Prerequisite:
SOC 425 Social Conflict (3) An analysis of the variables affecting intergroup and international conflict and cooperation.

SOC 427W (CED 427W, S T S 427W) Society and Natural Resources (3) Analysis of the relationships between societal development and enhancement and natural resources.

SOC (CED/S T S) 427W Society and Natural Resources (3)

There is a common tendency to portray environmental and natural resource problems as biophysical in nature. The implication of this tendency is that such problems are best addressed by scientists and engineers who discover evidence of and devise new technologies to fix them. Another common tendency is to assume that people resist solutions to environmental and natural resource problems because of individually held anti-environmental attitudes. In contrast to these two perspectives, sociologists point out that environmental and natural resource problems often lie at the intersection of biophysical processes and social, political, economic, belief, value, and knowledge systems. The goals of this writing-intensive course are to introduce students to the complexity of environmental and natural resource problems and to teach them to think sociologically. In addition to reading assigned books and articles, students will participate in a simulation to negotiate a global environmental treaty, attend a field trip to learn about alternative energy strategies, and conduct research on a local environmental or natural resource issue. After taking this course, students should be better prepared to engage in debates with academics, politicians, and other citizens regarding the causes and potential solutions to environmental and natural resource problems.

SOC 428 Homelessness in America (3) Survey of social science research on homelessness in the contemporary United States.

SOC 428H Homelessness in America (3) Survey of social science research on homelessness in the contemporary United States.

**SOC 440 (HD FS 440)** Family Policy (3) An in-depth examination of family policy.

**SOC (HD FS) 440 Family Policy (3)**

(BA) This course meets the Bachelor of Arts degree requirements.

This course is designed to provide an in-depth examination of family policy. Students will identify and critically analyze major issues, controversies, and policies that affect families. Attention will be devoted to recognizing both intended and unintended consequences of family policies and understanding policy challenges and trade-offs. Students will gain an understanding of how policies are shaped by both facts and myths, as well as our values. Students will examine historical and current trends in family patterns (e.g., divorce, women's labor force participation, nonmarital births) to understand the implications they hold for individuals, families and society. Students will gain an awareness of the social, economic, historical, legal, and political contexts within which family policies exist and are proposed. Although the main focus is on U.S. family policy, some time will be devoted to learning about family policies in other countries. We will learn about several specific family policies in-depth (e.g., welfare), but a final goal is to help students develop a general way of looking at family policy that they can then use to understand any issue of family policy that unfolds throughout their lifetime. This course will foster thoughtful reflection and critical thinking, writing skills, research skills, and skills of synthesis, logic, and argument. Course goals will be accomplished through course readings, writing assignments, lectures, class discussions, debates and group projects. Mastery of course material and student evaluation are assessed in

The Pennsylvania State University
several ways. Students will take a midterm and final exam that cover lectures, class discussions, and assigned readings. Two papers are also required. The first paper is based on an analysis of newspaper articles dealing with family policy issues that students will collect and relate to course materials. The second paper is a literature-based analysis of a family policy in a society outside the United States. Class participation is also essential and its evaluation will be based on a combination of class attendance, contributions to class discussions, participation in group debates and projects, and an oral presentation of the final paper on a non-U.S. family policy.

SOC 445 U.S. Immigration (3) This class examines theories of U.S. immigration and immigrant adaptation, effects of immigration, and policy.

SOC 445 U.S. Immigration (3)
The United States has long been known as a nation of immigrants. People have come for all sorts of reasons, including economic opportunity, political asylum, and religious freedom. Immigration continues to be a fundamental source of demographic and social change today. However, the nature of the changes brought about by immigration will depend on the pathways immigrants and their descendants take as they incorporate into American society. This course is designed to introduce students to theories of immigration, patterns of immigrant incorporation, immigration’s impact on the U.S., and political debates about immigration issues.

Topic to be discussed include:
• Why do immigrants come to the U.S.?
• In what kinds of communities do immigrants live?
• What is the economic impact of immigration on U.S. society?
• What is the social impact of immigration?
• Are new immigrants assimilating?
• What are the problems with current immigration policies and what are the alternative approaches to reform?

General Education: None
Diversity: None
This course addresses an understudied aspect of Jewish experience. It aims to expand our understanding of Jewish communities by focusing on those that are, alternatively, small, situated in out-of-the-way places, culturally outside the Jewish urban mainstream, or embedded in a larger society with markedly different values and traditions. These communities often constitute the points-of-contact between Jews and non-Jews, and in so doing sometimes transform Jews, non-Jews, and the relationships among them. Other such communities constitute experiments in Jewish lifeways and provide mainstream Jews with pilot projects for potential social and cultural change. This course will explore the significance of small, little-known, idiosyncratic, and anomalous Jewish communities on Jewish history and culture, and draw on them to instruct students on the social and cultural processes of small or unusual communities generally. The communities studied will be located both in the U.S. and elsewhere in which Jews have lived as a minority community during modern times. The course will look at the founding, growth, and decline of such communities and at their social processes and institutions. It will explore how to understand and analyze such communities, which vary from one part of
the world to another. The social world of Jewish communities, large and small, is a core interest of Penn State's Jewish Studies Program. This course will complement the current offerings in Jewish Studies, strengthening the social, cultural, and contemporary perspectives available in the Program. It will provide students with an opportunity to explore individual experience and micro-level processes among Jews, and to study the dynamics of identity and survival. It will complement the current offerings in Sociology and Anthropology by affording an opportunity to focus on community-level social processes and by adding a course on contemporary Jewry. The course will integrate knowledge from a variety of sources and fields, promote intercultural understanding, and meet US and IL requirements. Materials will be interdisciplinary, and will include ethnographies, sociological studies, population studies, histories, and personal narratives. They will include primary texts, creative works, and scholarly analyses. The assignments will be structured to facilitate preliminary experience in independent analysis, library research, or field research.

SOC 467 (CRIM 467, CRIMJ 467) Law and Society (3) Law and society studies the social origins of law and legal systems; occupational careers, and decision-making of legal officials.

SOC (CRIMJ/CRIM) 467 Law and Society (3)

(BA) This course meets the Bachelor of Arts degree requirements.

Law and society teaches students’ knowledge of key concepts and core ideas about the role of law in society. The course will cover the basics of key legal philosophies, major social science theories of law and society, research in law and society, the structure of the legal profession, and vital contemporary issues involving the role of law in society. CRIMJ/CRIM 113 and CRIM/CRIMJ 250W are prerequisites. The evaluations methods will include written assignments on course readings, and essay-style exams. Law and Society may be counted toward the credits required for the B.A. and B.S. in Crime, Law and Justice. It would fulfill one of the 400-level requirements in the "Law" component of the major. The course may also be counted toward credits required for the B.A. and B.S. in Sociology for students with the Deviance and Criminology specialization.

SOC 469 Techniques in Small Group Facilitation (1-4 per semester/maximum of 12) This course is the training course for students working as facilitators with the Race Relations Project.

SOC 469 Techniques in Small Group Facilitation (1-4 per semester/maximum of 12)
SOC 469 is an advanced training course for students who have been selected to be facilitators for the Race Relations Project. In this course, students draw on sociological theories and methods to learn how to sharpen their group facilitation skills in order to lead small group dialogues on race relations. The main objective is to learn how to create an ideologically neutral environment in which participants will think critically and speak candidly about their views and roles in race relations. All evaluations are accomplished through "live" observations of students actually facilitating dialogue. In order to be considered for a position as facilitator with the Race Relations Project, a student must successfully complete SOC 119 (Race and Ethnic Relations) and SOC 300 (Preceptorship in Sociology).

There are different learning objectives for students who take SOC 469 the first time as compared to those returning for multiple semesters. The general objectives are as follows:

Semester 1: During the first semester, students develop advanced facilitation skills. In the context of work with the Race Relations Project, this means that they acquire the tools they need to encourage critical thinking, to address complex racial and culture-related subjects and emotions, to lead "ideologically neutral" dialogue, and to more adeptly understand and implement the Socratic Method. At the core of their learning is study of the sociological dynamics of group process.

Semester 2: During the second semester, students develop their social and emotional intelligence as the foundation for implementing successful conversational interventions. The core of their learning involves integrating a more advanced understanding of their own personal cultural identity with more advanced facilitation techniques. In other words, in order to master small group facilitation and group process, students need to explore the nuances of their own personal racial and cultural identities and how these enter into their work as facilitators.

Semester 3: Students stay on for a third semester only if they can clearly articulate the advanced facilitation/observation/interpretation skills learned during the first two semesters in a way that allows them to assume the role of a peer mentor with new facilitators.

A student is only invited back for subsequent semesters of SOC 469 if they have successfully accomplished the learning objectives set forth for each semester.

The method of evaluation is standard for each semester that a student takes the class, and consists of a combined approach that includes: 1) live observations via an audio/video monitoring system and performance goal-setting with instructors and RRP staff (weekly), 2) self-evaluation and personal goal-setting through review of recorded small group dialogue sessions (three times per semester), and 3) personal meetings with course instructors (twice per semester).

For Your Information:

What is the RRP? These are campus wide 90 minute, peer facilitated small groups where trained undergraduate students (former SOC 119 facilitators) help participants explore their personal stories, views, biases and roles in race relations using a version of the Socratic Method. These inquiry-based sessions are designed to discuss the true nature of race relations face to face in an ideologically neutral environment. The conversations are extremely popular with participants (85 percent rate them as valuable and worthwhile) and the number offered each year has grown from 140 to over 800 in just six years. Currently twenty facilitators work for the project, all Penn State undergraduate students.

The RRP Mission Statement:
The mission of the RRP is to create an ideologically neutral environment for dialogue where individuals can voice their true concerns about race relations and begin to address these concerns in a productive and meaningful way.

RRP Philosophy:
Our guiding assumption is that the articulation of one’s viewpoint on an issue is the beginning of greater understanding and knowledge of that subject. And the experience of doing so with others in a group setting creates a kind of synergy that advances critical thinking as well as bridge building.

**SOC 512 (CLJ 512)** Criminological Theories (3) Survey of theoretical and substantive issues in deviance and criminology, with emphasis on critical review of theories.

**SOC (CLJ) 512 Criminological Theories (3)**

This graduate course in Criminological Theories is designed to provide students with a broad understanding of the major theories that have animated the field of criminology since its inception. The course traces the development of criminological theories from the early 20th century to the present and provides students with a targeted exposure to empirical studies that have tested these theories. Major topics covered (and the approximate percentage of time devoted to each) are as follows:

- Images of Crime and Criminals - 10%
- The Chicago School Approach - 10%
- Anomie and Strain Theories - 10%
- Opportunity and Routine Activity Theories - 10%
- Socialization and Learning Theories - 10%
- Conflict Theory and the Social Construction Perspective - 10%
- Criminal Organizations - 10%
- Criminal Careers - 10%
- Gendered Theories of Crime - 10%

This is a required course for both the M.A. and Ph.D. degrees in Crime, Law, and Justice and as such this course occupies a central position in the graduate curriculum. The course is offered once per year, usually during the Fall semester, and typically contains between 6 and 10 students.

Students are evaluated based on (1) the degree of preparation for class discussion; (2) a series of short written assignments (3-5 pages) covering each of the topic areas listed above; and (3) a longer term paper consisting of a theoretical analysis of critique, a critical review of the literature, or a research paper with a strong theoretical foundation. Grades are based on class participation and written work.

**SPAN 513** Acquisition of Spanish as a Second Language (3)

An in-depth analysis of current research carried out on the acquisition of Spanish as a second language. Focus will be on syntax, phonology, lexicon, discourse, and pragmatics. Specific topics covered include the following: null-subjects, clefts; movement and word-order, tense and aspect, mood, agreement features, grammaticalization, modality, negation, functional categories, tutored vs. untutored learners, UG vs. non-UG effects, the Noun Phrase Accessibility Hierarchy, markedness, cohesive devices, speech acts, metaphors, idioms, the lexicon and culture, the phonological systems, including suprasegmentals. In addition to developing an understanding of the current research on the acquisition of Spanish as a second language, students will learn how to read the research literature from a critical perspective and how to read empirical data presented in published research that might result in alternative interpretations from those espoused by authors of published work. This goal will be achieved in two ways: requiring students to submit via e-mail to the professor and other students in the seminar, two- to three-page critiques of assigned readings; oral presentations in class of readings selected by the student(s). Some of the critical reports and presentations will be carried out jointly and others will be done individually. Students will also learn how to design and implement empirical research on the acquisition of Spanish as well as how to write up the results of this research in a potentially publishable research report. Finally, they will have the opportunity to present their research findings to the Penn State applied linguistics community.
in a mini in-house workshop at the end of the course. In preparation for this, time will be set aside near the end of the seminar for students to present and discuss their research with their colleagues in the course. Most of the readings for the course will be preselected by the professor; however, students will also be expected to carry out independent reading of publications not included in the course syllabus and present and critique what they read in the seminar.

SOC (PL SC) 518 Survey Methods I: Survey Design (3)

This course is intended to provide graduate students the background to both evaluate published research using survey methods, and -- when combined with additional training -- to design their own surveys to collect data for their own research. Students will learn the essentials of sampling, questionnaire design, and how surveys may be implemented in different modes: telephone, face to face interviews, mail or other self-administered modes, and the internet. The course will emphasize how decisions of research design have important implications for the validity, reliability, and quantity of data that will be analyzed to answer key questions in the social, behavioral and health sciences. Sample design: 2 weeks; Questionnaire design and item analysis: 2 weeks; Telephone Surveys: 2 weeks; Face to face surveys: 2 weeks; Self administered and mail surveys: 2 weeks; Internet Surveys: 2 weeks; Ethics and human subjects protection: 1 week.

SOC 519 (PL SC 519) Survey Methods II: Analysis of Survey Data (3) Intermediate course on the statistical analysis of survey data: topics include weighting, complex surveys, missing data, and contextual analysis.

SOC (PL SC) 519 Survey Methods II: Analysis of Survey Data (3)

This is an intermediate level course in quantitative analysis. It is intended for graduate students who have completed 1-2 semesters of graduate-level statistics (not general research methods) and who are interested in the application of social statistics to the unique aspects of data collected by way of surveys. Surveys have a combination of qualities that represent challenges to valid inference. These include cluster and stratified sampling, under-representation of some groups due to differential response rates, missing data due to item non-response, cross-sectional design, and coarse measurement. Quite often we use surveys to test theories that the original survey designer did not intend to address, raising issues of validity and reliability of measurement. At the same time, surveys offer a number of opportunities and, when combined with other surveys (pooled cross sections) or merged with contextual data, can address a wide range of theoretical puzzles in the social sciences. This course provides an introduction to techniques in applied statistics that have developed specifically to address the special features of survey data. Examples of such techniques are: use of design weights, post-stratification weights, merging surveys with other surveys or auxiliary data, missing data imputation, challenges of causal inference. The class will blend an understanding of the core statistical issues with an emphasis on acquiring an intuition for the theory underlying the statistical models rather than focusing on proofs and estimation. This will provide a foundation for frequent hands-on applications in this seminar and for enrollment in more advanced or more in-depth courses offered by the Statistics department and the various social science departments.

SOC 524 The Demography of Human Fertility (3) Overview of major issues and methodological approaches in the demographic study of human fertility in developing and developed countries.

SOC 524 The Demography of Human Fertility (3)

This course provides a graduate-level overview of the study of human fertility, one of the three basic demographic processes (i.e., fertility, mortality, migration) emphasized in the field of demography. The first part of the course will focus on the timing and nature of historical and contemporary fertility declines. The major theories that have been set forth to explain why fertility declines occur will be studied, as will empirical evidence that bears on the applicability of the theories to fertility patterns in specific areas of the world. The second component of the course will focus on fertility patterns in the contemporary United States. Theoretical perspectives on the determinants of fertility in advanced industrial countries will be examined. Variation in fertility by race, ethnicity, and various social characteristics will be addressed. In addition, students will learn how to measure fertility with various types of data (e.g., surveys, vital statistics, censuses) and they will be exposed to a variety of research methodologies employed to assess the nature and determinants of fertility patterns. The class will be organized as a seminar. Major requirements are class participation, leadership of one or more class sessions, and completion of a class project. The class project can be an empirical research paper, a research proposal, or a literature review.

This course covers core content that is essential for demographic training. The course has been approved by the Dual-Title Graduate Degree Program in Demography as a core seminar on demographic structure and change; it can therefore be used by students in that program (in addition to students in Sociology) to fulfill the requirements for the degree.

SOC 525 Immigration, Assimilation, and Inequality (3) Examine theories, research, and policies on the incorporation of immigrants and their descendents.
SOC 525 Immigration, Assimilation, and Inequality (3)

Over the last several decades, the diversity of American society has increased substantially as a result of immigration from Latin America, Asia, and other world regions. This has raised numerous questions about the consequences of immigration and the long-term prospects of immigrants and their descendants. The major objective of this course is to provide the foundation for a sociological understanding of the process of assimilation (or incorporation), especially in relation to the structure of opportunities and the reproduction of inequality. This will be accomplished through a survey of contemporary theoretical perspectives, and both quantitative and qualitative studies that evaluate their merits. Although sociology has embraced the study of assimilation since its inception, we will also draw on other disciplines to explore various topics associated with educational attainment, economic mobility, social incorporation, political incorporation, family formation, and ethno-racial identification. Students will be evaluated on the basis of their engagement with weekly readings, as revealed by the quality of their participation in discussions and their written response to weekly essay questions. Students will also be required to write a paper on a topic of their choosing. This paper may be a research proposal, a literature review or a research study. The course will be offered every other year. It may serve as an elective in Sociology and the Dual-Title Graduate Degree Program in Demography as a core seminar on demographic processes.

SOC 526 (H P A 526) Health Disparities (3) This course provides an overview of social factors that lead to demographic disparities in health.

SOC (H P A) 526 Health Disparities (3)

This course provides a broad exploration of U.S. health disparities. In particular, it examines several types of U.S. health disparities that emerge as a result of individuals' race/ethnicity, socioeconomic status, nativity status and gender. The course focuses on theoretical and methodological strategies for studying health disparities as well as empirical evidence supporting the existence of different health disparities and explanations for understanding and ameliorating them. Students will summarize and discuss weekly readings and apply course materials to understand the state of the field and to carry out an original research project on a particular health disparity that interests them. This course fulfills basic seminar requirements in the Sociology graduate curriculum and serves as a process course for the interdisciplinary Demography dual-title graduate curriculum.

SOC 528 Homelessness in America (3) Survey of social science research on homelessness in the contemporary United States.

SOC 528 Homelessness in America (3)

The major objective of Sociology 528 is to introduce students to the scholarly literature on homelessness. Although the course emphasizes work by sociologists, contributions from psychology, political science, geography, history, and other disciplines are covered as well. Through reading, lecture, and discussion, students examine what is known about the origins of homelessness, its dimensions, and its consequences. They are encouraged to evaluate critically the methods used to investigate the problem and the evidence generated by those methods. They are also expected to be active producers of knowledge, independently exploring some aspect of homelessness in greater detail then sharing their results in oral and written form. This combination of activities is designed to underscore the relevance of social science research to important policy issues. Once students complete Sociology 528, they should be well prepared to take part in the ongoing public debate over how best to respond to homelessness in the contemporary U.S.
SOC 529 Seminar in Race and Ethnicity (3) Reviews the status of U.S. racial and ethnic minority groups; analyzes factors influencing inequality and inter-group relations.

SOC 529 Seminar in Race and Ethnicity (3)

The seminar opens with a review of the status of central racial and ethnic minority groups in the United States: African Americans, Latinos, Asian Americans, American Indians. Educational and economic status are considered, along with such factors as family structure, geographical location, residential segregation, language, and involvement with the criminal justice system. Institutional patterns that potentially contribute to observed statuses are reviewed.

Two groups of African Americans receive special attention: the urban “underclass” that sits at the bottom of the socioeconomic ladder and middle class blacks. Consideration of economic stratification by race and ethnicity includes analysis of wealth disparities and the differences in life chances they create. Structural and cultural explanations of economic outcomes are contrasted. Patterns of economic assimilation shown for recent immigrants are outlined, and the notion of “segmented assimilation” is introduced. Economic interdependence among minority groups receives attention. Extensive recent evidence about employment discrimination is reviewed.

The relevance of white Americans’ racial attitudes to political opinions and policy outcomes receives attention in readings that focus on policy issues affecting both African Americans and American Indians. Classic and recent frameworks for understanding prejudice and discrimination are introduced. Patterns observed for African American targets are contrasted with those for Latinos and Asian Americans. Research on the outcomes of intergroup contact is reviewed, along with recent “contextual” studies that assess the influence of community characteristics on racial attitudes.

Racial/ethnic identity is put in the spotlight, with attention to African Americans but also American Indians, West Indian immigrants, Latinos, Asian Americans, multiracial groups, and white Americans. “Pan-ethnicity” is considered.

The seminar is designed to familiarize graduate students in sociology and related fields with central information about the evolving status of racial and ethnic minority groups in the U.S., and with theoretical perspectives developed in sociology and other social science disciplines to understand racial/ethnic prejudice, discrimination, and inequality.
SOC 535 Sociology of Aging (3) Current research and methodological issues in the sociological study of aging.

Effective: Fall 1983

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SOC 537 (HD FS 537) Biosocial Perspectives on the Family (3) The implications of knowledge from behavioral endocrinology, behavior genetics, and evolutionary psychology for understanding family relationships and child development.

SOC (HD FS) 537 Biosocial Perspectives on the Family (3)

Breakthroughs in the way biological variables are measured and modeled have generated new findings that greatly increase our understanding of the reciprocal influences between family relationships, child development, and biological factors. Specifically, advances in the study of hormones, genetics, evolution, pharmacology, and immunology have led to important advances in our knowledge of gender, becoming a parent, early child development, middle child, and adolescent development, parent-child relations, courtship and mate selection, quality of intimate relations, separation and divorce, incest, and dominance and family violence.

Students are required to keep a journal of researchable ideas during the first five weeks of class. The purpose is to give students practice in identifying research needs and opportunities. The journal should include 4-6 research problems, each developed in 2-3 typed pages. The majority of each entry should be a clear statement of what knowledge gains would be realized by conducting the study and why they are important. The remainder of the statement should include consideration of the data you would use, measures of major variables, and analytic strategies. Think of it as a brief portfolio of thesis, dissertation, or research publication ideas.

Entries on research projects in which you are already involved are not eligible for inclusion in the journal. On the last page of the journal, indicate which problem you would like to develop into a more detailed proposal during the remainder of the semester and why. Turn in the journal during week 5. I will evaluate your entries and comment on your selection idea. The rest of the semester will be spent on developing one of the ideas to a full-blown proposal (about 20 pages). You should turn in as many drafts as needed to receive a good grade for this segment of the course. I expect you to turn in three or more before the end of the semester. We will meet about each draft and go over my comments. Proposal drafts should be spaced out over the semester.

The last week of the semester will be devoted to presentations of research proposals after which class members will offer comments and suggestions. Your grade will be based on the proposal draft you turn in the last week of the class. Twenty-one percent of the course grade is based on the research proposal.

SOC 538 (EDTHP 538) Sociology of Education (3) Provides students with an overview of dominant sociological theoretical perspectives on schools, schooling, and education in modern society.

SOC (EDTHP) 538 Sociology of Education (3)

This graduate course in the Sociology of Education covers the major sociological theories and empirical research on the role of formal education in society. The object of the course is to have the student become conversant with the main lines of sociological research applied to education and social development at the individual, community, and societal levels. Since sociology of education has had considerable impact on educational policy over the past 50 years, a second goal of the course is to understand this relationship and avenues for future research and policy analysis from a sociological perspective. This course is a central topic in the general study of social stratification and hence in pursuit of the Ph.D. in the Educational Theory and Policy and the Sociology program. The format of the course is a didactic seminar with extensive written assignments as the usual form of evaluation.

**SOC (CI ED, EDTHP, HI ED) 553 Educational Mobility in Comparative Perspective (3)**

Sociologists interested in higher education have attended to the relationships between postsecondary institutions and other institutions, as well as the impact on higher education of general social and demographic processes. Many of the classical ideas in sociological theory, including those of Max Weber and Emile Durkheim, have surfaced in recent debates over the nature of higher education. Sociologists in the U.S. have explored such questions as: the gatekeeping function of higher education; the impact of universities on stratification; and the socializing environment for women and minorities. This seminar introduces some of the classical theorists and contemporary researchers of the sociology of higher education. All seminar participants will be required to write a sample research proposal, based on the readings from the seminar.

**SOC 560 Urban Sociology (3)** Examination of the structure and dynamics of North American cities and of residents' experiences in such settings.

**SOC 560 Urban Sociology (3)**
The major objective of Sociology 560 (formerly 597F) is to survey the field of urban sociology, providing graduate students with a solid grounding in the literature on North American cities. The course heavily emphasizes recent writings by sociologists. However, the historical development and continuity of the major questions that have guided urban research receive more than passing attention, as do the contributions of geographers, psychologists, and others outside the discipline. A broad range of theoretical perspectives, substantive topics, and methodological strategies are through reading, lecture, and discussion. Students are expected to be active, critical consumers of urban knowledge but also producers of it: they must independently formulate and address a research problem then share their results with their classmates. Once students complete Sociology 560, they should be ready to enroll in more specialized urban seminars and to teach urban sociology at the undergraduate level.

**SOC 573 Demographic Techniques (3)** Models and measures of vital processes (fertility, mortality, migration) and their effects on growth and age structure of human populations.

**Demographic Techniques (3)**

**SOC 574 Statistical Methods for Social Research (3)** Basic concepts of statistics; linear regression; computer software; analysis of social surveys; causal inferences from nonexperimental data.

**Statistical Methods for Social Research (3)**

**SOC 575 Statistical Models for Nonexperimental Research (3)** Causal models for quantitative and qualitative data; path analysis and structural equations; logistic regression; duration models.

**Statistical Models for Nonexperimental Research (3)**

**SOC 576 Applied Mathematical Demography (3)** Survey of mathematical models used in the study of population: models
of growth, survivorship, fertility, migration, stability, kinship, projection.

**SOC 578 Multilevel Regression Models (3)**  
Covers multilevel regression models for the analysis of nested or hierarchical data, including both contextual and longitudinal applications.

**SOC 578 Multilevel Regression Models (3)**

This course is devoted to statistical models for regression analysis of multilevel data. Multilevel data arise when cases are sampled at two or more levels, with each lower level subsumed within the next higher, such as residents within neighborhoods within cities or individuals within families. Such data almost always violate the independence assumption of ordinary least squares regression, and in recent years a wealth of more appropriate techniques have become available. These methods bring the full flexibility of multiple regression analysis to the analysis of multilevel data, enabling scholars to address a broad range of research questions. This course thoroughly covers the basic multilevel regression model and also devotes considerable time to more advanced topics such as analysis of data with three or more levels, multilevel analysis of discrete dependent variables, and latent variables. Students will study examples in a broad range of substantive domains, with special attention to the unique research questions to which these methods give access. This is a course in the application of statistics to social science research, not a theoretical statistics course. Therefore the course will not include derivations and proofs, but rather the mathematics covered will be in the service of defining statistical models that correspond to useful research questions. The emphasis will be on understanding how to use these methods to do good research and on learning to interpret the results they provide. Several class sessions will be held in computer laboratories in order to train students in the use of statistical software that implements these methods.

**SOC 579 (ANTH 579) Spatial Demography (3)**  
This graduate course will expose students to spatial analysis tools and analytical methods applied to demographic research.

**SOC (ANTH) 579 Spatial Demography (3)**

The improved application of spatial data and methods to demographic research is a critical methodological challenge facing demographers today. This graduate seminar is designed to focus on substantive demographic research topics while exposing sociologists and demographers to challenges in, and opportunities for, using geographic information systems (GIS), spatial analysis, and spatial statistics in their own research. Substantive foci will include readings and discussions of spatial perspectives on topics such as racial/ethnic segregation, spatial mismatch/entrapment, poverty, crime/delinquency, migration, health inequalities, wellbeing, maternal and child health, environmental justice, and population and environment relations. Similarly, the seminar will highlight connections between spatial concepts and data availability (e.g., Modifiable Areal Unit Problem - MAUP; data privacy), other emerging methodological approaches to studying society (e.g., contextual modeling, multi-level modeling and the area of neighborhood effects) as well as the integration of different types of data (e.g. qualitative data and quantitative data). Throughout the course lectures and discussions will be complemented with lab sessions introducing spatial analysis methods and GIS and spatial analysis software. The lab sessions will include the use of among other software GeoDa, CrimeStat, R, and ArcGIS (including Geostatistical Analyst and Spatial Analyst extensions). These lab sessions will introduce many methodological and technical issues relevant to spatial analysis (e.g., error, data validation, data integration, cartography, exploratory spatial data analysis, spatial regression modeling, geographically weighted regression, point pattern analysis and geostatistics). Assignments for the courses include up to two writing assignments, up to four lab assignments, and a final project which will be presented as a short 15-minute presentation as well as submitted as a term paper. The writing assignments will include an annotated bibliography/brief literature review within a selected demographic theme area and a profile of a location.
well-known demographer and their adoption of spatial thinking/perspectives/methods. The lab assignments will focus on building geospatial databases, basic spatial analysis, exploratory spatial data analysis, and spatial regression modeling. The courses will include other labs and assignments that will be completed for no grade; these are intended as mechanisms/opportunities for developing and enhancing familiarity with selected software, data resources, and analytic methods.

**SOC 592 Writing for Publication in the Social Sciences (3)** Systematic, collective review of unpublished student manuscripts with an eye toward revision for publication.

**SOC 592 Writing for Publication in the Social Sciences (3)**

The overarching goal of the course is to prepare relatively advanced Ph.D. students to write effective journal articles, books, and grant proposals. The course emphasizes learning by doing. We begin by reviewing reviews of anonymous manuscripts that have been submitted to journals for possible publication. We ask four key questions about each article: What do we like about the manuscript (strengths)? What do we dislike (weaknesses)? What suggestions do we have - substantive and stylistic - for revising the manuscript? Is it published? Class discussion is organized around those questions. Then we use the same format and tools to critique unpublished student manuscripts. We discuss each manuscript with a view to answering the question of how the manuscript needs to be revised to make it publishable. Finally we read key articles on the differences between journal writing, book writing, and the writing of grant proposals. Again students are given hands-on experience by reviewing book prospectuses and grant proposals. The course is designed to be a core course in the Sociology Department's Professional Development Module for Ph.D. students. The
specific goals of the course are: A publishable paper - or at least concrete suggestions for how to make a student manuscript publishable, or book precis competitive, grant proposal fundable. A better understanding of how the review process works - what happens after you submit your paper, precis, or research proposal; what to expect from the editor's decision letter. A better understanding of what editors and reviewers are looking for in a journal manuscript, book precis, or grant proposal, and a better understanding of how to respond to reviewers' criticisms when you are invited to resubmit a manuscript or grant proposal. Good reviewing skills - what a good review looks like, and how to go about writing one. An expansion of students' intellectual horizons through exposure to different substantive areas, methodologies, and styles of work. Students will be evaluated on the basis of their written reviews due each week. The course will be offered at least twice every three years. Course enrollment should be limited to 12, to enable full in-class discussion of each student's manuscript.

SWENG 411 Software Engineering (3) Software engineering principles including life cycle, dependability, process modeling, project management, requires specification, design analysis, implementation, testing, and maintenance.

SWENG 411 Software Engineering (3)

This is an introductory course in software engineering, addressing the software development process, including aspects such as software requirements documentation, design specification, implementation, system integration, testing, and maintenance by individuals and teams. Topics include software process modeling, requirements elicitation and documentation, software architecture design and analysis, detailed design and programming, graphical user interface (GUI’s) design and prototyping, software quality assessment, software testing, software maintenance and evolution management, personal and team-based development. In lab students gain practical experience by completing programming assignments and utilizing computer-aided software engineering (CASE) tools for their personal projects tailored to each stage of the software life cycle. A semester long team-based project is required that reinforces teamwork fundamentals and the concepts covered in lecture. The projects and assignments provide an opportunity for student teamwork, document writing, and oral presentations.

The Pennsylvania State University
SWENG 421 Software Architecture (3) The analysis and design of software systems using canonical design patterns.

This course introduces the frequently-used software infrastructures in software development by experienced engineers. The formal UML notations are utilized to design software architecture and help communicate the design visually.

Students will learn the real practice of architectural styles, design patterns and design reuse. As to certain complex problems, alternative architectures will be proposed and their design trade offs will be evaluated. For instance, students compare two-tier with three-tier client/server architectures for distributed systems, and employ multi-process and multi-thread concurrent architectures for high performance computation systems. Moreover, students learn to conduct high level quality analysis from the design artifacts. The quality evaluation will focus on a number of attributes, including reusability, extendibility and performance.

A great deal of effort is placed on the major categories of design types containing dozens of separate design patterns. Students first review the most fundamental design patterns. Afterwards, they apply creational patterns to effectively create objects, partitioning patterns to categorize objects, structural patterns to allocate objects, behavioral patterns to interface the communication between objects, and concurrent patterns to handle tasks simultaneously. These skills will enable students to extend their own knowledge after graduation by giving them the skills to learn new patterns on their own.

Finally, students will integrate their programs with native code applications to enlarge the application domains. To achieve best reusability, they also learn modular designs to develop component-based software. These help them meet today's software needs of cross applications and architectures.

SWENG 431 Software Verification, Validation, and Testing (3) Introduction to methods of software verification, validation, and testing; mathematical foundations of testing, reliability models; statistical testing.

SWENG 431 Software Verification, Validation, and Testing (3)

Provides a background necessary for verification, validation, and testing of software systems. Verification addresses the question: "are we building the product right?" In other words, does the product meet the engineering specifications? Validation addresses whether the right product is being built and if it meets the design requirements. The testing aspect of the course addresses many of the methods available to test software systems. The levels of testing explored are 1) unit level (each module is tested independently), 2) integration testing (where the modules are integrated together and tested as a complete system), and 3) acceptance testing (the testing requirements of the users). Following this, specific test methodologies are addressed. By the end of this course the student should also be able to develop an appropriate test plan.

SWENG 452W Embedded Real Time Systems (3) The design and implementation of real time systems.

SWENG 452W Embedded Real Time Systems (3)

Real time operating systems is the study of hardware/software systems in which timing constraints must be met for correctness. Real time systems are embedded in applications ranging from the antilock brakes in cars to the flight control systems for jettliners. Students are first introduced to the concept of systems with real time constraints by examining case studies. The unified modeling languages (UML) with real time extension is introduced allowing students to capture the constraints present in the systems in a variety of models allowing the problem to be described at several levels of abstraction. Tasks and messages are introduced as programming structures which can satisfy the constraints described by the UML models. With a basic understanding of real time systems and how to implement them, the focus of the course shifts away from these technical concerns towards understanding the documentation of the requirements using the Volere Requirements Specification template. All the writing assignments in the class will revolve around Volere in one way or another. Increasingly complex case studies will give the class the opportunity to explore more sophisticated inter-task communications mechanisms as well as common pitfalls present in RTOS applications. Students will learn how to verify the correctness of their applications in order to guarantee that the real time constraints can be met when the system is deployed. Discussion will turn to application programmer interfaces used by hardware vendors to port hardware into a RTOS. The class will end by designing and building a complex RTOS by a team of students using the techniques learned in

The Pennsylvania State University
the class. The project will outline the needs of the RTOS application in a project proposal using the Volere template. The proposal will be developed iteratively with the faculty member until its scope and definition are clear. This proposal will be developed into a complete requirement specification including a time-line and identification of development benchmarks. This system resulting from the development will be documented in the final report write-up.

SWENG 480 Software Engineering Design (3) Concepts of engineering ethics, economy, and project management, senior capstone project selection, and technical communication skills.

SWENG 480 Software Engineering Design (3)
This course prepares senior software engineering students for industrial engineering design and project management. It covers the engineering design process, project planning and evaluation, engineering ethics, and engineering economy. In addition, students select, specify, and start their capstone design project, which is completed, in the follow-up course, SWENG 481. Students are expected to carry out a group design project that is on par with industrial expectations. Upon completion of this course a student should have a solid understanding of the engineering design process, a clear capstone project description, should have completed some preliminary design work, and be adequately prepared to complete the project in SWENG 481.

SWENG 569 Service Oriented Architecture (3) The principles of service oriented architecture; modeling, design and implementation of services; mapping business processes to services.

SWENG 569 Service Oriented Architecture (3)

Service-Oriented Architecture (SOA) is a design principle for guiding the design, development, deployment, and sustaining of flexible and agile IT solutions. SOA has become increasingly viable because of the widespread adoption of Web services technology that makes creating SOA practical and cost effective. SOA essentially makes IT agile, interoperable, and more responsive.

This course is structured to be appropriate for graduate students in software or systems engineering, or information science. Many of the topics covered in this course may be applied to a wide variety of research areas. Usually this course would cover the following topics: 1) Model, design, and implement SOA; 2) Create agile and reusable SOA; 3) Automate business processes by mapping to the architectural model; 4) Orchestrate services and execute processes with the Business Process Execution Language (BPEL); 5) Achieve interoperability within SOA using proven design patterns and/or best practices; and 6) Implement loosely coupled services using WSDL-first techniques.

Students will be evaluated on their understanding of the course material by completing one examination (20%), weekly assignments (40%), and an individual project with presentation (40%).

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SWENG 586 Requirements Engineering (3) Theory and applications of requirements elicitation, analysis, modeling, validation, testing, and writing for hardware and software systems.

SWENG 586 Requirements Engineering (3)

This course is a thorough treatment of the theoretical and practical aspects of discovering, analyzing, modeling, validating, testing and writing requirements for systems of all kinds, with an intentional focus on software-intensive systems. The course will bring to bear a variety of formal methods, social models, and modern requirements writing tools (e.g., the UML) to be useful to the theorist and practicing engineer.

Students will be led through a series of weekly activities that culminate in the delivery of a complete software requirements specification project for a hardware/software system (first in draft, then in final form). The project is broken down into four subprojects, Requirements Elicitation, Requirements Analysis and Representation, Requirements Validation and Testing, and Final Requirements Documentation, each of which counts 25% toward the final grade.

The course can be used as an elective in the Master of Software Engineering (M SE) program and, it is a required course in the online Systems Engineering (M.Eng.) program.

The Pennsylvania State University
SWENG 587 Software Systems Architecture (3) Software systems architecture; architectural design principles/patterns; documentation/evaluation of software architectures; reuse of architectural assets through frameworks/software product lines.

SWENG 587 Software Systems Architecture (3)
Architecture is an abstract view of a software system distinct from the details of how such a system is implemented. A robust architecture is key to developing software systems that meet quality expectations (such as performance, scalability, availability, maintainability, etc.) of their stakeholders. This course introduces basic concepts of software architecture, architectural design principles, and patterns. Students also learn how to document and evaluate software architectures, and reuse architectural assets through software product lines.

This course is structured to be appropriate for graduate students in software or systems engineering. Many of the topics covered in this course may be applied to a wide variety of research areas.

Students will be evaluated on their understanding of the course material by completing one examination (25%), weekly assignments (35%), and an individual project with presentation (40%).

SWENG 588 Program Understanding (3) Techniques for the analysis and visualization of large software systems to assess the quality of the design and architecture.

SWENG 588 Program Understanding (3)
It is a general observation that software engineers learn about software design, programming languages, paradigms, patterns and tools, and are expected to produce high quality designs and code, often without ever having seen good examples. This approach is akin to teaching students the syntax of the English language and writing techniques and then expecting them to become expert writers without ever having read great literary works. The course in Program Understanding seeks to educate graduate software engineering students beyond their understanding of code syntax and best construction practices with analytical evaluation of "great works" of software code. This approach includes manual code reading, the use of visualization techniques, and automated approaches to assessment of design and code quality.

SWENG 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Colloquium (1-3)

**SWENG 826** Applied Human-Computer Interaction (3) Evaluate and design interactive products that support how people work and communicate from both a theoretical and practical perspective.

**SWENG 826 Applied Human-Computer Interaction (3)**

This course introduces the student to the broad area of human-computer interaction. Emphasis is placed on applying theories and techniques to the evaluation and design of software-based products that are both useful and usable. Students will gain an understanding of these concepts primarily by analyzing existing interfaces and developing prototypes. Students will be exposed to the challenges of usability testing through review of published studies and by developing a usability study design.

Objectives:
The course objectives are for Information Science professionals and software engineers to:
1. Identify examples of positive and negative user experiences in both everyday life and the work environment
2. Gain an overview of HCl theories, principles, and guidelines
3. Learn ho to design for usability
4. Learn how to incorporate usability design into the software development process
5. Use usability principles to evaluate and compare software-based products
6. Learn how to effectively test for usability

Performance will be evaluated through projects where students will apply what they have learned to design and evaluation problems.

It is anticipated that this course will be offered once every year with expected enrollment of 20 students per offering.

SOILS 402 Soil Nutrient Behavior and Management (3) Chemical and biological behavior of soil nutrients; management for plant availability and fate in the environment. Laboratory emphasizes soil testing and soil-plant relationships.

SOILS 402 Soil Nutrient Behavior and Management (3)

Soil Nutrient Behavior and Management is a senior/graduate level course that covers the chemical and biological processes that determine the behavior of essential plant nutrients in soils. As this understanding of basic nutrient behavior is developed in the course, it is applied directly to explain the basis for management of nutrients for optimum plant availability. This same nutrient behavior is linked to the fate of nutrients either applied as sources of plant nutrition or through disposal of nutrient containing materials on soils, which is a major environmental issue. Management practices necessary to minimize environmental impacts from nutrients are also covered. From this background students will be able to understand nutrient behavior and management recommendations and adapt management to a variety of soil-plant systems and situations both for plant growth and environmental protection. Real world examples of developing and adapting management systems are used to illustrate this process. The laboratory exposes the student to common soil testing procedures, methods for studying soil nutrient-plant interactions, and examples of practical application of management practices in the field. Evaluation will be based on 3 exams, laboratory reports, homework assignments.

SOILS 403 Soil Morphology Practicum (2 per semester/maximum of 4) Students develop field skills to describe soil morphology, classify soils, and make land use interpretations.

SOILS 403 Soil Morphology Practicum (2 per semester/maximum of 4)

SOILS 403 is an eight week course that provides students with the opportunity to: make detailed soil morphological descriptions and interpretations; evaluate soil properties and their suitability for different land uses; and observe various soils throughout the Northeastern U.S. SOILS 403 synthesizes techniques used to describe soil morphology and site characteristics, classify soils, and make land use interpretations. The field skills taught are highly applicable to those pursuing careers in fields of environmental studies, engineering, waste disposal, horticulture, landscape architecture, agricultural, forestry, consulting, and by those describing soils for research. Students also have the opportunity to try out for the Penn State Undergraduate Collegiate Soil Judging Team each fall.
SOILS 404 Urban Soils (3) This course introduces the student to natural and human-influenced soils.

This course introduces the student to the management of soils in urban and suburban settings via comparisons in soil physical, chemical, and biological properties. The soil is also examined as the interface between the biotic and abiotic components of an urban site. Therefore, site management of soil during or following placement is examined in detail. Urban soil physical and chemical properties are discussed in terms of site stability. The interactions between stormwater management, erosion control, soil mechanics, and the soil’s ability to support vegetation are examined in the context of sustaining urban environments. The soil design process is presented: site assessment, biophysical analysis, profile construction, specification formulations, and conformance testing and inspection protocols. Professional practical examples such as mine reclamation, brown field restoration, and landscape construction are presented to illustrate the process. The student completes a series of exercises to gain experience in soil examination, soil/land use interpretation, site assessment, soil erosion calculations and a group assignment that evaluates soil issues on a reclamation or construction project.

SOILS (GEOSC) 405 Hydropedology (3) Soil and water interactions across scales, integrated studies of landscape-soil-water relationships, fundamental processes of water flow and chemical transport.

Hydropedology is the study of the fluxes, storages, pathways, residence times, and spatio-temporal organization of water in the root and deep vadose zones, and their relations to climate, ecosystem, land use, and contaminant fate. The aim is to characterize integrated physical, chemical, and biological processes of soil-water interactions across scales (including chemicals and energy transported by water flow). This course embraces interdisciplinary and multiscale studies of interactive pedological and hydrological processes in the earth’s surface and subsurface environments. The course will address the fundamental issues and practical applications of hydropedology (as a sister discipline of hydrogeology). This course emphasizes in situ soils that have distinct characteristics of pedogenic features, structures, layers, and soil-landscape relationships in the real world. Students will gain an in-depth understanding of soil and water interactions across scales from point observations to watershed phenomena, and will gain skills in predicting flow pathways and water fluxes in the landscape. This course promotes active learning, critical thinking, and hands-on skills. Course format will consist of two lectures and one laboratory/field exercise each week. The course will utilize a network of local watersheds with different land uses for demonstrations and class projects. Grading will be based on weekly lab/field exercise (20%), class research project (40%), homework (10%), one midterm exams (15%), and one final exam (15%). Since hydropedology is linked to a wide array of environmental, ecological, geological, agricultural, and natural resource issues of societal importance, SOILS (GEOSC) 405 will support interdisciplinary training of students in Soil Science as well as in other disciplines of the College of Agricultural Sciences, especially Agricultural and Biological Engineering, Agronomy, and Forest Resources. Students in the College of Earth and Mineral Sciences, College of Engineering, Eberly College of Science, and the Intercollege Graduate Degree Program in Ecology also will find this course useful when undertaking research on the vadose zone, the hydrologic cycle, and the earth system.

SOILS 412W Soil Ecology (3) Introduction to soil organisms; includes interactions between organisms, their processes, and metabolism with a major focus on microorganisms.

The Pennsylvania State University
SOILS 416 Soil Genesis, Classification, and Mapping (4) Lecture and laboratory course on the genesis of soils, their classification, mapping, and interpretation for land use.

SOILS 416 Soil Genesis and Classification (3)

The study of soil genesis, classification, and mapping examines the evolution of soils, their organization into natural units, and their distribution throughout the world. Physical, chemical, and morphological soil characteristics are studied both in the field and classroom and then used to classify soils. These classification units are in turn used to study the processes that influence soil development. Students acquire a detailed knowledge of the technical terminology of soil genesis and develop observational and analysis skills needed to describe and/or interpret soil morphologies in the context of the landscape a profile is found in. Students learn to recognize and explain soil genetic pathways due to current or past soil forming periods (as affected by climate change for example). Students also evaluate the effect of soil genesis on land use and management decisions, learn how to map soils at multiple scales, and deliver soil mapping information.

The course is comprised of weekly lectures and a laboratory. Exercises in the field and laboratory are designed to further develop a student's ability to ascertain a natural soil's origin using the five soil forming factors. Field skills that will be refined over the course of the semester include profile description, site description, soil mapping, and measurement and characterization of soil physical and chemical properties.

Upon completion of SOILS 416, students will demonstrate: 1) deep understanding of fundamental soil processes that result in the genesis of soils around the world; 2) familiarity with soil analytical and testing protocols for common laboratory and field measurements used in studying the genesis of soils; 3) skills for interpreting soil profiles from the soil orders of the world; 4) accurate prediction of soil genesis pathways for a given landform; 5) the ability to interpret soil profile physical and chemical data, classify a soil according to US Soil Taxonomy, map soils to an order 1 level, and be able to apply soil profile information as gathered from the US Soil Survey program to make land use interpretations.

SOILS (AGECO/AN SC) 418 Nutrient Management in Agricultural Systems (3)

Nutrient Management in Agricultural Systems is a senior level course that applies the fundamentals of animal and plant, sciences to the concept of a nation-wide food animal system. The regional concentration and consolidation of animal production enterprises has resulted in important economic savings for consumers. But these changes have also had some detrimental impacts on the environment. For example, some nutrients such as calcium and phosphorus and certain trace elements are mined, while others such as nitrogen and potassium are derived from crop production systems. In all cases, the nutrients are transported to areas of livestock concentration. A small portion of the nutrients leave the farm in the form of animal products, while 60 to 70% of the nutrients are excreted and applied to nearby crop land. The environmental implications of the net influx of these nutrients to livestock producing communities have only recently been recognized. These concepts will provide the background around which regulations are written and sound nutrient management strategies are developed and implemented.

SOILS 419 (GEOSC 418) Soil Environmental Chemistry (3) Introduction to chemical constituents and processes occurring in soils. Topics include mineral weathering, soil solution chemistry and adsorption of solutes.

SOILS 419 (GEOSC 418) Soil Environmental Chemistry (3)

Upon completion of the course, the students will be able to identify the soil components and properties responsible for the chemical reactivity of soils and will know the fundamental chemical processes that occur in soils. The students will also be able to link theoretical concepts to real life environmental problems.

General Education: None
SOILS 420 Remediation of Contaminated Soils (3)

Remediation of contaminated soils is an introduction to the basic principles and techniques of remediation. Upon completion of this course, students will be able to determine what type of remediation technology needs to be used in real-world conditions depending upon the chemical nature and extent of contamination and learn about protocols for soil sampling and leach testing. They will learn about regulatory background and many different types of wastes that will be encountered in contaminated soils. Students gain knowledge of various cationic and anionic species of metal contaminants and how best to fix these using chemical fixation and solidification technique, which is an established remediation technology. In addition, they will learn about other established technologies such as on-site and off-site incineration and innovative technologies such as bioremediation, phyto-remediation, vacuum extraction, thermal desorption, soil washing, solvent extraction, ex-situ supercritical oxidation, in-situ vitrification etc. They will be able to determine which technology is cost-effective for a particular contaminated soil. Students are evaluated through written testing of their understanding of basic remediation concepts and an oral presentation about a novel remediation technology through literature search. Soils 420 has no laboratory component.

SOILS 422 Natural Resources Conservation and Community Sustainability (3)

SOILS 422 provides the student with practical knowledge of community and natural resources conservation. The course covers symbiotic aspects of soil, water, air, plants, animals, and humans and their impact on the community. The course focuses on developing methods for the conservation and sustainable use of resources. This involves understanding the land ethic and developing a sense of place.

Conservation awareness has grown in recent years. Originally, erosion control was the sole reason for conservation planning. Eventually water conservation also became a concern addressed by planning. We have now moved into an era of ecosystem-based planning, where soil health, water and air quality, sustainable communities, and much more are considered in conservation planning. This planning involves both natural and human resources.
SOILS 422 covers understanding, designing, and developing best management practices (BMP's) for addressing resource conservation and maintaining sustainable farmland and communities. Calculating runoff and soil loss are researched and integrated into conservation planning as tools for establishing the need for BMP's.

Resources and technologies are covered, such as soil surveys, geographic information systems (GIS), global positioning systems (GPS), and ground penetrating radar (GPR). Networking and partnerships are also covered to give the student a practical knowledge of the critical nature of teamwork. Additionally, workings and interactions between federal, state, and local organizations and agencies are explored.

Land-use patterns, such as urban and suburban sprawl, mining, logging, and resource utilization are explored. Education is enhanced in the form of a community/sense of place project. This project utilizes classroom knowledge and incorporates student research into a practical plan for developing an appreciation and awareness for ones community.

Throughout the course the various aspects of soil, water, air, plants, animals and humans are woven together to emphasize the importance of all decisions on the ecosystem. After completing SOILS 422, the student will be equipped to make valuable and educated decisions to positively affect the community.

At the end of the course the student will be able to evaluate effects of human activities on the landscape; make sustainable land use decisions; determine the need for, and design best management practices; and develop a sense of place and describe individual roles and responsibilities in the community.

**SOILS 502** Soils Properties and Functions (3) Introduction to soil science for graduate students including fundamentals of and applications to plant production and environmental sustainability.

**SOILS 502 Soils Properties and Functions (3)**

This course provides an introduction to soil science, emphasizing the three areas of biological, chemical and physical
properties of soils. It is intended as an introductory course in soil science for graduate students whose work would benefit from background knowledge of soil science but who have not previously been exposed to the science of soils as an undergraduate.

As a graduate course, the pace of learning will be rapid, and the material covered will be quite comprehensive. The breadth of material is comparable to that covered in an undergraduate introduction to soil science, but with greater depth. The class will incorporate a substantial level of experiential components, including chemical analysis lab practice overview, some labs for gaining insight into physical properties, and field trips to help students gain an appreciation of how soils are influenced by, and also influence, the landscape in which they exist. Landscape visits with guided discussions, research proposal development and analysis, and selected soil management problem analysis provide students opportunities to synthesize classroom and textbook based material. Students will be evaluated based on quizzes, exams and written assignments.

**SOILS 512 Environmental Soil Microbiology (3)** Biology and ecology of microorganisms in terrestrial environments; microbiological and molecular analysis methods; microbial processes in carbon and nitrogen cycling.

**SOILS 512 Environmental Soil Microbiology (3)**

Environmental Soil Microbiology (SOILS 512) examines the major groups of microorganisms and their processes and interactions in terrestrial systems, with an emphasis on carbon and nitrogen cycling. Students will obtain an overview of the biology, ecology, and functions of bacteria, archaea, and fungi in soils, rhizospheres, sediments, and organic wastes. This course is intended for students interested in spatial and temporal distribution and activities of microorganisms in the environment, as well as in appropriate methods for analyzing microbes in environmental samples. Course format will consist of two weekly lectures, each followed by a 25-min discussion period. Class discussions will include exercises and reviews of recent literature on classical and molecular soil/environmental microbiology. Grading will be based on participation in class discussions (20%), two midterm exams (20 % each), one final take-home exam (20%), and a 10-page research proposal to be presented to the class in late April (20%). SOILS 512 will support interdisciplinary training of graduate students in Soil Science as well as in other disciplines of the College of Agricultural Sciences, especially Plant Pathology, Horticulture, Entomology, and Agricultural and Biological Engineering. Graduate students in the Intercollege Graduate Degree Program in Ecology (IGDPE), College of Earth and Mineral Sciences, Eberly College of Science, and College of Engineering also will find this course useful when undertaking research on systems involving microorganisms (e.g., biogeochemistry, plant or animal systems, or environmental engineering). Course will be offered every other spring semester with an anticipated enrollment of 20 students per class.

SOILS 571 Ecosystem Nutrient Cycles (3) Ecological theory and applications related to water, carbon, nitrogen, phosphorus, and cation cycling in managed and unmanaged terrestrial ecosystems.

SOILS 571 Ecosystem Nutrient Cycles (3)

This course is designed to benefit basic and applied environmental scientists that want to understand how nutrients cycle in terrestrial ecosystems. Students will develop knowledge of the biologically important nutrient cycles in terrestrial ecosystems, including linkages between nutrient cycling and energy (carbon) and water flow. The material covers the major theoretical advances in ecosystem ecology and applications of ecosystem theory to environmental management and problem solving. The water, carbon, nitrogen, phosphorus, and nutrient cation cycles will be covered. For each nutrient, inputs, outputs and internal cycling in plants and soils are discussed. Class time will include a mixture of lectures, discussions of primary literature and case studies, and group projects. Each student will write a paper on a topic related to their research that will be reviewed by student peers. Field and laboratory experiences will expose students to methods used by ecosystem ecologists. Students will complete the class with an understanding of: (1) classic and contemporary theories of nutrient cycling at the ecosystem scale, 2) variability in nutrient cycling among the major unmanaged and managed ecosystem types, 3) ecosystem responses to natural disturbance and human management, and 4) common and cutting-edge methods of ecosystem analysis.

SPAN 513 Acquisition of Spanish as a Second Language (3) Analysis of research on the acquisition of syntax, phonology, lexicon, discourse.

SPAN 513 Acquisition of Spanish as a Second Language (3)
An in-depth analysis of current research carried out on the acquisition of Spanish as a second language. Focus will be on syntax, phonology, lexicon, discourse, and pragmatics. Specific topics covered include the following: null-subjects, clefts; movement and word order, tense and aspect, mood, agreement features, grammaticalization, modality, negation, functional categories, tutored vs. untutored learners, UG vs. non-UG effects, the Noun Phrase Accessibility Hierarchy, markedness, cohesive devices, speech acts, metaphors, idioms, the lexicon and culture, the phonological systems, including suprasegmentals. In addition to developing an understanding of the current research on the acquisition of Spanish as a second language, students will learn how to read the research literature from a critical perspective and how to read empirical data presented in published research that might result in alternative interpretations from those espoused by authors of published work. This goal will be achieved in two ways: requiring students to submit via e-mail to the professor and other students in the seminar two- to three-page critiques of assigned readings; and oral presentations in class of readings selected by the student(s). Some of the critical reports and presentations will be carried out jointly, and others will be done individually. Students will also learn how to design and implement empirical research on the acquisition of Spanish as well as how to write up the results of this research in a potentially publishable research report. Finally, they will have the opportunity to present their research findings to the Penn State applied linguistics community, in a mini in-house workshop at the end of the course. In preparation for this, time will be set aside near the end of the seminar for students to present and discuss their research with their colleagues in the course. Most of the readings for the course will be preselected by the professor; however, students will also be expected to carry out independent reading of publications not included in the course syllabus and present and critique what they read in the seminar.

Special Education (SPLED)

SPLED 400 Inclusive Special Ed Foundations: Legal, Characteristics, Collaboration, Assessment, and Management (4) Legal issues, learner characteristics, collaboration skills, assessment, and behavior management related to educating students with disability in inclusive settings.

SPLED 400 Teaching Exceptional Students in General Education Settings (4)

This course is delivered via a model of blended instruction and addresses foundational skills (assessment and management) and knowledge (laws, etiologies, collaboration) for those working with students with special education needs in general education classrooms. Almost 30% of the content includes student understanding of the history and current relevance of special education law; roles and responsibilities of general education teachers in providing services to students with special education needs; characteristics and etiologies relevant to providing effective instruction to students with mild and severe disabilities; and developing and maintaining effective education teams. Roughly 35% of content is relevant to assessment in inclusive settings and is centered on sound instructional decision making as well as linking instruction to standards based curricula. Coverage includes understanding formative and summative assessment; creating and administering curriculum-based assessments in reading, mathematics, and writing; designing systems to collect behavioral data; interpreting a variety of norm-referenced test scores; using brief experimental analyses is adequate for a given purpose. Roughly 35% of content is relevant to applying principles of Applied Behavior Analysis (ABA) to managing and motivating learners with special needs placed in inclusive settings. Broad objectives include student acquisition of knowledge and skills related to ABA principles and interventions such as: identifying the nature (positive and negative) of consequences maintaining or decreasing specific behaviors; operationally defining behavior; establishing a classroom and school environment conducive to learning for all students; creating class-wide, school-wide; and individual motivation systems; intervening to decrease specific behavior; and using functional behavioral assessments (FBAs) and positive behavior supports.

SPLED 403A Evidence-Based Instruction for Elementary Students with Disabilities in Reading, Math, and Writing (3)

Evidence-based methods for design, delivery, and adaption of instruction for elementary students with disabilities in reading, mathematics, and writing.

This course is delivered via a model of blended instruction and addresses aspects of designing, delivering, and adapting instruction for students across the range of disability (i.e., mild, moderate, and severe) in elementary, inclusive settings. Content on relevant learner characteristics of special needs students is found throughout the course. About half the course covers content on: designing direct and explicit instruction; self-regulated learning; assistive technology; adaptations and accommodation for learners with several disabilities; and the hierarchy of taxonomical units relative to instructional design. The remaining half of the course covers content relevant to a wide range of literacy concerns and includes: evidence based practices for instruction in early reading (e.g. decoding, phonemic awareness, phonic and structural analysis; and vocabulary); reading comprehension at primary and intermediate levels (e.g. test structure, content specific vocabulary, and narrative and expository reading in content domains); writing (e.g. handwriting, spelling grammar, and written expression); and mathematics (e.g. number sense and early numeracy, basic facts and operations, applied skills, problem solving, fractions, decimals, and percents).

SPLED 403B Evidence-Based Methods for Teaching Secondary Students with Disabilities in Inclusive Settings (3)

Evidence-based methods for designing, delivering, and adapting instruction for students with disabilities in inclusive secondary education settings.

This course is delivered via a model of blended instruction and addresses aspects of designing, delivering, and adapting instruction for students across the range of disability (i.e., mild, moderate, and severe) in secondary inclusive settings. Content on relevant learner characteristics of special needs students is found throughout the course. About half the course covers content on: designing direct and explicit instruction; self-regulated learning; assistive technology; adaptations and accommodation for learners with several disabilities; and the hierarchy of taxonomical units relative to instructional design. The remaining half of the course covers content relevant to a variety of procedures and approaches to help students with special education needs gain meaningful access to secondary curriculum content without watering it down or ignoring the instructional needs of students without disabilities. Broadly this content includes ways of planning and delivering instruction to help all students, including those with learning problems, understand and retain critical course content. Topics include using graphic organizers, options for presenting content, mnemonics; task specific learning strategies; cooperative groups and peer focused interventions; study guides and guided notes; advance organizers; text structures for narrative and expository text; single and multiple-approaches for reading comprehension; writing mechanics, prompts, and rubrics; narrative, informative, and persuasive writing; problem solving (including Polya’s model); analogies; elaborate interrogation; and practice for problem solving.

The Pennsylvania State University
SPLED 408 (EDPSY 408) Meeting Instructional Needs of English Language Learners with Special Needs (3)
The course content and activities focus on instruction and assessment for English Language Learners with special needs.

SPLED (EDPSY) 408 Meeting Instructional Needs of English Language Learners with Special Needs (3)
The purpose of this course is to bring together two bodies of research to prepare future teachers of learners with special needs who are also English language learners to be effective teachers. The course has been developed to fulfill requirements of Pennsylvania Department of Education and in recognition of the growing number of English Language Learners (ELL) in the general population and thus in special education settings. The course presents (1) theory and research on the instructional needs of English Language Learners (ELLs) and (2) the knowledge base on effective instruction for students with special needs and assists students to integrate the two. Major topic areas include principles and issues in second language acquisition; ELL characteristics including linguistic and cultural factors that affect second language acquisition; techniques and methods of research-based instruction for English Language Learners with special needs; lesson planning and instructional modifications for ELLs with special needs; and appropriate assessment practices for ELLs with special needs. A major objective of this course is for students to be able to develop or modify instructional plans that reflect evidence based practices for adapting for the needs of ELL learners with special needs. Evaluation will be based on a combination of methods including, tests and quizzes, analyses of videos and case studies and reports of observations and interviews.

SPLED 409A Fundamental Literacy Skills for Students with Special Needs (3) Effective reading curriculum and teaching methods to teach students with special needs.

SPLED 409A Fundamental Literacy Skills for Students with Special Needs (3)
Effective classroom-based assessment, curriculum development, and instructional strategies for teaching reading to educate students with special needs will be described in this course. Students will learn how to assess, develop curriculum, and provide scientifically based best practice instruction in reading to K-12 students with special needs. Students will learn how to select reading skills necessary to scaffold and enhance students' present reading skills. Methods for using researched based assessment strategies and developing foundational reading skills within a classroom context, will be described.

This course builds on prerequisite Special Education courses in curriculum and instructional methods. Students in SPLED 409A extend knowledge of explicit instructional strategies in the context of reading. The content offered in this course complements 409B and 409C through the integration of researched based methods and sound instructional design within a curriculum to most effectively teach students with special needs.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2011
Prerequisite:
Concurrent: SPLED 495G

SPLED 409B Writing and Content Literacy for Students with Special Needs (3) Effective curriculum and materials for teaching writing and content literacy to students with special needs.

SPLED 409B Writing and Content Literacy for Students with Special Needs (3)
Effective application of classroom-based measurement, curriculum development, and instructional strategies for teaching writing and content literacy to educate students with special needs will be described in this course. Students will learn how to use assessment to develop curriculum and provide scientifically based best practice instruction in writing mechanics (handwriting, spelling, capitalization & punctuation) and written expression (pre-planning to revision) to K-12 students with special needs. Students will learn how to identify, select, and teach content text structure. Methods for using assessment to develop a reading comprehension curriculum within a content classroom context and teach K-12 students with special needs to read and comprehend narrative and expository text (such as text found in Math, Science, Social Studies, and other content textbooks) will be described. Methods for using assessment to develop curriculum and teach K-12 students with special needs to respond to content text and materials through writing will also be examined.

This course builds on prerequisite Special Education courses in curriculum and instructional methods. Students in SPLED 409B will have achieved mastery in basic reading theory, assessment, curriculum, and instructional methods. The content offered in this course adds to the existing course content by specifically addressing writing mechanics, written expression, and content reading, curriculum development, and instructional methods (including plans for generalization and maintenance) for students with special needs.

The Pennsylvania State University
Written responses for assigned readings will be required for each topic area. Written evaluations and class assignments (including case studies) will be given to assess student learning throughout the course time period. Students’ learning will be further evaluated through projects that demonstrate understandings of applying classroom-based measurement, curriculum development, and the instructional methods required to effectively teach writing and content learning to students with special needs. Student applied projects, in coordination with practicum placement, for writing instruction will include: (1) the collection of baseline writing data for a student with special needs, (2) development of a curriculum scope and sequence, (3) development of a research validated instructional intervention, (4) implementation of the intervention, (5) the collection of writing data throughout instruction and after instruction, and (6) development and implementation of an instructional plan for maintenance and generalization. To demonstrate understandings of teaching content and learning, students will prepare a presentation of an identified research-based content reading or writing instructional strategy or approach taught within a curriculum scope and sequence.

**SPLED 409C Mathematics Instruction for Students with Special Needs (3)**

Research-based assessment, instruction, and intervention strategies for teaching mathematics skills to students with special needs will be described in this course. Students will identify (a) the risk factors associated with mathematics disabilities, (b) effective prevention and remediation models of mathematics disabilities, (c) characteristics of scientifically—based instruction in content-area skills (e.g., counting, addition, fractions, problem solving, geometry) for K-12 students with disabilities, and (d) how to effectively provide and assess the effects of such instruction while provided in general and special education classrooms. This course builds on prerequisite Special Education courses in curriculum and instructional methods. Students in SPLED 409C will have achieved mastery in assessment, curriculum, and instructional methods. The content offered in this course adds to the existing course content by specifically addressing how to teach content-area mathematics skills to students with special needs.

Written responses for assigned readings will be required for each topic area. Written evaluations and class assignments will be given to assess student learning throughout the course time period. Students’ learning will be further evaluated through projects that demonstrate understandings of classroom-based assessment, curriculum development, and the instructional methods required to effectively teach content-area mathematics skills to students with special needs. Student applied projects, in coordination with practicum placement, for mathematics instruction will include: (1) the collection of baseline mathematics performance data for a student with special needs, (2) development of a curriculum scope and sequence, (3) development of a research validated instructional intervention, (4) implementation of the intervention, (5) on-going data collection throughout instruction and after instruction, and (6) development and implementation of an instructional plan for maintenance and generalization. To demonstrate understandings of teaching content area mathematics skills, students will prepare a presentation of a self- or instruction-selected research-based curriculum and instructional strategy or approach that meet “best practice” standards (e.g., those identified through previous meta-analysis).

SPLED 425 Foundations of Special Education, Etiologies, Law, and Implications for Practice (4) An introduction to exceptional individuals being served in special education programs across the life span.

SPLED 425 Foundations of Special Education, Etiologies, Law, and Implications for Practice (4)

This course is designed to provide an introduction to all exceptionalities included in special education programs as delineated by the most recent federal legislation guiding services for individuals with special needs. An important component of this course is the exploration of typical developmental stages and milestones used to monitor children's growth and progress over time. Fourteen (14) categories of disability are defined in relation to how states define who is eligible for a free appropriate public education under special education law. In addition, recent legislation is explored in relation to services provided, funding requirements, accommodations and classroom placement. The primary objective of this course to provide future educators with a solid foundation for their understanding disabilities, services, and legislation as they enter into the special education profession. Secondary objectives include preparing students to (a) address common misconceptions and myths associated with special education, (b) work with interdisciplinary teams in the formation of Individualized Education Program (IEP), and (c) promote the preparation of exceptional individuals to assume adult roles.

SPLED 430 Foundational Skills for Working with Students with Special Education Needs in General Education Classrooms

This is the first course in the Evidence-Based Practices for Inclusive Classrooms and Differentiating Instruction course series. The course is appropriate for pre- or in-service general education teachers who are seeking content on the roles and responsibilities of the general education teacher in providing services to students with special needs. This course serves as an introduction and prerequisite to the subsequent courses in the series.

This course addresses foundational skills for working with students with special education needs in general education classrooms. Board course objectives include student understanding of the history and current relevance of special education law; roles and responsibilities of the general education teacher in providing services to students with special education needs; providing effective instruction to students with mild and severe disabilities; and developing and maintaining effective education teams.

Evaluation of proficiency will occur in a variety of ways including short quizzes, graded application assignments, and course exams. At the beginning of the course, students will receive a packet containing DVDs of faculty presentations with imbedded activities, ungraded quizzes, and checkpoint summaries. Each recorded session will be roughly 2.5 - 3 hours total duration, exclusive of the required stopping/starting to complete imbedded, parallel learning activities. Some sessions may involve students accessing various targeted websites relevant to the content. Additionally, for most sessions, there will be assigned readings; an ungraded practice activity with feedback and/or comparison responses; and a graded assignment and quiz items. The latter will be delivered primarily via ANGEL with the instructor available for feedback and questions throughout the course via PicTel or some similar videoconferencing technology.

SPLED 431 Evidence-Based Methods for Monitoring Student Progress and Making Instructional Decisions (2)

This is the second course in the Evidence-Based Practices for Inclusive Classrooms and Differentiating Instruction course series. The course is appropriate for pre- or in-service teachers prepared to work in general education settings who are seeking content on validated methods for supporting the learning of students with special needs (e.g. Learning Disabilities, Emotional/Behavioral Disorders, Communication Disorders, Developmental Delays, etc.) in general education classes. Students should complete this course after they have completed the first course in the series (Foundational Skills for Working with Students with Special Education Needs in General Education Classrooms) and prior to completion of the final course in the series (either Evidence-Based Practices for Inclusive Elementary Classrooms or Evidence-Based Practices for Inclusive Secondary Classrooms).

This course is based on a model of effective instruction that includes (a) deciding what to teach, (b) instructional design, and (c) assessing the effectiveness of instruction. A feedback loop is instruction more effective and more efficient. After completing the class students should be able to: (a) give a rationale for the collection of data in classrooms; (b) describe the assessment process; (c) describe response to intervention and the general educator's role in the process; (d) summarize data using graphs and trendlines; (e) create and administer curriculum-based assessments in reading, mathematics, and writing; (f) design systems to collect behavioral data in classrooms; (g) interpret a variety of norm-referenced test scores; (h) use brief experiential analyses to identify effective academic interventions; (i) interpret norm-referenced test data; and (j) determine if the reliability/validity of an assessment is adequate for a given purpose.

Evaluation of proficiency will occur in a variety of ways including short quizzes, graded application assignments, and course exams. At the beginning of the course, students will receive a packet containing DVDs of faculty presentations with imbedded activities, ungraded quizzes, and checkpoint summaries. Each recorded session will be roughly 2.5 - 3 hours total duration, exclusive of the required stopping/starting to complete imbedded, parallel learning activities. Some sessions may involve students accessing various targeted websites relevant to the content. Additionally, for most sessions, there will be assigned readings; an ungraded practice activity with feedback and/or comparison responses; and a graded assignment and quiz items. The latter will be delivered primarily via ANGEL with the instructor available for feedback and questions throughout the course via e-mail. Furthermore, at least once during the course, instructors will be available live via PicTel or some similar videoconference technology.

Prerequisite:
SPLED 432 Evidence-Based Practices for Inclusive Behavior Management (2)

This is the third course in the Evidence-Based Practices for Inclusive Classrooms and Differentiating Instruction course series. The course is appropriate for pre- or in-service teachers prepared to work in general education settings who are seeking content on validated methods for supporting the learning of students with special needs (e.g., Learning Disabilities, Emotional/Behavioral Disorders, Communication Disorders, Developmental Delays, etc.) in general education classes. Students should complete this course after they have completed the first and second courses in the series (e.g., Effectiveness in General Education Classrooms and Evidence-Based Methods for Monitoring Student Progress and Making Instructional Decisions) and prior to completion of the final course in the series (e.g., Evidence-Based Practices for Inclusive Elementary Classrooms or Evidence-Based Practices for Inclusive Secondary Classrooms).

The course addresses aspects of managing and motivating learners with special needs placed in general education settings based upon the principles of Applied Behavior Analysis (ABA). Broad course objectives include student acquisition of knowledge and skills related to ABA principles and interventions such as: identifying the nature (positive or negative) of consequences maintaining or decreasing specific behaviors; operationally defining behavior; establishing a classroom and school environment conducive to learning for all students; creating class-wide, school-wide, and individual motivation systems; and intervening to decrease specific behaviors.

Evaluation of proficiency will occur in a variety of ways including short quizzes, graded application assignments, and course exams. At the beginning of the course, students will receive a packet containing DVDs of faculty presentations with imbedded activities, ungraded quizzes, and checkpoint summaries. Each recorded session will be roughly 2.5 - 3 hours total duration, exclusive of the required stopping/starting to complete imbedded, parallel learning activities. Some sessions may involve students accessing various targeted websites relevant to the content. Additionally, for most sessions, there will be assigned readings; an ungraded practice activity with feedback and/or comparison responses; and a graded assignment of quiz items. The latter will be delivered primarily via ANGEL with the instructor available for feedback and questions throughout the course via e-mail. Furthermore, at least once during the course, instructors will be available live via PicTel or some similar videoconferencing technology.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2011
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SPLED 433 Effective and Explicit Instruction for Students with Learning Difficulties (2)

This is the fourth course in the Evidence-Based Practices for Inclusive Classrooms and Differentiating Instruction course series. This course is appropriate for pre- or in-service teachers prepared to work in general education settings who are seeking content on validated methods for supporting the learning of students with special needs (e.g., Learning Disabilities, Emotional/Behavioral Disorders, Communication Disorders, Developmental Delays, etc.) in general education classes. Students should complete this course after they have completed the first course in the series (Foundationals Skills for Working with Students with Special Education Needs in General Education Classrooms and Evidence-Based Methods for Monitoring Student Progress and Making Instructional Decisions) and prior to completion of the final course in the series (e.g., Evidence-Based Practices for Inclusive Elementary Classrooms or Evidence-Based Practices for Inclusive Secondary Classrooms).

The course addresses aspects of designing delivering and adapting instruction for students across the range of disability (i.e., mild, moderate, & severe).

Evaluation of proficiency will occur in a variety of ways including short quizzes, graded application assignments, and course exams. At the beginning of the course, students will receive a packet containing DVDs of faculty presentations with imbedded activities, ungraded quizzes, and checkpoint summaries. Each recorded session will be roughly 2.5 - 3 hours total duration, exclusive of the required stopping/starting to complete imbedded, parallel learning activities. Some sessions may involve students accessing various targeted websites relevant to the content. Additionally, for most sessions, there will be assigned readings; an ungraded practice activity with feedback and/or comparison responses; and a graded assignment of quiz items. The latter will be delivered primarily via ANGEL with the instructor available for feedback and questions throughout the PicTel or similar videoconferencing technology.

The Pennsylvania State University
Evidence-Based Practices for Inclusive Elementary Classrooms (2) Evidence-based methods to effectively serve special needs students in elementary general education settings, including reading, writing, and mathematics instruction.

**SPLED 434A Evidence-Based Practices for Inclusive Elementary Classrooms (2)**

This course is one of two final class options in the Evidence-Based Practices for Inclusive Classrooms and Differentiating Instruction course series. The course is appropriate for pre- or in-service teachers prepared to work in general education settings who are seeking content on validated methods for supporting the learning of students with special needs (e.g., Learning Disabilities, Emotional/Behavioral Disorders, Communication Disorders, Developmental Delays, etc.) in general education classes. Students should complete this course only after they have completed the first four courses in the series (Foundational Skills for Working with Students with Special Needs in General Education Classrooms, Evidence-Based Methods for Monitoring Student Progress and Making Instructional Decisions, Evidence-Based Practices for Inclusive Behavior Management, Evidence-Based Design and Delivery of Effective Instruction for Students with Learning Difficulties).

This course addresses aspects of providing reading, writing, and mathematics instruction to elementary school students with special needs in the general education classroom. Broad course objectives include student acquisition of knowledge and skills in reading (e.g., word recognition, fluency, reading comprehension, vocabulary); writing (e.g., spelling, grammar, handwriting) and written expression (e.g., narrative, informative, persuasive); and mathematics (e.g., computation and problem solving).

Evaluation of proficiency will occur in a variety of ways including short quizzes, graded application assignments, and course exams. At the beginning of the course, students will receive a packet containing DVDs of faculty presentations with imbedded activities, ungraded quizzes, and checkpoint summaries. Each recorded session will be roughly 2.5 - 3 hours total duration, exclusive of the required stopping/starting to complete imbedded, parallel learning activities. Some sessions may involve students accessing various targeted websites relevant to the content. Additionally, for most sessions, there will be assigned readings; an ungraded practice activity with feedback and/or comparison responses; and a graded assignment and quiz items. **SPLED 434B Evidenced-Based Practices for Inclusive Secondary Classrooms (2)**

This course is one of two final class options in the Evidence-Based Practices for Inclusive Classrooms and Differentiating Instruction course series. The course is appropriate for pre- or in-service teachers prepared to work in general education settings who are seeking content on validated methods for supporting the learning of students with special needs (e.g., Learning Disabilities, Emotional/Behavioral Disorders, Communication Disorders, Developmental Delays, etc.) in general education classes. Students should complete this course only after they have completed the first four courses in the series (Foundational Skills for Working with Students with Special Needs in General Education Classrooms, Evidence-Based Methods for Monitoring Student Progress and Making Instructional Decisions, Evidence-Based Practices for Inclusive Behavior Management, Evidence-Based Design and Delivery of Effective Instruction for Students with Learning Difficulties).

The course addresses a variety of procedures and approaches to help students with special education needs gain meaningful access to the secondary curriculum content without watering it down or ignoring the instructional needs of students without disabilities. Broad course objectives include ways of planning and delivering instruction to help all students, including those with learning problems, understand and retain critical course content.

Evaluation of proficiency will occur in a variety of ways including short quizzes, graded application assignments, and course exams. At the beginning of the course, students will receive a packet containing DVDs of faculty presentations with imbedded activities, ungraded quizzes, and checkpoint summaries. Each recorded session will be roughly 2.5 - 3 hours total duration, exclusive of the required stopping/starting to complete imbedded, parallel learning activities. Some sessions may involve students accessing various targeted websites relevant to the content. SPLED 460C Specialized Reading Applications in Special Education (3)

Specialized Reading Applications in Special Education is the third course in an approved distance education certificate program. It is designed to provide teachers of students with special needs with evidenced-based procedures to teach a variety of reading skills.
SPLED 461 Introduction to Autism Spectrum Disorders: Issues and Concerns (3) Overview of issues, characteristics, and evidenced-based assessment strategies, and approaches for individuals with autism/PDD.

SPLED 461 Autism: Issues and Concerns (1 )
Autism: Issues and Concerns is the first course in a five course (12-credit) series leading to the Professional Development Certificate in Autism. All information, activities, and assignments are through videotape and web-based learning. As an introductory course, it is intended to provide an overview of Autism Spectrum Disorder (ADS). Basic information on views of causes, assessment, treatments, and parent concerns are included.

SPLED 462 Autism and Applied Behavior Analysis (3) This course addresses principles of applied behavior analysis and empiricism related to instruction and special issues affecting individuals with autism.

SPLED 462 Autism and Applied Behavior Analysis (4)
Autism and ABA is the second course in the 5 course (12 credit) series leading to the Professional Development Certificate in Autism. All information, activities, and assignments are through videotape and web-based learning. Content includes an overview of basic principles of applied behavior analysis (ABA) and elements of empiricism in educational settings. It is designed to provide teachers and related service personnel with basic principles of ABA related to service delivery in the field of autism. The course draws upon experts in autism from a variety of settings and disciplines.
designed to provide teachers and related service personnel with basic principles of ABA related to service delivery in the field of autism. The course draws upon experts in autism from a variety of settings and disciplines.

SPLED 463 Communication and Social Competence (3) Overview of deficits and strategies in speech, language, and communication across the Autism Spectrum Disorder.

SPLED 463 Communication and Social Competence (3)
Communication and Social Competence is the third course in the 5 course (12 credit) series leading to the Professional Development Certificate in Autism. All information, activities, and assignments are through videotaped and web-based learning. Content includes an overview of the deficits in the area of speech, language, and communication across the Autism Spectrum Disorders (ASD). Basic information on the nature of these deficits is provided from both a psycholinguistic model as well as a behavioral model. In addition to information on deficits, the majority of the course content will provide practical information related to intervention.

SPLED 464 Assessment and Curriculum (3) Overview of screening, diagnosis, and identification of skills in developmental domains and curricula for individuals with autism.

SPLED 464 Assessment and Curriculum (3)
Assessment and Curricula is the fourth course in the 5 course (12 credit) series leading to the Professional Development Certificate in Autism. All information, activities, and assignments are through videotaped and web-based learning. Content includes types of assessment and identification of skills in developmental domains. Practical strategies will be outlined.

SPLED 465 Asperger Syndrome (1) Characteristics, assessment, intervention, and curricula for individuals with Asperger syndrome. Emphasis will be given to social skill development.

SPLED 465 Asperger Syndrome (1)
Asperger is the fifth course in a five course (12-credit) series leading to the Professional Development Certificate in Autism. All information, activities, and assignments are through videotaped and web-based learning. Basic information on views of causes, assessment, treatments, and parent concerns for individuals with Asperger syndrome are included.

SPLED 495E Experience with Exceptional Children (3) Supervised activities with exceptional children in a variety of possible settings, e.g., schools, institutions, day care centers, vocational settings.

Experience with Exceptional Children (3)

SPLED 540 Orientation to PhD Study in Special Education (3) Information and skills needed for successful completion of Ph.D. study in Special Education for those targeting academic careers.

SPLED 540 Orientation to PhD Study in Special Education (3)

Offered every fall semester, this course is for students new to Ph.D. study in Special Education to prepare them for Candidacy and initiation of a line of research. Students take the course during their first semester in the Program. Based upon special offerings and typical numbers of new Ph.D. students in Special Education the anticipated enrollment will be 5-7 students. The course is intended to provide students frequent feedback on development of basic search skills and skills related to conducting a systematic review of professional literature, a skill that is prerequisite to development of a research agenda. At this point in their development, students are not expected to be able to formulate experimental research questions or use the IRB. They are still at a point at which they need to develop their skills reading and synthesizing current literature as a foundation for future experimental efforts (development of hypotheses, experimental designs, and IRB approvals are all covered in later courses). Students will receive feedback from the instructor and from peers as well as provide it to peers thereby developing their own feedback and editing skills (students actually receive feedback on their feedback). Towards the end, they need to be able to recognize varying forms of literature reviews (differing purposes and methods) and developing a means for conducting their own reviews in a systematic, replicable manner. They need to work on technical writing skills and on organization and using APA style. To accomplish this requires a lot of discussion and analysis of work in separate stages of development of a review.

Generally the content includes basic information and skills needed for successful completion of Ph.D. study including:

- Campus resources, pitfalls, technical writing skills, setting a research agenda (research to practice issues) and conducting systematic reviews of professional literature. While this may not sound like much, it is important to note that this is a highly individualized course with an emphasis on skill development. Therefore, as a result of participation students will:
  1. become acclimated to PSU information resources,
  2. identify ways to keep on track during PhD study,
  3. identify local support networks,
  4. locate 3 systematic reviews of the professional literature and identify key features,
  5. identify 3 key issues in research to practice in Special Education,
  6. complete electronic searches for references on a topic assigned by the course instructor,
  7. write an 18-22 page, systematic review which will include introduction, methods, results, and discussion/implications sections, of the literature on a topic assigned by the instructor and based upon search results,
  8. practice formulating “good” (i.e., answerable) research questions,
  9. distinguish between plagiarism and appropriate citation of other works,
  10. refine technical writing skills (including using APA style),
  11. develop feedback/editing skills in the area of technical writing,
  12. prepare an oral presentation of their results complete with visuals.

Methods of evaluation are primarily subjective and will include both peer and instructor assessments. Peer feedback during the development of the systematic review will not carry weight toward a final grade although the instructor will provide feedback based on their feedback to each student. The instructor's feedback will largely be individual and in writing and orally in private meetings with each student as the review is conducted in steps (e.g., introduction, results, etc.). Instructor's feedback will include areas related to technical writing in Special Education such as correct APA format, organization, substantiating claims, analysis and synthesis skills, and providing solid rational for the effort.

SPLED 573 Introduction to Research in Special Education (3) A seminar to review and design research in special education.

SPLED 573 Introduction to Research in Special Education (3)

The research literature provides professionals in the field with an array of valuable information. Unfortunately, this literature is, for various reasons, under-utilized by classroom teachers. The ultimate purpose of this class is to help teachers find solutions in the literature to everyday classroom problems. In line with this purpose, teachers will learn how to (a) find information in the literature, (b) evaluate the technical adequacy of the information, and (c) apply the information in their setting.

Statistics (STAT)

STAT 401 Experimental Methods (3) Random variables; probability density functions; estimation; statistical tests, t-tests; correlation; simple linear regression; one-way analysis of variance; randomized blocks.

Experimental Methods (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 1988
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

STAT 402 Statistical Analysis II (3) Two-sample problems, single and multifactor ANOVA, simple and multiple regression, categorical data.

Statistical Analysis II (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2007
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

STAT 414 (MATH 414) Introduction to Probability Theory (3) Probability spaces, discrete and continuous random variables, transformations, expectations, generating functions, conditional distributions, law of large numbers, central limit theorems. Students may take only one course from STAT(MATH) 414 and 418.

Introduction to Probability Theory (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2001
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

STAT 415 (MATH 415) Introduction to Mathematical Statistics (3) A theoretical treatment of statistical inference, including sufficiency, estimation, testing, regression, analysis of variance, and chi-square tests.

Introduction to Mathematical Statistics (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1989
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

Stochastic Modeling (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 1984
Prerequisite:

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**STAT 418 (MATH 418) Introduction to Probability and Stochastic Processes for Engineering (3)**

Introduction to probability axioms, combinatorics, random variables, limit laws, and stochastic processes. Students may take only one course from MATH(STAT) 414 and 418 for credit.

This course gives an introduction to probability and random processes. The topics are not covered as deeply as in a semester-long course in probability only or in a semester-long course in stochastic processes only. It is intended as a service course primarily for engineering students, though no engineering background is required or assumed. The topics covered include probability axioms, conditional probability, and combinatorics; discrete random variables; random variables with continuous distributions; jointly distributed random variables and random vectors; sums of random variables and moment generating functions; and stochastic processes, including Poisson, Brownian motion, and Gaussian processes.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2011

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**STAT 440 Computational Statistics (3)**

Topics related to computing in statistics, including numerical linear algebra, optimization, simulation, numerical integration, and bootstrapping.

This course introduces many important ideas in statistical computing. Students are expected to possess knowledge of mathematical statistics at the level of STAT 415 and matrices at the level of MATH 220. Students will learn the statistical computing environment called R and use R to implement many of the theoretical computing topics, which include numerical linear algebra, optimization, numerical and Monte Carlo integration, random number generation and simulation, and bootstrapping. Other statistical and mathematical software may be treated briefly, including symbolic mathematics environments like Mathematics and Maple.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006

**Intermediate Applied Statistics (3)**

Review of hypothesis testing, goodness-of-fit tests, regression, correlation analysis, completely randomized designs, randomized complete block designs, latin squares.

**Analysis of Variance (3)**

Analysis of variance for single and multifactor designs; response surface methodology.

**Analysis of Variance (3)**

Introduction to linear and multiple regression; correlation; choice of models, stepwise regression, nonlinear regression.

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

The Pennsylvania State University
Applied Regression Analysis (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2006
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

STAT 463 Applied Time Series Analysis (3) Identification of models for empirical data collected over time; use of models in forecasting.

STAT 463 Applied Time Series Analysis (3)

This course covers many major topics in time series analysis. Students will learn some theory behind various time series models and apply this theory to multiple examples. An introduction to time series and exploratory data analysis will be followed by a lengthy study of several important models, including autoregressive, moving average, autoregressive moving average (ARMA), autoregression integrated moving average (ARIMA), and seasonal models. For each model methods for parameter estimation, forecasting, and model diagnostics will be covered. Additional topics will include spectral techniques for periodic time series, including power spectra and the Fourier transform, and one or more miscellaneous topics chosen by the instructor, such as forecasting methods, transfer function models, multivariate time series methods, Kalman filtering, and signal extraction and forecasting. The use of statistical software will be a central component of this course, as will the proper interpretation of computer output. Students enrolling for this course are assumed to have taken a semester-long course on regression.

Applied Nonparametric Statistics (3)

STAT 464 Applied Nonparametric Statistics (3) Tests based on nominal and ordinal data for both related and independent samples. Chi-square tests, correlation.

Applied Nonparametric Statistics (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2006
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

STAT 466 Survey Sampling (3) Introduction to design and analysis of sample surveys, including questionnaire design, data collection, sampling methods, and ratio and regression estimation.

STAT 466 Survey Sampling (3)

This course covers classical sampling design and analysis methods useful for research and management in many fields. Topics include design of questionnaires; methods of data collection, sample-survey designs including simple random sampling, stratified sampling, cluster sampling, and systematic sampling; ratio, regression, and difference estimation; two-stage cluster sampling; population size estimation; methods for dealing with nonresponse; and possibly other topics at the discretion of the instructor. Statistical software will be used to apply many of the techniques covered by this course.

**STAT 480 Introduction to SAS (1)**

Introduction to SAS with emphasis on reading, manipulating and summarizing data.

**STAT 480 Introduction to SAS (1)**

STAT 480 addresses the fundamentals of the SAS programming language. It addresses the programming environment and major aspects of the Base SAS software, including reading in, manipulating, and transforming data. It also addresses techniques for reshaping and restructuring data files, merging and concatenating data sets, creating summaries and subsets of data sets, formatting and printing data, as well as using some of the basic statistical procedures.

- General Education: None
- Diversity: None
- Bachelor of Arts: None
- Effective: Spring 2008

**STAT 481 Intermediate SAS for Data Management (1)**

Intermediate SAS for data management.

**STAT 481 Intermediate SAS for Data Management (1)**

STAT 481 builds on the skills and tools learned in STAT 480 to provide intermediate level ability to use the Statistical Analysis System (SAS). It covers additional capability and major uses of the program, such as error checking, report generation, date and time processing, random number generation, and production of presentation quality output for graphs and tables. Other possible topics include advanced merging, PROC SQL, importing and exporting data sets, SAS GRAPH, and the Output Delivery System.

- General Education: None
- Diversity: None
- Bachelor of Arts: None
- Effective: Summer 2007

**STAT 482 Advanced Topics in SAS (1)**

Advanced statistical procedures in SAS, including ANOVA, GLM, CORR, REG, MANOVA, FACTOR, DISCRIM, LOGISTIC, MIXED, GRAPH, EXPORT, and SQL. Credit can not be received for both STAT 482 and STAT 480/481/483.

**STAT 482 Advanced Topics in SAS (1)**

STAT 482 builds on the skills and tools learned in STAT 480 and STAT 481 to provide advanced programming ability to use the Statistical Analysis System (SAS). It provides a survey of the major statistical analysis procedures, such as the TTEST, GLM, REG, MANOVA, FACTOR, DISCRIM, LOGISTIC, and MIXED procedures. Other topics include using the TABULATE procedure to create reports, generating random numbers, exporting data from SAS data sets, using the SAS/Graph module to produce presentation quality graphs, using the SQL procedure to query and combine data tables, and using macros to write more efficient SAS programs. Credit can not be received for both STAT 482 and STAT 480/481/483.

- General Education: None
- Diversity: None
- Bachelor of Arts: None
- Effective: Summer 2009

**STAT 483 Statistical Analysis System Programming (3)**

Introduction, intermediate, and advanced topics in SAS. Credit can not be received for both STAT 483 and STAT 480/481/482.

**STAT 483 Statistical Analysis System Programming (3)**

The three-credit STAT 483 course is a combination of the three one-credit courses STAT 480, 481, and 482. In STAT 480, students are introduced to the SAS windowing system, basic SAS programming statements, and descriptive reporting procedures, such as the FORMAT, PRINT, REPORT, MEANS, and FREQ procedures. In STAT 481, the focus is primarily on extending the programming skills of the students, as they learn how to read messy data into SAS data sets, how to combine SAS data sets in various ways, how to use SAS character functions, how to read and process date and time variables, how to use arrays and do loops to write more efficient programs, and how to use the Output Delivery System to create SAS output in a variety of formats. STAT 482 provides a survey of the major statistical analysis procedures, such as the TTEST, GLM, REG, MANOVA, FACTOR, DISCRIM, LOGISTIC, and MIXED procedures. Other STAT 482 topics include using...
the TABULATE procedure to create reports, generating random numbers, exporting data from SAS data sets, using the SAS/Graph module to produce presentation quality graphs, using the SQL procedure to query and combine data tables, and using macros to write more efficient SAS programs. Credit can not be received for both STAT 483 and STAT 480/481/482.

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

STAT 506 Sampling Theory and Methods (3) Theory and application of sampling from finite populations.

Sampling Theory and Methods (3)

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

Epidemiologic Research Methods (3)

This 3-credit course develops research and quantitative methods related to the design and analysis of epidemiological (mostly observational) studies. Such studies assess the health and disease status of one or more human populations or identify factors associated with health and disease status. To a lesser degree, the course also covers non-randomized, intervention (experimental) studies that may be designed and analyzed with epidemiological methods. This course is a second-level course and complements Biostat Methods, STAT 509, which is focused on clinical (experimental) trials. Together, these two courses provide students with a complete review of research methods for the design and analysis for common studies related to human health, disease, and treatment. Prerequisite are Intro Biostats (STAT 250 or equivalent) and Principles of Epidemiology (H P A/BB H 440 or equivalent) or permission of the instructor. To be taught in the Spring Semester each year.

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
STAT 509 Design and Analysis of Clinical Trials (3) An introduction to the design and statistical analysis of randomized and observational studies in biomedical research.

The objective of the course is to introduce students to the various design and statistical analysis issues in biomedical research. This is intended as a survey course covering a wide variety of topics in clinical trials, bioequivalence trials, toxicological experiments, and epidemiological studies. Many of these topics do not appear in other statistics courses, although a few topics are covered in greater depth in more advanced statistics courses. Computations are performed via the SAS statistical software package. Evaluation methods include four to five homework assignments, an in-class mid-semester examination and an in-class final examination.

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

STAT 510 Applied Time Series Analysis (3) Identification of models for empirical data collected over time. Use of models in forecasting.

Regression Analysis and Modeling (3)

General Education: None

STAT 548 Statistical Distribution Theory (3) Analytical study of nonnormal models and methods in reliability theory, survival analysis, records evaluation, scale/scale-free analysis, and directional statistics.

Statistical Distribution Theory (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 1984
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

STAT 551 Linear Models I (3) A coordinate-free treatment of the theory of univariate linear models, including multiple regression and analysis of variance models.

Linear Models I (3)
STAT 552 Linear Models II (3) Treatment of other normal models, including generalized linear, repeated measures, random effects, mixed, correlation, and some multivariate models.

STAT 553 Asymptotic Tools (3) A rigorous but non-measure-theoretic introduction to statistical large-sample theory for Ph.D. students.

STAT 557 (IST 557) Data Mining I (3) This course introduces data mining and statistical/machine learning, and their applications in information retrieval, database management, and image analysis.
Prerequisite:

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**STAT 558** (IST 558) Data Mining II (3) Advanced data mining techniques: temporal pattern mining, network mining, boosting, discriminative models, generative models, data warehouse, and choosing mining algorithms.

**STAT (IST) 558 Data Mining II (3)**

This course is the second course in a two-course sequence on data mining. It emphasizes advanced concepts and techniques for data mining and their application to large-scale data warehouse. Building on the statistical foundations and underpinnings of data mining introduced in Data Mining I, this course covers advanced topics on data mining; mining association rules from large-scale data warehouse, hierarchical clustering, mining patterns from temporal data, semi-supervised learning, active learning and boosting. In addition, to computational aspects of algorithm implementation, the course will also cover architecture and implementation of data warehouse, data preprocessing (including data cleansing), and the choice of mining algorithms for applications. In addition to discriminative models such as CRF and SVM models, the course will also introduce generative models such as Bayesian Net and LDA.

A term project will be developed by each student to apply an advanced data mining algorithm to a multi-dimensional data set. Classes will include lectures, paper discussions, and project presentations. Paper discussions will allow students to discuss state-of-the-art literature related to data mining. Project presentations will enable students to share and compare project ideas with each other and to receive feedback from the instructor.

Effective: Spring 2003

Prerequisite:
Concurrent: STAT 517

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**STAT 562** Statistical Inference II (3) Basic limit theorems; asymptotically efficient estimators and tests; local asymptotic analysis; estimating equations and generalized linear models.

**Statistical Inference II (3)**

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2003

Prerequisite:

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**STAT 565** Multivariate Analysis (3) Theoretical treatment of methods for analyzing multivariate data, including Hotelling’s T2, MANOVA, discrimination, principal components, and canonical analysis.

**Multivariate Analysis (3)**

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 1987

Prerequisite:

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**STAT 580** Statistical Consulting Practicum I (2) General principles of statistical consulting and statistical consulting experience. Preparation of reports, presentations, and communication aspects of consulting are discussed.

**Statistical Consulting Practicum I (2)**
General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2005
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

STAT 581 Statistical Consulting Practicum II (1 per semester/maximum of 2) Statistical consulting experience including client meetings, development of recommendation reports, and discussion of consulting solutions.

STAT 581 Statistical Consulting Practicum II (1 per semester/maximum of 2)

This course serves as a continuation of STAT 580, which provides actual practical experience as a statistical consultant. In STAT 581, each student will hold a consulting session biweekly (by appointment) with a researcher to discuss the statistical design, analysis and computation aspects required for the client’s project. Written reports are required for each project and reviewed for appropriateness and accuracy by a supervising faculty member. In addition, a weekly seminar is utilized to discuss selected projects and non-standard applications of statistical methodology. This course will be offered in the spring and summer, with an anticipated enrollment of 15-20 students per semester.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2004
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

STAT 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Bachelor of Arts: None
Effective: Summer 2012 Ending: Summer 2012

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

STABR 999B (IL) Comparative Law in a Globalized World - Transnational Perspectives - Florence Program (2.5) This course addresses selected topics that are important for U.S. lawyers in transnational practice. It introduces students to the civil law tradition and contemporary national and supranational legal systems in Europe and around the world that have grown out of or have been substantially influenced by the civil law tradition.

Comparative Law in a Globalized World - Transnational Perspectives - Florence Program (2.5)

General Education: None
Diversity: IL
Bachelor of Arts: None
Effective: Summer 2012 Ending: Summer 2012

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

STABR 999C (IL) International and Comparative Family Law - Florence Program (2.5) This course will present an overview of the family law systems in the United States and European countries with emphasis on Italy. The course will also focus on transnational family law problems involving recognition of foreign decrees, transnational custody battles, international adoptions etc. The course will combine theoretical and practical approaches. No prior knowledge of family law is required, and the course is not intended to be a substitute for an in-depth U.S. family law course.

International and Comparative Family Law - Florence Program (2.5)

General Education: None
Diversity: IL
Bachelor of Arts: None
Effective: Summer 2012 Ending: Summer 2012

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

STABR 999D (IL) The International Sale of Goods -- The CISG in Comparative Perspective - Florence Program (2.5) This course examines, from the perspective of a U.S.-based practitioner, selective issues on transnational contract formation, performance, breach, and remedies, focusing on the approach of the United Nations (Vienna) Convention on International Sale of Goods (CISG) in comparison with that of the Uniform Comemrical Code. The objective of the course is to develop students' skills in the drafting of transnational contracts and providing competent advice in the context of cross-border sales transactions. A course in sales is not a prerequisite to take this course and it is not intended to be a substitute for an in-depth U.S. “sales” course.
The International Sale of Goods -- The CISG in Comparative Perspective - Florence Program (2.5)

General Education: None
Diversity: IL
Bachelor of Arts: None
Effective: Summer 2012 Ending: Summer 2012

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

STABR 999E (IL) Transnational Litigation and Civil Procedure - Florence Program (2.5) This course explores the problems that most frequently arise in litigation involving foreign parties or business transactions. It initially focuses on judicial jurisdiction and related questions of forum non conveniens, validity and enforceability of forum selection clauses, antisuit-injunctions and international lis pendens. It then concentrates on the intricacies of serving process in transnational cases, and provisional remedies (injunctions, attachment and equivalent remedies) in litigation involving foreign parties or activities. The discovery process in transnational disputes and recognition and enforcement of foreign judgments are also addressed.

Transnational Litigation and Civil Procedure - Florence Program (2.5)

General Education: None
Diversity: IL
Bachelor of Arts: None
Effective: Summer 2012 Ending: Summer 2012

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

Summer Practicum (SP)

SP 714 Summer Practicum (1) The Penn State College of Medicine's summer practicum gives students the opportunity to gain direct experience in the care of patients in conducting biomedical research. The course is offered during the summer session between the first and second year of medical school.

Summer Practicum (1)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2011
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

Supply Chain Mgmt (SCM)

SCM 400 Transport Planning (3) Advanced study of transport systems in supply chain networks.

Transport Planning (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 404 Demand Fulfillment (3) Analysis of demand fulfillment and the role of distribution operations management in the supply chain.

SCM 404 Demand Fulfillment (3)

This course introduces the student to how customer demand is managed and how subsequent orders are filled in both business-to-business and business-to-consumer markets. Topics focus on the demand fulfillment process, which encompasses flows of goods, information, and funds from the moment a business receives an order from a customer until all requirements for the order are satisfied in full. These topics include:

*role of demand management and distribution operations in the supply chain
*transportation management
*distribution center processes
*inventory control and order management elements
*facility costing and productivity analysis
*strategic demand management and distribution operations issues in the supply chain.

Both theoretical and quantitative perspectives will be offered on these topics. Additionally, each topic will be addressed from strategic and financial perspectives. After completing this course, students will have the knowledge, skills, and abilities to:

*Explain the role of demand management in the supply chain
*Explain the role of distribution operations in demand management
*Determine the strategic and financial impacts of demand management and distribution operations management
*Articulate the role of information systems in demand management and distribution operations management
*Use quantitative techniques to analyze supply chain processes
*Describe related system software.

This is one of three prescribed foundation courses for the Supply Chain and Information Systems major for which SCM 301 Supply Chain Management is a prerequisite. This course also satisfies the prerequisite for SCM 421 Supply Chain Modeling and Analysis. Student evaluations are based on individual and group homework assignments and computer-lab exercises, as well as on at least three written examinations.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2011
Prerequisite:

Note : Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 405 Manufacturing and Services Strategies (3) Investigates manufacturing and services strategies in supply chain networks.

SCM 405 Manufacturing and Services Strategies (3)
This course examines manufacturing and services strategies, with special emphasis given to quality management concepts, methods, and issues. After completing this course, students will have the knowledge, skills, and abilities to:

*Explain the role of manufacturing or services operations from the boundary-spanning perspective of supply chain management and how supply chain management can be used as a strategic competitive advantage
*Articulate how the various components of a manufacturing strategy are integrated, particularly with respect to the use of information technologies for supply chains
*Effectively apply operational and quality tools useful in implementing manufacturing strategies.

Individual and team assignments form the basis for evaluation. Evaluation methods include a combination of class participation, exams, "hands-on" exercises, case studies, and written assignments. This is one of three prescribed foundation courses in the Supply Chain and Information Systems major for which B A 302 "Supply Chains" is a prerequisite. The course is also an important prerequisite for the capstone course in the major, SC&IS 450 "Supply Chain Leadership."

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2011
Prerequisite:

Note : Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 406 Strategic Procurement (3) Analysis of strategic procurement in the supply chain.

SCM 406 Strategic Procurement (3)
SCM 406 provides an in-depth analysis of the procurement process and supplier management, with strong emphasis placed on managing a supplier base for both products and services. Elements examined include the strategic role of procurement in supply chains, the identification and evaluation of requirements, the strategic make-versus-buy decision, how to identify, evaluate, and select potential suppliers and conduct a post-purchase evaluation; and the impact of information technology on strategic procurement. Both theoretical and quantitative perspectives will be offered. In addition, the topics will be addressed from strategic, financial, and global perspectives. In light of these perspectives, the course objectives are to develop a comprehensive understanding of:

(1) the supplier selection and evaluation process
(2) the relationship between product design and the supplier base
(3) the types of relationships that exist between buyers and sellers

The Pennsylvania State University
(4) the impact of information technology on strategic purchasing and supply management.

Students will also develop skills in using quantitative tools to select and evaluate suppliers. This is the third of three prescribed foundation courses in the Supply Chain and Information Systems major.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2011
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 416 Warehousing and Terminal Management (3) Administration of warehouse and terminal functions in logistics systems, with analysis of customer service, forecasting, inventory, investment, design, and operation. Not available to baccalaureate business students in Smeal.

Warehousing and Terminal Management (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 421 Supply Chain Analytics (3) Models and Methodologies for supply chain analysis.

SCM 421 Supply Chain Analytics (3)

This course provides a spreadsheet-based, example-driven approach to learn about important supply chain models, problems, and solution methodologies. The objectives of this course are:

1. to develop valuable modeling skills that students can appreciate and use effectively in their careers
2. reinforce and enrich your understanding of supply chain theories, principles, and concepts studied previously in foundation courses.

Student evaluation is based on:

1. individual and team group performance on problem-based exercises
2. individual performance on examinations
3. class participation.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2011
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 435 International Logistics (3)

SCM 435 develops an understanding of concepts, methods, and issues for design and management of global supply chain networks. Special emphasis is given to import and export processes. This is an elective course for majors and minors in Business Logistics and a required course for majors in Business Logistics and International Business.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
SCM 445 Operations Planning and Control (3) Aggregate production planning procedures, disaggregation methods in hierarchical production planning, master production scheduling, material requirements planning, lot-sizing, and capacity planning. Not available to baccalaureate business students in Smeal.

Operations Planning and Control (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2012 Future: Fall 2012
Prerequisite:

Note : Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 445 Operations Planning and Control (3) Aggregate production planning procedures, disaggregation methods in hierarchical production planning, master production scheduling, material requirements planning, lot-sizing, and capacity planning. Not available to baccalaureate business students in Smeal.

Operations Planning and Control (3)

General Education: None
Diversity: None

Effective: Fall 2012 Future: Fall 2012
Prerequisite:

Note : Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 450W Strategic Design and Management of Supply Chains (3) Strategic design and management of supply chains.

SCM 450W Strategic Design and Management of Supply Chains (3)

This course is about the strategic design and effective operation of supply chains. It will help prepare you for supply chain management positions in manufacturing, distributing, and other service firms including providers of logistics services. The course focuses on the definition, as well as the application, of a single logic that guides the management of all the supply chain activities. Information decision support systems, primarily computer-based, provide the foundation for this logic. Because the determination of inventory locations and the control of inventory levels play a key role in this logic, we spend considerable time on these subjects. The last section of the course covers ways to lead and organize people to manage cross-firm and cross-functional relationships effectively. After completing this course, students should have the knowledge, skills, and abilities to:

• Articulate the process perspective and the total systems view of supply chain management, the impact of systems thinking on firm performance, and the nature of relationships supply chain networks.

• Quantify the effect of strategic initiatives such as postponement and risk pooling on the financial performance of the firm, as well as on supply chain performance.

• Use and apply selected quantitative tools useful in implementing supply chain strategies.

• Explain the complex nature of human interaction needed to successfully introduce supply chain concepts in the firm. This is the prescribed capstone course for the Supply Chain and Information Systems major. It builds upon the fundamental supply chain knowledge, skills, and abilities developed in foundation and intermediate courses. Students must complete SCM 421 before taking this course.

SCM 450W is a writing-intensive course. In addition to written assignments encompassing case studies, hands-on exercises, and examinations, student evaluations include oral presentations and class participation.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2011
Prerequisite:

Note : Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 455 Logistics Systems Analysis and Design (3) Customer service, inventory management, transportation, warehousing, purchasing, international logistics, site location planning and analysis, and total cost analysis.

Logistics Systems Analysis and Design (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007

Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 456 Supply Chain Risk Analysis (3) Business processes are modeled as a network of queues using discrete-event simulation and analyzed model outcomes using statistical methods.

SCM 456 Simulation Models of Business Processes (3)

Students will learn to build models using commercial-grade simulation software. The course objective is to teach the methods and best practice of conducting simulation experiments, but this can only be realized within the context of a fully functional modeling tool. [Our traditional choice is ARENA, from Systems Modeling Corp., but other products are feasible.] Students learn to build models of processes typical in business operations, trace their step by step function, measure performance of the system, and predict the impact of proposed changes in the system. Simulation is a long-standing method in management science that has broad applicability.

Students will complete two examinations, regular homework assignments, and an applied project. The concepts in this course build upon one another. Early homework assignments and in-class lab exercises permit the instructor to insure mastery of the principles of the course. Students work in pairs to collect and analyze data about a real system as the basis for their final project.

SCM 456 is one of three courses (MS&IS 427, 455, or SCM 456) that students can select to complete requirements for the Management Science and Information Systems major and it is an optional course in the Operation and Information Systems Management curriculum.

General Education: None

Effective: Summer 2002  
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**SCM 556 Manufacturing Strategy (2)** Development of service-sensitive manufacturing strategies to support synchronized supply chains.

**Manufacturing Strategy (2)**

General Education: None  
Diversity: None  
Bachelor of Arts: None  
Effective: Summer 2002  
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**SCM 566 Demand Fulfillment (2)** Demand fulfillment strategies, operations, and methods in supply chain networks.

**Demand Fulfillment (2)**

General Education: None  
Diversity: None  
Bachelor of Arts: None  
Effective: Summer 2002  
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**SCM 570 Supply Chain Modeling (2)** Explore current modeling methods and software for design, analysis, execution and integration of supply chains.

**Supply Chain Modeling (2)**

General Education: None  
Diversity: None  
Bachelor of Arts: None  
Effective: Summer 2002  
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**SCM 576 Logistics and Supply Chain Leadership (2)** Current issues and best practices for selected supply chain leadership topics.

**Logistics and Supply Chain Leadership (2)**

General Education: None  
Diversity: None  
Bachelor of Arts: None  
Effective: Summer 2002  
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
SCM 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.

Research Topics (1-15)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2007

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Individual Studies (1-9)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2004

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Special Topics (1-9)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2002

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 597B Six Sigma Blackbelt for MBA Students (2) A focused overview highlighting principles of six sigma methodology including implementation of proven principles and techniques for business performance.

Six Sigma Blackbelt for MBA Students (2)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 800 Supply Chain Management (4) Introduction to the strategic framework, issues, and methods for integrating supply and demand management within and across companies.

SCM 800 Supply Chain Management (4)

SCM 800 provides an enhanced understanding of key principles, concepts, and methodologies for effective supply chain management. Supply chain management is the integration of core business processes from the end user through original suppliers that provides products, services and information that add value for customers. The systems viewpoint and a process orientation are explored at the firm level and from the perspective of inter-firm collaboration among participants in supply chains. Case studies explore supply chain management and its critical role in business. The course provides opportunities to investigate important topics such as the bullwhip effect, the key approaches to planning and managing inventory across supply chains, the creation of value through alignment and realignment of supply chain capabilities, and the key supply chain performance metrics.

After completing this course, students should have the knowledge, skills, and abilities to:

a. Articulate the essential principles and concepts of the supply chain approach
b. Understand the potential role of supply chains in creating value and in sustaining competitive positions of firms
c. Explain the impact of the bullwhip effect on supply chain performance
d. Understand the underlying causes of the bullwhip effect and articulate the principal approaches to ameliorating its impacts on supply chain performance
e. Articulate differences in the principal approaches to managing inventories across supply chains
f. Articulate the principal benefits and challenges associated with collaborative approaches to supply chain management
g. Understand the principal metrics used to manage supply chain performance

The Pennsylvania State University
The evaluation of students is based on small team case study submissions, short paper and problem assignments, on-line discussion postings, and peer reviews.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2007

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 810 Transportation and Distribution (4) Role of transportation and distribution operations in matching supply with demand; principles of transport industry analysis and competitive positioning.

SCM 810 Transportation and Distribution (4)
The course is set against a background of microeconomic theory and in a framework of supply chain management. Course design is directed toward graduate students with relatively little or no previous academic work in transport management and economics. Subject coverage includes both conceptual and applied material, such as the principles of industry analysis and competitive positioning; theory and practice of transport demand, costing, pricing, and revenue and demand management in distribution settings.

After completing this course, students should have the knowledge, skills, and abilities to:

a. Perform an industry analysis and assess a firm’s competitive positioning in its industry
b. Explain the principal categories of cost in a transport/distribution operation and how those cost categories behave with changes in the level of activity
c. Perform a basic activity-based costing analysis for a transport/distribution operation
d. Articulate the principal characteristics of transport demand
e. Understand the measure of price elasticity of demand and to use this measure to quantify the revenue impact of price changes
f. Articulate principal distribution strategies
g. Calculate a cost-based price and a differential price
h. Explain the principles and primary applications of revenue and demand management

The evaluation of students is based on small team case study submissions, individual short paper and problem assignments, on-line discussion postings, and peer reviews.

This course is a prescribed course for the on-line Master of Professional Studies in Supply Chain Management (MPS/SCM). The course is the second course in the first year of study, building on foundation knowledge developed in the first course but with a focus on the deliver portion of the supply chain.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2007
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 820 Strategic Procurement (4) Strategic planning for the source/buy process, including developing and managing supplier relationships, global issues, and e-procurement.

SCM 820 Strategic Procurement (4)
The course provides a special emphasis on the development and management of strategic sourcing relationships and promotes an understanding of the strategic role of supply management in effective supply/demand/value chain operations. Students learn through the application of course materials to relevant supply management case problems and scenarios. Collaboration in case preparation is required. Online discussions, “what if scenarios,” and contemporary problems enhance the learning experience.

After completing this course, students should have the knowledge, skills, and abilities to:

a. Understand the strategic role of supply management in effective supply/demand/value chain management.
b. Understand the potential impact of supply management on the competitive success and profitability of business organizations.
c. Articulate supply management best practices and understand the circumstances under which they work or do not work as well.
d. Understand key issues and approaches in relation to strategic supply management, including: supply relationship management, supply segmentation, and the outsourcing decision.
e. Plan and execute negotiation strategies.
g. Understand basic issues related to global sourcing.
h. Articulate the challenges and opportunities for supply management in the future.
The evaluation of students is based on small group case study submissions, individual case study submissions, a small group negotiation exercise, on-line discussion postings, and peer reviews.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2007
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 830 Supply Chain Analysis (2) Methods and tools to support supply chain decision making with emphasis on forecasting, inventory analysis, and demand planning.

SCM 830 Supply Chain Analysis (2)

Students in SCM 830 will manage competing firms in an action-learning simulation. In this simulation, students must make marketing, production, distribution, and procurement decisions for their firm. Students will develop analytic models to help support their decisions. Students will learn techniques for demand forecasting and inventory planning and build decision support tools to help make these decisions.

After completing this course, students should have the knowledge, skills, and abilities to:

a. Understand the interaction between supply chain operations and pricing and marketing efforts
b. Articulate the importance to firm performance of coordinated interaction among multiple functional areas associated with the supply chain
c. Use time series models and appropriate qualitative adjustments for demand planning
d. Use demand forecasts to make inventory decisions
e. Apply commercial spreadsheet software to develop forecasts and to make inventory decisions

Evaluation of students is largely based on student performance in the simulation, supporting models developed and justifications given for their decisions. Short written assignments and quizzes may also be used for assessment.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2007
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 840 Supply Chain Project Management (4) The fundamentals and tools of managing supply chain projects, with special emphasis given to related information technology projects.

SCM 840 Supply Chain Project Management (3)

This course explores the principles, concepts, and tools of managing supply chain projects, including project activity that requires a commitment of resources and people to an often strategically important undertaking that is not repetitive and short term. Special emphasis is given to IT related projects in supply chains.

After completing this course, students should have the knowledge, skills, and abilities to:

a. Articulate the critical project management elements and the sequence of these elements in bringing a project to fruition and success.
b. Charter and organize a cross-supply-chain project teams capable of achieving project success.
c. Use and apply the essential project management tools such as CPM, PERT, and Project to complete supply chain projects.
d. Determine project risks, costs, and advantageous alternative project paths.

Evaluation methods include a combination of written assignments and case studies, exercises, projects, and on-line discussion postings.

This course is a prescribed course for the on-line Master of Professional Studies in Supply Chain Management (MPS/SCM). The course is taken in the second year of study, building on supply chain management knowledge developed in three foundation courses taken in the first year.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2007
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 850 Supply Chain Design and Strategy (4) Design and management of supply chain networks, emphasizing the alignment of supply chain networks with corporate competitive strategy.
SCM 850 Supply Chain Design and Strategy (4)

The focus of this course is the strategic design of supply chain networks. Supply chain design decisions have extraordinary impact on the cost and service value attributes of a product or service over its lifetime. The influence of supply chain design on a firm's profitability and competitive positioning is one reason why competition today extends beyond firm versus firm to supply chain versus supply chain. Supply chain design decisions are among the most financially influential and long lasting business decisions and yet, supply chain designs should not be static. Ever increasing customer requirements, expanding product lines and customer segments, decreasing product life cycles, and competitive pressures enabled by a growing range of flexible supply chain design constantly force supply chain executives to evaluate and modify their current supply chain networks and the role of the supply chain in their firm's overall strategy.

This course provides an examination of (1) the role of supply chain network design within the context of the firm's competitive strategy, (2) alternative supply chain designs and the factors that influence network design decisions, (3) a framework for the network design process, and (4) the principal models and techniques used for making network design decisions.

After completing this course, students should have the knowledge, skills, and abilities to:

1. Explain the importance of achieving strategic fit between a firm's competitive strategy and the design of the firm's supply chain network.
2. Describe the basic decision making framework for achieving strategic fit.
3. Identify the key questions in network design for supply chains.
4. Identify the principal supply chain network design alternatives.
5. Enumerate the principal factors influencing choices among alternative supply chain designs.
6. Present a framework for the supply chain network design process.
7. Examine the principal models and techniques used for making network design decisions.
8. Consider the influence of demand and supply uncertainties on network design choices.

Evaluation of students is based on individual and team case study submissions, a culminating simulation exercise, on-line discussion postings, and peer reviews.

This course is prescribed for the on-line Master of Professional Studies in Supply Chain Management (MPS/SCM) and its taken in the second year of study, building on the supply chain knowledge, skills and abilities developed in previous foundation courses.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2007
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SCM 860 Supply Chain Transformation and Innovation (4)

Strategic supply chain transformation and innovation with emphasis on (re)configuration of key capabilities to achieve competitive advantages.

SCM 860 Supply Chain Transformation and Innovation (4)

This course focuses on strategic supply chain transformation, innovation, and organizational change. The course examines current issues and best practices with respect to supply chain strategy; value creation through design and redesign of supply chain capabilities; transformational outsourcing; supply chain role in new product development, and market introduction; technology adoption; and change management. Supply chain transformation initiatives offer firms great potential for improving profitability and competitive positioning, both within the market and within the supply chain. Because sustainable competitive advantage is not found in one set of supply chain capabilities, strategic transformations must constantly assemble and reassemble the key capabilities that give the firm and its supply chain successive temporary advantages. This assembling or redesigning of capabilities chains should be an on-going process as the most significant value producing capabilities in any given industry change over time. The ability to consistently assemble the set of capabilities that produce competitive advantages is what some refer to as the ultimate core capability.

After completing this course, students should have the knowledge, skills, and abilities to:

1. Articulate the meaning of competitive strategy in the context of transformation of supply chain capabilities chains.
2. Understand value creation through transformation of supply chain capabilities over time.
3. Identify the supply chain structure that is appropriate for various business situations.
4. Examine the development of essential elements of rapid response supply chain capabilities.
5. Understand the conditions under which functional activities, such as, manufacturing, product design, and new concept development, are amenable to outsourcing.
6. Assess operational and strategic challenges of vertical integration and outsourcing and in particular, highlight the nature of the strategic tension created by supplier decisions to integrate vertically into capabilities previously performed by critical customers.
7. Articulate the role of supply chain transformation in support of new product development.
8. Identify ways to organize and lead change in organizations.

The evaluation of students is based on individual and team case study submissions, short paper and problem assignments, on-line discussion postings, and peer reviews.

The Pennsylvania State University
This prescribed course in the on-line Master of Professional Studies in Supply Chain Management (MPS/SCM) is the capstone course taken in the second year of study that integrates previous topics.

**SCM 894 Research Topics (1-15)**

Supervised student activities on research projects identified on an individual or small-group basis.

**SCM 896 Individual Studies (1-9)**

Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

**SCM 897 Special Topics (1-9)**

Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

**SCM 898 Special Topics (1-9)**

Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

**Supply Chain and Information Systems (SC&IS)**

**SC&IS 505 Management Information Systems Research (1-3)**

Research problems and issues in supply chain and information systems.

This is a Ph.D. level course designed to familiarize students with information systems theories and research.
methodologies. Special emphasis is given to the design science paradigm and, specifically, to process and data modeling of information systems problems using techniques like UML, XML, and Petri-nets. In addition, workflow systems as an application of process modeling will be studied. After completing this course, students will have the knowledge, skills, and abilities to discuss and critically reflect on:

a) Information system research paradigms
b) Information system modeling techniques
c) Coordination theory
d) Workflow models, management and architectures
e) Information systems in supply chains

This is a prescribed research foundation course. Student evaluations are based on class participation, individual and group assignments, and exams. This course will be offered during Fall semester for 5-10 students.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SC&IS 510 Introduction to Supply Chain and Information Systems (3)

This course introduces the strategic framework, the managerial issues, and the methodologies for integrating supply and demand management within and across companies. Both theoretical and quantitative perspectives will be offered on these topics. Additionally, each topic will be addressed from strategic, financial, and research perspectives. After completing this course, students will have the knowledge, skills, and abilities to discuss and critically reflect on:

a) supply chain theories, methodologies, trends, best practices, and research issues
b) core supply chain processes
c) strategic and financial impacts of supply chain management
d) role of information systems

This is the first of four prescribed foundation courses. Student evaluations are based on class participation, individual and group assignments, and exams. This course will be offered during Fall semester with resident enrollment limits set at 20 students.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SC&IS 516 (I E 516) Applied Stochastic Processes (3)

This course covers the mathematical fundamentals and tools for analyzing stochastic systems evolving over time, including concepts and techniques related to Poisson Processes, renewal processes, and discrete and continuous time Markov chains. Students will also learn to build probabilistic intuition and insights when thinking about random processes. Additionally, students will learn to apply the essential techniques of stochastic processes to real world problems in the supply chain and information systems area.

This is a prescribed research foundation course for Ph.D. students in SC&IS. Student evaluations are based on class participation, individual and group assignments, and exams. This course will be offered during Spring semester to approximately 5-10 students.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006

Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SC&IS 519 (I E 519) Dynamic Programming (3)

Theory and application of dynamic programming; Markov decision processes with emphasis on applications in engineering systems, supply chain and information systems.
SC&IS (I E) 519 Dynamic Programming (3)

This course presents the basic theory and applications of dynamic programming. The focus of the course will be on the theory of Markov decision processes (MDP), which provides an analytical tool to optimally control the behavior of a Markov Chain. The students will learn fundamental MDP models, computational methods and applications in supply chain and information systems, including production and inventory control, quality control, logistics, scheduling, queueing network, and economic problems.

Student evaluations are based on class participation, individual and group assignments, and projects. This course will be offered during Spring semester for approximately 5-10 students.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006
Prerequisite:

SC&IS 520 Principles of SC&IS I (3) Initial course on principles of supply chain and information systems with special emphasis on potential research topics.

SC&IS 520 Principles of SC&IS I (3)

This is the first of two courses covering principles, research problems and issues in supply chain and information systems. The course familiarizes students with a wide range of appropriate research topics and prepares them to initiate doctoral level research in these areas. Topics include: logistics network design, transportation and distribution, management production and inventory management, supply chain integration and coordination, workflow systems, and process and data modeling of information systems.

Evaluation methods include homework assignments, research paper(s), presentations, and class participation and discussion.

Offered in the fall semester only. SC&IS 510 is a prerequisite.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SC&IS 525 Supply Chain Optimization (3) Introduction to theory and practice of optimization methods and models for analyzing and improving the performance of supply chain environments.

SC&IS 525 Supply Chain Optimization (3)

This course introduces students to the optimization methods and models that are applicable to managing supply chains and provides a quantitative foundation for research in supply chain management. The primary objective is to investigate the theory and practice of optimization methods, especially as they apply to managing large, interconnected supply chains. The investigation includes mathematical programming techniques, modeling approaches, and optimization languages.

This is a required course for Ph.D. students in SC&IS and an element of a set of methodological courses designed to provide a framework for analytical study of supply chain management. The course may also serve graduate students in related fields of study. Student evaluations are based on individual and group assignments or projects and examinations. This course will be offered during Spring semester to approximately 5019 students.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SC&IS 530 Principles of SC&IS II (3) Sequel on principles of supply chain and information systems with special emphasis on potential research topics.

SC&IS 530 Principles of SC&IS II (3)

This sequel to SC&IS 520 is directed at first and second year Ph.D. students in the SC&IS program. Other graduate students are welcome to attend with instructor’s permission. The objectives are to (1) study supply chain and information...
system principles, (2) expose students to a wide range of appropriate research topics, and (3) prepare students to conduct doctoral level research in these areas. Topics include planning, integration, and coordination; value and impact of information; game theory models, auctions, and behavioral issues.

Evaluation methods include homework assignments, research paper(s), presentations, and class participation and discussion.

This is the second part of a two-course sequence covering research problems and issues in supply chain and information systems. Offered in the spring term only. SC&IS 510 is a prerequisite.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SC&IS 535 Statistical Research Methods for Supply Chain and Information Systems (3)

This is a Ph.D. level course that requires in-depth study of statistical research methods for observational analysis and modeling of supply chain and information systems. Special emphasis is given to five methods of statistical inference:

a) Estimation
b) Comparison of K-groups
c) Forecasting
d) Data mining
e) Decision-making under uncertainty

Student evaluations are based on class participation, individual and group assignments, and exams. This course will be offered during Fall semester for approximately 5-10 students.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SC&IS 540 Transportation and Distribution Management (3)

This course focuses on the role of transport and distribution systems in new supply chain business models, with special emphasis given to total order management. Transportation system topics cover economic conditions, managerial strategies, governmental policies, and other phenomena, which affect the demand for and supply of transport and distribution services. Course design is directed toward graduate students with relatively little or no previous academic work in transport management and economics. Student evaluations are based on class participation, individual and group assignments, and exams. This course will be offered during the Fall semester with resident enrollment limits set at approximately 20 students.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SC&IS 545 Supply Chain Systems Simulation (3)

This course will provide an introduction to Monte Carlo and discrete-event simulation. Material will be aimed at the students who need to use simulation as a research tool at a sophisticated level. Although the focus of the course is the application of simulation to the analysis and design of supply chain and information decision systems, the material in this course will be appropriate for a much broader range of applications. Some time will be spend constructing simulation models of real-world systems, but the bulk of the course will be devoted to the statistical analysis required for correctly
specifying input processes and interpreting the output of simulation models.

This is an elective course for graduate students in SC&IS, which may also serve graduate students in related fields of study. Student evaluations are based on a series of classroom assignments. This course will be offered during Spring semester to approximately 5-10 students.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006
Prerequisite:

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**SC&IS 546 Procurement and Supply Management (3)**

Analysis, planning, and management of domestic and international procurement and supply activities.

**SC&IS 546 Procurement and Supply Management (3)**

SC&IS 546 provides an overview of procurement and supply management in the context of domestic and global supply-chain networks. Special emphasis is given to strategic sourcing relationships, supply management “best practices,” and E-perspectives on supply management. The course uses problem-based learning and emphasizes the case method. The goal is to learn through the application of course materials to relevant supply management case problems and scenarios. Collaboration in case preparation is required. Student evaluations are based on class participation, individual and group assignments, and exams. This course will be offered during the Fall semester with resident enrollment limits set at 20 students.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**SC&IS 560 Seminar in Transport Economics and Policy (3-6)**

Comparative analysis of theoretical and empirical studies in transport cost, demand, pricing, and policy problems.

**SC&IS 560 Seminar in Transport Economics and Policy (3-6)**

This course is designed for Ph.D. students interested in intensive study of transportation economics and policy research and current issues. Student evaluations are based on class participation, individual and group assignments, and written exams. This course will be offered during the Spring semester with resident enrollment limits set at approximately 20 students.

General Education: None

**SC&IS 570 (I E 570) Operations Research in Supply Chains (3)**

Use of operations research models and methods for solving
problems in supply chain systems.

SC&IS (I E) 570 Operations Research in Supply Chain (3)
The course provides an understanding of how operations research methods and techniques, such as linear programming, network models, dynamic programming, inventory models, integer programming, help solve problems in supply chain systems. Students are expected to have a basic knowledge of both deterministic and probabilistic models in operations research. The course is appropriate for graduate students interested in working in the supply chain area in industry as well as planning to pursue research in supply chain optimization. The course grade will be based on a set of "hands-on" problem exercises (25%), a semester project (20%), a mid-semester examination (25%) and a comprehensive final (30%). This cross-listed course will be taught in the fall. Anticipated enrollment per semester is 40 students.

SURG 745 (PED 745) Pediatric Cardiothoracic Surgery Elective (5) This fourth-year elective provides an introduction to the operative repair and peri-operative management of simple and complex congenital heart disease.

SURG (PED) 745 Pediatric Cardiothoracic Surgery Elective (5)
This elective in pediatric cardiothoracic surgery is offered to fourth-year medical students with an interest in congenital heart disease. It is principally targeted at students who plan a career in pediatrics, surgery, or pediatric or adult cardiology. The course is offered year-round on a monthly basis, with enrollment limited to 1-2 students per rotation. Students will work exclusively with attending surgeons in the clinical environment, and will participate in the comprehensive surgical management of infants, children, and adults with congenital heart disease. Clinical exposure will be provided to the initial surgical consultation, the judgment and rationale for operative versus non-operative
management, the preoperative family counseling meeting and informed consent process, and the formulation of the
operative plan. In the operating room, students will second-assist with pediatric heart surgery and will gain first-hand
appreciation of the anatomic defects and their surgical repair. Postoperatively, students will participate in clinical rounds
on pediatric surgery patients, and will follow the patients to discharge. The elective will emphasize the
multi-disciplinary approach to the management of congenital heart disease, with collaborative exposure to pediatric
cardiology, pediatric critical care, cardiac anesthesia, and cardiology for adults with congenital heart disease. Didactic
lectures, case presentations, and reviews will be provided to students as an introduction to the major heart defects.
Students will gain skill in the interpretation of echocardiograms, and will have the opportunity to view, in real-time,
 intraoperative transesophageal echo images, and correlate those images to the live, beating heart. Students will also gain
skill in interpretation of cardiac MRI and CT angiography. The course is offered as an elective for students seeking an
advanced introduction to surgery for congenital heart defects. The course is not intended as an acting-internship; thus,
there is no in-house call, and limited night or weekend clinical requirements. A pre-test and a post-test will be
administered.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2009
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details

SURT 770 Otolaryngology Acting Internship (5) A clinical experience devoted to disorders of the ears, nose, throat, and
head and neck.

Otolaryngology Acting Internship (5)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2008
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details
check the specific course syllabus.

SURT 771 Otolaryngology - Head and Neck Surgery Elective for Third Year Medical Students (2.5) This course provides
exposure to basic concepts for diagnosis and management of ear, nose and throat problems in children and adults.

SURT 771 Otolaryngology - Head and Neck Surgery Elective for Third Year Medical Students (2.5)

This course is designed to introduce third year medical students to the basics of evaluation and management of patients
with ear, nose, throat and neck problems. Students on this elective will serve as an integral part of the Otolaryngology -
Head & Neck Surgery team. This rotation should serve to enhance the head and neck history and examination skills of the
student. Student will be expected to personally evaluate patients in the clinic, as well as possibly through the emergency
room and inpatient consultation service. Management of these patients will be discussed with resident and attending
faculty in formulating a treatment plan. Operative experience will be directed mostly towards routine ear, nose, throat,
and neck surgeries. More intense head and neck cases may be utilized as opportunities for head and neck anatomy
experiences for all students. For those expressing an interest in otolaryngology - head and neck surgery as a potential
career, operative experience can be tailored for the exposure necessary to demonstrate the breadth of otolaryngology -
head and neck surgery. Daily conferences and lectures will serve as formal didactics, in addition to the teaching
opportunities provided in outpatient clinics and inpatient rounds.

The goals of this elective rotation are to enhance head and neck skills and to reinforce for students the otolaryngologic
pathology they are likely to see in their clinical practice, regardless of specialty.

Evaluation methods will include subjective evaluation of students' funds of knowledge and patient care skills by the
attending otolaryngology - head and neck surgery faculty. This course will be offered throughout the entire academic
year.

Diversity: None
Bachelor of Arts: None
Effective: Spring 2012
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
SYSEN 530 Systems Optimization (3) Theory/practice of linear programming will be developed including determination of optimum mix of products, levels of staffing, blending, network analysis, multi-period planning.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2001
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SYSEN 531 Probability Models and Simulation (3) Provides background in modeling problems containing random components that must be accounted for in a reasonable solution.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2007

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SYSEN 533 Deterministic Models and Simulation (3) Provides a background in simulation and the modeling of problems that contain differential equations as part of the system.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2007

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SYSEN 536 Decision and Risk Analysis in Engineering (3) Analysis of engineering decisions under uncertainty; problem identification, formulation, judgment, resolution; mitigation, risk analysis, quantification and management.

This course examines the analysis of decisions under uncertainty within the context of engineering and technology. It focuses on understanding and improving the decision-making process of individuals and groups in technical organizations. Emphasis is placed on evaluation methods; identification, modeling, and problem resolution; consequences/outcomes of the action taken; risk analysis and quantification.

Objectives
1. To appreciate the theoretical foundations of decision sciences within the context of engineering data and problems.
2. To be able to explain and evaluate alternative perspectives of the decision making process.
3. To be able to identify sources of decision failure in individuals and organizations.
4. To gain an understanding of decision technologies in the context of engineering decision making.

Performance will be evaluated through a mid-semester written examination, homework (case studies) assignments, class participation, and a semester group project with an in-class presentation.

Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SYSEN 550 Creativity and Problem Solving I (3) Foundations of individual problem solving, including creativity, cognitive style and level, problem solving processes and techniques, the paradox of structure.

SYSEN 550 Creativity and Problem Solving I (3)

Problem solving is a fundamental human activity that is critically important to all disciplines. The primary objective of this course is to help students become better and more effective problem solvers through a basic, yet rigorous, understanding of the cognitive processes involved in problem solving and individual creative behavior. To meet this objective, selected elements of cognitive psychology are examined, along with general and domain-specific models of the problem solving process, a variety of problem solving techniques, and illustrative examples and case studies related to these topics in a variety of contexts (including science, engineering, and management). In addition, students will explore their personal preferences for problem solving strategies and the ways these preferences can impact both personal and professional life. Here, the objective is to provide students with an assessment of their strengths and weaknesses in the domain of problem solving, as well as the basis of understanding and appreciating the diverse problem solving abilities and styles of others.

With its focus on effective problem solving at the individual level, this course is appropriate for students in all disciplines and areas of study. It also serves as the foundation for additional courses in problem solving, which may build upon the theoretical elements presented here (e.g., group problem solving) or serve as in-depth application studies in specific topical areas (e.g., invention). Students’ performance in this course will be evaluated through written examinations and homework assignments, as well as class participation. This course will be offered at least once during each academic year.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

SYSEN 552 Creativity and Problem Solving II (3) Theory and practical applications of group problem solving, including cognitive gap, coping behavior, agents of change, and managing cognitive diversity.

SYSEN 552 Creativity and Problem Solving II (3)

This course builds on an understanding of the individual problem solver to address the dynamics of group problem solving, with a particular focus on the domains of science, engineering, and technical management. At the core of the course material is cognitive gap, i.e., differences in cognitive characteristics that may exist between problem solvers (both individuals and groups) and/or between problem solvers and the problems they solve. Students will explore the impact of different cognitive profiles on problem solving from multiple perspectives, including group efficiency, personal communication, and the quality of group outcomes. Strategies and tactics for improving the problem solving performance of groups of all sizes will be learned and applied using real-world examples and case studies. Upon completing this course, students will have a fundamental, rigorous understanding of cognitive diversity within groups and how it can be leveraged to make problem solving more effective. Skills learned will include: analyzing the cognitive resources of a problem solving group; breaking down complex problems based on cognitive variables; and matching cognitive resources appropriately with required skills.

With its focus on effective problem solving at the group level, this course is appropriate for students in all disciplines and areas of study. It also serves as the foundation for additional courses in problem solving, which may build upon the theoretical elements presented here (e.g., problem solving leadership) or serve as in-depth application studies in specific topical areas (e.g., invention). Students’ performance in this course will be evaluated through written examinations and homework assignments, as well as class participation. This course will be offered at least once each academic year.

SYSEN 554 Problem Solving Leadership (3) Models, processes, and techniques for solving complex problems, managing problem solving diversity, and facilitating change through problem solving in socio-technical systems.

SYSEN 554 Problem Solving Leadership (3)

As the problems faced by professionals become more complex, expertise in the domain of the problem must be supplemented with knowledge about the problem solver and the problem solving process. This course builds on an understanding of the individual problem solver and problem solving groups (and the individual’s role within them) to focus on the facilitation of complex problem solving within socio-technical systems, including the role of the problem solver. 

The Pennsylvania State University
solving leader within problem solving groups.

Students will learn and implement strategies for characterizing and coordinating the problem solving preferences and abilities of individuals and groups based on problem constraints and the solutions desired. Other topics and skill sets covered will include: systems models of leadership; practical leadership as problem solving; processes and techniques for characterizing complex needs, generating and assessing potential solutions, and evaluating problem solving outcomes; frameworks for modeling and coordinating problem solving diversity among people, problems, and products; and the modeling and facilitation of socio-technical change through problem solving.

This course is appropriate for students in all disciplines and areas of study, although it is particularly relevant for students in engineering, science, and/or management. Students' performance in this course will be evaluated through written examinations, homework assignments, and a class project that extends over the semester.

TAX 960 Employee Benefits Law (2-3) This course introduces students to the law governing employer-provided benefit programs. It will begin with a look at the early development of welfare and pension plans offered through the workplace. The course will examine closely the landmark Employee Retirement Income Security Act of 1974 ("ERISA") and its subsequent amendments. Among topics to be covered will be defined benefit and defined contribution pension programs. This will include a survey of rules relating to pension taxation, vesting, funding, alienability, guaranty, and fiduciary duties. With respect to health insurance, the course will look at issues affecting both employee and retiree health programs, including collectively bargained ones. The course will also discuss the subjects of age discrimination in employee benefit programs as well as ERISA preemption.

General Education: None
Diversity: IL
Bachelor of Arts: Arts
Effective: Spring 2008
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

THEA 402 Theatre History II: From 1700 to Present (3) Survey of European drama and theatre from the eighteenth century through the modern period.

THEA 402 Theatre History II: From 1700 to Present (3)

A survey of drama and theatre from the seventeenth century through the modern period. The course is a sequential second half of the history of world theatre. Beginning with the post-Shakepearean era, students study major theatre movements in play writing, acting, theatre architecture and design. Some eras include the English Restoration and Georgian periods, the French Neoclassical period, German Romanticism, and the rise of the Beijing Opera. In addition, emerging post-colonial theatres of Africa and Asia will be explored. For each major era or movement, a play by one of the acknowledged masters of the form will be read and discussed in class. Students will write brief responses to their assigned readings, as well as experience a variety of assessment techniques.

THEA 412 (US;IL) (AF AM 412) African American Theatre (3) Exploration of the development of African American theatre from its roots in Africa through the diaspora, to the present time.

THEA (AAA S) 412 African American Theatre (3) (US;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

In this course, we will explore the development of African American theatre from its roots in Africa and Europe, through the diaspora, to the present time. We will learn something of the rich diversity of African American people and their contribution to the world's creative mainstream. We will become acquainted with both historical and contemporary artists who created and continue to create this unique American art form. The goals of the course are:
1) to develop familiarity with African American theatre and the socio-historic context in which it was created
2) to develop an understanding of the relationship of African American theatre to mainstream American theatre
3) to acquire an appreciation of the schools, styles, and techniques of African American theatre

We will do this by reading and engaging plays in the context of the period in which they were created, viewing films of plays, and attending relevant productions where possible.

THEA 423 Musical Theatre Performance III (2) Studio training in the unique performance skills, repertoire and business of professional musical theatre.

THEA 423 Musical Theatre Performance III (2)
This course meets the Bachelor of Arts degree requirements.

In depth preparation and performance of scenes from the works of Sondheim and Webber. Also, exploration of the adjustments needed to perform successfully in non-traditional performance venues.

The third in a musical theatre performance studio sequence, THEA 423 applies performance technique and methodology studied in previous studio classes to the works of contemporary composers, particularly Stephen Sondheim and Andrew Lloyd Weber. The course also explores the adjustment to performance needed when working in non-traditional stage spaces such as ballrooms, cruise ships, and industrials.

THEA 423 is a continuation of Musical Theatre Performance II. These studios represent the core of the musical theatre training program. Grading will be based on the quality of the musical theatre student's studio work, report, and demonstrated respect for the professional studio environment.

THEA 424 Musical Theatre Performance IV (2) Studio training in the unique performance skills, repertoire and business of professional musical theatre.

THEA 424 Musical Theatre Performance IV (2)

This studio is designed for senior musical theatre majors to hone their skills in acting, singing, and dancing in the last semester of their college career. The majority of the class will be the preparation of the Senior New York Showcase where each student will have the opportunity to perform for an invited audience of agents, alumni, and special guests. Students are responsible for all research and preparation of showcase material. Showcase material will be coached in class, but the main body of preparation relies on the students themselves, utilizing skills and techniques learned throughout their studio training.

Grading will be based on attendance, preparation, and attitude. These are all critical factors for entering the profession and for successfully completing this course. Deadlines and appointments must be kept. Students must do adequate outside preparation.

THEA 424 is a continuation of Musical Theatre Performance III. These studios represent the core of the musical theatre training program.

THEA 425A B.F.A. Acting Studio II (2) Scene Study

THEA 425A B.F.A. Acting Studio II (2)

THEA 425A is a laboratory or practicum course requiring active student presentation of work in progress for critiques by the instructor and input from peers. Working in pairs, students will be assigned a five-minute scene from modern American realism. Students must read the play from which the assigned scene is taken, do the necessary historical/analytical homework, develop a character biography and a scene score, and present the result of their work in the initial on-the-feet working sessions for faculty critique and peer input. Taking away responses from each working session, the students are expected to rehearse outside of class to address any issues raised in the previous working session and to ready the scene for the next viewing.

In THEA 425A, the instructor will serve, not as a director, but as an acting coach, asking probing questions and using his or her own energy to exhort, guide, and discipline the students. It is expected that faculty intervention will decrease and student self-reliance will increase with each passing studio.

THEA 425C B.F.A. Voice/Speech Studio II (2)

In THEA 425C, B.F.A. Musical Theatre students will continue to develop and expand their vocal instrument. Basics of vocal production will be repeated and developed with a greater focus on the individual actor’s application of his/her voice in the performance of various texts.

The first ten weeks will recall the basics of the past two semesters of voice/speech work and continue to expand the actors' capabilities. Extended work in the area of breath support and release, resonance and vocal range, and speech/articulation will all be explored with appropriate texts.

In the last five weeks of the semester, work will focus on text in the performance setting. A short program of text performances will be devised and presented in the last week of class.

THEA 427C B.F.A. Voice/Speech Studio III (2) Stage Dialect Studies

THEA 427C B.F.A. Voice/Speech Studio III (2)

THEA 427C focuses on the acquisition of stage dialects and accents. For each dialect the student becomes aware of the resonance, phonetic, inflection, and rhythm changes necessary to perform dramatic text with an accent or dialect. Vocal agility, phonetic recall and the ability to integrate the altered vocal behavior to the demands of acting are the primary goals. Each dialect unit will have an introductory instruction, a review session, and a presentation of a reading of a dialect monologue. The final project will be the performance of two dialect monologues.

Students will be evaluated upon preparedness, work ethic, focus, openness to change, growth, degree of self-reliant recall, and creative application of new skills. This studio performance class offers opportunity for assessment from the instructor in each class session. Periodic assignments will be made to assess self-reliant application of the work.

**THEA 450 Advanced Topics in Scene Design (3 per semester/maximum of 6)**

(BA) This course meets the Bachelor of Arts degree requirements.

This course will build upon the basic design process introduced in THEA 250. Students will explore design solutions for shows requiring multiple locals. Students will also be introduced to shows reflecting a variety of dramatic styles and will explore effective design solutions within stylistic constraints. In addition to previously introduced graphic skills, emphasis will be placed on graphic techniques involved in the production of scenery, including design drafting, prop drawings, and paint elevations.

As this course may be repeated, there will be a rotation of topics to ensure that students receive different content each semester. Topics within the rotation may include:
- Design for Shakespeare, unit settings
- Design for Musicals, practical and stylistic concerns
- Design for Opera
- Design for shows requiring simultaneous local
- Poetic or fragmented realism
- Design for contemporary episodic scripts
- Epic theatre design

THEA 458 Digital Imaging for the Theatre (1) Introduction to imaging software and its application in theatrical design and production.

Digital Imaging for the Theatre (1)

This course will provide students with an introduction to digital imaging software and explore the use of this software in the theatrical design and production process. An introduction to Photoshop or similar programs will make up the first part of the course. As part of the introduction to software, course time will be devoted to image acquisition using techniques such as Web based research, scanning, and use of the digital camera. The remainder of the course will focus on applying imaging software to the process of evolving and presenting designs for scenery, costumes, and lighting. Design presentation will include output of images for applications such as projection, Web pages, and both large and small-scale printing.

Students will execute a number of projects that will be turned in digitally to the instructor. Each project will have a specific objective and the grade will be outlined in a comment sheet.

THEA 459 Theatre Portfolio & Business Practices (2) Life as a professional theatre designer. Contracts, taxes, record-keeping, resumes, portfolios, interviewing, job hunting, and legal considerations.

Theatre Portfolio & Business Practices (2)

This course meets the Bachelor of Arts degree requirements.

This course is designed to prepare the student of design for life as a professional theatre designer. There are many
challenges to working in the business of design, arising primarily from the fact that most theatre designers are self-employed. It’s not enough to be a talented designer; one must also be a savvy business person. Contracts, taxes, recordkeeping, resumes, portfolios, interviewing, job hunting, and legal considerations will all be addressed, as they relate to life as a freelance designer. Special attention will be paid to the assembly of a professional portfolio, which is the centerpiece of any designers’ work.

Bachelor of Arts: Arts
Effective: Spring 2006
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

THEA 460 Advanced Topics in Costume Design (3 per semester/maximum of 6)
Developing and executing a design concept in a variety of the performing arts.

THEA 460 places emphasis on the use of text analysis and extensive historical research to make artistic choices as a costume designer in a production of a classical play, opera, or dance. Plays of this sort are of a size and scope not often found in contemporary material, which places exceptional demands on a designer. This course investigates the manner in which the theatrical imagination can be liberated to fulfill the particular requirements of classic theatre, opera, and dance.

The course will require several large-scale projects that reinforce the costume design process in a variety of the performing arts. Each area of work within a project is separately graded. These projects will contain written segment components such as a design statement or character analysis, an oral presentation or explanation of the designer’s choices and process, and (where applicable) a demonstration of the fully realized costume renderings.

The student is expected to master the process that takes a costume designer from reading a script (or listening to a piece of music) to the creation of a design concept to the visual presentation of renderings from which clothing can be constructed. Particular emphasis is placed on developing the oral presentation skills necessary to communication with the director and other theatre artists.

Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

THEA 461 Advanced Topics in Costume Construction and Technology (3 per semester/maximum of 6)
A specialized course in advanced costume construction techniques and theatrical costume technologies.

THEA 461 addresses the skills and techniques of theatrical costume construction necessary for the undergraduate student to understand and master in preparation for work within a professional costume setting. Emphasis is placed upon the creation of an historic silhouette as illustrated by a theatrical costume rendering for both men and women, with an eye to theatrical execution. Focus is placed on the production of clothing, as well as the creation of theatrical properties and accessories for the historic figure.

The course will require several large-scale projects that reinforce the costume construction process in a variety of historic eras. Each area of work within a project is separately graded. These projects will contain supporting research and examine the understanding and identification of construction and accessory techniques as manifested in the costume rendering.

A student’s approach to problem solving, personal process, communication skills, and successful time management will also be addressed.

THEA 464 History of Fashion (3) Survey of dress from Egyptian period to contemporary fashion.

History of Fashion (3)
THEA 465 History of Fashion II (3) Survey of dress from 1800 to contemporary fashion.

THEA 465 History of Fashion II (3)

(BA) This course meets the Bachelor of Arts degree requirements.

The course is the second part of the history of fashion that is an elective for graduate theatre students, is required for the B.F.A. Costume Design emphasis, and is an elective for the undergraduate theatre minor. The goal of the course is to identify and examine movements and trends in clothing and fashion from 1800 to the present. Each period is studied by using primary sources, slide presentations, and actual garments to illustrate the relationship between clothing and broad social, historical and artistic developments. Emphasis will be placed on plays that serve as particularly good examples of a period or style of fashion covered in the course.

Grading will be based on periodic quizzes covering topics from class lectures, slide presentations, and textbook readings. There will be one oral presentation, a written comprehensive final exam, and assigned graphic presentations or "redrawings" of clothing pieces.

To complete these "redrawings" the student will find a primary source or a photographic reproduction of a primary source and "redraw" the garment. For example, a student may find a painting, a sculpture, or photo of a garment (usually on a figure) that represents the period being discussed in class. The student would then "redraw" or copy that image, not trace, for the purposes of identifying the clothing pieces that are shown in the original. The "redrawings" are graded not on the student's ability to draw but rather on the content, detail, and thoroughness of the pencil sketch.

THEA 466 Costume Construction for Production (1 per semester/maximum of 6) Execution of production projects in construction and shop management.

THEA 466 Costume Construction for Production (1 per semester/maximum of 6)

THEA 467 Costume Design for Production (1 per semester/maximum of 6) Design and execution of production design projects.

THEA 467 Costume Design for Production (1 per semester/maximum of 6)

THEA 470 Advanced Topics in Lighting Design (3 per semester/maximum of 6) Advanced Topics in Lighting Design will rotate through opera, dance, non-traditional spaces, architecture, advanced technology, and color theory.

THEA 470 Advanced Topics in Lighting Design (3 per semester/maximum of 6)

(BA) This course meets the Bachelor of Arts degree requirements.

Advanced Topics in Lighting Design will utilize a rotating curriculum and may be taken twice for credit. Topics will include lighting design for opera, dance, non-traditional spaces, architecture, advanced technology, and color theory. Students will also learn to write and critique their own work, as well as the work of others, and to speak knowledgeably...
about design topics. There will also be some flexibility to allow students to pursue individual interests and group-directed projects.

**THEA 472 Lighting Technology (3)**

THEA 472 is an introduction to the basics of electricity, dimmer protocols, lightboard programming, lighting paperwork, and master electrician & assistant lighting design practices. This course will help prepare theatre designers to understand the inner workings of all of the equipment, working practices and safety requirements that are involved with the business of lighting design. This course will also provide students with many of the skills needed to get their foot in the door and get started in the business.

Special attention will be paid to safety, stressing the need for safe working practices and environments over the need to get the show up no matter what.

Students will learn how all of the advanced technology that is being introduced to the world of lighting functions and how these new technologies are all integrated into a functional system.

Students will serve as master electricians and/or as assistant lighting designers as part of the hands-on production aspect of the class, with ample time devoted to process discussions and post-show critiques of the work. Small-group problem solving and system troubleshooting will be discussed in depth and applied to real production situations.

THEA 484 Sound Recording Techniques (3) Multi-track audio recording and post production techniques.

THEA 484 Sound Recording Techniques (3)

THEA 484 will provide fundamental skills in recording an audio production.

The first four weeks will cover basics of current recording equipment, basic microphone theory and placement according to principles of sound propagation within performance spaces.

The second four weeks will expand on the principles of the first four weeks, considering the problems of recording in a variety of different locations and specific techniques for recording particular instruments.

The final seven weeks will focus on work within a recording studio. Students will need to configure a mixer with a multi-rack digital recorder and create a mastered CD with all appropriate post processing (EQ, compression, reverberation, etc.).

Students will work on teams for various recording projects, with one student serving as producer for each, so that they gain a comprehensive knowledge of the various duties involved in setting up and operating recording equipment.

Team projects will make up the majority of the grading for the class. Periodic quizzes will be administered in order to check the progress of the students and ensure their comprehension of the material. Each student will complete a final project in lieu of a final exam. During the production of this project, they will also be expected to serve in ancillary roles for their classmates’ projects. Their participation in these other projects will be considered in the grading of their final project.

**THEA 510 Experiential Analysis of Period Style (3)**

This course is taught in tandem with the second course of the core sequence on text analysis and dramatic literature required of all graduate students in the School of Theatre. As the course is offered only in London, England, it also functions as a core component of the international field studies program. Prior to taking up residence in England, students will explore films and dramatic texts set in periods ranging from the middle ages to the present day. Discussion will focus on the historic context for each dramatic work. Topics covered will include background information on historical events, an introduction to the visual world of each period, and the social/cultural ideology reflected in the period design.

While in England, students will participate in tours of museums and historical sites. Class discussion will focus on establishing connections between the social/cultural content previously presented and the tactile, spatial experiences gained through seeing actual sites and artifacts from each period.

The primary objective of the course will be to enhance the practical and intuitive understanding of period dramatic action in theatre students of all disciplines by guiding them through actual experience of period artifacts and spaces.

THEA 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

THEA 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

THEA 597D NY Experience (1) NY Experience of MFA Directing Students.

THEA 600 Thesis Research (1-15) No description.
THEA 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Teaching of theatre and film classes under senior faculty supervision.

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

THEA 811 International Studio Intensive (1-9 per semester) The course enhances the ability of the actor to meet the voice and speech demands for the performance of Shakespeare.

The objective of the course is two-fold. The first part of the class deals with the vocal skills necessary for successful acting of the Shakespearean play. The actors work on a series of rigorous voice and speech exercises, and master an intense and complete warm-up that prepares them to deal with the text. The second portion of the course deals with the play-script itself and examines the relationship between the voice and the text. Working with sonnets and monologues, the student is introduced to scansion, imagery, alliteration, and other text-related skills.

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

THEA 811A International Production Studio Intensive (1 per semester/maximum of 9) Intensive studio application of processes and procedures within specific theatre disciplines as influenced by the work of international professionals.

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
THEA 820B Movement for Actors I (2) Techniques and skills in physical expression, awareness, control, and stage movement.

THEA 820B Movement for Actors I (2 per semester)
A fundamental movement class designed to strengthen, prepare, and align the body for maximum freedom of expression. Emphasis is on concentration, flexibility, balance, coordination, relaxation and sensitivity to the impulses stimulated from outer and inner resources. Techniques may include but are not limited to time tested modalities such as Yoga, Alexander, Tai Chi, Pilates, Feldenkrais, and Modern Dance. Included in the course are units on nutrition, time management, and the proper care and maintenance of the physical instrument. Students will be evaluated according to their acquisition of skills and professional attitude.

THEA 820C Voice and Speech I (2) Vocal techniques for the actor: articulation, voice control, support, and projection.

THEA 820C Voice and Speech I (2)
THEA 820C is the first in a sequence of voice and speech courses for the actor. This first semester installment will focus on awareness and conditioning activities related to breath, posture, resonance and articulation. Prose and poetry readings will be used for application activities. Students will experience activities that will heighten their physical awareness of vocalizing. Most activities will involve a re-learning of how they speak, bringing to their conscious awareness the processes of voice/speech which were initially learned through early childhood nurturing. Class events will include awareness of breath patterns and the means to release inhibitive behaviors related to spinal posture, head and neck alignment, and musculature along the breath/vocal tract. Students will also gain awareness of how breath relates to their expressive/emotional system.

THEA 821A Acting II (3) A continuation of THEA 520A.

THEA 821A Acting II (3)
The foundational work of the first semester continues with its application to scripted material, primarily drawn from contemporary drama. The actor's skills in contact, communication, and inventiveness are further developed, along with personalizing the given circumstances of the dramatic text. The concept of "character: is introduced and students will begin the exploration of bringing truthful behavior to viewpoints different than their own. Each student will be paired with an acting partner and perform three scenes during the semester. A written, comprehensive script and character analysis will be required for each scene. Critiques of each actor's work will be given on a daily basis and the student will be expected to rehearse outside of class to address any issues raised and to have them remedied for the next viewing.
THEA 821B Movement for Actors II (2)
Through the study and discipline of learning precise corporeal skills, the actors gain confidence and clarity of expression. This clarity is applied toward the creation of mimetic illusions, mask-work, tableaux, and various animal and effort shaping studies aimed at developing characters for the stage. Characters may range from the fantastic to the most real. Improvisation and specific exercises are developed to encourage bold physical choices and the liberation of the creative imagination. Actors work in individual, team, and ensemble situations to apply techniques toward meaningful rendition of ideas.

Bachelor of Arts: None
Effective: Fall 2007
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

THEA 821C Voice and Speech II (2) A continuation of THEA 520C.

THEA 821C Voice and Speech II (2)
THEA 821C is the second in a sequence of voice and speech courses for the actor. This second semester installment will continue the focus of voice/speech training addressed in THEA 820: focus on awareness and conditioning activities related to breath, posture, resonance and articulation. Prose and poetry readings will be used for application activities. Students will experience activities that will heighten their physical awareness of vocalizing. Most activities will involve a re-learning of how they speak, bringing to their conscious awareness the processes of voice/speech which were initially learned through early childhood nurturing. Class events will include awareness of breath patterns and the means to release inhibitive behaviors related to spinal posture, head and neck alignment, and musculature along the breath/vocal tract. Students will also gain awareness of how breath relates to their expressive/emotional system.

Class activities will also include physical awareness of the consonant and vowels sounds and their phonetic transcriptions. Each event will strive to improve actors’ intelligibility and increase musicality of speech. Through application assignments with word lists, sentences, poetry and prose, students will increase language sensitivity.

This semester will also address voice quality issues directly and how they relate to the above. Specific events will focus on vibratory awareness in primary resonators and how to apply this awareness in all vocal life. Issues of vocal health, projection and emotional demands will be addressed.

Students will be evaluated upon preparedness, work ethic, focus, openness to change, growth, degree of self-reliant recall and creative application of new skills. This studio performance class offers opportunity for assessment from the instructor in each class session. Periodic assignments will be made to assess self-reliant application of the work.

THEA 822A Acting III (3) This course will focus on the research and development of skills necessary to perform the plays of Shakespeare and his contemporaries.

THEA 822A Acting III (3)
THEA 822A is designed to take the skills acquired in the movement, voice and acting studios in the first year of the graduate actor training program and apply them to the lush words, passionate images, and intense emotion required by the elevated texts of playwrights such as Shakespeare. The process requires the reduction of modern vocal and physical parasites and their replacement by a higher standard of speech and a classically open, expressive body. Truthful behavior in action is still the goal - the challenge is to embrace Shakespeare's truths.

In the weeks devoted to scene study, the actors must learn to be comfortable with classical works, to confront any predisposition about style, and see that their vocal and physical instruments need to be strengthened in order to fully play classical characters.

Because THEA 822A is a laboratory performance course, one in which students must be sharing what they are learning or performing on a daily basis, on-going assessment takes place through faculty feedback in working sessions, through faculty and peer critique of work presented, through an oral evaluation at mid-semester in conference with the graduate acting faculty, and through an extensive written evaluation and formal conference with the head of the School and the head of the acting program at semester's end. Other faculty will observe midterm and end of semester presentations to offer insights. Students thus receive assessment on many occasions in the course of the semester.

