spring 2001
Prerequisite:

P N G 411 Introduction to Petroleum and Natural Gas Extraction (1) Introduction to the design and implementation of the systems used in the extraction of oil and gas. Not intended for petroleum and natural gas engineering majors.
Effective: Spring 2001
Prerequisite:

P N G 420 Applied Reservoir Analysis and Secondary Recovery (4) Application of material balance equations/transient flow solutions to water influx problems; displacement theory as it applies to design/behavior of flooding.
Effective: Spring 2008
Prerequisite:

Effective: Spring 1999
Prerequisite:

P N G 430 Reservoir Modeling (3) The numerical simulation of petroleum reservoir processes by the use of models; scaling criteria and network flow.
Effective: Spring 2008
Prerequisite:

P N G 440W Formation Evaluation (3) Study of those methods used to evaluate the engineering properties of oil and gas bearing reservoir formations.
Effective: Spring 1999
Prerequisite:

P N G 450 Drilling Design and Production Engineering (3) Design and analysis of oil-field drilling operations and equipment.
Effective: Spring 2001
Prerequisite:

P N G 451 Oil Well Drilling Laboratory (1) Practice in well-control procedures. Measurement of drilling fluid properties.
Effective: Spring 2001
Prerequisite: Concurrent: P N G 450

P N G 475 Petroleum Engineering Design (3) Design and selection of mechanical components used in the production of fluids from subsurface reservoirs.
Effective: Spring 2001
Prerequisite:

P N G 480 Production Process Engineering (3) Analysis and evaluation of surface production processes, fluid separation, storage, measurement, treating, custody transfer, transmission, disposal, corrosion, and other operations.
Effective: Fall 2007
Prerequisite:

P N G 482 Production Engineering Laboratory (1) Measurement and analyses of the physical and chemical properties of hydrocarbon fluid systems in a production environment.
Effective: Fall 2007
Prerequisite: Concurrent: P N G 480

P N G 489 Engineering Evaluation of Oil and Gas Properties (3) Application of present worth and rate-of-return analysis; reserve calculations; decline curve analysis; uncertainty and risk analysis to engineering project design and evaluation.
Effective: Spring 2011
Prerequisite:

P N G 490 Introduction to Petroleum Engineering Design (1) Introduction to the concepts of engineering design as applied to petroleum and natural gas projects.
Effective: Spring 2011
Prerequisite:

The Pennsylvania State University
P N G 491 Reservoir Engineering Design (1) Application of the concepts of reservoir and drilling engineering to petroleum engineering design projects.
Effective: Spring 2011
Prerequisite:

P N G 492 Petroleum Engineering Capstone Design (1) Integration of petroleum and natural gas engineering concepts to project design.
Effective: Fall 2001
Prerequisite:

P N G 494 Thesis (1-6) A problem in petroleum engineering involving review of the literature and experimental data obtained in the field or laboratory.
Effective: Spring 1999

P N G 494H Thesis (1-6) A problem in petroleum engineering involving review of the literature and experimental data obtained in the field or laboratory.
Effective: Fall 2007

P N G 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2007

P N G 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1999

P N G 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1999

Effective: Spring 1999

Effective: Spring 1999
Prerequisite:

Effective: Spring 1999

P N G 512 Numerical Reservoir Simulation (3) Mathematical analysis of complex reservoir behavior and combination drives; numerical methods for the solution of behavior equations; recent developments.
Effective: Spring 1999

P N G 518 Design of Miscible Recovery Projects (3) Theory and design of miscible methods of oil recovery, current field applications, including hydrocarbon, CO2, micellar/polymer, alkaline, and inert gas.
Effective: Spring 1999

P N G 520 Phase Relations in Reservoir Engineering (3) Phase relations as applied to condensate and retrograde condensate reservoirs and to other problems in petroleum production.
Effective: Spring 1999

P N G 530 Natural Gas Engineering (1-3) Flow in producing or storage reservoirs; gas well testing; transmission systems; storage cycle; current developments.
Effective: Spring 1999
Prerequisite:

P N G 590 (EME 590, F SC 590, MNG 590) Colloquium (1-3) Continuing seminars which consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.
Effective: Spring 2009

P N G 595 Internship (1-15) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2004
Prerequisite:

P N G 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual
P N G 597 **Special Topics** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

P N G 597A **Reactive Transport Processes in Subsurface** (3) This class will cover basic principles of reactive transport modeling for subsurface system. The class will introduce important reactive systems in various applications, formulation of reactive transport equations, and numerical methods used to solve them. The class will also discuss open research questions in reactive transport systems, including the issue of scaling and effects of natural conditions on reaction thermodynamics and kinetics. In parallel with the lectures the students will also learn to use a reactive transport code, CrunchFlow, with various examples. Students are welcome to bring their own research topics into class discussion and in term projects. Students from Energy and Mineral Engineering, Geosciences, Environmental Engineering, and Chemical Engineering may benefit from this class.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

P N G 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1999

Effective: Spring 1999

P N G 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Spring 1999

Effective: Spring 1999

P N G 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Spring 1999

NOTE: Courses in the use of X-ray diffraction, electron microscopy, and spectroscopy in petroleum and natural gas studies are listed under MATERIALS SCIENCE and GEOLOGICAL SCIENCES.

Last Import from UCM: June 2, 2012 12:27 PM
Pharmacology-Hy (PHARM)

PHARM 504 Molecular Pharmacology II (4) Continuation of PHARM 503. Effective: Spring 2011

PHARM 550 Neuropharmacology (3) An in-depth discussion on the mechanism and pharmacokinetics of various neuroactive drugs. Effective: Fall 2011

PHARM 551 Anti-infective Therapeutics (1) This course covers general principles related to pharmacology of major classes of antimicrobial agents. Effective: Summer 2011

Prerequisite:

PHARM 552 Integrated System Pharmacology (1) This course covers principles related to pharmacology of major classes of drugs affecting the autonomic nervous, cardiovascular, pulmonary, and renal systems. Effective: Summer 2011

Prerequisite:

PHARM 553 Gastrointestinal and Immunomodulatory Therapeutics (1) This course focuses on pharmacology of drugs affecting gastrointestinal disorders, drugs used in therapy of inflammatory diseases, and immunomodulatory drugs for organ transplantation therapy. Effective: Summer 2011

Prerequisite:

PHARM 554 Anticancer Therapeutics (1) This course provides an understanding of general principles of the induction, prevention and treatment of cancer. Effective: Summer 2011

Prerequisite:

PHARM 561 Neuropharmacology (2) This course introduces basic principles of human neuropharmacology, with primary emphasis on drugs active in the central nervous system. Effective: Summer 2011

Prerequisite:

PHARM 562 Endocrine Pharmacology (2) This course presents basic principles of human endocrine pharmacology, emphasizing drugs active in the endocrine and reproductive systems. Effective: Summer 2011

Prerequisite:

Prerequisite:

PHARM 583 (PSIO 583) Maintaining Homeostasis C: Kidney (1) Renal physiology and pharmacology. Effective: Fall 2007

Prerequisite:

PHARM 584 (ANAT 584) Human Anatomy and Development A: Gross Human Anatomy (1) Explore gross human anatomy providing orientation to organs and the overall relationship of organs and structures within the human body. Effective: Fall 2007

PHARM 585 (ANAT 585) Human Anatomy and Development B: Human Development (1) Explores human embryology and organogenesis beginning at the third week of gestation through parturition. Effective: Fall 2007

PHARM 586 (ANAT 586) Human Anatomy and Development C: Stem Cell Biology and Regenerative Medicine (1) Exploration of stem cell biology and the role of stem cells in regenerative medicine. Effective: Fall 2007

PHARM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

PHARM 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

The Pennsylvania State University
PHARM 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

PHARM 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

PHARM 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

PHARM 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

PHARM 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Philosophy (PHIL)

PHIL 401 (AM ST 421) American Philosophy (3) Survey of key figures and movements in American thought including the Transcendentalists, the Pragmatists, and contemporary developments. Effective: Fall 2007
Prerequisite:

PHIL 402 European Philosophy (3 per semester, maximum of 6) Survey of key figures and movements of Europe, including phenomenology, existentialism, structuralism and post-structuralism, and critical theory. Effective: Fall 2007
Prerequisite:

PHIL 403 Environmental Ethics (3) Examines ethical theories, justice, rights, community, and human values revolving around such issues as preservation, conservation, pollution, sustainability, and population. Effective: Fall 2007
Prerequisite:

PHIL 405 Philosophy of Law (3) Examines philosophical views of the nature of law, legal ethics, law and society through questions regarding definition, interpretation, and institutions. Effective: Fall 2007
Prerequisite:

PHIL 406 Business Ethics (3) Examines the moral justification of business practices and economic systems through critical analyses of case studies and applied ethical theories. Effective: Summer 1998
Prerequisite:

Prerequisite:

PHIL 408W Social and Political Philosophy (3) Historical and philosophical foundations of political organization, authority, and justice, and contemporary issues of rights, community, and culture. Effective: Fall 1998
Prerequisite:

PHIL 409 Aesthetics (3) Studies concepts of beauty, truth, value, representation, production and reproduction, and reality through philosophical theory and works of art. Effective: Fall 2007
Prerequisite:

PHIL 410 Philosophy of Science (3) Historical and contemporary foundational and methodological issues such as causality, relativity and epistemological relativism, teleology, and the nature of reality. Effective: Fall 1998
Prerequisite:

PHIL 413 Philosophy of Literature (3) Discusses truth, belief, illusion, imagination and creativity through philosophical literature, as well as problems of philosophical writing. Effective: Fall 1998
Prerequisite:

PHIL 416 Philosophy of Social Science (3) Examines the philosophical nature and foundations of methodology, structures and objects, value-neutrality and objectivity in the social sciences. Effective: Summer 1998
Prerequisite:

PHIL 418 Ethics (3) Examines ethical theories, justice, rights, community, and human values revolving around such issues as preservation, conservation, pollution, sustainability, and population. Effective: Fall 2007
Prerequisite:

PHIL 418W Ethics (3) Examines ethical theories, justice, rights, community, and human values revolving around such issues as preservation, conservation, pollution, sustainability, and population. Effective: Summer 1998
Prerequisite:

PHIL 424 Philosophy of Religion (3) Examines the relation between faith and reason, the nature of religious experience, the problem of evil, the existence of God. Effective: Fall 2007
Prerequisite:

PHIL 425W Epistemology (3) The nature of cognition and perception, the conditions of experience, and the justification and truth of belief. Effective: Summer 1998
Prerequisite:
PHIL 426W Metaphysics (3) Examines the nature of reality, the existence of freedom, and the nature of matter, mind, and values.
Effective: Summer 1998
Prerequisite:

PHIL 427 Philosophy of Mind (3) Investigates problems of mind from the standpoint of traditional metaphysical views, modern scientific psychology, neuroscience, and artificial intelligence.
Effective: Spring 1999
Prerequisite:

PHIL 427 (S T S 432) Medical and Health Care Ethics (3) Examines ethical, political, and social issues in the research, implementation, and practice of medicine, medical technologies, and healthcare.
Effective: Fall 1998
Prerequisite:

PHIL 433 (S T S 433) Ethics in Science and Engineering (3) Ethical issues arising in the practice of science and engineering and their philosophical analysis.
Effective: Fall 1995

PHIL 434H (HIST 424H, J ST 424H, RL ST 424H) Monotheism and the Birth of the West (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.
Effective: Spring 2002 Ending: Summer 2012
Prerequisite:

PHIL 435 (S T S 435) The Interrelation of Science, Philosophy, and Religion (3) The historical and transformative interactions between science and Western philosophical and religious views of nature, humanity, and God.
Effective: Spring 1996

PHIL 437 (IL) World Philosophies and Cultures (3) Philosophical traditions, problems, and authors in African, Asian, Middle- Eastern, Native American, or other non-Western cultures and intellectual traditions.
Effective: Fall 2007
Prerequisite:

PHIL 438 (WMNST 438) Feminist Philosophy (3) Examines the central currents of feminist philosophy, selected problems and concepts regarding difference, gender and sex, identity, and political culture.
Effective: Fall 2007
Prerequisite:

PHIL 439 (IL) Asian Philosophies and Issues (3) Exploration of the traditions, problems, and authors of one or more of the philosophical systems of Buddhism, Hinduism, Taoism, and Confucianism.
Effective: Fall 2007
Prerequisite:

PHIL 441 Capstone Course in Philosophy (3) This course is intended as the Capstone Course for Philosophy majors and is to be taken during their senior year or during the last semester of their junior year.
Effective: Spring 2011
Prerequisite:

PHIL 453 Topics in Ancient Philosophy (3 per semester, maximum of 6) Examines the philosophy of central figures in ancient philosophy from the pre-Socratics to the post-Aristotelians and Neoplatonists.
Effective: Fall 1998
Prerequisite:

PHIL 455 Topics in Modern Philosophy (3 per semester, maximum of 6) Descartes to Kant, including mind and reality, space and time, God and nature, morality and autonomy.
Effective: Summer 1998
Prerequisite:

PHIL 456 Topics in Nineteenth Century Philosophy (3 per semester, maximum of 6) Hegel to Nietzsche, including nature and spirit, history and human nature, ideology and morality.
Effective: Summer 1998
Prerequisite:

PHIL 457 Topics in Twentieth Century Philosophy (3 per semester, maximum of 6) Topics in the philosophy of figures such as Husserl, James, Russell, Wittgenstein, Heidegger, Merleau-Ponty, and Dewey.
Effective: Fall 2007
Prerequisite:

PHIL 458 Topics in Contemporary Philosophy (3 per semester, maximum of 6) Topics in the philosophy of contemporary figures such as Foucault, Habermas, Rorty, Derrida, Rawls, Davidson, and MacIntyre.
Effective: Summer 1998
Prerequisite:

PHIL 460 (US;IL) (AAA S 460) African American Philosophy (3) Major works by African American Philosophers, on topics of race, freedom, citizenship, nationhood, law and society.
Effective: Fall 2009 Ending: Summer 2012
Prerequisite:

PHIL 460 (US;IL) (AF AM 460) African American Philosophy (3) Major works by African American Philosophers, on topics
of race, freedom, citizenship, nationhood, law and society.

Effective: Fall 2012 Future: Fall 2012

Prerequisite:

PHIL 461 Plato (3 per semester, maximum of 6) Examines the metaphysics, epistemology, politics, aesthetics, and moral theory of this central figure in the history of philosophy.
Effective: Spring 1999

Prerequisite:

PHIL 473 German Idealism (3 per semester, maximum of 6) Critically examines the philosophy of central German idealists, including Kant, Fichte, Schelling, and Hegel, and its impact on later philosophy.
Effective: Summer 1998

Prerequisite:

PHIL 474 Kant (3 per semester, maximum of 6) Critical examination of the metaphysics, epistemology, aesthetics, legal and moral philosophy, and influence of Immanuel Kant.
Effective: Fall 1998

Prerequisite:

PHIL 476 Hegel (3 per semester, maximum of 6) Critical examination of the metaphysics, moral theory, epistemology, and philosophy of history of this central figure of 19th-century philosophy.
Effective: Fall 1998

Prerequisite:

PHIL 479 Critical Theory (3 per semester, maximum of 6) Examines the ontology, political and social thought of the Frankfurt School from Horkheimer and Adorno to Marcuse and Habermas.
Effective: Summer 1998

Prerequisite:

PHIL 485 Heidegger (3 per semester, maximum of 6) Studies Heidegger's metaphysical thought from his early to later works regarding being, history, subjectivity, aesthetics, language, and his influence.
Effective: Fall 1998

Prerequisite:

PHIL 486 Wittgenstein (3 per semester, maximum of 6) Examines Wittgenstein's early and late work, including logical atomism, meaning, language games, forms of life, and the private-language argument.
Effective: Fall 1998

Prerequisite:

PHIL 487 Analytic Philosophy (3 per semester, maximum of 6) Analytic philosophy's founding by Frege, Russell, Moore, Wittgenstein; and its contemporary development by Quine, Kripke, Dummett, and Davidson.
Effective: Fall 1998

Prerequisite:

PHIL 490 Dewey (3 per semester, maximum of 6) Critically examines the metaphysics, epistemology, ethics, logic, aesthetics, education theory, and social and political philosophy of this major American pragmatist.
Effective: Summer 1998

Prerequisite:

PHIL 491 Merleau-Ponty (3 per semester, maximum of 6) Merleau-Ponty's phenomenological anti-dualism through his studies on the body and the flesh, aesthetics, political philosophy, and late ontology.
Effective: Summer 1998

Prerequisite:

PHIL 493 Phenomenology and Hermeneutics (3 per semester, maximum of 6) Studies major figures and issues in phenomenology and hermeneutics, focussing on the work of Husserl, Gadamer, Heidegger, Merleau-Ponty, and Levinas.
Effective: Summer 1998

Prerequisite:

PHIL 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

PHIL 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

PHIL 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PHIL 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PHIL 497A Sports Culture: Competitive Sports as a "Root Metaphor" for Politics, Business, and the Conduct of Life (3) Course designed to discuss implications sports play on today's society from aspect of advertising, subliminal messages,
finances for politics, business and life.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

PHIL 498 **Special topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2001

PHIL 499 (IL) **Foreign Study--Philosophy** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

PHIL 501 **American Philosophy Seminar** (3 per semester/maximum of 6) Critically examines central figures in American philosophy including Emerson, Thoreau, Pierce, James, Royce, Dewey, Santayana, Mead, Quine, Davidson, and Rorty.
Effective: Spring 2000

PHIL 502 **European Philosophy Seminar** (3 per semester/maximum of 6) Critically examines central European philosophers including Husserl, Heidegger, Sartre, Merleau-Ponty, Gadamer, Levinas, Foucault, and Derrida; course content varies with instructor.
Effective: Summer 2000

PHIL 503 **Ethics Seminar** (3 per semester/maximum of 6) Critical investigation of philosophical problems in ethics, and viability of historical and contemporary ethical positions; course content varies with instructor.
Effective: Summer 2000

PHIL 508 **Social and Political Philosophy Seminar** (3 per semester, maximum of 6) Critical examination of social and political philosophies, their historical context and relation to philosophic method; course content varies with instructor.
Effective: Summer 2000

PHIL 512 **Seminar in Logic** (3) This course covers topics in first-order symbolic logic with identity and advanced special topics in metatheory.
Effective: Summer 2009

PHIL 516 **Aesthetic Seminar** (3 per semester, maximum of 6) Critical examination of problems in philosophy of art including beauty, taste, value, politics, culture, interpretation; course content varies with instructor.
Effective: Summer 2000

PHIL 525 **Epistemology Seminar** (3 per semester/maximum of 6) Studies problems, figures, and movements in epistemology from the ancient philosophers to contemporary thinkers; course content varies with instructor.
Effective: Spring 2000

PHIL 538 (WMNST 538) **Feminist Philosophy Seminar** (3) Critically examines feminist approaches to ethics, epistemology, philosophy of science, metaphysics, social/political philosophy, and the history of philosophy.
Effective: Summer 2005

PHIL 539 **Critical Philosophy of Race** (3 per semester/maximum of 6) The study of philosophical issues raised by racism and by the concept of race and other related concepts.
Effective: Summer 2012

PHIL 553 **Ancient Philosophy Seminar** (3 per semester/maximum of 6) Analyzes specific concerns and texts of ancient philosophy including those of Plato and Aristotle; course content varies with instructor.
Effective: Summer 2000

PHIL 554 **Medieval Philosophy Seminar** (3 per semester/maximum of 6) Critical examination of medieval texts and philosophers, including Augustine, Anselm, Aquinas, Duns Scotus, and Ockham; course content varies with instructor.
Effective: Summer 2000

PHIL 555 **Modern Philosophy Seminar** (3 per semester/maximum of 6) Examines rationalism, empiricism, and other philosophical movements from Bacon and Descartes to Kant and Mill; course content varies with instructor.
Effective: Summer 2000

PHIL 556 **19th-Century Philosophy Seminar** (3 per semester, maximum of 6) Examination of philosophy from Hegel to Nietzsche on history, dialectic, ideology, existence, science, and art; course content varies with instructor.
Effective: Summer 2000

PHIL 557 **20th Century Philosophy Seminar** (3 per semester/maximum of 6) Central problems in works of twentieth-century philosophers including Russell, Dewey, Wittgenstein, Heidegger, Foucault, Levinas; course content

---

The Pennsylvania State University
PHIL 558 Contemporary Philosophy Seminar (3 per semester, maximum of 6) Critically investigates diverse recent figures and problems of continental, pragmatic, and analytic philosophy; course content varies with instructor.
Effective: Summer 2000

PHIL 561 Major Figures in Ancient Philosophy (3 per semester/maximum of 12) Close study of a major figure in ancient philosophy (6th BCE to 4th CE) through one central or several important texts.
Effective: Fall 2011

PHIL 562 Major Figures in Modern Philosophy (3 per semester/maximum of 12) Close study of a major figure in modern philosophy through one central or several important texts.
Effective: Fall 2011

PHIL 563 Major Figures in Nineteenth-Century Philosophy (3 per semester/maximum of 12) Close study of a major figure in nineteenth-century philosophy through one central text or several important texts.
Effective: Summer 2012

PHIL 564 Major Figures in Twentieth-Century Philosophy (3 per semester/maximum of 12) Close study of a major figure in twentieth-century philosophy by means of one central text or several important texts.
Effective: Summer 2012

PHIL 571 (BIOET 501) Perspectives and Methods in Bioethics (3) This course explores a variety of theories and methods in bioethics and applies them to a selection of current topics.
Effective: Spring 2012

PHIL 572 (BIOET 502) Perspectives in Macro-Bioethics (3) This course explores systemic and structural issues in bioethics, and the theories and methodologies required to address them.
Effective: Spring 2012

PHIL 573 (BIOET 573) Ethics and the Responsible Conduct of Biomedical Research (3) Provides an understanding of ethical issues arising in the responsible conduct of biomedical research and frameworks for critically analyzing them.
Effective: Spring 2012

PHIL 580 Phenomenology (3 per semester/maximum of 6) A critical study of one or more thinkers, ideas, or movements in modern phenomenology.
Effective: Fall 1983

PHIL 589 Philosophical Translation Seminar (2) Studies philosophical works in their original (non-English) languages; course content varies with instructor.
Effective: Spring 2001
Prerequisite:
PHIL 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

PHIL 594 Research Technique (1) A course utilizing research sources and techniques relevant to philosophical studies.
Taken in the first semester of graduate study.
Effective: Spring 1987

PHIL 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

PHIL 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

PHIL 600 Thesis Research (1-15) No description.
Effective: Fall 1983

PHIL 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983
PHIL 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Students will teach introductory logic course--i.e., Phil 1--and other introductory level courses as required by staffing. Effective: Fall 1983

PHIL 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. Effective: Spring 2000

PHIL 610 **Thesis Research Off Campus** (1-15) No description. Effective: Fall 1983

PHIL 611 **Ph.D. Dissertation Part-Time** (0) No description. Effective: Fall 1983

PHIL 803 (HLS 803) **Homeland Security: Social and Ethical Issues** (3) This course will examine the social, political, legal, and ethical issues that arise in the context of homeland security. Effective: Summer 2010

Last Import from UCM: June 2, 2012 12:27 PM
Phys Med&Rehabilita (PMR)

PMR 730 Physical Medicine and Rehabilitation Elective (3rd and 4th year) (5) This elective is for 3rd and 4th year medical students interested in gaining experience in the field of Adult and Pediatric Physical Medicine and Rehabilitation, improving diagnostic skills related to the complications of disability, and improving neurologic and musculoskeletal examination skills.
Effective: Summer 2011
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Physics (PHYS)

PHYS 400 Intermediate Electricity and Magnetism I (3) Electrostatics, steady-state magnetic field; electrical and magnetic properties of matter; Maxwell’s equations, boundary-value problems, and wave propagation. Effective: Spring 2007 Ending: Summer 2012
Prerequisite: Concurrent: MATH 230 OR MATH 231 ; PHYS 204

PHYS 400 Intermediate Electricity and Magnetism I (3-4) Electrostatics and magnetostatics in vacuum; electrical and magnetic properties of matter; electrodynamics, Maxwell’s equations, conservation laws, electromagnetic waves and radiation. Effective: Fall 2012 Future: Fall 2012
Prerequisite: Concurrent: MATH 230 OR MATH 231 ; PHYS 204

PHYS 402 Electronics for Scientists (4) Circuit and network theory; active devices; amplifiers; introduction to digital electronics; noise theory. Effective: Spring 2007
Prerequisite:

PHYS 406 Subatomic Physics (3) Introductory treatment of elementary particles, fundamental strong and electroweak interactions, nuclear structure, accelerators, particle detection, nuclear astrophysics. Effective: Spring 1995
Prerequisite:

PHYS 410 Introduction to Quantum Mechanics I (3-4) Basic postulates; Schrodinger wave equation; stationary states; variational method; scattering in one dimension; orbital angular momentum; hydrogen atom; numerical methods. Effective: Spring 2007
Prerequisite:

PHYS 411 Introduction to Quantum Mechanics II (3) General theory of angular momentum; approximation methods; scattering theory; radiation theory; applications to atomic, molecular, condensed matter, nuclear and particle physics. Effective: Spring 1994
Prerequisite:

PHYS 412 Solid State Physics I (3) Crystal symmetry, x-ray structure analysis, lattice vibrations, thermal properties, free electron transport theory, elementary one-electron quantum theory of solids. Effective: Fall 1986
Prerequisite: Concurrent: PHYS 410

PHYS 413 Solid State Physics II (3) Quantum theory of electronic and optical properties of solids, semiconductors, dielectrics, magnetic properties, crystal imperfections, low-temperature effects, and superconductivity. Effective: Fall 1986
Prerequisite:

PHYS 414 Solid State Physics (3) Crystal structure; reciprocal lattice; X-ray diffraction; lattice vibrations; thermal properties; free electron gas model; energy bands; semiconductors; magnetism. Effective: Spring 2007
Prerequisite:

PHYS 419 (MATH 419) Theoretical Mechanics (3) Principles of Newtonian, Lagrangian, and Hamiltonian mechanics of particles with applications to vibrations, rotations, orbital motion, and collisions. Effective: Spring 2007
Prerequisite:

PHYS 420 Thermal Physics (3) Basic postulates of statistical mechanics and thermodynamics, microscopic quantum states and macroscopic parameters; partition functions; Maxwell- Boltzmann and quantum statistics. Effective: Spring 2007
Prerequisite:

Prerequisite:

PHYS 443 Intermediate Acoustics (3) Vibration and simple vibrating systems, sound wave propagation, acoustic instruments, recent developments. Effective: Fall 1999
Prerequisite:

PHYS 444 Topics in Contemporary Physics (2) Modern research topics and career opportunities in physics; employment, graduate education, and tailoring the physics curriculum to meet career goals. Effective: Spring 2007
Prerequisite:

PHYS 448 Nanoscience Seminar (1) Advanced nanoscience seminar required of Behrend College students for completion of the nanoscience minor. Effective: Summer 2007

The Pennsylvania State University
Prerequisite:

PHYS 446 **The Year in Physics: A Seminar on the Latest Research** (1) Discussion recent research in physics.
Effective: Spring 2007
Prerequisite:

PHYS 457 **Experimental Physics** (1-3) Selected experiments in various fields of physics.
Effective: Spring 2007
Prerequisite:

PHYS 457W **Experimental Physics** (3) Selected experiments in various fields in physics.
Effective: Spring 2007
Prerequisite:

PHYS 458 **Intermediate Optics** (4) Geometrical and physical optics: theory of lens systems, aberrations, apertures, interference, diffraction, polarization.
Effective: Spring 2007
Prerequisite:

Effective: Fall 1986
Prerequisite:

PHYS 462 **Applications of Physics in Medicine** (3) Applications of physics in human physiology and in instrumentation for medical diagnosis and treatment.
Effective: Summer 2002
Prerequisite:

PHYS 472 **Elements of Nuclear Physics and its Applications to Medical Imaging and Treatments** (3) Introduction to the theory of nuclei, interactions with fast particles, and applications to medical imaging and radiation oncology.
Effective: Spring 2012
Prerequisite:

PHYS 479 (MATH 479) **Special and General Relativity** (3) Mathematical description, physical concepts, and experimental tests of special and general relativity.
Effective: Spring 2007
Prerequisite:

PHYS 494 **Physics Research Project** (1-12) Investigation of an original research problem, including a literature search. Preparation of a formal thesis is optional.
Effective: Spring 2007

PHYS 494H **Physics Research Project** (1-12) Investigation of an original research problem, including a literature search. Preparation of a formal thesis is optional.
Effective: Fall 2007

PHYS 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2007
Prerequisite:

PHYS 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PHYS 496H **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012

PHYS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PHYS 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

PHYS 510 **General Relativity I** (3) Foundations of general relativity, elements of differential geometry, Einstein's equation, Newtonian limit, gravity waves, Friedmann cosmologies and Schwarzschild solution.
Effective: Spring 1996
Prerequisite:

PHYS 511 **Topics in General Relativity** (3) Selected topics from: Cauchy problem, Hamiltonian formulation, positive energy theorems, asymptotics, gravitational radiation, singularity theorems, black-holes, cosmology, observational tests.
Effective: Spring 1996
Prerequisite:

PHYS 512 Quantum Theory of Solids I (3) Electrons in periodic potentials; single electron approximations; lattice dynamics; electrical, optical, and magnetic properties of solids; transport theory.
Effective: Spring 1996
Prerequisite: Concurrent: PHYS 517

PHYS 513 Quantum Theory of Solids II (3) Electron-phonon interaction, BCS theory; Landau Fermi-liquid theory; disorder and localized states; spin-wave theroy; many-body theory.
Effective: Spring 1996
Prerequisite:

PHYS 514 Physics of Surfaces, Interfaces, and Thin Films (3) This course focuses on interfacial and surface phenomena; structural, electronic, vibrational and thermodynamic properties; physisorption and chemisorption; phase transitions and ultrathin film nucleation; and growth phenomena.
Effective: Summer 1995
Prerequisite:

PHYS 517 Statistical Mechanics (3) Thermodynamics, classical and quantum statistics; Bose and Fermi gases; Boltzmann transport equation; phase transitions, critical phenomena; Ising model.
Effective: Spring 1996
Prerequisite:

PHYS 518 Critical Phenomena and Field Theory (3) Critical phenomena using field theoretical and renormalization group techniques; solvable statistical models and conformal field study; fluctuations and random processes.
Effective: Spring 2011
Prerequisite:

PHYS 524 Physics of Semiconductors and Devices (3) Electronic structure, optical and transport properties of crystalline and amorphous semiconductors, quantum wells, superlattices; quantum devices; quantum Hall effect.
Effective: Spring 1996
Prerequisite:

PHYS 525 Methods of Theoretical Physics I (3) Complex variables, Hilbert spaces, linear operators, calculus of variations, Fourier analysis, Green's functions, distributions, differential equations, and special functions.
Effective: Spring 1996

PHYS 526 Methods of Theoretical Physics II (3) Finite and Lie groups, representations and application to condensed matter and particle physics; selected topics from differential geometry.
Effective: Spring 1996
Prerequisite:

PHYS 527 (ASTRO 527) Computational Physics and Astrophysics (3) Introduction to numerical methods for modeling physical phenomena in condensed matter, atomic and high energy physics, gravitation, cosmology and astrophysics.
Effective: Fall 2008

PHYS 530 Theoretical Mechanics (3) Newtonian mechanics, noninertial coordinate system, Lagrangian mechanics, small oscillations, Hamiltonian formulation, canonical transformations, Hamilton-Jacobi theory, dynamical systems.
Effective: Spring 1996
Prerequisite:

PHYS 533 Theoretical Acoustics (3) Wave propagation in complex systems and materials: viscoelastic fluids, superfluids, elastic solids, periodic and random media, nonlinear media.
Effective: Spring 1996

PHYS 541 Elementary Particle Phenomenology (3) Baryons and mesons; leptons and quarks; electromagnetic and weak interactions and their unification; quantum chromodynamics; experimental techniques.
Effective: Spring 1996
Prerequisite:

PHYS 542 Standard Model of Elementary Particles Physics (3) Weinberg-Salam model of electroweak interactions, spontaneous symmetry breaking, quantum chromodynamics; selected topics from grand unified theories and superstring theory.
Effective: Summer 1995
Prerequisite:

PHYS 545 (ASTRO 545) Cosmology (3) Modern cosmology of the early universe, including inflation, the cosmic microwave background, nucleosynthesis, dark matter and energy.
Effective: Spring 2009

PHYS 555 (MATSE 555) Polymer Physics I (3) Introduction to the fundamental concepts needed to understand the physics applicable to polymer melts, solutions and gels.
Effective: Spring 2006

PHYS 557 Electrodynamics (3) Special relativity, electromagnet fields, Maxwell's equations, conservation laws, electrostatics and magnetostatics.
Effective: Spring 2011
Prerequisite:

PHYS 559 Graduate Laboratory (2) Study and applications of techniques and instrumentation used in modern physics laboratories.
Effective: Spring 1996

PHYS 561 Quantum Mechanics I (3) Postulates of quantum mechanics, Hilbert space methods, one dimensional potentials, spin systems, Harmonic oscillator, angular momentum, Hydrogen atom.
Effective: Spring 1996
Prerequisite:

PHYS 562 Quantum Mechanics II (3) Addition of angular momenta, perturbation theory, variational principle, scattering theory, density matrices, identical particles, interpretations of quantum mechanics, Dirac theory.
Effective: Spring 1996
Prerequisite:

PHYS 563 Quantum Field Theory I (3) Canonical and functional integral quantization of relativistic and non-relativistic field theories; Feynman diagrams; spontaneous symmetry breaking; renormalization group.
Effective: Spring 1996
Prerequisite:

PHYS 564 Quantum Field Theory II (3) Abelian and non-Abelian gauge theories; renormalization group and operator product expansions; BRST quantization; scattering theory, other related topics.
Effective: Spring 1996
Prerequisite:

PHYS 565 Interface of General Relativity and Quantum Physics (3) Limitations of perturbative methods, conceptual problems; selected topics from black hole thermodynamics, canonical quantum gravity, loop space methods and string theory.
Effective: Summer 1995
Prerequisite:

PHYS 571 Modern Atomic Physics (3) Light-atom interactions, atomic structure, laser cooling and trapping, interferometry, and Bose-Einstein condensation.
Effective: Spring 2011
Prerequisite:

PHYS 572 Laser Physics and Quantum Optics (3) Theory of modern lasers, non-linear and quantum optics, photon statistics, laser spectroscopies, pulsed lasers.
Effective: Spring 2011
Prerequisite:

PHYS 580 Elements of Network Science and Its Applications (3) Introduction to elements of network theory used to describe and model complex networks; applications in social, biological, and technological networks.
Effective: Spring 2011
Prerequisite:

PHYS 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1997

PHYS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

PHYS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

PHYS 600 Thesis Research (1-15) No description.
Effective: Fall 1983

PHYS 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

PHYS 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

PHYS 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

PHYS 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered
PHYS 897A Astrophysics for Educators (2) Explorations of high-energy messengers from extreme cosmic phenomena, such as Galactic supernova blast waves. Instructors will highlight leading experiments.
Effective: Summer 2012 Ending: Summer 2012
Physiology (PHSIO)

PHSIO 510 Physiological Adaptations to Stress (3) Students will learn how to address problems in physiological adaptations to stress through parallel molecular, cellular, and systemic approaches.
Effective: Spring 1998
Prerequisite:

PHSIO 567 (KINES 567) Advanced Exercise Physiology (3) Physiological changes during exercise with emphasis on the effects of physical conditioning and training.
Effective: Fall 1987
Prerequisite:

PHSIO 571 (BIOL 571) Animal Physiology (3) Mammalian cardiovascular, respiratory, renal, and gastrointestinal systems.
Effective: Summer 1985
Prerequisite:

PHSIO 572 (BIOL 572) Animal Physiology (3) Mammalian nervous, endocrine, metabolic, and reproductive systems.
Effective: Summer 1985
Prerequisite:

PHSIO 577 (KINES 577) Cardiovascular Physiology (3) In-depth study of the heart and circulatory system with emphasis on the effects of exercise on cardiovascular function.
Effective: Fall 1997
Prerequisite:

PHSIO 578 (KINES 578) Physiology and Mechanical Behavior of Skeletal Tissues (3) In-depth examination of the structure, composition, and material behavior of the basic skeletal tissues, including bone, cartilage, tendon, and ligament.
Effective: Spring 1999
Prerequisite:

PHSIO 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students or outside speakers.
Effective: Spring 1987

PHSIO 595 (EXSCI 595) Internship in Exercise Physiology and Cardiac Rehabilitation (1-15) Clinical and related research aspects of exercise physiology and exercise prescription with respect to cardiac and cardiovascular rehabilitation.
Effective: Spring 1988
Prerequisite:

PHSIO 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

PHSIO 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

PHSIO 600 Thesis Research (1-15) No description.
Effective: Fall 1983

PHSIO 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

PHSIO 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

PHSIO 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Physiology-Hy (PSIO)

PSIO 501  **Scientific Analysis and Presentation** (1) Journal club format used to develop critical analytical and presentation skills for understanding and clearly presenting current scientific data.  
Effective: Summer 1998

PSIO 503  **Cellular Physiology** (1) PSIO 503 is a physiology course that focuses on cellular aspects of physiology.  
Effective: Summer 2000

PSIO 504  **Cellular and Integrative Physiology** (3) PSIO 504 is a physiology course that integrates cellular and organ-based physiology concepts.  
Effective: Summer 2000

PSIO 505  **Cellular and Integrative Physiology II** (3) This is a physiology course that integrates cellular and organ-based physiology concepts.  
Effective: Spring 2002  
Prerequisite:  
PSIO 522  **Physiological Adaptations to Stress** (3) Students will learn how to address problems in physiological adaptations to stress through parallel molecular, cellular, and systemic approaches.  
Effective: Spring 2012

PSIO 581 (PHARM 581)  **Maintaining Homeostasis A: Heart and Vasculature** (1) Physiology of the cardiovascular system.  
Effective: Fall 2007  
Prerequisite:  
PSIO 583 (PHARM 583)  **Maintaining Homeostasis C: Kidney** (1) Renal physiology and pharmacology.  
Effective: Fall 2007  
Prerequisite:  
PSIO 584  **Practical Bioinformatics A: Analysis of Biological Databases** (1) Understanding and using protein, nucleotide, structure and human disease databases.  
Effective: Fall 2007  
Prerequisite:  
PSIO 585  **Practical Bioinformatics B: Protein and Structural Biology** (1) Understanding and using protein structure databases; advanced topics include basic biological switches, protein:protein interactions and molecular modeling.  
Effective: Spring 2008  
Prerequisite:  
PSIO 586  **Practical Bioinformatics C: Gene and Protein Expression** (1) Understanding modern techniques to address gene and protein expression; using database searching or data collection to obtain such information.  
Effective: Fall 2007  
Prerequisite:  
PSIO 590  **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students or outside speakers.  
Effective: Spring 1987

PSIO 596  **Individual Studies** (1-9) Creative projects including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Spring 1987

PSIO 597  **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.  
Effective: Spring 1987

PSIO 600  **Thesis Research** (1-15) No description.  
Effective: Summer 1983

PSIO 601  **Ph.D. Dissertation Full-Time** (0) No description.  
Effective: Summer 1983

PSIO 610  **Thesis Research Off Campus** (1-15) No description.  
Effective: Summer 1983

PSIO 611  **Ph.D. Dissertation Part-Time** (0) No description.
Plant Biology (PLBIO)

PLBIO 512 Plant Resource Acquisition and Utilization (4) Advanced study of plant resource acquisition and utilization considering molecular, physiological, and whole plant perspectives through lectures and problem solving. Effective: Fall 2006

PLBIO 513 Integrative Plant Communication and Growth (4) Advanced study of plant communication, growth, and development considering molecular, physiological, and whole plant perspectives through lectures and problem solving. Effective: Fall 2006

PLBIO 514 (HORT 514) Modern Techniques and Concepts in Plant Ecophysiology (2) An intensive introduction to concepts of plant ecophysiology and modern techniques used in this field. Effective: Fall 2006

Prerequisite:

PLBIO 515 Modern Techniques and Concepts in Plant Cell Biology (2) An intensive introduction to concepts of plant cell biology and modern techniques used in this field. Effective: Spring 2012

Prerequisite:

PLBIO 516 Modern Techniques and Concepts in Plant Molecular Biology (2) An intensive introduction to contemporary molecular biology methods as applied to the study of plants. Effective: Spring 2012

Prerequisite:

PLBIO 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 2006

PLBIO 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 2006

PLBIO 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Fall 2006

PLBIO 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 2006

PLBIO 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 2006

Last Import from UCM: June 2, 2012 12:27 PM
Plant Pathology (PPATH)

PPATH 405 Microbe-Plant Interactions: Plant Disease and Biological Control (3) Survey of microbe-plant interactions causing plant disease, mechanisms of pathogenesis, disease control, and microbial and molecular biological control strategies.
Effective: Spring 1999
Prerequisite:

PPATH 412 Turfgrass Disease Management (3) Introduction to biology of turfgrass pathogens and management of cool- and warm-season turfgrass disease.
Effective: Spring 2008
Prerequisite:

PPATH 416 Plant Virology: Molecules to Populations (3) A exploration of the molecular biology and population dynamics of the virus-plant interaction.
Effective: Fall 2005
Prerequisite:

PPATH 417 Phytobacteriology (3) Lecture and lab coverage of how bacteria cause plant diseases.
Effective: Fall 2009
Prerequisite:

PPATH 419 Plant Nematology (2) The biology of plant pathogenic nematodes, the diseases they cause, and their control.
Effective: Fall 2009
Prerequisite:

Effective: Spring 2002
Prerequisite:

Effective: Summer 2007
Prerequisite:

PPATH 430 (ERM 430) Air Pollution Impacts to Terrestrial Ecosystems (3) An overview of direct and indirect effects of air pollution on terrestrial plants and ecosystems.
Effective: Summer 2004
Prerequisite:

PPATH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PPATH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PPATH 497A Viruses Everywhere: the Good, the Bad, and the Beautiful (3) Exploration of virus ecology, emphasis on environmental viruses; virus-host relationships; and effects on host ecology, including beneficial viruses.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

PPATH 502 Plant Disease Diagnosis (3) Field and laboratory techniques used in diagnosing plant diseases caused by various types of pathogens with emphasis on fungi.
Effective: Summer 2005
Prerequisite:

PPATH 505 Fundamentals of Phytopathology (2) An in-depth tutorial of the fundamental theories and concepts of plant pathology.
Effective: Spring 2004
Prerequisite:

PPATH 522 Professional Development & Ethics in Plant Pathology (1) Graduate students will develop key professional skills and ethics through a combination of lectures, discussions, and assignments.
Effective: Summer 2012

PPATH 533 Molecular Genetics of Plant-Pathogen Interactions (3) In depth discussion/review of the primary literature on the mechanisms of plant-pathogen interactions at the molecular and cellular levels.
Effective: Summer 2003
Prerequisite:

PPATH 540 Plant Disease Control (3) Principles of plant disease control, including theoretical considerations involved in...
control by chemical and nonchemical means.
Effective: Winter 1978

PPATH 542 Epidemiology of Plant Diseases (3) Disease development in populations of plants, with emphasis on the impact of environment and control practices on rate of development.
Effective: Spring 1984
Prerequisite:

PPATH 543 Pathogen Variation and Host Resistance (3) Mechanisms and implications of genetic variation in plant pathogens related to breeding for disease resistance in plants by genetic means.
Effective: Fall 1983
Prerequisite:

PPATH 544 Fungal Genetics (4) Fungal breeding systems, mating types, asexual restrictions and recombination, tetrad analysis, gene conversion and extra genetic elements.
Effective: Summer 2003
Prerequisite:

PPATH 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2008

PPATH 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PPATH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

PPATH 597B Professional Development and Ethics (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

PPATH 600 Thesis Research (1-15) No description.
Effective: Fall 1983

PPATH 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

PPATH 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised preparation and presentation of materials in lectures and laboratories, preparation and supervision of exams and student consultation and evaluation.
Effective: Fall 1983

PPATH 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

PPATH 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

PPATH 802 (AGBIO 802) Plant Protection: Responding to Introductions of Threatening Pests and Pathogens (3) This course provides knowledge of plant biosecurity, plant disease, regulations, and technologies using case study examples.
Effective: Summer 2010
Prerequisite:

PPATH 853 (TURF 853) Interpreting Turfgrass Science Literature (3) Introduction to turfgrass research publications, interpretation of the data, and discussion of the significance of the results.
Effective: Summer 2010
Political Science (PL SC)

PL SC 403 The Legislative Process (3) Analysis of the policy process within the legislative system; the effects of environmental factors on policy alternatives and legislative decision making. Effective: Spring 2001
Prerequisite:

PL SC 405 The American Presidency (3) An examination of the selection methods for, and powers of, the American presidency, as well as other chief executives. Effective: Fall 1983
Prerequisite:

PL SC 410 Game Theory in International Relations (3) Game theoretic approaches to the study of international relations. Effective: Spring 2005 Ending: Fall 2012
Prerequisite:

PL SC 410 Strategy and Politics (3) This course examines political behavior using social choice theory and game theory. Effective: Spring 2013 Future: Spring 2013
Prerequisite:

PL SC 411W Principles of International Cooperation (3) An exploration of the forces that make conflict, or cooperation, more likely in international relations. Effective: Summer 2006
Prerequisite:

Prerequisite:

PL SC 413 The Rise and Fall of the Soviet Union (3) Background, organization, and operation of the Communist Party and the government of the Soviet Union. Effective: Spring 2001
Prerequisite:

PL SC 414 Dictators and Their Demise (3) Dictators and Their Demise examines the political economy of authoritarian rule. Effective: Summer 2011
Prerequisite:

Prerequisite:

PL SC 416 International Negotiations (3) The study of international negotiations from a strategic perspective. Effective: Summer 2005
Prerequisite:

PL SC 417 American Local Government and Administration (3) Organization, powers, functions, and problems of American cities and metropolitan areas; modern trends and developments. Effective: Winter 1978
Prerequisite:

PL SC 418 International Relations Theory (3) A survey of traditional and contemporary conceptual frameworks and theoretical approaches for the analysis of international relations. Effective: Winter 1978
Prerequisite:

PL SC 418W International Relations Theory (3) A survey of traditional and contemporary conceptual frameworks and theoretical approaches for the analysis of international relations. Effective: Spring 1999
Prerequisite:

PL SC 419 The Bureaucratic State (3) Overview of structural, technological, decision-making, behavioral, and political subsystems of bureaucracy; emphasis on bureaucratic dynamics within larger environmental, interorganizational contexts. Effective: Fall 2007
Prerequisite:

PL SC 422 Comparative Urban Politics (3) Relationships between structure and evolution of city systems and patterns of political behavior. Effective: Spring 2001
Prerequisite:

PL SC 423 Post-Soviet Politics (3) Aspects of political transition and institutions of the fifteen Soviet successor republics; emphasis on Russia and republican confederation. Effective: Fall 2007

The Pennsylvania State University
Prerequisite:

PL SC 424 **Topics in Comparative Government and Institutions** (3) Topics in the comparative analysis of representative contemporary Western and non-Western governmental institutions.
Effective: Fall 2007
Prerequisite:

PL SC 425 **Government and Politics of the American States** (3) Comparative analysis of political processes; executive, legislative, and judicial decision making and behavior; examination of systems functioning; selected public policies.
Effective: Winter 1978
Prerequisite:

PL SC 426 **Political Parties and Interest Groups** (3) Interest group basis of American politics, analysis of party and group behavior in electoral politics and the policy process.
Effective: Fall 1983
Prerequisite:

PL SC 427 **Political Opinion** (3) Nature and development of mass attitudes and opinions; political socialization; voting behavior; relation between opinions and public policy.
Effective: Spring 2001
Prerequisite:

PL SC 428 (US;IL) (WMNST 428) **Gender and Politics** (3) Gender in politics in the United States and around the world; major areas of women and politics research.
Effective: Fall 2007
Prerequisite:

PL SC 429 **Analysis of Electoral Politics** (3) The new politics, its technology, and the strategic perspectives that underlie it.
Effective: Spring 2007
Prerequisite:

PL SC 430 **Selected Works in the History of Political Theory** (3) Detailed examination and analysis of a selected major work, thinker, or tradition in the history of political theory.
Effective: Spring 1998
Prerequisite:

PL SC 430W **Selected Works in the History of Political Theory** (3) Detailed examination and analysis of a selected major work, thinker, or tradition in the history of political theory.
Effective: Spring 2008
Prerequisite:

PL SC 431 **Ancient, Medieval, and Renaissance Political Theories** (3) Political theories of Plato and Aristotle; selected Greek, Roman, medieval, and Renaissance theorists through Machiavelli.
Effective: Spring 2003
Prerequisite:

PL SC 432 **Modern and Contemporary Political Theories** (3) Political theories of the seventeenth through the twentieth centuries, including Hobbes, Locke, Rousseau, Marx, Mill, Mosca, Weber, and selected theorists.
Effective: Spring 2003
Prerequisite:

PL SC 433 **Political Foundations of the Early American Republic** (3) The course introduces students to the major political and philosophical movements that influenced the founders of the early American republic.
Effective: Summer 2008
Prerequisite:

PL SC 434 (IL) (AAA S 434) **War and Development in Africa** (3) This course will examine the relationship between war and development in sub-Saharan Africa in the post colonial era.
Effective: Spring 2008 Ending: Summer 2012
Prerequisite:

PL SC 434 (IL) (AFR 434) **War and Development in Africa** (3) This course will examine the relationship between war and development in sub-Saharan Africa in the post colonial era.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

PL SC 435 **Foundations of American Political Theory** (3) Political theories of colonial, revolutionary, and constitutional periods presented through works of selected thinkers and analysis of particular political problems.
Effective: Spring 2001
Prerequisite:

PL SC 435W **Foundations of American Political Theory** (3) Political theories of the revolutionary and constitutional periods presented through works of selected political thinkers and political issues.
Effective: Spring 2001
Prerequisite:

PL SC 436 **Civil Wars** (3) This course examines factors influencing the onset, duration, severity, termination, recurrence, and consequences of civil wars around the world.
Effective: Spring 2012
Prerequisite:
PL SC 437 **War in World Politics** (3) Causes, resolution, and consequences of crises and wars; testing theories of conflict using both case and statistical studies. Effective: Summer 1997  
Prerequisite:

Prerequisite:

PL SC 439 (CRIMJ 439) **The Politics of Terrorism** (3) Analysis of political terrorism as a violent alternative for peaceful change and traditional warfare in the nuclear age. Effective: Spring 2008  
Prerequisite:

PL SC 440 (US;IL) (AAA S 440, I B 440) **Globalization and Its Implications** (3) This course explores the socioeconomic implications of globalization. Effective: Spring 2008 Ending: Fall 2012  
Prerequisite:

PL SC 440 (US;IL) (AFR 440, I B 440) **Globalization and Its Implications** (3) This course explores the socioeconomic implications of globalization. Effective: Spring 2013 Future: Spring 2013  
Prerequisite:

PL SC 441 **Transnational Corporations and Other Organizations in International Relations** (3) Analysis of the effects of transnational actor behavior on international relations. Effective: Fall 2007  
Prerequisite:

PL SC 442 **American Foreign Policy** (3) Principles of American foreign policy; processes of policy formulation; roles of the President, Congress, the State Department, and other government agencies. Effective: Spring 2001  
Prerequisite:

PL SC 443 (IL) (AAA S 443) **Ethnic Conflict in Africa** (3) This course explores the various causes and impacts of ethnic conflicts in the African context. Effective: Spring 2008 Ending: Summer 2012  
Prerequisite:

PL SC 443 (IL) (AFR 443) **Ethnic Conflict in Africa** (3) This course explores the various causes and impacts of ethnic conflicts in the African context. Effective: Fall 2012 Future: Fall 2012  
Prerequisite:

Prerequisite:

Prerequisite:

PL SC 445Y (US) (AF AM 445Y, LER 445Y) **Politics of Affirmative Action** (3) Examines history, politics, and economics of the use of special programs to advance racial interests in the U.S. Effective: Fall 2012 Future: Fall 2012  
Prerequisite:

PL SC 452 **Government and Politics of Central Europe** (3) Politics and society in the Communist Era, the revolutions of 1989, and problems of adjustment to democracy and market. Effective: Fall 2007  
Prerequisite:

PL SC 453 (IL) **Political Processes in Underdeveloped Systems** (3) Comparative analysis of the political, social, and economic problems characteristic of underdeveloped systems. Effective: Fall 2007  
Prerequisite:

Prerequisite:

Prerequisite:
PL SC 455 Governments and Politics of Western Europe (3) Comparative analysis of political and governmental structures of major West European nations; main functions and processes of such structures.
Effective: Spring 2001
Prerequisite:

PL SC 456 Politics and Institutions of Latin-American Nations (3) Social forces and processes, governmental institutions, foreign policies of major states of Latin America.
Effective: Spring 2001
Prerequisite:

PL SC 457 International Politics of Latin America (3-6) Relationships among the nations of Latin America and the social forces which determine and shape their direction.
Effective: Spring 2001
Prerequisite:

PL SC 458 Government and Politics of East Asia (3-6) Examination of political institutions, democratic and communist revolution, political leadership, political processes of major states of East Asia.
Effective: Summer 1996
Prerequisite:

PL SC 459 (IL) (AAA S 459) Culture and World Politics (3) Role of culture in world politics.
Effective: Summer 2006 Ending: Fall 2012

PL SC 459 (IL) (AFR 459) Culture and World Politics (3) Role of culture in world politics.
Effective: Spring 2013 Future: Spring 2013

PL SC 460 (S T S 460) Science, Technology, and Public Policy (3) The all-pervasive importance of science and technology policy in modern societies and mechanisms and processes by which it is made.
Effective: Spring 1995
Prerequisite:

PL SC 461 (IL) Politics of the European Union (3) This course introduces students to the history, institutions and politics of the European Union.
Effective: Spring 2011
Prerequisite:

PL SC 462 Marxist and Socialist Political Theory (3) Analysis of major problems and key works in the Marxist and Socialist tradition; dialectical materialism, alienation, class warfare, etc.
Effective: Spring 2001
Prerequisite:

Effective: Summer 2008 Ending: Summer 2012
Prerequisite:

PL SC 464 (IL) (AFR 464) Globalization, Extractive Industries, and Conflict in Africa (3) Socioeconomic and environmental impacts of extractive industries in Africa.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

PL SC 467 International Relations of the Middle East (3) The international relations of the Middle East, stressing national security policies of regional and outside actors, and major contemporary conflicts.
Effective: Spring 1985
Prerequisite:

PL SC 470W Legal Brief Writing (3) Writing of legal briefs as practiced in American courts.
Effective: Spring 1998
Prerequisite:

PL SC 471 American Constitutional Law (3) The origins of judicial review, landmark decisions of the Supreme Court, and their impact on the American form of government.
Effective: Fall 2007
Prerequisite:

PL SC 472 The American Legal Process (3) Analysis of the roles, procedures, and policies characterizing the American legal system.
Effective: Spring 2001
Prerequisite:

PL SC 473 American Judicial Behavior (3) Analyzes behavior of judges and other participants in the legal process; examines how and why courts function as policymaking bodies.
Effective: Fall 2007
Prerequisite:

PL SC 474 Civil Liberties and Due Process (3) Fundamental problems relating to civil liberties and due process.
Effective: Fall 2007
Prerequisite:
PL SC 480W Congress and the Presidency (3) Basic characteristics and processes of the national legislature and executive; roles and interaction of these institutions in the policy process.
Effective: Fall 2007
Prerequisite:

PL SC 481 Global Political Economy (3) This course examines states, markets, power, production, and the relations between the various transnational agents who act in these areas. Students may not receive credit for PL SC 481 and PL SC 412.
Effective: Spring 2007
Prerequisite:

PL SC 482 American State and Urban Politics (3) Explores basic characteristics and processes of American state and urban politics; nature of intergovernmental relations involving these governmental levels.
Effective: Fall 2007
Prerequisite:

PL SC 484W The Foreign Policy of Soviet Successor States (3) Relations between Russia and The Newly Independent States (NIS); Russia's relations with selected foreign states and political Institutions; regional impact of the NIS in Baltic, Asian, and Central Asian areas.
Effective: Fall 2007
Prerequisite:

PL SC 487 International Law and Organizations (3) Major topics and issues of international law with special attention to institutional arrangements (international organizations) through which that law operates.
Effective: Fall 2007
Prerequisite:

PL SC 488 Comparative Public Policy (3) Comparative methodology and public policy implementation in postindustrial societies; selected case studies of policy output.
Effective: Fall 2007
Prerequisite:

PL SC 489 Public Administration (3) A survey of the major approaches to the management of most governmental agencies.
Effective: Fall 2007
Prerequisite:

Effective: Fall 2007
Prerequisite:

PL SC 491 Peace and Conflict Studies Seminar (3) Advanced study of major contemporary issues of peace and conflict; includes anthropological, technological, psychological, and economic perspectives.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

PL SC 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

PL SC 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

PL SC 495 Political Science Internship (1-6) Combining experience in government offices, related agencies, or law firms, with appropriate readings and a research paper/report.
Effective: Fall 2007
Prerequisite:

PL SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PL SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PL SC 497A (CAS 497A) Political Deliberation (3) This course showcases of contemporary deliberative practices and explores the shortcomings of modern politics by the deliberative democratic standard.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

PL SC 497B Political Psychology (3) This course will present a genuinely interdisciplinary approach to the study of political psychology.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
PL SC 497C **The Political Economy of China** (3) This course examines the key puzzles and issues of China's economic reform and development from the perspective of political economy.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

PL SC 499 (IL) **Foreign Study--Government** (1-12) Study, in selected foreign countries, of political institutions.
Effective: Summer 2005
Prerequisite:

PL SC 501 **Methods of Political Analysis** (3) Survey of important methods and approaches to the study of politics; introduction to research design.
Effective: Fall 1995

PL SC 502 **Statistical Methods for Political Research** (3) Basic concepts of statistics and their use in political research; data analysis, casual inference, regression analysis, computer applications.
Effective: Spring 1995

PL SC 503 **Multivariate Analysis for Political Research** (3) Analysis of selected issues in quantitative political analysis; introduction to advanced multivariate analysis techniques.
Effective: Spring 2003
Prerequisite:

PL SC 504 **Professional Norms in Political Science** (1.5) An introduction to professional norms, the fundamentals of good research, and the basic skills necessary for good teaching.
Effective: Spring 2007

PL SC 513 **Writing and Professional Development in Political Science** (1.5) Professional development focusing on publishing research, writing dissertations, and professional issues of advanced graduate students.
Effective: Fall 2007
Prerequisite:

PL SC 518 (SOC 518) **Survey Methods I: Survey Design** (3) Research design of social, behavioral, and health surveys.
Effective: Fall 2007

PL SC 519 (SOC 519) **Survey Methods II: Analysis of Survey Data** (3) Intermediate course on the statistical analysis of survey data: topics include weighting, complex surveys, missing data, and contextual analysis.
Effective: Spring 2008
Prerequisite:

PL SC 540 **American Government and Politics** (3) Survey of basic literature in major fields of U.S. government: public opinion, parties, voting, interest groups, presidency, congress, judiciary.
Effective: Fall 1995

PL SC 541 **American Political Institutions** (3-9) Research on a selected topic in United States political institutions such as the presidency, the courts, congress, bureaucracy, state governments.
Effective: Spring 1995

PL SC 542 **American Political Behavior** (3 per semester/maximum of 9) Research on a selected topic in United States political behavior such as public opinion, voting, parties, socialization, judicial behavior.
Effective: Spring 1995

PL SC 550 **Comparative Politics: Theory and Methodology** (3) Survey of basic literature and major research efforts in comparative political analysis.
Effective: Fall 1995

PL SC 551 **Comparative Political Institutions** (3 per semester/maximum of 9) Comparative study of the institutional structures of different political systems: the state, party systems, administrative structures.
Effective: Spring 1995

PL SC 552 **Comparative Political Behavior** (3 per semester, maximum of 9) Research on aspects of comparative political behavior, such as political culture, political change and development, interest groups, public opinion.
Effective: Spring 2003

PL SC 553 **Studies in Regional Politics** (3 per semester/maximum of 9) Research on political systems in selected regions of the world, such as Europe, Latin America, East and South Asia.
Effective: Spring 1995

PL SC 554 **The Politics of Development** (3) The course explores the origins of modernity, its proliferation globally, and problems associated with initiating and sustaining development.
PL SC 560 International Relations: Theory and Methodology (3) Survey of major traditional and contemporary theory-building efforts and contemporary research techniques and orientations in international relations. Effective: Summer 1995

PL SC 561 American Foreign Policy (3 per semester/maximum of 9) Research on the institutions, dynamics, and major themes of United States foreign policy. Effective: Spring 2003

PL SC 563 International Political Economy (3 per semester, maximum of 9) Research on international political economy with a focus on theory building; analysis of political causes and consequences of economic behavior. Effective: Spring 2003

PL SC 564 International Organization (3 per semester/maximum of 6) Research on international governmental and non-governmental organizations in the international system, emphasizing the United Nations and collective security. Effective: Spring 1995

Prerequisite:

Prerequisite:

PL SC 566 Conflict Management, Termination, and Bargaining (3) Research on termination and resolution of international conflicts, focusing on theory building and empirical assessment of theories of conflict resolution. Effective: Fall 2008

Prerequisite:

PL SC 580 Modern Democratic Political Theory (3) Survey of major themes and problems in modern theories of democratic politics. Effective: Spring 2003

PL SC 581 History of Political Theory (3 per semester/maximum of 9) Research on selected political theorists or historical traditions of political thought. Effective: Spring 2003

PL SC 583 Modern Political and Social Theory (3 per semester/maximum of 9) Research on major developments and issues in modern political and social theory, such as critical theory, modernism, and postmodernism. Effective: Spring 2003

PL SC 586 Theory of Bureaucratic and Administrative Politics (3 per semester/maximum of 6) The role of the executive in government and politics; theories of administrative organization, organization behavior, and decision-making processes. Effective: Spring 1998

PL SC 594 Research in Political Science (1-6) Supervised student activities on research projects identified on an individual or small group basis. Effective: Summer 1988

PL SC 595 Internship in Political Science (1-9) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Summer 1987

Prerequisite:

PL SC 595A (SOC 595A) Survey Research Practicum (1-6 per semester/maximum of 6) Practicum in Survey Research data collection or management. Effective: Summer 2011

Prerequisite:

PL SC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. A specific title may used in each instance and will be entered on the student's transcript. Effective: Spring 1987

PL SC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 1987

PL SC 597A Graduate Political Psychology (3) This course will present a genuinely interdisciplinary approach to the study
PL SC 597B **Causal inference** (3) This course approaches to causal inference using the potential outcomes framework.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

PL SC 597C **Comparative Authoritarianism** (3) The course begins with a brief introduction to classical theories of authoritarian rule, and then surveys the current literature on comparative authoritarianism.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

PL SC 597D **Judicial Politics** (3) This is a course on judicial politics, taught from both an American and comparative politics perspective.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

PL SC 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1995

PL SC 599 (IL) **Foreign Studies** (1-12 per semester/maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005

Effective: Fall 1983

PL SC 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

PL SC 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description.
Effective: Spring 1995

PL SC 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2000

Effective: Fall 1983

PL SC 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Portuguese (PORT)

PORT 405 Advanced Composition and Conversation (3) Intended to strengthen the advanced student's ability to speak, read, and write in modern Brazilian Portuguese.
Effective: Summer 1981
Prerequisite:

PORT 456 Brazilian Literature in English Translation (3) Selected topics in the history of Brazilian literature, supplemented by readings, discussion, and lectures on cultural or literary questions.
Effective: Winter 1978

PORT 476 Brazilian Literature, The Modern Era (1880 to the Present) (3) A survey of the major texts of Brazilian literature from romanticism to the present.
Effective: Summer 1991
Prerequisite:

PORT 480 The Brazilian Novel (3) A survey of the Brazilian novel from its origins to the present.
Effective: Spring 1993
Prerequisite:

PORT 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

PORT 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

PORT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PORT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PORT 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

PORT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

PORT 596A (CMLIT 596A) Jorge Amado (1) This short course examines four important novels of the Brazilian author Jorge Amado (1912-2001) at the centennial of his birth.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

PORT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1988

PORT 600 Thesis Research (1-15) No description.
Effective: Fall 1983

PORT 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Poultry Science (PTYSC)
NOTE: Also see courses listed under ANIMAL SCIENCE, DAIRY and ANIMAL SCIENCE, and FOOD SCIENCE.

PTYSC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

PTYSC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

PTYSC 600 Thesis Research (1-15) No description.
Effective: Fall 1983

PTYSC 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

Primary Care Medicine (PCMED)

PCMED 700 **Primary Care Preceptorship** (1) Participation in primary care settings of family medicine, general internal medicine, and general pediatrics. Effective: Spring 1994
Prerequisite: Concurrent: MED 701 MED 702

PCMED 731 **Primary Care Clerkship** (5) This course provides an opportunity for students to learn the principles of primary health care in rural, small town, and/or medically underserved communities. Effective: Summer 1996
Prerequisite:

PCMED 741 **Primary Care Elective - Medical Director-Practice Management Fishburn Family Medicine** (5) This module was developed for those students interested in gaining experience working with a medical director in primary care to learn about managing a practice and with family physicians, nurse practitioners and physician assistants in primary care. Effective: Summer 2009
Prerequisite:

PCMED 742 **Primary Care Longitudinal Advanced Elective** (5) Longitudinal outpatient experience caring for patients over time (once/week over six months) emphasizing continuity of care. Effective: Summer 2011
Prerequisite:

PCMED 743 **Primary Care in PA** (5) Four-week clinical experience with selected primary care physicians in PA. Effective: Summer 2003
Prerequisite:

PCMED 744 **Primary Care, Continental U.S. Sites** (5) Four-week Primary Care related experience in an outpatient clinic within the continental U.S. that meets the student’s individual needs. Effective: Summer 2003
Prerequisite:

PCMED 745 **Primary Care, Indian Health Service** (5) Four-week clinical experience with primary care physicians located at Indian Health Service sites. Effective: Summer 2003
Prerequisite:

PCMED 746 **Primary Care, International** (5) Four-week clinical experience with primary care physicians located at International sites. Effective: Summer 2003
Prerequisite:

PCMED 747 **Primary Care Elective - Leadership in Community Module** (5) This module was developed for those who have both the interest and potential to become leaders in the health care of hi-risk children and their families, and to meet the challenges and opportunities of community-oriented primary care. Effective: Summer 2009
Prerequisite:

PCMED 748 **Primary Care Elective - Penn State Orthopaedics and Sports Medicine** (5) This module was developed for those students interested in gaining experience working in the areas of primary care sports medicine. Effective: Summer 2009
Prerequisite:

PCMED 749 **Primary Care Sports Medicine, Hershey (4th year)** (5) This course provides exposure to concepts utilized in the evaluation and initial treatment of common sports medicine conditions. Effective: Fall 2009
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Psychiatry-Hy (PSCHT)

PSCHT 700 Psychiatry Clinical Clerkship (5) Clinical experience in the management of patients with psychiatric disorders.
Effective: Winter 1978
Prerequisite:
PSCHT 771 Adult Psychiatry Inpatient Acting Internship (5) Students are assigned selected adult inpatients and receive close individual supervision in diagnosis and treatment, including psychotherapy and drug therapy.
Effective: Spring 2009
Prerequisite:
PSCHT 773 Child Psychiatry Inpatient Acting Internship (5) Students are involved, under faculty supervision, in diagnostic evaluation and treatment planning and implementation of selected child and adolescent outpatients.
Effective: Spring 2009
Prerequisite:
PSCHT 774 Child Psychiatry Outpatient Elective (5-15) Students are involved, under faculty supervision, in diagnostic evaluation and treatment planning and implementation of selected child and adolescent inpatients.
Effective: Fall 2003
Prerequisite:
PSCHT 775 Consultation/Liaison Psychiatry Elective (5-15) Students evaluate medical/surgical patients where psychiatric consultation is requested and receive supervision in diagnosis and short-term psychiatric treatment.
Effective: Summer 1985
Prerequisite:
PSCHT 783 Research in Physiology and Pathology of Sleep (5-15) Participation in experimental and clinical studies of normal and disordered sleep and the evaluation, diagnosis and treatment of sleep disorders.
Effective: Winter 1978
Prerequisite:
PSCHT 796 Psychiatry Individual Studies (5) Creative projects including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2009
Prerequisite:
PSCHT 796A Psychiatry Individual Studies for 3rd Year Students (2.5) Psychiatry Individual Studies for 3rd Year Students.
Effective: Spring 2010
Prerequisite:
PSCHT 797 Psychiatry Special Topics (5) Psychiatry Special Topics.
Effective: Spring 2010
Prerequisite:

Psychology (PSY)

PSY 501 Seminar in General Psychology (1) Orientation course for first-year graduate students in Psychology. Effective: Spring 1999
Prerequisite:

PSY 502 (BB H 502) Health: Biobehavioral Perspectives (3) Introduction to the role of psychology in maintaining health and in treating nonpsychiatric disorders. Effective: Summer 1992

PSY 507 Analysis of Psychological Data I (3) Overview of analysis techniques for psychological data. Effective: Summer 2000
Prerequisite:

PSY 508 Analysis of Psychological Data II (3) Overview of advanced analytic techniques for psychological data. Effective: Summer 2004
Prerequisite:

PSY 511 Seminar in Contemporary Psychology (1-3 per semester/maximum of 12) Critical review of readings on a topic of current interest, either in content or methodology, within psychology. Effective: Fall 2006
Prerequisite:

PSY 517 Advanced Social Psychology (3) Problems of theory and of research methods with emphasis on persisting issues relevant to contemporary developments in social psychology. Effective: Spring 2007
Prerequisite:

PSY 520 (LING 520) Seminar in Psycholinguistics (3 per semester/maximum of 9) Considerations of theoretical and research issues relevant to psychological aspects of language sounds, syntax and semantics, and other cognitive support. Effective: Spring 2004

Prerequisite:

Prerequisite:

PSY 523 Social-Organization Psychology in Industry (3) Analysis of the role of social and organizational variables as they affect employee performance and employee attitudes. Effective: Spring 2007
Prerequisite:

PSY 524 Proseminar in Cognitive Psychology (3) An historical introduction to theories and critical findings in the field of cognitive psychology. Effective: Summer 1997
Prerequisite:

PSY 525 COG PSY SEM (3 per semester/maximum of 12) An advanced seminar in a topical or research area in the field of cognitive psychology. Effective: Spring 1998
Prerequisite:

Prerequisite:

Prerequisite:

PSY 529 (HD FS 529) Seminar in Child Development (1-6) Readings and reports on recent findings in child development. Effective: Spring 1999
Prerequisite:

PSY 534 Practicum in Industrial/Organizational Psychology (1-3) Supervised application of psychological principles in industrial and governmental settings. Effective: Spring 2007
Prerequisite:
Prerequisite: 

Prerequisite: 

Prerequisite: 

PSY 541 Personality Theory (3-4) Contemporary theories of personality; relevant research. Effective: Spring 2007
Prerequisite: 

PSY 542 Psychopathology (3-4) Theories of pathological behavior with reference to clinical and experimental data. Effective: Spring 2007
Prerequisite: 

Prerequisite: 

PSY 547 Fundamentals of Social Development (3) An introduction to theories, current issues, and critical psychological research findings relating to social and emotional development. Effective: Summer 2005

PSY 549 (HD FS 549) Developmental Theory (3) Conceptual frameworks and major contributions to the study of individual development across the life-span. Effective: Summer 1990
Prerequisite: 

PSY 554 Clinical Assessment (3) Development of psychological measures; evaluation of reliability and validity. Predictive utility of tests in clinical settings emphasized. Effective: Summer 1990
Prerequisite: 

PSY 555 Theory and Practicum in Clinical Assessment (3-9) Theoretical issues and research in clinical assessment with special reference to administration and interpretation of testing procedures and clinical interviewing. Effective: Winter 1978
Prerequisite: 

Prerequisite: 

PSY 557 Introduction to Psychopharmacology and Survey of Biological Therapies (3) An introduction to the principles of psychopharmacology and to the medications used to treat psychopathologies. Effective: Summer 1998
Prerequisite: 

PSY 558 (PHP 558, HLS 558) Disaster Psychology (3) Explores psychological impact of disasters and terrorist attacks on victims, families, rescuers, and society and methods of reducing negative effects. Effective: Spring 2011
Prerequisite: 

PSY 560 Practicum in Clinical Methods (1-6) Supervised practice in the Psychology Clinic, including assessment, therapy, report writing, and staff participation. Effective: Fall 1987
Prerequisite: 

PSY 561 Clinical Practicum with Children (1-6) Diagnosis and counseling of child-parent problems of learning and adjustment. Effective: Spring 2007
Prerequisite: 

PSY 564 Behavior Modification II (3) Survey and empirical evaluation of treatment strategies. Effective: Winter 1978
Prerequisite: 

The Pennsylvania State University
PSY 565 Seminar in Community Psychology (3) Application of social psychological research methods and principles to prevention and alleviation of behavior disorders in family and community settings.
Effective: Winter 1978

PSY 566 Cultural Psychology (3) Experimental and descriptive research on culture and behavior in both Western and non-Western settings.
Effective: Spring 2007
Prerequisite:

PSY 569 Advanced Theory and Practicum in Counseling and Psychotherapy (3-9) Theoretical issues, research, and practicum experience in psychotherapy.
Effective: Winter 1978

PSY 571 Seminar in Social Psychology (3-12 per semester/maximum of 12) Historical development of theory and methods; determinants and principles of complex social or interactional behavior; contemporary problems and research.
Effective: Spring 2006

PSY 572 Psychology of Gender (3) Theory and research on the psychology of gender, emphasizing gender in social interaction, and in individual identity.
Effective: Spring 2012
Prerequisite:

PSY 575 Clinical Child Psychopathology (3) Overview of developmental clinical child psychopathology; emphasis on social-emotional development, with review of abnormal development and social-emotional maladjustment.
Effective: Summer 1988
Prerequisite:

PSY 576 Clinical Child Interventions (3) Clinical-child therapeutic techniques from a developmental-clinical perspective with emphasis on theoretical basis and empirical evaluation of various techniques.
Effective: Summer 1988
Prerequisite:

PSY 577 Clinical Child Assessment (3) Overview of major methods used in clinical assessment of infants, pre-school children, and grade-school children with emphasis on social-emotional functioning.
Effective: Summer 1988
Prerequisite:

PSY 583 Designing Research in Social Psychology (3) Designs and procedures useful in social psychology and cognate disciplines; quasiexperimental designs and analysis, field experimentation, validity of inferences.
Effective: Fall 1983
Prerequisite:

PSY 584 (SOC 584) Attitude Formation and Change (3) Theory and method in research on attitude formation and change with emphasis on critical analysis.
Effective: Spring 2007
Prerequisite:

PSY 585 Interaction Processes Within and Between Groups (3) Interactions in personal, group, and intergroup relations; theory and observational methods.
Effective: Spring 2012
Prerequisite:

PSY 589 Social Cognition and Social Perception (3) Overview of how social behavior and social perception (e.g., impression formation, attitudes, the self, stereotyping) are influenced by cognitive processes.
Effective: Summer 1997

PSY 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1998

PSY 591 Seminar on Teaching Psychology (1-3) Objectives and content of psychology; organization and presentation of material; teaching aids and techniques.
Effective: Winter 1978

PSY 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PSY 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

PSY 600 Thesis Research (1-15) No description.
PSY 601 Ph.D. Dissertation Full-Time (0) No description.  
Effective: Fall 1983

PSY 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised training in lecture content and presentation, examination construction, and individual instruction.  
Effective: Fall 1983

PSY 610 Thesis Research Off Campus (1-15) No description.  
Effective: Fall 1983

PSY 611 Ph.D. Dissertation Part-Time (0) No description.  
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Psychology-Cl (PSYC)

PSYC 500 Ethics and Professional Practice in Psychology and Counseling (3) This course will familiarize students with the standards of ethical conduct related to research and practice in psychology and counseling. Effective: Fall 2005
Prerequisite:

PSYC 501 Cultural Competency in Psychology (3) This course will familiarize students with the need for sensitivity to individual and group differences associated with culture and ethnicity. Effective: Spring 2001
Prerequisite:

PSYC 502 Applied Social Psychology (3) An examination of social psychological applications to areas such as health, law, interpersonal relations, environment, politics, and other social issues. Effective: Spring 1998

PSYC 510 Human Development and Growth (3) The course covers human development across the life span. Effective: Spring 2005
Prerequisite:

PSYC 514 Preventive Psychology (3) This course focuses on the theoretical, conceptual, programmatic, and empirical issues currently in preventive psychology. Effective: Fall 1999
Prerequisite:

PSYC 515 Clinical Health Psychology (3) This course examines wellness maintenance, early detection, and the impact of health care on individuals and the community. Effective: Spring 1997
Prerequisite:

PSYC 516 Child Health Psychology (3) This course will familiarize students with health issues in the context of child development and family systems. Effective: Spring 2001
Prerequisite:

PSYC 517 Psychopathology (3) A broad spectrum view of psychopathology including biological, social, cognitive, psychological, and neuropsychological approaches, is emphasized, with an applied focus. Effective: Fall 2001
Prerequisite:

PSYC 518 Interviewing and Counseling (3) This course covers basic clinical interviewing and counseling techniques from both the didactic and experiential perspectives. Effective: Spring 2005
Prerequisite:

PSYC 519 Theories and Models of Psychotherapy (3) An advanced level of psychotherapies and applications in diverse settings. Effective: Summer 2005
Prerequisite:

PSYC 520 Research Methods (4) The course will review experimental, quasi-experimental designs, program evaluation, between subject designs, and within subject or intra-subject designs. Effective: Fall 1999
Prerequisite:

PSYC 521 Statistics (4) The nature, computation, computer analysis, interpretation, and APA-style write-up will be discussed for a number of statistical tests. Effective: Spring 2000
Prerequisite:

PSYC 524 Biological Basis of Behavior (3) This course focuses on biological determinants of behavior, including evolution, hormones, sensory systems, internal states, reproduction, emotions, learning, and memory. Effective: Spring 2001
Prerequisite:

PSYC 525 Forensic Psychology (3) This course will explore social, cognitive, civil and criminal issues related to forensic psychology. Effective: Spring 2001
Prerequisite:

PSYC 526 Behavioral Systems in Criminal Justice (3) The impact of crime on the offender, the victim, and society will be studied from the psychological perspective. Effective: Spring 2001
Prerequisite:

PSYC 530 Research Paper (3) Supervised research in psychology for degree candidates.
Effective: Spring 2001
Prerequisite:

PSYC 534 Behavioral Management (3) Analysis of determinants of behavior and behavioral ecology. Emphasis on data collection and data evaluation techniques.
Effective: Fall 1997

PSYC 540 Group Interventions (3) This course covers applications of psychotherapeutic techniques to a group setting.
Effective: Fall 2005
Prerequisite:

PSYC 571 Tests and Measurements (3) Administration, analysis, and interpretation of psychological evaluation methods will be reviewed.
Effective: Spring 2005
Prerequisite:

PSYC 572 Neuropsychological Assessment (3) This course will review the biological bases of behavior, emphasizing brain-behavioral relationships and assessment of these relationships.
Effective: Fall 2001
Prerequisite:

PSYC 592 Current Topics in Applied Psychology (3 per semester/maximum of 99) Advanced topics in applied psychology will be taught through readings, research, and practice.
Effective: Spring 1999
Prerequisite:

PSYC 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Summer 2003

PSYC 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 1995

PSYC 595A Clinical Practicum (1-18) Provides practicum experience component for interviewing and counseling course.
Effective: Fall 2005
Prerequisite:

PSYC 595B Clinical Internship (1-18) Supervised clinical experience in a community setting. This course is repeatable.
Effective: Spring 2005
Prerequisite:

PSYC 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1996

PSYC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1995

Last Import from UCM: June 2, 2012 12:27 PM
Public Administration (P ADM)

P ADM 401 *Introduction to Homeland Security* (3) This course provides foundational knowledge about homeland security, including policy, organization, and legal issues in the American context.
Effective: Summer 2008

P ADM 404 *Homeland Security and Defense in Practice* (3) This course analyzes, evaluates, and critiques homeland security plans in practice.
Effective: Summer 2008
Prerequisite:

P ADM 497 *Special Topics* (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1993

P ADM 500 *Public Organization and Management* (3) Development of basic concepts and issues in public administration; administrative theory and public policy processes.
Effective: Spring 2003

P ADM 502 *Governmental Fiscal Decision Making* (3) Nature, function, and technique of governmental budgeting viewed as mechanism for allocating resources among alternative public uses.
Effective: Spring 2003 Ending: Summer 2012
Prerequisite:

P ADM 502 *Governmental Fiscal Decision Making* (3) Nature, function, and technique of governmental budgeting viewed as mechanism for allocating resources among alternative public uses.
Effective: Fall 2012 Future: Fall 2012

P ADM 503 (H ADM 503) *Research Methods* (1-3) Examination of research methodologies relevant to administration, planning, and public policy.
Effective: Spring 2006 Ending: Summer 2012
Prerequisite:

P ADM 503 (H ADM 503) *Research Methods* (1-3) Examination of research methodologies relevant to administration, planning, and public policy.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

P ADM 505 *Human Resources in the Public and Nonprofit Sectors* (3) Concepts and approaches contributing to effective use of human resources in public and non-profit organizations; legal issues and requirements.
Effective: Spring 2002 Ending: Summer 2012
Prerequisite:

P ADM 505 *Human Resources in the Public and Nonprofit Sectors* (3) Concepts and approaches contributing to effective use of human resources in public and non-profit organizations; legal issues and requirements.
Effective: Fall 2012 Future: Fall 2012

P ADM 506 (H ADM 506) *Management Information Systems for Public and Health Administration* (3) The design, implementation, and purpose of computerized management information systems in public and non-profit organizations.
Effective: Spring 2003

P ADM 507 *Introduction to Public Policy Analysis* (3) Introduction to the analysis of public policy within its organizational and political contexts, including an emphasis on an economic perspective.
Effective: Summer 2004
Prerequisite:

P ADM 510 (H ADM 510) *Organizational Behavior* (3) Examination of concepts of human behavior in formal organizations, systems analysis, conceptual models, and decision processes.
Effective: Spring 2003

P ADM 511 *Organizational Change and Development* (3) Theory of organizational change and development; case analysis of applications in actual situations.
Effective: Spring 2003
Prerequisite:

P ADM 512 *Issues in Human Resources* (3) A survey of major human resource issues such as job stress, burnout, and the many forms of discrimination in organizations.
Effective: Spring 2003
Prerequisite:
P ADM 514 Public Organization and Managerial Consultation (3) This course will review the theories, approaches, methods, and expected outcomes of organization and management consultation. Effective: Spring 2003
Prerequisite:

P ADM 515 (MNGMT 515) Labor Management Relations (3) Labor relations issues; collective bargaining agreement, negotiations, and administration; legal framework of collective bargaining; labor relations in larger social context. Effective: Fall 2011
Prerequisite:

P ADM 516 Strategic Planning (3) A survey of strategic planning purposes, approaches and methods, and expected outcomes in small and large organizations. Effective: Summer 1999
Prerequisite:

Prerequisite:

P ADM 518 Nonprofit Organizations: Management and Leadership (3) A study of the theoretical and practical issues involved in management and leadership of nonprofit organizations. Effective: Spring 2003
Prerequisite:

P ADM 519 Nonprofit Organizations: Resource Development and Management (3) Process by which nonprofit organizations assure that resources are obtained and used effectively and efficiently toward the achievement of objectives. Effective: Summer 2003

P ADM 522 Government Financial Management (3) Theories and techniques of financial planning and control, with emphasis on their application in government and nonprofit agencies. Effective: Spring 2003
Prerequisite:

P ADM 523 Governmental and Nonprofit Accounting (3) Accounting, reporting, and auditing principles and procedures for public sector agencies and nonprofit organizations. Effective: Summer 1998
Prerequisite:

Prerequisite:

P ADM 532 Urban Government (3) Administrative processes and policy problems associated with managing urban communities; political, intergovernmental, fiscal, structural, and analytical concepts in urban government. Effective: Winter 1978

P ADM 533 Local Planning Law and Administration (3) Structure and function of local and regional government from perspective of local planning law and its administration. Effective: Spring 2003
Prerequisite:

P ADM 534 Managing Economic Development (3) Theoretical and operational aspects of economic development emphasizing the role of local and regional government. Effective: Spring 2003
Prerequisite:

P ADM 535 Policy Analysis and Planning (3) The course will cover the theoretical issues in and basic methods of policy analysis and planning (prospective policy analysis). Effective: Summer 2004
Prerequisite:

P ADM 550 Policy and Program Evaluation (3) The course will cover the theoretical issues in and basic methods of policy and program evaluation (retrospective policy analysis). Effective: Spring 2005
Prerequisite:

P ADM 556 State Government Administration (3) Study of structures, systems, processes, problems, and issues affecting state government administration; case studies, field observations, and research. Effective: Spring 2003
Prerequisite:

Prerequisite:
P ADM 558 Legislative Processes (3) Legislatures in American government, emphasizing comparative state legislatures: constitutional patterns; organization, administration; interaction with bureaucracy, constituencies, and organized interests.
Effect: Spring 2003
Prerequisite:

P ADM 570 Scope and Methods of Public Administration (3) Examination of theoretical approaches to public administration and the role of theory in the field.
Effect: Spring 2005 Ending: Summer 2012
Prerequisite:

P ADM 570 Scope and Methods of Public Administration (3) Examination of theoretical approaches to public administration and the role of theory in the field.
Effect: Fall 2012 Future: Fall 2012
Prerequisite:

P ADM 571 Seminar in Organizational Theory (3) Selected theories of organizations and their applications to the study of public organizations.
Effective: Spring 1988 Ending: Summer 2012
Prerequisite:

P ADM 571 Seminar in Organizational Theory (3) Selected theories of organizations and their applications to the study of public organizations.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

P ADM 573 Research and Theory in Public Policy and Governance (3) An introduction to policy analysis, the stages of the policy process, and key theoretical issues. Applications to real world problems.
Effective: Spring 2005
Prerequisite:

P ADM 574 Research and Theory in Public Management (3) Theoretical and empirical bases for selected functions of public managers.
Effective: Spring 1988
Prerequisite:

P ADM 575 Advanced Research Design (3) Experimental, quasi-experimental, survey, aggregate, and other research designs applied to organizational, managerial, and policy analysis research problems.
Effective: Spring 1988 Ending: Summer 2012
Prerequisite:

P ADM 575 Advanced Research Design (3) Experimental, quasi-experimental, survey, aggregate, and other research designs applied to organizational, managerial, and policy analysis research problems.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

P ADM 576 Multivariate Statistical Methods (3) Multivariate statistical methods, with special emphasis on their use in organizational, managerial, and policy analysis research settings.
Effective: Spring 1988
Prerequisite:

P ADM 579 Public Leadership and Ethics (3) Examination of theory and research in leadership and public ethics, and their application to the field of Public Management.
Effective: Summer 2004 Ending: Summer 2012
Prerequisite:

P ADM 579 Public Leadership and Ethics (3) Examination of theory and research in leadership and public ethics, and their application to the field of Public Management.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

P ADM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

P ADM 591 Readings in Public Administration (3) Directed readings in selected areas of public administration.
Effective: Spring 1999
Prerequisite:

P ADM 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1996 Ending: Summer 2012

P ADM 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual basis.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

P ADM 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

The Pennsylvania State University
P ADM 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

P ADM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

P ADM 597A Homeland Security Law (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

Effective: Spring 1990

P ADM 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 2000

P ADM 801 (HLS 801) Homeland Security Administration: Policies and Programs (3) Foundation for understanding homeland security history, the development of homeland security policies and organizations, and current management approaches.
Effective: Summer 2010

P ADM 802 Multifaceted Approaches to Homeland Security (3) Examination of the roles of the public and private sectors and the military in preparing, mitigating, and responding to disasters.
Effective: Fall 2008
Prerequisite:

P ADM 803 Strategic Planning and Organizational Imperatives in Homeland Defense and Security (3) The Homeland Security framework depends on strategic planning and organization. This course examines the key issues associated with these.
Effective: Fall 2008
Prerequisite:

P ADM 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2007

Last Import from UCM: June 2, 2012 12:27 PM
Public Admn (PUB A)

Effective: Fall 1983

Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Public Health Preparedness (PHP)

PHP 410 (HLS 410) Public Health Preparedness for Disaster and Terrorist Emergencies I (3) Analyzes the history of terrorism and explores the preparation and response to specific terrorist threats, natural disasters, and conventional catastrophes. Effective: Fall 2010
Prerequisite:

PHP 510 Public Health Preparedness for Disaster and Terrorist Emergencies II (3) A public health perspective on the preparation necessary to develop a coordinated response to a disaster or terrorist emergency. Effective: Spring 2012
Prerequisite:

PHP 527 Public Health Evaluation of Disasters and Bioterrorism (3) Introduces students to the design of exposure assessment and health effect studies applicable to disasters and terrorism. Effective: Spring 2012
Prerequisite:

PHP 530 (HLS 530) Critical Infrastructure Protection of Health Care Delivery Systems (3) Investigates the impact that terrorist incidents may have on healthcare facilities or their ability to deliver healthcare services. Effective: Spring 2012
Prerequisite:

PHP 553 (CAS 553) Disaster Communication (3) This seminar provides students with a comprehensive understanding of the multifaceted nature of disaster communication across phases of a disaster. Effective: Spring 2012

PHP 558 (PSY 558, HLS 558) Disaster Psychology (3) Explores psychological impact of disasters and terrorist attacks on victims, families, rescuers, and society and methods of reducing negative effects. Effective: Spring 2012
Prerequisite:

PHP 594 (HLS 594) Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 2012
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Public Health Sciences (PHS)

PHS 500 Research Ethics for Clinical Investigators (1) This course is designed for graduate students preparing for a career that will include clinical investigations.
Effective: Spring 2009

PHS 501 Principles of Public Health (3) This course is designed to provide students with a foundation in public health principles.
Effective: Summer 2012

PHS 504 Behavioral Health Intervention Strategies (3) Evaluation of intervention strategies from a biobehavioral health context; theories of change processes in health.
Effective: Spring 2011

PHS 505 Public Health Program Planning and Evaluation (3) Foundations in public health program planning and evaluation.
Effective: Summer 2012
Prerequisite:

PHS 506 Behavioral Health Intervention Strategies II (3) This course provides instruction on how to design theory-driven public health interventions.
Effective: Summer 2012
Prerequisite:

PHS 510 Clinical Research Methods (3) Introduction to the design, implementation, analysis, and interpretation of health research, including observational and controlled trials.
Effective: Spring 2009

PHS 511 Methods Used in Translational Research (1) This course is designed to familiarize clinicians with state-of-the-art laboratory techniques as they apply to translational research studies.
Effective: Spring 2009

PHS 516 Statistical Genetics (3) Basic theory and methods for statistical analysis, introduction to bioinformatics, principles and methods of statistical genetics, case-control association studies.
Effective: Spring 2009

PHS 518 Scientific Communication (2) A survey of the formats in which medical science is presented, with exercises in the preparation of abstracts, manuscripts, and grant applications, including illustrations.
Effective: Fall 2011

PHS 519 Patient Oriented Research (2) This course provides an overview of clinical research and an introduction to methods used to conduct clinical research.
Effective: Fall 2011
Prerequisite:

PHS 520 Principles of Biostatistics (3) Introduction to the application of techniques and interpretation of results that are commonly used to plan, analyze, and report clinical and health services research.
Effective: Spring 2009

PHS 521 Applied Biostatistics (3) An intermediate course that provides more in-depth development of analytical topics covered in the Intro Biostats course, such as analysis of variance and regression techniques. Students will perform analyses, summarize, and interpret results.
Effective: Spring 2009
Prerequisite:

PHS 522 Multivariate Biostatistics (3) This course focuses on advanced topics in biostatistics involving multivariate responses in biomedical research.
Effective: Spring 2009
Prerequisite:

PHS 523 Multivariate Analysis (3) This course focuses on the theoretical and applied aspects of multivariate analyses that are relevant to biomedical research.
Effective: Spring 2012
Prerequisite:

PHS 524 Longitudinal Data Analysis (3) This course focuses on the theoretical and applied aspects of longitudinal data analyses that are relevant to biomedical research.
Effective: Spring 2012
Prerequisite:

PHS 525 **Biostatistics for Lab Scientists** (3) Basic theory and methods for statistical analysis, data presentation and experimental design, with a focus on biomedical applications.
Effective: Summer 2010
Prerequisite:

PHS 526 **Categorical Data Analysis** (3) This course focuses on statistical theory and methods for analyzing categorical data.
Effective: Spring 2012
Prerequisite:

PHS 527 **Survival Analysis** (3) This course focuses on the analysis of time-to-event data with a focus on biomedical research.
Effective: Spring 2012
Prerequisite:

PHS 528 **Bayesian Methods** (3) Approaches to Bayesian modeling and computation with application to medicine and biomedical research.
Effective: Spring 2012
Prerequisite:

PHS 535 **Quality of Care Measurement** (3) Emphasizes the concept and measurement issues involved in assessing and improving the quality of health care.
Effective: Spring 2012
Prerequisite:

PHS 536 **Health Survey Research Methods** (3) This course provides instruction on how to design health research survey questionnaires and how to conduct survey studies.
Effective: Spring 2009
Prerequisite:

PHS 540 **Decision Analysis I** (1) This course provides an introduction to the methods and applications of decision analysis in clinical decision making.
Effective: Spring 2012
Prerequisite:

PHS 541 **Decision Analysis II** (1) This course provides an introduction to the methods and applications of decision analysis in clinical decision making.
Effective: Spring 2012
Prerequisite:

PHS 542 **Environmental Health Sciences** (3 per semester/maximum of 3) Overview of the impact that chemical, physical, and biologic agents in the environment have on human health.
Effective: Spring 2011

PHS 550 **Principles of Epidemiology** (3) Topics include measurements, surveillance, outbreak investigation, bias, and study design.
Effective: Spring 2009
Prerequisite:

PHS 551 **Advanced Epidemiological Methods** (3) Advanced methodological course providing in-depth discussions on applications of advanced methods to design, execution, data analysis, and epidemiological studies reporting.
Effective: Spring 2009
Prerequisite:

PHS 552 **Molecular Epidemiology of Chronic Disease** (3) This course provides instruction on molecular epidemiologic study design and methods in the study of chronic disease.
Effective: Spring 2009
Prerequisite:

PHS 553 **Infectious Disease Epidemiology** (3) Principles of infectious disease epidemiology and the use of epidemiologic methods to address infectious diseases of national and international importance.
Effective: Summer 2012
Prerequisite:

PHS 570 **Health Economics and Economic Evaluation** (3) An introductory course on applied economic evaluation, with emphasis on micro-economic theory, cost-effectiveness and economic modeling.
Effective: Spring 2009
Prerequisite:

PHS 571 **Health Services Organization and Delivery** (3) Examination of health systems, organization, financing, and evaluation; trends, problems, and issues.
Effective: Fall 2010

PHS 580 **Clinical Trials: Design and Analysis** (3) This course stresses the concepts of statistical design and analysis in biomedical research, with special emphasis on the clinical trial.
Effective: Spring 2009
Prerequisite:
PHS 581 Clinical Trials: Case Studies (1) This course emphasizes case studies in clinical trials design, conduct, and analysis.
Effective: Spring 2009

PHS 594 Research Topics (1-9) A closely monitored, clinical or population based research project that is conducted during the second year of the PHS MS curriculum.
Effective: Spring 2009

PHS 595 Public Health Practice Internship (1-6 per semester/maximum of 6) This course provides Master of Public Health degree students with hands-on, "real-world" experience in the practice of public health.
Effective: Summer 2011

PHS 596 Individual Studies (1-9) Creative projects including non-thesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2009

PHS 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be of topical or of special interest.
Effective: Spring 2009

PHS 597A Practice of Public Health (2) This course prepares students for public health practice through discussion of key issues encountered in the public health profession.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

PHS 597C Principles of Health Services Research (1) This course is designed to introduce new graduate students to the Health Services Research methodology.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

PHS 598 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2009

PHS 598A Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2009

PHS 600 Thesis Research (3-6) Research training provided to enable the student to advance his or her knowledge about a selected topic in public health sciences.
Effective: Fall 2010

PHS 801 Data Management (1) Development and implementation of plans for managing clinical research data, collection and processing data, and ensuring data quality.
Effective: Summer 2010

PHS 895A Master of Public Health Internship (3 per semester/maximum of 6) Provides Master of Public Health (MPH) degree students with hands-on, real-world experience in the practice of public health.
Effective: Summer 2012

PHS 897 Special Topics (1-9 per semester/maximum of 9) Formal courses offered infrequently on a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2012

PHS 897A Practice of Public Health (2) Examines key issues related to the practice of public health through discussion of case studies and students' practicum experiences.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Pulmonary Medicine-Hy (PLM)

PLM 726 Pulmonary Medicine (3) Some of the areas studied will be: Symptoms and Signs of Respiratory Disease; Use of Common Diagnostic Tools to Evaluate Patients; Pathophysiology; COPD; Bronchial Asthma; Hypertension; Thromboembolism; Pediatric Pulmonary Disease; Infections; Diffuse Infiltrative Pulmonary Diseases; Acute and Chronic Respiratory Failure; Acute Respiratory Distress Syndrome; Lung Cancer: Pathology and Clinical Aspects; Environmental and Occupational Lung Disease.

Effective: Spring 2009

Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Quality and Manufacturing Management (QMM)

QMM 491 Introduction to Business Concepts for Manufacturing (3) Introduction to business, topics in marketing, accounting, and finance for nonbusiness students in manufacturing management.
Effective: Fall 2001
Prerequisite:

QMM 492 Introduction to Engineering Design Principles (3) Engineering principles including different engineering fields, graphics, design, solid modeling and failure analysis.
Effective: Fall 2001
Prerequisite:

QMM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2008

QMM 552 Applied Statistical Process Control and Experimental Design (3) Concepts and techniques of statistical process control and the design of experiments.
Effective: Fall 2008
Prerequisite:

QMM 561 Manufacturing Systems Planning and Control I (3) Systems, components and configurations, flow of material and information in a manufacturing system.
Effective: Spring 1996
Prerequisite:

QMM 562 Manufacturing Systems Planning and Control II (3) Flow of material and information in a manufacturing system; emphasis on systems integration.
Effective: Spring 1996
Prerequisite:

QMM 581 Manufacturing Processes of Materials (3) Characteristics of materials with respect to their properties and associated choices of processing to create a range of products.
Effective: Spring 1996
Prerequisite:

QMM 582 Manufacturing and Supply Chain Strategy (3) Strategic decision context of manufacturing and its supply chains with linkage to corporate and business strategy.
Effective: Fall 2001
Prerequisite:

QMM 593 Field Experience in Manufacturing (1-2) Experiential learning through the firsthand study of manufacturing plants and by interacting with manufacturing leaders.
Effective: Spring 2001
Prerequisite:

QMM 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1997

QMM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1997

QMM 851 Quality Management (3) Concepts of design, assessment, and improvement of quality systems; customer needs analysis, identification of opportunities for application of measurement techniques.
Effective: Fall 2008
Prerequisite:

QMM 871 Design Practice for Manufacturing I (3) Contemporary concepts in design and design practice with emphasis on engineering, business, and human strategic issues.
Effective: Fall 2008
Prerequisite:

QMM 872 Design Practice for Manufacturing II (3) Contemporary concepts in design and design practice with emphasis on logistics, risk, design and manufacturing readiness, and production.
Effective: Spring 2009
Prerequisite:

QMM 891 Communication and Leadership Skills for Manufacturing Managers (1-3) Applied principles of managerial, visual, and written communication that support the needs of manufacturing leaders.
Effective: Fall 2008
Prerequisite:
QMM 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Fall 2007

Last Import from UCM: June 2, 2012 12:27 PM
Quantitative Analys (QANLY)

QANLY 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

QANLY 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1986

Last Import from UCM: June 2, 2012 12:27 PM
Radiology (RAD)

RAD 700 Pediatric Radiology (5) Tutorial course emphasizing interpretation, clinical correlation, indications, and limitations of imaging studies used in the evaluation of infants and children.
Effective: Spring 2009
Prerequisite:

RAD 771 General Radiology--Clinical Elective (5) Clinical elective including experience in diagnostic radiology, film interpretation, nuclear medicine, and radiation therapy.
Effective: Spring 2009
Prerequisite:

RAD 772 Radiology Advanced Elective (5) Clinical experience in interpreting radiographs and imaging studies, fluoroscopy, dictating and signing radiologic reports, and providing consultative services.
Effective: Summer 2011
Prerequisite:

RAD 774 Radiation Oncology Elective (3rd or 4th year) (5) This course provides exposure to the scope of clinical Radiation Oncology.
Effective: Fall 2010
Prerequisite:

RAD 774A Radiation Oncology Elective (3rd year) (2.5) This course provides 2 week exposure to the scope of clinical Radiation Oncology.
Effective: Fall 2010
Prerequisite:

RAD 796 Radiology Individual Studies (5) Creative projects including nontesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2009

RAD 796A Radiology Individual Studies for 3rd year Medical Students (2.5) Radiology Individual Studies for 3rd Year Medical Students.
Effective: Spring 2010
Prerequisite:

RAD 797 Radiology Special Topics (5) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2009

Last Import from UCM: June 2, 2012 12:27 PM
Real Estate (R EST)

R EST 515 (IB 515) Property Rights in a Global Economy (2) Analysis of economic, financial, legal, and political factors affecting international real estate decision making.
Effective: Summer 2011

R EST 560 Real Estate Financial Analysis (2) This course provides a modern framework for the valuation and analysis of real property using both theoretical and empirical approaches.
Effective: Summer 2011
Prerequisite:

R EST 570 Institutional Real Estate Investment (2) A survey of the latest developments of real estate as an institutional investment.
Effective: Summer 2011
Prerequisite:

R EST 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

R EST 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2011

R EST 599 (IL) Foreign Study--Real Estate (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2011
Prerequisite:

R EST 600 Thesis Research (1-15) No description.
Effective: Summer 2011

R EST 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 2011

R EST 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) No description.
Effective: Summer 2011

R EST 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 2011

Last Import from UCM: June 2, 2012 12:27 PM
Real Prop/Envrml Law (RP&EL)

RP&EL 960 Environmental Law (3) This course introduces some of the most important concepts, issues, and statutes in environmental law. After discussing the economic and ethical bases for environmental law, students examine a representative selection of federal statutes, including the National Environmental Policy Act, the Endangered species Act, "Superfund," and the Clean Air Act.
Effective: Summer 1999

RP&EL 962 Environmental Litigation (2) This course explores the various forms of litigation that arise in the practice of environmental law. Citizen suit actions, toxic torts, government enforcement actions (both criminal and civil), and other forms of litigation will be examined. Emphasis is on the practical aspects of litigation, with active class participation assumed in a problem-oriented format. The use of scientific evidence and expert testimony will be explored.
Effective: Summer 2011
Prerequisite:

RP&EL 963 Environmental and Toxic Torts (2) This course focuses on personal injury and property damage claims arising out of exposure to environmental contaminants and toxic substances. Policy concerns, as well as private causes of action under environmental laws will also be covered.
Effective: Spring 2008

RP&EL 964 Real Estate Negotiation and Drafting (3) Students will learn to negotiate and draft multiple standard documents used in commercial real estate transactions.
Effective: Spring 2011

RP&EL 965 Oil and Gas Law (3) This course will address the basic concepts in oil and gas law within the United States as well as the specific legal issues associated with the development of the Marcellus Shale formation. This specific topics to be covered include the ownership of oil and gas, oil and gas leasing, oil and gas conservation laws, oil and gas interests, and government regulation of development.
Effective: Summer 2012

RP&EL 973 Land Use Controls (3) The public regulation of private property raises some of the more interesting and difficult questions in property law. On one side of the debate is the government, which seeks to regulate land use in ways that it believes promote the public interest. On the other side are private property owners who often object to restrictions placed on their ability to use their property as they deem best. In studying this tension between public goals and private rights, the course will explore the constitutional limitations placed on governments in the area of land use regulations as well as topics such as variances, special use permits, vested rights, subdivision controls, exactions, and impact fees, exclusionary zoning, the rebuilding of urban cores, and the managing of growth in suburban areas.
Effective: Summer 2011

RP&EL 979 Ocean and Coastal Law (3) This course first concentrates on the legal regime for the coastal zone, including estuaries, bays, barrier islands, beach erosion and access, islands, and wetlands. The course then moves progressively seaward through the territorial sea into the ocean, concentrating on such issues as ownership of submerged lands; Freedom of High Seas; narcotics control, immigration, and sanitation in the contiguous zones; fishery management; and resource exploitation.
Effective: Fall 1998

RP&EL 980 Construction Law (2-3) This course examines the peculiar legal problems encountered on construction projects. It covers contract, tort and statutory law as adapted specifically to the construction industry. It analyzes the perspectives of an owner, developer, architect/engineer, contractor, subcontractor and bonding company, both in the context of private and public construction projects, commercial and residential. The principal areas of inquiry are contract structure, public bidding, theories of liability, payment and security mechanisms, claims related to time, disruption and extra work, and claims arising from construction defects. This course is designed to enable you to become familiar with construction law and the construction industry so that, whether you work in the public sector of private practice, you will be able to offer practical legal advice to construction professionals.
Effective: Summer 2011

RP&EL 983 Real Estate Transactions (4) This course examines various stages of the modern real estate transaction and of the relationships that shape it through the eyes of its various participants--buyer, seller, lender, developer, broker, attorney. Topics explored include contracts, deeds, financing, recording, and title assurance.
Effective: Fall 2000

RP&EL 988 Natural Resources Law (3) This course provides a basic overview of federal and state regulations and the common law affecting title to and exploitation of such resources as water, coal, oil, gas, and public lands. Common mineral leasing provisions are given particular emphasis.
Effective: Summer 1999

The Pennsylvania State University
RP&EL 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 2005

RP&EL 997A Oil and Gas Law (3) This course will address the basic concepts in oil and gas law within the United States as well as the specific legal issues associated with the development of the Marcellus Shale formation. The specific topics to be covered include the ownership of oil and gas, oil and gas leasing, oil and gas conservation laws, oil and gas interests, and government regulation development. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

Last Import from UCM: June 2, 2012 12:27 PM
Recreation, Park and Tourism Management (RPTM)

RPTM 410 Marketing of Recreation Services (3) Theoretical/practical application of marketing/advertising strategies in the development/delivery of recreation services. Effective: Spring 2005
Prerequisite:

RPTM 415 Commercial Recreation Management (3) Planning, developing, and managing profit-oriented recreation opportunities. Effective: Spring 2005
Prerequisite:

RPTM 425 Principles of Interpretive Materials (3) Principles, practices, application of non-personal interpretive activities common to natural/cultural history, including exhibits, audio-visual and illustrative materials. Effective: Spring 2005
Prerequisite:

RPTM 430 Environmental Education Methods and Materials (3) Methods and materials for developing, implementing, and evaluating environmental education programs within formal and non-formal educational settings. Effective: Summer 2011
Prerequisite:

RPTM 435W Program Evaluation and Research in Recreation Services (3) Systematic, structured problem-solving process for decision making in recreation and parks. Research techniques/evaluation procedures; quantitative, qualitative methodologies; deductive, inductive reasoning. Effective: Spring 2005
Prerequisite:

RPTM 435 Recreation Facilities Planning and Management (3) Planning and management of selected facilities with emphasis upon maintenance, activity, and support provisions. Effective: Spring 2005
Prerequisite:

RPTM 440 Adventure-based Programming and Administration (3) Utilization of wilderness/backcountry environments and participant challenge; history, models, theories; survey of organizations; program design, administration; and issues. Effective: Spring 2005
Prerequisite:

RPTM 460 Political and Legal Aspects of Recreation Services (3) Role of local, state, federal government in provision of recreation services. Legislative and judicial systems. Effective: Spring 2005
Prerequisite:

RPTM 470 Recreation and Park Management (3) Management of recreation and park services in public/non-profit settings; planning, budgeting fiscal development, resources allocation, decision-making, making, computer applications. Effective: Spring 2005
Prerequisite:

RPTM 476 Leisure Education in Therapeutic Recreation (3) Theoretical and practical application of leisure education in the therapeutic recreation process. Effective: Spring 2005
Prerequisite:

RPTM 480 Senior Management Seminar (1) Current management issues will be examined relative to professional management strategies, ethics, and leadership in leisure services. Effective: Spring 2005
Prerequisite:

RPTM 486 Facilitation Techniques in Therapeutic Recreation (3) Intervention strategies, therapeutic approaches, and group facilitation techniques in therapeutic recreation. Effective: Summer 2011
Prerequisite:

RPTM 490 Management and Issues in Therapeutic Recreation Services (3) Topics related to management and professional issues in therapeutic recreation services in both clinical and community settings. Effective: Summer 2011
Prerequisite:

RPTM 494H Senior Honors Thesis (1-6 per semester/maximum of 6) Senior Honors Thesis Effective: Summer 2011

RPTM 495A Internship in Recreation Services (12) Meet educational objectives through participation in organized practical experience; direct observation and professional supervision in full-time work experience. Effective: Spring 2005
Prerequisite:
RPTM 495B *Internship in Golf Management* (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings. Effective: Spring 2005
Prerequisite:

RPTM 495C *Internship in Golf Management* (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings. Effective: Spring 2005
Prerequisite:

RPTM 495D *Internship in Golf Management* (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings. Effective: Spring 2005
Prerequisite:

RPTM 496 *Independent Studies* (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2005

RPTM 497 *Special Topics* (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 2005

RPTM 497B *Introduction to Arena Management* (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 497B *Discovery Trip* (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

RPTM 497C *Outdoor Consortium* (2) The purpose of the Outdoor Recreation Consortium is to provide students with hands-on exposure to outdoor recreation resources management in a major National Park that is facing complex challenges. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

RPTM 497D *Peer Mentoring* (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013
Prerequisite:

RPTM 497E *Outdoor and Experiential Education* (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2012 Ending: Summer 2012

RPTM 497F *National Curricula Workshop* (1-2 per semester/maximum of 2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 497F *National Curricular Workshops* (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

RPTM 497G *Golf Operations* (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

RPTM 497I *Canoeing Leadership* (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 497I *Canoeing Leadership* (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

RPTM 497J *Peer Mentoring* (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
RPTM 497K **Discovery Trip** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

RPTM 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2006

RPTM 498B **Wilderness First Responder** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

RPTM 498D **Backpacking Leadership** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 498D **Back Packing Leadership** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

RPTM 498F **Rock Climbing Leadership** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 498F **Rock Climbing Leadership** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

RPTM 498G **Player Development/Tournament Golf** (2 per semester/maximum of 16) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 498G **Player Development/Tournament Golf** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

RPTM 498K **Administration of Golf Operations IV** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

RPTM 499 (IL) **Foreign Studies** (1-12 per semester/maximum of 12) Foreign Studies in RPTM.
Effective: Summer 2012
Prerequisite:

RPTM 501 **Leisure Studies Foundations** (3) This course provides general background knowledge about the literature and research methods central to the field of leisure studies.
Effective: Spring 2008

RPTM 510 **Tourism Behavior: An interdisciplinary Approach** (3) An exploration of the various approaches that have been taken in the social sciences to understand tourism behavior.
Effective: Spring 2008
Prerequisite:

RPTM 515 **Program Development and Evaluation** (3) Critical analysis of political and social determinants of recreation program development; research and evaluation procedures.
Effective: Spring 2008

RPTM 525 **Behavioral Patterns of the Outdoor Recreationist** (3) Patterns of time and space use; user characteristics; meaning of participation; facilitation of environment-use enhancement.
Effective: Spring 2008

RPTM 527 **Social Psychology of Leisure** (3) Application of the methods, constructs, and theory of social psychology to the study of leisure, outdoor recreation, and therapeutic recreation.
Effective: Spring 2008
Prerequisite:

RPTM 530 **Research Methods in Leisure Studies** (3) Research techniques, including methods, research design, techniques for data collection, as applied to relevant problems in the leisure studies field.
RPTM 533 Leisure Studies, Surveys, and Appraisals (3) Advanced procedures related to leisure, recreation, and park research. Effective: Spring 2008
Prerequisite:

RPTM 540 Public and Private Recreation Lands and Waters (3) Public and private roles and interactions, allocation of resources, use policies, open space concepts, private enterprise developments, legal controls. Effective: Spring 2008

RPTM 545 Philosophical and Social Bases of Leisure (3) Philosophical and social bases of leisure; analysis of critical issues of leisure for philosophical and social implications. Effective: Spring 2008

RPTM 560 Administrative Problems of Leisure Service Organizations (3) Special problems of recreation and park departments; legal powers and liability; departmental organization, financing, personnel policies, and staff development. Effective: Spring 2008

RPTM 570 Conceptual Bases for Therapeutic Recreation (3) Issues in the application of concepts in therapeutic recreation from a multidisciplinary perspective; evaluation and research. Effective: Spring 2008
Prerequisite:

RPTM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 2008

RPTM 596 Individual Studies (1-9) Creative projects, including nontesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2008

RPTM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 2008

RPTM 597A Foundations of Tourism (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 597A Scholarly Writing in RPTM (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

RPTM 597D Worldview, Sustainability and Environmental Education (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 2013 Ending: Spring 2013 Future: Spring 2013

RPTM 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Spring 2008

RPTM 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University. Effective: Spring 2010

RPTM 611 Ph.D. Dissertation Part-Time (0) No description.
Religious Studies (RL ST)

RL ST 400 Theories of Religion (3) Comparative and interdisciplinary study of two or more systematic theories of religion: anthropological, psychological, sociological, philosophical/theological.
Effective: Fall 1983
Prerequisite:

RL ST 405 (IL) (J ST 405) Ancient Jewish Traditions and Modern Food Movements (3) Jewish laws, customs and attitudes with regard to food production, agricultural policy and eating from biblical to modern times.
Effective: Spring 2012

RL ST 407Y (IL) (HIST 409Y, J ST 409Y) European Anti-Semitism from Antiquity to the Present (3) Surveys the history of anti-Semitism in Europe from antiquity through the Middle Ages to the present.
Effective: Summer 2005

RL ST 408 (US;IL) Hindu Studies (3) Special topics in Hindu studies.
Effective: Summer 2005
Prerequisite:

RL ST 409 (US;IL) Buddhist Studies (3) Special topics in Buddhist studies.
Effective: Spring 2006
Prerequisite:

RL ST 410 (US;IL) (HIST 410, J ST 410) Jews in the Medieval World (3) Trends in medieval Jewish society under Islam and Western Christendom.
Effective: Spring 2006

RL ST 411 (US;IL) (J ST 411) Jewish Studies (3) Study of the life and thought of a particular period or movement in the history of Judaism.
Effective: Spring 2006
Prerequisite:

RL ST 412 (J ST 412) American Judaism (3) The development of Jewish religion and culture in America from the colonial era to the present.
Effective: Summer 1999
Prerequisite:

RL ST 414 (PSYCH 436) Humanistic, Existential, and Religious Approaches to Psychology (3) Existential, humanistic, and religious approaches to the psychology of experience, consciousness, and will.
Effective: Spring 2007 Ending: Summer 2012
Prerequisite:

RL ST 420 Major Christian Thinkers (3) Systematic inquiry into the religious thought of one or more Christian thinkers, such as Paul, Augustine, Luther, Calvin, Kierkegaard, or Tillich.
Effective: Fall 1983
Prerequisite:

RL ST 422 (AM ST 422) Religion and American Culture (3 per semester/maximum of 6) Selected topics, problems, or historical movements in American religion. Relation between religion and American culture.
Effective: Summer 1996

RL ST 424H (HIST 424H, J ST 424H, PHIL 434H) Monotheism and the Birth of the West (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.
Effective: Spring 2002 Ending: Summer 2012
Prerequisite:

RL ST 424H (HIST 424H, J ST 424H) Monotheism and the Birth of the West (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

RL ST 440Y (US;IL) The Orthodox Christian Tradition (3) History, culture, and beliefs of the Eastern Orthodox religious tradition with special reference to Russia.
Effective: Summer 2011
Prerequisite:

RL ST 461 (US;IL) (SOC 461) Sociology of Religion (3) Contemporary religion in the United States: beliefs, structure, and function of major denominations and religious cults.
Effective: Spring 2006
Prerequisite:

RL ST 471Y (IL) (HIST 471Y) Classical Islamic Civilization, 600-1258 (3) Pre-Islamic Arabia; Muhammad; Arab conquest; Islamic beliefs and institutions; literary, artistic, and scientific achievements; relations with Europe; breakdown of unity.

The Pennsylvania State University
RL ST 478 (J ST 478) Ethics After the Holocaust (3) Explores the philosophical effects of the Holocaust for thinking about the primary question: Is ethics possible?
Effective: Summer 2012
Prerequisite:

RL ST 483 (IL) Zen Buddhism (3) The development and current state of Zen Buddhist thought and practice.
Effective: Spring 2006
Prerequisite:

RL ST 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

RL ST 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

RL ST 495 Internship (1-18) Supervised off-campus, non-group instruction, including field experience, practica, or internships.
Effective: Summer 2004
Prerequisite:

RL ST 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

RL ST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

RL ST 499 (IL) Foreign Study--Religious Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

RL ST 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

RL ST 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

RL ST 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

RL ST 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2002

RL ST 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983
Renal Medicine-Hy (REN)

REN 728 Hematology (3) Some of the areas studied will be: Renal Pathology and Congenital Disorders; Renal Physiology; Renal Function Testing; Glomerular Disease I and II; Urinary Tract Pathophysiology/Urinary Tract Infection; Urinalysis; Acid-Base; Pathology of the Prostate; Testicular/Penile Neoplasm; Salt and Water; Diuretics; Acute Renal Failure; Potassium; Calcium/Phosphorous; Chronic Renal Failure; and Inflammatory Disease of the Male Genital Tract.
Effective: Fall 2001
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Reproductive Medcn-Hy (REP)

REP 730 Reproductive Medicine (4) Some of the areas studied will be: Menstrual Cycle; Sexually Transmitted Diseases; Hormonal Contraception; Non-hormonal Contraception; Amenorrhea and Galactorrhea; Pathology of Cervix, Vulva, and Vagina; Cytology; Ectopic Pregnancy; Normal Pregnancy; Cancer of the Cervix; Pathology of the Breast; Perinatal Pathology; Prenatal Genetics Screen; Pathology of the Ovary and Fallopian Tube; Menopause; High Risk Pregnancy; Trophoblastic Tumors; Carcinoma of the Breast; Pathology of the Uterus; and Ovarian Cancer.
Effective: Fall 2001
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Rural Sociology (R SOC)

R SOC 417 (CED 417) **Power, Conflict, and Community Decision Making** (3) Impact of institutions on human interdependence and behavior, the structure of power, and community decision making and public policy. Effective: Spring 2010
Prerequisite:

R SOC 420 (US;IL) (CED 420, WMNST 420) **Women in Developing Countries** (3) Analysis of women’s work, experiences, and development policies and practices in Africa, Asia, and Latin America. Effective: Fall 2009

R SOC 452 **Rural Organization** (3) Social organization and change in rural communities; use of sociological principles in analysis of rural problems and rural development. Effective: Spring 2012
Prerequisite:

R SOC 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

R SOC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

R SOC 499 (IL) **Foreign Study--Rural Sociology** (1-12) Study in selected countries of rural social institutions and current rural sociological problems. Effective: Summer 2005

R SOC 502 **Use of Theory in Rural Sociology** (3) Examine and evaluate metasociology of alternative theoretical systems applicable to rural society, with emphasis on American society. Effective: Fall 1983
Prerequisite:

R SOC 505 (CEDEV 505, AEE 505) **Leadership Development** (3) Exploration, understanding, and application of leadership roles, strategies, and principles in group and community settings. Effective: Spring 2010

R SOC 508 **Sociology of Agriculture** (3) Sociological analysis of changes in the organization of agriculture and food systems in the United States and developing countries. Effective: Summer 1992

R SOC 513 **Research Methods in Rural Social Sciences** (3) Scientific method in planning and conducting research. Effective: Summer 2012

R SOC 516 (CEDEV 516) **Change in Rural Society** (3) Social change in rural society, emphasizing prediction and control of the change process. Even years. Effective: Fall 2000

R SOC 517 (CEDEV 517) **International Rural Social Change** (3) Implications of planned change for international rural societies, considering basic structural constraints, known institutional linkages, and potential synergetic consequences. Effective: Fall 2000

R SOC 522 **Data Analysis in Rural Sociology** (1) Analysis of research data in rural sociology using computer library programs. Effective: Fall 1987
Prerequisite:

R SOC 525 **Fertility, Population Change, and Development** (3) Fertility and population growth in less-developed countries; theories of fertility change, agricultural development, and population policies. Effective: Summer 1987
Prerequisite:

R SOC 530 **Sociology and Demography of Poverty in the United States** (3) An in-depth treatment of sociological and demographic dimensions of poverty in rural and urban areas of the United States. Effective: Spring 1998

R SOC 552 **Theoretical Frameworks for Rural Community Research** (3) Application of community theories to the study

The Pennsylvania State University
of communities in rural areas.
Effective: Summer 2000
Prerequisite:

R SOC 555 Human Dimensions of Natural Resources (3) Identification of the interrelationships and influence of human behavior and natural resources.
Effective: Spring 2012

R SOC 573 Methods of Survey Data Analysis (3) Use of multivariate procedures in the analysis of survey data in the rural social sciences.
Effective: Spring 1988
Prerequisite:

R SOC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

R SOC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

R SOC 597A Issues in Data Analysis (2-3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

R SOC 597C Qualitative Methods (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

R SOC 597D Contemporary Social Theory (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

R SOC 600 Thesis Research (1-15) No description.
Effective: Fall 1983

R SOC 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

R SOC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Provides advanced standing graduate students from a research oriented curriculum the opportunity to receive experience/supervision in resident instruction in higher education.
Effective: Fall 1983

R SOC 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

R SOC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Russian (RUS)

RUS 400 (IL) Senior Seminar in Russian Culture (3) Senior seminar devoted to topics in Russian culture; conducted in Russian. Effective: Spring 2006
Prerequisite:

RUS 401 Advanced Russian A (3) Advanced Russian grammar, conversation, and composition. Effective: Summer 2012
Prerequisite:

RUS 402 Advanced Russian B (3) Advanced Russian grammar, conversation, and composition. Effective: Summer 2012
Prerequisite:

RUS 404 Advanced Reading and Composition (3) Advanced Russian Reading and Composition. Effective: Summer 2012
Prerequisite:

RUS 405 (IL) Seminar in Russian Literature (3-6 per semester/maximum of 6) Readings in classical Russian literature; Topics vary. Effective: Summer 2012
Prerequisite:

RUS 406 (IL) Russian Film (3) Conversation and Composition based on classical Russian films. Effective: Summer 2012
Prerequisite:

RUS 412 (IL) Russian Translation (3 per semester/maximum of 6) Translation from Russian into English of complex texts from the humanities, social sciences, and technical fields. Effective: Spring 2006
Prerequisite:

RUS 426 (IL) Dostoevsky (3) Study of representative works by Dostoevsky in the original Russian. Effective: Spring 2006
Prerequisite:

RUS 427 (IL) Tolstoy (3) Study of representative works by Tolstoy in the original Russian. Effective: Spring 2006
Prerequisite:

RUS 460 (IL) Linguistic Analysis of Contemporary Russian (3) Detailed study of the phonology, morphology, and syntax of Modern Standard Russian and the major dialects. Effective: Spring 2006
Prerequisite:

RUS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 1994

RUS 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007

RUS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

RUS 496A Soviet History (3) Soviet History in "Advanced Russian through Reading." Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RUS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

RUS 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

RUS 501 Readings in Russian Literature (3-6) No description. Effective: Spring 1987
Prerequisite:
RUS 525 **Pushkin** (3) Pushkin's significance in Russian literature; his relation to other European literatures; Eugene Onegin and selected shorter works.
Effective: Winter 1978

RUS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2001

RUS 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

RUS 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching RUS 001, 002, or 003 under the supervision of a full-time faculty member.
Effective: Fall 1983

RUS 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
School Psychology (S PSY)

S PSY 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

S PSY 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

S PSY 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2011

S PSY 500 Professional Issues in School Psychology (1-3) Orientation to the field through study of unique problems, current issues, ethical and legal matters, unique cases, and research projects.
Effective: Summer 2011

S PSY 503 Development Across the Life Span (3) This is a graduate level survey course on the scientific discipline of human development across the life span.
Effective: Summer 2011
Prerequisite:

S PSY 510 Supervision of Pupil Service Personnel (1-10) Program supervision and professional leadership in university clinics and school systems.
Effective: Summer 2011
Prerequisite:

S PSY 530 Psychoeducational Interventions (3) Development of empirically validated psychoeducational interventions for academic and behavioral problems experienced in school by children and adolescents.
Effective: Summer 2011

S PSY 535 School-Based Psychological Interventions for Children and Youth (3) Development of empirically supported psychological and psychoeducational interventions for behavioral and emotional concerns among school-aged children.
Effective: Summer 2011
Prerequisite:

S PSY 554 Psychological and Educational Evaluation of Exceptional Children (3) Administration and interpretation of individual tests other than the Stanford-Binet, WISC, WAIS.
Effective: Summer 2011
Prerequisite:

S PSY 556 Psychological Assessment of Preschool and School-Aged Children (2) Study of cognitive/affective tests; use of systems--analytic, multivariate statistical, actuarial methods of data combination in decision-making processes.
Effective: Summer 2011
Prerequisite:

S PSY 559 The Individual Psychological Examination (3) Demonstrations and practice in widely used ability and aptitude tests; psychological report writing.
Effective: Spring 2012
Prerequisite:

S PSY 561 Consultation in Educational Settings (3) Prepares students to consult with teachers, administrators, parents, and other professionals about academic, behavioral, social-emotional, and programmatic issues.
Effective: Summer 2011
Prerequisite:

S PSY 595A Practicum in School Psychology (1-6) Clinical experience with children under supervision in a variety of settings requiring service, including practice in synthesizing data and observations.
Effective: Summer 2011
Prerequisite:

S PSY 595B Internship in School Psychology (1-10) Long-term placement in settings providing work for school psychologists with children, parents, teachers, administrators, and service agencies, under supervision.
Effective: Summer 2011
Prerequisite:

S PSY 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011
S PSY 597 Special Topics (1-9) Formal courses given on a topical or special interest subject that may be offered infrequently; several different topics may be taught in one year or semester. A specific title may be used in each instance and will be entered on the student’s transcript. Multiple offerings may be accommodated by the use of suffixes, A, B, etc. Effective: Summer 2011

S PSY 597A (BB H 597A) Neural Systems and Human Behavior (3) This is a course basic neuroscience and neurological bases of behavior. This course will provide students with fundamental knowledge about brain-behavioral systems as well as prepare the student to read and understand the current neuroscience literature relevant to his or her professional field. Effective: Summer 2012 Ending: Summer 2012

S PSY 597C Special Education Law & School Change (3) Special education and school law will form the foundation of this course. The course will also provide a basic framework of how school systems operate in order to help school psychologists and other potential school leaders effect change. Effective: Summer 2012 Ending: Summer 2012

S PSY 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Summer 2011

S PSY 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Summer 2011

S PSY 843 (CN ED 843) Prevention Strategies and Programming (3) Addresses prevention program development, implementation, and evaluation, along with theoretical and empirical underpinnings, ethical, and multicultural issues related to prevention. Effective: Summer 2011

Last Import from UCM: June 2, 2012 12:27 PM
Science (SC)

SC 400 Consequences of Science (1) A series of lecture/discussions in which science faculty members show the social implications of their research specialty.
Effective: Winter 1978

SC 401 Basic Science and Disease (1) Clinical aspects of various disease and how basic scientific information contributes towards understanding and treating disease.
Effective: Summer 2008
Prerequisite:

SC 402 Science-Related Employment: Corporate Organization, Opportunities, and Expectations (1-3 per semester/maximum of 3) Present undergraduate and graduate students with information and skills necessary for success in science-related job positions available in industry.
Effective: Spring 2011
Prerequisite:

SC 476 Human Dimensions of Health Care (3) Field experience in five or more medical settings; complementary exposure to the scientific literature; weekly discussions.
Effective: Spring 2011
Prerequisite:

SC 494 Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1994

SC 494H Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

SC 495 Science Co-op Work Experience III (1-3) A supervised work experience where the student is employed in a scientific position. To be offered for SA/UN grading.
Effective: Spring 2007
Prerequisite:

SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1996

SC 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 1997

SC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1996
Science Education (SCIED)

SCIED 410 Using Technology to Enhance Science Teaching (3) This course explores contemporary practice and research associated with applications of technology to enhance science learning and teaching.
Effective: Summer 2000
Prerequisite:

SCIED 411 Teaching Secondary Science I (3) Introduction to teaching secondary school science, including curriculum, learning theory, media, evaluation as they relate to student progress.
Effective: Spring 1994
Prerequisite:

SCIED 412 Teaching Secondary Science II (3) Implementation of science instruction using a variety of modern approaches.
Effective: Spring 2001
Prerequisite: Concurrent: C I 412W

SCIED 455 Field Natural History for Teachers (3) Ecologically oriented field study course to provide teachers with basic knowledge of natural science resources in school environments.
Effective: Winter 1978
Prerequisite:

SCIED 457 Environmental Science Education (3) Philosophy, techniques, and skills for teaching environmental science, including curriculum development, fieldwork, and the use of appropriate technologies.
Effective: Fall 2003
Prerequisite:

SCIED 458 Teaching Science in the Elementary School (3) Interpreting children's science experiences and guiding development of their scientific concepts; a briefing of science content material and its use.
Effective: Spring 2007
Prerequisite: Concurrent: C I 495A OR C I 495B ; MTHED 420 SS ED 430W

SCIED 470 Selected Studies in Science Education (1-6) Intensive work on particular issues, trends, or developments in science education for elementary and secondary school teachers.
Effective: Winter 1978
Prerequisite:

SCIED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

SCIED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

SCIED 497A Natural Gas - "Gold Rush" of the 21st Century (1) Course outlines effects of natural gas development on our environment, society and economy and describes environmental preservation/protection techniques.
Effective: Summer 2012 Ending: Summer 2012

SCIED 497B An Introduction to Sustainability for Teachers (1) Participants will learn to teach concepts of sustainable development including the pursuit of economic prosperity, environmental quality and social equity.
Effective: Summer 2012 Ending: Summer 2012

SCIED 497C Astrobiology for Educators (2) Explore the world of astrobiology to capture the attention of your students and encourage their interest in the sciences. This interdisciplinary course includes a variety of inquiry-based activities.
Effective: Summer 2012 Ending: Summer 2012

SCIED 497F (ENGR 497F) Fundamentals of Science, Technology and Engineering (3) A course focusing on physics content, engineering design principles, and elementary science education pedagogy.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

SCIED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

SCIED 551 History, Philosophy, & Sociology of Science and Science Teaching (3) Examination of the implications of history, philosophy, and sociology of science for science teaching.
Effective: Summer 2006
Prerequisite:
SCIED 552 Science Teaching and Learning (3) Exploration of the theoretical and empirical foundations of the teaching and learning of science.
Effective: Summer 2009

SCIED 556 The Supervision of Science Curriculum (3) Supervision of elementary and secondary science teachers as they develop K-12 programs in the public schools.
Effective: Winter 1978
Prerequisite:

SCIED 558 Research Problems in Science Teaching (3) Problems and research dealing with curriculum, materials, evaluation, and supervision of science teaching and learning.
Effective: Fall 1983
Prerequisite:

SCIED 559 Analysis of Instruction in Elementary Science Education (3) Analysis of the history, issues, trends, and research in elementary science education.
Effective: Winter 1978
Prerequisite:

SCIED 590 Colloquium (1-3) continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1992

SCIED 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

SCIED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

SCIED 597A Readings in Science Education (1-3) Readings on current topics in science education research.
Effective: Summer 2012 Ending: Summer 2012

SCIED 597A Secondary Science Teaching II (3) This class focuses on teaching and unit planning in secondary science.

SCIED 597B Science Education Projects (3-6) Research projects in science education.
Effective: Summer 2012 Ending: Summer 2012

SCIED 597B Curriculum in Science Education (3) An overview of history and research on curriculum in science education. Includes curriculum development and analysis, current research on inquiry-based curriculum, influence of state and national standards, learning progressions and diversity perspectives.

Last Import from UCM: June 2, 2012 12:27 PM
Science, Technology, and Society (S T S)

Effective: Spring 1999
Prerequisite:

S T S 408 (COMM 408) Cultural Foundations of Communications (3) Examination of oral, scribal, print, industrial and electronic cultures; analysis of impact of technology on communications and social structure.
Effective: Spring 2009
Prerequisite:

S T S 416 (US;IL) (WMNST 416, AAA S 416) Race, Gender and Science (3) The class will focus on race and gender as products of science, and how societal values shape scientific activity.
Effective: Spring 2008 Ending: Fall 2012
Prerequisite:

S T S 416 (US;IL) (AF AM 416, WMNST 416) Race, Gender and Science (3) The class will focus on race and gender as products of science, and how societal values shape scientific activity.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

S T S 420 (EM SC 420, SOC 420) Energy and Modern Society (3) Technology and economics of energy resources, production, and consumption; environmental factors, exhaustion, new technology.
Effective: Spring 1991

S T S 427W (SOC 427W, CED 427W) Society and Natural Resources (3) Analysis of the relationship between societal development and enhancement and natural resources.
Effective: Summer 2008
Prerequisite:

S T S 428 (IL) (HIST 428) The Darwinian Revolution (3) The origins and implications of evolutionary theory.
Effective: Spring 2006
Prerequisite:

S T S 430 (IL) (NUTR 430) Global Food Strategies: Problems and Prospects for Reducing World Hunger (3) Technological, social, and political solutions to providing basic food needs; food resources, population, and the environment; current issues.
Effective: Summer 2005

S T S 432 (PHIL 432) Medical and Health Care Ethics (3) Examines ethical, political, and social issues in the research, implementation, and practice of medicine, medical technologies, and healthcare.
Effective: Fall 1998
Prerequisite:

S T S 433 (PHIL 433) Ethics in Science and Engineering (3) Ethical issues arising in the practice of science and engineering and their philosophical analysis.
Effective: Fall 1995

S T S 435 (PHIL 435) The Interrelation of Science, Philosophy, and Religion (3) The historical and transformative interactions between science and Western philosophical and religious views of nature, humanity, and God.
Effective: Spring 1996

S T S 457 (US;IL) (WMNST 457, HIST 457) The History of Women in Science (3) Critical analysis of the role women, gender, and minorities have played in the natural sciences.
Effective: Fall 2011
Prerequisite:

S T S 460 (PL SC 460) Science, Technology, and Public Policy (3) The all-pervasive importance of science and technology policy in modern societies and mechanisms and processes by which it is made.
Effective: Spring 1995
Prerequisite:

S T S 470 Technology Assessment and Transfer (3) Nature of technology assessment and technology transfer in product design and development process from federal and university labs, and internationally.
Effective: Summer 1996

S T S 476 Technology and War (3) A survey and analysis of the interaction of technology, ethics, and warfare in the past and present society.
Effective: Summer 2007
S T S 490 Peace and Conflict Studies Seminar (3) Advanced study of major contemporary issues of peace and conflict; includes anthropological, technological, psychological, and economic perspectives.
Effective: Fall 1994 Ending: Fall 2012
Prerequisite:
S T S 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1992

S T S 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

S T S 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1991

S T S 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1991

S T S 498 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

S T S 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

S T S 500 Integrating Science and Technology Into Society (3) Interdisciplinary analysis of critical issues for science, technology, and society.
Effective: Spring 1991
Prerequisite:
S T S 589 Ethics and Values in Science and Technology (3) Study interrelationships of 20th century technological change and human values with emphasis on social and ethical aspects of technological progress.
Effective: Summer 1994

S T S 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1991
Prerequisite:
S T S 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Spring 1991

S T S 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1994

S T S 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1991
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Seminar - Dickinson (SEM)

SEM 900 Advanced Corporate Tax Seminar (2-3) This seminar will cover two main topics: Taxation of Executive Compensation and Corporate Mergers & Acquisitions.
Effective: Spring 2007

SEM 901 Advanced Evidence Seminar (2) An advanced investigation of topics in the law of evidence.
Effective: Spring 2007
Prerequisite:

SEM 903 History of International Law: Seminar (2) The general historical introduction and seminar presentations and projects are designed to accentuate problems and issues which enable students to better understand the foundations of the law of nations and encourage independent research skills.
Effective: Summer 2007

SEM 904 Citizenship Seminar: U.S. & International Perspectives (2) This seminar will closely examine the concept of citizenship, both as a legal status and as a normative concern, from both U.S. and international perspectives.
Effective: Spring 2007

SEM 905 EU and International Trade Law Seminar (3) This seminar seeks to examine selected aspects of the Commercial Law of the European Union. It provides an introduction to the distinct methodology of EU law and the European Court of Justice, examines the principles of the internal market, and focuses on aspects which are particularly important for US lawyers from a practical or theoretical perspective. It covers, among others, the following topics: Introduction to the fundamentals of the EU Legal Order; the internal market; free movement of goods, customs duties, discriminatory companies; financial services; aspects of competition law; anti-competitive agreements and monopolies; enforcement of competition law; selected comparisons with WTO and NAFTA.
Effective: Summer 2011

SEM 907 The Supreme Court in Comparative Perspective (3) This course examines the contribution of the judiciary to political governance in comparative perspective. It focuses on the Supreme Court and the European Court of Justice, which is the highest court of the European Union. It also takes into account selectively judgements of other constitutional courts. It seeks to explore the function of judicial review in modern democracy through a study of judicial decisions in selected areas. It examines the relationship between the judiciary and the other organs of government and the role of courts in protecting the citizen. It focuses on the following areas: federalism, the protection of human rights, the principles of democracy, non-discrimination, equality, proportionality, legitimate expectations, and fair hearing; Locus standi, remedies for the protection of constitutional rights, and the liability of public bodies and state agencies.
Effective: Fall 2011

SEM 908 Comparative Law in Globalized World Seminar (3) This seminar addresses selected topics that are important for U.S. lawyers in transnational practice.
Effective: Fall 2011

SEM 909 Conflict Resolution Theory Seminar (2) This seminar is a capstone course for students interested in understanding the lifecycle and dynamics of conflict and conflict resolution, and the role played by dispute resolution systems in furnishing both resolution and an experience of justice. The course will examine relevant dispute system design principles and socio-psychological theories and research and apply them to the processes used to resolve civil disputes in the United States and other countries through general and specialized courts, administrative agencies, ADR providers, and other private organizations. Students will conduct original legal and (if possible) empirical research, using the principles theories and research studied in the seminar to critique or propose elements of dispute resolution processes and/or systems. Students who enroll should be familiar with dispute system law and procedure from prior coursework.
Effective: Summer 2011
Prerequisite:

SEM 910 Cross-Border Legal Practice Seminar (2) This seminar will focus on two different themes. It will explore what it means to be a lawyer in the United States in comparison with what it means to be a lawyer in other countries. Among other things, participants will discuss the lawyer's role in society and the type of conduct that is regulated. This course will also examine the cross-border practice regulation that has emerged in response to the increasingly common circumstance of lawyers who handle a matter in a country other than their own.
Effective: Fall 2007
Prerequisite:

SEM 911 Education Law Seminar (2) This course covers the basic premises of compulsory education; issues concerning exclusion of students; school control of student behavior and curriculum; teacher employment problems; and issues of funding, minority rights, and school liability.
Effective: Spring 2007

SEM 912 Elder Law Seminar (2) This course presents students with opportunities for advanced research and writing in

The Pennsylvania State University
This course examines basic principles of the Union legal system, such as free movement of goods, persons, services, and capital, the right of establishment, common commercial policy, and foreign policy. It also examines the organization and functions of the Union's institutions and contrasts the United States federal experience. The relationship between Union law and the legal systems of member states will be addressed along with the jurisdiction of the Court of Justice. The relevance of the Union experience to the evolution of other common markets in North and South America and Asia will also be addressed.