The Pennsylvania State University
THEA 822B Movement for Actors III (2) Advanced techniques and skills in physical expression.

THEA 822B Movement for Actors III (2)

Building upon the character work of the previous semester, actors delve into the specific demands of farcical comedy and the development of European clown characters. Comic devices, timing, exaggeration, and invention are studied and applied to specific texts dealing with farcical movement demands. Clown characters are devised and guided toward specific invention work aimed at developing skills needed for a wide variety of comic situations. Building upon the previous work, an ensemble improvisation piece is developed to enable actors to apply techniques to an invented world with many different and demanding situations. Linking to the classical work in the acting studio, the actors will finish with a unit dealing with comic and dramatic physical demands and pitfalls inherent in working within the world of Shakespeare’s plays.

THEA 822C Voice and Speech III (2) Advanced voice and speech training for the actor: articulation, resonance, and vocal technique related to verse and heightened language drama.

THEA 822C Voice and Speech III (2)

THEA 822C is the third in a sequence of voice and speech courses for the actor. This third semester installment will focus on review of speech and voice techniques and application of those techniques in the performance of Shakespearean drama text and other heightened language plays. Scansion of poetic meter, syntax, lexicon resources, and sound patterns will be the primary informative elements of vocal performance. Students will be assigned sonnets, monologues and scenes as vehicles for application in the studio.

Students will be evaluated upon preparedness, work ethic, focus, openness to change, growth, degree of self-reliant recall and creative application of new skills. This studio performance class offers opportunity for assessment from the instructor in each class session. Periodic assignments will be made to assess self-reliant application of the work.

THEA 823A Acting IV (3) Students prepare audition material for their New York Showcase for theatrical agents.

THEA 823A Acting IV (3)

The objective of the course is the selection, rehearsal, and performance of audition material for the New York Showcase for theatrical agents. Students begin the semester by bringing large amounts of potential audition material into a peer review format where their fellow students and the instructor, evaluate the monologues and scenes and give specific feedback on its suitability. During the course of the semester, the students decide on a core of eight monologues and four scenes from which the final Showcase will be crafted. The monologues are performed for the class and the School of Theatre faculty.

THEA 823B Movement for Actors IV (2) Fundamentals of unarmed and armed stage combat with emphasis on enactment of safe and effective stage fights.
THEA 823B Movement for Actors IV (2)

Actors learn the basics of unarmed and armed stage combat techniques. Applying the standardized and time-tested safety measures derived from the Society of American Fight Directors, each actor must master kicks, slaps, punches, grabs, holds, rolls, and all other unarmed techniques. They must also learn how to wield a quarterstaff, rapier and dagger, and broadsword with confidence; safely and effectively enacting various styles of stage combat choreography. Designed to train specific techniques while raising kinetic awareness, the course also introduces the historical background for each weapon style.

THEA 823C Voice and Speech IV (2) A study of stage dialects.

THEA 823C Voice and Speech IV (2)

THEA 823C is the fourth in a sequence of voice and speech courses for the actor. This fourth semester installment will apply the articulation, phonetics and resonance skills addressed in prerequisite classes toward the acquisition of stage dialects and accents. For each dialect the student becomes aware of the resonance, phonetic transcription, inflection, and rhythmic changes necessary to perform dramatic text with an accent or dialect. Vocal agility, phonetic recall and the ability to integrate the altered vocal behavior to the demands of acting are the primary goals. Each dialect unit will have an introductory instruction, a review session, and a presentation of a reading of a dialect monologue. The final project will be the performance of two dialect monologues.

Students will be evaluated upon preparedness, work ethic, focus, openness to change, growth, degree of self-reliant recall and creative application of new skills. This studio performance class offers opportunity for assessment from the instructor in each class session. Periodic assignments will be made to assess self-reliant application of the work.

THEA 825A Acting Professionally/NYC Showcase (3) Development of audition repertoire; study of business topics; development, rehearsal and performance of NYC showcase.

THEA 825A Acting Professionally/NYC Showcase (3)

THEA 825A is a capstone course that brings closure to the actors' studio training and prepares them for entrance into the competitive world of the entertainment industry. The first half of the semester the students will locate, edit and present audition material for weekly critique. The students will also become aware of business practices related to the acting profession such as union membership, contracts, working with agents/casting directors, etc. During the second eight weeks the students will rehearse and eventually perform an audition showcase in NYC for talent agents and casting directors. Students will receive daily criticism of their work by faculty and peers and will be graded upon the applied aspects of the course, in audition tour of professional regional theatres and the NYC showcase performance.

THEA 825C Professional Repertory Performance (3) Rehearsal and performance of theatre productions at Penn State featuring third year MFA actors and professional guest artists.

THEA 825C Professional Repertory Performance (3)
The professional performance experience is the equivalent of a masters degree thesis. It is the culminating event for three years of full-time study, rehearsal, and performance. The season is chosen to demonstrate the acting skills of each student in the third year of the M.F.A. program. These plays are chosen to be the first professional experience for the acting students as they work alongside professional guest artists.

Training and Development (TRDEV)

TRDEV 418 Instructional Methods in Training and Development (3) Emphasis on teaching techniques and learning principles used by trainers and supervisors in business, health care, and government.

Instructional Methods in Training and Development (3)

General Education: None
Diversity: None
Bachelor of Arts: None
TRDEV 421 Presentation Skills for New Trainers (3) The effective use of platform skills for training, including the use of voice, audio-visual aids, group facilitation, and personal presence.

TRDEV 431 Basic Technology Skills in Training (3) Introduces basic training technology skills: electronic communications, word processing, spreadsheets, databases; provides skills to create and maintain electronic presentations and programs.

TRDEV 432 Video Production in Training (3) Introduces learners to the equipment, design, and production of video instruction for the workplace.

TRDEV 460 Foundations in Training and Development (3) Roles in training and development, relationships between training and development and other organizational structures, and the principles of training design.

TRDEV 465 Performance Analysis (3) This course involves the systematic analysis of employee performance in organizations to identify performance problems, diagnose causes, and specify solutions.
TRDEV 470 Human Resource Development Tools and Techniques (3)

Examination of contemporary strategies, tools, and techniques for designing human resource functions to promote employee learning and performance within organizations.

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

TRDEV 475 Career and Succession Management (3)

Examination of a systemic approach for integrating career planning and succession planning programs in organizations. This course examines this approach to career and succession planning through the study of career management concepts including core competency development, individual development plans, and performance management as well as new perspectives on career structures, such as the protean/boundaryless career, free-agent/contingent worker, and job sculpting.

TRDEV 497 Special Topics (1-9)

Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

TRDEV 505 Project Management in Training and Development (3)

Introduces skills for managing complex training and development projects, such as developing timelines, creating budgets, and allocating resources.

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

TRDEV 507 Program Evaluation (3) Evaluation of educational and other human services programs; preparation and presentation of the evaluation proposal.

Program Evaluation (3)
General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2002
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

TRDEV 518 Systematic Instructional Design in Training (3) Study of theory and practice of systematic instructional design. Application of instructional design principles to training problems in local organizations.

Systematic Instructional Design in Training (3)
General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2002
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

TRDEV 520 Learning Styles and Learning Theory in Training (3) Adult learning theory and its application to training and development.

Learning Styles and Learning Theory in Training (3)
General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2001
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

TRDEV 531 Technology in Training (3) Applications of various new instructional technologies to training problems.

Technology in Training (3)
General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2002
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

TRDEV 532 Web-Based Training (3) Introduction to the design and development of websites for computer-based instruction in the workplace.

Web-Based Training (3)

Computer-Based Training (CBT), Computer-Assisted Instruction (CAI), Computer-Based Education (CBE), Interactive Multimedia (IMM), and Web-Based Training (WBT) are all terms used to describe the delivery of learning materials via computer. The recent rapid increase in these types of programs can be partially attributed to the development of software authoring tools. These allow developers to create computer-based programs through easy-to-learn Graphical User Interfaces (GUIs) without requiring extensive knowledge of programming and programming languages.

Most recently, the World Wide Web (WWW) has offered a way of distributing training materials through a broader electronic network. Thus, Web-Based Training, or WBT, is becoming increasingly important as a tool for Trainers. Its “language” is primarily HTML.

The primary goal of this course is for you, the student, to demonstrate competency in applying design theory while using Web tools to develop a WWW-based module.

The Pennsylvania State University
TRDEV 533 Distance Learning for Trainers (3) This course will explore a variety of instructional technologies which have direct applications in training adult learners at a distance.

TRDEV 565 Implementing Training and Development Programs (3) The critical analysis of theories, strategies, and techniques for planning and implementing TRDEV programs to enhance employee learning and performance.

TRDEV 583 Issues in Training (3) An issue seminar addressing topics such as an unprepared work force, diversity, recession, and issues generated by the class.

TRDEV 587 Master’s Paper (1-6) The development of an original master’s project (paper, production, or practicum) supervised and judged by an appropriate faculty committee.

TRDEV 588 Research Designs Applied in Training (3) Planning experimental, observation, survey and qualitative research designs for training setting needs such as needs assessments and evaluations.
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

TRDEV 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Turfgrass (TURF)

TURF 425 Turfgrass Cultural Systems (3) A study of turfgrass maintenance practices and how their interrelationships can be utilized to develop management systems.

TURF 425 Turfgrass Cultural Systems (3)

TURF 425 is offered to students that are in their final year of the turfgrass science major. They are expected to use the information provided in the course and previously learned agronomic principles and concepts, to develop management and problem solving skills. More in depth information pertaining to various management systems are presented which expands upon prerequisite course content. Students are expected to be able to integrate different turfgrass maintenance practices into sound management strategies that lead to the production of high quality turfgrass areas. The management compromise between aesthetic quality and Functionality is stressed and students are challenged to recognize those cultural practices that influence the balance between the two. There are three 100 point exams during the semester. The majority of the content in each exam will come from the information provided since the previous one. Several unannounced quizzes will be given throughout the semester (usually 12 to 13 with only the 10 best counting toward the grade). A soil testing exercise is also included whereby the student is expected to take an appropriate sample from a site of their choosing submit it to the soil testing lab, interpret the soil test results, and make a written recommendation based upon the results. The course will help the student better understand how the maintenance practices and pest control programs learned in other courses inter-relate in the overall management scheme for a given turfgrass site. It will also prepare them for TURF 436 (Case Studies) where they will be expected to work in teams in problem solving situations. The facilities provided in ASI building, associated greenhouses, and the turfgrass field research plots as well as the campus grounds provide ample support for the effective delivery of the course.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2001
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

TURF 434 Turfgrass Edaphology (3) Characterization of soil physical properties for the establishment and maintenance of sports turf; includes root-zone construction.

TURF 434 Turfgrass Edaphology (3)

TURF 434 is offered to students that are entering their final year of the turfgrass science major. This course builds on introductory turfgrass and soil courses. In this course you will learn to interpret soil physical results using the United States Golf Association specifications for greens construction. You will learn how to evaluate and manipulate the physical properties of a soil in order to provide a quality turfgrass stand under varying conditions. You will use new information as well as physical and quantitative tools provided to aid in soil management decisions. You will defend your decisions to other students in group-exercises conducted on a computer bulletin board. You will also submit your decision making process and defend your decisions in writing, in the form of business proposals. This class has a series of labs, some of which run over several weeks. You will use class material and the physical and quantitative tools learned in the labs to inform your decision-making processes. Your grade will be based on exams, lab reports, and practicums. The practicums and the labs are interrelated. The practicums, which are mini-case studies of actual turfgrass situations and problems, require you to apply techniques and information learned in the physical lab periods. The practicums are graded on initial draft, final draft, and your critique of other student's solution to a problem. TURF 434 is an advanced course in soil physical properties.

The Pennsylvania State University
TURF 435 Turfgrass Nutrition (4)

Turfgrass Nutrition is a study in the nutrition and growth of turfgrass plants. Upon completion of this course, students will be able to distinguish the function and requirements of nutrients in the turfgrasses; describe how soil physical and soil chemical properties/conditions affect nutrient availability; select soil amendments to remedy soil chemical limitations; identify the best fertilizers and application methods to satisfy site-specific nutritional requirements; prepare nutrient management plans by appraising edaphic and environmental conditions and current cultural management and use; and will have discovered how best to sample soil, tissue, and water; submit samples, choose appropriate specialty tests, and interpret reports. TURF 435 compliments Turfgrass Edaphology, by examining soil chemical (rather than physical) properties as turfgrass growth parameters and addressing ameliorative measures in concept and operation. Students are introduced to the many classes of specialty fertilizers used in turfgrass management and their specific attributes are revealed through laboratory and field exercises. Students are evaluated through written testing of plant growth and nutrition concepts, interpretation of soil analysis, recommendations of fertilizer type and rate, and nutrient fate and management. TURF 435 has a substantial laboratory component.

TURF 436W Case Studies in Turfgrass Management (3)

Case Studies in Turfgrass Management is a three credit, writing intensive course for students in the final year of the Turfgrass Science major. The goal of this 'capstone' course is to provide students with an understanding of processes involved in solving turfgrass and soil problems at the managerial level. Using several real-life scenarios provided by the instructor, students will learn to gather facts associated with a problem, analyze the problem, formulate a set of options for solving the problems, select the most feasible solutions, and evaluate outcomes. Teams will submit reports and develop presentations for class. Teams will also be charged with questioning presenting teams and evaluating team members. Students will be evaluated through exams, reports, presentations, and class participation.

TURF 489 Supervised Experience in College Teaching (1-3)

Supervised Experience in College Teaching (1-3) Participate with instructors in teaching and undergraduate turfgrass course. Assist with teaching an evaluation and with development of instructional materials.

TURF 490 Colloquium (1)

Colloquium (1)
TURF 495  Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

TURF 496  Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

TURF 850  Turfgrass Physiology (3) Lectures, reading assignments, and problems designed to develop student competency in plant physiology as it relates to turfgrass management strategies.

TURF 852  Turfgrass Health Management (3) Lectures and exercises designed to develop student competency in solving turfgrass pest problems, as well as disease resistance in turfgrass.

TURF (PPATH) 853  Interpreting Turfgrass Science Literature (3) Introduction to turfgrass research publications, interpretation of the data, and discussion of the significance of the results.
This course will provide an introduction to literature search in turfgrass management, identification of most pertinent peer-reviewed journals for each area of interest/specialty in turfgrass management, and utilization of other resources such as technical journals, trade journals, online and resident educational material resources, extension bulletins/circulars from various institutions/organizations that addresses various topics on turfgrass management. This course will prepare the students for analyzing research questions or rationale formulated by an investigator, for understanding how the study was devised to address the objectives adequately and the results were obtained and presented in the publication, and for identifying the take-home message in the publication. Emphasis will be made on the criteria used for data collection, the significance of methods employed in statistical analyses of the data, and presentation of results in the publications to effectively convey the information to readers.

**Veterinary and Biomedical Sciences (VB SC)**

**VB SC 402W (ENT 402W)** Biology of Animal Parasites (3) An introduction to animal parasitology. Emphasis placed on host/parasite interactions, parasites of zoonotic importance, control programs and taxonomy.

**VB SC 402W Biology of Animal Parasites (3)**

This course provides students an opportunity to obtain an introduction to the field of animal parasitology. Material presented emphasizes life cycle patterns of animal parasites, host-parasite interactions and pathology, disease patterns and zoonotic potential of parasites to human disease, economic importance of parasitic diseases, taxonomy and parasite control programs. Information presented in this course will be useful to students interested in pursuing a career in veterinary medicine or careers dealing with animal care and management. Evaluation of student performance is achieved by 6 quizzes, three examinations and 3 writing assignments. The course is offered each spring semester with an enrollment of 15 to 25 students.

General Education: None

**VB SC 405** Laboratory Animal Science (3) Principles involved in maintaining laboratory animals. Emphasis is on management, preventive medicine, and surgical considerations used in laboratory animal colonies.

**VB SC 405 Laboratory Animal Science (3)**

This course in Laboratory Animal Science introduces students to the biology and characteristics of a variety of laboratory animal species, explores the care and use of animals in various research environments and examines ethical/legal issues pertaining to the use of animals in research and teaching. The laboratory section reinforces topics discussed in lecture.

The Pennsylvania State University
and provides an opportunity for students to learn basic animal handling techniques in a safe and professionally supervised environment. Students work with live laboratory animals including mice, rats, hamsters, guinea pigs, and rabbits. They learn handling techniques, administration techniques (such as by injection), and sample collection techniques (such as blood collection). They also learn surgical principles and perform a surgical procedure using aseptic technique.

The Laboratory Animal Science course appeals to and benefits several general groups of students. Those who plan to pursue careers involving animal research such as in academia or industry receive a broad foundation in the field of laboratory animal science as well as an introduction to techniques commonly employed when handling animals. Those pursuing careers involving veterinary medicine or veterinary technology receive training and the opportunity to develop clinical/technical skills focused on a unique group of species. Students that are undecided in their career choice find that the field of laboratory animal science holds many opportunities for those with animal knowledge, handling skills and an understanding of the societal issues surrounding the use of animals in research.

VB SC 407 Dairy Herd Health Programs (2) A discussion of health programs for dairy herds to assist in the control of infectious and metabolic diseases of dairy animals.

VB SC 407 Dairy Herd Health Programs (2)

Dairy Herd Health Programs provides students interested in dairy farm management and/or herd health medicine the opportunity to integrate basic knowledge of dairy cattle diseases into a comprehensive and practical herd health program. Herd health management is discussed as it relates to infectious disease control including mastitis and calf diseases, reproductive management, metabolic disease control and parasite control. A text book is not required. Readings are provided via ANGEL and students are strongly encouraged to read current scientific and lay press literature in the appropriate subject areas.

VB SC 420 General Animal Pathology (3) Nature and mechanisms of the disease process including degenerations, growth disturbances, inflammation, host-parasite relationships and neoplasia.

VB SC 420 General Animal Pathology (3)

The objectives of this course are to help the student develop an understanding of the concepts and general principles of disease processes in vertebrate species, attain skills required to observe and describe tissue changes in animals and develop critical thinking skills required for problem solving. In addition to text materials, photographs and photomicrographs of a variety of tissue lesions will be presented and discussed to emphasize concepts of disease processes as described in the course. Specific subjects that will be presented include cellular injury and necrosis, inflammation, blood coagulation, hemodynamic disorders, diseases of immunity, cell growth and adaptation and neoplasia. This course utilizes knowledge previously attained from courses in physiology, chemistry, immunology and biochemistry.

**VB SC 421 (BIOL 421) Comparative Anatomy of Vertebrates (4)** The comparative anatomy of representative vertebrate animals, discussed from a descriptive and an evolutionary viewpoint.

**VB SC (BIOL) 421 Comparative Anatomy of Vertebrates (4)**

Upon completion of this course, students will understand the fundamentals of vertebrate anatomy and be able to employ comparisons between phylogenetically distinct vertebrate species to illustrate evolutionary adaptations and the relationship between structure and function. Unique adaptations such as those of ruminants and birds will be explored in addition to the more common fish, amphibians and mono-gastric mammals typically used to illustrate these principles. Laboratory activities utilizing specimens representative of higher and lower vertebrate species will emphasize structure identification and functional adaptations. Students will be evaluated by means of laboratory examinations which will focus on structure identification. Attendance in laboratory is mandatory and laboratory exercises to be completed at each laboratory period will be graded. Students that miss laboratory session due to an excused absence should arrange a make up assignment with the instructor.

**VB SC 423W Pathology of Nutritional and Metabolic Diseases (3)** Overview of nutritional and metabolic diseases of animals integrating concepts from biochemical and physiologic aberrations to clinical applications.

**VB SC 423W Pathology of Nutritional and Metabolic Diseases (3)**

Nutrition plays a critical role in health, disease and convalescence of man and animals. Understanding the role of nutrition in disease pathogenesis, recovery and prevention requires an integration of biochemical and physiologic sciences and clinical practice. The intent of this course is to help the student integrate their knowledge from various basic science disciplines to real-world clinical issues related to the role of nutrition in disease pathogenesis, management and prevention across various animal species. Common nutrition and metabolic disease of production and companion animals will be used to demonstrate various principles of disease pathogenesis from a biochemical to whole animal basis. Deficiency and toxicity diseases of all essential nutrients will be addressed. In addition, a secondary role of nutrition in disease susceptibility and recovery mediated through immunologic and physiologic processes will be highlighted. In completing the course, students will have an understanding of comparative gastrointestinal anatomy and how this influences essential nutrients required and unique nutritional disease conditions. Additionally, students will gain appreciation for clinical management of nutritional diseases from diagnosis to prevention. Course format will be lectures and case-based discussions. With the integrative approach to course content, students are required to have previous courses in biology, biochemistry and nutrition. The course can meet requirements for writing across the curriculum and satisfies 400-level course requirements for Animal Bioscience and Animal Science majors. Prerequisites for the course include B M B 211 or B M B 401, and AN SC 301 or equivalent nutrition course.

**VB SC 425 (AN SC 425) Principles of Avian Diseases (3)** Principles of pathogenesis and control of diseases in poultry and other avian populations. Case material used where appropriate.

**VB SC (AN SC) 425 Principles of Avian Diseases (3)**

This course discusses the major diseases of domestic poultry, with etiology, prevention, and treatment reviewed on each disease. Since many of these diseases also affect wild birds and pet birds these are also reviewed. Lastly, avian disease with zoonotic (human public health) potential are also discussed in the course. This course is required by those seeking a poultry minor.

Previous coursework in pathogenic microbiology is beneficial.

Bachelor of Arts: None
Effective: Fall 2007
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

VB SC 431 (E R M 431) Environmental Toxicology (3) Effects of pollutants on animal health at the chemical, physical, and cellular level.

VB SC (E R M) 431 Environmental Toxicology (3)

This ecotoxicology course is designed to provide a mechanistic understanding of how chemicals released into the environment affect individuals and populations. General concepts of fate and transport of chemicals in the environment, including sources and emission of pollutants, is a major focus of this course. In addition, the principals underlying the study of adverse health effects, toxicology, will be described. The experimental means used to assess toxicity and the regulation of chemical releases by governmental agencies will be included. Many of these concepts will be reinforced through the use of a case study approach where a pertinent, timely, environmental issue is incorporated into the ongoing lectures.

VB SC 451 Immunotoxicology of Drugs and Chemicals (3) An in depth discussion of the effect of xenobiotics and drugs on host immune mechanisms.

Immunotoxicology of Drugs and Chemicals (3)

Maintaining good health is a priority for most of us, and a key element in staying healthy is a properly functioning immune system. However, we are constantly exposed to a barrage of chemicals in the environment both natural and man-made. Some of the key questions asked included: 1) do environmental chemicals affect the generation of immunity?, 2) is our environment to blame for bad health?, and 3) can natural compounds cause immunotoxicity? These questions and more will be addressed in Immunotoxicology. This course will focus primarily on the effects of chemicals in the environment but will also cover the impact of other factors such as therapeutics, recreational drugs, and dietary factors on the immune system. Immunomodulatory mechanisms will be examined at systemic, cellular and molecular levels. Discussions will include theory, principles, and methodology and key issues in immunotoxicity, host immune mechanisms, and tumorigenesis. Key issues in regulatory immunotoxicology will be discussed to make students prepared for jobs in Federal Regulatory Agencies. Grading for undergraduates will include midterm and finals, and class participation; while graduate students will be required to also write a short, immunotoxicologically-related research proposal. Our intent is to provide a bridge between the two sciences and the undergraduate majors of Immunology and Toxicology, with an introduction to the basic mechanisms by which environmental, occupational, and therapeutic agents may interfere with immunologic systems. Immunotoxicology is offered every fall semester and is designed for undergraduate students from toxicology, immunology, and forensic science majors.

The Pennsylvania State University
Lipid mediators are formed in all eukaryotic cells during the course of normal metabolism; however, their biogenesis is closely linked to stimulation or treatment of cells by pathogens, cytokines, and chemokines, and environmental pollutants. In this course, we will examine the mechanisms by which endogenous fatty acid molecules are formed and how they alter gene expression in a given target cell. Of particular interest are prostaglandins and leukotrienes that are potent eicosanoid lipid mediators derived from fatty acids, including the membrane derived arachidonic acid and dietary fatty acids such as eicosapentaenoic acid and docosahexaenoic acid. We will examine their biological functions in homeostasis and inflammation. In addition, the effects of clinically relevant nonsteroidal anti-inflammatory drugs, the newer generation coxibs, and leukotriene modifiers will be studied. Through these studies, we hope to gain important insights into the mechanisms of inflammatory responses, pain, and fever. The course will rely on current literature with lectures and group discussions. Students will be required to present a review of a current journal article and lead a discussion of that paper. Students are evaluated by mid-term written exam (30% of the final grade), presentations (30% of the final grade), and a final written exam (40% of the final grade).

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

The overall purpose of this course will be to provide second and third-year graduate students, the opportunity to study current concepts of macrophage biology. The course will be offered in the fall semester every other year. The class will meet once a week for two hours to review and discuss 3-4 papers on a chosen topic. For each class, the instructor will be responsible for choosing papers that reflect the most recent advances in the area of research to be covered and for providing background information on the topic. The students will be responsible for reading the papers prior to class and leading and/or participating in a critical discussion of the papers assigned for that week. This course will provide students with a detailed understanding of macrophage biology as well as a forum for developing skills in critical evaluation and discussion of current research. The materials covered in this course will build on information presented in MICRB 410 (Principles of Immunology), VB SC/B M B/MICRB 432 (Advances in Immunology: Signaling in the Immune System) and is designed to complement VB SC/BM MB/IBIOS 511 (Molecular Immunology).

VB SC 516 (BMMB 516) Viral Evasion of Immune Responses (2) An in-depth study of the interaction of viruses and cells and mechanisms that permit viruses to escape immunity.

The overall goal of the course is to provide second and third year graduate students an in-depth course on viral immunity and pathogenesis. The course will be offered in the Spring every other year. The class will meet once a week for two hours to review and discuss 4 or more papers. The papers will reflect new and innovative methods of studying the mechanisms by which viruses evade the immune response. Students will be expected to read the material prior to class and be prepared to lead and participate in critical discussion of all aspects of the paper. By focusing on the mechanisms involved in viral immunity and disease this course complements several existing courses on immunology, virology and biochemistry. The prerequisites of MICRB 410 and B MB 400 assure that the students enrolling in the course have a general understanding of immunology and biochemistry.

The overall purpose of the course will be to provide second and third-year graduate students an up to date comprehensive analysis of the molecular and cellular processes that underlie the development of the hematopoietic and vascular system. The course will be offered in the fall semester every other year. The class will meet once a week for two hours to review and discuss 3-4 papers on a chosen topic. For each class the instructor will be responsible for selecting the papers and for providing the necessary background information at the beginning of each class period. The students will be responsible for reading the papers prior to the class and leading/participating in a critical discussion of the papers assigned for that week. The course will provide a detailed understanding of molecular and cellular processes that drive the development of the hematopoietic and vascular system, the techniques used to study these processes as well as a forum for developing skills on critical evaluation and discussion of current research. The material discussed in this course will build on information presented in MICRB 410 (Principles of Immunology), VB SC/B MB/MICRB 432 (Advances in Immunology: Signaling in the Immune System) and is designed to complement VB SC/BMMB/IBIOS 511 (Molecular Immunology).
VB SC 520 Pathobiology (3) The course deals with the mechanism of disease. Topics are: homeostasis, vascular injury, inflammation, neoplasia, genetic disorders, and biochemical toxicology.

Upon completion of VB SC 520, Pathobiology, students will have an understanding of disease processes with emphasis on changes at both the tissue and systemic levels. During the first portion of the course, the student will have the opportunity to examine the role of infectious agents, inflammation, genetics, metabolism and neoplasia in the disease process. Students will integrate their knowledge of general microbiology, cell biology, histology and biochemistry in understanding these processes. The student will understand how differing disease phenotypes can be caused by different underlying etiologies in an organism.

During the second portion of the course the student will gain knowledge concerning disease processes of different organ systems building on the general principles learned in the first portion. Topics are organized and presented in a format that covers the basics of normal anatomy and histology progressing to an analysis of the abnormalities associated with various disease states arising from multiple etiologies. While the human model will be discussed most extensively, there are numerous applications to other mammalian species. The student will learn considerable medical terminology and clinical concepts.

The course has been modeled after introductory pathobiology courses currently taught at major medical schools. It should be of interest to graduate and undergraduate students in life sciences who wish to become familiar with the various underlying mechanisms, including molecular mechanisms, which give rise to the disease phenotype. The course is an excellent preparation for students wishing to pursue advanced study in medicine or veterinary science.

VB SC 530 (IBIOS 530) Regulation of Gene Expression by Xenobiotics (3) The mechanisms by which foreign chemicals alter gene expression and the techniques used to examine this effect are examined.

The goals of the present course are to enhance the students' ability to read, design, implement and discuss studies focusing on how chemicals regulate gene expression. Through the use of current research articles, the students will understand the principles of experimental design. They will learn critical reading skills as well as enhance their own research and problem solving abilities. In addition, an emphasis will be placed on presentation clarity and ability to defend scientific inquiry from peers. Thus students will develop critical communication skills. The grade is determined by presentations (60%) and one oral assignment (40%). Each student will give several presentations during the semester (depending on the number of students enrolled), each based on a current journal article. All students are expected to read the article and participate in in-class discussions. The oral assignment consists of a series of discussion questions, which the student will answer in writing and "defend" in an informal oral presentation. In addition to being a required course in the Molecular Toxicology graduate program (IBIOS), Regulation of Gene Expression by Xenobiotics will complement several life science graduate programs. This course builds upon Molecular and Cellular Toxicology and requires a good understanding of biochemistry and molecular biology.
Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

VB SC 534 Current Topics in Cancer Research (3) A discussion of current cancer research literature with the focus on primary research literature.

VB SC 534 Current Topics in Cancer Research (3)

Students enrolled in Current Topics in Cancer Research will acquire knowledge of focused areas in cancer research including basic biology of cancer cells, genes and signaling pathways that control cancer cell growth and metastasis, molecular methods for analysis of human and animal cancers, specific animal models of cancer and molecular approaches to cancer therapy. Emphasis will be placed on critical reading of primary literature, identification of strengths and weaknesses of methods, approach and conclusions of specific studies and implications of the research for future studies and understanding of cancer and therapy. This course will provide a solid foundation and companion for other specialized courses in a diverse group of graduate degree programs as well as the critical thinking and analysis required for completion of a doctoral program.

**W F S 435 (E R M 435) Limnology (3)** Biogeochemistry and natural history of freshwater ecosystems.

**W F S (E R M) 435 Limnology (3)**

This course will define and describe major principles (physical, chemical, biological, and ecological) that govern the structure and function of freshwater ecosystems (ponds, lakes, and rivers). Current scientific literature will be critically reviewed and discussed in relation to comparative philosophy, methodology, and case studies that cover a range of topics in limnology. The objectives of E R M (W F S) 435 are to familiarize students with the major physical properties, chemical cycles, taxonomic groups of organisms, and ecological interactions that define and describe the natural function of aquatic ecosystems. The course will use case studies to illustrate and examine pertinent issues (e.g., excessive material loading, introduction to exotic species, habitat fragmentation, and climate change) that can alter the structure and function of aquatic ecosystems. Knowledge of these basic ecosystem principles will be applied towards formulating real-life solutions to the issues identified in class, in order to better manage aquatic resources (methods to reduce material loads, transport controls of exotic species, habitat restoration, and reduction of global gases). This course will be useful to both undergraduate and graduate students seeking degrees in Environmental Resource Management, Wildlife and Fisheries Science, Ecology, and other related subjects. At the undergraduate level, the course will serve as a 400-level selection in both the Environmental Resource Management and Wildlife and Fisheries Science degree programs. At the graduate level, the course will compliment several Wildlife and Fisheries courses that form the compliment of that degree program. Moreover, the course can satisfy the course requirement for ecosystems ecology in the inter-college Ecology graduate program and serve as a breadth course in Water Resources for graduate students in the Watershed Stewardship program.

**W F S 436 (E R M 436) Limnological Methods (3)** Application of current methodologies to evaluate the biological, chemical, and physical characteristics of aquatic ecosystems.

**W F S (E R M) 436 Limnological Methods (3)**

Limnological Methods will instruct students to apply state of the art analytical measurements in order to gain an understanding of how and why ecosystems support specific biodiversity and biogeochemical cycles. The course will help students define key ecological elements (e.g., ecosystem metabolism, resource limitation, predator-prey relations) in both qualitative and quantitative terms, thereby making them tangible, tractable, and readily understandable. The course will use an instructional rubric to integrate conceptual, analytical, and communicative exercises in order to instruct students about how to evaluate variation in natural ecosystems.

This course provides experiential training in the scientific process (rubric), so students can learn by doing, thereby internalizing their knowledge. Course content is organized into three 5-week sections, each of which will emphasize one component of the biogeochemical cycle (physical, chemical, biological). In each section, students will carry out a focused group study designed to evaluate how a pertinent environmental perturbation can affect that component of the aquatic biogeochemical cycle. The course content in each five-week block will have students: 1) review the experimental design and hypothesis, 2) implement the experimental design in the field or laboratory, 3 and 4) process and analyze samples in the laboratory, and 5) make statistical and graphical evaluations of the experimental results relative to their hypothesis (in class) and present these findings in written form. Knowledge of these basic ecosystem principles will be applied towards formulating real-life solutions to the issues identified in class, in order to better manage aquatic ecosystems.

This course will be useful to undergraduate students seeking degrees in Environmental Resource Management and Wildlife and Fisheries Science, as well as graduate students pursuing degrees in Ecology, Forest Science, Wildlife and Fisheries Science, Watershed Stewardship, and other related subjects. At the undergraduate level, the course will serve as a 400-level elective in Environmental Resource Management degree program, Wildlife and Fisheries Science degree program, and the inter-college Marine Science option. At the graduate level, the course will complement several Forest Science and Wildlife and Fisheries courses. Moreover, the course can also satisfy the requirements for the ecosystems ecology focus in the inter-college Ecology graduate program. Grades will be based on three research papers, and a final laboratory practical.

W F S 440 Natural Resources Public Relations (3) The course prepares students to integrate public relations concepts with principles of natural resources management at the community level.

W F S 440 Natural Resources Public Relations (3)
This course will bring together the elements of previous courses in speech, writing, resource management, and policy to enable the student to present concepts and ideas to the public about management options. The course introduces the student to techniques used in conducting public relations activities as natural resources professional or as a representative of a natural resources agency or NGO. The course will emphasize current topics of sustainability, stewardship, ecosystem management, and conservation, all of which involve integration of ecological, economic and institutional concerns with a strong focus on effectively communicating with citizens at a local community level.

Professional presentations will be a major component of the class. Teams will develop a series of photographs to accompany a news feature; write a popular article; edit their peers' work; design and build a public display on a resource issue; research a current natural resources topic; develop a presentation and present their team's work to the class for evaluation.

They will learn how to develop media contacts, the aspects of hiring, supervision and interviewing for positions, work with both the electronic and print media, write a news release on a controversial topic, which will be evaluated by a professional in the field. A number of guest lecturers will be used to discuss current concerns and relate practitioner's experiences in the field. The class will focus on individual skills and team oriented projects. Students will be evaluated by their peers, professionals, and through a written mid-term and an oral final.

The course is based on a distinctive sub-discipline in natural resources management, which focuses on "information and education", typically one of five main divisions of a natural resources agency or organization. The central theme of the class is to bring to bear many of the concepts and ideas from a variety of previous classes to focus on the importance of public relations to the resource management field.

W F S 450 (E R M 450) Wetland Conservation (3) Wetland types, classification, functions and values; hydrology, soils, and plants; introduction to wetland identification and delineation; wetland regulations.

W F S (E R M) 450 Wetland Conservation (3)
Wetlands are unique ecosystems, differing in many ways from both terrestrial and aquatic environments. They provide recognized values and functions to society, although these values and functions remain difficult to quantify. The study of wetlands is interdisciplinary, requiring background knowledge in science, management and policy disciplines. This course will explore the variety of wetland types and functions, and emphasize the diverse hydrological, biological, chemical, and physical interactions that occur within wetlands. Because wetlands are recognized as valuable assets in the landscape, issues surrounding wetland management and regulation have taken on increased importance; we will address these issues as well. Topics will also include the restoration of degraded wetlands and wetland creation, along with the construction of wetlands for pollution abatement.

The Pennsylvania State University
Students will become familiar with different wetland types and how they are classified, and will develop skills in understanding the interactions between wetland hydrology, hydric soils and hydrophytic vegetation. They will also develop an understanding of important national and state policies and regulations pertaining to wetlands and their protection and delineation. Classroom assessment will be based on three cumulative exams, homework assignments, and a final project.

The course will fulfill 3 credits of electives or technical selections in the Wildlife and Fisheries Science major. Other students university-wide may be interested in the course, and the intention is to develop a course that is accessible to a wide variety of traditional and non-traditional students. For proper instruction, a technology classroom with computer projection equipment will be required.

**W F S 454 Field Ichthyology (2)** Introduction to collection and field identification of the fishes of Pennsylvania.

This course is designed to familiarize students with collection, observation, and field identification of Pennsylvania's fish fauna. Students are taught how to collect, preserve, catalog, curate, and observe fishes. Additionally, they are taught how to gather pertinent in situ behavioral and distributional information on fishes and how to manage, record, and store field data. With the increasing emphasis on biodiversity and environmental monitoring, students need to be able to collect, manage, and store data as well as secure the chain of custody.

This course is offered annually at the end of spring semester at the Tom Ridge Environmental Center in Erie, PA. Classes begin Sunday night at 1800 and extend until 1700 on Friday. After the three-hour introductory class, students meet each day at the Tom Ridge Environmental Center at 0700. Field collections/observations begin promptly, and end about 1700. Students reassemble in the laboratory at 1830 for a two-hour discussion of the day's activities. On one day, a series of night collections is made that extends until midnight. Students are responsible for their motel and food expenses during the week. All transportation to and from the collection sites is provided.

**W F S 463W Fishery Management (3)** Management of sport and commercial fisheries, including biological, political, social, and economic factors; regulations and other management techniques.

This course will introduce students to the management of recreational and commercial fisheries. The course emphasizes fishery management as a goal-oriented process that adapts over time to changes in fish populations and societal goals. Students will learn to recognize and understand that ecological, economic, political, and social forces shape this management process. Major methods of fisheries management involving people, population, and habitat management will be surveyed. Case studies highlighting the application of these management strategies to current fishery management are explored. Writing reports and management plans is emphasized.

W F S 525 Communications in Natural Resources (3) Communications of research results through manuscripts for peer reviewed journals, presentations at professional meetings, and articles for the general public.

W F S 525 Communications in Natural Resources (3)
This course focuses on development of communication skills for dissemination of scientific information from research. The major part of the course is devoted to methods for the planning, organizing, and writing of manuscripts suitable for submittal to peer-reviewed journals in the natural resource area. The course briefly reviews the design and delivery of effective presentations to professional audiences. Fundamentals for writing popular science articles are likewise addressed. An underlying objective is to help students improve writing skills and to illustrate methods for developing major sections of a typical research paper. An original paper suitable for submission is required as a final product. Techniques for developing effective slide presentations are reviewed and students must design and deliver a slide presentation based on their journal article. Approaches for writing articles for lay audiences are presented by speakers with journalism backgrounds, and students are required to prepare an article suitable for publication in a newspaper or a popular periodical. Grading is based 50% on the final manuscript, 10% on slide presentation, 10% on popular article, and 30% on weekly assignments.

**Women's Studies (WMNST)**

**WMNST 400** (US;IL) Debates in Contemporary Feminism (3) Consideration of feminist theories of women's experience in transforming understanding, reconceptualizing old problems, raising new ones, and expanding traditional disciplines.

**WMNST 400 Feminist Theory (3)** (US;IL)

This course focuses on theoretical analyses of gender as major components of contemporary thought. It is designed to help students develop knowledge of critical texts to better analyze women's issues and comprehend the realities of women's lives, past and present. The course will relate analyses of gender to analyses of race, class, religion, ethnicity, national origin, and sexual orientation. The course addresses theoretical issues rooted in an analysis of gender, critiques theories that do not attend to such issues, and investigates the premises and implications of feminist theory. The course will continue to have a prerequisite of WMNST 301: Introduction to Feminist Thought. For the Women's Studies major, WMNST 400 will fall under the heading of Additional Courses, where students will have a choice of this course or WMNST 401: Feminist Perspectives on Research and Teaching. These are our two most general courses at the 400-level. It may also be used to fulfill a US;IL requirement.

---

The Pennsylvania State University
WMNST 400 (US;IL) Debates in Contemporary Feminism (3) Consideration of feminist theories of women's experience in transforming understanding, reconceptualizing old problems, raising new ones, and expanding traditional disciplines.

WMNST 400 Feminist Theory (3) (US;IL)
This course focuses on theoretical analyses of gender as major components of contemporary thought. It is designed to help students develop knowledge of critical texts to better analyze women's issues and comprehend the realities of women's lives, past and present. The course will relate analyses of gender to analyses of race, class, religion, ethnicity, national origin, and sexual orientation. The course addresses theoretical issues rooted in an analysis of gender, critiques theories that do not attend to such issues, and investigates the premises and implications of feminist theory. The course will continue to have a prerequisite of WMNST 301: Introduction to Feminist Thought. For the Women's Studies major, WMNST 400 will fall under the heading of Additional Courses, where students will have a choice of this course or WMNST 401: Feminist Perspectives on Research and Teaching. These are our two most general courses at the 400-level. It may also be used to fulfill a US;IL requirement.

WMNST 401 Doing Feminism: Theory and Practice (3) Advanced analysis of feminist theory and the nature of its integration (sometimes uneasily) within feminist movements and practices.

WMNST 401 Feminist Perspectives on Research and Teaching (3)
The course explores current themes organizing debates and discussions within feminist discussions of teaching and research. Students will become familiar with various research perspectives that feminist researchers use including interviews, ethnography, and action research. The course will examine debates within feminist research and teaching including power, difference, and race. Key themes will include questions around the politics of representation, the relationship of research to colonialism, the authority of the researcher, researcher-researched relations, and power/knowledge relations in research, classrooms, and knowledge production broadly defined. The aim is not to identify a feminist orthodoxy but rather: 1) to identify and understand the varieties of feminism existing today; 2) to become knowledgeable about a range of themes currently emerging in feminist debates on teaching and research; and 3) to arrive at an appreciation of the transformative effect upon teaching and research these new paradigms, debates, and themes have meant across a range of disciplinary boundaries.
WMNST 407 (US) (THEA 407) Women and Theatre (3) A study of theatre practice and dramatic literature as informed by issues of gender, race, and ethnic background.

WMNST (THEA) 407 Women and Theatre (3) (US)

THEA/WMNST 407 approaches the study of theatre/performance as a valuable site for the exploration of race, class, and gender as social constructs. The focus will be on 20th century developments of women and theater. Feminist theory and theatrical practice will be a focus of the course and will reflect conflicts and differences present within feminism.

Education and the Status of Women (3)

WMNST 416 (US;IL) (AF AM 416, S T S 416) Race, Gender and Science (3) The class will focus on race and gender as products of science, and how societal values shape scientific activity.

WMNST (S T S/AAA S) 416 Race, Gender and Science (3) (US;IL)

The course’s objective is to provide a seminar for students to integrate feminist theory, social theory, and science studies through class discussions, essays, and research. The role of science in defining, producing, applying, and policing of gender and race in society will be explored through the work of feminists and traditional scholars working in a variety of disciplines from cultural studies to science studies. Students will be encouraged to develop a critical analysis of race and gender in science in order to understand the impact of gender and race on the production of scientific knowledge. This course is designed for students in the humanities, social sciences, sciences, and technical fields. Readings will be taken from past and contemporary social theory (i.e., students will be reading original works not textbooks). Students will be expected to read, understand, and synthesize 75-100 pages of reading per class and to discuss them in a seminar fashion in order to analyze, critique, and evaluate various theories to develop their own understanding of the interrelationship of science, race, and gender. In addition they will do two professional-style book reviews during the semester. At the end of the semester students will integrate theory with social, cultural, and historical data that they collect through library research (with a minimum of 50 sources). Students will present the paper to the class in a conference style presentation that will conclude with a Q&A session.

WMNST 420 (US;IL) (CED 420, R SOC 420) Women in Developing Countries (3) Analysis of women's work, experiences,
and development policies and practices in Africa, Asia, and Latin America.

WMNST (CEDEV, R SOC) 420 Women in Developing Countries (3)
(US;IL)
The purpose of this course is to increase understanding of women's lives in third world countries at the time when
women's movements, grassroots activism, and feminism are on the rise in the third world. The course examines third
world women's challenges to Western definitions of feminism and traces the theoretical shifts and practical changes
related to women's issues in African, Asia, and Latin America. Students participate in studying specific community and
agricultural development projects. Topics include feminist critiques of development and post-colonialism, ecofeminism
and environment, sexuality and reproduction, global restructuring, and grassroots community activism. Students will be
evaluated based on class participation, two written critiques of readings, a final course project, a mid-term, and a final
exam. This course will add diversity to both the rural sociology, community and economic development, and women's
studies curricula. International, gender, ethnic, and racial issues are core components of the course. The course will be an
elective for Women's Studies majors and minors and will serve graduate students in rural sociology, women's studies, and
other fields.

perspectives of sexual and domestic violence.

WMNST (CRIMJ/CRIM) 423 Sexual and Domestic Violence (3)
(US)
This course investigates violence against women, specifically domestic, sexual, and relationship violence. Students will
examine some of the legal, sociological, and psychological perspectives about sexual, domestic, and relationship violence
as well as the social and cultural roots of violence against women. Students will also gain an understanding of the
experiences of victims of domestic and sexual violence as well as the issues presented by perpetrators. Students will be
evaluated based on performance on exams, and two research papers. CRIMJ/CRIM/WMNST 423 is a supporting course in
both the WMNST major and minor as well as a supporting course in the CLJ major. It may also be used to satisfy a GI
requirement.

WMNST 426Y (US;IL) (GEOG 426Y) Gender and Geography (3) Description and explanation of the links between gender relations and spatial structures; gender and work, social services, and neighborhood activism.

WMNST (GEOG) 426Y Gender and Geography (3) (US;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

Until the 1970's women remained invisible in the analyses of social space: human geography was indeed just that (hu)man. Recently, feminist geography began to challenge the implicit masculinity of the subject of geography; this course will examine the evolution of the feminist challenge. The course addresses four major topics -- Gendering Space; Gendering Work; Gender, Place and Nationalism; and Gender and the Body. Students explore each of these through case studies and group projects, and will produce a series of essays throughout the semester. As a point of entry to discussion of place, space and gender, this course will explore the diverse ways in which feminists have seen space as central both to masculine power and to feminist resistance. In particular we will explore arguments from feminists of color and from poststructuralists which have influenced current discussion about maps and power in historical and contemporary contexts.

WMNST 428 (US;IL) (PL SC 428) Gender and Politics (3) Gender in politics in the United States and around the world; major areas of women and politics research.

WMNST (PL SC) 428 Gender and Politics (3) (US;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

This course is designed as an overview to the field of women and politics. It examines the role that women play in politics in the United States and around the world. Students will begin by examining how women are socialized differently from men and how that socialization affects women's political attitudes and participation. Then students will focus on women in different political offices and how their behavior compares to that of their male counterparts. Students will then analyze the women's movement in the United States. Finally, students will turn to different theories of the ideal position of women and men in politics and use those theories to explore the issue of pornography. Students will be evaluated on a final exam, short essays (4-5 page essays), class participation, and a research paper (15 pages). This is an advanced course with 6 credits prerequisite in Women's Studies or Political Science. This course fulfills the American Politics and Comparative Politics distribution as well as the advanced course requirement for the Political Science major. It is an elective for a Women's Studies major. It also fulfills an United States Cultures and International Cultures requirement.

WMNST 455 (US) (CAS 455) Gender Roles in Communication (3) Explores the literature on gender research in the discipline of human communication.

WMNST (CAS) 455 Gender Roles in Communication (3) (US)
This 400-level course is a theory and application course which also satisfies an intercultural requirement. CAS/WMNST 455 strives to ensure that students understand female and male differences and similarities in communication patterns, perceptions of the opposite sex, and expectations and stereotypes regarding the opposite sex. Many researchers find that gender communication is "cross cultural," i.e., that women and men come from two different cultures, and therefore misunderstanding of each others' intent and expectations may frequently occur. This course examines how distinctions in meaning and interpersonal dynamics may create these two differing cultures, and promotes understanding and possibilities for adaptation. It also investigates when and if changing communication styles is desirable, and in which settings. A goal of the course is to help students to solve puzzles toward understanding those we work with and relate to, as well as to apply their knowledge to their own lives and contexts. The course content and format reflects these goals. CAS/WMNST 455 begins with theoretical information, later applying it to situations of interest to most -- relationships, language use differences (verbal and nonverbal), media messages, and workplace issues. Lecture incorporates considerable discussion and exploration of gender issues and most topics are followed by activities, which illustrate how theories work in real life. This course is useful for any students seeking an intercultural course. It is recommended to Communication Arts and Sciences and Women's Studies majors and minors due to emphasis on communication theory and gender issues. Business, Counseling, Psychology, Sociology, Education and any Social Science majors may fulfill a US requirement through 455. Exams are geared toward testing ability to apply theory to life. Other evaluation methods encompass short reaction papers, a book review, application paper, and team research papers and presentations. These assignments and all class exercises focus on application of theory and course content to students' lives.

WMNST 462 (US) (ENGL 462) Reading Black, Reading Feminist (3) Female identity and its construction in textual representations of gender, class, color, and cultural difference in English-language literatures.

The Pennsylvania State University
WMNST (ENGL) 462 Reading Black, Reading Feminist (3)
(US)

(BA) This course meets the Bachelor of Arts degree requirements.

ENGL/WMNST 462 provides two important learning opportunities for undergraduate students. The first is to examine the construction of female identity in the textual representations of gender, class, color, and cultural differences by black American women. The second is to identify, explore, and analyze the major issues concerning the discovery and development of a black feminist literary tradition. Authors under consideration will vary from class to class, but may include writers such as Hortense Spillers, Harriet Jacobs, Harriet Wilson, E. Genoveese, Hazel Garby, Francis Harper, J. Fauset, Nella Larsen, Zora Neale Hurston, Gwendolyn Brooks, Margaret Walker, Nikki Giovanni, Sonia Sanchez, Maya Angelou, Lorraine Hansberry, Adrienne Kennedy, E. Brown-Guillory, Toni Morrison, S. A. Williams, Alice Walker, Paula Marshall, and Octavia Butler. The course will focus on the complex relationship of slavery and post-slavery black experience to the literary imagination of African American women, and of issues of gender in black identity in America. Topics covered will vary, but will include issues of the legacy of slavery, the development of black feminist thought, nineteenth-century conceptions of black womanhood, women’s roles in the Harlem Renaissance, representations of black womanhood by male writers, and self-representation by female writers, women “Black Power” poets, black female playwrights, neo-slave narratives, the aesthetics of contemporary black feminism, and post-modernism and the challenge to understandings of canonicity posed by black women’s writing, and the like. This class will prepare students for advanced courses in African American and feminist literature, as well as other academic courses that engage in the verbal and written analysis of complex written forms. Students will be evaluated by class participation, a group oral presentation, small group problem solving exercises, three out-of-class essays (of 5-8 pages each), and an in-class final examination consisting of essays and short answers. In addition to satisfying requirements for students emphasizing in African American literature within the English major, this course will be important in the offerings of African/African American Studies, American Studies, Women's Studies, and History. The course may be used as English major elective credit or as credit towards the English minor. The course can be used to complete the major and minor in Women's Studies Arts and Humanities area and it also satisfies the Women of Color (WOC) sub-requirement.

WMNST 464 (US) (BE SC 464) Feminine/Masculine (3) Study of sex role learning; investigating feminine/masculine labeling; implications for contemporary society.

WMNST (BE SC) 464 Feminine and Masculine (3)
(US)

This course provides a critical examination of the concepts of masculinity and femininity through a consideration of how these have shifted and changed historically and cross-culturally. It considers a variety of theories of gender difference. It investigates how gender is socially constructed and practiced. Thus, it examines how gender is enacted in interpersonal relationships and defined, reinforced, and challenged through processes of socialization as well as through the various institutional spheres of social life. The course addresses the diversity of masculinities and femininities within a single society. Thus, attention is given to race and class-based differences as well as to trans-genderism and homosexuality.

WMNST 466 (US;IL) (HIST 466) Lesbian and Gay History (3) Critical exploration of the history of sexuality, focusing especially on the emergence of modern lesbian and gay identities.

WMNST (HIST) 466 Lesbian and Gay History (3)
(US;IL)

This course will explore the relationships in different cultures and historical periods between the dominant culture and homosexuals, whom the culture deemed, at different times, sinful, deviant, criminal or, more recently, a minority community. Students will confront the very nature of difference, and the way it has been played out in European and American history. The course will challenge students to deal with how societies define difference itself; how they isolate or punish deviants; and how the creation of the "homosexual" helped establish not simply difference but "normalcy" in a highly sexualized modern culture. Finally, the course will explore notions of identity itself, focusing on the creation of a modern gay and lesbian identity and its impact on broader questions of gender, community, civil rights, and political discourse in the United States.

An example of evaluation methods would be: course presented in a seminar format with grades based on class participation, brief analytical papers, and a longer research or historiographic paper.

WMNST (PSY) 471 The Psychology of Gender (3) (US)

This course meets the Bachelor of Arts degree requirements.

This course examines how psychologists have addressed questions relating to gender in past and present-day research. Our goal is to understand what "gender" is, and how and when gender matters in our evaluations of ourselves and in our interactions with others. The course focuses on four themes:
(1) When does gender matter? Gender as a system of power relations, as an aspect of personality, as a cue;
(2) Diversity within gender categories;
(3) Thinking critically about language and the power of naming;
(4) Connections between psychological research and social change.

Successful completions of the course will:
(1) give students an understanding of the major concepts, theories, and methodological issues in past and current psychological research on gender
(2) enable students to think critically about psychology’s study of gender and its implications for social policy and social change
(3) enable students to relate their history of experience of gender to the academic literature on the topic
(4) give students an understanding of the importance and complexity of investigating gender in the context of other dimensions of social identity, such as racial ethnicity

Course grade is based on performance on quizzes/exams (30%), homework assignments (30%), a collaborative research project (35%), and class participation (5%). This course covers the psychology of gender in greater depth than does any other undergraduate PSY course, and provides a psychological perspective on topics covered in a variety of Women's Studies courses. It complements other PSY courses that cover related topics in social and personality psychology. The course can be counted as one of the required 400-level courses for the Psychology major and for the Women's Studies major.

WMNST 472 (LER 472) Work-Life Practices and Policies (3) Explore the causes and consequences of conflicts between work, family, and other life commitments, and how these may be resolved.

WMNST (L R) 472 Work-Life Practices and Policies (3)

This course meets the Bachelor of Arts degree requirements.

The interdisciplinary field of work-family and work-life developed as a result of middle-class women's entry into the labor force, a movement that generated conflict between family and paid work commitments. Overall, the course addresses the reasons the field developed, relevant theoretical perspectives regarding the issues, and related problems as well as proposed solutions at both the public and private sector levels. The overarching objectives of the course are to expand students' understanding of conflicts between work and family commitments, and how these might be resolved through private and public sector initiatives. Specifically, the course concerns how individuals, families, and organizations interact to help hinder the achievement of balance between work and life commitments, and relevant effects on those involved. The changing demographics of the family, laws and trends around working time, father and mother time with children, the expanded need for elder care, work-life programs such as flextime, concierge services, paid parental leave, part-time careers, paid time-off banks, and the role of unions, corporations and government legislation are covered. The course attempts to link the likely future needs of students to broader trends in society and how balance could be achieved at the level of individuals, families, other stakeholders in the community, and for society as well. Fields of research relevant to the course include labor studies, women's studies, Industrial/Organizational psychology, the sociology of work and of family, and child development.

The Pennsylvania State University
ENGL 490 Women Writers and Their Worlds (3) American and British literature written from the perspective of women. The course provides the opportunity to study writing by British Women from a historical perspective and to explore the views these women have of themselves as artists. The course will concentrate on a careful reading of works by a variety of authors. It will address the question of the role gender plays in the selection of literary forms and the development of character, theme, symbols, and rhetorical strategies. It will also explore what particular dimensions British women writers have brought to the British literary tradition.

Students will be active learners through keeping reading journals, presenting background reports on the history of women in England, participating in small-group discussions about the texts, and writing 2 shorter essays and one longer research essay for the class. This course focuses on an area of British literature, which more traditionally structured courses tend to obscure. The course will be attractive to students from a variety of programs, including English majors, Women's Studies minors, and Interdisciplinary Humanities students.

ENGL/WMNST 490 covers particular aspects of American and British literature written from the perspective of women. The course stresses the diversity of women's authorial worlds, both through time and/or space. The readings and specific focus vary from semester to semester. ENGL/WMNST 490 seeks to make students aware of the extensive body of literature written by women, but, unlike ENGL 194, which is a survey course of women's literature, ENGL/WMNST 490 can be a more intensive course, focusing on selected themes and topics of particular concern to women as reflected in the poetry and fiction of twentieth-century American and British women writers. The class can also be taught in relationship to earlier periods, dealing, for instance, with English women novelists from 1775-1865. In such a class, readings would include fiction by Fanny Burney, Mary Wollstonecraft, Ann Radcliffe, Jane Austen, Mary Shelly, Emily Bronte, Elizabeth Gaskell, and George Eliot. The course would then place each novel in its historical, social, intellectual, and literary context, and explore the various ways in which some of England's best writers transformed their female experience of the world into fiction that extended the range and influenced the development of the novel. Regardless of the particular focus, all sections of the course pose the following questions throughout: Do women use the same myths, archetypes, and literary conventions as male writers? Or do they sometimes have to modify the myths, archetypes, and literary conventions originated by their male precursors in order to adapt them to female experience? Is there such a thing as a chain of literary influence linking women writers to each other? What are the strategies for coping with the anxieties of authorship? What is the interaction between gender and genre? In what ways are creativity and procreativity modes of defying prevailing ideologies? Does a woman's psychological development have an effect on the plots a woman novelist conceives? How does women's literature reflect the realities of women's lives? As a course in women's literature, ENGL/WMNST 490 concerns itself with questions of gender. In so far as some of these women writers are black or women of color, it concerns itself with questions of race and ethnicity. In as far as the course looks at women's literature in the context of men's literature, it is concerned with the inter-relationship between dominant (male) and non-dominant (female) culture in the United States as well as in Britain. In so far as the course covers lesbian writers, it is concerned with sexual orientation. The course not only prepares students for taking up literary and cultural analysis in English classes, but also in any other class that engages in the verbal and written analysis of complex written texts, and in other classes in Women's Studies or in other Penn State departments that address the social, cultural, or ethical issues of gender. The course may be used as English Major elective credit or as credit towards the English Minor; it may also be used in the Women's Studies major and minor.

American Women Writers (3)
WMNST 492W Current Feminist Issues

Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

This course is the capstone course for the Women's Studies major. We keep the course small (15-20 students) and offer it every spring. It is constructed to provide you the opportunity to apply the knowledge and skills you have developed in Women's Studies to some of the major topics being addressed in current academic feminist discourse. The first goal of the course is for each student to become familiar with the major arguments and evidence regarding some of the current major topics in feminism. The second goal is for each student to learn more about the multidisciplinary perspectives of women's studies. The third goal of the course is for each student to develop and demonstrate her skill at carrying out feminist scholarship.

There are two core elements of the course. The first is class discussion of readings addressing some of the major current feminists. Each year a new set of these topics is put together by the instructor, drawing upon the suggestions of other Women's Studies faculty and majors. The second core element of the course is each individual student doing a term paper. Work on these papers will take place both publicly and privately, so that everyone in the course will learn something about how feminist projects are constructed in the various disciplines represented by the students' choices of topics for their papers.

Because this is a W course, 2/3 of your grade will be based on writing assignments. Throughout the course, you will write short (2 page) papers on the readings that we will be discussing in our seminars. You will also write a term paper and some preliminary assignments related to it, including a topic justification paper, an annotated bibliography accompanied by a text description of the major themes identified in the bibliography, a class presentation on your paper topic, and the final 10-15 page paper. The other third of your grade will be based on your participation in seminar discussions.

**WMNST 501 Feminist Perspectives on Research and Teaching Across the Disciplines (3)**

In this seminar, we will explore feminist approaches to research and teaching in different fields in the humanities, the social sciences, and the natural sciences. Students will take an active part in identifying and evaluating feminist approaches to theory and in analyzing how a feminist approach to research reshapes and redirects the ways that research has traditionally preceded and the results obtained in different disciplines. Our aim is not to identify a feminist orthodoxy with which to replace a masculinist or patriarchal orthodoxy, but rather to identify and understand the varieties of feminism existing today: to delineate differences between feminist and traditional paradigms, in terms of the ways research is designed and carried out within those disciplines; and to arrive at an appreciation of the transformative effect upon teaching and research of the new paradigms forged by feminist scholars in a variety of disciplines.

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**WMNST 502 Global Perspectives on Feminism (3)**

Exploration of feminist issues in a global perspective, including debates in history, ethics, and political feminism.

WMNST 538 (PHIL 538) Feminist Philosophy Seminar (3) Critically examines feminist approaches to ethics, epistemology, philosophy of science, social/political philosophy, and the history of philosophy.

WMNST (PHIL) 538 Feminist Philosophy Seminar (3)

This course aims to give students an understanding of the philosophical concepts and problems of feminist philosophy. The course will focus on major topics, such as the history of philosophy, ethics, social/political philosophy, epistemology and philosophy of science, and metaphysics, and figures within 20th century feminist philosophy with the concurrent goal of bringing them to bear on contemporary issues involving gender's relationship to race, sexuality, class, disability, nationality and age. This course builds upon PHIL 438 Feminist Philosophy and counts towards the requirements of the dual title degree in Philosophy and Women's Studies. Evaluation methods include preparation for and participation in class meetings, two short discussion papers, and a final term paper. The course will be offered at least once every four semesters with an enrollment goal of 20. Specific course content will vary with instructor.

Wood Products (W P)

W P 400 Properties of Wood (2) Chemical Structure and Mechanical Properties of Wood Composites.

W P 400 Properties of Wood (2)
The Properties of Wood is an introductory course for students in the Wood Products Business and Marketing Option and as an elective course for non-wood products majors in the Wood Products Marketing minor. The course is designed for students to develop an understanding of the molecular structure of wood and the macroscopic mechanical properties of wood. Students will develop the skills necessary to analyze and explain the behavior of wood during processing and utilization. The concepts and skills developed by the students in this course will be integrated into the wood products business case studies developed in advanced wood products business and marketing courses. Students will be evaluated by using weekly quizzes with descriptive and essay questions and a final exam. The course will be required for students in the Wood Products Business and Marketing option. Students electing the Wood Products Processing and Manufacturing option will be restricted from registering for this course.

W P 438 Business Concepts for Wood Manufacturing (4) The course will cover manufacturing strategies and related financial measures in a wood production environment.

W P 438 Business Concepts for Wood Manufacturing (4)

This course will introduce students to the challenges inherent in attempting to profitably manufacture quality products with wood as a raw material. This will lay the groundwork for student understanding that positive margins and profitability are not a given for all wood producers. Students will receive an overview of the operations function and how it should synergize with other business functions such as R&D and marketing. The remainder of the course will be dedicated to exposing students to (1) managerial finance and accounting topics pertinent to using wood as a raw materials in a manufacturing environment and (2) modern manufacturing strategies relevant to the wood products industry. The overall goal of the course is to give students a set of skills that will allow them to make informed economic decisions for a wood manufacturing organization. Knowledge of such topics as continuous process improvement from a business strategy standpoint should provide a framework for making decisions (using the managerial finance subject matter) that will improve the economic competitiveness of their employers. The course will include case studies from relevant industrial settings and will expose students to current managerial issues through field trips to mills and guest lecturers from industry. Students will also give an oral presentation based on assigned readings from a manufacturing-management text.

**WF ED 405 Project Management for Professionals (3)** Covers the essential concepts and skills needed to make effective contributions on projects, on time and within budget.

**WF ED 405 Project Management for Professionals (3)**

Professionals in the workplace carry out many different projects every day ranging from somewhat small tasks, e.g., planning events and designing courses, to big projects, e.g., launching an enterprise wide system. Project Management for Professionals is a practical “hands-on” course designed for mid-career adult students and covers the essential concepts and skills needed to make effective contributions and have an impact on the successful accomplishment of projects on time and within budget.

Project management principles and techniques are presented with an emphasis on how they are applied to real world workforce development projects. Topics include the project management life cycle and process; techniques for planning, scheduling, budgeting, and controlling project performance; project manager responsibilities and skills; project team development and effectiveness; project communication; and organization structures.

WF ED 410 Leadership Competencies for Professionals (3)

Leadership Competencies for Professionals is a course designed primarily for adult learners who demonstrate high leadership potential and who may not have significant supervisory and managerial responsibilities. Its purpose is to ensure that all students develop an adequate understanding of the contemporary professional leadership competencies that are needed to function effectively in today’s global business environment. These competencies include: collaboration / multi-disciplinary team-building, leadership in diversely distributed team environments, interpersonal communication in the workplace, conflict resolution / human performance management, project management, problem-solving / creative thinking / ethical decision making, and contemporary and emerging technology usage. Students will be assessed and evaluated through quizzes, instructor and peer observation, self-assessments and reflection, and team projects and presentations.

**Note**: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**WF ED 545** Economic and Demographic Modeling of Policies for Workforce Education and Development (3) Use of economic and demographic models to plan and evaluate workforce education and development.

**Economic and Demographic Modeling of Policies for Workforce Education and Development (3)**

- General Education: None
- Diversity: None
- Bachelor of Arts: None
- Effective: Summer 1996
- Prerequisite:

**Note**: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**WF ED 546** Work Based Education (3) Discussion of legislation and educational requirements for education based at the worksite including cooperative education, youth apprenticeship, and apprenticeship programs.

**Work Based Education (3)**

- General Education: None
- Diversity: None
- Bachelor of Arts: None
- Effective: Summer 1996
- Prerequisite:

**Note**: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**WF ED 550** Research in Workforce Education (3) Research techniques in workforce education.

**Research in Workforce Education (3)**

- General Education: None
- Diversity: None
- Bachelor of Arts: None
- Effective: Summer 1996

**Note**: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**WF ED 560** Historical and Philosophical Foundations of Workforce Education (3) An investigation of historical, philosophical, and professional foundations of workforce education.

**Historical and Philosophical Foundations of Workforce Education (3)**

- General Education: None
- Diversity: None
Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

WF ED 572 Organization Development For Industrial Trainers (3) An introduction to major concepts, skills and techniques required by industrial trainers to support and facilitate organization change.

Organization Development For Industrial Trainers (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 1996
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

WF ED 573 Needs Assessment for Industrial Trainers (3) Acquire skills to identify training and development needs, distinguish problems with management versus training solutions, develop and evaluate training solutions.

Needs Assessment for Industrial Trainers (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2001

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

WF ED 574 Strategic Planning For Education For Work (3) Study of human capital as a component of education, industrial and business training strategic planning at economy, and organizational levels.

Strategic Planning For Education For Work (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 1996
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

Current Policy and Practices in Industrial Training (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 1996
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

WF ED 590 Industrial Training Professional Seminars (1) Study of special topics relating to problems, practices, methodologies and special competency needs in industrial training.

Industrial Training Professional Seminars (1)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2001

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

WF ED 595A Field Based Project in Industrial Training (2-5) Students identify a training and/or organization development problem in industry and/or business and carry out contract problem analysis and resolutions.

Field Based Project in Industrial Training (2-5)

The Pennsylvania State University
Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**WF ED 595B** Workforce Education Administrative Internship (2-15) Supervised study with an administrator or researcher at a cooperating school, state governmental agency, or research institution.

Workforce Education Administrative Internship (2-15)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 1996

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**WF ED 595C** Internship in Cooperative Vocational Education (1-10) Validation of teaching and co-op coordinator competencies learned in prerequisite courses during interaction with professional staff while functioning under the supervision of a certified cooperative coordinator.

Internship in Cooperative Vocational Education (1-10)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1997
Prerequisite:

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**WF ED 596** Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Individual Studies (1-9)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 1996

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

**WF ED 597** Special Topics (1-9) Formal courses given on a topic or special interest subject which may be offered infrequently.

Special Topics (1-9)

General Education: None

GRADUATE PROGRAMS

Graduate programs are arranged in alphabetical order, accessible by clicking the links for each letter of the alphabet and then the link for the program name (see left side of this page).

If you do not know the exact name of a program, you can type a word connected with the subject area into the bulletin’s search engine and choose “Degree Programs” from the drop-down menu under “Area.” That will give you a list of programs that contain the search term you typed.

Within each program description, specific information varies. Typical descriptions include contact information, a graduate faculty list, degrees conferred, requirements, and links to course descriptions. In most cases, a link to the home page of the program, which will take you out of the bulletin site to the program’s site, is in the description.
Agricultural and Biological Engineering (A B E)

Program Home Page

The Graduate Faculty

- Dennis E. Buffington, Ph.D. (Minnesota), P.E. Professor of Agricultural Engineering
- John C. Heidkamp, Ph.D. (Lehigh) Assistant Professor of Agricultural Engineering
- Ali Demirci, Ph.D. (Iowa State) Associate Professor of Agricultural Engineering
- Herschel A. Elliott, Ph.D. (Delaware) P.E. Professor of Agricultural Engineering
- Robert E. Graves, Ph.D. (Massachusetts) P.E. Professor of Agricultural Engineering
- James M. Hamlett, Ph.D. (Iowa State) P.E. Associate Professor of Agricultural Engineering
- Paul H. Heinemann, Ph.D. (Florida) Professor of Agricultural Engineering
- James W. Hilton, Ph.D. (Iowa State) Associate Professor of Agricultural Engineering
- Albert R. Jarrett, Ph.D. (Penn State) P.E. Professor of Agricultural Engineering
- Jude Liu, Ph.D. (Manitoba, Canada) Assistant Professor of Agricultural Engineering
- Dennis J. Murphy, Ph.D. (Penn State) C.S.P. Distinguished Professor of Agricultural Engineering
- Virenda M. Puri, Ph.D. (Delaware) Distinguished Professor of Agricultural Engineering
- Thomas L. Richard, Ph.D. (Cornell) Associate Professor of Agricultural Engineering
- C. Pan Rozt, Ph.D. (Penn State) Adjunct Professor of Agricultural and Biological Engineering
- Howard Salis, Ph.D. (Minnesota) Assistant Professor of Agricultural and Biological Engineering
- Robert D. Shannon, Ph.D. (Indiana) Associate Professor of Agricultural Engineering
- Eileen F. Wheeler, Ph.D. (Cornell) Professor of Agricultural Engineering

The Graduate Faculty

Agricultural and Biological Engineering offers students the opportunity to gain expertise in areas of engineering for biological/agricultural systems corresponding to their professional interests. Graduate students select research projects (and supporting course work) from a wide range of interest areas that match faculty research expertise. Research projects are available in physical properties of biological materials, plant and animal production systems, food engineering, agricultural engineering, agricultural by-product utilization, forage processing and handling systems, electronics instrumentation, online computer control systems, erosion and sedimentation control, waste management, water quality, and natural resources management and conservation.

Excellent facilities, including equipment and instrumentation, are available for research in the designated areas. Among the special facilities are field plot areas; a full-scale sedimentation basin test facility; hydraulic flumes; seed laboratory; gas and ion chromatography units; atomic absorption unit; rainfall simulators; food properties lab; food equipment and processing lab; microbiological engineering lab; computer vision systems; hydraulic and pneumatic test stands; fabrication shop; electronics instrumentation; microcomputer laboratory; controlled environment chambers; wood structures lab; and wood mechanics lab.

Collaborative arrangements allow access to a large variety of other resources: Penn State Institutes of the Environment; Particulate Materials Center; Housing Research Center; Center for Food Manufacturing; USDA Pasture Systems and Watershed Management Research Lab; a mushroom research and demonstration facility and a 1,500-acre agricultural research center for cooperative work with agronomic and horticultural production systems as well as animal production systems.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

An undergraduate major in engineering is normally a prerequisite to work in the major. Students without an undergraduate engineering degree will be considered for admission on a provisional basis pending the completion of a number of additional credits to be specified on an individual basis. All students must submit scores from the General Aptitude Test of the Graduate Record Examinations (GRE) prior to admission (except those who have an ABET-accredited engineering degree). There is no minimum GRE score required for admission, as this is only one of several qualifications considered in the admission review process. However, financial assistance is often influenced by the degree of success exhibited by GRE scores and grade-point averages (GPAs) from previous engineering programs. International applicants must submit OFFICIAL transcripts, degree, and diploma certificates in both English and the native language.

Photocopies will not be accepted. All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test or a score of 213 on the computer-based test is required for admission. The TOEFL exam must be taken within three years of the application date.

All applicants must provide the department with official transcripts of all their previous course work (in duplicate), a statement of purpose written by the applicant, and at least three letters of recommendation. Admission into the A B E Graduate Program is based upon a thorough review of all applicant qualifications, and the best-qualified applicants will be accepted up to the number of students for which department resources are available.

Entrance to Master of Science Program

Completion of an undergraduate degree in agricultural or biological engineering or in another related engineering discipline is required for direct admission to the A B E graduate program. Students need at least a 2.50 (4.00 base) junior/senior grade-point average to be considered for admission.

A student with an undergraduate degree in a non-engineering field can be admitted to the M.S. program on a provisional basis, which continues until completing the engineering undergraduate requirements in mathematics, physics, engineering sciences (thermodynamics, statics, dynamics, strength of materials, fluid mechanics and electrical circuitry), and 6 credits of 400-level Agricultural and Biological Engineering courses. Upon completion of these preparatory courses with a minimum grade-point average of 2.75, the student will be admitted to the graduate program.

Entrance to Doctor of Philosophy Program

The requirement for direct acceptance is an M.S. degree with a research thesis in an engineering or science discipline and a B.S. degree from an engineering program. Only very highly qualified students will be accepted to the program directly from a B.S. engineering program.

A student with an undergraduate degree in a non-engineering field can be admitted to the Ph.D. program on a provisional basis, which continues until completing the engineering undergraduate requirements in mathematics, physics, engineering sciences (thermodynamics, statics, dynamics, strength of materials, fluid mechanics and electrical circuitry), and 6 credits of 400-level Agricultural and Biological Engineering courses.

Master's Degree Requirements

All candidates for the M.S. degree must prepare a thesis, complete a minimum of 30 graduate credits (including a minimum of 6 credits of research), and obtain a minimum grade-point average of 3.00. Only grades of C or better are accepted for graduate credit. Each program should include at least one course each from the areas of agricultural and biological engineering, agricultural/biological science, mathematics or statistics, and A B E 500 Research Methods.
total of at least 12 credits of course work must be at the 500 level. All courses must be approved by the student’s advisory committee as having significance and value for the degree program. All requirements for a master of science degree, whether satisfied at Penn State or elsewhere, must be met within five years from the first semester of graduate study.

Additional program details are contained in a graduate syllabus, available from the department.

**Doctoral Degree Requirements**

Official entrance into a Ph.D. program occurs upon successful completion of the Ph.D. Candidacy Exam. Ph.D. degree requirements include successful completion of the following: approved graduate course work, Ph.D. language and communication requirements, a comprehensive examination, and defense and approval of a dissertation.

No specified number of courses completed or credits earned are required by the department. However, the candidate must complete at least 9 credits of Agricultural and Biological Engineering (A B E) course work beyond the baccalaureate degree. Six credits must be 500-level A B E courses (excluding A B E 500, 590, 594, 595, 596); the remaining 3 credits must be in any A B E 460 course or higher. Unless previously taken, all Ph.D. students must complete A B E 500. The student's doctoral advisory committee will recommend the minimum requirements in such supporting areas as mathematics, engineering, agricultural/biological sciences, and physical sciences. The candidate is expected to develop a program of study and submit it to the appointed doctoral advisory committee for consideration and approval. All Ph.D. students are required to participate in resident education or extension teaching activities for the equivalent of at least one semester during their graduate program. A typical plan of study consists of about 90 credits beyond the baccalaureate degree with about 30 of the total credits for research. All requirements for a Ph.D. degree, whether satisfied on this campus or elsewhere, must be completed within seven years after passing the candidacy examination.

**Ph.D. LANGUAGE AND COMMUNICATION REQUIREMENT**—The purpose of the communication requirement is to strengthen the student’s professional communication skills. The candidate must take a minimum of two courses (a minimum total of 5 credits) and receive a grade of B or better in each course taken. Course selections must be approved by the academic adviser prior to registration. Courses used to satisfy this requirement must include the substantial practice of writing and/or speaking.

**Other Relevant Information**

Continuous fall and spring registration is required for all graduate students until the thesis is approved.

**Student Aid**

Graduate assistantships and other forms of student aid are described in the [STUDENT AID](#) section of the *Graduate Bulletin*.

**Courses**

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Last updated by Publications: 2/7/11
The Graduate Faculty

- Chinmay J. Anumba, Ph.D. (U Leeds, UK); D.Sc. (Loughborough, UK) P.E. Head; Professor of Architectural Engineering
- William P. Bahmfieth, Ph.D. (Illinois) P.E. Professor of Architectural Engineering
- Richard A. Sehr, Ph.D. (Texas Tech) P.E. Charles and Elnor Matts Professor of Architectural Engineering
- Thomas E. Boothby, Ph.D. (Washington) P.E., R.A. Professor of Architectural Engineering
- James D. Freihaut, Ph.D. (Penn State) Associate Professor of Architectural Engineering
- Linda M. Hanagan, Ph.D. (Virginia Tech) P.E. Associate Professor of Architectural Engineering
- Kevin Houser, Ph.D. (Penn State) P.E. Associate Professor of Architectural Engineering
- Robert M. Leicht, Ph.D. (Penn State) Associate Professor of Architectural Engineering
- Andres Lepage, Ph.D. (Illinois) P.E. S.E. Assistant Professor of Architectural Engineering
- Ali M. Memari, Ph.D. (Penn State) P.E. Professor of Architectural Engineering
- John I. Messner, Ph.D. (Penn State) Associate Professor of Architectural Engineering
- Richard G. Mistrick, Ph.D. (Penn State) P.E. Associate Professor of Architectural Engineering
- Stephen A. Mustra, Ph.D. (Illinois) P.E. Professor Emeritus of Architectural Engineering
- M. Kevin Parfit, M.Eng. (Cornell) P.E. Associate Professor of Architectural Engineering
- David R. Riley, Ph.D. (Penn State) Associate Professor of Architectural Engineering
- Jolena Srebic, Ph.D., (MIT) Associate Professor of Architectural Engineering
- Stephen Treado, Ph.D. (Maryland) P.E. Associate Professor of Architectural Engineering

Students may specialize in building construction, building illumination systems, building mechanical and energy systems, or building structural systems.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission to the Ph.D. and M.S. programs. Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission to the AE graduate programs. Students accepted into the Architectural Engineering program generally have an undergraduate degree in mechanical engineering, electrical engineering, civil engineering, architectural engineering, science, or architecture.

All degree candidates are required to provide a letter of intent outlining the student's intended area of study as well as three letters of recommendation. The best-qualified applicants will be accepted up to the number of spaces that are available for new students.

A limited number of undergraduate students in the B.A.E. program will be considered for admission to one of two integrated undergraduate-graduate degree programs. The first provides the student earning both the B.A.E. and M.A.E. degrees and involves a graduate-level component in the capstone senior project. The second provides the student with the opportunity to earn both the B.A.E. and M.S. degrees and involves a research-oriented thesis in addition to the capstone undergraduate senior project. Students who are approved to enroll in the 7th semester of the B.A.E. degree program may apply to one of two integrated programs and will be admitted following a positive review by the faculty committee on graduate admissions. Application materials for both programs are available on theAE Department website. To be considered for admission to either program, students must have attained a GPA of at least 3.0 and a grade of C or better in all classes listed as AE. A commitment from an AE graduate faculty member to serve as the student's M.S. thesis adviser is necessary for admission to the B.A.E./M.S. program.

Degree Requirements

A thesis is required for the M.S. degree, which consists of 24 credits of courses and a 6-credit research thesis. A minimum of 12 of the course credits must be completed at the graduate (500) level. A student's program of courses in the M.S. program is developed in cooperation with the student's academic adviser.

For the Ph.D. degree, a dissertation that displays a student's ability to conduct high-quality original scholarly work is required of all Ph.D. students. Each student accepted into the Ph.D. program must pass the Ph.D. Candidacy Examination, which requires students to display an understanding of basic material in all AE option areas, along with an in-depth understanding of material covered in the AE undergraduate courses within their area of focus. This examination must be taken no later than the beginning of the student's second year in the program. Each Ph.D. student must also pass an English Proficiency Examination that is administered by the department, typically during the first semester. The student's program of courses is developed in cooperation with the student's Ph.D. committee. It is recommended that this consist of approximately 30 credits of courses beyond the master's degree, although there is no established minimum or maximum. At the conclusion of the student's course work, the Ph.D. student must take a two-day written comprehensive examination that is developed by the student's Ph.D. committee. Following the comprehensive exam, continuous registration is required for all Ph.D. graduate students until the dissertation is approved. Each student presents a comprehensive thesis proposal to his/her committee prior to starting his/her dissertation research. The dissertation research and must present the results of this research in a final oral examination.

The M.Eng. degree is a nonthesis professional master's degree. Candidates for the M.Eng. degree are required to complete 30 credits of course work. A minimum of 18 credits must be at the 500 level or above. Students must follow the approved program of courses for one of the four available specialty areas. Minor modifications to these programs are permitted, with approval of the Graduate Program Officer. Each student must also complete a capstone project/report, supervised by a member of the graduate faculty.

Students admitted to an integrated program (B.A.E./M.A.E. or B.A.E./M.S.) must maintain a GPA in all classes used toward the M.A.E. or M.S. degree of at least 3.0. For both the Integrated B.A.E./M.A.E. and B.A.E./M.S. degree programs, 30 credits of the 172 total credits required to receive both degrees are applied toward the master's degree (up to 12 credits count toward both degrees). A minimum of 18 credits is required at the graduate level (500, 600 and 800 level). For the B.A.E./M.A.E. degree program, all of graduate credits are course credits. For the B.A.E./M.S. degree program, a thesis is required and six credits of thesis research (600 or 610) must be included in the candidate's academic course plan. Approved integrated program course sequences are available for each of the four undergraduate option areas. These sequences specifically identify the 12 credits of courses that count toward both degrees. Each student must submit a course plan detailing the graduate component for approval when applying to this program and must request approval from the Graduate Program Officer for any proposed modifications to this plan following admission to the program.

All students in the M.Eng., M.S., and Ph.D. programs must also attend a minimum of 10 approved lectures during their degree program.

Student Aid

Graduate assistantships and other forms of student aid are described in the Student Aid section of the Graduate Bulletin. A limited number of research and teaching assistantships, scholarships, and fellowships are available to M.S. and Ph.D. students in the Department of Architectural Engineering. The intent of these assistantships and awards is to support students conducting research under faculty supervision. For this reason, students in the M.S. and Ph.D.
programs who receive these types of financial support are expected to complete their degree program, including the thesis or dissertation, and may not transfer to the Master of Engineering degree program.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
Ph.D., M.S., M.Ed., M.P.S., Dual Degrees in Art Education and Women's Studies

The Graduate Faculty

- Patricia Amburgy, Ph.D. (Illinois) Associate Professor of Art Education
- Booker Stephen Carpenter II, Ph.D. (Penn State) Professor of Art Education
- Charles R. Garoian, Ph.D. (Stanford) Professor of Art Education
- Yvonne M. Gaudelius, Ph.D. (Penn State) Assistant Vice President and Associate Dean for Undergraduate Education; Professor of Art Education
- Grace Hampton, Ph.D. (Arizona State) Head of the Department of African and African American Studies; Professor of Art, Art Education, and Integrative Arts
- Karen Keifer-Boyd, Ph.D. (Oregon) Professor of Art Education; Affiliate Professor of Women's Studies
- Wanda B. Knight, Ph.D. (Ohio State) Associate Professor of Art Education
- Kimberly Powell, Ph.D. (Stanford) Assistant Professor of Art Education, and Curriculum and Instruction
- Mary Ann Stankiewicz, Ph.D. (Ohio State) Professor of Art Education
- Graeme Sullivan, Ph.D. (Ohio State) Professor of Art Education; Director, School of Visual Arts
- Christine Marmé Thompson, Ph.D. (Iowa) Professor of Art Education

This program helps students prepare for careers in college teaching, administration, research, public school art teaching, and art supervision.

Admission Requirements

For admission to the Graduate School, an applicant must hold either (1) a bachelor's degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the Internet-based test (iBT).

Applicants with iBT speaking scores between 15 and 19 may be considered for provisional admission, enrollment, and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, New Zealand, Scotland, the United States, and Wales.

Scores from the Graduate Record Examinations (GRE) or from the Miller Analogies Test (MAT) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students who seek admission to the graduate program must make formal application to the admissions committee of the Art Education program. To be admitted without deficiencies, the student is expected to have completed either a baccalaureate degree in art education or a program considered by the admissions committee to provide an appropriate background for the applicant's degree objectives. Related programs include work in studio art, art history, art education, education, museum education, etc. Deficiencies may be made up by course work that is not counted as credit toward an advanced degree.

Students pursuing graduate degrees may simultaneously take course work leading to teaching certification and art supervisory certification. The students who plan to teach art education at the college level should note that some institutions require professors to hold a public school art teaching certificate and to have had public school teaching experience.

Students with a minimum 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The most qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 average may be made for students with special backgrounds, abilities, and interests. Transcripts should indicate high attainment in appropriate academic and creative work. Letters of recommendation should attest to scholarship and ability to work independently. In addition to the above requirements, all applicants must submit an example of scholarly writing and a one- to two-page statement of:

1. professional objectives; and
2. the areas in which research and creative work are planned. The statement should indicate how these objectives will be furthered by graduate study.

For applications with a studio background, the inclusion of slides of creative work showing the depth and range of studio abilities is also recommended. Teachers may also submit slides of student works. Applicants planning to pursue studio work as a part of their graduate program must submit ten to fifteen slides of their creative work showing the depth and range of their studio abilities.

Master's Degree Requirements

A minimum of 30 graduate credits is required for the M.S. and M.Ed. degrees. Students must take a minimum of 15 credits in art education. Of those, M.Ed. and M.S. candidates are expected to complete the following 3-credit core: A ED 502, 505; 536 or 588; and A ED 590 (1 credit for each two semesters enrolled in course work). Students must take additional credits to total a minimum of 15 credits. All master's degree candidates must also complete 6 credits of foundational studies at the 400 level or above in areas such as art history, studio, philosophy, educational theory and policy, educational psychology, psychology, and anthropology. The remaining 9 credits are made up of elective studies.

Additional M.Ed. requirements. For M.Ed. candidates, 12 credits of course work must be at the 500 level or above. In addition to course work, M.Ed. candidates must write a substantial paper or present an exhibition in lieu of a thesis.

Additional M.S. requirements. For M.S. candidates, 18 credits of course work must be at the 500 level or above. M.S. candidates must prepare and orally defend a thesis. Requirements include 6 credits of thesis research within the 30 credits.

Students who seek admission to the M.P.S. in Art Education program should have current or recent teaching positions in a school, museum, cultural institution, or other community site at the time of application, with the expectation that the student continue to teach art in schools, museum, or other sites throughout the M.P.S. program. Applicants may apply to be admitted as a Graduate Non-degree Student for no more than 15 credits of course work.
Doctoral Degree Requirements

Admission to Candidacy. Once admitted to the doctoral program, all students must take a candidacy examination, which is given during the first year that the student is in residence. During the candidacy examination there is a review of (1) the student's professional resume; (2) a statement regarding the general direction of the student's research interests and possible areas of thesis inquiry; (3) completed graduate courses; (4) proposed course of study for subsequent semesters; (5) selected graduate papers written by the student; (6) slides or original work if studio inquiry is part of the student's program of study.

English competence. At or before the candidacy exam, all candidates for doctoral degrees are required to demonstrate high-level competence in the use of the English language, including reading, writing, and speaking, as part of the requirement for the doctoral program. Competency must be formally attested to by the student’s committee before the comprehensive examination is held.

Course requirements. All doctoral students are expected to complete the following 3-credit core courses: A ED 502, 505, 536, 588; and A ED 590 (1 credit for each two semesters enrolled in course work).

Additional Ph.D. requirements. All Ph.D. students must complete at least 2 continuous semesters of residency after being admitted to candidacy. Although not required by the program, Ph.D. students are strongly encouraged to complete a minor area of study. A foreign language is not required of Ph.D. candidates. Instead, the inquiry and foreign language requirement for the Ph.D. is met through 12 credits of graduate-level course work in a related discipline as determined by the student’s committee. All Ph.D. students are required to complete 18 credits of course work in art education. These 18 credits comprise the core courses plus two other courses in art education.

Comprehensive examination. Ph.D. candidates are required to take a written and oral comprehensive examination once their course work is substantially completed. The examination, prepared by the student’s doctoral committee, covers all phases of the student’s doctoral work both inside and outside the field of art education.

Doctoral dissertation. Ph.D. candidates are required to complete a dissertation on a topic of research approved by the student’s doctoral committee. The dissertation must be defended before the academic community at a final oral examination.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

ART EDUCATION (A ED) course list

Applied Behavior Analysis (ABA)

Program Home Page
KIMBERLY A. SCHRECK, Coordinator
Penn State Harrisburg
777 West Harrisburg Pike
Middletown, PA 17057
717-948-8048
kas24@psu.edu
www.hbg.psu.edu

Degree Conferred:
M.A.

The Graduate Faculty
Richard M. Foxx, Ph.D. (Southern Illinois) Professor of Psychology
Kimberly A. Schreck, Ph.D. (Ohio State) Associate Professor of Psychology

The program, offered at Penn State Harrisburg, helps master's level graduates prepare to function in community settings as applied behavior analysts, and to provide the academic training necessary for graduates to apply for national board certification in behavior analysis. The overall model emphasizes the core areas of the discipline including the scientific basis of behavior analysis, as well as how biological, social, and individual differences affect human behavior. Training will emphasize the development of both assessment and intervention skills.

The program helps prepare graduates to work in hospitals, medical schools, mental health centers, health maintenance organizations, a wide variety of educational settings, forensic settings, research facilities, and in center- and home-based programs for individuals with autism and developmental disabilities.

The program is intended for both part- and full-time students. Courses will be scheduled for fall and spring semesters. Admission is in the fall and spring semesters only.

Admission Requirements

Students will be admitted on a competitive basis and must submit the following:
- a completed application form
- two official transcripts of all colleges and universities attended
- three letters of recommendation
- a brief (two-page) interest statement

The applicant must have a bachelor’s degree from a regionally accredited academic institution, with at least 18 credits in education, psychology, or related disciplines with a cumulative grade-point average of 3.0 or above in the last 60 credits. Scores from the Graduate Record Examinations are required in the verbal, quantitative, and analytic portions.

The language of instruction at Penn State is English. All international applicants who have not received a baccalaureate or masters degree from a college/university/institution in a country where English is both the language of instruction and the only official or native language must take the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the speaking portion is required for admission; or a minimum composite score of 6.5 on the IELTS test is required for admission.

A personal interview may be required.

Transfer Credits

Subject to the limitations given below, a maximum of 10 credits of high-quality graduate work done at a regionally accredited institution may be applied toward the requirements for the master’s degree. Transferred academic work must have been completed within five years prior to the date of the first degree registration at the Graduate School of Penn State, must be of at least B quality (grades of B- are not transferable), and must appear on an official graduate transcript of a regionally accredited university. Pass-fail grades are not transferable to an advanced degree program unless the “Pass” can be substantiated by the former institution as having at least B quality.

Degree Requirements

Requirements for the M.A. in Applied Behavior Analysis include 27 credits in required course work, including the master’s project paper, supervised internship experience, and 6 elective credits for a total of 33 credits.

ABA Core Courses (to be offered annually) are required for all students in the program.

APPLIED BEHAVIOR ANALYSIS (ABA)
500. Experimental Analysis of Behavior (3)
511. Behavior Modification (3)
522. Single Subject Research (3)
533. Applied Analysis of Behavior (3)
588. Ethics and Legal issues in ABA (3)
594A, 594B. A Research Project (3)
595. Internship (9)

Elective Courses (6 credits)

APPLIED BEHAVIOR ANALYSIS (ABA)
555. Behavioral Interventions in Autism (3)
566. Behavioral Pediatrics (3)

The Pennsylvania State University
Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Dual-Title Graduate Degree in Astrobiology (ABIOL)

JAMES F. KASTING, Program Coordinator
2217 Earth and Engineering Sciences Building
814-863-8761; Astrobiology Research Center

Degree Conferred

Students electing this degree program through participating programs earn a degree with a dual title in the Ph.D., i.e., Ph.D. in (graduate program name) and Astrobiology. The following graduate programs offer dual degrees in Astrobiology: Astronomy and Astrophysics; Biology; Biochemistry, Microbiology, and Molecular Biology; Geosciences; and Meteorology.

The Graduate Faculty

- Michael A. Arthur, Ph.D. (Princeton) Professor of Geosciences
- Susan L. Branley, Ph.D. (Princeton) Professor of Geosciences; Director, Earth and Environmental Systems Institute
- Jean E. Brechley, Ph.D. (California, Berkeley) Assistant Professor of Geosciences
- Donald A. Bryant, Ph.D. (UCLA) Ernest C. Pollard Professor in Biotechnology; Professor of Biochemistry and Molecular Biology
- Albert Welford Castleman, Jr., Ph.D. (Polytechnic Inst. of Brooklyn) Eberly Distinguished Chair in Science; Evan Pugh Professor of Chemistry
- Matthew Fante, Ph.D. (California, Berkeley) Assistant Professor of Geosciences
- James G. Ferry, Ph.D. (Illinois) Stanley Person Professor of Molecular Biology
- Katherine H. Freeman, Ph.D. (Indiana) Professor of Geosciences
- S. Blair Hedges, Ph.D. (Maryland) Professor of Biology
- Christopher H. House, Ph.D. (California) Associate Professor of Geosciences; Director, Penn State Astrobiology Research Center
- James F. Kasting, Ph.D. (Michigan) Distinguished Professor of Geosciences
- Lee R. Kump, Ph.D. (South Florida) Professor of Geosciences
- Jennifer Macalady, Ph.D. (California, Davis) Associate Professor of Geosciences
- Suwarna Mahadevan, Ph.D. (Penn State) Assistant Professor of Astronomy and Astrophysics
- Hiroshi Ohmoto, Ph.D. (Princeton) Professor of Geochemistry
- Mark E. Patzkowsky, Ph.D. (Chicago) Professor of Geosciences
- Beth Shapiro, Ph.D. (Oxford) Assistant Professor of Biology
- Stein Sigurdsson, Ph.D. (Cal Tech) Associate Professor of Astronomy and Astrophysics
- Aleksander Wolszczan, Ph.D. (Copernicus U, Poland) Evan Pugh Professor of Astronomy and Astrophysics
- Jason Wright, Ph.D. (California, Berkeley) Assistant Professor of Astronomy and Astrophysics

The Astrobiology dual-title degree program is administered by the Department of Geosciences for the participating graduate programs. A program committee with representatives from each participating department maintains program definition, defines the nature of the candidacy examination and assigns the examining committee, identifies courses appropriate to the program, and recommends policy and procedures for the program's operation to the dean of the Graduate School and to the deans of the participating colleges. The dual-title degree program is offered through participating programs in the College of Earth and Mineral Sciences and the Eberly College of Science and, where appropriate, other graduate programs in the University. The program enables students from several graduate programs to gain the perspectives, techniques, and methodologies of Astrobiology, while maintaining a close association with major program areas of application.

Astrobiology is a field devoted to the exploration of life outside of Earth and to the investigation of the origin and early evolution of life on Earth. For admission to pursue a dual-title degree under this program, a student must apply to (1) the Graduate School; (2) one of the participating major graduate programs; and (3) the Astrobiology program committee. Usually students will apply and be accepted into the major program first. Application to the dual-title degree program can occur upon matriculation, but should be completed before the candidacy examination in the major program is scheduled.

Admission Requirements

Graduate students with research and educational interests in astrobiology may apply to the Astrobiology Dual-Title Degree Program. Candidates must submit transcripts of their undergraduate and graduate course work, a written personal statement indicating the career goals they hope to achieve by attaining an Astrobiology dual title, and a statement of support from their dissertation adviser. A strong undergraduate preparation in the basic sciences is expected, with evidence of an interest in multiple disciplines.

Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the major graduate program in which they are enrolled, in addition to the minimum requirements of the Astrobiology program. The minimum course requirements for the dual-title in Astrobiology are ABIOL 574 Planetary Habitability (3 credits), ABIOL 590 Astrobiology Seminar (2 credits), ABIOL 570 Astrobiology Field Experience (2 credits), and at least 2 credits of 400- or 500-level course work outside of the student's major program in an area relevant to Astrobiology (through consultation with their adviser). All students must pass a candidacy examination that assesses their potential in the field of astrobiology. This examination may be part of the candidacy examination in the student's major graduate program if an Astrobiology faculty member serves on the examination committee and is acceptable to the major program. If not, the Astrobiology dual-title program will offer a second candidacy examination. The structure and timing of the second candidacy examination will be determined jointly by the dual-title and major program. The student's doctoral committee should include faculty from the Astrobiology program, but this person may be the adviser and have an appointment in the major program of study. The field of Astrobiology should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of Astrobiology is required. A public oral presentation of the dissertation is required.

Financial Aid

Financial aid is generally available through the major program and through highly competitive University Graduate Fellowships (UGF). In addition, Penn State's Astrobiology Research Center (PSARC) provides support for students through research assistantships and graduate fellowships. Typically, students in Astrobiology are supported 12 months per year on some form of assistantship, fellowship, or summer wages provided by PSARC, UGF, or their home department.

Other Relevant Information

Students intrigued by the possibility of pursuing research in Astrobiology should visit the PSARC website and the NASA Astrobiology Institute website.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

ASTROBIOLOGY (ABIOL) course list

The Pennsylvania State University
Students must complete the following required courses as part of the 30 credit hours of graduate instruction:

- 432. Accounting Information Systems (3)
- 440. Advanced Managerial Accounting (3)
- 803. Forensic Accounting (3)
- 806. Advanced Topics in Taxation (3)
- 873. Advanced Topics in Financial Reporting (3)
- 881. Financial Statement Analysis (3)

The Pennsylvania State University
ACCTG 803 will be the capstone course for the program, with the final project integrating material learned in the other program courses. Student must also take an additional 3 credit (elective) course selected in consultation with their adviser.

Integrated B.S. in Accounting and Master of Accounting in Accounting Program

The Department of Accounting offers an integrated program allowing students to receive a B.S. in Accounting and Master of Accounting (M.Acc.) degrees within a five-year period. Students typically are admitted into the integrated program in the spring of the second year of the undergraduate program and the program is completed in the subsequent three years. The program is designed to meet the educational requirements for becoming a certified public accountant in Pennsylvania as well as most other states. Certified public accountants conduct independent audits and provide accounting, tax, and management advisory services. The program prepares students to enter into careers in public accounting, corporate accounting, management accounting, governmental accounting, financial analysis, and law enforcement. In addition, the program is appropriate for students having an interest in entering law school and graduate programs in business, such as M.B.A. programs or doctoral programs.

Admission Requirements

Students will generally apply for the program in the spring of their second year of undergraduate study. To apply for the program students must:

1. be enrolled in the Smeal College of Business or Division of Undergraduate Studies and intend to complete the entrance-to-major requirements by the end of the spring semester in which they apply

and

2. complete a Graduate School application for graduate study.

Although the program has no fixed minimum grade-point requirement, an applicant is generally expected to have grade-point average of at least 3.20 on Penn State’s grading scale of A (4.00) to D (1.00).

In addition, the Department may request an interview with an applicant, or require a GMAT exam or other exam. Admissions decisions will be based upon the student’s application, undergraduate record, SAT scores and, if applicable, interviews and examination results.

Admitted students must have completed ACCTG 211 with superior performance by the end of the spring semester in which they apply for admission to the program. A student who has not satisfied this requirement by the admissions deadline may be provisionally admitted pending completion of ACCTG 211 with a superior performance.

Degree Requirements

Students must complete the requirements for a B.S. in accounting with the following alterations:

Some of prescribed courses for the B.S. must be taken in sections that are available only to students enrolled in the program. These prescribed courses, which all count toward the undergraduate degree in accounting, are: ACCTG 403W, ACCTG 404, ACCTG 405, ACCTG 471, and ACCTG 472.

The student need not satisfy the requirement that 6 credit hours be completed from the following list of courses: ACCTG 406, ACCTG 432, ACCTG 473, and ACCTG 481.

The following courses cannot be used to satisfy the degree requirements of the integrated program: ACCTG 406, ACCTG 410, ACCTG 411, ACCTG 422, ACCTG 450, ACCTG 473, and ACCTG 481.

Students must complete the Master of Accounting Requirements, which total 30 credit hours of graduate instruction, in addition to completing 120 credit hours of undergraduate instruction.

The following courses, totaling 9 credits hours, will double-count towards both the B.S. and Master of Accounting degrees: B LAW 444(3), FIN 531(3), and ACCTG 881(3).

Courses

Graduate courses carry numbers from 500 to 599 or 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:
M.A.

The Graduate Faculty

- John Steven Backels, Ph.D. (Ball State) Affiliate Assistant Professor of Psychology
- Michael A. Becker, Ph.D. (SUNY, Albany) Associate Professor of Psychology
- Thomas G. Bowers, Ph.D. (Virginia Tech) Associate Professor of Psychology
- Gina M. Breisford, Ph.D. (Bowling Green) Assistant Professor of Psychology
- Barbara A. Bremer, Ph.D. (Bryn Mawr) Associate Professor of Psychology
- Richard Fiene, Ph.D. (Newport) Associate Professor of Human Development and Family Studies
- Marissa Harrison, Ph.D. (SUNY, Albany) Assistant Professor of Psychology
- Rebecca M. LaFountain, Ed.D. (William and Mary) Assistant Professor of Psychology
- Senel Poyrazli, Ph.D. (Houston) Associate Professor of Counseling Psychology
- Kimberly A. Schreck, Ph.D. (Ohio State) Associate Professor of Psychology
- Maria A. Turkson, Ph.D. (Maryland) Assistant Professor of Psychology
- Xu Xu, Ph.D. (Northern Illinois) Assistant Professor of Psychology

The Master of Arts in Applied Clinical Psychology program helps students prepare to work as mental health professionals in a variety of settings and is intended to provide a broad training program in empirically validated clinical psychology which, when accompanied by an additional 12 credits in advanced graduate studies in psychology and/or counseling, can provide the academic training necessary for graduates to apply for master’s level licensing as a professional counselor in the Commonwealth of Pennsylvania. The M.A. program requires 48 credits of course work. An optional 12-credit certificate program is available in the area of clinical health psychology through the School of Behavioral Sciences and Education for students seeking licensure.

The overall model emphasizes the scientific bases of behavior, including biological, social, and individual difference factors. The training model is health-oriented rather than pathology-oriented and emphasizes the development of helping skills, including both assessment and intervention.

The degree program is intended for both part- and full-time students. Students are admitted fall semester only. The deadline for admission is May 1.

Admission Requirements

Students will be admitted on a competitive basis and must submit the following:

- completed application form with the application fee
- two official transcripts of all colleges and universities attended
- three professional letters of recommendation
- a brief (two-page) interest statement
- verbal, quantitative, and analytical scores on the Graduate Record Examinations

The applicant must have a bachelor’s degree from a regionally accredited academic institution or the equivalent, must have completed at least 18 credits in psychology, and must have a cumulative grade-point average of 3.0 or above in the last 60 credits of course work. The undergraduate work must include a statistics course and a psychology research methods course with grades of B or higher. A personal interview is required.

International Students

All applicants whose first language is not English or who have not received a baccalaureate degree from an institution in which the language of instruction is English must take the Test of English as a Foreign Language (TOEFL), www.toefl.org. The test must be passed with a score of 550 (paper-based test) or 213 (computer-based test) or higher.

All students with international credentials must submit transcripts to Educational Credential Evaluators, Inc. (ECE) for a “Course by Course” academic evaluation of transcripts and degree. An ECE application can be obtained on the Web at www.ece.org.

Transfer Credits

Penn State allows for the approval of up to 10 transfer credits to graduate programs.

Grade-Point Average

Students must have a 3.00 grade-point average to graduate from the program.

Financial Aid

There is a limited number of scholarships and research grants available, as well as graduate assistantships. Many students work full-time and take classes part-time. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition. To find other options available to you, contact the Financial Aid Office at 717-948-6307.

Degree Requirements

The M.A. in Applied Clinical Psychology requires 48 credits of coursework. Included in the core courses are 100 hours of clinical practicum, 600 hours of supervised internship experience, and a master’s research paper.

Psychology Core Courses (23 credits) provide a foundation in professional ethics, individual differences and cultural diversity, the scientific bases of behavior, and scientific research skills. These courses are intended to facilitate the development of an awareness of the context in which clients live and in which interventions must work.

PSYCHOLOGY (PSYC)

- 500. Ethics and Professional Practice in Psychology and Counseling (3)
Clinical Core Courses (25 credits) provide a general background in clinical diagnosis, assessment, and interventions with appropriate supervised experience to allow students to develop the clinical skills appropriate for master’s level practitioners.

**PSYCHOLOGY (PSYC)**
- 510. Human Growth and Development (3)
- 517. Psychopathology (3)
- 518. Interviewing and Counseling (3)
- 519. Theories and Models of Psychotherapy (3)
- 540. Group Interventions (3)
- 571. Tests and Measurement (3)
- 595A. Clinical Practicum (1)
- 595B. Clinical Internship (6)

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Karl M. Reichard, Ph.D. (Virgina Polytech) Research Associate; Assistant Professor of Acoustics
- Michael Roan, Ph.D. (Penn State) Research Associate; Assistant Professor of Acoustics
- Victor W. Sparrow, Ph.D. (Illinois, Urbana-Champaign) Professor of Acoustics
- Richard Stern, Ph.D. (UCLA) Associate Director, ARL; Professor of Engineering Science and Mechanics
- David C. Swanson, Ph.D. (Penn State) Senior Research Associate; Associate Professor of Acoustics
- Brian T. Tittmann, Ph.D. (UCLA) Schell Professor of Bioengineering; Peking Science and Mechanics
- Martin W. Trethewey, Ph.D. (Michigan Tech) Professor of Mechanical Engineering
- Richard Tuzweller, Ph.D. (Penn State) Senior Research Associate; Associate Professor of Acoustics
- Alice M. Wiler, Ph.D. (Penn State) Senior Research Associate; Associate Professor of Acoustics

The aim of this program is to enable the student interested in acoustics to obtain an integrated program covering acoustical science and engineering applications of acoustics.

Student curricula are individually tailored and integrated through a selection of core and elective courses in areas such as basic acoustics, physical acoustics, underwater acoustics, signal processing, optics, architectural acoustics, medical ultrasonics, aeroacoustics, vibrations, wave propagation, speech, physiological acoustics, psychoacoustics, thermoacoustics, hydroacoustics, and computational acoustics. The courses are offered by the Graduate Program in Acoustics and by other participating University departments, including Aerospace Engineering, Architectural Engineering, Bioengineering, Electrical Engineering, Engineering Science and Mechanics, Mechanical Engineering, Meteorology, Geosciences, Physics, Speech Communication, and Communication Disorders.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Entering students should hold a bachelor's degree in physics, engineering, mathematics, or a closely related field that would provide substantial preparation in mathematics (a minimum of two semesters of calculus-based physics and mathematics to include complex variables and differential equations). In addition, an undergraduate knowledge of statics and dynamics, linear algebra, and electronic circuit analysis, and the ability to use mathematical analysis software is expected. Students with an average junior/senior average of 3.0 in the 4.00 scale, appropriate course backgrounds, and a B+ or better average in mathematics, physical science, and engineering courses will be considered for admission. The best-qualified applicants will be accepted up to the number of positions that are available for new students. An individual with nontechnical background may also apply, but acceptance into the program will depend significantly on the applicant's undergraduate background and motives to pursue advanced study in acoustics. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds and abilities.

Scores from the Graduate Record Examinations (GRE) are required. For applicants required by the Office of Graduate Enrollment to take the TOEFL, minimum TOEFL scores are 237 (computer-based test) or 580 (paper-based test).

Other Relevant Information

In addition to the acoustics courses listed here, the following courses and areas are available: AERSP 511, 524, 525; A E 458, 520; BIOE 506, 516; CMPE 485; E E 460, 530, 557, 560, 561, 562, 566, 570; ECE 512, 516, 521, 522, 524A, 525, 527, 528, 560, 562, 570; GEOSC 504, 507A, 551; M E 471, 554; PHYS 443, 533. This list may change as other departments continue to add new courses relevant to acoustics.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Ph.D., D.Ed., M.Ed.

The Graduate Faculty

- William Anderson, D.Ed. (Penn State) Adjunct Assistant Professor
- Eunice N. Askov, Ph.D. (Wisconsin) Distinguished Professor Emerita of Education
- Irene Baird, D.Ed. (Penn State) Affiliate Assistant Professor of Education
- Rebecca Beatty, D.Ed. (Penn State) Affiliate Assistant Professor of Education
- Thomas Beutling, D.Ed. (Penn State) Adjunct Assistant Professor
- Felicia Brown-Haywood, D.Ed. (Penn State) Affiliate Assistant Professor of Education
- Daniele Flannery, Ph.D. (Wisconsin) Associate Professor Emerita of Education
- Barbara Frey, D.Ed. (Penn State) Adjunct Assistant Professor
- Modupe (Dupe) Irele, D.Ed. (Penn State) Adjunct Assistant Professor
- Ilhan Kucukaydin, D.Ed. (Penn State) Affiliate Assistant Professor of Education
- Gary W. Kuhn, D.Ed. (Penn State) Associate Professor of Education
- Estelle S. Prins, Ph.D. (Cornell) Assistant Professor of Education
- Benjamin Allan Quigley, Ed.D. (Northern Illinois) Adjunct Assistant Professor
- Ladislaus (Lad) M. Samali, Ph.D. (California) Associate Professor of Education
- Fred M. Schied, Ed.D. (Northern Illinois) Associate Professor of Education
- Kay Shattuck, D.Ed. (Penn State) Adjunct Assistant Professor
- Helmer Stucky, D.Ed. (Penn State) Affiliate Assistant Professor of Education
- Ann Swartz, D.Ed. (Penn State) Affiliate Assistant Professor of Education
- Edward W. Taylor, Ed.D. (Georgia) Professor of Education
- Melody M. Thompson, D.Ed. (Penn State) Assistant Professor of Education
- Patricia Thompson, D.Ed. (Penn State) Affiliate Assistant Professor of Education
- Joan S. Thomson, Ph.D. (Wisconsin) Professor of Agricultural Communications; Affiliate Professor of Education
- Elizabeth J. Tisdell, Ed.D. (Georgia) Professor of Education

Adult Education extends through the life span from late adolescence to advanced age and takes place in a rich diversity of organizational as well as informal settings. The purpose of the Adult Education program is to increase the knowledge and competence of those who work with adult learners. Coursework, reading assignments, research projects, internships, informal discussions, and the dissertation all provide opportunities for in-depth and challenging learning experiences. The programs are interdisciplinary, and students are advised to seek learning in supporting fields within the University.

The Ph.D., D.Ed., and M.Ed. degrees are offered only at University Park. The M.Ed. is also offered through the World Campus. Harrisburg offers the D.Ed. degree.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from the Miller Analogies Test (MAT), are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in the program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Applicants with a total Verbal and Quantitative score above 1100 on the GRE, a junior/senior average of 3.00 (on a 4.00 scale), and a graduate average of 3.50 are usually admitted to the Ph.D. or D.Ed. program. Applicants with a junior/senior average of 2.70, a graduate average of 3.20, and a GRE total score of 1000 but with special backgrounds, abilities, and interests also may be admitted to the doctoral programs with only the baccalaureate degree, but they will earn the master's degree en route. The Miller Analogies Test may be accepted in place of the GRE for admission to the graduate program in Adult Education. A sample of student writing and a “career letter” in which applicants explain how the proposed studies in adult education relate to their careers are required for each degree. A proctored writing sample is required of doctoral students. Three letters of reference (at least two from faculty members for Ph.D. applicants) that evaluate the candidate’s aptitude for graduate study are required.

Applicants who exhibit exceptional qualities without meeting all of the stated requirements for admission may be considered for provisional admission while removing identified deficiencies. Deficiencies must be rectified within the first two semesters in the program; courses taken to remove deficiencies are considered to be prerequisites and do not earn credit toward the doctoral degree.

Master's Degree Requirements

M.Ed. students are required to write a master's paper, in lieu of a thesis, as part of the required 33 credits of course work. A minimum of 18 credits out of the 33 must be taken at the 500 level and a minimum of 18 credits must be in ADTED prefix courses.

Doctoral Degree Requirements

Ph.D. students are required to take 12 core credits in Adult Education, 12 credits in an emphasis area that is composed of Adult Education and supporting courses outside Adult Education, and 18 research credits, in addition to the residency requirement, candidacy and comprehensive examinations, and continuous registration during the dissertation research. All students are required to be computer literate as determined by their doctoral committee and will be assessed for communication skills during core adult education courses. Students with a knowledge of a second language (as demonstrated by having lived in a foreign country for at least one year, speaking a native language other than English, or having studied another language in post-secondary education for at least two years) will be given preference in admission to the Ph.D. program.

D.Ed. students who do not have previous experience in adult education are expected to acquire the equivalent of one year of experience in one or more fields of adult education practice prior to receiving their D.Ed. degree. A candidacy examination is administered after students complete 9-15 credits. During the comprehensive examination, in addition to being examined in their area of specialization, all D.Ed. students will be examined in the core adult education.
areas. A minimum of 24 credits in coursework must be taken in Adult Education. A minimum of 15 credits must be taken outside Adult Education as a minor or General Studies option. A minimum of 6 research credits is required.

Students in the Ph.D. program focus on research in Globalization and Lifelong Learning selecting one emphasis area (Distance Education, Literacy for Culturally and Linguistically Diverse Populations, Comparative Lifelong Learning, or Learning in Work and Communities). Research credits develop the background knowledge and tools to enable them to engage in original research. D.Ed. students conduct applied research with the goal of improving practice in the general adult education field.

Prerequisites for the Ph.D. Program: ADTED 460, Introduction to Adult Education, and ADTED 507, Research and Evaluation in Adult Education, or their equivalents, are prerequisites to admission to the Ph.D. program. Another prerequisite is a basic statistics course, such as EDPSY 400 or AEE 521, required as part of the Penn State master's degree program in Adult Education. As prerequisites they do not count toward the requirements of the Ph.D. program although they may be completed while taking required Ph.D. courses.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Matthew S. Kaplan, Ph.D. (CUNY) Professor of Agricultural and Extension Education
- Claudia C. Mincemoyer, Ph.D. (Penn State) Professor of Agricultural and Extension Education
- James H. Mortensen, Ph.D. (Penn State) Professor of Agricultural Education
- Daniel F. Perkins, Ph.D. (Michigan State) Professor of Agricultural and Extension Education
- Rama B. Radhakrishna, Ph.D. (Penn State) Professor of Agricultural and Extension Education
- Jan F. Scholl, Ph.D. (Iowa State) Associate Professor of Agricultural and Extension Education
- Barbara K. Wade, Ph.D. (Penn State) Affiliate Assistant Professor of Agricultural and Extension Education
- Nicole S. Webster, Ph.D. (Michigan State) Associate Professor of Agricultural and Extension Education
- Edgar P. Yoder, Ph.D. (Ohio State) Professor of Agricultural and Extension Education

Graduate programs emphasize agricultural or extension education (including preparation for employment in college or university programs), youth and family programming, state-level administration, local-level administration, private industry and international education. A minor may be taken in an area of the student’s choice or in general studies. Programs may include courses needed for certification in other fields of education.

Admission Requirements
All applicants must submit a letter of application, two or three typewritten pages in length, describing their professional experience, education, career goals, and reasons for pursuing the degree. Applicants must ensure that three departmental recommendation and evaluation forms from individuals knowledgeable about the applicant are forwarded to the department. Only the most qualified applicants will be admitted to the graduate program. The graduate program may provisionally admit selected applicants pending resolution of the requirements listed here or applicants with special skills and experiences.

Requirements listed here are in addition to the general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Master's Degrees
Prerequisite for admission to a master's program is a demonstrated professional interest in agricultural and extension education and/or applied youth and family education. Applicants whose junior-senior grade-point average (GPA) is under 3.00 on a 4.00 scale for their baccalaureate degree are required to submit Graduate Record Examinations (GRE) scores.

Master of science: This program is intended for those who are interested in defining, developing, or evaluating educational programs, both formal or nonformal, through public and private agencies and organizations serving youth, families or the agriculture community.

Master of education: Prerequisite for admission to this program is a minimum of 18 credits in professional education courses (including educational psychology and teaching and/or professional internship) or certification as a teacher of agriculture, or equivalent professional experience, including extension.

Doctoral Degree
An applicant should have a minimum average of 3.40 on a 4.00 scale on all previous graduate work or a minimum combined score of 1000 on the verbal and quantitative sections of the GRE. Two years of appropriate professional experience is required either prior to admission or before the degree is awarded. An interview with the graduate faculty is recommended of all applicants prior to admission into a doctoral program. Applicants to the doctoral program must submit evidence of ability to write a scholarly paper or thesis and demonstrate a teaching-level competence of English.

Master's Degree Requirements
A program of study agreement between adviser and student, including planned course work (approved by the student’s committee) and time frame, should be completed before beginning the second semester of study. Successful performance on a four-hour written essay exam, plus a one-hour oral exam, is required of all M.S. and M.Ed. candidates near the completion of their course work for the degree. The master's candidate is required to successfully complete an oral defense of a paper or thesis.

Doctoral Degree Requirements
Two years of appropriate professional experience is required either prior to admission or before the doctoral degree is completed.

Other Relevant Information
Selection and appointment of a thesis adviser and doctoral committee follows admission to candidacy. The candidate consults the department head or graduate officer in selecting an adviser. The candidate, in cooperation with an adviser, selects the doctoral committee. The chair of the committee is not necessarily the thesis adviser, but the thesis adviser is a member of the committee.

Student Aid
Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

The Pennsylvania State University
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

AGRICULTURAL AND EXTENSION EDUCATION (AEE) course list

Dual-Title Graduate Degree in Agricultural and Extension Education (AEE) and International Agriculture and Development (INTAD)

Graduate students with research and educational interests in international agriculture extension and education may apply to the Agricultural and Extension Education/INTAD Dual-Title Doctoral Degree Program. The goal of the dual-title degree AEE/INTAD Ph.D. program is to enable graduate students from AEE to acquire the knowledge and skills of their primary area of specialization in AEE, while at the same time gaining the perspective and methods needed to work internationally. Graduate study in this program seeks to prepare students to assume leadership roles in developing contemporary curricula and programs, conducting high quality research and development activities, and disseminating new knowledge in these areas in both national and international settings. Students are required to write research proposals and expected to write grants to support their research activities, reflecting the dual-title degree. As part of their professional development presentations, publication of research articles and active participation in professional societies is expected. Emphasis is placed upon the professional development of the student.

Admission Requirements

A student must first apply and be admitted to the AEE graduate program and the Graduate School at Penn State. For admission a student should have a strong background in agricultural and extension education, educational theory and policy, and teaching methods. Courses in research and statistics are recommended. Once accepted into the AEE program, the student can then request admission to the dual-title program by providing a statement of intent to the INTAD Academic Program Committee for the dual-title degree program. The application consists of a written personal statement indicating the career goals a student hopes to accomplish by earning a dual-title AEE/INTAD degree.

Further information about the admissions process will be posted on www.cas.psu.edu/international.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. The minimum acceptable score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a graduate degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the Agricultural and Extension Education program in which they are primarily enrolled. In addition, they must satisfy the requirements described below, determined by the student, their INTAD advisor, and their AEE program advisor.

Degree Requirements for ENT/INTAD Dual-Title M.S.

The Master's in AEE/INTAD is a dual-title degree awarded to students who are admitted to both the AEE master's program and admitted to the dual-title degree in INTAD. In addition to the requirements of the AEE degree:

Course Requirements

Complete a minimum of 12 INTAD course credits (400, 500 or 800-level) as follows:

9 credits from the core curriculum:

- Program Design and Delivery (AEE 450, 3 credits)
- Leadership Development (CEDEV/R SOC/AEE 505, 3 credits, on-line)
- International Agricultural Development Seminar (INTAD 820, 3 credits)

3 credits of internship or applied courses/independent studies with international development content

Thesis

Students pursuing a Master of Science (M.S.) must write a master's thesis on a topic that reflects both the graduate program in agricultural and extension education and the dual-title offering in INTAD. All members of the student’s committee for the dual-title master’s degree will be members of the graduate faculty. The committee must include at least one graduate faculty member from INTAD. A Degree Committee form should be filed upon selection of the committee members and should be approved by the INTAD Academic Program Committee Co-chair.

Final Examination

Candidates for the INTAD dual-title M.S. degree will also be required to pass a final oral examination covering the general field of AEE and also include elements of INTAD, with emphasis on the student’s area of specialization. The oral exam is to be administered by the student’s thesis committee. A favorable vote of a two-thirds majority is necessary for passing.

Some courses may satisfy both the graduate program primary requirements and those of the INTAD program. Final course selection is determined by the students in consultation with their INTAD advisors and their major program advisors. Students and advisors should maintain the INTAD Master's Degree Plan of Study, which must be submitted to the INTAD program office two months before the student files the "Intent to Graduate" via eLion.

Degree Requirements for ENT/INTAD Dual-Title Ph.D.

The doctoral degree in Agricultural and Extension Education and INTAD is a dual-title degree awarded only to students who are admitted to the AEE doctoral program and admitted to the dual-title degree in INTAD. The minimum course requirements for the dual-title Ph.D. degree in AEE and INTAD, in addition to the AEE Department requirements, are as follows:

Course Requirements

Students must complete a minimum of 18 INTAD graduate course credits with study in the following curriculum categories:

9 credits from core INTAD courses including

- International Agricultural Development Seminar (INTAD 820, 3 credits)
- Human Dimensions to Natural Resources (R SOC 555, 3 credits)
- Sociology of Agriculture (R SOC 508, 3 credits)

9 credits from INTAD elective curriculum/courses with international development content/internships/independent study

Graduates of the dual-title INTAD master's degree program who wish to pursue an INTAD doctoral degree must re-apply to the INTAD program for admission. INTAD master's degree credits may be carried over to the doctoral program. Six additional INTAD credits will be required. INTAD master's degree graduates who pursue an INTAD Ph.D. are required to take the INTAD 820 International Agricultural Development Seminar a second time.

The Pennsylvania State University
Candidacy

Candidacy procedures will be based on the procedures of the major department and will have an international dimension. Although not encouraged, the dual-title degree student may require an additional semester or more to fulfill requirements for the dual-title degree program. Therefore, under exceptional circumstances, the candidacy exam may be delayed at the discretion of the student advisor in consultation with the INTAD program coordinators.

Committee Composition

The doctoral committee of a Ph.D. dual-title degree student must include a minimum of four faculty members, i.e., the chair and at least three additional members, all of whom must be members of the Graduate Faculty; and the committee must include at least one representative from the INTAD Program faculty. The chair of the committee can be a member of both the Major Program and the INTAD Program faculty. If the chair is not an INTAD Program faculty member, the INTAD representative must be the co-chair of the committee. An official “outside member” also must be appointed to the committee.

Comprehensive Exam

At the end of the coursework, candidates for the dual-title doctoral degree in AEE and INTAD will be required to pass an oral comprehensive examination based on their thesis proposal and area of specialization in agricultural and extension education, while reflecting their dual-title degree curriculum. A separate comprehensive examination is not required by the INTAD program, but a section of the exam must be on international agriculture and the INTAD representative on the student’s doctoral committee must have input into the development of and participate in the evaluation of the comprehensive examination.

Dissertation and Dissertation Defense

Ph.D. students enrolled in the dual-title degree program are required to write and orally defend a dissertation on a topic that reflects their original research and education in both Agricultural and Extension Education and International Agriculture and Development. The dissertation should contribute to the body of knowledge in international agriculture. A public oral presentation of the dissertation is required.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400-499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up for deficiencies or to fill in gaps in previous education by not to meet requirements for an advanced degree.

Degrees Conferred:
Ph.D., M.S., M.Eng.

The Graduate Faculty

- Sven G. Billen, Ph.D. (Michigan) Associate Professor of Engineering Design and Electrical Engineering, and Aerospace Engineering
- Kenneth S. Brentner, Ph.D. (Cambridge) Professor of Aerospace Engineering
- Cengiz Camci, Ph.D. (Von Karman Institute) Professor of Aerospace Engineering
- Stephen C. Colton, Ph.D. (Penn State) Research Associate; Assistant Professor of Aerospace Engineering
- Farhan S. Gandhi, Ph.D. (Maryland) Professor of Aerospace Engineering
- Joseph F. Horn, Ph.D. (Georgia Tech) Associate Professor of Aerospace Engineering
- Robert F. Kunz, Ph.D. (Penn State) Senior Research Associate; Associate Professor of Aerospace Engineering
- Jack W. Langelan, Ph.D. (Stanford) Assistant Professor of Aerospace Engineering
- George A. Lesieutre, Ph.D. (California, Los Angeles) Professor of Aerospace Engineering
- Deborah A. Levin, Ph.D. (Caltech) Professor of Aerospace Engineering
- Lyle N. Long, D.Sc. (George Washington) Distinguished Professor of Aerospace Engineering and Mathematics
- Mark D. Maughmer, Ph.D. (Illinois) Professor of Aerospace Engineering
- Dennis K. McLaughlin, Ph.D. (MIT) Professor of Aerospace Engineering
- Robert G. Melton, Ph.D. (Virginia) Professor of Aerospace Engineering
- Michael M. Micci, Ph.D. (Princeton) Professor of Aerospace Engineering; Director of Graduate Studies
- Philip J. Morris, Ph.D. (Southampton Boeing/A. D. Welliver Professor of Aerospace Engineering
- Edward C. Smith, Ph.D. (Maryland) Professor of Aerospace Engineering
- David B. Spencer, Ph.D. (Colorado) Associate Professor of Aerospace Engineering

Opportunities for graduate study are available in the following areas: low-speed aerodynamics, airplane and helicopter aerodynamics; V/STOL aircraft, turbulence, astrodynamics, turbomachinery, air breathing propulsion, aeroacoustics, gas dynamics, stability and control of aerospace vehicles, aerospace structures, structural dynamics, aeroelasticity, rotorcraft engineering, computational fluid dynamics, experimental fluid dynamics, space propulsion, space vehicle dynamics, and high-performance computing.

Admission Requirements

Applicants must submit official scores from the Graduate Record Examinations (GRE) for admission to the graduate program and consideration for financial assistance. In addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin, the department poses a number of specific requirements. The entering M.Eng. or M.S. student must hold a bachelor's degree in engineering, physical science, or mathematics, and may be required to complete (without degree credit) undergraduate course work in fluid and solid mechanics and intermediate mathematical analysis, if not already completed. The department will consider students with a 3.0 junior/senior grade-point average (GPA) on a 4.0 scale; students with special backgrounds, abilities, or interests may request a waiver to this GPA requirement. The best-qualified applicants will be accepted up to the number of spaces that are available. Admission to the Ph.D. program requires satisfactory completion of a master's program in engineering, physical science, or mathematics. Admission to the Ph.D. program prior to completion of a master's degree may be considered upon the student passing the Ph.D. candidacy exam. A student must have completed at least 18 course credits beyond the baccalaureate degree in order to take the Ph.D. candidacy exam, and is not granted official status as a doctoral candidate until the master's degree is complete and the candidacy exam has been passed. Application materials are available at: www.aero.psu.edu.

M.Eng., M.S., and Ph.D. Core Requirements

1. Basic field theories. Complete two courses for 6 credits, one from a prescribed list in each of two of the following categories: fluid mechanics, solid mechanics, or system dynamics.
2. Numerical/computational methods. Complete one 3-credit course that addresses the numerical analysis of differential equations, from a prescribed list.
3. Applied mathematics. Complete one 3-credit, 500-level course from a prescribed list.
4. Teaching assistants and teaching aides who have classroom or laboratory instructional responsibilities must satisfactorily complete ENGR 588. Those with responsibilities limited to grading, holding office hours, and offering problem sessions must take ENGR 588 or a grading seminar.

Master of Engineering Degree Requirements

The M.Eng. degree is a nonthesis professional master's degree. A total of 30 credits is required, including courses in the core requirements. Twenty-one credits must be in Aerospace Engineering courses with at least 18 credits at the 500 level. A student may count a maximum of 6 credits of 400-level course work toward the degree. Each student must complete a scholarly paper (for 2 credits of AERSP 596), which includes a literature review and some additional experiment or analysis, and must complete the graduate colloquium (for 1 credit of AERSP 590).

Master of Science Degree Requirements

A total of 30 credits is required, including courses in the core requirements. Twelve credits must be in Aerospace Engineering courses with at least 6 credits at the 500 level. A student may count a maximum of 6 credits of 400-level course work toward the degree. Six credits of thesis research are also required. A completed M.S. thesis and its public presentation are required for graduation.

Doctoral Degree Requirements

There is no foreign language requirement for the Ph.D. degree; however, students must demonstrate proficiency in reading, writing, and speaking English through an examination administered by the department. This must be completed to satisfy the Graduate School's requirement before taking the comprehensive exam. The candidate's doctoral committee decides which, if any, courses are required in addition to those specified in the core requirements; this typically involves 24 course credits beyond the M.S. degree. Ph.D. candidates must also demonstrate evidence of experimental experience.

Over the course of a Ph.D. program, the department and doctoral committee administer three examinations: The candidacy examination is given as a preliminary aptitude test before the end of the second semester following admission to the program. A comprehensive examination, which covers the major and minor fields of study, is administered after the candidate has substantially completed the required course work. The final oral examination, which is related mainly to the dissertation, is given after the candidate has satisfied all other degree requirements. All Ph.D. students must maintain continuous registration until the thesis is approved. A completed Ph.D. dissertation and its public defense are required for graduation.

Student Aid

Graduate assistantships and other forms of financial aid are described in the STUDENT AID section of the Graduate Bulletin.

The Pennsylvania State University
Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

AEROSPACE ENGINEERING (AERSP) course list

Last updated by Publications: 1/14/09
Agricultural, Environmental, and Regional Economics (AEREC)

Program Home Page
ANN R. TICKAMYER, Head of the Department of Agricultural Economics and Rural Sociology
103 Armsby Building
814-865-5461

Degrees Conferred:
Ph.D., M.S.

The graduate program emphasizes economic theory and quantitative methods as applied to the food and agricultural system, natural resources and the environment, and regional economics and economic development.

Graduate Option in Watershed Stewardship

M.S. students in this program may elect the Graduate Option in Watershed Stewardship. This option provides enhanced educational opportunities for students with an interest in water resources management. The Watershed Stewardship Option attracts students from several graduate programs and educates them to facilitate team-oriented, community-based watershed management planning directed at water resource problems. The Watershed Stewardship Option is coordinated with similar options in other graduate programs through the Center for Watershed Stewardship. The Graduate Option in Watershed Stewardship requires 18 credits of graduate course work when taken with the M.S. degree in Agricultural, Environmental and Regional Economics; 6 credits of breadth courses, 3 credits of environmental economics, 1 credit of Watershed Stewardship Seminar (AEREC 591), and 8 credits of Watershed Stewardship Practicum I and II (AEREC 570 and AEREC 571). Breadth courses consist of 3 credits of graduate course work from water resources science and 3 credits from either humanities or communications/design. For M.S. students, the 3 credits in environmental economics consist of Resource and Environmental Economics I (AEREC S19). In the watershed stewardship practicum courses, students work in multidisciplinary teams with community, government and business leaders to analyze and understand natural resource problems and creatively synthesize appropriate solutions in a written watershed management plan.

Lists of acceptable water resources science, humanities, and communication/design courses are maintained by the Center for Watershed Stewardship. Students may petition the Agricultural, Environmental and Regional Economics Graduate Program Committee and the Center for Watershed Stewardship to substitute higher level or equivalent courses to suit their specific backgrounds and goals. Courses taken for the Graduate Option in Watershed Stewardship may be used to satisfy other equivalent (400- or 500-level) degree requirements in the Agricultural, Environmental and Regional Economics graduate program with the concurrence of their adviser and the Agricultural, Environmental and Regional Economics Graduate Program Committee. The graduate committee for a student enrolled in the Option in Watershed Stewardship must include a faculty representative from the Center for Watershed Stewardship.

Admission Requirements

Scores from the Graduate Record examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students entering the master’s program should have a total of 9 credits in agricultural economics and/or economics. Students entering the doctoral program should have successfully completed courses in intermediate micro- and macroeconomic theory, in differential and integral calculus and linear algebra, and in intermediate statistics. Students are permitted to enter the master’s and doctoral programs with deficiencies but must pass courses to eliminate deficiencies as soon as possible.

Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Doctoral Degree Requirements

There is no foreign language requirement for the Ph.D. degree; rather, the student must satisfactorily complete courses in economic theory and quantitative methods.

Other Relevant Information

Students in this program may elect the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees.

Students may qualify for admission to the dual-title degree program option in Demography consisting of interdisciplinary course work, with special emphasis on the economic, social, and geographic issues arising from the dynamics of population change.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

AGRICULTURAL ECONOMICS (AG EC) course list

Dual-Title Degree in Agricultural Economics (AEREC) and International Agriculture and Development (INTAD)

Graduate students with education and research interests in food and agribusiness economics, environmental and natural resource economics, and regional economic development may apply to the Agricultural, Environmental, and Regional Economics and INTAD Dual-Title Doctoral Degree Program. The goal of the program is to provide graduate students from AEREC with state-of-the-art training in economics and quantitative methods in the program areas described above, while also providing the perspective and methods needed for work in the international arena.

AEREC Admission Requirements

For admission to the dual-title doctoral degree under this program, a student must first apply and be admitted to the AEREC graduate program. Once accepted into the program, the AEREC student can then submit an application to the INTAD Academic Program Committee for the dual-title degree program. The application includes a written personal statement indicating the career goals that a student hopes to accomplish by earning a dual-title AEREC/INTAD degree. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is
The Pennsylvania State University

550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. The minimum composite score for the IELTS is 5.5. International applicants are exempt from the TOEFL requirement who have received a baccalaureate or a graduate degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Degree Requirements
To qualify for a dual-title degree, students must satisfy the requirements of the Agricultural, Environmental and Regional Economics program in which they are primarily enrolled. In addition, they must satisfy the requirements described below, determined by the student, their INTAD advisor, and their AEREC program advisor.

Degree Requirements for AEREC/INTAD Dual Title M.S.
The Master's in AEREC and INTAD is a dual-title degree awarded to students who are admitted to the AEREC master's program and admitted to the dual-title degree in INTAD. In addition to the requirements of the AEREC degree, dual-title degree students must:

Courses
Complete a minimum of 12 INTAD course credits (400, 500, or 800 level) as follows:
9 credits from the core curriculum
  • Program Design and Delivery (AEE 450, 3 credits)
  • Leadership Development (CEDEV/R SOC/AEE 505, 3 credits, on-line)
  • International Agricultural Development Seminar (INTAD 820, 3 credits)

3 credits of internship or applied courses/independent studies with international development content

Master's Thesis & Final Oral Examination
Write a master's thesis on a topic that reflects both the graduate program in agricultural, environmental and regional economics and the dual-title offering in INTAD.

The thesis committee for the dual-title master's degree will consist of two graduate faculty members from AEREC and one graduate faculty member from INTAD. All members of the student's committee for the dual-title master's degree will be members of graduate faculty. The committee must include at least one graduate faculty member from INTAD. A Degree Committee form should be filed upon selection of the committee members and should be approved by the INTAD Academic Program Committee Co-chair.

Some courses may satisfy both the graduate major program requirements and those of the INTAD program. Final course selection is determined by the students in consultation with their INTAD advisors and their major program advisors. Students and advisors should maintain the INTAD Master's Degree Plan of Study, which must be submitted to the INTAD program office two months before the student files the "Intent to Graduate" via eLion.

Degree Requirements for AEREC/INTAD Dual Title Ph.D.
The doctoral degree in AEREC and INTAD is a dual-title degree awarded only to students who are admitted to the AEREC doctoral program and admitted to the dual-title degree in INTAD. The minimum course requirements for the dual-title Ph.D. degree in AEREC and INTAD, in addition to the AEREC requirements, are as follows.

Courses
Students must complete a minimum of 18 INTAD course credits with study in the following categories:
9 credits from the core curriculum, which includes:
  • International Agricultural Development Seminar (INTAD 820, 3 credits)
  • International Rural Social Change (R SOC 517, 3 credits)
  • Human Dimensions of Natural Resources (R SOC 555, 3 credits)
  • OR
  • Sociology of Agriculture (R SOC 508, 3 credits)

9 credits from INTAD elective curriculum/courses with international development content/internships/independent study

Courses totaling a minimum of 18 credits must be taken at the 500-level or above; particular courses may satisfy both the AEREC requirements and those in the INTAD program. Final course selection is determined by the student in consultation with their INTAD advisor and their major program advisors.

Some students who already hold a master's degree from another institution may petition to have equivalent course credits accepted.

Graduates of the dual-title INTAD master's degree program who wish to pursue an INTAD doctoral degree must re-apply to the INTAD program for admission. INTAD master's degree credits may be carried over to the doctoral program. Six additional INTAD credits will be required. INTAD master's degree graduates who pursue an INTAD Ph.D. are required to take the INTAD 820 International Agricultural Development Seminar a second time.

Candidacy
Candidacy procedures will be based on the procedures of the major department and will have an international dimension. Although not encouraged, the dual-title degree student may require an additional semester or more to fulfill requirements for the dual-title degree program. Therefore, under exceptional circumstances, the candidacy exam may be delayed at the discretion of the student advisor in consultation with the INTAD program coordinators.

Committee Composition
The doctoral committee of a Ph.D. dual-title degree student must include a minimum of four faculty members, i.e., the chair and at least three additional members, all of whom must be members of the Graduate Faculty; and the committee must include at least one representative from the INTAD Program faculty. The chair of the committee can be a member of both the Major Program and the INTAD Program faculty. If the chair is not an INTAD Program faculty member, the INTAD representative must be the co-chair of the committee. An official "outside member" also must be appointed to the committee.

Comprehensive Exam
Students in the Ph.D. program are required to pass a comprehensive examination. A separate comprehensive examination is not required by the INTAD program, but international agriculture must be one of the key areas of the exam and the INTAD representative on the student's doctoral committee must have input into the development of and participate in the evaluation of the comprehensive examination.

Doctoral Thesis & Final Oral Examination
Ph.D. students enrolled in the dual-title degree program are required to write a Ph.D. dissertation on a topic that reflects their original research and

...continued
education in both AEREC and International Agriculture and Development. The dissertation should contribute to the body of knowledge in international agriculture. Upon completion of the student’s doctoral thesis, a final oral examination is scheduled.

The exam is administered by the student’s doctoral committee and focuses on the student’s thesis research. A public oral presentation of the dissertation is required.

**Courses**

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400-499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up for deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
Ph.D., M.S.

The Graduate Faculty

- Douglas D. Archibald, Ph.D. (Washington) Research Associate in Agricultural Analytical Chemistry
- Douglas B. Beegle, Ph.D. (Penn State) Distinguished Professor of Agronomy
- Surinder Chopra, Ph.D. (Vrije U of Brussels) Associate Professor of Maize Genetics
- William S. Curr, Ph.D. (Illinois) Professor of Weed Science
- Robert S. Gallagher, Ph.D. (Ohio State) Associate Professor of Cropping Systems
- Marvin H. Hall, Ph.D. (Minnesota) Professor of Forage Management
- David R. Huff, Ph.D. (California, Davis) Associate Professor of Turfgrass Breeding and Genetics
- John Kaminski, Ph.D. (Maryland) Assistant Professor of Turfgrass Management
- Heather D. Karsten, Ph.D. (Cornell) Associate Professor of Crop Production/Ecology
- Armen Kemanian, Ph.D. (Washington) Assistant Professor of Production Systems and Modeling
- Peter J. Landschoot, Ph.D. (Rhode Island) Professor of Turfgrass Science
- Dawn Luthe, Ph.D. (Iowa State) Professor of Plant Stress Biology
- Jonathan Lynch, Ph.D. (California, Davis) Professor of Plant Nutrition and Agronomy
- Andrew S. McNitt, Ph.D. (Penn State) Associate Professor of Soil Science
- David A. Mortensen, Ph.D. (North Carolina State) Professor of Weed Ecology/Biology
- Gregory W. Roth, Ph.D. (Penn State) Professor of Agronomy
- Matt A. Sanderson, Ph.D. (Iowa State) Adjunct Associate Professor of Agronomy
- Robert Howard Skinner, Ph.D. (Missouri) Adjunct Assistant Professor of Agronomy
- A. J. Turgeon, Ph.D. (Michigan State) Professor of Turfgrass Management

Agronomy graduate programs emphasize research that increases the efficiency of production of agronomic crops, improves the quality of food, feed, and fiber available for humans and animals, assists in the use and development of land resources, develops an understanding of the basic soil-plant-animal climate complex of which humans are a part, and improves the overall quality of the human environment. Within this framework, students may specialize in soil science, crop science, or soil and crop management, including turfgrass management. Areas of specialization in soil science include chemistry, fertility, genesis and morphology, microbiology, mineralogy, and physics. Crop science specialties include breeding and genetics, ecology and management, physiology, and weed science.

Research facilities include a 340-acre experimental farm with irrigation facilities, a 22-acre turfgrass research center, and 18-acre landscape management research center, greenhouses, service areas, and a number of well-equipped experimental laboratories. The department enjoys close collaboration with the USDA Pasture Systems and Watershed Management Research Laboratory, which adds substantial strength to the research and graduate education capabilities of the department.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination, are required for admission. At the discretion of the graduate standards committee, a student may be admitted provisionally for graduate study in the program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Prerequisites for major work in agronomy vary with the area of specialization and the degree sought, but courses in chemistry, mathematics, physics, geology, basic and applied biological sciences, and English communication skills are required. A baccalaureate degree in basic or applied natural sciences is preferred for M.S. degree applicants.

A minimum junior/senior grade-point average 3.00 (on a 4.00 scale) is required in all courses in the biological and physical sciences regardless of when taken. Exceptions to these requirements may be made for students with special backgrounds, abilities, and interests.

For admission to the Ph.D. program, an M.S. or equivalent degree with an emphasis on basic and applied natural sciences is preferred. Applicants for the Ph.D. program will be evaluated on the quality of work completed in all previous degree programs.

Students who lack some of the prerequisite courses may be admitted but are required to take these courses without degree credit. The best-qualified applicants will be accepted up to the number of spaces available for new students.

Master's Degree Requirements

In addition to the general requirements for the M.S. degree as defined by the Graduate School, the department requires 6 credits of 400- or 500-level formal courses in a minor or general studies area. Participation in at least one Agronomy seminar course each semester is required, and students must register for at least 1 credit of AGRO 602 Teaching Experience. An advisory committee will be appointed for each student, and additional courses and requirements may be determined by this advisory committee.

A thesis based on field and/or laboratory research is required for the M.S. degree.

Both M.S. and M.Agr. candidates must pass a final examination.

Doctoral Degree Requirements

Beyond the general requirements for the Ph.D. defined by the Graduate School, the department has a number of specific requirements regarding course level and distribution that are defined in the departmental publication "Graduate Degrees in Agronomy." While a minimum number of courses for the degree is not specified, the doctoral advisory committee has the responsibility of specifying courses and credits essential for the education and development of the candidate. Students are expected to be educated in depth in a specific subfield of agronomy and to have a perspective of the general field. Normally, 55 to 60 credits in formal course work beyond the B.S. degree are required. Doctoral candidates are required to participate regularly in a departmental seminar and to register for at least 2 credits of the seminar during the Ph.D. program. A teaching experience, consisting of two separate semesters, is also required of all Ph.D. students.

The communication and foreign language requirement for the Ph.D. degree may be met either by demonstrating a knowledge of at least one foreign language or by completing at least 6 credits of course work in an area of English communications approved by the student’s advisory committee.

Other Relevant Information

Every student has a close professional relationship with his or her faculty adviser. While research that is done for the thesis will be on subjects that fall within

The Pennsylvania State University
the ongoing research program of the adviser, students are encouraged to propose research projects that are of interest to them. For the most part, all costs relative to the research program will be covered by the department. The department encourages professional development of students through participation in meetings of relevant professional societies and organizations.

Student Aid
Graduate assistantships and other forms of student aid are described in the Student Aid section of the Graduate Bulletin.

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
M.A., Ph.D.

The Graduate Faculty
- Michael L. Barton, Ph.D. (Pennsylvania) Professor of American Studies and Social Science
- Simon J. Bronner, Ph.D. (Indiana) Distinguished Professor of American Studies and Folklore
- John R. Haddad, Ph.D. (Texas) Associate Professor of American Studies and Literature
- Charles Kupfer, Ph.D. (Texas) Associate Professor of American Studies and History
- Anne A. Verplanck, Ph.D. (William and Mary) Associate Professor of American Studies and Heritage Studies
- David Witwer, Ph.D. (Brown) Associate Professor of American Studies and History

The M.A. Degree Program

The M.A. degree program, offered at Penn State Harrisburg, emphasizes the interdisciplinary study of American society and culture. It serves students who want to investigate the American experience and apply their studies in a variety of professions, including education, government, communications, and museums. It is the distinguishing characteristic of the program that the large majority of its course offerings are taught by faculty trained in the discipline of American Studies and bearing the “American Studies” title. The program offers a number of concentrations including folklore, cultural history (public, popular culture, media studies), international American Studies, material and visual culture (art, architecture, craft, landscape, food, clothing, medicine), public heritage (museums, historic preservation, archiving, cultural resource management), race and ethnicity, and regional studies.

The campus is located in a rich cultural region, surrounded by Amish Farmlands, Gettysburg, Hershey, Steelton, Ephrata, Carlisle, York, and Harrisburg. Additionally, proximity to the major cities of Philadelphia, Pittsburgh, Baltimore, Washington, D.C., and New York offer a host of research options for students. Strong ties with local educational and cultural institutions, including the Pennsylvania Historical and Museum Commission, State Museum of Pennsylvania, Pennsylvania Farm Museum of Lands Valley, Hershey Museum, National Civil War Museum, and the Dauphin County Historical Society, Cumberland County Historical Society, and other Public Heritage resources provide excellent learning opportunities for students.

The M.A. degree can be earned by full- or part-time study. Most 500-level courses are offered in the evening as the program strives to meet students' needs.

Admission Requirements

The M.A. degree program in American Studies accepts students from a wide array of disciplines--particularly art, history, English, sociology, and anthropology--but recommends educational preparation related to the interdisciplinary study of American culture. This program accepts baccalaureate degrees earned from accredited institutions. Conditions of the degree must be equivalent to the conditions required for a degree from Penn State. All applicants must submit: a completed application form with the application fee; two official transcripts of all colleges and universities attended (minimum of 2.75 junior/senior grade-point average on a 4.00 scale); two letters of recommendation from individuals who can attest to the student's ability to handle graduate study; a statement of intent (approximately 500 to 1,000 words outlining their preparation for study, proposed fields of study, and career goals; and a sample of written work (seminar paper or equivalent research paper) as evidence of their American research and writing skills.

An application is available on the Web at www.hbg.psu.edu or by calling 717-948-6250. Submit materials for fall admission before February 15 and for spring admission before October 15. Students applying for scholarships and assistantships are requested to submit general examination scores of the Graduate Record Examination (GRE) taken within five years previous to the date of application. The GRE is recommended, but not required, for admission.

All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language: www.toefl.org) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the new speaking portion is required for admission; or an International English Language Testing System (IELTS) minimum composite score of 6.5. The IELTS exam tests four mandatory skill areas: listening, reading, writing, and speaking.

Completed international application material must be submitted by the following deadlines. Applications received after the deadlines will be processed for the following semester: fall semester, February 15; spring semester, October 15. Applications received after these deadlines will be processed for the following semester.

Degree Requirements

The student is required to take a minimum of 30 credits in American Studies, including at least 18 credits in the 500 series; AM ST 500, 591, and AM ST 580 are required. AM ST 500 should be taken in the last two semesters of study. Usually in the last semester of study, students are required to complete their program with a major paper by taking AM ST 580 or thesis, in which case AM ST 600 is taken. The choice of AM ST 580 to fulfill graduation requirements is for an original scholarly master's paper or project. One to 6 credits in AM ST 580 can be earned; the typical number of credits for the culminating project is 3. The choice of AM ST 600 is for a thesis and is taken for 6 credits. The thesis must follow the guidelines established by the Thesis Office of the Graduate School (see http://www.gradsch.psu.edu/current/thesis.html).

Advanced undergraduate courses (400-level) that have not counted toward a student's undergraduate degree may be considered for transfer into the graduate student's requirement of 30 credits of American Studies with permission of the program and approval of the Graduate School. At least 20 of the 30 credits must be earned at the Harrisburg location where the program is offered. Courses not having an American Studies designation but which are relevant to American Studies may be considered for inclusion in the student's requirement of 30 credits of American Studies with permission of the program.

The Ph.D. Program

The Doctor of Philosophy Program in American Studies represents the study of the United States as an academic field with its own developed theories, methods, and applications. Taking advantage of its location in a capital region with internationally known heritage sites and American Studies resources such as the Gettysburg Battlefield, Three-Mile Island, Hershey, Steelton, Anthracite Coal Region, and Amish Country, it emphasizes critical cultural inquiry and the application of American Studies to public heritage, public policy, and cultural resource management—including governmental work, museums, cultural agencies, educational opportunities, and records management, public policy, and communications. A foundation for this application is an understanding of the American experience developed within the intellectual legacy of American Studies.

Graduates of the program are typically oriented toward public practice as well as scholarship in American Studies—integrating perspectives on United States history, culture, and society. Students have opportunities for internships and field experiences outside the classroom. In addition to preparation for academic teaching and writing, the program is distinctively concerned among other doctoral departments of American Studies with the production of public scholars.
and leadership careers outside of academe. The program strives to cover America broadly in its national and international contexts, work with local resources and institutions, and to develop a focus on cultural expression and identity, including areas of material and visual culture; folk and popular culture; race, ethnicity, and gender; and literature, performance, and media.

The program requires enrollment as a full-time student for at least two consecutive semesters--9 credits per semester (summer sessions not included). A doctoral student is required to complete the program, including defense and acceptance of the doctoral thesis, within eight years after admission to candidacy.

Admission Requirements

Students may apply for admission only in the fall semester. All materials should be submitted before January 15.

Applicants for the Doctor of Philosophy in American Studies must hold a master's degree in American Studies, or a related field emphasizing American cultural scholarship and public heritage work such as history, English, sociology, political science, folklore, cultural studies, performance studies, ethnic studies, gender studies, communications, art history, museum and library studies, education, and cultural resource management.

Students are required to submit the following:

- a completed online application with the application fee;
- two transcripts of all undergraduate and graduate course work;
- scores from the Graduate Record Examination (GRE);
- a letter of reference attesting to both academic and professional capabilities. (At least two of these letters should be from academic sources, such as professors or academic advisers);
- a recent personal vita;
- a paper from a graduate course taken previously or publication demonstrating research and compositional skills.

Admission is highly competitive and the best-qualified students will be admitted subject to space availability and compatibility of the student with the program's research mission. Successful applicants with an M.A. typically have a GPA of 3.5 or above (or a 4.0 scale) in their graduate work.

International Students

International applicants must hold the equivalent of an American master's degree. They must submit official or attested university records, with certified translations if the records are not in English. Notarized copies are not sufficient. The language of instruction at Penn State is English. International applicants must take the TOEFL or the IELTS. International applicants must submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a minimum of 17 on the writing section for the Internet-based test. Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec ), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States and Wales.

Information about the TOEFL can be obtained by writing to the Educational Testing Service, Box 6155 , Princeton , NJ 08541-6155 or visiting their Web site at www.toefl.org.

Local administration at University Park campus of the TOEFL is handled by the IECP. Information about the IELTS can be obtained by contacting IELTS International, 11, 100 East Corson Street, Suite 200 , Pasadena , CA 91103 or visiting its Web site at www.ielts.org.

Residency

Over some twelve-month period during the interval between admission to the Ph.D. program and completion of the Ph.D. program, the candidate must spend at least two semesters (summer sessions are not included) as a registered full-time student (9 credits per semester) engaged in academic work at Penn State Harrisburg.

The Curriculum

Students progress through the following phases and take courses designated by their doctoral committee as part of their study for the Ph.D.

Candidacy

In this initial phase, the student must (1) make up any deficiencies in graduate courses in American Studies noted in the letter of acceptance, and (2) complete with a grade of B or better the following courses: AM ST 500 (Theory and Method), AM ST 502 (Problems in American Studies), AM ST 591 (Seminar), and at least one course from the subfield seminars (AM ST 510 to 570)--and (3) pass a candidacy examination. Admitted students who have met all course prerequisites begin the core courses with AM ST 500 (Theory and Method). Students who have already taken AM ST 500 within three years of admission may begin their program of study with the AM ST 502 (Problems in American Studies).

The candidacy examination is administered by a special committee appointed by the director of the doctoral program. After the exam is passed, a student is advanced to doctoral candidacy. General guidance of a doctoral candidate is the responsibility of a doctoral committee consisting of four or more active members of the Graduate Faculty, which includes at least two faculty members in the major field, and one outside member. The primary responsibilities of the outside member are (1) to maintain the academic standards of the Graduate School and (2) to assure that all procedures are carried out fairly. The outside member represents the Graduate School; and, as such, the outside member shall be a member of the Graduate Faculty but need not have direct expertise in the research area of the candidate. The outside member may contribute technical expertise, but this role is subordinate to the aforementioned primary responsibilities. The dissertation advisor must be a member of the doctoral committee and usually (but is not required to) serves as chair. If the candidate has a minor, that field must be represented on the committee. This committee is appointed by the graduate dean through the Office of Graduate Enrollment Services, upon recommendation of the head of the major program, soon after the student is admitted to candidacy. A person not affiliated with Penn State who has particular expertise in the candidate's research area may be added as a special member, upon recommendation by the head of the program and approval of the graduate dean (via the Office of Graduate Enrollment Services). A special member is expected to participate fully in the functions of the doctoral committee. If the special member is asked only to read and approve the doctoral dissertation, that person is designated a special signatory of the thesis. Occasionally, special signatories may be drawn from within the Penn State faculty in particular situations.

The Comprehensive Examination

Students must be registered as a full-time or part-time degree student for the semester (excluding summer session) in which the comprehensive examination is taken. The examination consists of three parts and is administered by the student's doctoral committee. One is in the area of Theory and Method and an additional two subfields of study from a list of five areas covered in the program. The five subfields of specialization are:

2. Folk and Popular Culture (material and visual culture, literature and media, language, performance, media, and music);
3. Interdisciplinary History and Politics (history of ideas, philosophy, and politics; biography and oral history; everyday life and socioeconomic studies; government, public policy, and diplomacy);
4. Society and Ethnography (race, ethnicity, class, gender, age; religion and belief; comparative culture and transnationalism);
5. Regional, Environmental, Urban, and Local Studies.

Additional subfields of study within American Studies may be selected with the approval of the student's doctoral committee.

The Pennsylvania State University
Although the exact number of courses required in each subfield may vary among students, typically four per subfield are required. Doctoral committees meet with students at least once each academic year. Written and oral comprehensive examinations in the three areas are given at the end of the study period.

The Dissertation

Under guidance from the doctoral committee, the candidate prepares a detailed research proposal that serves as the basis for the written dissertation covering an aspect of American Studies. The dissertation should represent a significant contribution to knowledge, show familiarity with the intellectual heritage of American Studies, be presented in a scholarly manner, reveal an ability on the part of the candidate to do independent research of high quality, and indicate considerable experience in using a variety of research techniques and forms of primary evidence. The contents and conclusions of the dissertation must be defended at the time of the final oral examination. Once approved, the student can enroll in AM ST 600 Thesis for on-campus work or AM ST 610 Ph.D. Dissertation Research Off-Campus. The writing and defense of this original contribution to the theory and practice of American Studies is the capstone to the Ph.D. program. A student must be registered continuously for each Fall and Spring semester, beginning with the first semester after the comprehensive examination requirement and residency requirement have been met, until the dissertation is accepted and approved by the dissertation committee. To maintain continuous registration, candidates may register for noncredit AM ST 601 or 611, with payment of the special thesis preparation fee; students who want to combine course work with thesis preparation must register for AM ST 600 or 611 (not 601 which is full-time thesis preparation) plus course registration at the regular per-credit fee. For more information on academic procedures, see http://bulletins.psu.edu/bulletins/whitebook/academic_procedures.cfm.

The final examination of the doctoral candidate is an oral examination (defense) administered and evaluated by the entire doctoral committee. This oral defense is open to the public and related in large part to the dissertation, but it may cover the candidate’s whole program of study. The Committee may restrict part of the defense to its members and the candidate. The candidate must be registered as a full-time or part-time degree student for the semester in which the oral defense is held.

Grade-Point Average and Time Limit

A minimum grade-point average of 3.0 (on a 4.0 scale) for work done in the American Studies doctoral program at the University is required for doctoral candidacy, for admission to the comprehensive examination, the final oral examination, and for graduation.

A doctoral student is required to complete the program, including acceptance of the doctoral thesis, within eight years from the date of successful completion of the candidacy examination. Extensions may be granted by the Director of Graduate Enrollment Services in appropriate circumstances.

Financial Aid

A limited number of scholarships, loans, and grants are available from the University. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition. To find available options from the University, contact the Financial Aid Office at 717-948-6307. For more information, see php.scripts.psu.edu/dept/iit/hbg/academics/gradaid.php.

Graduate School Funding Programs

Full-time incoming doctoral students starting in the fall semester with a record of scholarly excellence may qualify for a University Graduate Fellowship, Bunton-Waller Graduate Scholar Awards, and other programs. Interested students should contact the program director, who is responsible for nominating students. For more information, see www.gradsch.psu.edu/prospective/funding/programs.html.

Capital College Funding Programs

Full-time incoming graduate students may qualify for a Capital College Assistantship and other programs. Students must be nominated for an assistantship by the program director. For more information, see php.scripts.psu.edu/dept/iit/hbg/academics/gradaid.php.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Terry D. Etherton, Head of the Department of Dairy and Animal Science
tetherton@psu.edu
Daniel R. Hagen, Graduate Officer
drhh@psu.edu
324 Henning Building
814-863-3665

Degrees Conferred:
Ph.D., M.S., M.P.S.