Effective: Spring 2007

SEM 913 European Union Law Seminar (3) This course examines basic principles of the Union legal system, such as free movement of goods, persons, services, and capital, the right of establishment, common commercial policy, and foreign policy. It also examines the organization and functions of the Union's institutions and contrasts the United States federal experience. The relationship between Union law and the legal systems of member states will be addressed along with the jurisdiction of the Court of Justice. The relevance of the Union experience to the evolution of other common markets in North and South America and Asia will also be addressed.

Effective: Spring 2007

SEM 914 Federal Regulatory and Legislative Practice Seminar (2) A seminar devoted to exploring the details of federal regulatory and legislative practice in Washington, D.C.

Effective: Spring 2007

SEM 916 Class Actions Seminar (3) This seminar explores the class action device, tracing its historical origins from the earliest forms of aggregate litigation through various amendments to Rule 23 and passage of the Class Action Fairness Act. Although other non-class aggregation techniques are discussed, they are addressed only for comparative purposes. The unique nature of representative litigation and the special issues that arise during the course of a class action are the subject of discussion and student presentations during seminar sessions. Considerable discussion is devoted to the roles of the various "players" in a class action: the qualifications of the class representative, the qualifications and interest of class counsel, and the fiduciary role of the district judge.

Effective: Summer 2011

Prerequisite:

SEM 917 Gender and the Law Seminar (2) The role of gender in the development of modern law is considered in a variety of contexts. Among the topics are discrimination in pay and conditions of employment, psychological and sociological criminal defenses, pornography, spousal abuse, reproductive rights, and issues of child custody, support, and property division.

Effective: Spring 2007

SEM 918 Gender, Culture and International Human Rights Seminar (2) This Seminar examines issues in international human rights law raised by gender and cultural difference.

Effective: Fall 2008

SEM 922 International Protection of Human Rights Seminar (3) This seminar provides an introduction to international human rights law and procedures. It examines what are "human rights" and explores the law of treaty interpretation, how human rights law is incorporated into domestic legal systems, and the role of international governmental organizations, international and regional courts, and non-governmental organizations in protecting human rights. Students also learn how to research international law and how to write legal analysis based on international law.

Effective: Spring 2007

SEM 923 International Refugee Law Seminar (2) This course is intended to provide an introduction to the basic framework of international refugee law. It begins by laying out the historical political and philosophical background to the development of the concept of "refugee" in the twentieth century. It examines this legal framework within the context of the broader human rights system. The cradinal provisions of the principal international instruments establishing this framework--in particular the 1951 UN Convention Relating to the Status of Refugees and the 1967 Protocol thereto - are examined against the domestic legal regime establishing the substantive, procedural and evidentiary requirements for making a claim for asylum under U.S. law.

Effective: Fall 2008

SEM 925 Jurisprudence Seminar (2) This seminar investigates myriad theories about law. It is an aim of this offering to afford students a vehicle whereby they might test and place in perspective many of the theories of law gleaned from classroom work and personal experience.

Effective: Spring 2007

SEM 926 Law and Individuals with Disabilities Seminar (2) Major issues and concepts in law and social policy regarding individuals with handicaps are introduced. Topics include: income maintenance programs, special education, federal and state anti-discrimination laws, accessibility, special health issues, institutionalization and deinstitutionalization.

Effective: Spring 2007

SEM 927 Law of Artistic Persons and Properties Seminar (2) The objectives of this course include an examination of the interface between law and the arts with an eye to both theoretical and practical implications and a striving to identify creative and serviceable solutions to the problems that have frustrated the growth and harvest of the creative effort. The investigation will be directed toward subject areas that reflect functional divisions within the arts; i.e., the visual arts, dance, music, the literary arts, and areas such as television and film. The course includes a mandatory field trip to New York City at the student's expense.

Effective: Spring 2007
SEM 928 Law and Semiotics Seminar (3) Legal semiotics is the study of law focusing on signs and symbols as well as the construction of meaning in law in legal discourse. Law's communicative structures are essential in this context. Moreover, recent large-scale economic, political and social developments in the Western hemisphere have increased the need to expand our knowledge about law, and semiotic studies sustain that need.
Effective: Summer 2011

SEM 929 Law and Aging Policy Seminar (3) Examination of laws and public policies affecting older adults and families, including health and long-term care. This seminar will analyze demographic trends of aging world populations, including alternative public benefit and private retirement strategies affected by laws. Medicare, Medicaid, Social Security, protection of older adults, long-term care planning, and consumer protection laws will be introduced, with opportunities for students to select individual topics for in-depth research, writing and presentation in class. The seminar will also examine roles for specialists in elder law, whether in private practice or as public advocates.
Effective: Summer 2011

SEM 930 Law, Science, and Policy Seminar (2) This course will identify diverse areas in which advances in technology have posed challenges to society and law and will study select topics within those areas in order to ground the participants in the relevant legal, scientific, and ethical principles and jurisprudential and social theories. Subjects addressed include issues in biotechnology, such as cloning, transgenics, xenotransplantation, and pharmaceutical development; the ownership of biotechnological products; experimentation with humans and animals; human and animal rights concerns; environmental bioremediation; and non-lethal defense technologies.
Effective: Spring 2007

SEM 931 Lawyering and Ethics for the Business Attorney Seminar (2) This seminar provides students with an opportunity to analyze and discuss ethical and legal issues relating to representation of business entities. Issues covered include (1) who is the client for the lawyer who represents a business entity; (2) what special rules govern confidentiality and information sharing in the representation of a business entity; (3) how should a lawyer respond to evidence of client fraud or other illegal activities; (4) what are the potential liabilities for furnishing legal advice or providing legal opinions for business transactions that are later found to have been fraudulent or illegal; (5) when is a business entity required or permitted to reimburse employees for legal expenses relating to their employment activities; and (6) what special obligations and responsibilities are imposed on "in-house" attorneys who are full-time employees of a business entity.
Effective: Summer 2011
Prerequisite:

SEM 932 Military Law Seminar (3) A study of the various rules of domestic and international law that affect the United States Armed Forces as to both the internal and external operations of the military services. Coverage will include an introduction to the special rules of criminal law applicable to military personnel and the rules concerning membership in the Armed Forces. The course will also cover issues related to the tort liability of the Armed Forces and the rights and obligations of the Armed Forces as purchasers of goods and services and as owners of property. Finally, the course will examine the impact of treaties and conventions upon the operations of the Armed Forces.
Effective: Spring 2007

SEM 933 Protection of Individual Rights Under State Constitutions Seminar (2) With the perception that the federal judiciary is increasingly hostile to constitutional claims, individuals have turned to state constitutions as an independent source of rights in civil and criminal litigation. This course will explore the unique procedures and methods of state constitutional rights interpretation. In lieu of an examination, persons enrolled in the course will brief questions of state constitutional law in an arena where the United States Constitution fails to afford protection.
Effective: Summer 2011

SEM 934 Race, Racism, and American Law Seminar (2) The purpose of this seminar is to facilitate discussion and understanding of the role law has played in both the subordination and promotion of the rights of people of color in America. Subjects for discussion will include race and the American criminal justice system, hate speech and the First Amendment, affirmative action policies, and the quest for effective schools.
Effective: Summer 2011

SEM 936 Law and Sexuality Seminar (2) This seminar explores the different ways in which the law regulates and accounts for sexuality in general and sexual orientation in particular. Topics to be covered will include rights to privacy and their impact on the ability of the state to regulate sexual conduct; rights to equal protection by lesbians and gay men; the military's "don't ask, don't tell" policy; rights to free speech and associations of lesbians and gay men (and of those who do not want to associate with them); same-sex marriage and adoption by lesbians and gay men; employment discrimination; and legal issues involving transgendered individuals.
Effective: Summer 2011

SEM 937 Forensic Genetics Seminar (2) An examination of the history of and current issues in using genetic identification in the criminal law.
Effective: Summer 2010
Prerequisite:

SEM 938 The Supreme Court Seminar (2) The Supreme Court, including procedure and practice, principles of adjudication, and history, as well as the topics of the current term are studied. Students are required to present analyses of current cases as well as an analytical paper on approved topics of constitutional law.
Effective: Fall 2008

The Pennsylvania State University
SEM 939 Tax Policy Seminar (2) This course examines the fundamental issues in tax policy, focusing on trends and on current legislative proposals. Specific subjects include the underpinnings of the various tax systems, the tax legislative process, the use of tax structure and incentives to implement social and economic objectives, the legal methodology of controlling tax abuse, and similar subjects.
Effective: Spring 2007

SEM 941 The United Nations and International Law Seminar (2) The inexorable paces of globalization and interdependence have made the need for international cooperation more acute. The role of the United Nations in these processes has become both more relevant and controversial. Notwithstanding the critical voices that have questioned the relevance or usefulness of the world body from certain national perspectives and points of view, the United Nations, through its activities and programmes, continues to have a considerable impact on countries and societies around the world, in such areas as conflict prevention and resolution, control of population displacements, humanitarian action, and social and economic development. These considerations, among others, make a study of the United Nations and International law more important today than it has ever been.
Effective: Summer 2011

SEM 943 International Justice Seminar (2) The seminar will address international trial investigative techniques, tribunal jurisdiction and procedure, and areas of international civil and criminal law that are most relevant to legal practice before international tribunals.
Effective: Fall 2010

SEM 944 International Organizations Seminar (2) This seminar aims at examining the history, structure, operating philosophy and functions of international organizations, as well as the international legal framework in which they operate. Emphasis is placed on the relevance of international organizations as critical actors in and components of modern international society, and of their respective roles and functions in the international order.
Effective: Fall 2008

SEM 945 Congressional Investigations Seminar (2) This seminar will examine the laws and procedures governing congressional investigations through a series of historically based case studies and student analytical presentations on approved areas of congressional investigations law and procedure.
Effective: Spring 2011
Prerequisite:

SEM 946 Policy Issues in Corporate Crime Seminar (2) This seminar focuses on the theoretical and policy justifications underlying the prosecution of white collar crime.
Effective: Spring 2011

SEM 966 Reproductive Technology and the Law Seminar (2) This seminar addresses the legal and ethical problems posed by assisted reproduction with the aim of guiding lawmakers.
Effective: Fall 2007

SEM 967 Labor Law Seminar (2) This is an advanced seminar that assumes students will already have studied the National Labor Relations Act. It provides an opportunity for students to deepen their knowledge of labor law while also developing research, writing, analytical, and trial strategy skills.
Effective: Fall 2009
Prerequisite:

Effective: Spring 2011

SEM 969 Electronic Evidence Seminar (3) This seminar cover the case law, procedural rules, evidence rules, and rules of professional conduct implicated by the unique attributes of information created and/or stored electronically, as well as the filing and courtroom presentation of documents in electronic format. There are three components to the course. The first part concerns the discovery of ESI, and covers the nature, sources, and terminology of ESI; the different formats of ESI and the implications for preservation and production of ESI attributable to the different formats; the evolution of the rules and case law regarding discovery of ESI; and the obligations of counsel with respect of the preservation of ESI.
Effective: Summer 2011

SEM 970 Russian Law Seminar (2) This 2-credit seminar is concerned with the development of the law, legal system, and legal institutions of what is popularly known as Russia but also correctly and officially known as the Russian Federation within the boundaries presently occupied and, historically, within the boundaries of the Russian Empire. By "law" we mean formal legislation, customary rules, relevant international legal rules, legal doctrine, and anything else regarded by the Russian State or by Russian jurists as comprising part of the "law." For our purposes "legal institutions" encompasses all law enforcement agencies or any other agencies of the State or empowered by the state which are concerned with the law in any manner whatsoever, including educational institutions.
Effective: Spring 2012

SEM 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered

The Pennsylvania State University
SEM 997A International Financial Law Seminar (3) This seminar examines selected aspects of international financial, securities, and banking law. It covers broadly four areas: First, it provides elements of financial law. This includes legal aspects of banking, securities, and money; the objectives of regulations and supervision; an overview of US regulation; and the public and private law of international monetary obligations. Secondly, it examines aspects of international financial and securities regulation. This includes an examination of the financial crisis of 2008 and the regulatory reforms resulting from it; selected comparative aspects of regulation in the US and the EU through a detailed discussion of legislation and case law (e.g. institutional structure, insider trading, rating agencies). Thirdly, it discusses economic and monetary union in the EU and the eurozone crisis. Finally, it provides an overview of the law of the IMF and the international financial architecture.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Social Influenc Hlth (SIH)

SIH 711 Social Influences on Health (3) This course introduces population based medicine and its influence on individuals and provides a framework for learning subsequent biomedical sciences.
Effective: Fall 2008
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Social Studies Education (SS ED)

SS ED 411 Teaching Secondary Social Studies I (3) Methods for teaching social studies in secondary grades; nature of social studies, content and learning outcomes, instructional strategies and planning. Effective: Fall 2011
Prerequisite: SS ED 412W Teaching Secondary Social Studies II (3) Writing-intensive course focusing on study of the social studies teacher's role in planning instruction; strategies for teaching. Effective: Summer 2010
Prerequisite: Concurrent: C I 412W
Prerequisite: Concurrent: C I 495B; MTHED 420 SCIED 458 C I 495A OR
Prerequisite: SS ED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983
SS ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983
SS ED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992
SS ED 498A AP World History (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2012 Ending: Summer 2012
SS ED 498B AP US Government & Politics (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2012 Ending: Summer 2012
SS ED 498C AP US History (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2012 Ending: Summer 2012
Prerequisite: SS ED 532 Curriculum Models in Social Studies Education (3) Study of past and proposed curricula in elementary and secondary social studies. Various means of judging curricula will be offered. Effective: Spring 1985
Prerequisite: SS ED 533 Research in the Teaching of Social Studies (3) Procedures and methods of research for the teaching of social studies, strategies of investigation, and review of research literature. Effective: Fall 1983
Prerequisite: SS ED 590 Colloquium (1-3) Graduate seminar for new doctoral students in social studies education. Effective: Summer 1998
Prerequisite: SS ED 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987
SS ED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered
Social Thought (SOCTH)

SOCTH 501 Seminar in Social Thought (3) Selected topics in the historical development of the tradition in social thought, and a discussion of contemporary issues and debates. Effective: Spring 1996

Last Import from UCM: June 2, 2012 12:27 PM
Sociology (SOC)

SOC 400W Senior Research Seminar (3) Major concepts and principles of sociology through reading, data analysis, and writing. Capstone course for senior Sociology majors.
Effective: Fall 2001
Prerequisite:

SOC 403 Advanced Social Psychology (3) Analysis of the major theoretical approaches and research findings of contemporary social psychology.
Effective: Fall 1983
Prerequisite:

SOC 404 Social Influence and Small Groups (3) The study of social influence, leadership and status, and social cohesion and commitment processes in small groups.
Effective: Spring 2007
Prerequisite:

SOC 405 Sociological Theory (3) Overview of the development of sociological theory; current issues and controversies.
Effective: Spring 2001
Prerequisite:

SOC 406 (CRIMJ 406, CRIM 406) Sociology of Deviance (3) Theory and research concerning deviant behaviors and lifestyles viewed as significant departures from a group’s normative expectations.
Effective: Spring 2008
Prerequisite:

SOC 408 Urban Ecology (3) Spatial and temporal aspects of urban structure; urban growth, neighborhoods, racial and ethnic groups, mental illness; cross-cultural perspectives.
Effective: Fall 1983
Prerequisite:

SOC 409 (US) (AAA S 409) Racial and Ethnic Inequality in America (3) The impact of inequality and discrimination on individual and group identity among various racial and ethnic groups.
Effective: Summer 2005 Ending: Summer 2012
Prerequisite:

SOC 409 (US) (AF AM 409) Racial and Ethnic Inequality in America (3) The impact of inequality and discrimination on individual and group identity among various racial and ethnic groups.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

SOC 411 (US) (HD FS 416) Racial and Ethnic Diversity and the American Family (3) This course will explore the nature and determinants of racial and ethnic variation in family processes in the United States.
Effective: Spring 2005
Prerequisite:

SOC 412 (CRIMJ 412, CRIM 412) Crime, Social Control, and the Legal System (3) Legal and extralegal control; public opinion on crime; criminal justice and correctional processes; legal sanctions; control strategies. Field trip.
Effective: Spring 2008
Prerequisite:

SOC 413 (CRIM 413, CRIMJ 413) Advanced Criminological Theory (3) This course provides an in-depth look at theories of crime and examines influential empirical studies designed to these theories.
Effective: Spring 2008
Prerequisite:

SOC 414 (CRIMJ 414, CRIM 414) Criminal Careers and the Organization of Crime (3) Research on and theory of criminal careers and crime organizations, emphasizing recruitment and disengagement; offender characteristics and lifestyles; policy implications.
Effective: Spring 2008
Prerequisite:

SOC 416 (US) (EDTHP 416) Sociology of Education (3) The theoretical, conceptual, and descriptive contributions of sociology to education.
Effective: Spring 2006
Prerequisite:

SOC 419 (US) Race and Public Policy (3) Seminar format course in which sociological theory and research are applied to current race policy issues.
Effective: Spring 2006
Prerequisite:

SOC 420 (EM SC 420, S T S 420) Energy and Modern Society (3) Technology and economics of energy resources, production, and consumption; environmental factors, exhaustion, new technology.
Effective: Spring 2001
Prerequisite:
SOC 422 World Population Diversity (3) Survey of world diversity in national population growth/composition; the impacts of demographic change on the economic/social life of nations/people.
Effective: Spring 2001
Prerequisite:

SOC 423 Social Demography (3) Social demographic perspectives on fertility, mortality, morbidity, migration, population density, demographic transitions, social mobility, family, the aged, and minorities.
Effective: Spring 2001
Prerequisite:

SOC 424 Social Change (3) Critical review of classical and recent theories of social change, emphasizing the transformations occurring in the modern world.
Effective: Fall 1983
Prerequisite:

SOC 425 Social Conflict (3) An analysis of the variables affecting intergroup and international conflict and cooperation.
Effective: Fall 2007
Prerequisite:

SOC 427W (CED 427W, S T S 427W) Society and Natural Resources (3) Analysis of the relationships between societal development and enhancement and natural resources.
Effective: Summer 2008
Prerequisite:

SOC 428 Homelessness in America (3) Survey of social science research on homelessness in the contemporary United States.
Effective: Spring 2001
Prerequisite:

SOC 428H Homelessness in America (3) Survey of social science research on homelessness in the contemporary United States.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

SOC 429 Social Stratification (3) Structure and dynamics of class, caste, and status systems; class differentials and social mobility; current theoretical and methodological issues.
Effective: Winter 1978
Prerequisite:

SOC 430 Family in Cross-Cultural Perspective (3) Sociological analysis of family systems in various cultures and subcultures.
Effective: Spring 2001
Prerequisite:

SOC 431 (HD FS 431) Family Disorganization: Stress Points in the Contemporary Family (3) Focuses on divorce, remarriage, incest, family violence as well as problems associated with family formation and parent-child relations.
Effective: Spring 1994
Prerequisite:

SOC 432 Social Movements (3) Why and how people mobilize to promote or retard social change. Factors predicting success or failure of social movements.
Effective: Fall 1983
Prerequisite:

SOC 435 (HD FS 434) Perspectives on Aging (3) An analysis of the demographic, social, and cultural factors affecting the aged population in American society.
Effective: Fall 2007
Prerequisite:

Effective: Spring 2007
Prerequisite:

SOC 445 U.S. Immigration (3) This class examines theories of U.S. immigration and immigrant adaptation, effects of immigration, and policy.
Effective: Spring 2012
Prerequisite:

SOC 446 Political Sociology (3) Sociological analysis of types of political organization and their relations with other elements of social life.
Effective: Winter 1978
Prerequisite:

SOC 448 Environmental Sociology (3) Examination of the relationship between the physical environment and society.
Effective: Fall 2007
Prerequisite:

SOC 449 Environmental Movements (3) Comparative exploration of environmental movements within the context of classical and new social movement theory.
Effective: Fall 2007
Prerequisite:
SOC 450 Justice and the Environment (3) Considers notions of justice in relation to environmental philosophy, environmental movements, and general environmental concerns.
Effective: Fall 2007
Prerequisite:

SOC 454 (US) The City in Postindustrial Society (3) Postindustrial social organization in the United States and Europe; consequences for metropolitan social stratification, community power, and environmental quality.
Effective: Spring 2006
Prerequisite:

SOC 455 Work and Occupations (3) Work and occupational life in modern society; work in the past, present, and future.
Effective: Fall 1983
Prerequisite:

SOC 456 (WMNST 456) Gender, Occupations, and Professions (3) The role of gender in shaping contemporary North American patterns of employment, occupational roles, and statuses.
Effective: Spring 2001
Prerequisite:

SOC 457 (US;IL) (ANTH 457, J ST 457) Jewish Communities: Identity, Survival, and Transformation in Unexpected Places (3) Examines the global array of smaller Jewish communities that have flourished outside the main urban centers of Jewish settlement.
Effective: Summer 2006
Prerequisite:

SOC 461 (US;IL) (RL ST 461) Sociology of Religion (3) Contemporary religion in the United States: beliefs, structure, and function of major denominations and religious cults.
Effective: Spring 2006
Prerequisite:

SOC 467 (CRIM 467, CRIMJ 467) Law and Society (3) Law and society studies the social origins of law and legal systems; occupational careers, and decision-making of legal officials.
Effective: Spring 2008
Prerequisite:

SOC 468 Mood-Altering Substances in Society (3) Perspectives of cultures throughout the world toward mood-altering substances are reviewed in light of public policy, benefits, and problems.
Effective: Fall 2007

SOC 469 Techniques in Small Group Facilitation (1-4 per semester/maximum of 12) This course is the training course for students working as facilitators with the Race Relations Project.
Effective: Summer 2010
Prerequisite:

SOC 470 Intermediate Social Statistics (4) Descriptive and inferential statistics in social research: central tendency and variation, normal distribution, measures of association, confidence intervals, hypothesis testing.
Effective: Fall 2001
Prerequisite:

SOC 471 Qualitative Research Methods in Sociology (3) Theory, methods, and practice of qualitative data collection, including observation, participant observation, interviewing; supervised projects in natural settings.
Effective: Spring 2001
Prerequisite:

SOC 481H Senior Honors Seminar in Sociology (1) Supervised experience in planning and writing the honors thesis.
Effective: Spring 1999
Prerequisite:

SOC 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

SOC 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

SOC 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2000
Prerequisite:

SOC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

SOC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject
which may be topical or of special interest.
Effective: Fall 1983

SOC 497A 1% vs 99%: Class Inequality in the USA (3) This course will explore past and present class inequalities; class struggles in U.S. history; the recent demise of the middle class; and other topics.
Effective: Summer 2012 Ending: Summer 2012

SOC 497A The Sociology of Mental Health (3) This class focuses on social origins of mental health and illness, with an emphasis on gender, race/ethnicity and socioeconomic status.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

SOC 497B Health, Disease and Society (3) This course will emphasize the critical role social factors play in influencing health and disease in individuals, groups and society.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

SOC 497C Formal Organizations in Modern Society (3) A review of the rapid expansion of formal organizations in modern America.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

SOC 497D Cultural Awareness in the Classroom (1) Participants will be taught awareness of basic cultural differences and their effect on communities and expectations in the classroom, workplace, and society.
Effective: Summer 2012 Ending: Summer 2012

SOC 497D (EDTHP 497D) Sociology of Family, Community, and Education (3) This course uses sociological research to examine the roles of families, communities and the educational system in American society.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

SOC 497H History of the Family (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

SOC 499 (IL) Foreign Study--Sociology (2-6) Study, in selected foreign countries, of groups, institutions, and social problems.
Effective: Summer 2005
Prerequisite:

SOC 500 Introduction to Graduate Study in Sociology (1) Required of all incoming graduate students in sociology.
Effective: Fall 1983

SOC 501 Proseminar in Sociology (3 per semester/maximum of 6) An in-depth introduction to the major specialty areas of Sociology.
Effective: Summer 1998
Prerequisite:

SOC 502 Theories of Society I (3) Review and analysis of trends and controversies in sociological theory from late eighteenth-century beginnings through the nineteenth century.
Effective: Fall 1983

SOC 503 Theories of Society II (3) Review and analysis of trends and controversies in sociological theory in the twentieth century.
Effective: Fall 1983

SOC 512 (CLJ 512) Criminological Theories (3) Survey of theoretical and substantive issues in deviance and criminology, with emphasis on critical review of theories.
Effective: Fall 2005

SOC 513 Sociological Research Methods (3) Critical review of methodological issues; research designs; analysis and interpretation of findings.
Effective: Fall 1983

SOC 515 (CLJ 515) Research Methods in Criminology and Deviance (3) Review of methodological issues; design and conduct of research; analysis and interpretation of findings; ethical and policy issues.
Effective: Spring 1996

Effective: Fall 2007
SOC 519 (PL SC 519) **Survey Methods II: Analysis of Survey Data** (3) Intermediate course on the statistical analysis of survey data; topics include weighting, complex surveys, missing data, and contextual analysis.
Effective: Spring 2008  
Prerequisite:

SOC 521 **Family Demography** (3) Current family demographic research on nuptiality, divorce, household composition, female employment, migration, and fertility.
Effective: Spring 1985

SOC 522 **Demography of the Life Course** (3) The theoretical bases, critical concepts, and methods of life course analysis in the study of demographic transitions.
Effective: Spring 1994  
Prerequisite:

SOC 523 **Internal and International Migration** (3) Examination of theories, frameworks, and policies related to internal and international migration causes and consequences in developed and developing nations.
Effective: Spring 1997  
Prerequisite:

SOC 524 **The Demography of Human Fertility** (3) Overview of major issues and methodological approaches in the demographic study of human fertility in developing and developed countries.
Effective: Fall 2000

SOC 525 **Immigration, Assimilation, and Inequality** (3) Examine theories, research, and policies on the incorporation of immigrants and their descendants.
Effective: Summer 2011

SOC 526 (H P A 526) **Health Disparities** (3) This course provides an overview of social factors that lead to demographic disparities in health.
Effective: Summer 2012

SOC 527 (AFR 527) **Migration, Urbanization, and Policy in the Developing World** (3) This course examines the dynamics of migration and urbanization processes, as well as their policy implications, in non-industrialized regions of the world.
Effective: Summer 2012

SOC 528 **Homelessness in America** (3) Survey of social science research on homelessness in the contemporary United States.
Effective: Fall 2000

SOC 529 **Seminar in Race and Ethnicity** (3) Reviews the status of U.S. racial and ethnic minority groups; analyzes factors influencing inequality and inter-group relations.
Effective: Summer 2012

SOC 530 **Sociology of Family** (3) An in-depth introduction to the sociological study of the family.
Effective: Spring 2002

SOC 531 (HD FS 531) **Family Disorganization: Stress Points in the Contemporary Family** (3) Focuses on divorce, remarriage, incest, family violence as well as problems associated with family formation and parent-child relations.
Effective: Summer 1994

SOC 535 **Sociology of Aging** (3) Current research and methodological issues in the sociological study of aging.
Effective: Fall 1983

SOC 537 (HD FS 537) **Biosocial Perspectives on the Family** (3) The implications of knowledge from behavioral endocrinology, behavior genetics, and evolutionary psychology for understanding family relationships and child development.
Effective: Summer 2002

SOC 538 (EDTHP 538) **Sociology of Education** (3) Provides students with an overview of dominant sociological theoretical perspectives on schools, schooling, and education in modern society.
Effective: Summer 2007

SOC 544 **Current Issues in Complex Organizations** (3) Critical survey of recent developments in sociological study of organizations and the theory of bureaucracy, including reciprocal effects on environments.
Effective: Spring 2011

SOC 546 **Seminar in Political Sociology** (3) Analysis of issues and problems in political sociology. Topical emphasis
varies.