The Graduate Faculty

- Paul A. Bartell, Ph.D. (Virginia) Assistant Professor of Avian Biology
- Craig R. Baumrucker, Ph.D. (Purdue) Professor of Animal Nutrition/Physiology
- John W. Comerford, Ph.D. (Georgia) Associate Professor of Dairy and Animal Science
- Chad Dechow, Ph.D. (Tennessee) Associate Professor of Dairy Genetics
- Francisco J. Díaz, Ph.D. (Wisconsin-Madison) Assistant Professor of Reproductive Biology
- Robert G. Etkin, Ph.D. (Purdue) Professor of Poultry Nutritional Biochemistry
- Terry D. Etherton, Ph.D. (Minnesota) Distinguished Professor of Animal Nutrition
- Daniel R. Hagen, Ph.D. (Illinois) Professor of Animal Science
- Harold W. Harpster, Ph.D. (Michigan State) Professor of Animal Nutrition
- Kevin J. Harvanke, Ph.D. (Cornell) Assistant Professor of Nutritional Physiology
- Ailyn J. Heinrichs, Ph.D. (Ohio State) Professor of Dairy and Animal Science
- Lisa A. Holden, Ph.D. (Penn State) Associate Professor of Dairy and Animal Science
- R. Michael Hulet, Ph.D. (Texas A&M) Associate Professor of Poultry Science
- Kenneth B. Kephart, Ph.D. (Penn State) Professor of Animal Science
- Daniel M. Kniffen, Ph.D. (West Virginia) Assistant Professor of Dairy and Animal Science
- Wansheng Liu, Ph.D. (Northwestern A&F) Associate Professor of Genomics
- Edward W. Mills, Ph.D. (Purdue) Associate Professor of Dairy and Animal Science
- Jon M. Oatley, Ph.D. (Washington State) Assistant Professor of Reproductive Physiology
- Troy Ott, Ph.D., PAS (Florida) Associate Professor of Reproductive Physiology
- Joy L. Pate, Ph.D. (New Hampshire) Professor of Reproductive Physiology; C. Lee Rumberger and Family Chair in Agricultural Sciences
- Paul H. Patterson, Ph.D. (Wisconsin) Associate Professor of Poultry Science
- Ramesh Ramachandran, Ph.D. (Maryland) Assistant Professor of Avian Biology
- Cooduvalli S. Shashikant, Ph.D. (Osmania) Associate Professor of Molecular and Developmental Biology
- W. Burton Stanier, Ph.D. (Virginia Tech) Assistant Professor of Equine Science
- Ann W. Swinker, Ph.D. (West Virginia) Associate Professor of Equine Science
- Gabriella A. Varga, Ph.D. (Maryland) University Distinguished Professor of Animal Science
- Regina Vasilatos-Younken, Ph.D. (Penn State) Professor of Poultry Science

Students may specialize in animal care and management, breeding and genetics, growth and development, lactational biology, nutrition, or reproductive biology. Well-equipped research laboratories and various agricultural animals, as well as small-animal models and wildlife species, are available.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin. Prerequisite to graduate work is the completion of an undergraduate major in animal science, dairy science, poultry science, or a related biological science. Scores from the Graduate Record Examinations (GRE) are required for admission (average percentile at least 50 percent in verbal, quantitative, and analytical components). The quantitative reasoning component is recommended, but the program will accept scores from the mathematical reasoning component. Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission on a competitive basis.

Exceptions to admission requirements may be made for students with special backgrounds, abilities, and interests.

Degree Requirements

The M.P.S. is a professional program designed to prepare individuals for specialist and management positions in county agricultural extension, government, or industry and does not require a thesis. The academic M.S. and Ph.D. programs require a thesis and are designed for those primarily interested in education and research. The requirements of these programs are detailed in the departmental publication “Graduate Student Handbook in Animal Science.” The communication or foreign language requirement for the Ph.D. degree may be satisfied by competence in either one foreign language or communication skills.

Student Aid

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Loren A. Evey, Ph.D. Assistant Professor of Neural and Behavioral Sciences
- Ronald R. Gomes Jr., Ph.D., Assistant Professor of Orthopaedics and Rehabilitation
- Charles H. Lang, Ph.D., (Hahneman) Professor and Vice Chair of Cell and Molecular Physiology
- Alphonse E. Leure-du-Pree, Ph.D. (London) Professor of Neural and Behavioral Sciences
- Patricia McLaughlin, D.Ed. (Penn State) Professor of Neural and Behavioral Sciences
- Christopher Nyilbizi, Ph.D. (McGill, Montreal) Associate Professor of Orthopaedics and Rehabilitation
- David S. Phelps, Ph.D. (Temple) Professor of Pediatrics
- Joseph W. Sassani, M.D. (Thomas Jefferson) Professor of Ophthalmology
- Joyce Tombran-Tink, Ph.D., Professor of Neual and Behavioral Sciences
- Shaomin Zhang, M.D., Ph.D. (Tokyo) Assistant Professor of Neural and Behavioral Sciences

The graduate program emphasizes the general areas of gross anatomy, history, histology/cytology, neuroanatomy/neurophysiology, or appropriate combinations of these areas. Approaches offered include morphological (descriptive, comparative, developmental), functional (physiological, chemical), and experimental.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the Graduate Bulletin section of the Graduate Bulletin.

A bachelor's degree reflecting a reasonable background in zoology, biology, mathematics, or chemistry is required. Students with a 3.00 junior/senior average and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Applicants must provide complete transcripts and three letters of recommendation. A personal interview is desirable.

Doctoral Degree Requirements

Students must earn a total of at least 35 didactic credits; there are ten required courses, including ANAT 503, ANAT 505, ANAT 506, ANAT 512, ANAT 590, ANAT 802, BMS 501, BMS 502, HES 515 (or equivalent course), IBIOS 591, NEURO 511, and NEURO 530 plus an additional 6 credits in elective courses. Course work must be completed with an overall grade-point average of 3.0 or better. A grade of B- or better is required in ANAT 503, ANAT 505, ANAT 506, ANAT 512, and NEURO 511. Each student also must serve as a teaching assistant in SBMP 715 for one semester. In addition, a student must satisfactorily complete the following: (a) candidacy examination, (b) comprehensive examination, and (c) written and oral defense of thesis. Students must demonstrate competency in the English language. Attendance and participation in college-wide seminars, colloquium, and/or journal clubs is highly recommended.

Other Relevant Information

This program is offered only through the College of Medicine at the Penn State Milton S. Hershey Medical Center.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Pat Shipman, Ph.D. (NYU) Adjunct Professor of Anthropology
- Mark D. Shriver, Ph.D. (Texas) Associate Professor of Anthropology
- Dean R. Snow, Ph.D. (Oregon) Professor of Anthropology
- Alan Walker, Ph.D. (U London) Evan Pugh Professor of Anthropology and Biology
- David L. Webster, Ph.D. (Minnesota) Professor of Anthropology
- Kenneth M. Weiss, Ph.D. (Michigan) Evan Pugh Professor of Anthropology
- James W. Wood, Ph.D. (Michigan) Professor of Anthropology and Demography

The master's program is designed to train students in general anthropology. The doctoral program is structured to train students in the following areas of specialization: ethnology (with subspecialization in social anthropology, demographic anthropology, cultural evolution, and ecology); archaeology (with subspecialization in cultural ecology, analytical approaches, technological methods, and culture areas); biological anthropology (with subspecialization in human adaptability, genetics, biological demography, human evolution, and the behavioral biology of human and non-human primates).

Admission Requirements
Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Undergraduate preparation must include 12 credits in anthropology and archaeology or their equivalent. A student with an excellent record but who does not meet these requirements may be admitted provided course deficiencies are made up without graduate credit. Students with a 3.00 or higher junior/senior average (on a 4.00 scale) and with appropriate course backgrounds who have research interests directly related to the special anthropological competencies within the department will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Master's Degree Requirements
M.A. candidates may submit either a thesis or a term paper. If the latter is chosen, 6 credits in 500-level courses in the major field must be scheduled in lieu of thesis credits. The M.A. degree may be bypassed by exceptional candidates for the Ph.D. degree.

Doctoral Degree Requirements
The communication and foreign language requirement for the Ph.D. degree includes a reading knowledge of a foreign language plus an option from among additional foreign languages, field languages, linguistics, or statistics.

Dual-Title Ph.D. in Anthropology and Bioethics

Degree Requirements
Anthropology Ph.D. students may pursue additional training in bioethics through the dual-title Ph.D. program in Bioethics. To qualify for the dual-title degree, students must satisfy the requirements of the Anthropology Ph.D. program. In addition, they must satisfy the requirements described below, as established by the Bioethics program committee. Within this framework, final course selection is determined by the student, their Anthropology advisor and their Bioethics program advisor.

Additional Course Work
The dual-title Ph.D. in Anthropology and Bioethics requires eighteen credits of course work, as follows:
- Seven required credits (BIOET 501, BIOET 502, and BIOET 590), plus at least three additional BIOET credits at the 500 level.
- Eight additional credits from a list of approved electives at the 400 and 500 level, with at least two credits at the 500 level. The list of elective courses will be maintained by the Director of the Bioethics Graduate Program in consultation with the Bioethics Program Committee.

Candidacy
In order to be admitted to doctoral candidacy in the dual-title degree program, students must meet the Ph.D. candidacy requirements specified by Anthropology. During the candidacy process, the student will also be assessed for candidacy to the Bioethics program, and at least one member of the candidacy committee must come from the Bioethics program.

Comprehensive Exam

The Pennsylvania State University
At least one member of the doctoral committee will be a faculty member affiliated with the Bioethics Program. The faculty member (or members) affiliated with the Bioethics Program will be responsible for administering a portion of the comprehensive exam that will require the student to demonstrate an understanding of various theoretical and methodological approaches to bioethics, and an ability to apply them to issues and problems (including, where appropriate, practical problems) in their primary field.

**Dissertation and dissertation defense**

A dissertation on a bioethics-related topic or with a substantial bioethics component is required of students in the dual-title Ph.D. program. The bioethics-related topic of the dissertation or the bioethics component will be approved by the student’s committee.

**Student Aid**

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the [STUDENT AID](#) section of the *Graduate Bulletin*, the following award typically has been available to post-comprehensive graduate students in this program:

**HILL FELLOWSHIPS FOR STUDY IN ANTHROPOLOGY**

Details available from Professor Nina G. Jablonski, Department of Anthropology, 409 Carpenter Building, University Park campus.

**Courses**

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Applied Linguistics (APLNG)

Program Home Page

The Graduate Faculty

- Gabriela Appel-Lantolf, Ph.D. (Delaware) Senior Lecturer in German and Applied Linguistics
- Suresh Canagarajah, Ph.D. (Texas, Austin) Edwin Erle Sparks Professor of Applied Linguistics, English, and Asian Studies
- Joan Kelly Hall, Ph.D. (SUNY Albany) Professor of Applied Linguistics
- Karen E. Johnson, Ph.D. (Syracuse) Kirby Professor in Language Learning and Applied Linguistics
- Professor of Applied Linguistics
- Chin-Keong Chong, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of Applied Linguistics
- James Lantolf, Ph.D. (Penn State) Greer Professor of Language Acquisition and Applied Linguistics
- Xiaofei Lu, Ph.D. (Ohio State) Assistant Professor of Applied Linguistics
- Sinfree Makoni, Ph.D. (Edinburgh, Scotland) Associate Professor of Applied Linguistics and African Studies
- Mark A. Ouellette, Ph.D. (Pennsylvania) Senior Lecturer in Applied Linguistics
- Sandra J. Savigon, Ph.D. (Illinois, Urbana-Champaign) Professor of Applied Linguistics
- Robert Schrauf, Ph.D. (Case Western) Associate Professor of Applied Linguistics
- Susan Strauss, Ph.D. (California, Los Angeles) Associate Professor of Applied Linguistics
- Steve Thorne, Ph.D. (California, Berkeley) Assistant Professor of Applied Linguistics

The Ph.D. in Applied Linguistics helps prepare scholars who will conduct systematic examinations of individual and societal multilingualism in order to build and test theories of how linguistic systems develop, are acquired, used, and taught in global contexts. The Ph.D. degree program includes the foundational theory and research of linguistics, applied linguistics, second language acquisition, psycholinguistics, and sociolinguistics. It will prepare doctoral candidates to utilize a range of research perspectives, both qualitative and quantitative, e.g., sociocultural, historical, linguistic, stylistic, discourse analytical. Overall, the purpose of the research undertaken in graduate study in Applied Linguistics will be to illuminate, in all its complexity, the multiple dimensions of the study of language as a mode of social existence, communication, and cognition.

Admission Requirements

Applicants are required to submit transcripts of all previous course work from institutions of higher learning. In addition, scores from the Graduate Record Examinations (GRE) are required for applicants who have received a degree from an institution of higher education in the United States or abroad in which the medium of instruction is English. GRE scores are optional for applicants who have received a degree from an institution of higher education in which the medium of instruction is a language other than English. All applicants are required to submit three letters of reference (at least two from faculty with whom the applicant has studied) evaluating aptitude for doctoral study. Applicants must submit at least one sample of scholarly writing (published or unpublished research paper, thesis, etc.) and an academic statement describing their teaching and research experience and their specific professional goals and interests.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 600 for the paper-based test, 250 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. Applicants with a speaking score of 15 or 16 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5. In addition, international applicants are encouraged to submit a cassette tape recording on which they describe their career goals and reasons for wanting to pursue doctoral studies at Penn State.

Candidacy Evaluation

In the third semester (a minimum of 18 credits) of graduate study, all candidates must satisfactorily complete a candidacy evaluation in which they are required to present a portfolio of work completed in their program of study. The portfolio will include a transcript of the candidate’s academic record, a statement of applications of scholarly work in Applied Linguistics and related areas, and a brief description of the proposed dissertation research, showing relevant course work completed and projected. Following submission of this portfolio, the candidate will meet with the members of his/her doctoral committee for an oral candidacy evaluation. The purpose of this evaluation is threefold: (a) to determine whether the candidate has achieved a level of learning and understanding sufficient to justify acceptance as a doctoral candidate, (b) to discover what further study is required to bring the candidate to the competence required for the research being proposed, and (c) to secure approval of a program of course work and independent study to achieve the requisite competence. The particulars of each candidate’s program of study and research are defined on the basis of the candidacy evaluation.

English Language Competence

During course work prior to the candidacy examination, candidates will be assessed for communicative competence in reading, writing, and speaking English. Should a higher level of competence be required, the candidate will be directed to the appropriate resources. International candidates will be advised that the passage of the minimal TOEFL requirement does not demonstrate the level of competence required for completion of the Ph.D. program.

Additional Language Competence

All candidates must demonstrate competence in reading relevant research literature in one language other than English and intermediate speaking competence in an additional language. The additional language competence requirements may be demonstrated in a variety of ways.

Committee Composition

The doctoral committee will consist of four or more active members of the Graduate Faculty and must include at least two faculty in the major field. One member of the doctoral committee must be from outside of the candidate’s field of study. Members of the Graduate Faculty with courtesy appointments in LALS who are members of the Applied Linguistics Graduate Faculty may serve as the chair of the doctoral committee with approval of the Director of LALS.

Comprehensive Examination

The Pennsylvania State University
Dissertation

Each doctoral candidate is required to conduct an original and independent research project representing a significant contribution to knowledge in the field of study. The project should be presented in a scholarly manner, show an ability on the part of the candidate to do independent research of high quality, and demonstrate competence in the use of appropriate research techniques. The content and conclusions of the dissertation will be defended at the time of the final oral examination. A written dissertation proposal is required and must be approved at a proposal hearing by a majority vote of the candidate’s dissertation committee. A majority vote is also required for approval of the completed written dissertation at the final oral defense.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Dual-Title Graduate Degree in Applied Linguistics and Asian Studies

Graduate students with research and educational interests in international education may apply to the Applied Linguistics/Asian Studies Ph.D. program. The goal of the dual-title degree in Applied Linguistics and Asian Studies is to enable graduate students from Applied Linguistics to acquire the knowledge and skills of their major area of specialization in Applied Linguistics while at the same time gaining the perspective of Asian Studies.

In order to prepare graduate students for the competitive job market, this program provides them with a solid disciplinary foundation that will allow them to compete for the best jobs in their field. For such students the dual-title Ph.D. in Asian Studies will add value to their degree and their status as candidates. It will produce excellent linguists who are experts in Asian Studies as well. The dual-title degree in Applied Linguistics and Asian Studies will build curricular bridges between the student’s major field so as to provide a unique training regime for the global scholar.

Additional details of the dual degree program are available in separate documentation and from the Asian Studies Program (see http://asian.la.psu.edu/graduate.shtml).

Admission Requirements

For admission to the dual-title Ph.D. degree under this program, a student must first apply and be admitted to the Applied Linguistics graduate program. Once accepted into the Applied Linguistics program, the student can apply to the Admissions Committee of the Asian Studies. The Asian Studies Admissions Committee reviews applications and recommends students for admission to the Graduate School. Students already in their first and second years of the Applied Linguistics graduate program may also apply to the dual-title program.

Applicants are required to submit transcripts of all previous coursework from institutions of higher learning. In addition, scores from the Graduate Record Examinations (GRE) are required for applicants who have received a degree from an institution of higher education in the United States or abroad in which the medium of instruction is English. GRE scores are optional for applicants who have received a degree from an institution of higher education in which the medium of instruction is a language other than English.

There are no specific requirements for admissions into the dual-title program beyond the requirements of the Graduate School and Applied Linguistics, though applicants interested in the program should also make their interest in the dual-degree program known clearly on their applications and include remarks in their essays that explain their training, interests, and career goals in an area of Asian Studies.

General Graduate School requirements are stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Degree Requirements

To qualify for an Asian Studies degree, students must satisfy the requirements of the Applied Linguistics program in which they are primarily enrolled. In addition, they must satisfy the requirements described below, as established by the Asian Studies committee. Within this framework, final course selection is determined by the student, their Asian Studies advisor, and their Applied Linguistics program advisor.

Upon a student’s acceptance by the Asian Studies Admissions Committee, the student will be assigned an Asian Studies academic advisor in consultation with the student’s major advisor in Applied Linguistics. As students develop specific scholarly interests, they may request that a different Asian Studies faculty member serve as their advisor. The student and advisor will discuss a program of study that is appropriate for the student’s professional objectives and that is in accord with the policies of The Graduate School, the Applied Linguistics department and the Asian Studies program.

Requirements for the Applied Linguistics/Asian Studies Ph.D.

The doctoral degree in Applied Linguistics and Asian Studies is awarded only to students who are admitted to the Applied Linguistics doctoral program and admitted to the dual-title degree in Asian Studies. The minimum course requirements for the dual-title Ph.D. degree in Applied Linguistics and Asian Studies are as follows:

- 60 credits beyond the master’s degree, INCLUDING
  - 1 credit of APLNG 580
  - 6 credits in foundations courses, which may include but need not be limited to the following: APLNG 591, APLNG 597 (Special Topics)
  - 6 credits in research methods, which may include but need not be limited to the following: APLNG 593, APLNG 597 (Language Analysis), APLNG 581, APLNG 586
  - 6 credits in Applied Linguistics electives, to be selected in consultation with the applied linguistics advisor
  - 15 credits of Asian-related coursework at the 400 or 500 level. At least 6 of these 15 credits will be from ASIA 501 and 502. As many as 6 may come from Applied Linguistics, as approved by the student’s doctoral advisor and the Asian Studies Program director of graduate studies. The remaining credits can be taken in ASIA or in any department other than Applied Linguistics.
  - All-skills proficiency in one Asian language AND intermediate speaking competence in an additional language other than English

Particular courses may satisfy both the Applied Linguistics requirements and those of the Asian Studies program. Final course selection is determined by the student in consultation with their dual-title program advisors and their major program advisors.

APPLIED LINGUISTICS (APLNG) course list

Degrees Conferred:

- M.S.
- M.A.
- M.B.S.
- Integrated B.S. in Statistics and Master of Applied Statistics (M.A.S.)

The Graduate Faculty

- Michael G. Akritas, Ph.D. (Wisconsin) Professor of Statistics
- Naomi S. Altman, Ph.D. (Stanford) Associate Professor of Statistics
- Charles E. Antle, Ph.D. (Oklahoma State) Professor Emeritus of Statistics
- Steven F. Arnold, Ph.D. (Stanford) Professor of Statistics
- Chandra Bhat, Ph.D. (ISI-Calcutta, India) Professor of Statistics
- Jesse L. Barlow, Ph.D. (Northwestern) Professor of Computer Science and Engineering, and Statistics
- Otmar N. Bjerstedt, Ph.D. (Oslo, Norway) Professor of Biology, Entomology, and Statistics
- Marilyn T. Boswell, Ph.D. (California, Riverside) Associate Professor Emeritus of Statistics
- Francesca Chiaromonte, Ph.D. (Minnesota) Associate Professor of Statistics and Public Health Sciences
- Vernon M. Chinchilli, Ph.D. (North Carolina) Distinguished Professor of Biostatistics and Statistics
- Mosuk Chow, Ph.D. (Cornell) Associate Professor of Statistics; Senior Research Associate
- Linda M. Collins, Ph.D. (USC) Professor of Human Development and Family Studies, and Statistics
- Enrique del Castillo, Ph.D. (Arizona State) Associate Professor of Industrial Engineering and Statistics
- Manfred Denker, Ph.D. Professor of Statistics and Mathematics
- Duncan Fong, Ph.D. (Purdue) Professor of Marketing and Statistics
- John Frick, Ph.D. (North Carolina) Assistant Professor of Statistics
- Debasis Ghosh, Ph.D. (Washington) Associate Professor of Statistics and Public Health Sciences
- Murail Haran, Ph.D. (Minnesota) Assistant Professor of Statistics
- William L. Harkness, Ph.D. (Michigan State) Professor Emeritus of Statistics
- Thomas P. Hettmansperger, Ph.D. (Iowa) Professor Emeritus of Statistics
- Robert A. Hultquist, Ph.D. (Oklahoma State) Professor Emeritus of Statistics
- David R. Hunter, Ph.D. (Michigan) Associate Professor of Statistics
- Bing Li, Ph.D. (Chicago) Professor of Statistics
- Jia Li, Ph.D. (Stanford) Associate Professor of Statistics and Computer Science and Engineering
- Ruze Li, Ph.D. (North Carolina) Professor of Statistics
- John C. Liechty, Ph.D. (Cambridge) Associate Professor of Marketing and Statistics
- Dennis K. J. Lin, Ph.D. (Wisconsin) University Distinguished Professor of Statistics and Supply Chain Management
- Bruce G. Lindsay, Ph.D. (Washington) William Professor of Statistics
- David T. Mauger, Ph.D. (Michigan) Associate Professor of Public Health Sciences and Statistics
- Donald St. P. Richards, Ph.D. (UW) Professor of Statistics
- James L. Rosenberger, Ph.D. (Cornell) Professor of Statistics
- T.D. (Cornell) Associate Professor Emeritus of Statistics
- Joseph L. Schafer, Ph.D. (Harvard) Associate Professor of Statistics
- Michele L. Shaffer, Ph.D. (Penn State) Associate Professor of Public Health Sciences and Statistics
- Damla Sentürk, Ph.D. (California, Davis) Assistant Professor of Statistics
- Durand L. Shumway, Ph.D. (Penn State) Assistant Professor of Statistics; Research Associate
- Laura J. Stensland, Ph.D. (Penn State) Lecturer in Statistics
- Aleksandra B. Slavkovic, Ph.D. (Carnegie Mellon) Assistant Professor of Statistics
- Linda C. Strauss, Ph.D. (Penn State) Professor of Statistics; Research Associate
- Arkady A. Tempelman, D.Sc. (Vilnius, Lithuania) Professor of Statistics and Mathematics
- Roberta W. Wu, Ph.D. (U of Washington) Professor of Public Health Sciences and Statistics
- Fuqing Zhang, Ph.D. (North Carolina State) Professor of Meteorology and Statistics
- Yufan Zhang, Ph.D. (Southern California) Assistant Professor of Statistics
- Zhizhao Zhao, Ph.D. (Chicago) Assistant Professor of Statistics

Graduate instruction and research opportunities are available in most areas of statistics and probability, including linear models, nonparametric statistics, robustness, statistical computing, analysis of count data, multivariate analysis, experimental design, reliability, stochastic processes and probability (applied and theoretical), distribution theory, statistical ecology, and biometrics. Graduate students can gain practical experience in the application of statistical methodology through participation in the department's statistical consulting center and collaborative research activities. In addition, collaborative projects with other departments provide longer term experience and support for selected students. Most students gain valuable teaching experience by assisting in the teaching and grading of courses. Instruction and research is conducted through the Statistical Consulting Center and the Statistical Consulting Center for the Social and Behavioral Sciences.

The Master of Applied Statistics (M.A.S.) program is a professional degree designed to provide training in statistics focused on developing data analysis skills, and exploration of all core areas of applied statistics, without going deeply into the mathematical statistics foundations. It aims to provide its graduates with broad knowledge in a wide range of statistical application areas.

The Doctor of Philosophy (Ph.D.), Master of Arts (M.A.), and Master of Science (M.S.) degrees in Statistics are designed for advanced studies in applied and theoretical statistics. Special emphases include biostatistics, statistical ecology, environmental statistics, genomics, biometrics and statistical computation. The M.S. degree is appropriate preparation for the department's Ph.D. degree.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. Entering graduate students in statistics for whom English is not the first language are required to take the TOEFL (Test of English as a Foreign Language) examination. The results of this examination must be received by the Department of Statistics at least six months prior to the requested date of admission to the Graduate School and must pass the PSU test of spoken English in the first year of the program.

The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the Internet-based test (iBT). Applicants with lower scores may be considered for provisional admission.

While applications from all students (including those who already have done graduate work) are reviewed, completion of a standard calculus sequence is regarded as a prerequisite. Students with a 3.00 or better junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Students hoping to earn a Ph.D. in statistics
Degree Requirements

Professional Master of Applied Statistics Requirements

For the M.A.S. degree, a minimum of 30 credits and a minimum grade-point average of 3.0 are required for graduation. Of the 30 credits, 24 must be courses from the Statistics department and 21 must be at the 500 level. The candidate must complete 6 credits in applied statistics (STAT 501, STAT 502), 6 credits in mathematical statistics (STAT 414, STAT 415) and 3 credits in statistical consulting (STAT 580-581). For all M.A.S. students, the Stat 581 course will have a comprehensive written project report required as part of the course, which serves as the culminating experience. To complete the remaining credit requirements, a candidate can select 9-15 credits from the following applied statistics courses: STAT 484, STAT 480, STAT 500, STAT 503, STAT 504, STAT 505, STAT 506, STAT 507, STAT 509, and STAT 510. In addition, students with suitable backgrounds may choose up to 6 credits from a departmental list of additional courses with approval from their advisor.

Master of Arts and Master of Science Degree Requirements

For the M.A. and M.S. degrees, a candidate must complete at least 30 credits, including at least 27 at the 500 or 600 level; 21 of the 27 500-level credits must be formal course work from the department of Statistics. A candidate must complete 6 credits in applied statistics (STAT 511, STAT 512), 6 credits in mathematical statistics (STAT 513, STAT 514), 3 credits in stochastic processes (STAT 515) and 3 credits in statistical consulting (STAT 580-581). The student must also pass a written master’s qualifying examination taken at the end of the first year. Finally, an M.A. candidate must submit an acceptable master’s paper to the department, and an M.S. candidate must submit a thesis.

Doctoral Degree Requirements

In addition to the course requirements for the M.A. and M.S. degrees given above, a Ph.D. candidate in Statistics must complete further courses in linear models (STAT 551), asymptotic tools (STAT 553), statistical inference (STAT 561), and advanced probability (STAT 517), as well as 15 credits of electives taken from STAT 518, STAT 544, STAT 545, STAT 552, STAT 562, STAT 564, STAT 565, and STAT 572, or other courses suggested by the Ph.D. committee and approved by the Graduate Studies Committee. The student also must pass a written Ph.D. qualifying exam, typically during the second year, and a comprehensive exam given at the end of the third year. The comprehensive exam will have a written component, whose content will be determined and administered by the student’s Ph.D. graduate committee, and an oral component, which includes the presentation of a thesis research proposal. The candidate then must submit an acceptable Ph.D. thesis and defend it.

The Ph.D. in Statistics offers options in Biometrics, Biostatistics, Environmental Statistics, and Genomics. The course and the examination requirements remain the same under these options, however, the candidate must take 15 credits from a list of courses identified by the option.

Minor in Statistics Requirements

The Department of Statistics has three possible options for a Graduate Minor in Statistics:

- **Option 1:** STAT/MATH 414-415 and at least three 500-level courses from the department.
- **Option 2:** Five or more courses totaling 15 credits at the 500-level from the department. Stat 464 may also count toward the 15 credits.
- **Option 3:** Four 500-level courses totaling 12 credits from the department and one additional course of 3 credits approved by the department head or graduate studies chairman.

Please note: STAT 500 will not be counted toward the Graduate Minor in Statistics under any option.

For all options, a 3.5 GPA is required in the courses to be counted toward the minor. Completion of one of the options listed above, with the specified grade-point average, and the signature on the Graduate Minor Program form found on the Department of Statistics website constitutes approval of the Minor in Statistics. The candidate must indicate the wish to have a Graduate Minor in Statistics when the diploma card is filed and indicate the semester the Ph.D. degree is expected.

Other Relevant Information

Students in the Statistics program may elect the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees. (See also Operations Research.)

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the Student Aid section of the Graduate Bulletin. GRE scores are required for consideration for assistantships.

Integrated B.S. in Statistics and Master of Applied Statistics (M.A.S.)

The Integrated Undergraduate-Graduate (IUG) degree with B.S. in Statistics and Master of Applied Statistics (M.A.S.) is designed to be completed in five years. This integrated degree will enable a select number of highly qualified and career-oriented students to obtain training in statistics focused on developing data analysis skills and exploration of core areas of applied statistics at the undergraduate and graduate levels. The M.A.S. degree is a professional master’s degree that emphasizes applications and does not provide as much training in the mathematical and statistical theory. The degree prepares students with interests in mathematics, computation, and the quantitative aspects of science for careers in industry and government as statistical analyst. Research divisions in the pharmaceutical industry, quality control and quality engineering divisions in manufacturing companies, clinical research units, corporate planning and research units, and other data-intensive positions require persons with training in mathematics, computation, database management, and statistical analysis, which this program will provide.

Application Process

The number of openings in the integrated B.S./M.A.S. program is limited. Admission will be based on specific criteria and the recommendation of faculty. Applicants to the integrated program:

- Must be enrolled in the Statistics B.S. program.
- Must have completed at least 60 credits of the undergraduate degree program, including the two courses: STAT 414 and STAT 415 and the students must apply to the program prior to completing 110 credits.
- Must present a departmental approved plan of study in the application process in consultation with the M.A.S. program director.
- Must be recommended by the chair of the department’s undergraduate program committee.
- Must be accepted into the M.A.S. program in Statistics.

For the IUG B.S./M.A.S. degree, 120 credits are required for the B.S. and 30 credits for the M.A.S. The following twelve graduate-level credits (number of credits in parentheses) can apply to both B.S. and M.A.S. degrees; six of these are at the 500 level:

**STATISTICS (STAT)**

- 414. Introduction to Probability Theory (3)
- 415. Introduction to Mathematical Statistics (3)
- 501. Regression Methods (3)
- 502. Analysis of Variance and Design of Experiments (3)

Assuming all requirements for the B.S. are completed, students in the program can complete the B.S. degree and not advance to the M.A.S. Degree if they...
Degree Requirements

IUG Statistics B.S. prescribed Statistics courses (25 credits)

STATISTICS (STAT)
220. Basic Statistics (3)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
416. Stochastic Modeling (3)
464. Applied Nonparametric Statistics (3)
470W. Problem Solving and Communication in Applied Statistics (3)
480. Introduction to Statistical Analysis System (SAS) (1)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)

Note that students in IUG Statistics B.S. take STAT 501 and STAT 502 instead of STAT 460 and STAT 462 for the regular Statistics B.S.

IUG Statistics M.A.S. requirement (30 credits)

STATISTICS (STAT)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)
580. Statistical Consulting Practicum (2)
581. Statistical Consulting Practicum II (1)

Electives (15 credits)
Select from STAT 503, STAT 504, STAT 505, STAT 506, STAT 507, STAT 509, STAT 510 and the departmental list of additional courses for the M.A.S program with the approval of the adviser.

**For all students in the M.A.S program, the STAT 581 courses will have a comprehensive written project report required as part of the course, which serves as the culminating experience.

Integrated B.A./B.S. in Mathematics and Master of Applied Statistics (M.A.S.)

The Integrated Undergraduate-Graduate (IUG) degree with B.A./B.S. in Mathematics and Master of Applied Statistics (M.A.S.) is designed to be completed in five years. This integrated degree will enable a select number of highly qualified and career oriented students to obtain training in statistics focused on developing data analysis skills, and exploration of core areas of applied statistics at the graduate levels in addition to an undergraduate degree in Mathematics. The M.A.S. degree is a professional masters degree that emphasizes applications. The degree prepares students with interests in mathematics, computation, and the quantitative aspects of science for careers in industry and government as statistical analysts. Research divisions in the pharmaceutical industry, quality control, and quality engineering divisions in manufacturing companies, clinical research units, corporate planning and research units, and other data intensive positions require persons with training in mathematics, computation, database management, and statistical analysis, which this program will provide.

Application Process

The number of openings in the integrated B.A./B.S. in Mathematics and M.A.S. program is limited. Admission will be based on specific criteria and the recommendation of faculty. Applicants to the integrated program:

- Must be enrolled in the Mathematics B.A./B.S. program.
- Must have completed at least 60 credits of the undergraduate degree program including the two courses: STAT 414 and STAT 415 and the students must apply to the integrated program prior to completing 110 credits.
- Must present a departmental approved plan of study in consultation with the M.A.S. program director.
- Must be recommended by the chair of Mathematics Department's undergraduate program committee. Two additional recommendation letters must be sent to the M.A.S. admissions committee.
- Must submit a transcript and a statement of purpose.
- Must apply to the M.A.S. program in Statistics.

For the IUG B.A./B.S. in Mathematics and M.A.S. degree, 120 credits are required for the B.A./B.S. and 30 credits for the M.A.S. The following twelve graduate level credits (number of credits in parentheses) can apply to both B.A./B.S. and M.A.S. degrees, six of these are at the 500 level:

STATISTICS (STAT)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)

Assuming all requirements for the B.A./B.S. in Mathematics are completed, students in the program can complete the B.A./B.S. degree and not advance to the M.A.S. degree if they desire.

Degree Requirements

IUG Math B.A./B.S. students must fulfill the Math B.A./B.S. requirement while counting these prescribed Statistics courses (15 credits)

STATISTICS (STAT)
220. Basic Statistics (3)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)

IUG M.A.S. Requirements (30 credits)

STATISTICS (STAT)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)
580. Statistical Consulting Practicum (2)
581. Statistical Consulting Practicum II (1)

Electives: (15 credits)
Select from STAT 484, STAT 503, STAT 504, STAT 505, STAT 506, STAT 507, STAT 509, STAT 510 and the departmental list of additional courses for the M.A.S. program with the approval of the adviser.

For the IUG B.A./B.S. in Mathematics and M.A.S. degree, the four courses: STAT 414, STAT 415, STAT 501 and STAT 502 can apply to both the B.A./B.S. and
M.A.S. degrees.

*Can be waived for students with an equivalent course, e.g., STAT 250 or STAT 301.

** For all students in the M.A.S. program, the STAT 581 course will have a comprehensive written project report required as part of the course, which serves as the culminating experience.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:
M.A.

The Graduate Faculty

- John Steven Backels, Ph.D. (Ball State) Affiliate Assistant Professor of Psychology
- Michael A. Becker, Ph.D. (SUNY, Albany) Associate Professor of Psychology
- Thomas G. Bowers, Ph.D. (Virginia Tech) Associate Professor of Psychology
- Gina M. Breisford, Ph.D. (Bowling Green) Assistant Professor of Psychology
- Barbara A. Bremer, Ph.D. (Bryn Mawr) Associate Professor of Psychology
- Richard Fiene, Ph.D. (Newport) Associate Professor of Human Development and Family Studies
- Marissa Harrison, Ph.D. (SUNY, Albany) Assistant Professor of Psychology
- Senel Poyrazli, Ph.D. (Houston) Associate Professor of Counseling Psychology
- Maria A. Turkson, Ph.D. (Maryland) Assistant Professor of Psychology
- Xu Xu, Ph.D. (Northern Illinois) Assistant Professor of Psychology

The Master of Arts program in Applied Psychological Research focuses on the development of research skills within the context of scientific training in psychology. The program requires 35 credits of course work (29 credits of core courses and 6 credits of electives).

The program is designed to meet the needs of students who plan careers in research or administration within human service or similar organizations, who plan to conduct research in other settings, or who plan to pursue doctoral study. Students can select electives and research experiences to reflect their individual interests in consultation with their adviser.

The program is intended for both part- and full-time students. Students are admitted for fall semester only. The deadline for admission is May 1.

Admission Requirements

Students will be admitted on a competitive basis and must submit the following:

- a completed application form with the application fee
- two official transcripts of all colleges and universities attended
- three professional letters of recommendation
- a brief (two-page) interest statement
- verbal, quantitative, and analytical scores on the Graduate Record Examinations

The applicant must have a bachelor's degree from a regionally accredited academic institution, must have completed at least 18 credits in psychology, and must have a cumulative grade-point average of 3.0 or above in the last 60 credits of coursework. The undergraduate work must include a statistics course and a psychology research methods course with grades of B or higher. A personal interview is required.

Transfer Credits

Penn State allows for the approval of up to 10 transfer credits to graduate programs.

Degree Requirements

The M.A. in Applied Psychological Research requires 35 credits of course work, including 6 credits of supervised research experience and a master's research paper.

Psychology Core Courses (29 credits) (provide a foundation in professional ethics, individual differences and cultural diversity, the scientific bases of behavior, and scientific research skills)

PSYCHOLOGY (PSYC)

- 500. Ethics and Professional Practice in Psychology (3)
- 501. Cultural Competency in Psychology (3)
- 502. Applied Social Psychology (3)
- 520. Research Methods (4)
- 521. Statistics (4)
- 524. Biological Basis of Behavior (3)
- 530. Research Paper (3)
- 594. Applied Psychological Research (6)

Elective Courses (6 credits) (should be selected in consultation with the student's adviser in support of the student's research focus) Possible elective courses include:

PSYCHOLOGY (PSYC)

- 400. Health Psychology (3)
- 403. Adult Development (3)
- 405. Child Development (3)
- 406. Adolescence (3)
- 409. Child Behavior Disorders (3)
- 410. Psychology of the Differently-Abled (3)
- 415. Abnormal Psychology (3)
- 421. Behavior Modification (3)
- 425. Cognition and Perception (3)
- 427. Learning Theory (3)
- 465. Psychology of Women (3)
- 482. Personality Theory (3)
- 514. Preventive Psychology (3)
- 515. Clinical Health Psychology (3)
Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Architecture (ARCH)

Degree Conferred:
- M.Arch
- Integrated B.Arch.-M.Arch. Program
- Ph.D.

Ph.D. Program Faculty
- Chimay Anumba, Ph.D. (Leeds) Professor of Architectural Engineering
- Jin Baek, Ph.D. (Penn) Assistant Professor of Architecture
- Mark Ballora, Ph.D. (McGill) Associate Professor of Integrative Arts and Music
- Thomas E. Mastrey, Ph.D. (Washington) P.E. Assistant Professor of Architectural Engineering
- Maika Bose, Ph.D. (Wisconsin) Associate Professor of Landscape Architecture
- Gary L. Catchen, Ph.D. (Columbia) Professor of Nuclear Engineering
- Sidney Cohn, Ph.D. (North Carolina) Professor of Urban Design
- James Cooper, Ph.D. (Virginia) Assistant Professor of Architecture
- Madhulika Desai, Ph.D. (Berkeley) Assistant Professor of Art History
- Mary I. Frecker, Ph.D. (Michigan) Professor of Mechanical Engineering
- Jawaid Haider, Ph.D. (Penn State) Professor of Architecture
- Derek Holdsworth, Ph.D. (British Columbia) Professor of Geography
- Larry Greenfield, Ph.D. (California - Santa Barbara) Associate Professor of Landscape Architecture
- Loukas Kalisperis, Ph.D. (Penn State) Professor of Architecture
- James Kalsbeek, M.S. Arch. (Cincinnati) Associate Professor of Architecture
- Donald E. Kunze, Ph.D. (Penn State) Associate Professor of Architecture and Integrative Arts
- Nancy Locke, Ph.D. (Harvard) Associate Professor of Art History
- John I. Messers, Ph.D. (Penn State) Assistant Professor of Architectural Engineering
- Richard G. Mistrick, Ph.D. (Penn State) P.E. Associate Professor of Architectural Engineering
- Timothy Murtha, Ph.D. (Penn State) Assistant Professor of Landscape Architecture
- Ute Poerschke, Ph.D. (Cottbus, Germany) Associate Professor of Architecture
- Daniel Purdy, Ph.D. (Cornell) Associate Professor of German
- Sarah K. Rich, Ph.D. (Yale) Assistant Professor of Art History
- Timothy W. Simpson, Ph.D. (Georgia Tech) Professor of Industrial and Mechanical Engineering
- Elizabeth Smith, Ph.D. (NYU) Associate Professor of Art History
- Alexandra Staub, Ph.D. (Cottbus) Associate Professor of Architecture
- Jawaid Haider, Ph.D. (Penn State) Professor of Architecture
- James Kalsbeek, M.S. Arch. (Cincinnati) Associate Professor of Architecture
- Donald E. Kunze, Jr., Ph.D. (Penn State) Professor of Architecture and Integrative Arts
- Jodi L. LaCoe, M.Arch. (McGill) Instructor in Architecture
- Darla Lindberg, M.Arch. (Iowa State) Associate Professor of Architecture
- John P. Lucas, M.Arch. (North Carolina State) Professor of Architecture
- Romolo Martemuccio, M.S Urb Des. (Pratt Institute) Professor of Architecture
- Paul M. Settlage, M.Arch. Eng. (Penn State) Affiliate Associate Professor of Architecture
- Katsuhiro Muramoto, M.Arch. (Crabbrook Academy) Associate Professor of Architecture
- Madis Pihlak, M.C.P. (Berkeley) Associate Professor of Architecture and Landscape Architecture
- Ute Poerschke, Ph.D. (Cottbus, Germany) Associate Professor of Architecture
- Alexandra Staub, Ph.D. (Cottbus) Associate Professor of Architecture
- Daniel Willis, M.S. Arch. (Penn State) Professor of Architecture: Head, Department of Architecture
- James Wines, B.S. (Syracuse) Professor of Architecture
- Scott W. Wing, M.Arch. (Princeton) Associate Professor of Architecture

M.Arch Program Faculty
- Jin Baek, Ph.D. (Penn) Assistant Professor of Architecture
- Pier Luigi Bandini, Lau.Arch. (U. of Florence, Italy) Associate Professor of Architecture
- David Celento, M.Arch. (Harvard) Assistant Professor of Architecture
- Sidney Cohn, Ph.D. (North Carolina) Professor Emeritus of Urban Design
- James Cooper, Ph.D. (Virginia) Assistant Professor of Architecture
- Christine Gorby, M.Arch. (Harvard) Associate Professor of Architecture
- Jawaid Haider, Ph.D. (Penn State) Professor of Architecture
- Lisa Iulo, M.Arch. (CUNY) Assistant Professor of Architecture
- Loukas Kalisperis, Ph.D. (Penn State) Professor of Architecture
- James Kalsbeek, M.S. Arch. (Cincinnati) Associate Professor of Architecture
- Donald E. Kunze, Jr., Ph.D. (Penn State) Professor of Architecture and Integrative Arts
- Jodi L. LaCoe, M.Arch. (McGill) Instructor in Architecture
- Darla Lindberg, M.Arch. (Iowa State) Associate Professor of Architecture
- John P. Lucas, M.Arch. (North Carolina State) Professor of Architecture
- Romolo Martemuccio, M.S Urb Des. (Pratt Institute) Professor of Architecture
- Paul M. Settlage, M.Arch. Eng. (Penn State) Affiliate Associate Professor of Architecture
- Katsuhiro Muramoto, M.Arch. (Crabbrook Academy) Associate Professor of Architecture
- Madis Pihlak, M.C.P. (Berkeley) Associate Professor of Architecture and Landscape Architecture
- Ute Poerschke, Ph.D. (Cottbus, Germany) Associate Professor of Architecture
- Alexandra Staub, Ph.D. (Cottbus) Associate Professor of Architecture
- Daniel Willis, M.S. Arch. (Penn State) Professor of Architecture: Head, Department of Architecture
- James Wines, B.S. (Syracuse) Professor of Architecture
- Scott W. Wing, M.Arch. (Princeton) Associate Professor of Architecture

The Master of Architecture program emphasizes three areas central to the school: Community and Urban Design (CUD), Digital Design (DD), and Culture, Society and Space (CSS). The program allows opportunities for graduate students to assist in undergraduate courses and work with the two endowed centers: the Hamer Center for Community Design Assistance and the Stuckeman Center for Design Computing. In addition, selected graduate students can also participate in the department's Rome program for undergraduates. The Master of Architecture is a post-professional degree. Post-professional degrees do not qualify the recipient for professional licensure in the United States. The program is intended for students already holding professional degrees in architecture, and in exceptional cases, for students with nonprofessional architectural degrees who seek to develop a better understanding of architecture. The Master of Architecture program is specially designed for students interested in advanced studies in Community and Urban Design, Digital Design and Culture, Society and Space. It is expected that such students will have previously studied the technical and professional aspects of architectural practice and are primarily interested in strengthening the intellectual underpinnings of their work through intensive studio investigations, design applications, and rigorous theoretical inquiry.

The Ph.D. in Architecture is a research-based degree supporting a number of areas of research inquiry. The program's distinguishing quality is its...
broad-based research core, grounded in contemporary critical theory and methods. Faculty include Penn State scholars with an expertise in architectural theory, the design of digital design, digital fabrication, building construction and technology, cultural and environmental behavior, housing, urban design, and sustainability. Visiting scholars further enhance the program and course offerings. The program allows opportunities for graduate students to assist in undergraduate courses and work with the research centers of the department. It is expected that students will have previously studied the technical and professional aspects of architectural practice and are primarily interested in strengthening the intellectual underpinnings of their work through intensive investigation, design applications, and rigorous theoretical inquiry.

M.Arch. Admission Requirements

M.Arch degree applicants should have a five-year professional degree in architecture. This M.Arch. program culminates in a post-professional degree for students with a five-year professional degree that is accredited by the National Architectural Accrediting Board (NAAB) or its equivalent. Any exceptions must have the consent of the Department Head. International applicants with a five-year degree in architecture are considered equivalent to a graduate from a five-year NAAB-accredited program for admission purposes. In exceptional cases, the M.Arch. program may accept students with a four-year architecture degree or other degrees who seek to develop a better understanding of the principles and theory that underlie the profession of architecture. It is understood that such students are interested in the academic path that an M.Arch degree offers. These students would be required to take remedial undergraduate or graduate courses and may have to significantly extend the duration of their study.

In addition to the application to the University for admission to the Graduate School, all applicants for the M.Arch. degree must submit the following to the Department of Architecture.

A statement of intent should be primarily a description of the applicant's professional goals, desired option and subjects of study, and the area(s) of anticipated architectural inquiry. A portfolio of creative and design work (architecture and planning projects) executed at the undergraduate level or under professional guidance or independently, provided that such work can be evidenced as executed by the applicant, is an important part of the graduate application. A minimum portfolio representation of one project for each year of academic undergraduate study, or its equivalent, is required. The applicant is encouraged to include other evidence of academic excellence, such as awards, design and scholarly achievements, and other recognitions. A complete set of official transcripts is required for all applications. A minimum of three statements of recommendation from faculty members acquainted with the applicant's academic history and/or recommendations by an undergraduate review committee should accompany the application.

Scores from the Graduate Record Examinations (GRE) are required for admission for all applicants. A minimum grade-point average of 3.00 is required for admission.

Ph.D. Admission Requirements

To be admitted into the Doctor of Philosophy in Architecture degree program, an applicant must have received a professional degree in architecture from an accredited institution and a Masters degree in architecture or related field. Outstanding candidates who do not hold a professional architecture degree but who satisfy all other entrance to major requirements may be admitted by the Ph.D. program director with the concurrence of the Department Head. Scores from the Graduate Record Examination (GRE) will be required for admission. An overall minimum grade-point average of 3.20 for graduate and undergraduate degrees is required for admission. In addition to the application to the University for admission to the Graduate School, all applicants must submit the following to the Department of Architecture: 1) an official transcript from all institutions of higher education attended, both undergraduate and graduate, 2) official diplomas/certificates for each degree obtained, 3) three letters of recommendation, 4) a statement of intent, and 5) a CV.

The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.20 grade-point average may be made for student with special backgrounds, abilities, and interests.

English Language Requirements

The language of instruction at Penn State is English. International applicants for all degrees must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test or a total score of 79 with a 19 on the speaking section of the computer-based test (iBT). Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5. Specific graduate programs may have more stringent requirements. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guiana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

M.Arch. Degree Requirements

The capstone of the M.Arch. Program is a Master’s Thesis or Thesis [Design] Project, which requires the student to identify and formulate an area of inquiry within which he or she will be expected to do original research and to complete a project or a written thesis that tests the theoretical ideas. The Master of Architecture is a 30-credit program that requires 24 credits of course work and 6 credits of thesis or thesis project. At least 18 credits must be at the 500 or 600 levels, and at least 20 credits must be taken in residence at University Park. The core courses consist of a total of 12 credits.

A graduate student may be able to complete the requirements for the M.Arch. degree in one year. Those students who are awarded an assistantship will require more than two semesters to complete the requirements for the M.Arch. degree. Directed Electives include courses related to one of the three options from other disciplines, such as Landscape Architecture, Geography, Sociology, Philosophy, Psychology, and Computer Science, as well as within the Department of Architecture. Architectural Research (Arch 591) is specifically designed for each of the three options and counts toward the 12 credits necessary to satisfy the option within the major. The thesis requirement can be fulfilled in two ways: through a written thesis, which conforms to the scholarly standards of the Graduate School or through a design project that tests theoretical ideas. A written monograph will accompany all thesis design projects.

Ph.D. Degree Requirements

The capstone of the Ph.D. program is a dissertation, which requires the student to identify and formulate an area of inquiry within which he or she will be expected to conduct high-quality original scholarly research. Each student accepted into the Ph.D. degree program must pass the Ph.D. Candidacy Examination, which requires students to display an understanding of basic material in all areas, along with an in-depth understanding of material covered in courses within their area of focus. This examination must be passed within three semesters, not counting summer session, of entry into the doctoral program. The Ph.D. program of course work is developed in cooperation with the student’s Ph.D. Committee. It is recommended that this consist of approximately 30 credits of courses beyond the master’s degree. At the conclusion of the student’s course work, the Ph.D. student must take a written comprehensive examination that is developed by the student’s Ph.D. Committee. Following the comprehensive exam, continuous registration is required for all Ph.D. students until the dissertation is completed. Each student presents a comprehensive thesis proposal to his/her committee prior to starting his/her dissertation research and must present the results of this research in a final oral examination.

Ph.D. Course Work

- 6 credits of Critical Theory and Methods in Architecture (ARCH 512)
- 12 credits of Architectural Research and/or Design Inquiry (ARCH 520, 536, 591)
- 12 credits of research-area related courses such as Computational Methods in Architectural Design or Pedagogical Topics in Architecture (ARCH 522, 545, 590)
- 12 credits of Dissertation

Integrated B.Arch.-M.Arch. Program

The Department of Architecture offers a limited number of academically superior students enrolled in the fourth year of the Bachelor of Architecture degree program the opportunity to enroll in an integrated program leading to both the B.Arch. and the Master of Architecture degrees. The program permits the
student to integrate the fifth year of study for the professional B.Arch. degree with the program of study for the M.Arch. degree into a continuous program of study culminating in the award of both degrees. The ability to coordinate as well as concurrently pursue the two degree programs enables the student to achieve greater depth and comprehensiveness than if the degrees are pursued sequentially and to earn the two degrees in a shorter period of time. In particular, the program encourages the student to integrate the undergraduate thesis design project with the master's thesis, thereby achieving a greater depth of inquiry.

The number of openings to this special program is limited; admission is by invitation of the faculty and is extremely selective.

**Admission Requirements**

Applicants to the integrated program must be enrolled in the fourth year of a B.Arch. program or otherwise qualified to apply for admission to the fifth year of the B.Arch. program at Penn State. To be admitted, applicants must be able to meet the following requirements:

--Must be unconditionally accepted into the MARCH program at Penn State (see application requirements for the MARCH degree in the Penn State Graduate Degree Programs Bulletin).

--Must have a minimum 3.20 junior/senior overall grade-point average (on a 4.0 scale) as well as: (1) a minimum 3.20 GPA in architectural design courses (studio), and (2) a minimum 3.20 GPA in all course work except architectural design courses (studio).

--In addition to the normal application requirements for the MARCH degree, the student applicant shall provide a Plan of Study of not more than 1,500 words. The plan shall clearly describe the student's proposed general thesis topic and a strategy for pursuing it, including a list of proposed courses and a list of faculty whom the student foresees as contributing to the course of study.

The best-qualified students will be accepted up to the number of spaces available for new students. Acceptance to the program prior to the completion of all required course work is provisional, contingent upon meeting the previous requirements.

**Degree Requirements**

Students must complete the requirements for both the B.Arch. and M.Arch. degrees except that not more than 12 credits earned in either degree program may be used to meet the requirements of both degrees. Therefore, a minimum total of 48 credits are required to complete the Integrated B.Arch.-M.Arch. Program and earn both degrees. The student must maintain not less than a 3.2 overall GPA and shall achieve not less than a B grade in each required course.

**Student Aid**

Graduate assistantships and other forms of student aid are described in the Student Aid section of the Graduate Bulletin. All applicants who are accepted are considered for departmental financial aid.

**Courses**

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
M.F.A.

The Graduate Faculty

- Micaela Amato, M.F.A. (Colorado) Professor of Art and Women's Studies
- Irina Aristarkhova, Ph.D. (Russian Academy of Sciences) Assistant Professor of Women's Studies and Visual Arts
- John Bowman, B.F.A. (Rutgers) Professor of Art
- Paul Chidester, M.F.A. (Art Institute, Chicago) Associate Professor of Art
- Bonnie Collura, M.F.A. (Yale) Assistant Professor of Art
- Charles R. Garoian, Ph.D. (Stanford) Professor of Art Education
- Robin L. Gibson, M.F.A. (Wisconsin, Madison) Associate Professor of Art
- Lonnie Graham, M.F.A. (San Francisco Art Inst) Associate Professor of Art
- Matthew Kenyon, M.F.A. (Virginia Commonwealth) Assistant Professor of Art
- Jerold Maddox, M.F.A. (Indiana) Professor of Art
- Cristin Millett, M.F.A. (Arizona State) Associate Professor of Art
- Helen O'Leary, M.F.A. (Art Institute, Chicago) Professor of Art
- Simone Ostof, M.F.A. (Maryland) Associate Professor of Art
- Elizabeth Quackenbush, M.F.A. (Rochester Inst of Technology) Professor of Art
- Carlos Rosas, M.F.A. (Cranbrook Academy of Art) Associate Professor of Art
- Steven Rubin, M.F.A. (California, San Diego) Assistant Professor of Photography
- Jean Sanders, M.F.A. (Wisconsin, Madison) Associate Professor of Art
- Keith Shapiro, M.F.A. (Penn State) Associate Professor of Integrated Arts and Art
- Christopher P. Staley, M.F.A. (Alfred) Distinguished Professor of Art
- Graeme Sullivan, Ph.D. (Ohio State) Professor of Art Education; Director, School of Visual Arts
- Robert Yarber, M.F.A. (Louisiana State) Distinguished Professor of Art

M.F.A. program is planned to provide professional emphasis in a specific area of art.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

The Master of Fine Arts program in art, with its emphasis on professional study, is designed for the mature individual who by previous training and study has sufficiently prepared for the undertaking. It is strongly suggested that applicants have a minimum of 12 credits of art history at the undergraduate level. Any qualified student who has graduated from an accredited college that offers a bachelor of arts, bachelor of science, or bachelor of fine arts in the area of art of the equivalent may seek admission. The School of Visual Arts requires a minimum of 3.00 junior/senior grade-point average (on a 4.00 scale) for admission to the Master of Fine Arts Program. Exceptions to the minimum 3.00 average may be made for students with special backgrounds, abilities, and interests.

In addition to the previous requirements, all applicants must submit:

1. A portfolio of his/her work to illustrate his/her preparation for graduate study. A portfolio of slides, rather than actual work, is required. A selection of no fewer than twenty examples should be presented. The majority should be in the area of the applicant's interest.
2. A statement of professional aims. This statement should include the applicant's intentions for his/her proposed study. Some indications of his/her philosophy, beliefs, and goals in regard to education and art should give evidence that he/she is prepared to undertake the work outlined for the Master of Fine Arts program.
3. Three letters of reference attesting to the applicant's scholarship and ability to work independently.

Degree Requirements

The School of Visual Arts requires a minimum total of 60 credits for the Master of Fine Arts degree. Not more than 10 credits may be transferred from other accredited graduate institutions. Of the 60 credits required for graduation, candidates are expected to complete the following distribution of credits: 30 credits in a major area of concentration, 12 credits in art history and critical studies, 10 credits in related areas, and 8 credits in graduate seminar.

Additional M.F.A. Requirements

For M.F.A. candidates, at least 24 credits of the required 60 credits must be at the 500 level. In addition to course work, M.F.A. candidates must pass a candidacy review, which is usually held at the end of the second semester of study, submit an artist's statement, pass the M.F.A. comprehensive oral examination and produce an M.F.A. exhibition.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
Ph.D., M.A.

The Graduate Faculty

- Brian A. Curran, Ph.D. (Princeton) Associate Professor of Art History
- Anthony Cutler, Ph.D. (Emory) Evan Pugh Professor of Art History
- Madhu Desai, Ph.D. (California, Berkeley) Assistant Professor of Art History and Asian Studies
- Roland E. Fleischer, Ph.D. (Johns Hopkins) Professor Emeritus of Art History
- Hellmut Hager, Ph.D. (Universität Bonn) Evan Pugh Professor and Professor Emeritus of Art History
- Charlotte M. Houghton, Ph.D. (Duke) Associate Professor of Art History
- Nancy Locke, Ph.D. (Harvard) Associate Professor of Art History
- Leo Mazow, Ph.D. (North Carolina, Chapel Hill) Affiliate Associate Professor of Art History
- Patrick McGrady, Ph.D. (SUNY, Binghamton) Affiliate Assistant Professor of Art History
- Randy J. Ploog, Ph.D. (Penn State) Affiliate Assistant Professor of Art History
- Jeanne Chenault Porter, Ph.D. (Michigan) Associate Professor Emerita of Art History
- Sarah K. Rich, Ph.D. (Yale) Associate Professor of Art History
- Jefflel Ben Robinson, Ph.D. (Virginia) Affiliate Associate Professor of Art History
- Elizabeth B. Smith, Ph.D. (NYU, Institute of Fine Arts) Associate Professor of Art History
- Robin Thomas, Ph.D. (Columbia) Assistant Professor of Art History
- Elizabeth Walters, Ph.D. (NYU, Institute of Fine Arts) Assistant Professor of Art History
- Kristi Ann Wormhoudt, Ph.D. (Iowa) Affiliate Assistant Professor of Art History
- Craig Zabel, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of Art History

Graduate work is offered in the following areas: Ancient, Byzantine, Medieval, Renaissance, Baroque, Modern, Contemporary, American, African, and Asian art and architectural history.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) Aptitude Test (verbal, quantitative, and analytical) are required for admission to the Department of Art History. Special emphasis will be given to the verbal part of the GRE scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Candidates with a 3.00 junior/senior grade-point average and a minimum of 21 credits in art history will be considered for admission to the master's program. Lacking these, a promising candidate may be accepted on condition that deficiencies be remedied, but without graduate degree credit. Applicants to the Ph.D. program must have an M.A. in art history or a closely related field. The best-qualified applicants will be accepted up to the number of spaces that are available for new students.

Master's Degree Requirements

Candidates for the M.A. degree are required to complete a minimum total of 36 credits (including a master's thesis or paper), divided as follows:

- ART H 551 (3 credits), to be taken during one's first fall semester
- 12 credits at the 400 level, of which 3 credits must be taken in four of the five following areas of art history: African/Asian, Ancient, Byzantine/Medieval, Renaissance/Baroque, and Modern
- 9 credits of 500-level seminars in art history (ART H 551 and ART H 596 may not be used to fulfill this requirement). Each seminar in this 9-credit requirement must be taken with a different faculty member.
- 6 additional credits in art history at the 400 or 500 level. With the approval of one's adviser and the graduate officer, 3 credits of this requirement may be a course at the 400 or 500 level outside the Department of Art History.
- 6 credits of ART H 600 for a master's thesis or 6 credits of ART H 596 for a master's paper. ART H 596 may be used only by a master's candidate for a master's paper; all other individual studies should use ART H 496.

In addition, candidates must demonstrate a reading proficiency in two foreign languages. One of these languages must be German, and the other being French, Italian, or Spanish. On the recommendation of a student's adviser, and with the approval of the graduate officer, a student may substitute one of the above-named languages with another foreign language deemed appropriate for a specialized field. Proficiency in one language must be demonstrated before the end of one year of study. A reading knowledge of the second language must be demonstrated before the end of the second year. A master's examination must also be passed before completing the M.A. degree.

Doctoral Degree Requirements

Thirty additional credits, not including doctoral dissertation research, are required for the Ph.D. At least 24 of these credits must be in art history and 3 to 6 must be in a related area outside art history. At least 9 of the art history credits must be at the 500 level, exclusive of Art History 510 and Art History 596. At the discretion of the candidate's doctoral committee, the candidate may be required to take additional specialized courses pertaining to his or her major area of study. For students who have received a master's degree from another university, a reading competency in German and in French or Italian must be demonstrated before the end of one year of study. For the Ph.D., a candidacy examination, a comprehensive examination, and a final oral examination must be successfully completed in addition to the student's doctoral dissertation.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

ART HISTORY (ART H) course list

The Pennsylvania State University
Dual-Title Graduate Degree in Asian Studies (ASIA)

Eric Hayot
Director of Asian Studies
441 Burrowes Building
814-865-1188
ehayot@psu.edu

Degrees Conferred:
Students electing this program through primary departments will earn a Ph.D. in (graduate program name) and Asian Studies. The following graduate programs offer dual degrees in Asian Studies: Applied Linguistics, Comparative Literature, and History.

Faculty
Asian Studies faculty include individuals with budgeted appointments in Asian Studies and individuals with courtesy joint appointments. The following faculty members have budgeted or courtesy joint appointments in Asian Studies:

- Jonathan Abel, Assistant Professor of Comparative Literature and Asian Studies
- David Atwill, Assistant Professor of History and Asian Studies
- Erica Brindley, Assistant Professor of Religious Studies and History and Asian Studies
- Suresh Canagarajah, Kirby Professor of Language Learning, English, and Asian Studies
- Gretchen Caspar, Associate Professor of Political Science and Asian Studies
- Kumkum Chaggerjee, Associate Professor of History and Asian Studies
- Tina Chen, Associate Professor of English and Asian Studies
- Madhuri Desai, Assistant Professor of Art and Art History and Asian Studies
- Charlotte Eubanks, Assistant Professor of Comparative Literature and Asian Studies
- Eric Hayot, Associate Professor of Comparative Literature and Asian Studies
- Ronnie Hsia, Edwin Earle Sparks Professor of History and Asian Studies
- Alexander Huang, Assistant Professor of Comparative Literature and Asian Studies
- On-cho Ng, Professor of History and Religious Studies and Asian Studies
- Sumita Raghuram, Associate Professor of Labor Studies and Employment Relations and Asian Studies
- Bee-yan Roberts, professor of Economics and Asian Studies
- Gonzalo Rubio, Associate Professor of Classics and Mediterranean Studies and Asian Studies
- Denis Simon, Professor of International Affairs
- Mrinalini Sinha, Professor of History, Women's Studies, and Asian Studies
- Gregory Smits, Associate Professor of History and Asian Studies
- Susan Strauss, Associate Professor of Applied Linguistics and Asian Studies
- Reiko Tachibana, Associate Professor of Comparative Literature and Asian Studies
- Xiaoye You, Assistant Professor of English and Asian Studies

Program Objectives of a Dual-Title Degree in Asian Studies
A dual-title degree in Asian Studies and a given discipline acknowledges and fosters scholarly work across the disciplines, and increases the intellectual rigor and breadth of graduate work. The dual-title degree teaches student to synthesize knowledge within and across disciplinary boundaries.

The primary advantages of a dual-title degree include the intellectual and academic advantages of interdisciplinarity, strengthening the reputation of individual programs/departments through innovative degree programs, increased recruitment of quality graduate students, and improved placement of doctoral graduates.

The dual-title degree program in Asian Studies does not duplicate any other degree program at Penn State.

Admission Requirements
In addition to the admission requirements set forth by the Graduate School and the cooperating department, students seeking admission to the dual-title program will be admitted to graduate study in Asian Studies by an admissions committee of Asian Studies-affiliated faculty. Students must be admitted to a primary program before applying for the dual-title degree. Therefore, the Asian Studies program will follow the timetable and admission requirements of the cooperating department. Applicants should have a junior/senior cumulative average of a 3.00 (on a 4.00 scale) and appropriate course background. Prospective students seeking admission to the dual-title degree program will write a statement of purpose that addresses the ways in which their research and professional goals will reflect an interest in interdisciplinary and Asian Studies-related research.

Degree Requirements
The requirements for the dual-title Ph.D. include Asia-related coursework, Asia-related components to the candidacy and comprehensive exams, strong all-skills proficiency in one Asian language and either two-years' college study (or equivalent) of another Asian language or else an alternative proficiency appropriate to the student's field; and the completion of an Asian Studies-related dissertation.

Ph.D. Requirements
Coursework: 15 credits of Asia-related coursework at the 400 or 500 level. At least 9 of these 15 credits will be from ASIA 501, 502, and 597; the remainder may come from Asian Studies or from the student's home department, as approved by the student's doctoral adviser and the Asian Studies program director of graduate studies.

Language requirement: Students will show strong all-skills proficiency in one Asian language and either two years' college study (or equivalent) of another Asian language or else an alternative proficiency appropriate to the student's field.

Graduate committee, examinations, dissertation: A representative of the Asian Studies program will serve on the student's doctoral committee, which will take the student's home departmental practice into consideration in determining how to include an appropriate Asian Studies component in the student's candidacy and comprehensive examinations and in the dissertation.

Student Aid
Graduate assistantships available to students in this program and other forms of student aid are in the STUDENT AID section of the Graduate Bulletin.

- Peter W. A. Roming, Ph.D. (Brigham Young) Senior Research Associate
- Donald P. Schneider, Ph.D. (Cal Tech) Head; Distinguished Professor of Astronomy and Astrophysics
- Steinn Sigurdsson, Ph.D. (Cal Tech) Associate Professor of Astronomy and Astrophysics
- Paul Kooner, Ph.D. (Texas, Austin) Professor of Physics and Astronomy and Astrophysics
- Leisa K. Townsley, Ph.D. (Wyoming) Senior Scientist
- Richard A. Wade, Ph.D. (Cal Tech) Associate Professor of Astronomy and Astrophysics
- Aleksander Wolszczan, Ph.D. (Copenicus U, Poland) Evan Pugh Professor of Astronomy and Astrophysics
- Jason Wright, Ph.D. (California, Berkeley) Assistant Professor of Astronomy and Astrophysics

The graduate program in Astronomy & Astrophysics prepares students for careers in astronomy, space science and education. Graduate instruction and research opportunities are available in theoretical, observational, and instrumental astronomy and astrophysics. Currently active areas of theoretical research include high-energy astrophysics (including theory of neutron stars, black holes, and gamma ray bursts), relativity and cosmology, stellar dynamics and planet formation, and computational methodology. Observational areas include spectroscopic and photometric observations of high-redshift quasars, galaxies and the intergalactic medium; gamma-ray bursts; X-ray and visible light studies of quasars, starbursts and other active galaxies; visible light studies of nearby galaxies and their stellar populations; infrared study of brown dwarfs and protoplanetary disks; spectroscopy and modeling of binary, magnetically active, pre- and post-main sequence stars; spectroscopic searches for planetary systems. Instrumental areas include: development of X-ray telescopes and detectors; and high-precision visible and near-infrared light spectrographs. Department faculty members participate in several university cross-disciplinary organizations: Astrobiology Research Center, Center for Astrostatistics, Center for Gravitational Physics and Geometry, and the Center for Gravitational Wave Physics.

The Department played a seminal role in and leads many science investigations using two NASA-launched satellites, the Chandra X-Ray Observatory and the Swift panchromatic gamma-ray burst mission, and the innovative 9-meter Hobby-Eberly Telescope located at the McDonald Observatory in Texas. Faculty and students have new facilities, including other space-based observatories (GALEX, Hubble Space Telescope, Spitzer Space Telescope, XMM-Newton) and ground-based telescopes (Gemini and other national facilities, Magellan, Keck, South Africa Large Telescope, Very Large Telescopes, Physics faculty members closely associated with the Department are involved in particle and gravitational wave observations using the Auger, AMANDA, Ice Cube, and LIGO instruments. The Department has extensive computing facilities, and research is also conducted with university and national supercomputing resources.

Graduate students also have ample opportunity to acquire experience in undergraduate teaching and public outreach.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), including the Physics test, are required for admission. In addition, students coming from non-English speaking undergraduate institutions must submit scores from the TOEFL (Test of english as a Foreign Language) or IELTS (International English Language Testing System) examination. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Normally, students admitted to the program are required to have a bachelor's degree in physics and/or astronomy with a grade-point average of at least 3.0 in their junior-senior years and in physics, astronomy, math, and related subjects. Typical GRE scores for entering students are 720 or more on the general test, and 680 or more on the Physics test. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System). The minimum acceptable score for the TOEFL is 800 for the paper-based test, 243 for the computer-based test, or a total score of 96 with a 23 on the speaking section for the internet-based test. The minimum composite score for the IELTS is 6.5.

Degree Requirements

Course requirements for the Ph.D. consists of 30 credits of 3-credit courses, 3 credits of ASTRO 596 for directed research in the second year, 3 credits of ASTRO 589 Seminars in current research, 1 credit of ASTRO 590 Colloquium, and 1 credit of ASTRO 602 for supervised teaching. The ten 3-credit courses must include ASTRO 501, ASTRO 502, at least four additional ASTRO 500-level courses, and at least two PHYS 500-level courses. One 400-level class may also be substituted. A GPA of 3.2 in these courses is required.

The Candidacy Examination is an oral examination with broad coverage of covering any area of astronomy. Students who fail the Examination may make a second attempt. At the Comprehensive Examination, the student presents a significant body of original research conducted at Penn State. This Examination tests the student's mastery of the chosen field of research. The student prepares an extended written report and oral presentation, and answers questions on the research and closely related areas. The Comprehensive Exam can be passed, failed with option retake, or failed followed by dismissal from the Ph.D. program. Graduation requires the completion of a dissertation of original research and a thesis defense before the Doctoral Committee.

While all students are admitted into the Ph.D. program, occasionally students terminate with a M.S. degree. This requires completion of the Ph.D. course requirements (except the three topical seminars) with 3.00 grade point average, passage of the Candidacy Exam, and submission of a suitable thesis.

The Pennsylvania State University
Student Aid

Graduate Teaching Assistantships, externally funded graduate Research Assistantships, and/or University fellowships are typically provided to student admitted and continuing in good standing. Many students also apply for externally funded fellowships. University sources of funding are described in the STUDENT AID section of the Graduate Bulletin.

Courses

 Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
Ph.D., M.S., M.B.A., M.D./M.B.A.

The Graduate Faculty

- Brent W. Ambrose, Ph.D. (Georgia) Smeal Professor of Real Estate; Director, Institute for Real Estate Studies, Professor of Insurance and Real Estate
- Orle E. Barron, Ph.D. (University of Oregon) Professor of Accounting; PricewaterhouseCoopers Teaching Fellow in Accounting; Director of Smeal College Schreyer Honors Program
- Russell Barton, Ph.D. (Cornell) Professor of Supply Chain and Information Systems; Co-Director, MMM Degree Program; Associate Director, CMTOC
- Hans Baumgartner, Ph.D. (Stanford) Professor of Marketing
- Garet E. Bolton, Ph.D. (M.I.T. Sloan) Associate Professor of Accounting
- Lisa Bolton, Ph.D. (Florida) Associate Professor of Marketing
- Forrest S. Briscoe, Ph.D. (MIT Sloan) Assistant Professor of Management
- Dan J. Cahoy, JD (Franklin) Associate Professor of Business Law
- Gwanwi (Charles) Cao, Ph.D. (Chicago) Smeal Chair Professor in Finance
- Jennifer Couglan Chang, Ph.D. (Northwestern) Clinical Associate Professor in Marketing Pastie Fellow in Teaching and Learning
- Christopher Crisalla, Ph.D. (Pennsylvania) Assistant Professor of Supply Chain Management
- Keith Crocker, Ph.D. (Carnegie Mellon) The William Elliott Professor of Insurance and Risk Management
- Robert P. Crum, D.B.A. (Kentucky) Associate Professor of Accounting
- Wenhao Debiao, Ph.D. (Pennsylvania) Smend Chair Distinguished Chaired Professor of Marketing
- Ming Ding, Ph.D. (Pennsylvania) Professor of Marketing and Robert G. Schwartz Fellow
- Mark W. Dumas, Ph.D. (Northwestern) Detlof Von Touche Professor of Accounting
- Peter Ebbes, Ph.D. (Groningen) Assistant Professor of Marketing
- Charles R. Enis, D.B.A. (Maryland) Associate Professor of Accounting
- Harish Exarnsworth, Ph.D. (Washington) Assistant Professor of Finance
- Laura Field, Ph.D. (California, Los Angeles) Associate Professor of Finance
- Paul E. Fischer, Ph.D. (Rochester) Chair, Department of Accounting; Professor of Accounting
- Duncan Fong, Ph.D. (Purdue) Chair, Department of Marketing; Professor of Marketing
- Raghur Athur, Ph.D. (Minnesota) Alvin H. Clemens Professor of Entrepreneurial Studies; Professor of Management and Organization, Research Director of the Farrell Center for Entrepreneurial Studies
- Dennis A. Gioia, Ph.D. (Florida State) Chair, Department of Management and Organization; Robert & Judith Klein Professor of Management
- Qian Guan, Ph.D. (Penn State) Instructor in Supply Chain and Information Systems
- Dan Givoly, Ph.D. (NYU) Ernst & Young Professor of Accounting
- Marvin Goldberg, Ph.D. (Illinois) Irving & Irene Bard Emeritus Professor
- Guojing Gong, Ph.D. (Iowa) Assistant Professor of Accounting
- Barbara L. Gray, Ph.D. (Case Western Reserve) Professor of Organizational Behavior; Director, Center for Research in Conflict and Negotiation
- Rajdeep Grewal, Ph.D. (Cincinnati) Irving & Irene Bard Professor of Marketing
- Gary J. Hambrecht, Ph.D. (Penn State) Smeal Professor of Management
- Ian P. Harrison, Ph.D. (Pennsylvania) Professor of Supply Chain and Information Systems; Earl P. Strong Executive Education Professor in Business
- David Haushalter, Ph.D. (Purdue) Associate Professor of Finance; Academic Director, Smeal Trading Room
- Jingzhai (Jaye) Huang, Ph.D. (Northwestern) Associate Professor of Finance; David H. McKinley Professor of Business
- Steven J. Huddart, Ph.D. (Yale) KPMG Professor of Accounting
- Stephen E. Humphrey, Ph.D. (Michigan State) Associate Professor of Management
- Peter Iliev, Ph.D. (Brown) Assistant Professor of Finance
- Austin J. Jaffe, Ph.D. (Illinois) Chair, Department of Insurance and Real Estate; Philip H. Sieg Professor of Business Administration; Director, International Programs; Associate for Real Estate Studies
- Elena Katok, Ph.D. (Penn State) Professor of Supply Chain Management; Co-Director, Laboratory for Economic Management and Auctions
- J. Edward Ketz, Ph.D. (Virginia Tech) Associate Professor of Accounting
- William Krawac, Ph.D. (Utah) Chair, Department of Finance; David Sykes Professor of Finance
- Glen E. Kreiner, Ph.D. (Arizona State) Assistant Professor of Management
- Mirko Kremer, Ph.D. (Mannheim) Assistant Professor of Supply Chain Management
- Akhil Kumar, Ph.D. (California, Berkeley) Professor of Information Systems
- Alok Kumar, Ph.D. (Wisconsin) Assistant Professor of Marketing
- Anthony Kwasnica, Ph.D. (Cal Tech) Associate Professor of Business Economics; Laboratory for Economic Management and Auctions
- John Ladbury, Ph.D. (Cambridge) Associate Professor of Marketing and Statistics
- Gary L. Lilien, D.E.S. (Columbia) Distinguished Research Professor of Management Science; Research Director, Institute for the Study of Business Markets
- Dennis K. J. Lin (Wisconsin) University Distinguished Professor of Statistics and Supply Chain Management
- Henock Louis, Ph.D. (Ohio State) Associate Professor of Accounting
- Michelle B. Lowry, Ph.D. (Michigan State) Associate Professor of Finance; Calenwood Faculty Fellow in Business
- James McKeown, Ph.D. (Michigan State) Mary Jean and Frank P. Smeal Chaired Professor Emeritus of Accounting
- Margaret Meloy, Ph.D. (Cornell) Associate Professor of Marketing
- James A. Miles, Ph.D. (Penn State) Professor of Finance; Joseph F. Bradley Fellow of Finance
- Vilmos F. Misar (Florida) Assistant Professor of Finance
- Karl Muller, Ph.D. (Illinois) Associate Professor of Accounting; Smeal Research Fellow in Accounting
- Chris J. Muscarella, Ph.D. (Purdue) Professor of Finance; L. W. ‘Roy’ and Mary Lois Clark Teaching Fellow
- Robert A. Novack, Ph.D. (Tennessee) Associate Professor of Supply Chain Management and Information Systems
- Ralph Oliva, Ph.D. (Rensselaer) Professor of Marketing; Executive Director, Institute for the Study of Business Markets
- Timothy Pollock, Ph.D. (Illinois) Associate Professor of Management
- Lisa L. Posey, Ph.D. (Penn State) Assistant Professor of Business Administration
- Arvind Rangaswamy, Ph.D. (Northwestern) Senior Associate Dean for Research and Faculty; Jonas H. Anchel Professor of Marketing
- Edward T. Reutzel, Ph.D. (Penn State) Associate Professor of Supply Chain Management
- Najib Samuel, Ph.D. (Penn State) Clinical Associate Professor of Accounting & STS
- Jeffrey M. Sharp, J.D. (Oklahoma) Associate Professor of Business Law
- Dennis P. Sheehan, Ph.D. (California) The Virginia and Louis Benzak Professor of Finance; Associate Dean of MBA Programs
- Jun Shu, Ph.D. (California, Berkeley) Assistant Professor of Supply Chain and Information Systems
- Timothy Simin, Ph.D. (Washington) Assistant Professor of Finance

The Pennsylvania State University
To introduce students early to the research process, each Ph.D. student must complete a written research paper with two years after admission to the Ph.D. program. The student must then present the paper at an open departmental workshop or seminar within the first year of admission. A member of the doctoral committee shall be designated to represent the research methods field and shall be responsible for evaluating the paper. The student must then present the paper at an open departmental workshop or seminar within the first year of admission. A member of the doctoral committee shall be designated to represent the research methods field and shall be responsible for evaluating the paper.

Supporting Field Requirements:

1. The Master of Business Administration program is a professional degree designed to prepare individuals for managerial positions in business, government, and nonprofit institutions. The M.B.A. curriculum blends technical rigor, managerial theory, and integrative learning experiences through case studies and other teaching methods. A managerial communications course is fully integrated into the program.
2. The Master of Science in Business Administration program is highly flexible and designed for advanced study in a specialized field. The M.S. program is directed toward the development of competency within a defined area of management. Fields such as accounting and management science are examples of career opportunities requiring specialized knowledge and skill, including research.
3. The Doctor of Philosophy degree in the Business Administration program offers advanced graduate education for students focused on research careers at leading business schools. The faculty of the college views the Ph.D. as evidencing scholarship at the highest level.

Admission Requirements

The M.B.A. program consists of two distinct portions: (1) preprogram competency expectations, including accounting, economics, mathematics, and statistics; and (2) 60 credits of graduate courses. Individuals who did not have adequate preparation in accounting, economics, mathematics, and statistics in their undergraduate programs are expected to develop the required minimum level of competency before graduate study can begin. The time required to complete this graduate program, based on full-time study, is twenty-one months. The student body is divided into diverse sections of approximately forty students, with each section proceeding through the same core classes each semester. Emphasis is placed on student interaction and shared learning both inside and outside the classroom.

The M.S. program consists of two distinct portions: (1) approximately 33 acceptable undergraduate foundation credits in business administration, economics, and mathematics; and (2) 30 graduate credits in business administration or related areas, including a paper or thesis. An applicant may be admitted without foundation courses, but they must be made up without degree credit. A professional paper and 3 additional credits of graduate-level coursework can be substituted for the thesis.

Doctoral Degree Requirements

Competency Expectations: Entrance into the doctoral program in business administration does not require the completion of an undergraduate degree specifically in business. While almost any major at the undergraduate level may be acceptable, graduate study in business administration does presume a minimum level of competency in mathematics, statistics, and computing. No transcript credit is required for entering doctoral candidates in these areas, except where specified by particular fields of specialization. However, it must be emphasized that lack of minimum competency in mathematics, statistics and computing could be a significant disadvantage to the candidate.

Breadth Requirement: All candidates are expected to develop a broad understanding of the functions of the business organization. To achieve breadth, all Ph.D. candidates must show competency by completing 12 credits of graduate course work in a minimum of two of the approved fields of study within the Smeal College of Business and in economics. The 12 credits in the breadth requirement must be taken in fields outside or separate from a candidate's primary, supporting, and research competency fields.

Primary Field Requirements: All candidates are required to achieve competency in a primary field of business administration. The primary field is the sphere of scholarship that commands the most extensive and intensive portion of a program and is the area in which the dissertation research and major professors are selected. Primary fields may be selected from the following: accounting, finance; management and organization; marketing; and supply chain and information systems.

Graduate work in a selected primary field may require competency in prerequisite areas, including undergraduate work in the field itself as well as prior work in mathematics, statistics, computer science, economics, and social and behavioral sciences. The prerequisite work will be specified by each primary field.

Supporting Field Requirements: All candidates must select a supporting field from business administration or related outside areas. Those spheres of scholarship that complement the candidate's primary field. Supporting fields from business administration include all the primary fields. Outside supporting fields are selected. Primary fields may be selected from the following: accounting, finance; management and organization; marketing; and supply chain and information systems.

Graduate work in a selected primary field may require competency in prerequisite areas, including undergraduate work in the field itself as well as prior work in mathematics, statistics, computer science, economics, and social and behavioral sciences. The prerequisite work will be specified by each primary field.

Research Methods Field: All candidates must develop a broad understanding of the scientific research process and in-depth competency in the research methods used in the primary field. Each candidate's doctoral committee shall specify a minimum of four graduate-level courses/12 credits (beyond the M.B.A. core courses) to constitute a supporting field in research methods. These courses should cover specific methods and tools relevant for research in the primary field. A member of the doctoral committee shall be designated to represent the research methods field and shall be responsible for evaluating the candidate's competence in the field.

Research Paper and Presentation Requirement: To introduce students to the research process, each Ph.D. student must complete a written research paper with two years after admission to the Ph.D. program. The student must then present the paper at an open departmental workshop or seminar within the first year of admission. The paper is approved by the department committee and chair. The student must work under the guidance of a Research Paper Supervisor.
(who may or may not later be the thesis adviser). The research paper supervisor mentors the student, possibly suggesting the research topic, monitoring progress, providing ideas and feedback, and helping the student develop appropriate research, writing, and presentation skills. The paper must substantially represent the student’s work, and must be written by the student. The paper must clearly define and motivate the problem being addressed, contain a comprehensive literature review, and present the research contributions and conclusions. Approval of written paper and presentation can be used as a means to satisfy the University’s English competence and communication requirement (to be completed before the comprehensive examination).

Other Degree Programs

QUALITY AND MANUFACTURING MANAGEMENT MASTER’S PROGRAM (QMM)
The QMM program is an integrated, one-year academic program requiring 30 credits and leading to a master’s degree in Manufacturing Management. The Penn State College of Engineering and Smeal College of Business have jointly developed this curriculum so as to integrate the viewpoints and fundamentals of the disciplines on engineering and business as applied to quality and manufacturing management. The objective of the QMM program is to develop graduates who are prepared to assume leadership positions in manufacturing and to contribute through functional integration to the firm’s competitiveness in global markets.

M.B.A./M.M.M. CONCURRENT DEGREE PROGRAM
This concurrent degree program, an intensive two-year program that combines the M.B.A. degree and M.M.M. degree, is available for students interested in both degrees. In order to complete the concurrent degree within the two-year period, the student must opt for the Supply Chain Management portfolio in the MBA program.

M.B.A./M.H.A. CONCURRENT DEGREE PROGRAM
The MBA program of Smeal College of Business and the Department of Health Policy and Administration of the College of Health and Human Development offer a concurrent degree program that will enable a student to finish in two academic years both a master’s degree in Business Administration (M.B.A.) and a master’s degree in Health Administration (M.H.A.). An M.B.A./M.H.A. graduate will be well-grounded in business management, health management, and the skills and expertise associated with functional areas of health services management. During the two academic years and intervening summer, the student will complete 63 credits of course work and a professional internship of 400 hours in a health care organization.

FIVE-YEAR SCIENCE B.S./M.B.A. PROGRAM
This program is the result of collaboration between the Eberly College of Science and Smeal College of Business. With the accelerated nature of the program, students can earn a B.S. degree in science and an M.B.A. degree in five calendar years after graduation from high school. For the first three and one-half years, including the first semester of the M.B.A. curriculum, students are enrolled as undergraduates in the Eberly College of Science. For the remaining three semesters, participants are graduate students formally enrolled in the Smeal College of Business M.B.A. program. Successful completion of this program results in a B.S. degree in Science awarded by the Eberly College of Science during year four and an M.B.A. from the Smeal College of Business at the end of year five.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the Graduate Bulletin, other awards are available to graduate students in Smeal College of Business.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

ACCOUNTING (ACCTG) course list
Dr. Dan Givoly, Chair; 814-865-0041

BUSINESS ADMINISTRATION (B A):
The following courses require matriculation into the MBA program at University Park campus and are considered part of the MBA core curriculum:

- 500. MARKETING MANAGEMENT (1-3)
- 501. MANAGEMENT (2)
- 502. TEAM PROCESSES AND PERFORMANCE (1-3)
- 504. ETHICAL LEADERSHIP (2)
- 505. NEGOTIATION THEORY AND SKILLS (1-3)
- 510. SUPPLY CHAIN AND OPERATIONS MANAGEMENT (1-3)
- 511. FINANCIAL ACCOUNTING (1-3)
- 512. RISK & DECISION (2)
- 515. BUSINESS STATISTICS FOR CONTEMPORARY DECISION MAKING (2)
- 517. LEADERSHIP COMMUNICATIONS (1-3)
- 521. INTRODUCTION TO MANAGERIAL ACCOUNTING (2)
- 523. INFORMATION TECHNOLOGY (2)
- 531. INTRODUCTION TO FINANCE (1-3)
- 532. GLOBAL BUSINESS ENVIRONMENT (1)
- 533. ECONOMICS FOR MANAGERS (2)
- 535. GLOBAL PERSPECTIVES (1)
- 536. INTERNATIONAL IMMERSION (2)
- 571. STRATEGIC MANAGEMENT (1-3)
- 575. CAPSTONE BUSINESS CASE (4)

Courses outside the MBA core:

- 528. BUSINESS SIMULATION (1-3)
- 545. BUSINESS, GOVERNMENT & INTERNATIONAL ECONOMICS (2)
- 565. STRATEGIC LEADERSHIP (1-3)
- 574. BUSINESS RESEARCH (1-3)
- 596. INDIVIDUAL STUDIES (1-9)
- 599. FOREIGN STUDY - BUSINESS ADMINISTRATION (1-12)

BUSINESS LAW (B LAW)
525. BUSINESS LAW FOR INNOVATION & COMPETITION (2)

BUSINESS LOGISTICS (B LOG) course list
Dr. John E. Tyworth, Chair; 814-865-1866

E-BUSINESS (EBIZ) course list

ENTREPRENEURSHIP (ENTR)
500. INNOVATION AND ENTREPRENEURSHIP (1-3)

FINANCE (FIN).

The Pennsylvania State University
The Pennsylvania State University

515. NITTANY LION FUND MANAGER (3)  
555. GLOBAL FINANCE (1-3)  
570. FINANCIAL MODELING (2)

CONCURRENT DEGREE OFFERING WITH THE PENN STATE DICKINSON SCHOOL OF LAW

Smeal College of Business, University Park campus

The Penn State Dickinson School of Law

Degrees Conferred:

J.D. (Dickinson) M.B.A. (The Smeal College)

Concurrent degree program. Smeal College of Business and the Penn State Dickinson School of Law offer a concurrent degree program leading to the degrees of Juris Doctor (J.D.) and Master of Business Administration (M.B.A.). We live in a global society where complex legal structures interact with dynamic and powerful market forces. Individuals with backgrounds in both business and law have a distinct advantage in understanding this interaction and are uniquely positioned for success in our modern society. The Juris Doctor/Master of Business Administration (J.D./M.B.A.) joint degree program provides outstanding, highly motivated students the opportunity to combine a Juris Doctor degree from the Penn State's Dickinson School of Law (DSL), one of America's oldest and most respected law schools, with an M.B.A. degree from Penn State's internationally ranked Smeal MBA Program (Smeal). Participants in this program earn both a Juris Doctor degree and a Master of Business Administration in four years compared to the five years required to earn the two degrees separately.

Admission to the program. In order to be admitted to the program, students may: (a) first be admitted and enrolled in either Smeal College or Dickinson and subsequently admitted to the other program; or (b) be admitted to the concurrent program prior to commencing studies at Penn State. Each program will make a separate admission decision. Students admitted to both programs will be admitted as concurrent degree candidates.

Admission Requirements

Candidates must apply to DSL and Smeal separately and must each school's requirements. Visit the following Web sites for additional information regarding each school's application.

For DSL:  
http://www.dsl.psu.edu/admissions/applyjd.cfm

For Smeal:  
http://www.smeal.psu.edu/mba/admission/apply

Dickinson. All applicants for the JD program must hold a bachelor's degree from a regionally accredited institution and are required to take the Law School Admissions Test (LSAT). Applicants must submit a JD application form; pay a $60 nonrefundable application fee if using electronic methods (a $70 nonrefundable application fee if using a downloaded application); submit a complete Law School Data Assembly Service (LSDAS) report; and provide two examples of written expression, an overview of your academic and professional experiences, and two letters of recommendation.

MBA program in Smeal College. All applicants for the MBA program must hold a bachelor's degree from a regionally accredited institution and are required to take the Graduate Management Admission Test (GMAT). They must also complete the online application (consisting of the application form, a professional resume, work history, and three essays); provide two copies of their prior academic transcripts; submit two letters of recommendation, and pay a $60 nonrefundable application fee.

Credit Requirements: The J.D. degree at DSL requires a minimum of 88 credits and the Smeal M.B.A. degree requires a minimum of 60 credits. For students enrolled in the JD/MBA Program, DSL accepts the transfer of twelve (12) Smeal credits which all come from Smeal's required core curriculum. Similarly, Smeal accepts the transfer of twelve (12) credits from the DSL required core curriculum with the possibility of four (4) additional credits eligible for transfer from DSL's elective courses. Twelve of these credits come from the DSL required core curriculum while the possible other four of these credits would come from DSL's elective courses. Accordingly, students must take a minimum of 76 credits from DSL and 44-48 credits from Smeal in order to complete the JD/MBA program.

Pursuant to University policy, the transfer credits may not be applied to their corresponding joint degree until a participant has completed at least one year of study in both DSL and Smeal.

Current DSL Students: Students currently enrolled at DSL in the JD program may apply to the JD/MBA program during their first or second year of study by applying for admission to Smeal.

Sequence. Students may choose to conduct their study in either of the two sequences shown below. Each "Year" refers to the traditional academic year beginning in late August and concluding in May. In addition, DSL offers a limited number of courses during the summer term. Smeal does not offer any classes over the summer term.

Option 1

Year 1: JD Foundation Course work at either the Carlisle or the University Park location

The Pennsylvania State University
CONCURRENT DEGREE OFFERING WITH THE PENN STATE HERSHEY COLLEGE OF MEDICINE

Hershey College of Medicine, Hershey campus
Smeal College of Business, University Park campus

Degrees Conferred: M.D. (Hershey) M.B.A. (The Smeal College)

Concurrent degree program. Smeal College of Business and the Penn State Hershey College of Medicine offer a concurrent degree program leading to the degrees of Medical Doctor (M.D.) and Master of Business Administration (M.B.A.). The objective of the program is to produce highly qualified clinicians who also understand the challenges of running a business. The Medical Doctor/Master of Business Administration (M.D./M.B.A.) joint degree program provides outstanding students the opportunity to combine a Medical Doctor degree from the College of Medicine, a highly respected medical college and medical center, with an M.B.A. degree from Penn State's internationally ranked Smeal MBA Program from Penn State's in this program earn both a Medical Doctor degree and a Master of Business Administration in five years compared to the six years required to earn the two degrees separately.

Admission to the program. In order to be admitted to the program, students must first be admitted and enrolled in the COM as a medical student and subsequently admitted to Smeal. Each program will make a separate admission decision. Students admitted to both programs will be admitted as concurrent degree candidates.

Admission Requirements
Candidates must apply to the College of Medicine and the Smeal College of Business separately and must meet each school's requirements. Visit the following websites for additional information regarding each school's application.

For COM: http://www.hmc.psu.edu/md/admissions/requirements.html
For Smeal: www.smeal.psu.edu/mba/admission/apply

College of Medicine: Specific Admission Requirements for the M.D. Degree Program

Biology: One year of college biology plus laboratory is required.
Chemistry: Two years of college chemistry (organic and inorganic) with laboratory is required.
Humanities: One-half year (or one semester) of humanities is required. Courses recommended are in disciplines such as philosophy, history, literature, language, anthropology, ethics, and theology.
Physics: One year of college physics with laboratory is required.
Mathematics: One year of college mathematics is required. Biomedical science emphasizes the quantitative approach. Students should have a background in calculus, basic statistical methods, and probability.
Behavioral Science: One semester of college study in the behavioral sciences is required. Courses recommended are in disciplines such as psychology, sociology, cultural anthropology, and ecology.
English: Although there is no formal course requirement for English, students are expected to have a strong background in writing, oral communication, and critical reading skills.

Applicants for admission to the College of Medicine are required to have completed three years of undergraduate study at an accredited college or university.
Applicants for admission to the College of Medicine must have completed a baccalaureate degree by the time of matriculation.

Applicants are strongly encouraged to complete required science courses before applying. All academic prerequisites must be completed before matriculation.

Completion of the Medical College Admissions Test (MCAT) is required for application to the College of Medicine. Applicants are encouraged to take the examination during the spring of the application year. The College of Medicine will not accept MCAT test scores earlier than three calendar years previous to the year of matriculation, nor those taken during the year of matriculation (January dates).

Smeal College of Business: Specific Admission Requirements for the MBA Program

For admission to the Graduate School, U. S. applicants must have received, from a magnetically accredited institution, a bachelor's degree with requirements substantially equivalent to those at Penn State. (Penn State is accredited by the Middle States Association of Colleges and Schools.) International applicants must have a tertiary (postsecondary) degree that is deemed comparable to a four-year U. S. bachelor's degree to apply for admission. This degree must be from an officially recognized degree-granting institution in the country in which it operates. All applicants are required to take the Graduate Management Admissions Test (GMAT). They must also complete the online application (consisting of the application form, a professional resume, work history, and three essays); provide two copies of their prior academic transcripts; submit two letters of recommendation, and pay a nonrefundable application fee. All international applicants whose first language is not English must take the TOEFL (Test of English as a Foreign Language) and submit the results of that test with the application for admission. International applicants are exempt from the TOEFL requirement who have received a baccalaureate or a graduate degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Credit Requirements: The MD degree at College of Medicine requires a minimum of two hundred twenty nine (229) credits and the Smeal College of Business MBA degree requires a minimum of sixty (60) credits. For students enrolled in the MD/MBA Program, the College of Medicine accepts the transfer of forty five (45) Smeal credits from Dickinson and requires the transfer of forty (40) of which come from Smeal's required core curriculum and four (4) of which come from Smeal electives. Similarly, Smeal accepts a transfer of at least twelve (12) credits from the College of Medicine, nine (9) of which come from the required core curriculum and three (3) from prescribed electives, with the possibility of three (3) additional credits eligible for transfer from the College of Medicine's elective courses. Accordingly,
students must take **minimum** of two hundred nine (209) credits from the College of Medicine and forty five (45) credits from the Smeal College of Business in order to complete the MD/MBA program.

Pursuant to University policy, the transfer credits may not be applied to their corresponding joint degree until a participant has completed at least one year of study in both the College of Medicine and the Smeal College of Business.

**Current College of Medicine Students:** Students currently enrolled at the College of Medicine in the MD program may apply to the MD/MBA program during their first three years at the College of Medicine by applying for admission to the Smeal College of Business.

**Sequence:** Students may choose to conduct their study in either of the two sequences shown below. Each “Year” refers to the traditional academic year beginning in late August and concluding in May. The College of Medicine students can expect to take courses during the summer. The Smeal College of Business does not offer any classes over the summer term.

**Years 1-3:** MD foundation and advanced coursework at the College of Medicine.

**Year 4:** MBA foundation coursework at the University Park location.

**Year 5:** Combination of MD and MBA coursework at the University Park location.

**Transfer of Credits MBA:** fifteen (15) credits from the College of Medicine course work may be transferred toward the MBA degree at Smeal. Courses for which such credit may be applied shall be subject to approval by Smeal based on relevance to the MBA program. Students must obtain a grade satisfactory to Smeal (High Pass or Low Pass) for any MD course work to be credited toward the MBA degree.

**Transfer of Credits MD:** A maximum of forty five (45) credits for MBA course work may be transferred for credit toward the MD degree at the COM. Courses for which such credit may be applied shall be subject to approval by the College of Medicine faculty. Students must obtain a grade satisfactory to the College of Medicine (a grade of “C” or higher) for any MBA course work to be credited toward the MD degree.

**Advising of Students:** All students in the program shall have two advisers, one from the Smeal College of Business and one from the College of Medicine.

**Graduation:** It is anticipated that students will complete a minimum of two hundred nine (209) credits from the College of Medicine and forty five (45) credits from the Smeal College of Business in order to obtain the concurrent MBA and MD degrees from those institutions. However, a student can graduate with one degree before the other as long as he/she has completed all of the requirements for that degree.

Erie, PA 16563

Degree Conferred:
M.B.A.

Associate Members of the Graduate Faculty

- Kerry A. Adzima, Ph.D. (West Virginia) Assistant Professor of Economics
- S. Saad Andaleeb, Ph.D. (Illinois) Professor of Marketing
- Pelin Bicer, Ph.D. (Texas Tech University) Assistant Professor of Marketing
- Brian L. Boscaljon, Ph.D. (Texas Tech) Associate Professor of Finance
- Charles A. Brown, Ph.D. (Kent State) Associate Professor of Accounting
- Michael E. Brown, Ph.D. (Penn State) Associate Professor of Management
- Ozgun Caliskan Demirag, Ph.D. (Georgia Institute of Technology) Assistant Professor of Management
- Michael Chuang, Ph.D. (University of Illinois at Urbana-Champaign) Assistant Professor of Management
- Ashutosh V. Deshmukh, Ph.D. (Memphis State) Professor of Accounting
- David T. Doran, Ph.D. (Pittsburgh) Associate Professor of Accounting
- James F. Fairbank, Ph.D. (Penn State) Associate Professor of Management
- Michael G. Filbeck, D.B.A. (Kentucky) Professor of Finance and Samuel Patton Black III Chair in Insurance and Risk Management
- John L. Fizel, Ph.D. (Michigan State) Professor of Economics
- Hunter Holzhauer, Ph.D. (Mississippi State University) Assistant Professor of Finance
- Eric C. Jackson, Ph.D. (Michigan State) Assistant Professor of Management
- William Johnson, Ph.D. (York University) Associate Professor of Management
- James A. Kurre, Ph.D. (Wayne State) Associate Professor of Economics
- Kevin P. Lutz, Ph.D. (Illinois) Associate Professor of Economics
- John M. Magenau, Ph.D. (SUNY, Buffalo) Associate Professor of Management
- James E. Manfield, Ph.D. (Memphis) Professor of Finance
- Jeffrey K. Pinto, Ph.D. (Pittsburgh) Professor of Management and Andrew Morrow and Elizabeth Lee Black Chair in Management Technology
- Mary Beth Pinto, Ph.D. (Pittsburgh) Professor of Marketing
- Matthew E. Swinarski, Ph.D. (SUNY, Buffalo) Assistant Professor of Management Information Systems
- Diane H. Parente, Ph.D. (SUNY, Buffalo) Professor of Management
- Margaret A. Thoms, Ph.D. (Ohio State) Professor of Management
- Phylis M. Mansfield, Ph.D. (Memphis) Professor of Marketing
- William R. Tietze, Ph.D. (Illinois Inst of Tech) Associate Professor of Management
- Alfred G. Warner, Ph.D. (Ohio State) Associate Professor of Management
- Jessica Xin Zhao, Ph.D. (SUNY, Buffalo) Assistant Professor of Finance

The Penn State Erie M.B.A. is a general degree emphasizing development of the planning and problem-solving skills crucial in middle and upper management. Course work emphasizes the integration of business functions and the practical application of theory in the business world, using cases, simulated problems and actual situations students are experiencing at work. Many students are fully employed professionals who bring a wealth of knowledge and experience to the classroom. Both full-time and part-time study are possible and the program can be completed by attending evening and daytime classes.

Admission Requirements

Admission is granted only to candidates who demonstrate high promise of success for graduate work. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Applicants are required to take the Graduate Management Admissions Test (GMAT) administered by the Educational Testing Service, Box 966, Princeton, NJ 08541; telephone (609) 771-7330.

Admission decisions are based on the following: undergraduate grade-point average; the degree of correspondence between the applicant's objectives and those of the program; three letters of reference, and GMAT score. Favorable consideration will be given to applicants who have significant work experience. An applicant's GMAT score plus undergraduate grade-point average (multiplied by 200) must total at least 1,050 to be considered for admission. A minimum GMAT score of 450 is required. However, admission is competitive and higher scores may be required, depending on the qualifications of the applicants. Entering graduate students who are non-native English speakers are required to take a TOEFL (Test of English as a Foreign Language) score of at least 550 on the paper-based test and at least 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the speaking portion; or the International English Language Testing System (IELTS) with a minimum composite score of 6.5 for admission. Admission is open during the fall and spring semesters, as well as during the summer session.

Applicants must demonstrate proficiency in writing by having earned a grade of B or higher in a college English composition or writing course or by achieving a score of four or higher on the GMAT Analytical Writing Assessment. Students who fail to meet at least one of these two criteria must complete a college English composition or writing course and earn a grade of B or higher or retake the GMAT test and score four or higher on the Analytical Writing Assessment. This requirement must be satisfied during either the first semester or summer session of the student's matriculation.

All students must be computer literate and have ready and reliable access to a computer and the Internet to successfully complete the MBA program. Students must know how to use word processing software, log-on to an Internet provider, and use e-mail. Additionally, MBS students must have a working knowledge of Microsoft Office programs including Word, Excel, PowerPoint, and Access.

Master's Degree Requirements

The Master of Business Administration degree program consists of three parts:

- Foundation Core Courses (15 credits): These courses introduce students to accounting, economics, finance, management, marketing, operations management, and the application of quantitative methods to the analysis of business problems. Completion of the foundation core, consisting of B ADM 500, B ADM 501, and B ADM 503, prepares students for the program's advanced required courses and electives. The foundation core is required of all applicants who have not completed an undergraduate degree in business or previous undergraduate or graduate course work relevant to the foundation core requirements.

Applicants who have, within seven years prior to the date of their admission to degree candidacy, completed a baccalaureate degree in business from a regionally accredited institution that includes course content equivalent to the foundation core courses may be exempted from part or all of this requirement as long as the previously completed courses carry grades of B or higher. An applicant who, within seven years prior to his or her admission to degree candidacy, completed a baccalaureate degree in a non-business field from a regionally accredited institution that includes equivalent undergraduate or graduate courses carrying a grade of B or higher also may be exempted from relevant portions of the foundation core courses. Applicants who have maintained currency of knowledge through relevant business experience and continuing professional education in one or more of the areas within the foundation core courses and who completed relevant course work more than seven years prior to admission to degree status may also be exempted from
relevant portions of foundation core requirements. Exemption from foundation core requirements is granted in accordance with the course exemption guidelines for the MBA program.

Advanced Required Courses (21 credits): These courses build on the knowledge base established in the foundation core and provide greater depth of knowledge in the subject areas included. This component of the MBA program consists of seven 3-credit courses that cover advanced topics in cost management, managing effective organizations, quantitative methods for business, leadership and ethics, corporate finance, marketing strategy, and strategic management and business policy.

All students are required to complete this requirement which includes B ADM 510, B ADM 512, B ADM 513, B ADM 514, B ADM 526, B ADM 532 and B ADM 554 unless they can demonstrate advanced knowledge of the course subject matter through prior course work, extensive experience and/or advanced professional education. Students who believe they have knowledge of an advanced required course must submit a written request and documentation describing their knowledge of the course subject matter. If approved, the student will substitute an additional elective course for the advanced required course.

Elective Courses (9 credits): All students are required to take 9 credits of elective courses covering advanced topics of their choice. Electives must include at least 3 credits of Management Information Science course work from the program approved list of courses. MBA students may apply a maximum of 6 credits of approved 400-level course work toward elective requirements. Course work at the 400 level must be approved by the director of the MBA program and cannot have been used for another degree.

Transfer Credits: Students may transfer a maximum of 9 credit hours from another regionally accredited graduate program or recognized degree-granting institution to fulfill elective or advanced required courses. Application of transfer credits to the student's academic program must be approved by the director of the MBA program and be in compliance with Graduate School requirements described in the GENERAL INFORMATION section of the Graduate Bulletin.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Foundation Core Courses:

BUSINESS ADMINISTRATION (B ADM)

- 501. Costs, Competition, and Market Performance (6)
- 502. Demand, Operations, and Firm Performance (6)
- 503. Integrated Business Analysis (3)

Advanced Required Courses:

BUSINESS ADMINISTRATION (B ADM)

- 510. Cost Management for Decision Making and Control (3)
- 512. Managing Effective Organizations (3)
- 513. Quantitative Methods for Business (3)
- 514. Strategic Planning and Business Policy (3)
- 526. Leadership and Ethics (3)
- 532. Corporate Finance (3)
- 554. Marketing Strategy (3)

Elective Courses:

BUSINESS ADMINISTRATION (B ADM)

- 511. Information Systems Management and Strategy (3)
- 520. Entrepreneurial Ventures (3)
- 521. Leadership Seminar (3)
- 522. Business Solutions (3)
- 523. International Business (3)
- 524. Operations Strategy (3)
- 525. Innovation and Change Management (3)
- 530. Investment Theory (3)
- 531. Business Forecasting (3)
- 532. Corporate Finance (3)
- 533. Derivatives (3)
- 550. Global Marketing (3)
- 551. Marketing Research (3)
- 552. Service Marketing (3)
- 553. Consumer Behavior (3)
- 552. Financial Statement Analysis (3)
- 553. Financial Electronic Commerce (3)
- 590. Colloquium (1-3)
- 595. Internship (1-18)
- 596. Independent Studies (1-9)
- 597. Special Topics (1-9)
- 598. Special Topics (1-9)
- 599. Foreign Studies (1-12)

ECONOMICS (ECON)

- 410. Economics of Labor Markets (3)
- 420. Money, Banking, and Economic Activity (3)
- 430. Regional Economic Analysis (3)
- 440. Industrial Organization (3)
- 450. Managerial Economics (3)
- 460. Business Forecasting Techniques (3)
- 462. Advanced Business Forecasting Techniques (3)
- 470. International Trade and Finance (3)
- 485. Econometric Techniques (3)
- 497. Special Topics (1-6)

FINANCE (FIN)

- 400. Problems in Financial Management (3)
- 410. Introduction to Investments (3)
- 430. Estate Planning (3)
- 450. Retirement Planning (3)
- 460. Investment Analysis (3)
- 470. International Financial Management (3)
- 480. Advanced Financial Analysis (3)
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Gayle J. Yaverbaum, Ph.D. (Temple) Professor Emerita of Information Systems
- Richard Young, Ph.D. (Penn State) Professor of Supply Chain Management
- Ugur Yucelt, Ph.D. (New School) Associate Professor of Marketing

The Program
Students served by the M.B.A. program are, primarily, nontraditional and reside in south-central Pennsylvania. With the exception of a small percentage of students who are full-time, they are employees of area businesses, state and local governments, and not-for-profit organizations, who study on a part-time basis. In order to accommodate both full- and part-time students, courses are offered primarily in the late afternoon and evening—with occasional offerings on weekends.

The program is intended not only to satisfy current individual needs for professional growth, but also to foster lifelong learning. As an outcome of the program, students may expect to gain participative strengths, problem solving and critical thinking skills, technical expertise, and desirable attitudes and values, particularly ethical values needed in the conduct of business.

To strengthen the educational experience, the Program places high priority on teaching and currency of curriculum, with an emphasis on oral and written communication, research, and cross-functional integration of concepts.

Admission Requirements
Applicants to the program must hold a baccalaureate degree in any field from a regionally accredited, college-level institution. Decisions are based primarily on undergraduate junior/senior grade-point average and the Graduate Management Admission Test (GMAT) scores. (Please visit www.mba.com/ for more information about the GMAT). Postbaccalaureate course work, professional experience, and the statements provided in the application are also taken into account.

Students are also required to submit:
- a completed online application form with application fee
- two copies of official transcripts from all colleges or universities attended
- GMAT test scores (the test must have been taken within the past five years)
- two letters of recommendation

For complete admission information, on-line application, and the latest updates on admission requirements and procedures, please consult the College Web page at www.hbg.psu.edu/

International Students
Applicants whose first language is not English or who have not received a baccalaureate degree from an institution in which the language of instruction is English, must take the Test of English as a Foreign Language (TOEFL), http://www.toefl.org/. The test must be passed with a score of 550 (paper based test) or 213 (computer based test) or higher.

All students with international credentials must submit transcripts to Educational Credential Evaluators, Inc. (ECE) for a "course by course" academic evaluation of transcripts and degree. An ECE application can be obtained on the Web at: www.ece.org.

Application Dates

The Pennsylvania State University
Analytic Skills Requirement: Prior to enrolling in their M.B.A. course work, students must demonstrate competence in analytic skills. This requirement can be satisfied in one of two ways: (1) by satisfactory completion of college-level courses in calculus and statistics such as QUANT 310, or MATH 110 plus STAT 200; or (2) by successful completion of proficiency examinations in calculus and statistics approved by the M.B.A. Program. This requirement must be satisfied by the first semester or summer session of the student’s matriculation, and completed with a grade of C or higher.

Credit by examination: Interested students should obtain a Credit by Examination form from Enrollment Services and consult with the MBA Program to obtain a list of suggested preparatory materials and schedule the exam.

Computer Skills Requirement: Students are required to demonstrate proficiency in the use of microcomputer applications. This requirement can be satisfied through a college-level microcomputer applications course within the past five years with a grade of B or higher, or by documented, significant, computer-related work experience. If this requirement has not been met prior to admission, a college-level microcomputer course such as MIS 103 or COMPSC 203 is required. Course work must be completed by the first semester or summer session of the student’s matriculation with a grade of B or higher.

Communications Skills Requirement: Successful completion of the M.B.A. Program requires the ability to think clearly, and to write and speak persuasively. Part of this requirement can be satisfied by achieving a score of “4” or higher on the Graduate Management Admission Test (GMAT) Analytical Writing Assessment. If this score is not achieved, students must satisfy this requirement through additional course work in writing skills such as ENGL 5013 or other work developed in consultation with the M.B.A. Program. This requirement must be satisfied by the first semester or summer session of the student’s matriculation. All courses taken must be completed with a grade of B or higher. The speech component of this requirement is satisfied through individual and group presentations in BUS 500 and other courses in the M.B.A. Program.

Pre-Program Courses:
The MBA Program is grounded in the academic disciplines of accounting, finance, economics, marketing, management, and information sciences, among others, in order to provide students with the conceptual foundation required for competent pursuit of more advanced studies in business administration as well as the ethical and illegal management of profit and non-profit organizations. This background can be provided by course work taken as part of a comprehensive and integrated, four-year degree program at an accredited, college-level institution, or through graduate course work. All courses must have been completed with a grade of B or higher, within seven years prior to admission to the M.B.A. Program. Course work not meeting the tests of relevancy, quality, or currency must be taken at the graduate level prior to starting the 30-credit M.B.A. Program. Time limits may be waived by the M.B.A. Program on the basis of post-graduation training or current and relevant work experience. Courses available at Penn State Harrisburg that provide the necessary foundation for graduate business study include: ACCT 501, BUS 500, BUS 505, BUSECS 502, BUS 505, MNGMT 511; Either MNGMT 522 or MNGMT 523; and MKRT 513.

Degree Requirements
The M.B.A. degree requires 30 credits of course work at the graduate level (500-level or higher). These credits are distributed over two clusters of courses:

Prescribed Courses:

- ACCT 540, BUS 515, BUS 588, BUS 589, FINAN 521, INFSY 543, MNGMT 514, MKTG 514.
- FIN 543 Foundations of E-Business (3)
- MKRT 586 Internet Marketing (3)
- Select 6 credits from INFSY 544(3); MKRT 587(3); or, in consultation with an advisor, from courses in such areas as supply chain management; research and development; promotion; inventory control; procurement; international finance; and international management to meet the objectives of the Track.

Human Resources Management: The objective of this Track is to examine and apply models and techniques from human resources management, labor relations, and behavioral science for the planning and organization of work and work systems to promote cooperation and collaboration, individual and group initiative, innovation, motivation, and flexibility. Also examined are techniques and mechanisms used to develop and maintain a work environment and work climate supportive of performance excellence, full participation, employees’ well-being and satisfaction, and personal and organizational learning and growth.

- MNGMT 505 Managing Human Resources (3)
- MNGMT 515 Labor Management Relations (3)
- MNGMT 545 Employment Law for Business (3)

Select 3 credits:
- Select 3 credits from MNGMT 520(3); MNGMT 570(3); or, in consultation with an advisor, from courses in such areas as human resources management; labor relations; behavioral science; and international management to meet the objectives of the Track.

Financial Analysis: The objective of this Track is to examine and apply models and techniques from finance and accounting for the planning, analysis, control, and improvement of competitive performance, organizational health, ethical business practices, performance capabilities, and progress toward key business results, strategic objectives, and changing organizational goals. Particular emphasis is placed on approaches for translating those analyses into priorities for improvement and opportunities for innovation at all levels, and in all parts of the organization.

- FINAN 531 Managing Financial Operations (3)
- ACCT 561 Financial Statement Analysis II (3)

Select 6 credits:
Select 6 graduate credits in Accounting and/or Finance, in consultation with an advisor, to meet the objectives of the Track.

General Business: The objective of this Track is to allow students to select graduate courses that meet their personal and professional goals.

Select 12 credits:

The Pennsylvania State University
Transfer Credit and Course Substitutions

Transfer Credits: Up to 10 transfer credits may be applied toward the degree. However, credits used to complete a previous degree may not be applied. Transfer credits must have been completed within the past five years, appear on a graduate transcript, and have been passed with a B grade or higher and been earned in an equivalent graduate-level program at an accredited, college-level institution. It must be the opinion of the reviewing faculty that these courses are equivalent in quality to those offered at Penn State Harrisburg.

Course substitutions: Some students enter the Program with advanced coursework in one or more subject areas (e.g., a degree in accounting plus a C.P.A.) making some prescribed coursework redundant. Except for BUS 588, which must be taken at Penn State Harrisburg, students may petition or be advised by the Program to replace up to six credits with prescribed courses with an equivalent number of credits of more advanced graduate courses in the same subject area. The advanced course(s) taken must have the replaced courses as an important foundation or prerequisite. Courses must have been completed within the past five years and have earned a grade of B or higher.

Grade-point Average and Time Limit

A 3.00 (out of 4.00) minimum grade-point average is required for the M.B.A. degree. All course work must be completed within six years, or seven consecutive summers of matriculation.

Financial aid

There are a limited number of scholarships, fellowships, and research grants available, as well as several graduate assistantships. For more information on these, contact the School of Business Administration.

Many students work full-time and take classes part-time. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition. To find other options available to you, contact the Financial Aid Office, 717-948-6307.

Graduate School Assistantships

Full-time graduate students who are interested in an assistantship should contact the graduate program coordinator. Students must be nominated for an assistantship by their program coordinator.

Students applying for an assistantship should submit scores from the Graduate Management Admissions test, or similar examinations by January 30.

Concurrent Degree Offering with the Penn State Dickinson School of Law

Penn State Harrisburg, the Capital College, School of Business Administration

The Penn State Dickinson School of Law

Degrees Conferred: J.D. (Dickinson)
M.B.A. (The Capital College)
M.S.I.S. (The Capital College)

Concurrent Degree Programs

The Dickinson School of Law and the School of Business Administration of Penn State Harrisburg offer cooperative programs leading to the degrees of Juris Doctor (J.D.) to be granted by the Dickinson School of Law, and either the Master of Business Administration (M.B.A.) or Master of Science in Information Systems (M.S.I.S.) to be granted by Penn State Harrisburg, The Capital College. These concurrent degree opportunities facilitate the completion of both a law degree, and a professional degree in business or information systems.

Admission Requirements

The concurrent programs require that the student first be admitted to The Dickinson School of Law. Subsequently, the student is recommended for and applies for admission to the Graduate School for the Penn State Harrisburg M.B.A. Program or M.S.I.S. Program.

The following are required for applicants:

The Dickinson School of Law: Completed Law School application; Law School Admission Test (LSAT) score; Law School Data Assembly Service (LSDAS) report; one page personal statement; employment record since high school; two letters of recommendation.

M.B.A. and M.S.I.S. Programs: Completed Graduate School application; Graduate Management Admission Test (GMAT); letter of recommendation from the Associate Dean of the Dickinson School of Law; evidence of proficiency in analytic skills through college-level calculus and statistics demonstrated either by completion of courses or successful completion of proficiency examinations approved by the M.B.A. Program; evidence of proficiency in microcomputer applications skills; proficiency in writing evidenced by a score of "4" or higher on the Analytical Writing Assessment portion of the GMAT; evidence of proficiency in the academic disciplines of accounting, finance, economics, marketing, management and information sciences equivalent to that provided by completion of an integrated four-year business program, or completion of additional course work at the graduate level. Each course must have been completed with a grade of B or higher within seven years prior to admission to the M.B.A. or M.S.I.S. program. The School of Business Administration will review the applicant's transcripts for acceptability of the courses.

No courses from the M.B.A. or M.S.I.S. program may count toward the J.D. program until the student is matriculated at The Dickinson School of Law. However, graduate-level courses taken in either the M.B.A. or M.S.I.S. program at Penn State Harrisburg, or at another graduate-level institution may be applied to the M.B.A. or M.S.I.S. in accordance with the transfer of the Graduate School.

Transfer of Credits

Nine credits of course work at The Dickinson School of Law may be transferred toward the M.B.A. or the M.S.I.S. degrees, subject to Program approval. Students must obtain a grade satisfactory to the M.B.A. and M.S.I.S. program in order for the credits to be transferable. Nine credits of M.B.A. or M.S.I.S. courses may be transferred for credit toward the J.D. degree at The Dickinson School of Law, subject to the approval of the School of Law.

Advising of Students

All students in the concurrent program have two advisors, on in the School of Business Administration and one from the faculty at The Dickinson School of Law. Because the concurrent program is designed to be taken in synchrony with the objective that both degrees will be earned simultaneously, students who do not demonstrate progress toward completion of both degrees may be denied continuation in the concurrent program. Such a decision will rest jointly with the faculties of the M.B.A. or M.S.I.S. program and the J.D. program.

Tuition

The Dickinson School of Law and Penn State Harrisburg will each charge their own tuition to students in the concurrent programs.

The Pennsylvania State University
Concurrent Degree Offering with the Milton S. Hershey Medical Center, The Department of Pharmacology

Penn State Harrisburg, The Capital College, School of Business Administration
The Milton S. Hershey Medical Center, the Department of Pharmacology

Degrees Conferred:
Ph.D. (Hershey)
M.B.A. (The Capital College)

Concurrent Degree Programs

The Milton S. Hershey Medical Center, Department of Pharmacology, and the School of Business Administration of Penn State Harrisburg, The Capital College offer cooperative programs leading to the degrees of doctor of philosophy (Ph.D.) to be granted by the Hershey Medical Center, and either the Master of Business Administration (M.B.A.) or Master of Science in Information Systems (M.S.I.S.) to be granted by the Capital College. These concurrent degree opportunities facilitate the completion of both a pharmacology doctorate and a professional degree in business administration or information systems. The programs are designed primarily for students interested in pursuing a career involving high-quality independent research and positions of management responsibility within the pharmacological community.

Admission Requirements:
The concurrent programs require that the student first be admitted to The Pharmacology Program. Subsequently, the student is recommended for and applies for admission to the Graduate School for the Penn State Harrisburg M.B.A. or M.S.I.S. program.

The following are required for applicants:

Pharmacology: Completed application; Graduate Record Examination (GRE) score; a bachelor's degree reflecting a reasonable background in zoology or biology, mathematics and chemistry; a minimum junior/senior grade point average of 3.00 and with appropriate course backgrounds; two letters of recommendation; a curriculum vitae; a description of career goals. Reading knowledge of one or two foreign languages is recommended.

M.B.A. and M.S.I.S. Programs: Completed Graduate School application; Graduate Management Admission test (GMAT) score; letter of recommendation from the department chair of the pharmacology department; evidence of proficiency in analytic skills through college-level calculus and statistics demonstrated either by completion of course or successful completion of a mathematics proficiency examination approved by the program; evidence of proficiency in microcomputer applications skills; proficiency in writing evidenced by a score of "4" or higher on the Writing Assessment portion of the GMAT; evidence of proficiency in the academic disciplines of accounting, finance, economics, marketing, management and information sciences equivalent to that provided by completion of an integrated four-year business program, or completion of additional course work at the graduate level. Each course must have been completed with a grade of B or higher within seven years prior to admission to the M.B.A. or M.S.I.S. program. The School of Business Administration will review the applicant's transcripts for acceptability of the courses.

No courses from the M.B.A. or M.S.I.S. program may count toward the Ph.D. until the student is admitted to the pharmacology program. However, graduate-level courses taken in the M.B.A. or M.S.I.S. program at Penn State Harrisburg, or at another graduate-level institution, may be applied to the M.B.A. or M.S.I.S. in accordance with the transfer policies of the Graduate School.

Transfer of Credits

Nine credits of course work in pharmacology may be transferred toward the M.B.A. or M.S.I.S., subject to Program approval. Students must obtain a grade satisfactory to the M.B.A. or M.S.I.S. Program in order for the credits to be transferable. Nine credits of M.B.A. or M.S.I.S. coursework may be transferred for credit toward the Ph.D. degree, subject to the approval of the Department of Pharmacology.

Advising of Students

All students in the concurrent program have two advisors, one in the School of Business Administration, and one from the faculty in the Department of Pharmacology. Because the concurrent program is designed to be taken in synchrony with the objective that both degrees will be earned simultaneously, students who do not demonstrate progress toward completion of both degrees may be denied continuation in the concurrent program. Such a decision will rest jointly with the faculties of the M.B.A. or M.S.I.S. and the Ph.D. programs.

The Course Matrix

For more information and the latest updates on the concurrent programs, call the Department of Pharmacology at 717-531-8285 or visit the Web sites at:

The Pennsylvania State University
The graduate program in Biobehavioral Health (BB H) is an interdisciplinary graduate program provided by the College of Health and Human Development and involving faculty from its departments. The focus of the program is on the interaction of biological, behavioral, sociocultural, and environmental variables in the etiology and prevention of health problems and in the promotion of healthy human development. The program is designed to cultivate competence in basic and applied research, in the evaluation of biobehavioral health intervention strategies, and in university teaching. Graduates are prepared for research, teaching, or policy roles in health care settings, private and public research laboratories, government agencies, and universities including medical schools.

Special resources available in the college that students may draw upon and potentially participate in for their research programs include a Health and Human Development Consultation Center, Nutrition Clinic, and Speech and Hearing Clinic; Centers for Gerontology, the Study of Child and Adolescent Development, Developmental and Health Genetics, Locomotion Studies, Worksite Health Enhancement, and Developmental and Health Research Methodology; special laboratories in Behavioral Endocrinology, Biomechanics, Human Performance, Motor Behavior, and Nutrition; and extensive computer resources. Additional resources, including elaborate mainframe and super computer capabilities, are available in other parts of the University.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from the Medical College Admission Test (MCAT), are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

College graduates with an undergraduate or master's degree, or a health professions degree emphasizing biological and/or behavioral sciences, or an interdisciplinary program combining aspects of these will be considered for admission. Applicants should have a minimum grade-point average of 3.00 (A=4.00), an above-average score on the GRE or MCAT, and three supporting recommendations. At the discretion of the graduate program, exceptions may be made to these requirements for students with special backgrounds, abilities, and interests. Admission will be offered to candidates who are the best qualified, in the judgment of the faculty, taking all factors in to account.

Entering students should have a basic background in biological sciences, the behavioral sciences, or a combination of the two. In addition, they should have a basic background in quantitative methods. They should have competence in English, as reflected in a Test of English as a Foreign Language (TOEFL) score of 600 or above. In exceptional cases, superior students who do not meet these requirements may be admitted provisionally, while correcting their deficiencies. This must occur during their first two semesters in the program.

Master's Degree Requirements

M.S. degree candidates must take five core courses in biobehavioral health and 12 additional credits in methods individually designed in consultation with and with the approval of their adviser and committee. All M.S. degree candidates must complete a master's thesis or a master's paper. Candidates selecting the thesis option must complete an additional 6 credits of master's thesis research (BB H 600) for a total of 33 credits. Candidates selecting the paper option must complete an additional 6 credits of individual studies (BB H 596) in lieu of the 6 thesis credits. The master's thesis will typically describe original research. The master's paper may describe original research, but may also involve a substantial review of the literature, or a substantial description of a new research-related procedure. The choice of thesis or paper options will be made by the student in consultation with the adviser. The student's advisory committee judges the quality and acceptability of the paper or thesis. Additionally, the thesis must be submitted to, and accepted by the Graduate School M.S. candidates' grade-point average of all course work through completion of M.S. degree requirements must be 3.0 or higher.

M.S. program course requirements: BB H core courses (15 credits: BB H 501, BB H 502, BB H 503, BB H 504, BB H 505); other methods courses (12 credits minimum: courses at the 400 or 500 level to be selected in consultation with the student's adviser); research credits (6 credits minimum or 6 thesis credits)

Doctoral Degree Requirements

Formal admission to the doctoral program depends on satisfactory completion of the candidacy examination. This exam is designed to assess the student's potential and academic preparation for doctoral study. The candidacy exam may be given after at least 18 credits have been earned in graduate courses beyond the baccalaureate and must be completed no later than the end of the third semester (summer sessions do not count).

Communication and Language Requirement. Doctoral students must demonstrate competency in spoken English as judged by the faculty and in technical writing as demonstrated in research papers and/or publications. In addition, they must demonstrate competence in one of the following areas: (1) a foreign language; (2) computer science; (3) college teaching; (4) logic or philosophy of science.

Other Requirements. All students must take five core courses in Biobehavioral Health and 12 additional credits in research methods individually designed in consultation with and with the approval of the student's adviser and committee to develop doctoral-level competence in biobehavioral health and one or more related specialized areas.

Dual-Titled Ph.D. in Biobehavioral Health

Degree Requirements

Biobehavioral Health Ph.D. students may pursue additional training in bioethics through the dual-title Ph.D. program in Bioethics. To qualify for the dual-title degree, students must satisfy the requirements of the Biobehavioral Health Ph.D. program. In addition, they must satisfy the requirements described below, as established by the Biobehavioral Health and Bioethics program committee. Within this framework, final course selection is determined by the student, their Biobehavioral Health program advisor and their Bioethics program advisor.
Additional coursework
The dual-title Ph.D. in Biobehavioral Health and Bioethics requires twelve credits of coursework beyond the requirements for the Ph.D. in Biobehavioral Health, as follows:

- Seven required credits (BIOET 501, BIOET 502, and BIOET 590), plus at least three additional BIOET credits at the 500-level.
- Two additional credits from a list of approved electives at the 400 or 500-level. The list of elective courses will be maintained by the Director of the Bioethics Graduate Program in consultation with the Bioethics Program Committee.

Candidacy. In order to be admitted to doctoral candidacy in the dual-title degree program, students must meet the Ph.D. candidacy requirements specified by Biobehavioral Health. During the candidacy process, the students will also be assessed for candidacy to the Bioethics program, and at least one member of the candidacy committee must come from the Bioethics program but not a member of the Biobehavioral Health faculty.

Comprehensive exam. The faculty member (or members) affiliated with the Bioethics Program will be responsible for administering a portion of the comprehensive exam that will require the student to demonstrate an understanding of various theoretical and methodological approaches to bioethics, and an ability to apply them to issues and problems (including, where appropriate, practical problems) in their primary field.

Dissertation and dissertation defense. A dissertation on a bioethics-related topic or with a substantial bioethics component is required of students in the dual-title Ph.D. program. The bioethics-related topic of the dissertation or the bioethics component will be approved by the student’s committee.

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

BIOBEHAVIORAL HEALTH (BB H) course list

Dual-Title Graduate Degree in Biogeochemistry

Program Home Page
JENNIFER L. MACALADY, Program Coordinator
210 Deike Building
814-865-6330
macalad@geosc.psu.edu

Degree Conferred:
Students electing this degree program through participating programs earn a degree with a dual title in the Ph.D., e.g., Ph.D. in (graduate program name) and Biogeochemistry.

The following graduate programs offer dual degrees in Biogeochemistry: Biochemistry, Microbiology, and Molecular Biology; Civil Engineering; Chemistry; Ecology; Environmental Engineering; Geosciences; Materials Science and Engineering; and Soil Science.

The Graduate Faculty
Michael A. Arthur, Ph.D. (Princeton) Professor of Geosciences
Elizabeth W. Boyer, Ph.D. (Virginia) Associate Professor of Water Resources
Susan L. Brantley, Ph.D. (Princeton) Professor of Geosciences
Jean E. Brenchley, Ph.D. (California, Davis) Professor of Microbiology and Biotechnology
Rachel A. Freeman, Ph.D. (Urbana-Champaign) Associate Professor of Civil and Environmental Engineering
Mary Ann Bruns, Ph.D. (Michigan State) Associate Professor of Agronomy/Soil Microbiology
William Burgos, Ph.D. (Virginia Tech) Professor of Environmental Engineering
Hunter J. Carro, Ph.D. (Michigan) Associate Professor of Aquatic Ecology
Brian A. Dempsey, Ph.D. (North Carolina) Professor of Environmental Engineering
David M. Eissenstat, Ph.D. (Utah State) Professor of Woody Plant Physiology
Matthew Fattal, Ph.D. (California, Berkeley) Assistant Professor of Geosciences
James G. Ferry, Ph.D. (Illinois) Illinois Professor of Biochemistry and Molecular Biology
Katherine H. Freeman, Ph.D. (Indiana) Professor of Geosciences
Michael Gooseff, Ph.D. (Colorado) Associate Professor of Civil Engineering
Peter Heaney, Ph.D. (Johns Hopkins) Professor of Mineral Sciences
Christopher House, Ph.D. (California) Assistant Professor of Geosciences
Jason Kay, Ph.D. (Colorado State) Assistant Provost for Biochemistry
Armen Kemanian, Ph.D. (Washington) Assistant Professor of Production Systems and Modeling
Roger Koida, Ph.D. (California, Berkeley) Professor of Horticultural Ecology
James D. Krueger, Ph.D. (Yale) Associate Professor of Geosciences
Lee Kump, Ph.D. (South Florida) Professor of Geosciences
Bruce E. Logan, Ph.D. (California, Berkeley) Kapp Professor of Environmental Engineering
Jennifer L. Macalady, Ph.D. (California, Davis) Assistant Professor of Geosciences
Carmen Emid Martinez, Ph.D. (Rutgers) Associate Professor of Environmental Soil Chemistry
Karl T. Mueller, Ph.D. (California, Berkeley) Professor of Chemistry
Kwadwo Osseo-Asare, Ph.D. (California, Berkeley) Distinguished Professor of Metallurgy, and Energy and Geo-environmental Engineering
John M. Regan, Ph.D. (Wisconsin) Associate Professor of Environmental Engineering
Erica A. H. Smithwick, Ph.D. (Oregon State) Assistant Professor of Geography
Ming Tien, Ph.D. (Michigan State) Professor of Biochemistry
Denice H. Wardrop, Ph.D. (Penn State) Associate Professor of Geography and Ecology

The Biogeochemistry Dual-Title Degree Program will be administered by the Department of Geosciences for the participating graduate programs. A program committee with representatives from each participating department maintains program definition, identifies courses appropriate to the program, and recommends policy and procedures for the program’s operation to the dean of the Graduate School and to the deans of the participating colleges. The dual-title degree program is offered through participating programs in the College of Earth and Mineral Sciences, College of Agricultural Sciences, College of Engineering, Eberly College of Science, and the Intercollege Graduate Degree Programs. The program enables students from several graduate programs to gain the perspectives, techniques, and methodologies of Biogeochemistry, while maintaining a close association with major program areas of study. For admission to the Biogeochemistry dual-title degree under this program, a student must apply to (1) the Graduate School and (2) one of the participating major graduate programs; and then subsequently to (3) the Biogeochemistry program committee. Students may only apply to the dual-title program once they have been accepted into a major program. Once a student has been accepted to a major program, application to the dual-title degree program can occur immediately or at a later time, such as upon matriculation. The application to the dual-title degree program, however, should be completed before the candidacy examination in the major program is scheduled.

Admission Requirements
Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Candidates must submit transcripts of their undergraduate and graduate coursework, a written personal statement indicating their interests in the interdisciplinary arena of Biogeochemistry and their career goals they hope to serve by attaining a Biogeochemistry dual-title, and a statement of support from their dissertation advisor, if assigned. A strong undergraduate preparation in the basic sciences is expected, with evidence of an interest in multiple disciplines.

Degree Requirements
To qualify for a dual-title degree, students must satisfy the requirements of the major graduate program in which they are enrolled, in addition to the minimum requirements of the Biogeochemistry program. Students are required to have two advisors from separate disciplines, one individual serving as a primary advisor in the major degree program, and the intercollegiate graduate degree program, and a secondary advisor in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. The major program advisor normally will also be a member of the Biogeochemistry faculty. The two faculty advisors can represent different academic programs, but this is not required; as faculty from a scientifically diverse department could represent very different areas of expertise.

To fulfill the course requirements for the dual-title degree in Biogeochemistry, students must complete a total of 15 graduate credits chosen in consultation with the advisor from an approved list of courses in the areas of biogeochemistry and microbiology, environmental chemistry, environmental engineering, geocchemistry, materials science and engineering, and soil science. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. In all cases, the result of a single candidacy exam for both entrance to the student’s major Ph.D. program and this dual-title program will be reported to the graduate school. When possible, the candidacy exam will involve a single examination that includes biogeochemistry. However, in some cases, such as with the Chemistry Department, existing candidacy procedures preclude use for the Biogeochemistry dual-title program. In these instances that require major program’s existing candidacy procedures to be augmented by a biogeochemistry examination, the structure and timing of this exam will be determined jointly by the dual-title and major program. The student’s doctoral committee should include faculty from the major program of study and also faculty with expertise within Biogeochemistry. The field of Biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of Biogeochemistry is required. A public oral presentation of the dissertation is required, which may be part of the final defense within the major degree program.

Financial Aid
The Pennsylvania State University
Graduate assistantships and other forms of student aid are described in the Student Aid section of the Graduate Bulletin. A limited number of Research Assistantships are also available through the Biogeochemistry Dual-Title Degree Program.

Degree Conferred:
- Master of Biotechnology
- Integrated B.S. in Biotechnology - Master of Biotechnology Program
- Integrated B.S. in Animal Sciences - Master of Biotechnology in Biotechnology

The Graduate Faculty
- Jean E. Brenchley, Ph.D. (California, Davis) Professor of Microbiology and Biotechnology
- John E. Carlson, Ph.D. (Illinois) Associate Professor of Molecular Genetics
- Barbara J. Christ, Ph.D. (British Columbia) Professor of Plant Pathology
- Darrell M. Fox, Ph.D. (Illinois) Professor of Entomology
- Wayne R. Curtis, Ph.D. (Purdue) Professor of Chemical Engineering and Biotechnology
- Ali Demirici, Ph.D. (Iowa) Assistant Professor of Agricultural and Biological Engineering
- Richard F. Devon (California, Berkeley) Associate Professor of Engineering Design and Graphics
- Min Ding, Ph.D. (Pennsylvania, Wharton School) Assistant Professor of Marketing
- Stephanie Doores, Ph.D. (Maryland) Associate Professor of Food Science
- J. Larry Duquette, Ph.D. (Dartmouth) Professor of Chemical Engineering
- Nina V. Fedoroff, Ph.D. (Rockefeller U) Willaman Professor of Life Sciences
- Henry C. Foley, Ph.D. (Penn State) Professor of Chemical Engineering
- Majid R. Foolad, Ph.D. (California, Davis) Professor of Plant Genetics
- Richard J. Frieske, Ph.D. (Wisconsin) Professor of Molecular Virology
- Frederick E. Gildow, Ph.D. (Cornell) Professor of Plant Pathology
- Simon G. Gilroy, Ph.D. (Edinburgh) Associate Professor of Biology
- Mark J. Guiltinan, Ph.D. (California, Irvine) Associate Professor of Plant Molecular Biology
- Roy H. Hammerstedt, Ph.D. (Minnesota) Professor Emeritus of Biochemistry
- Ross C. Hardison, Ph.D. (Iowa) Professor of Biochemistry
- Kelli Hoover, Ph.D. (California, Davis) Assistant Professor of Entomology
- Bhuwan M. Jayarao, Ph.D. (Hungary) Associate Professor of Veterinary Science
- Seogchan Kang, Ph.D. (Wisconsin) Associate Professor of Plant Pathology
- Lynn Kozlowski, Ph.D. (Columbia) Professor of Biobehavioral Health
- Gretchen A. Kulda, Ph.D. (California, Berkeley) Assistant Professor of Plant Pathology
- Hong Ma, Ph.D. (Mass Med Inst) Professor of Biology
- Wojciech Makalowski, Ph.D. (Poznan U, Poland) Associate Professor of Biology
- Bruce A. McPherson, Ph.D. (Illinois) Associate Professor of Entomology
- Webb Miller, Ph.D. (Washington) Professor of Computer Science and Engineering
- Christopher A. Mullin, Ph.D. (Cornell) Professor of Entomology
- Michael V. Pishko, Ph.D. (Texas) Associate Professor of Chemical Engineering
- B. Franklin Pugh, Ph.D. (Wisconsin) Associate Professor of Biochemistry and Molecular Biology
- C. Channa Reddy, Ph.D. (India) Distinguished Professor of Veterinary Science
- R. P. Schön, Ph.D. (Harvard) Professor of Biochemistry and Molecular Biology
- Cooduvalli Shashikant, Ph.D. (India) Associate Professor of Molecular and Developmental Biology
- David T. Wilson, Ph.D. (Western Ontario) Professor of Marketing; Alvin H. Clemens Professor of Entrepreneurial Studies
- Andrew L. Zydney, Ph.D. (MIT) Professor of Chemical Engineering

The Master of Biotechnology degree program is offered through a collaboration of the Life Sciences Consortium with the Department of Biochemistry and Molecular Biology and the Department of Chemical Engineering. It is a multidisciplinary program in which at least thirty-two regular faculty members from fourteen different academic departments in Penn State University as well as ad hoc mentors from the academic faculty and from industry. The Master of Biotechnology curriculum is designed to give students broad knowledge and training in the scientific and practical aspects of biotechnology. It involves innovative, hands-on, and multidisciplinary learning approaches to educate and train students in the science behind biotechnology, its business and legal aspects, and the ethical and social issues that it brings about. In addition, the courses and the activities required of all students in this program intend to develop team working and communication skills, which are very important in industry. Graduates of this program are expected to have the knowledge and training for diverse career options: as academic educators, as scientists in both academic and industry settings, as members of decision-making business and management teams in government and biotechnology industries, as bioentrepreneurs, and as members and leaders of governmental, public, and private organizations that deal with social, ethical and legal issues in biotechnology. Furthermore, because of their broad knowledge in biotechnology, graduates of this program are expected to fill a niche in industry where knowledge and ability to interface and communicate with various functional groups within the organization are required.

Admission Requirements

Applications will be considered in accordance with the requirements of the Graduate School as described in the GENERAL INFORMATION section of the Graduate Bulletin. The program is appropriate for students with a baccalaureate degree in biological sciences, chemistry, or engineering or other baccalaureate fields that include sufficient credits from relevant courses in the life sciences. Applicants must have a minimum junior/senior grade point average of 3.00 (on a 4.00 scale). Graduate Record Examinations (GRE) scores are required with a combined total of at least 1700 points for the verbal, quantitative, and analytical tests. Typically, students are admitted as part of a cohort to commence studies in the fall. The best-qualified applicants will be accepted up to the number of spaces available for new students.

Degree Requirements

A minimum of 30 graduate credits is required for completion of the program. 18 credits of which must be from courses in the 500 level. Students are required to take at least 16 credits from core courses described below. Additional credits are from industry internship and elective courses which are determined based on the interest and career track the student decides to pursue: agriculture, medical applications, or diversified. All Master of Biotechnology candidates are required to write a research paper based on a research project conducted in an academic research laboratory or in industry. A student whose research project is conducted in an academic laboratory will be required to do an internship in industry.

Core Courses

AGRICULTURAL AND BIOLOGICAL ENGINEERING (A B E)

The Pennsylvania State University
Electives

These courses are chosen from offerings in various academic departments based on students' interest or track and career objectives. These include IBIOS 595 (Industry Internship), which is required unless a student already opted to do IBIOS 594 (Research Project) in industry, and IBIOS 597C (Special Topics: Advanced Laboratory Techniques in the Life Sciences), another elective course that is virtually required of students who intend to pursue research and development careers in industry. This is a modular laboratory course dealing with specialized techniques currently used in life sciences research: mammalian cell culture and monoclonal antibody production, quantitative cell analysis by flow cytometry and digital microscopy, nucleic acid sequence analysis, high-throughput analysis of nucleic acids using microarrays, protein analysis by mass spectrometry, techniques in animal transgenics, and other specialized techniques a student may arrange to work on with a research laboratory on campus.

Integrated B.S. in Biotechnology - Master of Biotechnology in Biotechnology Program

The integrated B.S. in Biotechnology-Master of Biotechnology degree program is designed to enable qualified undergraduate students in the B.S. Biotechnology program to graduate in five years with the Master of Biotechnology degree. The requirements of the Master of Biotechnology degree are designed to prepare students for diverse career opportunities in the burgeoning biotechnology industry. The integrated B.S. Biotechnology-Master of Biotechnology program will enhance the preparation and qualifications of B.S. Biotechnology students seeking entry-level positions in biotechnology and related industries. At the same time, students develop a practical knowledge of the laboratory techniques that underlie current research in the life sciences that will serve as excellent preparation for those students in the Master of Biotechnology program who later decide to pursue further graduate degrees.

A maximum of 12 credits will be cross-counted towards the B.S. and Masters degrees, from the following courses:

- BMB 400(2-3)
- BIOTC 479(3)
- IBIOS 571(2)
- IBIOS 591(1)
- IBIOS 593(3)

B.S. Biotechnology Requirements:

Total credits required: 125

- GENERAL EDUCATION: 46 credits (15 of these are included in the REQUIREMENTS FOR THE MAJOR)
- REQUIREMENTS FOR THE MAJOR: 94-95 credits
  - Prescribed courses: 67 credits
  - Additional courses: 6-9 credits
  - Supporting courses and related areas: 18-21 credits

Master of Biotechnology Requirements:

Total credits required: 30 (18 of which must be from 500-level courses)

- Required courses: 16-19 credits
- Electives: 11-14 credits

Integrated B.S. in Animal Sciences - Master of Biotechnology in Biotechnology

The integrated B.S. in Animal Sciences Master of Biotechnology in Biotechnology degree program is designed to enable qualified undergraduate students in the B.S. Animal Sciences program to graduate in five years with the Master of Biotechnology degree. The requirements of the Master of Biotechnology degree are designed to prepare students for diverse career opportunities in the burgeoning biotechnology industry. The integrated B.S. in Animal Sciences Master of Biotechnology in Biotechnology program will enhance the preparation and qualifications of B.S. Animal Sciences students seeking entry-level positions in biotechnology and related industries. At the same time, students develop a practical knowledge of the laboratory techniques that underlie current research in the life sciences that will serve as excellent preparation for those students in the Master of Biotechnology program who later decide to pursue further graduate degrees.

A maximum of 12 credits will be cross-counted towards the B.S. and Masters degrees*.

Minimum total credits earned for Summer and 5th year
18 credits, at least 12 of which are 500-level credits

Admission Requirements

Students must have a GPA of 3.5 at the time of application to the integrated degree program when they have completed at least 75 credits of their B.S. curriculum. The GRE scores normally required in the Master of Biotechnology in Biotechnology program will be waived for applicants to the integrated B.S.-Master of Biotechnology degree.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
Ph.D., M.S.

The Graduate Faculty

- Mohammad Reza Abidian, Ph.D. (Michigan) Assistant Professor of Bioengineering, Materials Science and Engineering, and Chemical Engineering
- James H. Adair, Ph.D. (Florida) Professor of Materials Science and Engineering, and Bioengineering
- Reka Albert, Ph.D. (Notre Dame) Professor of Physics
- Harry R. Allcock, Ph.D. (Notre Dame) Professor of Chemistry
- James G. Brasseur, Ph.D. (Stanford) Professor of Mechanical Engineering and Bioengineering
- Justin Brown, Ph.D. (Virginia) Assistant Professor of Bioengineering
- Paul W. Breuer, Ph.D. (Purdue) Professor of Ceramic Science and Engineering
- Peter J. Butler, Ph.D. (CUNY) Associate Professor of Bioengineering
- Wenwu Cao, Ph.D. (Penn State) Professor of Mathematics and Materials Science
- Brian T. Cheng, Ph.D. (Penn State) Research Associate in Applied Science
- Wayne Curtis, Ph.D. (Purdue) Professor of Chemical Engineering and Biotechnology
- Henry Donahue, Ph.D. (California, Santa Barbara) Michael and Myrtle Baxter Professor of Orthopaedics and Rehabilitation, and Cellular and Molecular Physiology, and Bioengineering
- Cheng Dong, Ph.D. (Columbia) Distinguished Professor of Bioengineering, and Engineering Science and Mechanics
- Patrick Drew, Ph.D. (Brandeis) Assistant Professor of Engineering Science and Mechanics, and Neurosurgery
- Qiang Du, Ph.D. (Texas) Professor of Mathematics
- Arnold A. Fontaine, Ph.D. (Penn State) Senior Scientist in Applied Research Laboratory
- Mary J. Frecker, Ph.D. (Michigan) Professor of Mechanical Engineering and Bioengineering
- András Freivalds, Ph.D. (Michigan) Professor of Industrial Management Systems Engineering
- Bruce Gluckman, Ph.D. (Pennsylvania) Associate Professor of Engineering Science and Mechanics, Neurosurgery, and Bioengineering; Associate Director, Penn State Center for Neural Engineering
- Esther Gomez, Ph.D. (California, Berkeley) Assistant Professor of Chemical Engineering and Bioengineering
- William O. Hancock, Ph.D. (Washington, Seattle) Associate Professor of Bioengineering
- William E. Higgins, Ph.D. (Illinois, Urbana-Champaign) Professor of Electrical Engineering and Bioengineering
- Kane M. High, M.D. (Penn State) Associate Professor of Anesthesiology
- Jun (Tony) Huang, Ph.D. (UCLA) Associate Professor of Engineering Science and Mechanics
- Christine Keating, Ph.D. (Penn State) Associate Professor of Chemistry
- Michael H. Krane, Ph.D. (Penn State) Research Associate, Applied Research Laboratory
- Robert F. Kunz, Ph.D. (Penn State) Senior Research Associate, Applied Research Laboratory; Associate Professor of Aerospace Engineering
- Herbert H. Lipowsky, Ph.D. (California, San Diego) Professor of Bioengineering, and Engineering Science and Mechanics
- Sheereen Majdzarringhalamaraghy, Ph.D. (Michigan) Assistant Professor of Bioengineering
- Keeffe Manning, Ph.D. (Virginia Commonwealth) Associate Professor of Bioengineering
- Christopher Siedlecki, Ph.D. (Michigan) Professor of Chemical Engineering
- Richard S. Meyer, Ph.D. (Penn State) Research Associate in Applied Research
- Thomas Neuberger, Ph.D. (Wurzburg, Germany) Research Assistant, The Huck Institutes of the Life Sciences; Assistant Professor of Bioengineering
- James W. P. Ph.D. (Wisconsin) Professor of Exercise Science and Mechanics in Design and Manufacturing
- Gerson Rosenberg, Ph.D. (Penn State) Jane A. Fetter Professor of Surgery and Bioengineering
- Jeffrey L. Schiano, Ph.D. (Illinois) Associate Professor of Electrical Engineering
- Stephen Schiff, M.D., Ph.D. (Duke) Brush Chair Professor of Engineering; Professor of Neurosurgery, and Engineering Science and Mechanics; Director, Penn State Center for Neural Engineering
- Neil A. Sharkey, Ph.D. (California, Davis) Professor of Kinesiology, Orthopaedics, and Rehabilitation
- Christopher Siedlecki, Ph.D. (Case Western Reserve) Professor of Surgery and Bioengineering
- Margaret Slattery, Ph.D. (Penn State) Assistant Professor of Bioengineering
- Srinivas Tadigadapa, Ph.D. (Cambridge) Professor of Electrical Engineering and Bioengineering
- Akil Undar, Ph.D. (Texas, Austin) Associate Professor of Pediatrics, Surgery, and Bioengineering
- Erwin A. Vogler, Ph.D. (Indiana) Professor of Materials Science and Engineering, and Bioengineering
- Wolfgang Weier, Ph.D. (Penn State) Professor of Surgery and Bioengineering
- Qiang X. Yang, Ph.D. (Georgia Tech) Professor of Radiology and Bioengineering
- Sulin Zhang, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of Engineering Science and Mechanics, and Bioengineering
- Siyang Zheng, Ph.D. (Cali Tech) Assistant Professor of Bioengineering

This interdisciplinary program is designed to provide students with graduate level training in engineering and the life sciences by the application of engineering principles and techniques to the solution of problems in medicine and biology. Graduate instruction in bioengineering is under the direction of a program committee composed of graduate faculty representing several departments in the Colleges of Engineering, Health and Human Development, Science, and Medicine.

Opportunities for specialized research revolve around a delineation of the electrical, mechanical, and biophysical properties of biological materials at the cellular, tissue, and organ level. Specific applications include development of artificial organs, with an emphasis on the artificial heart and heart assist devices; cardiovascular hemodynamics, with an emphasis on the structure and function of the capillary network, and blood behavior in contact with the walls of blood vessels and artificial surfaces; cardiac and auditory electrophysiology, lung mechanics and pulmonary function; and non-invasive diagnostic techniques, with an emphasis on ultrasound and X-ray devices and medical imaging. Extensive computer facilities and specialized equipment are available to support a combination of studies that employ experimental observations and their analysis through mathematical modeling and computer simulations.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. However, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students with a degree in engineering, physics, or the life sciences will be eligible for admission. All students must have a strong background in physics and mathematics. This background should include 6 credits in chemistry, 9 credits in calculus-based physics, and mathematics through calculus and differential equations. Students who lack one or two courses may still be considered for admission but will have to make up any deficiency early in their graduate program. Students with a 3.0 junior/senior grade-point average and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces available. Exceptions to the minimum average may be made for students with special backgrounds, abilities, and interests.

Master’s Degree Requirements

The Pennsylvania State University
The particular course of study depends on the student's background and area of research specialization. Courses are selected from the life sciences, engineering, and bioengineering. Course requirements include BIOE 401, BIOE 402, and BIOE 403 plus two 500-level courses in bioengineering, 6 credits in the life sciences (including BIOL 472), and 6 credits in technically oriented courses outside bioengineering and the life sciences. In addition, students without a previous degree in engineering or physics are required to complete up to 24 additional credits in engineering. Most of this additional course work will be at the undergraduate level and typically includes statics and dynamics, electric circuits and fields, electronic devices, fluid mechanics, and linear systems. A thesis is required for the M.S. degree. Students must continue to register at appropriate times until the thesis is approved.

Doctoral Degree Requirements

Candidates for the Ph.D. degree generally are expected to complete PHSIO 571 (BIOL 571) and PHSIO 572 (BIOL 572) plus several additional courses in the life sciences, five courses in bioengineering, and five graduate-level courses in engineering, mathematics, and physics. Supporting courses are available at University Park and the Penn State Milton S. Hershey Medical Center in anatomy, biochemistry, biology, biophysics, chemistry, laboratory animal medicine, materials science, mathematics, physics, physiology, and the engineering departments.

The communication and foreign language requirement for the Ph.D. degree may be satisfied by demonstrating intermediate knowledge of an acceptable foreign language, or by taking an advanced technical writing course and presenting a formal proposal for thesis research to the doctoral committee.

Students must continue to register at appropriate times until the thesis is approved.

Biomolecular Transport Dynamics Option

The Biomolecular Transport Dynamics option requires the following courses in addition to the doctoral dissertation, candidacy, and comprehensive examinations:

- three Biotransport courses (9 credits)
- two Life Science courses (6)
- five Engineering or Life Science courses (15)
- IBIOS 590. COLLOQUIUM (twice) (2)
- IBIOS 591. ETHICS IN LIFE SCIENCES (1)
- IBIOS 595. INTERNSHIP (optional) (1)
- IBIOS 596. LABORATORY ROTATIONS (1)
- IBIOS 602. TEACHING EXPERIENCE (twice) (2)

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

bioethics@psu.edu

Degree Conferred
Students electing to pursue this program through participating departments will earn a degree with a dual-title at the Ph.D. level, i.e. Ph.D. in [major program name] and Bioethics. The following graduate programs offer dual degrees in bioethics: Ph.D. in Anthropology, Ph.D. in Biobehavioral Health, and Ph.D. in Communication Arts and Sciences.

Graduate Faculty
Sarah E. Ades, Ph.D. (MIT) Associate Professor of Biochemistry and Molecular Biology
Frank Ahern, Ph.D. (Hawaii) Senior Research Associate in Biobehavioral Health
Collins O. Aririhenbuwa, Ph.D. (Tennessee), Professor of Biobehavioral Health; Department Head, Biobehavioral Health
Jesse Ballenger, Ph.D. (Case Western Reserve ) Associate Professor of Science, Technology, and Society
Michael Bean, Ph.D. (Virginia) Paterno Family Professor in Literature
Victoria Brailthwaite, D.Phil. (Oxford) Professor of Fisheries and Biology
Anne Buchanan, Ph.D. (Texas) Senior Research Associate in Anthropology and Science, Technology, and Society
Greg Ezghilian, Ph.D. (Chicago) Director of the Science, Technology, and Society Program; Associate Professor of Modern History, and Science, Technology, and Society
Richard Friske, Ph.D. (Wisconsin) Professor of Molecular Virology; Interim Head, Department of Biochemistry and Molecular Biology
Michael Hecht, Ph.D. (Illinois) Distinguished Professor of Communication Arts and Sciences, and Crime, Law, and Justice
Marianne Hillemeier, Ph.D. (Michigan) Associate Professor of Health Policy and Administration, and Demography
John Horgan, Ph.D. (University College, Cork) Associate Professor of Science, Technology, and Society, Information Sciences Technology, and Psychology; Director, International Center for the Study of Terrorism
Judith Hupcey, Ed.D. (Columbia) Associate Professor of Nursing, School of Nursing; Associate Professor of Humanities, College of Medicine
Byron Jones, Ph.D. (Arizona) Professor of Biobehavioral Health
Susan Loeb, Ph.D. (Penn State) Assistant Professor of Nursing
Jonathan H. Marks, M.A., B.C.L. (Oxford), Associate Professor of Bioethics, Humanities, and Law
Stephan A. Matthews, Ph.D. (Cardiff), Associate Professor of Sociology, Anthropology and Demography
Jennifer Mench, Ph.D. (Emory) Professor of Philosophy, and Science, Technology, and Society
Michelle Miller-Day, Ph.D., (Arizona State) Associate Professor of Communication Arts and Sciences
Roxanne Parrott, Ph.D. (Arizona) Professor of Communication Arts and Sciences
Janice Petroad, Ph.D. (Penn State) Associate Professor of Nursing, School of Nursing; Associate Professor of Humanities, College of Medicine
Kathleen Postle, Ph.D. (Wisconsin) Professor of Biochemistry and Molecular Biology
Dennis Scanlon, Ph.D. (Michigan) Associate Professor of Health Policy and Administration
Steven J. Schiff, M.D., Ph.D. (Duke) Brush Chair Professor of Engineering
Chloe Silverman, Ph.D. (Pennsylvania) Assistant Professor of Science, Technology, and Society, and Women's Studies
Rachel Smith, Ph.D. (Michigan State) Associate Professor of Communication Arts and Sciences
Susan Squier, Ph.D. (Stanford) Brit Professor of Women's Studies, English, Science, Technology, and Society
Nancy Tuana, Ph.D. (California) DuPont/Class of 1949 Professor of Philosophy, Women's Studies, Science, Technology, and Society; Director, Rock Ethics Institute
Donald B. Thompson, Ph.D. (Illinois) Professor of Food Science
George Vogler, Ph.D. (Colorado at Boulder) Professor of Biobehavioral Health; Director, Center of Developmental and Health Genetics
Kenneth Weiss, Ph.D. (Michigan) Evan Pugh Professor of Biological Anthropology and Genetics

The bioethics dual-title program is housed in the College of the Liberal Arts with administrative support (e.g., staff support) provided by the Rock Ethics Institute, similar to, for example, the Huck Institutes of the Life Sciences' support of the IBiOS Intercollege Graduate Degree Program. The Bioethics Program Committee, which contains representatives from participating colleges and departments, maintains the program's definition and goals, identifies faculty and courses relevant to the program, and recommends policies and procedures for the program's operation.

Program Objectives of Dual-Title Degree in Bioethics
The dual-title graduate degree in bioethics will acknowledge and foster scholarly work across disciplines, increasing the intellectual rigor and breadth of graduate work through immersion in both bioethics and the primary discipline. The dual-title degree will also provide opportunities for students to learn how to synthesize knowledge and develop expertise within and across disciplinary boundaries.

In addition to the intellectual and academic advantages of interdisciplinarity, the dual-title degree program will strengthen the reputation of individual programs/departments through an innovative degree program, increase recruitment of top quality graduate students, and increase job opportunities for students after graduation.

Dual-title degree programs do not duplicate other degree programs at Penn State University.

Admission Requirements
Dual-title bioethics graduate students will first be admitted to their major programs in accordance with the requirements stipulated by the Graduate Council and the major program. They will then be admitted to graduate study in the Bioethics program by an admissions committee consisting of faculty affiliated with the Bioethics program. Applicants should have a junior/senior cumulative average of at least 3.0 (on a 4.0 scale) and an appropriate background in undergraduate coursework. Prospective dual-title students will write a statement of purpose that addresses the ways in which their research and professional goals reflect an interest in interdisciplinary bioethics research.

Degree Requirements
General requirements for the dual-title Ph.D. in [major program name] and Bioethics are listed below.

- 7 required credits (BIOET 501, BIOET 502, and BIOET 590). At least three additional BIOET credits at the 500 level.
- Eight additional credits from a list of approved electives at the 400 and 500 level, with at least two credits at the 500 level.
- Comprehensive examination in bioethics and the related field, with the format and content to be determined by agreement with the major department.
- Dissertation on a bioethics-related topic or that includes a substantial bioethics component.