**SOC 551 Social Stratification and Social Change** (3) Origin and development of stratification systems and inequality among and within societies; social mobility; change in stratification systems.

Effective: Fall 1983

Prerequisite:

**SOC 553 (CI ED 553, EDTHP 553, HI ED 553) Education Mobility in Comparative Perspective** (3) Role of education in social mobility, using quantitative, qualitative, and historical methods; focuses comparatively on Britain, East Asia, South America.

Effective: Summer 2002

Prerequisite:

**SOC 557 (EDTHP 557, HI ED 557) Sociology of Higher Education** (3) Reviews theory and current sociology research on student access, achievement, and governance in postsecondary education, with applications to policy analysis.

Effective: Fall 2000

Prerequisite:

**SOC 560 Urban Sociology** (3) Examination of the structure and dynamics of North American cities and of residents' experiences in such settings.

Effective: Fall 2000

Prerequisite:

**SOC 573 Demographic Techniques** (3) Models and measures of vital processes (fertility, mortality, migration) and their effects on growth and age structure of human populations.

Effective: Fall 2001

Prerequisite:

**SOC 574 Statistical Methods for Social Research** (3) Basic concepts of statistics; linear regression; computer software; analysis of social surveys; causal inferences from nonexperimental data.

Effective: Fall 1983

Prerequisite:

**SOC 575 Statistical Models for Nonexperimental Research** (3) Causal models for quantitative and qualitative data; path analysis and structural equations; logistic regression; duration models.

Effective: Spring 1989

Prerequisite:

**SOC 576 Applied Mathematical Demography** (3) Survey of mathematical models used in the study of population: models of growth, survivorship, fertility, migration, stability, kinship, projection.

Effective: Fall 1986

Prerequisite:

**SOC 577 Techniques of Event History Modeling** (3) Survival analysis theory and methods for discrete dependent variables.

Effective: Summer 1998

Prerequisite:

**SOC 578 Multilevel Regression Models** (3) Covers multilevel regression models for the analysis of nested or hierarchical data, including both contextual and longitudinal applications.

Effective: Summer 2006

Prerequisite:

**SOC 579 (ANTH 579) Spatial Demography** (3) This graduate course will expose students to spatial analysis tools and analytical methods applied to demographic research.

Effective: Spring 2008

Prerequisite:

**SOC 584 (PSY 584) Attitude Formation and Change** (3) Theory and method in research on attitude formation and change with emphasis on critical analysis.

Effective: Spring 2007

Prerequisite:

**SOC 590 Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 1987

Prerequisite:

**SOC 591 (CLJ 591) Teaching Sociology/Crime, Law, and Justice** (1) Preparation for teaching sociology and/or crime, law, and justice at the college level.

Effective: Fall 2000

Prerequisite:

**SOC 592 Writing for Publication in the Social Sciences** (3) Systematic, collective review of unpublished student manuscripts with an eye toward revision for publication.

Effective: Spring 2007

Prerequisite:

**SOC 595A (PL SC 595A) Survey Research Practicum** (1-6 per semester/maximum of 6) Practicum in Survey Research data

The Pennsylvania State University
collection or management.
Prerequisite:

SOC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

SOC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

SOC 597A Work, Family and Policy (3) Theory and evidence on the interrelations between gender, family employment, and earnings; work-family conflict; and potential policy solutions.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

SOC 597B Sociological Social Psychology (3) Theories, methods and research findings in microsociology, the study of social interaction; examining links between individuals, groups, and social structure.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

SOC 597C Sociology of Organizations (3) A brief review of the history of organizational students followed by a review of contemporary approaches to organizational research.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

SOC 597D Immigration, Family, Health (3) Drawing on a demographic perspective, this course will examine theories and research on the intersection of immigration, family, and health.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

SOC 600 Thesis Research (1-15) No description.
Effective: Fall 1983

SOC 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

SOC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Students will teach introductory level courses as required by staffing and students' needs.
Effective: Fall 1983

SOC 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Summer 2005

SOC 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

SOC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
SWENG 400 *Introduction to Software Engineering Studio* (3) Provides an introduction to the principles of software engineering and includes complementary instruction in one programming language. Effective: Summer 1999

Prerequisite:

SWENG 411 *Software Engineering* (3) Software engineering principles including life cycle, dependability, process modeling, project management, requires specification, design analysis, implementation, testing, and maintenance. Effective: Spring 2008

Prerequisite: Concurrent: SWENG 311

SWENG 421 *Software Architecture* (3) The analysis and design of software systems using canonical design patterns. Effective: Summer 2008

Prerequisite:

SWENG 431 *Software Verification, Validation, and Testing* (3) Introduction to methods of software verification, validation, and testing; mathematical foundations of testing, reliability models; statistical testing. Effective: Spring 2008

Prerequisite:

SWENG 452W *Embedded Real Time Systems* (3) The design and implementation of real time systems. Effective: Summer 2008

Prerequisite:

SWENG 465 *Web Services* (3) This course introduces the students to a contemporary computing paradigm called "service-oriented computing." Effective: Spring 2011

Prerequisite:

SWENG 480 *Software Engineering Design* (3) Concepts of engineering ethics, economy, and project management, senior capstone project selection, and technical communication skills. Effective: Spring 2009

Prerequisite:

SWENG 481 *Software Engineering Project* (3) Capstone group design projects in software engineering. Effective: Spring 2008

Prerequisite:

SWENG 494 *Research Project* (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 2010

SWENG 495 *Internship* (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Spring 2008

Prerequisite:

SWENG 496 *Independent Studies* (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Summer 2010

SWENG 497 *Special Topics* (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Summer 1999

SWENG 497A *Software Integration* (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Summer 2012 Ending: Summer 2012

SWENG 499 (IL) *Foreign Studies* (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2010

SWENG 500 *Software Engineering Studio* (3) The 500-level studio provides an opportunity for students to undertake a substantial software project. Effective: Summer 1999

SWENG 505 *Software Project Management* (3) Analysis and construction of project plans for the development of complex software products; how to manage change and cost control. Effective: Fall 2003
SWENG 537 Software System Design (3) Best practices in the requirements, analysis, and design of large software systems including the Unified Modeling language and the Unified Process.
Effective: Spring 2008
Prerequisite:

SWENG 541 Advanced Database Design Concepts (3) Practical benefits of a Database Management System; three-stage process to create and implement a relational database to meet defined requirements.
Effective: Summer 2002
Prerequisite:

SWENG 545 Data Mining (3) Practical benefits of data mining will be presented; data warehousing, data cubes, and underlying algorithms used by data mining software.
Effective: Summer 2002
Prerequisite:

SWENG 545 Bioinformatics (3) Introduction to information processing problems in computational biology and a unified treatment of machine learning methods for solving these problems.
Effective: Summer 2002
Prerequisite:

SWENG 560 Web Based Systems (3) Autonomous intelligent software agent mechanisms, Java's database connectivity, and the emerging architectures for the development of Web based information systems.
Effective: Spring 2001
Prerequisite:

SWENG 568 Enterprise Integration (3) Advances in design, development, and deployment of control and management software for enterprise and production information systems.
Effective: Fall 2003

SWENG 569 Service Oriented Architecture (3) The principles of service oriented architecture; modeling, design and implementation of services; mapping business processes to services.
Effective: Spring 2009

SWENG 580 Advanced Software Engineering (3) Description of tools and techniques in the software development lifecycle; Mitigation and managing time-to-market and quality of large software systems.
Effective: Spring 2001
Prerequisite:

SWENG 581 Software Testing (3) This course provides a rigorous formal framework and practical information on this the testing of software throughout its life cycle.
Effective: Summer 2005
Prerequisite:

SWENG 582 Real-Time Software Design and Analysis (3) A holistic, systems-based approach to design and analysis of real-time systems; design and implementation of a small real-time system.
Effective: Summer 2002
Prerequisite:

SWENG 584 Genetic Algorithms (3) Application of genetic algorithms to problems in engineering and science including combinatorial optimization, multi-criteria optimization, biology, chemistry, and neural networks.
Effective: Summer 2002
Prerequisite:

SWENG 585 Pattern Oriented Design (3) This class examines well-known heuristics, principles and patterns in the design and construction of reusable frameworks, packages and components.
Effective: Spring 2006
Prerequisite:

SWENG 586 Requirements Engineering (3) Theory and applications of requirements elicitation, analysis, modeling, validation, testing, and writing for hardware and software systems.
Effective: Summer 2008

SWENG 587 Software Systems Architecture (3) Software systems architecture; architectural design principles/patterns; documentation/evaluation of software architectures; reuse of architectural assets through frameworks/software product lines.
Effective: Summer 2008

SWENG 588 Program Understanding (3) Techniques for the analysis and visualization of large software systems to assess the quality of the design and architecture.
Effective: Spring 2009

SWENG 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1999

The Pennsylvania State University
SWENG 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1999

SWENG 594A Masters Research Paper (3) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2012 Ending: Summer 2012

SWENG 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1999

SWENG 596A Requirements Completeness (3) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2012 Ending: Summer 2012

SWENG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1999

SWENG 826 Applied Human-Computer Interaction (3) Evaluate and design interactive products that support how people work and communicate from both a theoretical and practical perspective.
Effective: Fall 2010

Last Import from UCM: June 2, 2012 12:27 PM
Soil Science (SOILS)

SOILS 401 Soil Composition and Physical Properties (3) Advanced study of mineralogical and physical properties of soils which affect soil-plant-water relationships.
Effective: Spring 2001
Prerequisite:

SOILS 402 Soil Nutrient Behavior and Management (3) Chemical and biological behavior of soil nutrients; management for plant availability and fate in the environment. Laboratory emphasizes soil testing and soil-plant relationships.
Effective: Spring 2009
Prerequisite:

SOILS 403 Soil Morphology Practicum (2 per semester/maximum of 4) Students develop field skills to describe soil morphology, classify soils, and make land use interpretations.
Effective: Spring 2011
Prerequisite:

SOILS 404 Urban Soils (3) This course introduces the student to natural and human-influenced soils.
Effective: Summer 2010
Prerequisite:

SOILS 405 (GEOSC 405) Hydropedology (3) Soil and water interactions across scales, integrated studies of landscape-soil-water relationships, fundamental processes of water flow and chemical transport.
Effective: Spring 2008
Prerequisite:

SOILS 412W Soil Ecology (3) Introduction to soil organisms; includes interactions between organisms, their processes, and metabolism with a major focus on microorganisms.
Effective: Spring 2008
Prerequisite:

SOILS 416 Soil Genesis, Classification, and Mapping (4) Lecture and laboratory course on the genesis of soils, their classification, mapping, and interpretation for land use.
Effective: Fall 2011
Prerequisite:

Effective: Summer 2003

SOILS 419 (GEOSC 418) Soil Environmental Chemistry (3) Introduction to chemical constituents and processes occurring in soils. Topics include mineral weathering, soil solution chemistry and adsorption of solutes.
Effective: Summer 2007
Prerequisite:

SOILS 420 Remediation of Contaminated Soils (3) Basic principles and technical aspects of remediation of contaminated soils.
Effective: Summer 2007 Ending: Summer 2012
Prerequisite:

SOILS 420 Remediation of Contaminated Soils (3) Basic principles and technical aspects of remediation of contaminated soils.
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

SOILS 422 Natural Resources Conservation and Community Sustainability (3) Conservation, land-use, and community (soil, water, air, plants, animals, and humans) impacting quality of life and sense of place.
Effective: Spring 2006
Prerequisite:

SOILS 450 Environmental Geographic Information Systems (3) Use of geographic information systems (GIS) and digital spatial databases to characterize landscapes for environmental assessment and management.
Effective: Summer 1999
Prerequisite:

SOILS 489 Supervised Experience in College Teaching (1-3) Participate with instructors in teaching an undergraduate soil science course; assist with teaching and evaluation and with development of instructional materials.
Effective: Summer 1993
Prerequisite:

SOILS 490 (AGRO 490) Colloquium (1) Continuing written and oral presentations developed by students in consultation with the course instructor.
Effective: Fall 1993
Prerequisite:

SOILS 494 Senior Thesis (1-6) Supervised data collection and analysis on a topic of interest to the student culminating in...
SOILS 494H **Senior Thesis** (1-6) Supervised data collection and analysis on a topic of interest to the student culminating in a formal thesis. 
Effective: Fall 2007 
Prerequisite: 

SOILS 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. 
Effective: Summer 1990 
Prerequisite: 

SOILS 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Summer 1990 

SOILS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest. 
Effective: Summer 1990 

SOILS 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction. 
Effective: Spring 2012 

SOILS 502 **Soils Properties and Functions** (3) Introduction to soil science for graduate students including fundamentals of and applications to plant production and environmental sustainability. 
Effective: Summer 2008 

SOILS 507 **Soil Physics** (3-4) Soil physical properties emphasizing water, heat, gas, and ion movement in unsaturated soils. Laboratory included with 4 credits. 
Effective: Summer 1992 
Prerequisite: 

SOILS 510 **Geographic Information System Applications** (3) Soil data bases, image processing, and geographic information systems will be used to model and understand land and water resources. 
Effective: Spring 1993 
Prerequisite: 

SOILS 512 **Environmental Soil Microbiology** (3) Biology and ecology of microorganisms in terrestrial environments; microbiological and molecular analysis methods; microbial processes in carbon and nitrogen cycling. 
Effective: Summer 2011 
Prerequisite: 

SOILS 513 **Soil Environmental Chemistry** (3) Chemical constituents and processes occurring in soils. Discussion of soil components, reactions at the solid-solution interface, and soil chemical processes. 
Effective: Spring 2012 
Prerequisite: 

SOILS 516 **Soil Genesis** (1 per semester, maximum of 4) Field trip to study the genesis, classification, and geomorphology of the major soils of the northeastern United States. 
Effective: Summer 1992 
Prerequisite: 

SOILS 519 **Nature of Soil Minerals** (3) Constituent minerals of soils: modern methods for identification; relations to soil formation and agricultural practices. 
Effective: Fall 2001 

SOILS 571 **Ecosystem Nutrient Cycles** (3) Ecological theory and applications related to water, carbon, nitrogen, phosphorus, and cation cycling in managed and unmanaged terrestrial ecosystems. 
Effective: Fall 2008 

SOILS 590 (AGRO 590) **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. 
Effective: Fall 1993 

SOILS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Spring 1992 

SOILS 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. 
Effective: Spring 1992
SOILS 597A  **Vadose Zone Transport** (3) Lecture and literature discussion course covering water and contaminant transport through the unsaturated zone with an emphasis on soils.

SOILS 597D  **Ecosystem Analytical Techniques** (3) SOILS 597D is a laboratory instrumentation course designed to give students a deeper understanding of analytical techniques for ecosystem measurements.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

SOILS 600  **THESIS RESEARCH** (1-15) NO DESCRIPTION.
Effective: Summer 1992

SOILS 601  **PH.D. DISSERTATION FULL-TIME** (0) NO DESCRIPTION.
Effective: Summer 1992

SOILS 602  **SUPERVISED EXPERIENCE IN COLLEGE TEACHING** (1-3 PER SEMESTER, MAXIMUM OF 6) GRADUATE STUDENT INVOLVEMENT IN PREPARATION, PRESENTATION, AND EVALUATION OF COURSE MATERIALS FOR UNDERGRADUATE FORMAL COURSES.
Effective: Spring 1992

SOILS 610  **Thesis Research Off-Campus** (1-15) No description.
Effective: Summer 1992

SOILS 611  **PH.D. DISSERTATION PART-TIME** (0) NO DESCRIPTION.
Effective: Summer 1992

Last Import from UCM: June 2, 2012 12:27 PM
Spanish (SPAN)

SPAN 410 Advanced Oral Expression and Communication (3) Emphasis on achieving practical command of spoken Spanish and the comprehension of native speech. Use of journalistic materials. Effective: Fall 1995
Prerequisite:

SPAN 412 Translation (3) Techniques of oral and written translation from Spanish to English and vice versa, particularly for business, literature, and social work. Effective: Spring 2008
Prerequisite:

SPAN 413 Interpretation (3) Introduction to the art of interpretation, with particular attention to the professions for which it is most commonly required. Effective: Summer 2012
Prerequisite:

SPAN 414 Spanish Phonology (3) Spanish phonetics and phonemics; systematic means of correcting pronunciation defects; other audio-lingual applications. Effective: Spring 2001 Ending: Fall 2012
Prerequisite:

SPAN 415 Spanish Morphology and Syntax (3) The Spanish grammatical system; analysis of morphemic units and their organization into syntactic structures. Effective: Spring 2001 Ending: Fall 2012
Prerequisite:

SPAN 416 The Evolution of Spanish (3) The emergence and development of the sounds and forms of Spanish. Effective: Spring 1995 Ending: Fall 2012
Prerequisite:

SPAN 417 The Evolution of Spanish (3) The emergence and development of the sounds and forms of Spanish. Effective: Spring 2013 Future: Spring 2013
Prerequisite:

SPAN 420 Spanish for Business and International Trade (3) Introduction to the Spanish of international business and to the social and cultural norms of negotiation in Spanish-speaking countries. Effective: Spring 2008
Prerequisite:

SPAN 439 Don Quijote (3) Thorough study of the masterpiece, including its sources, genesis, language, style, success, and influence. Effective: Spring 2008 Ending: Fall 2012
Prerequisite:

SPAN 440 Teaching of Romance Languages (3) Theories of second language acquisition. Current classroom practices in the teaching of Romance languages. Effective: Spring 2001
Prerequisite:

SPAN 472 The Contemporary Spanish American Novel (3) The regionalist and social novel since 1910, together with the social background. Effective: Spring 2008 Ending: Fall 2012
Prerequisite:

SPAN 476 Masterpieces of Spanish American Literature (3) Reading, analysis, and discussion of selected major works representative of Spanish American prose and poetry.
Effective: Spring 2008 Ending: Fall 2012
Prerequisite:

SPAN 476 Masterpieces of Spanish American Literature (3) Reading, analysis, and discussion of selected major works representative of Spanish American prose and poetry.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

SPAN 490 Masterpieces of Spanish Prose (3) Reading, analysis, and discussion of selected masterpieces of Spanish novels, short stories, etc.
Effective: Spring 2008 Ending: Fall 2012
Prerequisite:

SPAN 490 Masterpieces of Spanish Prose (3) Reading, analysis, and discussion of selected masterpieces of Spanish novels, short stories, etc.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

SPAN 491 Masterpieces of Spanish Drama and Poetry (3) Reading, analysis, and discussion of selected masterpieces of Spanish drama and poetry.
Effective: Spring 2008 Ending: Fall 2012
Prerequisite:

SPAN 491 Masterpieces of Spanish Drama and Poetry (3) Reading, analysis, and discussion of selected masterpieces of Spanish drama and poetry.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

SPAN 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

SPAN 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

SPAN 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

SPAN 496A Bilingual Research Experience (1-3) Research in Center of Language Science including running participants and setting up experiments.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

SPAN 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

SPAN 497A Spanish for Health Care Providers (1) Beginning level course designed for healthcare providers working with Spanish speaking families who are unable to communicate effective in English.
Effective: Summer 2012 Ending: Summer 2012

SPAN 499 (IL) Foreign Study--Spanish (1-12) Contemporary Spanish life and civilization. Emphasis on post-Civil War period: literature, arts, and sociopolitical problems.
Effective: Summer 2005
Prerequisite:

SPAN 502 Theory and Techniques of Teaching Spanish (1-3) Audio-lingual orientation.
Effective: Winter 1978

SPAN 507 Hispano-Romance Linguistics (3 per semester/maximum of 9) History, development, and linguistic description of Old Spanish and related Romance languages of the Iberian Peninsula.
Effective: Fall 1983

SPAN 510 Spanish Descriptive Linguistics: Phonology (3) No description.
Effective: Winter 1978

SPAN 511 Spanish Transformational-Generative Linguistics (3) No description.
Effective: Winter 1978

SPAN 513 Acquisition of Spanish as a Second Language (3) Analysis of research on the acquisition of syntax,
span 514 Hispanic Dialectology (3 per semester/maximum of 6) Early fragmentation among the peninsular dialects; their status today, Judeo-Spanish; descriptive analysis of modern Spanish American dialects. Effective: Fall 1983

span 516 Medieval Spanish Literature (3 per semester/maximum of 9) Topics vary: juglaria and clerecia, emergence of lyric and brief narrative; history and didacticism; origins of novel; balladry; fifteenth-century innovations. Effective: Fall 1983

span 528 Seventeenth-Century Spanish Literature (3 per semester/maximum of 9) Prose and poetry of major authors: works and trends of the late Golden Age and Baroque period. Effective: Fall 1983

span 537 Golden Age Theatre (3 per semester/maximum of 6) Major works of Lope de Vega, Tirso de Molina, Calderon, and others. Effective: Fall 1983

span 553 Writings of the "Generation of 1898" (3 per semester/maximum of 6) Novels, plays, short stories, essays, poetry of Valle-Inclan, Azorin, Benavente, Unamuno, Machado, Maeztu, and Baroja in the context of generation concept. Effective: Fall 1983

span 560 The Contemporary Novel in Spain (3 per semester, maximum of 9) The novel since 1941: Cela, Laforet, Zununegui, Suarez Carreno, Matute, and others. Effective: Spring 2001

span 566 Contemporary Spanish Poetry (3) Various currents in Spanish poetry from the generation of 1927: Lorca, Aleixandre, Salinas, Guillen, Alonso, Alberti, Hernandez, Otero, and others. Effective: Fall 1983

span 568 Early Spanish American Literature (3 per semester/maximum of 9) Content varies; selected topics from colonial period, romanticism, and the nineteenth century before modernism. Effective: Fall 1983

span 574 The Spanish American Novel (3 per semester/maximum of 9) Content varies; selected works from the late nineteenth century through the contemporary period. Effective: Fall 1983

span 575 Stylistic and Literary Criticism (3) Major theories of literary criticism applied to Hispanic literature. Effective: Winter 1978

span 576 Seminar in Hispanic Literature (3-12) Common and individual research in special problems in Spanish or Spanish American literature. Effective: Summer 1988

span 587 Technology in Foreign Language Education: An Overview (3) Approaches to the uses and research applications of multimedia and other educational technologies applied to the teaching of foreign languages. (also crosslisted with APLNG 589) Effective: Spring 2004

span 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

span 596A A Corpus-based Analysis of Verb Bias (3) Use natural speech corpora to establish verb biases for verbs to be used in future experimental stimuli. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

span 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Summer 1988

span 600 Thesis Research (1-15) No description. Effective: Fall 1983

The Pennsylvania State University
SPAN 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

SPAN 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Summer 1999

SPAN 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2001

SPAN 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

SPAN 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Special Education (SPLED)

SPLED 400 Inclusive Special Ed Foundations: Legal, Characteristics, Collaboration, Assessment, and Management (4) Legal issues, learner characteristics, collaboration skills, assessment, and behavior management related to educating students with disability in inclusive settings.
Effective: Summer 2011
Prerequisite:

SPLED 401 Motivating Exceptional Learners (4) Group and individual techniques to promote student task engagement and prosocial behavior.
Effective: Summer 2011
Prerequisite:

SPLED 402 Human Rights: Historical and Current Issues in Special Education (3) Litigation, legislation, regulation, and advocacy issues impacting on educational and related services for individuals with academic and/or physical disabilities.
Effective: Summer 2011
Prerequisite:

SPLED 403A Evidence-Based Instruction for Elementary Students with Disabilities in Reading, Math, and Writing (3) Evidence-based methods for design, delivery, and adaptation of instruction for elementary students with disabilities in reading, mathematics, and writing.
Effective: Summer 2011
Prerequisite:

SPLED 403B Evidence-Based Methods for Teaching Secondary Students with Disabilities in Inclusive Settings (3) Evidence-based methods for designing, delivering, and adapting instruction for students with disabilities in inclusive secondary education settings.
Effective: Summer 2011
Prerequisite:

SPLED 404 Working with Families and Professionals in Special Education (3) Strategies for productive interactions between special educators and others such as colleagues, employers, parents, service providers, professionals, and students.
Effective: Summer 2011
Prerequisite:

SPLED 408 (EDPSY 408) Meeting Instructional Needs of English Language Learners with Special Needs (3) The course content and activities focus on instruction and assessment for English Language Learners with special needs.
Effective: Summer 2011
Prerequisite:

SPLED 409A Fundamental Literacy Skills for Students with Special Needs (3) Effective reading curriculum and teaching methods to teach students with special needs.
Effective: Summer 2011
Prerequisite: Concurrent: SPLED 495G

SPLED 409B Writing and Content Literacy for Students with Special Needs (3) Effective curriculum and materials for teaching writing and content literacy to students with special needs.
Effective: Summer 2011
Prerequisite: Concurrent: SPLED 495G

SPLED 409C Mathematics Instruction for Students with Special Needs (3) Research-based practices for teaching mathematics skills to students with special needs.
Effective: Summer 2011
Prerequisite: Concurrent: SPLED 495G

SPLED 411 Intervention for Students with Severe Disabilities (3) Assessment, teaching strategies, curricula, materials, and assistive techniques for use with individuals having severe disabilities (mental and physical).
Effective: Summer 2011
Prerequisite: Concurrent: a grade of C or better in SPLED 495E

SPLED 412 Instruction for Students with Mild Disabilities (4) Appropriate teaching strategies, curriculum sequences, and materials selection and evaluation for children with mild special needs.
Effective: Summer 2011
Prerequisite: Concurrent: a grade of C or better required in SPLED 454

SPLED 415 Early Special Education (3-4) Includes early identification methods, assessment, curricula, parent involvement, and program evaluation for exceptional preschoolers in mainstreamed or segregated settings.
Effective: Summer 2011
Prerequisite:

SPLED 418 Technologies for Persons with Disabilities (2) Sensory aids, communication systems, computer systems, expert systems, simulations, and other technologies for students who are academically or physically challenged.
Effective: Summer 2011
Prerequisite:
SPLED 419 Assistive Technology for General Education Teachers (2-3) Strategies to support use of assistive technologies by students with disabilities in general education classrooms.
Effective: Summer 2012
Prerequisite:

SPLED 425 Foundations of Special Education, Etiologies, Law, and Implications for Practice (4) An introduction to exceptional individuals being served in special education programs across the life span.
Effective: Fall 2011
Prerequisite:

SPLED 430 Foundational Skills for Working with Students with Special Education Needs in General Education Classrooms (1) Introduction to working with students with special education needs in the general education classroom, including history and legal foundation.
Effective: Summer 2011
Prerequisite:

SPLED 431 Evidenced-Based Methods for Monitoring Student Progress and Making Instructional Decisions (2) Evidence-based methods for assessing student progress and making data-based instructional decisions.
Effective: Summer 2011
Prerequisite:

SPLED 432 Evidence-Based Practices for Inclusive Behavior Management (2) Managing and motivating learners with special needs in general education settings based upon principles of Applied Behavior Analysis.
Effective: Summer 2011
Prerequisite:

SPLED 433 Effective and Explicit Instruction for Students with Learning Difficulties (2) Evidence-based methods for designing, delivering, and adapting academic instruction for students with mild, moderate, and severe learning difficulties.
Effective: Summer 2011
Prerequisite:

SPLED 434A Evidence-Based Practices for Inclusive Elementary Classrooms (2) Evidence-based methods to effectively serve special needs students in elementary general education settings, including reading, writing, and mathematics instruction.
Effective: Summer 2011
Prerequisite:

SPLED 434B Evidenced-Based Practices for Inclusive Secondary Classrooms (2) Evidence-based methods to effectively serve special needs students in secondary general education settings.
Effective: Summer 2011
Prerequisite:

SPLED 444 Inclusive Education and Assessment (6) Knowledge and skills needed to educate students with special needs in urban schools.
Effective: Summer 2011
Prerequisite: Concurrent: URBED 395W

SPLED 454 Assessment for Instruction (4) Orientation to evaluation of special students with emphasis on the creation, use, and interpretation of teacher-made assessment procedures.
Effective: Summer 2011
Prerequisite: Concurrent: a grade of C or better in SPLED 412