Language Competency Requirements
The student will fulfill the language requirement specified by the major department through which the student is admitted to the dual-title degree program.
Candidacy Requirement
In order to be admitted to doctoral candidacy in the dual-title degree program, students must meet the Ph.D. candidacy requirements specified by the major program. During the candidacy process, the student will also be assessed for candidacy to the dual-title program, and at least one member of the candidacy committee must come from the dual-title program. Faculty members who hold appointments in both programs may serve in a combined role.

Committee Composition
In accordance with the Graduate Council's requirements, the doctoral committee shall contain at least four members. At least one of the committee members must be a faculty-member affiliated with the Bioethics Program. Where major programs are supportive of this, graduate students will be encouraged to have a second committee-member so qualified. Faculty members who hold appointments in both programs may serve in a combined role. If the committee chair does not serve in this combined role, the faculty member representing the bioethics program must be co-chair of the committee. The dual-title representative(s) will be expected to participate in constructing and grading comprehensive examination questions that cover the secondary area of study. The Outside Member will be appointed in accordance with the Graduate School's Graduate Student Committee Procedures. The Graduate Council's current policy is that the Outside Member cannot have more than a 25% budgetary connection with either the graduate major program or the dual-title degree program.

Comprehensive Exams
The faculty member (or members) affiliated with the Bioethics Program will be responsible for administering a portion of the comprehensive exam that will require the student to demonstrate an understanding of various theoretical and methodological approaches to bioethics, and an ability to apply them to issues and problems (including, where appropriate, practical problems) in their major field.

Dissertation
A dissertation on a bioethics-related topic or with a substantial bioethics component is required of students in the dual-title Ph.D. program. The bioethics-related topic of the dissertation or the bioethics component will be approved by the student's committee.

Student Aid
When available, graduate assistantships available to students in this program and other forms of student aid will be described in the STUDENT AID section of the Graduate Program.

Course Listing
Required Courses:
All students in the dual-title bioethics program are required to take the following three courses, which will provide a rigorous grounding in general theory, methods and the scholarly literature of bioethics:

BIOETHICS (BIOET)
501. PERSPECTIVES AND METHODS IN BIOETHICS (3)
502. PERSPECTIVES IN MACRO-BIOETHICS (3)
590. BIOETHICS COLLOQUIUM (1)

In addition, students will be required to take at least three additional BIOET credits at the 500-level. These course offerings will be enhanced over time, and will initially include:

BIOETHICS (BIOET)
503. ETHICS AND THE RESPONSIBLE CONDUCT OF BIOMEDICAL RESEARCH (3)
597. SPECIAL TOPICS IN BIOETHICS (1-3)

In addition, this rubric will be used to cross-list courses with a substantial bioethics-related component including courses in bioethics and medical humanities offered by the Department of Humanities in the College of Medicine at Hershey. (Approval for cross-listing will be obtained on a case-by-case basis.) It may also be used to create courses that run concurrently with a bioethics-related seminar series and/or lecture series run by the Rock Ethics Institute.

With the approval of the Director of the Bioethics Graduate Program, students may also fulfill the requirement for the three additional 500-level BIOET credits through one of four alternatives:

BIOET 594. RESEARCH TOPICS
BIOET 596. INDIVIDUAL STUDIES
BIOET 590. COLLOQUIUM (since the topics will vary from semester, students may take this course in subsequent semesters for additional credit OR An additional elective course determined to satisfy this requirement on the grounds that the syllabus indicates a sufficiently strong bioethics content.

Elective Courses
Students in the program will take the remaining credits by choosing from a wide variety of existing elective courses at the 400 and 500 levels from a list maintained by the Director of the Bioethics Graduate Program in consultation with the Bioethics Program Committee. Students also have the right to petition the Director of the Bioethics Graduate Program to request that additional courses be added to the list of electives. The elective courses chosen by the student must be approved by either the Director of the Bioethics Graduate Program or, with the agreement of the Director, by another member of the Bioethics Program Committee. These courses are currently offered by a variety of departments (including BB H, BMMB, CAS, FRNSC, H ADM, HLHED, H P A, IBIOS, NURS, NUTR, PHIL, PHS, S T S, and WMNST) and they encompass a variety of subject areas including clinical ethics, research ethics, public health and health policy, health law, environmental ethics and policy, global and comparative health, biotechnology, and medical humanities. A list of courses available as elective credits for graduate students in the bioethics program is included below.

In addition, students may pursue an internship or practicum, provided that this is approved in advance by the Director of the Bioethics Graduate Program:

BIOET 595. INTERNSHIP (1-3)

List of Elective Courses
The list of elective courses will be maintained by the Director of the Bioethics Graduate Program in consultation with the Bioethics Program Committee. The list currently includes the following courses:

ANTH/Biol 463 HUMAN GENETICS (3)
ANTH/Biol 460H HUMAN GENETICS (4)
ANTH 471H BIOLOGY. EVOLUTION AND SOCIETY (3)
BB H 501 BIOBEHAVIORAL SYSTEMS IN HEALTH AND DEVELOPMENT: THEORY AND PROCESSES (3)
BB H 504 BEHAVIORAL HEALTH INTERVENTION STRATEGIES (3)
BB H 551 WORLD HEALTH PROMOTION (3)
BMH 490 BIOETHICS AND MEDICAL HUMANITIES CAPSTONE (3)
BMMB 509 ETHICS IN BIOMEDICAL SCIENCE (1)
CAS 453 HEALTH COMMUNICATION THEORY AND RESEARCH (3)
CAS 557 HEALTH COMMUNICATION (3)
CAS 562 QUALITATIVE METHODS (3)
FRNSC 561 ETHICS IN FORENSIC SCIENCE (1)
Biology (BIOL)

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- Sarah M. Assmann, Ph.D. (Stanford) Waller Professor of Biology
- Michael Axtell, Ph.D. (California, Berkeley) Associate Professor of Biology
- Iliana B. Baums, Ph.D. (Miami) Assistant Professor of Biology
- Ottar N. Bjernstad, Ph.D. (Oslo) Professor of Entomology and Biology
- Victoria Brathwaite, D.Phil. (Oxford, UK) Professor of Fisheries and Biology
- Tomas Carlo, Ph.D. (Colorado, Boulder) Assistant Professor of Biology
- Isabella Mitalendorf, Ph.D. (Stirling, UK) Assistant Professor of Biology
- Douglas R. Cavener, Ph.D. (Georgia) Professor of Biology; Head of the Department
- Gong Chen, Ph.D. (Shanghai) Associate Professor of Biology
- Daniel J. Cosgrove, Ph.D. (Stanford) Professor and Holder of the Ebeling Chair in Biology
- Richard J. Czy, Ph.D. (California, Irvine) Professor of Biology
- Claude W. dePamphilis, Ph.D. (Georgia) Professor of Biology
- Nina V. Fedoroff, Ph.D. (Rockefeller) Evan Pugh Professor of the Life Sciences
- Charles R. Fisher, Ph.D. (California, Santa Barbara) Professor of Biology
- Michael Gannon, Ph.D. (Texas Tech) Associate Professor of Biology (Altoona)
- Shunug G. Gentry, Ph.D. (Edinburgh) Associate Professor of Biology
- Mark J. Guillot, Ph.D. (California, Irvine) Professor of Plant and Molecular Biology
- Kevin H. Han, Ph.D. (SUNY, Buffalo) Assistant Professor of Biology
- Lauraine Hawkins, Ph.D. (New Mexico) Assistant Professor of Biology (Mont Alto)
- S. Blair Hedges, Ph.D. (Maryland) Professor of Biology
- Rod M. Heisey, Ph.D. (California, Davis) Professor of Biology (Schuykill)
- Dale Holen, Ph.D. (Wisconsin, Milwaukee) Associate Professor of Biology (Worthington Scranton)
- Edward C. Holmes, Ph.D. (Cambridge, UK) Professor of Biology; Eberly College of Science Distinguished Senior Scholar
- Peter Hudson, Ph.D. (Oxford) Willaman Professor of Biology; Director, Hock Institutes of Life Sciences
- Timothy Jegla, Ph.D. (Washington U School of Medicine, St. Louis) Assistant Professor of Biology
- Zhi-Chun Lai, Ph.D. (Albert Einstein College of Medicine) Professor of Biology
- Tracy Langkilde, Ph.D. (Sydney) Assistant Professor of Biology
- Aimin Liu, Ph.D. (NYU Medical Center) Assistant Professor of Biology
- Bernhard Lüscher, Ph.D. (Zürich) Professor of Biology, and Biochemistry and Molecular Biology, and Psychiatry
- Hong Ma, Ph.D. (MIT) Professor of Biology
- Wojciech Makalowski, Ph.D. (Poznan) Associate Professor of Biology
- Kateryna Makova, Ph.D. (Texas Tech) Assistant Professor of Biology
- Yingwei Mao, Ph.D. (Michigan) Assistant Professor of Biology
- James H. Marden, Ph.D. (Vermont) Professor of Biology
- Paula C. McSteen, Ph.D. (East Anglia) Assistant Professor of Biology
- Robert A. Miller, Ph.D. (Binghamton) Professor of Biology (Worthington Scranton)
- Robert B. Mitchell, Ph.D. (Penn State) Professor of Biology
- Masato Nai, Ph.D. (Kyoto) Evan Pugh Professor; Director, Institute of Molecular and Evolutionary Genetics
- Richard W. Ordway, Ph.D. (Mass Medical Inst) Associate Professor of Biology
- Eric S. Post, Ph.D. (Alaska) Assistant Professor of Biology
- Marcel Salthe, Ph.D. (Stanford) Assistant Professor of Biology; Branco Weiss Fellow
- Richard W. Schaeffer, Ph.D. (Georgia) Associate Professor of Biology
- Katriona Shea, Ph.D. (London) Assistant Professor of Biology
- Sharon P. Shriver, Ph.D. (Case Western Reserve) Assistant Professor of Biology
- Andrew G. Stephenson, Ph.D. (Michigan) Professor of Biology
- Graham H. Thomas, Ph.D. (Edinburgh) Associate Professor of Biology, and Biochemistry and Molecular Biology
- Christopher F. Uhl, Ph.D. (Michigan State) Professor of Biology
- Nandini Vasudevan, Ph.D. (Indian Inst Science, Bangalore) Assistant Professor of Biology
- Alan Walker, Ph.D. (London) Evan Professor of Biology and Anthropology
- Kenneth V. Weiss, Ph.D. (Michigan) Evan Pugh Professor of Anthropology and Genetics
- Matthew Whim, Ph.D. (Cambridge) Assistant Professor of Biology
- James A. Winsor, Ph.D. (Michigan) Professor of Biology (Altoona)

The department directs graduate programs in a broad spectrum of research areas, including bioinformatics, cell biology, developmental biology, ecology, evolution, genetics, neuroscience, phylogenetics, and physiology. The department houses the Institute of Molecular Evolutionary Genetics. The Ph.D. in Biology may be taken with an option in Molecular Evolutionary Biology, Plant Biology, or one of the Integrative Biosciences options adopted by the department (Molecular Medicine, Cell and Developmental Biology, Chemical Biology, Ecological and Molecular Plant Physiology, or Neuroscience). The courses of study are planned individually by the student and an advisor.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Admission is restricted to students who have the baccalaureate degree in a biological science and who present a cumulative undergraduate average of at least 3.00 on a scale of 4.00. Each applicant must provide a personal statement of interests and objectives and letters from three persons verifying the applicant’s academic competence.

Master’s Degree Requirements

Students obtaining an M.S. degree in Biology must complete course work as described in the General Information section of this bulletin, with guidance from their academic adviser. A thesis is usually required and must be defended before a faculty committee. The research must represent an original contribution, and the time allotted to it is about one year.

Doctoral Degree Requirements
The only courses required across the department are Biology 592, Critical Evaluation of Biological Literature, and Biology 590, a colloquium covering the Biology Seminar Series. Course work specific to individual plans of study are decided upon by the student in consultation with their graduate adviser and Ph.D. committee. All doctoral degree students must pass a written and oral candidacy examination that is usually administered during their third semester of study. After a student has completed all of their course work and made substantial progress on the design and execution of their thesis research, a comprehensive examination is administered by their Ph.D. committee. The Ph.D. thesis must represent a significant original contribution suitable for publication, and will usually require between two and four years of laboratory or field research. When complete the thesis must be defended before the student’s graduate committee. The thesis defense is normally immediately preceded by a public presentation of the thesis research by the student.

The department awards Ph.D. degrees in Biology covering the full spectrum of subjects represented by our diverse faculty. If desired, a student may elect to pursue one of the following options as part of his/her program of study.

**Molecular Evolutionary Biology option:** (1) The student must meet the criteria for the M.S. or Ph.D. in Biology. (2) The student’s research adviser must be a member of the Biology program and/or a full member of the Institute of Molecular Evolutionary Genetics. Other committee members may be chosen as needed providing that a majority of the committee is associated with the IMEG. (3) In addition to the normal Biology program requirements, the student must take (for both an M.S. or Ph.D. in Biology) 3 credits of course work in BIOL 591; 9 credits from among the following courses (to be selected in consultation with the student’s committee): BIOL 405, BIOL 410, BIOL 422, BIOL 427, BIOL 428, BIOL 591, BIOL 504, BIOL 514, BIOL 524, BIOL 533, BIOL 542, BIOL 590. (4) Any other course work or training deemed appropriate by the student’s committee.

**Plant Biology option:** (1) The student must meet the criteria for the M.S. or Ph.D. in Biology. (2) The student’s research adviser must be a member of the Biology program. Other committee members may be chosen as needed to assure that a well-rounded graduate advisory committee is established. (3) In addition to the normal Biology program requirements, the student must take the required colloquia in the field of specialization and (for both an M.S. or Ph.D. in Biology) a minimum of 6 credits from among the following courses (to be selected in consultation with the student’s committee): BIOL 410, BIOL 414, BIOL 422, BIOL 427, BIOL 441, BIOL 446, BIOL 513, BIOL 514, BIOL 515, BIOL 516, BIOL 544, BIOL 591, BIOL 597, BMB 514, HORT 444. (4) Any other course work or training deemed appropriate by the student’s committee.

Integrative Biosciences options are available in Molecular Medicine, Cell and Developmental Biology, Ecological and Molecular Plant Physiology, Chemical Biology, and Neuroscience. Requirements for these options that are in addition to the basic criteria for a Ph.D. in Biology are described under Integrative Graduate Program in Biosciences in this bulletin.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Thomas A. Lloyd, Ph.D. (Harvard) Professor of Public Health Sciences, Obstetrics and Gynecology, Pharmacology, Nutrition, and Kinesiology
David T. MacGoey, Ph.D. (Michigan) Professor of Public Health Sciences and Statistics
Joshua Muscat, Ph.D. (NYU) Professor of Public Health Sciences
Ian M. Paul, M.D., M.Sc. (Penn State) Associate Professor of Pediatrics and Public Health Sciences
Rosalie M. Pascoal, M.P.H. (Florida International) Associate Professor of Public Health Sciences
Zhengmin Qian, M.D., Ph.D. (Rutgers) Assistant Professor of Public Health Sciences and Homeland Security
John P. Richie Jr., Ph.D. (Louisville) Professor of Public Health Sciences, Pharmacology
Christopher Hopf, Ph.D. (Penn State) Associate Professor of Public Health Sciences
Alexandra Slavkovic, Ph.D. (Carnegie Mellon) Associate Professor of Statistics and Public Health Sciences
Carol S. Weissman, Ph.D. (Johns Hopkins) Distinguished Professor of Public Health Sciences, Obstetrics and Gynecology, and Health Policy and Administration
Robin Taylor Wilson, Ph.D. (Iowa) Assistant Professor of Public Health Sciences
Chuntao Wu, Ph.D. (SUNY Albany) Assistant Professor of Public Health Sciences
Rongling Wu, Ph.D. (Washington) Professor of Public Health Sciences and Statistics
Jeff Yanosky, Sc.D. (Harvard) Assistant Professor of Public Health Sciences
Junjia (Jay) Zhu, Ph.D. (Penn State) Assistant Professor of Public Health Sciences

Biostatistics is the science that applies statistical theory and mathematical principals to research in medicine, biology, environmental science, public health, and related fields. Biostatisticians working in the area of public health develop and use mathematical and scientific methods to (1) determine risk factors for disease and injuries, and (2) identify health trends within communities. Biostatisticians working in the area of medicine develop and use mathematical and scientific methods to design and analyze (1) clinical trials to investigate new therapies for treating acute and chronic illness, (2) observational studies to understand disease onset and progression, (3) basic science studies to determine the mechanisms of disease, and (4) human genetics studies to investigate the inherited susceptibility to disease. Career opportunities are available in universities, academic medical centers, government, and private industry. The demand for individuals with graduate-level degrees in biostatistics is extremely high.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Applicants must complete prior to admission:

1. A two-semester graduate-level course in applied statistics from a recognized graduate program. The comparable courses offered by the Department of Statistics are Stat 511: Regression Analysis and Modelling (3) and Stat 512: Design and Analysis of Experiments (3).
2. A two-semester graduate-level course in mathematical statistics from a recognized graduate program. The comparable courses offered by the Department of Statistics are Stat 511: Regression Analysis and Modelling (3) and Stat 512: Design and Analysis of Experiments (3).
3. For admission to the Graduate School, all applicants must have received from a regionally accredited institution a baccalaureate degree earned under residence and credit conditions substantially equivalent to those required by Penn State. International applicants must hold the equivalent of an American four-year baccalaureate degree.

4. Results from one of the following standardized tests taken within the past five (5) years:
   - Graduate Record Examination (GRE)
   - Graduate Management Admission Test (GMAT)
   - Medical College Admission Test (MCAT)
   - Law School Admission Test (LSAT)
   - (This requirement is waived for applicants who have an advanced degree in a related field beyond the baccalaureate.)

5. Results from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) for applicants whose first language is not English.
   - The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test.
   - The minimum composite score for the IELTS is 6.5.

6. Completion of the Graduate School application, which includes three (3) letters of recommendation and a Curriculum Vitae or resume.

7. Payment of the application fee.

Doctoral Degree Requirements
Each student in the Biostatistics Ph.D. program is expected to acquire knowledge in the disciplines of Biostatistics.

Each student must complete a total of 31 credits of graduate level course work, the majority of which are 500 level courses, specifically:

- 22 credits in required courses
- 6 additional credits in Epidemiology or Health Services Research
- 3 credits in elective courses, plus
- Dissertation

After the completion of the first year of coursework, each candidate is required to take a candidacy examination, based on the coursework in PHS 523, PHS 524, PHS 525, PHS 526 and PHS 527. The decision to admit or not to admit a student to candidacy will be made by a committee of graduate faculty in the Biostatistics program. In addition, a comprehensive examination is administered at the completion of all coursework, followed by the final oral examination in defense of the PhD dissertation.

Courses

**Prescribed Courses:** 22 credits
PHS 500(1), PHS 523(3), PHS 524(3), PHS 526(3), PHS 527(3), PHS 528(3), PHS 580(3), STAT 553(3)

**Additional Courses:** 6 credits
PHS 535(3), PHS 536(3), PHS 550(3), PHS 551(3), PHS 552(3), PHS 570(3)

**Elective Courses:** 3 credits
Select from PHS 516(3), STAT 561(3), STAT 562(3)

**Common Courses:** Varies
PHS 594(1-9), PHS 596(1-9), PHS 597(1-9), PHS 600(3-6)

Review Date: 01/10/2012

The Pennsylvania State University
Biochemistry, Microbiology, and Molecular Biology (BMMB)

The Graduate Faculty

- Sarah E. Ades, Ph.D. (MIT) Associate Professor of Biochemistry and Molecular Biology
- Paul Babitzke, Ph.D. (Georgetown) Professor of Biochemistry and Molecular Biology
- Lu Bai, Ph.D. (Cornell) Assistant Professor of Biochemistry and Molecular Biology, and Physics
- J. Martin Bollinger, Ph.D. (MIT) Professor of Biochemistry and Molecular Biology; Professor of Chemistry
- Squire Booker, Ph.D. (MIT) Associate Professor of Biochemistry and Molecular Biology; Professor of Chemistry
- Jean E. Brenchley, Ph.D. (California, Davis) Professor of Microbiology and Biotechnology
- Donald A. Colman, Ph.D. (Yale) Professor of Biochemistry and Molecular Biology
- Craig E. Cameron, Ph.D. (Case Western) Paul Berg Professor of Biochemistry and Molecular Biology
- Franklin L. Dorman, Ph.D. (Vermont) Associate Professor of Biochemistry and Molecular Biology
- James G. Ferry, Ph.D. (Illinois) Stanley Person Professor of Molecular Biology; Director, Center for Microbial Structural Biology
- Richard J. Frieque, Ph.D. (Wisconsin) Professor of Molecular Virology
- David S. Gilmour, Ph.D. (Cornell) Professor of Molecular and Cellular Biology
- John H. Golbeck, Ph.D. and Biophysics; Professor of Chemistry
- Ying Gu, Ph.D. (California, Riverside) Assistant Professor of Biochemistry and Molecular Biology
- Wendy Hanna-Rose, Ph.D. (Harvard) Associate Professor of Biochemistry and Molecular Biology
- Ross C. Hardison, Ph.D. (Iowa) T. Ming Chu Professor of Biochemistry and Molecular Biology
- Eric T. Harvill, Ph.D. (California, Los Angeles) Associate Professor of Microbiology and Infectious Disease
- Tienhu Kao, Ph.D. (Yale) Professor of Biochemistry and Molecular Biology
- Kenneth C. Keeler, Ph.D. (MIT) Associate Professor of Biochemistry and Molecular Biology
- Andrey Krasiilnikov, Ph.D. (Russian Academy of Science) Associate Professor of Biochemistry and Molecular Biology
- Maria Krasilnikov, Ph.D. (Moscow Inst of Physics and Tech) Research Assistant Professor, Biochemistry and Molecular Biology
- Carsten Krebs, Ph.D. (MPI for Radiation Biology, Germany) Associate Professor of Biochemistry and Molecular Biology; Associate Professor of Chemistry
- Zhi-Chun Lai, Ph.D. (Albert Einstein College of Medicine) Professor of Biology; Professor of Biochemistry and Molecular Biology
- Arthur Lemon, Ph.D. (Princeton) Professor of Biochemistry and Molecular Biology
- Bernhard Luscher, Ph.D. (Zürich) Associate Professor of Biochemistry and Molecular Biology
- Andrea M. Mastro, Ph.D. (Penn State) Professor of Microbiology and Cell Biology
- Katubiko Murakami, Ph.D. (National Inst of Genetics, Japan) Associate Professor of Biochemistry and Molecular Biology
- Anton Nekrutenko, Ph.D. (Texas Tech) Associate Professor of Biochemistry and Molecular Biology
- B. Tracy Nixon, Ph.D. (MIT) Professor of Biochemistry and Molecular Biology
- Robert A. Pollack, Ph.D. (California, San Francisco) Associate Professor of Veterinary and Biomedical Sciences
- Gary H. Perdue, Ph.D. (Oregon State) John T. and Paige S. Smith Professor in Agricultural Sciences
- Jeffrey M. Peters, Ph.D. (California, Davis) Distinguished Professor of Molecular Toxicology and Carcinogenesis
- Ronald D. Porter, Ph.D. (M.I.T) Associate Professor of Microbiology and Molecular Genetics
- Kathleen Postle, Ph.D. (Wisconsin, Madison) Professor of Biochemistry and Molecular Biology
- B. Franklin Pugh, Ph.D. (Wisconsin) Willaman Professor of Molecular Biology; Professor of Biochemistry and Molecular Biology
- Joseph A. Sears, Ph.D. (UCCLA) Ernest C. Pollard Professor in Biochemistry and Molecular Biology
- Marylyn D. Ritchie, Ph.D. (Vanderbilt) Associate Professor of Biochemistry and Molecular Biology; Director, Center for Systems Genomics
- Melissa Rolls, Ph.D. (Harvard) Assistant Professor of Biochemistry and Molecular Biology
- Lorraine Sanya, Ph.D. (Harvard) Assistant Professor of Biochemistry and Molecular Biology
- Mark T. McElyea, Ph.D. (Washington U School of Medicine) Professor of Biochemistry and Molecular Biology
- Scott Selleck, Ph.D. (University of Cambridge) Professor of Biochemistry and Molecular Biology
- Carmen Tarn, Ph.D. (University of Cambridge) Professor of Biochemistry and Molecular Biology
- Graham H. Thomas, Ph.D. (Edinburgh, Scotland) Associate Professor of Biochemistry; Associate Professor of Biochemistry and Molecular Biology
- Ming Tien, Ph.D. (Michigan State) Professor of Biochemistry
- Osvald P. Diavchenko, Ph.D. (Cornell) Professor of Microbiology and Molecular Biology
- Yanning Wang, Ph.D. (Iowa State) Associate Professor of Biochemistry and Molecular Biology

The major goal of the program in Biochemistry, Microbiology, and Molecular Biology is to train students for independent research and teaching in the principal areas of those scientific disciplines. Students may enter the program from a variety of backgrounds such as biochemistry, biology, biophysics, cell biology, chemistry, genetics, microbiology, molecular biology, physics, and other related disciplines. The student's research may begin during the first year. Research areas of faculty include bacterial growth regulation and differentiation, biophysics and biochemistry and molecular biology of photosynthesis, calcium metabolism in skeletal tissues, cell cycle regulation, chromosome organization and structure, control of gene expression, DNA-binding proteins, electron paramagnetic resonance spectroscopy, enzyme kinetics and mechanisms of DNA-acting enzymes, functional genomics, membrane structure and function, metallobiochemistry of iron-sulfur proteins, mobile genetic elements, molecular biology of development, molecular biology of xenobiotic metabolism, prokaryotic sensory transduction, regulation of amino acid metabolism, RNA-binding proteins, RNA structure, self-incompatibility in plants, spermatogenesis and spermatozoan maturation, structure and function of enzymes, virology, and X-ray crystallography.

Admission Requirements

Scores on the Graduate Record Examination (GRE) Aptitude Test (verbal, quantitative, and analytical) are normally required for admission. Only under exceptional circumstances will an applicant be considered without those scores. It is also recommended that applicants take the Subject Test in Biochemistry, Cell and Molecular Biology, or Chemistry or Biology. Entering students should have taken courses in biology, organic chemistry, alcohol, general physics, genetics, microbiology, and preferably physical chemistry. Any deficiencies may be made up concurrently with graduate studies. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION of the Graduate Bulletin.

Admission to the program is based on prior course records and grades, GRE scores, letters of recommendation and interviews. Virtually all students are admitted with the intent of obtaining a Ph.D. degree although a master's degree is obtained in some cases on the way to the Ph.D., or as a final degree.

Master's Degree Requirements

Students must meet the M.S. degree requirements specified by the Graduate School in the Graduate Bulletin. In addition, a research thesis must be submitted and defended before a committee of the faculty. In general, the master's program is expected to take about two years beyond a bachelor's degree.

Doctoral Degree Requirements

Admission to Ph.D. candidacy is decided on the basis of the student's performance in courses, research and teaching. In addition, an oral candidacy examination is taken during the fall semester of the second year. This examination tests the student's ability to utilize what s/he has learned in solving problems encountered in research.
problems based on the scientific method. A comprehensive oral examination is taken before the student's Ph.D. thesis committee within approximately three semesters after the student has been admitted to candidacy. The student is expected to present a written proposal concerning his or her research problem in terms of the relevant current literature, the data that has been gathered and the future directions of the experimentation. Questioning may involve, but is not limited to, that research proposal.

The faculty requires that each student demonstrate the ability to collect, organize and present the results of their research in a professional manner before graduation. This is accomplished by preparing a manuscript based on the Ph.D. thesis research. The manuscript must be written primarily by the student and submitted for publication in a refereed journal. The final Ph.D. thesis defense is taken before the student’s thesis committee at the end of the program. The student must also present a public seminar on the thesis research within the two-week period preceding the thesis defense. Generally the Ph.D. degree takes about five years beyond a bachelor's degree.

Biogeochemistry Dual-Title Degree Program
Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Students in the Biogeochemistry Dual Title program are required to have two advisers from separate disciplines: one individual serving as a primary adviser in their major degree program and a secondary adviser in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework from an approved list of courses is required. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. A single candidacy examination that includes biogeochemistry will be administered for admission into the student's Ph.D. program, as well as the biogeochemistry dual-title. The structure and timing of this exam will be determined jointly by the dual-title and major program. The student’s doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Other Relevant Information
The director of graduate studies is in charge of advising students about academic and related matters until they have chosen a thesis adviser. Beginning students carry out a series of rotation projects in at least three different faculty laboratories before deciding on a research area. Students generally decide on their thesis research adviser at the end of their first fall semester. Each student must take a total of 18 credits in 400- and 500-level courses, required and elective, from a list approved by the program faculty.

Further course work and research are individually planned by the student and the research adviser in consultation with the Ph.D. thesis committee. The thesis committee is established according to the rules of the Graduate School once Ph.D. candidacy has been attained.

All students are required to participate as teaching assistants in undergraduate laboratory courses as part of their training. Students are required to register for BMMB 602 (Supervised Experience in College Teaching) for two semesters.

Student Aid
Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin. Under normal circumstances, all students admitted and continuing in good standing are provided with graduate assistantship support from University sources and research grants.

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Grigoryev, Ph.D. (Lomonosov, Moscow) Professor of Biochemistry and Molecular Biology Patricia S. Grignon, Ph.D. (Rutgers) Associate Professor of Neural and Behavioral Sciences Edward J. Gunther, Ph.D. (Yale) Assistant Professor of Medicine Andras Hajnal, M.D., Ph.D. (Pecs U Medical School, Hungary) Assistant Professor of Neural and Behavioral Sciences Philippe A. Haozsi, M.D., Ph.D. (Univ of Hong Kong) Professor of Medicine, Chairman, Penn State Heart and Vascular Institute Christopher R. Herzog, Ph.D. (Medical College of Ohio) Assistant Professor of Pharmacology and Pathology Gregory M. Holmes, Ph.D. (Connecticut) Associate Professor of Anatomy Jianming Hu, M.D., Ph.D. (Wuhan, China; Penn State) Associate Professor of Microbiology and Immunology Rosalyn B. Ibry, Ph.D. (South Florida) Assistant Professor of Medicine Faoud T. Ishmael, M.D., Ph.D. (Penn State) Assistant Professor of Medicine, and Biochemistry and Molecular Biology Harriet G. Isom, Ph.D. (Illinois) Distinguished Professor of Microbiology, and Immunology and Pathology Leonard S. Jefferson, Jr., Ph.D. (Vanderbilt) Evan Pugh Professor and Chair, Cellular and Molecular Physiology Byron C. Jones, Ph.D. (Arizona) Associate Professor of Biobehavioral Health and Pharmacology Sreenivas Kanugula, Ph.D. (Hyderabad, India) Assistant Professor of Cellular and Molecular Physiology Kelly Karp, Ph.D. (Penn State) Associate Professor of Pharmacology Michael Katzman, M.D. (Columbia) Professor of Medicine, and Microbiology and Immunology Marc P. Kellman, Ph.D. (Miami) Professor of Medicine Gordon L. Kaufman, M.D. (Michigan) Professor of Surgery, and Cellular and Molecular Physiology Ralph L. Keil, Ph.D. (Cornell) Associate Professor of Biochemistry and Molecular Biology Mark Kester, Ph.D. (SUNY, Buffalo) G. Thomas Passananti Professor of Pharmacology Scot R. Kimball, Ph.D. (Vermont) Professor of Cellular and Molecular Physiology Charles H. Lang, Ph.D. (Hahnemann) Distinguished Professor and Vice Chair of Cellular and Molecular Physiology, and Surgery Edward Lankford, M.D., Ph.D. (Johns Hopkins) Associate Professor of Medicine Kathryn F. LaNoe, Ph.D. (Yale) Distinguished Professor of Cellular and Molecular Physiology Philip Lazarus, Ph.D. (McGill; Canada) Professor of Pharmacology, and Public Health Sciences Sang Lee, Ph.D. (Kyungpook National, Korea) Assistant Professor of Neurosurgery Richard S. Legro, M.D. (Mount Sinai) Professor of Obstetrics and Gynecology Robert G. Levine, Ph.D. (SUNY, Stony Brook) Professor of Pharmacology David Liu, Ph.D. (CUNY) Assistant Professor of Neural and Behavioral Science Xin Liu, Ph.D., M.D. (Penn State) Assistant Professor of Medicine
Successful completion of the Program results in conferral of the Ph.D. Degree in Biomedical Sciences.

Curriculum in the second year is determined by the choice to participate in one of the Options, or an individualized curricular pathway designed by the student in consultation with the dissertation adviser and doctoral committee.

The fall curriculum includes the one-credit Art of Scientific Communication course that further develops the student's knowledge acquisition from the primary literature and integrates three-credit BMS courses arranged around the theme 'Life Requires': 1) BMS 501 Regulation of Cellular and Systemic Energy Metabolism, 2) BMS 502 Cell and Systems Biology, and 3) BMS 503 Flow of Cellular Information. The Fall curriculum also includes the one-credit Art of Scientific Communication course that further develops the student's knowledge acquisition from the primary literature and integrates three-credit BMS courses arranged around the theme 'Life Requires': 1) BMS 501 Regulation of Cellular and Systemic Energy Metabolism, 2) BMS 502 Cell and Systems Biology, and 3) BMS 503 Flow of Cellular Information.

The spring curriculum also includes the one-credit Art of Scientific Communication course that further develops the student's knowledge acquisition from the primary literature and integrates three-credit BMS courses arranged around the theme 'Life Requires': 1) BMS 501 Regulation of Cellular and Systemic Energy Metabolism, 2) BMS 502 Cell and Systems Biology, and 3) BMS 503 Flow of Cellular Information.

The first-year fall curriculum provides the student an understanding of basic cellular processes through a common curriculum that includes three parallel and integrated three-credit BMS courses arranged around the theme 'Life Requires': 1) BMS 501 Regulation of Cellular and Systemic Energy Metabolism, 2) BMS 502 Cell and Systems Biology, and 3) BMS 503 Flow of Cellular Information. The fall curriculum also includes the one-credit Art of Scientific Communication course that reinforces the 'Life Requires' components and aids students in the transition to professional literature as a source of information.

The first-year spring curriculum offers an opportunity to explore one or more curricular paths that lead to entry into one of the Options and/or to utilizing integrative Physiology as a stepping-stone to the individualized curricular pathway within the BMS Graduate Program. The spring curriculum also includes the one-credit Art of Scientific Communication course that reinforces the 'Life Requires' components and aids students in the transition to professional literature as a source of information.

The curriculum in the second year is determined by the choice to participate in one of the Options, or an individualized curricular pathway designed by the interaction of the student with the dissertation adviser and doctoral committee.

Successful completion of the Program results in certification of the Ph.D. Degree in Biomedical Sciences.
The minimum acceptable score for the TOEFL is 550 for the paper-based test, or a total score of 80 with a 19 on the speaking faculty members in the section of the.

**Courses**

Graduate assistantships available to students in this Program and other forms of student aid are described in the **Master's Degree Requirements** The Biomedical Sciences Program does not actively recruit students to earn an M.S. degree. To receive an M.S. degree in Biomedical Sciences, at least 36 credits from courses at the 500- or 600-level are required.

1. **Required Core Courses:** BMS 501 Regulation of Cellular and Systemic Energy Metabolism, BMS 502 Cell and Systems Biology, BMS 503 Flow of Cellular Information, BMS 504 Art of Scientific Communication I, BMS 505 Art of Scientific Communication II, BMS 591 Ethics in the Life Sciences, BMS 596 Individual Studies: Research Rotation, and BMS 600 Thesis Research (no more than 6 credits of BMS 600 Thesis Research may be counted toward the 36 credit minimum).

2. **Required Program Courses:** BMS 520 Integrative Physiology, BMS 581 Molecular & Translational Approaches to Human Disease, BMS 590 Colloquium and at least 7 credits of elective courses selected in consultation with the student’s dissertation adviser and thesis committee.

Students must complete original laboratory research that culminates in a thesis. Additionally, all requirements listed in the University Bulletin for the M.S. degree must be fulfilled.

**Doctoral Degree Requirements**

During the first semester of the first year of study, Ph.D. candidates are required to take BMS 501 Regulation of Cellular and Systemic Energy Metabolism, BMS 502 Cell and Systems Biology, BMS 503 Flow of Cellular Information, BMS 504 Art of Scientific Communication I, and BMS 596 Individual Studies: Research Rotation. In the Spring semester, students are required to take BMS 520 Integrative Physiology, BMS 505 Art of Scientific Communication II, BCHEM 596 Individual Studies: Research Rotation and elective courses selected in consultation with the BMS Graduate Program Student Advisory Committee. Each candidate for the Ph.D. degree must fulfill written and spoken English communication requirements that are satisfied by preparing written and oral reports describing the laboratory rotations during the first year.

At the end of the first year, admission to Ph.D. candidacy is determined by performance in course work, laboratory rotations, and the BMS Graduate Program Candidacy examination. Students join their research laboratory by the end of the summer of the first year.

The doctoral committee of a Ph.D. student is formed upon entry into the thesis laboratory. The committee must include at least two faculty members in the major field. In addition, an official “outside member” must be appointed as one of the four members. The outside member may not have a budgetary connection or adjunct appointment or other conflict of interest with the department or academic unit to which the doctoral program belongs, or to the department or academic unit of the chair or dissertation advisor, and cannot serve as either chair or co-chair of the committee.

During the second year, students take BMS 581 Molecular & Translational Approaches to Human Disease, BMS 590 Colloquium, and elective courses that are selected in consultation with the student’s dissertation adviser and doctoral committee. Ph.D. candidates prepare a written comprehensive examination in the format of a grant application prior to the end of the fifth semester of enrollment. As part of this examination, the candidate also gives an oral presentation of this proposal to their doctoral committee.

It is expected that the Ph.D. candidate will have at least one paper submitted for publication in a major peer-reviewed scientific journal prior to the doctoral examination. A dissertation must be prepared and defended by each Ph.D. candidate.

**M.D./Ph.D. Admissions Requirements**

In addition to the basic college level premedical school requirements for the Penn State College of Medicine (one each year of biology, chemistry, physics, math, and organic chemistry), the MD/PhD program has the following requirements:

- **Academic Achievement**
  - Applicants to our program generally have very strong grades and MCAT scores. In recent years, successful applicants have an average GPA of 3.75 and MCAT scores of 33-34. Applicants are not required to take the GREs.
  - **Research Experience**
  - We are especially interested in candidates with a strong and sustained background in research. Candidates who have spent 1-2 years after graduation conducting research are strongly encouraged to apply.
  - **Recommendations**
  - We are especially interested in receiving letters of recommendation from faculty with whom you conducted research and who can comment on your passion and potential for research.
  - **Goals**
  - Applicants must be able to clearly articulate the reasons for pursuing the joint degree.
  - **International Students**
  - All qualified candidates are eligible to apply regardless of citizenship. (http://www.pennstatehershey.org/web/md/admissions/overview/requirements)

**OTHER RELEVANT INFORMATION**

The BMS Graduate Program Student Advisory Committee, which includes representation from the Program and each Option of the Program, advises students about academic and related matters until the student has a dissertation adviser. First-year students carry out a series of rotation projects in at least three different faculty laboratories before deciding on a research laboratory. If desired, students formally make a decision to join an Option by the end of the Spring semester of their first year and must satisfy all admission requirements of the Option.

Students must have a dissertation adviser by the end of the summer of the first year. The student and dissertation adviser then plan additional course work and develop a research plan in consultation with the doctoral committee.

**STUDENT AID**

Graduate assistantships available to students in this Program and other forms of student aid are described in the **STUDENT AID** section of the Graduate Bulletin.

**COURSES**

Graduate courses carry numbers from 500 to 699 and 800 to 899.

**Biochemistry and Molecular Genetics (BMG) Option**

The Pennsylvania State University
The Translational Therapeutics Option does not actively recruit students to earn an M.S. degree. To receive an M.S. degree in The Translational Therapeutics Option at least 36 credits from courses at the 500- or 600-level are required.

**ADMISSION REQUIREMENTS**

To be admitted to the Option in Biochemistry and Molecular Genetics, Ph.D. candidates must successfully complete 1) the first year of the BMS Graduate Program, 2) three research rotations, at least two with faculty in the Biochemistry and Molecular Genetics Option, and 3) the BMS Graduate Program Candidacy examination. Upon completion of the first year, admission to the Ph.D. candidacy and the Option in Biochemistry and Molecular Genetics is determined by performance in course work, written and oral reports describing laboratory rotations done during the first year.

At the end of the first year, admission to Ph.D. candidacy and the Option in Biochemistry and Molecular Genetics is determined by performance in course work, laboratory work, and the BMS Graduate Program Candidacy examination. Students join their research laboratory by the end of the summer of the first year.

During the second year, students take BCHEM 590 Colloquium and at least 7 credits of 500-level didactic elective courses selected in consultation with the student’s dissertation adviser and doctoral committee.

Ph.D. candidates prepare a written comprehensive examination in the format of a grant application prior to the end of the fifth semester of enrollment. As part of this examination, the candidate also gives an oral presentation of this proposal to their doctoral committee.

It is expected that the Ph.D. candidate will have at least one paper submitted for publication in a major peer-reviewed scientific journal prior to the doctoral examination. A dissertation must be prepared and defended by each Ph.D. candidate.

**Required Option Courses:**

- BMS 501 Regulation of Cellular and Systemic Energy Metabolism, BMS 502 Cell and Systems Biology, BMS 503 Flow of Cellular Information, BMS 504 Art of Scientific Communication I, BMS 505 Art of Scientific Communication II, BMS 591 Ethics in the Life Sciences, BMS 596 Individual Studies: Research Rotation, and BMS 600 Thesis Research (no more than 6 credits of BMS 600 Thesis Research may be counted toward the 36 credit limit).

- BCHEM 521 Structure, Function, and Regulation of Biological Molecules, BCHEM 522 Molecular Genetics: Genes to Genomes, BCHEM 596 Individual Studies: Research Rotation, and at least 7 credits of elective courses selected in consultation with the student’s thesis adviser and thesis committee.

Students must complete original laboratory research that culminates in a thesis. Additionally, all requirements listed in the University Bulletin for the M.S. degree must be fulfilled.

The Translational Therapeutics Option is designed to give qualified students a combination of didactic instruction, informal interaction, and laboratory experience that enables them to obtain a firm foundation in the principles, methods, and contributions of pharmacology, defined broadly as the science of the interaction of chemical agents with biological systems. Primary emphasis is placed on the molecular mechanism by which drugs act in the body and by which the body transforms drugs.

**ADMISSION REQUIREMENTS**

To be admitted to the Option in Translational Therapeutics, Ph.D. candidates must successfully complete 1) the first year of the BMS Graduate Program, 2) three research rotations, at least two with faculty in the Translational Therapeutics Option, and 3) the Candidacy exam.

**Master’s Degree Requirements**

The Translational Therapeutics Option does not actively recruit students to earn an M.S. degree. To receive an M.S. degree in The Translational Therapeutics Option at least 36 credits from courses at the 500- or 600-level are required.

- Required Core Courses: BMS 501 Regulation of Cellular and Systemic Energy Metabolism, BMS 502 Cell and Systems Biology, BMS 503 Flow of Cellular Information, BMS 504 Art of Scientific Communication I, BMS 505 Art of Scientific Communication II, BMS 591 Ethics in the Life Sciences, BMS 596 Individual Studies: Research Rotation, and BMS 600 Thesis Research (no more than 6 credits of BMS 600 Thesis Research may be counted toward the 36 credit minimum).

- Required Option Courses: PHARM 520 Principles of Drug Action, PHARM 551 Anti-infective Therapeutics, PHARM 552 Integrated Systems Pharmacology, PHARM 553 Gastrointestinal and Immunomodulatory Therapeutics, PHARM 554 Anticancer Therapeutics, PHARM 561 Neuropharmacology, PHARM 562 Endocrine Pharmacology, and at least 7 credits of elective courses selected in consultation with the student’s thesis adviser and thesis committee.

Students must complete original laboratory research that culminates in a thesis. Additionally, all requirements listed in the University Bulletin for the M.S. degree must be fulfilled.

**Doctoral Degree Requirements**

During the Fall semester of the first year of study, Ph.D. candidates take BMS 501 Regulation of Cellular and Systemic Energy Metabolism, BMS 502 Cell and Systems Biology, BMS 503 Flow of Cellular Information, BMS 504 Art of Scientific Communication I, and BMS 596 Individual Studies: Research Rotation. In the Spring semester, students considering joining the Option in Translational Therapeutics take PHARM 520 Principles of Drug Action, BMS 505 Art of Scientific Communication II, BMS 596 Individual Studies: Research Rotation, and at least 7 credits of elective courses selected in consultation with the BMS Graduate Program Student Advisory Committee. Each candidate for the Ph.D. degree must fulfill written and spoken English communication requirements that are satisfied by preparing written and oral reports describing laboratory rotations done during the first year.

The Pennsylvania State University
At the end of the first year, admission to Ph.D. candidacy and the Option in Translational Therapeutics is determined by performance in course work, laboratory rotations, and the BMS Graduate Program Candidacy examination. Candidates join their research laboratory by the end of the summer of the first year.

During the second year, students take PHARM 551 Anti-infective Therapeutics, PHARM 552 Integrated Systems Pharmacology, PHARM 553 Gastrointestinal and Immunomodulatory Therapeutics, PHARM 554 Anticancer Therapeutics, PHARM 561 Neuropharmacology, PHARM 562 Endocrine Pharmacology, and elective courses selected in consultation with the candidate’s dissertation adviser and doctoral committee.

Ph.D. candidates prepare a written comprehensive examination in the format of a grant application prior to the end of the fifth semester of enrollment. As part of this examination, the candidate also gives an oral presentation of this proposal to their doctoral committee.

It is expected that the Ph.D. candidate will have at least one paper submitted for publication in a major peer-reviewed scientific journal prior to the doctoral examination. A dissertation must be prepared and defended by each Ph.D. candidate.

**Virology and Immunology Option**

Todd D. Schell, Ph.D., Option Director
The Pennsylvania State University College of Medicine
Hershey, PA 17033
rcourtney@psu.edu

The objective of the Option in Virology and Immunology is to prepare graduate students in the Biomedical Sciences (BMS) Graduate Program the opportunity to focus on research projects that are related to virology, immunology, and related areas of cell biology, molecular biology, biochemistry, and genetics. The Option in Virology and Immunology allows students to develop an integrative research approach using aspects of biochemistry, molecular biology, and genetics to approach scientific questions associated with areas of virology and immunology.

This Option is offered only through the BMS Graduate Program at the Penn State College of Medicine in Hershey.

**ADMISSION REQUIREMENTS**

To be admitted to the Option in Virology and Immunology, Ph.D. candidates must successfully complete: (1) the first year of the BMS Graduate Program; (2) three research rotations, at least two with faculty members in the Virology and Immunology Option; and (3) the Candidacy examination.

**Masters Degree Requirements**

The Virology and Immunology Option does not actively recruit students to earn an M.S. degree. To receive an M.S. degree in The Virology and Immunology Option at least 41 credits from courses at the 500- or 600-level are required.

1. **Required Core Courses**: BMS 501 Regulation of Cellular and Systemic Energy Metabolism, BMS 502 Cell and Systems Biology, BMS 503 Flow of Cellular Information, BMS 504 Art of Scientific Communication I, BMS 505 Art of Scientific Communication II, BMS 591 Ethics in the Life Sciences, BMS 596 Individual Studies: Research Rotation, and BMS 600 Thesis Research (no more than 6 credits of BMS 600 Thesis Research may be counted toward the 41 credit minimum).

Students must complete original laboratory research that culminates in a thesis. Additionally, all requirements listed in the University Bulletin for the M.S. degree must be fulfilled.

**Doctoral Degree Requirements**

During the first year, students take BMS 501 (Regulation of Cellular and Systemic Energy Metabolism), BMS 502 (Cell and Systems Biology), BMS 503 (Flow of Cellular Information), BMS 504 (Art of Scientific Communication I), and BMS 596 (Individual Studies: Research Rotation). In the Spring semester, students who are considering joining the Option in Virology and Immunology should take MICRO 550 (Medical Microbiology: Topics in Molecular Pathogenesis), MICRO 581 (Immunology A: Basic Concepts in Innate and Adaptive Immunity), MICRO 582 (Immunology B: Adaptive Immunity), MICRO 590 (Individual Studies: Research Rotation), MICRO 602 (Supervised Experience in College Teaching) and BMS 505 (Art of Scientific Communication II).

At the end of the first year, admission to Ph.D. candidacy and the Option in Virology and Immunology is determined by successful performance in course work, laboratory rotations, and the BMS Graduate Program Candidacy examination. Students join their research laboratory by the end of the summer of the first year.

During the second year, students take MICRO 553 (Science of Virology), MICRO 560 (Concepts in Immunology), MICRO 602 (Supervised Experience in College Teaching), MICRO 572 (Literature Reports), MICRO 583 (Viral Vectors), MICRO 590 (Colloquium), GENET 581 (Genetics of Model Organisms A: Bacterial and Viral Pathogenesis), and IBIOS 580 (Critical Reading in Immunology). Ph.D. candidates prepare a written comprehensive examination in the format of a grant application usually prior to the end of the sixth semester of enrollment. As a part of this examination, the candidate also participates in an oral defense of his proposal with the candidate’s doctoral committee.

It is expected that the Ph.D. candidate will have at least one paper submitted for publication in a major peer-reviewed scientific journal prior to the doctoral examination. A dissertation must be prepared and defended for the successful completion of the Ph.D. degree.

**M.D./Ph.D. Degree Requirements**

Prospective students interested in simultaneously pursuing an M.D. and Ph.D. degree must apply to the College of Medicine M.D. program using the national American Medical College Application Service (AMCAS) application system and indicate their intent to pursue the joint degree program. The College of Medicine M.D./Ph.D. Admissions Committee reviews applications and evaluates candidates for acceptance into both the MD and PhD program. Candidates not accepted into the joint degree program can be referred to either the M.D. or Ph.D. program, depending on their qualifications.

During the first two years of medical school, the student conducts at least three research rotations. After successful completion of the first two years of medical school, the candidate enters the BMS Graduate Program or one of its three options, each of which may have different credit requirements.

During the summer after the second year of medical school M.D./Ph.D. students take Step 1 of the United States Medical Licensing Examination (USMLE), which serves as the Candidacy Examination for the BMS program and its Options.

**Biomedical Sciences Program Requirements**

The doctoral committee of an M.D./Ph.D. student in the BMS program is formed upon entry into the thesis laboratory. The committee must include a minimum of four faculty members, i.e., the chair and at least three additional members, all of whom must be members of the Graduate Faculty. The committee must include at least two members of the BMS program graduate faculty. At least one member of the doctoral committee must represent a field outside the candidate’s major field of study in order to provide a broader range of disciplinary perspectives and expertise. This committee member is referred to as the Outside Field Member.

M.D./Ph.D. students in the BMS program are required to take BMS 581 Molecular & Translational Approaches to Human Disease. Additional courses are selected in consultation with the student’s dissertation adviser and doctoral committee.

The M.D./Ph.D. candidate prepares a written comprehensive examination in the format of a grant application and gives an oral presentation of this proposal.
It is expected that the M.D./Ph.D. candidate will have at least one paper submitted for publication in a major peer-reviewed scientific journal prior to the final doctoral examination. A dissertation must be prepared and defended by each M.D./Ph.D. candidate.

Biochemistry and Molecular Genetics Option Requirements
The doctoral committee of a M.D./Ph.D. student in the Biochemistry and Molecular Genetics Option is formed upon entry into the thesis laboratory. The committee must include a minimum of four faculty members, i.e., the chair and at least three additional members, all of whom must be members of the Graduate Faculty. The committee must include at least two members of the major program graduate faculty and at least two members who are faculty of the Biochemistry and Molecular Genetics Option. If the dissertation advisor is not a member of this Option, a co-advisor who is a member of the Option must be appointed to the committee. At least one member of the doctoral committee must represent a field outside the candidate's major field of study in order to provide a broader range of disciplinary perspectives and expertise. This committee member is referred to as the 'Outside Field Member.'

M.D./Ph.D. students in the BMG Option are required to take BCHEM 521 Structure, Function, and Regulation of Biological Molecules and BCHEM 522 Molecular Genetics: Genes to Genomes. Additional courses are selected in consultation with the student's dissertation adviser and doctoral committee.

The M.D./Ph.D. candidate prepares a written comprehensive examination in the format of a grant application and gives an oral presentation of this proposal to their doctoral committee.

It is expected that the M.D./Ph.D candidate will have at least one paper submitted for publication in a major peer-reviewed scientific journal prior to the final doctoral examination. A dissertation must be prepared and defended by each M.D./Ph.D candidate.

Translational Therapeutic Option Requirements
The doctoral committee of a M.D./Ph.D. student in the Translational Therapeutic Option is formed upon entry into the thesis laboratory. The committee must include a minimum of four faculty members, i.e., the chair and at least three additional members, all of whom must be members of the Graduate Faculty. The committee must include at least one member of the major program graduate faculty and at least two members who are faculty of the Translational Therapeutics Option. If the dissertation advisor is not a member of this Option, a co-advisor who is a member of the Option must be appointed to the committee. At least one member of the doctoral committee must represent a field outside the candidate's major field of study in order to provide a broader range of disciplinary perspectives and expertise. This committee member is referred to as the 'Outside Field Member.'

M.D./Ph.D. students in the Translational Therapeutics Option are required to take PHARM 520 Principles of Drug Action. Additionally, the candidate takes elective courses selected in consultation with the candidate's dissertation adviser and doctoral committee.

The candidate prepares a written comprehensive examination in the format of a grant application and gives an oral presentation of this proposal to the doctoral committee.

It is expected that the M.D./Ph.D. candidate will have at least one paper submitted for publication in a major peer-reviewed scientific journal prior to the final doctoral examination. A dissertation must be prepared and defended by each M.D./Ph.D candidate.

Virology and Immunology Option Requirements
The doctoral committee of a M.D./Ph.D. student in the Virology and Immunology Option is formed upon entry into the thesis laboratory. The committee must include a minimum of four faculty members, i.e., the chair and at least three additional members, all of whom must be members of the Graduate Faculty. The committee must include at least two members of the major program graduate faculty. If the dissertation advisor is not a member of this Option, a co-advisor who is a member of the Option must be appointed to the committee. At least one member of the doctoral committee must represent a field outside the candidate's major field of study in order to provide a broader range of disciplinary perspectives and expertise. This committee member is referred to as the 'Outside Field Member.'

M.D./Ph.D. students in the Virology and Immunology Option are required to take MICRO 553 (Science of Virology), MICRO 560 (Concepts in Immunology), IBIOS 580 (Critical Reading in Immunology), MICRO 572 (Literature Reports), MICRO 590 (Colloquium), MICRO 583 (Viral Vectors), GENET 581 (Genetics of Model Organisms A: Bacterial and Viral Pathogenesis), and MICRO 565 (Supervised Experience in College Teaching).

Comprehensive Examination
The M.D./Ph.D. candidate prepares a written comprehensive examination in the format of a grant application and gives an oral presentation of this proposal to their doctoral committee.

Final Doctoral Examination
It is expected that the M.D./Ph.D. candidate will have at least one paper submitted for publication in a major peer-reviewed scientific journal prior to the final doctoral examination. A dissertation must be prepared and defended by each M.D./Ph.D. candidate.

Degree Conferred: M.B.A.

The Graduate Faculty
- John Cameron, J.D. ( Widener University) Assistant Professor of Management and Organization
- Janice L. Dreachsln, Ph.D. (Wayne State) Professor of Health Policy and Administration
- Karen Duhala, Ph.D. (Penn State) Assistant Professor of Finance and Accounting
- Daniel C. Indro, Ph.D. (Indiana) Associate Professor of Finance
- Ponnusir Jiraporn, Ph.D. (Southern Illinois, Carbondale) Assistant Professor of Finance
- Barrie E. Litzky, Ph.D. (Drexel) Associate Professor of Management and Organization
- Kimberly K. Merriman, Ph.D. (Temple) Assistant Professor of Management and Organization
- Simon J. Pak, Ph.D. (California, Berkeley) Associate Professor of Finance
- Denise Potosky, Ph.D. (Rutgers) Associate Professor of Management and Organization
- Patrick Qiang, Ph.D. (Massachusetts, Amherst) Assistant Professor of Operations Management
- Kailasam Satyamurthy, Ph.D. (Clemson) Senior Lecturer in Engineering and Management
- Sagnika Sen, Ph.D. (Arizona State) Assistant Professor of Management Information Systems
- Manohar Singh, Ph.D. (Southern Illinois, Carbondale) Associate Professor of Finance
- Patrick Grady, J.D. (Penn State) Associate Professor of Management and Organization
- Eric W. Stein, Ph.D. (Pennsylvania) Associate Professor of Management Science and Information Systems
- Walter Wang, Ph.D. (Louisiana State) Associate Professor of Marketing

The Pennsylvania State University M.B.A. is a general degree program emphasizing development of the planning and problem-solving skills crucial in middle and upper management in the public, private, and nonprofit sectors. Nearly all students are working professionals who bring a wealth of experience and knowledge to the classroom. Required research may be conducted in Penn State Great Valley’s Library and Computer Center, which provide local research support as well as access to the library and computer resources of the entire Penn State system.

The M.B.A. program is geared toward the needs of part-time students who are employed full-time. Courses in the program, which are offered at Great Valley, are scheduled for the convenience of adult learners, in the evening or on Saturday. Online and blended formats are also available.

Admission Requirements

Requirements listed here are in addition to the Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin. Scores from the Graduate Management Admission Test (GMAT) are required for admission. Scores from the Test of English as a Foreign Language (TOEFL) are required of international applicants and must be submitted at the time of application. Exceptions: The TOEFL is not required of natives of an English-speaking country or applicants who hold a bachelor’s degree from an institution of an English-speaking country. Applicants should have had at least one year of quantitative analysis or statistics.

Admission decisions are based on the quality of the applicant's credentials in relation to those of other applicants. Evaluation criteria include professional and academic accomplishments, GMAT scores, two recommendations, and a personal statement that provides indications of future academic and professional potential.

Application filing dates: Penn State Great Valley's M.B.A. program has a rolling admission policy. New students may start classes in fall, spring, or summer sessions.

Degree Requirements

Normally 45 credits will be required to complete the M.B.A. degree.

Prior to enrolling in M.B.A. program requirements, students entering the program are expected to meet preprogram requirements that build a foundation for quantitative analysis as described below.

Quantitative Skills Requirement: Prior to enrolling in their M.B.A. course work, students must demonstrate competence in quantitative skills. This requirement must be satisfied in one of two ways:

1. Completion of two sequential undergraduate courses in applied statistics or one graduate introductory course in applied statistics at a regionally accredited institution of higher education with a minimum grade of B, within the seven years prior to being enrolled at Penn State Great Valley. Syllabi for such courses must be provided.

OR

1. Satisfactory completion of BUSAD 501 (formerly MS&IS 510): Statistical Analysis for Managerial Decision Making at Penn State Great Valley. This requirement must be satisfied by the first semester or summer session of the student's matriculation prior to enrolling in M.B.A. degree courses, and completed with a grade of B or higher. Successful completion of this course will result in 3 graduate credits, but will not count toward the completion of program requirements for the M.B.A. degree.

To facilitate successful fulfillment of preprogram requirements, students needing to take BUSAD 501 will be admitted on a one-year provisional basis.

Exemption from up to 15 credits from the foundation courses may be granted in accordance with the course exemption guidelines for the M.B.A. program. Normally students will need to have completed at least two undergraduate courses with a grade of B or higher, no more than seven years prior to admission to the M.B.A. program to be eligible for exemption from a specific foundation course. At the Management Division Head's discretion, a competency exam may be required to receive certain course exemptions. Course work not meeting the tests of relevancy, quality, or currency must be taken at the graduate level prior to starting advanced coursework. Time limits may be waived by the M.B.A. program on the basis of post-graduate training or current and relevant work experience.

All entering students are required to take MGMT 501.

Foundation Courses (18 credits) provide an overview of key business processes and functional areas of organizations. The are: Behavioral Science in Business (MGMT 501), Financial and Managerial Accounting (ACCTG 511), Financial Management (FIN 531), Prices and Markets (BUSAD 523), Marketing Management (MKTG 500), and Operations Management (OPMGT 510).

Essential Courses (15 credits) build necessary competencies for effective managerial practice, knowledge of key elements of contemporary business, and ethical decision making. They include one course in each of the following categories: Ethics, Global, Interpersonal Dynamics, Organizational and Industry Contexts, and Managing Technology.

Elective courses (9 credits) provide an opportunity for students to pursue their interests and develop distinctive competencies by pursuing advanced courses offered or approved by the Management Division.

All students must complete a Capstone course (3 credits) that provides students with an opportunity to strategically integrate and apply what they have learned in their course work. MGMT 571 (Strategic Management) is the capstone course for the MBA.
Student Aid

There are a limited number of scholarships, fellowships, and graduate assistantships available. For more information on these, contact the Financial Aid Office at Penn State Great Valley.

Most students work full-time and take classes part-time. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition. To find other options that may be available to you, contact the Great Valley Financial Aid Office, 610-648-3311.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Civil Engineering (C E)

The Graduate Faculty
- Rachel A. Brennan, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of Civil Engineering
- William D. Burgos, Ph.D. (Virginia Tech) Associate Professor of Environmental Engineering
- Fred S. Cannon, Ph.D. (Illinois, Urbana-Champaign) P.E. Professor of Environmental Engineering
- Brian A. Dempsey, Ph.D. (North Carolina) Professor of Environmental Engineering
- Eric T. Donnell, Ph.D. (Penn State) Associate Professor of Civil Engineering
- Christopher J. Duffy, Ph.D. (New Mexico Institute of Mining and Technology) P.H. Professor of Civil Engineering
- William J. O'Byrne, Ph.D. (Penn State) Adjunct Associate Professor of Civil Engineering
- Michael Goessert, Ph.D. (Colorado) Associate Professor of Civil Engineering
- David F. Hill, Ph.D. (California, Berkeley) Associate Professor of Civil Engineering
- Peggy A. Johnson, Ph.D. (Maryland) Head; Professor of Civil Engineering
- Paul P. Jovanis, Ph.D. (California, Berkeley) Professor of Civil Engineering
- Bo Kasai, Ph.D. (Oregon State) Hankin Chair of Residential Building Construction
- Jeffrey A. Laman, Ph.D. (Michigan) P.E. Professor of Civil Engineering
- Daniel G. Linzell, Ph.D. (Georgia Tech) P.E. Associate Professor of Civil Engineering
- Bruce E. Logan, Ph.D. (California, Berkeley) Kappe Professor of Environmental Engineering
- Maria M. Lopez de Murphy, Ph.D. (Michigan) Associate Professor of Civil Engineering
- Jack V. Matson, Ph.D. (Rice) P.E. Professor of Environmental Engineering
- Angelica Palomino, Ph.D. Hartz Family Career Development Professor; Assistant Professor of Civil Engineering
- Matthew D. Repacholi, Ph.D. (Maryland) P.E. Associate Professor of Civil Engineering
- Patrick Reed, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of Civil Engineering
- John M. Regan, Ph.D. (Wisconsin, Madison) P.E. Associate Professor of Civil Engineering
- Andrew Scanlon, Ph.D. (Alberta) S.E. Professor of Civil Engineering
- Barry Scheutz, Ph.D. Professor of Civil Engineering
- Andrea J. Schokker, Ph.D. (Texas, Austin) Adjunct Professor of Civil Engineering
- Venkataaraman (Venky) N. Shankar, Ph.D. (U Washington, Seattle) Associate Professor of Civil Engineering
- Shelley M. Stofells, D.E. (Texas A&M) P.E. Associate Professor of Civil Engineering
- H. Randolph Thomas, Jr., Ph.D. (Vanderbilt) P.E. Professor of Civil Engineering
- Ming C. Wang, Ph.D. (California, Berkeley) P.E. Professor of Civil Engineering
- Gordon Warn, Ph.D. Assistant Professor of Civil Engineering

Students may specialize in construction engineering, environmental engineering, hydrosystems engineering, structural engineering, and transportation engineering.

Admission Requirements
The requirements listed here are in addition to the general requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Candidates should possess a baccalaureate degree from a regionally accredited institution. Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and appropriate course backgrounds may be considered for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

International applicants must submit OFFICIAL transcripts, degree, and diploma certificates in both English and native language. These documents must contain the "red stamp" or have the raised notary stamp. Photocopies will NOT be accepted.

All applicants must provide the department with official transcripts of all their previous course work (in duplicate), a statement of objectives, and three letters of recommendation AT THE TIME OF APPLICATION. In addition, all applicants must submit scores from the General Graduate Record Examinations Aptitude Test (verbal, quantitative, and analytical).

All international applicants whose native language is not English must present an acceptable score (560 minimum on the paper-based test; 220 minimum on the computer-based test) on the Test of English as a Foreign Language (TOEFL).

Applicants for fall admission who wish to be considered for financial aid should have COMPLETED applications on file by DECEMBER 1 of the preceding year.

Degree Requirements
The M.Eng. degree is a nonequivalent professional master's degree. The program provides training for advanced professional practice. A minimum of 30 graduate credits (400 level and above) of course work and a writing portfolio are required. It should be noted that 20 credits must be earned at an established graduate campus of the University. At least 15 credits must be earned in graduate courses (500 level). Divisions may require specific core courses. Students are not permitted to count audited credits toward the minimum credits required for the degree.

The M.S. degree program is strongly oriented toward research. A minimum of 30 graduate credits (400-level and above) is required, of which 20 must be earned at an established graduate campus of the University. At least 18 credits in the 500 and 600 levels, combined, must be included in the program. A minimum of 12 credits of course work (400 and 500 level), as contrasted with research, must be completed in the major (courses prefixed C E). Division may require specific core courses. Students are not permitted to count audited credits toward the minimum credits required for the degree. A thesis is required, and at least 6 credits of thesis research (C E 600 or 610) must be included in the candidate's academic course plan.

A candidate for the Ph.D. degree must pass the English proficiency and candidacy examinations, prepare and defend the thesis proposal as part of the oral comprehensive examination, and pass the final oral examination (thesis defense). In addition, a Ph.D. candidate must satisfy the University residency requirement by registering for two consecutive semesters as a full-time student.

Continuous registration is required for all graduate students until the thesis or writing portfolio has been approved. See also Environmental Engineering.

Biogeochemistry Dual-Title Degree Program
Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Students in the Biogeochemistry Dual Title program are required to have two advisers from separate disciplines: one individual serving as a primary adviser in their major degree program and a secondary adviser in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework beyond the list of courses is required. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. A single candidacy examination that includes biogeochemistry will be administered for admission into the student’s Ph.D. program, as well as the biogeochemistry dual-title. The structure and timing of this exam will be determined jointly by the dual-title and major program.

The Pennsylvania State University
student’s doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Other Relevant Information

Students in this program may elect to participate in the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees. See also Environmental Engineering.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin. International applicants who wish to be considered for a teaching assistantship must present an acceptable score (250-300 or 55-60) on the Test of Spoken English (TSE). The TSE can be taken in many countries, or at Penn State after arrival.

CECIL M. PEPPERMAN MEMORIAL GRADUATE FELLOWSHIP
Available to a graduate student in civil or environmental engineering specializing in one of the following fields, listed in order of priority: waste treatment and management, water pollution control, environmental engineering, or related fields.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Jacqueline Edmondson, Ph.D. (Penn State) Assistant Professor of Education
- Daniel D. Hade, Ph.D. (Ohio State) Associate Professor of Education
- Leigh Ann Haefer, Ph.D. (Penn State) Associate Professor of Education
- M. Kathleen Heid, Ph.D. (Penn State) Professor of Education
- Steven L. Herb, Ph.D. (Penn State) Librarian; Head, Education Library, Affiliate Associate Professor of Education
- Patricia H. Hinchez, Ed.D. (Columbia) Associate Professor of Education
- James E. Johnson, Ph.D. (Wayne State) Professor of Education
- Greg J. Kelly, Ph.D. (Cornell) Professor of Education
- Youb Kim, Ph.D. (Michigan State) Assistant Professor of Education
- Rainbow Koul, Ph.D. (Penn State) Associate Professor of Education
- James Levin, Ph.D. (Penn State) Affiliate Associate Professor of Education
- Gwendolyn M. Lloyd, Ph.D. (Michigan) Professor of Education
- Andrea V. McCloskey, Ph.D. (Indiana) Assistant Professor of Education
- Scott P. McDonald, Ph.D. (Michigan) Associate Professor of Education
- Scott A. Metzger, Ph.D. (Michigan State) Assistant Professor of Education
- Orin T. Murray, Ph.D. (Michigan) Assistant Professor of Education
- Jamie M. Myers, Ph.D. (Indiana) Professor of Education
- Murry R. Nelson, Ph.D. (Stanford) Professor of Education
- James F. Nolan, Ph.D. (Penn State) Hermanowicz Professor of Education
- Matthew E. Poechner, Ph.D. (Penn State) Assistant Professor of Education
- Kimberly A. Powell, Ph.D. (Stanford) Assistant Professor of Education
- Jacqueline Reid-Walsh, Ph.D. (McGill) Associate Professor of Education
- Peter A. Rubba, Ed.D. (Indiana) Professor of Education
- David W. Saxe, Ph.D. (Illinois) Associate Professor of Education
- Stephanie C. Serriere, Ph.D. (Indiana) Assistant Professor of Education
- Patrick W. Shannon, Ph.D. (Minnesota) Professor of Education
- Kathleen A. Sillman, Ph.D. (Penn State) Assistant Professor of Education
- Deborah M. Smith, Ph.D. (Delaware) Assistant Professor of Education
- Jeanine M. Staples, Ph.D. (Pennsylvania) Assistant Professor of Education
- Iris M. Striedieck, D.Ed. (Penn State) Assistant Professor of Education
- Dana L. Suchtich, Ph.D. (Penn State) Associate Professor of Education
- Daniel K. Thompson, Ph.D. (Iowa) Assistant Professor of Education
- Joseph Valente, Ph.D. (Arizona State) Assistant Professor of Education
- Anne E. Whitney, Ph.D. (California) Assistant Professor of Education
- Vivian Yenika-Agbaw, Ph.D. (Penn State) Associate Professor of Education
- Rose Mary Zbiek, Ph.D. (Penn State) Associate Professor of Education
- Craig M. Zembal-Saul, Ph.D. (Michigan) Associate Professor of Education

This program provides advanced professional preparation in the special areas of bilingual education, curriculum and supervision, early childhood education, elementary education, instructional leadership, language and literacy education, science education, social studies education, and mathematics education.

Admission Requirements

Scores from the Miller Analogies Test (MAT) or the Graduate Record Examinations (GRE) are required for admission. However, applicants for the doctoral degree are strongly encouraged to take the GRE. Moreover, students with excellent academic records who wish to be considered for fellowships, scholarships, and assistantships should take the GRE as a matter of course. At the discretion of an option area, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students with appropriate course and professional backgrounds will be considered for admission, subject to the limitation of program facilities. For admission to the professional degree programs leading to the M.Ed. and D.Ed., teaching or equivalent experience and at least 18 credits in education are recommended.

Master's Degree Requirements

M.Ed. and M.S. candidates are expected to complete the core: EDPSY 421, C I 400, and C I 550, or the equivalent.

Candidates for the M.Ed. degree with a minor in Curriculum and Instruction must take a minimum of 6 course credits approved in advance.

Doctoral Degree Requirements

The completion of a core of competencies in curriculum, instruction, and supervision is expected of Ph.D. and D.Ed. candidates.

To meet residency requirements, the Ph.D. candidate must spend at least two consecutive semesters enrolled as a full-time student at the University Park campus. The D.Ed. candidate must spend at least two consecutive sessions (e.g., semester, summer session) enrolled as a full-time student at the University Park campus.

Candidates for the D.Ed. degree with a minor in Curriculum and Instruction must take a minimum of 15 course credits approved in advance by the graduate
Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Integrated B.S. in Special Education/M.Ed. in Curriculum and Instruction

The Special Education and Curriculum and Instruction with emphasis in Language and Literacy Education Integrated Undergraduate-Graduate (SE/CI-LLED IUG) leading to certification as a Reading Specialist.

The Special Education and Curriculum Instruction with Emphasis in Language and Literacy Education Integrated Undergraduate-Graduate (SE/CI-LLED IUG) Degree Program consists of integration of required courses for a B.S. in Special Education and courses required for certification as a Reading Specialist and a M.Ed. in Curriculum and Instruction with emphasis in Language and Literacy Education (LLED). The five-year, SE/CI-LLED IUG is an option for highly qualified students seeking certification to teach Special Education in Pennsylvania in grades K-12. Students in this IUG will be taught how to design and deliver appropriate instruction based on individual needs and incorporate a variety of materials and strategies. Students are expected to complete courses required for the graduate level K-12 reading specialist integrated with their undergraduate experiences and coursework in Special Education and will complete a summer practicum in an on-campus reading clinic as well as a capstone Special Education teaching experience in their final semester. Completion of the IUG (along with earning a passing score on PDE required PRAXIS tests) leads to a B.S. in Special Education, certification in special education and as a reading specialist in the state of Pennsylvania, and a M.Ed. in Curriculum and Instruction.

Admission to the SE/CI-LLED IUG Reading Specialist program will be based upon having attained a minimum GPA of 3.5 in Special Education courses, with a grade of B or better in SPLED 412. Admission will be based on a recommendation by the Reading Specialist Program Coordinator in consultation with the Coordinator of Teacher Education in Special Education.

For the B.S./M.Ed. Degree in integrated Special Education B.S. and Curriculum and Instruction M.Ed., a minimum of 150 credits is required. Up to 12 graduate level credits can apply to both undergraduate and graduate degrees; half of these must be at the 500-level. Students can complete the B.S. in Special Education and not advance to the M.Ed. Cl degree if they desire.

Master of Education

CURRICULUM AND INSTRUCTION M.Ed. (30 credits)

Core Areas (9 credits - choose one course from each area):
Curriculum: CI 550
Research: EDPSY 400, EDPSY 545, or HD FS 429

Emphasis in Language and Literacy Education with Reading Specialist (* denotes required courses)

Note: A Master's paper is required for completion of the M.Ed.

A passing score on the PRAXIS Reading Specialist Exam (qualifying score of 570) is required for Reading Specialist certification.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

CURRICULUM AND INSTRUCTION (C I) course list
CURRICULUM AND SUPERVISION (C & S) course list
EARLY CHILDHOOD EDUCATION (E C E) course list
LANGUAGE AND LITERACY EDUCATION (LL ED) course list
MATHEMATICS EDUCATION (MTHED) course list
SCIENCE EDUCATION (SCIED) course list
SOCIAL STUDIES EDUCATION (SS ED) course list

Last Revised by the Department: Summer Session 2010

Blue Sheet Item #: 38-04-098
Review Date: 01/12/2010
Last updated by Publications: 1/21/11
The graduate program emphasizes theory and research on crime and justice, research and statistical methodology, and substantive knowledge about crime
and its control.

Admission Requirements
Applications from students with either the B.A. or M.A. degree will be accepted through January 1 for admission in the fall of the following year. Selection is
based on transcripts, three letters of recommendation from persons familiar with the applicant's academic performance, a statement of goals, a sample of
written work such as a term paper, and Graduate Record Examinations (GRE) verbal and quantitative scores. The best-qualified applicants will be admitted to
the program up to the number of spaces available.

M.A. and Ph.D. Degree Requirements
Students entering the program with the B.A. degree will first earn the M.A. degree. Thirty-seven credits of course work and a master's thesis are required for
the M.A. The course work includes a sequence of methods and statistics courses; a crime theory course; a course in the organization and criminal justice
system; and additional 500-level substantive Crime, Law, and Justice courses selected in consultation with a student's faculty committee.

A candidacy exam is required of all students seeking the Ph.D., after a master's degree has been earned. This exam will consist of an evaluation by the
program's graduate faculty of the student's seminar papers, master's thesis, and overall record of performance. Students admitted with a master's degree will
stand for this exam in the second semester of full-time study.

To complete the Ph.D., students must, in consultation with their committee, select 12 credits of 500-level courses outside the program that form a coherent
disciplinary concentration that complements the study of Crime, Law, and Justice. A comprehensive exam must be passed by all students before intensive
dissertation research begins.

The program in Crime, Law, and Justice has no formal foreign language or communication requirement. However, students are encouraged to pursue
additional training in statistics, computer science, foreign language, technical writing, specialized methods, or specialized theory that will further their
dissertation or career plans.
Student Aid

All students admitted to the program are supported with stipends and tuition waivers for either four years (students entering with a master's degree) or five years (students entering with a bachelor's degree). Support may be in the form of research assistantships or teaching assistantships, with most students receiving a combination of types of support across their graduate careers.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Dual-Title Graduate Degree in Classics and Ancient Mediterranean Studies (CAMS)

Program Home Page
PAUL B. HARVEY, Jr., Department Head
101 Weaver Building
814-863-0061
pbh1@psu.edu

Degrees Conferred

Students electing this program through participating departments will earn a degree with a dual-title at both the Ph.D. and the master's levels, i.e., Ph.D. in (graduate program name) and Classics and Ancient Mediterranean Studies, or master's degree in (graduate program name) and Classics and Ancient Mediterranean Studies.

The following graduate programs offer dual degrees in Classics and Mediterranean Studies: History.

The Graduate Faculty

Classics and Ancient Mediterranean Studies-affiliated faculty include individuals with budgeted appointments in Classics and Ancient Mediterranean Studies and the following faculty members have budgeted and courtesy joint appointments in Classics and Ancient Mediterranean Studies:

- Christopher Brady, D.Phil. (Oxford) Associate Professor of Classics and Ancient Mediterranean Studies
- Paul C. Dilley, Ph.D. (Yale) Assistant Professor of History, Classics and Ancient Mediterranean Studies, and Jewish Studies
- Garrett G. Fagan, Ph.D. (McMaster) Associate Professor of Classics and Ancient Mediterranean Studies, and History
- Baruch Halpern, Ph.D. (Harvard) Chaiken Family Chair in Jewish Studies; Professor of Ancient History and Religious Studies; Fellow, Institute for the Arts and Humanities Studies
- Paul B. Harvey, Jr., Ph.D. (Pennsylvania) Associate Professor of Classics and Ancient Mediterranean Studies, History, and Religious Studies
- Ann E. Killebrew, Ph.D. (Hebrew University, Jerusalem) Associate Professor of Classics and Ancient Mediterranean Studies, Jewish Studies, and Anthropology
- Gerald (Gary) K. Knoppers, Ph.D. (Harvard) Edwin Erle Sparks Professor of Classics and Ancient Mediterranean Studies, Religious Studies, and Jewish Studies
- Michael Kulikowski, Ph.D. (Toronto) Professor of History, and Classics and Ancient Mediterranean Studies
- Mark Munn, Ph.D. (Pennsylvania) Professor of Ancient Greek History, Greek Archaeology, and Classics and Ancient Mediterranean Studies
- Donald Redford, Ph.D. (Toronto) Professor of Classics and Ancient Mediterranean Studies
- Aaron Rubin, Ph.D. (Harvard) Associate Professor of Classics and Ancient Mediterranean Studies, Jewish Studies, and Linguistics
- Gonzalo Rubio, Ph.D. (Johns Hopkins) Associate Professor of Classics and Ancient Mediterranean Studies, History, and Religious Studies
- Zoe Stamatopoulos, Ph.D. (Virginia) Assistant Professor of Classics and Ancient Mediterranean Studies
- Stephen Wheeler, Ph.D. (Princeton) Associate Professor of Classics

Dual-title degrees grounded in CAMS and a given discipline will acknowledge and foster interdisciplinary scholarship. This dual-title degree program will increase the intellectual rigor, breadth, and depth of graduate work in a participating program through immersion in the disciplinary fields covered by the Department of Classics and Ancient Mediterranean Studies: the philology and literature of ancient Mediterranean languages; the history and material cultures of those societies.

This dual-title program will thus provide a context in which students will learn how to synthesize knowledge within and across traditional disciplinary boundaries. In addition, this dual-title degree program will provide qualified students opportunities for instructional training encouraging an interdisciplinary approach to teaching.

The primary advantages of this dual-title program include the intellectual and academic advantages and benefits of interdisciplinary study, as well as the enhancement of the reputation of the departments concerned through an innovative program, leading to recruitment of highly qualified graduate students, and an improved placement of doctoral graduates in highly-competitive humanities fields.

This dual-title degree program does not duplicate any other degree program in the University.

Admission Requirements

Students must first be admitted to a participating program; only after admittance by a participating program, will students be admitted to graduate study in CAMS by an admissions committee of CAMS faculty and the approval of the head of CAMS. CAMS will follow the timetable and admissions requirements of the participating program. Applicants to this dual-title degree program should have a junior/senior cumulative average of at least 3.00 (on a 4.00 scale) and appropriate academic preparation. Preference will be given to those candidates whose undergraduate record demonstrates expertise in ancient Mediterranean Studies (history; literature; archaeology) and proficiency to the 12 th credit level in one or more ancient languages. Where applicable, a minimum GPA of 3.5 (on a 4.00 scale) is requisite for graduate work previously undertaken. Prospective students seeking admission to this dual-title degree program are required to write a statement of purpose that addresses the ways in which their research and professional goals will reflect an interest in interdisciplinary research in the participating program and the disciplines and fields included in CAMS.

Degree Requirements

This dual-title degree will have requirements in addition to those for graduate degrees in a participating program. Those requirements include additional course work in ancient languages, additional components to the comprehensive examinations at the doctoral level, and the completion of CAMS-related theses at the master's level (optional; see below) and doctoral levels (compulsory). A CAMS master's, and a doctoral, committee, chaired by faculty closely related to the student's field of interest, will supervise the graduate study of each student accepted into this dual-title program. Students will be expected to attend and participate actively in the CAMS regularly-scheduled colloquia.

Master's Degree

33 credits, including:
- 6 required credits (CAMS 592: CAMS Proseminar; CAMS 593: Research Seminar).
- 9 additional credits in 500 or 400-level work in CAMS courses.

Reading knowledge of one ancient language; proficiency to be demonstrated through 400/500 level work in that language as instructed by CAMS language faculty.

Writing requirement: completion and approval of two seminar research papers. Those research papers should be conceived, in terms of length, format, and quality, as suitable for submission to refereed journals for publication. A student has the option of filing one of those research papers with the Graduate School as a master's thesis, in the appropriate format specified by the Graduate School.

Although the Graduate School permits eight years to complete the master's degree, master's-level students who expect to enter the Ph.D. program are strongly encouraged to graduate in either spring or summer at the end of the second year. The culminating experience leading to the master's degree will be evaluated in accord with the procedures and standards of the participating program and of CAMS.

Ph.D. Degree

The Pennsylvania State University
6 required credits (CAMS 592: CAMS Proseminar; CAMS 593: Research Seminar).
9 additional credits in 500 or 400-level work in CAMS courses.
9 additional credits (a minimum of 6 should be at the 500-level) in CAMS courses or courses relevant to the student's research interests.

Reading knowledge of a second ancient language—proficiency to be demonstrated through 400/500 level work in that language as instructed by CAMS language faculty—or competence, demonstrated in coursework or field study, as approved by the student's supervisory committee, in a research technique in a technical field relevant to CAMS: e.g., archaeology, art history, anthropology, historical linguistics, literary studies and analysis.

Dissertation on a CAMS-related topic as approved by the student's committee.

Foreign Language and English Competency Requirements

The student will fulfill the English Competency requirements specified by the participating program. Master's students will fulfill a requirement of reading knowledge of one ancient language: Ph.D. candidates will fulfill a requirement of reading knowledge of two ancient languages or of one ancient language and competence in a research technique. Language proficiency will be demonstrated through 400/500 level work in the languages concerned, as instructed by CAMS faculty.

Students will be expected to acquire and demonstrate reading proficiency in those modern foreign languages (e.g., but not exclusively, French, German, Italian) appropriate to their research interests, as identified in consultation with their CAMS graduate supervisory committee.

Dissertation

A dissertation on a CAMS topic is required of students in this dual-title degree program. The CAMS topic of the dissertation will be approved by the student's committee.

Student Aid

Graduate assistantships are available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500-599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate language requirements when taken by graduate students. Courses below the 400 level do not qualify. A graduate student may register for or audit these lower-level courses in order to make up deficiencies, but not to meet requirements for an advanced (graduate) degree.

- John Tang, Ph.D. (Biochemistry and Molecular Biology, Eberly College of Science)
- Graham Thomas, Ph.D. (Biology and BMB, Eberly College of Science)
- Yanning Wang, Ph.D. (Biochemistry and Molecular Biology, Eberly College of Science)
- Kenneth Weiss, Ph.D. (Biology, ECoS; Anthropology, College of Liberal Arts)
- Michael Whim, Ph.D. (Biology, Eberly College of Science)
- Na Xia, Ph.D. (Veterinary and Biomedical Sciences, College of Agricultural Sciences)
- Yinong Yang, Ph.D. (Biochemistry and Molecular Biology, Eberly College of Science)
- Ian Zagon, Ph.D. (Neural and Behavioral Sciences, College of Medicine)

The Intercollege Graduate Degree Program in Cell and Developmental Biology (IGDP in CDB) prepares graduates for diverse opportunities in academic institutions, pharmaceutical companies, private research foundations, governmental research and regulatory programs. The program includes faculty from 10 departments in the College of Agricultural Sciences, Engineering, Liberal Arts, and Eberly College of Science at the University Park campus and the College of Medicine at the Penn State Milton S. Hershey Medical Center. The IGDP in CDB is also supported by the Huck Institutes of Life Sciences which provides modern telecommunications facilities and sophisticated equipment for state-of-the-art research applications. Doctoral students not only receive education and training new principles and experimental approaches, but also practice communication skills in group discussions and informal seminars and explore various potential career opportunities before graduation. Two unique aspects are (1) optional dual mentors will provide students with interdisciplinary training new principles and experimental approaches, but also practice communication skills in group discussions and informal seminars and explore various potential career opportunities before graduation. Two unique aspects are (2) optional dual mentors will provide students with interdisciplinary and multidisciplinary training, stimulate scientific thinking using different perspectives, and prepare for a wide range of future career options; and (2) an optional internship will provide a mechanism for students to obtain practical experience in future professional settings or gain specialized training off campus.

General Admission Requirements

M.S. or Ph.D. degrees

Application deadline is January 10 for priority consideration.

1. Completed official Penn State Graduate School application
2. Paid nonrefundable application fee
3. Two official transcripts from each institution attended
4. Application for a U.S. visa (International applicants only)
5. Graduate Record Examinations (GRE) general test scores
6. Three letters of recommendation
7. Statement of goals that pertains to the life sciences
8. All international applicants whose first language is not English or who have not received baccalaureate or masters degrees from an institution in which the instruction is English must take the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the new speaking portion is required for
Program Requirements

M.S. or Ph.D. degrees

1. Foundation of basic knowledge in cell biology, developmental biology, biochemistry, and molecular biology. The IGDP in CDB requires at least 9 credits in one or more of these disciplines, taken either as an undergraduate or as a part of the graduate curriculum. The following courses serve to fulfill this requirement.
   - IBIOS 593. COLLOQUIUM (2 credits) All students are required to enroll for 4 credits of Colloquium. Students receive A-F quality grades.
   - IBIOS 592. CURRENT RESEARCH SEMINARS (2 credits) Students are required to enroll for 4 credits. Students receive A-F quality grades.
   - BMMB 501 (*). CORE CONCEPTS IN BIOMOLECULAR SCIENCES (5 credits) Students receive A-F quality grades.
   - IBIOS 572 (*). BENCHMARK PAPERS (2 credits) Students are required to enroll for 2 credits. Students receive A-F quality grades.
   - IBIOS 541 (*). MOLECULAR BIOLOGY OF ANIMAL DEVELOPMENT (3 credits) Students receive A-F quality grades.
   - The coursework has been designed to satisfy the requirement of English proficiency.

2. Independent Studies: Laboratory Rotations (1-3 credits per semester) Students receive an A (satisfactory/passing) or F (unsatisfactory/failing). Only R credits are counted for credit totals.

3. IBIOS 595. INTERNSHIP (1 credit, optional) Students receive an R (satisfactory/passing) or U (unsatisfactory/failing). Only R credits are counted for credit totals.

4. IBIOS 591. ETHICS IN THE LIFE SCIENCES (1 credit) Students receive A-F quality grades.

5. IBIOS 600 THESIS RESEARCH (variable credits)

6. IBIOS 601 Ph.D. DISSERTATION FULL-TIME (0 credits)

7. IBIOS/VSC 602 SUPERVISED EXPERIENCE IN COLLEGE TEACHING (optional, 1 credit), one semester is encouraged after the first year in residence.

8. The Graduate School requires all graduate students to maintain a 3.0 grade-point average.

English Requirement for International Students

The English Requirement for International Students in IBIOS is that prescribed by the Graduate School. All entering international students, whose first language is not English, will be required to take a Test of Spoken English (TSE) which is administered by the University’s Center for English as a Second Language (ESL). Exceptions may be made if the entering applicant received a baccalaureate or Master's from an institution which instructs in English.

Students with teaching responsibilities are required to take the American English Oral Communicative Proficiency Test (AEOCPT) prior to entering the classroom. The AEOCPT is given at the beginning of fall and spring semesters. All international students are required to pre-register for this test. The test scores from the AEOCPT (American English Oral Communicative Proficiency Test) are posted on the University's Administrative Information System (AIS) computer. Below is the course of action or the various TSE (Test of Spoken English) score ranges.

- *250 approved for teaching and the ESL (English as a Second Language) requirement will be satisfied.
- 230-249 required to schedule and pass ESL 118G.
- 200-229 required to pass ESL 117G*. These students will not be permitted to teach in a classroom situation, and may instead be assigned to grading and/or proctoring duties.
- <200 required to schedule and pass with the grade of A in ESL 115G, before ESL 117G*. These students will not be permitted to teach in a classroom situation, and may instead be assigned to grading and/or proctoring duties.

* At the end of this course, students are re-tested. Based upon these test results, students are either approved for teaching, placed in a subsequent ESL course, or asked to retake the course.

For students who enroll at the Hershey Medical School who need to take one or more of the above English courses can fulfill the requirements on one of the following ways. First, take the course at UP. If the student needs to commute between the two campuses but does not have a car, the UP-HY shuttle service can potentially be used. Secondly, a student may take a similar course at Hershey or an area college, approved by the CDB program curriculum committee.

Students, who are required to enroll in ESL courses, must complete the ESL requirement by the end of the second semester of residency. Students who fail to satisfy this requirement may be terminated from the IBIOS program, at the discretion of the Co-Chairs.

M.S. Degree Requirements

For all master's degrees, a minimum of 30 graduate credits and a 3.0 overall GPA are required. At least 18 credits at the 500-level or above, combined, (with at least 6 credits of 500-level in professional master's programs) must be included in the program. If pursuing a Masters thesis option, up to 6 IBIOS 600 credits may be applied, and 12 credits need to be in the major at the 500 level (excluding IBIOS 600). IBIOS 598 (Internship) and 596 (Rotations) credits all count toward the 30 credits. All CDB graduate students must successfully complete required courses and/or electives (see below) during the first two years of their graduate education. If all course credits and requirements are met, students do not have to be registered for classes while writing and/or defending their/her thesis. Bachelor's students must have completed a bachelor's degree at an accredited college or university and have a minimum of a 3.0/4.0 junior/senior undergraduate grade-point average.

Ph.D. Degree Requirements

Ph.D. students must have a minimum of 30 credits and a 3.0 overall GPA through out the program. The course requirements are essentially the same as that required for the M.S. degree listed above, with some discretion left to the student and advisor.

Grade Point Average/Unsatisfactory Scholarship: Students are required to have a minimum grade-point average of 3.0 through out the course of their training. Furthermore, the student must have a 3.0 to take the doctoral candidacy, the comprehensive and final oral examinations. One or more failing grades or a cumulative grade-point average below 3.0 may be considered evidence of unsatisfactory scholarship and be grounds for dismissal from the program.

English Competence: A candidate for Ph.D. in the CDB program is required to demonstrate high-level competence in the use of the English language, including reading, writing, and speaking, as part of his/her language and communication requirements. The CDB program has several required courses, all of which train and improve students in reading, writing, and speaking in English. Students are required to make oral presentations and complete written assignments. The instructors of these courses will assist in evaluating the competence in using English and those students identified as being deficient in English will be required to take remedial activities, such as additional courses, writing assignments, and tutorials. International students are advised that the submission of minimum requirements for TOEFL does not constitute the fulfillment of the English competence requirement. English competence must be demonstrated before or at the candidacy exam.

Besides coursework, research, teaching, IGDP in CDB doctoral students participate in the following:

Candidacy Exam: This exam shall be taken by the end or during the student's third semester in the CDB Program. The student will be assigned one scientific paper from the primary literature to read and analyze for approximately one week. The papers will be selected based upon the students'
background and coursework. The analysis should involve exploring the relevant literature as well as the fundamental issues in Cell and Developmental Biology. Following this independent research the student will take an oral exam. The oral exam will be administered by at least three members of the graduate program. The overall goal of the exam is to assure that the student has an intellectual foundation in Cell and Developmental Biology. The exam is designed to evaluate basic knowledge in Cell and Developmental Biology and related disciplines as well as the students’ ability to integrate this understanding to effectively evaluate experimental design, results, and the conclusions drawn. In the event that the student does not pass this exam, the student’s committee will make a recommendation as to whether to offer another opportunity or to terminate the student’s enrollment in the program.

Comprehensive Examination: Evaluation via the Doctoral Committee to determine the feasibility of proposed research and the preparedness of the student. Students must be registered for classes (typically IBIOS 600) the semester they take this exam.

Doctoral Committee: Upon successful completion of the Candidacy Examination, the student in consultation with the mentors will, as soon as possible, select a doctoral committee. The committee will consist of three members of the IGDP in CDB and one faculty member who is not a member of the IGDP in CDB. One members of the committee must be from a different department from the home department(s) of the mentor(s). This committee is responsible for supervising the academic program and monitoring the progress of the student towards his/her degree. Doctoral Thesis Committee Composition is based on the Graduate Degree Programs Bulletin (http://bulletins.psu.edu/bulletins/whitebook/degree_requirements.cfm?section=degreeReq1) published by the Graduate School regarding Doctoral Committees and requires:

- 4 person minimum of approved PSU Graduate Faculty.
- 2 members must be inside the major and 1 member must be outside the major. Note - the outside member must be member of the approved PSU Graduate Faculty. The outside member for intercollege graduate programs may be inside the major but committee membership must have representation from more than one department.
- For students with dual mentors, both mentors may serve on the committee. One of the mentors should be designated as the primary mentor. The outside member must not be in the same department as the primary mentor.
- A person not affiliated with PSU may be added as a special member (beyond the 4 members of the approved PSU Graduate Faculty) upon recommendation of the head of the program and approval of the graduate dean.
- Have committee chair or one of the co-chairs be a member of the approved PSU Graduate Faculty. Typically it’s the faculty advisor.
- The doctoral candidate and three committee members must be physically present for the comprehensive exam and defense. No more than one person may be present via telephone. Telephone or video conference arrangements must be approved by the Dean of the Graduate School.
- Need approval of 2/3 of the committee members for passing comprehensive exam and defense dissertation.

Ph.D. Defense: Evaluation via the Doctoral Committee of the thesis research. Students must present their thesis in accordance with the Penn State guidelines as described in the THESIS GUIDE Requirements for the Preparation of Master’s and Doctoral Theses. Current copies may be obtained from website: http://www.gradsch.psu.edu/current/thesis/guide.html, or from the Thesis Office, 115 Kern Building, University Park, PA 16802; 814-865-5448.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.
The Master of Professional Studies in Community and Economic Development (MPS CEDEV) is a 30-credit terminal master's degree program that emphasizes an interdisciplinary approach to community and economic development. The program balances theory and practice. Courses are taught in MPS CEDEV use a blend of Web technology, print, and other media to provide an effective balance of flexibility and interaction. Individuals who currently work with, or are interested in working with communities, community organizations and stakeholders, or on a range of community and economic development issues at the state or national levels would benefit from this program. The MPS CEDEV program requires the completion of seven core courses (21 credits) in which students are asked to apply social, political and economic development issues in community and economic development. The courses offer examples and opportunities to apply the concepts to real issues facing communities and rural regions. Two of the core courses (6 credits) emphasize statistical methods and tools and techniques useful to practitioners in community and economic development, or to work toward additional certifications. All students are required to complete a project, paper or internship (3 to 6 credits) that integrates theory and practice.

The Graduate Faculty

- Charles W. Abdalla, Ph.D. (Michigan State) Professor of Agricultural and Environmental Economics
- Theodore R. Allen, Ph.D. (Michigan State) Professor of Agricultural, Environmental, and Regional Economics
- David Blandford, Ph.D. (Manchester) Professor of Agricultural Economics
- Kathryn Brasier, Ph.D. (Wisconsin—Maidson) Associate Professor of Rural Sociology
- Ann Dodd, Ph.D. (Penn State) Associate Professor, Agricultural and Extension Education
- Leland I. Gienna, Ph.D. (Missouri) Associate Professor of Rural Sociology and Science, Technology, and Society
- Stephen J. Goetz, Ph.D. (Michigan State) Professor of Agricultural and Regional Economics
- Francis X. Higdon, Ph.D. (Pittsburgh) Senior Lecturer in Community Development
- Clare Hinrichs, Ph.D. (Cornell) Associate Professor of Rural Sociology
- Leif L. Jensen, Ph.D. (Wisconsin) Professor of Rural Sociology, Demography, and Sociology
- David Blandford, Ph.D. (Michigan State) Professor of Rural Sociology
- Janelle B. Larson, Ph.D. (Oxford) Associate Professor of Agricultural Economics
- Mark A. Leach, Ph.D. (University of California) Assistant Professor of Rural Sociology and Demography
- A. E. Luff, Ph.D. (Penn State) Professor of Rural Sociology
- Diane K. McLaughlin, Ph.D. (Penn State) Associate Professor of Rural Sociology
- Anouk Patel-Campillo, Ph.D. (Cornell) Assistant Professor of Rural Sociology
- Richard C. Ready, Ph.D. (Wisconsin) Professor of Agricultural and Environmental Economics
- Carolyn Sachs, Ph.D. (Kentucky) Professor of Rural Sociology
- John (Penn State) Research Associate, Consumer Services Information System (CSIS); Co-Director, Consumer Services Information System Project; Co-Director, State Weatherization Program Evaluation Project
- Stephen M. Smith, Ph.D. (Wisconsin) Professor of Agricultural and Regional Economics
- Ann R. Tickamyer, Ph.D. (North Carolina at Chapel Hill) Professor of Rural Sociology; Head, Department of Agricultural Economics and Rural Sociology
- Leland I. Glenna, Ph.D. (Missouri) Associate Professor of Rural Sociology and Science, Technology, and Society
- David Blandford, Ph.D. (Manchester) Professor of Agricultural Economics
- Charles W. Abdalla, Ph.D. (Michigan State) Professor of Agricultural and Environmental Economics
- Theodore R. Allen, Ph.D. (Michigan State) Professor of Agricultural, Environmental, and Regional Economics
- David Blandford, Ph.D. (Manchester) Professor of Agricultural Economics
- Kathryn Brasier, Ph.D. (Wisconsin—Maidson) Associate Professor of Rural Sociology
- Ann Dodd, Ph.D. (Penn State) Associate Professor, Agricultural and Extension Education
- Leland I. Gienna, Ph.D. (Missouri) Associate Professor of Rural Sociology and Science, Technology, and Society
- Stephen J. Goetz, Ph.D. (Michigan State) Professor of Agricultural and Regional Economics
- Francis X. Higdon, Ph.D. (Pittsburgh) Senior Lecturer in Community Development
- Clare Hinrichs, Ph.D. (Cornell) Associate Professor of Rural Sociology
- Leif L. Jensen, Ph.D. (Wisconsin) Professor of Rural Sociology
- Janelle B. Larson, Ph.D. (Oxford) Associate Professor of Agricultural Economics
- Mark A. Leach, Ph.D. (University of California) Assistant Professor of Rural Sociology and Demography
- A. E. Luff, Ph.D. (Penn State) Professor of Rural Sociology
- Diane K. McLaughlin, Ph.D. (Penn State) Associate Professor of Rural Sociology
- Anouk Patel-Campillo, Ph.D. (Cornell) Assistant Professor of Rural Sociology
- Richard C. Ready, Ph.D. (Wisconsin) Professor of Agricultural and Environmental Economics
- Carolyn Sachs, Ph.D. (Kentucky) Professor of Rural Sociology
- John (Penn State) Research Associate, Consumer Services Information System (CSIS); Co-Director, Consumer Services Information System Project; Co-Director, State Weatherization Program Evaluation Project
- Stephen M. Smith, Ph.D. (Wisconsin) Professor of Agricultural and Regional Economics
- Ann R. Tickamyer, Ph.D. (North Carolina at Chapel Hill) Professor of Rural Sociology; Head, Department of Agricultural Economics and Rural Sociology
- Leland I. Glenna, Ph.D. (Missouri) Associate Professor of Rural Sociology and Science, Technology, and Society
- David Blandford, Ph.D. (Manchester) Professor of Agricultural Economics

Admission Requirements

Students with a 3.00 average (on a 4.00 scale) for the most recent two years of college/university education, or with an advanced degree, and with appropriate course and experiential backgrounds will be considered for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, experience, abilities, and interests. The best-qualified applicants will be accepted to the graduate program.

Admission requirements include the following:

- Either (1) a bachelor's degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting institution
- Statement of purpose describing professional experiences and education, career goals, and how the MPS program will enable the applicant to meet their objectives
- Current resume
- Three letters of recommendation
- Two sets of official transcripts from educational institutions attended for undergraduate or graduate degree work
- Test of English as a Foreign Language (TOEFL) score, if applicable. The language of instruction at Penn State is English. All international applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions listed below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, or a total score of 80 with a 19 on the speaking section for the Internet-based test (iBT). Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires completion of specified remedial English courses ESL 114G (American Oral English for Academic Purposes) and/or ESL 116G (ESL/Composition for Academic Purposes) and attainment of a grade of B or higher. The minimum composite score for the IELTS is 6.5.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a graduate degree from a college/university/institution in any of the following: Australia; Belize; British Caribbean and British West Indies; Canada (except Quebec); England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

- Non-refundable application fee

To begin your application, please visit http://www.gradsch.psu.edu/portal/. On the "Campus, Major, Degree & Semester" page select "WORLD CAMPUS" as the campus and "COMMUNITY AND ECONOMIC DEVELOPMENT" as the major.

Scores from the Graduate Record Examinations (GRE) are not required for admission to the MPS CEDEV program. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Prerequisites for the master's program include 12 credits in rural sociology, sociology, agricultural economics, or other social and behavioral sciences at the discretion of the graduate program. If the entering student does not have these prerequisites, they must be made up at the University during the early part of the master's program.
Degree Requirements

The professional Master's degree requires 30 credits including a final integrative assessment/experience. All students complete the required MPS CEDEV core program of community and economic development courses, statistics, and methods. The MPS CEDEV courses consist of CEDEV 430, CEDEV 452, CEDEV 500, CEDEV 505, and CEDEV 509. The statistics, methods, and techniques requirement includes STAT 500 (or equivalent) and CEDEV 575. CEDEV 576 is an optional summer institute focusing on applications and practices for community and economic development. An integrative paper, project, or internship is required where the student demonstrates the capability to integrate and apply concepts, principles, analytical techniques and interpretation skills learned in the program to a real problem faced by a community or community organization. Choice of electives will be based on a plan of study worked out between the student and faculty adviser. There is no foreign language requirement for the degree; however, students planning to work in multi-cultural or international settings are encouraged to gain competency in an appropriate language(s). A total of 18 credits must be 500 level or higher, with at least 6 credits of 500-level course work. This Graduate Council requirement is met through the required courses and the project, internship or paper credits.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

COMMUNITY AND ECONOMIC DEVELOPMENT (CEDEV) course list

Last Revised by the Department: Spring Semester 2011

Chemical Engineering (CH E)

The Graduate Faculty

- Antonios Armou, Ph.D. (UCLA) Associate Professor of Chemical Engineering
- Harry Allcock, Ph.D. (Univ of London) Professor of Chemistry and Evan Pugh Professor
- Kyle Bishop, Ph.D. (Northwestern) Assistant Professor of Chemical Engineering
- Ali Borhan, Ph.D. (Stanford) Professor of Chemical Engineering
- Ralph C. Colby, Ph.D. (Northwestern) Professor of Materials Science and Engineering
- Wayne R. Curtis, Ph.D. (Purdue) Professor of Chemical Engineering and Biotechnology
- Ronald P. Danner, Ph.D. (Lehigh) Professor Emeritus of Chemical Engineering
- Kristin Fichthorn, Ph.D. (Michigan) Merrell R. Fenske Professor of Chemical Engineering
- Henry C. Foley, Ph.D. (Penn State) Vice President for Research and Dean of the Graduate School; Professor of Information Sciences and Technology, and Chemical Engineering
- Enrique D. Gomez, Ph.D. (California, Berkeley) Assistant Professor of Chemical Engineering
- Esther Gomez, Ph.D. (California, Berkeley) Assistant Professor of Chemical Engineering
- Tony Huang, Ph.D. (UCLA) Associate Professor of Engineering Science and Mechanics
- Michael Janik, Ph.D. (Virginia) Chair, Brennan Clean Energy Early Career Professorship in Chemical Engineering
- Seong Han Kim, Ph.D. (Northwestern) Associate Professor of Chemical Engineering
- Wallis Lloyd, Ph.D. (Minnesota) Adjunct Professor of Chemical Engineering
- Bruce Logan, Ph.D. (California, Berkeley) Kappe Professor of Environmental Engineering
- Angela Uecking, Ph.D. (Michigan) Associate Professor of Energy and Mineral Engineering, and Chemical Engineering
- Costas D. Maranas, Ph.D. (Princeton) Donald B. Broughton Professor of Chemical Engineering
- Janna Maranas, Ph.D. (Princeton) Associate Professor of Chemical Engineering
- Themis Matsoukas, Ph.D. (Michigan) Professor of Chemical Engineering
- Scott T. Milner, Ph.D. (Harvard) Joyce Chair Professor of Chemical Engineering
- Joseph Perez, Ph.D. (Penn State) Senior Research Scientist
- Joan Redwing, Ph.D. (Wisconsin) Professor of Materials Science and Engineering
- Robert Roux, Ph.D. (California, Berkeley) Friedrich G. Helfferich Assistant Professor of Chemical Engineering
- Howard M. Salis, Ph.D. (Minnesota) Assistant Professor of Agricultural and Biological Engineering, and Chemical Engineering
- David Snyder, Ph.D. (Carnegie Mellon) Adjunct Professor, Electro-Optics Center
- Chunshan Song, Ph.D. (Osaka) Professor of Fuel Science and Chemical Engineering
- James S. Uttman, Ph.D. (Delaware) Professor Emeritus of Chemical Engineering
- M. Albert Vannice, Ph.D. (Stanford) Professor Emeritus of Chemical Engineering
- Darryl Vitek, Ph.D. (Carnegie Mellon) Professor of Chemical Engineering
- James S. Vrentas, Ph.D. (Delaware) Professor of Chemical Engineering
- Chao-Yang Wang, Ph.D. (Iowa) Distinguished Professor of Mechanical Engineering; Professor of Materials Science and Engineering
- Andrew Zydny, Ph.D. (MIT) Walter L. Robb Endowed Family Chair and Professor of Chemical Engineering

Course offerings and research facilities are available in: bioprocessing, protein engineering, energy and alternative energy, catalysis and kinetics, fluid mechanics, nanotechnology, polymer science and engineering, process control, molecular simulation, systems biology and optimization.

Admission Requirements

Scores from the Graduate Record Examination (GRE) are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

To be admitted, a student should be a graduate of an accredited major in chemical engineering or the equivalent. Graduates of other accredited engineering or physical science majors may be admitted but will be required to make up certain undergraduate deficiencies without graduate credit. Students with a 3.00 junior/senior average (on a 4.00 scale) and appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students.

Master's Degree Requirements

A minimum of 18 course credits is required and must include at least 12 credits in the 500-series chemical engineering courses. A thesis is required. There is no communication or language requirement. Continuous registration is required for all graduate students until the thesis is approved.

Doctoral Degree Requirements

A minimum of 30 graduate course credits is required and must include a minimum of 15 credits of 500-series Chemical Engineering courses taken at the University. There is no communication or language requirement. The comprehensive examination consists of a written research proposal or project defended orally after it has been accepted. Continuous registration is required for all graduate students until the thesis is approved.

Other Relevant Information

Programs leading to a minor in Chemical Engineering are available to both M.S. and Ph.D. candidates who wish to complement studies in their major fields with a broader knowledge of chemical thermodynamics, transport phenomena, and reactor design.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit
these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.
Chemistry (CHEM)

Program Home Page
BARBARA GARRISON, Head of the Department

814-865-6553

Degrees Conferred:
Ph.D., M.S.

The Graduate Faculty

- David L. Allara, Ph.D. (California, Los Angeles) Professor of Polymer Science and Chemistry
- Hugh R. Allcock, Ph.D. (London) Evan Pugh Professor of Chemistry
- James B. Anderson, Ph.D. (Princeton) Evan Pugh Professor of Chemistry
- Anne M. Andrews, Ph.D. (American U) Associate Professor of Molecular Toxicology
- John B. Asbury, Ph.D. (Emory) Assistant Professor of Chemistry
- John V. Badding, Ph.D. (California, Berkeley) Professor of Chemistry
- Alan J. Benesi, Ph.D. (California, Berkeley) Lecturer in Chemistry
- Stephen P. Benovic, Ph.D. (Cornell) Evan Pugh Professor and Eberly Chair in Chemistry
- Philip C. Bevilacqua, Ph.D. (U of Rochester) Professor of Chemistry
- David D. Bohr, Ph.D. (McMaster) Assistant Professor of Chemistry
- J. Martin Bollinger, Ph.D. (MIT) Professor of Biochemistry and Molecular Biology, and Chemistry
- Squire J. Booker, Ph.D. (MIT) Associate Professor of Biochemistry and Molecular Biology, and Chemistry
- A. Welford Castleman, Ph.D. (Polytechnic Institute of Brooklyn) Evan Pugh Professor of Chemistry
- Gong Chen, Ph.D. (Columbia) Assistant Professor of Chemistry
- Andrew G. Ewing, Ph.D. (Indiana U) J. Lloyd Huck Chair in Natural Sciences and Professor of Chemistry
- Kenneth S. Feldman, Ph.D. (Stanford) Professor of Chemistry
- Raymond L. Funk, Ph.D. (California) Professor of Chemistry
- Barbara J. Garrison, Ph.D. (California, Berkeley) Shapiro Professor of Chemistry
- Michael Green, Ph.D. (Chicago) Associate Professor of Chemistry
- Sharon Hammes-Schiffer, Ph.D. (Stanford) Eberly Professor of Biotechnology and Schaffer Professor of Chemistry
- Lasse Jensen, Ph.D. (Riksuniversitet Groningen) Assistant Professor of Chemistry
- Christine Keating, Ph.D. (Penn State) Associate Professor of Chemistry
- Carsten D. Krebs, Ph.D. (Max Planck Institut für Strahlenchernie) Associate Professor of Biochemistry and Molecular Biology, and Chemistry
- Tae-Hee Lee, Ph.D. (Georgia Inst of Tech) Assistant Professor of Chemistry
- Thomas F. Lieb, Ph.D. (California, Berkeley) DuPont Professor of Materials Chemistry
- Mark Maroncelli, Ph.D. (California, Berkeley) Professor of Chemistry
- Przemyslaw Maslik, Ph.D. (Kentucky) Associate Professor of Chemistry
- Bratoljub H. Milosavljevic, Ph.D. (U of Belgrade) Lecturer in Chemistry
- Karl T. Mueller, Ph.D. (California, Berkeley) Professor of Chemistry
- William G. Noid, Ph.D. (Cornell) Assistant Professor of Chemistry
- Scott A. Showalter, Ph.D. (Washington U) Assistant Professor of Chemistry
- Raymond E. Schaal, Ph.D. (Penn State) Associate Professor of Chemistry
- Ayusman Sen, Ph.D. (Chicago) Professor of Chemistry
- Scott A. Shultz, Ph.D. (Washington U) Assistant Professor of Chemistry
- Dan G. Sykes, Ph.D. (U of Alberta) Senior Lecturer and Director
- Steven M. Weinreb, Ph.D. (Rochester) Russell and Mildred Marker Professor of Natural Products Chemistry
- Stephen P. Weiss, Ph.D. (California, Berkeley) Professor of Chemistry
- Mary Beth Williams, Ph.D. (North Carolina, Chapel Hill) Associate Professor of Chemistry
- Nicholas Winograd, Ph.D. (Case Western Reserve) Evan Pugh Professor of Chemistry

The Ph.D. program in Chemistry provides students with a broad background in chemistry and intensive research experience culminating in the preparation of a formal thesis. The goal of the program is to prepare students for a variety of careers in academia, government, or industry. The exceptionally high quality of our laboratory and computer facilities enables us to provide students with outstanding research opportunities. Distinguished visiting scholars conduct informal discussions each week at a departmental colloquium.

The Chemical Biology option introduces graduate students to training with more active, multidisciplinary, and group learning experience. Students in the option will have the opportunity to participate in the Life Sciences Consortium seminars and will have dual mentorship.

Admission Requirements

Scores from the Graduate Record Examination (GRE) are required for admission. In extenuating circumstances, a student may be admitted provisionally for graduate study in the program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

For admission, at least integral calculus plus one year's work in general physics, organic chemistry, physical chemistry, and either analytical or inorganic chemistry are normally required. Students who have appropriate course backgrounds and who present a 2.50 average (on a 4.00 scale) in all undergraduate courses in chemistry, physics, and mathematics will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 2.50 grade-point average may be made for students with special backgrounds, abilities, and interests.

Master's Degree Requirements

The program of the M.S. candidate must include a total of at least 30 graduate-level course credits (CHEM 431W, CHEM 450, CHEM 452, CHEM 457, CHEM 494, and CHEM 500 may not be included in this credit count.)

Additional requirements of the M.S. program are that the candidate must write a thesis and must defend this thesis at an oral examination. The thesis will be accomplished under the sponsorship of a faculty member, and the candidate must schedule at least 6 credits of CHEM 600 (for a thesis) or CHEM 589 (for a research report) to fulfill this requirement. The candidate's attainments under a thesis must be approved by a committee of at least three faculty members, one of whom will be the candidate's sponsor.

Qualifying examinations in analytical, biological, inorganic, organic, and physical chemistry will be given to all new students upon entrance in the fall semester. These exams cover subject matter at the level of the basic courses offered for the B.S. degree in chemistry at Penn State. For certification as an M.S. candidate, proficiency in two areas is required. These must include physical chemistry. Such proficiency may be demonstrated either by (1) passing the area examination upon entrance, or (2) obtaining a grade-point equivalent of 3.0 in at least 3 credits of graduate-level course work in the area. The courses to be used to fulfill this latter option will be designated by the graduate counseling committee. This course work must be completed successfully during the student's first two semesters of residence.

A final oral examination will be administered by a committee consisting of the student's research preceptor and two other faculty members. This examination is scheduled after the M.S. thesis has been completed.
Doctoral Degree Requirements

Candidates for the Ph.D. degree in Chemistry must meet the following requirements established by the department faculty.

A Ph.D. candidate shall be required to take a minimum of five 3-credit courses in chemistry at the 400-500 level (only CHEM 408, CHEM 430, and CHEM 448 can be used). The candidate's doctoral committee may require additional specific courses.

Qualifying examinations in analytical, biological, inorganic, organic, and physical chemistry will be given to all new students upon entrance in the fall semester. These exams cover subject matter at the level of the basic courses offered for the B.S. degree in chemistry at Penn State. As a part of the requirements for certification as a Ph.D. candidate, each student will be expected to demonstrate proficiency in three areas of chemistry, including physical chemistry. Such proficiency may be demonstrated either by (a) passing the area examination upon entrance, or (b) obtaining a grade-point equivalent of 3.0 in at least 3 credits of graduate-level coursework in the area. The courses to be used to fulfill this latter option will be designated by the graduate counseling committee. This coursework must be completed successfully during the student's first two semesters of residence.

In order to qualify for the oral comprehensive examination, a Ph.D. candidate must first obtain a grade of 3.0 or better on 3 credits of CHEM 500 (by writing the requisite number of seminar reports, proposals, and presenting in an area seminar).

A Ph.D. candidate shall take the oral comprehensive examination during his or her first two and one-half years of residency.

Every Ph.D. candidate shall present at least one area or department seminar during the course of residency.

A final oral examination based on a defense of the doctoral thesis is required of all candidates. This exam is given as a formal public seminar with a subsequent closed meeting with the doctoral committee.

Biogeochemistry Dual-Title Degree Program

Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Students in the Biogeochemistry Dual Title program are required to have two advisors from separate disciplines: one individual serving as a primary advisor in their major degree program and a secondary advisor in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework from an approved list of courses is required. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. Chemistry's existing candidacy procedure is to be augmented by a biogeochemistry examination, the structure and timing of this exam will be determined jointly by the dual-title and major program. A single candidacy result is to be reported to the graduate school once this process is complete. The student's doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Candidacy exams must incorporate a biogeochemistry component; for Chemistry students, an oral exam in biogeochemistry will be administered. See the Biogeochemistry Dual Title listing in the Graduate Degree Programs Bulletin for further details regarding program requirements.

Other Relevant Information

All candidates for advanced degrees must schedule CHEM 602, Supervised Experience in College Teaching, for 1 to 2 credits for at least one semester. This requirement may be waived or modified for students who have attained satisfactory competence in teaching as a result of prior experience.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the Student Aid section of the Graduate Bulletin. It is important to note that department policy limits financial support from department funds to the first two years of graduate study of an M.S. candidate and to the first five years of graduate study of a Ph.D. candidate. Financial support beyond these periods is permitted from other than department funds, e.g., a research assistantship funded from an individual faculty member's research grant(s).

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

CHEMISTRY (CHEM) course list
Comparative and International Education (CI ED)

Program Home Page
DAVID P. BAKER, Program Contact; Associate Professor of Education
301A Rackley Building
814-863-0955

Degrees Conferred:
Students earn a dual-title degree in this option through participating programs at either the Ph.D. (or D.Ed.) or the M.A., M.S., M.Ed. level. Students receive a degree which lists their major program and Comparative and International Education.

The Graduate Faculty
- Clemente Abokwaa, Ph.D. (Alberta) Assistant Professor of African and African American Studies
- David P. Baker, Ph.D. (Johns Hopkins) Professor of Education and Sociology
- Katerina Bodovski, Ph.D. (Penn State) Assistant Professor of Education
- Thomas Bruening, Ph.D. (Iowa) Associate Professor of Agricultural and Extension Education
- Liza Conyers, Ph.D. (Wisconsin, Madison) Associate Professor of Education
- Edgar Farmer, Ed.D. (Penn State) Professor of Education
- Roger L. Geiger, Ph.D. (Michigan) Distinguished Professor of Education
- Rukmalie Jayakody, Ph.D. (Michigan) Associate Professor of Human Development and Family Studies, Sociology, and Demography
- Dennis Jett, Ph.D. (Witwatersand, Johannesburg, South Africa) Professor of International Affairs
- James Johnson, Ph.D. (Wayne State) Professor of Education
- Matt Kaplan, Ph.D. (CUNY) Associate Professor of Agricultural and Extension Education
- Gerald LeTendre, Ph.D. (Stanford) Professor of Education
- Beverly Lindsay, Ph.D. (American) Professor of Education
- Sinfree Makoni, Ph.D. (Edinburgh, Scotland) Associate Professor of Applied Linguistics, and African and African American Studies
- Kyle L. Peck, Ph.D. (Colorado, Boulder) Professor of Education
- Suet-ling Pong, Ph.D. (Chicago) Professor of Education, Sociology, and Demography
- David Post, Ph.D. (Chicago) Professor of Education
- Madhu Suri Prakash, Ph.D. (Syracuse) Professor of Education
- Esther Prins, Ph.D. (Cornell) Assistant Professor of Education
- Edwin Rajotte, Ph.D. (Rutgers) Professor of Entomology
- William J. Rothwell, Ph.D. (Illinois) Professor of Education
- Kai Schafft, Ph.D. (Cornell) Assistant Professor of Education
- Ladislaus M. Semali, Ph.D. (California, Los Angeles) Associate Professor of Education
- Raphael Chouse, Ph.D. (Chicago) Associate Professor of Education
- Joseph M. Valente, Ph.D. (Arizona State) Assistant Professor of Education

The Comparative and International Education dual-title degree program option is administered by the Committee on Comparative and International Education. The committee maintains program definition, identifies courses appropriate to the option, develops and administers the program's comprehensive examination, and recommends policy and procedures for the program's operation to the dean of the College of Education and to the dean of the Graduate School. Members of the committee also chair or co-chair the dissertation committees for students electing the dual-title doctoral degree.

The dual-title degree program is offered through participating programs in the College of Education and, where appropriate, other graduate programs in the University. The option enables students from several graduate programs to gain the perspectives, techniques, and methodologies of comparative and international education, while maintaining a close association with program areas of application. Comparative and international education is a field devoted to the systematic analysis of the operation and effects of the world's education systems. For admission to pursue a dual-title degree under this program, a student must apply to (1) the Graduate School; (2) one of the participating graduate major programs; and (3) the Committee on Comparative and International Education.

Admission Requirements
Program candidates will be required to take the Graduate Record Examination, to provide a writing sample, and, where appropriate, a satisfactory TOEFL score, and to submit a written personal statement indicating the career goals they hope to serve by attaining a Comparative and International Education degree.

Degree Requirements
To qualify for a dual-title degree, students must satisfy the requirements of the graduate major programs in which they are enrolled, in addition to the minimum requirements of the Comparative and International Education program.

For the M.A., M.S., or M.Ed. dual-title degree in Comparative and International Education, the minimum course requirements are: 3 credits in the required Proseminar in Comparative and International Education; 6 credits in advanced Comparative and International Education courses; 12 credits in Comparative and International Education content courses. Candidates for the dual-title master's degree in Comparative and International Education will also be required to pass a written comprehensive examination based on a set of core readings established by the committee.

A master's thesis or master's paper is required, depending upon the student's graduate major program; the supervisor of which must be a member of the graduate faculty recommended by the chair of the program granting the degree and approved by the Committee on Comparative and International Education as qualified to supervise work in Comparative and International Education.

The minimum course requirements for the Ph.D. (or D.Ed.) dual-title degree in Comparative and International Education are: 3 credits in the Proseminar in Comparative and International Education; 6 credits in advanced Comparative and International Education courses; 12 credits in Comparative and International Education content courses or courses with comparative or international content; and 6 credits in research methods. Students are expected to be fluent in reading, writing, and speaking English, and must demonstrate competency in reading a language other than English, preferably a language relevant to a country or geographic area they propose to study. (This foreign language requirement can be satisfied by passing the appropriate ETS Language Achievement Test, or by passing the appropriate Penn State foreign language course.) A minimum of 18 credits must be 500-level course, and particular courses may satisfy both the graduate major program requirements and those in the Comparative and International Education program. Candidates for the dual-title doctoral degree in Comparative and International Education will also be required to pass a written comprehensive examination based on a set of core readings established by the committee.

A Ph.D. (or D.Ed.) minor program in Comparative and International Education is available to doctoral students who find it desirable to include the perspectives and methodologies of Comparative and International Education in their programs and have been approved to do so by their doctoral committees. To qualify for a minor in Comparative and International Education, students must satisfy the requirements of their graduate major programs, and meet the following minimum requirements in Comparative and International Education: 3 credits in the Proseminar in Comparative and International Education course; and 6 credits in Comparative and International Education content courses (or advanced courses) or in courses with comparative or international content offered outside the College of Education.

The Pennsylvania State University
The doctoral dissertation committee of a Ph.D. (or Ed.D.) dual-title degree student is recommended, in conjunction with the Comparative and International Education committee, by the graduate major program granting the degree. The chair and at least two members of a doctoral committee must be members of the graduate faculty. The chair or co-chair of the dissertation committee must be a member of the Comparative and International Education committee.

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
- Ph.D., M.A.
- Integrated B.A./M.A. Program in Comparative Literature

The Graduate Faculty

- Jonathan Abel, Ph.D. (Princeton) Assistant Professor of Comparative Literature and Asian Studies
- Andrea Bachner, Ph.D. (Harvard) Assistant Professor of Comparative Literature and Asian Studies
- Mary Barnard, Ph.D. (Michigan) Associate Professor of Spanish and Comparative Literature
- Thomas O. Beebee, Ph.D. (Michigan) Distinguished Professor of Comparative Literature and German
- Kevin J. H. Berland, Ph.D. (McMaster) Associate Professor of English
- Patrick G. Cheney, Ph.D. (Toronto) Distinguished Professor of English and Comparative Literature
- Jonathan P. Ebner, Ph.D. (Penn) Associate Professor of Comparative Literature and English
- Josephine Berry Weiss Early Career Professor in the Humanities

- Caroline D. Eckhardt, Ph.D. (Michigan) Professor of Comparative Literature and English
- Robert Edwards, Ph.D. (California, Riverside) Edwin Erle Sparks Professor of English and Comparative Literature
- Nergis Erûrk, Ph.D. (Columbia) Assistant Professor of Comparative Literature
- Charlotte Eubanks, Ph.D. (Colorado) Assistant Professor of Comparative Literature and Asian Studies
- Kathyn M. Grossman, Ph.D. (Yale) Professor of French
- Thomas A. Hale, Ph.D. (Rochester) Edwin Erle Sparks Professor of African, French, and Comparative Literature
- Eric Hayot, Ph.D. (University of Wisconsin-Milwaukee) Professor of Comparative Literature and Asian Studies

- Linda J. Ivanits, Ph.D. (Wisconsin) Professor of Russian and Comparative Literature
- Djelal Kadir, Ph.D. (New Mexico) Edwin Erle Sparks Professor of Comparative Literature
- Sophia A. McClennen, Ph.D. (Duke) Professor of Comparative Literature, Spanish, and Women's Studies; Affiliate Faculty, School of International Affairs

- Philip Mosley, Ph.D. (East Anglia) Professor of English, Communications, and Comparative Literature
- John Ochoa, Ph.D. (Yale) Associate Professor of Spanish and Comparative Literature
- Steven Putzei, Ph.D. (Toronto) Associate Professor of English
- Dennis Schmidt, Ph.D. (Boston College) Liberal Arts Research Professor of Philosophy, Comparative Literature, and German

- Allan Steokl, Ph.D. (SUNY) Professor of French and Comparative Literature

- Reiko Tachibana, Ph.D. (Penn State) Associate Professor of Comparative Literature, Japanese, and Asian Studies

- Charlotte Eubanks, Ph.D. (Colorado) Assistant Professor of Comparative Literature and Asian Studies
- Nergis Erûrk, Ph.D. (Columbia) Professor of Russian and Comparative Literature

Graduate programs in Comparative Literature combine a core of comparative literature requirements with courses in selected literatures and further comparative courses, according to each student's interests. For example, programs of study can concentrate on such topics as genres, themes, periods, movements, folk tale and oral literature, criticism, and the links between literature and related fields such as theatre or women's studies.

The M.A. is a general humanistic degree that helps prepare students for a variety of situations, including teaching in private high schools or community colleges, or further graduate work. The Ph.D. is a more specialized degree. The Ph.D. in comparative literature can be combined with a minor in a professional field such as teaching English as a second language. Another potential combination is our dual-title Ph.D. in Comparative Literature and Asian Studies.

Only the faculty members and courses officially associated with the Department of Comparative Literature are listed here. Faculty members and courses in other departments are also available to comparative literature students according to their preparation.

Admission Requirements
Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students with appropriate course backgrounds and a 3.00 junior/senior average (on a 4.00 scale) will be considered for admission. The admission process is highly competitive and the best qualified students will be admitted subject to space availability. Students with a degree from an institution where the language of instruction is English must supply the GRE, all others must supply TOEFL. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a graduate degree from the college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales. Those international students who provide TOEFL scores do not need to provide the GRE. Most students who do graduate work in comparative literature hold a B.A. or M.A. degree in comparative literature or in a particular language and literature. Students completing degrees in such fields are welcome to apply—as are students in other humanistic fields, such as philosophy or science, if they have studied literature.

For admission to the M.A. program, students should be prepared to study at least two foreign literatures in their own language. Doctorate-seeking students usually complete the M.A. before being formally admitted to the Ph.D. program, but exceptional students may be admitted from the B.A. level directly to the Ph.D. Students are encouraged to plan a unified M.A./Ph.D. program if they take both degrees here; however, Ph.D. applications are welcomed from students holding or completing an M.A. elsewhere.

Master's Degree Requirements
Requirements for the M.A. in comparative literature include 6 credits of CMLIT 501(1-6), CMLIT 502(3) CMLIT 503(3); 3 further credits in comparative literature courses and other literature courses (18 credits); a master’s paper; and proficiency in two foreign languages (one at the level that permits thorough literary analysis of texts, the other at the level of reading proficiency). Students are expected to take coursework in non-Anglophone literatures (at least 6 credits), but the exact number of non-Anglophone courses is to be determined in the plan of study by the Director of Graduate Studies.

Doctoral Degree Requirements
Requirements for the Ph.D. in comparative literature include (1) CMLIT 501 (6 credits), CMLIT 502 (3 credits), and CMLIT 503 (3 credits)—with substitute courses if these have been used in the M.A. program; (2) at least an additional 21 credits in literature courses, including course work in the three languages that the student selects, with emphasis on the student's primary literature—students should organize their course work, as much as possible, around a unifying principle, such as genre, period, or theme; (3) a candidacy examination; (4) proficiency in two foreign languages; (5) a comprehensive examination; and (6) a dissertation.

On item (4), the foreign languages are to be prepared at a level that permits thorough literary analysis of texts and related material in those languages.

Other Relevant Information
The Pennsylvania State University
Students pursuing a graduate degree in comparative literature have individualized programs of study within the requirements specified above. For example, one student may emphasize film and new media; another, the novel. One student may concentrate on earlier literatures; another, on international modernism. One student may be interested primarily in the European tradition; another, in literatures. In such a program, the relationship between student and adviser is important. Each graduate student works with faculty advisers familiar with comparative studies as a whole and with the student's particular area of interest.

Student Aid
Teaching assistantships in the Department of Comparative Literature, as well as in related language and literature departments, typically have been available to students taking comparative literature degrees. In recent years, Comparative Literature students have held assistantships in Arabic, Chinese, English, French, German, Hebrew, Italian, Japanese, Russian, Spanish, Swahili, and Women’s Studies, as well as in Comparative Literature courses. There also is a graduate assistantship position for an editorial assistant to the journal Comparative Literature Studies, which is edited in the department. In addition to the fellowships, graduate assistantships, and other forms of financial aid described in the Student Aid section of the Graduate Bulletin, the following awards typically have been available to graduate students in this program:

SAMUEL P. BAYARD AWARD
Available annually to a graduate student in comparative literature, selected by the graduate committee of the Department of Comparative Literature. Amount varies.

EDWIN ERLE SPARKES FELLOWSHIPS IN THE HUMANITIES (8)
Available to beginning and continuing graduate students in the following graduate programs: Comparative Literature, English, French, German, History, Philosophy, Spanish, and Communication Arts and Sciences.

FOLGER INSTITUTE FELLOWSHIPS
Penn State is a member of the Folger Institute of Renaissance and Eighteenth-Century Studies. Graduate students in Comparative Literature are eligible for Folger Institute Fellowships to study in seminars and workshops at the Folger Library, Washington, D.C.

Title VI Center for Global Studies ASSISTANTSHIP
Available to beginning and continuing graduate students in Comparative Literature and other programs.

Integrated B.A./M.A. Program in Comparative Literature (CMLIT)
The Department of Comparative Literature offers an integrated B.A./M.A. program that is designed to allow academically superior baccalaureate students to obtain both the B.A. and the M.A. degrees in Comparative Literature within five years of study. The first two years of undergraduate course work include the University General Education and Liberal Arts requirements in addition to language and literature study in the major. In the third year, students are expected to define areas of interest in two primary literatures in different languages. In addition, students in the B.A./M.A. program should begin to undertake work in a second foreign language. The fourth year includes graduate-level work in methodology and the student’s selection of primary literatures, which replaces comparable 400-level senior year courses. The fifth and final year of the program typically consists of graduate work in Comparative Literature courses as well as the chosen literatures. The program culminates with an M.A. paper.

By encouraging greater depth and focus in the course of study beginning in the third undergraduate year, this program helps students more clearly define their area of interest and expertise in the otherwise vast field of international literatures. As a result, long-range academic planning for exceptional students pursuing doctoral degrees after leaving Penn State, or other professional goals, will be greatly enhanced. The student may also be more competitive in applying for admission to Ph.D. programs as well as for institutional and national grant monies and scholarships.

Admission Requirements
The number of openings in the integrated B.A./M.A. program is limited. Admission is selective based on specific criteria and the unqualified recommendation of faculty. Applicants to the integrated program:

1. Must be enrolled in the Comparative Literature B.A. program.
2. Must have completed 60 credits of the undergraduate degree program. (It is strongly suggested that students apply to the program prior to completing 100 credits.)
3. Must be accepted without reservation into the M.A. program in Comparative Literature.
4. Should have a recommended overall GPA of 3.2 (on a 4.0 scale) in undergraduate coursework and a minimum GPA of 3.5 in all coursework completed for the major.
5. Must present a departmentally approved plan of study in the application process.
6. Must be recommended by the chairs of the Department’s undergraduate and graduate committees.

A typical sequence of coursework for the integrated program would appear as follows:

**Year One:** 6 credits: CMLIT 010
- 6 credits: CMLIT 100

**Year Two:** 6 credits: Foreign Language (beyond the 12-credit level)
- 6 credits: Courses in Literature

**Year Three:**

- 9 credits: 400-level courses in Literature, including CMLIT 400Y
  (variable credits) Work in foreign language (credits do not count towards the major, but reading proficiency is required for the M.A. degree)

**Year Four:**

- 3 credits: CMLIT 501, 502, and/or 503
- 6 credits: Comparative Literature courses
- 6-9 credits: 500-level courses in Literatures (at least 3 credits in non-Anglophone literature)

**Year Five:**

- 3 credits: CMLIT 501, 502, and/or 503
- 9-12 credits: 500-level courses in Literatures (at least 3 credits in non-Anglophone literature)
- 6 credits: 500-level Comparative Literature Courses M.A. paper
Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

COMPARATIVE LITERATURE (CMLIT) course list

[1] A student enrolled in this major must receive a grade of C or better, as specified in Senate Policy 82-44.

Degrees Conferred:
Ph.D., D.Ed., M.S., M.Ed.

The Graduate Faculty

- Kathleen J. Bieschke, Ph.D. (Michigan State) Professor of Counseling Psychology
- Jo Lynn V. Carney, Ph.D. (Ohio) Associate Professor of Counselor Education
- Liza M. Conyers, Ph.D. (Wisconsin-Madison) Associate Professor of Rehabilitation and Human Services
- Catharina (Tineke) J. Cunningham, Ph.D. (Penn State) Affiliate Assistant Professor of Counselor Education
- Lois A. Ehmann, Ph.D. (Penn State) Adjunct Assistant Professor of Counselor Education
- Jeffrey A. Hayes, Ph.D. (Maryland) Professor of Counseling Psychology
- Richard J. Hazler, Ph.D. (Idaho) Professor of Counselor Education
- James T. Herbert, Ph.D. (Wisconsin-Madison) Professor of Education, and Rehabilitation and Human Services
- Brandon Hunt, Ph.D. (Virginia) Professor of Rehabilitation and Human Services
- W. Terrell Jones, D.Ed. (Penn State) Affiliate Assistant Professor of Counselor Education
- Margaret Lorah, D.Ed. (Penn State) Affiliate Assistant Professor of Counselor Education
- Elizabeth A. Mellin, Ph.D. (Ohio) Assistant Professor of Counselor Education
- Spencer G. Niles, D.Ed. (Penn State) Distinguished Professor of Counselor Education
- Deirdre O'Sullivan, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of Rehabilitation and Human Services
- Robert M. Ondorf, Ph.D. (Penn State) Affiliate Assistant Professor of Counselor Education
- Jack R. Rayman, Ph.D. (Iowa) Affiliate Professor of Education and Counseling Psychology
- Elizabeth A. Skowron, Ph.D. (SUNY, Albany) Associate Professor of Counseling Psychology
- Robert B. Slaney, Ph.D. (Ohio State) Professor of Counseling Psychology
- Jerry Trusty, Ph.D. (Mississippi State) Professor of Counselor Education
- Keith B. Wilson, Ph.D. (Ohio State) Associate Professor of Rehabilitation and Human Services
- Susan S. Woodhouse, Ph.D. (Maryland) Assistant Professor of Counseling Psychology

Professional preparation is offered at the master's level for school counselors (elementary and secondary) and rehabilitation counselors. Credits required by different master's options vary from 51 to 54. Specifically, program specializations at the master's level include elementary school counseling (54 credit hours), secondary school counseling (54 credit hours), and rehabilitation counseling (51 credit hours).

The Ph.D. program prepares candidates for positions as counselor education faculty members and consists of a minimum of four academic years of graduate level preparation (including master's-level preparation), defined as eight semesters, with a minimum of 96 graduate-level credits required of all students in the program. The D.Ed. program helps students prepare to become supervisors of counseling services and requires 61 credit hours beyond the master's degree in counselor education.

Admission Requirements

Scores from the Graduate Record Examination (GRE) are required for admission to the Ph.D. program. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students with a 2.50 junior/senior average (on a scale of 4.00) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 2.50 grade-point average may be made for students with special backgrounds, abilities, and interests. All doctoral applicants should present at least a 3.33 average in all graduate study completed prior to admission.

All doctoral applicants must have completed a master's degree in counselor education prior to admission in the Ph.D. or D.Ed. program. The master's degree must be comprised of 48 credit hours as specified by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). Post-master's counseling experience is required for admission to the D.Ed. program.

Degree Requirements

All candidates are expected to exhibit, in addition to academic competence, effectiveness in interpersonal relations and in both written and oral communication. They also must provide evidence support of professional counseling activities and involvement in professional organizations. All degree options require students to participate in extensive practicum or fieldwork experience under supervision.

The Ph.D. program includes 76 credit hours beyond the master's degree in counselor education. The master's degree must be comprised of 48 credit hours as specified by CACREP. Ph.D. students must satisfy advanced degree requirements in the CACREP counselor education core areas (31 credit hours including a counseling and teaching internship), a minor field of study (15 credit hours), and empirical foundations (15 credit hours). Students in the Ph.D. program are expected to complete a dissertation involving independent and original research. Students are expected to use theoretical models of counseling to investigate problems of importance to the field. The addition of credits in the Ph.D. program incorporate advanced coursework in research design, statistics, and counseling. Students are expected to prepare students for their subsequent roles as faculty members in counselor education programs.

The D.Ed. Program includes 61 credit hours beyond the master's degree in counselor education. Students in the D.Ed. program in Counselor Education must satisfy degree requirements in core counselor education courses (19 credit hours), empirical foundations (12 credit hours), and a counseling specialty area (15 credit hours) such as: career guidance, administration, planning, and management in service delivery settings. D.Ed. students must complete a dissertation (15 dissertation credit hours) that is of practical significance to the delivery or administration of counseling services.

Candidacy Examination

All Ph.D./D.Ed. students are required to have a master's degree in counselor education prior to admission. After completion of 12 credits of doctoral study, which may allow the student to take the candidacy examination as early as the second semester in their doctoral program, Ph.D. and D.Ed. students may take a candidacy examination. Given the requirement that doctoral students will have a master's degree in counselor education thereby demonstrating their ability to complete graduate work successfully, the nature of the candidacy examination will include a review of the following by the student's candidacy committee: (1) the student's professional resume, (2) a statement regarding the general direction of the student's research interests and possible areas of dissertation inquiry, (3) grades from completed graduate courses, (4) proposed course of study for subsequent semesters, (5) selected graduate papers written by the student, and (6) a statement regarding the student's professional goals. In the candidacy examination, the student's candidacy committee determines the student's ability to continue in the program and to conduct doctoral research.

Comprehensive Examination

Both Ph.D. and D.Ed. candidates are required to take a written and oral comprehensive examination once their course work is completed (or when they are in their final semester of required coursework) and prior to the dissertation. The examination, prepared by the student's doctoral committee, covers all areas of the student's doctoral work. The comprehensive examination for Ph.D. students must include an assessment of the student's competence related to
conducting independent and original research.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

CORE COURSES for Counselor Education Ph.D Program:

COUNSELOR EDUCATION (CN ED)

502. Advanced Counseling Theory (3)
554. Cross-Cultural Counseling (3)
555. Career Counseling (3)
580. Foundations of Counselor Education Seminar (3)
581. Professional Issues Seminar (3)
582. Advanced Group Psychotherapy (3)
589. Seminar on Counseling Supervision (1)
595D. Supervision of Counselors (3)
595I. Teaching Internship (3)
595K. Doctoral Counseling Internship (3)
595P. Counselor Education Doctoral Practicum (3)

CORE COURSES for Counselor Education D.Ed. Program:

COUNSELOR EDUCATION (CN ED)

554. Multicultural Counseling (3)
580. Foundations: History and Trends in Counselor Education (3)
581. Professional Issues in Counselor Education (3)
589. Seminar on Counseling Supervision (1)
595D. Supervision of Counselors (3)
595P. Counselor Education Doctoral Counseling Practicum (3)
595K. Counselor Education Doctoral Counseling Internship (3)

cppic@psu.edu

Degrees Conferred:
Ph.D.

The Graduate Faculty
- Kathleen J. Bieschke, Ph.D. (Michigan) Professor of Counseling Psychology
- JoLynn V. Carney, Ph.D. (Ohio) Associate Professor of Counseling Education
- Lisa M. Conyers, Ph.D. (Wisconsin-Madison) Associate Professor of Rehabilitation and Human Services
- Jeffrey A. Hayes, Ph.D. (Maryland) Professor of Counseling Psychology
- Richard J. Hazel, Ph.D. (Idaho) Professor of Counselor Education
- Dennis E. Heitzmann, Ph.D. (Texas) Affiliate Associate Professor of Counseling Psychology
- James T. Herbert, Ph.D. (Wisconsin, Madison) Professor of Education and Rehabilitation and Human Services
- Brandon Hunt, Ph.D. (Virginia) Professor of Rehabilitation and Human Services
- Joyce K. Illfelder-Kaye, Ph.D. (Ohio State) Affiliate Associate Professor of Counseling Psychology
- Benjamin D. Locke, Ph.D. (Boston College) Affiliate Assistant Professor of Counseling Psychology
- Margaret Lorah, D.Ed. (Penn State) Affiliate Assistant Professor of Counselor Education
- Mary McClanahan, Ph.D. (Penn State) Adjunct Assistant Professor of Counseling Psychology
- Janet McCracken, Ph.D. (Ohio State) Adjunct Assistant Professor of Counseling Psychology
- Elizabeth Mellin, Ph.D. (Ohio) Assistant Professor of Counselor Education
- Spencer G. Niles, D.Ed. (Penn State) Distinguished Professor of Counselor Education
- Jack R. Rayman, Ph.D. (Iowa) Affiliate Professor of Education and Counseling Psychology
- Elizabeth A. Skowron, Ph.D. (Albany) Associate Professor of Counseling Psychology
- Robert B. Slaney, Ph.D. (Ohio State) Associate Professor of Counseling Psychology
- Jerrod G. Trusty, Ph.D. (Mississippi State) Professor of Counseling Education
- Keith B. Wilson, Ph.D. (Ohio State) Professor of Rehabilitation and Human Services
- Susan S. Woodhouse, Ph.D. (Maryland) Assistant Professor of Counseling Psychology

The Ph.D. in Counseling Psychology is fully accredited by the American Psychological Association and approved by the Pennsylvania Board of Psychologist Examiners. This degree program is designed to train counseling psychologists in a multiculturally infused scientist-practitioner model. Graduates of this program are automatically entitled to sit for the psychology licensure examination in Pennsylvania and in most other states. Requirements vary from state to state so students desiring licensure in other states must determine the requirements of the state in which they intend to practice, although graduation from an A.P.A.-approved doctoral training program in counseling psychology is ordinarily sufficient to qualify to sit for a state licensure examination as a psychologist.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

All candidates for the Ph.D. in Counseling Psychology must possess a master's degree program, the content of which is relevant to counseling psychology (e.g., rehabilitation counseling, counselor education, clinical or general psychology). Doctoral candidates should present a 3.33 average in all graduate study completed.

Degree Requirements

In addition to academic competence, all candidates are expected to exhibit effectiveness in interpersonal relations and in both written and oral communication. They also must evidence support of professional counseling activities and organizations.

Ph.D. students in Counseling Psychology must satisfy degree requirements in statistics and research design, general psychology foundations, and counseling psychology core courses. In addition, students participate in extensive practicum, research teams, and internship experiences under supervision. Art of the requirements for the Ph.D., all students must complete an approved internship in a counseling center or other facility meeting criteria set by the American Psychological Association.

The communication and foreign language requirement for the Ph.D. degree may be satisfied by a comprehensive knowledge of one foreign language and courses from other designated areas, or by options from designated areas selected to include competence in statistics, research design, computer application, or measurement.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

COUNSELING PSYCHOLOGY (CNPSY) course list

Date last reviewed by Graduate School: 04/12/04
Last updated by Publications: 3/2/12
Students following the track in software engineering will be provided with the conceptual tools needed for designing and developing large software systems. In addition to the required core, the track in software engineering consists of the following courses: COMP 513, COMP 519, and COMP 527. This option requires: 6 credits of COMP 594, 3 credits of COMP 595, 3 additional credits from approved 500-level electives in computer science, mathematics, engineering, and information systems courses and 9 credits from approved 400- and 500-level electives in computer science, mathematics, engineering, and information systems courses.

Suggested Tracks

For students with interests in the areas of software engineering, systems programming, and artificial intelligence, the program suggests the following course work. These tracks are only advisory—there is no requirement that a student follow any track, and tracks will not be noted on diplomas or transcripts.

**Track in Software Engineering:** Students following the track in software engineering will be provided with the conceptual tools needed for designing and managing large software systems. In addition to the required core, the track in software engineering consists of the following courses: COMP 513, COMP 516, INFSY 570. In addition to these courses, CMPS 470 is highly recommended, as compiler development is an ideal environment for gaining practical experience with software engineering technologies and tools.

**Track in Systems Programming:** Students following the track in systems programming will receive instruction in both the conceptual foundation of systems software and the implementation of such systems. In addition to the required core, the track in systems programming consists of the following courses: COMP 520, COMP 524, COMP 556.

**Track in Artificial Intelligence:** Students following the track in artificial intelligence are expected to gain an understanding in the theory and applications of AI methods as well as evolutionary methods for solving a variety of problems. In addition to the required core, the track in artificial intelligence consists of the following courses: COMP 436, COMP 517, and COMP 545.

Additional Information

For further information, see: [http://cs.hbg.psu.edu](http://cs.hbg.psu.edu)

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

[COMPUTER SCIENCE (COMP) course list](http://cs.hbg.psu.edu)

The Pennsylvania State University
Integrated B.S./M.S. Program in Computer Science

The Computer Science program offers a limited number of academically superior Bachelor of Science candidates the opportunity to enroll in an integrated, continuous program of study leading to both the Bachelor of Science and the Master of Science in Computer Science. The ability to coordinate as well as concurrently pursue the two degree programs enables the student to earn the two degrees in five years.

Students in the IUG program must satisfy the degree requirements for both Bachelor of Science and Master of Science degrees. However, the total course load is reduced due to the maximum of 12 credits that can count towards both degrees. A minimum of 6 credits proposed to count for both degrees must be at the 500 level. Thesis credits may not be double counted. The first two years of the IUG program are identical to the first two years of the Bachelor of Science program. The third and fourth years of the IUG program differ from those of the Bachelor of Science program due to the courses that count toward the Master of Science degree requirements. Student performance will be monitored on an on-going basis. In addition, a formal evaluation of student academic performance will be performed when the student has completed 100 to 105 credits, which is at the end of the first semester of the senior year for a typical student in the program. Students who have not maintained a 3.5 GPA in their Math and Computer Science courses will be put on probationary status with respect to the IUG program. Their ability to continue in the IUG program will be based on their academic performance in the last semester of their senior year. As part of the review in the senior year, students will be advised about the paper option and thesis option in the graduate program. Students intending to pursue the thesis option would be advised to do so only if they have been doing very well in the program and are in no danger of not being able to continue into the fifth year. A minimum grade point average of 3.5 must be earned in all math and computer science course work that is applied toward the graduate degree. This includes any courses that count toward both the undergraduate and graduate degrees, as well as all courses taken during the fifth year. Students have the choice of receiving the B.S. degree at the end of the fourth year or waiting until the end of the fifth year to receive both degrees. Students who elect to receive the B.S. degree at the end of the fourth year will pay graduate tuition for courses taken in the fifth year; students opting to receive both degrees at the end of the fifth year will pay undergraduate tuition for all five years. Note that students who are awarded a graduate assistantship must elect to receive the B.S. degree at the end of the fourth year. If for any reason a student admitted to the IUG program is unable to complete the requirements for the Master of Science degree, the student will be permitted to receive the Bachelor of Science degree assuming all the undergraduate degree requirements have been satisfactorily completed. Students who successfully complete the courses listed in the recommended schedule will satisfy the requirement for the Bachelor of Science degree by the end of their fourth year.

Admission Requirements

To initiate the application process, students must submit an Integrated Undergraduate-Graduate (IUG) Degree in Computer Science Application Form, a transcript, and a faculty recommendation, in addition to applying for admission to the Graduate School. A faculty advisor will help undergraduate candidates determine a sequence of courses that will prepare them for acceptance into the Integrated Undergraduate-Graduate (IUG) degree program. In order to apply for the IUG program, students must have completed a minimum of 45 credits. A typical student would apply after completing between 45 to 60 credits, that is, after the fourth semester and before the end of the fifth semester. For consideration for acceptance into the program, students must have completed and earned a minimum grade point average of 3.0 in the following Computer Science and Mathematics courses: MATH 140, MATH 141, MATH 220, CMPSC 121, CMPSC 122, and CMPSC 360. Student applications will be evaluated based on their overall academic performance, in addition to the above requirements. In all cases, admission to the program will be at the discretion of the Graduate Admissions Committee in Computer Science.

Degree Requirements

Students in the IUG program must satisfy the degree requirements for both Bachelor of Science and Master of Science degrees. The total course load is reduced due to the maximum of 12 credits that can count towards both degrees. The minimum of 6 credits double-counted must be at the 500 level. Thesis credits may not be double counted.

The Pennsylvania State University
Community Psychology and Social Change (CP&SC)

Program Home Page

HOLLY ANGELIQUE, Coordinator
W-157 Olmsted Building
Penn State Harrisburg
777 W. Harrisburg Pike
Middletown, PA 17057-4898

Degrees Conferred:

Master of Arts in Community Psychology and Social Change

The Graduate Faculty

- Holly Angelique, Ph.D. (Michigan State) Associate Professor of Community Psychology
- Ken Cunningham, Ph.D. (CUNY) Associate Professor of Sociology
- Kamini Maraj Grahame, Ph.D. (Toronto) Associate Professor of Community Psychology and Social Change
- Senel Poyrazli, Ph.D. (Houston) Associate Professor of Counseling Psychology
- Chiara Samba, Ph.D. (Loyola, Chicago) Assistant Professor of Social Sciences

The graduate program in Community Psychology leads to a master of arts degree in Community Psychology and Social Change with concentration in
Children, Youth, and Family; Environmental Issues; and Individualized Studies. The nontraditional program emphasizes planned social change, and is based
on both sociology and psychology. The program equips students with skills useful in coping with the multifaceted problems facing communities. Students
learn (a) to assess problems at the level of communities or organizations, (b) to plan and implement possible solutions to these problems, and (c) to evaluate
the effectiveness of the solutions. Learning takes place both in courses and in a master's project that entails fieldwork and the writing of a master's paper.

To act as a change agent, the student must be aware of contemporary community needs, along with the impact of the community structure upon its
individual members, and the techniques best suited to initiate productive changes. After completing this interdisciplinary program, the graduate should be
able to approach problems with a more integrated point of view and work cooperatively with community individuals and agencies toward practical solutions.
Problems related to crime, education, child and family development, employment, the lack of effective social power, and other factors affecting psychological
well being are approached from bases in community service agencies or informal community groups. The majority of students work full-time in agencies or
governmental units. To accommodate these working students, 500-level graduate courses are scheduled in the evening.

Admission Requirements

Requirements listed below are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

For admission to the program, a student must have a baccalaureate degree from an accredited academic institution, earned under residence and credit
conditions equivalent to those required by Penn State. The minimum grade-point average (GPA) in the junior and senior years must be 3.00 or higher (on a
4.00 scale). Students with experience in carrying out planned social change are particularly encouraged to apply. Most applicants hold degrees in
psychology, sociology, or related disciplines. Ideally, applicants will have taken courses in developmental, personality, and social psychology, along with
work in social change, social problems, and social conflict. Students from diverse other backgrounds are welcome to apply, particularly if they have had work
or other experience affecting change in community settings. Applicants will be asked to take additional course work without graduate credit, chosen after
consultation with an adviser, if they have had no psychology or sociology courses beyond the introductory level. Applicants must have received a C or better
in an introductory statistics course covering parametric and non-parametric inferential statistics; they will be requested to make up any deficiency without
graduate credit.

Admission to the Community Psychology program is based on clear suitability for the program as evidenced by the application as a whole; it is limited to the
number of spaces available for masters project supervision.

Applicants must submit the following:

1. A completed application form and application fee.
2. Two copies of official transcripts from colleges or universities previously attended (including Penn State).
3. Admission Essay: We are interested in learning something about your writing and analytical abilities, and about you as a person. Please take two to
six double-spaced pages to answer the following question.

   C. Wright Mills wrote: "The sociological imagination enables its possessor to understand the larger historical scene in terms of its meaning for
   the inner life and the external career of a variety of individuals….The sociological imagination enables us to grasp history and biography and
   the relations between the two within society. That is its task and its promise. To recognize this task and this promise is the mark of the classic
   social analyst...." Discuss the intersection of your biography with history and society. How have the society and the times in which you live helped to shape who
   you are? What do you hope to accomplish in life? How do you think our graduate program will help you to reach your goals?

- A letter of about 500 words outlining significant community or work experience, along with career and academic objectives.
- Three professional letters of recommendation, special forms provided. Please include at least two essays from academic sources.

Program Requirements

An important part of this degree is a master's project, made up a total of 9 credits, comprising from 3 to 6 credits of Practicum (CMPSY 522), and from 3 to 6
credits of Research (CMPSY 594). The project is planned in the context of the course Roles and Methods in Community Psychology (CMPSY 521); it is
supervised by a master's committee of graduate faculty. The particular mix of practicum and research is worked out by the student in consultation with the
faculty. The variable mix of practicum and of research credits results in the student's being able to choose course work that emphasizes study in the area in
which she or he needs most skill-development. In the usual case, a student with a strong background in fieldwork would be asked to emphasize research in
her or his master's project, and a student with a strong research background, but with limited fieldwork, would be asked to emphasize the practicum. The
output of CMPSY 522 is a practicum; the output of the research course CMPSY 594 is a required master's paper of at least 3 credits. The master's paper may be
based on the field experience. Students often choose to structure their master's paper around a specific community research problem. Again, students
may apply for Practicum (522) credit, or, at their choice, ask for a waiver of the requirement, on the basis of documented prior experience. Decisions about
such applications are made by the student's master's committee.

Part-time students who are able to take two courses at a time can complete the degree in seven to eight semesters. Since the processes of designing a
master's project and of writing a master's paper are labor-intensive and frequently take more time than the student expects, even full-time students will

The Pennsylvania State University
often take six or more semesters to complete the degree. The program offers three concentrations, each including all the required Community Psychology courses. The Children, Youth, and Families Concentration uses its electives 9 approved credits from courses in psychology, education, and sociology. The Environmental Issues Concentration uses electives approved by an adviser and drawn from special courses in environmental issues and from various other programs. The Individualized Concentration uses as its elective courses chosen to meet individual needs, with the approval of an adviser.

Graduation Requirements

To qualify for the degree, 36 credits are needed, 24 of which must be at the 500 level. There is a sequence of substantive courses, starting with Theories and Issues in Community Psychology (CMPSY 500).

Required Courses (27 credits)

COMMUNITY PSYCHOLOGY (CMPSY)
- 500. Theories and Issues in Community Psychology (3)
- 510. Change Processes (3)
- 511. Social Impacts on Psychological Functioning (3)
- 519. Research Methods I (3)
- 520. Research Methods II (3)
- 521. Roles and Methods in Community Psychology (3)
- 522. Practicum (3-6)
- 594. Master's Paper (3-6)

Elective Courses (9 credits)

Concentrations

In addition to the core curriculum, students will complete the requirements of one of the three concentrations described below:

Children, Youth, and Families Concentration

Students working toward a Master of Arts degree in Community Psychology and Social Change with this concentration must complete three of the following courses. Students should check for prerequisites when deciding on which courses to take.

EDUCATION (EDUC)
- 404. Young Children's Behavior: Observation and Evaluation (3)
- 410. The Child and Social Institution. (3)

PSYCHOLOGY (PSYC)
- 405. DEVELOPMENTAL PSYCHOLOGY (3)

SOCIOLOGY (SOCIO)
- 462. Perspectives on Aging (3)
- 463. The Family (3)

Environmental Issues Concentration

Students working toward a Master of Arts degree in Community Psychology and Social Change with this concentration must complete three of the following courses. Students should check for prerequisites when deciding on which courses to take.

CIVIL ENGINEERING (C E)
- 471. Environmental Sanitation (3)
- 497. The Human Environment (1-9)

ENVIRONMENTAL ENGINEERING (ENVE)
- 487. Environmental Law (3)

PUBLIC ADMINISTRATION (P ADM)
- 531. Environmental Policy (3)

SOCIOLOGY (SOCIO)
- 470. Environmental Sociology (3)
- 471. Environmental Movements (3)
- 472. Justice and the Environment (3)

Individual Concentration

Students choose electives from a wide variety of courses offered by the Behavioral Science and other faculties. The object is to support a special interest or mix of interests, in, for instance, environmental issues, adult education, criminal justice, urban sociology, women's studies, or issues of class-ism, racism, or sexism. Students work with faculty advisers in gaining approval of electives and in choosing topics for master's projects.

Student Aid

A number of scholarships, fellowships, and graduate assistantships are available. Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

The Pennsylvania State University
Criminal Justice (CRIMJ)

Program Home Page
JAMES M. RUIZ, Interim Program Chair
Penn State Harrisburg
777 W. Harrisburg Pike
Middletown, PA 17057-4898
717-948-6058 (administrative assistant)
717-948-6484 (fax)

Degree Conferred:
M.A.

The Graduate Faculty
- Danielle Boisvert, Ph.D. (Cincinnati) Assistant Professor of Criminal Justice
- Shaun L. Gabbidon, Ph.D. (Indiana U of Pa.) Distinguished Professor of Criminal Justice
- Carl Garver, D.Ed. (Penn State) Instructor in Criminal Justice
- Don Hummer, Ph.D. (Michigan State) Associate Professor of Criminal Justice
- James M. Ruiz, Ph.D. (Sam Houston State) Associate Professor of Criminal Justice
- Barbara A. Sims, Ph.D. (Sam Houston State) Professor of Criminal Justice
- Jennifer Summer, Ph.D. (California, Irvine) Assistant Professor of Criminal Justice

The program reflects the numerous complexities of the discipline. It provides academic leadership for students to work within corrections, institutionalized and non-institutionalized settings, victim services, adult and juvenile services, policing and law enforcement, private security, courts, and other human service organizations serving the clients of these institutions. It also helps develop research acumen for those students who may wish to consider doctoral studies.

Strong ties developed in state, local, and federal level law enforcement, corrections, drug treatment, victimization, and crime control policy organizations provide research and learning opportunities for interested students.

The degree may be earned by full or part-time study. Most courses will be offered in the evening, although some will be offered during the day or on weekends.

Admission Requirements
- A completed application form with the application fee.
- Two official transcripts of all colleges and universities attended.
- Graduation from a regionally accredited college or university.
- Three letters of recommendation.
- A brief (two-page) statement of purpose or a writing sample.
- Minimum GPA of a 3.0 for the last 60 credits of undergraduate study. Satisfactory scores on the Graduate Record Examination (GRE), Graduate Management Admissions Test (GMAT), or Law School Admissions Test (LSAT) are required if the GPA is less than 3.0. Note: All students who seek funding must take one of these standardized tests, preferably the GRE.
- The language of instruction at Penn State is English. All international applicants whose first language is not English or who have not received a baccalaureate or master's degree from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 20 points on the speaking portion; or the IELTS module with a minimum composite score of 6/5 is required for admission.
- Some foundational course work may be required for those students who did not major in criminal justice as an undergraduate. This decision will be made by the MACJ Program Coordinator after a close review of the undergraduate transcript.
- In exceptional cases, the program may also approve admission by reason of special backgrounds, abilities, and interests.
- Students must submit admission materials for fall by February 15.

Degree Requirements
1. The thesis track requires 36 credits. Six of the credits will be for the thesis.
2. The non-thesis track will require 36 credits plus successful completion of the comprehensive essays, for which a student will register for one credit of CRIMJ 594.
3. These credits must be at the 400 level or above with a minimum of 30 credits at the 500 level or above.
4. A minimum grade-point average of a 3.0 must be earned for course work taken as a graduate student.
5. Students are required to take the following courses: CRIMJ 500, CRIMJ 501, CRIMJ 502, CRIMJ 503, and CRIMJ 504. CRIMJ 501 and CRIMJ 503 are to be taken concurrently.
6. Students who believe they have completed a course substantially similar to one of the specific course requirements may apply to have their previous work evaluated for the purposes of exemption to that requirement. If approved, another course will be taken in place of that requirement.
7. A maximum of 6 credits of completed graduate work may be transferred in from another accredited institution.

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

CRIMINAL JUSTICE (CRIMJ) course list

Last updated by Publications: 5/23/11
College Student Affairs (CSA)

KIMBERLY A. GRIFFIN, in charge
400 Rackley Building
814-865-3449
psu-csa@psu.edu

Degree Conferring:
M.Ed.

The Graduate Faculty

- Kimberly A. Griffin, Ph.D. (California, Los Angeles) Assistant Professor of Education, College Student Affairs, and Higher Education
- Robert Hendrickson, Ed.D. (Indiana) Professor of Education
- Margaret A. Lorah, D.Ed. (Penn State) Affiliate Assistant Professor of Counselor Education
- Susan R. Rankin, Ph.D. (Penn State) Associate Professor of College Student Affairs and Higher Education
- Eric White, Ed.D. (Pennsylvania) Affiliate Assistant Professor of Education

The College Student Affairs program provides graduate instruction for students preparing to enter the student affairs profession on college and university campuses. Course work includes foundational studies as well as professional studies in the areas of student development theory; student characteristics and effects of college on students, individual and group interventions, organization and administration; and assessment, evaluation, and research. Both emphasis areas provide intentional opportunities for students to enhance their professional skills through internships in student affairs administrative and/or college counseling offices on and off campus.

Admission Requirements

Graduate Record Examinations (GRE) combined verbal and quantitative scores or Miller Analogies Test (MAT) score are required, as are TOEFL scores, if applicable. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

An applicant must have received, from a regionally accredited institution, a baccalaureate degree earned under residence and credit conditions substantially equivalent to those required by Penn State. The individual's junior-senior grade-point average must be at least 3.0 on a 4.0 system. The individual's overall grade-point average must be at least 2.75 on a 4.0 system. Individuals who do not meet this requirement may request special consideration by submitting a letter indicating why they feel they deserve consideration.

If an individual has completed graduate course work prior to application, his or her grade-point average for this course work must be at least 3.0 on a 4.0 system. Two recommendation letters and a personal statement are also required as part of the application process. Please see www.ed.psu.edu/educ/csa to apply for specific program application guidelines.

Degree Requirements

The College Student Affairs degree requires 42 credits, including two 150-hour internships and the completion of a capstone project.

Joint Degree Program between The Pennsylvania State University Dickinson School of Law (J.D.) and the College Student Affairs Program (M.Ed.)

Joint Degree Program: The Dickinson School of Law (DSL) and the College Student Affairs Program (CSA) are offering a joint degree program leading to a Juris Doctor (J.D.) and Master of Education (M.Ed.), in College Student Affairs.

Admission Requirements

The number of openings in the joint degree J.D./M.Ed. program will be limited to students with an outstanding academic record who have successfully completed two semesters at the Dickinson School of Law.

Applicants to the joint degree program:

1. must have been admitted to the Dickinson School of Law
2. should have successfully completed two semesters of course work at the Dickinson School of Law with a grade-point average of 3.0
3. must submit two letters of recommendation from the Dickinson School of Law faculty
4. must submit a career statement

Note: Students are eligible to start taking courses in the CSA program after successfully completing two semesters of law school work.

College-Specific Admission Requirements

DSL: A bachelor's or equivalent degree from an accredited college is a prerequisite for admission; however, there is no standard prescribed undergraduate curriculum. An applicant should have acquired significant oral and written communication skills before entering law school. The following are required of applicants: a completed application form for DSL; submission of the results of the law school admission test (LSAT); completion of an LSDAS report; a one-page personal statement; employment records since high school; and two letters of recommendation.

CSA: The following are required of all applicants: a completed Graduate School application; submission of the results of the Graduate Record Examination (GRE), Miller Analogies Test (MAT), or LSAT; an official undergraduate transcript or transcripts; a personal statement; employment records since high school; and two letters of recommendation.

All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the Test of English as a Second Language (TOEFL) and submit the results of that test with the application for admission. TOEFL score of 550 on the paper test or a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 22 points on the new speaking portion; or the International English Language Testing System (IELTS) with a minimum composite score of 6.5 is required for admission.

An applicant must have received from a regionally accredited institution, a baccalaureate degree earned under residence and credit conditions substantially equivalent to those required by Penn State. The individual's junior-senior grade-point-average (GPA) must be at least 3.0 on a 4.0 system. The individual's overall GPA must be at least 2.75 on a 4.0 system. Individuals who do not meet this requirement may request special consideration by submitting a letter indicating why they feel they deserve consideration.

If an individual has completed graduate course work prior to applying to the CSA program, his or her grade-point-average for this course work must be at least 3.0 on a 4.0 system.

Residency: Students will normally spend four semesters in residence at DSL and as many additional semesters in residence as needed to complete the M.Ed.
The department and faculty liaisons for DSL shall be the Associate Dean for Academic Affairs and the student advisor shall be the Associate Dean for Academic Affairs or such other faculty member(s) as may be designated by the Dean. The liaison for CSA shall be the Professor-in-Charge (PIC) or such faculty member(s) as may be designated by the PIC.

**PRESCRIBED COURSES**

DSL: All students in the J.D. program are required to take the first-year curriculum in DSL. In the second or third year, students must take CORE 934 (Professional Responsibility).

The fall curriculum for the first year consists of the following courses:

**CORE COURSES (CORE)**
- 900. Civil Procedure (4)
- 910. Criminal Law (3)
- 912. Legal Analysis, Research & Writing I (3)
- 925. Torts (4)

The spring curriculum of the first year consists of the following courses:

One 3-credit Elective

**CORE COURSES (CORE)**
- 903. Constitutional Law I (3)
- 905. Contracts (4)
- 914. Legal Analysis, Research & Writing II (3)
- 920. Property (4)

CSA: All students in the CSA program must take the following courses:

**COLLEGE STUDENT AFFAIRS (CSA)**
- 501. Introduction to Student Affairs (3)
- 502. Organization and Administration in Student Affairs (3)
- 503. Student Development in College Environments (3)
- 504. Research and Assessment in Student Affairs (3)
- 505. Capstone Seminar (2)
- 506. Campus Environments
- 507. Social Justice
- 595. Internship (student must take two 3-credit internships) (1-9)
- 596. Culminating Experience, Learning Portfolio (1-9)

**COUNSELOR EDUCATION (CN ED)**
- 501. Counseling Theory and Methods (3)
- 506. Helping Skills for CSA Professions (3)

**HIGHER EDUCATION (HI ED)**
- 545. Higher Education in the U.S. (3)
- 556. Higher Education Students (3)

Two 3-credit Electives

**INTERPROGRAM TRANSFER OF CREDITS**

DSL: A maximum of twelve credits of CSA course work may be transferred for credit toward the J.D. degree at DSL. Students must obtain a grade satisfactory to DSL for the course work to be credited toward the J.D. degree. The following courses offered by CSA may qualify for credit in DSL: (1) CSA 501 (Introduction to College Student Affairs); (2) CSA 502 (Organization and Administration in College Affairs); (3) CSA 503 (Student Development in College Environments); and (4) CSA 504 (Research and Assessment in Student Affairs).

CSA: What courses may be credited will be determined by the student's degree program. Normally a maximum of nine credits of DSL course work will be counted for credit for the minimum requirements for a master's degree, subject to approval by the Professor-in-Charge.

Sequence: The sequence of courses will be determined by the students and their advisors.

Recommended Program of Study and Advising: All students in the program will have two advisors, one from DSL and one from CSA. Periodic interaction between the two advisors will be encouraged. A program of study will be developed for each student, taking into account the fact that some courses are offered on a rotating or intermittent basis. Many courses are offered every year but some are offered every two or three years. Advisors will have available a list of projected relevant courses or educational experiences in order to work with the student on an individualized program of study. The standard committee structure will apply to the CSA programs.

Tuition: Students will be charged the applicable DSL tuition to cover the J.D. program and the applicable graduate tuition to cover the CSA degree program. DSL tuition will be paid for the semesters in which the student is registered for DSL courses, and graduate tuition will be paid for the semesters in which the student is registered for graduate courses. A student may take up to one course (3 credit hours) per semester in the program where the student is not primarily registered without any change in tuition, but must pay additional tuition to the program that the student is not primarily registered if he or she wishes to take additional course work pursuant to that program during the semester.

Financial Aid and Assistantships: Decisions on financial aid and assistantships will be made by each school according to that school's procedures.

Fulfillment of Degree Requirements and Graduation: All courses in one program that will count toward meeting the requirements of the other program must be completed before the awarding of either degree. Students will be required to fulfill all requirements for each degree in order to be awarded that degree, subject to the interprogram transfer of credits. With respect to CSA program requirements for a learning portfolio, work done while at DSL under the supervision of a DSL faculty member may be appropriate for incorporation into the learning portfolio with the approval of the CSA degree program committee (in such cases, the committee should consider whether the credits afforded such work will be subject to the twelve credit limit). A DSL faculty member must be a member of the committee).

If for some reason the student cannot complete the requirements of the J.D. degree, the student will still be allowed to count DSL courses already taken toward the M.Ed. in CSA, even if he or she is no longer in the joint degree program.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Janice C. Light, Ph.D. (Toronto) Distinguished Professor of Communication Sciences and Disorders
- Eilin Mainella-Arnold, Ph.D. (Wisconsin) Assistant Professor of Communication Sciences and Disorders
- Carol Miller, Ph.D. (Pennsylvania) Associate Professor of Communication Sciences and Disorders
- Maya Misra, Ph.D. (Tufts) Assistant Professor of Communication Sciences and Disorders
- Robert A. Prosek, Ph.D. (Purdue) Professor of Communication Sciences and Disorders
- Krista Wilkinson, Ph.D. (Georgia State) Professor of Communication Sciences and Disorders

The goals of the program in Communication Sciences and Disorders are to train professionals to conduct research and be consumers of research in communication sciences and disorders and to prepare competent professionals to habilitate and rehabilitate individuals who have speech, language, and/or hearing problems. The program also serves to provide students in other curricula at Penn State with orientation toward and information about communication sciences and disorders.

Facilities for student training and research include in-house clinical therapy and diagnostic services, laboratories in speech science and audiology, and affiliated schools and clinics. The program enjoys academic, research, and clinical relationships with a number of related programs at Penn State and draws upon academic work from related areas as part of the graduate training in communication sciences and disorders. Preparation is given for school and professional certifications and licensure. The CSD academic program is accredited by the Council of Academic Affairs of the American Speech-Language-Hearing Association. Master's-level graduate study requires a full-time externship experience, ordinarily occurring during the final semester of study.

Admission Requirements
Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Approximately 35 credits are required for admission, distributed among speech pathology, audiology, speech science, education, and psychology, and including a course in statistics. Students entering without an undergraduate degree in CSD will be required to take additional make-up work.

Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Usually students earn a master's degree in communication sciences and disorders prior to being considered for doctoral study, although persons with master's degrees in other fields will be considered for a doctoral program.

Master's Degree Requirements
The master's degree requires a minimum of 50 graduate credits beyond admission standards. Students usually earn 55 to 65 credits to complete a degree, over four semesters and a summer of study.

There is a non thesis option for the Master of Science degree, requiring a paper and additional course credits in lieu of a thesis. The master's program of study provides course work and practicum for advanced and/or professional-level licensure.

Doctoral Degree Requirements
The Doctor of Philosophy degree normally requires a master's degree in communication sciences and disorders or a related field, plus a minimum of two years of advanced study, and presentation and oral defense of a research-based dissertation.

The communication and foreign language requirement is a minimum of 6 credits of statistics beyond the first course, plus 9 credits selected from among statistics, technical writing, computer science, research design, or a foreign language.

Two research exercises, one of which is used for doctoral candidacy evaluation early in the doctoral program, are required prior to the dissertation. Comprehensive written examinations in the areas of a student's interest and an optional minor field examination, plus an oral examination prior to dissertation, are required.

Details of a student's doctoral program are determined by the doctoral committee.

Dual-Title Ph.D. Degree in Communication Sciences and Disorders and Language Science

Graduate students with research and educational interests in language science may apply to the Communication Sciences and Disorders and Language Science Degree Program. The goal of the dual-title degree in Communication Sciences and Disorders and Language Science is to enable graduate students from Communication Sciences and Disorders to acquire the knowledge and skills of their major area of specialization in Communication Sciences and Disorders, while at the same time gaining the perspective of the various disciplines contributing to the study of language science.

Admission Requirements
For admission to the dual-title degree under this program, a student must first apply and be admitted to the Communication Sciences and Disorders graduate program and the Graduate School. Students considered for admission to the doctoral program have a Masters program GPA above 3.0/4.0, outstanding letters of recommendation, a written statement of scholarly interests and goals, and have completed the GRE. New graduate students in Communication Sciences and Disorders will receive information about the Language Science dual-title program, and may discuss their interest with one or more Language Science faculty in the Department of Communication Sciences and Disorders, in order to obtain a recommendation for admission to the Language Science program. Once accepted into the Communication Sciences and Disorders program, and with a recommendation from a Language Science program faculty member in that department, the student may apply to the dual-title Ph.D. program in Communication Sciences and Disorders and Language Science by submitting a letter describing the student's interest in the program. The student's letter will be forwarded to a committee that will include the Director of the Linguistics Program, one of the Co-Directors of the Center for Language Science, and a third faculty member within the Center for Language Science. All three committee members will be affiliated with the Program in Linguistics. Upon the recommendation of this committee, the student will be admitted to the dual-title degree program in Language Science. The admission requirements of the Language Science dual-title Ph.D. program are that the

The Pennsylvania State University
Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the Communication Sciences and Disorders program in which they are primarily enrolled. In addition, they must satisfy the requirements described below, as established by the Language Sciences program committee. Within this framework, final course selection is determined by the student and their Communication Sciences and Disorders program advisor.

The doctoral degree in Communication Sciences and Disorders and Language Sciences is awarded only to students who are admitted to the Communication Sciences and Disorders doctoral program and admitted to the dual-title degree in Language Science. The minimum requirements for the dual-title Ph.D. degree in Communication Sciences and Disorders and Language, in addition to the Communication Sciences and Disorders requirements are as follows:

Course Work: 21 credits of 500-level courses

6 credits:
LING 521 Proseminar in the Language Science of Bilingualism
LING 522 Proseminar in Professional Issues in Language Science

3 credits Research Methods/Statistics in Language Science:
LING 525 Experimental Research Methods in Psycholinguistics
PSY 507 Analysis of Psychological Data I
PSY 508 Analysis of Psychological Data II

3 credits in Theoretical Linguistics
LING 500 Syntax II
LING 504 Phonology II

3 credits in Cognitive Neuroscience or Psycholinguistics
LING 520 Seminar in Psycholinguistics
PSY 511 Seminar in Contemporary Psychology
PSY 520 Seminar in Psycholinguistics

6 credits in Research Internships
These internships will provide experience in the conduct of research; at least one internship must be with a mentor other than the student's dissertation advisor. (Students will choose one course among the following CSD 596, GER 596, LING 596, PSY 596, SPAN 596).

Particular courses may satisfy both the Communication Sciences and Disorders requirements and those in the Language Science dual-title program. Final course selection is determined by the student in consultation with their doctoral advisor and committee. In most cases, the number of total credits earned by a dual-title student will be from 6-12 more than those normally earned by a student in Communication Sciences and Disorders. Some courses which meet Language Science requirements (e.g., theoretical linguistics, neuroscience, psycholinguistics) may also fulfill the Communication Sciences and Disorders requirements for a related area outside the department; however, dual-title students are not required to count any particular Language Science requirement as their outside area. Dual-title students who choose an outside content area not related to Language Science will require more time to complete their program.

Students are expected to participate in weekly Language Science Research meeting each semester in residence.

Student Aid

Student Aid Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the Student Aid section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Jianwen Bai, Ph.D. (Northwestern) Professor of Computer Science and Engineering
- Piotr Berman, Ph.D. (MIT) Associate Professor of Computer Science and Engineering
- Guang Car, Ph.D. (Pittsburgh) Associate Professor of Information Sciences and Technology, Geography, and Computer Science and Engineering
- Octavia I. Camps, Ph.D. (Washington) Adjunct Associate Professor of Electri and Computer Engineering, Northeastern
- Guohong Cao, Ph.D. (Ohio) Professor of Computer Science and Engineering
- David Capel, Ph.D. Assistant Professor of Computer Science and Engineering
- Suja Chacko, Ph.D. (Pennsylvania) Assistant Professor of Computer Science and Engineering
- Kyusun Choi, Ph.D. (Penn State) Assistant Professor of Computer Science and Engineering
- Frederico Torres Fonseca, Ph.D. (Maine) Associate Professor of Information Sciences and Technology
- Dennis F. Dunn, Ph.D. (Pittsburgh) Associate Professor of Informa tion Sciences and Technology; Professor of Computer Science and Engineering
- Martin Furrer, Dr. Sc. Math. (ETH–Zürich) Professor of Computer Science and Engineering
- Chenjun Gao, Ph.D. (Arizona) David and Helen Wang Professor of In formation Sciences and Technology; Professor of Computer Science and Engineering
- Sean Hallgren, Ph.D. Associate Professor of Computer Science and Engineering
- John Hannan, Ph.D. (Pennsylvania) Associate Professor of Computer Science and Engineering
- John E. Higgins, Ph.D. Assistant Professor of Electrical Engineering
- Mary Jane Irwin, Ph.D. (Illinois) Evan Pugh Professor, A. Robert Noll Chair of Engineering, Department of Computer Science and Engineering
- Trent Jaeger, Ph.D. (Michigan) Associate Professor of Computer Science and Engineering
- Mahmut Kandemir, Ph.D. Associate Professor of Computer Science and Engineering
- George Kesidis, Ph.D. (California, Berkeley) Professor of Computer Science and Engineering; Electrical Engineering
- Daniel Kifer, Ph.D. Assistant Professor of Computer Science and Engineering
- Thomas F. La Porta, Ph.D. (Columbia) Professor of Computer Science and Engineering
- Dongwon Lee, Ph.D. (UCLA) Associate Professor of Information Sciences and Technology; Computer Science and Engineering
- Wang-Chien Lee, Ph.D. (Ohio) Associate Professor of Computer Science and Engineering
- Ji Li, Ph.D. (Stanford) Associate Professor of Statistics
- Peng Liu, Ph.D. (George Mason) Associate Professor of Information Sciences and Technology; Computer Science and Engineering
- Yaxin Liu, Ph.D. (Massachusetts) Associate Professor of Electrical Engineering
- Patrick McDonald, Ph.D. (Michigan) Associate Professor of Computer Science and Engineering
- Wei Liu, Ph.D. (Washington) Professor of Biology; Computer Science and Engineering
- Prasenjit Mitra, Ph.D. (Stanford) Assistant Professor of Computer Science and Engineering
- Vijaykrishnan Narayanan, Ph.D. (South Florida) Professor of Computer Science and Engineering
- Padma Raghavan, Ph.D. (Penn State) Professor of Computer Science and Engineering
- Srinivas Ramchandran, Ph.D. (MIT) Assistant Professor of Computer Science and Engineering
- Frank E. Ritter, Ph.D. (Carnegie Mellon) Associate Professor of Information Sciences and Technology; Psychology
- Ruzan Shokouhi, Ph.D. (Northwestern) Assistant Professor of Computer Science and Engineering
- Rajeev Sharma, Ph.D. (Maryland) Associate Professor of Computer Science and Engineering
- Sunil Sinha, Ph.D. (Waterloo) Assistant Professor of Civil and Environmental Engineering
- Amin Shokouhi, Ph.D. (Georgia Tech) Professor of Computer Science and Engineering
- Adam Smith, Ph.D. (MIT) Associate Professor of Computer Science and Engineering
- Soumyasankar (Cimarz) (Kumara), Ph.D. (Purdue) Allen E. Pearce/Allen M. Pearce Professor of Industrial and Manufacturing Engineering; Professor of Computer Science and Engineering, and Information Sciences and Technology
- Bhuvan Urgaonkar, Ph.D. (Massachusetts) Assistant Professor of Computer Science and Engineering
- James Z. Wang, Ph.D. (Stanford) Associate Professor of Information Sciences and Technology; Computer Science and Engineering
- Yanxi Liu, Ph.D. (Princeton) Associate Professor of Computer Science and Engineering
- John Yen, Ph.D. (California, Berkeley) University Professor of Information Sciences and Technology; Professor of Computer Science and Engineering
- Suncun Zhu, Ph.D. (George Mason) Associate Professor of Computer Science and Engineering, and Information Sciences and Technology

The department offers courses and is prepared to direct research in a variety of subfields of computer science and engineering, including VLSI, computer architecture, parallel/distributed processors and processing, multiprocessors, interconnection networks, pattern recognition and image processing, performance evaluation, reliability, fault tolerance, theory of computation, computer systems, numerical analysis and optimization, programming methodology, and analysis of algorithms. Research and instruction are supported by extensive computing facilities within the University’s Information Technology Services and by the computer laboratories operated by the department.

For information about areas of specialization, laboratory and research facilities, fellowships assistantships, and other sources of financial assistance, please refer to our Web site: www.cse.psu.edu.

Admission Requirements

All applicants must provide a one-page statement of purpose and scores from the Graduate Record Examinations (GRE) Aptitude Test (verbal, quantitative, and analytical). A subject test in the GRE is not required, but the subject test in Computer Science is recommended. Those students seeking an assistantship in Computer Science and Engineering are required to submit a Statement of Purpose. The TOEFL IBT is equivalent to passing the TOEFL. A lower score would require remedial English as a Second Language courses. For score reporting for TOEFL and TSE, our institution code is 2660 and our department code is 78.

English Proficiency—The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section of the Internet-based test. The minimum composite score for the IELTS is 6.5. Specific graduate programs may have more stringent requirements.

Specific graduate programs may require all international applicants to submit a TOEFL or IELTS score, regardless of their academic background and country of origin.

Information about the TOEFL can be obtained by writing to the Educational Testing Service, Box 6155, Princeton, NJ 08541-6155 or visiting its Web site at www.toefl.org. Local administration at University Park campus of the TOEFL is handled by the IECP. Information about the IELTS can be obtained by visiting www.ielts.org.
Master's Degree Requirements

Candidates for the master's degree must satisfactorily complete the requirements of the Graduate School. In addition, all students are expected to have completed appropriate courses in computer architecture and machine organization, data structures and analysis of algorithms, programming languages, operating systems, and logical design/switching theory or theory of automata. Students who do not meet background requirements will be required to take the appropriate 400-level courses to prepare them for the 500-level courses. At most, 3 credits of background course work can be used to satisfy the degree requirements. Students admitted to the M.S. program will not be permitted to switch to the M. Eng. program at a later time, except under extenuating circumstances.

Master of Science students must take 15 credits of courses numbered CSE 500 through 589, including a minimum of 9 credits of breadth courses taken from the department's Graduate Handbook in Computer Science and Engineering. An additional 9 credits of 400-level courses and above (excluding independent studies courses and ENGR 588) are required (see Handbook). This must include at least 1, and at most 2, credits of CSE 590 (Colloquium). Students must complete and defend an M.S. thesis (6 credits of CSE 600). The total degree requirement is 30 credits.

Master of Engineering students must take 18 credits of 500-level courses with at least 15 of the credits being associated with courses that have CSE designations and numbered 500-589 (including a minimum of 9 credits of breadth courses referenced above and at least 3 credits of a depth course from the department list. Students must also take 12 additional credits of 400-level courses and above, excluding independent studies courses and ENGR 588 (See Handbook). This must include at least 1, and at most 2, credits of CSE 590 (colloquium). Students are required to complete and defend a 1-credit technical paper (CSE 594). The total degree requirement is 30 credits.

Doctoral Degree Requirements

The doctoral degree requirements include the general requirements of the Graduate School as listed under Doctoral Degree Requirements. Furthermore, students applying for and gaining admittance to the Ph.D. program will not be permitted to switch to the master's program at a later date, except under extenuating circumstances. To qualify for a Ph.D. degree, each student must take 27 credits of courses with numbers CSE 500-589 or CSE 598, and 21 additional credits of 400-level and above courses. The 21 additional credits must include at least 3 credits of CSE 590 (colloquium), with a maximum of 3 credits of CSE 590 being counted toward the total of 48 minimum credits. A maximum of 3 credits of X96 may also be counted. A student must pass the Ph.D. candidacy examination by the third regular semester after entering the program (see Handbook). Students must pass the Ph.D. comprehensive examination after completion of most of the course work, and the English competency and communication requirements. A thesis must be completed under the direction of a Ph.D. committee and the results must be successfully defended in the thesis defense examination.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the Student Aid section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Demography (DEMOG)

Program Home Page

GORDON F. De JONG, In Charge
601 Oswald Tower
814-865-0486
demography@pop.psu.edu

The Demography dual-title degree program option is administered by the Demography Program Committee, which is responsible for management of the program. The committee maintains program definition, identifies faculty and courses appropriate to the option, and recommends policies and procedures for its operation to the dean of the Graduate School. This dual-title degree program is offered as an option to graduate major programs in three colleges: Agricultural Sciences, Health and Human Development, and the Liberal Arts. The option enables students from diverse graduate programs to attain and be provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Degraded Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Primary admission requirements for the dual-degree M.A., M.S., or Ph.D. program are established by the participating graduate program and a positive recommendation by a Demography faculty member in that graduate program. All application materials should be submitted by January 2. Applicants should have a junior/senior cumulative grade-point average of well above 3.00 (on a 4.00 scale) and appropriate courses in statistics and in the social science department to which they are applying. The application should include three letters of reference and a statement describing and explaining the applicant's interest in demography and goals during and after graduate study. TOEFL scores are required of all students for whom English is a second language.

Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the graduate program in which they are enrolled, including the communication/foreign language requirements, if any. In addition, they must satisfy the minimum requirements in the Demography option described here, as established by the Demography Program Committee. Within this framework, final course selection is determined by students and their degree advisor.
committees. All dual-title degree candidates who are in residence must enroll in DEMOG 590 for 1 credit each year in residence.

Master's Degree: For the M.A. and M.S. degree with the Demography option, 12 course credits are required in addition to the colloquium credit or credits. A minimum of 3 credits is required in each of the following areas: (1) disciplinary perspective courses; (2) demographic methods courses (SOC 573 is required of all candidates); (3) seminars in demographic processes; (4) seminars in population studies. See a complete course list on the program home page.

Particular courses may satisfy both the graduate major program requirements and those of the Demography option. The thesis supervisor must be a member of the graduate faculty recommended by the chair or the graduate officer of the program granting the degree and a member of the Demography faculty.

Ph.D. Degree: For the Ph.D. degree with the Demography option, a minimum of 24 credits is required in addition to the colloquium credits. For students entering with a master's degree from another institution, equivalent course credits may be accepted. The following minimum number of credits is required in each curriculum category: 3 credits of disciplinary perspective courses; 6 credits of demographic methods courses; SOC 573 is required of all candidates; 6 credits of seminars in demographic processes; 3 credits of seminars in population studies; and 6 credits of electives. Final course selection is determined in consultation with the doctoral committee.

The doctoral committee is recommended by the graduate major program granting the degree. A four-member committee is required for a dual-title degree program. The chair and at least one additional member of the doctoral committee must be members of the graduate faculty in Demography. The Demography faculty members on the student's committee are responsible for administering an examination in demography that constitutes a portion of the comprehensive examination of the doctoral student in the program option. A dissertation on a demographic-related topic is required of students in the dual-title degree program.

Other Relevant Information

A Ph.D. minor in Demography is available for doctoral students in graduate programs other than the dual-title participating programs who find it advantageous to include demographic content, methods, and policy analysis in their program of study. The student's doctoral committee must approve the choice of this minor, and one member of the doctoral committee must be from the Demography faculty.

To qualify for a minor in Demography, students must satisfy the requirements of their graduate major program and take at least 15 credits in demography in addition to colloquium credits. A minimum of at least 3 credits each in (1) disciplinary perspective, (2) demographic methods courses (SOC 573 is required of all candidates), (3) seminars in demographic processes, and (4) seminars in population studies is required. Students must enroll in DEMOG 590 for 1 credit during each year enrolled in the program and in residence.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the Student Aid section of the Graduate Bulletin, the following awards typically has been available to graduate students in this program:

Affiliated departments and The Population Research Institute Assistantships, and the NICHD Traineeship awards

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

The general areas of graduate research in Electrical Engineering are electromagnetics and optics; electronics and photonics; communications, computers, and networking, and signal processing; and control and power systems. Specializations available within these areas include microwaves, antennas, and
networking; and signal processing; and control and power systems. Specializations available within these areas include microwaves, antennas, and
propagation; electro-optics and nonlinear optics; remote sensing and space systems; materials and devices; circuits and networks; VLSI; communications;
Networking; signal and image processing; computer vision and pattern recognition; control systems; and power systems.

For information about areas of specialization, laboratory and research facilities, fellowships, assistantships, and other sources of financial assistance, write
directly to the Graduate Program Coordinator, Department of Electrical Engineering, 121 Electrical Engineering East, University Park, PA 16802-2705, or
review the Web pages at www.ee.psu.edu.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.
Applicants are required to submit scores from the general portions of the Graduate Record Examinations, three letters of reference, and a personal statement
of relevant experience and goals, a resume, undergraduate transcripts, and a supplemental application.

Master of Science Degree Requirements

The Master of Science requirements include the general requirements of the Graduate School as listed under Master's Degree Requirements in the Graduate
Bulletin.
Specific course requirements: (1) Thesis option--24 course credits, including a broad selection of 500-level courses, 2 colloquium credits, 6 thesis credits,
and a satisfactory thesis; (2) Paper option--30 course credits, including a broad selection of 500-level courses, 2 colloquium credits, 2 paper credits, and a
satisfactory paper.

Doctoral Degree Requirements

The Doctor of Philosophy requirements include the general requirements of the Graduate School as listed under Doctoral Degree Requirements in the
Graduate Bulletin.
Specific requirements: The communication requirement is met by adequacy in both spoken and written English. The candidacy examination consists of both
written and oral parts; the oral comprehensive examination is preceded by the writing of a thesis proposal. The program requires a minimum of 39 course
credits and 2 colloquium credits beyond the B.S. degree.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the Graduate
Bulletin, the following awards typically have been available to graduate students in this program:

PAUL F. ANDERSON GRADUATE FELLOWSHIP
MELVIN P. BLOOM MEMORIAL GRADUATE FELLOWSHIP
LUTHER B. AND PATRICIA A. BROWN GRADUATE FELLOWSHIP
JOSEPH R. AND JANICE M. MONKOWSKI GRADUATE FELLOWSHIP
JAMES R. AND BARBARA R. PALMER FELLOWSHIP
PONTANO FAMILY SCHOLARSHIP IN ELECTRICAL ENGINEERING
SOCIETY OF PENN STATE ELECTRICAL ENGINEERS (SPSEE) GRADUATE FELLOWSHIP
BESS L. AND MYLAN R. WATKINS GRADUATE FELLOWSHIP

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet
some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit
these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

ELECTRICAL ENGINEERING (E E) course list

Last Revised by the Department: Spring Semester 2010
Blue Sheet Item #: 38-06-136
Review Date: 04/13/2010
Last updated by Publications: 7/29/11
Electrical Engineering

Admission Requirements

A prospective graduate student in Electrical Engineering at Penn State Harrisburg must fulfill the admission requirements as set forth by the Graduate School, and have a bachelor of science degree in electrical engineering or its equivalent from an institution that is accredited by the Accreditation Board for Engineering and Technology (ABET). An undergraduate cumulative grade-point average of 3.0 or better on a 4.0 scale is required for admission. Exceptions to this will be based on professional experience and other factors such as GRE scores. In addition, a student who does not meet the overall 3.0 grade-point average may be considered for admission if the student has a 3.0 junior/senior grade-point average. Up to 15 credits earned in three semesters or fewer, as a special nondegree student, may be applied toward the master's degree. Those applying for admission as a master of engineering candidate without an electrical engineering degree may be admitted with the stipulation that deficiencies in background, if any, will be remedied early in the program and that these courses will be in addition to the required number of credits for the degree.

Applicants should submit the following:

- a graduate online application with the application fee;
- official copies of undergraduate transcripts;
- test scores from the Graduate Record Examinations (GRE) (preferable, but not required);
- three (3) letters of reference, especially those from faculty who can evaluate academic potential;
- a personal statement of technical interest, goals, and experience.

Test scores from the Graduate Record Examination (GRE) are required ONLY for those applicants indicating interest in an assistantship.

Degree Requirements

A total of 33 credits is required for a Master of Engineering degree, of which at least 24 must be taken through Penn State Harrisburg engineering graduate programs. Up to 9 credits of graduate work may be transferred from other institutions provided (a) credits are suitable for the particular engineering discipline, and (b) students have earned a grade of B or better. At least 18 credits must be at the 500 level, which includes 3 credits of ENGR 594. Generally, students enrolled in the program for the Master of Engineering degree in Electrical Engineering must earn 12 credits in the required core courses (i.e., courses with the E E prefix).

Master of Engineering Paper: A candidate for the master of engineering degree in Electrical Engineering must write a scholarly report or engineering paper and defend it before three faculty members. The paper is intended to be a relatively short document compared with a thesis. A published paper may be used to meet this requirement. The paper should be written according to the standards set for an IEEE publication. The engineering paper may be initiated by taking the 1-credit ENGR 594 course. This should be done approximately halfway through the program. Once the proposal is approved and the work well under way, the student should register for ENGR 594 with his/her paper adviser. Work will proceed as planned under the direction of the paper adviser, though changes may be made with the consent of the master's paper committee.

Up to 9 credits of graduate work may be transferred from other institutions provided (a) credits are suitable for the particular engineering discipline, and (b) students have earned a grade of B or better.

Students must have a 3.00 grade-point average in both prescribed and supporting courses approved by the program to graduate. Students pursue the program on a part-time basis. A student can complete the program within two years, based on completion of two courses a semester.

M.S. (E ENG)

Admission Requirements

Admission into the Master of Science (M.S.) Electrical Engineering program will be granted only to candidates who demonstrate high potential for success in graduate studies.

Applicants should have undergraduate degrees in engineering or technology-related fields from an accredited university and must meet the admission requirements as set by Penn State’s Graduate School. An applicant must hold either (1) a bachelor’s degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution. An undergraduate cumulative grade-point average of 3.0 or better on a 4.0 scale, and scores from the GRE are required for admission.

Applicants should submit the following:

- a completed Graduate School online application with the application fee;
- official copies of undergraduate transcripts;
- three (3) letters of professional recommendations from individuals who can evaluate the applicant's potential;
- a personal statement of technical interest, goals, and experience;
- grades of 3.0 or better in a core course sequence.

The Pennsylvania State University
Degree Requirements

All graduate students in Electrical Engineering are required to adhere to the requirements of the Graduate School, as found in the Graduate Degree Programs Bulletin. The requirements of the Graduate School, however, are minimum requirements and the policies, procedures, and regulations listed below are additional and more specific for graduate students pursuing the MS in Electrical Engineering degree. Advisers will call pertinent regulations to the attention of their advisees, but it should be understood that it is the student's personal responsibility to see that all requirements are satisfied.

The MSEE program at Penn State Harrisburg is structured into two areas of concentration to fully take advantage of the specialty areas represented in the EE graduate faculty. The areas are Electronics-Electromagnetics-Optics (EEO) and Systems. The program requires 31 credits, including 24 course credits with at least 15 credits at the 500 level, one colloquium credit, and 6 thesis credits (600-level). All students are required to take a 500-level analysis course (EMCH 524A) in addition to prescribed courses in one of the two concentration areas. The prescribed courses are intended to establish the fundamentals of the technical areas. To incorporate some breadth into the program, students are required to take at least one course in the second concentration area. A maximum of three 400-level courses (9 credits) may be taken for the MSEE degree.

Original research, usually requiring at least two semesters of work (nominal 6 credits), is expected for a thesis. The work should be an in-depth investigation intended to extend the state of knowledge in some specialty area.

The E E program has established a six-year time limit for completion of the M.S. degree. Any extension beyond six years requires the approval of the E E program Graduate Faculty.

The student must maintain a minimum grade point average (GPA) of 3.00 or better on a 4.00 scale in 500- and 400-level courses listed on his/her Plan of Study.

Penn State Harrisburg's MSEE program is distinct and independent of the MSEE program offered at the University Park campus.

English Proficiency— The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5. Specific graduate programs may have more stringent requirements.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Completed International Application material must be submitted by the following deadlines: May 31 for the fall semester; September 30 for the spring semester; February 28 for the summer session. Applications received after these deadlines will be processed for the following semester.

PLEASE NOTE: Each graduate program reserves the right to set earlier deadlines than those noted above.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

For course information specific to the Electrical Engineering M.S. and M.Eng. programs at Penn State Harrisburg, refer to the program home page.
Business Administration, Executive Master of (exMBA)

The Executive MBA program is a cohort program with a class of approximately forty students moving in lockstep through the program. Classes are taught primarily on the weekends in the Philadelphia area, complemented with several residence weeks on the University Park campus. The time required to complete the program is twenty-two months.

Admission Requirements

Please refer to the requirements listed in the Admission Requirements section of the full-time MBA program at University Park. Applicants to the Executive MBA program should have considerable work experience, typically ten years or more.

Master's Degree Requirements

Please refer to the requirements listed in the Master's Degree Requirements section of the full-time MBA program at University Park.

The Graduate Faculty

School of Science, Engineering, and Technology

Ma’moon Abu-Ayyad, Ph.D. (New Brunswick) Assistant Professor of Mechanical Engineering
Sedig S. Agili, Ph.D. (Marquette) Associate Professor of Engineering
Jennifer A. Albert, Ph.D. (West Virginia) Assistant Professor of Civil Engineering
Omid Arzhang, Ph.D. (Akron) Interim Senior Associate Dean for Academic Affairs; Professor of Engineering
Ganes H. Bai, Ph.D. (Virginia Tech) Assistant Professor of Engineering
Amit Banerjee, Ph.D. (New Jersey Institute of Technology) Assistant Professor of Mechanical Engineering
Joseph J. Cecere, Ph.D. (North Texas State) Associate Professor of Engineering
Yen-Chih Chen, Ph.D. (Purdue) Assistant Professor of Environmental Engineering
Y. Frank Chen, Ph.D. (Minnesota) Professor of Engineering
Richard Giocci, Ph.D. (Maryland) Associate Professor of Mechanical Engineering
Shirley E. Clark, Ph.D. (Alabama) Associate Professor of Environmental Engineering
Ram P. Goel, Ph.D. (Michigan State) Assistant Professor of Mechanical Engineering
Robert Gray, Ph.D. (Ohio) Associate Professor of Electrical Engineering
Peter Idowu, Ph.D. (Toledo) Associate Professor of Engineering
Harris Imaodejumu, Ph.D. (North Carolina State) Associate Professor of Engineering
Hossein Jula, Ph.D. (Southern California) Associate Professor of Electrical Engineering
Sai Kakurutu, Ph.D. (Kansas State) Assistant Professor of Civil Engineering
Jubum Kim, Ph.D. (Washington) Assistant Professor of Civil Engineering
Seroj Mackertich, Ph.D. (Penn State) Associate Professor of Engineering
Shashi Marikunte, Ph.D. (Michigan State) Assistant Professor of Civil Engineering
Aldo Morales, Ph.D. (SUNY) Professor of Electrical Engineering
Gautam Ray, Ph.D. (Penn State) Professor of Engineering
Jerry F. Shoup, Ph.D. (Penn State) Interim Director, School of Science, Engineering, and Technology; Associate Professor of Electrical Engineering
Mohammad Totigh, Ph.D. (Drexel) Associate Professor of Electrical Engineering
Sofia Vidalis, Ph.D. (Florida) Assistant Professor of Civil Engineering
Seth Wolpert, Ph.D. (Rutgers) Associate Professor of Engineering
Yuefeng Xie, Ph.D. (Tsinghua) Professor of Environmental Engineering

School of Business Administration

Thomas Amie, Ph.D. (Maryland) Assistant Professor of Accounting
Nihal Bayraktar, Ph.D. (Maryland) Associate Professor of Economics
Melvin Blumberg, Ph.D. (Penn State) Professor of Management
Terence A. Brown, D.B.A. (Maryland) Associate Professor of Transportation and Marketing
Qiang Bu, Ph.D. (Massachusetts) Assistant Professor of Finance
Thomas Buttross, Ph.D. (Mississippi) Associate Professor of Professional Accountancy
Retik Cullen, Ph.D. (NYU) Professor of Management and International Business
Patrick Cusatis, Ph.D. (Penn State) Associate Professor of Finance
Raymond Gibney, Ph.D. (Pittsburgh) Assistant Professor of Management
Jean E. Harris, Ph.D. (Virginia Tech) Associate Professor of Accounting
Rhoda Joseph, Ph.D. (Baruch) Assistant Professor of Information Systems
Erdener Kaynak, Ph.D. (Cranfield, Bedford, England) Professor of Marketing
Mukund S. Kuikinen, Ph.D. (Kentucky) Chancellor, Penn State Harrisburg; Professor of Finance
Roderick Lee, Ph.D. (Penn State) Assistant Professor of Information Systems
David A. Morand, Ph.D. (Cornell) Professor of Management
Dinesh R. Patil, Ph.D. (Rutgers) Associate Professor of Supply Chain Management
Parag C. Pendharkar, D.B.A. (Southern Illinois) Professor of Information Systems
Robert D. Russell, Ph.D. (Pittsburgh) Assistant Professor of Management
Stephen P. Schappe, Ph.D. (Ohio State) Director, School of Business Administration; Associate Professor of Management
Girish Subramanian, Ph.D. (Temple) Professor of Information Systems
Peter Swan, Ph.D. (Michigan) Assistant Professor of Logistics and Operations Management
Omar Tawatnuntachai, Ph.D. (New Orleans) Associate Professor of Finance
Premal P. Vora, Ph.D. (Penn State) Associate Professor of Finance
Gayle J. Yaverbaum, Ph.D. (Temple) Professor Emerita of Information Systems
Ji Wu, Ph.D. (Drexel) Assistant Professor of Economics
Richard Young, Ph.D. (Penn State) Professor of Supply Chain Management
Ugur Yucelt, Ph.D. (New School) Associate Professor of Marketing

The Master of Professional Studies (M.P.S.) Engineering Management degree program is a graduate professional degree program that integrates engineering with business and management principles. The program provides engineers with business and management perspectives and enhances their capabilities in the management of major projects, business initiatives, policies, and other activities in both the public and private sectors. Furthermore, it highlights the importance of technology strategy and intellectual properties management, and offers an environment for personal and professional networking that could hold significant future dividend.

The program is offered at Penn State Harrisburg as a partnership between the School of Science, Engineering, and Technology and the School of Business Administration, which is accredited at the undergraduate and graduate levels by AACSB International—the Association to Advance Collegiate Schools of Business International.

The Pennsylvania State University
Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin. Admission into the Master of Professional Studies program will be granted only to candidates who demonstrate high potential for success in graduate studies.

Applicants should have undergraduate degrees in engineering or technology from an accredited university and are expected to have completed undergraduate course work in calculus and economics.

An undergraduate cumulative grade-point average of 3.0 or better on a 4.0 scale, and scores from the Graduate Management Admission Test (GMAT) are required for admission. Students demonstrating high potential but failing to meet the minimum GMAT score requirements may be considered on the basis of professional accomplishments and other criteria that may predict success in the program.

Applicants should submit the following:
---a graduate online application with the application fee
---official copies of undergraduate transcripts
---three (3) letters of reference, especially from faculty who can evaluate academic potential
---a personal statement of technical interest, goals, and experience
---test scores from the Graduate Management Admission Test (GMAT)
---test scores from the Graduate Record Examination (GRE) are required for those indicating interest in an assistantship

English Proficiency—The language of instruction at Penn State is English. All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. Departments and programs may have more stringent requirements and may require all international applicants to submit a TOEFL or IELTS score regardless of their academic background. A TOEFL score of at least 550 (paper-based test), 213 (computer-based test) or a total score of 80 on the Internet-based test (iBT), with a minimum of 19 points on the speaking section, is required for admission. Graduate programs may require a higher score. The International English Language Testing System (IELTS) module provides an exam to test four mandatory skill areas: listening, reading, writing and speaking. All four modules are equally weighted in the evaluation process. The International English Language Testing System has been approved by the Graduate Council as an alternative exam to the TOEFL for international students applying to Penn State. A minimum composite score of 6.5 on the IELTS test is required for admission.

Degree Requirements

All graduate students in Engineering Management are required to adhere to the requirements of the Graduate School, as listed in the Graduate Degree Programs Bulletin. The requirements of the Graduate School, however, are minimum requirements and the policies, procedures, and regulations listed below are additional and more specific for graduates students pursuing the M.P.S. degree in Engineering Management. Advisers will call pertinent regulations to the attention of their advisees, but it should be understood that it is the student's personal responsibility to see that all requirements listed are satisfied.

The M.P.S. in Engineering Management is a 34-credit graduate program that integrates engineering with business and management principles. The multidisciplinary, broadly based M.P.S. program provides engineers with business and management perspectives to enhance capabilities in management of large projects.

All M.P.S. students are required to take eight core courses (21 credits) focusing on economic analysis, communication and teamwork, management processes, corporate finance, energy and the environment, and engineering analysis.

The curriculum requires the completion of two free electives (6 credits) in any of the engineering disciplines, and a culminating experience through a three-course sequence (7 credits) on strategic management of new ventures and innovations. Of the 34 credits required for the degree, 31 must be earned in 500-level graduate courses.

Courses

Please refer to the graduate program home page for a complete list of available courses.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.
Environmental Pollution Control (E P C)

Degrees Conferred:
M.S., M.E.P.C. (Penn State Harrisburg, Penn State University Park)

The Graduate Faculty--Penn State Harrisburg

- Katherine H. Baker, Ph.D. (Delaware) Associate Professor of Environmental Microbiology
- Melvin Blumberg, Ph.D. (Penn State) Professor of Management
- Yen-Chih (David) Chen, Ph.D. (Purdue) Assistant Professor of Environmental Engineering
- Balwant Chohan, Ph.D. (Massachusetts) Assistant Professor of Chemistry
- Beverly A. Cigler, Ph.D. (Penn State) Professor of Public Administration and Public Policy
- Shirley Clark, Ph.D. (Alabama, Birmingham) Associate Professor of Environmental Engineering
- Thomas H. Eberlein, Ph.D. (Wisconsin) Associate Professor of Chemistry
- Robert F. Munzenrider, Ph.D. (Georgia) Associate Professor of Public Administration
- Sairam Rudrabhatla (Osmania, India) Assistant Professor of Biology
- Howard G. Sachs, Ph.D. (Clark) Professor of Biology
- Clifford H. Wagner, Ph.D. (SUNY Albany) Associate Professor of Computer Science and Mathematical Sciences
- Yuefeng Xie, Ph.D. (Tsinghua) Professor of Environmental Engineering

The Graduate Faculty--Penn State University Park

- David G. Abler, Ph.D. (Chicago) Professor of Agricultural Economics and Demography
- Michael A. Adewumi, Ph.D. (Illinois Institute of Tech) Professor of Petroleum and Natural Gas Engineering
- Christopher J. Bise, Ph.D. (Penn State) Centennial Professor of Mining Engineering
- Andrzej L. Boehm, Ph.D. (Stanford) Associate Professor of Fuel Science
- William H. Brune, Ph.D. (Johns Hopkins) Professor of Meteorology
- Fred S. Cannon, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of Civil and Environmental Engineering
- Hunter Carrick Ph.D. (Michigan) Assistant Professor of Aquatic Ecology
- Rick L. Day, Ph.D. (Penn State) Assistant Professor of Soil Science and Environmental Information Systems
- Jerzy Dec, Ph.D. (Inst of Organic Industry, Poland) Research Associate in Soil Biochemistry
- Brian A. Dempsey, Ph.D. (North Carolina) Professor of Environmental Engineering
- David R. DeWalle, Ph.D. (Colorado State) Professor of Forest Hydrology
- Herschel A. Elliott, Ph.D. (Delaware) P.E. Professor of Agricultural Engineering
- David Fawcett, Ph.D. (California, Berkeley) Professor of Geo-Environmental Engineering
- Ann N. Fisher, Ph.D. (Connecticut) Professor of Agricultural and Environmental Economics
- Richard L. Gordon, Ph.D. (MIT) Professor of Mineral Economics
- William A. Groves, Ph.D. (Michigan) Assistant Professor of Industrial Health and Safety
- Michael W. Grutzeck, Ph.D. (Penn State) Senior Research Associate and Associate Professor of Materials
- James M. Hamlett, Ph.D. (Iowa) Associate Professor of Agricultural Engineering
- Albert R. Jarrett, Ph.D. (Penn State) P.E. Professor of Agricultural Engineering
- Dennis Lamb, Ph.D. (Washington) Professor of Meteorology
- Hangsheng Lin, Ph.D. (Texas A&M) Assistant Professor of Hydropedology/Soil Hydrology
- James A. Lynch, Ph.D. (Penn State) Professor of Forest Hydrology
- Jack V. Matson, Ph.D. (Rice) P.E. Professor of Civil Engineering
- Audrey C. Miller, Ph.D. (Colorado State) P.E., P.L.S. Professor of Civil Engineering
- Dennis J. Murphy, Ph.D. (Penn State) C.S.P. Professor of Agricultural Engineering
- Richard R. Parizek, Ph.D. (Illinois) Professor of Geology
- Gregory W. Petersen, Ph.D. (Wisconsin) Distinguished Professor of Soil and Land Resources
- Sarma V. Pisupati, Ph.D. (Penn State) Assistant Professor of Fuel Science
- Raymond W. Regan, Sr., Ph.D. (Kansas) P.E. Professor of Environmental Engineering
- Paul D. Robillard, Ph.D. (Cornell) Associate Professor of Agricultural Engineering
- Adam Z. Rose, Ph.D. (Cornell) Professor of Energy, Environmental, and Mineral Economics
- Barry F. Scheetz, Ph.D. (Penn State) Senior Scientist and Professor of Materials
- Robert L. Shannon, Ph.D. (Indiana) Associate Professor of Agricultural Engineering
- William E. Sharpe, Ph.D. (West Virginia) Professor of Forest Hydrology
- James Shortle, Ph.D. (Iowa State) Professor of Agricultural Economics
- John M. Shelly, Ph.D. (Penn State) Professor of Plant Pathology
- Dennis W. Thomson, Ph.D. (Wisconsin) Professor of Meteorology
- David G. Wagner, Ph.D. (Colorado State) Assistant Professor and Extension Specialist for Precision Agriculture
- Grace A. Wang, Ph.D. (Minnesota) Assistant Professor of Natural Resource Policy
- John C. Wyngaard, Ph.D. (Penn State) Professor of Meteorology

This intercollege master's degree program, available at Penn State Harrisburg and Penn State University Park, deals with the various aspects of air, land, and water pollution control. Graduate instruction is under the direction of an interdisciplinary faculty committee and the departments participating in the program. The EPC faculty have teaching and research interests in the area of environmental pollution control, and where projects are being funded, support opportunities may be available. Currently, faculty from sixteen departments in four colleges are participating in the program at University Park and faculty from four graduate programs participate at Penn State Harrisburg. A student is affiliated with one of these departments on the basis of his/her specific area of interest and is advised by an EPC faculty member in that department. Maximum flexibility is maintained by the program in an effort to meet both the needs of the individual student and the pollution control activity in which he/she wants to participate.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

The EPC program is designed for students with backgrounds in science or engineering. Admission will be granted if the applicant has the necessary program prerequisites and a faculty member in the student's interest area agrees to serve as adviser. Normal admission requirements include mathematics through integral calculus plus two courses each in both general chemistry and physics.

Students with a 3.00 junior/senior average and with appropriate backgrounds in mathematics and science will be considered for admission. The best-qualified applicants will be admitted up to the number of places that are available for new students. Applicants to the Environmental Pollution Control program are required to provide a statement of objectives, three letters of recommendation, and scores from the Graduate Record Examination (GRE) Aptitude Test (verbal, quantitative, analytical) to complete the admission process. Entering graduate students for whom English is not their first language are required to have a score of at least 560 on the TOEFL (Test of English as a Foreign Language) examination. There is no foreign language requirement.

The Pennsylvania State University
Degree Requirements

All candidates are required to take a core course in each of four environmental areas--air, water, solid waste, hazardous waste management, and policy/risk--and 1 credit of the E P C 590 seminar for a minimum core requirement of 12 credits. All but 6 of the total 30 credits required must be selected from a recommended course list. If the option to prepare a thesis is selected (M.S. only), students must schedule at least 12 credits at the 500 level, take at least 6 credits of 600-level thesis research in their thesis adviser’s academic department, and write a thesis on an area concerned with environmental pollution. Only 6 credits of 600-level course work may count toward the 30-credit minimum degree requirement. Students who select the nonthesis option must schedule at least 18 credits at the 500 level, which may include 1 credit of E P C 590 and a maximum of 3 paper-writing credits. The M.E.P.C. E P C degree require submission of a scholarly master's paper.

Watershed Stewardship Option

The Graduate Option in Watershed Stewardship is a graduate option intended to provide enhanced educational opportunities for students with an interest in water resources management who are enrolled in a graduate degree program within Environmental Pollution Control at the University Park campus. The objective of the Graduate Option in Watershed Stewardship is to educate students to facilitate team-oriented, community-based watershed management planning directed at natural resources conservation and environmental problems encountered in Pennsylvania communities, especially non-point source water pollution. The Graduate Option in Watershed Stewardship requires 22 credits of graduate coursework: 12 credits of breadth courses, 2 credits of Watershed Stewardship Seminar courses (FOR 591A and FOR 591B or LARCH 510.2), and 8 credits of Watershed Stewardship Practicum I and II courses (FOR 570 and FOR 571 or LARCH 540.2 and LARCH 550.2). Breadth courses will consist of three graduate credits of coursework from each of four subject areas: 1) water resources science, 2) social science, public policy and economics, 3) humanities, and 4) communications and design. In the watershed stewardship practicum courses students work in teams with community, government and business leaders to analyze and understand natural resources and environmental pollution problems and creatively synthesize appropriate solutions in the form of a written watershed management plan.

A representative pattern of scheduling for the Graduate Option in Watershed Stewardship in addition to a student’s other degree requirements might be:

First Year:

Fall Semester
Breadth electives? 7 credits
FOR 591A or LARCH 510.2
Watered Stewardship Issues
Colloquium, 1 credit
Spring Semester
Breadth electives? 7 credits
FOR 591B or LARCH 510.2
Watered Stewardship
Planning Colloquium, 1 credit

Second Year:

Fall Semester
FOR 570 or LARCH 540.2? 3 credits
Keystone Project
Spring Semester
FOR 571 or LARCH 550.2? 3 credits
Keystone Project

A list of acceptable breadth courses from each category is provided in the Graduate Option in Watershed Stewardship Handbook. Students will be allowed to petition to the Center for Watershed Stewardship to substitute higher level or equivalent courses in a major field to suit their specific backgrounds and goals. Courses taken for the Graduate Option in Watershed Stewardship may be used to satisfy other EPC degree requirements with concurrence of their adviser and graduate committee and only if such courses are approved EPC core requirements or are on the currently approved list of additional 400- and 500-level course for the EPC major. The graduate committee for a student enrolled in the Option in Watershed Stewardship must include a faculty representative from the Center for Watershed Stewardship.

Students enrolled in M.E.P.C. or M.S. degree program within Environmental Pollution Control may apply to participate in the Graduate Option in Watershed Stewardship. EPC students may prepare their thesis or paper on a topic related to their watershed management plan, but the thesis or paper must reflect independent thought and scholarly effort above and beyond the requirements of FOR 570 and FOR 571 or LARCH 540.2 and LARCH 550.2.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

ENVIRONMENTAL POLLUTION CONTROL (E P C)
590. COLLOQUIUM (1)

EPC Concurrent degree offering with the Penn State Dickinson School of Law

Penn State Harrisburg School of Science, Engineering, and Technology
Penn State Dickinson School of Law

Degrees Conferred:

J.D. (Dickinson) M.E.P.C., M.S. (Penn State Harrisburg)

Degrees

The Penn State Dickinson School of Law and the Intercollege Graduate Program in Environmental Pollution Control (EPC) offer a coordinated program leading to the degrees of Juris Doctor (J.D.) and Master of Environmental Pollution Control (M.E.P.C.), or Master of Science in EPC (M.S.).

The EPC programs are interdisciplinary, dealing with all aspects of controlling air, water, and solid waste pollution and disposal. The master of engineering degree is designed for those with an undergraduate degree in engineering, while the master of environmental pollution control degree is for those with science or nontechnical backgrounds. The master of science degree is intended for those students who wish to intensively pursue a research area as part of their master’s degree work.

Admission to the Program

In order to be admitted to the program, students must first be admitted to Dickinson under its regular admission procedures. Students are admitted to begin classes in the fall only. Dickinson will screen potential program candidates, and need not forward applications of all Dickinson admittees who have expressed an interest in the EPC programs. Dickinson can withhold support for some admittees until they have demonstrated proficiency in their legal studies and a capacity for dual-degree study. The EPC program at Penn State Harrisburg will make an independent admission decision as to all dual-degree applicants.

Admission Requirements

The Pennsylvania State University
Dickinson
A bachelor's or equivalent degree from an accredited college is a prerequisite for admission. However, there is no standard prescribed undergraduate curriculum. An applicant should have acquired significant oral and written communication skills before entering law school. The following are required of applicants: complete application form for Dickinson; taking of the Law School Admission Test (LSAT); completion of an LSDAS report; a one-page personal statement; employment record since high school; two recommendations.

EPC
A bachelor's degree in engineering from an accredited program is required for the Master of Engineering degree program. For the Environmental Pollution Control program, a bachelor's degree is required, including courses in mathematics through integral calculus and two courses each in both general physics and chemistry. If the applicant has not had experience with aspects of environmental engineering or science, completion of ENVE 397 Introduction to Environmental Engineering and Science or CE 297B Water Pollution Control is strongly suggested prior to the start of the graduate course work in the program. A completed Graduate School application form also is required.

Sequence
Students complete the first year of the J.D. program before beginning the EPC program. (While students might take courses in the EPC program prior to enrollment at Dickinson, credit for those courses may not count toward the J.D. degree.) Thereafter, students may concurrently enroll in courses in the J.D. and the EPC programs provided that they abide by the requirements of each program.

Interprogram Transfer of Credits

J.D.
A maximum of 12 credits for EPC course work may be transferred for credit toward the J.D. degree at Dickinson. Courses for which such credit may be applied shall be subject to approval by the Dickinson faculty. Students must obtain a grade satisfactory to Dickinson for the course work to be credited toward the J.D. degree.

M.E.P.C.
A maximum of 12 credits of Dickinson course work may be counted for credit toward this degree, subject to EPC approval based on the relevance to the MEPC degree program. No course work at Dickinson may be used to satisfy the master's paper requirement of the MEPC degree program. However, a member of the Penn State graduate faculty from Dickinson may be designated as a reader for the master's project.

M.S. in EPC
A maximum of 8 credits of Dickinson course work may be counted for credit toward this degree, subject to EPC approval based on relevance to the degree program. No course work at Dickinson may be used to satisfy the master's paper requirement of the M.Eng. degree program or the thesis requirement of the M.S. degree. However, a member of Penn State graduate faculty from Dickinson may be designated as a reader for the master's project.

Recommended Program of Study and Advising
All students in the program have two advisers, one from Dickinson and one from EPC (Penn State Harrisburg). Periodic interaction between the two advisers is encouraged. A program of study is developed for each student, taking into account the fact that some courses at both locations are offered on a rotating basis. Many courses are offered every year, but some are offered every two or three years. Advisers will have available a list of projected relevant offerings in order to work with the student on an individualized program of study.

Tuition
Students will be charged the applicable Dickinson tuition to cover the J.D. program and graduate tuition on a per credit (in-state) rate of the EPC courses.

Graduation
A student in the program may complete the requirements for one of the degrees, and be awarded that degree, prior to completing all the requirements for the other degree. All courses in one program that will count toward meeting the requirements of the other program must be completed before awarding the first degree.

Degrees Conferred:
- Ph.D. in Engineering Science and Mechanics
- M.S. in Engineering Science and Mechanics
- M.Eng. in Engineering Mechanics
- Integrated Undergraduate/Graduate Study - B.S. in Engineering Science - M.S. in Engineering Science and Mechanics

The Graduate Faculty
- Dinesh Agrawal, Ph.D. (Penn State) Director, Microwave Processing and Engineering Center; Professor of Engineering Science and Materials
- S. Ashok, Ph.D. (Rensselaer) Professor of Engineering Science
- Charles Bakis, Ph.D. (Virginia Tech) Distinguished Professor of Engineering Science and Mechanics
- Jeffrey M. Catchmark, Ph.D. (Lehigh) Associate Professor of Agricultural and Biological Engineering
- Francesco Costanzo, Ph.D. (Texas A&M) Professor of Engineering Science and Mechanics
- Joseph P. Cusumano, Ph.D. (Cornell) Professor of Engineering Science and Mechanics
- Melik C. Demirel, Ph.D. (Carnegie Mellon) Associate Professor of Engineering Science and Mechanics
- Cheng Dong, Ph.D. (Columbia) Distinguished Professor of Bioengineering
- Corina Drapaca, Ph.D. (Waterloo, Canada) Assistant Professor of Engineering Science and Mechanics
- Patrick Drew, Ph.D. (Brandeis) Assistant Professor of Engineering Science and Mechanics
- Renata S. Engel, Ph.D. (South Dakota) Associate Dean for Academic Programs, College of Engineering; Professor of Design, Engineering Science and Mechanics
- Stephen J. Fonas, Ph.D. (Pennsylvania) Director, Center for Nanotechnology Education and Utilization; Bayard D. Kunkle Chair in Engineering
- Bruce J. Gluckman, Ph.D. (Pennsylvania) Associate Professor of Engineering Science and Mechanics, and Neurosurgery
- Gary L. Gray, Ph.D. (Wisconsin, Madison) Associate Professor of Engineering Science and Mechanics
- Reginald Hamilton, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of Engineering Science and Mechanics
- Robert E. Harbaugh, M.D. (Penn State) Chair, Department of Neurosurgery; Professor of Engineering Science and Mechanics
- Donald F. Heaney Jr., Ph.D. (Penn State) Director, Center for Innovative Sintered Products; Associate Professor of Engineering Science and Mechanics
- Mark W. Horn, Ph.D. (Penn State) Associate Professor of Engineering Science and Mechanics
- Jun (Tony) Huang, Ph.D. (UCI) Associate Professor of Engineering Science and Mechanics
- Mst Kamrunnahar (Alberta, Canada) Research Associate, Center for Neural Engineering
- Koundela, Ph.D. (Penn State) Head, Composites Materials Division, Applied Research Lab
- Akhlesh Lakhtakia, D.Sc. (Banaras Hindu U) Charles Godfrey Binder Professor of Engineering Science and Mechanics
- Michael T. Lanaghn, Ph.D. (Penn State) Associate Director, Materials Research Institute; Professor of Engineering Science and Mechanics, and Materials Science and Engineering
- Patrick M. Lenahan, Ph.D. (Illinois) Distinguished Professor of Engineering Science and Mechanics
- Herbert H. Lipowsky, Ph.D. (California, San Diego) Chair and Professor of Bioengineering
- Clifford J. Lissenden, Ph.D. (Virginia) Professor of Engineering Science and Mechanics
- Christine B. Masters, Ph.D. (Penn State) Associate Professor of Engineering Science and Mechanics
- Robert N. Pangborn, Ph.D. (Rutgers) Vice President and Dean for Undergraduate Education; Professor of Engineering Science
- Jean L. Pytel, Ph.D. (Penn State) Assistant Dean for Student Services, College of Engineering; Associate Professor of Engineering Mechanics
- Joseph L. Rose, Ph.D. (Drexel) Paul Morrow Professor of Engineering Science and Mechanics and in Design and Manufacturing
- Steven J. Schiff, M.D., Ph.D. (Duke School of Medicine) Brush Chair Professor of Engineering in the Department of Engineering Science and Mechanics; Professor of Neurosurgery and Physics; Director, Center for Neural Engineering
- Albert E. Segall (Penn State) Professor of Engineering Science and Mechanics
- Vladimir V. Semak, Ph.D. (Moscow Inst of Physics and Tech) Senior Research Associate; Associate Professor of Engineering Science and Mechanics
- Batia A. Shavy, Ph.D. (Johns Hopkins) Professor of Engineering Science and Mechanics
- Elzbieta Sikora, Ph.D. (Polish Academy of Science) Research Associate
- Ivica Smid, Ph.D. (U Vienna) Associate Professor of Engineering Science and Mechanics
- John A. Sullivan, Ph.D. (Penn State) Assistant Professor of Engineering Science and Mechanics
- Bernard R. Wittmann, Ph.D. (California, Los Angeles) Schell Professor of Engineering Science and Mechanics
- Judith A. Todd, Ph.D. (Cambridge) Department Head; P. B. Breneman Chair and Professor of Engineering Science and Mechanics
- Mirra Urquidi-Macdonald, Ph.D. (U Paris, Sud) Professor of Engineering Science and Mechanics
- Eduard Ventsel, D.Sc. (Moscow Civil Engineering Inst) Professor of Engineering Science and Mechanics
- Jian Xu, Ph.D. (Michigan) Associate Professor of Engineering Science and Mechanics; Adjunct Professor of Electrical Engineering
- Sam Y. Zarmir, Ph.D. (Penn State) Professor Emeritus of Engineering Mechanics
- Sulin Zhang, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of Engineering Science and Mechanics

Opportunities for graduate studies are available in interdisciplinary and multidisciplinary research areas including: biomechanics; composite materials; continuum mechanics; electrical, magnetic, electromagnetic, optical, thermal, and mechanical properties of thin films; experimental mechanics; lithography; MEMS and MOEMS; micromechanics; molecular beam epitaxy; numerical methods; photovoltaic materials and devices; nanotechnology and nanobiotechnology; properties of materials; shock, vibration acoustics and nonlinear dynamics; structural health monitoring; structural mechanics; wave-material interaction; non-destructive evaluation and testing; and failure analysis.

Admission Requirements

For admission to the Graduate School, an applicant must hold either (1) a bachelor's degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution. Graduates in engineering, the sciences, mathematics, engineering science, and materials who present a 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Applicants will be accepted up to the number of places available for new students.

Scores from the Graduate Record Examination (GRE) are required for admission. At the discretion of the Graduate Officer, a student may be granted provisional admission pending receipt of acceptable GRE scores.

International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System). The minimum composite score for the IELTS is 6.5. The minimum score accepted for the paper-based TOEFL is 550; 80 (total) for the internet-based test (iBT). Applicants with TOEFL iBT scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency and, if necessary, remedial course work.

International applicants who have received a baccalaureate or a graduate degree from a college/university/institution in the following countries are exempt from the TOEFL/IELTS requirement: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland,
M. Eng. (E MCH) Degree Requirements
At least 30 graduate credits must be earned, of which 22 must be from lecture/laboratory courses approved by the department. Fifteen credits must be earned from E SC or E MCH courses as follows: 3 credits are required in the area of Analysis; 3 credits in the area of Fields; 3 credits in the area of Motion; 3 credits in the area of Materials Performance/Reliability or Materials Processing/Structure/Characterization; and 3 credits from any one of the four categories. Additionally, 1 credit of graduate seminar (E SC 514 or E MCH 514) must be earned. A scholarly written report on a developmental study involving at least one area represented in the course work must be written, for which 3 credits of E SC 596 or E MCH 596 can be granted. This report must be comparable in the level of work and quality to a master's thesis. A 3.0 minimum grade-point average is required to maintain good academic standing and for graduation.

M.S. (ESMCH) Degree Requirements
At least 32 graduate credits must be earned, of which 24 credits must be from 400- and 500-level lecture/laboratory courses approved by the department. No more than 6 credits may be earned from 400-level courses. Three credits are required in the area of Mathematical Methods in Engineering (E MCH 524A, or an equivalent), 3 credits in the area of Mechanics; 3 credits in the area of Materials; and 3 credits in the area of Engineering Science. In addition, 2 credits of graduate seminar (E MCH 514 or E SC 514) must be earned. A thesis is required and at least 6 credits of thesis research (E MCH 600/610 or E SC 600/610) must be included in the student’s program of study. The thesis must be a well-organized account of research undertaken by the student and must show initiative and originality. A 3.0 minimum grade-point average is required to maintain good academic standing and for graduation.

Ph.D. (ESMCH) Degree Requirements
Students may enter the Ph.D. program after completing an M.S. degree or directly from the B.S. degree. The student must have completed an appropriate baccalaureate or master’s degree prior to admission. In addition: 1) at least 18 graduate credits must be earned in 400- and 500-level lecture/laboratory courses approved by the department; and, 2) 3 credits of a graduate seminar (E MCH 514 or E SC 514) must be earned beyond the master’s degree requirements. The student must demonstrate English proficiency, pass a candidacy examination, a comprehensive examination, and a final oral examination. A doctoral thesis on an appropriate topic is required. It must be a well-organized account of research undertaken by the student and show initiative and originality. A minimum grade-point average of 3.00 for work done at the University is required to maintain good academic standing and is required for doctoral candidacy, admission to the comprehensive examination, the final oral examination, and for graduation. It should be noted that passage of the final oral examination is necessary but is not sufficient for award of the degree; the dissertation must be accepted, as the ultimate step.

Integrated Undergraduate/Graduate Study - B.S. in Engineering Science - M.S. in Engineering Science and Mechanics

Introduction
The flexibility and strength in fundamentals of the Engineering Science curriculum provides an opportunity for Engineering Science undergraduate students to participate in the ESM Integrated Undergraduate Graduate (IUG) program. Application for IUG status may be made in the fifth or subsequent semesters. The IUG program promotes the interchange of ideas across all branches of the scientific and engineering disciplines from both a theoretical and experimental perspective. Students in the composite degree program are expected to pursue interdisciplinary studies in areas that encompass nano- and bionanotechnology, advanced materials, electromagnetic, mechanics, microelectronics, nanoelectronics and bioelectronics, neural engineering, photonics and photovoltaics (among others) and they are expected to embrace multidisciplinary perspectives across departmental, College, and University boundaries.

Other Relevant Information
Continuous registration is required for all students until the thesis or engineering report is approved.

Student Aid
Research and Teaching Assistantships (half time) are granted to a majority of graduate students in good academic standing. Financial support is ordinarily limited to three semesters for full-time master’s degree students, and six semesters for full-time Ph.D. students. In addition to the fellowships, traineeships, graduate assistantships, or other forms of financial aid described in the STUDENT AID section of the Graduate Bulletin, the following awards typically have been available to graduate students in this program:

THEODORE HOLDEN THOMAS, Jr., MEMORIAL SCHOLARSHIP-Available to undergraduate or graduate students who display outstanding ability and have enrolled in the Department of Engineering Science and Mechanics. Apply to the Department of Engineering Science and Mechanics, 212 Earth-Engineering Sciences Building. Deadline is February 1.

SABITH AND GÜLER HAYEK GRADUATE SCHOLARSHIP IN ENGINEERING SCIENCE AND MECHANICS-Provides recognition and financial assistance to outstanding graduate students enrolled or planning to enroll in the Department of Engineering Science and Mechanics. Apply to the Department of Engineering Science and Mechanics, 211 Earth-Engineering Sciences Building. Deadline is February 1.

DR. RICHARD LLORENSES GRADUATE AWARD IN ENGINEERING SCIENCE AND MECHANICS - Provides recognition and financial assistance to graduate students pursuing a degree in Engineering Science and Mechanics who have achieved academic excellence. Apply to the Department of Engineering Science and Mechanics, 211 Earth-Engineering Sciences Building. Deadline is February 1.

RICHARD P. MCNITT SCHOLARSHIP IN ENGINEERING SCIENCE AND MECHANICS - Available to undergraduate or graduate students enrolled in the Department of Engineering Science and Mechanics who have achieved superior academic records or who manifest promise of outstanding academic success. Apply to the Department of Engineering Science and Mechanics, 212 Earth-Engineering Sciences Building. Deadline is February 1.

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit courses in order to make deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Sedig S. Agili, Ph.D. (Marquette) Associate Professor of Electrical Engineering
- Jennifer A. Albert, Ph.D. (West Virginia) Assistant Professor of Civil Engineering
- Omid Ansary, Ph.D. (Wayne State) Assistant Professor of Mathematics
- Katherine Baker, Ph.D. (Delaware) Associate Professor of Environmental Microbiology
- Ganesh P. Bal, Ph.D. (Virginia Tech) Assistant Professor of Engineering
- Amit Banerjee, Ph.D. (New Jersey Institute of Technology) Assistant Professor of Mechanical Engineering
- Jeremy Blum, Ph.D. (George Washington) Assistant Professor of Computer Science
- Eugenie Boman, Ph.D. (Connecticut) Associate Professor of Mathematics
- Thang N. Bui, Ph.D. (MIT) Associate Professor of Engineering
- Joseph J. Cecere, Ph.D. (North Texas State) Associate Professor of Engineering
- Sukoon Chang, Ph.D. (Rutgers) Associate Professor of Computer Science
- Yen-Chih Chen, Ph.D. (Purdue) Assistant Professor of Environmental Engineering
- Yohochia Frank Chen, Ph.D. (Minnesota) Professor of Engineering
- Balwant Chohan, Ph.D. (Mass Amherst) Assistant Professor of Chemistry
- Richard Ciocci, Ph.D. (Maryland) Associate Professor of Mechanical Engineering
- Shirley E. Clark, Ph.D. (Alabama) Associate Professor of Environmental Engineering
- Thomas Eberlein, Ph.D. (Wisconsin—Madison) Associate Professor of Chemistry
- Kerwin Foster, Ph.D. (Florida State); Ph.D. (UNC) Assistant Professor of Physics
- Ram P. Goel, Ph.D. (Michigan State) Assistant Professor of Mechanical Engineering
- Robert Gray, Ph.D. (Ohio) Associate Professor of Electrical Engineering
- Peter Idowu, Ph.D. (Toledo) Associate Professor of Engineering
- Harris Imaodjemu, Ph.D. (North Carolina State) Associate Professor of Engineering
- Hossein Jula, Ph.D. (Southern California) Associate Professor of Electrical Engineering
- Sai Kakaturu, Ph.D. (Kansas State) Assistant Professor of Civil Engineering
- Jubum Kim, Ph.D. (Washington) Assistant Professor of Civil Engineering
- Seor Mackertich, Ph.D. (Penn State) Associate Professor of Engineering
- Anita Marenco, Ph.D. (Cornell) Assistant Professor of Mathematics
- Alfred Mohabir, Ph.D. (SUNY) Professor of Electrical Engineering
- Shashi Marikunte, Ph.D. (Michigan State) Assistant Professor of Civil Engineering
- Linda M. Null, Ph.D. (Iowa State) Associate Professor of Computer Science
- Graham Ray, Ph.D. (Penn State) Professor of Engineering
- Sairam Rudrabhatla, Ph.D. (Oklahoma) Assistant Professor of Biology
- Jerry F. Shoup, Ph.D. (Penn State) Interim Director, School of Science, Engineering, and Technology; Associate Professor of Electrical Engineering
- John Shartman, Ph.D. (Wayne State) Assistant Professor of Mathematics
- Mohammad-Reza (Soheil) Tofighi, Ph.D. (Drexel) Associate Professor of Electrical Engineering
- Sofia Vidalis, Ph.D. (Florida) Assistant Professor of Civil Engineering
- Clifford Wagner, Ph.D. (New York, Albany) Associate Professor of Math & Computer Science
- Ronald Walker, Ph.D. (Michigan) Assistant Professor of Mathematics
- Seth Woltpert, Ph.D. (Rutgers) Associate Professor of Engineering
- Yuefeng Xie, Ph.D. (Tsinghua) Professor of Environmental Engineering

A program leading to the degree of Master of Engineering with a major in Engineering Science is offered at Penn State Harrisburg. The program is designed to provide a broad, advanced education in the engineering sciences with some specialization permitted in the area of the student's major interest. It is offered specifically to permit practicing engineers to pursue advanced studies through evening classes while in full-time employment in industry in the area. Courses offered for the program are all established and authorized by the resident departments at the University Park campus.

Admission Requirements

Scores from the graduate Record Examinations (GRE) are not required for students holding baccalaureate degrees from accredited U.S. educational institutions. At the discretion of a graduate program, students may be admitted for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements state in the GENERAL INFORMATION section of the Graduate Bulletin.

Students may be admitted to the program from a wide variety of disciplines. Students applying for admission are expected to have completed the following core courses: (1) physics through modern physics; (2) mathematics through differential equations; (3) one course in engineering thermodynamics; (4) one course in electrical circuits; (5) basic courses in engineering statics, dynamics, and strength of materials; and (6) computer programming. Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

English Proficiency—The language of instruction at Penn State is English. All international applicants whose first language is not English or who have not received baccalaureate or master’s degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. Departments and programs may have more stringent requirements and may require all international applicants to submit a TOEFL or IELTS score regardless of their academic background. A TOEFL score of at least 550 (paper-based test), 213 (computer-based test) or a total score of 80 on the Internet-based test (iBT), with a minimum of 6.5 on the speaking section, is required for admission. Graduate programs may require a higher score. The International English Language Testing System (IELTS) module provides an exam to test four mandatory skill areas: listening, reading, writing, and speaking. All four modules are equally weighted in the evaluation process. The International English Language Testing System has been approved by the Graduate Council as an alternative exam to the TOEFL for international students applying to Penn State. A minimum composite score of 6.5 on the IELTS test is required for admission.

The Pennsylvania State University
Completed International Application material must be submitted by the following deadlines: May 31 for the fall semester; September 30 for the spring semester; February 28 for the summer session. Applications received after these deadlines will be processed for the following semester.

Applicants should submit the following:
— A graduate online application with the application fee;
— Official copies of undergraduate transcripts;
— Three (3) letters of reference, especially those from faculty who can evaluate academic potential;
— A personal statement of technical interest, goals, and experience.

**NOTE:** Test scores from the Graduate Record Examination (GRE) are required ONLY for those applicants indicating interest in an assistantship.

**Degree Requirements**

The credit requirements in this major will be satisfied by an appropriate combination of core courses and elective courses. The core courses include offerings in mathematics and in several branches of engineering that have been selected because of their general character and breadth of applicability to all fields of engineering. A minimum of 30 credits is required, of which at least 18 must be at the 500 level. Of the 30 credits, 6 credits of mathematics and a scholarly written report (3 credits) must be completed.

This program should be distinguished from the graduate program in Engineering Science at University Park campus, which offers the M.S. degree.

**Other Relevant Information**

More details regarding admission requirements are available from the directors of the graduate centers offering the program.

**Student Aid**

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the [STUDENT AID](#) section of the [Graduate Bulletin](#).

- Scottie McDonald, Ph.D. (Michigan), Professor of Geosciences
- Andrew A. Nyblade, Ph.D. (Michigan), Associate Professor of Geosciences
- Christopher Palma, Ph.D. (Virginia), Outreach Fellow, Science
- Demian M. Saffer, Ph.D. (UC Santa Cruz), Assistant Professor of Geosciences
- Kamini Singha, Ph.D. (Stanford), Assistant Professor of Geosciences
- Timothy White, Ph.D. (Penn State), P.G., Senior Research Associate, EMS Earth and Environmental Systems Institute

The M.Ed. in Earth Sciences program is designed for secondary science teachers who seek to enrich their knowledge and practice through rigorous courses and individual projects supervised by Penn State faculty members. Combining graduate courses from academic departments in Penn State's College of Earth and Mineral Sciences, College of Education, and Eberly College of Science, the curriculum will prepare teachers to help students in grades 7 through 12 master educational objectives related to Earth and space science, as specified in National Science Education Standards (National Academy of Sciences, 1996). To accommodate working teachers who are only able to study part-time and at a distance, courses will be offered online through Penn State's World Campus. Fall, Spring, and Summer semester offerings will be available. Students will be granted licenses to use the courseware modules developed for the M.Ed. in Earth Sciences program in their secondary classrooms.

Admission Requirements

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the internet-based test. The minimum composite score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a masters degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British west Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, The United States, and Wales.

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students may initially enroll in M.Ed. in Earth Sciences classes as non-degree graduate students. Up to 15 credits earned in non-degree status may be counted toward the M.Ed. in Earth Sciences degree.

Master's Degree Requirements

The M.Ed. in Earth Sciences degree is conferred upon students who earn a minimum of 30 credits while maintaining an average grade of 3.0 or better in all course work, including at least 18 credits at the 500 level or above (with at least 6 credits at the 500 level), and who complete a quality culminating individual project in consultation with a graduate adviser. Students will have the opportunity to participate in face-to-face field experiences or workshops at University Park or other locations during Summer sessions.

Student Aid

Graduate assistantships are not available. Financial aid opportunities for part-time students who participate through the World Campus are discussed at http://worldcampus.psu.edu/StudentServices_Paying.shtml.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

EARTH SCIENCES (EARTH) course list
The Graduate Faculty

- Marc D. Abrams, Ph.D. (Michigan State) Professor of Forest Ecology and Physiology
- Mary Barbercheck, Ph.D. (California, Davis) Professor of Entomology
- Paul Bartell, Ph.D. (Virginia) Assistant Professor of Avian Biology
- Ilana Baums, Ph.D. (Miami) Assistant Professor of Biology
- Otta Bjornstad, Ph.D. (Oslø) Assistant Professor of Entomology
- William Brown, Ph.D. (Virginia Tech) Professor of Fisheries and Aquatic Sciences
- Margaret C. Brittingham, Ph.D. (Wisconsin) Associate Professor of Wildlife Resources
- Robert P. Brooks, Ph.D. (Massachusetts) Professor of Wildlife and Wetlands
- Mary Ann Bruns, Ph.D. (Michigan State) Assistant Professor of Agronomy/Soil Microbial Ecology
- Tomas Carlo-Joglar, Ph.D. (Colorado) Assistant Professor of Biology
- § Christopher F. Uhl, Ph.D. (Michigan) Associate Professor of Forest Resources
- Charles Andrew Cole, Ph.D. (Southern Illinois) Assistant Professor of Landscape Architecture and Ecology
- David Eissenstat, Ph.D. (Utah State) Professor of Woody Plant Physiology; Coordinator, Physiological Ecology Option
- Matthew Ferrari, Ph.D. Assistant Professor of Biology
- § C. Paola Ferrari, Ph.D. (Michigan State) Assistant Professor of Fisheries Management
- James Eide, Ph.D. (Penn State) Associate Professor of Forest Resources
- Charles R. Fisher, Jr., Ph.D. (California, Santa Barbara) Professor of Biology
- § Shelby J. Fleischer, Ph.D. (Auburn) Associate Professor of Entomology
- Robert Gaige, Ph.D. (Ohio State) Associate Professor of Crop Rearing Systems
- § Michael R. Gannon, Ph.D. (Texas Tech) Associate Professor of Biology
- Bryan T. Grenfell, Ph.D. (Sheffield, UK) Professor of Biology
- § Lauraine K. Hawkins, Ph.D. (New Mexico) Assistant Professor of Biology
- § S. Blair Hedges, Ph.D. (Maryland) Associate Professor of Biology
- Date Holen, Ph.D. (Wisconsin, Milwaukee) Willaman Professor of Plant Physiology
- David P. Hughes, D.Phil. (Oxford) Assistant Professor of Entomology and Biology
- Scott Isard, Ph.D. (Indiana) Professor of Aerobiology
- § Heather D. Karsten, Ph.D. (Cornell) Assistant Professor of Crop Production/Ecology
- Jason P. Kaye, Ph.D. (Colorado) Assistant Professor of Soil Biogeochemistry
- Margaret K. Kikkawa, Ph.D. (Colorado State) Assistant Professor of Biology
- § K. C. Kim, Ph.D. (Minnesota) Professor of Population Genetics
- Roger Koide, Ph.D. (California, Berkeley) Professor of Horticulture Ecology
- Todd C. Lajeunesse, Ph.D. Assistant Professor of Biology
- Tracy Langkilde, Ph.D. (Sydney) Assistant Professor of Biology
- Henry Lin, Ph.D. (Texas A&M) Assistant Professor of Crop and Soil Science
- Jonathan Lynch, Ph.D. (California, Davis) Associate Professor of Plant Nutrition
- Jennifer Macalady, Ph.D. (California, Davis) Assistant Professor of Geosciences
- Carolyn G. Mahan, Ph.D. Associate Professor of Biology; Co-coordinator, Environmental Studies Program, Penn State Altoona
- James H. Marden, Ph.D. (Vermont) Associate Professor of Agriculture
- Mark Mescher, Ph.D. (Georgia) Assistant Professor of Entomology
- David A. Mortensen (North Carolina State) Associate Professor of Crop and Soil Sciences
- Susan Parks, Ph.D. (MIT/Woods Hole Oceanographic Inst) Research Associate
- * Ganapati P. Patil, Ph.D. (Michigan) Distinguished Professor of Mathematical Statistics
- Eric Post, Ph.D. (Alaska) Assistant Professor of Biology
- Andrew Read, D.Phil. (Oxford, UK) Professor of Biology and Entomology
- § Michael C. Saunders, Ph.D. (Georgia) Associate Professor of Entomology
- Beth Shapiro, D.Phil. (Oxford, UK) Schaffer Career Development Assistant Professor of Biology
- William E. Sharpe, Ph.D. (West Virginia) Professor of Forest Hydrology
- Katriona Shea, Ph.D. (London) Assistant Professor of Theoretical Applied Ecology, Life Sciences Consortium
- Erica Smithwick, Ph.D. (Oregon State) Assistant Professor of Geography
- § Jay R. Stalater, Jr., Ph.D. (Virginia Tech) Professor of Ichthyology; Coordinator, Conservation Biology Option
- § Kim C. Steiner, Ph.D. (Michigan State) Professor of Forest Biology
- § Andrew G. Stephenson, Ph.D. (Michigan) Professor of Biology
- Kenneth R. Tamminga, M.P. (Queens, Canada) Associate Professor of Landscape Architecture
- § Alan H. Taylor, Ph.D. (Colorado) Associate Professor of Geography
- John Tooker, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of Entomology
- James Timlinson, Ph.D. (Mississippi) Ralph O. Mumma Professor of Entomology
- § Christopher F. Uhl, Ph.D. (Michigan State) Professor of Biology; Chair, IGDP in Ecology
- § Tyler Wagner, Ph.D. (Michigan State) Adjunct Assistant Professor of Fisheries Ecology
- Denice Wardrop, Ph.D. (Penn State) Assistant Director, Penn State Cooperative Wetlands Center
- Peter Will, Ph.D. (Pennsylvania) Associate Professor of Geosciences; John T. Ryan Jr. Faculty Fellow
- Eric Zenner, Ph.D. (Oregon State) Associate Professor of Silviculture

Note: Quantitative Ecology option faculty are designated by (*), Microbial Ecology option faculty by (#), Conservation Biology option faculty by (§), and Physiological Ecology option faculty by (). See text for further explanation.
The program is administered by a committee drawn from faculty members in several departments and colleges of the University. This committee and its chair are appointed by the dean of the Graduate School. The instructional staff is composed of participating faculty in those departments offering graduate courses in fields closely allied to ecology.

The advisory committee is selected by the candidate and his/her adviser and approved by the Graduate School. The committee has the responsibility for determining the course program and research acceptable in satisfying degree requirements.

Four options for specialization are offered: Quantitative Ecology, Microbial Ecology, Conservation Biology and Physiological Ecology. Students are not required to select an option. The quantitative ecology option includes mathematical and statistical modeling and applications of statistics to experimental design and data analysis. The microbial ecology option includes basic aquatic and soil microbial ecology and applications to recycling of materials and release of genetically engineered organisms. The conservation biology option is concerned with problems of maintaining the rapidly disappearing diversity of organisms and their habitats, and the global reservoir of genetic diversity that these organisms represent. The physiological ecology option is concerned primarily with the function and performance of organisms in their environment. Each option entails extra course requirements plus a thesis directed by an ecology faculty member in the option. Additional information can be obtained from the option coordinators.

Admission Requirements

Scores from the Grade Record Examination (GRE), including verbal, quantitative, and advanced biology test, are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin. Candidates should have a strong science background, including chemistry through organic chemistry, mathematics through Calculus, physics, and biology. A limited number of such courses can be made up while the student is pursuing a graduate student.

Students with a background in another discipline that has potential value to original ecological work will be seriously considered. A junior/senior grade-point average of 3.00 or better (on a 4.00 scale) is required.

Students are strongly urged to choose their research interests and initiate communication with the relevant faculty member(s) before applying for admission. A student will not be admitted without the commitment of a faculty member to serve as the student’s research adviser. Teaching and research assistantships are available only through the student’s faculty adviser.

The top sheet (white copy) of the application and application fee are to be sent to the Graduate School. The applicant should forward the following directly to the program chair: (1) pink copy of the application; (2) three or more letters of recommendation regarding the student’s academic and professional promise; (3) a concise one-page statement describing the student’s goals both within the program and in professional life; and (4) GRE scores (general test and the subject test in biology). Specific inquiries about the Ecology program may be directed to the program chair. Applications should be submitted by February 1 for summer or fall semester admission.

Master’s Degree Requirements

In addition to Graduate School requirements, the instructional program includes three graduate core courses in ecology (one each in two of the three core areas: population ecology, community/ecosystem ecology, and physiological ecology), an advanced 3-credit statistic course, two credits of colloquium, a minimum of six thesis credits, breadth courses selected by the student in consultation with the research adviser and research committee, and a thesis research project directed by the student’s adviser. A nonthesis option is available for the M.S. degree, at the adviser’s discretion.

Doctoral Degree Requirements

In addition to Graduate School requirements, the instructional program includes three graduate core courses in ecology (one each of the three core areas: population ecology, community/ecosystem ecology, and physiological ecology), two advanced 3-credit statistics courses, 4 credits of colloquium, breadth courses as selected by the student in consultation with the research adviser and research committee, a minimum of 15 thesis credits, and a thesis research project directed by the student’s adviser.

The communication and foreign language requirement for the Ph.D. degree may be satisfied by strong performance in two semesters of one foreign language or the equivalent. Both the candidacy and comprehensive examinations will be written and oral.

Biogeochemistry Dual-Title Degree Program

Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Students in the Biogeochemistry Dual Title program are required to have two advisers from separate disciplines: one individual serving as a primary adviser in their major degree program and a secondary adviser in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework and a thesis are required. The student must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. A single candidacy examination that includes biogeochemistry will be administered for admission into the student’s Ph.D. program, as well as the biogeochemistry dual-title. The structure and timing of this exam will be determined jointly by the dual-title and major program. The student’s doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Watershed Stewardship Option

The Graduate Option in Watershed Stewardship is intended to provide enhanced educational opportunities for students with an interest in water resources management who are enrolled in the Intercollege Graduate Degree Program in Ecology at the University Park campus. The objective of the Graduate Option in Watershed Stewardship is to educate students to facilitate team-oriented, community-based watershed management planning directed at natural resources conservation and environmental problems encountered in Pennsylvania communities, especially non-point source water pollution. The Graduate Option in Watershed Stewardship requires 22 credits of graduate course work: 12 credits of breadth courses, 2 credits of Watershed Stewardship Seminar courses (FOR 591A and FOR 591B or LARCH 510.2), and 8 credits of Watershed Stewardship Practicum I and II courses (FOR 570 and FOR 571 or LARCH 540.2 and LARCH 550.2). Breadth courses will consist of three graduate credits of course work from each of four subject matter areas: (1) water resources science, (2) social science, public policy and economics, (3) humanities, and (4) communications and design. In the watershed stewardship practicum courses, students work in teams with community, government, and business leaders to analyze and understand natural resources and ecological issues and creatively synthesize appropriate solutions in the form of a written watershed management plan.

Other Relevant Information

Detailed descriptions of courses now available for students majoring in ecology may be found under the offerings of several ecologically oriented departments.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.
Economics (ECON)

- Neil Wallace, Ph.D. (Chicago) Distinguished Professor of Economics
- Stephen Yeaple, Ph.D. (Wisconsin) Associate Professor of Economics
- Ruijun Zhou, Ph.D. (Pittsburgh) Associate Professor of Economics

NOTE: For details regarding admission, degree requirements, and financial aid, see "Graduate Program" on the department's home page. Click on "Program Home Page" above.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Educational Leadership (EDLDR)

Program Home Page

PRESTON GREEN, In Charge of Graduate Programs in Educational Leadership 207A Rackley Building 814-863-1879; pg11@psu.edu

Department e-mail: EDLDR@psu.edu

Degrees Conferred:

Ph.D., D.Ed., M.S., M.Ed.

Graduate work in the Educational Leadership program encompasses two major strands or paths. The first strand focuses on those who want to engage in a wide variety of leadership roles within and directly affecting schools and districts. These roles include, but are not limited to teacher leadership, instructional leadership, principal leadership, and district-level leadership. This strand may also lead to certification and/or letters of endorsement in supervision, the principalship or the superintendent. The second strand focuses on those who want to exercise leadership roles in educational policy arenas and/or engage in educational research. Possible roles include: intermediate unit officials, state and federal agency administrators and staff, professors of educational administration, and research and development personnel. The principalship certification is also available at Penn State Great Valley and Penn State Harrisburg.

The M.Ed. in Educational Leadership with an option in Teacher Leadership is designed for students who wish to pursue leadership positions in educational organizations other than those that are formally designated, e.g., the principalship. The option is focused most particularly toward teachers who wish to expand their professional practice, teacher performance, curriculum, and staff development efforts within their own school contexts. The on-line option in teacher leadership is designed specifically for working professionals whose participation in a residence program may be limited by time and distance constraints.

Admission Requirements

Scores from the Miller Analogies Test (MAT) are required for admission to the doctoral programs in Educational Leadership. When the MAT is not available (e.g., in some overseas locations), Graduate Record Examinations (GRE) scores or Graduate Management Admissions Test (GMAT), may be substituted. At the discretion of a graduate program, a student may be admitted provisionally. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Applicants to the M.Ed. and M.S. degree programs must present evidence of at least a 2.60 grade-point average in the last two years of undergraduate work. A grade-point average of 3.50 in prior graduate work is required of those desiring admission to enter a doctoral program. The best-qualified students will be accepted up to the number of spaces available. Special backgrounds and experiences may allow for conditional admission to those not meeting stated criteria.

More details concerning the degree and certification programs are presented in a prospectus that is available upon request.

Students interested in pursuing the on-line M.Ed. in Educational Leadership with an option in Teacher Leadership must first be admitted to Penn State's Graduate School. The requirements listed below are in addition to general Graduate School requirements as stated in the GENERAL INFORMATION section of the Graduate Bulletin. Scores from the Miller Analogies Test (MAT), the Graduate Record Examinations (GRE), or some other pertinent standardized test are not required for admission to professional degree programs in Educational Leadership, and this includes the online M.Ed in Educational Leadership with an option in Teacher Leadership.

We anticipate that the M.Ed. in Educational Leadership with an option in Teacher Leadership will attract a small number of international students as well as those in the United States. In accordance with the requirements noted in the Graduate Bulletin, “The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with exceptions noted below.

The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test or a total score of 80 with a 19 on the speaking section for the internet-based test. Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5.”

Complete details concerning the TOEFL/IELTS requirements are available at the Master's Degree Requirements section of the Graduate Bulletin.

The Educational Leadership Program requires all graduate program applicants to submit three reference letters, official copies of undergraduate and graduate transcripts, a short review of a professional journal article of the applicant's choosing (along with a copy of the actual article), a brief personal statement of intent, and a current resume or CV. Applicants must present evidence of at least a 3.0 grade-point average in the last two years of undergraduate work. The best-qualified students will be accepted up to the number of spaces available. Special backgrounds and experiences may allow for provisional admission to those not meeting all of the above criteria.

The Teacher Leadership Admission Committee on a rolling basis will review all applications to the M.Ed. in Educational Leadership with an option in Teacher Leadership. Admission decisions (admit, reject, or admit provisionally) are made using all of these data.

Master's Degree and Certification Requirements

All candidates for the M.Ed. and M.S. degrees will complete a minimum of 30 graduate credits. Certification for various public school administrative positions requires additional graduate work beyond the master's degree and such requirements as specified in the program prospectus.

M.Ed. students must submit a master's paper. M.S. degree students are expected to submit a thesis.

The M.Ed. in Educational Leadership with an Option in Teacher Leadership via World Campus and in residence at Penn State University Park is a 30-credit M.Ed. program with 2 designated "core" courses and 6 required courses for a total of 24 credits. The two designated "core" courses for this M.Ed. option are: (1) EDLDR 580 Principles of Instructional Supervision and (2) EDLDR 559 School Improvement. Six other courses are required and include EDLDR 563, EDLDR 802, C I 501, EDLDR 551, EDPSY 421 or ADTED 498, and EDLDR 894A. Six additional credits (2 courses) from outside of the Educational Leadership Program are considered electives in the proposed Teacher Leadership option.

The resident M.Ed. in Educational Leadership (non-option) requires 30 credits, including the 2 "core" courses noted above and 6 required courses for a total of 24 credits. The two designated "core" courses for the M.Ed. non-option are: (1) EDLDR 560 Principles of Instructional Supervision and (2) EDLDR 559 School Improvement. The six required courses are drawn from several "strands" or areas of concentration offered, including School Leadership, Professional Development, Curriculum, School Policy, & Change and an "Open" area. Determination of the specific courses is dependent on: (1) the "strand" or area of concentration selected by the student and (2) advisement and guidance from the assigned academic advisor.

Credits toward a M.Ed. in Educational Leadership will be at the 400-level or above with a minimum of 18 credits earned from courses at or above the 500-level. At least six (6) credits must be completed outside of the EDLDR Program area. An additional Program requirement states that all master's degrees (either the M.S. or the M.Ed.) must contain a total of at least 18 credits of EDLDR course work.

Each student will complete the M.Ed. in Educational Leadership with an option in Teacher Leadership via World Campus in conjunction with a designated EDLDR faculty member and in connection with the EDLDR 894A course work. This is the culminating course of the program and focuses on an application of course instruction in an action research project. This project will be planned in cooperation with the EDLDR faculty member who serves as the student's project advisor and must reflect an appropriate degree of graduate-level scholarship, as determined by the advisor.

The Pennsylvania State University
The master's project is a completed piece of work representing the culmination of academic work toward the M.Ed. degree.

**Doctoral Degree Requirements**

Candidates for the D.Ed. degree are required to spend at least one semester and one summer session consecutively in full-time residence during a twelve-month period. Ph.D. candidates are strongly encouraged to spend two academic years in residence, but must spend at least two consecutive semesters in residence. D.Ed. candidates may satisfy the residence requirement in another manner consistent with Graduate School policy, including attendance at the day-long seminars offered weekly every other academic year. Candidates for all degrees are required to combine work in the social sciences and humanities with the specialization in Educational Leadership.

Expectations of candidates for both the D.Ed. and Ph.D. are high in the field of research competence and require the ability to identify and conceptualize a research problem for the thesis. The D.Ed. is more appropriate for those with career goals in administration and policy making. The Ph.D. is more appropriate for those with career goals in research and scholarship.

After the doctoral student has been admitted to a doctoral program and has completed forty to forty-five hours beyond the bachelor's degree, his or her name is usually submitted for candidacy. After a student is admitted to candidacy for the doctoral degree, he or she takes the comprehensive written and oral examinations. After those are successfully completed, the student presents a thesis problem on a significant, researchable topic, evidenced by a prospectus to the doctoral committee for review.

**Other Relevant Information**

American Indian students participate in a special administrator preparation program. Foreign students can work on research topics in their home nations.

**Student Aid**

Graduate assistantships available to students in this program and other forms of student aid are described in the [STUDENT AID](#) section of the Graduate Bulletin.

Degrees Conferred:
Ph.D., M.S.

The Graduate Faculty
- David S. Bender, Ph.D. (Cornell) Associate Professor of Educational Psychology
- Robert L. Hale, Ph.D. (Nebraska) Professor of Education
- Stephanie L. Knight, Ed.D. (Houston) Professor of Education
- Jonna M. Kulikowich, Ph.D. (Texas A&M) Professor of Education
- Pui-Wa Lei, Ph.D. (Iowa) Associate Professor of Education
- Bonnie J. F. Meyer, Ph.D. (Cornell) Professor of Educational Psychology
- P. Karen Murphy, Ph.D. (Maryland) Professor of Education
- Rayne A. Sperling, Ph.D. (Nebraska) Associate Professor of Education
- Robert J. Stevens, Ph.D. (Illinois) Professor of Educational Psychology
- Hoi K. Suen, Ed.D. (Northern Illinois) Distinguished Professor of Educational Psychology
- Peggy Van Meter, Ph.D. (Maryland) Associate Professor of Education
- Sarah E. Zappe, Ph.D. (Penn State) Director of Assessment and Instructional Support

The graduate program in Educational Psychology focuses on the study of learning, instruction, and measurement across the life span. The learning and instruction emphasis applies the study of cognitive psychology to research on learning and instruction in applied settings such as schools. The course of study provides a strong foundation in psychological theory, principles related to instructional applications, and quantitative methodology. The measurement emphasis applies cognitive psychology and theories of measurement to test design, instrument construction, scale analysis, and measurement theory. The Educational Psychology program emphasizes the use of rigorous quantitative methodology in the scientific study of learning, instruction, and measurement in applied settings. Typically this program prepares individuals for professions in universities, research institutions, government agencies, and industry. Individuals interested in more clinical applications of psychology, such as counseling psychology or school psychology should contact those specific graduate programs in the University.

Admission Requirements
Applicants are required to submit scores from the Graduate Record Examinations (GRE) verbal, quantitative, and analytic writing. Typically applicants have at least a 3.0 junior/senior grade-point average (on a 4.0 point scale) and broad undergraduate background including college level mathematics. Exceptions may be made for students with special backgrounds, abilities, and interests. Applicants with a master’s degree will be required to show strong performance in their graduate program. Applicants will also supply letters of reference and a written statement of their professional goals. The requirements specified here are in addition to the Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Master's Degree Requirements
Students in the master's degree program are required to take 30 credits, including core courses EDPSY 406, 421, 450, and 475. Students will also take at least one foundational course in educational theory, philosophy, or individual differences. The remaining credits will be taken in a way to develop the student’s area of specialization, in consultation with the student’s adviser. The program offers two options, M.S. with a thesis, and an M.S. without a thesis. Students wishing to go on to the Ph.D. are required to complete the M.S. with thesis option.

Doctoral Degree Requirements
Students in the doctoral degree program will select a major emphasis in either learning and instruction or measurement. Students in the doctoral program must complete the core courses as listed in the master's program. All students must also have at least one advanced-level course in learning and measurement. Students will also have three courses spread across the foundational areas of educational theory and history, philosophy, and individual differences. Students must pass a candidacy examination to enter into the doctoral program, assessing their mastery of the content in the core courses. Students must also pass a comprehensive examination assessing their areas of specialization near the end of their doctoral studies. Students are also expected to develop and defend a theoretically based scholarly research proposal that will become their dissertation project. The doctoral program culminates in the production of and defense of the student’s dissertation that is expected to be a publishable quality independent research study. All of these requirements are specified in more detail in the student handbook.

Doctoral Minor
At the doctoral level, a minor is also possible in EDPSY. Like all University minors, it requires at least 15 credits of work within the program, including the courses EDPSY 406, 421, and 450, plus at least two other courses in EDPSY, in consultation with the minor adviser. The minor adviser should be a member of the Graduate Faculty and on the doctoral committee. The minor adviser should be appointed as early as possible. Anyone interested in this option should talk to a faculty member in EDPSY. If you would like to apply to enter the minor in Educational Psychology, see the program staff assistant in 125D CEDAR Building.

Student Aid
All applicants are considered for Graduate Assistantships that are available in the program. Typically these assistantships provide tuition waiver plus a stipend.

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

EDUCATIONAL PSYCHOLOGY (EDPSY) course list

The Pennsylvania State University
Educational Theory and Policy (EDTHP)

Program Home Page

MINDY KORNHABER, In Charge of Graduate Programs in Educational Theory and Policy
300 Rackley Building
814-865-7920
EDTHP@psu.edu

Degrees Conferred:
Ph.D., M.A.

The Graduate Faculty

- David P. Baker, Ph.D. (Johns Hopkins) Professor of Education and Sociology
- Katerina Bodovski, Ph.D. (Penn State) Assistant Professor of Education
- David Gamson, Ph.D. (Stanford) Associate Professor of Education
- Gerald K. LeTendre, Ph.D. (Stanford) Professor of Education and International Affairs; Head, Education Policy Studies
- Dana Mitra, Ph.D. (Stanford) Associate Professor of Education
- Madhu S. Prakash, Ph.D. (Syracuse) Professor of Education
- Suet-Ling Pong, Ph.D. (Chicago) Professor of Education, Sociology, and Demography
- Maryellen Schaub (Penn State) Assistant Professor of Education
- Liang Zhang, Ph.D. (Cornell) Assistant Professor of Education and Labor Studies

The master's and doctoral programs in Educational Theory and Policy are designed primarily to prepare persons for careers in education policy development and analysis. Students in the program may choose to emphasize policy development and analysis either in the United States or in terms of a comparative and international perspective. Additionally, individualized multidisciplinary programs of study in the foundation areas of education (history, philosophy, sociology, and comparative/international) and in the social sciences, management sciences, and/or humanities will be designed jointly by the student and the program faculty. It is anticipated that graduates will find employment in state departments of education, ministries of education, federal and international education agencies, academic institutions, and various professional associations.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Students with a 2.75 grade-point average will be considered for admission to the master's program, and with a 3.00 grade-point average at the master's level for the Ph.D. program. Exceptions to the minimum grade-point average may be made for students with special backgrounds, abilities, and interests.

Master's Degree Requirements

Candidates who seek an M.A. in Educational Theory and Policy shall complete programs that will include studies in social theory, policy, and planning or in the social sciences or humanities. A thesis is required.

Doctoral Degree Requirements

Candidates who seek a Ph.D. in Educational Theory and Policy shall complete programs that will include studies in social theory, policy, and planning, or in the social sciences or humanities.

All doctoral students must pass a written candidacy examination after nine to eighteen hours of study.

Candidates for the Ph.D. degree are required to complete a minimum of two consecutive semesters in residence during an academic year.

The communication and foreign language requirements for the Ph.D. degree may be satisfied by options selected from foreign languages, statistics, computer science, logic, or other research methodologies deemed acceptable by the candidate's doctoral committee.

At the end of the program of study, each student must take a written and oral comprehensive examination that will cover the student's major areas of study.

Other Relevant Information

Upon admission, each student will be assigned to a faculty adviser whose specialization best coincides with the student's background or academic interest. For the master's degree, the adviser and student together will plan the program of study. For doctoral students, the adviser and student will plan the early aspects of study, but an interdisciplinary committee will be formed, soon after the student is admitted to candidacy, to supervise completion of a program of study.

Student Aid

Graduate assistantships available to doctoral students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Joint Degree Program between The Pennsylvania State University Dickinson School of Law (J.D.) and the Educational Theory And Policy Program (M.A., & Ph.D.)

Joint Degree Program: The Pennsylvania State University Dickinson School of Law (DSL) and the Educational Theory and Policy (EDTHP) Program are offering a joint degree program leading to a Juris Doctor (J.D.); and a Master of Arts (M.A.), or a Doctor of Philosophy (Ph.D) in Educational Theory and Policy.

Admission Requirements

The number of openings in the joint degree J.D./M.A. or Ph.D. program will be limited to students with an outstanding academic record who have successfully completed two semesters at the Dickinson School of Law.

Applicants to the joint degree program:
1. must have been admitted to the Dickinson School of Law
2. should have successfully completed two semesters of course work at the Dickinson School of Law with a grade-point average of 3.0
3. must submit two letters of recommendation from the Dickinson School of Law faculty
4. must submit a career statement

The Pennsylvania State University
Note: Students are eligible to start taking courses in the EDTHP program after successfully completing two semesters of law school work.

College-Specific Admission Requirements

DSL: A bachelor's or equivalent degree from an accredited college is a prerequisite for admission; however, there is no standard prescribed undergraduate curriculum. An applicant should have acquired significant oral and written communication skills before entering law school. The following are required of applicants: a completed application form for DSL; submission of the results of the law school admission test (LSAT); completion of an LSDAS report; a one-page personal statement; employment records since high school; and two letters of recommendation.

EDTHP: The following are required of all applicants: a completed application form to EDTHP; submission of the results of the Graduate Record Examination (GRE), or LSAT; an official undergraduate transcript or transcripts; a personal statement; employment records since high school; and three letters of recommendation.

The best qualified students will be accepted for admission into the doctoral programs up to the number of spaces available. Students with a 2.75 grade-point-average (GPA) will be considered to the master's program, and with a 3.0 GPA at the master's level for the Ph.D. program. Exceptions to the minimum GPA may be made for students with special backgrounds, abilities, and interests.

All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the Test of English as a Second Language (TOEFL) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test or a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the new speaking portion; or the International English Language Testing System (IELTS) with a minimum composite score of 6.5 is required for admission.

Residency: Students will normally spend four semesters in residence at DSL and as many additional semesters in residence as needed to complete the additional requirements for the pertinent EDTHP degree. Ph.D. candidates must arrange the sequence of semesters to ensure that they are in residence as full-time students in the EDLDR program for at least two consecutive semesters (Fall-Spring or Spring-Fall) excluding summer in a single twelve-month period. D.Ed.

Liaisons: The department and faculty liaisons for DSL shall be the Associate Dean for Academic Affairs and the student advisor shall be the Associate Dean for Academic Affairs or such other faculty member(s) as may be designated by the Dean. The liaison for EDTHP shall be the Professor-in-Charge (PIC) or such faculty member(s) as may be designated by the PIC.

PRESCRIBED COURSES

DSL: All students are required to take the first-year curriculum in DSL. In the second or third year, students must take CORE 934 (Professional Responsibility). The fall curriculum for the first year consists of the following courses:

CORE COURSES (CORE)

- 900. Civil Procedure (4)
- 910. Criminal Law (3)
- 912. Legal Analysis, Research & Writing I (3)
- 925. Torts (4)

The spring curriculum of the first year consists of the following courses:

One 3-credit Elective

CORE COURSES (CORE)

- 903. Constitutional Law (3)
- 905. Contracts (4)
- 914. Legal Analysis, Research & Writing II (3)
- 920. Property (4)

EDTHP: A minimum of 36 credits is required for the M.A. in EDTHP. At least 27 credits must be at the 500 level or above; at least 18 credits must be in EDTHP. At least 6 credits of thesis research (EDTHP 600 or 610) must be taken to fulfill the Graduate School's requirements. Only 3 credits of EDTHP 596 (Independent Study) may be counted toward the M.A. requirements. Students who wish to transfer credits from other programs must receive prior approval from the EDTHP faculty. The required course is EDTHP 500 (Proseminar).

Ph.D. requirements

Introduction to the EDTHP Program (3 credits)

EDTHP 500 Proseminar

Research Methods (12 credits)

EDTHP/EDLDR/HI ED 585: Research Design

EDTHP/EDLDR/HI ED 586: Qualitative Methods

Two quantitative methods courses.

Research Courses: 6 credits

These are research method courses specifically related to the student's thesis.

Theory Foundations: 12 credits

Four theory-based 500-level EDTHP courses are required. At least one course must be a 500-level EDTHP course in the area of history or philosophy of education (e.g., EDTHP 533, 536, 540, or 541), and another must be a 500-level EDTHP course in the area of sociology or demography of education (e.g., EDTHP 516, 537, or 597 classes such as Sociology of Education or Sociology of Adolescence). After a student has consulted with his or her advisor, one 400-level course may be substituted for EITHER one 500-level Theory course or one 500-level Policy course, depending on the nature of the 400-level course. Students who take advantage of this option will need to do additional work beyond the 400-level requirements and should make arrangements with the instructor ahead of time.

Policy Foundations: 12 credits

EDTHP/EDLDR/HI ED 587: Policy and Politics

In addition, three 500-level EDTHP courses in educational policy (e.g., EDTHP 516, 518, 520, 527, or 597 classes such as Comparative Analysis of Education Policy) are required. After a student has consulted with his or her advisor, one 400-level course may be substituted for EITHER one 500-level Theory course or one 500-level Policy course, depending on the nature of the 400-level course. Students who take advantage of this option will need to do additional work beyond the 400-level requirements and should make arrangements with the instructor ahead of time.

*Note: Some EDTHP courses may be counted as either a Theory course or a Policy course, but they may not be double-counted.

Other: 21 credits

These include credits for minor or dual-title requirements, electives, and thesis research. A maximum of 9 professional credits and 15 academic transfer credits may be counted.

EDTHP independent study courses (EDTHP 596) will be counted only as electives unless the student consults with his or her advisor and then petitions the...
EDTHP faculty.

INTERPROGRAM TRANSFER OF CREDITS

DSL: A maximum of twelve credits for EDTHP course work may be transferred for credit toward the J.D. degree at DSL. Students must obtain a grade satisfactory to DSL for the course work to be credited toward the J.D. degree. The following EDTHP courses may qualify for credit in DSL: (1) EDTHP 518 (Analysis of U.S. Educational Policy); EDTHP 520 (Theoretical Perspectives on School Reform); (3) EDTHP 533 (Social History and Educational Policy); (4) EDTHP 541 (Contemporary Philosophies of Education); and (5) EDTHP 587 (Education Policy and Politics).

EDTHP: What courses may be credited will be determined by the student's degree program. Normally a maximum of twelve credits of DSL course work will be counted for credit for the minimum requirements for a master's degree, subject to approval by the student's advisory committee. Normally, a maximum of 30 credits from a master's degree program will be counted for credit for the minimum requirements for a Ph.D. degree.

Sequence: The sequence of courses will be determined by the students and their advisors.

Recommended Program of Study and Advising: All students in the program will have two advisors, one from DSL and one from EDTHP. Periodic interaction between the two advisors will be encouraged. A program of study will be developed for each student, taking into account the fact that some courses are offered on a rotating or intermittent basis. Many courses are offered every year but some are offered every two or three years. Advisors will have available a list of projected relevant courses or educational experiences in order to work with the student on an individualized program of study. The standard committee structure will apply to the EDTHP programs.

Tuition: Students will be charged the applicable DSL tuition to cover the J.D. program and the applicable graduate tuition to cover the EDLDR degree program. DSL tuition will be paid for the semesters in which the student is registered for DSL courses, and graduate tuition will be paid for the semesters in which the student is registered for graduate courses. A student may take up to one course (3 credit hours) per semester in the program where the student is not primarily registered without any change in tuition, but must pay additional tuition to the program that the student is not primarily registered if he or she wishes to take additional course work pursuant to that program during the semester.

Financial Aid and Assistantships: Decisions on financial aid and assistantships will be made by each school according to that school's procedures.

Fulfillment of Degree Requirements and Graduation: All courses in one program that will count toward meeting the requirements of the other program must be completed before the awarding of either degree. Students will be required to fulfill all requirements for each degree in order to be awarded that degree, subject to the interprogram transfer of credits. With respect to EDTHP program requirements for a thesis or paper, work done while at DSL under the supervision of a DSL faculty member may be appropriate for incorporation into the thesis or paper with the approval of the EDTHP degree program committee (in such cases, the committee should consider whether the credits afforded such work will be subject to the twelve credit maximum for interprogram transfers). A DSL faculty member must be a member of the committee). If for some reason the student cannot complete the requirements of the J.D., the student will still be allowed to count DSL courses already taken toward the pertinent EDTHP degree, even if he or she is no longer in the joint degree program.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
Ph.D., M.S. (with or without options in Petroleum and Natural Gas Engineering; Mining and Mineral Process Engineering; Environmental Health and Safety Engineering; Fuel Science; and Energy Management and Policy)

The Graduate Faculty

- Michael A. Adewumi, Ph.D. (IIT) Professor of Petroleum and Natural Gas Engineering
- Luis Ayala, Ph.D. (Penn State) Assistant Professor of Petroleum and Natural Gas Engineering
- André L. Boehman, Ph.D. (Stanford) Associate Professor of Fuel Science
- Seth Blumsack, Ph.D. (Carnegie Mellon) Assistant Professor of Energy and Mineral Engineering
- Jeffrey Brownson, Ph.D. (Wisconsin) Assistant Professor of Energy and Mineral Engineering
- Yanyi Dong, Ph.D. (Hefei) Assistant Professor of Energy and Mineral Engineering
- Caroline B. Clifford, Ph.D. (Penn State) Senior Research Associate, Energy Institute
- Timothy Considine, Ph.D. (Cornell) Professor of Natural Resource Economics
- Derek E. Eow(TM) (Berkeley) Professor of Geo-Environmental Engineering
- Turgay Ertakin, Ph.D. (Penn State) Professor of Petroleum and Natural Gas Engineering
- Seth K. Ester, Ph.D. (Penn State) Associate Professor, Ph Energy and Geo-Environmental Engineering
- Maochen Ge, Ph.D. (Penn State) Associate Professor of Mining Engineering
- Abraham S. Grader, Ph.D. (Stanford) Professor of Petroleum and Natural Gas Engineering
- R. Larry Grayson, Ph.D. (West Virginia) Professor of Energy and Mineral Engineering
- William A. Groves, Ph.D. (Michigan) Associate Professor of Industrial Health and Safety
- Joel M. Haight, Ph.D. (Auburn) Associate Professor of Energy and Mineral Engineering
- Philipp M. Hälecke, Ph.D. (Chicago) Associate Professor of Petroleum and Natural Gas Engineering
- Richard Hogg, Ph.D. (California, Berkeley) Professor Emeritus of Mineral Processing and Geo-Environmental Engineering
- M. Thaddeus Iyokumbul, Ph.D. (Univ. of Western Ontario) Associate Professor of Mineral Processing and Geo-Environmental Engineering
- Zuleima Karpyn, Ph.D. (Penn State) Associate Professor of Petroleum and Natural Gas Engineering
- Vladislav Kocj basic's, Ph.D. (Belgrade) Associate Professor of Mining Engineering
- Andrew Kleit, Ph.D. (Yale) Professor of Energy and Environmental Economics
- Mark S. Klima, Ph.D. (Penn State) Chair of the Department of Energy and Mineral Engineering
- Angela D. Lueking, Ph.D. (Michigan) Assistant Professor of Energy and Geo-Environmental Engineering
- Peter T. Luckie, Ph.D. (Penn State) Professor Emeritus of Mineral Processing
- Serguei Lvov, Ph.D. (St. Petersburg) Professor of Energy and Mineral Engineering
- Xiaolang Ma, Ph.D. (Kyushu, Japan) Senior Research Associate, Energy Institute
- Christopher J. Marone, Ph.D. (Columbia) Professor of Geosciences
- Jonathan Mathews, Ph.D. (Penn State) Assistant Professor of Energy and Mineral Engineering
- Kwadwo A. Osseo-Asare, Ph.D. (California, Berkeley) Professor of Metallurgy and Energy and Mineral Engineering
- Sarma Piuspati, Ph.D. (Penn State) Associate Professor of Petroleum and Natural Gas Engineering
- Mark Ramsay, Ph.D. (Penn State) Senior Lecturer, Energy and Mineral Engineering
- Ljubisa R. Radovic, Ph.D. (Penn State) Professor of Energy and Mineral Engineering
- Reza V. Ramazani, Ph.D. (Penn State) Professor of Mining and Geo-Environmental Engineering
- Jamal Rostami, Ph.D. (Colorado School of Mines) Assistant Professor of Energy and Mineral Engineering
- Alan W. Scaroni, Ph.D. (Penn State) Professor of Energy and Mineral Engineering and Associate Dean for Graduate Education and Research
- Harold H. Schobert, Ph.D. (Iowa State) Professor of Fuel Science
- Chunchun Song, Ph.D. (Osaka) Professor of Fuel Science
- Robert W. Watson, Ph.D. (Penn State) Associate Professor of Petroleum and Natural Gas Engineering and Geo-Environmental Engineering
- Yaw D. Yeboah, Sc.D. (MIT) Professor and Head of Energy and Mineral Engineering
- Fan Zhang, Ph.D. (Harvard) Assistant Professor of Energy and Mineral Engineering

The Department of Energy and Mineral Engineering provides a vertically integrated approach to research and education in all aspects of the energy and mineral industries, including scientific and engineering issues, health and safety and maintenance of high environmental standards. The Department’s mission is to forge an intellectual and scientific cohesiveness in energy and mineral resource technology. This objective is achieved by exploiting the natural synergy between the exploration, extraction, processing and utilization of energy and mineral resources so as to cater to the emerging needs of society.

The Department offers advanced degrees in Energy and Mineral Engineering (M.S. and Ph.D.) and an online professional Master of Engineering (M. Eng.) degree in Oil and Gas Engineering Management. The Department has overall requirements for the M.S., M.Eng., and Ph.D. degrees with specific requirements associated with each program.

Energy and Mineral Engineering Program

The Energy and Mineral Engineering (EME) program is a single graduate program with a focus on the production of energy and minerals in an economic, safe and efficient manner. The program provides flexible education of students in energy and mineral sciences and engineering, with focus on both non-renewable and renewable resource and energy industries. The program is designed to resolve the sometimes competing goals of flexible education of requisite breadth while still providing in-depth study; students are required to follow a focused curriculum that combines the requisite rigor with flexibility in a rapidly changing field of endeavor. Participating students take core program and required option courses and additional courses from a broad array of courses to meet the total credit requirements. Students are not required to choose an option. However, a student who desires disciplinary identity may choose from among the five available options: petroleum and natural gas engineering, mining and mineral process engineering, environmental health and safety engineering, fuel science, and energy management and policy.

Admission Requirements

Scores for the Graduate Record Examinations (GRE) are required for admission, though this may be waived at the discretion of the Energy and Mineral Engineering graduate program. The best-qualified applicants will be accepted by the Energy and Mineral Engineering graduate program up to the number of spaces available for new students for the fall intake. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Admission to the Energy and Mineral Engineering graduate program in the Department of Energy and Mineral Engineering is competitive. Entering students...
must hold a bachelor’s degree in a science or engineering discipline. Students with 3.00 or better (out of 4.00) junior/senior cumulative grade-point averages and appropriate course backgrounds will be considered for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Undergraduate students from the Department of Energy and Mineral Engineering with sixth semester standing, minimum grade-point average of 3.3, and excellent faculty recommendations may be admitted for a five-year B.S./M.S. dual degree.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the internet-based test (iBT). Applicants with iBT speaking scores between 15 and 19 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5. Specific graduate programs may have more stringent requirements. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a masters degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British west Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, The United States, and Wales.

Letters of recommendation and an applicant’s statement of purpose are also required.

Master's Degree Requirements

The M.S. degree program in Energy and Mineral Engineering is designed for students to gain advanced knowledge for research, analysis, and design in Energy and Mineral Engineering. Students pursuing an M.S. degree will be required to complete 24 course credits and submit a thesis (6 credits) to the Graduate School. Graduate committees in the graduate program in the Department of Energy and Mineral Engineering play an important role in formulating individual course and research schedules. At least 18 of the total course credits must be at the 500 level.

Doctoral Degree Requirements

The Ph.D. program in Energy and Mineral Engineering emphasizes scholarly research and help students prepare for research and related careers in industry, government, and academia. Acceptance into the Ph.D. degree program in Energy and Mineral Engineering is based on the student’s performance on the Ph.D. candidacy examination administered by the faculty of the EME graduate program. A comprehensive examination is required of all Ph.D. candidates and should be taken after substantial completion of course work. The comprehensive examination is the responsibility of the candidate’s doctoral committee and administered according to the rules specified by the Graduate School. The Ph.D. program in Energy and Mineral Engineering is quite flexible, with minimum formal requirements. A minimum of 12 post M.S. course credits is required. At least 18 course credits for the graduate program must be at the 500 level. For students entering the program with an M.S. degree, 500-level courses already taken either at Penn State or other institutions may be accepted in partial fulfillment of the Ph.D. 18 credits of 500-level course requirements if the are found to be appropriate. The communication and foreign language requirements for the Ph.D. degree may be satisfied by intermediate knowledge of one foreign language. The general requirements for graduation are outlined in the GENERAL INFORMATION section of the Graduate Bulletin.

Other Relevant Information

All graduate students are expected to attend general Department seminars. Graduate students may be asked to contribute to the instructional programs of the Department by assisting with laboratory and lecture courses.

Students in Energy and Mineral Engineering may elect the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees. (See also Operations Research Student Aid)

Graduate students are supported by a variety of government and industry fellowships, and research and teaching assistantships. Stipends vary depending on the source. Please see the STUDENT AID section of the Graduate Bulletin to learn other forms of the student aid.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

The Graduate Faculty

- Michael Anesko, Ph.D. (Harvard) Associate Professor of English and American Studies
- Robin Becker, M.A. (Boston) Professor of English and Women's Studies
- Bernard W. Bell, Ph.D. (Massachusetts) Professor of English
- Kevin J. H. Berland, Ph.D. (McMaster) Associate Professor of English
- Michael Berube, Ph.D. (Virginia) Paterno Family Professor of Literature
- Hester Blum, Ph.D. (University of Pennsylvania) Assistant Professor of English
- Robert E. Burlhorn, Ph.D. (South Carolina) Associate Professor of English
- Atholton Suresh Canagarajah, Ph.D. (University of Texas at Austin) Kirby Professor of Language Learning
- Barbara Cantalupo, A.B. (Rochester) Associate Professor of English
- Charles Cantalupo, Ph.D. (Rutgers) Professor of English, Comparative Literature, and African Studies
- Robert L. Casserio, Ph.D. (Yale) Professor of English
- Christopher Castiglia, Ph.D. (Columbia University) Professor of English
- Patrick G. Cheney, Ph.D. (Toronto) Professor of English
- Margaret Christian, Ph.D. (California, Los Angeles) Associate Professor of English
- William J. Cobb, Ph.D. (Houston) Associate Professor of English
- Phyllis B. Cole, Ph.D. (Harvard) Professor of English
- Claire M. Colebrook, Ph.D. (University of Edinburgh) Edwin Erle Sparks Professor of English
- Mary G. DeJong, Ph.D. (South Carolina) Associate Professor of English and Women's Studies
- Robert M. Doyle, Ph.D. (California, Berkeley) Associate Professor of English
- Jonathan P. Eburne, Ph.D. (University of Pennsylvania) Assistant Professor of English
- Caroline D. Eckhardt, Ph.D. (Michigan) Professor of English and Comparative Literature; Head, Comparative Literature
- Reisert, R. Edwards, Ph.D. (California, Riverside) Distinguished Professor of English
- William Ellis, Ph.D. (Ohio State) Associate Professor of English
- Richard C. Fushell, Ph.D. (Duquesne) Professor of English and Comparative Literature
- Keith Gilroy, Ph.D. (Glasgow) Professor of English
- Cheryl Glenn, Ph.D. (Ohio State) Associate Professor of English
- Sean Goudie, Ph.D. (University of California, Berkeley) Associate Professor of English and Asian Studies
- Caroline K. B. Hall, Ph.D. (Brown) Associate Professor of English and American Studies
- Emily Harrington, Ph.D. (University of Michigan) Assistant Professor of English
- John T. Harwood, Ph.D. (Nebraska) Associate Professor of English; Senior Director of Teaching and Learning with Technology, Information Technology Services
- Clement Hawes, Ph.D. (Yale) Associate Professor of English
- Charlotte Holmes, M.F.A. (Columbia) Associate Professor of English
- Evelyn Hovanec, Ph.D. (Pittsburgh) Associate Professor of English
- Kathryn Hume, Ph.D. (Pennsylvania) Distinguished Professor of English
- Robert D. Hume, Ph.D. (Pennsylvania) Evan Pugh Professor of English
- Nicholas A. Jokovsky, D.Phil. (Oxford) Professor of English
- Julia Kasdorf, Ph.D. (NYU) Associate Professor of English
- Michael Kiernan, Ph.D. (Harvard) Associate Professor of English
- Laverne King, Ph.D. (University of North Carolina, Chapel Hill) Assistant Professor of English
- Laura L. Knoppers, Ph.D. (Harvard) Professor of English
- John E. Lleva, Ph.D. (Harvard) Associate Professor of English
- Brian Lennon, Ph.D. (Columbia University) Assistant Professor of English and Comparative Literature
- Robert E. Lougy, Ph.D. (California, Davis) Associate Professor of English
- Janet Lyon, Ph.D. (Virginia) Associate Professor of English
- Ian Marshall, Ph.D. (Delaware) Associate Professor of English
- James E. May, Ph.D. (Maryland) Associate Professor of English
- William B. McCarthy, Ph.D. (Indiana) Professor of English
- Linda Patterson Miller, Ph.D. (Delaware) Professor of English
- Shirley Moody, Ph.D. (University of Maryland) Assistant Professor of English
- Mark Morrisson, Ph.D. (Chicago) Associate Professor of English
- J. Philip Mosley, Ph.D. (East Anglia) Associate Professor of English and Comparative Literature
- Carla J. Mufford, Ph.D. (Delaware) Associate Professor of English
- Leonard Mustazza, Ph.D. (SUNY) Professor of English
- Jeffrey Nealon, Ph.D. (Loyola) Professor of English
- Aldon Nielsen, Ph.D. (George Washington) George and Barbara Kelly Professor of English
- Mary North, Ph.D. (University of Michigan) Associate Professor of English
- Josp Novakovich, M.A. (Texas at Austin) Associate Professor of English
- Jon Oton, Ph.D. (USC) Assistant Professor of Writing
- Paul Orlov, Ph.D. (Toronto) Associate Professor of English
- Yunolu F. Osagie, Ph.D. (Cornell) Associate Professor of English
- Beverly Peterson, Ph.D. (William and Mary) Assistant Professor of English
- R. Alan Price, Ph.D. (Rochester) Associate Professor of English
- Steven D. Putzel, Ph.D. (Toronto) Associate Professor of English
- Christopher Reed, Ph.D. (Yale University) Associate Professor of English and Visual Culture
- Mike Riley, Ph.D. (Ohio) Associate Professor of English
- Benjamin Schreier, Ph.D. (Brandeis University) Assistant Professor English and Jewish Studies
- Robin G. Schultze, Ph.D. (Michigan) Professor of English
- Sanford Schwartz, Ph.D. (Princeton) Associate Professor of English
- Stuart Selber, Ph.D. (Michigan Tech U) Associate Professor of English
- John L. Selzer, Ph.D. (Miami) Professor of English
- Linda Selzer, Ph.D. (The Pennsylvania State University) Assistant Professor of English and American Studies
- Gayle L. Smith, Ph.D. (Massachusetts) Associate Professor of English
- James F. Smith, Ph.D. (Penn State) Professor of English
- Scott Smith, Ph.D. (University of Notre Dame) Assistant Professor of English and Comparative Literature
- Thomas Smith, Ph.D. (Rutgers) Assistant Professor of English
- Adam J. Sorkin, Ph.D. (North Carolina) Distinguished Professor of English
- Sandra Spanier, Ph.D. (Penn State) Professor of English and Women's Studies
- Susan Squier, Ph.D. (Stanford) Julia Gregg Brill Professor of English and Women's Studies
Admission Requirements

Requirements listed in this section are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

English Proficiency--The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test; or a minimum composite score of 6.5 on the IELTS.

Applicants should have a junior/senior grade-point average of 3.50 (on a 4.00 scale), although exceptions may be made for students with special backgrounds, abilities, and interests. Scores from the Graduate Record Examinations (GRE) Aptitude Tests (verbal and quantitative) are required for admission. Applicants must also submit three letters of recommendation, a writing sample indicating their ability to do analytical or original work, and a statement of their professional goals.

For admission, M.A. students should have strong backgrounds in English courses; 18 credits beyond freshman composition are a minimum, but the department prefers at least 24 credits.

For admission into the M.F.A. program, students must have a baccalaureate degree (with substantial work in English), a portfolio of publishable student writing, and the intention to pursue a career as a professional writer.

To be considered for the doctoral program, students must have completed an M.A. in English, M.F.A. or its equivalent. The records of potential students should promise of superior work in doctoral study.

Master's Degree Requirements

Candidates for the M.A. may take at least 30 credits of course work. M.A. candidates must fulfill the language requirement in one foreign language. All master's candidates are required to take ENGL 501, one course in literary or rhetorical theory, two courses in periods prior to 1800, and two courses in periods after 1800. Students are also required to complete a Writing Project that will demonstrate mastery of the field.

For admission into the M.F.A. program, students must have a baccalaureate degree (with substantial work in English), a portfolio of publishable student writing, and the intention to pursue a career as a professional writer.

M.F.A. candidates are required to take 42 credits, distributed as follows:

- 3 credits ENGL 501
- 12 credits in ENGL 512, ENGL 513, or ENGL 515, at least 9 of which must be in the student's area of specialization (ENGL 512, 513, and 515 can be repeated for credit)
- 12 credits in ENGL 596 for the final project, or at least 6 credits of ENGL 596 and 6 credits of English Department graduate seminars
- 3 credits in electives (400 or 500-level courses)
- 12 credits in literature at the 500 level
- Candidates will complete a book-length manuscript of publishable quality in their area of specialization.

Doctoral Degree Requirements

The Ph.D. degree does not require a specific number of credits although all candidates are required to have completed English 501 (or the equivalent), one course in rhetoric or theory, two courses in periods before 1800, and two courses in periods after 1800. With the help of departmental graduate advisers, students select a program of seminars or reading courses. To complete their programs, students must show reading proficiency in one foreign language, pass written comprehensive examinations, and write and defend a doctoral dissertation.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the Graduate Bulletin, the following awards typically have been available to graduate students in this program:

EDWIN ERLER SPARKS FELLOWSHIPS IN THE HUMANITIES (8)

Available to beginning and continuing graduate students in one of the following graduate programs: Comparative Literature, English, French, German, History, Linguistics, Philosophy, Spanish, and Speech Communication; stipend $12,560 plus waiver of tuition. Apply to department before February 1.

KATEY LEHMAN FELLOWSHIP

Provides approximately $13,000 plus tuition for a year's study in poetry or fiction writing leading toward an M.F.A. in English. The Lehman Fellow will teach one course during the fellowship year. Fellowship holders are eligible for graduate assistantships with a similar stipend and tuition grant during the second year of study.

WILMA EBBITT AWARD

Funding to support research in rhetoric. Number and amount of awards to be determined.

BEN EUWEMA MEMORIAL SCHOLARSHIP

Travel funding for graduate degree candidates; consideration will be given to all currently enrolled graduate students in English. Preference will be given to students at the Ph.D. thesis stage, particularly those who need to travel to complete their research; number of awards and amount of each will be determined each year.

FOLGER INSTITUTE FELLOWSHIPS

The Pennsylvania State University
Penn State is a member of the Folger Institute of Renaissance and Eighteenth-Century Studies. Graduate students in English are eligible for Folger Institute Fellowship to study in seminars and workshops at the Folger Library, Washington, D.C.

**PHILIP YOUNG MEMORIAL AWARD**
Funding to support research in American Literature. Number and amount of awards will be determined.

**Courses**
Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

**ENGLISH (ENGL) course list**

Last Revised by the Department: Fall Semester 2009
Blue Sheet Item #: 37-07-030

M.E.M.

The Graduate Faculty

Adrian Barb, M.B.A., Ph.D. (Missouri, Columbia) Assistant Professor in Information Science
Joanna Defranco, Ph.D. (NJIT) Senior Lecturer in Information Science
Kathryn W. Jablakow, Ph.D. (Ohio State) Associate Professor of Mechanical Engineering and STS
Phillip A. Laplante, M.B.A., Ph.D. (Stevens Institute of Tech) Distinguished Professor of Systems Engineering
John I. McCool, Ph.D. (Temple) Distinguished Professor of Systems Engineering
Colin J. Neill, Ph.D. (Wales) Associate Professor of Software Engineering
James A. Nemes, D.Sc. (George Washington) Professor of Mechanical Engineering
Michael J. Piovoso, Ph.D. (Delaware) Professor of Electrical Engineering
Robin G. Qiu, Ph.D. (Penn State) Associate Professor of Information Science
David W. Russell, Ph.D. (CNAA, London) Professor of Electrical Engineering
Raghvinder Sangwan, Ph.D. (Temple) Assistant Professor of Information Science
Kailasam Satyamurthy, M.B.A., Ph.D., (Clemson) Senior Lecturer of Engineering and Management

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin. The Master of Engineering Management is developed for students with a background in engineering or science. Applicants with a four year undergraduate degree in engineering, mathematics, physics, computer science, or a related discipline will be considered. Test scores from the GMAT or GRE exams are not required, but will be considered by the admissions committee if submitted. Jr/Sr GPA of 3.0 or better on a 4.0 scale is required. Students must have three years or more work experience in an engineering or engineering-related position. Applicants must submit a letter of reference, and a one page personal statement of relevant experience and goals.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the Internet-based test (iBT). Applicants with iBT speaking scores between 15 and 19 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Degree Requirements

All students in the Master of Engineering Management program must complete a minimum of 33 credits. The courses must include the required core courses of 18 credits:

ENGMT 501: Engineering Management Science (3)
ENGMT 510: Economics and Financial Studies for Engineers (3)
SYSEN 505: Technical Project Management (3)
SYSEN 536: Decision and Risk Analysis in Engineering (3)
SYSEN 550: Creativity and Problem Solving I (3)
SYSEN 552: Creativity and Problem Solving II (3)
as well as the capstone course:
ENGMT 539: Engineering Management Strategy (3)

Student Aid

Graduate Assistantships available to students in the program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

The Graduate Faculty
- Tom Baker, Ph.D. (Michigan State) Professor of Entomology
- Mary E. Barbercheck, Ph.D. (California, Davis) Professor of Entomology
- Otta N. Bjornstad, Ph.D. (Oslo) Associate Professor of Entomology
- Diana Cox-Foster, Ph.D. (Illinois) Professor of Entomology
- Li Wang Ci, Ph.D. (Kentucky) Professor of Entomology
- Consuelo M. De Moraes, Ph.D. (Georgia) Assistant Professor of Entomology
- Gary W. Felton, Ph.D. (California, Davis) Professor of Entomology
- Shelby J. Fleischer, Ph.D. (Auburn) Professor of Entomology
- James L. Frazier, Ph.D. (Ohio) Professor of Entomology
- Christina Grozinger, Ph.D. (Harvard) Associate Professor of Entomology
- Mark A. McPherson, Ph.D. (Illinois) Professor of Entomology
- David Hughes, Ph.D. (U of Glasgow) Assistant Professor of Entomology and Biology
- Grzegorz Krawczyk, Ph.D. (Michigan State) Senior Research Associate of Entomology
- Bruce A. McWhorter, Ph.D. (Illinois) Professor of Entomology
- Mark Mescher, Ph.D. (U of Georgia) Assistant Professor of Entomology
- Christopher A. Mullin, Ph.D. (Cornell) Professor of Entomology
- Nancy Ostiguy, Ph.D. (Cornell) Associate Professor of Entomology
- Edwin G. Rajotte, Ph.D. (Rutgers) Professor of Entomology
- Jason Rasgon, Ph.D. (California, Davis) Associate Professor of Entomology
- Andrew Read, Ph.D. (Oxford, UK) Professor of Biology and Entomology, Eberly College of Science Distinguished Senior Scholar
- Michael C. Saunders, Ph.D. (Georgia) Professor of Entomology
- Matthew Thomas, Ph.D. (U of Southampton, UK) Professor of Entomology
- John Tooker, Ph.D. (Illinois) Assistant Professor of Entomology
- Jim Tunlinson, Ph.D. (Mississippi State) Professor of Entomology, Ralph O. Mumma Endowed Professor of Chemical Ecology

Students in Entomology represent a range of experiences and interests, with varied backgrounds from biology, chemistry, zoology, entomology, meteorology, ecology and botany programs to name a few. You will find an exceptional faculty that offer an unequalled range of research expertise and breadth within our focus areas. The strengths of the research program are in four main programs: Chemical Ecology, Ecological Applications, Gene Base Biology and Ecology and Pollinator Biology and Ecology. Many opportunities are available for study abroad experiences from which students return with a new perspective that enhances their studies and research. The Entomology Department participates in a number of dual-degree programs including Comparative and International Education (CI ED), Human Dimensions of Natural Resources and the Environment (HDNRE), International Agriculture and Development (INTAD) and Operations Research (OR). Additional specialization is available to students conducting research with insects in intercollegiate degree programs in ecology, genetics and plant biology.

Admission Requirements
Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

For admission a student should have a strong background in biological sciences. Courses in chemistry through organic, physics, mathematics through calculus, statistics, and computer application are recommended.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. Applicants with IBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5.

Master's Degree Requirements
The Master of Science degree in Entomology is an intermediate degree leading toward the development of special knowledge in entomology. It provides training for prospective doctoral candidates. A minimum of 30 credits (400 and 500 level) are required, with at least 20 credits earned in residence. At least 18 credits in the 500 and 600 series must be included in the program. A minimum of 12 credits in coursework (400 and 500) must be completed in the major program.

The program requires all students to take ENT 518, ENT 520, ENT 522, ENT 590 (2 credits), and 3 credits statistics (i.e., STAT 501, 502, 541, AG 400, or equivalent). An insect collection is required at the end of the first year of courses. Additional courses may be selected by the student in consultation with his/her graduate committee. Each Master's student is expected to serve as a teaching assistant for 3 credits. Each student must present the results of thesis research at a departmental seminar, and the student may register for 1 credit of ENT 590 that semester. A thesis equivalent to 6 credits (ENT 600) is required. A final oral examination covering the general field of entomology, with emphasis in the student's area of specialization, is required by the department. This is to be administered by the student's committee. A favorable vote of a two-thirds majority is necessary for passing.

Committers for master’s degree candidates should be formed during the first semester, and are suggested jointly by the student and advisor, with approval by the Department Head. Masters committees have a minimum of three members. One of these should be from another degree program, particularly if the student plans to minor in that area. Additional faculty members may be appointed to the committee, and it should consist of a majority of the committee. The student and committee shall meet early in the process to plan the student’s program and approve a thesis project.

The Thesis Guide is available electronically, visit www.etd.psu.edu.

Doctoral Degree Requirements
The degree of doctor of philosophy signifies high scholastic achievement and demonstrated capability in independent research. Although there is no formal credit requirement at the Ph.D. level, five academic years of full time graduate work beyond the bachelor's degree are normally required. Some of the work may be completed off campus or on a part-time basis, but between the time of acceptance as a candidate and completing the degree requirements the student must spend two academic sessions in residence within a twelve-month period. The program requires all students to take ENT 518, ENT 520, ENT 522, and ENT 530 (4 credits). An insect collection is required at the end of the first year of courses. Other course requirements are dependent on the student’s program of study. Each Ph.D. student is expected to serve as a teaching assistant for 6 credits. The results of the dissertation research must be presented at a departmental seminar. In addition, students must take and pass a comprehensive and final oral examination. Students commencing a doctoral program may have a provisional committee appointed as soon as the advisor is selected. Students are not formally admitted to the doctoral program until they have passed a candidacy examination. A favorable vote by two-thirds of the Candidacy Committee members is necessary for acceptance.

The Pennsylvania State University
Graduate Bulletin Archive - 2012

Dual-Title Graduate Degree in Entomology (ENT) and International Agriculture and Development (INTAD)

Graduate students with research and educational interests in international education may apply to the Entomology/INTAD Dual-Title Degree Program. The goal of the dual-title degree Entomology and INTAD graduate program is to enable graduate students from Entomology to acquire the knowledge and skills of their primary area of specialization in Entomology, while at the same time gaining the perspective and methods needed for work in the international agriculture. Graduate study in this program seeks to prepare students to assume leadership roles in science, science education, outreach, and project management anywhere in the world. Students are required to write research proposals and expected to write grants to support their research activities, reflecting the dual-title degree. As part of their professional development presentations, publication of research articles and active participation in professional societies is expected. Emphasis is placed upon the professional development of the student. Students are able to specialize in the research program areas of chemical ecology, disease ecology and biology, pollinator ecology and biology, ecology, genomics and pest management. Additional specialization is available to students performing research with insects in the inter-college degree programs in genetics, ecology, and plant biology. At the same time they will acquire a broad perspective about how to apply their research findings in the context of the broader international community. Thus, the dual-title will allow students to master their field of specialization from an international perspective so that they can compare practices and outcomes between countries and regions. This dual-title graduate degree program does not duplicate any other degree program at the University.

Admission Requirements

For admission to the dual-title doctoral degree under this program, a student must first apply and be admitted to the Entomology graduate program. Once accepted into the Entomology program, the student can then submit an application to the INTAD Academic Program Committee for the dual-title degree program. The application consists of a written personal statement indicating the career goals that a student hopes to accomplish by earning a dual-title ENT/INTAD degree. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

For admission a student should have a strong background in biological sciences. Courses in chemistry through organic, physics, mathematics through calculus, statistics, and computer application are recommended. The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. The minimum composite score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a graduate degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the Entomology program in which they are primarily enrolled. In addition, they must satisfy the requirements described below, determined by the student, their INTAD advisor, and their Entomology program advisor.

Degree Requirements for ENT/INTAD Dual-Title M.S.

The master's in Entomology and INTAD is a dual-title degree awarded only to students who are admitted to the Entomology master's program and admitted to the dual-title degree in INTAD. In addition to the requirements of the Entomology degree, dual-title degree students must:

Course Requirements

Complete a minimum of 12 INTAD course credits (400, 500 or 800 level) as follows:

9 credits from the core curriculum:

- Program Design and Delivery (AEE 450, 3 credits)
- Leadership Development (CDEV/R SOC/AEE 505, 3 credits, on-line)
- International Agricultural Development Seminar (INTAD 820, 3 credits)

3 credits of internship or applied courses/ independent studies with international development content

Thesis

Write a master's thesis on a topic that reflects both the graduate program in entomology and the dual-title offering in INTAD. Thesis research credits (SUBJ 600) must be taken in the major program.

All members of the student's committee for the dual-title master's degree will be members of the graduate faculty. The committee must include at least one graduate faculty member from INTAD and one from ENT. The Committee form should be filed upon selection of the committee members and should be approved by the INTAD Academic Program Committee Co-chair.

Candidates for the dual-title master's degree in Entomology and INTAD will also be required to pass a final oral examination covering the general field of entomology and INTAD, with emphasis on the student's area of specialization. The oral exam is to be administered by the student's thesis committee.

The Pennsylvania State University
Degree Requirements for ENT/INTAD Dual-Title Ph.D.

The doctoral degree in Entomology and INTAD is a dual-title degree awarded only to students who are admitted to the Entomology doctoral program and admitted to the dual-title degree in INTAD. The minimum course requirements for the dual-title Ph.D. degree in ENT/INTAD, in addition to the Entomology requirements, are as follows.

Course Requirements

Students must complete a minimum of 18 INTAD course credits with study in the following categories:

- 9 credits from the core curriculum
  - International Agricultural Development Seminar (INTAD 820, 3 credits)
  - International Rural Social Change (R SOC 508, 3 credits)
  - Sociology of Agriculture (R SOC 555, 3 credits)
  - Human Dimensions of Natural Resources (R SOC 557, 3 credits)

- 9 credits from INTAD elective curriculum/courses with international development content/internships/independent study

Permission from a student's academic advisor, in consultation with the program chair, is required to substitute a 400-level course for a 500-level course; however, the requirement for 18 credits at the 500-level or above must still be met, in total, across both the major and the dual-title courses of study. Particular courses may satisfy both the Entomology Department requirements and those in the INTAD program. Final course selection is determined by the student in consultation with their INTAD advisors and their Entomology program advisors. Students who already hold a master's degree from another institution may petition to have equivalent course credits accepted.

Graduates of the dual-title INTAD master's degree and Ph.D. who wish to pursue an INTAD doctoral degree must re-apply to the INTAD program for admission. INTAD master's degree credits may be carried over to the doctoral program. Six additional INTAD credits will be required. INTAD master's degree graduates who pursue an INTAD Ph.D. are required to take the INTAD 820 International Agricultural Development Seminar a second time.

Candidacy

Candidacy procedures will be based on the procedures of the major department and will have an international dimension. Although not encouraged, the dual-title degree student may require an additional semester or more to fulfill requirements for the dual-title degree program. Therefore, under exceptional circumstances, the candidacy exam may be delayed at the discretion of the student's advisor in consultation with the INTAD program coordinators.

Committee Composition

The doctoral committee of a Ph.D. dual-title degree student must include a minimum of four faculty members, i.e., the chair and at least three additional members, to be members of the Major Program faculty; and the committee must have at least one representative from the INTAD Program faculty. The chair of the committee can be a member of both the Major Program and the INTAD Program faculty. If the chair is not an INTAD Program faculty member, the INTAD representative must be the co-chair of the committee. An official "outside member" also must be appointed to the committee.

Comprehensive Exam

At the end of the coursework, candidates for the dual-title doctoral degree in Entomology and INTAD will be required to pass an oral comprehensive examination based on their thesis proposal and area of specialization in entomology, while reflecting their dual-title curriculum. A separate comprehensive examination is not required by the INTAD program, but international agriculture must be one of the key areas of the exam and the INTAD representative on the student's doctoral committee must have input into the development of and participation in the evaluation of the comprehensive examination.

Dissertation and Dissertation Defense

Ph.D. students enrolled in the dual-title degree program are required to write and orally defend a dissertation on a topic that reflects their original research and education in both Entomology and International Agriculture and Development. The dissertation should contribute to the body of knowledge in international agriculture. A public oral presentation of the dissertation is required.

Dual-Title Graduate Degree in Entomology (ENT) and Comparative and International Education (CI ED)

Graduate student with research and educational interests in international education may apply to the Entomology/CI ED Dual-Title Degree Program. The goal of the dual-title degree Entomology and CI ED graduate program is to enable graduate students from Entomology to acquire the knowledge and skill of their primary area of specialization in Entomology, while at the same time gaining the perspective and methods of comparative and international education. The graduate dual-title degree program in Entomology and CI ED study in this program seeks to prepare students to assume leadership roles in science, science education, outreach, and project management anywhere in the world. Students are required to write research proposals and expected to write grants to support their research activities, reflecting the dual-title degree. As part of their professional development, presentations, publication of research articles, and active participation in professional societies is expected. Emphasis is placed upon the professional development of the student. Students are able to specialize in the research program areas of chemical ecology, disease ecology and biology, pollinator ecology and biology, ecology, genomics and pest management. Additional specialization is available to students performing research with insects in the inter-college degree programs in genetics, ecology, and plant biology. At the same time they will acquire a broad perspective about how to apply their research findings in the context of the broader international community. Thus, the dual-title will allow students to master their field of specialization from an international perspective so that they can compare practices and outcomes between countries and regions.

This dual-title graduate degree program does not duplicate any other degree program at the University.

Admission Requirements

For admission to the dual-title degree under this program, a student must apply directly and be admitted to the Entomology graduate program. Once accepted into the Entomology program, the student can apply to the Admissions Committee on the Comparative and International Education program. The CI ED admissions committee reviews applications and recommends students for admission to the dual-title degree program to the Graduate School. Scores from the Graduate Records Examinations (GRE) are required for admission. In addition, students are to provide a written personal statement indicating the career goals they hope to accomplish by earning a dual-title Entomology/CI ED degree. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the Entomology program in which they are primarily enrolled. In addition, they must satisfy the requirements described below, as established by the CI ED program committee. Within this framework, final course selection is determined by the student, their CI ED advisor, and their Entomology program advisor.

Upon a student's acceptance by the CI ED admissions committee, the student will be assigned a CI ED academic adviser in consultation with the CI ED program chair. As students develop specific scholarly interests, they may request that a different CI ED faculty member serve as their adviser. The student and adviser...
The master's in Entomology and CI ED is a dual-title degree awarded only to students who are admitted to the Entomology master's program and admitted to the dual-title degree in CI ED. In addition to the requirements for the Entomology degree, dual-title students must:

- Complete a minimum of 12 CI ED credits with study in the following curriculum categories:
  - 3 credits, CI ED Proseminar (CI ED 500)
  - 6 credits, advanced comparative and international education content courses
  - 3 credits, advanced or focused comparative and international education content courses

Write a master's thesis on a topic that reflects both the graduate program in Entomology and the dual-title offering in Comparative and International Education.

The thesis committee for the dual-title M.S. degree will consist of two graduate faculty members from Entomology and one graduate faculty member from CI ED.

Candidates for the dual-title master's degree in Entomology and CI ED will also be required to pass a final oral examination covering the general field of Entomology and CI ED, with emphasis on the student's area of specialization. The oral exam (thesis defense) is to be administered by the student's thesis committee. A favorable vote of a two-thirds majority is necessary for passing.

Some courses may satisfy both the graduate program requirements and those of the CI ED program. Final course selection is determined by the student in consultation with their CI ED advisers and their major program advisers. Students and advisers should maintain the CI ED Master's Degree Plan of Study, which must be submitted to the CI ED program office two months before the student files the "Intent to Graduate" via eLion.

Requirements for the Entomology/CI ED Dual-Title Ph.D.

The doctorate in Entomology and CI ED is a dual-title degree awarded only to students who are admitted to the Entomology doctoral program and admitted to the dual-title degree in CI ED. The minimum course requirements for the dual-title Ph.D. degree in Entomology and CI ED, in addition to the Entomology requirements, are as follows:

- Complete a minimum of 27 graduate credits
  - 3 credits of Proseminar in Comparative and International Education (CI ED 500);
  - 6 credits in advanced-Comparative and International Education courses;
  - 12 credits in Comparative and International Education content courses or courses with comparative or international content;
  - 6 credits in research methods.

A minimum of 18 of the 27 credits must be taken at the 500-level, and particular courses may satisfy both the Entomology Department requirements and those in the Comparative and International Education program. Final course selection is determined by the student in consultation with their CI ED advisers and their major program advisers. Students who already hold a master's degree from another institution may petition to have equivalent course credits accepted.

Ph.D. Minor in CI ED

A Ph.D. (or D.Ed.) minor program in Comparative and International Education is available to doctoral students who find it desirable to include the perspectives and methodologies of Comparative and International Education in the Entomology program and have been approved to do so by their doctoral committees.

To qualify for a minor in CI ED, students must satisfy the requirements of the Entomology Department, and meet the following minimum requirements:

- 3 credits in the Proseminar in Comparative and International Education (CI ED 500);
- 3 credits in a Comparative and International Education course;
- 9 credits in Comparative and International Education content courses or courses with comparative or international content outside the College of Education.

Graduate students with research and educational interests in operations research may apply to the Entomology/O R Dual-Title Degree Program. The goal of the dual-title degree Entomology and O R graduate program is to enable graduate students from Entomology to acquire the knowledge and skill of their primary area of specialization in Entomology, while at the same time attain and be identified with the tools, techniques, and methodology of operations research. Operations research is the analysis—usually involving mathematical treatment—of a process, problem, or operation to determine its purpose and effectiveness and to gain maximum efficiency. Graduate Dual-Title degree program in Entomology and O R study in this program seeks to prepare students to assume leadership roles in science, science education, outreach, and project management anywhere in the world. Students are required to write research proposals and expected to write grants to support their research activities, reflecting the dual-title degree. As part of their professional development, presentations, publication of research articles, and active participation in professional societies is expected. Emphasis is placed upon the professional development of the student. Students are able to specialize in the research program areas of chemical ecology, disease ecology and biology, pollinator ecology and biology, ecology, genomics and pest management. Additional specialization is available to students performing research with insects in the inter-college degree programs in genetics, ecology, and plant biology. At the same time they will acquire a broad perspective about how to apply their research findings in the context of operations research. Thus, the dual-title will allow students to master their field of specialization from an operations research perspective.

This dual-title graduate degree program does not duplicate any other degree program at the University.

Admission Requirements

For admission to the dual-title degree under this program, a student must first apply and be admitted to the Entomology graduate program. Once accepted into the Entomology program, the student can apply to the Admissions Committee of the Operations Research program. The O R admissions committee reviews applications and recommends students for admission to the dual-title degree program to the Graduate School. Scores from the Graduate Records Examinations (GRE) are required for admission. For the M.S. dual-title degree in Entomology-Operations Research, in addition to those prescribed by the graduate major program, prerequisites for acceptance to the program are as follows: 6 credits in stochastic/statistical methods; 9 credits in computer science. For the Ph.D. dual-title degree in Entomology-Operations Research, in addition to those prescribed by the graduate major program, prerequisites for acceptance to the program without deficiency include the following or their equivalent: MATH 140, MATH 141, MATH 220; CMPSC 101; and 3 credits of probability and statistics. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the Entomology program in which they are primarily enrolled. In addition, they must satisfy the requirements described below, as established by the O R program. Within this framework, final course selection is determined by the student, their O R adviser, and their Entomology program adviser.

Requirements for Entomology/O R Dual-Title M.S.

For the M.S. dual-title degree in Operations Research, the minimum requirements are:

- 6 credits in stochastic/statistical methods, including a minimum of 3 credits in each of the areas of statistical methods and stochastic processes;
- 6 credits in optimization, including a minimum of 3 credits in linear programming;
- 3 credits in computational methods;
- 9 credits in a Comparative and International Education content course.

The Pennsylvania State University
Students must enroll in O R 590 Colloquium for at least 1 credit in each year enrolled in the program and in residence. A minimum of 9 credits must be in the 500 series.

Particular courses may satisfy both the graduate major program requirements and those in the Operations Research program.

A thesis may be required, the supervisor of which must be a member of the graduate faculty recommended by the chair of the program granting the degree and approved by the Operations Research committee as qualified to supervise thesis work in operations research. A paper or report may be written in lieu of the M.S. or M.A. thesis upon approval of the student's graduate major program. It is the prerogative of the graduate major program to assign these credits to one or more of the following categories: stochastic/statistical methods, optimization, computational methods, or applications.

**Requirements for the Entomology/O R Dual-Title Ph.D.**

For the Ph.D. dual-title degree in Operations Research, the minimum requirements are:

- 9 credits in stochastic/statistical methods, including a minimum of 3 credits in each of the areas of statistical methods and stochastic processes;
- 9 credits in optimization, including a minimum of 3 credits in linear programming;
- 6 credits in computational methods, including a minimum of 3 credits in simulation;
- 12 credits in applications/specialization

Students must enroll in O R 590 Colloquium for at least 1 credit in each year enrolled in the program and in residence. A minimum of 18 credits must be in the 500 series.

The doctoral committee for an Entomology-Operations Research Ph.D. dual-title degree student is recommended by the Entomology program. The chair and at least two members of a doctoral committee must be members of the graduate faculty and approved by the Operations Research committee as qualified to supervise doctoral theses in operations research. The Operations Research committee is responsible for administering an examination in operations research that constitutes a portion of the comprehensive examination administered to the doctoral students in the program option, as well as to the candidate who chooses operations research as a minor field.

**Ph.D. Minor in O R**

A Ph.D. minor program in Operations Research is available for doctoral students who find it advantageous to include advanced quantitative methods of systems analysis in their programs of study and have been approved to do so by their doctoral committees. To qualify for a minor in Operations Research, students must satisfy the requirements of their graduate major programs, meet the same prerequisites as the M.S. dual-title degree, and meet the following minimum requirements:

- 6 credits in stochastic/statistical methods, including a minimum of 3 credits in each of the areas of statistical methods and stochastic processes;
- 6 credits in optimization
- 3 credits in computational methods

A minimum of 6 credits must be taken at the 500 level.

The doctoral committee for an Entomology-Operations Research Ph.D. dual-title degree student is recommended by the Entomology program. The chair and at least two members of a doctoral committee must be members of the graduate faculty and approved by the Operations Research committee as qualified to supervise doctoral theses in operations research. The Operations Research committee is responsible for administering an examination in operations research that constitutes a portion of the comprehensive examination administered to the doctoral students in the program option, as well as to the candidate who chooses operations research as a minor field.

**Courses**

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Rachel A. Brennan, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of Civil Engineering
- William D. Burgio, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of Environmental Engineering
- Fred S. Cannon, Ph.D. (Illinois, Urbana-Champaign) P.E. Associate Professor of Environmental Engineering
- Brian A. Dempsey, Ph.D. (North Carolina) Professor of Environmental Engineering
- Christopher J. Duffy, Ph.D. (New Mexico Institute of Mining and Technology) P.H. Professor of Civil Engineering
- Peggy A. Johnson, Ph.D. (Maryland) Professor of Civil Engineering
- Bruce E. Logan, Ph.D. (California, Berkeley) Kappe Professor of Environmental Engineering
- Jack V. Matson, Ph.D. (Rice) P.E. Professor of Environmental Engineering
- Arthur C. Miller, Ph.D. (Colorado State) P.E., P.L.S. Professor of Civil Engineering
- Raymond W. Regan, Sr., Ph.D. (Kansas) P.E. Professor of Environmental Engineering

This specialty prepares students for careers in the design of treatment facilities, environmental monitoring, process development for water quality control, industrial waste treatment, management of hazardous and toxic substances, monitoring and management of environmental quality, air pollution control, and water resource systems.

Admission Requirements
The requirements listed here are in addition to the general requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Candidates should possess a baccalaureate degree from a regionally accredited institution. Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and appropriate course backgrounds may be considered for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

International applicants must submit OFFICIAL transcripts, degree, and diploma certificates in both English and their native language. These documents must contain the “red stamp” or have the raised notary stamp. Photocopies will NOT be accepted. Applicants must provide the department with official transcripts of all of their previous course work (in duplicate), a statement of objectives, and three letters of recommendation AT THE TIME OF APPLICATION. Résumés are encouraged, but not required. In addition, all applicants must submit scores from the General Graduate Record Examination Aptitude Test (verbal, quantitative, and analytical).

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the internet-based test. The minimum composite score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a masters degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British west Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, The United States, and Wales.

Applicants for fall admission who wish to be considered for financial aid should have COMPLETED applications on file by DECEMBER 1 of the preceding year.

Degree Requirements
The M.Eng. degree is a nonthesis professional master's degree. The program provides training for advanced professional practice. A minimum of 30 graduate credits (400 level and above) of course work and a writing portfolio are required. It should be noted that 20 credits must be earned at an established graduate campus of the University. At least 15 credits must be earned in graduate courses (500 level). Students are not permitted to count audited credits toward the minimum credits required for the degree. The writing portfolio may consist of the following types of writing samples: a semester paper, a report that documents a semester design project, an applied research paper, or professional papers. The writing sample must demonstrate in-depth knowledge of an engineering topic presented in a format typical of professional practice.

The M.S. degree program is strongly oriented toward research. A minimum of 30 graduate credits (400 level and above) is required, of which 20 must be earned at an established graduate campus of the University. At least 15 credits in the 500 and 600 series, combined, must be included in the program. A minimum of 30 credits of course work (400 and 500 level), as contrasted with research, must be completed in the major (courses prefixed C E). Students are not permitted to count audited credits toward the minimum credits required for the degree. A thesis is required, and at least 6 credits of thesis research (C E 650 or C E 651) must be included in the candidate’s academic course plan.

A minimum of 24 credits of graduate course work (400 level and above) is required beyond the master's degree. A candidate for the Ph.D. degree must pass the English proficiency and candidacy examinations, prepare and defend the thesis proposal as part of the oral comprehensive examination, and pass the final oral examination (thesis defense). In addition, Ph.D. candidates must satisfy the University residency requirement by registering for two consecutive semesters as a full-time student.

Continuous registration is required for all graduate students until the thesis or writing portfolio has been approved.

Biogeochemistry Dual-Title Degree Program
Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Students in the Biogeochemistry Dual Title program are required to have two advisers from separate disciplines: one individual serving as a primary adviser in their major degree program and a secondary adviser in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework from an approved list of courses is required. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. A single candidacy examination that includes biogeochemistry will be administered for admission into the student’s Ph.D. program, as well as the biogeochemistry dual-title. The structure and timing of this exam will be determined jointly by the dual-title and major program. The student’s doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Other Relevant Information
The following courses offered by the Department of Civil and Environmental Engineering are appropriate for students majoring in Environmental Engineering (course descriptions are given under Civil Engineering): C E 482, 485W, 472W, 475, 476, 479, 496, 497, 551, 555, 556, 561, 564, 566, 567, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 596, 597, and 598. Appropriate courses offered by other departments include, but are not limited to: B M B 401, 402; CHEM 406; GEOC 452; M E 405, 470, 521; METEO 454; MICR 400; NUC E 420.

The Pennsylvania State University
Graduate assistantships and other forms of student aid are described in the Student Aid section of the Graduate Bulletin. International applicants who wish to be considered for a teaching assistantship must present an acceptable score (250-300 or 55-60) on the Test of Spoken English (TSE). The TSE can be taken in many countries, or at Penn State after arrival.

CECIL M. PEPPERMAN MEMORIAL GRADUATE FELLOWSHIP
Available to a graduate student in civil or environmental engineering specializing in one of the following fields, listed in order of priority: waste treatment and management, water pollution control, environmental engineering, or related fields.

Environmental Engineering (ENVE)

Program Home Page

THOMAS H. EBERLEIN, Coordinator, Environmental Programs
Penn State Harrisburg
TL 177 Science and Technology Building
777 W. Harrisburg Pike
Middletown, PA 17057-4898

Degree Conferred:
M.Eng.

The Graduate Faculty:
- Katherine A. Baker, Ph.D. (Delaware) Associate Professor of Environmental Microbiology
- Yen-Chih (David) Chen, Ph.D. (Purdue) Assistant Professor of Environmental Engineering
- Balwant Chohan, Ph.D. (Massachusetts) Assistant Professor of Chemistry
- Shirley Clark, Ph.D. (Alabama, Birmingham) Associate Professor of Environmental Engineering
- Thomas H. Eberlein, Ph.D. (Wisconsin) Associate Professor of Chemistry
- Sairam Rudrabhatla, Ph.D. (Osmania, India) Assistant Professor of Biology
- Howard G. Sachs, Ph.D. (Clark) Professor of Biology
- Yuefeng Xie, Ph.D. (Tsinghua) Professor of Environmental Engineering

This program, offered at the Harrisburg campus, is intended for the engineer who desires a part-time graduate environmental engineering program. Prospective students who do not have an undergraduate engineering degree, but rather hold a baccalaureate degree in a related scientific field (such as chemistry, microbiology, environmental science) may be admitted to the program but may need to take some prerequisite undergraduate engineering courses. This degree program complements the Environmental Pollution Control graduate programs (M.E.P.C. and M.S. in EPC) offered by the same faculty.

A variety of civil and environmental engineering courses are regularly offered, as well as specialty courses in environmental policy, other engineering areas, computer science, and other policy-related areas.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Applicants are strongly encouraged to present an undergraduate degree in engineering from an accredited program. However, those who possess an undergraduate degree in a related scientific field may be considered for admission; those students will need to take additional engineering courses in order to be adequately prepared.

All students are expected to have an undergraduate junior/senior grade-point average of 3.0 on a 4.0-point system. Exceptions to this minimum may be made for students with special backgrounds or abilities, or other qualifications.

All applicants must provide two copies of all official transcripts of all their previous course work. In addition, applicants must supply a statement of objectives and three letters of recommendation.

For those students for whom English is not their native language, scores on the Test of English as a Foreign Language (TOEFL) are required; an acceptable score of 560 on the paper-based version or 220 on the computer-based test is required.

International applicants should be aware that processing of transcripts and other application-related information may take considerable time. Applicants must ensure that materials arrive at least three months prior to the start of the semester they first intend to begin studies.

Degree Requirements

A minimum of 30 credits is required for the degree. All candidates are required to take a core course in each of the four environmental areas: air, water, solid waste management, and policy/risk. The program suggests that students take the following courses to meet the first three area requirements:

**MECHANICAL ENGINEERING (M E)**
- ME 433 Air Pollution Control (3)

**CIVIL ENGINEERING (C E)**
- CE 472 Water Pollution Control (3)
- CE 476 Solid Waste Management (3)

The college regularly offers several courses that meet the policy/risk area requirement, including:
- ENVE 487 Environmental Law
- ENVE 569 Environmental Risk Assessment
- PADM 531 Environmental Policy

Courses in the degree program may be taken at the 400 or 500 level, but a minimum of 18 credits must be at the 500 level. All students must take at least 1 credit of EPC 590 Seminar and complete a scholarly master's paper. The seminar and the paper count toward the 500-level requirement. All students must complete a total of 30 credits in order to earn the degree.

Food Science (FD SC)

Program Home Page

JOHN D. FLOROS, Head of the Department
814-865-5444
foodsci@psu.edu

Degrees Conferred:
Ph.D., M.S.

The Graduate Faculty
- Ramaswamy C. Anantheswaran, Ph.D. (Cornell) Professor of Food Science
- Robert B. Beeleman, Ph.D. (Ohio State) Professor of Food Science
- J. Lynne Brown, Ph.D. (MIT) Associate Professor of Food Science
- John N. Coupland, Ph.D. (Leeds) Associate Professor of Food Science
- Catherine N. Cutter, Ph.D. (Clemson) Associate Professor of Food Science
- Stephanie Doores, Ph.D. (Maryland) Associate Professor of Food Science
- Edward Dudley, Ph.D. (Wisconsin-Madison) Assistant Professor of Food Science
- Ryan J. Elias, Ph.D. (Massachusetts) Assistant Professor of Food Science
- John D. Floros, Ph.D. (Georgia) Professor of Food Science
- Hassan Gourama, Ph.D. (Nebraska) Associate Professor of Food Science
- John E. Hayes, Ph.D. (Connecticut) Assistant Professor of Food Science
- Kathleen L. Keller, Ph.D. (Rutgers) Assistant Professor of Nutritional Sciences and Food Science
- Stephen J. Knabel, Ph.D. (Iowa State) Professor of Food Science
- Luke F. LaBorde, Ph.D. (Wisconsin-Madison) Associate Professor of Food Science
- Joshua D. Lambert, Ph.D. (Arizona) Assistant Professor of Food Science
- Robert F. Roberts, Ph.D. (Minnesota) Associate Professor of Food Science
- Robert D. Steele, Ph.D. (Wisconsin-Madison) Professor of Food Science
- Donald B. Thompson, Ph.D. (Illinois) Professor of Food Science
- Gregory R. Ziegler, Ph.D. (Cornell) Professor of Food Science

Graduate work leading to the M.S. and Ph.D. degrees in Food Science is directed toward a multidisciplinary and integrated approach to teaching and research relevant to processing and manufacture of value-added foods from agricultural commodities. Through integration of the disciplines of chemistry, microbiology, engineering, and nutrition, students learn to ensure that consumers can make healthful choices from an abundant supply of affordable, safe, nutritious, and appealing foods.

Admission Requirements
Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students with a 3.00 junior/senior average (on a 4.00 scale) will be considered for admission to the program. Exceptions may be made for students with special backgrounds, abilities, and interests.

Best preparation for graduate work would be the completion of an undergraduate degree in food science, biochemistry, microbiology, or other related areas. The undergraduate program must include calculus, organic chemistry, microbiology, and general physics. Students may be admitted with deficiencies but are required to make them up without degree credit.

Students are generally admitted directly to a master's program unless they have previously earned an M.S. degree in food science or an appropriate related area; in such cases, admission can be made directly to the doctoral program by approval of the graduate program committee.

Master's Degree Requirements
The requirements for the M.S. program are detailed in the Department of Food Science's "Graduate Program Handbook." Minimum course requirements for the M.S. degree are as follows:
- Fundamentals of Food Science (FD SC 500), 4 credits;
- Research Methods in Food Science (FD SC 501), 2 credits;
- Supervised Experience in College Teaching (FD SC 602), 1 credit;
- Statistics (STAT 500 or equivalent);
- Biochemistry (BM B 401 or equivalent);
- Research (FD SC 600), 6 credits.

Doctoral Degree Requirements
The requirements for the Ph.D. program are detailed in the Department of Food Science's "Graduate Program Handbook."
Minimum course requirements for the Ph.D. degree are as follows:
- FD SC 500 Fundamentals of Food Science, 4 credits;
- FD SC 501 Research Methods in Food Science, 2 credits;
- FD SC 602 Supervised Experience in College Teaching, 2 credits;
- STAT 500 or equivalent, BM B 401 or equivalent.

Student Aid
Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

The Pennsylvania State University
Finance (FINAN)

DANIEL C. INDRO, Academic Division Head
School of Graduate Professional Studies
Penn State Great Valley
30 East Swedesford Road
Malvern, PA 19355-1443
610-648-3229
www.sgps.psu.edu

Degree Conferred:
Master of Finance (M.Fin.)

The Graduate Faculty

- Karen Duhala, Ph.D. (Penn State) Assistant Professor of Finance and Accounting
- Andrew J. Felo, Ph.D., CMA, CRM (SUNY, Binghamton) Associate Professor of Accounting
- Daniel Indro, Ph.D. (Indiana University) Associate Professor of Finance
- Pornsita Jiraporn, Ph.D. (Southern Illinois, Carbondale) Assistant Professor of Finance
- John Mason, Ph.D. (Michigan State) Associate Professor of Management and Organization
- Bo Ouyang, Ph.D. (Texas, Arlington) Assistant Professor of Accounting
- Patrick Oiang, Ph.D. (Massachusetts, Amherst) Assistant Professor of Finance
- Simon J. Pak, Ph.D. (California, Berkeley) Associate Professor of Finance
- Manohar Singh, Ph.D. (Southern Illinois, Carbondale) Associate Professor of Finance

The Master of Finance (M.Fin.) program offered by the School of Graduate Professionals at Penn State Great Valley is a graduate degree program designed for intensive and focused study in finance. As part of the School's Management Division, the program is included under the specialized professional accreditation received from the Association to Advance Collegiate Schools of Business International (AACSB). Students enroll in the program as a cohort and proceed through courses together in a prescribed sequence. Classes are taught in a schedule convenient for working professionals who have demanding time commitments. The time required to complete the program is fifteen months.

The program provides an advanced and specialized graduate education in finance for individuals with career interests as finance professionals in financial management, or investment management. The curriculum reflects a balanced combination of advanced financial theory and practical business applications. Major emerging concepts and practices in the finance field are introduced and discussed throughout the program. The program is designed to help graduates to become proficient in technical and analytical skills in finance and to develop expertise in financial problem solving and financial decision-making preparing them to advance their finance careers in organizations such as investment and commercial banking firms, mutual funds, other financial firms, non-financial businesses, consulting firms, government agencies and non-profit organizations. In addition, students will find a substantial number of courses in the M.Fin. program to be helpful in preparing for tests required for various professional certifications in finance, such as the Chartered Financial Analyst (CFA).

Admission Requirements

Requirements listed here are in addition to the Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin. The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a graduate degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales. For admission to the Graduate School, U.S. applicants must have received, from a regionally accredited institution, a bachelor's degree with requirements substantially equivalent to those at Penn State. (Penn State is accredited by the Middle States Association of Colleges and Schools.) International applicants must have a tertiary (postsecondary) degree that is deemed comparable to a four-year U.S. bachelor's degree to apply for admission. This degree must be from an officially recognized degree-granting institution in the country in which it operates.

Applicants should:
1. Have a 3.0 or better (on a 4.0 scale) junior/senior grade-point average.
2. Submit a completed online application.
3. Submit a GMAT or GRE score. Applicants holding an MBA, JD, Ph.D., CPA, or CFA or doctoral degree are not required to submit standardized test scores.
4. Submit a statement of intent or career path objective (one page).
5. Submit two confidential evaluation form letters.
6. Submit two official transcripts from all post-secondary institutions attended.
International applicants must submit official university records (transcripts/marksheets and diploma if date conferred does not appear on transcripts/marksheets), with attested English translations if the record is not in English. Notarized copies are not sufficient.
7. Submit a current resume.
8. Submit a visa application document if they are in the U.S. on a student or work visa.
9. Complete an admissions interview (by telephone or in person).

Admission decisions are based on the quality of the applicant's credentials and an interview in relation to those of other applicants who meet the requirements for admission outlined above.

Application Filing Dates: Applications to the Penn State Great Valley's Master of Finance program are reviewed on a rolling basis. New students are admitted to a cohort and begin their studies in early January.

Pre-Program Requirements:

Applicants are expected to have a working knowledge of a spreadsheet program, financial management, statistics and microeconomics. These pre-program requirements may be satisfied with academic work prior to matriculation in the M.Fin. program through college-level course credits in the following areas:
1. Financial Management/Corporate Finance: Topics include time value of money, basic theories of bond and stock valuation, capital budgeting, capital asset pricing model, market efficiency, and capital structure
2. Introductory Business Statistics: Topics include probability theory, sampling, inference, quality assurance, regression, forecasting, and simulation
3. Microeconomics: Topics include allocation of resources and distribution of income with in various market structures

The professor-in-charge of the Master of Finance program will examine academic transcripts of each applicant to determine if and how pre-program requirements are met. If a requirement is not met, the deficiency must be corrected through earned credit.

Degree Requirements:
Thirty (30) credits are required to complete the M.Fin. degree. The course work includes six required core courses (18 credit hours) which provide a body of knowledge in finance; three elective courses (9 credit hours) designed to help students develop additional expertise in corporate finance or investments; and a capstone course (3 credit hours) which provides a culminating experience for students.

The required courses provide a quantitative and analytical foundation in finance. They include:

**CORE COURSES:**
- ACCTG 512 Financial Accounting Theory and Reporting Problems
- BUSAD 525 Quantitative Methods in Finance
- BUSAD 526 Current Issues in Corporate Finance
- FIN 505 Multinational Managerial Finance
- FIN 508 Analysis of Financial Markets
- FIN 513 Speculative Markets

The required capstone course, BUSAD 585 Research in Security Valuation, provides a culminating experience for students to develop their analytical ability, their synthesis of material, and their ability to identify strategies that enhance value creation, building upon their knowledge acquired from the core courses.

The electives allow students to focus in a selected field of finance such as corporate financial management or investment management. The exact elective courses to be offered for a cohort will be determined by the professor-in-charge based on polls taken from each cohort class and on consultation with the faculty who are teaching elective courses.

Students may enroll in the Master of Finance program at the Great Valley Campus, taking courses in a face-to-face and blended format. Or students may enroll in the online Master of Finance program. A one-week residency at Great Valley is required as part of the online program.

**Student Aid**

There are a limited number of scholarships, fellowships, and graduate assistantships available. For more information on these, contact the Financial Aid Office at Penn State Great Valley via email at studentaid@gv.psu.edu or visit the website at http://www.sgps.psu.edu/prospective/tuition/financial_aid/default.aspx.

**Courses**

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Blue Sheet Item #: 34-06-360

Review Date: 12/15/06

Date last updated by Publications: 8/21/09
Science/Business, Integrated Five-Year Program

Degree Conferred:
B.S./M.B.A. Degrees

This special program is a cooperative effort between the Eberly College of Science and the Smeal College of Business. The program will provide an opportunity for students to combine and accelerate an undergraduate program in the basic sciences with a graduate program in business administration. Students admitted to this program will have the opportunity to earn a B.S. degree in General Science from the Eberly College of Science and an M.B.A. in Business Administration from the Smeal College in a total of five years. The first three years of study will include courses that satisfy the undergraduate science and General Education components of the program, and the last two years will satisfy the graduate business components of the program.

Initial program admission decisions are made jointly by the Eberly College of Science and the Smeal College of Business. The decision to extend an invitation to join the program as an undergraduate is reached through a multi-step process. First, applicants meeting all program criteria will be initially reviewed. Then a limited number of top candidates will be selected for on campus interviews by representatives of the Eberly College of Science and the Smeal College of Business. Successful interviewees will be offered admission to the accelerated program.

During the third year of the program, students formally apply to the MBA program in the Smeal College of Business. Applications are reviewed against the same criteria used for all MBA applicants, including undergraduate record, GMAT scores and related work experience. Successful candidates will gain admission into the MBA program for their fourth year of study. Students will then earn their B.S. degree during the first year of M.B.A. course work, and earn their M.B.A. degree at the end of their second year of graduate study. In addition to the regular fall and spring semester course work, program students are expected to earn credit during summer session through Cooperative Education experiences and participate in the MBA internship program.

This program seeks to combine an undergraduate program with graduate study in a professional school, and it proposes to attract and select excellent students with defined career goals. It is important to note that students in this program will have completed at least 112 undergraduate credits before entering the MBA component of the program. They will satisfy all of Penn State’s undergraduate General Education requirements and will complete the science course requirements that a General Science student with the General option does. The main elements that are different for students in the accelerated program as compared with regular four-year General Science major (General option) are that in the accelerated program students use elective credits for summer Co-op experiences and for 12 transfer credits from their first year of MBA studies. These 12 credits will be “double counted” on both the undergraduate and graduate transcripts. Accelerated students also will have an opportunity to take special “bridge” courses including 1- and 2-credit seminar classes that will focus on traversing the boundaries among science, technology, and business.

DATE LAST REVIEWED: 3/18/03
The Graduate Faculty

- Marc D. Abrams, Ph.D. (Michigan State) Professor of Forest Ecology and Physiology
- Peter Blankenhorn, Ph.D. (Penn State) Professor of Wood Technology
- Elizabeth Boyer, Ph.D. (Virginia) Associate Professor of Water Resources
- Nicole Brown, Ph.D. (Virginia Tech) Assistant Professor of Wood Chemistry
- John E. Carlson, Ph.D. (Illinois) Associate Professor of Molecular Genetics
- William F. Eldemond, Ph.D. (Penn State) Assistant Professor of Urban and Community Forestry
- James C. Finley, Ph.D. (Penn State) Professor of Forest Resources
- Matthew Hunsaker, Ph.D. (California, Davis) Assistant Professor of Forest Resources
- Michael G. Jacobson, Ph.D. (North Carolina State) Assistant Professor of Forest Resources
- John Janowiak, Ph.D. (Washington State) Professor of Wood Products Engineering
- Margaret Kaye, Ph.D. (Colorado State) Assistant Professor of Forest Ecology
- Marc E. McDill, Ph.D. (Virginia Tech) Associate Professor of Forest Resource Management
- Michael G. Messina, Ph.D. (North Carolina State) Director, School of Forest Resources; Professor of Forest Resources
- Judd Michael, Ph.D. (Penn State) Associate Professor of Wood Products Business Management
- Charles Ray, Ph.D. (Texas A&M) Assistant Professor of Wood Products Operations
- Paul M. Smith, Ph.D. (Virginia Tech) Professor of Forest Products Marketing
- Sanford Smith, Ph.D. (Penn State) Lecturer in Forest Resources
- Kim C. Steiner, Ph.D. (Michigan State) Professor of Forest Biology
- Eric Zenner, Ph.D. (Oregon State) Associate Professor of Silviculture

The Doctor of Philosophy and the Master of Science degree programs are oriented toward research, education, and scientific technology in the professions of forest products and forestry. Faculty expertise, laboratories, and outdoor facilities are available to support specialization in a variety of fields. Possibilities for specialization are indicated in part by the courses listed under wood products, forestry, and wildlife and fisheries, and by related courses in agricultural economics, agronomy, animal nutrition, biology, business administration, chemical engineering, computer science, ecology, economics, entomology, environmental pollution control, environmental resource management, geology, geomatics, hydrology, landscape architecture, meteorology, physiology, plant pathology, polymer sciences, recreation and parks, regional planning, or statistics.

Students in this program may elect the dual-degree program option in Operations Research for the Ph.D. and M.S. degrees. (See also Operations Research.)

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. A student may be admitted provisionally without GRE scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Application materials should be submitted before February by those who want to begin in summer or fall. For admission, an applicant should have at least a 2.75 grade-point average; a 3.00 junior/senior average (on a 4.00 scale); and courses that are basic to the individual’s field of specialization. Ordinarily, these include 12 credits in communication; 12 credits in social sciences and humanities; 10 credits in quantification, including calculus and statistics; 8 credits in chemistry and/or physics; 8 credits in biological sciences; and 18 credits in forest products, forestry, fish, wildlife, or related courses. Three reference letters and a brief statement describing the applicant’s academic goals, career interests, and special qualifications are required. The best-qualified applicants will be accepted up to the number of spaces available. Exceptions to admission requirements may be made for students with special backgrounds, abilities, and interests.

Admission to the Ph.D. program in Forest Resources requires a master's degree in Forest Resources or a closely related field, or a bachelor's degree with a minimum grade-point average of 3.30 and demonstrated research ability.

Master's Degree Requirements

M.S.: In addition to Graduate School requirements, 6 credits of statistics and 2 credits of colloquium are required.

Doctoral Degree Requirements

An international communications or cultural requirement is required for the Ph.D. degree. This requirement may be satisfied by demonstrating competence in one foreign language equivalent to passing two or three college-level courses. It also may be met by two courses in one or two contemporary foreign cultures. With approval of the doctoral committee, a student may petition the graduate faculty of the school for waiver of the international communications or culture requirement.

Postbaccalaureate course work will include courses specified for the M.S. degree plus 2 credits of colloquium. The entire program of courses tailored to the student’s objectives is subject to approval of the student’s committee.

The comprehensive examination will consist of an oral and written portion, the written coming first. Copies of the student's thesis research proposal should be provided to the committee before the comprehensive examination.

WATERSHED STEWARDSHIP OPTION

The Graduate Option in Watershed Stewardship is a graduate option intended to provide enhanced educational opportunities for students with an interest in water resources management who are enrolled in a graduate degree program within Forest Resources. The objective of the Graduate Option in Watershed Stewardship is to educate students to facilitate team-oriented, community-based watershed management planning directed at water resources problems encountered in Pennsylvania communities, especially non-point source water pollution. The Graduate Option in Watershed Stewardship requires 22 credits of graduate coursework: 12 credits of breadth courses, 2 credits of Watershed Stewardship Seminar courses (FOR 591A and FOR 591B or LARCH 510-2), and 8 credits of Watershed Stewardship Practicum I and II courses (FOR 570 and FOR 571, or LARCH 540.2 and LARCH 550.2). Breadth courses will consist of 3 graduate credits of course work from each of four subject matter areas: (1) water resources science; (2) social science, public policy and economics, (3) humanities, and (4) communications and design. In the watershed stewardship practicum course students work in teams with community, government, and business leaders to analyze and understand natural resources problems and creatively synthesize appropriate solutions in the form of a written watershed management plan.

A representative pattern of scheduling for the Graduate Option in Watershed Stewardship in addition to a student's other degree requirements is:
Joint Degree Programs between The Pennsylvania State University Dickinson School of Law (J.D.) and the School of Forest Resources (M.S., Ph.D.)

Joint Degree Program. The Pennsylvania State University Dickinson School of Law (DSL) and the School of Forest Resources (SFR) will offer coordinated programs of study leading to the degrees of Juris Doctor (J.D.) and a Master of Science (M.S.), or a Doctor of Philosophy (Ph.D.) in Forest Resources or Wildlife and Fisheries Sciences. The SFR programs are interdisciplinary.

Admissions. In order to be admitted to the program, students may a) first be admitted and enrolled in either SFR or DSL, and be subsequently admitted to Fall Semester

</table>

A list of acceptable breadth courses from each category is provided in the Graduate Option in Watershed Stewardship Handbook. Students will be allowed to petition to the Center for Watershed Stewardship to substitute higher level or equivalent courses in a major field to suit their specific backgrounds and goals. Courses taken for the Graduate Option in Watershed Stewardship may be used to satisfy other equivalent (400- or 500-level) degree requirements with concurrence of adviser and graduate committee. The graduate committee for a student enrolled in the Option in Watershed Stewardship must include a faculty representative from the Center for Watershed Stewardship.

Students enrolled in M.S., or Ph.D. degree programs within the School of Forest Resources and other participating programs may apply to participate in the Graduate Option in Watershed Stewardship.

Other Relevant Information
Each entering student receives individual guidance from an adviser, and later from his or her committee, in designing a program of studies and research based on his or her original plans. The student is responsible for conforming to all requirements summarized in the “Graduate Studies Handbook” of the School of Forest Resources, and for completing the degree program within a reasonable time, i.e., two years for a master's degree or three years for a Ph.D.

Student Aid
In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the Student Aid section of the Graduate Bulletin, the following award typically has been available to graduate students in this program:

FOREST RESOURCES: JESSE ROSSITER RAPP MEMORIAL SCHOLARSHIP
--Available to graduate students. Apply to the School of Forest Resources’ Scholarships, Loans, and Awards Committee.

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

FORESTRY (FOR) course list
See also Wildlife and Fisheries Science.
WOOD PRODUCTS (WP) course list

Joint Degree Programs between The Pennsylvania State University Dickinson School of Law (J.D.) and the School of Forest Resources (M.S., Ph.D.)

Joint Degree Program. The Pennsylvania State University Dickinson School of Law (DSL) and the School of Forest Resources (SFR) will offer coordinated programs of study leading to the degrees of Juris Doctor (J.D.) and a Master of Science (M.S.), or a Doctor of Philosophy (Ph.D.) in Forest Resources or Wildlife and Fisheries Sciences. The SFR programs are interdisciplinary.

Admissions. In order to be admitted to the program, students may a) first be admitted and enrolled in either SFR or DSL, and be subsequently admitted to the other program, or b) be admitted to the joint degree program prior to commencing studies at Pennsylvania State University. Credits earned in the SFR program before admission to DSL cannot, however, be credited to the J.D. degree. Each program will make a separate admission decision. Students admitted to both programs will be admitted as joint degree candidates. Applications for transfer into the joint degree program from another law school or forestry/natural resources program at another University will be considered on a case-by-case basis.

Admission Requirements

DSL A bachelor's or equivalent degree from an accredited college is a prerequisite for admission. However, there is no standard prescribed undergraduate curriculum. An applicant should have acquired significant oral, and written communications skills before entering law school. The following are required of applicants: a completed application form for DSL; taking of the Law School Admissions Test (LSAT); completion of an LSDAS report; a one-page personal statement; employment record since high school; and two recommendations.

School of Forest Resources: A Bachelor's or equivalent degree from a regionally accredited college is a prerequisite for admission to a master's degree program, with a cumulative grade point average of 2.75 and junior-senior average of 3.0, based on a maximum 4.0 system. The following are also required of applicants to the joint degree program: taking of the Graduate Record Examination (GRE) or the LSAT; an official undergraduate transcript or transcripts; a personal statement; employment record since high school; and three recommendations. There is no prescribed undergraduate curriculum, and, because of the diversity of programs in the School, professional preparation may vary considerably. As a guide, SFR suggests having 8 credit hours in chemistry and/or physics; 12 in calculus, statistics, and/or computer science; 8 in biology, botany, and/or zoology; 12 in writing and speaking; 12 in economics, social sciences, and/or humanities; and 18 in forest science, wildlife and fisheries science, and/or wood products. Completed applications showing that a candidate is qualified for DSL will be forwarded to potential faculty advisers in SFR, and admission of otherwise qualified candidates will depend upon the willingness of a faculty member to act as an adviser. Applicants are advised to contact potential advisers before applying and should contact the SFR liaison (the Goddard Chair), as well as the SFR Assistant Director of Graduate Studies, to identify potential advisers.

Admission to the Ph.D. program requires evidence of research ability, e.g., a master's degree thesis, paper, or equivalent publication and a grade point average of 3.3 or higher in graduate studies work, exclusive of thesis and special problem courses. Baccalaureate degree students graduating from an honors program with a required thesis, or who have authored a refereed publication, may be considered for admittance without a master's degree.

Residency: For master's programs, 5 semesters' residence is required at the Law School and 3 semesters' residence at the SFR at University Park, although additional time may be required to complete the M.S. thesis requirements. For Ph.D. programs, the same minimum number of semesters will be required, as well as the additional time as required to complete additional course work and a dissertation. In addition, Ph.D. candidates must arrange the sequence of seminars such that they are in residence at University Park as a full time student for at least two semesters in a single 12-month period. Although a student will normally take all courses at the campus where the student is in residence, a student may take up to one course (three credit hours) per semester at the Pennsylvania State University.
The respective liaisons for DSL and SFR shall be as follows: The Department and Faculty liaison for DSL shall be the Associate Dean for Academic Affairs and the student adviser will be the Director of the Agricultural Law Center or such other faculty member(s) as may be designated by the Dean. The liaison for SFR for the Joint Degree Program and the student contact for inquiries regarding the Joint Degree Program shall be the then current holder of the Maurice K. Goddard Chair in Forestry and Environmental Resources Conservation, or the Director of SFR when there is no current appointee to the Goddard Chair.

Interprogram Transfer of Credits

J.D. A maximum of 12 credits for SFR course work may be transferred for credit toward the J.D. degree at DSL. Students must obtain a grade satisfactory to DSL for the course work to be credited toward the J.D. degree. What courses may qualify for credit shall be determined by the DSL liaison. Because of the interdisciplinary nature of many SFR degrees, courses from other Departments and Colleges are credited towards an SFR degree with the approval of the SFR committee (e.g. courses in Economics, Agricultural Economics, Agricultural and Extension, Agronomy, Entomology, Geosciences, Landscape Architecture, Leisure Studies, Meteorology, Plant Pathology, Soil Science, EPC) and credits of these courses will be treated as SFR courses (i.e. may be credited to the DSL program with DSL approval, subject to the 12-credit limit).

SFR Degrees: The SFR programs are interdisciplinary programs and typically credits from other Departments and Colleges may be credited. What courses may be credited will be determined by the student's SFR committee. Normally, a maximum of 12 credits of DSL course work will be counted for credit toward the minimum requirements for an SFR Master's degree, subject to approval by the student's SFR committee.

Sequence. The sequence of courses will be determined by the students and their advisers. Generally, however, students will complete the first year of the DSL program before beginning the SFR program. Thereafter, students may concurrently enroll in courses in the DSL and SFR programs, provided that they abide by the requirements of each program. The ordinary expectation will be that students will spend entire semesters at one location or the other.

Recommended Program of Study and Advising. All students in the program will have two advisers, one from DSL and one from SFR (the committee chair). Periodic interaction between the two advisers will be encouraged. A program of study will be developed for each student taking into account the fact that some courses at both locations are offered on a rotating or intermittent basis. Many courses are offered every year, but some are offered every two or three years. Advisers will have available a list of projected relevant offerings in order to work with the student on an individualized program of study. The standard committee structure will apply to the SFR programs.

Tuition. Students will be charged the applicable DSL tuition to cover the J.D. program and the applicable SFR tuition to cover the SFR degree program. The DSL tuition will be paid for the semesters that the student is in residence at DSL and the SFR tuition will be paid for the semesters that the student is in residence at University Park. A student may take up to one course (3 credit hours) per semester at the campus where the student is not residence without, any change in tuition, but must pay additional tuition to the nonresidential campus if he or she wishes to take additional course work at that campus during that semester.*

Financial Aid and Assistantships. Decisions on financial aid and assistantships will be made by each school according to that school's procedures. Generally, SFR assistantships and financial aid will not apply to time spent at DSL.

Fulfillment of Degree Requirements and Graduation. A student in the program may complete the requirements for one of the degrees and be awarded that degree prior to completing all the requirements for the other degree, provided, however, that the student shall have successfully completed at least two semesters of work towards the other degree. All courses in one program that will count toward meeting the requirements of the other program must be completed before award of either degree. Students will be required to fulfill all requirements for each degree in order to be awarded that degree, subject to the interprogram transfer of credits. With respect to SFR's requirement for a thesis or paper, work done while at DSL under the supervision of a DSL faculty member may be appropriate for incorporation into the thesis or paper with the approval of the SFR committee (in such cases, the committee should consider whether credits afforded such work will be subject to the 12-credit maximum for interprogram transfers described in paragraph 6(b) and the DSL faculty member should be a member of the committee).

*After taking comprehensive examinations, a Ph.D. student must pay tuition for all courses taken at any campus where the Ph.D. student is not registered.

Degrees Conferred:
Ph.D., M.A.

The Graduate Faculty

- J.-Marc Authier, Ph.D. (Southern California) Associate Professor of French and Applied Linguistics
- Barbara Cullock, Ph.D. (Delaware) Professor of French and Linguistics
- Christine Clark-Evans, Ph.D. (Bryn Mawr) Associate Professor of French and Women's Studies
- Meredith C. Doran, Ph.D. (Cornell) Assistant Professor of French and Applied Linguistics
- Kathryn M. Grossman, Ph.D. (Yale) Professor of French
- Thomas A. Hale, Ph.D. (Rochester) Edwin Erle Sparks Professor of African, French, and Comparative Literature
- Celeste Kinginger, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of French and Applied Linguistics
- Norris J. Lacy, Ph.D. (Indiana) Edwin Erle Sparks Professor of French and Medieval Studies
- Vera Mark, Ph.D. (Texas, Austin) Assistant Professor of French and Linguistics
- Benedicte Monicat, Ph.D. (Maryland) Professor of French and Women's Studies
- Lisa Reed, Ph.D. (Université d'Ottawa) Associate Professor of French and Linguistics
- Willa Z. Silverman, Ph.D. (New York) Professor of French and Jewish Studies
- Allan Stokel, Ph.D. (SUNY, Buffalo) Professor of French and Comparative Literature
- Jean-Claude Vuillemin, Ph.D. (Michigan State) Professor of French
- Monique Yaari, Ph.D. (Cincinnati) Associate Professor of French

This program offers training in French literature and civilization.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are generally required of all students educated (high school and college) in the continental United States. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Minimum qualifications for admission typically include a B.A. in French or the equivalent, a minimum of 3.20 grade-point average (on a 4.0 scale), and the ability to speak and write in both French and English (a speech sample demonstrating the applicant’s ability to speak extemporaneously and coherently about his/her study and career goals in French for anglophones, in English for francophones, and in French and English for speakers of other foreign languages is required). A written text on a literary or cultural topic also must be submitted. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.20 GPA may be made for students with special backgrounds, abilities, and interests.

Master's Degree Requirements

Candidates for the master's degree in French complete a minimum of ten 3-credit graduate-level courses, plus a master's paper or a minimum of nine 3-credit courses, plus a thesis. A reading knowledge of a second foreign language plus oral and written examinations also are required. All candidates take FR 571 Introduction to Criticism, FR 502 Introduction to French Linguistics, FR 580 Approaches to French Civilization, and FR 581 Theory and Techniques of Teaching French. In addition to the four required courses designated here, all candidates take three 3-credit courses in French literature, plus three 3-credit elective courses. At least one elective course should be in the area of projected specialization at the Ph.D. level. The M.A. degree (or equivalent) is normally a prerequisite to doctoral candidacy.

Candidates for the Women's Studies and French dual-title master's degree complete a minimum 30 credits plus a master's paper. All candidates take FR 502 Introduction to French, FR 580 Approaches to French Civilization, FR 581 Theory and Techniques of Teaching French, FR 571 French Literary Theory and Criticism, WMNST 501 Feminist Perspectives in Research and Teaching, WMNST 502 Global Feminism, WMNST 507 Feminist Theory, and 9 credits in literature (6 of those credits in Women's Studies-approved courses).

Doctoral Degree Requirements

The Ph.D. degree prepares candidates for careers in teaching and research at the college or university level. Between 30 and 36 credits beyond the M.A. in French (or equivalent) is required in graduate course work. Credits must be distributed in one of two areas of specialization: civilization or literature. Doctoral candidates must demonstrate either an advanced knowledge of one foreign language other than French or a reading ability of two foreign languages other than French (equivalent to the 12-credit level). All doctoral students must pass a candidacy examination, a comprehensive written and oral examination, and a final oral defense.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

*FR 121G. FUNDAMENTALS OF READING FRENCH
*FR 122G. PRACTICE IN READING FRENCH

*No graduate credit is given for this course.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

107 Whitmore Laboratory
814-863-6758

Degree Conferred:
Master of Professional Studies in Forensic Science

The Graduate Faculty

- Mitchell M. Holland, Ph.D. (Maryland, College Park) Associate Professor of Biochemistry and Molecular Biology
- Ke Chung Kim, Ph.D. (Minnesota) Professor of Entomology
- John H. Kramer, Ph.D. (Iowa) Professor of Sociology, and Crime, Law, and Justice
- Kateryna Makova, Ph.D. (Texas Tech) Assistant Professor of Biology
- George R. Milner, Ph.D. (Northwestern) Professor of Anthropology
- Robert B. Mitchell, Ph.D. (Penn State) Professor of Biology
- Kevin R. Murphy, Ph.D. (Penn State) Department Head, Professor of Psychology
- Stephan C. Schuster, Ph.D. (University of Munich) Associate Professor of Biochemistry and Molecular Biology
- Ayusman Sen, Ph.D. (Chicago) Professor of Chemistry
- Robert C. Shaler, Ph.D. (Penn State) Associate Professor of Anthropology
- Mark D. Shriver, Ph.D. (Texas) Associate Professor of Anthropology
- Daniel G. Sykes, Ph.D. (Alberta) Lecturer, Department of Chemistry

The Master of Professional Studies (MPS) in Forensic Science is an inter-college degree program housed in the Eberly College of Science and is offered through a collaboration of the Departments of Anthropology, Biochemistry and Molecular Biology, Biology, Chemistry, Entomology, Psychology, and Sociology. The program is offered by Penn State graduate faculty members, with enrichment by mentors from the academic faculty, public crime laboratories, and private forensic laboratories. The curriculum is designed to provide students with innovative, hands-on, and multidisciplinary learning approaches to educate and train them in crime scene investigation, the science behind forensics, courtroom proceedings, and the ethical and social issues that they will be exposed to when they join the forensic community. In addition, the program will develop teamwork and communication skills, which will be important when working actual cases in a crime laboratory.

Admission Requirements and the Application Process

Applications will be considered in accordance with the requirements of the Graduate School as described in the GENERAL INFORMATION section of the Graduate Bulletin. The MPS in Forensic Science program is appropriate for students with a baccalaureate degree in the biological sciences, chemistry, or a related field of study. Applicants for the MPS program are required to have a minimum cumulative GPA of 3.00 (on a 4.00 scale) in their undergraduate degree. In addition, each applicant is asked to provide a personal statement of interests and objectives, as well as two letters of reference. Letters of reference can be submitted by the student's undergraduate advisor, research advisor, and/or an instructor for an upper level course taken as part of their major. An applicant may be asked to go through an interview process conducted by members of the forensic science faculty. Admission to the program is based upon a thorough review of all applicant qualifications, and the best-qualified applicants will be accepted up to the number of spaces available for new students.

Applicants are referred to the program web site for guidance on how to submit their applications, the deadline for submitting applications, and when decisions on acceptance into the program will be announced: www.forensics.psu.edu.

Degree Requirements

A minimum of 30 graduate credits is required for completion of the program, at least 18 credits from courses at the 500 and 800-level. Students are required to take 16 credits from the core courses listed below. Additional credits are from elective courses (which are determined based on interest and career track). FRNSC 801 will serve as the capstone experience for completion of the MPS degree in Forensic Science.

Core Courses (16 credits)

FORENSIC SCIENCE (FRNSC)
- 500. Principles of CSI and Criminalistics I (6)
- 501. Criminalistics II (4)
- 541. Forensic Seminar Series (1)
- 561. Ethics in Forensic Science (1)
- 801. Criminalistics III (4)

Electives (Select at least 14 credits)

A minimum of 30 graduate credits will be required for completion of the program, with at least 18 credits from courses at the 500 and 800-level. The elective courses are chosen in consultation with the student's advisor from offerings in various academic departments based on the student's interest and career objectives to provide interdisciplinary breadth and perspective. Some examples are:

ANTHROPOLOGY (ANTH)
- 411. Skeletal Forensic Anthropology (3)
- 413. Molecular Forensic Anthropology (3)

BIOLOGY (BIOL)
- 422. Advanced Genetics (3)
- 505. Statistical Methods in Evolutionary Genetics (3)
- 514. Topics in Systematics and Evolution (2)

BIOCHEMISTRY AND MOLECULAR BIOLOGY (B M B)
- 400. Molecular Biology of the Gene (3)
- 401. General Biochemistry (2)

BIOCHEMISTRY, MICROBIOLOGY, AND MOLECULAR BIOLOGY (BMMB)

The Pennsylvania State University
597A. Concepts in Biomedical Sciences (5)

CHEMISTRY (CHEM)

- 427. Forensic Chemistry (4)
- 525. Analytical Separations (3)
- 526. Spectroscopic Analysis (3)

CRIME, LAW AND JUSTICE (CLJ)

- 501. Criminal Justice Organizations and Institutions (3)
- 585. Law Enforcement Process and Policy (3)

ENTOMOLOGY (ENT)

- 412. Insect Taxonomy (3)

FORENSIC SCIENCE (FRNSC)

- 421. Forensic Molecular Biology (3)
- 821. Forensic Molecular Biology II (4)
- 831. Forensic Chemistry II (3)
- 832. Forensic Drug Chemistry (3)
- 833. Forensic Toxicology (3)
- 894. Research Projects in Forensic Science (1-12)
- 895. Internship (1-6)

INTEGRATIVE BIOSCIENCES (IBIOS)

- 593. Molecular Biology Laboratory (3)

NURSING (NURS)

- 409. Introduction to Forensic Nursing (3)

PHARMACOLOGY (PHARM)

- 501. Pharmacology (4)

PSYCHOLOGY (PSYCH)

- 464. Behavior Genetics (3)
- 470. Abnormal Psychology (3)
- 445. Forensic Psychology (3)

SOCIOLOGY (SOC)

- 413. Advanced Criminological Theory (3)
- 512. Criminological Theories (3)
- 515. Research Methods in Criminology and Deviance (3)

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Kenneth M. Weiss, Ph.D. (Michigan) Evan Pugh Professor of Anthropology and Genetics
- John W. Wills, Ph.D. (Tennessee, Knoxville) Professor of Microbiology and Immunology (Hershey)
- Jin-Ming Yang, Ph.D. (Shanghai Medical, China) Professor of Pharmacology (Hershey)
- Lisa C. Zagon, Ph.D. (Colorado) Professor of Neuroscience and Anatomy (Hershey)
- Samuel Shao-Min Zhang, Ph.D. (Tokyo, Japan) Assistant Professor of Neural and Behavioral Science (Hershey)
- Jiuye Zhu, Ph.D. (Dartmouth Medical School) Assistant Professor of Cellular and Molecular Physiology (Hershey)

The Intercollege Graduate Program in Genetics is designed to prepare graduates for rapidly expanding opportunities in genetics in academic institutions, biotechnology and pharmaceutical companies, private research institutes, governmental research laboratories, etc. The program includes faculty from eighteen departments in the Eberly College of Science and the Colleges of Agricultural Sciences, Health and Human Development, and the Liberal Arts at the University Park campus and the Penn State College of Medicine at The Milton S. Hershey Medical Center. Beginning and advanced graduate-level courses are taught by full-time faculty members in their own areas of specialization. Fields available for study include molecular, biochemical, physiological, cellular, developmental, pharmacological, genomics, bioinformatics, population, and evolutionary genetics; also applications in recombinant DNA technology, genetic engineering, breeding plants or animals, and genetic counseling of humans. Please see the list of faculty on the Web site www.genetics.psu.edu.

For the full range of areas represented.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Only under exceptional circumstances will an applicant be considered without these scores. In addition, applicants should have a cumulative undergraduate grade-point average of at least 3.0 and appropriate courses in biology (including genetics, organic chemistry or biochemistry), statistics, other sciences, and communications. The application must include three letters of reference and a statement describing and explaining interests in genetics, types of organism and research preferred, and goals during and after graduate studies.

All application materials should be submitted by January 31 for the best chance of admission and financial aid. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Master's Degree Requirements

The master's degree program can serve as an alternative for students who, for any number of reasons, do not proceed to the Ph.D. A committee appointed for each student, with the approval of the program chair, determines specific courses, communication skills, and research acceptable for satisfying M.S. degree requirements. Applicants must meet the M.S. degree requirements, as specified by the Graduate School in the Graduate Bulletin. In addition, specific genetics course requirements include 12 credits selected from a list of approved genetics courses, 3 credits in statistics, and 2 credits per year in genetics colloquium. A thesis is required of all candidates for the M.S. degree.

Doctoral Degree Requirements

The student's Ph.D. committee, appointed after a written and oral candidacy examination is passed, determines specific requirements for courses and research, and administers the comprehensive and final examinations. The Graduate School requires no specified number of credits for the attainment of the doctorate. However, the Genetics program requires 15 credits in approved genetics courses, 3 credits in statistics, and 2 credits per year in genetics colloquium. The requirement in communication and foreign language skills is the same as that of the thesis adviser's department or program. All Ph.D. students are required to prepare and formally defend a thesis involving independent research.

Other Relevant Information

Because the selection of the faculty adviser is one of the most important decisions that each student will make during their graduate career, we offer a rotation program to allow students to do three laboratory rotations with different faculty during the first semester. At the end of the first semester, students choose their doctoral adviser in consultation with the faculty adviser and chair of the Genetics program. Although most students accepted into the Genetics graduate program are admitted to the rotation program, some students may be admitted to receive training by a specific faculty member. All admissions must be approved by the IGDP Genetics Admissions Committee.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin. In most participating departments, Genetics applicants are eligible for departmental teaching or research assistantships, and other assistantships supported by grant funds of individual faculty who make these award decisions.

Applicants with a grade-point average above 3.60 and superior GRE scores are encouraged to request fellowship applications from the Graduate School before January 31.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Robert G. Crane, Ph.D. (Colorado) Professor of Geography
- Lorraine Dowler, Ph.D. (Syracuse) Associate Professor of Geography and Women's Studies
- Roger M. Downs, Ph.D. (Bristol) Professor of Geography
- William Easterling, Ph.D. (North Carolina) Dean; Professor of Geography
- Rodney A. Erickson, Ph.D. (Washington) Executive Vice President and Provost
- Amy K. Glasmeier, Ph.D. (California, Berkeley) Professor of Geography
- Donna L. Holdsworth, Ph.D. (British Columbia) Professor of Geography
- Brian King, Ph.D. (Colorado) Assistant Professor of Geography
- Alexander Klippel, Ph.D. (Bremen, Germany) Assistant Professor of Geography
- C. Gregory Knight, Ph.D. (Minnesota) Professor of Geography
- Derrick J. Lampkin, Ph.D. (Arizona) Assistant Professor of Geography
- B. Ikorolajeh Logan, Ph.D. (California, Los Angeles) Professor of Geography
- Alan M. MacEachren, Ph.D. (Kansas) Professor of Geography
- James McCarthy, Ph.D. (California, Berkeley) Associate Professor of Geography
- Donna J. Pequignet, Ph.D. (SUNY, Buffalo) Professor of Geography
- Erica Smithwick, Ph.D. (Oregon State) Assistant Professor of Geography
- Alan H. Taylor, Ph.D. (Colorado) Professor of Geography
- Petra Tschakert, Ph.D. (Arizona) Assistant Professor of Geography
- Melissa Wright, Ph.D. (Johns Hopkins) Associate Professor of Geography
- Lakshman S. Yapa, Ph.D. (Syracuse) Professor of Geography
- Brenton M. Yarnal, Ph.D. (Simon Fraser) Associate Head; Professor of Geography
- Karl S. Zimmerer, Ph.D. (California, Berkeley) Head of the Department; Professor of Geography

Affiliated Faculty

- Guoray Cai, Ph.D. (Pittsburgh) Associate Professor of Information Sciences and Technology, and Geography
- Susan W. Friedman, Ph.D. (Toronto) Adjunct Assistant Professor of Geography
- Stephen Matthews, Ph.D. (U of Wales) Associate Professor of Demography
- Douglas Miller, Ph.D. (Penn State) Associate Professor of Geography; Director for Outreach, Earth and Mineral Sciences Environment Institute
- Adam Rome, Ph.D. (Kansas) Associate Professor of History

Faculty Emeriti

- Ronald F. Aber, Ph.D. (Minnesota) Professor Emeritus of Geography
- Peirce F. Lewis, Ph.D. (Michigan) Professor Emeritus of Geography
- Frederick L. Wernstedt, Ph.D. (California, Los Angeles) Professor Emeritus of Geography
- Wilbur Zelinsky, Ph.D. (California, Berkeley) Professor Emeritus of Geography

The faculty encourages graduate students to arrange courses of study appropriate to their individual needs and aspirations. Programs in Geography may be directed toward a career in public service, teaching and research, private industry, or one of the many other vocational opportunities open to geographers. Students typically concentrate their study on topics that fall within the special skills and interests of the faculty. Current specialties include behavioral geography; biogeography; cartography; climatology; cultural geography; feminist geography; geographic visualization; historical geography; human dimensions of global change; nature and society; political geography; population geography; regional economic development and industrial location; remote sensing; and urban geography.

The M.S. program is broadly based. It is designed to provide beginning graduate students with basic training in systematic fields, geographical theory, and research techniques. Study at the Ph.D. level is also broad in the first year, then becomes more specialized.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission, as well as a personal statement. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course work in geography or a related discipline will be considered for admission to the M.S. program. Applicants with master's degrees from high-quality graduate programs in geography will be considered for admission to the doctoral program. The best-qualified applicants will be admitted up to the number of places that are available for new students. All students must have or must acquire a broad competence in physical geography, human geography, representation methods, and analysis methods (qualitative or quantitative).

Baccalaureate students must earn a master's degree before they will be considered for admission to the doctoral program.

Master's Degree Requirements

The M.S. degree may be earned by completing a thesis or two papers. The thesis option requires completion of at least 30 graduate credits. If the two-paper option is elected, the candidate must earn 35 credits of graduate-level work. The master's papers are usually expanded versions of course or seminar papers that are of sufficiently high quality that they can be submitted to scholarly journals. At least one of the papers offered to fulfill the M.S. papers requirement must have been written in connection with a departmental course or seminar.

All M.S. students are required to enroll in GEOG 500 Introduction to Geographic Research (3 credits), GEOG 502 Research Scholarship in Geography (3 credits), and at least 3 credits of GEOG 501A, B, C, or D Research Perspectives (1 credit each) during their first year of residence. All M.S. students are required to complete at least one seminar at the 500 level. Supporting courses are chosen in consultation with an entrance committee (in year one) or the adviser (in subsequent years).

The Pennsylvania State University
Doctoral Degree Requirements

There is no fixed number of credits; courses are prescribed according to the student's prior experience. The Graduate School's communication and foreign language requirement for the Ph.D. degree shall be satisfied in a manner approved by the candidate's doctoral committee.

All doctoral students are required to enroll in GEOG 500 Introduction to Geographic Research (3 credits) and GEOG 502 Research Scholarship in Geography (3 credits) during their first year of residence.

Other Relevant Information

Penn State's graduate program in Geography works with incoming students to design programs tailored to their specific interests and needs. Thus there are few formal requirements and a maximum of opportunities for students to pursue their own interests under the guidance of the faculty. Each student's work is supervised by his or her academic adviser and by a committee consisting of two additional members of the graduate faculty for M.S. students and three or four additional members for doctoral students.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the Student Aid section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Arthur W. Rose, Ph.D. (Cal. Tech.) Professor Emeritus of Geochemistry
- Rudy L. Slingerland, Ph.D. (Penn State) Professor of Geology
- Barry Voight, Ph.D. (Columbia) Professor of Geology
- William B. White, Ph.D. (Penn State) Professor Emeritus of Geochemistry
- Peter Wilf, Ph.D. (Pennsylvania) Assistant Professor of Geosciences

M.S. and Ph.D. Degrees

The Department of Geosciences offers M.S. and Ph.D. degree programs that provide students with a broad background in any of the major areas of geological sciences and intensive research experiences culminating in the preparation of a formal thesis. The goal of the programs is to prepare students for scientific careers in academia, government, or industry. A wide range of faculty interests and exceptional laboratory and other support facilities provide an extensive variety of areas of specialization in which students may choose their course work and research topics, which include: aqueous geochemistry, chemistry and physics of rocks and mineral, geodynamics, global change and earth history, sedimentary geology and paleobiology, solid earth and applied geophysics, surficial processes. A complete listing can be found at www.geosc.psu.edu.

The research of faculty and students is facilitated through: the Biogeochemical Research Initiative for Education (BRIE, an NSF-sponsored graduate program in microbial biogeochemistry), the Petroleum Geosystems Initiative (an industry-sponsored, team-based M.S. program) linking the Department of Geosciences and the Department of Energy and Geo-Environmental Engineering and the Penn State Astrobiology Research Center (PSARC, an NSF-sponsored interdisciplinary program in the origin and evolution of life in the universe, aimed at understanding the connections between the environment and the biota on Earth, especially during the stages of its evolution) as well as the Environment Institute of the College of Earth and Mineral Sciences, including the Earth System Science Center, and the Center for Environmental Chemistry and Geochemistry.

In addition to extensive computing and supercomputing facilities developed in association with the Earth System Science Center, students have access to a wealth of analytical, experimental, and field equipment. State-of-the-art analytical equipment is maintained by the department and the Material Characterization Laboratory. The Department of Geography and the Office for Remote Sensing of Environmental Resources have remote sensing facilities.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are normally required for admission. Exceptions must be approved by the department.

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

For admission, applicants generally are expected to have a bachelor's degree in some branch of the natural or physical sciences, engineering, or mathematics. An applicant also is expected to have completed standard introductory courses in geosciences, chemistry, physics, and mathematics through integral calculus, plus 15 credits of intermediate-level work in one or a combination of these subjects. Greater than minimal preparation in chemistry, geology, biology, mathematics, or physics may be required for particular subdisciplines. Applicants who have taken somewhat less than the indicated minimum in these subjects may be admitted but must make up their deficiencies concurrently with their graduate studies.

Students with special backgrounds, abilities, and interests whose undergraduate grade-point average in courses pertinent to geosciences is below a 3.00 (on a 4.00 scale) will be considered for admission only when there are strong indications that a 3.00 average can be maintained at the graduate level.

The Pennsylvania State University
Students are admitted both to the M.S. and Ph.D. degree programs. A student may work toward a Ph.D. degree without first earning a master's degree. If this option is desired, the student must arrange the scheduling of a candidacy evaluation no later than the end of the third semester of residence at Penn State.

Faculty Advisers

Upon arrival, students will be advised initially by a committee appointed by the associate head for Graduate program and Research. The committee in turn will designate an interim adviser. Before the end of the first academic year of residence, the student is expected to develop specific academic and research interests so that an appropriate permanent academic adviser and research supervisor may be chosen. The academic adviser and research supervisor are usually the same person, except when the research supervisor is not a member of the geosciences graduate faculty. In such a case, a geosciences program faculty member serves as the academic adviser.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the Student Aid section of the Graduate Bulletin. In addition, several graduate fellowships are available for students within the Department of Geosciences.

Programs of study are required to have no more than two years for the M.S. degree and three additional years, or five years total, for the Ph.D. degree. A student transferring to the department with the M.S. degree should plan on four additional years. Financial support from teaching or research assistantships or from fellowships is available to students in good standing, but not awarded beyond these limits except in unusual cases.

Common Degree Requirements

All graduate students in geosciences, including both M.S. and Ph.D. students, are expected to develop breadth in the geosciences, a fundamental and advanced knowledge of their subdiscipline, and skills in the areas of data collection and quantitative analysis. Toward that end, all graduate students must select one of the approved courses in each of the following areas: (1) Geosciences Breadth -- 3-4 credits; (2) Disciplinary Fundamentals -- 3-4 credits; (3) Data Gathering -- 3-4 credits; and (4) Quantitative Analysis -- 3-4 credits.

Prescribed courses (3 credits): GEOSC 500 (3)

Additional Courses

Data Gathering and Interpretation: Select 3 credits from GEOSC 410(3), GEOSC 413W(3), GEOSC 483(3), GEOSC 508(3), GEOSC 558(4), GEOSC 565(3), GEOSC 572(1-2)

Quantitative Analysis: Select 3 credits from E MCH 524A(3), GEOSC 514(3), GEOSC 560(3), GEOSC 561(4), MNG 557(3-6), P N G 425(3); GEOSC 597(3) (either Multivariate Approaches in Geosciences OR Data Analysis in the Earth Sciences)

A current list of approved courses is maintained by the Department's Graduate Program Office in room 507 Deike Building. The list of approved courses may be modified by approval of the Department's Graduate Program Committee.

Additional Master's Degree Requirements

Master's degree students are required to take 30 graduate credits, which include at least 18 credits at the 500 to 600 level. The 12 to 16 common degree credits described above satisfy the Graduate School minimum of at least 12 credits in course work in the major program.

As part of the M.S. program, each student is required to complete a thesis. The thesis must be defended in an oral examination administered by an M.S. committee.

Additional Doctoral Degree Requirements

Admission to Ph.D. candidacy is determined by an oral examination before a candidacy committee. Preparation and defense of two research proposals will serve as one means of assessing the student's ability. At least one of these proposals should represent original work by the student, but the other may be an actual thesis proposal and involve limited initial input from the adviser or others.

Course work in addition to the common degree requirements described above will be selected by the student in consultation with his/her committee. The comprehensive examination is both oral and written. It is administered by the doctoral committee after the student has essentially completed course work and after a foreign language requirement (if required by the committee) is fulfilled. A final oral defense of the thesis is required.

Biogeochemistry Dual-Title Degree Program

Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Students in the Biogeochemistry Dual Title program are required to have two advisers from separate disciplines: one individual serving as a primary adviser in their major degree program and a secondary adviser in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework from an approved list of courses is required. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. A single candidacy examination that includes biogeochemistry will be administered for admission into the student's Ph.D. program, as well as the biogeochemistry dual-title. The structure and timing of this exam will be determined jointly by the dual-title and major program. The student's doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Integrated B.S./M.S. Program in Geosciences

The Department of Geosciences offers an integrated B.S./M.S. Program that is designed to allow academically superior students to obtain both the B.S. and the M.S. degree in Geosciences within 5 years of study. Students who wish to complete the Integrated B.S./M.S. Program in Geosciences must apply for admission to the Graduate School and the Integrated B.S./M.S. program by the end of their junior year.

During the first three years, the student follows the course scheduling of one of the options in Geosciences (see Undergraduate Degree Program Bulletin); however, if a student intends to enter the Integrated B.S./M.S. program, he/she would be encouraged to take, wherever appropriate, upper level classes. By the end of the junior year, the student normally would apply for admission to the program. A decision of acceptance would be made prior to the beginning of the senior year and a M.S. Advising Committee would be appointed. During the senior year, the student would follow the scheduling of the B.S. Geosciences option he/she has selected, with an emphasis on completing 500-level coursework wherever appropriate. During the senior year, the student will start work on a thesis designed to meet the departmental requirements of a M.S. Thesis. During the fifth year, the student will take courses fulfilling the departmental M.S. degree requirements and complete the M.S. Thesis. Undergraduate tuition rates will apply as long as the student is an undergraduate, unless the student receives financial support, for example, an assistantship requiring the payment of graduate tuition.

Admission Requirements

Students who wish to complete the Integrated B.S./M.S. Program in Geosciences must apply for admission to the Graduate School and the Integrated B.S./M.S. program at the by the end of their junior year. Typical test scores of students admitted to the Geosciences Graduate Program are: GPA 3.5 and GRE's Verbal 570, and Quantitative 709. Three letters of recommendation by faculty members for admission to graduate study are required. The applications are reviewed by the Admissions Committee of the Geosciences Graduate Program and acted upon by the Associate Head for Graduate Programs.
Requirements

B.S. Degree Portion: Total B.S. Requirements - 121 Credits
(For details on courses see the Undergraduate Degree Programs Bulletin.)

General Education: 45 Credits
18 of these are included in the REQUIREMENTS FOR THE MAJOR

Requirements for the Major - 94 Credits

Common Requirements for all options - 61 Credits

Prescribed Courses - 61 credits
Additional Courses - 3 Credits
Additional Geosciences Courses - 15 Credits
Supporting Courses and Related Areas - 15 Credits

M.S. Portion: Total M.S. Requirements - 30 Credits

Prescribed Courses: GEOSC 501(1), GEOSC 600(1-15)
Additional Courses - 9 credits
Disciplinary Fundamentals: Select 3 credits from GEOSC 479, GEOSC 481, GEOSC 489, GEOSC 519, GEOSC 533, GEOSC 548, GEOSC 585
Data Gathering: Select 3 credits from GEOSC 413W, GEOSC 483, GEOSC 558, GEOSC 565, GEOSC 572
Additional Geosciences Courses at the 400 and 500 level - 6 Credits
Supporting Areas: 6 Credits of Graduate course work. These courses should be related to the thesis work of the student.
If a student has accumulated more than 121 Credits as an undergraduate student, 9 credits of 400- or 500-level class credits can be transferred to the MS program, provided these courses were not used to fulfill BS requirements.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

GEOSCIENCES (GEOSC) course list

NOTE: GEOSC 439, GEOSC 470W, GEOSC 472A, GEOSC 472B includes from one to several field trips for which an additional charge will be made.

Unit A.
(MATSC) POWDER X-RAY DIFFRACTION (1) Compound identification, lattice parameter measurement, and other applications of the powder diffraction method.

Unit B.
(MATSC) TRANSMISSION ELECTRON MICROSCOPY (1) Principles and practice of transmission electron microscope operation. Students undertake individual projects.

Unit C.
(MATSC) SPECTROSCOPY (1) Emission spectrographic analysis of powders and atomic absorption analysis of solutions.

Unit D.
(MATSC) ELECTRON MICROPROBE ANALYSIS (1) Qualitative and quantitative elemental analysis of microvolumes within solids. Emphasis on individual student projects.

Unit E.
(MATSC) SCANNING ELECTRON MICROSCOPY (1) Principles and practice of scanning electron microscope operation. Students undertake individual projects.

Unit G.
(MATSC) ANALYTICAL ELECTRON MICROSCOPY (1) Modern analytical electron microscope techniques: scanning transmission electron microscopy; electron energy loss spectroscopy; energy dispersive analysis of X-rays. Prerequisite: MATSC (GEOSC) 511B.

- Hartmut Heep, Ph.D. (Illinois) Associate Professor of German and Comparative Literature
- Carrie N. Jackson, Ph.D. (Wisconsin, Madison) Associate Professor of German and Linguistics
- Martina Kolb, Ph.D. (Yale) Assistant Professor of German and Comparative Literature
- B. Richard Page, Ph.D. (Wisconsin, Madison) Associate Professor of German and Linguistics
- Daniel Purdy, Ph.D. (Cornell) Associate Professor of German
- Michael Putnam, Ph.D. (Kansas) Assistant Professor of German and Linguistics
- Dennis Schmidt, Ph.D. (Boston College) Professor of Philosophy, German, and Comparative Literature
- Adrian Wanner, Ph.D. (Columbia) Professor of Russian and Comparative Literature

Programs of study with major emphasis upon literature, culture, linguistics, or applied linguistics lead to advanced degrees.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are desirable. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Minimum qualifications for admission include 30 undergraduate credits in German beyond the intermediate level. Provision is made, however, for admission with limited deficiencies. Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. Requirements for admission to the M.Ed. degree program include 18 credits in education and related psychology. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Master's Degree Requirements

The M.A. in German is designed to offer students a general foundation in German culture, language, linguistics, and literature. After completing a small set of core requirements, students may pursue interests from areas that include German and Slavic Languages and Literature. The M.A. degree requires a minimum of 36 credits and is designed as a terminal degree. The following courses are required for the M.A. degree:

- German 510: Introduction to Literary Criticism and Its Application
- German 511: The Teaching of College German
- German 513, 514 or 515: German Phonetics and Phonology, German Syntax, or Introduction to German Linguistics or Introduction to German Applied Linguistics

Practical experience in supervised teaching is required for all graduate degrees. Students who wish to earn a Master's Degree must write a research paper of between thirty and fifty pages on a topic defined in conjunction with a faculty adviser. The research paper should demonstrate mastery of primary and secondary literature, interpretative skills, and academic prose in both German and English. A one-hour oral defense of the paper shall be scheduled two weeks after its formal submission to the adviser. A committee consisting of faculty adviser and two other members of the German program selected by the M.A. candidate shall evaluate the student's knowledge of the subject matter.

Doctoral Degree Requirements

For the Ph.D., a student must complete at least 66 credits (including M.A. credits) of graduate-level work. GER 510, 511, and 513, 514 or 515 are required of all students. Other requirements include: (1) demonstrated reading knowledge of one foreign language in addition to German and English, (2) successful passing of the comprehensive examination with written and oral components, and (3) completed doctoral dissertation. Options are offered in German Literature and Culture and in German Applied Linguistics; see the student handbook for details.

Dual-Title Graduate Degree in German and Language Science

Graduate students with research and educational interests in German and Language Science may apply to German and Language Science Ph.D. Graduate Program. The goal of the dual-title degree German and Language Science graduate program is to enable graduate students from German to acquire the knowledge and skills of their major area of specialization in German, while at the same time gaining the perspective and methods of the Language Sciences.

Admission Requirements

To pursue a dual-title degree under this program, the student must first apply to the Graduate School and be admitted through the Department of Germanic and Slavic Languages and Literatures (see below for admission requirements for the Graduate Program in German). Upon admission to the German Program and with a recommendation from a Language Science program faculty member in the Department of Germanic and Slavic Languages and Literatures, the student's application will be forwarded to a committee that will include the Director of the Linguistics Program, one of the Co-Directors of the Center for Language Science, and a third elected faculty member within the Center for Language Science. All three committee members will be affiliated with the Program in Linguistics. Upon the recommendation of this committee, the student will be admitted to the dual-title degree program in Language Science.

Requirements for the Dual-Title Ph.D. Degree in German and Language Science

The doctoral degree in German and Language Science is awarded only to students who are admitted to the German doctoral program and admitted to the dual-title degree in Language Science. The minimum course requirements for the dual-title Ph.D. degree in German and Language Science, in addition to the German Program requirements, are as follows:

- Language Science proseminar courses (LING 521 and LING 522; 6 credits).
- Research Methods/Statistics (LING 525 or equivalent; 3 credits).
- Theoretical Linguistics (LING 500 or LING 504; 3 credits).
- Cognitive Neuroscience or Psycholinguistics (LING/PSY 520, PSY 511 or equivalent; 3 credits).
- Research internships with two different Language Science faculty mentors (CSD 596, GER 596, LING 596, PSY 596, SPAN 596; 6 credits).

For further information, contact Center for Language Science, 427 Burrowes Building, 814-865-5481.

The Pennsylvania State University
Particular courses may satisfy both the German requirements and those in the Language Science program. Final course selection is determined by the student in consultation with the dual-title program advisors and the major program advisors. Students who already hold a master's degree from another institution may petition to have equivalent course credits accepted.

### Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the **STUDENT AID** section of the *Graduate Bulletin*, the following awards typically have been available to graduate students in this program:

**EXCHANGE FELLOWSHIPS AT CHRISTIAN ALBRECHTS UNIVERSITÄT, KIEL, AND THE PHILLIPS UNIVERSITÄT, MARBURG**—Available to graduate students in German and other fields for a full academic year. Students must have a good command of German.

**WALTER EDWIN THOMPSON AND DR. REGINA BLOCK THOMPSON SCHOLARSHIP FUND**—Thompson Fellowships are available each year for graduate students in the Department of Germanic and Slavic Literatures and Languages. These fellowships can be awarded in addition to other grants or stipends.

### Courses

*GER 001G. ELEMENTARY GERMAN FOR GRADUATE STUDENTS (3)* Designed for students preparing to satisfy language requirements for advanced degrees.

*GER 002G. ELEMENTARY GERMAN FOR GRADUATE STUDENTS (3)* Continuation of GER 001G, with opportunity for reading in special fields.

*No graduate credit is given for this course.*

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Department of Geography, via World Campus

Degrees Conferred:
M.G.I.S.

The Graduate Faculty

Todd Bacastow, Ph.D. (Penn State) Professor of Practice for Geospatial Intelligence
Joseph A. Bishop, Ph.D. (Penn State) Research Associate
Cynthia A. Brewer, Ph.D. (Michigan State) Professor of Geography
Roberts P. Brooks, Ph.D. (UMass, Amherst) Professor of Geography
Mark W. Corson, Ph.D. (South Carolina) Associate Professor of Geography
Robert G. Crane, Ph.D. (Colorado) Professor of Geography
David W. DiBiase, M.S. (Wisconsin-Madison) Senior Lecturer of Geography
Mark Gahegan, Ph.D. (Curtin) Professor of Geography
Peter L. Guth, Ph.D. (MIT) Professor of Geography
Patrick J. Hyaldon, Ph.D. (Oregon State) Associate Professor of Geography
Fritz C. Kessler, Ph.D. (Kansas) Associate Professor of Geography
Alexander Klippel, Ph.D. (Bremen, Germany) Assistant Professor of Geography
C. Gregory Knight, Ph.D. (Minnesota) Professor of Geography
Alfred P. MacEachren, Ph.D. (Kansas) Professor of Geography
Douglas A. Miller, Ph.D. (Penn State) Associate Professor of Geography
Anthony C. Robinson, Ph.D. (Penn State) Research Associate
Adena B. Schultz, M.S. (Penn State) Senior Lecturer of Geography
Alan H. Taylor, Ph.D. (Colorado) Professor of Geography
Ian Turton, Ph.D. (Edinburgh) Senior Research Associate, Geography
Denise H. Wardrop, Ph.D. (Penn State) Associate Professor of Geography
Brenton M. Yarnall, Ph.D. (Simon Fraser) Professor of Geography

The Master of Geographic Information Systems (M.G.I.S.) degree is awarded to students who demonstrate mastery of the technical competencies and leadership skills required to design, manage, and use geographic information technologies successfully in a wide range of professional fields. The MGIS program is intended specifically for working professionals who are able to participate only on a part-time basis and at a distance. It is offered exclusively through World Campus. The MGIS complements, but does not replace, the Department of Geography’s more research-focused Master of Science program, which is offered at the University Park campus. Students who expect to pursue the Ph.D. in Geography should apply for admission to the residential M.S. program.

Admission Requirements

Students who wish to pursue the M.G.I.S. degree must be admitted both to the MGIS program and to Penn State’s Graduate School. The Graduate School requires students to possess any baccalaureate degree from a regionally accredited institution that is substantially equivalent to those required by Penn State. It also requires official TOEFL or IELTS scores for students from countries in which English is not the primary language. Minimum TOEFL scores are 550 for the paper test or 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the Internet-based test (IBT). Applicants with IBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a masters degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Additional requirements imposed by the Department of Geography include:

- Statement of professional experience and goals including documentation of a minimum two years of professional experience, preferably (but not necessarily) related to geographic information technologies. A résumé may be attached as a supplement, but the statement itself should be an essay (two to three pages) that demonstrates the applicant’s verbal communication skills.
- Three letters of recommendation that attest to the applicant’s readiness for graduate study and that he or she has the requisite minimum of two years of professional experience.
- Two official transcripts from each post-secondary institution attended, including the institution that conferred the applicant’s baccalaureate degree (and any graduate degrees, if applicable). Applicants are expected to have earned a grade-point average of 3.0 (or equivalent) or better during their final two years of undergraduate work;
- Official Graduate Records Examination (GRE) score reported directly from the testing center to Penn State. GRE scores are required: however, this requirement may be waived under certain circumstances. Please contact the graduate program directly.

A committee consisting of at least three Geography faculty members, including one faculty member not currently participating in the MGIS program, will meet three times annually to screen applications and identify applicants qualified for admission. Three cohorts of approximately twelve students each will be admitted during three annual admissions cycles. Applicants who are only able to participate part-time and at a distance while maintaining full-time professional responsibilities (and who are therefore effectively excluded from participation in the department’s resident program) will be preferred. The best-qualified applicants will be admitted to the number of spaces that are available for new students. Prior to admission in the MGIS program, students may enroll in MGIS courses as nondegree graduate students. Nondegree graduate students who are subsequently admitted to the MGIS program may count up to 15 credits of course work accumulated in nondegree status toward the M.G.I.S. degree. Applicants for nondegree graduate status must submit transcripts that confirm they have received a baccalaureate degree from an accredited institution under residence and credit conditions substantially equivalent to those required by Penn State. Admission as a nondegree student neither guarantees nor implies subsequent admission to the MGIS degree program. Changing from nondegree status to regular graduate status requires a new admission application.

By Graduate School rules, a maximum of 10 credits of high-quality graduate work completed at a regionally accredited institution may be applied toward the requirements for the M.G.I.S. degree. However, credits earned to complete a previous master’s degree, whether at Penn State or elsewhere, may not be applied to a second master’s degree program at Penn State. Approval to apply any transferred credits toward a degree program must be granted by the student’s academic advisor or program and the Graduate School. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School of Penn State, must be of at least B quality, and must appear on an official graduate transcript of an accredited university.

Degree Requirements

Students earn the M.G.I.S. degree by successfully completing 35 credits of course work, including a supervised independent project. Course requirements include a minimum of 18 credits at the 500 level or above, 6 to 9 credits of which are earned through individual studies (GEGG 596). Students are encouraged to create and maintain personal e-portfolios that chronicle their achievements in the program, outline long-term professional development strategies, and document meaningful interactions among students and faculty members. The independent project demonstrates the student’s ability to apply advanced knowledge and skills related to geographic information systems in a way that makes a substantial contribution to his or her professional work. For most student, the project culminates in a formal public presentation, attended by a member of the graduate faculty associated with the MGIS program, which

The Pennsylvania State University
takes place at an appropriate professional conference (such as annual conferences of the Urban and Regional Information Systems Association, the American Congress on Surveying and Mapping, or ESRI). Alternative arrangements are made for students with special needs or constraints. For example, students who submit written reports of project aims and outcomes for publication in adviser-approved peer-reviewed journals are exempt from the public presentation requirement. Presentations and papers are preceded by dress rehearsals that are open to all students in the program through Web and audio conferencing.

As part of his or her individual studies, every student is expected to contribute a formal peer review of one other student’s rehearsal.

An Advisory Board consisting of accomplished GIS professionals in government and industry, as well as Penn State faculty members in a variety of disciplines who specialize in geographic information science and technology, guides the ongoing development of the MGIS curriculum. Designed for students who are able to participate on only a part-time basis and at a distance, the curriculum is spread over three years; however, students who are able to manage heavier course loads may complete the program in a shorter period of time. Courses are ten weeks in length and require eight to twelve hours of student effort per week. Most courses are offered four times annually, starting in early January, April, July, and October. Most students will complete four courses per year, one course at a time. First-year courses are designed to help students develop the information literacy and technical competencies they need to become knowledgeable and skillful users of desktop geographic information technologies. Second-year courses prepare students for leadership in their organizations with regard to the design, specification, and management of complex geographic information infrastructures. During the third year, students complete electives and an independent study project by which they demonstrate a substantive contribution to their organization as well as the ability to communicate their contribution to a professional audience. Students who successfully complete the Penn State MGIS satisfy the minimum educational achievement required for professional certification by the Geographic Information Systems Certification Institute (www.gisci.org).

Student Aid

Graduate assistantships are not available. Financial aid opportunities for part-time students who participate through the World Campus are discussed at http://worldcampus.psu.edu/StudentServices_FinancialAidOffice.shtml.

PREScribed COURSES

MASTER OF GEOGRAPHIC INFORMATION SYSTEMS

GEOGRAPHY (GEOG)

- GE 482. The Nature of Geographic Information (2)
- GE 864. Professionalism in GIS&T (2)
- GE 483. Problem-Solving with GIS (3)
- GE 484. GIS Database Development (3)
- GE 583. Geospatial System Analysis and Design (3)
- GE 584. Geospatial Technology Project Management (3)
- GE 586. Geographical Information Analysis (3)
- GE 596. Individual Studies (3)

In lieu of the 8 credits of prescribed introductory courses (GEOG 482 or 864 + 483 + 484) plus 6 additional elective credits, MGIS students may substitute 14 credits associated with courses that comprise the Geospatial Intelligence Option. This option is designed for current or aspiring practitioners in government agencies, businesses, and non-governmental organizations that rely on insights produced through skillful, knowledgeable, and conscientious analysis of diverse geo-referenced data to plan for emergencies, to coordinate responses to natural and human induced disasters, to enforce the law, and to plan and conduct military operations.

GEOSPATIAL INTELLIGENCE OPTION

GEOGRAPHY (GEOG)

- GE 882. Geographic Foundations of Geospatial Intelligence (3)
- GE 883. Remote Sensing for the Geospatial Intelligence Professional (3)
- GE 884. Geographic Information Systems for the Geospatial Intelligence Professional (3)
- GE 885. Advanced Analytic Methods in Geospatial Intelligence (3)
- GE 889. Seminar in Geospatial Intelligence (2)

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Health Administration (H ADM)

Program Home Page
JAMES T. ZIEGENFUSS, JR., Graduate Program Coordinator
School of Public Affairs, Penn State Harrisburg
W-160 Olmsted Building; 717-948-6226

Degree Conferred:
M.H.A.

Graduate Faculty
- Cynthia Mara, Ph.D. (Virginia Tech) Associate Professor of Health Care Administration and Policy
- Goktug Morcol, Ph.D. (Virginia Tech) Associate Professor of Public Administration
- Bing Ran, Ph.D. (Waterloo) Assistant Professor of Public Administration
- Jill S. Rumberger, Ph.D. (Penn State) Assistant Professor of Health Administration
- Triparna Vasavada, Ph.D. (SUNY-Albany) Assistant Professor of Public Administration
- James T. Ziegenfuss, Jr., Ph.D. (Penn/Wharton School) Professor of Management and Health Care Systems

Recognizing that the national health care system is in a period of reform and redesign, the program emphasis involves design/redesign in a 36-credit curriculum. Based on eight core courses defined as the foundation of administration in health care, the degree is designed for part-time professional students already engaged in health administration careers. The mission of the program is to further student knowledge and skills in a continuous learning cycle. Students are expected not only to know the existing health system, but are to develop a capability for design consistent with demands of access to care, management, and control of costs and quality of care delivery.

Part-time students may start the program at the beginning of any semester. They usually take one or two 3-credit courses each semester. Students may also take one or two courses during the summer session to maintain steady progress toward the degree. All Health Administration courses are available during the evening for the convenience of part-time students. A student may complete the M.H.A. on a part-time basis in about two to four years.

Admission Requirements
Applicants must have received their baccalaureate degree from an accredited college or university prior to starting the graduate program. Applicants who are still completing their baccalaureate requirements at the time of the application may be admitted to the Graduate School conditional on the awarding of the baccalaureate degree.

Admission to the MHA program is based on clear suitability for the MHA program as demonstrated by the application as a whole, to include: a completed application, evidence of a bachelor's degree from an accredited college; a statement of career and educational goals; a successful undergraduate record with a grade-point average of 3.00 (with particular attention given to the last two years of undergraduate work); satisfactory scores on the Graduate Record Examination (GRE) or Graduate Management Admission Test (GMAT) are required if the GPA is less than 3.00; three years of work experience; and names of three references willing to provide recommendations.

The GPA requirement may be relaxed if the student has professional experience or other strong evidence suggesting likely success in the MHA program. Some applicants may be accepted on a non-matriculated probationary basis, pending performance at the B (3.00) level over 15 hours of approved credit.

Program Requirements
All undergraduate degrees are acceptable for admission. All students are expected to have had at least an introductory course in statistics and statistical software.

If these introductory knowledge and skill areas have not been completed prior to admission they must be satisfied prior to completion of 12 graduate credits. Reading and introductory courses—for which not graduate credit is given—are available at Penn State Harrisburg. The computer area may be satisfied by completing a 1-credit computer course: P ADM 486 Applied Statistical Package.

The degree requires a minimum of 36 graduate credits, including a 3-credit, faculty-supervised paper. Three credits of 400-level work may be included in the electives. An overall 3.00 (B) grade-point average must be earned in all 400- and 500-level work.

REQUIRED COURSES: 24 credits
- H ADM 539, H ADM 540, H ADM 541, H ADM 542, H ADM 545, P ADM 503, P ADM 506, P ADM 510

ELECTIVE CONCENTRATION: 9 credits
- H ADM 543, H ADM 546, H ADM 548, H ADM 551, H ADM 552, H ADM 597, P ADM 505, P ADM 511, P ADM 512, P ADM 514, P ADM 515, P ADM 516, P ADM 520

CAPSTONE COURSE: 3 credits
- H ADM 594

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

HEALTH ADMINISTRATION (H ADM) course list

DATE LAST REVIEWED BY GRADUATE SCHOOL: 5/26/04
Last updated by Publications: 5/23/11
The graduate degrees in the Department of Health Policy and Administration focus on management, policy, and research in health services, with particular attention to the recurrent problems of cost, quality, and access to health services.

The doctoral program (Ph.D.) is designed to provide advanced knowledge and skills in health services research, with an emphasis track in health policy and economics, health care organizations or population health and demography. The doctorate in H P A prepares students to become independent health services researchers in academic and nonacademic settings.

The Master of Science (M.S.) degree in Health Policy and Administration provides a solid foundation of knowledge and skills in health services research. The M.S. in H P A prepares students for further graduate study toward a doctorate in health services research or related fields or for research and analytic work in academic and nonacademic health services research settings.

The professional Master of Health Administration (M.H.A.) program prepares students for the complexities they will face in managing organizations that plan, finance, and deliver health care. The curriculum emphasizes strategic decision-making, financial management, communication and detailed aspects of the U.S. health care system. These include health law, epidemiology, health insurance, government health-financing programs, ethics, managed care, long-term care, health care technology, marketing, and strategic planning for health services.

The integrated B.S. in Health Policy and Administration/Master of Health Administration (M.H.A.) program allows qualified undergraduate students to earn both degrees in five calendar years of full time academic study. Students completing an integrated B.S./M.H.A. are prepared to advance quickly to positions of leadership in health care organizations.

The M.B.A. program of the Smeal College of Business and the Department of Health Policy and Administration of the College of Health and Human Development offer a concurrent degree program. The M.B.A./M.H.A. graduate will be well-grounded in both business and health management and prepared for positions in hospitals, nursing homes, managed care and health insurance organizations, health care consulting, and pharmaceutical companies, as well as for helping businesses in all sectors understand the unique features of the health care system.

**Doctoral Admission and Degree Requirements**

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Satisfactory scores from either the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) are required for admission; the GRE is preferred. A junior/senior grade-point average of 3.00 or better (on a 4.00 scale) and a well-considered statement of experience and career goals are major criteria for admission. Some work experience in health services is preferred, but not required.

The H P A doctoral curriculum includes study in three substantive areas: (1) core courses in health services organization, delivery, finance and policy; (2) core courses in health services research methods and statistics, and (3) courses and a master’s thesis approved by the thesis advisor. At least 15 credits of the program must be completed in H P A departmental course offerings at the 400- and 500-level. At least 18 credits of the degree must be in 500- and 600-level courses. A 6-credits master’s thesis must be completed as part of the degree requirement.

**M.S. Admission and Degree Requirements**

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Satisfactory scores from either the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) are required for admission; the GRE is preferred. A junior/senior grade-point average of 3.00 or better (on a 4.00 scale) and a well-considered statement of experience and career goals are major criteria for admission. Some work experience in health services is preferred, but not required.

The M.S. curriculum in H P A includes study in three substantive areas: (1) a core set of courses in health services organization, delivery, finance, and policy; (2) core courses in health services research methods and statistics, and (3) courses and a master’s thesis approved by the thesis advisor. At least 15 credits of the program must be completed in H P A departmental course offerings at the 400- and 500-level. At least 18 credits of the degree must be in 500- and 600-level courses. A 6-credits master’s thesis must be completed as part of the degree requirement.

**M.H.A. Admission and Degree Requirements**

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Satisfactory scores from either the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) are required for admission; the GRE is preferred. This requirement will be waived for applicants with five or more years of relevant work experience. A junior/senior grade-point average of 3.00 or better (on a 4.00 scale), a relevant personal statement and three letters of recommendation are necessary. Some work experience in health care is preferred, but not required.

The program can be completed on a full-time basis in 21 months or on a part-time basis or with the aid of technology through the World Campus in 28 months. Requirements for the completion of the M.H.A., include 49 credits with at least 39 credits at the 500- or 600-level. Included in the 49 credits is a residency in a health care setting and a capstone course to demonstrate evidence of analytical ability and synthesis of material.
Integrated B.S. in Health Policy and Administration/Master of Health Administration (M.H.A.) Admission and Degree Requirements

The following credentials will be considered for admission:

- A demonstrated ability to communicate effectively, an advanced level of maturity, and high motivation to pursue a career in the health care field
- Academic references
- Successful completion of 60 undergraduate credits having maintained a cumulative GPA of 3.4 or better

Students admitted to the B.S. in Health Policy and Administration/M.H.A. are able to earn both the B.S. and M.H.A. in five calendar years of full-time academic study.

M.B.A./M.H.A. Concurrent Degree Program Admission and Degree Requirements

Students may apply to be admitted to either the M.H.A. or the M.B.A. program initially. During the initial year in either graduate program, students may apply to complete the concurrent degree program and must meet admission requirements for the other program. See the M.H.A. and M.B.A. degree program descriptions for further admission requirements of each program.

Students complete 88 credits associated with both the M.H.A. and M.B.A. degrees. Included within the required credits is a 10-week integrated residency during a summer. The time required to complete the M.B.A./M.H.A. can be as much as 34 months.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.S. (A master's degree is offered only to persons interested in studying for a doctorate.)

The Graduate Faculty

- David M. Almeida, Ph.D. (Victoria) Associate Professor of Human Development and Family Studies
- Leann Birch, Ph.D. (Michigan) Distinguished Professor of Human Development and Family Studies
- Clancy Blair, Ph.D. (Alabama, Birmingham) Associate Professor of Human Development and Family Studies
- Alan Booth, Ph.D. (Nebraska, Lincoln) Distinguished Professor of Human Development, Sociology, and Demography
- C. Wando M. Bryant, Ph.D. (Texas, Austin) Associate Professor of Human Development and Psychology
- Robert L. Burgess, Ph.D. (Washington, St. Louis) Professor of Human Development
- Linda M. Burton, Ph.D. (Southern California) Professor of Human Development and Sociology
- J. Douglas Coatsworth, Ph.D. (Minnesota) Assistant Professor of Human Development and Family Studies
- Linda Collins, Ph.D. (Southern California) Professor of Human Development and Family Studies
- Sherry Corneal, Ph.D. (Penn State) Associate Professor of Human Development and Family Studies
- Ann C. Couter, Ph.D. (Cornell) Professor of Human Development and Family Studies
- Anthony R. D'Augelli, Ph.D. (Connecticut) Professor of Human Development
- Judith F. Dunn, Ph.D. (Cambridge) Adjunct Professor of Human Development and Family Studies
- Craig Edelbrock, Ph.D. (Oregon State) Professor of Human Development and Family Studies
- David J. Eggebeen, Ph.D. (North Carolina) Associate Professor of Human Development and Family Studies, and Sociology
- Donald H. Ford, Ph.D. (Penn State) Professor Emeritus of Human Development
- Paul A. Gomes, Ph.D. (Iowa) Professor Emeritus of Human Development
- Scott Gest, Ph.D. (Minnesota) Assistant Professor of Human Development and Family Studies
- Mark T. Greenberg, Ph.D. (Virginia) Professor of Human Development and Family Studies and Bennett Chair of Prevention Research
- Bernard G. Guerney, Jr., Ph.D. (Penn State) Professor Emeritus of Human Development and Counseling Psychology
- Louise F. Guernsey, Ph.D. (Penn State) Professor Emerita of Human Development and Family Studies and Counseling Psychology
- Melissa A. Hardy, Ph.D. (Indiana) Distinguished Professor of Human Development and Family Studies, and Sociology; Director, Gerontology Center
- S. Marjorie Hoffer, Ph.D. (Southern California, Los Angeles) Assistant Professor of Human Development and Family Studies
- Kathryn Hood, Ph.D. (Temple) Associate Professor of Human Development and Family Studies
- Rukmalie Jayakody, Ph.D. (Michigan) Associate Professor of Human Development and Family Studies, and Demography
- Eva S. Lefkowitz, Ph.D. (California, Los Angeles) Associate Professor of Human Development and Family Studies
- Eric Loken, Ph.D. (Harvard) Assistant Professor of Human Development and Family Studies
- Jennifer L. Maggs, Ph.D. (Victoria) Associate Professor of Human Development and Family Studies
- Susan M. McHale, Ph.D. (North Carolina) Professor of Human Development and Family Studies
- Gordon K. Nelson, Ph.D. (Wisconsin) Associate Professor of Human Development (Capital College)
- Joan E. O'Brien, Ph.D. (Temple) Associate Professor of Human Development (Abington College)
- Robert Plomin, Ph.D. (Texas) Adjunct Professor of Human Development and Family Studies
- Michael Rovine, Ph.D. (Penn State) Associate Professor of Human Development and Family Studies
- K. W. Washington, Ph.D. (Evan Pugh Professor of Human Development and Psychology
- Rainer Silbereisen, Ph.D. (Jena) Adjunct Professor of Human Development and Family Studies
- Edward Smith, Ph.D. (North Carolina) Senior Research Associate in the College of Health and Human Development
- Edward Smith, Ph.D. (Michigan) Associate Professor of Human Development and Family Studies
- Graham B. Spanier, Ph.D. (Northwestern) Professor of Human Development and Family Studies, Sociology, Demography, and Family and Community Medicine
- Cynthia A. Stifter, Ph.D. (Maryland) Professor of Human Development and Family Studies
- Dena Swanson, Ph.D. (Emory) Assistant Professor of Human Development and Family Studies
- Douglas M. Teti, Ph.D. (Vermont) Professor of Human Development
- Fred W. Vondracek, Ph.D. (Penn State) Professor of Human Development
- Sherry L. Willis, Ph.D. (Texas) Professor of Human Development
- Steven H. Zarit, Ph.D. (Chicago) Professor of Human Development

This interdisciplinary program is one of the graduate programs of the College of Health and Human Development. It is administered through the Department of Human Development and Family Studies. The Human Development and Family Studies graduate program is designed to educate students about research, theory, and methodology related to the study of individuals and families across diverse populations and diverse settings. There is a strong interest in the ways in which social institutions and settings such as day care facilities, schools, neighborhoods, and social policy institutions facilitate (or inhibit) opportunities for development and change for individuals and families. Understanding the characteristics and conditions that place individuals or families at risk for developing problems, designing effective prevention programs to address those risks, and mounting rigorous evaluations of such programs is a growing emphasis in the program. All students, regardless of substantive area, are encouraged to develop strong skills in research methods, a hallmark of our graduate training. Through course work and apprenticeship experiences, students develop an understanding of the program's multidisciplinary life span/life course, and applied orientation. As student's progress through the program, they are expected to develop specialized expertise in two or more of the department's areas of concentration: individual development, family studies, intervention research, and research methods. Further specialization is possible in current and aging, biological base of behavior, child and adolescent development, cognitive development and functioning, family relationships, integrative theories of human development, interpersonal relationships, and social-emotional development and change.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Entering students should have at least 6 credits in the biological and physical sciences; 12 in the social sciences and, depending upon proposed area of emphasis, at least 3 credits in sociology, psychology, and economics. A strong background in developmental and family studies. Students not meeting these requirements may be admitted with limited deficiencies to be made up concurrently with their graduate work.

Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission for fall semester only. Early application is required, and a special application to HD FS must be completed; additional information can be obtained from the professor in charge of Graduate Studies, Professor in charge of: The Pennsylvania State University
Entering students take three required 3-credit courses (Life Span Development, Family Studies, and Intervention Research), four required 3-credit methods courses in Research Methods and Statistics, and 2 credits of a professional development seminar during the first two years. Over time, course work becomes increasingly specialized and tailored to the student’s individual interests. Yearly Plans of Study developed in consultation with the student’s adviser specify course work and apprenticeship experience directed at the student’s emerging scholarly and career interests. For the master’s degree, in addition to the required courses, students must take a total of 12 credits in their substantive field, 6 methodology elective credits, and 6 credits of thesis research. For the doctorate, in addition to the required courses, students take 9 credits in their substantive field and 6 credits of thesis research. Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the Student Aid section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

HUMAN DEVELOPMENT AND FAMILY STUDIES (HD FS) course list

DATE LAST REVIEWED BY GRADUATE SCHOOL: 5/21/04
Last reviewed by Publications: 1/10/11
Human Dimensions of Natural Resources and the Environment (HDNRE)

Co-Chairs, Department of Agricultural Economics and Rural Sociology and Department of Geography

Degrees Conferred:

Students electing the dual-title intercollege program in HDNRE through participating majors may earn a degree with dual-title at both the Ph.D. and M.S./M.A. levels, i.e., Ph.D. in (graduate program name) and Human Dimensions of Natural Resources and the Environment, or M.S./M.A. in (graduate program name) and Human Dimensions of Natural Resources and the Environment.

The following graduate programs offer dual-title degrees in HDNRE: M.A. and Ph.D. in Anthropology and HDNRE; M.S. and Ph.D. in Energy and Mineral Engineering and HDNRE; M.S. and Ph.D. in Forest Resource Management and HDNRE; M.S. and Ph.D. in Geography and HDNRE; M.S. and Ph.D. in Recreation, Park and Tourism Management and HDNRE; and M.S. and Ph.D. in Rural Sociology and HDNRE.

The Graduate Faculty

- Richard B. Alley, Ph.D. (Wisconsin, Madison) Evan Pugh Professor of Geosciences
- Theodore R. Alter, Ph.D. (Michigan State) Professor of Agricultural, Environmental, and Regional Economics
- John C. Becker, J.D. (Dickinson) Professor of Agricultural Economics and Law
- Stephen J. Beckerman, Ph.D. (New Mexico) Associate Professor of Anthropology
- André L. Boehm, Ph.D. (Stanford) Professor of Fuel Science
- Andrew Cole, Ph.D. (Southern Illinois) Assistant Professor of Landscape Architecture
- Caru Bowny, Ph.D. (California, Davis) Assistant Professor of Landscape Architecture
- Kathy Brasier, Ph.D. (Wisconsin) Assistant Professor of Rural Sociology
- Robert G. Crane, Ph.D. (Colorado) Professor of Geography; Director, Alliance for Earth Sciences, Engineering, and Development in Africa
- Duane R. Diefenbach, Ph.D. (Georgia, Athens) Adjunct Assistant Professor; Leader—Wildlife, PaCFWRU
- Srinidhi Echols, Ph.D. (Virginia Tech) Assistant Professor of Landscape Architecture
- Semih Esir, Ph.D. (Penn State) Professor of Energy and Geo-Environmental Engineering
- Jil L. Findies, Ph.D. (Washington State) Distinguished Professor of Agricultural Economics
- James C. Finnell, Ph.D. (Penn State) Professor of Forest Resources
- Leland Glenna, Ph.D. (Missouri) Assistant Professor of Rural Sociology and Science Technology and Society
- Larry Gore, Ph.D. (California, Santa Barbara) Associate Professor of Landscape Architecture
- Allan R. Graefe, Ph.D. (Texas A&M) Associate Professor of Leisure Studies
- Murali Haran, Ph.D. (Minnesota) Assistant Professor of Statistics
- Colleen Hinchliffe, Ph.D. (Cornell) Associate Professor of Rural Sociology
- Nina J. Jablonski, Ph.D. (Pennsylvania) Distinguished Professor of Anthropology
- Jason Kaye, Ph.D. (Colorado State) Assistant Professor of Soils and Biogeochemistry
- Klaus Keil, Ph.D. (Princeton) Associate Professor of Geosciences
- C. Gregory Knight, Ph.D. (Minnesota) Professor of Geography
- Neil P. Korostoff, M.L.A. (Pennsylvania) Associate Professor of Landscape Architecture
- A. L. (Land) (Penn State) Professor of Rural Sociology
- James McCarthy, Ph.D. (California, Berkeley) Assistant Professor of Geography
- Robert McKinstry, J.D., M.F.S. (Yale) Adjunct Professor of Forest Resources
- Douglas Miller, Ph.D. (Penn State) Assistant Professor of Geography; Director for Outreach, Earth and Mineral Sciences Environment Institute
- Timothy Murtha, Ph.D. (Penn State) Assistant Professor of Landscape Architecture
- Wayne L. Myers, Ph.D. (Michigan) Professor of Forest Biometrics
- L. (Lou) (Florida) Associate Professor of Anthropology
- Daniel F. Perkins, Ph.D. (Michigan State) Professor of Agricultural and Extension Education
- Charles Ray, Ph.D. (Texas A&M) Assistant Professor of Wood Products Operations
- James T. San Julian, Ph.D. (Colorado State) Professor of Wildlife Management
- Michael C. Saunders, Ph.D. (Georgia) Professor of Entomology
- Kamini Singha, (Stanford) Assistant Professor of Geosciences
- Arthur Small, (California, Berkeley) Associate Professor of Meteorology
- Sanford Smith, Ph.D. (Penn State) Lecturer in Forest Resources
- Ken Temple, M.L.A. (Queen’s) Associate Professor of Landscape Architecture
- Pat Thomas, Ph.D. (Arizona) Assistant Professor of Geography
- Nancy Tuana, Ph.D. (California, Santa Barbara) DuPont/Class of ‘49 Professor of Philosophy, Humanities, and Women’s Studies; Director, Rock Ethics Institute
- George Vahaviol, Ph.D. (Penn State) Affiliate Associate Professor of Recreation, Park, and Tourism Management; Program Director, Shaver's Creek Center
- Thorsten Wagener, Ph.D. (Imperial College) Assistant Professor of Civil Engineering
- James W. Wood, Ph.D. (Michigan) Professor of Anthropology and Demography
- Melissa Wright, Ph.D. (Johns Hopkins) Associate Professor of Geography and Women’s Studies
- Brenton M. Yarnal, Ph.D. (Simon Fraser) Professor of Geography; Director, Center for Integrated Regional Assessment
- Karl S. Zimmerer, Ph.D. (California, Berkeley) Head and Professor of Geography
- Harry C. Zinn, Ph.D. (Colorado) Associate Professor of Recreation, Park, and Tourism Management

The HDNRE dual-title intercollege degree program is administered by the HDNRE Program Committee. The committee maintains program definition, identifies appropriate faculty and courses, and recommends policies and procedures for its operation. This dual-title intercollege degree program is offered through graduate major programs in four colleges: Agricultural Sciences, Earth and Mineral Sciences, Health and Human Development, and the Liberal Arts. HDNRE enables students to attain and be identified with the content, techniques, applications, methods, and policy implications of an interdisciplinary focus on Human Dimensions of Natural Resources and the Environment, while maintaining a close association with areas of application.

Through participation in HDNRE, student programs of study will emphasize integrated, multidisciplinary approaches designed for improving their understanding about and management of natural resources. Areas of study will reflect the faculty advisor's home department and disciplinary thrust.

To pursue a dual-title intercollege degree under this program, the student must first apply and be admitted through one of the existing graduate programs that offers the dual-title degree in HDNRE (Anthropology; Energy and Mineral Engineering; Forest Resources; Geography; Recreation, Park, and Tourism Management; or Rural Sociology).

Admission Requirements

HDNRE requirements include: (1) a minimum baccalaureate Jr/Sr grade point average of 3.0 out of a 4.0 scale; (2) a statement of professional goals, natural resource management philosophy, and reasons for applying to the program; and (3) letters of reference from individuals capable of evaluating the applicant's potential for graduate work in interdisciplinary natural resource management. TOEFL scores are required of all students for whom English is a second language.

The language of instruction at Penn State is English. All international applicants whose first language is not English or who have not received a baccalaureate or master's degree from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the new Internet-based Test with a minimum of 20 points on the speaking portion; or the IELTS module with a minimum composite score of 6.5 is required for admission.
Degree Requirements

To qualify for a dual-title intercollege degree, students must satisfy the requirements of the major program in which they are enrolled, including the communication/foreign language requirements, if any. In addition, they must satisfy the minimum requirements in the HDNRE dual-title intercollege program described here. Final course selection is determined by the student and her/his respective graduate committee. All dual-title intercollege degree candidates must enroll in HDNRE 590 in each of their first two semesters.

M.S./M.A. Degree: A candidate for the dual-title intercollege M.S./M.A. in HDNRE must complete 17 credit hours of HDNRE coursework beyond the bachelor’s degree in addition to curricular requirements for the masters degree in the student's primary program. The HDNRE requirement includes four common courses in the HDNRE curriculum – i.e., HDNRE 590 Colloquium (two credits), HDNRE 574 Integrated Perspectives in Human Dimensions of Natural Resources and the Environment, HDNRE 575 Ethical Issues in Human Dimensions of Natural Resources, and one additional course selected in consultation with the student’s graduate committee. The HDNRE Colloquium must be taken in each of the first two semesters of enrollment in the dual-title intercollege degree program. In addition, 6 semester credit hours of Thesis Research (in the student’s home graduate degree program) are required if the candidate is writing a thesis. All students must take both the graduate major program requirements and those of the HDNRE dual-title intercollege program. All courses must be approved by the student’s M.S./M.A. committee.

The thesis supervisor and chair of the student’s graduate committee shall be a member of the student’s major program, and a member of the dual-title program. All members of the committee must hold Graduate Faculty status or secure the same before serving on the committee.

The culminating experience (e.g., thesis, scholarly paper, project) must incorporate an HDNRE interest together with the primary field of study. All students are also required to successfully complete an oral defense of the M.S./M.A. project completed as part of the major’s requirements if required by the participating program.

Ph.D. Degree: A candidate for the dual-title intercollege HDNRE Ph.D. must complete, in addition to curricular requirements for the doctoral degree in the student’s primary program, a minimum of 18 credit hours of HDNRE coursework. This includes the required courses for the HDNRE M.S./M.A. program. The HDNRE Colloquium must be taken each of the first two semesters of enrollment in the dual-title intercollege degree program, and once more prior to graduation. In addition, 9 semester credit hours of Thesis Research (either in the home department or in HDNRE) are required. Particular courses may satisfy both the graduate major program requirements and those of the HDNRE program. If an HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary course work must be selected, with the approval of the student’s doctoral committee. As well, a continuing doctoral candidate must take 3 credits of HDNRE 590 (each student must enroll the first two semesters and then once more prior to graduation).

All Ph.D. students will be required to complete, present, and defend a dissertation that incorporates a topic related to HDNRE, in addition to the participating program.

All participating primary programs (Anthropology; Energy and Mineral Engineering; Forest Resources; Geography; Recreation, Park, and Tourism Management; and Rural Sociology) have agreed to incorporate the dual-title program within the student’s dissertation work.

Student Aid

Forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Primary Programs of Study

All students (M.S./M.A. and Ph.D.) in the dual-title intercollege graduate degree program in HDNRE are expected to complete the common series of courses (HDNRE 590 – 2 credit minimum for masters students and 3 credit minimum for doctoral students, HDNRE 574, HDNRE 575, and RSOC 555). As well, each student is required to take either ANTH 559 or FORS 565 and one additional course selected in consultation with the student’s graduate committee. The HDNRE Colloquium must be taken in each of the first two semesters of enrollment in the dual-title intercollege degree program. In addition, 6 semester credit hours of Thesis Research (in the student's home graduate degree program) are required if the candidate is writing a thesis. Particular courses may satisfy both the graduate major program requirements and those of the HDNRE dual-title intercollege program. All courses must be approved by the student’s M.S./M.A. committee.

The thesis supervisor and chair of the student’s graduate committee shall be a member of the student’s major program, and a member of the dual-title program. All members of the committee must hold Graduate Faculty status or secure the same before serving on the committee.

The culminating experience (e.g., thesis, scholarly paper, project) must incorporate an HDNRE interest together with the primary field of study. All students are also required to successfully complete an oral defense of the M.S./M.A. project completed as part of the major’s requirements if required by the participating program.

Ph.D. Degree: A candidate for the dual-title intercollege HDNRE Ph.D. must complete, in addition to curricular requirements for the doctoral degree in the student’s primary program, a minimum of 18 credit hours of HDNRE coursework. This includes the required courses for the HDNRE M.S./M.A. program. The HDNRE Colloquium must be taken each of the first two semesters of enrollment in the dual-title intercollege degree program, and once more prior to graduation. In addition, 9 semester credit hours of Thesis Research (either in the home department or in HDNRE) are required. Particular courses may satisfy both the graduate major program requirements and those of the HDNRE program. If an HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary course work must be selected, with the approval of the student’s doctoral committee. As well, a continuing doctoral candidate must take 3 credits of HDNRE 590 (each student must enroll the first two semesters and then once more prior to graduation).

All Ph.D. students will be required to complete, present, and defend a dissertation that incorporates a topic related to HDNRE, in addition to the participating program.

All participating primary programs (Anthropology; Energy and Mineral Engineering; Forest Resources; Geography; Recreation, Park, and Tourism Management; and Rural Sociology) have agreed to incorporate the dual-title program within the student’s dissertation work.

Student Aid

Forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Primary Programs of Study

All students (M.S./M.A. and Ph.D.) in the dual-title intercollege graduate degree program in HDNRE are expected to complete the common series of courses (HDNRE 590 – 2 credit minimum for masters students and 3 credit minimum for doctoral students, HDNRE 574, HDNRE 575, and RSOC 555). As well, each student is required to take either ANTH 559 or FORS 565 and one additional course selected in consultation with the student’s graduate committee. The HDNRE Colloquium must be taken in each of the first two semesters of enrollment in the dual-title intercollege degree program. In addition, 6 semester credit hours of Thesis Research (in the student's home graduate degree program) are required if the candidate is writing a thesis. Particular courses may satisfy both the graduate major program requirements and those of the HDNRE program. If an HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary course work must be selected, with the approval of the student’s doctoral committee. As well, a continuing doctoral candidate must take 3 credits of HDNRE 590 (each student must enroll the first two semesters and then once more prior to graduation).

All Ph.D. students will be required to complete, present, and defend a dissertation that incorporates a topic related to HDNRE, in addition to the participating program.

All participating primary programs (Anthropology; Energy and Mineral Engineering; Forest Resources; Geography; Recreation, Park, and Tourism Management; and Rural Sociology) have agreed to incorporate the dual-title program within the student’s dissertation work.
Ph.D. – no specified minimum credit requirements plus dissertation
- Candidacy Examination
- 2 credits of 590
- 1 credit FOR 602 credit (Supervised Experience in College Teaching)
- Satisfy Language or Culture requirement
- Comprehensive Examination
- A final oral defense of dissertation
- Ph.D. – 18 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course). If a HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary courses must be selected with the approval of the student’s doctoral committee.
- 9 semester credit hours of Thesis Research

Energy and Mineral Engineering

M.S.
- M.S. – minimum of 30 credits (24 course credits + 6 credits of Thesis Research)
- 15 credits representing physical (EGEE 500 – 3 credits) and chemical (EGEE 510 – 3 credits) interactions, quantitative skills (EGEE 520 – 3 credits), integrative design experience (EGEE 580 – 5 credits), or equivalent substitution in these main programmatic areas, and Colloquium (EGEE 590 – 1 credit)
- A final oral defense of thesis
- M.S. – 17 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course).
- 6 semester credit hours of Thesis Research if a thesis is required.
- Ph.D. – minimum of 15 credits of 500-level courses plus dissertation
- Candidacy examination
- Comprehensive examination
- A final oral defense of dissertation
- Ph.D. – 18 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course). If a HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary courses must be selected with the approval of the student’s doctoral committee.
- 9 semester credit hours of Thesis Research

Recreation, Park, and Tourism Management

M.S.
- M.S. – minimum of 36 credits including thesis
- 9 credits RPTM core courses (RPTM 501, 527, 545)
- Research Methods (RPTM 530)
- Statistics – one statistics course at 400 or 500 level
- 5 credits of RPTM electives
- 6 semester credit hours of thesis research
- A final oral defense of thesis
- M.S. – 17 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course).
- 6 semester credit hours of Thesis Research if a thesis is required.
- Ph.D. – no specified minimum number of credits plus dissertation
- 12 credits RPTM core courses (RPTM 501, 527, 545, 597)
- Research Methods (RPTM 533 plus a qualitative methods course)
- Candidacy and comprehensive examination
- Statistics – three statistics courses beyond master’s coursework
- 6 credits of RPTM electives
- Dissertation research (no specified minimum of credit hours)
- A final oral defense of dissertation
- Ph.D. – 18 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course). If a HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary courses must be selected with the approval of the student’s doctoral committee.
- 9 semester credit hours of Thesis Research

Anthropology

M.A.
- M.A. – minimum of 30 credits (24 course credits + 6 credits of Thesis Research)
- 12 credits in Anthropology (including ANTH 408 and ANTH 456)
- 6 credits of graduate level statistics
- At least 6, but no more than 15 credits of Thesis Research
- At least 18 credits total must consist of 500- or 600- level course series, and only 6 thesis research credits (600) are applicable
- A final oral examination
- M.A. – 17 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course).
- 6 semester credit hours of Thesis Research if a thesis is required.

Ph.D.
- Ph.D. – The M.A. requirements as noted above (or equivalent)
- 18 additional graduate level credits
- Satisfy foreign language requirement
- Comprehensive Examination
- A final oral defense of dissertation
- Ph.D. – 18 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course). If a HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary courses must be selected with the approval of the student’s doctoral committee.
- 9 semester credit hours of Thesis Research

Geography

M.S.
- M.S. – Thesis option or two-paper option: thesis option minimum of 30 credits, plus thesis; paper option minimum of 35 credits, plus two papers, one of which must be associated with a seminar. Geography 500 and 502, 3 credits of 501, 2 credits of 590, and a minimum of 3 other 500-level seminar credits from the Department required. Proposal defense required of both options;
- Illustrated Paper presentation required at end of 2nd year.

The Pennsylvania State University
M.S. – 17 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course).
- 6 semester credit hours of Thesis Research if a thesis is required.

Ph.D.
- Ph.D. – Geography 500 and 502, 2 credits of 590; no other course or credit requirements, plus dissertation
- Proposal defense a minimum of two weeks before comprehensive exam; final oral defense of dissertation.
- Ph.D. – 18 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course). If a HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary courses must be selected with the approval of the student’s doctoral committee.
- 9 semester credit hours of Thesis Research

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
Ph.D., D.Ed., M.Ed.

The Graduate Faculty

- John J. Cheslock, Ph.D. (Cornell) Associate Professor of Higher Education
- Michael Dooris, Ph.D. (Penn State) Affiliate Associate Professor of Education
- Dorothy H. Evensen, Ph.D. (NYU) Professor of Education
- Roger L. Geiger, Ph.D. (Michigan) Distinguished Professor of Education
- Kimberly A. Griffin, Ph.D. (UCLA) Assistant Professor of Education
- Donald E. Heller, Ed.D. (Harvard) Professor of Education
- Robert M. Hendrickson, Ed.D. (Indiana) Professor of Education
- Beverly Lindsay, Ph.D. (American) Professor of Education
- Leticia Oseguera, Ph.D. (UCLA) Assistant Professor of Education
- David M. Post, Ph.D. (Chicago) Professor of Education
- Robert D. Reason, Ph.D. (Iowa State) Associate Professor of Education
- Patrick T. Terenzini, Ph.D. (Syracuse) Distinguished Professor Emeritus of Education
- M. Lee Urcraft, Ph.D. (Michigan State) Adjunct Professor of Education
- James Fredericks Volkwein, Ph.D. (Cornell) Professor of Higher Education
- Roger L. Williams, D.Ed. (Penn State) Affiliate Assistant Professor of Education

The graduate program in Higher Education has as its goal the preparation of individuals who will pursue careers and exert leadership in postsecondary education as administrators, faculty, or researchers in the nation's colleges and universities and in a variety of public and private agencies and associations in the United States and other nations. With emphasis on the systematic study of higher education, the program builds on the scholarly and scientific disciplines offered throughout the University and applies these studies to the professional functions and responsibilities that its graduates will assume, and to the knowledge of the field of higher education. The program is concerned with four broad areas of higher education study and with three areas of special emphasis: academic programs and evaluation, organization and administration, and perspectives on higher education policy and practice.

With mounting awareness of the changes occurring in various academic and professional fields, of the need for higher education reform, and of the need for improved articulation among the various levels of education, higher education faculty cooperates with other departments of the University to offer a number of courses and seminars for graduate students interested in pursuing a minor in higher education.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by the graduate program and authorized by the dean of the Graduate School, such as the Miller Analogies Test (MAT), are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

APPLICATION DEADLINE: Candidates may enter the program at the beginning of the fall or spring semester, or the summer session. To allow sufficient time for processing applications, required information must be received by January 1 for international applicants and those wishing to be considered for Graduate Fellowships, or February 1 for all other applicants. Those wishing consideration for the spring semester should submit materials by September 15. Applicants should contact the program office for additional application materials.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Joint Degree Program between The Pennsylvania State University Dickinson School of Law (J.D.) and the Higher Education Program (M.Ed., D.Ed., Ph.D.)

Joint Degree Program. The Pennsylvania State University Dickinson School of Law (DSL) and the Higher Education (HI ED) Program are offering a joint degree program leading to a Juris Doctor (J.D.); and a Master of Education (M.Ed.), a Doctor of Education (D.Ed.), or a Doctor of Philosophy (Ph.D.) in Higher Education.

Admission Requirements

The number of openings in the joint degree J.D./M.Ed., D.Ed., or Ph.D. program will be limited to students with an outstanding academic record who have successfully completed two semesters at the Dickinson School of Law.

Applicants to the joint degree program:
1. must have been admitted to the Dickinson School of Law
2. should have successfully completed two semesters of course work at the Dickinson School of Law with a grade-point average of 3.0
3. must submit two letters of recommendation from the Dickinson School of Law faculty
4. must submit a career statement

Note: Students are eligible to start taking courses in the HI ED program after successfully completing two semesters of law school work.

College-Specific Admission Requirements

DSL: A bachelor’s or equivalent degree from an accredited college is a prerequisite for admission; however, there is no standard prescribed undergraduate curriculum. An applicant should have acquired significant oral and written communication skills before entering law school. The following are required of applicants: a completed application form for DSL; submission of results of the Law School Admission Test (LSAT); completion of an LSDAS report; a one-page personal statement; employment records since high school; and two letters of recommendation.

HI ED: The following are required of all applicants: a completed application form to HI ED; submission of the results of the Graduate Record Examination (GRE), Miller Analog Test (MAT), or LSAT; an official undergraduate transcript or transcripts; a personal statement; employment records since high school; and four letters of recommendation.

All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the Test of English as a Second Language (TOEFL) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test or a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the new speaking portion; or the International English Language Testing System (IELTS) with a minimum composite score of 6.5 is

The Pennsylvania State University
Residency

Students will normally spend four semesters in residence at DSL and as many additional semesters in residence as needed to complete the additional requirements for the pertinent HI ED degree. Ph.D. candidates must arrange the sequence of semesters to ensure that they are in residence as full-time students in the HI ED program for at least two consecutive semesters (Fall-Spring or Spring-Fall) excluding summer in a single twelve-month period. D.Ed. candidates must take at least 90 credits, of which at least 30 credits must be earned at the University Park campus.

Liaisons

The department and faculty liaisons for DSL shall be the Associate Dean for Academic Affairs and the student advisor will be the Associate Dean for Academic Affairs or such other faculty member(s) as may be designated by the Dean. The liaison for HI ED shall be the Professor-in-Charge (PIC) or such faculty member(s) as may be designated by the PIC.

PRESCRIBED COURSES

DSL: All students in the J.D. program are required to take the first-year curriculum in DSL. In the second or third year, students must take CORE 934 (Professional Responsibility).

The fall curriculum for the first year consists of the following courses:

- CORE COURSES (CORE)
  - 900. Civil Procedure (4)
  - 910. Criminal Law (3)
  - 912. Legal Analysis, Research & Writing I (3)
  - 925. Torts (4)

The spring curriculum of the first year consists of the following courses:

- One 3-credit Elective
- CORE COURSES (CORE)
  - 903. Constitutional Law (3)
  - 905. Contracts (4)
  - 914. Legal Analysis, Research & Writing II (3)
  - 920. Property (4)

HI ED: All students pursing a Ph.D. must satisfy the following minimum requirements:

- Core Courses: 18 credits
- Research Requirements: 12 credits
- Advanced Skills: 9 credits
- Specialization in Higher Education: 12 credits
- Cognate Minor: 15 credits (minimum)

PROPOSAL WRITING
HI ED 594 (Research Topics) (minimum of 3 credits; maximum of 9)

Ph.D. DISSERTATION (non-credit; for continuous registration after completion of coursework and Oral Comprehensive Exam)
HI ED 601 (full time) or HI ED 611 (part time)

All students pursuing a D.Ed. must satisfy the following minimum requirements:

- Core Courses: 18 credits
- Research Requirements: 12 credits
- Specialization in Higher Education: 12 credits
- Minor or General Studies Grouping: 15 credits (minimum)

INTERNERSHIP
HI ED 595 (9 credits optional based on previous experience in higher education administration)

VI. D.Ed. THESIS RESEARCH
HI ED 594 (Research Topics) (minimum of 3 credits; maximum of 9)
Students pursuing the M.Ed. must satisfy the following requirements: (30 credits for degree)

- Higher Education Courses (15 credits minimum; HI ED 545 (Higher Education in the U.S.) is required).
- Research methods (3 credits)
- Minor field or General Studies Grouping (6 credits)
- Master’s Paper (3 credits)
- HI ED 596 (Independent Study)

**INTERPROGRAM TRANSFER OF CREDITS**

**DSL:** A maximum of twelve credits for HI ED course work may be transferred for credit toward the J.D. degree at DSL. Students must obtain a grade satisfactory to DSL for the course work to be credited towards the J.D. degree. The following HI ED program may qualify for credit in DSL: (1) HI ED 545 (Higher Education in the United States); (2) HI ED 552 (Administration in Higher Education); (3) HI ED 560 (Legal Issues in Higher Education); (4) HI ED 546 (College Teaching) and (5) HI ED 587 (Education Policy and Politics).

**HI ED:** What courses may be credited will be determined by the student’s degree program. Normally a maximum of twelve credits of DSL course work will be counted for credit for the minimum requirements for a master's degree, subject to approval by the student's advisory committee. Normally, a maximum of 30 credits from a master's degree program will be counted for credit for the minimum requirements for a Ph.D. or D.Ed. degree.

**Sequence**

The sequence of courses will be determined by the students and their advisors.

**Recommended Program of Study and Advising**

All students in the program will have two advisors, one from DSL and one from HI ED. Periodic interaction between the two advisors will be encouraged. A program of study will be developed for each student, taking into account the fact that some courses at both locations are offered on a rotating or intermittent basis. Many courses are offered every year but some are offered every two or three years. Advisors will have available a list of projected relevant courses or educational experiences in order to work with the student on an individualized program of study. The standard committee structure will apply to the HI ED programs.

**Tuition**

Students will be charged the applicable DSL tuition to cover the J.D. program and the applicable graduate tuition to cover the HI ED degree program. DSL tuition will be paid for the semesters in which the student is registered for DSL courses, and graduate tuition will be paid for the semesters in which the student is registered for graduate courses. A student may take up to one course (3 credit hours) per semester in the program where the student is not primarily registered if he or she wishes to take additional course work pursuant to that program during the semester.

**Financial Aid and Assistantships**

Decisions on financial aid and assistantships will be made by each school according to that school's procedures. Generally, assistantships and financial aid granted by HI ED will not apply to time spent at DSL.

**Fulfillment of Degree Requirements and Graduation**

All courses in one program that will count towards meeting the requirements of the other must be completed before the awarding of either degree. Students will be required to fulfill all requirements for each degree in order to be awarded that degree, subject to the interprogram transfer of credits. With respect to HI ED program requirements for a thesis or paper, work done while at DSL under the supervision of a DSL faculty member may be appropriate for incorporation into the thesis or paper with the approval of the HI ED degree program committee (in such cases, the committee should consider whether the credits afforded such work will be subject to the twelve credit maximum for interprogram transfers). A DSL faculty member must be a member of the committee).

If for some reason the student cannot complete the requirements of the J.D., the student will still be allowed to count DSL courses already taken toward the pertinent HI ED degree, even if he or she is no longer in the joint degree program.

**Course Descriptions**

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

David G. Atwill, Ph.D. (Hawaii) Associate Professor of History and Asian Studies
Katheleen Baldanza, Ph.D. (Penn) Assistant Professor of History and Asian Studies
William A. Blair, Ph.D. (Penn State) Professor of History
Daniel C. Beier, Ph.D. (Chicago) Associate Professor of History
Jonathan E. Brockopp, Ph.D. (Yale) Associate Professor of History
Kumkum Chatterjee, Ph.D. (Calcutta, India) Professor of History
Gary S. Cvijanovich, Ph.D. (Wisconsin) Distinguished Professor of History
Ronnie Po-chia Hsaio, Ph.D. (Yale) Professor of History
Grace Delgado, Ph.D. (UCLA) Assistant Professor of History
Solisiree Dal Moro, Ph.D. (Wisconsin) Assistant Professor of History
Alan Derickson, Ph.D. (California) Professor of History
Sophie C. M. de Schaepdrijver, Ph.D. (Amsterdam) Associate Professor of History
Greg Eghigian, Ph.D. (Chicago) Associate Professor of History
Garrett G. Fagan, Ph.D. (McMaster) Associate Professor of Classics and Ancient Mediterranean Studies and History
Cary Fraser, Ph.D. (Geneva) Associate Professor of African and African American Studies and History
Lori D. Ginzberg, Ph.D. (Yale) Professor of History and Women's Studies
Amy Greenberg, Ph.D. (Harvard) Professor of History and Women's Studies
Baruch Halpern, Ph.D. (Harvard) Professor of History, Jewish Studies, and Classics and Ancient Mediterranean Studies
Paul B. Harvey, Ph.D. (Pennsylvania) Associate Professor of History and Classics and Ancient Mediterranean Studies
Benjamin T. Hudson, Ph.D. (Oxford) Professor of History
Anthony E. Kaye, Ph.D. (Columbia) Associate Professor of History
Joan B. Landes, Ph.D. (NYU) Professor of Women's Studies and History
Daniel L. Letwin, Ph.D. (Yale) Associate Professor of History
Russell K. Lohse, Ph.D. (Texas) Assistant Professor of History
David McBride, Ph.D. (Columbia) Assistant Professor of African/African American Studies and African American History
Sally A. McMurry, Ph.D. (Cornell) Professor of History
Kathryn Merkle-Hess, Ph.D. (California, Irvine) Assistant Professor of History and Asian Studies
Wilson J. Moses, Ph.D. (Brown) Professor of History
Mark Munn, Ph.D. (Bryn Mawr) Professor of History, and Classics and Ancient Mediterranean Studies
Mark E. Neely, Jr., Ph.D. (Yale) McCabe Greer Professor of the Era of the American Civil War
On-Cho Ng, Ph.D. (Harvard) Professor of History and Asian Studies
Carol Reardon, Ph.D. (Kentucky) Professor of History
Matthew Restall, Ph.D. (California, Los Angeles) Professor of History
A. G. Roebber, Ph.D. (Brown) Professor of History
Anne Carver Rose, Ph.D. (Yale) Professor of History and Jewish Studies
Paul Lawrence Rose, Ph.D. (Sorbonne) Professor of History and Jewish Studies
Gonzalo Rubio, Ph.D. (Johns Hopkins) Associate Professor of History, and Classics and Ancient Mediterranean Studies
Janina Sufrit, Ph.D. (Harvard) Associate Professor of History
Kathryn Salzer, Ph.D. (Toronto) Assistant Professor of History
Gregory Smits, Ph.D. (Southern California) Associate Professor of History
Catherine Wanner, Ph.D. (Columbia) Associate Professor of History
Nan E. Woodruff, Ph.D. (Tennessee) Professor of History

Graduate instruction at the master's degree level is offered in the following areas of history: the Ancient Mediterranean; Medieval, Early Modern, and Modern European, including Great Britain and Russia; the United States, including colonial American and African American history; the Middle East; East and South Asian; and Latin America. In addition, graduate instruction is offered in such comparative or topical areas as Military History, Women's History, History of Religion, Jewish History, and the History of Science.

Doctoral programs ordinarily are limited to American, Ancient, Medieval, Early Modern British and European, Modern European, and East Asian History; as well as comparative studies in the History of War and Society; Women's History; the History of Industry, Agriculture, and Society; the History of Science and Technology; and the History of Religion. Prospective doctoral candidates are invited to contact the graduate officer about the current availability of any of these or other areas before applying.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Applicants to the doctoral program must hold or be near completion of the master's degree (or its equivalent); all others will be considered for admission to the master's program, even if it is their ultimate intention to pursue a doctoral degree at Penn State.

To be considered for admission, applicants must submit transcripts that show (1) substantial course work in history with a minimum grade-point average of 3.50 (on a 4.0 scale) in all undergraduate history courses, (2) a minimum junior/senior GPA in all courses of 3.30, (3) at least three semesters of college-level work in a foreign language (additional language training appropriate to the fields in which the applicant proposes to work may also be required for admission) and (4) where applicable, a minimum GPA of 3.50 for all graduate work previously undertaken. Each applicant must submit the scores of the Graduate Record Examination (GRE) taken within five years previous to the date of application; the general examination scores are mandatory, the history examination is optional. Students with scores of 650 or better in each of the verbal, quantitative, and analytic sections of the general examination will be given preference in admission. Applicants from abroad whose native language is not English must submit the scores of TOEFL to the Graduate School; admission to the history program normally requires a score of 600 or better.

The Department of History further requires all applicants to submit directly to the department a statement of intent outlining their proposed fields of study and career goals, as well as a sample of their written work (undergraduate history thesis, master's thesis, seminar paper or equivalent research paper) as evidence of their historical research and writing skills. Three letters of recommendation are required; it is strongly preferred that at least two of them be from historians.

Master's Degree Requirements

The Pennsylvania State University
Dual-Title Graduate Degree in History and Asian Studies

Graduate students with research and educational interests in international education may apply to the History/Asian Studies Degree Program. The goal of the dual-title degree History and Asian Studies is to enable graduate students from History to acquire the knowledge and skills of their major area of specialization in History while at the same time gaining the perspective of Asian Studies.

In order to prepare graduate students for the competitive job market, this program provides them with a solid disciplinary foundation that will allow them to compete effectively for the best jobs in their field. For such students, the dual-title Ph.D. in Asian Studies will add value to their degree and their status as candidates. It will produce excellent historians who are experts in Asian Studies as well. The dual-title degree in History and Asian Studies will build curricular bridges beyond the student’s major field so as to provide a unique training regime for the global scholar.

Additional details of the dual degree program are available in separate documentation and from the Asian Studies Program (see http://asian.la.psu.edu/graduate.shtml).

Admission Requirements

For admission to the dual-title Ph.D. degree under this program, a student must first apply and be admitted to the History graduate program. Once accepted into the History program, the student may apply to the Admissions Committee of the Asian Studies graduate program. Applicants interested in the program should make that known clearly on their applications and include remarks in their essays that explain their training, interests, and career goals in an area of Asian Studies.

Each applicant must submit the scores of the Graduate Record Examinations (GRE) taken within five years previous to the date of application; the general examination scores are mandatory, the history examination is optional. Students with scores of 650 or better in each of the verbal, quantitative, and analytic sections of the general examination will be given preference in admission.

General Graduate School requirements are stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Degree Requirements

To qualify for an Asian Studies degree, students must satisfy the requirements of the History program in which they are primarily enrolled. In addition, they must satisfy the requirements described below, as established by the Asian Studies committee. Within this framework, final course selection is determined by the student, their Asian Studies advisor, and their History program advisor.

Upon a student’s acceptance by the Asian Studies Admissions Committee, the student will be assigned an Asian Studies academic advisor in consultation with the Asian Studies chair. As students develop specific scholarly interests, they may request that a different Asian Studies faculty member serve as their advisor. The student and advisor will discuss a program of study that is appropriate for the student's professional objectives and that is in accord with the policies of The Graduate School, the History department and the Asian Studies program.

Requirements for the History/Asian Studies Ph.D.

The Pennsylvania State University
The doctoral degree in History and Asian Studies is awarded only to students who are admitted to the History doctoral program and admitted to the dual-title degree in Asian Studies. The minimum course requirements for the dual-title Ph.D. degree in History and Asian Studies are as follows:

- History 592 and History 593 (proseminars in historical methods and research)
- For students entering with a B.A. degree, a two-year sequence of these courses is required, for a total of four courses
- For students entering with an M.A. degree, a one-year sequence of these courses is required, for a total of two courses
- 15 credits of Asia-related coursework at the 400 or 500 level. At least 6 of these 15 credits will be from ASIA 501 and 502 (the required proseminar sequence in Asian Studies). As many as 6 may come from History, as approved by the student's doctoral advisor and the ASP Director of Graduate Studies. The remaining credits can be taken in ASIA or in any department other than History.

Particular courses may satisfy both the History requirements and those of the Asian Studies program. Final course selection is determined by the student in consultation with their dual-title program advisors and their major program advisors. Students who already hold a master’s degree from another institution may petition to have equivalent course credits accepted.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.
Health Education (HLHED)

Program Home Page
RAFFY LUQUIS, Program Coordinator
Penn State Harrisburg
W314 Olmsted Building
777 W. Harrisburg Pike
Middletown, PA 17057-4898
717-948-6730
E-mail: orl100@psu.edu

Degrees Conferred:
M.Ed.

The Graduate Faculty
- Raffy R. Luquis, Ph.D. (Arkansas) Associate Professor of Health Education
- William D. Milheim, Ph.D. (Kent State) Professor of Education
- Samuel W. Monismith, D.Ed. (Penn State) Associate Professor of Health Education

The Health Education program emphasizes behavioral and organizational strategies to plan, implement, and evaluate interventions that enable individuals, groups and communities to achieve personal, environmental, and social health. It complements other professional fields such as education, nutrition, physical therapy, occupational therapy, dental hygiene, nursing, health care administration, and preventive psychology.

The program follows a professional development focus, as many of the students are employed in the broad areas of disease prevention and health promotion and are pursuing graduate study on a part-time basis. The M.Ed. is a professional degree emphasizing applied research.

The program requires a research-based culminating experience. The faculty has a broad range of interests, including health promotion, family systems, teaching and training methods, violence and substance abuse prevention and control, and multicultural health issues.

A minimum of 30 graduate credits is required for the completion of the degree. A 3 credit research-based culminating writing experience is required. The program requires students to complete 21 credits in Prescribed Core courses and 9 credits in Elective courses.

Admission Requirements
Students must have a baccalaureate degree from an accredited college or university, an overall minimum undergraduate grade-point average of 2.50 and a junior/senior GPA of 3.00 (on a 4.00 scale) for admission into the program. Students are also required to submit:
- A completed application form with application fee;
- Two copies of an official transcript from an accredited, college-level university;
- Supplementary application.

An application is available on the Web at www.hbg.psu.edu or by calling 717-948-6250.

Degree Requirements
A minimum of 30 graduate credits is required for the completion of the degree. A 3-credit research-based culminating experience is required. The program has a required core of courses totalling 18 credits as follows:

Prescribed Core Courses: 21 credits
- HLHED 415 Planning and Development of Health Education Programs (3)
- HLHED 456 Advanced Techniques in School and Community Health Education (3)
- EDUC 440 Education Statistics and Measurement (3) or EDPSY 400 Introduction to Statistics in Educational Research (3)
- HLHED 552 Current Health Education Issues (3)
- HLHED 553 Multicultural Health Issues (3)
- EDUC 586 Educational Research Design (3) or HLHED 530 Research Techniques in Health Education (3)
- Culminating Experience: HLHED 591 Culminating Health Education Seminar (3) or HLHED 587 Master’s Project (3)

Elective Courses: 9 credits
A minimum of 12 credits is to be selected from the following HLHED courses: HLHED 420, 421, 443, 497, 501, 516, 590, 596, or 597.

Students also may select electives from suitable courses in Psychology, Community Psychology and Social Change, Education, Training and Development, or Health Administration programs. Note that 6 credits must be at the 500 level. Please contact the program office for further information about electives.

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

The Pennsylvania State University
Horticulture (HORT)

Program Home Page
RICHARD P. MARINI, Head of the Department
102 Tyson Building
814-865-2571

Degrees Conferred:
Ph.D., M.S.

The Graduate Faculty

- Richard N. Arteca, Ph.D. (Washington State) Professor of Horticultural Physiology
- Rick Bates, Ph.D. (Virginia Tech) Associate Professor of Ornamental Horticulture
- Robert D. Berghage, Ph.D. (Michigan State) Associate Professor of Horticulture
- Kathleen B. Brown (formerly Evensen), Ph.D. (Florida) Professor of Postharvest Physiology
- Robert M. Grassweller, Ph.D. (Ohio State) Professor of Tree Fruit
- David Decoteau, Ph.D. (UMass) Professor of Horticulture
- David M. Eissenstat, Ph.D. (Utah) Professor of Woody Plant Physiology
- Majid R. Foolad, Ph.D. (California, Davis) Professor of Plant Genetics
- Mark J. Guiltnan, Ph.D. (California, Irvine) Professor of Plant Molecular Biology
- Charles W. Heuser, Ph.D. (Rutgers) Professor of Horticultural Physiology
- Kathleen Kelley, Ph.D. (Michigan State) Associate Professor of Consumer Horticulture
- Roger T. Koide, Ph.D. (California, Berkeley) Professor of Horticultural Ecology
- William J. Lamont, Jr. Ph.D. (Cornell) Professor of Vegetable Crops
- Jonathan P. Lynch, Ph.D. (California, Davis) Professor of Plant Nutrition
- Richard P. Marini, Ph.D. (Virginia Tech) Professor of Horticulture; Department Head
- Michael D. Orzolek, Ph.D. (Maryland) Professor of Vegetable Crops
- Elsa Sanchez, Ph.D. (Washington State) Associate Professor of Horticultural Systems Management
- James C. Sellmer, Ph.D. (Wisconsin, Madison) Associate Professor of Ornamental Horticulture
- Dan T. Stearns, M.S. (North Carolina State) Professor of Landscape Contracting

Students may specialize in crop production and marketing, integrated crop management, plant genetics and breeding, horticultural plant physiology, postharvest physiology, plant molecular biology and biotechnology, and horticultural ecology.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of the graduate program officer, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Prerequisites for admission vary according to the area of specialization, but basic courses in physical sciences, mathematics, biological sciences, communication skills, and social sciences and humanities are required. Students who lack prerequisite courses may be admitted but are required to make up deficiencies without degree credit.

Students with a 2.75 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students.

See hortweb.cas.psu.edu/academic/gradprog.html for the most current Admission requirements.

Master's Degree Requirements

All M.S. degree candidates must complete at least one graduate course in biometry, at least 2 credits of resident or extension education (HORT 596 or HORT 602), and two seminars (HORT 590). A thesis is required for the M.S. degree.

Doctoral Degree Requirements

The communication requirement for the Ph.D. degree may be satisfied by completing at least 6 graduate credits in an area of communications skills approved by the student's advisory committee.

All Ph.D. candidates must present at least three seminars (HORT 590) for credit and complete at least two graduate courses in statistics or statistical applications. Ph.D. students must take 2 credits of resident or extension education (HORT 596 or HORT 602). The candidacy examination must be taken within six months after beginning residency.

Within one semester after passing the candidacy examination, the student's doctoral committee, with the thesis adviser in charge, will have the program planning meeting. The purposes of this meeting are to (1) determine the student's strengths and weaknesses in pertinent subject matter areas; (2) guide the student in developing a plan of study; and (3) review and discuss the proposed thesis research.

The comprehensive examination, composed of both written and oral parts, will be given when, in the student's and adviser's opinion, the student is ready for the examination, and when the communication requirements and essentially all courses have been completed.

After the thesis is completed and all other requirements for the Ph.D. have been met, the dean of the Graduate School will schedule the final examination. Normally, three months must elapse between the comprehensive and the final examinations. A major part of the examination will be an oral defense of the thesis.

Student Aid

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the STUDENT AID section of the Graduate Bulletin. Students who wish to compete for fellowships should be sure that their application materials are complete by January 15 for entry the following fall semester. The following award typically has been available to graduate students in this program.

WALTER THOMAS MEMORIAL SCHOLARSHIP

Available to students studying the nutrition of horticultural crops; stipend equivalent to a half-time assistantship. Apply through the Department of Horticulture.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet
some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:
- M.S. in Human Resources and Employment Relations
- Master of Professional Studies in Human Resources and Employment Relations (MPS HRER)
- Integrated B.S. in Labor and Employment Relations and M.S. in Human Resources and Employment Relations (LRHRER)
- Integrated B.S. in Spanish and M.S. in Human Resources and Employment Relations (SPhHRER)

The Graduate Faculty
- Mark S. Anner, Ph.D. (Cornell) Assistant Professor of Labor Studies and Employment Relations, and Political Science
- Forrest S. Briscoe, Ph.D. (MIT) Assistant Professor of Labor Studies and Employment Relations, and Sociology
- Paul F. Clark, Ph.D. (Pittsburgh) Professor of Labor Studies and Employment Relations
- Alex Colvin, Ph.D. (Cornell) Assistant Professor of Labor Studies and Employment Relations
- Alan Derickson, Ph.D. (California, San Francisco) Professor of Labor Studies and Employment Relations, and History
- Robert Drago, Ph.D. (Massachusetts, Amherst) Professor of Labor Studies and Employment Relations, and Women's Studies
- Ronald L. Filippelli, Ph.D. (Penn State) Professor of Labor Studies and Employment Relations
- Dennis Gouran, Ph.D. (Iowa) Professor of Speech Communication and Labor Studies and Employment Relations
- Sumita Raghuram, Ph.D. (Minnesota) Associate Professor of Labor Studies and Employment Relations
- Jackie Krasas Rogers, Ph.D. (USC) Associate Professor of Labor Studies and Employment Relations, Sociology, and Women's Studies
- James B. Stewart, Ph.D. (Notre Dame) Professor of Labor Studies and Employment Relations
- Mark Wardell, Ph.D. (Missouri) Associate Professor of Labor Studies and Employment Relations

The master of science degree in Human Resources and Employment Relations (HRER) is a two-year program designed for students anticipating careers in some aspect of labor and human resources or labor-management relations. The program has the following objectives:
- provide students with an understanding of the roles employers, employees, employee organizations, and public policy makers play in the employment relationship;
- familiarize students with the complex personal and organizational issues inherent in the employment relationship;
- prepare students to systematically analyze complex issues and evaluate research results in the process of administering labor and human resource systems;
- prepare students for advanced graduate or professional training beyond the master's degree;
- prepare students for employment as practitioners in the field.

Admission Requirements
Scores from the Graduate Record Examinations (GRE) or the Graduate Management Admission Test (GMAT) are required. Applicants with a 3.00 junior/senior grade-point average (on a 4.00 scale) will be considered for admission. Applicants must have three letters of recommendation sent from people who can assess adequately their likelihood of completing the graduate program.

Students are expected to have completed successfully an undergraduate statistics course plus a minimum of 12 undergraduate credits in the social sciences as part of their baccalaureate degree.

Degree Requirements

THESIS OPTION:
The HRER thesis option is intended for students anticipating additional graduate education beyond the master's degree. It requires 36 credits, including a minimum of 30 at the 400 and 500 level, and a minimum of 6 600-level thesis credits. For the degree, an overall 3.00 (B) grade-point average must be earned in the 400- and 500-level work and a grade of B or above must be earned in all 500-level courses. At least 6 credits must emphasize a particular aspect of employment relations. A student's thesis should reflect the chosen emphasis.

RESEARCH PAPER OPTION:
The HRER research paper option is intended for students expecting to enter the labor market upon completion of the master's degree. It requires a minimum of 37 credits at the 400 and 500 level. For the degree, and overall 3.00 (B) grade-point average must be earned in the 400- and 500-level work and a grade of B or above must be earned in all 500-level courses. At least 6 credits must emphasize a particular aspect of employment relations. A student's research paper should reflect the chosen emphasis.

Student Aid
Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the STUDENT AID section of the Graduate Bulletin.

Course Requirements

Core Courses (22 credits)
HRER 501, HRER 502, HRER 504, HRER 505, HRER 512, HRER 513, HRER 516
Required course are offered once per academic year and elective courses at least once every two academic years.

Emphasis Courses (6 credits)
An emphasis is an area of study related to a particular aspect or domain of industrial relations and human resources. Students select an emphasis in consultation with their master's advisory committee.

Elective Courses (3-9 credits)
With the faculty adviser's approval, a student selects at least 3 or more elective credits, depending on the chosen option. Examples of suitable elective courses are: HRER 500, HRER 535, HRER 536, HRER 594, HRER 595, HRER 596, HRER 597, HRER 599, LER 411, LER 401, LER 444, LER 458Y, ECON 412, ECON 438W, ECON 571; EDLDR 525; EDLDR 574; HIST (LER) 555; MGMT 521, MGMT 523, MGMT 548; PSYCH 484, PSYCH 485; PSY 522; SOC 455, SOC 456, SOC 555.
HUMAN RESOURCES AND EMPLOYMENT RELATIONS (HRER) course list

Master of Professional Studies in Human Resources and Employment Relations (MPS HRER)

PAUL F. CLARK, Professor in charge

The MPS in Human Resources and Employment Relations (HRER) is a 33 credit program of study for professionals working in human resources/employment relations or considering a career in some aspect of human resources and employment relations. The program will prepare students to:

- understand the roles that employers, employees, employee organizations and unions, and public policy makers play in the employment relationship;
- analyze the complex personal, legal, and organizational issues inherent in the employment relationship;
- understand the ethical dimensions of human resource and employment relations;
- analyze complex issues and evaluate research results in the process of administering labor and human resource systems;

Courses include the study of employment law, labor and employment relations, human resources, workplace organization, labor markets, ethics, and the employment relationship, recruiting/selection, compensation and benefits, workforce development, and diversity in the workplace.

The program will highlight the changing nature of the HRER field, including the impact of the globalization of private and public organizations and the growing importance of diversity in the workforce. It will culminate in a capstone class in which students will demonstrate their understanding of the curriculum and apply it to their professional areas of interest. Upon completion of the MPS HRER, students will be equipped to work as professionals in human resource management, employment relations, and general management with private employers, unions, government agencies, and non-profit organizations.

Students pursuing the MPS in HRER would be required to complete a concentration designed to provide the student an opportunity to develop expertise in a specific area of human resources and employment relations. The focused coursework should make the degree more relevant to potential students and add value to the degree from the student's perspective.

Students will choose and complete one concentration which will include six credits beyond the 24 required credits. Double counting six required credits, including the Research Project, the concentration would be 12 credits of coursework in a particular area of HRER. Three additional elective credits chosen from LER, HRER, or WFED courses must also be completed. Students will be required to complete the capstone project in their area of concentration. (For example, students choosing the Benefits and Compensation concentration would be required to complete a capstone project that focused on some aspect of benefits and compensation).

Degree Requirements

PRESCRIBED COURSES: 24 credits

HUMAN RESOURCES AND EMPLOYMENT RELATIONS (HRER)

501. Labor and Employment Law (3)
504. Seminar in Industrial Relations (3)
505. Seminar in Human Resources (3)
800. International Context of HRER (3)
802. Organizations in the Workplace (3)
816. Labor Market Analysis (3)
836. Diversity in the Workplace (3)
894. Research Project (3)

AREAS OF CONCENTRATION (student must complete one)

--Benefits and Compensation
LER 424 Employment Compensation (3)
LER 425 Employment Benefits (3)

--Employment and Labor Law
LER 401 Law of Labor-Management Relations (3)
HRER 811 Labor and Employment Law II (3)

--Labor and Collective Bargaining
LER 401 Law of Labor-Management Relations (3)
LER 435 Labor Relations in the Public Sector (3)

--Staffing, Training, and Development
LER 426 Staffing and Training (3) or WF ED 471 Training in Industry and Business (3)
WF ED 573 Needs Assessment for Industrial Trainers (3)

ELECTIVE COURSES: 9 credits
Select 6 credits in area of concentration.
Select an additional 3 credit course from LER, HRER, or WF ED courses listed below.

LABOR AND EMPLOYMENT RELATIONS (LER)

401. Law of Labor-Management Relations (3)
424. Employment Compensation (3)
425. Employment Benefits (3)
426. Staffing and Training (3)
435. Labor Relations in the Public Sector (3)
444. Occupational Health: Policy and Practices (3)
445Y. Politics of Affirmative Action (3)
460. Human Resources Ethics (3)
464. Communication Skills for Leaders in Groups and Organizations (3)
472. Work-Life Practices and Policies (3)

HUMAN RESOURCES AND EMPLOYMENT RELATIONS (HRER)

811. Labor and Employment Law II (3)
WFORCE EDUCATION AND DEVELOPMENT (WF ED)
471. Training in Industry and Business (3)
573. Needs Assessment for Industrial Trainers (3)

3. Admission Requirements

In order to enter the MPS in HRER, applicants must hold either (1) a bachelor's degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution prior to starting the graduate program, above. Students who do not have a GPA of 3.0 will be considered on a case-by-case basis depending on the quality of their overall application. Applicants who are still completing their baccalaureate requirements at the time of application may be admitted to the Graduate School.

conditional on the awarding of the baccalaureate degree. Students are also expected to have a minimum of two years of full-time work experience prior to admission.

Admissions decisions for the program are based on the quality of the applicant’s credentials. The decisions are based on a review of the complete application portfolio. During the admission process, students who are better suited for another graduate level program will be encouraged to apply to the appropriate program. Applicants to the MPS HRER should submit the following materials:

- Penn State graduate degree application form and application fee;
- World Campus program application;
- A 2-3 page essay articulating career and educational goals that demonstrates the applicant’s written communication skills. Documentation of a minimum of two years of full-time work and a resume should be attached as a supplement;
- Three letters of recommendation that attest to the applicant’s readiness for graduate study and document the requisite minimum of two years of work experience;
- Official transcript(s) of all institutions attended;

TOEFL score, if applicable. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 19 points on the new speaking portion is required for admission.

A minimum composite score of 6.5 on the IELTS test is required for admission.

Graduate Record Examination (GRE) scores are not required.

4. Recommended Sequence of Courses

Most adult students will participate in the online program on a part-time basis because of full-time professional responsibilities. The typical student course load is expected to be one course or two courses each semester (fall, spring, and possibly summer). Below, we illustrate one course per semester program. The sequence of courses may change and additional courses may be scheduled per semester depending on enrollment and demand. Course development will focus on one area of concentration creating one path through the degree. Additional courses for other areas of concentration will be added as enrollments increase to support a broader curriculum.

Year one: 9 Credits
HRER 501(3): Labor and Employment Law (fall)
HRER 504(3): Seminar in Industrial Relations (spring)
HRER 505(3): Seminar in Human Resources (summer)

Year two: 9 Credits
HRER 800(3): International Context of HRER (fall)
HRER 802(3): Organizations in the Workplace (spring)
HRER 836(3): Diversity in the Workplace (summer)

Year three: 9 credits
HRER 816(3): Labor Market Analysis (fall)
Electives (3): (spring)
Electives (3): (summer)
Electives for concentration

Year four: 6 credits
Electives (3): Fall/Spring

HRER 894 Research Project (Can be offered fall, spring, and summer depending on demand.)

Graduate Record Examination (GRE) scores are not required.

A minimum composite score of 6.5 on the IELTS test is required for admission. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 19 points on the new speaking portion is required for admission.

A minimum composite score of 6.5 on the IELTS test is required for admission.

TOEFL score, if applicable. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 19 points on the new speaking portion is required for admission.

A minimum composite score of 6.5 on the IELTS test is required for admission.

Graduate Record Examination (GRE) scores are not required.

**Graduate Bulletin Archive - 2012**

**ADDITIONAL COURSES:** (13 credits)
(Some courses in this category have prerequisites that are not included in the major)
- LER 201 GS(3) or LER 401(3) (Sem: 3-8)
- SCM 200(4) or STAT 200 GS(4) (Sem: 3-8)
- LER 136 US(3) or WMNST 136 US(3) or LER 400 IL(3) (Sem: 5-8)
- LER 458Y US(3) or HIST 458Y US(3) or LER 414W(3) (Sem: 5-8)

**SUPPORTING COURSES AND RELATED AREAS:** (33-34 credits)
(LER courses that are used in the Additional Courses category may not be double counted to satisfy this requirement. Some courses in this category have prerequisites that are not included in the major.)
Select 15-21 credits from appropriate LER courses, at least 9 must be at the 400 level (only 3 credits of LER 495 or 3 credits of LER 496 may be used to satisfy this requirement) (Sem: 5-8)
Select 12-19 credits from the department list in consultation with an adviser, at least 6 credits must be at the 400 level, 3 each from 3 categories:

- **ECON 342 GS(3), ECON 370 GS(3), ECON 412(3), ECON 436W(3), ECON 445(3) (Sem: 5-8)**
- **MGMT 100(3), MGMT 312(3), MGMT 331(3), MGMT 341(3), MGMT 424(3) (Sem: 3-8)**
- **PSYCH 482(3), PSYCH 484(3), PSYCH 485(3) (Sem: 5-8)**
- **SOC 119 GS(US), SOC 409 GS(US), SOC 444(3), SOC 455(3), SOC 456(3) (Sem: 3-6)**

**M.S. REQUIREMENTS:** 36 credits
[12 credits may be double counted, 6 must be at the 500 level]

**PRESCRIBED COURSES:** (21 credits)
- HRER 501(3), HRER 502(3), HRER 504(3), HRER 505(3), HRER 513(3)**, HRER 516(3)
- **HRER 594(1-6), HRER 595(1-6), HRER 596(1-6), HRER 597(1-3), HRER 600(3-6)**

**ADDITIONAL COURSES:** (15 credits)
Select 15 credits from the following list in consultation with adviser (only 6 credits may be at the 400 level).

**Emphasis Courses (6 credits)**
An emphasis is an area of study related to a particular aspect or domain of industrial relations and human resources. Select 6 credits from the M.S. prescribed or additional courses in consultation with their adviser.

**Masters Research Paper or a Masters Thesis (6 credits)**
Students must complete either a Masters Research Paper or a Masters Thesis. Students choosing the Thesis option must complete 6 thesis credits (HRER 600). These credits can be counted towards the 15 credits required from the M.S. Additional Courses section above.

**HUMAN RESOURCES AND EMPLOYMENT RELATIONS (HRER) course list**

**LABOR AND EMPLOYMENT RELATIONS (LER) course list**

**Integrated B.S. in Spanish and M.S. in Human Resources and Employment Relations (SPHRER)**
The integrated Spanish B.S. and HRER M.S. is a five-year program designed for highly qualified and motivated students seeking employment within a culturally diverse workplace. Students will develop basic skills in speaking, understanding, reading, and writing Spanish. Students will gain familiarity with Hispanic cultures through literature and the University’s international education program. If they choose to have that experience. Students also will learn about (1) the roles that employers, employees, employee organizations, and public policy makers play in the employment relationship, (2) the complex personal and organizational issues inherent in the employment relationship, and (3) how to systematically analyze those complex issues and evaluate research relevant to those analyses.

For the B. S./M. S. degree in Integrated Spanish B.S. and Human Resources and Employment Relations M.S., a minimum of 154 credits is required. Twelve graduate level credits can apply to both undergraduate and graduate degrees; six of these must be at the 500 level. Students can complete the B.S. in Spanish and not advance to the M.S. HRER degree if they desire.

**Bachelor of Science**

**Scheduling Recommendation by Semester Standing given like (Sem: 1–2)**

**GENERAL EDUCATION:** 45 credits
(10 of these 45 credits are included in the REQUIREMENTS FOR THE MAJOR)

**FIRST-YEAR SEMINAR:**
(Included in ELECTIVES or GENERAL EDUCATION course selection)

**UNITED STATES CULTURES AND INTERNATIONAL CULTURES:**
(Included in ELECTIVES or GENERAL EDUCATION course selection)

**WRITING ACROSS THE CURRICULUM:**
(Included in REQUIREMENTS FOR THE MAJOR)

**ELECTIVES:** 18 credits

**REQUIREMENTS FOR THE MAJOR:** 101 credits
(This includes 10 credits of General Education courses: 6 credits of GS courses; 4 credits of GQ courses.)

**PRESCRIBED COURSES:** (27 credits)
[Some courses in this category have prerequisites that are not included in the major]
- SPAN 100(3), SPAN 120(3), SPAN 200(3), SPAN 253(3), SPAN 305(3) (Sem: 1–6)
- SPAN 300W(3), SPAN 410(3), SPAN 412(3), SPAN 414(3) (Sem: 5–8)

**ADDITIONAL COURSES:** (12 credits)
- SPAN 210(3) or SPAN 220(3), SPAN 353(3) or SPAN 354(3) (Sem: 3–6)
- SPAN 472(3) or SPAN 476(3) (Sem: 5–8)
Select 3 credits of SPAN 415(3), SPAN 418(3), SPAN 420(3), SPAN 439(3), SPAN 490(3), SPAN 491(3), or SPAN 497(1–9) (Sem: 5–8)

**LABOR AND EMPLOYMENT RELATIONS:** (32 credits)
[Prescribed undergraduate credits in Labor and Employment Relations option]
- ECON 002 GS(3), LER 100 GS(3), LER 201(3), LER 312(4), LER 400 IL(3), LER 414W(3), LER 458Y US(3), STAT 200 GS(4) (Sem: 1–6)
- HRER 501(3), HRER 512(3) (Sem: 7–8)

**Master of Science**

**EMPLOYMENT RELATIONS/HUMAN RESOURCES M.S.:** (30 credits)
[HRER credits to be selected from the following in consultation with an HRER adviser]
- HRER 500, HRER 502, HRER 504, HRER 505, HRER 513, HRER 516, HRER 535, HRER 536, HRER 595*, HRER 596*, HRER 597, HRER 599

The Pennsylvania State University
[* Heritage speakers (students with Spanish language in family background but not necessarily a native speaker) should take SPAN 100A and SPAN 301 instead of SPAN 100 and SPAN 300W]

The Graduate Faculty

- William P. Andrew, Ph.D. (Penn State) Associate Professor of Hotel, Restaurant, and Institutional Finance
- Albert Bartlett, Ph.D. (Penn State) Associate Professor of Hospitality Management
- Peter Bondi, Ph.D. (Penn State) Associate Professor of Hospitality Management
- Martha Conklin, Ph.D. (New York) Associate Professor of Hospitality Management
- David Cranage, Ph.D. (Penn State) Assistant Professor of Hospitality Management
- Robert D. Lee, Ph.D. (Syracuse) Professor Emeritus of Hospitality Management
- Anna Mattila, Ph.D. (Cornell) Associate Professor of Hospitality Management
- Daniel Mount, Ph.D. (U. International U) Associate Professor of Hospitality Management
- Karthik Namasiavayan, Ph.D. (Cornell) Assistant Professor of Hospitality Management
- John O'Neil, Ph.D. (Rhode Island) Assistant Professor of Hospitality Management
- Sara J. Parks, R.D., M.B.A. (Michigan State) Professor Emerita of Hospitality Management
- Elwood L. Shater, Ph.D. (SUNY, Syracuse) Professor Emeritus of Environmental Management and Tourism
- Arun Upneja, Ph.D. (U of Houston) Associate Professor of Hospitality Management
- Hubert B. Van Hoof, Ph.D. (Arizona State) Professor of Hospitality Management

The Hotel, Restaurant, and Institutional Management M.S. and Ph.D. degree programs are designed to prepare individuals for research and educational roles in the hospitality industry. The programs offer advanced graduate research training for students who desire to become educators, researchers, and knowledge-based professionals in the hospitality field. Student's individualized programs are designed to ensure they will have a mastery of the scope of knowledge covering the entire spectrum of hospitality management as well as the ability to complete significant research in a specific hospitality area.

Students in the program may elect the dual-title degree program in Operations Research for the Ph.D. and M.S. degrees. (See also Operations Research).

Admission Requirements

Entry into the program requires a baccalaureate degree from a regionally accredited institution as well as a minimum of one to two years of work experience in the hospitality industry.

Scores for the Graduate Record Examinations (GRE), Graduate Management Aptitude Test (GMAT), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) will be considered for admission. Exceptions to this minimum average are sometimes made for students with special backgrounds, abilities, interests, and circumstances. Students are expected to have managerial competency in accounting, marketing, economics, human resource management, management information systems, and computer technology prior to entry into the program. Deficiencies in any of these areas must be made up in the first year that the student is enrolled (and will not be counted toward the program’s 36-credit requirement).

Master's Degree (M.S.) Requirements

The master’s degree program is designed to help students develop solid graduate-level research skills within a focused hospitality research area. Each student must complete a core of 12 credits of Methods Courses to include HRIM 503, STAT 500, and 6 credits of Methods Courses. In addition, students must take a minimum of 3 credits of HRIM 590 Colloquium. Students also complete a minimum of 15 credits of concentration area course work that is custom tailored to the student’s hospitality research interests and academic and professional background.

A master’s thesis is required of all students. The thesis is based on original empirical research. A master’s committee of three persons who oversee the master’s thesis is appointed for each candidate. This committee gives the final master’s exam, which is an oral defense of the master’s thesis.

Doctoral Degree Requirements

The doctoral program is an advanced graduate research program designed for students who want to become educators, researchers, and knowledge-based professionals in the hospitality field. Students’ programs are individualized to ensure in addition to a mastery of the scope of knowledge in hospitality management they will also have the ability to complete significant research in a focused hospitality management area. In addition to satisfying the requirements of the Graduate School, a student must complete the following courses prior to scheduling the Ph.D. comprehensive examination: HRIM 585, HRIM 586, HRIM 590 (total of 3 credits), 12 credits of quantitative and statistical analysis, 18 credits in an HRIM concentration area, and 12 credits from an outside supporting area.

The language or communication requirement for the Ph.D. can be fulfilled by (1) demonstrating proficiency in an approved foreign language, or (2) demonstrating proficiency in computer programming, or (3) completing a minor. The demonstration of proficiency is determined by an HRIM faculty committee.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

HOTEL, RESTAURANT, AND INSTITUTIONAL MANAGEMENT (HRIM) course list

M.Eng., M.S., Ph.D.

The Graduate Faculty

- David J. Cannon, Ph.D. (Stanford) Associate Professor of Industrial Engineering
- Enrique del Castillo, Ph.D. (Arizona State) Distinguished Professor of Industrial Engineering
- Tom M. Cavalier, Ph.D. (Virginia Tech) Professor of Industrial Engineering
- M. Jaya Chandra, Ph.D. (Syracuse) Professor of Industrial Engineering
- Paul H. Cohen, Ph.D. (Ohio State) Distinguished Professor Emeritus of Industrial Engineering
- Edward C. De Meter, Ph.D. (Virginia Tech) Professor of Industrial Engineering
- Andris Freivalds, Ph.D. (Michigan) Professor of Industrial Engineering
- Terry L. Friesz, Ph.D. (John Hopkins) Harold and Inge Marcus Chaired Professor of Industrial Engineering
- Paul M. Griffin, Ph.D. (Texas A&M) Peter and Angela Dal Pezzo Department Head; Professor of Industrial Engineering
- Catherine M. Harmonosky, Ph.D. (Purdue) Associate Professor of Industrial Engineering
- Sanjay Joshi, Ph.D. (Purdue) Professor of Industrial Engineering
- E. Amine Lehtihet, Ph.D. (Lehigh) Professor of Industrial Engineering
- Deborah J. Medeiros, Ph.D. (Purdue) Associate Professor of Industrial Engineering
- David A. Nemhhard, Ph.D. (Michigan) Assistant Professor of Industrial Engineering; Harold and Inge Marcus Career Professor
- Harriet Black Nemhhard, Ph.D. (Michigan) Associate Professor of Industrial Engineering; Bashore Career Professor
- Vittal Prabhu, Ph.D. (Wisconsin) Professor of Industrial Engineering
- An Ravi Ravindran, Ph.D. (Berkeley) Professor of Industrial Engineering
- Ling Rothrock, Ph.D. (Georgia Tech) Associate Professor of Industrial Engineering
- Cluytyn G. Ruud, Ph.D. (Darmen) P.E. Professor Emeritus of Industrial Engineering
- Timothy W. Simpson, Ph.D. (Georgia Tech) Professor of Industrial Engineering and Mechanical Engineering
- Soundar R. Tirupatikumara (Kumara), Ph.D. (Purdue) Allen E. Pearce/Allen M. Pearce Chaired Professor; Distinguished Professor of Industrial Engineering
- José A. Ventura, Ph.D. (Florida) Professor of Industrial Engineering
- Robert C. Voigt, Ph.D. (Wisconsin) P.E. Professor of Industrial Engineering
- Richard A. Wysk, Ph.D. (Purdue) Leonhard Chair in Engineering, Professor of Industrial Engineering
- Tao Yao, Ph.D. (Stanford) Assistant Professor of Industrial Engineering

Graduate study and research are conducted in manufacturing process, information engineering operations research-management science, production engineering, process design, systems engineering, human factors, ergonomics, quality engineering, and robotics.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission, at the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

To be admitted into the program, an applicant must have received a baccalaureate degree from a regionally accredited institution. Graduates in engineering, physical sciences, and mathematics who present a 3.0 grade-point average will be considered for admission. For all international students whose native language is not English, scores from the Test of English as a Foreign Language (TOEFL) are required with a minimum score of 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the Internet-based test required for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.0 grade-point average may be made for students with special backgrounds, abilities, and interests.

Degree Requirements

Three degrees are offered: Master of Engineering (M.Eng.), Master of Science (M.S.), and the Doctor of Philosophy (Ph.D.).

The M.Eng. is a professional degree program aimed at preparing students with a breadth of technical and managerial skills to make significant immediate contributions in an industrial setting. The degree requirements include 27 credits of course work, one credit of I E 590 (Colloquium), and a scholarly paper for which two credits of I E 596 (Individual Studies) must be taken. Of the 27 credits of required course work, at least 18 must be prefixed I E, and at least 15 must be at the 500 level. Of the 15 credits at the 500 level, at least 12 must be in I E courses. The scholarly paper must demonstrate comprehensive and in-depth knowledge of a topic in industrial engineering, and it should be suitable for submission for publication in a refereed journal as approved by the committee.

The M.S. degree program is intended for students to gain advanced knowledge for research, analysis, and design in industrial engineering. The degree requirements include 24 credits of course work and two I E 590 (Colloquium) credits. Of the 24 credits of required course work, at least 15 must be prefixed I E, and at least 12 must be at the 500 level. Of the 12 credits at the 500 level, at least nine must be I E courses. A thesis is required, for which six credits of I E 600 or I E 610 must be taken.

For the M.Eng. and M.S. degrees, area options are available in Human Factors/Ergonomics Engineering, Manufacturing Engineering and Quality Engineering. M.Eng. and M.S. dual-title degrees in Industrial Engineering and Operations Research are also offered.

The Ph.D. program emphasizes scholarly research, and prepares students for research and development careers in industry, government, and academe. Students are admitted to candidacy after passing a written examination. The Ph.D. is awarded upon completion of a program of advanced study that includes a minimum period of residence, passing the English proficiency and comprehensive examinations, completing a satisfactory dissertation, and passing the final oral examination. The degree requirements consist of 45 credits of coursework and four I E 590 (Colloquium) credits. Of the 45 credits of required course work, 36 must be prefixed I E, and at least 30 must be at the 500 level. Nine credits must be from outside the Department and must include a six-credit sequence, with at least three credits at the 500 level. A Ph.D. dual-title degree program in Industrial Engineering and Operations Research is also available.

Continuous registration is required for all graduate students until the paper, thesis, or dissertation is approved.

Master of Engineering (M.Eng.) Degree - Human Factors/Ergonomics Engineering Option

To receive the M.Eng. degree in Industrial Engineering with an Option in Human Factors/Ergonomics Engineering, a student must complete at least 30 credits beyond the bachelor's degree: 27 credits of course work, 1 credit of colloquium, and 2 credits of individual studies leading to a scholarly paper, as required for the M.Eng. degree in Industrial Engineering.

The 30 credits for the Option in Human Factors/Ergonomics Engineering must include the following:
I. CORE REQUIREMENT

1. Experimental Design (3 credits)

INDUSTRIAL ENGINEERING (I E)
511. Experimental Design in Engineering

II. ELECTIVES

1. Human Factors - Any three courses from the following list: (9 credits)

INDUSTRIAL ENGINEERING (I E)
552. Mechanics of the Musculoskeletal System
553. Engineering of Human Work
558. Engineering of Cognitive Work

Any of these courses may be substituted by other suitable I E 500-level courses, subject to the approval of the IME Graduate Faculty.

2. Industrial Engineering (6 credits)

Any two I E courses approved for graduate credit.

3. Any three courses from the following list; at least one course must be at the 500 level. (9 credits)

BIOENGINEERING (BIOE)
507. Biomedical Signal Processing

INDUSTRIAL HEALTH AND SAFETY (I H S)
445. Industrial Hygiene & Toxicology
447. Industrial Hygiene Measurements
450. Environmental Health & Safety
470 Analytical Methods for System Safety

KINESIOLOGY (KINES)
565. Neurophysiological Basis of Movement
574. Modeling in Biomechanics
578. Physiology & Mechanical Behavior of Skeletal Tissues
579. Advanced Biomechanics of Human Motion

PSYCHOLOGY (PSYCH)
453. Sensation & Perception
456. Advanced Cognitive Psychology
458. Visual Cognition
462. Physiological Psychology

III. Colloquium (1 credit)

I E 590. Colloquium (or 1 credit of O R 590)

IV. Individual Studies (2 credits)

I E 596 Individual Studies

Master of Engineering (M.Eng.) Degree - Manufacturing Engineering Option

To receive the M.Eng. degree in Industrial Engineering with an Option in Manufacturing Engineering, a student must complete at least 30 credits beyond the bachelor's degree: 27 credits of course work, 1 credit of colloquium, and 2 credits of individual studies leading to a scholarly paper, as required for the M.Eng. degree in Industrial Engineering.

The 30 credits required for the Option in Manufacturing Engineering must include the following:

I. CORE REQUIREMENT

INDUSTRIAL ENGINEERING (I E) (9 credits)
511. Experimental Design in Engineering
550. Manufacturing Systems
582. Information Technology for Industrial & Manufacturing Engineering

II. ELECTIVES

1. Students must take at least one course from each of the following four groups; at least two courses must be at the 500 level.

a. Materials and Manufacturing Processes

INDUSTRIAL ENGINEERING (I E)
428. Metal Casting
438. Metal Cutting Principles & Practices
518. Materials, Forming Processes & Quality
528. Metal Cutting Theory
538. Experimental Investigation in Materials Processing
561. Weld Design
580. Analysis of Machining Precision

b. Process, Assembly and Product Engineering

INDUSTRIAL ENGINEERING (I E)
464. Assembly of Printed Circuit Boards
563. Computer-Aided Design for Manufacturing
576. Computer-Aided Tolerancing in Design & Manufacturing
579. Designing Product Families

c. Manufacturing Productivity and Quality

The Pennsylvania State University
Master of Engineering (M.Eng.) Degree - Quality Engineering Option

To receive the M.Eng. degree in Industrial Engineering with an Option in Quality Engineering, a student must complete at least 30 credits beyond the bachelor's degree: 27 credits of course work, 1 credit of colloquium, and 2 credits of individual studies leading to a scholarly paper, as required for the M.Eng. degree in Industrial Engineering.

I. CORE REQUIREMENT

INDUSTRIAL ENGINEERING (IE)
511. Experimental Design in Engineering

II. ELECTIVES

1. Any three courses from the following list: (9 credits)

INDUSTRIAL ENGINEERING (IE)
532. Reliability Engineering
566. Quality Control
576. Computer-Aided Tolerancing in Design and Manufacturing
583. Response Surface Methodology and Process Optimization
584. Time Series Control and Process Adjustment

2. Any one course from the following list: (3 credits)

STATISTICS (STAT)
500. Applied Statistics
505. Applied Multivariate Statistical Analysis
508. Sampling Theory and Methods
511. Regression Analysis and Modeling
512. Design and Analysis of Experiments

3. Any two I E courses from the following list; of which at least one course must be at the 500 level. (6 credits)

INDUSTRIAL ENGINEERING (IE)
454. Applied Decision Analysis
468. Optimization Modeling and Methods
505. Linear Programming
516. Applied Stochastic Processes
519. Dynamic Programming
520. Multiple Criteria Optimization
521. Nonlinear Programming

4. Any two I E or non-I E courses approved for graduate credit. See "IME List Of Approved No-I E Courses-All Options" (attached). (6 credits)

III. Colloquium (1 credit)
I E 590 Colloquium (or 1 credit of O R 590)

IV. Individual Studies (2 credits)
I E 596 Individual Studies

*IME List of Approved Non-I E Courses - All Options

Other Relevant Information

Students in this program may elect the dual-title degree program in Operations Research for the Ph.D. and M.S. degrees.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the Graduate Bulletin, the following award typically has been available to graduate students in this program:

HAROLD & INGE MARCUS GRADUATE FELLOWSHIPS--Consideration for these fellowships shall be given to all students exhibiting academic excellence who have been admitted to Penn State as candidates for a graduate degree in the Department of Industrial and Manufacturing Engineering, College of Engineering.

BENJAMIN W. NIEBEL MANUFACTURING FELLOWSHIP
Consideration for this fellowship shall be given to all students exhibiting academic excellence who have been admitted to Penn State as candidates for a graduate degree in the Department of Industrial and Manufacturing Engineering, College of Engineering.

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Satvir S. Tevejia, Ph.D., (Microbiology and Immunology, CoM)
- Emmy Trukenmiller, Ph.D., (Microbiology and Immunology, CoM)
- Na Xiong, Ph.D., (Veterinary and Biomedical Sciences, College of AgSci)

The Intercollege Graduate Program in Immunology and Infectious Diseases (IGDP in I&ID) prepares graduates for diverse opportunities in academic institutions, pharmaceutical companies, private research foundations, governmental research and regulatory programs. The program includes faculty from 12 departments in the Colleges of Agricultural Sciences, Health and Human Development and Eberly College of Science at the University Park campus and the College of Medicine at the Penn State Milton S. Hershey Medical Center. The IGDP in I&ID is also supported by the Huck Institutes of Life Sciences which provides modern telecommunications facilities and sophisticated equipment for state-of-the-art research applications. Doctoral students not only explore new conceptual connections, but also engage in active group learning experiences, and explore a variety of potential career opportunities before graduation. Two unique aspects are (1) optional dual mentors will expose students to complementary viewpoints and encourage students to pursue problems at the interface between traditional disciplines, and (2) an optional internship will provide a mechanism for students to obtain practical experience in future professional settings.

General Admission Requirements

M.S. or Ph.D. degrees

Application deadline is January 10 for priority consideration.
1. Completed official Penn State Graduate School application
2. Paid nonrefundable application fee
3. Two official transcripts from each institution attended
4. Application for a U.S. visa (International applicants only)
5. Graduate Record Examinations (GRE) general test
6. Three letters of recommendation
7. Statement of goals that pertains to the life sciences
8. All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System) and submit the result of that test with the application for admission. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the speaking portion; or the International English Language Testing System (IELTS) module with a minimum composite score of 6.5 is required for admission.
9. Students must have completed a bachelor's degree at an accredited college or university and have a minimum of 3.0/4.0 junior/senior undergraduate grade-point average.

Program Requirements

M.S. or Ph.D. degrees

Students are expected to have a foundation and basic knowledge in immunology, infectious diseases, molecular biology, cell biology, biochemistry, and virology. Required courses are designed to fulfill this aspect of the training. The courses offered at the Hershey and University Park Campuses are interchangeable and fulfill requirements on both campuses. All students receive A-F grades except for rotations, internships and research credits for which students will receive R (satisfactory/passing) or F (unsatisfactory/failing).

General coursework required for both M.S. and Ph.D. Students

The Pennsylvania State University
IBIOS 590 COLLOQUIUM (2 credits) All students are required to enroll for 4 credits of colloquium.

IBIOS 591 ETHICS IN THE LIFE SCIENCES (1 credit)

IBIOS 596 INDEPENDENT STUDIES: LABORATORY ROTATIONS (1-3 credits per semester)

IBIOS 600 THESIS RESEARCH (1-9 credits per semester)

IBIOS 601 THESIS PREPARATION (0 credit per semester) For those students who passed their comprehensive exams (For Ph.D. students only)

IBIOS 511 MOLECULAR IMMUNOLOGY (2) or MICRO/CMBIO 554 PRINCIPLES OF IMMUNOLOGY (2)

BM/BMB SC 432 MECHANISMS OF MOLECULAR CELL COMMUNICATION(2) or CMBIO/BCHEM 503 CORE MOLECULAR BIOLOGY (3)

BM/BMB 501 CORE CONCEPTS IN BIOMOLECULAR SCIENCE (5), or B M B 401H BIOCHEMISTRY (3) and B M B 400 MOLECULAR BIOLOGY (2-3)

Supporting Courses

IBIOS 595 INTERNSHIP (1)

VB SC 602/IBIOS 602 SUPERVISED EXPERIENCE IN COLLEGE TEACHING. (1) All students are strongly encouraged to enroll for 1 credit (or the equivalent) although this is an optional requirement.

IBIOS/V SC/BMBSC 515 INNATE IMMUNITY (2)

IBIOS/V SC/BMBSC 516 VIRAL EVASION OF IMMUNE RESPONSES (2)

IBIOS/V SC/BMBSC 518 T CELL RECOGNITION AND DEVELOPMENT (2)

IBIOS/V SC/BIOS 519 DEVELOPMENT OF THE HEMATOPOETIC AND VASCULAR SYSTEM (2)

MICRO 550 MEDICAL MICROBIOLOGY (2)

MICRO 572 LITERATURE REPORTS (1)

MICRO 553 SCIENCE OF VIROLOGY (4)

The Graduate School requires all graduate students to maintain a 3.0 grade-point average.

M.S. Degree Requirements

Masters students must have a minimum of 30 credits and a 3.0 overall GPA. IBIOS 595 (Internship) and 596 (Rotations) credits all count toward the 30 credits. 18 credits need to be in the major at the 500-600 level. If pursuing a Masters thesis option, up to 6 IBIOS 600 credits may be A-F graded and 12 credits need to be in the major at the 400-500 level. The student selects a thesis committee (upon consultation with faculty advisor), writes a thesis, and defends his/her work. If all course credits and requirements are met, students do not have to be registered for classes while writing and/or defending his/her thesis. Pursuing a masters non-thesis option, 18 credits must be in 500-level courses; and the student must have a first authored manuscript (based on his/her research) that has been submitted to a peer reviewed journal. The manuscript is given to at least the faculty advisor and the IGDP Chair for evaluation.

Students must present their thesis in accordance with the Penn State guidelines as described in the THESIS GUIDE Requirements for the Preparation of Master’s and Doctoral Theses. Current copies may be obtained from the following website: http://www.gradsch.psu.edu/current/thesis/guide.html.

Ph.D. Degree Requirements

Ph.D. students must have a minimum of 30 credits and a 3.0 overall GPA through out the program. IBIOS 595 (Internship) and 596 (Rotations) credits all count toward the 30 credits. 18 credits need to be in the major at the 500-600 level. If pursuing a masters non-thesis option, 18 credits must be in 500-level courses; and the student must have a first authored manuscript (based on his/her research) that has been submitted to a peer reviewed journal. The manuscript is given to at least the faculty advisor and the IGDP Chair for evaluation.

Grade Point Average/Unsatisfactory Scholarship:

Students are required to have a minimum grade-point average of 3.0 through out the course of their training. Furthermore, the student must have a 3.0 to take the doctoral candidacy, the comprehensive and final oral examinations. One or more failing grades (F) or a cumulative grade-point average below 3.0 may be considered evidence of unsatisfactory scholarship and be grounds for dismissal from the program.

English Competence:

A candidate for the degree of Doctor of Philosophy is required to demonstrate high-level competence in the use of the English language, including reading, writing, and speaking, as part of the language and communication requirements for the Ph.D. This will be assessed for both domestic and international students as part of the candidacy exam, which includes a reading and original writing component. Should deficiencies be identified at the candidacy examination, students will be directed into appropriate remedial activities, including additional English and communication courses. Competence must be formally attested by the program before the doctoral comprehensive examination is permitted. (Internationally trained students should note that passage of the minimal TOEFL requirement does not demonstrate the level of competence expected of a Ph.D. from Penn State.)

Besides coursework, research, and teaching, IGDP in I&ID doctoral students participate in the following:

Candidacy Exam:

This exam should be taken by the end or during the student's third semester in the I&ID Program. The student will be assigned two scientific papers from the primary literature to read and analyze for approximately one month. The papers will be selected based upon the students' background and coursework. The analysis should involve exploring the relevant literature as well as the fundamental issues in immunology, infectious diseases, biochemistry, molecular biology and biology. Following this independent research, the student will take a written exam to answer several questions related to the two papers followed by an oral exam a week later. The questions and oral exam will be administered by at least three members of the graduate program and include individuals from both UP and CoM. The overall goal of the exam is to assure that the student has an intellectual foundation in immunology and infectious diseases. The exam is designed to test basic knowledge in immunology, infectious diseases, biochemistry, molecular biology and related disciplines as well as the students' ability to integrate this understanding to effectively interpret experimental design, results, and the conclusions drawn. In the event that the student does not pass this exam, the student's committee will make a recommendation as to whether to offer another opportunity or to terminate the student's enrollment in the program.

Doctoral Committee:

Upon successful completion of the Candidacy Examination, the student in consultation with the mentors will, as soon as possible, select a doctoral committee. The committee will consist of both mentors, one additional member of the IGDP in I&ID and one faculty member who is not a member of the IGDP in I&ID. If the three I&ID members of the committee are also members of the same department, the fourth committee member must be from a different department. This committee is responsible for supervising the academic program and monitoring the progress of the student towards his/her degree. It is the charge of the committee to assure that the student carries out a substantial piece of independent research and presents it as a dissertation. Doctoral Committee Composition is based on the Graduate Degree Programs Bulletin published by the Graduate School (refer to http://bulletins.psu.edu/bulletins/whitebook/degree_requirements.cfm?section=degreeReq1) regarding Doctoral Committees and requires:

- 4 person minimum of approved PSU Graduate Faculty.
- 2 members must be inside the major and 1 member must be outside the major. Note - the outside member must be member of the approved PSU Graduate Faculty. The outside member for intercollege graduate programs may be inside the major but committee membership must have representation from more than one department.
- A person not affiliated with PSU may be added as a special member (beyond the 4 members of the approved PSU Graduate Faculty) upon recommendation of the head of the program and approval of the graduate dean.

The Pennsylvania State University
Have committee chair or one of the co-chairs be a member of the approved PSU Graduate Faculty. Typically it’s the faculty advisor.
- The doctoral candidate and three committee members must be physically present for the comprehensive exam and defense. No more than one person may be present via telephone. Telephone or video conference arrangements must be approved by the Dean of the Graduate School.
- Need approval of 2/3 of the committee members for passing comprehensive exam and defense dissertation.

Comprehensive Examination:
Evaluation via the Doctoral Committee to determine the feasibility of proposed research and the preparedness of the student. Students must be registered for classes (typically IBIOS 600) the semester they take this exam.

Students must present their thesis in accordance with the Penn State guidelines as described in the THESIS GUIDE Requirements for the Preparation of Master’s and Doctoral Theses. Current copies may be obtained from the following Web site:
http://www.gradsch.psu.edu/current/thesis/guide.html

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Mirna Urquidi-MacDonald, Ph.D. (Paris-Sud) Professor of Engineering Science and Mechanics

The School of International Affairs (SIA) is designed to prepare students for occupations involving public service, private enterprise, nonprofit organizations, and international organizations worldwide. The Master's in International Affairs (MIA) degree program will provide students with a substantial knowledge base in international systems, institutions, issues and history and the advanced analytical tools and cross-cultural skills and competencies necessary for these occupations. Students will work closely with faculty to design a curriculum around their core course work, which incorporates a functional or regional theme and provides the opportunity to apply and enhance the core knowledge component with a thematically based set of graduate courses from across Penn State's existing graduate and professional curriculum.

Admission Requirements

Admission to the MIA degree program will require: (i) a bachelor's degree from a U.S. regionally accredited institution or (ii) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution. All applicants will submit GRE scores, two letters of recommendation and a personal statement addressing their reasons for pursuing a graduate degree in international affairs and discussing their plans and goals.

International applicants whose native language is not English will submit a satisfactory TOEFL or IELTS score from a test taken within two years of application. A satisfactory TOEFL score is 550 or above on the paper test, 213 or above on the computer-based test or 80 or above on the new internet-based test (with a minimum of 23 points on the new speaking portion). A satisfactory IELTS score is a minimum composite score of 6.5. If the applicant's qualifying degree is from a country where English is the native language and the degree is from an institution where English is the language of instruction, the applicant may apply for an exemption from these requirements.

Admissions will be based on a review of all submitted materials and spaces will be offered to the best qualified applicants, taking into account academic achievement, relevant work experience and other indices of aptitude for advanced study in international affairs.

Master's Degree Requirements

The M.I.A. will consist of 400, 500 and 800 level courses which were either created for the program or are pre-existing across the graduate curriculum. The program will require six courses which are designed to establish a base of knowledge in key subject areas which reflect the basic mission of the SIA. These courses will form the core curriculum for the M.I.A. This core curriculum is designed to provide students with a strong foundation in the ethical dimensions of international exchange, with skills essential to perform quantitative and qualitative analysis in cross-cultural contexts and with leadership training designed to understand and bridge the cultural differences. A minimum of 42 graduate credits will be required for completion of the program, at least 18 of which will be from courses at the 500 and 800 level. Students will be required to take 18 credits of core courses, five courses of which are at the 800 level and one course of which is at the 500 level.

In addition to completing the core curriculum, students will choose their remaining courses, with faculty guidance, from a substantial list of graduate courses for a total of 21 credits. The courses usually will be clustered around areas of concentration designated by the SIA faculty, but students also will be permitted to design an independent interdisciplinary curriculum with faculty approval. The areas of concentration, which will be pre-approved by the faculty, will take advantage of Penn State's rich graduate curriculum by aggregating in appropriate thematic clusters pre-existing and specially-created graduate-level classes.

In addition to the core curriculum and elective courses, degree candidates must complete either: (i) a master's paper; or (ii) a supervised internship placement. If the first option is chosen and the candidate opts to complete a master's paper, they must enroll in 3 credits of INTAF 594. The master's paper will involve integrating and showing mastery of the subject matter of the student's curricular emphasis, and may also involve original research. If the second option is chosen, the candidate will enroll in 3 credits of INTAF 595. The student will participate in a supervised internship placement of sufficient depth and professionalism that would allow the student to experience the integration of their curricular studies in an actual professional environment. A reflective paper will be submitted as a part of this credit requirement.

In order to graduate, students also will need to demonstrate proficiency in a language other than English. Proficiency will be defined as follows: (i) four semesters of a Penn State language sequence or its equivalent (15 credits); (ii) native acquisition, as shown by the candidate's personal history and approved by the SIA faculty; or (iii) performance on a proficiency evaluation sufficient to equal four semesters of language learning; for this purpose, either Penn State's proficiency certification process (described below) or another pre-approved proficiency assessment may be used.

Joint Degree Program between The Pennsylvania State University Dickinson School of Law (J.D.) and the School of International Affairs (M.I.A.)

Joint Degree Program:
The Dickinson School of Law (DSL) and the School of International Affairs (SIA) are offering a joint degree program that will enable a student to complete in four academic years both a Juris Doctor degree (J.D.) and a Master's in International Affairs (M.I.A.). A J.D./M.I.A. graduate will have the education and skills background to practice law in the United States, to work in an international context and to assume a leadership role in international affairs. The student will complete a minimum of 109 credits including eleven required law courses, two of which involve skills training, and seven required international affairs courses, one of which involves either an internship or a master's paper.
Admission Requirements

Students applying to the joint degree program must be admitted separately into both DSL and SIA. Students must first be admitted into the law school and will always complete their first two semesters in law before commencing the M.I.A. component. Credits earned towards an M.I.A. prior to entry into DSL will not be credited towards the J.D.

College Specific Admission Requirements

DSL: The DSL admissions process considers academic transcripts, leadership activities, community activities, work experience, personal background, letters of recommendation, the personal statement, LSAT scores and the LSAT writing sample. An admissions committee identifies candidates who are academically prepared for law study and who will contribute to the promotion of diversity and excellence in the student body and the legal profession. There is no standard prescribed undergraduate curriculum. The following are required of J.D. degree applicants: a completed application form, an LSAT score, an LSDAS report, a one-page personal statement and two letters of recommendation.

SIA: The following are required of M.I.A. applicants: (1) a bachelor's degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution. There is no standard prescribed undergraduate curriculum. All applicants will submit GRE scores, two letters of recommendation and a personal statement addressing their reasons for pursuing a graduate degree in international affairs and discussing their plans and goals. Upon the student's request, the LSAT may replace the GRE for joint degree admissions purposes.

International applicants who are applying to the Joint Degree program, and who do not qualify for the English exemption, must provide a satisfactory English test score. Joint degree applicants will be required to achieve a minimum TOEFL score of 575 on the paper test, 230 on the computer-based test or 88 on the internet-based test (with a minimum speaking score of 20); a minimum of 6.5 on the IELTS will also be acceptable.

Residency

A typical J.D./M.I.A. joint degree student will be in residence at DSL for six semesters and at SIA for two semesters.

Liaisons

The respective liaisons for DSL and SIA shall be as follows: the department and faculty liaisons for DSL shall be the Associate Dean for Academic Affairs and the student adviser will be the Associate Dean for Academic Affairs or such other faculty member(s) as may be designated by the Dean. The liaison for SIA shall be the Director or such faculty member(s) as may be designated by the Director.

Interprogram Transfer of Credits

DSL: A maximum of nine credits for M.I.A. course work may be transferred for credit toward the J.D. degree at DSL. Courses eligible for cross-counting towards the J.D. and M.I.A. include the courses on the M.I.A. Electives list (Appendix A-31) and any other courses taken as M.I.A. electives with the express written permission of the M.I.A. and J.D. advisers. Students must obtain a grade satisfactory to DSL for the course work to be credited towards the J.D. degree.

SIA: Because of the interdisciplinary nature of the M.I.A. degree, courses taken in DSL as a part of the elective component of the M.I.A. automatically count towards the M.I.A. Courses eligible for cross-counting towards the J.D. and M.I.A. include the courses on the M.I.A. Electives list (Appendix A-31) and any other courses taken as M.I.A. electives with the express written permission of the M.I.A. and J.D. advisers.

Sequence

The sequence of courses will be determined by the students and their advisers. However, students are required to complete the first year of the DSL program before beginning the M.I.A. program. It is expected that most joint degree students will complete the first two semesters of the M.I.A. consecutively in either the first or second year after completion of the first year of the J.D. degree.

Recommended Program of Study and Advising

All students in the program will have two advisers, one from DSL and one from SIA. Periodic interaction between the two advisers will be encouraged. A program of study will be developed for each student, taking into account the fact that some courses at both locations are offered on a rotating or intermittent basis. Many courses are offered every year but some are offered every two or three years. Advisers will have available a list of projected relevant courses or educational experiences in order to work with the student on an individualized program of study. The standard committee structure will apply to the SIA programs.

Tuition

Students will be charged the applicable DSL tuition to cover the J.D. program and the applicable SIA tuition to cover the M.I.A. degree program. The DSL tuition will be paid for the semesters that the student is in residence at DSL, and the SIA tuition will be paid for the semesters that the student is in residence there. A student may take up to one course (3 credit hours) per semester in the school where the student is not in residence without any change in tuition, but must pay additional tuition to the non-residential program if he or she wishes to take additional course work at that campus during that semester.

Financial Aid and Assistantships

Decisions on financial aid and assistantships will be made by each school according to that school's procedures.

Fulfillment of Degree Requirements and Graduation

A student in the program may complete the requirements for one of the degrees and be awarded that degree prior to completing all the requirements for the other degree; provided, however, that the student shall have successfully completed at least two semesters of work towards the other degree. All courses in one program that will count towards meeting the requirements of the other must be completed before the awarding of either degree. Students will be required to fulfill all requirements for each degree in order to be awarded that degree, subject to the inter-program transfer of credits.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Ph.D.

The Integrative Biosciences Graduate Faculty

- Raj Acharya, Ph.D. (Minnesota) Professor of Computer Science and Engineering
- Hiroshi Akashi, Ph.D. (Chicago) Assistant Professor of Biology
- Reka Albert, Ph.D. (Notre Dame) Assistant Professor of Physics
- Naomi Altman, Ph.D. (Stanford) Associate Professor of Statistics
- Sarah Assmann, Ph.D. (Stanford) Professor of Biology
- Maria Baeza, Ph.D. (University of Leeds) Assistant Professor of Biochemistry
- Le Bao, Ph.D. Assistant Professor of Statistics
- Judith Bond, Ph.D. (Rutgers) Professor and Chair, Biochemistry and Molecular Biology
- Donald Bryant, Ph.D. (California, Los Angeles) Ernest C. Pollard Professor of Biotechnology, and Professor of Biochemistry and Molecular Biology
- John Carlson, Ph.D. (Illinois) Professor of Molecular Genetics; Director, Schatz Center for Tree Molecular Genetics
- Laura Carrel, Ph.D. (Stanford Reserve) Assistant Professor of Biochemistry and Molecular Biology
- Francesca Chiaromonte, Ph.D. (Minnesota) Associate Professor of Statistics
- Keith Cheng, M.D., Ph.D. (NYU; U Washington) Professor of Pathology; Adjunct Professor of Biochemistry and Molecular Biology
- Surinder Chopra, Ph.D. (Vijs U of Brussels, Belgium) Associate Professor of Maize Genetics
- Michael Chorney, Ph.D. (Cornell, Sloan Kettering Cancer Center) Professor of Microbiology
- Daniel Cosgrove, Ph.D. (Stanford) Professor of Biology
- Gary Czarnikow, Ph.D. (Georgia) Associate Professor of Biology
- Cheng Dong, Ph.D. (Columbia) Distinguished Professor of Bioengineering
- Nina Fedoroff, Ph.D. (Rockefeller) Willmann Professor of Life Sciences; Director, Biotechnology Institute
- Gregory Fifer, Ph.D. (Illinois) Stanley Person Professor of Molecular Biology
- John Flanagan, Ph.D. (Vanderbilt) Professor of Biochemistry and Molecular Biology
- Majid R. Foolad, Ph.D. (California, Davis) Professor of Plant Genetics
- David Ger, Ph.D. (Georgia) Associate Professor of Plant Pathology and Biology
- Channe Gowda, Ph.D. (Myorea, India) Professor of Biochemistry and Molecular Biology
- Mark Guilltian, Ph.D. (California, Irvine) Professor of Plant Molecular Biology; Director, Endowed Program in the Molecular Biology of Cocoa
- Ross Hardison, Ph.D. (Iowa) Professor of Biochemistry
- Terry J. Hartman, Ph.D., M.P.H., (Harvard School of Public Health) Assistant Professor of Nutrition
- S. Blair Hedges, Ph.D. (Maryland) Professor of Biology
- Peter Keenan, Ph.D. (Yale) Associate Professor of Molecular Biology
- Leonard Jefferson, Ph.D. (Vanderbilt) Evan Pugh Professor; Chair of Cellular and Molecular Physiology
- Byron Jones, Ph.D. (Arizona) Professor of Biobehavioral Health and Pharmacology
- Sergio Kanter, Ph.D. (Wisconsin) Associate Professor of Plant Pathology
- Teh-hui Kao, Ph.D. (Yale) Professor of Biochemistry and Molecular Biology
- Kathryn LaNoue, Ph.D. (Yale) Professor of Cellular and Molecular Physiology
- Arthur Leland, Ph.D. (Princeton) Professor of Biochemistry and Molecular Biology
- Jia Li, Ph.D. (Stanford) Associate Professor of Statistics
- Guangli Li, Ph.D. Assistant Professor of Statistics
- Bruce G. Lindsay, Ph.D. (Washington) Willaman Professor and Head of Statistics
- George Makhatadze, Ph.D. (Moscow Physico-Technical Institute) Professor of Biochemistry and Molecular Biology
- Kate Makova, Ph.D. (Texas Tech) Assistant Professor of Biology
- Costas Maranas, Ph.D. (University of Boston) Associate Professor of Chemical Engineering
- Timothy McNellis, Ph.D. (Yale) Assistant Professor of Plant Pathology
- Webb C. Miller, Ph.D. (Washington), Professor of Biology and Computer Science and Engineering
- Kathleen Mulder, Ph.D. (SUNY, Buffalo) Professor of Pharmacology
- Masatoshi Nei, Ph.D. (Kyoto University, Japan) Evan Pugh Professor of Evolutionary Biology
- Arun Misra, Ph.D. (Texas Tech) Assistant Professor of Biochemistry and Molecular Biology
- Karl M. Newell, Ph.D. (Illinois) Professor of Kinesiology and Biobehavioral Health
- Randen Patterson, Ph.D. Assistant Professor of Biology
- Anthony Pegg, Ph.D. (Cambridge) Evan Pugh Professor of Cellular and Molecular Physiology, and Pharmacology; J. Lloyd Hux Professor of Cell and Molecular Biology
- B. Franklin Pugh, Ph.D. (Wisconsin, Madison) Associate Professor of Biochemistry and Molecular Biology
- Caiyamphi Rao, Ph.D. (Cambridge) Eberly Professor Emeritus of Statistics
- W. Brian Reeves, M.D. (Thomas Jefferson) Staff Physician
- Marylynn Ritchie, Ph.D. (Vanderbilt) Director, Center for Systems Genomics; Associate Professor of Biochemistry and Molecular Biology
- Donald R. Peterson, Ph.D. (California, Riverside) Associate Professor of Pharmacology
- Marilyn Rossinick, Ph.D. (Colorado School of Medicine) Professor of Plant Pathology and Biology
- Ira Rosson, Ph.D. (Johns Hopkins) Associate Professor of Biochemistry and Molecular Biology
- James Rosenberger, Ph.D. (Cornell) Professor of Statistics
- Stephen Schaeffer, Ph.D. (Georgia) Associate Professor of Biochemistry
- Cara-Lynne Schengrund, Ph.D. (Selton Hall) Professor of Biochemistry and Molecular Biology
- Stephen Schuster, Ph.D. (University of Munich, Germany) Professor of Biochemistry and Molecular Biology
- Coovuvali Shashika, Ph.D. (Osmania University, India) Associate Professor of Molecular and Developmental Biology
- Mark Shriver, Ph.D. (Georgia State University) Associate Professor of Anthropology
- Thomas Spratt, Ph.D. (Chicago) Associate Professor of Biochemistry
- Jack Vanden Heuvel, Ph.D. (Wisconsin) Professor of Molecular Toxicology
- David V. Vanderberg, Ph.D. (Penn State) Associate Professor of Biobehavioral Health
- George Vogler, Ph.D. (Colorado, Boulder) Professor of Biobehavioral Health
- Kent Vrana, Ph.D. (Louisiana State) Medical Center Professor and Chair of Pharmacology
- James Wang, Ph.D. (Stanford) Associate Professor of Information Sciences and Technology
- Kenneth Weiss, Ph.D. (Michigan) Evan Pugh Professor of Anthropology and Genetics

Calling upon the expertise of more than seventy faculty members representing twenty-seven different departments among eight different colleges between two different campuses, the Integrative Biosciences (IBIOS) Graduate Program offers a unique opportunity to learn about and work in multiple disciplines. This graduate education component of the Huck Institutes of the Life Sciences is supported by modern telecommunications facilities and equipment. Doctoral students can pursue problems at the interface between traditional disciplines, and (2) an optional internship that provides a mechanism for students to obtain "real world" opportunities before graduation. Two unique aspects are (1) dual mentors who will expose students to complementary viewpoints and encourage students to pursue problems at the interface between traditional disciplines, and (2) an optional internship that provides a mechanism for students to obtain "real world" opportunities before graduation.
experience in future professional settings.
The program offers the following areas of research emphasis (called options): Bioinformatics and Genomics, and Chemical Biology.

**General Admission Requirements**

Faculty begin reviewing applications December 1.

1. Completed official Penn State Graduate School application
2. Paid nonrefundable application fee ($45 U.S.)
3. Two official transcripts from each institution attended
4. Completed Integrative Biosciences Graduate Degree Program application
5. Application for a U.S. visa (international applicants only)
6. Graduate Record Examinations (GRE) general test
7. Three letters of recommendation
8. Statement of goals that pertains to the life sciences
9. All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) examination. A minimum TOEFL score of 600 on the paper test, 250 on the computer-based test, or 100 (including 23 on the speaking component) on the Internet-based test is required.
10. Students must have completed a bachelor's degree at an accredited college or university and have a minimum of a 3.0/4.0 junior/senior undergraduate grade-point average.

**Prescribed (Required) Courses:**

1. Foundation of basic knowledge in molecular biology, cell biology, biochemistry, and computational methods in the life sciences. The IBIOS Graduate Program expects at least 6 credits (or the equivalent) in one or more of these disciplines, taken either as an undergraduate or as a part of the graduate curriculum. The specific courses are left to the discretion of each option.
2. IBIOS 590 COLLOQUIUM (4 credits, 2 per semester during any of the first four semesters in residence), a monthly colloquium that will present life science topics of general interest to all faculty and graduate students in the Huck Institutes of the Life Sciences.
3. IBIOS 591 ETHICS IN LIFE SCIENCES (1 credit), an examination of integrity and misconduct in life sciences research, including issues of data collection, publication, authorship, and peer review.
4. IBIOS 595 INTERNSHIP (optional, 1 credit), an external work assignment relevant to individual research or career goals. (Register for IBIOS 595 in 520 Thomas Building)
5. IBIOS 596 INDIVIDUAL STUDIES: Laboratory Rotations (1-3 credits per semester, depending upon option)
6. IBIOS 600 THESIS RESEARCH (variable credits)
7. IBIOS 601 Ph.D. DISSERTATION FULL-TIME (0 credits)
8. IBIOS 602 SUPERVISED EXPERIENCE IN COLLEGE TEACHING (1 credit each semester), two semesters or the equivalent is required after the first year in residence. International Fellows must pass an English proficiency exam before teaching.

The Graduate School requires all graduate students to maintain a 3.0 grade-point average. Individual options may require a higher GPA.

Students must present their thesis in accordance with the Penn State guidelines as described in the *THESIS GUIDE Requirements for the Preparation of Master's and Doctoral Theses*. Current copies may be obtained from the web site www.gradsch.psu.edu/current/thesisguide or the Thesis Office, 115 Kern Building, University Park, PA 16802; 814-865-5448.

Elective courses. Student may select any 400- to 500-level courses pending approval by the Faculty Mentor and the Option Director - available elective courses vary from year to year.

**BIOINFORMATICS AND GENOMICS (BG) OPTION**

**College of Medicine (Hershey)**

**Prescribed (Required) Courses:**

- IBIOS stable number Genomics (3 credits), currently offered as 598B, a special topics course. Videoconferenced between UP and COM
- GEN 520, Genetics (Offered at COM and now planned to be videoconferenced between COM and UP.)
- BCHEM 502, Biological Chemistry (3 credits)
- IBIOS 591, Ethics (1 credit)
- IBIOS 590, Colloquium (1 credit)
- HES 615, Statistical Genetics
- CMBIO 520, Genetic Analysis (3 credits)
- Electives: Choose at least three credits from courses that support the chosen thesis research.

**University Park**

**Prescribed (Required) Courses:**

- IBIOS stable number Genomics (3 credits), currently offered as 598B, Bioinformatics I - BIOL 597F, CSE/STAT 598 (3 credits)
- IBIOS 591, Ethics (1 credit)
- IBIOS 590, Colloquium (1 credit)
- Electives. Choose at least three credits from the following courses.
  - BIOL 597F, CSE 598F, STAT 597F Bioinformatics II
  - GEN 520, Genetics (Offered at COM and now planned to be videoconferenced between COM and UP.)
  - STAT 597D, Genometrics
  - BIOL 497D, Practical Bioinformatics
  - BIOL 497G/597G, Computer Programming in C; Biological Applications
  - BIOL 505, Statistical Methods in Evolutionary Genetics
  - 8 B M B 597C, Computers for biochemists and molecular biologists
  - CSE 598E, STAT 597E, Data Mining
  - IBIOS 597G, HORT 597A, and AGRO 597G. Plant Genomics
  - 8MBM 597A or 8MBM 501. Core Concepts in Biomolecular Science

See also **BIOTECHNOLOGY**.

**CHEMICAL BIOLOGY (CB) OPTION**

**Prescribed (Required Courses):**

- Graduate level courses in biochemistry or molecular biology (6 credits, 3 per semester of the first year)
- Chemical Biology elective (6 credits, 3 per semester of the first year)

The Graduate Faculty -- Penn State Erie, The Behrend College

- S. Saad Andaleeb, Ph.D. (Illinois at Urbana-Champaign) Professor of Marketing
- Brian L. Bosciajaj, Ph.D. (Texas Tech) Associate Professor of Finance
- Ashutosh V. Deshmukh, Ph.D. (Memphis) Professor of Accounting and Management Information Systems
- David T. Doran, Ph.D. (Pittsburgh) Associate Professor of Accounting
- John L. Fizel, Ph.D. (Michigan State) Professor of Economics
- James A. Kurre, Ph.D. (Wayne State) Associate Professor of Economics
- Kenneth K. T. Louie, Ph.D. (Illinois) Associate Professor of Economics
- Jothi M. Muthai, Ph.D. (SUNY at Buffalo) Associate Professor of Management
- Io Division, Ph.D. (Pennsylvania) Professor of Management
- Diane H. Rapp, Ph.D. (SUNY, Buffalo) Professor of Management
- Jeffrey K. Pinto, Ph.D. (Pittsburgh) Professor of Management
- Mary Beth Pinto, Ph.D. (Pittsburgh) Professor of Marketing
- Ray Venkataraman, Ph.D. (Illinois Inst of Tech) Professor of Management

The Graduate Faculty -- Penn State Great Valley, School of Graduate Professional Studies

- Janet Duck, Ph.D. (Penn State) Assistant Professor of Management
- John Mason, Ph.D. (Michigan State) Associate Professor of Management
- Kimberly K. Merriman, Ph.D. (Temple) Assistant Professor of Management
- Denise Potosky, Ph.D. (Rutgers) Associate Professor of Management and Organization
- Matthew Sarkees, Ph.D. (Pittsburgh) Assistant Professor of Marketing

The Graduate Faculty -- Penn State Harrisburg, The Capital College

- Melvin Blumberg, Ph.D. (Penn State) Professor of Management
- Terence A. Brown, D.B.A. (Maryland) Associate Professor of Transportation and Marketing
- John D. Butters, Ph.D. (Mississippi) Associate Professor of Professional Accountancy
- Refik Culpan, Ph.D. (NYU) Professor of Management and International Business
- Jacob De Rooy, Ph.D. (Rutgers) Associate Professor of Managerial Economics and Statistics
- Robert D. Olin, Ph.D. (Virginia Tech) Associate Professor of Management
- Krishna S. Dhir, Ph.D. (Colorado) Professor of Business Administration
- Jean Harris, Ph.D. (Virginia Tech) Associate Professor of Professional Accountancy
- Erdener Kaynak, Ph.D. (Cranfield) Professor of Marketing
- Mukund S. Kulkarni, Ph.D. (Kentucky) Professor of Finance
- David A. Morand, Ph.D. (Cornell) Professor of Management
- Velma N. Muthai, Ph.D. (Pennsylvania) Assistant Professor of Economics and Statistics
- Kurt H. Parkum, Ph.D. (Wisconsin) Associate Professor of Management
- Parag C. Pendharkar, D.B.A. (Southern Illinois) Professor of Information Systems
- Robert D. Russell, Ph.D. (Pittsburgh) Assistant Professor of Management
- Stephen P. Schappe, Ph.D. (Ohio State) Associate Professor of Management
- John A. Simisis, Ph.D. (Massachusetts) Assistant Professor of Economics
- Girish Subramanian, Ph.D. (Temple) Associate Professor of Information Systems
- Orane Tawatnuchal, Ph.D. (New Orleans) Associate Professor of Finance
- John M. Trussel, Ph.D. (George Washington) Associate Professor of Professional Accountancy
- Ugru Yucelt, Ph.D. (New School) Associate Professor of Marketing

The Graduate Faculty -- The Smeal College of Business

- Robert P. Crum, D.B.A. (Kentucky) Associate Professor of Accounting
- Edward Keitz, Ph.D., Associate Professor of Accounting

The Penn State Intercollege Master of Business Administration (iMBA) is an online degree program of Penn State Erie, The Behrend College; Penn State Great Valley, The School of Graduate Professional Studies; Penn State Harrisburg; and Smeal College of Business, Penn State University Park. The iMBA curriculum emphasizes cross-functional organizational thinking; focuses on business planning and strategy; closely follows the quality guidelines for accreditation of AACSB (American Assembly of Collegiate Schools of Business), the accrediting body affiliated with The International Association for Management Education; and uses cutting-edge instructional technology to transcend issues of time and space, and to support effective teaching and learning.

Within the context of these goals, the iMBA curriculum was developed around four core business areas and six themes. The core business areas include: Financial Reporting, Analysis, and Markets; Domestic and Global Economic Environments; Human Behavior in Organizations; Creation and Distribution of Goods and Services.

The themes were derived from values and concepts found in high performing organizations: Leadership; Strategic Planning; Customer and Market; Information and Analysis; Human Resources; Process Management.

These business areas and themes are integrated at the course level. Students apply knowledge developed in these areas to multidimensional problems and issues throughout the program, which includes two required one-week culminating or capstone residential experiences.

Admission Requirements

Admission is granted only to candidates who demonstrate high promise of success for graduate work. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Applicants are required to take the Graduate Management Admission Test (GMAT). Applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English, must take the TOEFL (Test of English as a Foreign Language).

Admissions decisions are based on a review of a complete admission portfolio, including an application, a statement of intent, a current resume, official transcripts from each undergraduate and graduate institution attended, two letters of recommendation, and GMAT scores. An applicant's credentials are compared to the standards set by other candidates in the current application pool. Please see
Master's Degree Requirements

The iMBA degree requires 48 credits distributed across the following courses: IMBA 501, IMBA 502, IMBA 513, IMBA 515, IMBA 516, IMBA 517, IMBA 521, IMBA 522, IMBA 523, IMBA 530, IMBA 531, IMBA 543, IMBA 544, IMBA 550, IMBA 560, IMBA 561, IMBA 562, IMBA 573, and IMBA 574. Attendance at the two one-week Residency Experiences is mandatory. Following the iMBA course schedule, which involves completing credits over eight consecutive terms, a part-time student can complete the program in two years (see http://www.worldcampus.psu.edu/pub/imba/afs_sched.shtml).

Other Relevant Information

The iMBA is an online graduate degree program delivered via World Campus (http://www.worldcampus.psu.edu/). Students progress through the program in cohorts. They must be computer literate and have immediate, ready, and reliable access to a computer and the Internet. Although not all aspects of the course are delivered via electronic media, Internet access is required to successfully complete the course of instruction, as well as participate in online discussion groups. See (http://www.worldcampus.psu.edu/pub/imba/ats_equip.shtml) for the most current technical requirements. Students are required to complete the two one-week residency experiences. No alternatives and substitutions are possible.

Courses

Term One
INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (IMBA)
501. Markets, Industry Analysis, and Business Strategy (3)
502. Financial and Accounting Tools (3)

Term Two
INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (IMBA)
513. Data Analysis Resource Module (2)
515. Accounting for External Reporting (2)
516. Organizational Behavior and Performance(2)

Term Three
INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (IMBA)
521. Strategic Analysis (2)
522. Financial Management (2)
523. Organizational Development, Intervention and Change (2)
Residency Experience I (required)

Term Four
INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (IMBA)
517. Corporate Governance (2)
531. Project Management (2)
543. Accounting for Internal Decision Making (2)

Term Five
INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (IMBA)
530. Marketing in a Global Environment (3)
544. Managing Human Resources(3)

Term Six
INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (IMBA)
550. Corporate Information Strategy(3)
560. Corporate Innovative Strategies (3)

Term Seven
INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (IMBA)
561. Global Operations and Supply Chain Management (3)
562. Global Business Management (3)

Term Eight
INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (IMBA)
573. Strategic Planning (3)
574. Strategic Financial Decisions (3)
Residency Experience II (required)

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:
M.S. in Information Science

The Graduate Faculty

- Adrian Barb, Ph.D. (University of Missouri) Assistant Professor of Information Science
- Joanna Defranco, Ph.D. (New Jersey Institute of Technology) Assistant Professor of Information Science
- Nil H. Ergin, Ph.D. (University of Missouri-Rolla), Assistant Professor of Systems Engineering
- Kathryn Jablonski, Ph.D. (Ohio State) Associate Professor of Mechanical Engineering
- Phillip L. Laplante, Ph.D. ( Stevens Institute of Tech) P.E. Associate Professor of Software Engineering
- John I. McCoool, Ph.D. (Temple) Distinguished Professor of Industrial and Manufacturing Engineering
- Colin J. Neil, Ph.D. (Wales) Associate Division Head and Professor of Software Engineering
- James A. Nemes, D.Sc. (George Washington University) Professor and Division Head
- Michael J. Piovoso, Ph.D. (Delaware) Professor of Electrical Engineering
- Robin G. Qiu, Ph.D. (Penn State) Associate Professor of Information Science
- David W. Russell, Ph.D. (CNAA, London) Professor of Electrical Engineering
- Raghvinder Sangwan, Ph.D. (Temple) Associate Professor of Software Engineering
- Kailasam Satyamurthy, Ph.D. (Clemson) Assistant Professor of Engineering and Management

The professional, nonthesis graduate program is designed to offer students a balance of information systems and management theories and emphasizes technical competence, leadership skills, and business expertise. Students gain insight in the role and management of emerging information technologies to gain competitive advantage.

Admission Requirements

Students who have a baccalaureate degree in data processing, information systems and/or other quantitative, scientific, or business discipline will be considered for admission to the program. Students should have earned at least a 3.00 junior/senior average in their baccalaureate program at a regionally accredited institution. It is recommended that scores from the Graduate Record Examinations (GRE) or the Graduate Management Admissions Test (GMAT) be submitted. Under special circumstances, exceptions to these requirements may be considered; students with a particularly strong undergraduate background may petition to substitute advanced courses for required ones. If the admissions committee determines an area of weakness or insufficient baccalaureate preparation, the student may be required to take preparatory courses prior to being admitted to the program. Scores from the Test of English as a Foreign Language (TOEFL) are required of international applicants at the time of application. The minimum TOEFL score is 550 (paper) or 213 (computer).

Program Requirements

The requirement for the degree is 39 credits of graduate course work and completion of a master's paper. The Master of Science in Information Science program is based on a sequence of 18 credits of required core courses. This is followed by 18 credits of approved electives, selected with the assistance of a graduate adviser, followed by an integrative capstone course (IN SC 539). Required and elective credits must be distributed so that a minimum of 12 and a maximum of 18 credits derive from the Management Division and the remainder from the Engineering Division. A grade-point average of at least 3.0 must be achieved, with at least 18 credits at the 500 level.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:
M.S.

The Graduate Faculty
- Melvin Billingsley, Ph.D. (Yale) Professor of Biotechnology and Entrepreneurship
- Gregory A. Crawford, Ph.D. (Rutgers) Associate Librarian
- Rhoda Joseph, Ph.D. (City University of New York, Baruch College), Assistant Professor of Information Systems
- Parag C. Pendharkar, D.B.A. (Southern Illinois) Professor of Information Systems
- Girish Subramanian, Ph.D. (Temple) Professor of Information Systems
- Gayle J. Yaverbaum, Ph.D. (Temple) Professor of Information Systems

The Program

Operating under the auspices of the School of Business Administration, Penn State Harrisburg's master's degree program in information systems is designed to meet the rapidly increasing need for technically grounded, upper-level information resources managers within business organizations. With the exception of a small percentage of students who are full-time, the students served by the M.S.I.S. program are employees of area businesses, state and local governments, and not-for-profit organizations who study on a part-time basis. In order to accommodate both full- and part-time students, courses are primarily offered in the evening.

The two-fold nature of the program requires a manager to have competence both in information technology and in management theory; therefore, the curriculum combines the highly technical content of information science with the managerial emphasis of information systems. Unlike computer science programs, which tend to focus on computer hardware and architecture, this program is organized around applied computer-based activities, the development of communication skills, and managerial principles.

Students may elect to take one of two options in the program: Information Systems in Health Care Management and Delivery, or Information Systems in the Life Sciences. Each of these options requires a total of 36 credits. Alternatively, students can earn the degree without notation of an option; the total credits required for the degree under this choice are 30 credits.

Admission Requirements

Applicants to the program must hold a baccalaureate degree in any field from a regionally accredited, college-level institution. Students who apply for the option in Life Sciences must hold a baccalaureate degree in life sciences or a related field from a regionally accredited college-level institution. Decisions are based primarily on undergraduate junior-senior grade-point average and the Graduate Management Admissions Test (GMAT) scores. (Please visit www.gmac.com for more information on the GMAT). Postbaccalaureate course work, professional experience, and the statements provided in the application are also taken into account.

Students are also required to submit the following:
- a completed application form with application fee
- two copies of official transcripts from all colleges or universities attended;
- official scores from the GMAT test (the test must have been taken within the past five years);
- letters of recommendation (optional);
- supplemental application;

An application is available on the web at www.hbg.psu.edu or by calling 717-948-6250.

The Test of English as a Foreign Language (TOEFL) (www.toefl.org) must be taken by applicants for whom English is not their first language or whose language of instruction was not English. Submit the results of that test with the application for admission. A TOEFL score of 550 (paper-based test) or 213 (computer-based test) or higher is required for admission.

All students with international credentials must submit transcripts to Educational Credential evaluators, Inc. (ECE) for a "course by course" academic evaluation of transcripts and degree. An ECE application can be obtained on the web at: www.ece.org.

Application Dates

Candidates may enter the program at the beginning of the fall, spring, or summer session. To allow time for applications to be processed, all information, including GMAT score, must be received by Enrollment Services no later than July 18 for admission to the fall semester, November 18 for admission to the spring semester, and April 18 for admission to the summer session.

Applicants from outside the United States must follow the early admission dates in order to allow the necessary clearances and paperwork to be processed in time.

Entry Requirements

Analytic Skills Requirement: Prior to enrolling in their M.S.I.S. course work, students are required to demonstrate competence in Analytic skills. This requirement may be demonstrated by: (1) satisfactory completion of college-level courses in calculus and statistics such as QUANT 310 or MATH 110 plus STAT 200 or (2) successful completion of a calculus and statistics proficiency examination approved by the M.S.I.S. program. This requirement must be taken either during the first semester or summer session of the student's matriculation and completed with a grade of C or better.

Credit by Examination: Interested students should obtain a Credit by Examination form from Enrollment Services and should consult with the M.S.I.S. Program to schedule the exam and obtain a list of suggested preparatory materials.

Computer Skills Requirement: Students are required to demonstrate proficiency in the use of Microcomputer Applications. This requirement can be satisfied through completion of a college-level microcomputer applications course within the past five years with a grade of B or higher or by documented significant computer-related work experience. If this requirement has not been met prior to admission, a college-level microcomputer course such as M I S 103 or CMPSC 203--Microcomputers in Business--is required. Course work must be taken either during the first semester or summer session of the student's matriculation and completed with a grade of B or higher.

Communication Skills Requirement: Successful completion of the M.S.I.S. program requires the ability to think clearly and to write and speak persuasively. Part of this requirement can be met by obtaining a score of "4" or more on the Graduate Management Admission Test (GMAT), Analytical Writing Assessment (AWA). If this score is not achieved, students must satisfy this requirement through additional course work in writing skills or other work developed in the course of this requirement can be met by obtaining a score of "4" or more on the Graduate Management Admission Test (GMAT), Analytical Writing Assessment (AWA). If this score is not achieved, students must satisfy this requirement through additional course work in writing skills or other work developed in

The Pennsylvania State University
Graduate Bulletin Archive - 2012

(AWA). If this score is not achieved, students must satisfy this requirement through additional course work in writing skills or other work developed in consultation with the M.S.I.S. Program. This requirement must be satisfied during the first semester or summer session of the student’s matriculation and completed with a grade of B or higher. The speech component of this requirement is satisfied through individual and group presentations in courses in the M.S.I.S. Program.

Pre-Program Requirement: The pre-program requirement provides a basic foundation in theory, tools and techniques required for the management of profit and non-profit organizations. It also provides a basic understanding of applications of financial accounting, the creation and distribution of goods and services, and how people relate to others in various organizations, helping to merge two related disciplines: business and information systems. Students who have completed the appropriate pre-program courses previously must have completed the courses with a grade of B or higher within seven years prior to admission, or through equivalent graduate course work validated by recent work experience. Students who have not met these tests of relevancy, grade or currency, prior to admission to the program must take these courses at the graduate level and early in Program. Students choosing an option in life sciences are required to have a baccalaureate degree in life sciences or a related field.

Pre-Program Requirement: 9 credits
ACCT 501, BUS 505, MGMT 511, BUSEC 502

Degree Requirements

The M.S.I.S. program requires, excluding prerequisite requirements, 30-36 credits of course work at the graduate level (500-level or higher). Options require 36 credits.

These are distributed over three groups of courses: Prescribed Courses, Additional Courses, and Electives.

M.S.I.S. Degree Program

Master of Science in Information Systems

Pre-Program Courses
ACCT 501, Financial Analysis (3)
BUS 505, Data Analysis for Business Decisions (2)
BUSEC 502, Prices, Markets, and Competitive Strategy (2)
MGMT 511, Organizational Behavior (2)

Prescribed Courses
INFSY 535, Object-Oriented Design and Program Development (3)
INFSY 540, Information Technology and Knowledge Management (3)
INFSY 554, Master's Project (3)

Additional Courses (choose 15 credits)
INFSY 543, Electronic Commerce (3)
or
INFSY 550, Strategic Information Systems (3)
or
INFSY 587, Global Information Technology (3)
INFSY 545, Program, Data, and File Structures (3)
INFSY 547, WEB Enabled Technologies (3)
INFSY 555, Data Management (3)
INFSY 556, Data Warehousing (3)
INFSY 560, Data Communications Systems and Networks (3)
INFSY 562, Network Protocols (3)
or
INFSY 563, Network Security Management (3)
or
INFSY 564, Mobile computing (3)
INFSY 565, Intelligent Systems (3)
INFSY 566, Data Mining and Knowledge Discovery (3)
INFSY 570, Software Engineering in the Analysis and Design of Information Systems (3)
INFSY 575, Seminar in Information Technology Management (3) (as approved for major by Program)
INFSY 597, Special Topics (3)

Electives (6 credits)

Elective courses allow students to select additional elective courses of interest. Six credits of elective courses should be taken from 500-level courses offered by Penn State Harrisburg's School of Business Administration.

M.S.I.S. Degree with Options

Information Systems in Health Care Management and Delivery Option

Pre-Program Courses
ACCT 501, Financial Statement Analysis (3)
BUS 505, Data Analysis for Business Decisions (2)
BUSEC 502, Prices, Markets, and Competitive Strategy (2)
MGMT 511, Organizational Behavior (2)

Prescribed Courses
INFSY 535, Object-Oriented Design and Program Development (3)
INFSY 540, Information Technology and Knowledge Management (3)
INFSY 554, Master's Project (3)

Additional Courses
INFSY 555, Data Management (3)
INFSY 556, Data Warehousing (3)
INFSY 560, Data Communications Systems and Networks (3)
INFSY 565, Intelligent Systems (3)
INFSY 566, Data Mining and Knowledge Discovery (3)

Option Courses
H ADM 539, Health Systems Organizations (3)
INFSY 585, Advanced Applications in Medical Informatics (3)

Select 6 credits from:
H ADM 540, Health Administrative Policy Formulation (3)
H ADM 541, Health Economics (3)
H ADM 542, Health Care Politics (3)
H ADM 543, Long-Term Care Administration (3)
H ADM 548, Health Care Quality (3)

The Pennsylvania State University
Information Systems in Life Sciences Option

Prerequisite
A baccalaureate degree in a life sciences field

Pre-Program Courses
ACCT 501. Financial Analysis (3)
BUS 505. Data Analysis for Business Decisions (2)
BUSEC 502. Prices, Markets, and Competitive Strategy (2)
MNGMT 511. Organizational Behavior (2)

Prescribed Courses
INFSY 535. Object-Oriented Design and Program Development (3)
INFSY 540. Information Technology and Knowledge Management (3)
INFSY 554. Master's Project (3)

Additional Courses
INFSY 555. Data Management (3)
INFSY 556. Data Warehousing (3)
INFSY 560. Data Communications Systems and Networks (3)
INFSY 565. Intelligent Systems (3)
INFSY 566. Data Mining and Knowledge Discovery (3)

Option Courses
INFSY 578. Technology and Life Sciences (3)
Select 9 credits from:
BUSAD 534. Ethical Dimensions of Management in the Biotechnology and Health Industry (3)
BUSAD 583. Future of the Biotechnology and Health Industry: Strategic Considerations (3)
INFSY 575. Seminar in Information Technology Management (3) (as approved for option by Program)
INFSY 597. Special Topics (3) (as approved for option by Program)
STS 589. Ethics and Values in Science and Technology (3)
SWENG 552. Bioinformatics (3)

Students electing an option in the M.S.I.S. program must complete a total of 36 credits in the major to obtain the degree.

A minimum 3.0 grade-point average is required before a student is awarded an M.S. degree in Information Systems.

All course work must be completed within six years, or seven consecutive summers of matriculation.

Transfer Credits
Up to 10 transfer credits may be applied toward the degree. However, credits used to complete a previous graduate degree may not be applied. These courses must have been taken within the past five years, appear on a graduate transcript, and have been passed with a B grade or higher. It must be the opinion of the reviewing faculty that these courses are equivalent in quality to those offered at Penn State Harrisburg. Credit will not be given for any class used to complete a previous degree.

Course Substitutions
Because some students enter the Program with advanced knowledge in one or more subject areas, up to six credits in prescribed or additional courses may be replaced with more advanced graduate courses in the same subject area. Except for INFSY 554, which must be taken at the College, INFSY prescribed and additional courses, in cases where there is equivalent knowledge, must be replaced with more advanced courses in the same field. Substitutions are based on a minimum of six credits of advanced undergraduate course work in an area of concentration or credits earned in an equivalent graduate-level program at a regionally accredited, college-level institution. These courses must have been completed within the past five years and have earned a grade of B or better. Substituted courses must be replaced with other advanced graduate courses in the field for which the substitute is the foundation/prerequisite. Substitutions are based on past academic performance. An examination cannot be used for earned graduate course credit.

Grade-Point Average and Time Limit
A 3.00 (out of 4.00) minimum grade-point average is required FOR THE AWARD OF THE M.S.I.S. degree. All course work must be completed within six years, or seven consecutive summers, of matriculation.

Financial Aid
There are a limited number of scholarships, fellowships, and research grants available, as well as several graduate assistantships. For more information on these, contact Penn State Harrisburg’s School of Business Administration.

Many students work full-time and take classes part-time. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition. To find other options available to you, contact one of the following offices: Financial Aid Office, 717-948-6307 or Enrollment Services, 717-948-6250.

Graduate School Assistantships
Full time graduate students who are interested in an assistantship should contact the graduate program coordinator. Students must be nominated for an assistantship by their program coordinator.

Students applying for an assistantship should submit scores from the Graduate Management Admissions Test (GMAT), or similar examinations by January 30.

CONCURRENT DEGREE OFFERINGS WITH THE DICKINSON SCHOOL OF LAW
Penn State Harrisburg, School of Business Administration
The Dickinson School of Law

Degrees Conferred:
J.D. (Dickinson)
M.B.A. (Penn State Harrisburg)
M.S.I.S. (Penn State Harrisburg)

Concurrent Degree Programs
The Pennsylvania State University
The Dickinson School of Law and the School of Business Administration of Penn State Harrisburg offer cooperative programs leading to the degrees of Juris Doctor (J.D.) to be granted by the Dickinson School of Law, and either the Master of Business Administration (M.B.A.) or Master of Science in Information Systems (M.S.I.S.) to be granted by Penn State Harrisburg. These concurrent degree opportunities facilitate the completion of both a law degree and a professional degree in business or information systems. The programs are designed primarily for location-bound students who enter law school with an undergraduate degree in business, information systems or related fields.

Admission Requirements

The concurrent programs require that the student first be admitted to the Dickinson School of Law. Subsequently, the student is recommended for and applies for admission to the graduate school for the Penn State Harrisburg M.B.A. program or M.S.I.S. program.

The following are required for applicants:

**The Dickinson School of Law:**
- Completed Law School application; Law School Admission Test (LSAT) score; Law School Data Assembly Service (LSDAS) report; one page personal statement; employment record since high school; two letters of recommendation.

**M.B.A. And M.S.I.S. Programs:**
- Completed Graduate School application; Graduate Management Admission Test (GMAT); letter of recommendation from the associate dean of the Dickinson School of Law; evidence of proficiency in analytic skills through college-level calculus and statistics demonstrated either by completion of courses or successful completion of a mathematics proficiency examination approved by the program; evidence of proficiency in microcomputer applications skills; proficiency in writing evidenced by a score of "4" or higher on the writing assessment portion of the GMAT; proficiency in entry-level financial accounting as demonstrated by completion of college-level course work; completion of a set of pre-program business core requirements demonstrated by completion of a minimum of six credits of advanced undergraduate work in each core area. Each course must have been completed with a grade of B or higher within seven years prior to admission to the M.B.A. or M.S.I.S. program. The School of Business Administration will review the applicant's transcripts for acceptability of the courses.

No courses from the M.B.A program or M.S.I.S. program may count toward the J.D. program until the student is matriculated at The Dickinson School of Law. However, graduate-level courses taken in either in the M.B.A. or M.S.I.S. program at Penn State Harrisburg or at another graduate-level institution may be applied to the M.B.A. or M.S.I.S. in accordance with the transfer policies of the Graduate School.

Transfer of Credits

For those students meeting the entry and pre-program requirements of the M.B.A. and M.S.I.S. programs, 30 additional credits are required. Nine credits of course work at the Dickinson School of Law may be transferred toward the M.B.A. or the M.S.I.S. degrees, subject to program approval. Students must obtain a grade satisfactory to the M.B.A. and M.S.I.S. program in order for the credits to be transferable. Nine credits of M.B.A. or M.S.I.S. courses may be transferred for credit toward the J.D. degree at the Dickinson School of Law, subject to the approval of the school of law.

Advising of Students

All students in the concurrent program have two advisers, one in the School of Business Administration and one from the faculty at the Dickinson School of Law. Because the concurrent program is designed to be taken in synchrony with the objective that both degrees will be earned simultaneously, students who do not demonstrate progress toward completion of both degrees may be denied continuation in the concurrent program. Such a decision will rest jointly with the faculties of the M.B.A. or M.S.I.S. program and the J.D. program.

Tuition

The Dickinson School of Law and Penn State Harrisburg will each charge their own tuition to students in the J.D./M.B.A. and J.D./M.S.I.S. programs.

Additional Information

For more information and the latest updates on the concurrent programs, call the law school at 717-240-5207 or 800-840-1122, or visit the Web sites at: http://www.dsl.psu.edu or http://www.hbg.psu.edu

CONCURRENT DEGREE OFFERINGS WITH THE PENN STATE COLLEGE OF MEDICINE, THE DEPARTMENT OF PHARMACOLOGY

Penn State Harrisburg, School of Business Administration

The Penn State College of Medicine, The Department of Pharmacology

Degrees Conferred:

Ph.D. (College of Medicine)
M.B.A. or M.S.I.S. (Penn State Harrisburg)

Concurrent Degree Programs

The Penn State College of Medicine, Department of Pharmacology, and The School of Business Administration of Penn State Harrisburg offer cooperative programs leading to the degrees of Doctor of Philosophy (Ph.D.) to be granted by the Penn State College of Medicine, and either the Master of Business Administration (M.B.A.) or Master of Science in Information Systems (M.S.I.S.) to be granted by Penn State Harrisburg. These concurrent degree opportunities facilitate the completion of both a pharmacology doctorate and a professional degree in business administration or information systems. The programs are designed primarily for students interested in pursuing a career involving high-quality independent research and positions of management responsibility within the pharmaceutical community.

Admission Requirements:

The concurrent programs require that the student first be admitted to the pharmacology program. Subsequently, the student is recommended for and applies for admission to the graduate school for the Penn State Harrisburg M.B.A. or M.S.I.S. program.

The following are required for applicants:

**Pharmacology:**
- Completed application; Graduate Record Examination (GRE) Score; A bachelor's degree reflecting a reasonable background in zoology or biology, mathematics and chemistry; a minimum junior/senior grade point average of 3.00 and with appropriate course backgrounds; two letters of recommendation; a curriculum vitae; a description of career goals. Reading knowledge of one or two foreign languages is recommended.

**M.B.A. and M.S.I.S. Programs:**
- Completed Graduate School application; Graduate Management Admission Test (GMAT) score; letter of recommendation from the department chair of the pharmacology department; evidence of proficiency in analytic skills through college-level calculus and statistics demonstrated either by completion of courses or successful completion of a mathematics proficiency examination approved by the program; evidence of proficiency in microcomputer applications skills; proficiency in writing evidenced by a score of "4" or higher on the writing assessment portion of the GMAT; proficiency in entry-level financial accounting as demonstrated by completion of college-level course work; completion of a set of pre-program business core requirements demonstrated by completion of a minimum of six credits of advanced undergraduate work in each core area. Each course must have been completed with a grade of B or higher within seven years prior to admission to the M.B.A. or M.S.I.S. program. The School of Business Administration will review the applicant's transcripts for acceptability of the courses.

No courses from the M.B.A program or M.S.I.S. program may count toward the Ph.D. until the student is admitted to the Pharmacology Program. However, graduate-level courses taken in either in the M.B.A. or M.S.I.S. program at Penn State Harrisburg or at another graduate-level institution may be applied to the M.B.A. or M.S.I.S. program.
It is anticipated that most students in the concurrent programs will require additional graduate credits in order to satisfy the entry and pre-program requirements in business administration. Nine credits of course work in pharmacology may be transferred toward the M.B.A. or M.S.I.S. Students must obtain a grade satisfactory to the program in order for the credits to be transferable. Nine credits of M.B.A. or M.S.I.S. course work may be transferred for credit toward the Ph.D. degree, subject to the approval of the department of pharmacology.

All students in the concurrent program have two advisers, one in the School of Business Administration and one from the faculty in the department of Pharmacology. Because the concurrent program is designed to be taken in synchrony with the objective that both degrees will be earned simultaneously, students who do not demonstrate progress toward completion of both degrees may be denied continuation in the concurrent program. Such a decision will rest jointly with the faculties of the M.B.A. or M.S.I.S. and the Ph.D. programs.

The Course Matrix

For more information and the latest updates on the concurrent programs, call the department of pharmacology at 717-531-8285 or visit the Web sites at:
http://www.hmc.psu/pharmacology_program.index.html
http://www.hbg.psu.edu

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
Ph.D., D.Ed., M.S., M.Ed. (Penn State University Park)

The Graduate Faculty
- Alison A. Carr-Chellman, Ph.D. (Indiana) Professor of Education
- Roy B. Ciariana, Ed.D. (Memphis) Professor of Education
- Barbara L. Grabowski, Ph.D. (Penn State) Professor of Education
- Simon R. Hooper, Ph.D. (Penn State) Associate Professor of Education
- Susan M. Land, Ph.D. (Florida State) Associate Professor of Education
- Doris Lee, Ph.D. (Texas) Associate Professor of Education
- Orrin Murray, Ph.D. (Michigan) Assistant Professor of Education
- Kyle L. Peck, Ph.D. (Colorado) Professor of Education
- Priya Shama, Ph.D. (Georgia) Associate Professor of Education
- Heather Zimmerman, Ph.D. (Washington) Assistant Professor of Education

This program provides advanced professional preparation in the development of effective, efficient instructional materials and the use of technology in educational settings. Skill and knowledge in the fields of educational psychology, instructional design, computer technologies, development of educational materials, and evaluation of educational outcomes combine to prepare graduates for a variety of roles and professional environments. Graduates are employed by corporate, agency, and military training departments; entrepreneurial consulting companies; public school districts; community college learning resource centers, and colleges and universities. At the University Park campus, the program offers an M.S. degree for students who will continue into the Ph.D. program and a career in higher education, and two options within the M.Ed., Instructional Systems Design and Educational Technology. The M.S. degree program is also offered Penn State Great Valley.

Admission Requirements
Scores from the Graduate Record Examinations (GRE) (for master's or doctorate) or Miller Analogies Test (for master's), transcripts, letters of reference, application letter, and writing assignment are required for admission.

Master's Degree Requirements
Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin. For the M.S. degree, EDPSY 400 or its equivalent is prerequisite. M.Ed. and M.S. candidates are expected to complete the following courses: INSYS 415, INSYS 521, INSYS 522, INSYS 525 or INSYS 527, four INSYS emphasis courses, and 6 credits of professional orientation in Educational Psychology, Educational Administration, Workforce Education and Development, and/or Adult Education. Other courses may be substituted with approval from the candidate's adviser. The Leadership in Technology Integration emphasis requires INSYS 471 instead of INSYS 521.

The M.S. degree requires: as core courses INSYS 415 and EDPSY 421; as required courses INSYS 575 or EDPSY 475, and 6 credits of INSYS 600/610; and a master's thesis.

The M.Ed. Instructional Systems Design option requires: as core courses INSYS 415, INSYS 521, INSYS 522, and INSYS 525; as required courses , INSYS 527, and EDPSY 421; and a master's project paper, internship and paper, or design apprenticeship.

The M.Ed. with an Educational Technology option requires: as core courses INSYS 415 and EDPSY 421; as required courses AEE 521 or STAT 500; EDTEC 448, EDTEC 561, EDTEC 562; EDTEC 566 or EDTEC 568; and EDTEC 567; and a master's paper documenting the effectiveness of a technology-related intervention in an educational setting.

Doctoral Degree Requirements
Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin. In addition to those requirements for a master's degree, D.Ed. and Ph.D. candidates are expected to complete the following courses: EDPSY 421, two doctoral CORE courses (INSYS 581, INSYS 583, or INSYS 586), 12 credits of Instructional Systems emphasis courses, and a 15-credit minor or supporting field.

The Ph.D. candidate is expected to complete four research design courses covering both quantitative and qualitative methods. The communication requirement must be satisfied by completing one course in applied statistics, and either one course in advanced statistics or one course in advanced qualitative data analysis. The Ph.D. candidate is also expected to complete a research apprenticeship working directly with a faculty member.

The D.Ed. candidate is expected to complete two research design courses, choosing from experimental, qualitative, or survey research design, and a 9- to 15-credit internship.

As part of the candidacy exam, candidates are required to prepare residency plans indicating how they will be professionally immersed during their residency period. This plan is then reviewed again prior to graduation.

Candidates for doctoral degrees with a minor in Instructional Systems must take a minimum of 15 credits approved in advance by the professor in charge of the Instructional Systems program.

Student Aid
A limited number of graduate assistantships are available to students in this program. These and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses
Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Industrial Relations and Human Resources (IRHR)

**Program Home Page**
PACU F. CLARK, Head
133 Willard Building
814-865-5425

**Degree Conferred:**
M.S. in Industrial Relations and Human Resources

**The Graduate Faculty**
- Mark S. Anner, Ph.D. (Cornell) Assistant Professor of Labor Studies and Industrial Relations, and Political Science
- Forrest S. Bricco, Ph.D. (MIT) Assistant Professor of Labor Studies and Industrial Relations, and Sociology
- Paul F. Clark, Ph.D. (Pittsburgh) Professor of Labor Studies and Industrial Relations
- Alex Colvin, Ph.D. (Cornell) Assistant Professor of Labor Studies and Industrial Relations
- Alan Derickson, Ph.D. (California, San Francisco) Professor of Labor Studies and Industrial Relations, and History
- Robert Drago, Ph.D. (Massachusetts, Amherst) Professor of Labor Studies and Industrial Relations, and Women's Studies
- Ronald L. Filippelli, Ph.D. (Penn State) Professor of Labor Studies and Industrial Relations
- Dennis Gouran, Ph.D. (Iowa) Professor of Speech Communication and Labor Studies and Industrial Relations and Labor Relations
- Sumita Raghuram, Ph.D. (Minnesota) Associate Professor of Labor Studies and Industrial Relations
- Jackie Krasas Rogers, Ph.D. (USC) Associate Professor of Labor Studies and Industrial Relations, Sociology, and Women's Studies
- Joree B. Stewart, Ph.D. (Notre Dame) Professor of Labor Studies and Industrial Relations
- Mark Wardell, Ph.D. (Missouri) Associate Professor of Labor Studies and Industrial Relations

The master of science degree in Industrial Relations and Human Resources (IRHR) is a two-year program designed for students anticipating careers in some aspect of labor and human resources or labor-management relations. The program has the following objectives:
- provide students with an understanding of the roles employers, employees, employee organizations, and public policy makers play in the employment relationship;
- familiarize students with the complex personal and organizational issues inherent in the employment relationship;
- prepare students to systematically analyze complex issues and evaluate research results in the process of administering labor and human resource systems;
- prepare students for advanced graduate or professional training beyond the master's degree;
- prepare students for employment as practitioners in the field.

**Admission Requirements**
Scores from the Graduate Record Examinations (GRE) or the Graduate Management Admission Test (GMAT) are required. Applicants with a 3.00 junior/senior grade-point average (on a 4.00 scale) will be considered for admission. Applicants must have three letters of recommendation sent from people who can assess adequately their likelihood of completing the graduate program.

Students are expected to have completed successfully an undergraduate statistics course plus a minimum of 12 undergraduate credits in the social sciences as part of their baccalaureate degree.

**Degree Requirements**

**THESIS OPTION:** The IRHR thesis option is intended for students anticipating additional graduate education beyond the master's degree. It requires 36 credits, including a minimum of 30 at the 400 and 500 level, and a minimum of 6 500-level thesis credits. For the degree, an average 3.00 (B) grade-point average must be earned in the 400- and 500-level work and a grade of B or above must be earned in all 500-level courses. At least 6 credits must emphasize a particular aspect of employment relations. A student's thesis should reflect the chosen emphasis.

**RESEARCH PAPER OPTION:** The IRHR research paper option is intended for students expecting to enter the labor market upon completion of the master's degree. It requires a minimum of 37 credits at the 400 and 500 level. For the degree, and overall 3.00 (B) grade-point average must be earned in the 400- and 500-level work and a grade of B or above must be earned in all 500-level courses. At least 6 credits must emphasize a particular aspect of employment relations. A student's research paper should reflect the chosen emphasis.

**Student Aid**
Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the Student Aid section of the Graduate Bulletin.

**Course Requirements**

**Core Courses (22 credits)**
IRHR 501, IRHR 502, IRHR 504, IRHR 505, IRHR 512, IRHR 513, IRHR 516

Required course are offered once per academic year and elective courses at least once every two academic years.

**Emphasis Courses (6 credits)**
An emphasis is an area of study related to a particular aspect or domain of industrial relations and human resources. Students select an emphasis in consultation with their master's advisory committee.

**Elective Courses (3-9 credits)**
With the faculty adviser's approval, a student selects at least 3 or more elective credits, depending on the chosen option. Examples of suitable elective courses are: L I R 411, L I R 401, L I R 444, L I R 458Y; IRHR 500, IRHR 535, IRHR 536, IRHR 584, IRHR 595, IRHR 596, IRHR 597, IRHR 599; ECON 412, ECON 436, ECON 571, EDDL 565, EDDL 574; HIST (L I R) 555; MGMT 321, MGMT 503, MGMT 548; PSYCH 484, PSYCH 485; PSY 522; SOC 453, SOC 456, SOC 555.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

**INDUSTRIAL RELATIONS AND HUMAN RESOURCES (IRHR) course list**

**Integrated B.S. in Labor and Industrial Relations and M.S. in Industrial Relations and Human Resources (LIRHR)**

PROFESSOR PAUL F. CLARK, Head

The integrated B.S. in Labor and Industrial Relations and M.S. in Industrial Relations and Human Resources is a five-year program designed for academically talented baccalaureate students to obtain both the B.S. and the M.S. degrees in LIR and IRHR with five years of study. Students will develop expertise in the human resources and labor relations fields beyond the B.S. degree. The undergraduate curriculum educates students about (1) the roles of employers, employees, employee organizations and public policy makers play in the employment relationship, (2) the complex personal and organizational issues...
Bachelor of Science

Scheduling Recommendation by Semester Standing given like (Sem: 1-2)

GENERAL EDUCATION: 45 credits
(10 of these 45 credits are included in the REQUIREMENTS FOR THE MAJOR)

FIRST-YEAR SEMINAR:
(Included in ELECTIVES or GENERAL EDUCATION course selection)

UNITED STATES CULTURES AND INTERNATIONAL CULTURES:
(Included in ELECTIVES or GENERAL EDUCATION course selection)

WRITING ACROSS THE CURRICULUM:
(Included in REQUIREMENTS FOR THE MAJOR)

ELECTIVES: 18 credits

REQUIREMENTS FOR THE MAJOR: 98-99 credits
[12 credits may be double counted, 6 must be at the 500 level]

B.S. REQUIREMENTS: 62-63 credits
(This includes 10 credits of General Education courses)

COMMON REQUIREMENTS FOR THE MAJOR (ALL OPTIONS): 36-37 credits

PRESCRIBED COURSES: (16 credits)
(Some courses in this category have prerequisites that are not included in the major)
L I R 100 GS(3), L I R 312(4) (Sem: 3-8)
ECON 002 GS(3), ECON 315 GS(3), PSYCH 281 GS(3) (Sem: 1-8)

ADDITIONAL COURSES: (13 credits)
(Some courses in this category have prerequisites that are not included in the major)
L I R 201 GS(3) or L I R 401(3) (Sem: 3-8)
SCI 200(4) or STAT 200 QG(4) (Sem: 3-8)
L I R 138 US(3) or WMNST 136 US(3) or L I R 400 L(3) (Sem: 5-8)
L I R 456Y US(3) or HIST 458Y US(3) or L I R 414W(3) (Sem: 5-8)

SUPPORTING COURSES AND RELATED AREAS: (33-34 credits)

(L I R courses that are used in the Additional Courses category may not be double counted to satisfy this requirement. Some courses in this category have prerequisites that are not included in the major.)
Select 15-21 credits from appropriate L I R courses, at least 9 must be at the 400 level (only 3 credits of L I R 495 or 3 credits of L I R 496 may be used to satisfy this requirement) (Sem: 5-8)
Select 12-19 credits from the department list in consultation with an adviser, at least 6 credits must be at the 400 level, 3 each from 3 categories:

1. ECON 342 GS(3), ECON 370 GS(3), ECON 412(3), ECON 436(3), ECON 445(3) (Sem: 5-8)
2. MGMT 100(3), MGMT 321(3), MGMT 331(3), MGMT 341(3), MGMT 424(3) (Sem: 3-8)
4. PSYCH 482(3), PSYCH 484(3), PSYCH 485(3) (Sem: 5-8)
5. SOC 119 GS(4), SOC 409 US(3), SOC 444(3), SOC 455(3), SOC 456(3) (Sem: 3-8)

[1] A student enrolled in this major must receive a grade of C or better, as specified in Senate Policy 82-44.

M.S. REQUIREMENTS: 36 credits
[12 credits may be double counted, 6 must be at the 500 level]

PRESCRIBED COURSES: (21 credits)
IRHR 501(3), IRHR 502(3), IRHR 504(3), IRHR 505(3), IRHR 512(3)*, IRHR 513(3)*, IRHR 516(3)*

**or other statistics course approved in advance by graduate director

ADDITIONAL COURSES: (15 credits)
Select 15 credits from the following list in consultation with an adviser (only 6 credits may be at the 400 level).
L I R 400 IL(3), L I R 401(3), L I R 414W(3), L I R 424(3), L I R 437(3), L I R 446(3), L I R 456Y US(3), L I R 460(3), L I R 465(3), L I R 470(3), IRHR 500(3), IRHR 535(3), IRHR 536(3), IRHR 594(1-6), IRHR 595(1-5), IRHR 596(1-6), IRHR 597(1-3), IRHR 600(3-6)

Emphasis Courses (6 credits)

An emphasis is an area of study related to a particular aspect or domain of industrial relations and human resources. Select 6 credits from the M.S. prescribed or additional courses in consultation with their adviser.

Masters Research Paper or a Masters Thesis (6 credits)

Students must complete either a Masters Research Paper or a Masters Thesis. Students choosing the Thesis option must complete 6 thesis credits (IRHR 600). These credits can be counted towards the 15 credits required from the M.S. Additional Courses section above.

INDUSTRIAL RELATIONS AND HUMAN RESOURCES (IRHR) course list
LABOR AND INDUSTRIAL RELATIONS (L I R) course list

[1] A student enrolled in this major must receive a grade of C or better, as specified in Senate Policy 82-44.

Integrated B.S. in Spanish and M.S. in Industrial Relations and Human Resources (SPIRHR)

http://lsir.la.psu.edu/gshms/integratedspanishirhrbsms.htm

The integrated Spanish B.S. and IRHR M.S. is a five-year program designed for highly qualified and motivated students seeking employment within a culturally diverse workplace. Students will develop basic skills in speaking, understanding, reading, and writing Spanish. Students will gain familiarity with Hispanic cultures through literature and the University's international education program. For the B. S./M. S. degree in Integrated Spanish B.S. and Industrial Relations and Human Resources M.S., a minimum of 154 credits is required. Twelve graduate level credits can apply to both undergraduate and graduate degrees; six of these must be at the 500 level. Students can complete the B.S. in Spanish and not advance to the M.S. IRHR degree if they desire.

- At least 3 credits must be at the 9400 level.
- At least 3 credits must be at the 9500 level.
- At least 3 credits must be at the 9600 level.
- At least 3 credits must be at the 9700 level.
- At least 3 credits must be at the 9800 level.
- At least 3 credits must be at the 9900 level.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin. Applicants are required to submit scores from the general portions of the Graduate Record Examinations (GRE) or the Graduate Management Admissions Test (GMAT), three letters of reference, and a one-three page personal statement of relevant experience and goals; In addition, applicants to the Ph.D. and M.S. programs are required to submit a current resume, statement of research interests, and a sample of applicant's writing (e.g., technical paper, etc.). The GRE or GMAT requirement may be waived for applicants to the Professional Master Program if the student has five or more years of relevant information sciences and technology work experience.

Since the program is multidisciplinary in nature, students from almost any discipline may be acceptable for entry into the program. A bachelor's degree in a related area (information science and technology), while not necessary for admission, is helpful in the successful completion of the degree. It is expected that students will have a basic level of competency in statistics, computer language, and information technology (related work experience can be used to demonstrate such competency). A student may be accepted into the program with "provisional status" for no more than one year while work is completed to meet these expectations.

It is expected that a successful applicant has an overall grade point average of 3.00 (on a 4.00 scale) or higher for their undergraduate study (and/or graduate-level studies). However, accomplishments demonstrated through work experience and recommendation letters from the applicant’s academic advisor or employer will also play an important role in making the admission decision. The most qualified applicants will be accepted into the program until all spaces for new students are filled.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, a total score of 80 with a 20 on the speaking section for the Internet-based test (iBT) or a minimum composite score for the IELTS of 6.5. Applicants with iBT speaking scores between 15 and 19 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial coursework.

Degree Requirements

Doctoral Degree Requirements

The doctoral degree requirements include the general requirements of the Graduate School as listed under the Doctoral Degree Requirements. To qualify for a Ph.D. degree, each student must take 12 credits of courses IST 501, IST 511 or IST 512, IST 521 or IST 522, IST 531 or IST 532; plus four (4) credits of IST 590 (colloquium); 12 credits of graduate-level courses to supporting the primary field research methods, (one of these courses, 3 credits, must focus on the philosophy of science); and 12 to 30 additional credits of nonthesis graduate courses that support the student's IST research program. In addition, all candidates must be competent in the English language and must have demonstrated language proficiency by passing the written comprehensive examination in English. The written comprehensive examination shall be satisfied by passing a written examination. The written comprehensive examination is designed to test the student's knowledge of the material covered in the course work. The written comprehensive examination shall be given at the end of the second semester following the student's matriculation. Students must pass the Ph.D. comprehensive examination after completion of most of the course work, usually at the end of the second year of study. In cases where a student has failed the written comprehensive examination, the student will be required to pass the examination before being allowed to continue with dissertation work.

M.S. Degree Requirements

The M.S. in Information Sciences and Technology requires a minimum of 32 credits, 27 of which must be earned at University Park. These credits are...
The Pennsylvania State University

Graduate Bulletin Archive – 2012

2011 – 2012

distributed among the following requirements:

Core Courses (14 credits). All candidates are expected to develop a broad understanding of the core constructs of people, information, technology, and the significant interactions among those elements through taking IST 501, IST 511 or IST 512, IST 521 or IST 522, IST 531 or IST 532 plus two graduate colloquia offered by the college.

Support Area (6 credits). A candidate is expected to choose an area customized to support the thesis requirement. A support area could be a selection of courses in law, business, education, engineering, the liberal arts, science, or any area that is linked to the information sciences.

Research Methods (6 credits). All candidates must develop a basic understanding of the scientific research process, statistical techniques, and research methods utilized in the information sciences.

Thesis (6 credits). All students must write a thesis. The thesis should focus on a well-defined problem relevant to the information sciences. The student must present the thesis in a public presentation and successfully defend the thesis to the adviser and committee.

Language and Communication. All candidates must be competent in the English language and must have demonstrated skills in the communication of ideas both orally and in writing commensurate with the requirement of professional work. The foreign language and communication requirement may be fulfilled through demonstrating computer language proficiency (assessed through courses taken).

M.P.S. Degree Requirements

The Master in Information Sciences program requires a minimum of 33 credits, 24 of which must be earned at Penn State. Up to 9 graduate credits may be transferred in from an accredited institution (as is permissible by the Graduate School). At least 18 credits must be courses at the 500 level and above. A student will first take 9 credits of core courses. The student will then take 12 credits of prescribed courses for the base program or the Information Assurance and Decision Support (IADS) Option. The remaining 9 course credits of electives are chosen in consultation with the student’s advisor. Lastly, the student must complete a master project guided by the student’s advisor. A student can choose to be in the Base Program or in the IADS Option. These credits are distributed among the following requirements:

Core Courses (9 credits). The core of the Master in Information Sciences program consists of four courses -- IST 552 (or INFSY 540), IST 554, IST 562, and IST 594 -- for a total of 12 credits. These courses represent the core technical foundations to study Information Sciences and Technology.

The Base Program (12 credits of prescribed courses and 9 credits of electives). The base program consists of four prescribed (required) courses, IST 516, IST 521 (or IST 522), IST 552 (or IST 531), and IST 564 and 9 credits of elective courses, in addition to the 9-credit core and three-credit capstone course. It is designed for students who do not have a special interest in mind. The elective courses are chosen in consultation with the student’s advisor. Hence, it offers the flexibility that enables the student to build an in-depth knowledge and skills about information sciences tailored to his/her interests and background. Students from Harrisburg region can also select courses from Harrisburg Campus to fulfill the prescribed courses (by substitution) and 9 credits of electives.

Information Assurance and Decision Support (IADS) Option (12 credits of prescribed courses and 9 credits of electives). The IADS option consists of four prescribed (required) courses, IST 515, IST 555, IST/STAT 557 and IST 885, and 9 credits of elective courses, in addition to the 9-credit core and three-credit capstone courses. These courses enable the student to focus on developing knowledge and skills for information analysis, information assurance and decision support including theories, techniques, and applications of data mining, data fusion, information search, information security, and intelligent resource allocation. Students who prefer more flexibility in time and location can take the online courses, offered through World Campus as meeting elective requirements.

Master Project (3 credits). The project requires all students in the Master in Information Sciences program to focus on a well-defined issue or problem relevant to the information sciences and technology. The student will submit a project proposal to his/her faculty advisor for approval. Upon completion of the project, the student will share or present the project results at a final presentation as a component of IST 594.

Language and Communication. All candidates must be competent in the English language and must have demonstrated skills in the communication of ideas both orally and in writing commensurate with the requirement of professional work. The foreign language and communication requirement may be fulfilled through demonstrating computer language proficiency (assessed through courses taken).

Courses

Graduate courses carry numbers from 500 to 599 or 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
Ph.D., M.S.

The Graduate Faculty

- April Armstrong, M.D. (Western Ontario) Assistant Professor of Orthopaedics
- Cynthia Bartok, Ph.D. (Wisconsin) Assistant Professor of Kinesiology
- Kathryn A. Bennett, M.D. (Wright State) Adjunct Assistant Professor of Kinesiology
- W. E. Buckley, Ph.D. (Penn State) Professor of Exercise and Sport Science, and Health Education
- John H. Challis, Ph.D. (Loughborough University of Technology) Professor of Kinesiology
- David E. Conroy, Ph.D. (Utah) Associate Professor of Kinesiology
- Maxe De Souza, Ph.D. (Connecticut) Professor of Kinesiology
- Danielle Symons Downs, Ph.D. (Florida) Associate Professor of Kinesiology
- Mark Dyreson, Ph.D. (Arizona) Professor of Kinesiology
- Robert E. Eckhardt, Ph.D. (Michigan) Professor of Developmental Genetics and Evolutionary Morphology
- Steriani Elavsky, Ph.D. (Illinois) Assistant Professor of Kinesiology
- Jinger S. Gottschall, Ph.D. (Colorado) Assistant Professor of Kinesiology
- Douglas R. Hochstetler, Ph.D. (Penn State) Associate Professor of Kinesiology
- Lacy A. Holowatz, Ph.D. (Penn State) Assistant Professor of Kinesiology
- W. Larry Kenney, Ph.D. (Penn State) Professor of Physiology and Kinesiology
- Donna H. Korzick, Ph.D. (Penn State) Associate Professor of Kinesiology and Physiology
- R. Scott Kretchmar, Ph.D. (Southern California) Professor of Exercise and Sport Science
- Teresa Lang, Ph.D. (Penn State) Research Associate
- Mark L. Latash, Ph.D. (Rush) Distinguished Professor of Kinesiology
- John A. Lucas, Ed.D. (Maryland) Professor Emeritus of Exercise and Sport Science
- Sayers John Miller, Ph.D. (Penn State) Assistant Professor of Kinesiology
- Karl M. Newell, Ph.D. (Illinois) Professor of Kinesiology and Biobehavioral Health
- James A. Pawelczyk, Ph.D. (North Texas) Associate Professor of Physiology and Kinesiology
- Stephen J. Piazza, Ph.D. (Northwestern) Associate Professor of Kinesiology
- David N. Proctor, Ph.D. (Kent State) Professor of Kinesiology
- Robert L. Sainburg, Ph.D. (Rutgers) Professor of Kinesiology
- George F. Salvaterra, Ph.D. (Penn State) Affiliate Assistant Professor of Kinesiology
- Neil A. Sharkey, Ph.D. (California, Davis) Professor of Kinesiology
- Semyon M. Sloboynov, Ph.D. (Illinois) Professor of Kinesiology
- Ronald A. Smith, Ph.D. (Wisconsin) Professor Emeritus of Exercise and Sport Science
- Karl G. Stoedefalke, Ph.D. (Illinois) Professor Emeritus of Exercise and Sport Science
- Kenneth L. Swalgin, Ph.D. (Ohio) Assistant Professor of Kinesiology
- John G. Thompson, Ph.D. (Penn State) Professor of Exercise and Sport Science
- Richard L. Tutwiler, Ph.D. (Penn State) Adjunct Research Associate
- Nancy I. Williams, Sc.D. (Boston U) Professor of Kinesiology
- David Jane Smith, Ph.D. (North Texas State) Affiliate Assistant Professor of Exercise and Sport Science
- Vladimir M. Zatsiorsky, Ph.D. (Central Institute of Physical Culture, Moscow) Professor of Kinesiology

The graduate programs in Kinesiology are research oriented and are designed to meet the specific goals and interests of the student. The primary goal of the overall program is to provide students an opportunity to study in depth one area of specialization and to develop necessary research skills to enhance their professional competence. The master's program is designed to prepare students for future graduate study, while the doctoral program is directed toward careers in research and in teaching at the advanced undergraduate and graduate levels in colleges and universities. Six areas of study are available at both the master's and doctoral levels: (1) athletic training and sports medicine, (2) biomechanics, (3) exercise physiology, (4) history and philosophy of sport, (5) motor control, and (6) psychology of movement and sport. Several well-equipped research facilities are available to support graduate study, including the Biomechanics Laboratory, Motor Behavior Laboratory, and Noll Physiological Research Center.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Scores from the Graduate Record Examinations (GRE) are required for admission. The minimum requirements for admission to the master's program include a 3.00 junior/senior grade-point average (on a 4.00 scale), satisfactory recommendations, a total of 1000 or higher on the verbal and quantitative sections of the GRE, and appropriate background courses in physical, biological, behavioral, and/or social science, depending on the intended area of specialization. Candidates from majors other than exercise and sport science/physical education are welcome to apply. In addition, doctoral applicants are expected to meet more stringent admission standards, including documented research capabilities (e.g., from an M.S. degree). Experience is highly desirable. Admission is highly competitive and the best-qualified students will be admitted subject to space availability and compatibility of the student with the department's research mission.

Master's Degree Requirements

All master's candidates are required to complete a research methods course and an acceptable statistics course; show proficiency in the English language; and write a thesis. In addition, each specialization may require specific courses. All specializations require a minimum of 30 credits.

Doctoral Degree Requirements

A program to meet the individual needs of each student is planned with the adviser in consultation with the doctoral committee members. Students should elect at least 15 credits from courses within the department and at least 6 credits from courses outside the department. It is expected that the depth of knowledge in each area of study comes from independent study and research experiences, in addition to the dissertation, which are under the direction of the faculty. Specific required courses include the Colloquium and Proseminar.

Student Aid

Graduate assistantships that are available to students in this program and other forms of student aid are described in the STUENAT AID section of the Graduate Bulletin.

Courses

The Pennsylvania State University
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:
M.S.

Graduate Faculty

- Catherin S. Beckwith, D.V.M. (Illinois), Ph.D. (Missouri) Associate Professor of Comparative Medicine
- Xuwen Peng, D.V.M. (Huazhong Agricultural U), Ph.D. (Penn State) Associate Professor of Comparative Medicine
- Ronald P. Wilson, V.M.D. (Pennsylvania) Professor and Chair of Comparative Medicine

All students entering the program must have completed a professional degree program in veterinary medicine and must hold the degree of D.V.M., V.M.D., or equivalent.

The Department of Comparative Medicine is a basic science, academic department of the College of Medicine. It is concerned with the range of variation of normal and abnormal structure, function, and behavior in a variety of species of animals used for teaching, testing, and research. Its faculty, staff, and students work in a multidisciplinary and collaborative fashion with all other departments in the college to advance the research mission.

Graduate study in laboratory animal medicine consists of advanced training in biology, medicine and methodology pertinent to animal-based research, and the development of scholarship and research capabilities within the specialty. The general plan is one that provides a broad, basic foundation upon which the individual can build a career in teaching and research and/or in the professional direction of research animal facilities.

The curriculum of this training program includes:

First Year:

**COMPARATIVE MEDICINE (C MED)**

501. Biology and Care of Laboratory Animals (3)
503. Laboratory Animal Genetics (3)
507. Techniques of Laboratory Animal Experimentation (3)
515. Experimental Surgery of Laboratory Animals (3)
530. Diseases of Laboratory Animals I (3)
531. Diseases of Laboratory Animals II (3)
535. Comparative Pathology (3)
590. Colloquium (1 credit per semester)
650. (3)

**INTEGRATED BIOSCIENCES (IBIOS)**

591. Ethics in the Life Sciences (1)

*Courses offered every other year on an alternating basis; thus students entering program on even numbered years will take during second year.

Second Year:

**COMPARATIVE MEDICINE (C MED)**

590. Colloquium (1 credit/semester)
600. Research project for M.S. thesis (6-9)

This program is offered only at the Penn State Milton S. Hershey Medical Center.

Language Science

PHILIP BALDI, Director
Program in Linguistics
323 Weaver Building
814-865-7891
phb@psu.edu

Degrees Conferred
Students electing this degree program through participating programs earn a degree with a dual-title at the Ph.D. level, i.e., Ph.D. in (graduate program name) and Language Science.

The following graduate programs offer dual degrees in Language Science: German and Psychology.

The Graduate Faculty
Marc Authier (University of Southern California) Associate Professor of French and Linguistics
*Philip Baldi (University of Rochester), Professor of Linguistics and Classics
*Paola Dussias (University of Arizona) Associate Professor of Spanish, Psychology and Linguistics
*Henry Gerfen (University of Arizona) Associate Professor of Spanish and Linguistics
*Carrick Jackson (University of Wisconsin) Assistant Professor of German and Linguistics
*Judith Kroll (Brandeis University) Distinguished Professor of Psychology, Linguistics, and Women's Studies
*Ping Li (Leiden University) Professor of Psychology and Linguistics
*John Lipski (University of California, San Diego) Edwin Erle Starks Professor of Spanish and Linguistics
*Elina Mainela-Arnold (University of Wisconsin) Assistant Professor of Communication Sciences and Disorders and Linguistics
*Carol A. Miller (University of Pennsylvania) Associate Professor of Communication Sciences and Disorders and Linguistics
*Maya Misra (Tufts University) Assistant Professor of Communication Sciences and Disorders and Linguistics
*B. Richard Page (University of Wisconsin) Associate Professor of German and Linguistics
Lisa Reed-Authier (University of Ottawa) Associate Professor of French and Linguistics
Aaron Rubin (Harvard University) Assistant Professor of Classics and Ancient Mediterranean Studies, Jewish Studies and Linguistics
Gonzalo Rubio (Johns Hopkins), Associate Professor of Classics and Ancient Mediterranean Studies and Linguistics
*Nuria Sagarra (University of Illinois) Assistant Professor of Spanish Linguistics and Applied Linguistics
*Robert Schrauf (Case Western Reserve University), Associate Professor of Applied Linguistics
*Susan Strauss (University of California Los Angeles), Associate Professor of Applied Linguistics and Asian Studies
*Janet van Hell (University of Amsterdam) Visiting Professor of Psychology and Linguistics
*Daniel Weiss (Harvard University) Assistant Professor of Psychology and Linguistics

* Member of Center for Language Science

Program Objectives of the Dual-Title Degree in Language Science
A dual-title degree program in participating programs and Language Science will prepare students to combine the theoretical and methodological approaches of several disciplines in order to contribute to research in the rapidly growing area of Language Science. This inherently interdisciplinary field draws on linguistics, psychology, speech-language pathology, and cognitive neuroscience, as well as other disciplines, to address both basic and applied research questions in such areas as first and second language acquisition, developmental and acquired language disorders, literacy, and language pedagogy. Dual-title degree students will receive interdisciplinary training that will enable them to communicate and collaborate productively with a wide range of colleagues across traditional discipline boundaries. Such training will open up new employment opportunities for students and give them the tools to foster a thriving interdisciplinary culture in their own future students. The dual-title program will facilitate the formation of a cross-disciplinary network of peers for participating students as part of their professional development.

The dual-title degree program will not duplicate other degree programs in the University.

Admission Requirements
To pursue a dual-title degree under this program, the student must first apply to the Graduate School and be admitted through one of the participating graduate degree programs (see Appendix E for admissions requirements of potential participating programs). Upon admission to one of the above programs and with a recommendation from a Language Science program faculty member in that department, the student's application will be forwarded to a committee that will include the Director of the Linguistics Program, one of the Co-Directors of the Center for Language Science, and a third elected faculty member within the Center for Language Science. All three committee members will be affiliated with the Program in Linguistics. Upon the recommendation of this committee, the student will be admitted to the dual-title degree program in Language Science.

Doctoral Degree Requirements
The dual-title Ph.D. degree in Language Science will have the following requirements.

Course work (21 credits of 500-level courses)
6 credits, Proseminar in the Language Science of Bilingualism (LING 521), Proseminar in Professional Issues in Language Science (LING 522)
3 credits, Research methods/statistics in Language Science (such as LING 525, PSY 507, PSY 508)
3 credits in theoretical linguistics (students will choose between LING 500 or LING 504)
3 credits, Courses in Psychology (such as PSY/LING 520, PSY 511)
6 credits, Research internships (students will choose one course among the following: CSD 596, GER 596, LING 596, PSY 596, SPAN 596)

Language Science Research Meetings
Students must participate in weekly Language Science Research meetings each semester in residence.

Foreign Language and English Competency Requirements
The student will fulfill the language requirement specified by the participating department through which the student is admitted to the dual-title degree program.

Candidacy Examination
In order to be admitted to doctoral candidacy in the dual-title degree program, students will take a candidacy examination that is administered by the primary program. However, the dual-title degree student may require an additional semester or more to fulfill requirements for the primary program and dual-title program; therefore, the candidacy examination may be delayed. In addition, the student may be required to present a portfolio of work in Language Science to their committee. Such a portfolio would include a statement of the student's interdisciplinary research interests, a plan of future study, and samples of writing that indicate the student's work in Language Science. The candidacy examination committee will be composed of faculty from the primary program, as well as at least one faculty member affiliated with Language Science. The designated Language Science faculty member may be appointed in the student's primary program, but he or she may also hold a formal appointment with Linguistics. The Language Science member will participate in constructing...
and grading candidacy examination questions in the area of Language Science.

**Doctoral Committee Composition**

A doctoral committee consisting of at least four members of the Graduate Faculty must be appointed and will include a representative of the Language Science dual-title program. In addition, an official "outside member" must be appointed as one of the four members. The student’s doctoral committee will include faculty from the primary program as well as faculty from Language Science. Faculty members who hold appointments in both the primary program and Language Science may serve in a combined role.

**Comprehensive Examination**

The student's doctoral committee will include faculty from the primary program as well as faculty from Language Science. Faculty members who hold appointments in both the primary program and Language Science may serve in a combined role. The Language Science representative(s) will help to insure that the field of Language Science is integrated into the comprehensive examination.

**Dissertation**

**Linguistics Minor**

The doctoral minor provides interested students with an opportunity to complete a program of scientific study focused on the nature, structure, and use of human language. The minor is designed to cover the foundations of the discipline of linguistics by reviewing fundamental core areas such as phonology and syntax. Course work is also available in many additional areas of linguistics such as semantics, morphology, language variation, historical linguistics, and discourse analysis.

The minor requires a minimum of 15 credits, 6 of which must be at the 500 level. Nine credits are prescribed in syntax (LING 402), phonology (LING 404), and a general introduction to linguistics (LING 401), although a linguistics course at the 500 level may be substituted for LING 401 with the approval of the director of the program in Linguistics.

**Student Aid**

Most students will be funded through their primary departments, and will be considered for graduate assistantships according to the procedures of those departments. The Center for Language Science currently has two graduate assistantships for which dual-title degree students will be eligible.

Degree Conferred:
- M.L.A., M.S.

The Graduate Faculty
- Peter J. Aeschbacher, M.Arch., M.U.P. (UCLA) Assistant Professor of Landscape Architecture
- C. Timothy Baird, M.L.A. (Pennsylvania) Associate Professor of Landscape Architecture
- Mallika Bose, Ph.D. (Wisconsin) Associate Professor of Landscape Architecture
- Caru Bown, Ph.D. (California, Davis) Assistant Professor of Landscape Architecture
- Sean Burkholder, M.L.A. (Harvard) Assistant Professor of Landscape Architecture
- Andrew Cole, Ph.D. (Southern Illinois) Assistant Professor of Landscape Architecture and Ecology
- Stuart Echols, Ph.D. (Virginia Tech) Assistant Professor of Landscape Architecture
- Kelleaon Foster, M.L.A. (Massachusetts) Associate Professor of Landscape Architecture
- Larry Gorenflo, Ph.D. (UCSB) Associate Professor of Landscape Architecture
- Ronald E. Henderson, M.L.A. (Pennsylvania) Professor of Landscape Architecture and Asian Studies; Chair in Integrative Design
- Timothy P. Johnson, M.L.A. (Ohio State) Associate Professor of Landscape Architecture
- Gary B. Kessler, M.L.A. (Harvard) Associate Dean Undergraduate Studies, College of Arts and Architecture and Associate Professor of Landscape Architecture
- Barry W. Kew, M.L.A. (Virginia) Assistant Professor of Landscape Architecture
- Neil P. Korostoff, M.L.A. (Pennsylvania) Associate Professor of Landscape Architecture
- Timothy M. Murtha, Ph.D. (Penn State) Assistant Professor of Landscape Architecture
- Brian A. Orland, M.L.A. (Arizona) Professor of Landscape Architecture
- M. Eliza Pennypacker, M.L.A. (Virginia) Professor of Landscape Architecture
- Made Pihlak, M.L.A., M.C.P. (California, Berkeley) Associate Professor of Landscape Architecture and Architecture
- Cecilia Rusnak, M.A. (Iowa) Associate Professor of Landscape Architecture
- Bon Szczypiel, M.L.A. (Penn State) Associate Professor of Landscape Architecture
- Ken Tamminga, M.P.L. (Queen's) Professor of Landscape Architecture
- Thomas C. Yahner, M.L.A. (Penn State) Associate Professor of Landscape Architecture

M.L.A. (Professional Degree)
The M.L.A. program is an accredited professional degree program focused on preparation to practice landscape architecture for students who hold a bachelor's degree in another field.

M.S. in Landscape Architecture (Research Degree)
The M.S. in Landscape Architecture program is a research focused degree program designed to offer students graduate level research inquiry into landscape architecture for students who hold a bachelor's degree.

Admission Requirements
Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

To be admitted to the program, applicants must be able to meet the following requirements:
- For admission to the M.L.A. applicants must have completed a bachelor's degree from any discipline prior to entry into the M.L.A. program.
- For admission to the M.S. in Landscape Architecture, applicants must have completed a bachelor's degree in Landscape Architecture or a closely related discipline (e.g., geography, ecology, and anthropology).

All submissions for admission must include:
1. A graduate school application
2. Evidence of creativity (portfolio or other), evidence of analytical ability (research paper or other), and an essay explaining why the individual seeks to study landscape architecture at Penn State
3. Official undergraduate transcript
4. GRE scores
5. TOEFL scores (see below)
6. 3 letters of recommendation

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination, are required for admission. At the discretion of the program, a student may be admitted provisionally for graduate study without these scores.

Students with a 3.00 junior/senior average (on a 4.00 scale) will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

M.L.A. Degree Requirements
The M.L.A. curriculum requires completion of 49 credits of graduate work at the 400-level and above, including a minimum of 44 credits at the 500-level and above. In addition, to fulfill the requirements of professional accreditation, students must undertake 34 credits of prerequisite classes.

Requirements for professional accreditation:

LANDSCAPE ARCHITECTURE (LARCH)
060. History of Landscape Architecture (3)
065. Built Environment and Culture (3)
231. Introduction to Design Implementation (3)
232. Landscape Architectural Design Implementation I (3)
241. Vegetation Ecology and Landscape Design (3)
251. Design Visualization and Graphics I (3)
272. Landscape Architecture Field Trip I (1)
331. Landscape Architectural Design Implementation II (3)
332. Landscape Architectural Design Implementation II (3)
341. Plants, People and Place: Plants in Landscape Architectural Design (3)
361W. Historic Issues in Landscape Architecture (3)
382. Professional Practice (3)

The Pennsylvania State University
Core Requirements for the Graduate Degree:

LANDSCAPE ARCHITECTURE (LARCH)
414. Design and Theory V: Advanced Landscape Architectural Design (10)
502. Intellectual History and Theory of Landscape Architecture (3)
510. Graduate Seminar in Landscape Architecture (3)
515. Design and Theory I - Introduction (5)
520. Design and Theory II (5)
530. Design and Theory III (5)
540. Design and Theory IV (5)
550. Graduate Studio IV (7)
590. Colloquium (6)

Student Aid
Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

M.S. in Landscape Architecture Degree Requirements

The core curriculum is a two-year research focused 40 credit minimum program including a minimum of 18 credits at the 500-level and above. Students are required to take graduated level coursework, including graduate seminars (12 credits), graduate colloquium (4 credits), research design (3 credits), and a course in quantitative/qualitative analysis (3 credits minimum). Students must also complete a M.S. Thesis.

Core graduate requirements:
LANDSCAPE ARCHITECTURE (LARCH)
501. Research Writing in Landscape Architecture (3)
502. Intellectual History and Theory of Landscape Architecture (3)
510. Graduate Seminar (12)
590. Graduate Colloquium (4)
650. Thesis Research (1 - 15)

The student and the student's adviser, subject to the approval of the departmental Graduate Program Committee, determine specific course requirements.

Option 1: M.S. in Landscape Architecture (Community and Urban Design)

The Community and Urban Design (CUD) Option provides students with in-depth inquiry into the theory and practice of community-based and urban design that responds to trends related to urban growth and change, the rise of the non-profit sector in community governance, and poverty and environmental degradation in urbanized and urbanizing areas. The intent of the CUD Option is to introduce students to theory, methods, and research surrounding specific topics in CUD. Students undertake hands-on design work and research as well as coursework in methods and computer applications, planning and policy, and ethics and society.

The CUD Option offers a topical curricular "track" within the M.S. in Landscape Architecture program. The core degree requirements for the CUD Option are the same as for the M.S.- 40 credits, comprising seminars, electives, design, and research, but focuses student core seminars and methods on CUD specific courses. Twenty-four credits of the following coursework must be completed for the CUD option:

- Depth and Hands-on Experience in Design and Research Inquiry
- 9 credits of breadth at 400-500 level are required in the following subject areas:
  - 3 credits in Methods and Computer Applications
  - 3 credits in Community and Urban Design in Planning
  - 3 credits in Ethics and Society

Additional CUD-oriented breadth electives are recommended, but optional, within the remaining elective credits required in the M.S. in Landscape Architecture.

Students are expected to complete the requirements of the M.S. in Landscape Architecture with CUD option in four semesters.

Option 2: M.S. in Landscape Architecture (Watershed Stewardship)

The pedagogic foundation of the Graduate Option in Watershed Stewardship is the integration of depth, breadth, and experience for each student. From their undergraduate background students will bring a focus which will be enhanced via graduate level coursework in their field. They will also be required to take graduate courses in watershed-related disciplines outside their own major: the breadth requirements. And through community focused experience of at least 8 credits of Keystone Projects (FOR 570 and FOR 571) and at least 2 credits of seminars (LARCH 510 or FOR 591A and FOR 591B), students will be challenged to analyze and understand watersheds and creatively synthesize community-appropriate solutions.

The degree requirements for Graduate Option in Watershed Stewardship are the same as those for the Master of Science in Landscape Architecture degree program with the addition of a minimum of 2 credits of FOR 591A and FOR 591B. Students are required to take graduated level coursework, including graduate seminars (12 credits), graduate colloquium (4 credits), research design (3 credits), and a course in quantitative/qualitative analysis (3 credits minimum). Students must also complete a M.S. Thesis.

Students in the Graduate Option in Watershed Stewardship will be required to take a minimum of 9 credits of elective course work to ensure breadth of training in essential watershed stewardship subjects. Three credits of 400- or 500-level course work will be required from each of the following three subject categories: (1) Water Resources Sciences, (2) Social Science, Public Policy, or Economics, and (3) Humanities.

Student Aid
Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

TOEFL Information
The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the Internet-based test (iBT). Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5.

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:
M.L.D.

The Graduate Faculty

- Janice L. Dreachslin, Ph.D. (Wayne State) Professor of Health Policy and Administration
- Janet M. Duck, Ph.D. (Penn State) Assistant Professor of Management and Organization
- Kathryn Jablonski, Ph.D., Ph.D. (Ohio State) Associate Professor of Engineering
- Barrie I. Litzy, Ph.D., Ph.D. (Drexel) Associate Professor of Management and Organization
- Denise Potosky, Ph.D. (Rutgers) Associate Professor of Management and Organization
- John J. Sosik, Ph.D. (SUNY, Binghamton) Professor of Management and Organization
- Eric W. Stein, Ph.D. (Pennsylvania) Associate Professor of Management Science and Information Systems

The Penn State Great Valley Master of Leadership Development (MLD) program is a 36-credit interdisciplinary professional program that blends the social and behavioral sciences with ethical studies to develop outstanding organizational and community leaders. As part of the School's Management Division, the program is accredited under the specialized accreditation received from the Association to Advance Collegiate Schools of Business International (AACSB). The program is designed to meet the educational needs of professionals at the middle to senior levels of management. Note that the focus of this program is different from that of the MBA offered by the School: While the MBA program provides an overview of leadership, the purpose of the MLD program is to provide an in-depth analysis of the theory and practice of authentic transformational leadership by providing an environment in which faculty and students can have a complete and open collaboration on what constitutes exemplary leadership. The MLD curriculum emphasizes strategic leadership and the creation of wealth in organizations, balancing financial measure of performance with learning and growth, and customer and external process perspectives. The program builds on the mid- and high-level managerial and administrative experience of students in order to achieve its goal of promoting positive change in individuals, teams, organizations, and communities.

The program provides training in leadership-relevant research, and some students continue on to pursue a doctoral degree. Required research may be conducted in Penn State Great Valley's Library and Computer Center, which provides local research support as well as access to the library and computer resources of the entire Penn State system.

The MLD program is geared primarily toward the needs of part-time students who are employed full-time. Courses in the program, which are offered at Great Valley, are scheduled for the convenience of adult learners, mainly in the evening or on Saturdays.

Admission Requirements

Admission is granted only to candidates who demonstrate high promise of success for graduate work. Requirements listed here are in addition to the Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

An undergraduate and/or graduate GPA of at least 3.0 on a 4.0 scale is required for admission. It is strongly preferred that applicants present at least five years of related professional work experience.

All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) and receive a minimum of 570 (paper score), or 230 (electronic score), or 80 points on the new Internet-based test with a minimum of 23 points on the speaking portion; or the International English Language Testing System (IELTS) with a minimum composite score of 6.5 for admission and submit the results of that test with the application for admission.

Admission decisions are based on a review of the applicant's professional and academic accomplishments as presented in the Admissions Dossier and the quality of the applicant's credentials in relation to those of other applicants who meet the requirements for admission. A complete Admissions Dossier includes the following:

- Online application and non-refundable application fee;
- current resume, preferably indicating at least five years of related work experience;
- two official transcripts from each regionally-accredited college or university attended, (both undergraduate and graduate), with credit conditions equivalent to those required by Penn State; or a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution;
- completion of two 300-word leadership essay questions developed by the faculty to assess an applicant's logical reasoning and writing skills;
- two confidential evaluation forms/letters of endorsement from executives or community leaders detailing their evaluation of the applicant's leadership ability and potential.

Application Filing Dates: Penn State Great Valley's MLD program has a rolling admissions policy. Students may be admitted and enroll in classes in early September or early January. More detailed information about the program may be found at http://www.sgps.psu.edu/prospective/academicprograms/leadership/mld/admission.aspx. More detailed information about the application process and the application requirements may be found at http://www.sgps.psu.edu/prospective/academicprograms/leadership/mld/admission.aspx.

Degree Requirements

Thirty-six (36) credits are required to complete the MLD degree. A series of leadership cornerstone courses (12 credits) and leadership competency courses (9 credits) are required to provide all MLD students with a common body of knowledge. Leadership Context courses (12 credits) and a Capstone course (3 credits) round out the program.

Leadership Cornerstone courses (12 credits) provide a foundation for leadership development studies. They include: LEAD 501 (Leadership Across the Lifespan), BUSAD 555/LEAD 555 (Full-Range Leadership Development), BUSAD 556/LEAD 556 (Diversity Leadership), and LEAD 557 (Leadership Models and Methods).

Leadership Competency courses (9 credits) build a foundation for effective leadership communication, creativity/innovation, and moral development. They include: LEAD 561 (Dynamic Communication in Leadership Contexts), [MGMT 573 (Corporate Innovation Strategies or SYSEN 550 (Creativity, Innovation, and Change) or BUSAD/LEAD 519 (Developing Creative High Performance Organizations)], and [BUSAD 534 (Ethical Dimensions of Management in the Biotechnology and Health Industry) or PHIL 597 (Ethical Dimensions of Leadership) or BUSAD 576 (Ethical Issues in Information Technology)].

Leadership Context courses (12 credits) provide an overview of the situations in which leadership processes are embedded. They include: LEAD 562 (Strategic Leadership), [BUSAD 551 (Business Environment) or BUSAD 530 (Biotechnology and Health Industry Overview)], and a choice of 2 context-specific electives (6 credits).

All students must complete a capstone course that provides students with an opportunity to enact what they have learned in their course work in the context of promoting positive change in their community. LEAD 582 (Social Entrepreneurship and Community Leadership).

The Pennsylvania State University
Student Aid

There are a limited number of scholarships, fellowships, and graduate assistantships available. For more information on these, contact the Financial Aid Office at Penn State Great Valley.

Most students work full-time and take classes part-time. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition. To learn more about payment options for students who receive employer tuition reimbursement benefits, or for more information on other payment options that may be available to you, contact the Great Valley Financial Aid Office, 610-848-3311.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:
M.Ed.

The Graduate Faculty
- Ann L. Berger-Knorr, Ph.D. (Penn State) Assistant Professor of Reading
- Shanetia P Clark, Ph.D. (Penn State) Assistant Professor of Education
- Barbara A. Marinsk, Ph.D. (Maryland) Assistant Professor of Reading Education
- Mary Napoli, Ph.D. (Penn State) Assistant Professor of Education

The Master of Education in Literacy Education at Penn State Harrisburg is designed to provide full-time and part-time graduate students with a focused program of study in the field of reading education. The program is aligned with the standards of the Pennsylvania Department of Education. Following successful completion of the program, students are eligible to take the Praxis examination for certification as a reading specialist (K-12). Specifically, the goals of the program are to develop in students: (1) specialized, in-depth knowledge about the teaching of reading and writing; (2) the clinical skills necessary for diagnosing and intervening with reading disabled students; (3) the ability to interpret and to evaluate literacy research; (4) the literacy leadership skills necessary to support the professional practices in a K-12 setting; (5) provide rigorous offerings aligned with the standards of the International Reading Association (IRA) and the National Council for the Accreditation of Teacher Education (NCATE); and (6) prepare students for the complexities they will face as reading specialists in schools serving the K-12 population.

Admission Requirements
Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Admissions
The M.Ed. Program in Literacy Education has five important admission requirements.

First, candidates must have achieved an overall junior/senior grade point average of 3.00 or higher. For candidates applying for admission who have completed credits beyond the baccalaureate degree, we will evaluate the last (approximately) 60 credits completed.

Second, candidates must submit two letters of recommendation. These letters must be from former professors who can attest to the academic ability and potential of the candidate.

Third, candidates must submit a 200-300 word personal statement that addresses their career goals and reasons for pursuing a graduate degree.

Fourth, candidates must have a valid Pennsylvania Teaching Certificate and present evidence that they have completed a course in the methods of teaching reading such as EDUC 320 (Methods in Teaching Beginning Readers) or 321 (Methods in Teaching Intermediate and Advanced Readers) with a grade of C or better.

Fifth, candidates must submit test scores from one of the following: Graduate Record Examination, Miller Analogies Test, or Praxis examinations completed for certification. In addition, the language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer based test, or a total score of 80 with a 20 on the speaking section for the internet-based test. The minimum composite score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a masters degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States and Wales.

Retention
Candidates must maintain a minimum 3.00 grade point average, satisfactorily complete all required key assessments, attain a grade of "C" or better in all required core courses. Candidates who do not make satisfactory progress will be notified in writing noting the specific deficiencies and requesting that they meet with the program coordinator to develop a remediation plan. Failure to meet or to satisfactorily complete the remediation plan will result in termination from the program.

All persons enrolled in Teacher Education Programs at Penn State Harrisburg are expected to demonstrate the professional dispositions that are aligned with the unit’s vision statement. The faculty shall evaluate the approved dispositions demonstrated by the candidates in class and during field experiences.

Candidates may be rated as exemplary, acceptable, or unacceptable. Candidates are expected to attain acceptable or exemplary ratings in order to graduate.

Degree Requirements
The Master of Education degree in Literacy Education consists of 42 credits that prepare candidates for the Pennsylvania Reading Specialist Certification (K-12). The degree requirements for the Master of Education in Literacy Education includes 36 credits in foundational, pedagogical, and advanced theoretical work in reading, writing and educational research design and a 6 credit capstone clinical practicum for a total of 42 credits. A minimum grade-point average of 3.00 for work done at the University and acceptable or higher ratings on the professional dispositions are required for graduation.

Prescribed Core Course Requirements (39 Credits)

EDUCATION (EDUC)
422. Literature for Children and Adolescents (3)
425. Literacy Assessment (3)
452. Teaching Writing (3)
466. Foundations of Teaching English as a Second Language (3)
471. Best Practices in Literacy (3)
477. Teaching Struggling Readers and Writers (3)
561. Psychology of Reading (3)
562. Diagnostic Evaluation of Reading Problems (3)
563. Advanced Methods of Teaching Reading (3)
564. Reading Clinic (6)
565. Literacy Leadership (3)
586. Educational Research Designs (3)
Electives

(Choose 3 credits from the following)
Students can choose either one of two electives in the program. Both elective courses (ENGL 409 or EDUC 432) require specialized study in the teaching of writing. ENGL 409 (taken concurrently with EDUC 452) will allow the student to complete a writing fellowship with the Capital Area Writing Project. Or, EDUC 432 allows for the in-depth study of writing through children's literature.

EDUC 432 Children's Literature in the Writing Curriculum (3)
ENGL 409 Composition Theory and Practice for Teachers (3)

Transfer Credits

Subject to the limitations given below, a maximum of 10 credits of high-quality graduate work done at a regionally accredited institution may be applied toward the requirements for the master's degree. However, credits earned to complete a previous master's degree, whether at Penn State or elsewhere, may not be applied to a second master's degree program at Penn State. The student should distinguish carefully between the transferability of credit and its applicability in a particular degree program. Approval to apply any transferred credits toward a degree program must be granted by the student's academic adviser, the program head or graduate officer, and the Graduate School. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School of Penn State, must be of at least B quality (grades of B- are not transferable), and must appear on an official graduate transcript of an accredited university. Pass-fail grades are not transferable to an advanced degree program unless the "Pass" can be substantiated by the former institution as having at least B quality.

A maximum of 15 graduate credits taken as a nondegree student prior to admission to a graduate degree program may be applied to a graduate program, with departmental approval. The credits must have been earned within five years preceding entry into the degree program.

Forms for transfer of credit can be obtained from the Office of Graduate Enrollment Services, 114 Kern Building.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit courses below the 400 level in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

KAREN A. THOLE, Head of the Department of Mechanical and Nuclear Engineering
137 Reber Building
814-865-2519

Degrees Conferred:

- Ph.D., M.S.
- Integrated B.S. and M.S. in Mechanical Engineering

The Graduate Faculty

- Cari Bryant Arnold, Ph.D. (Missouri-Rolla) Assistant Professor of SEDTAPP; Assistant Professor of Mechanical Engineering
- Ashok D. Belegundu, Ph.D. (Iowa) Professor of Mechanical Engineering
- Andre L. Boehman, Ph.D. (Stanford) Professor of Fuel Science, and Materials Science and Engineering
- James G. Brasseur, Ph.D. (Stanford) Professor of Mechanical Engineering, Bioengineering, and Mathematics
- Jack S. Brenizer, Ph.D. (Penn State) Professor of Mechanical and Nuclear Engineering
- Seongmin Cho, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of Mechanical Engineering
- Liming Chang, Ph.D. (Illinois) Professor of Mechanical Engineering
- Fan-Bill Cheung, Ph.D. (Notre Dame) Professor of Mechanical Engineering
- Jinho Cho, Ph.D. (Cal Tech) Professor of Mechanical Engineering
- Stephen A. Copley, Ph.D. (California, Berkeley) Senior Scientist, Applied Research Laboratory
- Edward C. De Meter, Ph.D. (Virginia Tech) Professor of Mechanical Engineering and Industrial Engineering
- Miro J. Fiser, Ph.D. (Michigan) Professor of Mechanical Engineering
- Amanul Haque, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of Mechanical Engineering
- Daniel C. Haworth, Ph.D. (Cornell) Professor of Mechanical Engineering
- Jun (Tony) Huang, Ph.D. (California, Los Angeles) Associate Professor of Engineering Science and Mechanics
- Thomas G. Hughes, Ph.D. (Penn State) Senior Research Associate, Applied Research Laboratory
- Thomas A. Izquierdo, Ph.D. (Princeton) Professor of Mechanical Engineering
- Lyle N. Long, Ph.D. (George Washington) Distinguished Professor of Aerospace Engineering
- Eric R. Marsh, Ph.D. (MIT) Professor of Mechanical Engineering
- Matthew M. Mench, Ph.D. (Penn State) Associate Professor of Mechanical Engineering
- Panagiotis Michaleris, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of Mechanical Engineering
- Timothy F. Miller, Ph.D. (Penn State) Senior Research Associate, Applied Research Laboratory
- Eric M. Mockensturm, Ph.D. (California, Berkeley) Associate Professor of Mechanical Engineering
- Michael F. modest, Ph.D. (California, Berkeley) Professor of Mechanical Engineering
- Matthew B. Parkinson, Ph.D. (Michigan) Assistant Professor of SEDTAPP; Assistant Professor of Mechanical Engineering
- Scott B. Peterson, Ph.D. (Iowa) Senior Research Associate, Applied Research Laboratory
- Laura L. Pauley, Ph.D. (Stanford) P.E. Professor of Mechanical Engineering
- Henry L. Raff, Ph.D. (Illinois, Urbana-Champaign) Professor of Mechanical Engineering
- Stephen J. Piazza, Ph.D. (Northwestern) Associate Professor of Mechanical Engineering, Bioengineering, and Mechanical Engineering
- Christopher D. Paine, Ph.D. (California, Berkeley) Professor of Mechanical Engineering
- Akos Rayn, Ph.D. (Northern Illinois) P.E. Distinguished Professor of Mechanical Engineering
- Domenic A. Santavicca, Ph.D. (Princeton) Professor of Mechanical Engineering
- Robert J. Santoro, Ph.D. (Boston College) George L. Guillet Professor of Mechanical Engineering
- Frank W. Schmitt, Ph.D. (Wisconsin) Professor Emeritus of Mechanical Engineering
- Gary S. Settles, Ph.D. (Penn State) Professor of Mechanical Engineering
- Alok Sinha, Ph.D. (Carnegie Mellon) Professor of Mechanical Engineering
- H. Joseph Sommer III, Ph.D. (Illinois, Urbana-Champaign) Professor of Mechanical Engineering
- Jelena Srbic, Ph.D. (MIT) Adjunct Professor of Mechanical Engineering; Associate Professor of Architectural Engineering
- Gita Talmage, Ph.D. (Illinois, Urbana-Champaign) Professor of Mechanical Engineering
- Karen A. Thole, Ph.D. (Princeton) Distinguished Professor of Mechanical Engineering
- Stefan T. Thynell, Ph.D. (North Carolina State) Professor of Mechanical Engineering
- Martin W. Trethewey, Ph.D. (Michigan Tech) Professor of Mechanical Engineering
- Stephen R. Turns, Ph.D. (Wisconsin) Professor of Mechanical Engineering
- Adria van Duin, Ph.D. (Delft U of Tech, The Netherlands) Associate Professor of Mechanical Engineering
- James C. Wambold, Ph.D. (New Mexico) Professor Emeritus of Mechanical Engineering
- Chao-Yang Wang, Ph.D. (Iowa) Professor of Mechanical Engineering and Materials Science
- Donghai Wang, Ph.D. (Tulane) Assistant Professor of Mechanical Engineering
- Kon-Well Wang, Ph.D. (California, Berkeley) Professor Emeritus of Mechanical Engineering
- Gao Wang, Ph.D. (Princeton) Assistant Professor of Mechanical Engineering
- Ralph L. Webb, Ph.D. (Minnesota) Professor Emeritus of Mechanical Engineering
- David N. Wermeling, Ph.D. (MIT) Harold and Inge Marcus Dean of Engineering; Professor of Mechanical Engineering
- John Wyngaard, Ph.D. (Penn State) Professor of Meteorology, Geo-Environmental Engineering, and Mechanical Engineering
- Vigor Yang, Ph.D. (Cal-Tech) Distinguished Professor of Mechanical Engineering
- Steven Y. Yuzkurt, Ph.D. (Stanford) Professor of Mechanical Engineering
- Richard A. Yetter, Ph.D. (Princeton) Professor of Mechanical Engineering

Graduate programs and research facilities are available in combustion, heat transfer, fluid mechanics, dynamic system analysis, robotics, mechanical design, and energy systems. Air pollution control, automotive safety, tribology, designing for noise control and for reliability also provide many research and design opportunities.

Admission Requirements

Admission to the program is quite competitive. Entering students must hold a B.S. degree in engineering or physical science. Students with 3.0 or better (out of 4.0) junior/senior cumulative grade-point averages and appropriate course backgrounds will be considered for admission. The best-qualified applicants will be admitted. In addition, scores from the Graduate Record Examinations (GRE) are required. To qualify for admission, an international student must achieve a minimum score of 550 on the paper-based Test of English as a Foreign Language (TOEFL), or a minimum score of 213 on the computer-based test. Letters of recommendation and a statement of purpose written by the applicant are also required to complete the application package.
Degree Requirements

The M.S. degree program is designed for students to gain advanced knowledge for research, analysis, and design in mechanical engineering. Students pursuing an M.S. degree may choose one of two options: completion of 24 course credits and the submission of a thesis (6 credits) to the Graduate School, or 30 course credits and the submission of a scholarly paper to the department. A Ph.D. thesis proposal may serve as the paper, provided the student has passed the Ph.D. candidacy examination.

Continuous registration is required of all Ph.D. graduate students until the thesis is approved.

The Ph.D. program emphasizes scholarly research and helps students prepare for research and related careers in industry, government, and academia. Students are admitted to candidacy after passing written and oral examinations. The Ph.D. program is quite flexible, with minimal formal requirements. The Ph.D. is awarded upon completion of a program of advanced study that includes a minimum period of residence, a satisfactory thesis, and the passing of comprehensive and final oral examinations as determined by the student’s doctoral committee.

Generally, a Ph.D. student must have 30 credits above a master's degree before taking the comprehensive examination.

Integrated B.S. and M.S. in Mechanical Engineering

A limited number of undergraduate students in the B.S.M.E. program will be considered for admission to the integrated undergraduate/graduate program leading to the B.S.M.E. and the M.S.M.E. degrees. Students with a junior standing in the B.S.M.E. degree program may be admitted to the integrated B.S.M.E./M.S.M.E. program, following a positive review of an application specific to this program by the faculty committee on graduate admissions. Students must have attained a GPA of at least 3.0. Students admitted to the integrated program must maintain a GPA in all classes used toward the M.S.M.E. degree of at least 3.0.

Student Aid

Graduate students are supported by a variety of government and industry fellowships, traineeships, and research and teaching assistantships. Stipends vary depending on the source. Competition for support is extremely keen; however, outstanding students are considered for attractive offers of support, including various fellowships specifically for new students in the College of Engineering. By completing the department’s application for financial assistance, you will automatically be considered for a graduate assistantship. To receive full consideration for financial aid, all application materials should be submitted by January 15.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Kathleen Mulder, Ph.D. (SUNY, Buffalo) Professor of Pharmacology
- Chris Mullin, Ph.D. (Cornell) Professor of Insect Toxicology
- Curtis J. Omiecinski, Ph.D. (Univ of Washington) Professor of Veterinary and Biomedical Sciences
- Andrew Patterson, Ph.D. (NCI and George Washington) Assistant Professor of Molecular Toxicology
- Gary Perdue, Ph.D. (Oregon State) Distinguished Professor of Molecular Toxicology
- Jeffrey M. Peters, Ph.D. (California, Davis) Associate Professor of Molecular Toxicology
- Chenna Reddy, Ph.D. (Indian Inst of Science) Distinguished Professor and Head of Veterinary and Biomedical Sciences
- John Rich, Ph.D. (Louisville) Professor of Health Evaluation Sciences
- Gavin Robertson, Ph.D. (California, Riverside) Assistant Professor of Pharmacology
- Thomas Spratt, Ph.D. (Chicago) Associate Professor of Biochemistry and Molecular Biology
- Chen-Pei David Su, Ph.D. (Cornell) Professor of Biochemistry and Molecular Biology
- John Vanden Heuvel, Ph.D. (Wisconsin) Associate Professor of Molecular Toxicology
- Kent Vrana, Ph.D. (Louisiana State) Professor and Chair of Pharmacology
- Jong Yoon, Ph.D. (Case Western Reserve) Assistant Professor of Pharmacology
- Jiuye Zhu, Ph.D. (Dartmouth Medical School) Assistant Professor of Cellular and Molecular Physiology

The Intercollege Graduate Degree Program in Molecular Toxicology (IGDP in MT) prepares graduates for diverse opportunities in academic institutions, pharmaceutical companies, private research foundations, governmental research, and regulatory programs. The program includes faculty from eight departments in the College of Agricultural Sciences, Health and Human Development and Eberly College of Science at the University Park campus and the College of Medicine at the Penn State Milton S. Hershey Medical Center. The IGDP in MT is also supported by the Huck Institutes of Life Sciences, which provides modern telecommunications facilities and sophisticated equipment for state-of-the-art research applications. Doctoral students not only explore new conceptual connections, but also engage in active group-learning experiences and explore a variety of potential career opportunities before graduation. Two unique aspects are (1) optional dual mentors will expose students to complementary viewpoints and encourage students to pursue problems at the interface between traditional disciplines, and (2) an optional internship will provide a mechanism for students to obtain “real world” experience in future professional settings.

General Admission Requirements

M.S. or Ph.D. degrees

Application deadline is January 10 for priority consideration.

1. Completed official Penn State Graduate School application
2. Paid nonrefundable application fee
3. Two official transcripts from each institution attended
4. Application for a U.S. visa (international applicants only)
5. Graduate Record Examinations (GRE) general test
6. Three letters of recommendation
7. Statement of goals that pertains to the life sciences
8. International applicants whose first language is not English or who have not received baccalaureate or master’s degrees from an institution in which the language of instruction is English, must take the TOEFL (Test of English as a Second Language) and submit the results of that test with the application. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the internet-based test with a minimum of 23 points on the speaking portion is required for admission.
9. Students must have completed a bachelor’s degree at an accredited college or university and have a minimum of a 3.0/4.0 junior/senior undergraduate grade-point average.

Additional English Requirement for International Students (both M.S. and Ph.D.)

International applicants whose first language is not English or who have not received baccalaureate or master’s degrees from an institution in which the language of instruction is English, whether or not they hold a teaching assistantship, will be required to take the AEOPCT (American English Oral Communicative Proficiency Test) prior to entering the classroom. The AEOPCT is given at the beginning of fall and spring semesters. All international students are required to preregister for this test. This test is administered at the University Park campus, thus students from the Hershey campus are required to take the test at the University Park campus. Below is the course of action for the score ranges:

- Greater than 250 approved for teaching and the ESL (English as a Second Language) requirement will be satisfied.
**Program Requirements**

### M.S. or Ph.D. degrees

1. Foundation of basic knowledge in molecular biology, cell biology, biochemistry, and molecular toxicology. The IGDP in MT requires at least 9 credits in one or more disciplines, taken either as an undergraduate or as a part of the graduate curriculum. The following courses are requirements for respective campuses.

#### University Park students

**BIOCHEMISTRY AND MOLECULAR BIOLOGY (B M B)**
- 400. MOLECULAR BIOLOGY OF THE GENE (3 credits)
- 403. MOLECULAR TOXICOLOGY (3 credits)

**VETERINARY AND BIOMEDICAL SCIENCES (VB SC)**
- 433. MOLECULAR TOXICOLOGY (3 credits)

**VETERINARY SCIENCE (V SC)**
- V SC/IBIOS 530. REGULATION OF GENE EXPRESSION (3 credits)

#### Hershey Medical Center Students

**CELL AND MOLECULAR BIOLOGY (CMBIO)**
- 502. CORE BIOCHEMISTRY (3 credits)
- 503. MOLECULAR BIOLOGY (3 credits)

**PHARMACOLOGY (PHARM)**
- 520. PRINCIPLES OF DRUG ACTION (2 credits)

In addition to these required courses, electives must also be taken to fulfill the required number of academic credits for either an M.S. or Ph.D. degrees.

1. IBIOS 570 MOLECULAR TOXICOLOGY SEMINAR (2 credits, 1 per semester during any of the first four semesters in residence), a monthly colloquium that will present molecular toxicology topics of general interest to all faculty and graduate students in the IGDP in MT.
2. IBIOS 590 COLLOQUIUM (2 credits) All students are required to enroll for 4 credits of Colloquium. Students typically take this course in the fall and spring semesters of their first year. In Colloquium, students are introduced to a wide variety of topics from molecular biology, cell biology, biochemistry, and molecular toxicology.
3. IBIOS 591 ETHICS IN THE LIFE SCIENCES (1 credit) Usually taken the fall semester of their second year, students examine moral and ethical issues related to research and experimentation. The IGDP in MT requires at least 9 credits in one or more disciplines, taken either as an undergraduate or as a part of the graduate curriculum.
4. IBIOS 595. INTERNSHIP (1 credit, optional) For students interested in exploring academic, government, medical, law, or business corporate approaches to research. This is an external work assignment relevant to individual research or career goals. Students receive an R (satisfactory/passing) or U (unsatisfactory/failing). Only R credits are counted for credit totals. Students typically participate in an internship the summer of their first or second year. Contacts, positions, applications, course registration, course requirements, and grading are processed through the Eberly College of Science Cooperative Education Program (814-865-5000). Additional credits of IBIOS 595 are at the expense of the student.
5. IBIOS 596. INDEPENDENT STUDIES: LABORATORY ROTATIONS (1-3 credits per semester) For students exploring potential Ph.D. projects and faculty advisers. Students receive an R (satisfactory/Passing) or F (unsatisfactory/failing). Only R credits are counted for credit totals.
6. IBIOS 601. THESIS PREPARATION (0 per semester) for those students who passed their comprehensive exams. This course appears on the transcript but does not have any grade or credit associated with it.
7. IBIOS 602. THESIS RESEARCH (1-9 per semester) for those students who passed their comprehensive exams. This course appears on the transcript but does not have any grade or credit associated with it.
8. IBIOS 600. THESIS RESEARCH (1-9 per semester) for those students who passed their comprehensive exams. This course appears on the transcript but does not have any grade or credit associated with it.
9. IBIOS 600. THESIS RESEARCH (1-9 per semester) for those students who passed their comprehensive exams. This course appears on the transcript but does not have any grade or credit associated with it.
10. The Graduate School requires all graduate students to maintain a 3.0 grade-point average.

### M.S. Degree Requirements

Masters students must have a minimum of 30 credits and a 3.0 overall grade-point average. For a master's thesis option, up to 6 IBIOS 600 credits may be A-F graded. Eighteen (18) credits must be at the 500 to 600 level, and a minimum of 12 credits need to be in the major at the 400 to 600 level (excluding IBIOS 600). The student selects a thesis committee (upon consultation with faculty adviser), writes a thesis, and defends his/her work. If pursuing a master's nonthesis option, the student must have a first-authored manuscript (based on his/her research) that has been either accepted and/or published in a peer reviewed journal. Additionally, for a master's nonthesis option, 18 credits need to be in the major at the 500 level. The manuscript is given to at least the faculty adviser and the IGDP Chair for evaluation. IBIOS 595 (Internship) and 596 (Rotations) credits count toward the 30 credits. However, the 602 (Teaching) optional credits do not count toward the 30 credits. All IGDP in Molecular Toxicology graduate students must successfully take the following list of required courses during the first two years of their graduate education. If all course credits and requirements are met, students do not have to be registered for classes while writing and/or defending his/her work.

---

The Pennsylvania State University
Graduate Bulletin Archive - 2012

Ph.D. Degree Requirements

Ph.D. students must have a minimum of 30 credits and a 3.0 overall grade-point average. For a master's thesis option, up to 6 IBIOS 600 credits may be A-F graded and 12 credits need to be in the major at the 400 to 600 level (excluding IBIOS 500). The course requirements are essentially the same as that required for the M.S. degree listed above, with some discretion left to the student and adviser.

Grade-Point Average/Unsatisfactory Scholarship

Students are required to maintain an overall 3.0 GPA throughout the program, and, in particular, must have a 3.0 to take the doctoral candidacy, the comprehensive examination, and the final oral examination. One or more failing grades or a cumulative grade-point average below 3.0 may be considered evidence of unsatisfactory scholarship and may be grounds for dismissal from the IGDP in MT.

English competence

A candidate for the degree of Doctor of Philosophy for the IGDP in MT is required to demonstrate a high-level competence in the use of the English language, including reading, writing, and speaking, as part of the language and communication requirements for the Ph.D. Programs are expected to establish mechanisms for assessing and improving competence of both domestic and international students. Toward this goal, all students must participate in the IBIOS 590 colloquium, which includes assessment of reading, original writing and speaking skills. International students must also demonstrate proficiency of the English language as part of the Additional English Requirement for teaching described above. During the course work prior to the candidacy examination, candidates will be assessed for communicative competence in reading, writing, and speaking English. Should a higher level of competence be required, the candidate will be directed to the appropriate resources. International students are advised that the passage of the minimum TOEFL requirements does not demonstrate the level of competence required for completion of the Ph.D. program. English competence must be demonstrated before the doctoral comprehensive examination is scheduled. Besides course work, research, and teaching, IGDP Molecular Toxicology doctoral students participate in the following:

Candidacy Exam

The Candidacy Exam is uniquely designed for each student. The exam should be taken by the end or during the student's third semester in the Integrative Biosciences Graduate Program. The student will be assigned a scientific paper from the biochemical literature to read and analyze; the paper will be selected based upon the student's background and course work. The analysis should involve exploring the relevant literature as well as the fundamental issues in toxicology, biochemistry, and biology. The student will be given ten days to write a three-page single-spaced review. At the same time the paper is assigned a meeting of the committee should be arranged for a sixty- to ninety-minute oral exam by the committee to review the written assignment and discuss other issues. The committee meeting shall be within twenty-one days of the original assignment of the paper. The student is not required to make a formal oral presentation, but should have overheads of the data for discussion purposes. The student should be able to integrate knowledge about chemical and biological aspects of the paper and understand and evaluate the experimental design, rationale, results, and the authors' interpretation of their work. In the event that the student does not pass this exam, the student's committee will make a recommendation as to whether to offer another opportunity or to terminate the student's enrollment in the program.

Comprehensive Examination

Evaluation via the Doctoral Committee to determine the feasibility of proposed research and the preparedness of the student. Students must be registered for classes (typically IBIOS 600) the semester they take this exam.

Doctoral Committee

Upon successful completion of the Candidacy Examination, the student in consultation with the advisor will, as soon as possible, select a doctoral committee. The committee will consist of the advisor, two members of the IGDP in MT and up to two faculty members who are not a member of the IGDP in MT. If the student has selected the option of having dual advisors, then both of the advisors will be on the doctoral committee, along with two members of the IGDP in MT and one faculty member who is not a member of the IGDP in MT. If the faculty members from the IGDP in MT on the committee are also members of the same department, then at least one faculty member must be from a different department. This committee is responsible for supervising the academic program and monitoring the progress of the student towards his/her degree. Doctoral thesis committee composition is based on the Graduate Degree Programs Bulletin prepared by the Graduate School regarding Doctoral Committees and requires:

- Four-person minimum of approved Penn State Graduate Faculty.
- Two members must be inside the major and one member must be outside the major. Note: The outside member must be member of the approved Penn State Graduate Faculty. The outside member for intercollege graduate programs may be inside the major but committee membership must have representation from more than one department.
- A person not affiliated with Penn State may be added as a special member (beyond the four members of the approved Penn State Graduate Faculty) upon recommendation of the head of the program and approval of the graduate dean.
- Have committee chair or one of the co-chairs be a member of the approved Penn State Graduate Faculty. Typically it's the faculty adviser.
- The doctoral candidate and three committee members must be physically present for the comprehensive exam and defense. No more than one person may be present via telephone. Telephone or video conference arrangements must be approved by the Dean of the Graduate School.
- Need approval of two-thirds of the committee members for passing comprehensive exam and defense dissertation.

Ph.D. Defense

Evaluation via the Doctoral Committee of the thesis research. Students must present their thesis in accordance with the Penn State guidelines as described in the THESIS GUIDE Requirements for the Preparation of Master's and Doctoral Theses. Current copies may be obtained from the Thesis Information Web site. For more information, contact the Thesis Office, 115 Kern Building, University Park, PA 16802; 814-865-5448.

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- BIOCHEMISTRY AND MOLECULAR BIOLOGY (B M B) course list
- CELL AND MOLECULAR BIOLOGY (CMBIO) course list
- INTEGRATED BIOSCIENCES (IBIOS) course list
- PHARMACOLOGY (PHARM) course list
- VETERINARY AND BIOMEDICAL SCIENCES (VB SC) course list

The Graduate Faculty

- Lee Ahern, Ph.D. (Penn State) Assistant Professor of Communications
- Douglas Anderson, Ph.D. (Southern Illinois) Dean; Professor of Communications
- George Anghelescu, Ph.D. (Minnesota) Assistant Professor of Communications
- Robert F. Arons, Ph.D. (Massachusetts) Associate Professor of Communications
- Ronald Bettig, Ph.D. (Illinois) Associate Professor of Communication
- Barbara Bird, M.F.A. (Northwestern) Associate Professor of Communications
- Dennis Bertorelli, Ph.D. (Florida) Assistant Professor of Communications
- Jeremy Cohen, Ph.D. (Washington) Professor of Communications
- Colleen Connolly-Ahern, Ph.D. (Florida) Associate Professor of Communications
- Frank Davis, Ph.D. (South Carolina) Associate Professor of Communications
- Dennis K. Davis, Ph.D. (Minnesota) Professor of Communications
- Marcia DiStaso, Ph.D. (Miami) Assistant Professor of Communication
- Michael Elavsky, Ph.D. (Illinois) Assistant Professor of Communication
- Lyn Elliot, Ph.D. (Iowa) Associate Professor of Communications
- Russell Frank, Ph.D. (Pennsylvania) Associate Professor of Communications
- Robert Frieden, J.D. (Virginia) Cable TV Pioneers Chair Professor in Telecommunications Studies and Law
- Michel Haigh, Ph.D. (Oklahoma) Associate Professor of Communications
- Jane Hall, Ph.D. (Wisconsin) Associate Professor of Media Studies
- Martin E. Halstuk, Ph.D. (Florida) Associate Professor of Communications
- Marie Hardin, Ph.D. (Georgia) Associate Professor of Communications
- R. Dorn Hezel, M.F.A. (New York) Associate Professor of Film and Video
- Anne Hoag, Ph.D. (Michigan) Associate Professor of Communications
- Matthew Jackson, Ph.D. (Indiana) Associate Professor of Communications
- Krishna Jayakar, Ph.D. (Indiana) Associate Professor of Communications
- Matthew Jordan, Ph.D. (Claremont) Assistant Professor of Communication
- Anne Marie Major, Ph.D. (Southern Illinois) Associate Professor of Communications
- Matthew P. McAllister, Ph.D. (Illinois) Professor of Communications
- John S. Nichols, Ph.D. (Minnesota) Professor Emeritus of Communications
- Mary Beth Oliver, Ph.D. (Wisconsin) Distinguished Professor of Communications
- Anthony A. Olurunmola, Ph.D. (Howard) Associate Professor of Communications
- Patrick R. Parsons, Ph.D. (Minnesota) Don Davis Professor in Ethics
- Robert D. Richards, J.D. (American) John and Ann Curley Professor of First Amendment Studies
- Ford Ria, B.A. (Florida) Professor of Communications
- Michelle Rodino-Colocino, Ph.D. (Pittsburgh) Assistant Professor of Communications
- Amit R. Schechter, Ph.D. (Rutgers) Associate Professor of Communications
- Debra Reina Sorell, Ph.D. (Stanford) Professor of Communications
- Michael Schmierbach, Ph.D. (Wisconsin) Assistant Professor of Communications
- Fuyuan Shen, Ph.D. (North Carolina, Chapel Hill) Associate Professor of Communications
- Richard Sherman, M.F.A. (Ohio) Associate Professor of Communication
- Susan M. Strohm, Ph.D. (Minnesota) Assistant Professor of Communications
- S. Shyam Sundar, Ph.D. (Stanford) Distinguished Professor of Communications and Communication Arts and Sciences
- Richard D. Taylor, J.D. (New York) Palmer Chair of Telecommunications Studies and Law
- Bu Zhong, Ph.D. (Maryland) Assistant Professor of Communications

Doctoral Degree Requirements

The Ph.D. Program in Mass Communications is administered by the College of Communications. All students seeking admission to the program are required to submit Graduate Record Examination scores, transcripts of all previous undergraduate and graduate work, and three letters of recommendation from individuals qualified to comment on their ability to perform successfully at the doctoral level. Students whose native language is not English must present a minimum TOEFL score of 600 to be considered for admission. In most cases, a completed master’s degree is required for admission to the program. In addition, applicants are required to submit a personal statement indicating what they expect to achieve and how their educational background qualifies them for doctoraal-level study in mass communications. Admission decisions are made by the college admissions committee.

Requirements listed above are in addition to general Graduate School requirements listed in the GENERAL INFORMATION section of the Graduate Bulletin. Students admitted to the doctoral program must complete a candidacy examination. For students with a master’s degree or equivalent, this examination ordinarily will occur before the student has completed 10 credits of doctoral-level work. For individuals admitted with only a baccalaureate degree and no graduate-level work, the candidacy examination will be administered after 30 credits and before 40 credits of graduate-level work, have been completed. The committee designated to conduct the examination will determine whether the student's knowledge of mass communications is adequate for doctoral-level study in mass communications. Admission decisions are made by the college admissions committee.

The program requires both semesters of the Mass Communications Proseminar (COMM 501.1 and COMM 501.2), a foundation course and other courses selected by the student, with committee approval, that collectively constitute a coherent sequence appropriate to the advanced study of mass communications. Students are expected to take a minimum of 20 credits in communications-related courses. No more than 6 credits can be taken as independent study credits. Students also are required to take at least one course in research methods approved by the doctoral committee. Upon completion of the course work approved for the plan of study, the candidate will take a comprehensive examination. Following the comprehensive examination, doctoral candidates schedule a dissertation proposal meeting at which the research plan for their dissertation is reviewed and approved by their committee. Upon completion of the dissertation, doctoral candidates present a final oral defense of their dissertations before their committees.

The communication and foreign language requirement for the Ph.D. degree may be satisfied by intermediate knowledge of one foreign language or by an equivalent research skill relevant to the student's field of study.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Ludmila Zikatanova, Ph.D. (Sofia) Professor of Mathematics

Graduate courses in all the principal branches of mathematics are offered regularly each year. The department is prepared to direct research in a variety of fields, including various branches of analysis, algebra, topology, number theory, applied analysis, and mathematical logic and foundations.

Admission Requirements

Scores from the Graduate Record Examinations Aptitude Test (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

To be admitted to the Ph.D., D.Ed., or M.A. program without undergraduate deficiency, an applicant should have completed at least 18 credits in mathematics at the advanced undergraduate level (400 series or their equivalents). The undergraduate student is urged to take at least 6 credits in foundations of analysis (MATH 401), 6 in modern algebra (MATH 435 and MATH 436), and 3 in topology (MATH 429) or their equivalents. These courses are essential preparation for the graduate program, and if they are taken after admission, a maximum of 6 credits may be counted toward an advanced degree.

Students with a 3.00 junior/senior average and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students.

Students applying to the graduate program in mathematics for whom English is not their native language are required to have a score of at least 550 (paper-based test), 213 (computer-based test), or a total score of 80, with a score of 19 on the speaking section (Internet-based test), on the Test of English

The Pennsylvania State University
as a Foreign Language (TOEFL) examination. The results of this examination must be submitted along with other requested items before the application deadline.

**Master's Degree Requirements**

For the M.A. degree the department offers two options: (1) the thesis option requires 12 credits of approved 500-series course in mathematics, 6 to 9 credits of thesis, sufficient credits in approved 400- or 500-series courses to make a total of 30 credits, and a final oral examination based on the thesis and general course material; and (2) the nonthesis option requires 18 credits of 500-series courses in mathematics, sufficient credits in approved 400- or 500-series courses to make a total of 30 credits, and a term paper on an approved topic in mathematics. No final examination is given in this option. Under this option a student may also elect to take a minor in applied mathematics (9 credits with at least 6 at the 500 level) and may use these credits toward the necessary 30 credits. For both options, a grade of A or B is required in all courses.

To be admitted to the M.Ed. program without undergraduate deficiency, an applicant should have completed at least 15 credits in mathematics at the intermediate level beyond calculus. The M.Ed. program does not require any 500-series courses, but the student is encouraged to select some at this level. Special courses have been instituted for the training of teachers. Among these are MATH 470 and MATH 471. These are acceptable to satisfy credit requirements only for the M.Ed. degree.

**Doctoral Degree Requirements**

All doctoral students are required to take three qualifying examinations. Two of these examinations must be completed prior to the beginning of the student’s second year of graduate study, and the third prior to the beginning of the third year. The qualifying examinations are in the areas of analysis, algebra, and topology/geometry.

The qualifying examinations are given twice a year—after the end of the spring semester and before the beginning of the fall semester. Basic, one-year sequences are offered in each subject annually to help students prepare for the examinations. Typically, an entering Ph.D. student takes two of the basic sequences in the first year and the third basic sequence in the second year of study, and takes the qualifying examinations in the spring after completing the corresponding courses. If an examination is failed, the student must take it again. Students who fail a qualifying examination in a given subject twice may not continue in the Ph.D. program.

Entering Ph.D. students may take one or more of the qualifying examinations on arrival in August without penalty. If they fail a pre-entrance exam, they still have two more opportunities to pass it. Entering Ph.D. students are advised to take at least two basic sequences (in the subjects they did not pass qualifying exams in on arrival) and the subsequent qualifying exams in the first year of graduate study.

After passing all three qualifying exams, students are expected to select a thesis adviser and form a doctoral committee. The committee administers the comprehensive exam (no later than the end of the seventh semester of study) and offers counsel of the student as his research progresses.

**Other Relevant Information**

Students in this program may elect the dual-title degree program in Operations Research for the Ph.D. degree. (See also Operations Research.)

Further information about the graduate program in Mathematics may be found at the following website: [www.math.psu.edu/grad](http://www.math.psu.edu/grad).

**Student Aid**

Graduate assistantships available through this program and other forms of student aid are described in the [STUDENT AID](http://www.math.psu.edu/grad) section of the *Graduate Bulletin*.

**Courses**

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
Ph.D., M.S.

The Graduate Faculty
- James Adair, Ph.D. Professor of Materials Science and Engineering
- Dinesh K. Agrawal, Ph.D. Professor of Materials Science and Engineering
- David L. Allara, Ph.D. Professor of Materials Science and Chemistry
- Harry L. Alcock, Ph.D. Evan Pugh Professor of Chemistry
- Maurice E. Amateau, Ph.D. Professor of Engineering Science and Mechanics
- S. Ashok, Ph.D. Professor of Engineering Science
- John V. Badding, Ph.D. Assistant Professor of Chemistry
- Andrew S. Badzian, Ph.D. Professor of Materials Science and Mechanics
- Charles Bakis, Ph.D. Associate Professor of Engineering Science and Mechanics
- Jayanth R. Banavar, Ph.D. Professor of Physics
- Anthony Baratta, Ph.D. Professor of Nuclear Engineering
- Uma Belegundu, Ph.D. Research Associate in Materials
- Amar S. Bhalla, Ph.D. Professor of Materials and Electrical Engineering
- William R. Bitter, Ph.D. Professor Emeritus of Metallurgy
- Paul R. Blankenhorn, Ph.D. Professor of Wood Technology
- Andre L. Boehman, Ph.D. Associate Professor of Fuel Science
- Susan L. Brantley, Ph.D. Associate Professor of Geosciences
- Paul W. Brown, Ph.D. Professor of Materials Science and Engineering
- Wenhao Cao, Ph.D. Professor of Mathematics, and Materials Research
- Gary L. Catchen, Ph.D. Professor of Nuclear Engineering
- Moses H. W. Chan, Ph.D. Evan Pugh Professor of Physics
- Subhash Chander, Ph.D. Professor of Mineral Processing
- Long-Qing Chen, Ph.D. Professor of Materials Science and Engineering
- Ralph Colby, Ph.D. Professor of Materials Science and Engineering
- Milton W. Cole, Ph.D. Distinguished Professor of Physics
- Lance Collins, Ph.D. Professor of Chemical Engineering
- Robert W. Collins, Ph.D. Professor of Physics and Materials Research
- Joseph C. Conway, Jr., Ph.D. Professor of Engineering Science and Mechanics
- Vincent Crespi, Ph.D. Professor of Physics
- L. Eric Cross, Ph.D. Evan Pugh Professor Emeritus of Electrical Engineering
- Paul H. Cutler, Ph.D. Professor Emeritus of Physics
- Makunda B. Das, Professor Emeritus of Electrical Engineering
- Tarasankar DebRoy, Ph.D. Professor of Materials Science and Engineering
- Elizabeth Dickey, Ph.D. Assistant Professor of Materials Science and Engineering
- Renee D. Diehl, Ph.D. Professor of Physics
- Joseph P. Dougherty, Ph.D. Associate Professor of Materials and Electrical Engineering
- Robert S. Engel, Ph.D. Professor of Engineering Science and Mechanics
- Wolfgang E. Ernst, Ph.D. Professor of Physics and Chemistry
- Kristen A. Fichthorn, Ph.D. Professor of Chemical Engineering and Physics
- Stephen J. Fonash, Ph.D. Kunkle Chair; Professor of Engineering Science
- Barbara J. Garrison, Ph.D. Professor of Geosciences
- David J. Green, Ph.D. Professor of Ceramic Science and Engineering
- Michael K. Grutzeck, Ph.D. Professor of Materials Science and Engineering
- Paul R. Howell, Ph.D. Professor of Metals Science and Engineering
- Srihari Komarneni, Ph.D. Professor of Clay Mineralogy
- Iam-Choo Khoo, Ph.D. Professor of Electrical Engineering
- Donald Koss, Ph.D. Professor of Materials Science and Engineering
- John R. Hellmann, Ph.D. Associate Professor of Ceramic Science and Engineering
- Ian H. Harrison, Ph.D. Professor of Polymer Science
- Donald H. Heaney, Ph.D. Research Associate in Materials
- John R. Hellmann, Ph.D. Associate Professor of Ceramic Science and Engineering
- Gerald G. Johnson, Ph.D. Associate Professor Emeritus of Computer Science and Engineering
- Thomas N. Jackson, Ph.D. Professor of Electrical Engineering
- Thomas N. Jackson, Ph.D. Professor of Electrical Engineering
- Gerald G. Johnson, Ph.D. Associate Professor Emeritus of Computer Science and Engineering
- Sridhar Komarneni, Ph.D. Professor of Clay Mineralogy
- Iam-Choo Khoo, Ph.D. Professor of Electrical Engineering
- Donald A. Koss, Ph.D. Professor of Metals Science and Engineering
- Sanat Kumar, Ph.D. Professor of Materials Science and Engineering
- Kenneth K. Kuo, Ph.D. Distinguished Professor of Mechanical Engineering
- Peter Labosky, Ph.D. Professor of Wood Science and Technology
- Akhilash Lakhtakia, Ph.D. Professor of Engineering Science and Mechanics
- Michael Lanagan, Ph.D. Associate Professor of Materials Science and Engineering
- George A. Lesieutre, Ph.D. Professor of Aerospace Engineering
- Qi Li, Ph.D. Associate Professor of Physics
- Ying Liu, Ph.D. Associate Professor of Physics
- Zhi-Kiu Liu, Ph.D. Associate Professor of Materials Science and Engineering
- Digby D. MacDonald, Ph.D. Professor of Materials Science and Engineering
- Thomas E. Mallouk, Ph.D. DuPont Professor of Materials Chemistry
- Harvey Manbeck, Ph.D. Distinguished Professor of Agricultural Engineering
- Evangelos Manias, Ph.D. Virginia and Philip L. Walker Faculty Fellow; Assistant Professor of Materials Science and Engineering
- William D. Mark, Professor of Mechanical Engineering; Senior Scientist
- Theresa S. Mayer, Associate Professor of Electrical Engineering
- Julian D. Maynard, Jr., Distinguished Professor of Physics
- Russell F. Messier, Professor of Engineering Science and Mechanics
- Gary L. Messing, Professor of Ceramic Science and Engineering; Head, Materials Science and Engineering
- Suzanne E. Mohney, Ph.D. Associate Professor of Materials Science and Engineering
- Arthur M. T. Motta, Ph.D. Associate Professor of Nuclear Engineering
- Karl T. Mueller, Ph.D. Associate Professor of Chemistry
- Michael J. Natan, Ph.D. Professor of Chemistry
- Robert N. Pangborn, Ph.D. Professor of Engineering Mechanics; Associate Dean

The Pennsylvania State University
The aim of the intercollege program in Materials is to provide an opportunity for the student interested in the structure, properties, and behavior of solid materials to obtain an integrated program of courses encompassing both the necessary fundamentals of chemistry, physics, and mathematics and their technological and engineering applications.

The program is designed to encourage graduate study and research that cut across the traditional engineering disciplines and scientific inquiry related to materials. Faculty members associated with the program come from several colleges and many research centers at the University.

In order to maintain focus for the selection of core courses and for the administration of the comprehensive examination, formal options have been established (i.e., Materials Science and Materials Engineering). These options differ in the specification of core courses and in the focus of the research. Other program requirements are common for the two options.

**Admission Requirements**

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are recommended but not required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Entering students should hold a bachelor's degree in chemistry, physics, mathematics, geological science, engineering, ceramics, or metallurgy, or in a closely related field that will have included in it mathematics at least through integral calculus and a minimum of one year of physics and one year of chemistry. Students with a 3.00 grade-point average (on a 4.00 scale) and appropriate course backgrounds will be considered for admission. Exceptions to the 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. The applicant should be interested specifically in an interdisciplinary program of study and research.

**Master's Degree Requirements**

The program for the M.S. degree must include a total of 30 credits as outlined in the GENERAL INFORMATION section of the Graduate Bulletin. The candidate must prepare a thesis proposal and list of courses for approval by the program faculty constituting the student's M.S. committee. A thesis describing original work performed by the student shall be written and defended before the M.S. committee.

**Doctoral Degree Requirements**

Acceptance into the Ph.D. program is based on the student's performance on the Ph.D. candidacy exam administered by a rotating committee of program faculty. The examination is designed to evaluate the student's potential for original and successful Ph.D. research and is composed of a written proposal and oral presentation. Detailed plans for thesis research and course work consistent with the student's declared option are to be presented to the Ph.D. committee following successful completion of the candidacy exam, and the student is to present periodic progress reports to the committee until the thesis is defended. Near the end of the period of formal course work, each student will take a comprehensive exam. The examination consists of a written part administered by a rotating committee of program faculty, based on specific areas of knowledge depending on the chosen option, and an oral part, administered by the candidate's Ph.D. committee, that will emphasize an understanding of both fundamentals and the student's area of specialization. At the culmination of the Ph.D. research experience, each candidate must write a thesis, present it to his/her Ph.D. committee, and defend it at a public, oral presentation, following by an examination by the committee. All candidates must demonstrate proficiency in English in both written and oral form, which is established formally in conjunction with the candidacy exam.

**Other Relevant Information**

Seminar series are offered on various materials topics under the course listing MATL 590 Colloquium, and students are encouraged to enroll in these courses or to take materials-related seminar courses offered by other departments. The program offers instruction on special topics under the designation MATL 597, or students may explore such areas individually under a faculty member's supervision, receiving credit under the designation MATL 596. Thesis research on various aspects of the solid state may be conducted in the Intercollege Materials Research Laboratory, Applied Research Laboratory, or appropriate departments in the Colleges of Earth and Mineral Sciences, Engineering, or Science. A wide variety of experimental facilities for materials research are available.
Student Aid

Assistance is provided by the program office in identifying and applying for fellowships and scholarships from internal and external sources, and in facilitating linkages with faculty and units that can offer support in the form of graduate assistantships for research in specific topical areas. These and other types of financial aid are described in the STUDENT AID section of the Graduate Bulletin.

The Pennsylvania State University
The intercollege graduate degree program in materials science and engineering offers comprehensive graduate education in the fundamentals of materials science (synthesis-structure-property-performance relationships). Faculty have interests in many research areas including biomaterials, ceramics, composites, computational materials science, electronic and photonic materials, materials chemistry and physics, metals, nanostructured and nanoscale materials, piezoelectrics and ferroelectrics, polymers and soft materials. Students may choose to study across the major themes of materials today including materials in energy applications, nanotechnology, materials in medicine, materials in communications, materials for sensor applications, structural materials, etc., by using a combination of MATSE courses and a myriad of materials-related courses offered in the science and engineering departments at Penn State.

Admission Requirements

Scores for the Graduate Record Examinations (GRE) are required for admission, though this requirement may be waived at the discretion of the departmental graduate admission committee. The best-qualified applicants will be accepted up to the number of spaces available for new students. The degree requirements listed here are in addition to the general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Master's Degree Requirements

The graduate program for the M.S. degree must include a total of at least 30 credits. Subject to the approval of the graduate program coordinator, a maximum of 10 credits of high-quality graduate work done at an accredited U.S. institution may be applied toward the requirements for the master's degree. A minimum of 6 research credits (MATSE 600) is required. The minimum number of formal course credits (excluding seminar MATSE 590) required is 18 for all students. All candidates for advanced degrees are also expected to attend MATSE 590 colloquium. A thesis describing independent research performed by the student shall be written and defended at an oral examination. Bound copies will be made available for the University Libraries and the thesis adviser. A thesis committee shall administer the final oral examination of the thesis. The committee shall consist of at least three graduate faculty members.

M.S. Requirements (Summary)-minimum total credits: 30; minimum research credits: 6; minimum formal course credits: 18; minimum 500-level credits: 12; minimum credits in the major: 12; seminar: 2 credits per year; minimum GPA: 3.00.

Doctoral Degree Requirements

The general requirements are based upon a period of residence, the writing of a satisfactory thesis and its acceptance by the doctoral committee and the Graduate School, and the passing of the comprehensive examination. A doctoral program consists of a combination of courses, seminars, and research that fulfills the minimum requirements of the Graduate School and is approved by the doctoral committee for each individual student. A master's degree is not a prerequisite for the doctorate. However, the first year of graduate study leading to the Ph.D. may be the same as that provided for the master's degree.

Acceptance into the Ph.D. program is based on the student's performance on the Ph.D. candidacy exam, which is administered by a graduate candidacy exam committee of the department. Although there is no specified requirement by the graduate school for the number of course credits for a Ph.D. degree, the department requires a minimum of 18 credits of 500-level courses courses for completing a doctoral degree. The specific courses are determined by the student and the adviser in consultation with the student's doctoral committee. A student with a M.S. degree from Penn State can use the 500-level credits earned during his or her M.S. study to fulfill the course requirements. Upon approval by the doctoral committee and the graduate program coordinator, a student with an M.S. degree from another U.S. university may use a maximum of 10 credits from that school to partially fulfill the course requirement.

- Candidacy exam: (Offered twice a year: at the beginning of spring and fall semesters) Students will write a research proposal and give a presentation on the proposal to three members of the candidacy committee, whose members will ask questions about the proposal and the student's prior course work. The student will choose a topic for the proposal from three provided by the faculty committee, chosen to reflect the interest area(s) of the individual candidate. Students will be given three weeks to write the proposal and turn it into the MATSE graduate office. The oral presentation will take place seven to ten days after the written paper is submitted.
- Minimum formal course requirement (This is not required by the University, but required by the department): 18 credits of 500-level courses courses after B. S. (The courses to be taken are determined by the adviser and a thesis committee, having a minimum of four members with at least one outside of the department.)
- Comprehensive exam: Progress report and thesis proposal (five to ten pages) provided to the student's doctoral committee. An oral presentation is given to the research committee, followed by questions on the written and oral presentations.
- Seminar: 2 credits of MATSE 590 per year, until comprehensive exam is passed
- Minimum GPA: 3.0
- Thesis: A written thesis and an oral defense administered by the doctoral committee

Student Aid

Top graduate applicants will be automatically nominated for a number of graduate fellowships and top-up awards in the department, including the University Graduate Fellowship as well as several industry-sponsored assistantships. Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

The Pennsylvania State University
Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- John S. Nichols, Ph.D. (Minnesota) Professor Emeritus of Communications
- Mary Beth Oliver, Ph.D. (Wisconsin) Distinguished Professor of Communications
- Anthony A. Olorunnisola, Ph.D. (Howard) Associate Professor of Communications
- Patrick R. Parsons, Ph.D. (Minnesota) Don Davis Professor in Ethics
- Robert D. Richards, J.D. (American) John and Ann Curley Professor of First Amendment Studies
- Ford Risley, Ph.D. (Florida) Professor of Communications
- Michelle Rodino-Colocino, Ph.D. (Pittsburgh) Assistant Professor of Communications
- Anne M. Scheiter, Ph.D. (Rutgers) Associate Professor of Communications
- Jorge Reina Schement, Ph.D. (Stanford) Professor of Communications
- Michael Schmierbach, Ph.D. (Wisconsin) Assistant Professor of Communications
- Fang Shen, Ph.D. (North Carolina, Chapel Hill) Associate Professor of Communications
- Richard Sherman, M.F.A. (Ohio) Associate Professor of Communications
- Susan M. Strohm, Ph.D. (Minnesota) Associate Professor of Communications
- S. Shyam Sundar, Ph.D. (Stanford) Distinguished Professor of Communication Arts and Sciences
- Richard D. Taylor, J.D. (New York) Palmer Chair of Telecommunications Studies and Law
- Bu Zhong, Ph.D. (Maryland) Assistant Professor of Communications

The master's degree in Media Studies is an academic program that involves students in the systematic study of media. The objective of the course of study is to enable students to achieve a comprehensive understanding of the systems, networks, cultures, and information associated with media. The program prepares students for doctoral study in communications and for professional positions in business and government requiring a comprehensive understanding of the historical, social, and political implications of the media. This program helps prepare students to organize research projects, critically evaluate research reports, and directly influence media practices by the application of research findings.

Admission Requirements
Scores from the Graduate Record Examinations (GRE) are required for admission. Students with a 3.00 junior/senior grade-point average are eligible for admission. Three letters of recommendation are required. Applicants must also submit an autobiographical statement of about 1,000 words indicating the nature of the applicant's interest in Media Studies, reasons for wanting to do graduate work, and future aspirations relating to the field of mass communications. Experience shows that most applicants hold a bachelor's degree in a field of the liberal arts or the social and behavioral sciences, including journalism and mass communications. However, this does not preclude applicants with other backgrounds, abilities, and interests such as those whose undergraduate training may have been in a scientific or technical field. In every case, the applicant should explain in the autobiographical statement how his or her undergraduate education relates to the decision to seek admission to graduate study in mass communications.

Program of Study
The M.A. program seeks to integrate two areas of inquiry and analysis. The "Critical Studies" area centers on the expressive, creative, and linguistic dimensions of media as cultural processes. The "Political Studies" area focuses primarily on the political and economic dimensions of national and international communications systems and processes. The student is encouraged to combine courses from these and possibly other areas into a coherent package of course work culminating in a thesis.

Degree Requirements
For the M.A. degree, candidates must complete a one-course research core by taking either COMM 506 (quantitative research methods) or COMM 511 (qualitative research methods). The remaining credits are selected by the student in consultation with the adviser from the graduate courses listed in this section. Candidates must complete a minimum of 36 credits, including 6 for the thesis (COMM 600). At least 18 credits must be at the 500 level. Course work offered by the College of Communications may be scheduled as part of the student’s program with prior approval of the student’s academic committee. In some cases, students may be required to take additional credits in order to make up deficiencies in undergraduate course work.
Integrated B.A/M.A. in Media Studies

The College of Communications offers academically qualified students enrolled in a bachelor of arts program in the College of Communications the opportunity to earn both the B.A and the M.A upon completion of five years of study. The Integrated Undergraduate-Graduate Program in Media Studies would facilitate the advanced study of communications research and thesis development through a carefully organized selection of undergraduate courses, graduate seminars and directed research projects. The program would accelerate and enhance undergraduate students' appreciation for graduate level scholarship by involving them in the seminars, research activities, and the scholarly discourse of the college's community of master's- and doctoral-level scholars.

For the IUG Media Studies B.A./M.A. degree, a minimum of 120 credits is required for the B.A. and 36 credits for the M.A. Twelve graduate-level credits, in consultation with the adviser, can apply to both the B.A. and M.A. degrees. Six of these must be at the 500 level.

If for any reason a student admitted to the B.A./M.A. program is unable to complete the requirements for the master of arts degree program in Media Studies, the student will be permitted to receive the B.A. degree, assuming all degree requirements have been satisfactorily completed.

Application Process and Admissions Requirements

Applicants must complete 6 credits from the following lists of courses with a minimum GPA of 3.5 in order to be admitted: 3 credits from COMM 100, COMM 150, COMM 180, COMM 320, or COMM 370 and 3 credits from COMM 205, COMM 250, COMM 381, COMM 401, COMM 403, COMM 304, COMM 405, COMM 407, COMM 408, COMM 409, COMM 410, COMM 411, COMM 413W, COMM 417, COMM 418, COMM 419, COMM 451, COMM 452, COMM 453, COMM 454, COMM 455, COMM 484, or COMM 485. The minimum overall GPA required of applicants is 3.2. Admission to the program is based on the evaluation of the student's transcript, examples of completed writing and research projects, a narrative statement of objectives, and two letters of support from faculty with whom they have worked. One faculty member must be from outside the college.

Applications will be reviewed by the appropriate subset of members of the Graduate Committee of the college.

Applicants to the Integrated program:

1. Must be enrolled in a B.A. program in the College of Communications.
2. Must have completed 60 credits of the undergraduate degree program. (It is recommended that students apply prior to completing 100 credits.)
3. Must provide a narrative statement of objectives and two letters of endorsement from faculty with whom they have worked. One faculty member must be from the College of Communications.
4. Must present an approved plan of study in the application process.

Program of Study

The Integrated B.A./M.A. degree in Media Studies is an academic program that involves students in the systematic study of media. The objective of the course of study is to enable students to achieve a comprehensive understanding of the systems, networks, cultures, and information associated with media. The program prepares students for doctoral study in communications and for professional positions in business and government requiring a comprehensive understanding of the historical, social, and political implications of the media. This program helps prepare students to organize research projects, critically evaluate research reports, and directly influence media practices by the application of research findings. The program is specifically not intended for advanced professional education.

Undergraduate tuition rates will apply as long as the student is in undergraduate status, unless the student receives financial support, such as an assistantship requiring the payment of graduate tuition.

Degree Requirements

For the IUG Media Studies M.A. degree, a minimum of 120 credits is required for the B.A. and 36 credits for the M.A. At least 18 of the required 36 credits must be at the 500 level. Twelve graduate-level credits, in consultation with the adviser, can apply to both the B.A. and M.A. degrees. Six of these must be at the 500 level.

For the IUG Media Studies B.A./M.A. degree, a minimum of 120 credits is required for the B.A. and 36 credits for the M.A. Twelve graduate-level credits, in consultation with the adviser, can apply to both the B.A. and M.A. degrees. Six of these must be at the 500 level.

Student Aid

Graduate assistantships and other forms of student aid available to students in this program are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

COMMUNICATIONS (COMM) course list

Last Revised by the Department: Summer Session 2005
Blue Sheet Item #: 33-04-274
Review Date: 1/18/05

Last updated by Publications: 5/31/11
The Graduate Faculty

- David M. Babb, Ph.D. (Penn State) Research Associate/Assistant Professor of Meteorology and John A. Dutton e-Education Institute
- Peter R. Bannon, Ph.D. (Colorado) Professor of Meteorology
- William H. Brune, Ph.D. (Johns Hopkins) Professor of Meteorology
- Marcelo Chamecki, Ph.D. (Johns Hopkins) Assistant Professor of Meteorology
- Eugene Clothiaux, Ph.D. (Brown) Associate Professor of Meteorology
- Kenneth J. Davis, Ph.D. (Colorado) Associate Professor of Meteorology
- Jenni L. Evans, Ph.D. (Monash) Professor of Meteorology
- Steven B. Feldstein, Ph.D. (Penn State) Senior Scientist
- Chris E. Forest, Ph.D. (MIT) Associate professor of Climate Dynamics in Meteorology
- Jose D. Fuentes, Ph.D. (Guelph) Professor of Meteorology
- Lee M. Grncarz, Ph.D. (Emory, McGill) Senior Lecturer in Meteorology
- Jerry Y. Harrington, Ph.D. (Colorado State) Associate Professor of Meteorology
- Sue Ellen Haupt, Ph.D. (Michigan) Senior Scientist/Professor of Atmospheric and Oceanic Physics-ARL and Meteorology
- Scott A. Isard, Ph.D. (Indiana) Professor of Aerobiology in Plant Pathology and Meteorology
- Timothy J. Killeen, Ph.D. (Urbana-Champaign) Associate Professor of Electrical Engineering and Adjunct Professor of Meteorology
- Andrew Kleit, Ph.D. (Yale) Professor of Meteorology
- Sukyoung Lee, Ph.D. (Princeton) Professor of Meteorology
- Michael E. Mann, Ph.D. (Yale) Professor of Meteorology and Geosciences
- Paul Markowski, Ph.D. (Oklahoma) Assistant Professor of Meteorology
- Raymond G. Najjar, Ph.D. (Princeton) Associate Professor of Meteorology
- Jon M. Neese, Ph.D. (Penn State) Senior Lecturer in Meteorology
- Scott J. Richardson, Ph.D. (Oklahoma) Senior Research Associate of Meteorology
- Yvette Pamela Richardson, Ph.D. (Oklahoma) Assistant Professor of Meteorology
- Hampton N. Shirer, Ph.D. (Penn State) Associate Professor of Meteorology
- David R. Stuhrer, Ph.D. (Penn State) Senior Research Associate and Associate Professor of Meteorology
- Anne M. Thompson, Ph.D. (Bryn Mawr) Professor of Meteorology
- Johannes Verlinde, Ph.D. (Colorado State) Associate Professor of Meteorology
- Joshua M. Wuman, Ph.D. (MIT) Adjunct Professor of Meteorology
- George S. Young, Ph.D. (Colorado State) Professor of Meteorology and Geo-Environmental Engineering
- Fuqing Zhang, Ph.D. (North Carolina State) Professor of Meteorology and Statistics

The graduate program embraces topics that span atmospheric processes from those of the planetary boundary layer to those of the upper atmosphere, that encompass phenomena with molecular to planetary dimensions, and that range from practical to theoretical significance. The program develops and integrates approaches based on observational, computational and analytical techniques.

The major interests of the faculty and graduate students center on (1) analysis, modeling, and prediction of the evolution of synoptic-scale, or mesoscale, weather systems, particularly those of significant impact on human activities; (2) observation and theoretical study of processes related to transmission of radiation through the atmosphere, including remote sensing through use of electromagnetic or acoustic systems; (3) laboratory, and theoretical study of trace gases, particulates, and clouds and their consequences for air quality and climate; and (4) observation and theoretical study of atmospheric physics on a variety of scales, including phenomena of weather and climate, boundary layer physics, turbulence, convective systems, and severe storms; (5) weather risk.

The department encourages interdisciplinary studies and is expanding its programs in biometeorology, climate dynamics, atmospheric pollution prediction, atmospheric carbon cycling, forecast reliability and verification, mathematical study of fluid dynamical systems, and integrated atmosphere-ocean systems. The department is affiliated with the Earth and Environmental Sciences Institute, which conducts studies in Earth system science, including climate, large-scale dynamics, oceanography, and regional assessments.

For the M.S. program, a minimum of 34 credits is required. For the Ph.D. program, a minimum of 8 course credits and 1 credit/semester of METEO 590 until passage of the comprehensive exam.

Admission Requirements

The Meteorology program is open to all students with a baccalaureate degree and a strong interest in the atmospheric sciences. A degree in meteorology, science, mathematics, or engineering provides a particularly good background, although the department has had some students with arts and humanities degrees (such as Art History) who have done well. The minimum course requirements for admission are mathematics at least through differential equations and at least one year of calculus-based physics. Scores from the Graduate Record Examinations (GRE) are required for the evaluation of all applicants. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

For admission to the program, the departmental admission committee considers courses taken, grade-point average, three letters of recommendation, GRE scores, professional experience, and English proficiency. Rather than setting rigid standards in each category, the committee examines the overall record as a whole. The best-qualified applicants are accepted up to the number of spaces that are available for new students.

Generally, additional mathematics and physics beyond the minimum requirements listed above are required, as well as courses in statistics, chemistry, and computer programming. All students admitted to the graduate program have GPAs of 3.50 or higher; particularly good grades in the sciences are desirable. Three recommendations are solicited from persons familiar with the student's academic competence, and the student is required to write a letter summarizing interests and goals. The General Test package containing the Mathematical Reasoning Test of the GRE is required of all applicants. A verbal and quantitative combined score of 1200 or greater is typical for the department's students.

All international applicants must submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the Internet-based test (IBT).

International applicants with IBT speaking scores between 15 and 18 may be considered for provisional admission, which requires taking the Penn State American English Oral Communication Proficiency Test (AEOCP) upon first enrollment and, if necessary, remedial course work (ESL 115G, ESL 117G, and/or ESL 118G). The minimum composite score for the IELTS is 6.5.

International applicants who have received a baccalaureate or masters degree from a college, university, or institution in any of the following countries are exempt from the TOEFL requirement: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, or Wales.

For admission to the program, the departmental admission committee considers courses taken, grade-point average, three letters of recommendation, GRE scores, professional experience, and English proficiency. Rather than setting rigid standards in each category, the committee examines the overall record as a whole.

The Best-Qualified Applicants are Accepted Up to the Number of Spaces that Are Available for New Students.
Master of Science (M.S.) Degree Requirements

The M.S. degree is offered with thesis or research paper options, both requiring 34 credits. For both options, a core curriculum is required that is composed of METEO 520 (3 credits), 521 (3 credits), 531 (3 credits), 533 (3 credits), 580 (1 credit), 590 (1 credit/semester; minimum or 2 credits) and 591 (1 credit) that is supplemented by 6 elective credits from 500-level Meteorology courses, for a total of 22 credits.

All students must take a minimum of 12 additional elective credits for a total of 30 credits, which are distributed as follows. Students in the M.S. thesis option must select 6 additional credits from 400- and 500-level course work in Meteorology or related disciplines, and the remaining 6 credits of these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree. Some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

All M.S. students defend their thesis or paper in a public presentation that is evaluated by, and must be approved by, the students' committee. A minimum of three signatures is required for a M.S. thesis, including the thesis adviser and the department head or program chair.

M.S. Minor

For a minor in Meteorology, an M.S. student must select 6 credits of 500-level Meteorology courses in a course plan approved by the department.

Doctor of Philosophy (Ph.D.) Degree Requirements

Studies for the Ph.D. degree are designed to accommodate the interests and capabilities of the candidate, and they are overseen by a doctoral committee, which also administers comprehensive and final oral examinations. Before being admitted to Ph.D. candidacy, a student must have the academic support of a faculty member and the student must pass the Ph.D. candidacy examination that is typically offered once each year. The exam must be taken within one year of being admitted to the program. If a student does not pass the exam on their first attempt, then a second attempt is allowed at the time the student completes a M.S. degree in our graduate program.

A student must take METEO 591 (1 credit) the first semester it is available upon matriculating in the program. METEO 580 (1 credit) must be taken prior to the department's competency exam in written and spoken technical English. METEO 580 and METEO 591 will be waived as required classes if a student has taken thesis or equivalent courses in the Ph.D. program. A minimum of three credits elective credits from METEO 500-level (other than METEO 501, 520, 521, 531, 533, 580, 590, 591) or RELATED DISCIPLINE 400- or 500-level courses must be taken that do not count toward any other degree requirement and finished by the semester in which the comprehensive exam is passed. One credit of METEO 590 is required each semester until the comprehensive exam is passed. A student must pass the department's competency exam in written and spoken technical English before being admitted to the comprehensive exam. There are no minimal credit requirements for quality-graded METEO 600 (research credits whose grades count toward the grade-point average); students may earn up to 12 quality-graded METEO 600 credits. The student is expected to master the material in the M.S. core courses (METEO 520, 521, 531, and 533), but need not take those courses for credit.

Dual-Title Graduate Degree in Astrobiology (ABIOL)

Studies interested in the emerging field of Astrobiology may wish to obtain a Dual-Title Graduate Degree in Astrobiology and Meteorology. The pursuit of this dual title entails additional course work beyond the degree requirements set forth here (see the Graduate Bulletin for further details concerning these course and program requirements), as well as the participation of at least one Astrobiology program faculty member on the dissertation committee. The Astrobiology representative, who assists with the selection of courses, may be the adviser and have an appointment in Meteorology. The Ph.D. candidacy exam for dual-title students will be administered by Meteorology but with a component of it from the Astrobiology representative, or others related to this dual-title graduate degree, that assesses their potential in the field of Astrobiology. The field of Astrobiology will also be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of Astrobiology is required. A public oral presentation of the dissertation is required.

Ph.D. Minor

For a minor in Meteorology, Ph.D. students should select 15 credits of 500-level Meteorology courses in a course plan approved by the department.

Other Relevant Information

The program differentiates between instruction and research topics appropriate for M.S. students seeking positions of advanced responsibility in government or industry, those appropriate for M.S. students anticipating further study, and those appropriate for Ph.D. candidates who will work in advanced research laboratories or academic institutions.

Student Aid

Graduate assistantships available through this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin. Most graduate students are supported with teaching or research assistantships.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

M. S. Minor

For a minor in Meteorology, M.S. students must select 6 credits of 500-level Meteorology courses in a course plan approved by the department.

Other Relevant Information

The program differentiates between instruction and research topics appropriate for M.S. students seeking positions of advanced responsibility in government or industry, those appropriate for M.S. students anticipating further study, and those appropriate for Ph.D. candidates who will work in advanced research laboratories or academic institutions.

Student Aid

Graduate assistantships available through this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin. Most graduate students are supported with teaching or research assistantships.

A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

METEOROLOGY (METEO) course list

NOTE: Courses in the use of X-ray diffraction, electron microscopy, and spectroscopy in meteorological studies are listed under MATERIALS SCIENCE.

Integrated B.S./M.S. Program in Meteorology

The Department of Meteorology offers an integrated B.S./M.S. program, also called the Integrated Undergraduate-Graduate (IUG) program, that is designed to allow academically superior students to obtain both the B.S. and the M.S. degree in Meteorology in five years of study. In order to complete the program in five years, students interested in the IUG program in Meteorology must apply for admission to the Graduate School and the IUG program by the end of their junior year.

During the first three years, the student will follow the course scheduling of one of the options in the B.S. degree, normally the Atmospheric Sciences or the General Option (see the Undergraduate Bulletin). Students who intend to enter the IUG program are encouraged to take upper level classes during their first three years whenever appropriate. By the end of the junior year, students normally apply for admission to both the IUG Program and to the Graduate School. Acceptance decisions will be made prior to the beginning of the senior year and M.S. advising committees appointed for successful applicants. During the senior year, IUG students follow the scheduling of the selected B.S. Meteorology Option, with an emphasis on completing 500-level course work as appropriate. During the senior year, IUG students will complete the required 12 credits of 500-level Meteorology course work in Meteorology during the fifth year, IUG students take courses fulfilling the departmental M.S. degree requirements and complete their M.S. theses or papers. Typical scheduling plans for students pursuing the General or Atmospheric Sciences Options are given on the departmental Web site.
http://www.met.psu.edu. If a plan similar to one of these plans is followed, then the student will have completed all requirements for the B.S. in Meteorology by the end of the fourth year. If, for some reason, a student cannot continue in the integrated program, then this student will be able to receive the undergraduate degree upon completion of all of the B.S. requirements. Undergraduate tuition rates will apply as long as the student is an undergraduate, unless the student receives financial support, for example, via an assistantship requiring the payment of graduate tuition.

IUG Program Admission Requirements

Students who wish to complete the IUG program in Meteorology should apply for admission to both the Graduate School and the IUG program by no later than the end of their junior year. In this case, successful students will be admitted formally into the graduate program in Meteorology just prior to their senior year, if their progress has been satisfactory. Admission prior to the senior year is also possible in some unusual circumstances. In all cases, admission to the program will be at the discretion of the Associate Head of the Department of Meteorology graduate program, who will determine the necessary criteria for all applicants. These criteria include the setting of the minimum required scores on the GRE and minimum cumulative GPA for consideration, the receipt of recommendation letters from three faculty and a letter of support from the department head, and the identification of an adviser who is willing to oversee the student’s research project. Evidence of significant research potential must be provided in the application.

IUG Program Degree Requirements

The total degree requirements are as follows: The new program will fulfill the present rigorous requirements of the existing M.S. Program. In particular, all IUG students must defend their theses or papers, as do all M.S. students, in a public presentation toward the end of their graduate program.

B.S. Degree Portion:
- TOTAL B.S. REQUIREMENTS: 121 credits (12 double-counted with the M.S. Requirements)
- General Education: 45 credits, 24 of which are included in the REQUIREMENTS FOR THE MAJOR
- Requirements for the Major (All Options): 75 credits
  - Prescribed Courses: 56 credits
  - Additional Courses: 19 credits
- Requirements for the General Option: 18-19 credits

M.S. Degree Portion:
- TOTAL M.S. REQUIREMENTS: 34 credits (12 double-counted with the B.S. Requirements)
  - Prescribed Courses: METEO 520, 521, 531, 533, 580, 590, 591 (16 credits)
  - Additional Courses: 18 credits
    - 6 credits of 500-level course work
    - 6 credits of 400- or 500-level course work
    - 6 credits of METEO 600 (thesis option)
    - or 6 credits of 400- or 500-level course work (paper option)

The Intercollege Graduate Program in Molecular Medicine (IGDP in MM) prepares graduates for diverse opportunities in academic institutions, pharmaceutical companies, private research foundations, governmental research and regulatory programs. The program includes faculty from 14 academic units in the College of Agricultural Sciences and Eberly College of Science at the University Park campus and the College of Medicine at the Penn State Milton S. Hershey Medical Center. The IGDP in MM is also supported by the Huck Institutes of Life Sciences which provides modern telecommunications facilities and sophisticated equipment for state-of-the-art research applications. Doctoral students not only explore new conceptual connections, but also engage in active group learning experiences and explore a variety of potential career opportunities before graduation. Two unique aspects are (1) optional dual mentors will expose students to complementary viewpoints and encourage students to pursue problems at the interface between traditional disciplines, and (2) an optional internship will provide a mechanism for students to obtain practical experience in future professional settings.

The Pennsylvania State University
General Admission Requirements

Ph.D. degrees

Application deadline is December 1 for priority consideration.

1. Completed official Penn State Graduate School application for the IGDP in Molecular Medicine
2. Paid nonrefundable application fee
3. Two official transcripts from each institution attended
4. Application for a U.S. visa (international applicants only)
5. Graduate Record Examinations (GRE) general test
6. Three letters of recommendation
7. Statement of goals that pertains to the life sciences
8. All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) examination. A minimum TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or a score of 80 on the internet-based test is required.
9. Students must have completed a bachelor's degree at an accredited college or university and have a minimum of a 3.0/4.0 junior/senior undergraduate grade-point average.

Program Requirements

Ph.D. degrees

1. Foundation of basic knowledge in cancer biology, toxicology, immunology, infectious diseases, molecular biology, cell biology, biochemistry. The IGDP in MM requires at least 9 credits in one or more of these disciplines. Students may request a waiver of a required if they have taken the specific course as an undergraduate or a similar course at another institution. The request will be made in writing to the campus curriculum committee after consultation with the co-chair. The following courses are to fulfill this requirement.

University Park

BIOCHEMISTRY AND MOLECULAR BIOLOGY (B M B)

464. Molecular Medicine (3 credits)

BIOCHEMISTRY, MICROBIOLOGY & MOLECULAR BIOLOGY (BMMB)

501. Biochemistry & Molecular Biology (5 credits)

INTEGRATIVE BIOSCIENCES (IBIOS)

VBS/IBIOS 511. Molecular Immunology (2 credits)

590. Colloquium (1 credit)

591. Ethics in Life Sciences (1 credit)

596. Independent Studies: 3 Laboratory Rotations (1 credit)

Penn State Hershey

College of Medicine Core Curriculum

BIOMEDICAL SCIENCE (BMS)

501. Regulation of Cellular and Systemic Energy Metabolism (3 credits)

502. Cell and Systems Biology (3 credits)

503. Flow of Cellular Information (3 credits)

Molecular Medicine Core Curriculum

INTEGRATIVE BIOSCIENCES (IBIOS)

590. Colloquium (1 credit)

591. Ethics in Life Sciences (1 credit)

596. Independent Studies: 3 Laboratory Rotations (1 credit)

Electives

Five additional credits from the College of Medicine Selective Courses

To augment the core sequences of courses, students and their research committees will formulate an individualized advanced curriculum. Additionally, opportunities to participate in an internship (IBIOS 595) or supervised college teaching experiences (IBIOS 602/VBS 602) are available. Interested graduate students are to discuss the opportunity with a MM IGDP Co-Chair and/or their faculty advisor.

IBIOS 595. INTERNSHIP (1 credit). For students interested in exploring academic, government, medical, legal, or business corporate approaches to research. This is an external work assignment relevant to individual research or career goals. Interested graduate students are to discuss the opportunity with the IGDP in MM co-chair and/or their faculty advisor.

IBIOS 602/VBS 602. SUPERVISED EXPERIENCE IN COLLEGE TEACHING (1 credit). All students are strongly encouraged to enroll for 1 credit (or the equivalent) of Supervised Experience in College Teaching before the beginning of their third year. International fellows from non-English speaking countries must pass an English proficiency exam before any teaching duties are assigned.

M.S. Degree Requirements

Although the graduate program in Molecular Medicine generally gives admission to students who seek the Ph.D. degree, on occasion, the program may allow candidates to pursue the Master of Science (M.S.) degree. This degree can also serve as an alternative for students who do not proceed to the Ph.D. for any number of reasons. It should be noted that an M.S. degree is not required for entry into the Ph.D. program of the Molecular Medicine IGDP. Masters students must have a minimum of 30 credits and a 3.0 overall GPA. IBIOS 595 (Internship), 596 (Rotations), and 602 (Teaching) credits all count toward the 30 credits. 18 credits need to be in the major at the 500-600 level.

Student Aid

Graduate assistantships available in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin. Under normal circumstances, all students admitted and continuing in good standing are provided with graduate assistantship support from University sources, research grants, or fellowships. Financial support is usually not provided for work toward a M.S. degree.

Courses

Graduate courses carry numbers from 500-599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

For course descriptions see the corresponding URLs.

The Pennsylvania State University
Master of Professional Studies in Community and Economic Development (MPS CEDEV)

The Master of Professional Studies in Community and Economic Development (MPS CEDEV) is a 30-credit terminal master's degree program that emphasizes an interdisciplinary approach to community and economic development. The program balances theory and practice. Courses taught in MPS CEDEV use a blend of Web technology, print, and other media to provide an effective balance of flexibility and interaction. Individuals who currently work with, or are interested in working with communities, community organizations and stakeholders, or on a range of community and economic development issues at the state or national levels would benefit from this program. The MPS CEDEV program requires the completion of seven core courses (21 credits) in which students learn and apply sociological and economic concepts to issues in community and economic development. The courses offer examples and opportunities to apply these concepts to real issues facing communities and rural regions. Two of the core courses (6 credits) emphasize statistical methods and tools and techniques useful to practitioners in community and economic development. Students then can take from 3 to 6 credits of elective coursework to focus on their particular interests within community and economic development, or to work toward additional certifications. All students are required to complete a project, paper or internship (3 to 6 credits) that integrates theory and practice.

Instruction in the MPS CEDEV program emphasizes key themes that include economic planning and development; municipal finance, land use and population change; community structure, organization and process; leadership; tools and techniques in community development; community decision-making and capacity building. Students also may complete 12 credits in the core and a professional paper and earn a Post-baccalaureate Certificate in Community and Economic Development.

Degree Requirements

The professional Master’s degree requires 30 credits including a final integrative assessment/experience. All students complete the required MPS CEDEV core program of community and economic development courses, statistics, and methods. The MPS CEDEV courses consist of CEDEV 430, CEDEV 452, CEDEV 500, CEDEV 505, and CEDEV 509. The statistics, methods, and techniques requirement includes STAT 500 (or the equivalent) and CEDEV 575. CEDEV 576 is an optional summer institute focusing on applications and practices for community and economic development. An integrative paper, project, or internship is required where the student demonstrates the capability to integrate and apply concepts, principles, analytical techniques and interpretation skills learned in the program to a real problem faced by a community or community organization. Choice of electives will be based on a plan of study worked out between the student and faculty adviser. There is no foreign language requirement for the degree, however, students planning to work in multi-cultural or international settings are encouraged to gain competency in an appropriate language(s). A total of 18 credits must be 500 level or higher, with at least 6 credits of 500-level course work. This Graduate School requirement is met through the required courses and the project, internship or paper credits.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
- M.A., M.Mus., M.M.E.
- Ph.D.
- D.M.A.
- Music: Integrated Undergraduate-Graduate Degrees

The Graduate Faculty
- Sue Haug, D.Mus.A. (Iowa) Professor of Music
- Dan C. Armstrong, M.Mus. (Michigan) Professor of Music
- Eleanor Duncan Armstrong, D.Mus.A. (Michigan) Professor of Music
- Mark Ballora, Ph.D. (McGill) Associate Professor of Music
- Paul Barsom, Ph.D. (Eastman) Associate Professor of Music
- Vincent Betnitez, Ph.D. (Indiana) Associate Professor of Music
- Lisa J. Bontrager, M.Mus. (Michigan) Distinguished Professor of Music
- Velvet Brown, M.Mus. (Boston) Professor of Music
- Orlando Bundy, D.Ed. (Penn State) Professor of Music Education
- Maureen A. Carr, Ph.D. (University of Wisconsin) Distinguished Professor of Music
- Edward Christopher, D.Mus.A. (Eastman) Assistant Professor of Music
- Al Clements, Ph.D. (Washington, Seattle) Associate Professor of Music Education
- Kim Cook, M.Mus. (Yale) Professor of Music
- Anthony Costa, D.Mus.A. (Ohio State) Assistant Professor of Music
- Timothy Deighton, D.Mus.A. (Kansas) Professor of Music
- Lynn Drafal, D.Ed. (Illinois) Associate Professor of Music
- Daryl Durrant, M.Mus. (Wisconsin, Milwaukee) Professor of Music
- Gerardo Edelstein, M.Mus. (Rice) Associate Professor of Music
- Langston Fitzgerald III, D.Mus.A. (Catholic) Professor of Music
- Robert Gardner, Ph.D. (Eastman) Assistant Professor of Music Education
- Dennis Glocke, M.Mus. (Northwestern) Professor of Music
- Taylor Greer, Ph.D. (Yale) Associate Professor of Music
- Stephen Hopkins, Ph.D. (Florida State) Assistant Professor of Music
- Timothy Hurtz, B.Mus. (Southern California) Associate Professor of Music
- Lisa Jenkins, Ph.D. (Michigan) Instructor in Music
- Richard Kennedy, M.Mus. (Indiana) Professor of Music
- Christopher Kiver, D.Mus.A. (Michigan) Associate Professor of Music
- Anthony Leach, Ph.D. (Penn State) Professor of Music and Music Education
- Mark Lusk, M.Mus. (Eastman) Professor of Music
- James Lyon, M.Mus. (West Texas) Professor of Music
- Eric J. McKee, Ph.D. (Michigan) Associate Professor of Music
- Robert Nairn, Dipl.Mus. (Berlin Musikhochschule) Professor of Music
- Joanna Runkowski, Ph.D. (SUNY, Buffalo) Professor of Music Education
- Mary Saunders, M.A. (Middlebury College/Sorbonne, Paris) Associate Professor of Music
- Timothy Shafer, D.Mus. (Indiana) Professor of Music
- Steven H. Smith, D.Mus.A. (Eastman) Professor of Music
- Norman Spivey, D.Mus.A. (Michigan) Professor of Music
- David Stambler, D.Mus.A. (Maryland) Associate Professor of Music
- Marie Sumner Lott, D.Mus.A. (Montclair) Assistant Professor of Music
- Marica Tacconi, Ph.D. (Yale) Professor of Music
- Caitlin J. Thorton, Ph.D. (Penn State) Assistant Professor of Music Education
- Linda Thornton, Ph.D. (Montclair) Associate Professor of Music Education
- Jennifer Trost, M.Mus. (Michigan State) Associate Professor of Music
- M. Daniel Yoder, M.Mus. (Idaho) Professor of Music
- Charles Youmans, Ph.D. (Duke) Associate Professor of Music
- Max Zorin, D.Mus.A. (Eastman) Associate Professor of Music

Admission Requirements
In addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin, the School of Music requires the completion of a recognized baccalaureate degree in music or music education, with a junior/senior grade-point average of 2.80 or higher (on a 4.00 scale), but admission to the Doctor of Musical Arts (D.M.A.) requires a grade point average of 3.00. Admission to the M.Mus. program requires an audition or the submission of compositions, or a list of works studied in preparation for conducting (depending on the specific degree); admission to the M.M.E. program requires the completion of 12-15 credits in music education methods at the undergraduate level and successful teaching or student teaching experience; admission to the Ph.D. requires an interview, submission of videotapes of teaching or conducting, scores from the Miller Analogies Test, and a portfolio of requested documents; admission to the M.A. program requires scores from the Graduate Record Examinations (GRE General Test), and evidence of scholarly writing on a musical topic. Information on additional requirements for entrance to the various degree programs can be obtained from the School of Music office. Admission to the D.M.A. (major in piano performance) requires an audition in person or by video recording of an extensive memorized program; students admitted to this program must perform musically at least at the level required to complete the degree Master of Music at Penn State, and must show potential ability to perform professionally. Additional requirements include an interview in person or by interactive video to assess language skills in addition to the University’s requirement of specific performance on the TOEFL (550 on the paper test, 213 on the computer-based test, or 80 points on the internet test with a minimum of 20 on the new speaking portion) or alternatively, the International English Language Testing System (IELTS) with a minimum of 6.5.

Master's Degree Requirements
Three programs leading to the master of arts degree are offered. All three degrees require a research component. The M.A. in Music Theory and History (34 credits) provides an interdisciplinary approach to the field of music scholarship, whereas the M.A. in Musicology (32 credits) and the M.A. in Music Theory (32 credits) are more specialized in preparing students for doctoral study. All three programs require a thesis. A reading knowledge of German or another appropriate language must be demonstrated before thesis credit may be scheduled.

The master of music education degree provides the opportunity for advanced study in music, music learning and teaching, and teaching as reflective practice. The program requires one full-time year of residency at the University Park campus, and is designed to be completed in one academic year plus two summer semesters. Fulfillment of degree requirements includes successful completion of 30 credits of course work that includes a final action research project and resultant substantial article-length paper, followed by an oral presentation focusing on the candidate’s projects and course work. This presentation, including
Graduate Bulletin Archive - 2012 2011 - 2012

The master of music degree (36 credits) provides five majors: Performance, Composition/Theory, Conducting, Piano Pedagogy and Performance, and Voice Performance and Pedagogy. The M.Mus. in Performance offers three separate curricula with areas of emphasis in Voice, Keyboard, or Orchestral Instruments. Depending on the area of emphasis, a recital, a composition project, or a conducting project is required. For the M.Mus. in Performance with emphasis in voice or keyboard, a master's recital is required, in addition to either a master's paper or lecture-recital. For the M.Mus. in Performance (orchestral instruments), a master's recital is required. For the M.Mus. in Composition/Theory, a composition project and a master's paper are required. The M.Mus. in Conducting offers three areas of emphasis: Orchestral, Choral, or Band/Wind Ensemble. A performance project and a master's paper are required.

In all master's programs, at least one-half the required credits must be at the 500 level, and a comprehensive examination is required.

**Doctoral Degree Requirements: Ph.D. in Music Education**

The Ph.D. in Music Education is designed to provide opportunities for the highest level of scholarly study in the processes of teaching and learning music. Candidates are expected to develop and test new knowledge in the field of music education while preparing themselves for positions in higher education or other leadership roles within the profession. A candidacy exam, a doctoral thesis, and comprehensive written and oral examinations are required.

**Doctoral Degree Requirements: D.M.A. major in Piano Performance**

The Doctor of Musical Arts is offered with a major in Piano Performance. Four semesters in residence are required. The degree is designed to provide students with a thorough background of preparation and experience in professional-level performance and in the literature of the instrument, while becoming sufficiently knowledgeable about the discipline of music as a whole, in order to teach at the collegiate or university level. This background knowledge would include, but not be limited to, music theory, analysis, and history. Sixty credits are required beyond the Master of Music; if an exceptional student is admitted before completion of a prior Master of Music degree, the student will complete a total of 30 credits in categories equivalent to those required for the M.Mus., in addition to the 60 required for the D.M.A. A candidacy examination will follow upon two semesters completed in residence. Minimum course requirements (post-Master's degree) include sixteen credits (four semesters at 4 credits/semester) of Keyboard 580J applied music instruction; four credits of advanced ensembles; 10 credits of literature and pedagogy in the major area; and 18 credits in the broader discipline of music, the comprehensive examination will occur upon the completion of coursework, before the final recital. The culminating experience of the D.M.A. degree is public performance: three memorized solo recitals are required (the final recital is prepared independently), and two recitals of chamber music. Although no written thesis is required, a lecture-recital is required, with a pre-approved monograph text.

**Other Relevant Information**

The School of Music sponsors many musical ensembles, and candidates for performance degrees are required to participate in positions of responsibility. All candidates for degrees are expected to be in residence for a minimum of two semesters, except that D.M.A. candidates must be in residence for at least four semesters.

The School of Music is a regionally accredited institutional member of the National Association of Schools of Music.

**Student Aid**

Graduate assistantships available to students in this program and other forms of student aid are described in the [STUDENT AID](#) section of the Graduate Bulletin.

**Music: Integrated Undergraduate-Graduate Degrees**

The School of Music offers six Integrated Undergraduate-Graduate degree programs—three that combine the B.A. in Music with the M.A. in Musicology, Music Theory, and Music Theory and History, and three that combine the B.M. in Performance with the M.A. in Musicology, Music Theory, and Music Theory and History. This enables a select number of students to further their research interests at the undergraduate and graduate levels. By the end of the five-year program students receive two degrees, a B.A. in Music and an M.A. in Musicology, Music Theory, or Music Theory and History, or a B.M. in Performance and an M.A. in Musicology, Music Theory, or Music Theory and History. The School of Music sponsors many musical ensembles, and candidates for performance degrees are required to participate in positions of responsibility. All candidates for degrees are expected to be in residence for a minimum of two semesters, except that D.M.A. candidates must be in residence for at least four semesters. A candidacy examination will follow upon two semesters completed in residence.

Candidates for these Integrated Undergraduate-Graduate degrees must demonstrate a high level of aptitude and achievement in academic core courses and be highly motivated to pursue research projects with faculty.

Modeled after a similar program in the Schreyer Honors College, this IUG program enables gifted music students to double count credits in two degree programs. As a result they will have developed a research focus during their fourth and fifth years, which will help them prepare for entry into doctoral programs at other institutions.

For further information about the six Integrated Undergraduate-Graduate degree programs, including application procedures and degree requirements, see the [School of Music Web site](#) and click on the "Prospective Students" link.

**MUSIC COURSES**

Individualized instruction is offered in six categories covering eighteen instruments:

- **Brass (BRASS)**: Trumpet, french horn, trombone, euphonium, tuba
- **Keyboard (KEYBD)**: Piano, organ
- **Strings (STRING)**: Violin, viola, violoncello, double bass
- **Woodwinds (WWNDS)**: Flute, oboe, clarinet, bassoon, saxophone
- **Percussion (PERCN)**
- **Voice (VOICE)**

Instruction is offered for each instrument in three different modes: Secondary for 1 credit, Secondary for 2 credits, and Performance for 4 credits. The Performance mode is available only to M.Mus. (Performance) students in their major areas. All other students take Secondary for 1 or 2 credits.

Applied music fees are required for individual instruction: $175 per instrument for a 1-credit course, $250 per instrument for a 2-, 3-, or 4-credit course. A complete list can be obtained from the School of Music office.

**MUSIC (MUSIC)**

- **503. CONCERT CHOIR (1 per semester, maximum of 4)**
- **504. CHAMBER SINGERS (1 per semester, maximum of 4)**
- **505. SYMPHONIC WIND ENSEMBLE (1 per semester, maximum of 4)**
- **506. SYMPHONIC BAND (1 per semester, maximum of 4)**
- **507. PHILHARMONIC ORCHESTRA (1 per semester, maximum of 4)**
- **508. CHAMBER SINGERS (1 per semester, maximum of 4)**
- **509. CONCERT CHOIR (1 per semester, maximum of 4)**

The Pennsylvania State University
**507. PHILHARMONIC ORCHESTRA** (1 per semester, maximum of 4)
**508. CHAMBER ORCHESTRA** (1 per semester, maximum of 4)
**509. CENTRE DIMENSIONS** (1 per semester, maximum of 4)
**510. BRASS CHOIR** (1 per semester, maximum of 4)
**511. PERCUSSION ENSEMBLE** (1 per semester, maximum of 4)
**520. CHAMBER MUSIC FOR STRINGS** (1-4)
**521. CHAMBER MUSIC FOR WOODWINDS** (1-4)
**522. CHAMBER MUSIC FOR BRASS** (1-4)
**523. SONATA DUOS** (1)

**560. CHORAL CONDUCTING** (2-4 per semester, maximum of 16)
**561. ORCHESTRAL CONDUCTING** (2-4 per semester, maximum of 8)
**562. BAND/WIND ENSEMBLE CONDUCTING** (2-4 per semester, maximum of 16)
**565. STUDIO AND RECITAL ACCOMPANIMENT** (1)

*Admission by audition.

**Course may be scheduled only after consultation with the director of the School of Music.**

**Course Descriptions**

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Kevin D. Alloway, Ph.D. (Indiana) Professor of Neural and Behavioral Sciences
- Anthony F. Andrews, Ph.D. (American U) Associate Professor of Molecular Toxicology
- Alistair J. Barber, Ph.D. (Open University, Milton Keynes, UK) Assistant Professor of Ophthalmology, and Cellular and Molecular Physiology
- Colin Bamstafe, Ph.D. (Wolstein College, Oxford, UK) Professor and Chair, Neural and Behavioral Sciences
- Paul Bartell, Ph.D. (Virginia) Assistant Professor of Avian Biology
- Sheri Benenbaum, Ph.D. (California, Berkeley) Professor of Psychology
- Merlin L. Billslinge, Ph.D. (George Washington) Professor of Pharmacology
- Edward O. Bixler, Ph.D. (New Mexico) Professor of Psychiatry; Vice Chair of Research
- Robert H. Bonneau, Ph.D. (Penn State) Professor of Microbiology and Immunology
- Douglas Cavener, Ph.D. (Georgia) Professor and Head of Biology
- Shana Cavagelli, Ph.D. (Duke) Assistant Professor of Biobehavioral Health
- John Collins, Ph.D. (Cambridge) Professor of Physics
- James R. Connor, Ph.D. (California, Berkeley) Distinguished Professor and Vice Chair of Neurosurgery
- Rebecca Corwin, Ph.D. (Chicago) Associate Professor of Psychology
- Nancy Dennis, Ph.D. (Catholic U of America) Assistant Professor of Psychology
- Min Ding, Ph.D. (Pennsylvania); Ph.D. (Ohio State) Associate Professor of Marketing
- Barry R. Dwarkin, Ph.D. (Rockefeller) Professor of Neural and Behavioral Sciences
- John Ellis, Ph.D. (Rochester) Professor of Psychiatry and Pharmacology; Director, Molecular Neuropharmacology Laboratory
- Paul J. Esslinger, Ph.D. (Texas Christian) Professor of Neurology
- Andrew G. Ewty, Ph.D. (Indiana) Professor of Chemistry, and Neural and Behavioral Sciences; J. Lloyd Hickey Chair in Natural Sciences
- Jidong Fang, M.D./Ph.D. (CUNY) Associate Professor of Psychiatry
- Williams M. Freeman, Ph.D. (Wake Forest) Associate Professor of Pharmacology
- Thomas W. Gardner, M.D. (Thomas Jefferson) Professor of Ophthalmology, and Cellular and Molecular Physiology
- Charles Geier, Ph.D. (Pittsburgh) Assistant Professor of Human Development
- Rick Gilmore, Ph.D. (Carnegie Mellon) Assistant Professor of Psychology
- Bruce Gluckman, Ph.D. (Pennsylvania) Associate Professor of Engineering Science and Mechanics, and Neurosurgery; Associate Director, Penn State Center for Neural Imaging Research
- Jinger Gottschall, Ph.D. (Colorado) Assistant Professor of Kinesiology
- Patricia S. Griswold, Ph.D. (Rutgers) Associate Professor of Neural and Behavioral Sciences
- Andras Hajnal, M.D., Ph.D. (Peacs U Medical School, Hungary) Assistant Professor of Neural and Behavioral Sciences
- Kyung-An Han, Ph.D. (Arizona) Professor of Biobehavioral Health and Pharmacology
- Frank Hillary, Ph.D. (Drexel) Assistant Professor Psychology
- Dezhe Jin, Ph.D. Assistant Professor of Physics
- Byron C. Jones, Ph.D. (Arizona) Professor of Biobehavioral Health and Pharmacology
- Uhnah Kim, Ph.D. (Duke) Associate Professor of Neurosurgery
- Laura Klein, Ph.D. (Uniformed Services U of Health Sci) Associate Professor of Biobehavioral Health
- Lisa Kopp, Ph.D. (USC) Assistant Professor of Human Development
- Alexey Kozezhnikov, Ph.D., Assistant Professor of Physics
- J. Kyle Kraidy, Ph.D. Assistant Professor of Neural and Behavioral Sciences
- Zhichun Liu, Ph.D. (Albert Einstein College of Med) Assistant Professor of Psychology
- Kathryn F. LaNoue, Ph.D. (Yale) Professor of Cellular and Molecular Physiology
- Alphonse E. Leure-duPree, Ph.D. (U of London, England) Professor of Neural and Behavioral Sciences
- Robert Levenson, Ph.D. (SUNY, Stony Brook) Professor of Pharmacology
- Aimin Liu, Ph.D. (NYU Medical Center) Assistant Professor of Biology
- David X. Liu, Ph.D. (CUNY) Assistant Professor of Neural and Behavioral Sciences
- Lyle N. Long, D.Sc. (George Washington) Distinguished Professor of Aerospace Engineering and Mathematics
- Patricia J. McLaughlin, D.Ed. (Penn State, Harrisburg) Professor of Neural and Behavioral Sciences
- Robert J. Milner, Ph.D. (Rockefeller) Professor of Neural and Behavioral Sciences; Co-Director, Graduate Program in Neuroscience
- Gregory Moore, M.D. (Wayne State School of Med) Ph.D. (MIT) Professor of Psychiatry, and Neural and Behavioral Sciences; Director, Behavioral Neuroimaging Research Division
- Ralph Norgren, Ph.D. (Michigan) Professor of Neural and Behavioral Sciences
- Richard W. Ordway, Ph.D. (UMass Medical School) Professor of Biology; Chair, Intercollege Graduate Degree Program in Genetics
- Ann Ouyang, M.B., B.S. (London) Professor of Medicine
- Charles Palmer, M.D. (U of Cape Town, South Africa) Professor of Pediatrics
- Randen Patterson, Ph.D. (Maryland) Assistant Professor of Biology
- Blaise Peterson, Ph.D. (U of Washington) Associate Professor of Cellular and Molecular Physiology
- Thomas G. Pitchard, Ph.D. (Delaware) Associate Professor of Neural and Behavioral Sciences
- Chester A. Ray, Ph.D. (Georgia) Professor of Medicine and Cellular and Molecular Physiology
- William Ray, Ph.D. (Vanderbilt) Professor of Psychology
- Frank Ritter, Ph.D. (Carnegie Mellon) Associate Professor of Information Sciences and Technology
- Victor J. Ruiz-Velasco, M.D. (Tulane) Assistant Professor of Anesthesiology
- Robert L. Sainburg, Ph.D. (Rutgers) Associate Professor of Biobehavioral Health and Pharmacology; Co-Director, Graduate Program in Neuroscience
- Russell C. Schindler, Jr., Ph.D. (Indiana) Associate Professor of Cellular and Molecular Physiology
- Cara-Lynne Schengrund, Ph.D. (Seton Hall) Professor of Biobehavioral Health and Pharmacology
- K. Suzanne Scherf, M.D. (Pittsburgh) Assistant Professor of Psychology
- Steven Schiff, Ph.D. (Duke) Chair Professor of Engineering, Professor of Neurosurgery, Engineering Science and Mechanics; Director, Penn State Center for Neural Engineering.
- Zachary Simmons, M.D. (Florida) Professor of Neurology
- Ian A. Simpson, Ph.D. (London) Assistant Professor of Neuroscience
- Semyon Slobounov, Ph.D. (Illinois); Ph.D. (U of Leningrad) Associate Professor of Kinesiology
- Thyagarajan Subramanian, Professor of Neural and Behavioral Sciences; Director, Movement Disorders Program

The Pennsylvania State University
The Neuroscience graduate program is an interdepartmental program within the College of Medicine. The goal of the program is to provide academic and research training leading to the Ph.D. or M.S. degree in Neuroscience. Graduates are prepared for future careers in academic research, teaching, industry, or government service. Doctoral students are expected to graduate with the following competencies: (1) the conceptual and technical skills necessary to conduct a research project in an area of neuroscience; (2) a broad general knowledge of neuroscience and detailed knowledge of one or more specialized areas; (3) the ability to appraise scientific evidence; (4) effective oral and written communication skills; (5) a commitment to professional responsibilities and adherence to ethical principles; and (6) an understanding of the external structures that govern biomedical research and the career pathways available to graduates. These competencies are delivered and/or assessed through formal course work (required and elective courses), candidacy and comprehensive examinations, mentored laboratory research, public presentations, publication of research papers, and defense of a written dissertation.

Although the program focuses on doctoral education; the M.S. degree in Neuroscience can be granted to students who request it. Master's students are expected to complete the same course requirements as doctoral students and to write a research thesis.

Graduate Degree Requirements

Ph.D. degree in Neuroscience

During the first year of study, Ph.D. candidates in neurosciences receive a broad education in the breadth of neuroscience through three core neuroscience courses covering cellular and molecular neuroscience (which includes developmental neuroscience and neuropharmacology), systems neuroscience, and neuroanatomy. Students must also demonstrate competency in biostatistics. This requirement is satisfied by passing the course HES 515 or another similar course with the approval of the program director. This requirement may be waived with the approval of the program director for students who can demonstrate prior course work in biostatistics. In addition, 3 credits of elective courses offered at Penn State; course selection for this elective is with the approval of the program director.

The Language and Communication Requirement is satisfied by a grade of at least 3.0 in NEURO 530. A research thesis and thesis defense are required.

M.S. Degree in Neuroscience

Core or Required Courses: NEURO 511, 520, 521, 522, 523, 530, 597; CMBIO 540; IBIOS 591.

Language and Communication Requirement: Satisfied by a grade of at least 3.0 in NEURO 530

Thesis or Paper Requirement and Course(s)/Credits Required: A research thesis is required.

Student Aid

Graduate research assistantships are provided for qualified doctoral students; full tuition is also provided. All support is continuous for the first year from the Neuroscience program. Support in years two and above, when the student is conducting thesis research, must be secured from either the basic science department in which the candidate elects to pursue his/her minor or from funds available from the thesis adviser. These funds must be secured by the student in conjunction with his/her adviser.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit

Nuclear Engineering (NUC E)

Program Home Page

ARTHUR T. MOTTA, Chair of Nuclear Engineering
138 Reber Building
814-863-6384

Degrees Conferred:
Ph.D., M.S., M.Eng.

The Graduate Faculty

- Maria Avramova, Ph.D. (Penn State) Assistant Professor of Nuclear Engineering
- Yousry Y. Azmy, Ph.D. (Illinois, Urbana-Champaign) Adjunct Professor of Nuclear Engineering
- Anthony J. Baratta, Ph.D. (Brown) Professor Emeritus of Nuclear Engineering
- Jack S. Brenizer, Jr., Ph.D. (Penn State) Professor of Mechanical and Nuclear Engineering
- Gary L. Catchen, Ph.D. (Columbia) Professor of Nuclear Engineering
- Fan-Bill Cheung, Ph.D. (Notre Dame) Professor of Mechanical and Nuclear Engineering
- Ward D. Diethorn, Ph.D. (Carnegie Tech) Professor Emeritus of Nuclear Engineering
- Robert M. Edwards, Ph.D. (Penn State) Professor of Nuclear Engineering
- Kostadin N. Ivanov, Ph.D. (Bulgarian Academy of Sciences) Professor of Nuclear Engineering
- Edward S. Kenney, Ph.D. (Penn State) Professor Emeritus of Nuclear Engineering
- Seungjin Kim, Ph.D. (Purdue) Assistant Professor of Mechanical and Nuclear Engineering
- Edward H. Klevans, Ph.D. (Michigan) Professor Emeritus of Nuclear Engineering
- Samuel H. Levine, Ph.D. (Pittsburgh) Professor Emeritus of Nuclear Engineering
- Thomas F. Lin, Senior Research Associate
- Arthur T. Motta, Ph.D. (California, Berkeley) Professor of Nuclear Engineering
- Gordon E. Robinson, Ph.D. (Penn State) Professor Emeritus of Nuclear Engineering
- Barry E. Scheetz, Ph.D. (Penn State) Professor of Materials; Senior Scientist, Materials Research Laboratory; Professor of Civil Engineering and Nuclear Engineering
- Kenan Ünlü, Ph.D. (Michigan) Professor of Nuclear Engineering; Director, Radiation Science and Engineering Center

Graduate programs and research facilities are available in thermal-hydraulics, neutronics, computational methods, advanced controls with applications of artificial intelligence, materials, radiation monitoring and effects, fuel management, and radioactive waste management. Application areas include advanced reactor design, safety analysis, radiation instrumentation development, neutron imaging, and plant life extension.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the 

GENERAL INFORMATION

section of the Graduate Bulletin.

Students with a 3.00 junior/senior grade-point average and with appropriate course backgrounds will be considered for admission. General aptitude GRE test results are required. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

To qualify for admission, an international student must achieve a minimum score on the Test of English as a Foreign Language (TOEFL) of 550 on the paper-based test, 213 on the computer-based test, and 80 on the Internet-based test with a 19 in the speaking section. This requirement is waived if the student’s native language is English or if the student received a baccalaureate or master’s degree from an institution in which the language of instruction was English. Letters of recommendation and a statement of purpose written by the applicant are also required to complete the application package.

Degree Requirements

The M.Eng. degree is a nonthesis professional master’s degree. In the M.Eng. degree program, 30 course credits are required. Twelve of those credits must be in Nuclear Engineering with at least 18 credits at the 500 level. No thesis is required for the M.Eng. degree. Instead, the student must take 3 credits of NUC E 5970 Professional Topics in Nuclear Engineering, which represents formal recognition of the student’s effort spent on writing a paper about an engineering subject. It must be approved by the adviser, a faculty reader, and the program chair.

The M.S. degree program is designed for students to gain advanced knowledge for research, analysis, and design in nuclear engineering. Student pursuing an M.S. degree must complete 24 course credits and submit an acceptable thesis (6 research credits) to the Graduate School.

Continuous registration is required of all Ph.D. students until the thesis is approved.

The Ph.D. program emphasizes scholarly research and helps students prepare for research and related careers in industry, government, and academe. Students are admitted to candidacy after passing written and oral examinations. The Ph.D. program is quite flexible, with minimal formal requirements. The Ph.D. degree is awarded upon completion of a program of advanced study that includes a minimum period of residence, a satisfactory thesis, and the passing of comprehensive and final oral examinations as determined by the student’s doctoral committee.

Generally, a Ph.D. student must have 30 credits above a master’s degree before taking a comprehensive examination.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the Graduate Bulletin, the following awards typically have been available to graduate students in this program:

NATIONAL ACADEMY FOR NUCLEAR TRAINING FELLOWSHIPS-Available to graduate students in nuclear engineering; stipend plus tuition.

U.S. DEPARTMENT OF ENERGY-NUCLEAR SCIENCE AND ENGINEERING FELLOWSHIPS-Available to graduate students interested in engineering and engineering support related to nuclear technology; stipend plus tuition.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level will not count. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

NUCLEAR ENGINEERING (NUC E) course list

The Pennsylvania State University
The Graduate Faculty

- Kesha Baptiste-Roberts, Ph.D. (Johns Hopkins) Assistant Professor of Nursing
- Raymonde A. Brown, Ph.D. (Maryland) Assistant Professor of Nursing; Associate Dean for Undergraduate Programs and Outreach in Nursing
- Harleah G. Buck, Ph.D. (Southern Florida) Assistant Professor of Nursing
- Mary Beth Clark, Ed.D. (Temple) Assistant Professor of Nursing
- Mona M. Counts, Ph.D. (Texas, Austin) Associate Professor of Nursing; Elouise Ross Eberly Professor of The School of Nursing
- Margaret (Peg) Cushman, Ph.D. (UMass, Boston) Assistant Professor of Nursing
- Donna Fick, Ph.D. (California) Professor of Nursing
- Janet Fogg, Ph.D. (Villanova) Instructor in Nursing
- Marianne Hillemeier, Ph.D. (Michigan) Associate Professor of Health Policy and Administration, and Nursing Health Policy
- Judith E. Hupcey, Ed.D. (Columbia) Associate Professor of Nursing; Associate Dean for Graduate Education in Nursing
- Rita Jablonski, Ph.D. (Virginia) Assistant Professor of Nursing
- Lisa A. Kikta, Ph.D. (Penn State) Assistant Professor of Nursing; Coordinator, Clinical Nurse Specialist Option
- Ann M. Kolanoowski, Ph.D. (New York) Professor of Nursing; Elouise Ross Eberly Professor of The School of Nursing
- Susan Loeb, Ph.D. (Penn State) Associate Professor of Nursing
- Kathleen M. Mastronardi, Ph.D. (Kent State) Assistant Professor of Nursing
- Paula Milone-Nuzzo, Ph.D. (Connecticut) Professor and Dean, School of Nursing
- Janice L. Penrod, Ph.D. (Penn State) Associate Professor of Nursing
- Adam S. Sawyer, Ph.D. (Pennsylvania) Assistant Professor of Nursing
- Carol A. Smith, D.S.N. (Alabama) Associate Professor of Nursing
- Elizabeth J. Susman, Ph.D. (Penn State) Jean Phillips Shirley Professor of Biobehavioral Health; Professor of Nursing
- Patricia Sweeney, Ph.D. (Penn State) Instructor in Nursing; Coordinator, Nurse Practitioner Option

The Graduate programs emphasize productive scholarship and research in the development of nursing knowledge and the translation of knowledge into practice. Advanced study is in human health and development throughout the life span, and in nursing's role in providing health services to individuals, families, and communities.

The Ph.D. program prepares nurse scientists and clinical scholars to provide leadership in nursing education, practice and research. Individualized curricula prepare nursing graduates to assume positions as faculty, advanced clinicians, clinical researchers and leadership positions in community, governmental, or institutional settings.

The M.S. degree in Nursing consists of a Base Program with four emphasis areas or a B.S. to Ph.D. and four advanced practice nursing options. The Base Program emphasis areas include: nursing administration, nursing education, clinical trials research or community health policy and management. The advanced practice options include: Clinical Nurse Specialist, Family Nurse Practitioner, Adult Gerontology Primary Care Nurse Practitioner, and Adult Gerontology Acute Care Nurse Practitioner. The master's degree program in Nursing is accredited by the National League for Nursing Accrediting Commission and the Commission on Collegiate Nursing Education.

The Nurse Practitioner option is designed to help prepare the professional nurse to function in an expanded nursing role providing direct care to specific groups of clients in a variety of health care settings. Since that practice is inherently interdisciplinary in nature, advanced knowledge and research from nursing is combined with knowledge from science, medicine, and related disciplines. The Nurse Practitioner may also function in supervisory, consultative, education, and research roles.

The Clinical Nurse Specialist option prepares advanced practice nurses in Adult Gerontology or Community Health to plan, implement, and evaluate care in a variety of settings. They function in direct care, supervisory, consultative, education, and research roles serving individuals, families, and communities.

Admission Requirements for M.S. and Ph.D. Programs

1. For admission to the Nursing program, an applicant must hold either (1) a bachelor’s degree in Nursing from a U.S. regionally accredited institution or (2) a postsecondary degree in Nursing that is equivalent to a U.S. baccalaureate degree in Nursing. International students must also submit transcripts of all previous course work from institutions of higher learning. For M.S. applicants, a cumulative grade-point average of 3.3 (on a 4.0 scale) is expected with a B or better in all science and nursing courses. College chemistry and statistics are also required. For doctoral applicants, a cumulative grade-point average 3.5 (on a 4.0 scale) for master's and subsequent coursework is expected.

2. Two letters of evaluation are required for the master's program and three letters of reference are required for the doctoral program. The letters should be solicited from professional colleagues who can attest to the applicant's ability.

3. Applicants must submit transcripts of all previous course work from institutions of higher learning. For M.S. applicants, a cumulative grade-point average of 3.3 (on a 4.0 scale) for junior/senior baccalaureate degree is expected with a B or better in all science and nursing courses. College chemistry and statistics are also required. For doctoral applicants, a cumulative grade-point average 3.5 (on a 4.0 scale) for master's and subsequent coursework is expected.

M.S. Degree Requirements

A core of courses including nursing issues, theory, and research is required of all students. Candidates in the Base Program require a minimum of 30 credits (range 30-39). The Clinical Nurse Specialist option must earn a minimum of 41-50 credits, Family Nurse Practitioner option, the requirement is a minimum of 41-50 credits.
45-48 credits, Adult Gerontology Primary Care Nurse Practitioner, is a minimum of 41-49 credits and Adult Gerontology Acute Care Nurse Practitioner, is a minimum of 43-46 credits. Students in all programs may choose to do either a thesis for 6 credits or a scholarly paper for 3 credits. A scholarly paper demonstrates the application of theory and research to a clinical problem based on review of literature and research utilization for that problem.

**Ph.D. Degree Requirements**

**Candidacy Examination:** All students must satisfactorily complete the candidacy examination, which is designed to confirm the student’s mastery of basic nursing theory and research methods. For students entering the doctoral program with a master’s degree, the candidacy examination must be taken at the end of the first year of full-time study or the equivalent. Students who fail the examination on the first attempt may repeat it once. Students who fail the examination the second time are terminated from the program.

**Comprehensive Examination:** The comprehensive examination is designed to test the student’s mastery of and ability to synthesize and integrate the theoretical basis for nursing science, advanced research methods and the chosen specialty area. This examination is taken upon completion of all course work. Students who fail the examination on the first attempt may repeat it once. Students who fail the examination the second time are terminated from the program.

**English Competency:** All students will be assessed for deficiencies in reading, writing and speaking of English during the core nursing courses prior to the candidacy examination; should remedial work be necessary, the student will be directed to the appropriate sources. International students will be advised that the passage of the minimal TOEFL or IELTS requirement does not demonstrate the level of competence expected of a Ph.D. in nursing.

**Communication and Language Requirement:** A foreign language will not be required. However, all students are required to be computer literate in word processing and use of statistical packages, as determined by their dissertation committee, and will be assessed for communication skills during core nursing courses.

**Dissertation:** Each student is required to conduct an original and independent research project which adds to nursing’s body of knowledge, and to communicate the research report in a written dissertation. A written dissertation proposal is required and must be approved at a proposal hearing by a majority vote of the student’s dissertation committee. A majority vote is also required for approval of the completed written dissertation at the final oral defense.

**Student Aid**

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the [STUDENT AID](#) section of the Graduate Bulletin, the following awards typically have been available to graduate students in this program:

**U.S. PUBLIC HEALTH SERVICE TRAINEESHIPS IN NURSING**

Open to selected registered nurse, full-time students in nursing; stipend may be available plus tuition. Apply to Associate Dean for Graduate Education, School of Nursing.

**Courses**

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students but courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

GORDON JENSEN, Head of the Department of Nutritional Sciences

SHELLY NICKOLS-RICHARDSON, Professor-in-Charge of Graduate Program in Nutrition

323 Chandlee Laboratory

814-863-2920

Degrees Conferred:
Ph.D., M.S.

The Graduate Faculty

- Craig R. Baumrucker, Ph.D. (Purdue) Professor of Animal Nutrition and Physiology
- Cheston M. Berlin, Jr., M.D. (Harvard) University Professor of Pediatrics and Pharmacology
- Leann Lippis Birch, Ph.D. (Michigan) Distinguished Professor of Human Development and Family Studies
- Dorothy A. Blair, Ph.D. (Cornell) Assistant Professor of Nutritional Sciences
- J. Lynne Brown, Ph.D. (MIT) Associate Professor of Food Science
- James R. Connor, Ph.D. (California, Berkeley) Professor of Neuroscience and Anatomy
- Rebecca L. Crow, Ph.D. (Chicago) Associate Professor of Nutritional Sciences
- Terry D. Etherton, Ph.D. (Minnesota) Distinguished Professor of Animal Nutrition
- Gary J. Fosmire, Ph.D. (California, Berkeley) Associate Professor Emeritus of Nutritional Sciences
- Michael H. Green, Ph.D. (California, Berkeley) Professor of Nutrition Science and Physiology
- Andras Hajnal, M.D., Ph.D. (Univ Medical School Pecs, Hungary) Associate Professor of Neural/Behavioral Sciences
- Okhee Han, Ph.D. (North Carolina) Assistant Professor of Nutritional Sciences
- Terry J. Hartman, Ph.D., R.D. (Minnesota) Professor of Nutritional Sciences
- Kevin J. Harvatine, Ph.D. (Cornell) Assistant Professor of Nutritional Physiology
- Leonard S. Jefferson, Jr., Ph.D. (Vanderbilt) Professor, Department of Cellular and Molecular Physiology; Associate Dean for Research and Graduate Studies
- Gordon L. Jensen, M.D., Ph.D. (Cornell) Professor and Department Head of Nutritional Sciences, Professor of Medicine, Hershey School of Medicine
- Ben J. Jones, Ph.D. (Arizona) Professor of Biobehavioral Health
- Shannon K. Kelleher, Ph.D. (California, Davis) Assistant Professor of Nutritional Sciences
- Kathleen L. Keller, Ph.D. (Rutgers) Assistant Professor of Nutritional Sciences and Food Science
- Katarzyna (Kasia) Kordas, Ph.D. (Johns Hopkins) Assistant Professor of Nutritional Sciences
- Penny M. Kris-Etherton, Ph.D., R.D. (Minnesota) Distinguished Professor of Nutritional Sciences
- Barbara Lohse, Ph.D., R.D. (Wisconsin, Madison) Associate Professor of Nutritional Sciences
- Andrea M. Mastro, Ph.D. (Penn State) Professor of Microbiology and Cell Biology
- Edward W. Mills, Ph.D. (Purdue) Associate Professor of Dairy and Animal Science
- Laura E. Murray-Kolb, Ph.D. (Penn State) Assistant Professor of Nutritional Sciences
- Sherry M. (Shelly) Nichols-Richardson, Ph.D., R.D. (Georgia) Professor of Nutritional Sciences
- Jill Patterson, Ph.D. (Wisconsin, Madison) Assistant Professor of Nutritional Sciences
- Jeffrey Peters, Ph.D. (California, Davis) Associate Professor of Veterinary Science
- Claudia K. Probst, Ph.D. (Oregon) Associate Professor of Nutritional Sciences
- Connie J. Rogers, Ph.D. (Pittsburgh) Assistant Professor of Nutritional Sciences
- Barbara J. Rolis, Ph.D. (Cambridge) Helen A. Guthrie Chair and Professor of Nutritional Sciences
- A. Catharine Ross, Ph.D. (Cornell) Dorothy Foehr Huck Chair and Professor of Nutritional Sciences
- Ian Simpson, Ph.D. (University College, London) Professor of Neuroscience and Anatomy
- Donald B. Thompson, Ph.D. (Illinois, Champaign-Urbana) Professor of Food Science
- Jack Vanderkooi, Ph.D. (Wisconsin, Madison) Associate Professor of Veterinary Science
- Regina Vasilatos-Younken, Ph.D. (Penn State) Professor of Poultry Science
- Sheila G. West, Ph.D. (North Carolina, Chapel Hill) Associate Professor of Biobehavioral Health
- Nancy I. Williams, Sc.D. (Boston) Associate Professor of Kinesiology

Graduates are prepared for careers in basic and applied research in nutrition and in college teaching. The course of study is planned to meet the professional objectives of the individual student. Students may emphasize molecular and cellular nutritional sciences, nutritional biochemistry, applied human nutrition, animal nutrition, and nutrition research, in college teaching. Supportive courses are available in biochemistry, physiology, genetics, microbiology, biophysics, food science, health policy and administration, human development and family studies, anthropology, sociology, psychology and statistics.

Current research emphasizes minerals, vitamin A, lipid metabolism, metabolic disorders, nutrition and behavior, nutrition education strategies, evaluation of dietary intake and nutritional status, nutrition policy and health promotion and disease prevention across the life cycle.

Facilities include well-equipped nutrition science laboratories with animal facilities supervised by a University laboratory animal resource staff. The Diet Assessment Center and the metabolic kitchens serve as a laboratories for students in community nutrition, nutrition education, and metabolic nutrition.

Admission Requirements

Scores from the Graduate Record Examination (GRE), or from the Medical College Admission Test (MCAT), are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to the GENERAL INFORMATION section of the General Bulletin.

College graduates with an undergraduate degree in nutrition, animal sciences, food science, dietetics, or a related biological or social science will be considered for admission. Applicants should have a minimum grade-point average of 3.00 (on a 4.00 scale), an acceptable score on the GRE (an average quantitative and verbal score above the fiftieth percentile of three supporting recommendations. Exceptions may be made for students with special backgrounds, abilities, and interests. When openings are limited, the best-qualified candidates are given priority.

The basic expectations for admission from undergraduate studies include 6 credits in chemistry (organic and inorganic); 3 credits each in physiology, biochemistry, and nutrition; and physics, calculus, and analytical chemistry for some research areas in nutrition science and social science for public health and community nutrition. Students with more than 9 credits of deficiency and a superior record may be admitted as provisional students until they qualify for consideration for regular degree status. Deficiencies are expected to be made up with a 3.00 grade-point average or better within the first two semesters.

Master's Degree Requirements

The graduate program in Nutritional Sciences offers the M.S. degree with an emphasis in basic nutritional sciences, applied human nutrition, or nutrition in public health.

The M.S. degree requires 30 credits of course work, including 6 credits in research (NUTR 600). The M.S. degree with an emphasis on nutrition in public health includes a 4-credit field experience (NUTR 555).

Doctoral Degree Requirements

The Pennsylvania State University
Students are admitted on a provisional basis pending satisfactory completion of the candidacy examination designed to assess the student's potential and academic preparation for doctoral study. Candidacy examinations must be scheduled by students with a master's degree after they have completed 10 credits in doctoral work but before the end of the second semester following admission to the graduate program. The candidacy examination is administered and evaluated by the Graduate Candidacy Committee.

**Communication and Language Requirement:** Doctoral students must demonstrate competency in spoken English as judged by the program faculty and in technical writing by completion of ENGL 418 with a grade of B or better. Students also must complete satisfactorily 2 to 3 credits at the 400 or 500 level from any one of the following areas: (1) college teaching; (2) logic or philosophy of science; (3) foreign language; or (4) computer science. There are no specific course requirements; however, the academic program is developed by the student in consultation with his or her adviser to develop doctoral-level competence in nutrition and one or more supporting areas. Students are expected to participate in a colloquium each semester and enroll in a seminar on a regular basis.

**Nutritional Sciences Option within the IBIOS program:** This option in Nutritional Sciences is proposed to promote excellence in graduate education in nutritional sciences by capitalizing on the expertise existing within the biological, biomedical, behavioral, and social sciences at Penn State. Students can choose an area of focus within this option that emphasizes biomolecular nutrition, human nutrient requirements, or ingestive behavior and nutrition intervention. The educational goal of this option is to create a stimulating and diverse environment in which students will develop the critical thinking skills needed to tackle complex issues in nutrition. Students will be expected to develop a foundation of basic knowledge in molecular biology, cell biology, biochemistry and computational methodology. In addition, students are required to complete 2 credits of IBIOS 590. Students are required to complete a course in professional developmental ethics. All students are required to assist in teaching/resident instruction for at least two semesters during their degree program.

**Student Aid**
Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the **STUDENT AID** section of the *Graduate Bulletin*.

**Courses**
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Operations Research (O R)

Program Home Page
SUSAN H. XU, Chair of the Committee on Operations Research
335 Beam Building
814-863-0531

Degrees Conferred:

Students electing this option through participating programs earn a degree with a dual title at both the Ph.D. and the M.S., M.A., or M.Eng. levels, i.e., Ph.D. in (graduate program name) and Operations Research, or M.S., M.A., or M.Eng. in (graduate program name) and Operations Research.

The following graduate programs offer dual degrees in Operations Research: Agricultural, Environmental and Regional Economics; Agricultural and Biological Engineering; Animal Science; Business Administration; Civil Engineering; Chemical Engineering; Computer Science and Engineering; Electrical Engineering; Economics; Educational Leadership; Energy and Mineral Engineering; Entomology; Forest Resources; Geography; Geosciences; Hotel, Restaurant and Institutional Management; Industrial Engineering; Mathematics; Mechanical Engineering; Statistics; and Workforce Education and Development.

The Graduate Faculty

- William P. Andrew, Ph.D. (Penn State) Associate Professor of Hotel, Restaurant, and Institutional Management
- Charles E. Antle, Ph.D. (Oklahoma State) Professor Emeritus of Statistics
- Stephen E. Arnold, Ph.D. (Stanford) Professor of Statistics
- Russell R. Barton, Ph.D. (Cornell) Professor of Industrial Engineering
- Tom M. Cavalier, Ph.D. (Virginia Tech) Professor of Industrial Engineering
- M. Jeya Chandra, Ph.D. (Syracuse) Professor of Industrial Engineering
- Kalyan Chatterjee, Ph.D. (Harvard) Distinguished Professor of Management Science and Information Systems
- David P. Christy, Ph.D. (Georgia) Associate Professor of Management Science and Information Systems
- N. Edward Coulson, Ph.D. (California, San Diego) Associate Professor of Economics
- Lily (Ageliki) Elefteriadou, Ph.D. (Polytechnic U, Brooklyn) Associate Professor of Civil Engineering
- Stephen Emerick, Jr., Ph.D. (Penn State) Professor Emeritus of Industrial Engineering
- Turgay Ertekin, Ph.D. (Penn State) Professor of Petroleum and Natural Gas Engineering
- Jill L. Findeis, Ph.D. (Washington State) Professor of Agricultural Economics
- Duncan K. H. Fong, Ph.D. (Purdue) Professor of Management Science and Information Systems
- Natarajan Gautam (North Carolina) Associate Professor of Industrial Engineering
- Richard L. Gordon, Ph.D. (MIT) Professor Emeritus of Mineral Economics
- Milton Halberg, Ph.D. (Iowa State) Professor Emeritus of Agricultural Economics
- Catherine Harmonosky, Ph.D. (Purdue) Associate Professor of Industrial Engineering
- Terry P. Harrison, Ph.D. (Tennessee) Professor of Supply Chain and Information Systems
- Jack C. Hayya, Ph.D. (UCLA) Professor Emeritus of Management Science and Information Systems
- Paul H. Heinemann, Ph.D. (Florida) Associate Professor of Agricultural Economics
- George B. Kleindorfer, Ph.D. (Carnegie Mellon) Professor of Management Science and Information Systems
- Joseph M. Lambert, Ph.D. (Purdue) Associate Professor of Computer Science
- Holly S. Lewis, Ph.D. (South Carolina) Associate Professor of Management Science and Information Systems
- Gary L. Lilien, D.E.S. (Columbia) Distinguished Research Professor of Management Science
- Carlos Maranas (Princeton) Associate Professor of Chemical Engineering
- John I. McCool, Ph.D. (Temple) Associate Professor of Industrial Engineering
- Elise D. Miller-Hooks, Ph.D. (Austin) Assistant Professor of Civil Engineering
- Jan M. Mutmansky, Ph.D. (Penn State) Professor of Mineral Engineering
- David Passmore, Ph.D. (Minnesota) Professor of Education
- Raja V. Ramani, Ph.D. (Penn State) P.E. Professor of Mining Engineering
- A. Rangaswamy (Berkeley) Professor of Industrial Engineering
- William J. Rothwell, Ph.D. (Illinois) Professor of Education
- Michael Saunders, Ph.D. (Georgia) Associate Professor of Entomology
- James S. Shortle, Ph.D. (Iowa State) Associate Professor of Agricultural Economics
- Timothy W. Simpson, Ph.D. (Georgia Tech) Associate Professor of Mechanical Engineering and Industrial Engineering
- Sigit S. Stojanov, Ph.D. (California State) Professor of Agricultural Economics
- Joseph V. Terza, Ph.D. (U of Pittsburgh) Associate Professor of Economics
- Leonid N. Vaserstein, Ph.D. (Moscow State) Professor of Mathematics
- Joe A. Ventura, Ph.D. (Florida) Professor of Industrial Engineering
- Paul N. Walker, Ph.D. (Massachusetts) P.E. Professor of Agricultural Engineering
- Robert D. Weaver, Ph.D. (Wisconsin) Professor of Agricultural Economics
- Anthony V. Williams, Ph.D. (Michigan State) Associate Professor of Geography
- Susan H. Xu, Ph.D. (Rensselaer) Associate Professor of Management Science and Information Systems

The Operations Research dual-title degree program option is administered by an Operations Research committee, which is responsible for management of the program. The committee maintains program definition, identifies faculty and courses appropriate to the option, and recommends policy and procedures for its operation to the dean of the Graduate School. This dual-title degree program is offered as an option through graduate major programs in eight colleges. The option enables students from diverse graduate programs to attain and be identified with the tools, techniques, and methodology of operations research, while maintaining a close association with areas of application. Operations research is the analysis—usually involving mathematical treatment—of a process, problem, or operation to determine its purpose and effectiveness and to gain maximum efficiency. To pursue a dual-title degree under this program option the student must apply to the Graduate School and register through one of the approved graduate programs.

Admission Requirements

Scores from the Graduate Record Examination (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements listed in the GENERAL INFORMATION section of the Graduate Bulletin.

For the M.S., M.A., M.Eng. dual-title degree in Operations Research, in addition to those prescribed by the graduate major program, prerequisites for acceptance to the program without deficiency include the following or their equivalent: MATH 140, MATH 141, MATH 220, CMPSC 101; and 3 credits of probability and statistics.

For the Ph.D. dual-title degree in Operations Research, in addition to those prescribed by the graduate major program, prerequisites for acceptance to the program without deficiency include the following or their equivalent: MATH 401, MATH 436; CMPSC 101; and 3 credits of probability and statistics.

Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the graduate major programs in which they are enrolled, in addition to the minimum requirements, or their equivalent, in the Operations Research program. Students must enroll in O R 590 Colloquium for at least 1 credit in each year enrolled in the program and in residence.

The Pennsylvania State University
For the M.S. or M.A. dual-title degree in Operations Research, the minimum requirements are: 6 credits in stochastic/statistical methods, including a minimum of 3 credits in each of the areas of statistical methods and stochastic processes; 6 credits in optimization, including a minimum of 3 credits in linear programming; 3 credits in computational methods; and 3 credits in applications/specialization. Application courses are those that involve problem solving through the use of decision methods. A minimum of 9 credits must be in the 500 series. Particular courses may satisfy both the graduate major program requirements and those in the Operations Research program.

A thesis may be required, the supervisor of which must be a member of the graduate faculty recommended by the chair of the program granting the degree and approved by the Operations Research committee as qualified to supervise thesis work in operations research. A paper or report may be written in lieu of the M.S. or M.A. thesis upon approval of the student’s graduate major program. An M.Eng. student or a student selecting the paper or report must take an additional 6 credits in the Operations Research program. It is the prerogative of the graduate major program to assign these credits to one or more of the following categories: stochastic/statistical methods, optimization, computational methods, or applications.

The minimum requirements for the Ph.D. dual-title degree in Operations Research are: 9 credits in stochastic/statistical methods, including a minimum of 3 credits in each of the areas of statistical methods and stochastic processes; 9 credits in optimization, including a minimum of 3 credits in linear programming; 6 credits in computational methods, including a minimum of 3 credits in simulation; and 12 credits in applications/specialization. A minimum of 18 credits must be in the 500 series, and particular courses may satisfy both the graduate major program requirements and those in the Operations Research program.

A Ph.D. minor program in Operations Research is available for doctoral students who find it advantageous to include advanced quantitative methods of systems analysis in their programs of study and have been approved to do so by their doctoral committees. To qualify for a minor in Operations Research, students must satisfy the requirements of their graduate major programs, meet the same prerequisites as the M.S. dual-title degree, and meet the following minimum requirements: 6 credits in stochastic/statistical methods, including a minimum of 3 credits in each of the areas of statistical methods and stochastic processes; 6 credits in optimization; and 3 credits in computational methods. A minimum of 6 credits must be taken at the 500 level.

The doctoral committee for a Ph.D. dual-title degree student is recommended by the graduate major program granting the degree. The chair and at least two members of a doctoral committee must be members of the graduate faculty and approved by the Operations Research committee as qualified to supervise doctoral theses in operations research. The Operations Research committee is responsible for administering an examination in operations research that constitutes a portion of the comprehensive examination administered to the doctoral students in the program option, as well as to the candidate who chooses operations research as a minor field.

**STOCHASTIC/STATISTICAL METHODS**

- **Statistical Methods**
  - MATH/STAT 414, MATH/STAT 415, MATH/STAT 418
  - I E 511
  - MS&IS 501, MS&IS 533
  - STAT 460, STAT 501, STAT 502, STAT 503
  - ECON 501
  - AG EC/ECON 510, AG EC/ECON 511

- **Stochastic Processes**
  - I E /SC&IS 516
  - I E 517
  - MATH/STAT 416, MATH/STAT 516, MATH/STAT 519
  - STAT 515

**OPTIMIZATION**

- **Linear Programming**
  - I E 405 or MS&IS 451 or MATH 484
  - I E 505

- **Nonlinear Programming**
  - MS&IS 452
  - I E 521

- **Integer Programming**
  - I E 510

- **Dynamic Programming**
  - I E/SC&IS 519

- **Mathematical Programming**
  - I E 512, I E 520
  - CMPSC/MATH 555
  - SC&IS 525, MS&IS 550

**COMPUTATIONAL METHODS**

- **Numerical Methods**
  - CMPSC/MATH 451, CMPSC/MATH 455, CMPSC/MATH 456, CMPSC/MATH 550

- **Simulation Methods**
  - I E 453 or MS&IS 452
  - I E 522
  - MSIS 532

**APPLICATION/SPECIALIZATION**

Includes courses in the above areas as well as courses in quality control, scheduling, inventory, queuing, decision analysis, game theory, logistics, expert systems, econometrics, forecasting, and others.

**Courses**

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Beverly A. Cigler, Ph.D. (Penn State) Professor of Public Policy and Administration
- Cynthia Massie Mara, Ph.D. (Virginia Tech) Associate Professor of Health Care Administration and Policy
- Goktug Morcol, Ph.D. (Virginia Polytechnic Institute and State University) Associate Professor of Public Administration
- Jeremy F. Plant, Ph.D. (Virginia) Professor of Public Policy and Administration
- Bing Han, Ph.D. (Waterloo) Assistant Professor of Public Administration
- Odd J. Stalebrink, Ph.D. (George Mason) Associate Professor of Public Administration
- Triparna Vasavada, Ph.D. (SUNY-Albany) Assistant Professor of Public Administration
- James T. Ziegenfluss, Jr., Ph.D. (Pennsylvania/Wharton) Professor of Management and Health Care Systems

MPA Program

The Master of Public Administration (MPA) program is intended for those with career interests in public management, health and human services, government, and other public service and nonprofit organizations. The curriculum blends theoretical and applied concepts and assumes "real-world" experiences for the novice administrator. In addition, if students devote attention to general professional development. The MPA program is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA).

FULL-TIME OR PART-TIME—Students may begin the program in any semester. Three courses (or 9 credits) per semester are considered a normal course load for full-time students. Part-time students typically take one or two 3-credit courses each semester and one or two courses during the summer session to maintain steady progress toward the degree. The program, including an internship in a public agency or nonprofit organization for those without three years of managerial, supervisory, or professional experience, requires eighteen to twenty-four months of full-time study, or three to five years on a part-time basis.

Admission Requirements

Applicants must hold either (1) a bachelor's degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution prior to starting the graduate program. Applicants who are still completing their baccalaureate requirements at the time of application may be admitted to the Graduate School conditional on the awarding of the baccalaureate degree.

Admission to the MPA program is based on clear suitability for the program as demonstrated by the application as a whole, including the following: a completed application with the application fee; evidence of a bachelor's degree from a regionally accredited college; a statement of career and educational goals; a successful undergraduate record with a grade-point average of 3.00 (either as the cumulative GPA or for the last 60 hours of relevant course work); satisfactory scores on the Graduate Record Examination (GRE), Graduate Management Admission Test (GMAT), or Law School Admission Test (LSAT) if the GPA is less than 3.0; and three references willing to provide recommendations.

Degree Requirements

The MPA degree program requires 36 graduate credits—18 in core courses, 15 in electives, and 3 for the research project. Up to 6 credits of 400-level courses may be taken as electives, with the approval of an adviser. In addition, a 3-credit internship is required of students who do not have at least two years of full-time relevant work experience that consists of supervisory, managerial, or professional work. The internship is waived for students with this experience before they enter the program or who gain it during the program.

REQUIRED CORE COURSES (18 credits)
P ADM 500, P ADM 502, P ADM 503, P ADM 505, P ADM 506, P ADM 510

ELECTIVE CONCENTRATION AREA (15 credits)

With the faculty adviser's approval, a student selects 15 credits of electives from the courses list. Students also have the option of taking elective courses from one of the following concentrations: Government Administration, Health Care Management and Policy, Human Resources Management, Information Resource Management, Policy Analysis, and Criminal Justice, as well as the general Public Administration degree.

RESEARCH PROJECT—P ADM 594

INTERNERNSHIP IN PUBLIC ADMINISTRATION—P ADM 595 (if required)

Ph.D. Program

The Doctor of Philosophy in Public Administration provides a broad-based academic program combining conceptual foundations with research and analytical skills. The goal of the program is to educate professionals with the ability to create and apply knowledge through teaching, research, consulting, and management.

Graduates of the program work in such occupations as:

- university or college professor
- president of community hospital
- senior positions in state and federal government
- senior training officer national executive development institute
- health care consultant
- president, non-profit organization

The Program retains the traditional requirements of the Ph.D. degree—advanced coursework, comprehensive examinations, residency, a research dissertation, final oral examination, and standards of excellence—in a program that allows students to combine study and work. Students may pursue the program on a full- or part-time basis. The emphasis is placed in critical thinking, research, writing, and mastery of a broad body of literature. In the

The Pennsylvania State University
Applicants who do not have necessary background, but otherwise meet the criteria for admission may be candidates take additional course work to prepare for comprehensive examinations in three subfields of study, complete a period of two consecutive semesters of concentrated study and research as a full-time student—9 credits per semester.

Application for Admission

To assure course availability and maximize progress, applicants should carefully consider when to apply to the Program and begin study. In general, students should plan to begin taking P ADM 570 (Scope and Methods of Public Administration) and other doctoral seminars during the Fall Semester.

The following information should also help applicants decide when to apply to the Program:

Fall Admission:

- Applicants for fellowships and assistantships must complete and submit materials by January 30.
- Applicants who must take one or more prerequisite courses typically should apply by October 31.
- This will enable them to take the necessary prerequisite courses during the Spring Semester and/or Summer Term and begin doctoral seminars the next Fall. If in doubt about the need for prerequisites, an applicant should meet the October 31 deadline.
- Students who are not required to take prerequisite courses may submit their application materials by October 31 or March 15. However, we encourage students to apply at the earliest possible date.
- The Program Coordinator can answer individual applicant questions about application and entrance dates.

Admission Requirements

Applicants for the Doctor of Philosophy in Public Administration should hold a master’s degree in public administration, public policy, or a related field such as business, economics, political science, or sociology. Applicants with master’s degrees in other fields also will be considered. Students may be required to take additional courses after admission to the program to make up for any deficiencies.

A student must have taken the following graduate courses as program prerequisites or co-requisites: Public Organization and Management (P ADM 500), Introduction to Public Policy Analysis (P ADM 507), Research Methods (P ADM 503), and Organization Behavior (P ADM 510).

In addition, most applicants should have five years of relevant professional work experience.

Students are required to submit the following:

- a completed application, with the application fee
- two letters of approval of all undergraduate and graduate course work scores from the Graduate Record Exam (GRE), with official verification
- three letters of reference attesting to both academic and professional capabilities (at least two of the three letters should be from academic sources, such as prior professors or academic advisors)
- a letter of approximately 500 words outlining significant work experience, career goals, and academic objectives
- a recent personal vita
- a substantial academic paper written for a previous graduate course (e.g., seminar paper)

Interviews: The Admissions Committee interviews individuals whose application material indicates they qualify for entry into the Program. These interviews may be face-to-face or by telephone. Interviews help assure a good fit between individual interests and the Program.

International Students

Application deadlines: International student application materials must meet the following deadlines:

January 30 for Fall, September 30 for Spring, February 28 for Summer Semester.

*Applications received after the deadlines will be processed for the following semester.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test (iBT). The minimum composite score for the IELTS is 6.5.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a graduate degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Degree Requirements

Students progress through the following phases and take the required courses indicated as part of their study for the Ph.D.

Precandidy and Provisional Admission—Applicants who do not have necessary background, but otherwise meet the criteria for admission may be admitted provisionally and must (1) make up any deficiencies in graduate courses in public administration noted in the letter of acceptance, (2) complete P ADM 570 (Scope and Methods), P ADM 575 (Research Design), and at least one course from the P ADM 571, P ADM 572, P ADM 573, and P ADM 574 seminar series, with an average of 3.5 or better, and (3) pass a candidacy exam. Students who must make up deficiencies are considered to be provisionally admitted into the program. A student may remain in this temporary classification for a period of no longer than two semesters following admission. Upon successful completion of the requisite courses noted in the letter (with a 3.5 grade point average), the student will be removed from provisional status and be regularly enrolled. It is to be emphasized that the provisional condition must be met before a student reaches an academic benchmark (doctoral candidacy, comprehensive, and final oral examination). A student will not be permitted to graduate with a provisional status remaining on his or her record.

Comprehensive Examination—Candidates take additional course work to prepare for comprehensive examinations in three subfields of study, complete a period of residency, and write the Ph.D. dissertation. The three formal subfields of specialization are: organization theory and behavior, policy analysis and governance, and public management. Additional subfields of study, such as Health Care Management and Policy, Criminal Justice, Management Information Systems, and Training and Development may be selected with the approval of the student's doctoral committee.

Residency—A period of two consecutive semesters of concentrated study and research as a full-time student—9 credits per semester.

The Dissertation

Under guidance from the dissertation committee, the candidate prepares a detailed research proposal that serves as the basis for the written dissertation. The writing and defense of this original contribution to the theory of public administration is the capstone to the Ph.D. program.

Grade Point Average and Time Limit

Part-time students can complete the program in approximately seven to eight years of continuous study. Full time students may complete the Program in four to five years. Students must have a 3.50 grade-point average to graduate.

Financial Aid

There are a limited number of scholarships, fellowships, and research grants available, as well as graduate assistantships. Many students work full-time and take classes part-time. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition. To find other options available to you, contact the Financial Aid Office at 717-948-6307.

The Pennsylvania State University
Degrees Conferred:

J.D./M.P.A.

The Dickinson School of Law of The Pennsylvania State University and the School of Public Affairs of Penn State Harrisburg, the Capital College, offer a cooperative program leading to the degrees of Juris Doctor, to be granted by Dickinson, and Master of Public Administration, to be granted by Penn State Harrisburg.

Admission Requirements

In order to be admitted to the program, students must first be admitted to The Dickinson School of Law under its regular admission procedures. Dickinson need not forward applications of all DSL admittees who have expressed interest in the MPA program and can withhold support for some admittees until they have demonstrated proficiency in their legal studies and a capacity for dual degree study. Penn State Harrisburg will make independent admissions decisions as to all dual degree applicants.

The Dickinson Admissions Office requires: application forms for DSL and PSH Graduate School, the Law School Admission Test (LSAT), a completed LSDAS report, a one-page personal statement, employment record since high school, and two recommendations.

The Penn State Harrisburg Admissions Office requires: completed applications (Graduate School and MPA), with the application fee; evidence of either (1) a bachelor's degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution; a statement of career and educational goals; a successful undergraduate record with a grade-point average of 3.0 (either as the cumulative GPA or for the last 60 hours of relevant course work); satisfactory scores on the Graduate Record Examination (GRE), Graduate Management Admission Test (GMAT), or Law School Admission Test (LSAT) if junior–senior or cumulative GPA is less than 3.0); and three names of references willing to provide recommendations.

Degree Requirements

To be eligible to earn the Juris Doctor degree, a candidate must: earn credit for 88 semester hours of course work, have a cumulative average of at least 70.00, complete all required courses (currently totaling 41 semester hours) plus at least one seminar, and complete six semesters in residence.

The MPA degree program requires 36 graduate credits—18 in core courses, 15 in electives, and 3 for the Research Project.

A maximum of 9 credits for Dickinson School of Law course work may be transferred for credit toward the MPA degree at Penn State Harrisburg, subject to Harrisburg's approval based on relevance to the MPA program.

A maximum of 9 credits for MPA course work with a grade of B or better may be transferred for credit toward the J.D. degree at Dickinson. Courses for which such credit may be applied shall be subject to approval by the Dickinson faculty.

It is anticipated that students will complete a minimum of 79 credits from Dickinson and 27 credits (not including the internship) from Penn State Harrisburg in order to earn the J.D. and M.P.A. degrees. A student in the program, however, may obtain either degree prior to completing all requirements for the other degree. Students must earn at least a 3.0 grade-point average to be eligible for the M.P.A. degree.

Robert A. Cherry, Medical Director, Penn State Shock Trauma Center; Chief, Section of Trauma and Critical Care, Penn State Milton S. Hershey Medical Center
College of Medicine, C1524
717-531-6066

**Degrees Conferred:**
M.H.S., Master of Homeland Security (Penn State University Park)

**The Graduate Faculty**
- Robert A. Cherry, M.D. (Columbia) Assistant Professor of Surgery
- Elizabeth Carney, DVM (Iowa State) Assistant Professor of Comparative Medicine
- Peter K. Forster, Ph.D. (Penn State) Instructor of Political Science
- Kevin P. Furlong, Ph.D. (Utah) Professor of Geosciences
- Jim Holliman, M.D. (Washington) Professor of Emergency Medicine
- Gretchen A. Kulda, Ph.D. (California) Assistant Professor of Plant Pathology
- Eugene J. Lengerich VMD, MS (U of Penn), Associate Professor of Health Evaluation Sciences
- Craig Meyers, Ph.D. (UCLA) Professor of Microbiology and Immunology
- Kevin R. Murphy, Ph.D. (Penn State) Professor and Head of Psychology
- Roxanne P. Parrott, Ph.D. (Penn State) Professor of Communication Arts and Sciences and Health Policy Administration
- Zhengmin Qian, M.D., Ph.D. (Rutgers) Assistant Professor of Health Evaluation Services

The M.H.S. in Public Health Preparedness is designed to provide both science and nonscience postbaccalaureate students with broad training in public health preparedness as it relates to issues surrounding homeland security. The curriculum will be delivered in a distance education format to accommodate the needs and careers of professionals who are already working in or wish to transition into the field of homeland security. The program's target audience may include federal, state, and local public health officials, public affairs administrators, emergency management professionals, health care professionals, first responders, criminal justice and law enforcement personnel, military staff, and members of corporate security.

Graduates of the program will have a fundamental understanding of disaster communication, the principles of hazard analysis and incident management with respect to chemical, biological, radiological, and nuclear incidents, disaster planning and coordination, agricultural safety and security, critical infrastructure protection, and the political, legal, psychological and social aspects of terrorism.

**Admission Requirements**
The objective of the admissions process is to identify and admit qualified graduate students who have the capacity, motivation and intellect to protect and serve local, state, and national interests with respect to the occurrence of or threat of a natural disaster or terrorist attack.

Qualified candidates will have a baccalaureate degree from a regionally accredited institution and are expected to have a 3.0 or higher undergraduate grade point average on a 4.0 scale. Scores on the General Test of the Graduate Record Examination (GRE) are generally required for all applicants. GRE requirements may be waived in selected cases for those with advanced degrees who have demonstrated the ability to perform graduate level work and have submitted scores for consideration on comparable standardized tests, such as the GMAT, MCAT, or LSAT. A statement of professional experience and goals (up to 500 words) and the candidate's CV must accompany the application. Three letters of recommendation that attest to the applicant's readiness for graduate study are also required.

Applicants whose native language is not English must provide evidence of proficiency in English with a minimum TOEFL score of 550 (paper-based test) or 220 (computer-based test). Special backgrounds, abilities, and interests related to homeland security are desirable. Students will be required to possess a suitably configured personal computer and Internet connections.

**Transfer Credit**
A maximum of 10 credits of high-quality graduate work done at a regionally accredited institution may be applied toward the requirements for the master's degree. However, credits earned to complete a previous master's degree, whether at Penn State or elsewhere, may not be applied to a second master's degree program at Penn State. Approval to apply any transferred credits toward a degree program must be granted by the student's academic adviser, the program head or graduate officer, and the Graduate School. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School of Penn State, must be of at least B quality (Gradus of B- are not transferable), and must appear on an official graduate transcript of an accredited university. Pass-fail grades are not transferable to an advanced degree program unless the “Pass” can be substantiated by the former institution as having at least B quality.

**Funding Sources**
World Campus students who are enrolled in a degree program and meet all other federal student aid eligibility requirements may be eligible for federal aid programs. Students must complete the Free Application for Federal Student Aid (FAFSA) to be considered for student aid.

**Other Financing Options**
- **Tuition Assistance Programs:** Students should check with their employer on the availability of tuition assistance programs to help cover graduate school costs.
- **Veterans Programs:** Veterans enrolled in degree programs may be eligible for reimbursement when they successfully complete a World Campus course. Students should contact their local Office of Veterans Programs, or Penn State's Office of Veteran's Programs.
- **Innovative Loans:** World Campus students who need to explore additional financing options are encouraged to review the following private educational lenders:
  - Citalissat
  - TERI Continuing Education Loans--for World Campus students who are non-degree or taking continuing education units (CEUs)
- **World Campus Student Fund:** This scholarship is funded annually by World Campus staff members and students who understand that financial aid is not always available to distance learners--and when it is, the eligibility requirements are often difficult to meet. All scholarship monies awarded will be deposited directly into the recipients' student accounts at Penn State.
- **Trustee Scholarship Program:** Eligible students demonstrating financial need as determined by the Free Application for Federal Student Aid (FAFSA) will be contacted.

**Degree Requirements**
To be awarded a Master of Homeland Security degree in Public Health Preparedness, the student must successfully earn a total of 30 credit hours, of which at least 18 must be in 500-level courses. Students are expected to maintain a B (3.0) or better average in academic courses to be retained in the program. Each candidate must complete a project report on a topic related to public health preparedness in homeland security.

**Faculty Advisers**
All graduate students will be assigned a faculty adviser to encourage and mentor students in their educational pursuits, and to provide students with advice

The Pennsylvania State University
on research projects and career opportunities. Interactive communication is available through telephone sessions and video conferencing. On-site campus visits are encouraged, but not required.

Library Resources
The Penn State University Libraries provide an extraordinary array of collections and services to students who participate in classes through the World Campus. Students will have a Penn State Access Account that will allow them to access the online catalog, databases, digital library projects, and the growing number of full-text resources. The Libraries are able to service requests to scan print documents and deliver PDF documents at no charge through the University network. Students can also utilize the "ASK" reference service, which allows students to seek assistance through phone, e-mail, or synchronous online chats. Materials not owned by Penn State can be obtained through Interlibrary Loan services. ILLIAD, a service available through the Libraries' Web site, allows students to make and track their interlibrary loan requests without the need for an intermediary. The Libraries also operate an Electronic Reserves service that allows faculty members to make electronic materials available to students enrolled in a particular course. Students are always welcome to contact one of the Libraries' subject specialists for personalized assistance with their information needs.

PRESCRIBED COURSES: 27 credits

HOMELAND SECURITY (HLS)
410. Public Health Preparedness for Disaster and Bioterrorism Emergencies I (3)
510. Public Health Preparedness for Disaster and Bioterrorism Emergencies II (3)
520. Agricultural Biosecurity (3)
527. Public Health Evaluation of Disasters and Bioterrorism (3)
530. Critical Infrastructure Protection of Health Care Delivery Systems (3)
553. Disaster Communication (3)
558. Disaster Psychology (3)
594. Research Project (3)

POLITICAL SCIENCE (PL SC)
439. The Politics of Terrorism (3)

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Date last reviewed by Publications: 01/08/08
Last Revised by the Department: Fall Semester 2008
Blue Sheet Item #: 36-07-011
Review Date: 6/17/08
The graduate program requires that each graduate student have 3 credits in statistics. However, Ph.D. candidates are expected to have statistical skills.

Doctoral Degree Requirements

All graduate students are required to complete one semester of VB SC 590 Colloquium each year as well as 8 credits from a list of courses.

Master's Degree Requirements

A minimum of 30 graduate credits is required for the M.S. degree, of which 18 credits must be taken in 500- and 600-level courses.

Doctoral Degree Requirements

The doctor of philosophy degree places a strong emphasis on research. It is conferred in recognition of the capacity to carry out independent research and the attainment of a high level of scholarship. General requirements for the doctorate specify a minimum period of residence, the passing of candidacy, comprehensive and final oral examinations, and the writing of a satisfactory thesis. The particular combination of courses, seminars, individual study, and research that constitutes an individual student's program is arranged by the doctoral committee and should include the courses that have been designated in the Pathobiology graduate curriculum, subject to the general policies of the Graduate School. The Graduate School requires no specific number of courses for the attainment of the doctorate. However, the Pathobiology graduate program requires that all graduate students complete the course requirements outlined. A total of 21 graduate credits is required for the Ph.D. degree. A minimum grade-point average of 3.00 for work done at the University is required.

There are formal communications requirements for the Ph.D. degree in Pathobiology which are required by the Graduate School. The doctoral committee will assess the technical writing and oral communication skills of the candidate and may require that formal course work or other means to improve these skills be undertaken.

The graduate program requires that each graduate student have 3 credits in statistics. However, Ph.D. candidates are expected to have statistical skills equivalent to those learned in STAT 501 and STAT 502. The candidacy examination committee and the doctoral committee will assess the student's competence in statistics and may require that additional course work be taken.

The Pennsylvania State University
A candidacy examination is given to students entering the Ph.D. program and after they complete at least twelve hours of postbaccalaureate course work.

After being admitted to candidacy, each doctoral candidate is guided by a doctoral committee consisting of four or more members of the graduate faculty. At least one member and preferably two are from other departments. These committees are appointed through the Office of Graduate Student Programs, upon recommendation of the department head, after the student is admitted to candidacy.

**Other Relevant Information**

After a student has been admitted to graduate study in the department, an adviser will be appointed by the program director. This person may be a member of the eventual M.S. committee or someone else assigned the responsibility for directing the student’s scheduling of course work. In the case of a doctoral candidate, the person may be a member of the eventual doctoral committee or someone else designated the responsibility for directing the student’s scheduling of course work. The adviser is also responsible for initiating the scheduling of the candidacy examination.

**Student Aid**

Graduate assistantships available to students in this program and other forms of student aid are described in the [STUDENT AID](#) section of the [Graduate Bulletin](#).

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Junja (Jay) Zhu, Ph.D. (Penn State) Assistant Professor of Public Health Sciences

The Master of Public Health (M.P.H.) Program includes graduate-level course work in five core areas of knowledge — health services administration, biostatistics, epidemiology, social and behavioral sciences, and environmental health sciences — and provides knowledge and insight required in the interpretation and utilization of health related research in public health practice. Students learn population-based health research methods, methods for evaluating and improving health care practices, and first-hand real-world working experience in the practice of public health.

The M.P.H. degree can lead to careers in a wide variety of fields and settings, including academic health centers; the health insurance industry; health services networks; local, state, and federal government agencies; and the pharmaceutical industry.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

M.P.H. Degree Requirements

Each student must complete a total of 47 credits of graduate level course work, the majority of which are 500 level courses, specifically:

- 26 credits in prescribed courses, with a 6 credit Public Health Practice Internship,
- 18 credits in elective courses, plus
- 3 research credits.

Prescribed Courses: 26 credits

PHS 500(1), PHS 504(3) or BB H 504(3), PHS 520(3), PHS 536(3), PHS 542(3), PHS 550(3), PHS 571(3) or HPA 520, PHS 595(6), PHS 801(1)

Required Research Courses: 3 credits

PHS 594(3)

Additional Courses: 18 credits

PUBLIC HEALTH (PH) course list

- PHS 535(3)
- PHS 551(3)
- PHS 552(3)
- PHS 570(3)
- PHS 580(3)
- PHS 581(1-9)
- BB H 501(3)

Degrees Conferred:
Ph.D., M.A.

The Graduate Faculty
- Mitchell S. Aboulafia, Ph.D. (Boston College) Professor of Philosophy
- Douglas R. Anderson, Ph.D. (Penn State) Associate Professor of Philosophy
- John P. Christman, Ph.D. (Illinois, Chicago) Associate Professor of Philosophy and Women's Studies
- Vincent M. Colapietro, Ph.D. (Marquette) Professor of Philosophy
- Daniel W. Conway, Ph.D. (California, San Diego) Professor of Philosophy
- Véronique M. Fôt, Ph.D. (Boston College) Associate Professor of Philosophy
- Emily R. Groszhofer, Ph.D. (Yale) Professor of Philosophy and African American Studies; Fellow of the Institute for the Arts and Humanities
- Irene E. Harvey, Ph.D. (York) Associate Professor of Philosophy and Women's Studies
- Dale Jacquette, Ph.D. (Brown) Professor of Philosophy
- Claire Katz, Ph.D. (Memphis) Associate Professor of Philosophy, Jewish Studies and Women's Studies
- Catherine E. Kemp, Ph.D. (SUNY, Stony Brook) Assistant Professor of Philosophy
- Christopher P. Long, Ph.D. (New School, New York) Associate Professor of Philosophy
- Evelyn B. Pluha-Moravetz, Ph.D. (Michigan) Professor of Philosophy
- Dennis J. Schmidt, Ph.D. (Boston College) Professor of Philosophy, German, and Comparative Literature; Co-director, Institute for the Arts and Humanities
- Shannon W. Sullivan, Ph.D. (Vanderbilt) Head; Associate Professor of Philosophy and Women's Studies
- Nancy Tuana, Ph.D. (California, Santa Barbara) DuPont/Class of '49 Professor of Philosophy, Humanities, and Women's Studies; Director, Rock Ethics Institute

Graduate education in the Penn State Department of Philosophy is characterized by a focus on, and commitment to, the history of philosophy, conceived as a basis for study in diverse areas of special interest. In addition, the graduate program includes special emphases on both contemporary Continental philosophy (including phenomenology, existentialism, hermeneutics, social theory, and postmodernism) and Classical American philosophy (including transcendentalism, semiotics, pragmatism, and contemporary cultural issues). All students' programs are arranged to facilitate preparation in the systematic fields of their interests, such as aesthetics, ethics, political philosophy, metaphysics, philosophy of religion, epistemology, philosophy of science, and mathematical logic, and there is a provision for directed research, collaboration, and in-depth consultation by students with member of the faculty.

Interdisciplinary study is also possible across the humanities, the social sciences, the arts, the natural sciences, and interdisciplinary programs such as Women's Studies, Classics and Ancient Mediterranean Studies, and Science Technology, and Society. The Philosophy department offers students the opportunity to earn a dual-title doctoral degree in Philosophy and Women's Studies. Doctoral minors are available in social thought and in literary theory, criticism, and aesthetics. Study abroad is possible as well, through exchange programs or individual arrangements with leading departments of philosophy.

Admission Requirements
Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program in light of these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Undergraduate preparation is advisable.

Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 GPA may be made for students with special backgrounds, abilities, and interests. Apply by January 15.

Degree Requirements
The department may waive the requirement of a thesis for an M.A. candidate. The foreign language requirement for the Ph.D. degree is satisfied by passing department translation examinations in two languages other than English, and by completing a course in philosophy in one of the these languages. The logic requirement for the Ph.D. degree is satisfied by passing a department logic examination.

Student Aid
Every student admitted to the department's Ph.D. program receives full assistantship or fellowship funding (stipend and tuition waiver) for five years (assuming reasonable progress). In addition to the many fellowships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the Graduate Bulletin, the department awards annually an Edwin Erle Sparks Fellowship in the Humanities. In the last several years, Philosophy graduate students have received numerous external national and international fellowships and awards (such as DADD, Fulbright, Javits, Mellon). Many Philosophy graduate students have received assistantship support for interdisciplinary teaching assignments in programs such as American Studies, Classics and Ancient Mediterranean Studies, Religious Studies, and Women's Studies.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Roger T. Anderson, Ph.D. (Johns Hopkins) Professor of Public Health Sciences, Chief, Health Services Research Division
Arthur S. Berg, Ph.D. (California, San Diego) Assistant Professor of Public Health Sciences
Vernon M. Chinchilli, Ph.D. (North Carolina) Professor of Biostatistics; Department Chair
Ping Du, Ph.D. (SUNY Albany) Assistant Professor of Public Health Sciences
Elana Farace, Ph.D. (Virginia) Associate Professor of Public Health Sciences
Christopher S. Hollenbeak, Ph.D. (Washington U) Associate Professor of Public Health Sciences
Wenke Hwang, Ph.D. (Maryland) Associate Professor of Public Health Sciences
Tonya S. King, Ph.D. (North Carolina) Associate Professor of Public Health Sciences
Kristen Kjerulf, Ph.D. (Illinois) Professor of Public Health Sciences
Eugene J. Lengerich, V.M.D. (Pennsylvania) Professor of Public Health Sciences
Douglas Leslie, Ph.D. (Yale) Professor of Public Health Sciences
Duanping Liao, Ph.D. (North Carolina) Professor of Public Health Sciences
Jiangang (Jason) Liao, Ph.D. (Johns Hopkins) Professor of Public Health Sciences
Thomas A. Lloyd, Ph.D. (Harvard) Professor of Public Health Sciences; Chief, Epidemiology Division
David T. Mauger, Ph.D., Ph.D. (Michigan) Professor of Public Health Sciences; Chief, Biostatistics Division
Joshua Muscat, Ph.D. (NYU) Professor of Public Health Sciences
Rosanne M. Pogash, M.P.A. (Penn State) Affiliate Instructor of Public Health Sciences
John Richie, Ph.D. (Louisville) Professor of Public Health Sciences
Christopher N. Sciamanna, M.D., M.P.H. (Johns Hopkins) Professor of Medicine and Public Health Sciences
Michele L. Shaffer, Ph.D. (Penn State) Associate Professor of Public Health Sciences
Li Wang, Ph.D. (Penn State) Assistant Professor of Public Health Sciences
Carol S. Weisman, Ph.D. (Johns Hopkins) Distinguished Professor of Public Health Sciences and OB/GYN
Robin Taylor Wilson, Ph.D. (Iowa) Assistant Professor of Public Health Sciences
Chuntao Wu, Ph.D. (SUNY Albany) Assistant Professor of Public Health Sciences
Rongling Wu, Ph.D. (Washington) Professor of Public Health Sciences and Statistics
Jeff D. Yanosky, Sc.D. (Harvard) Assistant Professor of Public Health Sciences
Junja (Jay) Zhu, Ph.D. (Penn State) Assistant Professor of Public Health Sciences

The Master's Program in Public Health Sciences includes graduate-level course work in biostatistics, epidemiology, and health services research, and provides knowledge and insight required in health related research. Students learn population-based methods for planning, executing, analyzing, and disseminating research results, and methods for evaluating and improving health care practices.

Admission Requirements
Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin. Prospective applicants for this program should have at least a bachelor's degree in a biological, physical, or behavioral science. Please see the program Web page for specific program application requirements.

Master's Degree Requirements
Each student in Public Health Sciences is expected to acquire breadth of knowledge in the disciplines of Biostatistics, Epidemiology and Health Services Research, and skills in the areas of experimental design, data collection and quantitative analysis. The PHS Master of Science degree can lead to careers in a wide variety of fields and settings, including academic health centers; the health insurance industry; health services networks; local, state, and federal government agencies; and the pharmaceutical industry. Each student must complete at least 30 credits at the 500 level or higher. Each student must submit an original Master's thesis according to the guidelines outlined by the Graduate School.

Prescribed Courses: 16 credits
PHS 500(1), PHS 520(3), PHS 521(3), PHS 535(3), PHS 550(3), PHS 551(3)

Additional Courses: 11 credits

Research Courses: 3 credits
PHS 594(3)

Thesis Research: 6 credits
PHS 600 (6)

Courses in Health Policy and Administration (HPA) and Statistics (STAT) may be taken as elective courses and will be considered on an individual basis in consultation with the student's academic adviser.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Craig R. Baumrucker, Ph.D. (Purdue) Professor of Animal Nutrition/Physiology
- Anthony T. Lai, Ph.D. (Yale) Distinguished Professor of Chemical Engineering
- Sarah K. Bronson, Ph.D. (Washington University) Associate Professor of Cellular and Molecular Physiology
- C. Randall Brown, Ph.D. (Texas) Associate Professor of Cellular and Molecular Physiology
- christopher j. Lynch, Ph.D. (north Texas) Associate Professor of Physiology and Kinesiology
- Vincent Chau, Ph.D. (virginia) Professor of Head, Biology
- Hui-Ling Chiang, Ph.D. (Harvard) Professor of Cellular and Molecular Physiology
- Pamela H. Correll, Ph.D. (George Washington) Associate Professor of Veterinary Science
- Catherine Coleman, Ph.D. (Aberdeen) Assistant Professor of Cellular and Molecular Physiology
- Robert N. Cooney, MD. (Vermont) Professor and Chief of General Surgery and Professor of Cellular and Molecular Physiology
- Rebecca L. Corwin, Ph.D. (Chicago) Associate Professor of Nutrition
- Henry J. Donahue, Ph.D. (California) Professor of Orthopaedics and Rehabilitation, and Cellular and Molecular Physiology; Director, Musculoskeletal Research
- Terry D. Etherton, Ph.D. (Minnesota) Professor of Animal Nutrition
- David J. Feith, Ph.D. (Penn State) Assistant Professor of Cellular and Molecular Physiology
- Robert A. Frost, Ph.D. (SUNY, Stony Brook) Associate Professor of Cellular and Molecular Physiology
- Thomas W. Gardner, M.D. (Jefferson/Penn State) Professor of Ophthalmology, and Cellular and Molecular Physiology
- Carol V. Gay, Ph.D. (Penn State) Professor of Molecular and Cell Biology
- Michael H. Green, Ph.D. (California, Berkeley) Professor of Nutrition Science and Physiology
- Daniel R. Hagen, Ph.D. (Illinois) Professor of Animal Science
- William O. Hancock, Ph.D. (Washington) Associate Professor of Bioengineering
- Ronald S. Kensinger, Ph.D. (Florida) Professor of Animal Nutrition/Physiology
- Gary J. Killian, Ph.D. (Penn State) Distinguished Professor of Reproductive Physiology
- Scot R. Kimball, Ph.D. (Vermont) Professor of Cellular and Molecular Physiology
- Donna H. Korzick, Ph.D. (Penn State) Associate Professor of Kinesiology and Physiology
- Charles H. Lang, Ph.D. (Hahnemann) Distinguished Professor and Vice Chair of Cellular and Molecular Physiology, and Surgery
- Karl L. Labenz, Ph.D. (California) Professor of Cell Biology
- Roland M. Leach, Jr., Ph.D. (Cornell) Walther H. Ott Professor in Avian Biology
- Richard S. Legro, M.D. (Mount Sinai) Professor of Obstetrics and Gynecology
- Christopher J. Lynch, Ph.D. (Califomia, San Diego) Professor of Head, Bioengineering
- James H. Marden, Ph.D. (Vermont) Professor of Physiology
- Magdi M. Mashaly, Ph.D. (Wisconsin) Associate Professor of Poultry Science
- Robert B. Mitchell, Ph.D. (Penn State) Professor of Physiology
- Jon Oatley, Ph.D. Assistant Professor of Reproductive Physiology and Physiology
- Magdi M. Mashaly, Ph.D. (Wisconsin) Associate Professor of Poultry Science
- Anthony E. Pegg, Ph.D. (Cambridge) Evan Pugh Professor of Cellular and Molecular Physiology and Pharmacology; J. Lloyd Huck Professor of Cell and Molecular Biology
- Blaise Peterson, Ph.D. (Washington) Associate Professor of Cellular and Molecular Physiology
- Lisa S. Portitz, MD. (Northwestern) Assistant Professor of Surgery and Cellular and Molecular Physiology
- David N. Proctor, Ph.D. (Kent State) Associate Professor of Kinesiology and Physiology
- Stephen J. Rannels, Ph.D. (Penn State) Associate Professor of Cellular and Molecular Physiology
- Chestor A. Ray, Ph.D. (Georgia) Professor of Medicine, and Cellular and Molecular Physiology
- Gavin Robertson, Ph.D. (California) Associate Professor of Pharmacology, Pathology, and Dermatology
- Barbara J. Rolls, Ph.D. (Cambridge, England) Professor and Guthrie Chair in Nutrition
- Russell C. Scaduto, Jr., Ph.D. (Indiana) Associate Professor of Cellular and Molecular Physiology
- Lisa M. Shantz, Ph.D. (Johns Hopkins) Associate Professor of Cellular and Molecular Physiology
- Neil A. Sharkey, Ph.D. (California, Davis) Professor of Kinesiology, Orthopaedics, and Rehabilitation
- Cooduvalli S. Shahikant, Ph.D. (Hyderabad, India) Associate Professor of Molecular and Developmental Biology
- Jeffrey S. Shenberger, MD. (Penn State Hershey) Associate Professor of Pediatrics and Cellular and Molecular Physiology
- Yuguang (Roger) Shi, Ph.D. (Australian National University & UC-Davis) Associate Professor of Cellular and Molecular Physiology
- Ian Simpson, Ph.D. (London) Professor of Neural and Behavioral Sciences and Cellular and Molecular Physiology
- J. J. Smith, M.D. (Florida) Professor of Medicine, Division of Gastroenterology
- Diane M. Thiboutot, M.D. (Penn State Hershey) Professor of Ophthalmology
- James Utman, Ph.D. (Delaware, Newark) Distinguished Professor of Chemical Engineering and Bioengineering
- Thomas C. Varo, Ph.D. (Penn State) Distinguished Professor of Cellular and Molecular Physiology
- Regina Vasiatko-Youkhn, Ph.D. (Penn State) Professor of Endocrine Physiology and Nutrition
- Nancy L. Williams, Sc.D. (Boston) Associate Professor of Kinesiology
- Jiuye Zhu, Ph.D. (Dartmouth) Associate Professor of Cellular and Molecular Physiology

This is an intercollege program designed to enable students to obtain an integrated series of courses encompassing both the fundamentals of physiology and advanced training in a specialized area. Courses can be taken either at the College of Medicine or at University Park.

Graduate instruction in physiology is under the direction of the program committee, composed of graduate faculty from several departments at University Park—including the areas of animal science, biochemistry, bioengineering, biology, kinesiology, microbiology, and nutrition, as well as the Department of Cellular and Molecular Physiology at the College of Medicine. The master’s program, including courses, laboratory experience, and original research, is designed for completion in approximately two years, while the doctoral degree requires approximately five years.

Admission Requirements

- Courses for the Graduate Record Examination (GRE) are offered in the graduate office of the department. The Graduate Bulletin Archive is a valuable resource for prospective students, offering detailed information on the curriculum, admissions criteria, and financial aid opportunities.

The Pennsylvania State University
Scores from the Graduate Record Examinations (GRE) are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

**Degree Requirements**

Deficiencies in chemistry, biological science, mathematics (through a second course in calculus), and physics must be made up early in the student's graduate program. All candidates must complete a general basic laboratory course in physiology (combined cellular, mammalian, and comparative) before choosing an area of specialization. Possible areas of specialization are cardiovascular and respiratory physiology; cellular and subcellular physiology; comparative physiology; environmental physiology; exercise physiology; physiology of nutrition and metabolism; neurophysiology; renal physiology; and reproductive physiology. The graduate committee shall be appropriately represented by members of the physiology program committee and those of the area of specialization who shall have the responsibility and jurisdiction for determining the course program and research acceptable in satisfying degree requirements. A nonthesis option is available for the M.S. degree on a limited basis.

The communication and foreign language requirement for the Ph.D. degree may be satisfied by one of several options including intermediate knowledge of one foreign language.

**Other Relevant Information**

The following courses, among others, are available for physiology majors, and their descriptions may be found under the offerings of several departments:

- AGRO 545; AN SC 420, AN SC 423, AN SC 431W, AN SC 502, AN SC 514, AN SC 515; B M B 400, B M B 401, B M B 402, B M B 437; BIOE 402, BIOE 501, BIOE 502, BIOE 503, BIOE 504, BIOE 505, BIOE 506, BIOE 507; BIOE 552; BIOE 553, BIOE 570; BIOL 409, BIOL 428, BIOL 429, BIOL 437, BIOL 445, BIOL 465, BIOL 466, BIOL 472, BIOL 473, BIOL 477, BIOL 479, BIOL 538, BIOL 539, BIOL 544, BIOL 550; CMPS 412; EDPSY 400, EDPSY 406, EDPSY 409, EDPSY 410, EDPSY 456, EDPSY 507; KINES 456, KINES 457, KINES 484, KINES 530, KINES 565, KINES 567, KINES 577, KINES 587; MICRB 400, MICRB 401, MICRB 410, MICRB 412; NUC E 405, NUC E 420; NURS 503; NUTR 452, NUTR 515; NUTR 581, NUTR 582; PHSIO 501, PHSIO 506, PHSIO 507; PHYS 400, PHYS 402, PHYS 420; PTYSY 454, PTYSY 455; PSYCH 403, PSYCH 404, PSYCH 405, PSYCH 406, PSYCH 422, PSY 527; STAT 460, STAT 462, STAT 464, STAT 470, STAT 500, STAT 501, STAT 502, STAT 503, STAT 505; V SC 405, V SC 420.

The following courses are offered at the College of Medicine: ANAT 503, ANAT 505, ANAT 510, ANAT 512, ANAT 515, ANAT 535, ANAT 542, ANAT 543, ANAT 544, ANAT 545, ANAT 550; BCHM 505, BCHM 523, BCHM 526, BCHM 551, BCHM 553; L A M 501, L A M 503, L A M 507, L A M 510, L A M 515, L M M 501, L M M 502, L M M 554, MICRO 550, MICRO 552, MICRO 554, MICRO 555, MICRO 559; NEURO 509, NEURO 510, NEURO 515, NEURO 520, NEURO 525, NEURO 527, NEURO 528, NEURO 550; PHARM 505, PHARM 508, PHARM 510, PHARM 511, PHARM 515, PHARM 520, PHARM 540, PHARM 550. Descriptions of these courses can be found under the designated program.

**Physiology Minor**

The objective of the doctoral minor in Physiology is to augment the training of doctoral students with a coordinated group of courses that provide an integrated perspective of physiology from the molecular to the organismal level. It is expected that most students pursuing the minor will be graduate degree candidates in basic biological sciences, health sciences, or bioengineering.

The graduate minor in Physiology requires the following. (1) BIOL 472. If the student took a one-semester, upper-level undergraduate mammalian physiology course as an undergraduate, then this requirement may be waived with approval by the chair of the Physiology program. (2) PHSIO 571 and PHSIO 572. If these courses are required for the major, then substitute an equal number of credits in 500-level Physiology elective courses. (3) A 3-credit, 500-level Physiology course. (4) Select additional credits from 500-level Physiology courses or a relevant 400- or 500-level course so that the total course credits for the minor is 15. These 15 credits cannot include course work that is used to fulfill requirements in the student's major. (5) Elective courses for the minor must be approved by the chair of the Physiology program. For a list of suggested courses, see “Other Relevant Information” in the Physiology section of this bulletin. (6) Students must earn a grade of C or better in each course in the minor and maintain an overall average of 3.00 in the minor. (7) One member of the doctoral committee must be a faculty member in the Intercollege Graduate Degree Program in Physiology.

**Student Aid**

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the Graduate Bulletin, the following awards typically have been available to graduate students in this program:

MRS. A. ROBERT NOLL GRADUATE FELLOWSHIP IN APPLIED PHYSIOLOGY

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- David Weiss, Ph.D. (Stanford) Associate Professor of Physics
- James J. Whitmore, Ph.D. (Illinois) Professor of Physics
- Roy F. Willis, Ph.D. (Cambridge) Professor of Physics
- Thomas Winter, Ph.D. (Wisconsin) Professor of Physics
- Xiaoxing Xi, Ph.D. (Peking) Professor of Physics; Associate Professor of Materials Science and Engineering
- Jinping Ye, Ph.D. (Yale) Assistant Professor of Physics

Graduate instruction and research opportunities are available in atomic and molecular physics, laser physics, experimental and theoretical condensed matter and materials physics, surface physics, low-temperature physics, statistical physics, acoustics, nuclear physics, experimental and theoretical particle physics, quantum field theory, general relativity, cosmology and relativistic astrophysics and quantum gravity. Work in some areas is conducted in cooperation with the Materials Research Institute, the Applied Research Laboratory, and other interdisciplinary research facilities.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School Requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

A bachelor’s degree in physics or an allied field is required for admission to the M.S., and Ph.D. programs. Students with a 2.50 or higher junior/senior grade-point average (on a 4.00 scale) in physics and mathematics will be considered, and the best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 2.50 GPA may be made for students with special backgrounds, abilities, and interests. Exceptions may also be made for applicants to doctoral programs who have completed master’s degrees at other institutions.

Admission and study programs for the M.Ed. degree are handled on an individual basis.

Master's Degree Requirements

M.S. program: Required courses include PHYS 530, PHYS 557, PHYS 559 (2 credits), PHYS 561, or PHYS 410. There are two options. Thesis option: The thesis must be based on at least 6 credits of PHYS 600 and must conform to Graduate School regulations. Nonthesis option: An additional 6 credits of 500-level physics courses beyond the required ones must be taken, and a short paper must be submitted to, and accepted by, the department. There is no degree examination for either option.
M.Ed. program: At least 18 credits in physics are required, of which up to 6 credits may be for research. Six additional nonresearch science credits (which may be in physics) and a 6-credit minor in a field of professional education also must be included. A thesis or term paper must be submitted and accepted by the department.

Doctoral Degree Requirements

Ph.D. program: Required courses include PHYS 517, PHYS 525, PHYS 530, PHYS 557, PHYS 559 (2 credits), PHYS 561, PHYS 562, and a first-year seminar series. Courses required beyond these depend on the Ph.D. option. Students take at least four additional 3-credit, 500-level physics courses.

A candidacy examination is given at the end of the first year, a comprehensive examination approximately two years after the candidacy examination, and a final thesis defense takes place after the completion of the thesis. There is no departmental foreign language requirement, although a reading knowledge of one foreign language may be needed in some areas of research.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the Student Aid section of the Graduate Bulletin, the following awards typically have been available to graduate students in this program:

HOMER F. BRADDOCK GRADUATE FELLOWSHIPS Available to exceptional Ph.D. candidates in several departments of the Eberly College of Science. They carry stipends of $3,500 to $7,500 per year for each of the first three years.

WHEELER P. DAVEY MEMORIAL FELLOWSHIPS Carry stipend of variable amount and are available to a limited number of qualified graduate students in the Eberly College of Science.

DAVID C. DUNCAN GRADUATE FELLOWSHIPS Available to first- and second-year graduate students in physics and carry a stipend of approximately $2,000 per year for each of the first two years.

FRYMOYER SCHOLARSHIP

W. DONALD MILLER GRADUATE FELLOWSHIP

DAVID H. RANK MEMORIAL PHYSICS AWARD

THE NELLIE AND OSCAR L. ROBERTS FELLOWSHIPS Available to graduate students majoring in the physical sciences and in biochemistry and molecular biology. Each award is for $4,000 per year for one or two years.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Dual-Title Graduate Degree in Political Science and Asian Studies

The Graduate Faculty

- Donna Bahy, Ph.D. (Illinois) Professor of Political Science
- Lee Ann Banaszak, Ph.D. (Washington U) Associate Professor of Political Science
- D. Scott Bennett, Ph.D. (Michigan) Head; Professor of Political Science
- Michael E. Berkman, Ph.D. (Indiana, Bloomington) Professor of Political Science
- David B. Carter, Ph.D. (U of Rochester) Assistant Professor of Political Science
- Gretchen G. Casper, Ph.D. (Michigan) Associate Professor of Political Science
- John Christman, Ph.D. (Illinois, Chicago) Associate Professor of Philosophy, Political Science, and Women's Studies
- Stephen J. Cimbala, Ph.D. (Wisconsin) Professor of Political Science
- C. Michael Comiskey, Ph.D. (Princeton) Associate Professor of Political Science
- Errol Henderson, Ph.D. (Michigan) Associate Professor of Political Science
- Marie E. Hojnacki, Ph.D. (Ohio State) Associate Professor of Political Science
- Zaryab Iqbal, Ph.D. (Emory) Assistant Professor of Political Science
- Douglas Lemke, Ph.D. (Vanderbilt) Associate Professor of Political Science
- Suzanna Linn, Ph.D. (Iowa) Professor of Political Science
- Burt Monroe, Ph.D. (Oxford) Associate Professor of Political Science
- Subhanan Mukherjee, Ph.D. (Columbia) Associate Professor of Political Science
- David J. Myers, Ph.D. (California, Los Angeles) Associate Professor of Political Science
- Glenn Palmer, Ph.D. (Michigan) Professor of Political Science
- Eric Plutzer, Ph.D. (Washington U) Professor of Political Science
- Susan Welch, Ph.D. (Illinois, Urbana-Champaign) Professor of Political Science
- Joseph G. Wright, Ph.D. (California, Los Angeles) Assistant Professor of Political Science
- Christopher Zorn, Ph.D. (Ohio State) Professor of Political Science

The purpose of the graduate program in Political Science is to train professional political scientists who intend to pursue careers in research, teaching, and public service. The department offers programs leading to the M.A. and Ph.D. degrees. The programs are designed to enable students to acquire both methodological sophistication and substantive knowledge in a variety of fields.

The graduate program in Political Science encourages the study of a variety of substantive concerns, methodological approaches, and research skills. Among the department’s special areas of strength are United States politics and political behavior (legislative politics, public opinion and voting, parties and interest groups, and judicial process); political and social theory; international relations and peace science; and the politics of western and eastern Europe, Latin America, and South Asia; international conflict; international political economy; democratization; social movements; political culture; gender and politics. A dual-degree program with Women’s Studies is also available.

Admission Requirements

Entrance to the Political Science graduate program occurs in the fall semester. Applications must be received by the department not later than January 15 for fall admission. However, the department will begin accepting applications as of September 1.

The Department of Political Science requires M.A. and Ph.D. program applicants to submit transcripts, Graduate Record Examinations (GRE) scores (verbal, quantitative, and analytical), a statement of career plans and proposed emphasis in political science, at least three letters of recommendation from persons familiar with the applicant’s academic performance, and a writing sample demonstrating research and/or analytical skills.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English profiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for IELTS is 6.5. Specific graduate programs may have more stringent requirements.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students can be admitted to the master's program or, after passing a Ph.D. candidacy exam, can be admitted to the Ph.D. program with a master's degree.

Master's Degree Requirements

Depending on the student's previous methodological training, 30 credits of course work, including an essay, are required for a master's degree. The course work includes a methodological core of 9 credits (PL SC 501, 502, and 503); 12 credits in a primary field (including the survey seminar in the field); 6 credits in a secondary field; and 3 credits for the M.A. essay. Students also take a seminar on teaching and professional development in political science. There are no language requirements for the degree. Every master's candidate is required to pass an examination of their master's essay.

In the case of transfer students, a maximum of 10 credits earned in an advanced degree program at another university or in another department at Penn State will count toward the 30-credit requirement.

Doctoral Degree Requirements

The Department of Political Science requires a minimum total of 60 post baccalaureate credits for the Ph.D. Course work accepted for the M.A. in Political Science will count toward the 60-credit requirement. At least 45 credits, exclusive of the dissertation, must be in political science.

In the case of transfer students, a maximum of 30 credits earned in an advanced degree program at another university or in another department at Penn State will count toward the 60-credit requirement.

The department requires that a student complete the designated "core" courses in methodology (PL SC 501, 502, and 503) and a seminar on teaching and professional development in political science. Ph.D. degree candidates must present three fields for the purposes of comprehensive examinations. The major and one of the minor fields must be selected from the department's recognized fields, and one of the minor fields may be outside political science. The major field requires a minimum of 15 credits; each minor field requires a minimum of 9 credits.

The Pennsylvania State University
Dual-Title Graduate Degree in Political Science and Asian Studies

Graduate students with research and educational interests in international education may apply to the Political Science/Asian Studies Degree Program. The goal of the dual-title degree Political Science and Asian Studies is to enable graduate students from Political Science to acquire the knowledge and skills of their major area of specialization in Political Science while at the same time gaining the perspective of Asian Studies.

In order to prepare graduate students for the competitive job market, this program provides them with a solid disciplinary foundation that will allow them to compete for the best jobs in their field. For such students, the dual-title PhD in Asian Studies will add value to their degree and their status as candidates. It will produce excellent political scientists who are experts in Asian Studies as well. The dual-title degree Political Science and Asian Studies will build curricular bridges beyond the student’s major field so as to provide a unique training regime for the global scholar.

Additional details of the dual degree program are available in separate documentation and from the Asian Studies Program (see http://asian.la.psu.edu/graduate.shtml).

Admission Requirements

For admission to the Dual-Title Ph.D. degree, a student must first apply and be admitted to the Political Science graduate program. After admission to the Political Science graduate program, a student must then apply for admission to the Asian Studies Program. The Asian Studies admissions committee reviews applications and recommends student for admission to the Asian Studies program to the Graduate School. Applicants should have a junior/senior cumulative average of at least 3.00 (on a 4.00 scale) and appropriate course background. Students already in their first and second years of the Political Science graduate program may also apply to the dual-title program.

In addition to the requirements of the Graduate School and Political Science, applicants interested in the dual-title program should also make their interest known clearly on their applications and include remarks in their statement of purpose that address the ways in which their research and professional goals reflect an interest in interdisciplinary and Asian Studies-related research.

General Graduate School requirements are stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Degree Requirements

To qualify for an Asian Studies degree, students must satisfy the requirements of the Political Science program in which they are primarily enrolled. In addition, they must satisfy the requirements described below, as established by the Asian Studies committee. Within this framework, final course selection is determined by the student, their Asian Studies advisor, and their Political Science program advisor.

Upon a student's acceptance by the Asian Studies admissions committee, the student will be assigned an Asian Studies academic advisor in consultation with the Asian Studies chair. As students develop specific scholarly interests, they may request that a different Asian Studies faculty member serve as their adviser. The student and adviser will discuss a program of study that is appropriate for the student's professional objectives and that is in accord with the policies of The Graduate School, the Political Science department and the Asian Studies program.

Requirements for the Political Science/Asian Studies Ph.D.

The doctoral degree in Political Science and Asian Studies is awarded only to students who are admitted to the Political Science doctoral program and admitted to the dual-title Ph.D. degree in Asian Studies. The minimum course requirements for the dual-title Ph.D. degree in Political Science and Asian Studies are as follows:

- A minimum total of 60 postbaccalaureate credits. Course work accepted for the M.A. in Political Science will count toward the 60-credit requirement. At least 45 credits, exclusive of dissertation, must be in political science.
- Completion of course work in two major fields (the first of which is a political science sub field as detailed in the Political Science graduate handbook, and the second of which is Asia-related) and one minor field (in a regular political science subfield).
- Completion of the designated core of courses in methodology (PL SC 501, 502, and 503).
- Completion of two, 1.5 credit seminars on teaching, writing, and professional development in political science.
- Completion of introductory field seminars appropriate to one's three fields of study.
- 15 credits of Asia-related coursework at the 400 or 500 level. At least 6 of these 15 credits will be from ASIA 501 and 502. As many as 6 may come from Political Science, as approved by the student’s doctoral advisor and the Asian Studies Program director of graduate studies. The remaining 3 credits can be taken in ASIA or in any department other than Political Science.
- All-skills proficiency is one Asian Language AND two years’ college study (or equivalent knowledge) of another Asian language OR alternative proficiency appropriate to the student’s field.

Particular courses may satisfy both the Political Science requirements and those of the Asian Studies program. Final course selection is determined by the student in consultation with their dual-title program advisors and their major program advisors.

Other Relevant Information

Penn State is a member of the Committee on Institutional Cooperation (CIC), an association of the Big Ten universities and the University of Chicago. The CIC sponsors the Traveling Scholars program, which provides doctoral-level students with an opportunity to study at another CIC university. In addition to participating in CIC programs, the department sponsors attendance at the ICPSR Summer program at the University of Michigan.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Charles T. Anderson, Ph.D. (Stanford) Assistant Professor of Biology
- Richard N. Areca, Ph.D. (Washington State) Professor of Horticultural Physiology
- Sarah M. Assmann, Ph.D. (Stanford) Wailer Professor of Biology
- Michael Axtell, Ph.D. (California, Berkeley) Associate Professor of Biology
- Robert D. Berghage, Ph.D. (Michigan State) Associate Professor of Horticulture
- Philip C. DelVecchio, Ph.D. (Rochester) Professor of Chemistry
- Kathleen M. Brown, Ph.D. (Georgia Tech) Associate Professor of Wood Chemistry
- Donald A. Bryant, Ph.D. (California, Los Angeles) Ernest C. Pollard Professor of Biotechnology and Professor of Biochemistry and Molecular Biology
- John E. Carlson, Ph.D. (Illinois) Professor of Molecular Genetics (Forest Resources)
- Jeffrey Catchmark, Ph.D. (Lehigh) Associate Professor of Agricultural and Biological Engineering
- Sudhir Chopra, Ph.D. (Vrije U, Brussels) Associate Professor of Maize Genetics
- Daniel Cosgrove, Ph.D. (Stanford) Eberly Chair and Professor of Biology
- Wayne R. Curtis, Ph.D. (Purdue) Professor of Chemical Engineering and Biotechnology
- Richard J. Cyr, Ph.D. (California, Irvine) Professor of Biology
- Consuelo DeMoraes, Ph.D. (Georgia) Professor of Entomology
- Claude DePamphilis, Ph.D. (Georgia) Professor of Biology
- David M. Eissenstat, Ph.D. (Utah State) Professor of Woody Plant Physiology
- Majid Foolad, Ph.D. (California, Davis) Professor of Plant Genetics
- John H. Glime, Ph.D. (Indiana) Professor of Biochemistry and Biophysics
- Ying Gu, Ph.D. (California, Riverside) Assistant Professor of Biochemistry and Molecular Biology
- Mark J. Guilittan, Ph.D. (California, Irvine) Professor of Plant Molecular Biology
- David Huff, Ph.D. (California, Davis) Associate Professor of Turfgrass Breeding and Genetics
- Seogchan Kang, Ph.D. (Wisconsin) Professor of Plant Pathology
- Teh-hui Kao, Ph.D. (Yale) Professor of Biochemistry and Molecular Biology
- Roger Koide, Ph.D. (California, Berkeley) Professor of Horticultural Ecology
- Dawn S. Luthe, Ph.D. (Wisconsin—Madison) Professor of Plant Stress Biology
- Jonathan P. Lynch, Ph.D. (California, Davis) Professor of Plant Nutrition
- Hope Ma, Ph.D. (MIT) Distinguished Professor of Biology
- Timothy McNellis, Ph.D. (Yale) Associate Professor of Plant Pathology
- Mark C. Mescher, Ph.D. (Georgia) Assistant Professor of Entomology
- Gabriel Monshausen, Ph.D. (Bonn) Assistant Professor of Biology
- Christopher A. Mullin, Ph.D. (Cornell) Professor of Entomology
- B. Tracey Nixon, Ph.D. (MIT) Professor of Biochemistry and Molecular Biology
- Anthony Pigg, Ph.D. (Michigan) Professor of Biology
- Ming Tien, Ph.D. (Michigan) Professor of Biochemistry and Molecular Biology
- Yinong Yang, Ph.D. (U Florida) Associate Professor of Plant Pathology

The Intercollege Graduate Degree Program in Plant Biology includes faculty from nine departments in the College of Agricultural Sciences, College of Engineering, and Eberly College of Science. Each student becomes associated with the adviser’s department, which may provide financial support, research facilities, and office space. Applicants are encouraged to explore opportunities by contacting faculty who may be prospective advisers.

The objective of this program is to educate and train plant biologists using the most modern techniques available today. Graduates from this program have gone on to a diverse range of careers, including positions in colleges and universities, research institutes, industry, and government. Research interests of the program faculty span the breadth of scientific areas ranging from molecular biology, biochemistry, biophysics, genetics, and functional genomics to whole-plant physiology and ecology. Student training includes a comprehensive set of team-taught courses that reflect this breadth of scientific approaches.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) Aptitude Test (verbal, quantitative, analytical) are required for admission. At the discretion of the graduate program officers, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course background will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces available for new students. Students entering this program should have had a strong foundation in the biological sciences, including biochemistry, general physics, and college mathematics through