SPLED 460A Fundamentals of Reading Instruction in Special Education (3) Topics include the interactive nature of reading, recent findings of the National Reading Panel, explicit instruction principles and reading assessments.
Effective: Summer 2011

SPLED 460B Teaching and Assessing Reading Skills of Students with Special Needs (3) Topics include methods for assessing and teaching reading skills including fluency, word level decoding and comprehension.
Effective: Summer 2011
Prerequisite:

SPLED 460C Specialized Reading Applications in Special Education (3) Topics include methods for assessing and teaching reading skills in vocational competence, functional reading, reading for students with sensory impairment.
Effective: Summer 2011
Prerequisite:

SPLED 461 Autism: Issues and Concerns (1) Overview of issues, characteristics, and evidenced-based assessment strategies, and approaches for individuals with autism/PDD.
Effective: Summer 2011 Ending: Fall 2012

SPLED 461 Introduction to Autism Spectrum Disorders: Issues and Concerns (3) Overview of issues, characteristics, and evidenced-based assessment strategies, and approaches for individuals with autism/PDD.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

SPLED 462 Autism and Applied Behavior Analysis (4) Basic principles of applied behavior analysis (ABA) and empiricism. Emphasis will be given to ABA principles in educational settings.
Effective: Summer 2011 Ending: Fall 2012

The Pennsylvania State University
Prerequisite:

**SPLED 462 Autism and Applied Behavior Analysis** (3) This course addresses principles of applied behavior analysis and empiricism related to instruction and special issues affecting individuals with autism.
Effective: Spring 2013 Future: Spring 2013
Prerequisite:

**SPLED 463 Communication and Social Competence** (3) Overview of deficits and strategies in speech, language, and communication across the Autism Spectrum Disorder.
Effective: Summer 2011
Prerequisite:

**SPLED 464 Assessment and Curriculum** (3) Overview of screening, diagnosis, and identification of skills in developmental domains and curriculum for individuals with autism.
Effective: Summer 2011
Prerequisite:

**SPLED 465 Asperger Syndrome** (1) Characteristics, assessment, intervention, and curriculum for individuals with Asperger syndrome. Emphasis will be given to social skill development.
Effective: Summer 2011

**SPLED 495E Experience with Exceptional Children** (3) Supervised activities with exceptional children in a variety of possible settings, e.g., schools, institutions, day care centers, vocational settings.
Effective: Summer 2011
Prerequisite: Concurrent: a grade of C or better in SPLED 411 SPLED 412

**SPLED 495F Practicum in Special Education** (15) Teaching experience with mildly/moderately disabled children in age appropriate settings, e.g., infant/preschools, schools, vocational/job sites.
Effective: Summer 2011
Prerequisite:

**SPLED 495G Experience with an Integrated Inclusion Classroom** (4) Supervised teaching in integrated general classrooms with activities in assessment, diagnosis, and direct intervention with students in need or with disabilities.
Effective: Summer 2011
Prerequisite: Concurrent: a grade of C or better required in SPLED 409

**SPLED 496 Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

**SPLED 497 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

**SPLED 497A Introduction to Autism Spectrum Disorders for General Educators** (3) The course will cover characteristics and assessment of students having Autism Spectrum Disorders (ASD). Strategies for instruction in general education settings will be discussed as well as programming for communication, behavioral and social interactions.
Effective: Summer 2012 Ending: Summer 2012

**SPLED 497B Introduction to Assistive Technology for General Education Teachers** (2) This class will focus on the role of the general education teacher in supporting the effective use of assistive technology by students with disabilities.
Effective: Summer 2012 Ending: Summer 2012

**SPLED 498 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

**SPLED 498A Practicum in Applied Behavior Analysis** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2012 Ending: Summer 2012

**SPLED 498A Practicum in Applied Behavior Analysis** (4) Practicum in developing, implementing, and evaluating behavior analytic techniques. See attached syllabus.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

**SPLED 498B A Focus on Improving Student Achievement Through Effective Practices** (3) Attend professional development seminars and submit intervention summaries and implementation plans.
Effective: Summer 2012 Ending: Summer 2012

**SPLED 500 Seminar in Special Education** (1-9) Continuing series of professional seminars designed to provide a forum for discussion of current and classical research concerning exceptional children.
Effective: Summer 2011

The Pennsylvania State University
Prerequisite:

SPLED 501 Administration and Supervision of Educational Programs for Exceptional Children (2-3) Problems connected with the instituting and organizing of classes for atypical children; the legal phases, finances, teaching personnel, pupil personnel, housing, equipment, courses of study, curriculum, etc.
Effective: Summer 2011
Prerequisite:

SPLED 502 Educating Individuals with Autism Spectrum Disorders (3) This seminar addresses evidence-based strategies related to individuals with ASD including characteristics, assessment, treatment approaches, and life-span programming.
Effective: Summer 2011

SPLED 503A Applied Behavior Analysis for Special Education: Basic Principles I (4) Topics include a history of applied behavior analysis; underlying assumptions; dimensions and characteristics of ABA; ethics; basic terminology and principles.
Effective: Summer 2011

SPLED 503B Applied Behavior Analysis for Special Education: Basic Principles II (4) Topics include functional assessment of behavior, ethics, methods to increase and decrease behavior, and generalization.
Effective: Summer 2011
Prerequisite:

SPLED 503C Applied Behavior Analysis for Special Education: Extended Applications I (4) Topics include assessment and intervention for challenging behavior, systems support, classroom applications of ABA, and review of ABA Certification Exam.
Effective: Summer 2011
Prerequisite:

SPLED 505 Single-Case Research (3) Overview of research methods associated with collecting and evaluating repeated measures on single cases.
Effective: Summer 2011

SPLED 510 Problems in the Education of the Mentally Retarded (2-4) Study of existing curriculums, instructional practices, educational programs; experimentation in curriculum building and materials construction.
Effective: Summer 2011
Prerequisite:

SPLED 511 Ethical Considerations for Special Education Populations (3) Discussion of ethical and legal standards in special education.
Effective: Summer 2012

SPLED 515 Infants and Toddlers with Special Needs (3) Comparison of typical and atypical development of infants and toddlers; applicable instructional strategies in education.
Effective: Summer 2011
Prerequisite:

SPLED 516 Assessment in Early Educational Intervention (2-3) Describes and illustrates models, methods, and materials for assessing infants and preschoolers with developmental delays and disabilities.
Effective: Summer 2011
Prerequisite:

SPLED 530 Problems in the Education of the Learning Disabled (2-4) Review of the research and theoretical implications in the educational and behavioral management of learning disabled children.
Effective: Summer 2011
Prerequisite:

SPLED 540 Orientation to PhD Study in Special Education (3) Information and skills needed for successful completion of Ph.D. study in Special Education for those targeting academic careers.
Effective: Summer 2011
Prerequisite:

SPLED 550 Professional Seminar in Special Education (2) Professional competencies and ethical issues related to obtaining and retaining positions in higher education.
Effective: Summer 2011
Prerequisite:

SPLED 570 Problems in the Education of the Emotionally Disturbed (2-4) Current issues, methods, and problems associated with the education of the emotionally/behaviorally disturbed.
Effective: Summer 2011
Concurrent: SPLED 305 SPLED 401

SPLED 573 Introduction to Research in Special Education (3) A seminar to review and design research in special education.
Effective: Summer 2011
Prerequisite:
SPLED 575 Grant-Proposal Development in Special Education (3) Designed to facilitate development of grants and proposal writing techniques for submission and funding by student researchers.
Effective: Summer 2011
Prerequisite:

SPLED 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2011

SPLED 595 Internship (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. A specific title may be used in each instance and will be entered on the student’s transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.
Effective: Summer 2011

SPLED 595A Practicum (1-6) Supervised clinical experience on campus in University-managed diagnostic and remedial settings.
Effective: Summer 2011
Prerequisite:

SPLED 595B Field Experiences in Off-Campus Laboratories (1-10) Supervised off-campus field experiences in selected laboratory settings with exceptional children.
Effective: Summer 2011
Prerequisite:

SPLED 595C Internship in Special Education Supervision (1-6) Internship in day/residential school setting under supervision of field supervisor and University faculty.
Effective: Summer 2011
Prerequisite:

SPLED 595D Internship in Special Education (2-10) Internship to take place in schools or educational situations where student is not regularly employed, under supervision of graduate faculty.
Effective: Summer 2011
Prerequisite:

SPLED 596 Individual Studies (1-9) Creative projects, including non-thesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

SPLED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2011

SPLED 597A Evidence-based Instruction for Adolescents with Learning Difficulties: The Strategic Intervention Model (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2012 Ending: Summer 2012

SPLED 597B Applied Behavior Analysis for Special Education: Extended Applications II (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2012 Ending: Summer 2012

SPLED 600 Thesis Research (1-15) No description.
Effective: Summer 2011

SPLED 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 2011

SPLED 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Experience in structuring and teaching a college course supervised by a graduate faculty member.
Effective: Summer 2011

SPLED 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 2011

SPLED 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 2011

Last Import from UCM: June 2, 2012 12:27 PM

The Pennsylvania State University
Special Grad Pgmr (SPEC)

SPEC 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1993

SPEC 600 Thesis Research (1-15) No description.
Effective: Fall 1983

SPEC 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

SPEC 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

SPEC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 2, 2012 12:27 PM
Statistics (STAT)

STAT 401 Experimental Methods (3) Random variables; probability density functions; estimation; statistical tests, t-tests; correlation; simple linear regression; one-way analysis of variance; randomized blocks.
Effective: Spring 1988
Prerequisite:

STAT 402 Statistical Analysis II (3) Two-sample problems, single and multifactor ANOVA, simple and multiple regression, categorical data.
Effective: Fall 2007
Prerequisite:

STAT 414 (MATH 414) Introduction to Probability Theory (3) Probability spaces, discrete and continuous random variables, transformations, expectations, generating functions, conditional distributions, law of large numbers, central limit theorems. Students may take only one course from STAT(MATH) 414 and 418.
Effective: Fall 2001
Prerequisite:

STAT 415 (MATH 415) Introduction to Mathematical Statistics (3) A theoretical treatment of statistical inference, including sufficiency, estimation, testing, regression, analysis of variance, and chi-square tests.
Effective: Fall 1989
Prerequisite:

Effective: Spring 1984
Prerequisite:

STAT 418 (MATH 418) Introduction to Probability and Stochastic Processes for Engineering (3) Introduction to probability axioms, combinatorics, random variables, limit laws, and stochastic processes. Students may take only one course from MATH(STAT) 414 and 418 for credit.
Effective: Fall 2011
Prerequisite:

STAT 440 Computational Statistics (3) Topics related to computing in statistics, including numerical linear algebra, optimization, simulation, numerical integration, and bootstrapping.
Effective: Spring 2006
Prerequisite:

STAT 460 Intermediate Applied Statistics (3) Review of hypothesis testing, goodness-of-fit tests, regression, correlation analysis, completely randomized designs, randomized complete block designs, latin squares.
Effective: Fall 2006
Prerequisite:

STAT 461 Analysis of Variance (3) Analysis of variance for single and multifactor designs; response surface methodology.
Effective: Fall 2007
Prerequisite:

STAT 462 Applied Regression Analysis (3) Introduction to linear and multiple regression; correlation; choice of models, stepwise regression, nonlinear regression.
Effective: Fall 2006
Prerequisite:

STAT 463 Applied Time Series Analysis (3) Identification of models for empirical data collected over time; use of models in forecasting.
Effective: Spring 2006
Prerequisite:

STAT 464 Applied Nonparametric Statistics (3) Tests based on nominal and ordinal data for both related and independent samples. Chi-square tests, correlation.
Effective: Fall 2006
Prerequisite:

STAT 466 Survey Sampling (3) Introduction to design and analysis of sample surveys, including questionnaire design, data collection, sampling methods, and ratio and regression estimation.
Effective: Spring 2006
Prerequisite:

STAT 470W Problem Solving and Communication in Applied Statistics (3) Provide problem solving and communication skills through development of writing ability, interaction with peers and the SCC, and oral presentations.
Effective: Spring 2000
Prerequisite:

STAT 480 Introduction to SAS (1) Introduction to SAS with emphasis on reading, manipulating and summarizing data.
Effective: Spring 2008
Prerequisite:

STAT 481 Intermediate SAS for Data Management (1) Intermediate SAS for data management.
Effective: Summer 2007
Prerequisite:

STAT 482 Advanced Topics in SAS (1) Advanced statistical procedures in SAS, including ANOVA, GLM, CORR, REG, MANOVA, FACTOR, DISCRIM, LOGISTIC, MIXED, GRAPH, EXPORT, and SQL. Credit can not be received for both STAT 482 and STAT 480/481/483.
Effective: Summer 2009
Prerequisite:

STAT 483 Statistical Analysis System Programming (3) Introduction, intermediate, and advanced topics in SAS. Credit can not be received for both STAT 483 and STAT 480/481/482.
Effective: Summer 2009
Prerequisite:

STAT 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2007
Prerequisite:

STAT 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2007
Prerequisite:

STAT 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships.
Effective: Fall 2007
Prerequisite:

STAT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

STAT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

STAT 497C Topics in Stat Computing with R (1) Topics: I) Basic background on R II) Manipulating data I III) Finding help IV) Simple univariate data V) Importing data VI) Documenting your work VII) Manipulating data II VII) Reptitive tasks - loops and the apply() family IX) Bivariate data X) Basic analyses (as much as possible we’ll work with real data.)
Effective: Summer 2012 Ending: Summer 2012

STAT 497C Topics in Stat Computing with R (1) Topics: I) Basic background on R II) Manipulating data I III) Finding help IV) Simple univariate data V) Importing data VI) Documenting your work VII) Manipulating data II VII) Reptitive tasks - loops and the apply() family IX) Bivariate data X) Basic analyses (as much as possible we’ll work with real data.)
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

STAT 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

STAT 500 Applied Statistics (3) Descriptive statistics, hypothesis testing, power, estimation, confidence intervals, regression, one- and 2-way ANOVA, Chi-square tests, diagnostics.
Effective: Spring 1999
Prerequisite:

STAT 501 Regression Methods (3) Analysis of research data through simple and multiple regression and correlation; polynomial models; indicator variables; step-wise, piece-wise, and logistic regression.
Effective: Fall 2006
Prerequisite:

STAT 502 Analysis of Variance and Design of Experiments (3) Analysis of variance and design concepts; factorial, nested, and unbalanced data; ANCOVA; blocked, Latin square, split-plot, repeated measures designs.
Effective: Fall 1995
Prerequisite:

STAT 503 Design of Experiments (3) Design principles; optimality; confounding in split-plot, repeated measures, fractional factorial, response surface, and balanced/partially balanced incomplete block designs.
Effective: Fall 1983
Prerequisite:

STAT 504 Analysis of Discrete Data (3) Models for frequency arrays; goodness-of-fit tests; two-, three-, and higher-way tables; latent and logistic models.
Effective: Fall 1983
Prerequisite:

**STAT 505 Applied Multivariate Statistical Analysis** (3) Analysis of multivariate data; T2-tests; particle correlation; discrimination; MANOVA; cluster analysis; regression; growth curves; factor analysis; principal components; canonical correlations.
Effective: Spring 2003
Prerequisite:

**STAT 506 Sampling Theory and Methods** (3) Theory and application of sampling from finite populations.
Effective: Fall 1983
Prerequisite:

Effective: Spring 2005
Prerequisite:

**STAT 509 Design and Analysis of Clinical Trials** (3) An introduction to the design and statistical analysis of randomized and observational studies in biomedical research.
Effective: Fall 2004
Prerequisite:

**STAT 510 Applied Time Series Analysis** (3) Identification of models for empirical data collected over time. Use of models in forecasting.
Effective: Fall 1983
Prerequisite:

**STAT 511 Regression Analysis and Modeling** (3) Multiple regression methodology using matrix notation; linear, polynomial, and nonlinear models; indicator variables; AOV models; piece-wise regression, autocorrelation; residual analyses.
Effective: Fall 2006
Prerequisite:

**STAT 512 Design and Analysis of Experiments** (3) AOV, unbalanced, nested factors; CRD, RCBD, Latin squares, split-plot, and repeated measures; incomplete block, fractional factorial, response surface designs; confounding.
Effective: Spring 1984
Prerequisite:

**STAT 513 Theory of Statistics I** (3) Probability models, random variables, expectation, generating functions, distribution theory, limit theorems, parametric families, exponential families, sampling distributions.
Effective: Summer 1986
Prerequisite:

**STAT 514 Theory of Statistics II** (3) Sufficiency, completeness, likelihood, estimation, testing, decision theory, Bayesian inference, sequential procedures, multivariate distributions and inference, nonparametric inference.
Effective: Summer 1986
Prerequisite:

**STAT 515 Stochastic Processes I** (3) Conditional probability and expectation, Markov chains, the exponential distribution and Poisson processes.
Effective: Summer 1986 Ending: Fall 2012
Prerequisite:

Effective: Spring 2013 Future: Spring 2013
Prerequisite:

**STAT 517 (MATH 517) Probability Theory** (3) Measure theoretic foundation of probability, distribution functions and laws, types of convergence, central limit problem, conditional probability, special topics.
Effective: Summer 2000
Prerequisite:

**STAT 518 (MATH 518) Probability Theory** (3) Measure theoretic foundation of probability, distribution functions and laws, types of convergence, central limit problem, conditional probability, special topics.
Effective: Fall 1983
Prerequisite:

**STAT 519 (MATH 519) Topics in Stochastic Processes** (3) Selected topics in stochastic processes, including Markov and Wiener processes; stochastic integrals, optimization, and control; optimal filtering.
Effective: Fall 1984
Prerequisite:

**STAT 524 Ecometrics** (3) Stochastic models and statistical methods in ecological problems; population dynamics, spatial patterns in populations of one, two, or more species.
Effective: Winter 1978
Prerequisite:

**STAT 525 Survival Analysis I** (3) Location estimation, 2- and K-sample problems, matched pairs, tests for association and covariance analysis when the data are censored.
Effective: Summer 1992

The Pennsylvania State University
Graduate Bulletin Archive - 2012

Prerequisite:

STAT 540 Statistical Computing (3) Computational foundations of statistics; algorithms for linear and nonlinear models, discrete algorithms in statistics, graphics, missing data, Monte Carlo techniques.
Effective: Fall 1983
Prerequisite:

STAT 544 Categorical Data Analysis I (3) Two-way tables; generalized linear models; logistic and conditional logistic models; loglinear models; fitting strategies; model selection; residual analysis.
Effective: Summer 1992
Prerequisite:

STAT 548 Statistical Distribution Theory (3) Analytical study of nonnormal models and methods in reliability theory, survival analysis, records evaluation, scale/scale-free analysis, and directional statistics.
Effective: Spring 1984
Prerequisite:

STAT 551 Linear Models I (3) A coordinate-free treatment of the theory of univariate linear models, including multiple regression and analysis of variance models.
Effective: Spring 1987
Prerequisite:

STAT 552 Linear Models II (3) Treatment of other normal models, including generalized linear, repeated measures, random effects, mixed, correlation, and some multivariate models.
Effective: Spring 1987
Prerequisite:

STAT 553 Asymptotic Tools (3) A rigorous but non-measure-theoretic introduction to statistical large-sample theory for Ph.D. students.
Effective: Summer 2004
Prerequisite:

STAT 557 (IST 557) Data Mining I (3) This course introduces data mining and statistical/machine learning, and their applications in information retrieval, database management, and image analysis.
Effective: Summer 2009
Prerequisite:

STAT 558 (IST 558) Data Mining II (3) Advanced data mining techniques: temporal pattern mining, network mining, boosting, discriminative models, generative models, data warehouse, and choosing mining algorithms.
Effective: Summer 2010
Prerequisite:

STAT 561 Statistical Inference I (3) Classical optimal hypothesis test and confidence regions, Bayesian inference, Bayesian computation, large sample relationship between Bayesian and classical procedures.
Effective: Spring 2003
Prerequisite: Concurrent: STAT 517

STAT 562 Statistical Inference II (3) Basic limit theorems; asymptotically efficient estimators and tests; local asymptotic analysis; estimating equations and generalized linear models.
Effective: Spring 2003
Prerequisite:

STAT 565 Multivariate Analysis (3) Theoretical treatment of methods for analyzing multivariate data, including Hotelling’s T2, MANOVA, discrimination, principal components, and canonical analysis.
Effective: Spring 1987
Prerequisite:

STAT 580 Statistical Consulting Practicum I (2) General principles of statistical consulting and statistical consulting experience. Preparation of reports, presentations, and communication aspects of consulting are discussed.
Effective: Spring 2005
Prerequisite:

STAT 581 Statistical Consulting Practicum II (1 per semester/maximum of 2) Statistical consulting experience including client meetings, development of recommendation reports, and discussion of consulting solutions.
Effective: Summer 2004
Prerequisite:

STAT 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

STAT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

STAT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

The Pennsylvania State University
STAT 600 Thesis Research (1-15) No description.
Effective: Fall 1983

STAT 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

Effective: Fall 1983

STAT 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

STAT 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2008

STAT 897A Introduction to Applied Statistics (3) Description statistics, hypothesis testing, power estimation, confidence intervals, regression, one- and two-way ANOVA, chi-square tests, diagnostics.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

STAT 897D Applied Data Mining and Statistical Learning (3) Data Mining tools are exploring data with regression, PCA, discriminant analysis, cluster analysis, classification and regression trees (CART).
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Strctrl Basis-Med Pr (SBMP)

SBMP 715 Structural Basis of Medical Practice (13) This integrated course will provide gross structure, organization, and function of human body with labs devoted to dissection of human body; clinical and radiological correlation. Effective: Summer 1997

Last Import from UCM: June 2, 2012 12:27 PM
Study Abroad (ABLA W)

ABLA W 900 Study Abroad (1-17) Law student attending international study abroad program. Effective: Summer 2008

Last Import from UCM: June 2, 2012 12:27 PM
Study Abroad (STABO)

STABO 999 (IL) **Study Abroad** (1-12) See summer program brochure for description.
Effective: Summer 2005

STABO 999A (IL) **Introduction to Arbitration - McGill Program** (1) Addresses the basic issues and rules of arbitration law as articulated in U.S. law and the rulings of the U.S. Supreme Court.
Effective: Summer 2012 Ending: Summer 2012

STABO 999B (IL) **Consumer Arbitration - McGill Program** (1) Examines the U.S. and Canadian law on the use of class action remedies and arbitration in the context of consumer disputes. Recent High Court cases from each jurisdiction are considered.
Effective: Summer 2012 Ending: Summer 2012

STABO 999C (IL) **ICSID Arbitration - McGill Program** (1) A study of the World Bank arbitration procedure that addresses the issues of sovereignty in resolving transborder commercial and investment disputes. ICSID was established in 1965 under the Washington Convention. It has become a key arbitration system with the proliferation of Bilateral Investment Treaties (BITs), which give foreign investors the right to make claims against a host State.
Effective: Summer 2012 Ending: Summer 2012

STABO 999D (IL) **NAFTA Arbitration - McGill Program** (1) Another developing transborder arbitration system, like ICSID, that applies to the mixed (commercial and political) disputes of international trade in the North American context. The consideration focus upon the doctrines and procedures that have arisen under NAFTA Chapter 11 arbitral proceedings.
Effective: Summer 2012 Ending: Summer 2012

STABO 999E (IL) **ICC Arbitration - McGill Program** (1) Examines the structure and practices of a major provider of arbitration services. The International Chamber of Commerce, headquartered in Paris, France, administers more than 600 arbitrations yearly. It is a significant part of transborder arbitral practice.
Effective: Summer 2012 Ending: Summer 2012

STABO 999F (IL) **UNCITRAL Model Law on Arbitration - McGill Program** (1) Addresses the basic principles of the international governance of arbitration, awards, and proceedings through the uniform law established by the UN Commission on International Trade Law.
Effective: Summer 2012 Ending: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
Study Abroad (STABR)

STABR 997 **Special Topics** (1-12) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Summer 2010

STABR 999 (IL) **Study Abroad** (1-12) See summer program brochure for description. Effective: Summer 2005

STABR 999A (IL) **Current Issues in Constitutional Interpretation - Florence Program** (1) Using recent important cases, this course will exam a variety of challenging issues that have arisen in recent Supreme Court cases. Among these are questions arising under the Second, Fourth, Sixth, and Eighth Amendments, as well as theories of constitutional interpretation and the doctrine of stare decisis. Effective: Summer 2012 Ending: Summer 2012

STABR 999B (IL) **Comparative Law in a Globalized World - Transnational Perspectives - Florence Program** (2.5) This course addresses selected topics that are important for U.S. lawyers in transnational practice. It introduces students to the civil law tradition and contemporary national and supranational legal systems in Europe and around the world that have grown out of or have been substantially influenced by the civil law tradition. Effective: Summer 2012 Ending: Summer 2012

STABR 999C (IL) **International and Comparative Family Law - Florence Program** (2.5) This course will present an overview of the family law systems in the United States and European countries with emphasis on Italy. The course will also focus on transnational family law problems involving recognition of foreign decrees, transnational custody battles, international adoptions etc. The course will combine theoretical and practical approaches. No prior knowledge of family law is required, and the course is not intended to be a substitute for an in depth U.S. family law course. Effective: Summer 2012 Ending: Summer 2012

STABR 999D (IL) **The International Sale of Goods -- The CISG in Comparative Perspective - Florence Program** (2.5) This course examines, from the perspective of a U.S.-based practitioner, selective issues on transnational contract formation, performance, breach, and remedies, focusing on the approach of the United Nations (Vienna) Convention on International Sale of Goods (CISG) in comparison with that of the Uniform Commercial Code. The objective of the course is to develop students' skills in the drafting of transnational contracts and providing competent advice in the context of cross-border sales transactions. A course in sales is not a prerequisite to take this course and it is not intended to be a substitute for an in-depth U.S. “sales” course. Effective: Summer 2012 Ending: Summer 2012

STABR 999E (IL) **Transnational Litigation and Civil Procedure - Florence Program** (2.5) This course explores the problems that most frequently arise in litigation involving foreign parties or business transactions. It initially focuses on judicial jurisdiction and related questions of forum non conveniens, validity and enforceability of forum selection clauses, antisuit-injunctions and international lis pendens. It then concentrates on the intricacies of serving process in transnational cases, and provisional remedies (injunctions, attachment and equivalent remedies) in litigation involving foreign parties or activities. The discovery process in transnational disputes and recognition and enforcement of foreign judgments are also addressed. Effective: Summer 2012 Ending: Summer 2012

Last Import from UCM: June 2, 2012 12:27 PM
Summer Practicum (SP)

SP 714 Summer Practicum (1) The Penn State College of Medicine's summer practicum gives students the opportunity to gain direct experience in the care of patients in conducting biomedical research. The course is offered during the summer session between the first and second year of medical school.

Effective: Summer 2011

Prerequisite:

Last Import from UCM: June 2, 2012 12:27 PM
Supply Chain Mgmt (SCM)

SCM 400 Transport Planning (3) Advanced study of transport systems in supply chain networks.
Effective: Spring 2007
Prerequisite:

SCM 404 Demand Fulfillment (3) Analysis of demand fulfillment and the role of distribution operations management in the supply chain.
Effective: Spring 2011
Prerequisite:

SCM 405 Manufacturing and Services Strategies (3) Investigates manufacturing and services strategies in supply chain networks.
Effective: Spring 2011
Prerequisite:

SCM 406 Strategic Procurement (3) Analysis of strategic procurement in the supply chain.
Effective: Summer 2011
Prerequisite:

SCM 416 Warehousing and Terminal Management (3) Administration of warehouse and terminal functions in logistics systems, with analysis of customer service, forecasting, inventory, investment, design, and operation. Not available to baccalaureate business students in Smeal.
Effective: Spring 2007
Prerequisite:

SCM 421 Supply Chain Analytics (3) Models and Methodologies for supply chain analysis.
Effective: Spring 2011
Prerequisite:

Effective: Spring 2007
Prerequisite:

SCM 445 Operations Planning and Control (3) Aggregate production planning procedures, disaggregation methods in hierarchical production planning, master production scheduling, material requirements planning, lot-sizing, and capacity planning. Not available to baccalaureate business students in Smeal.
Effective: Spring 2007 Ending: Summer 2012
Prerequisite:
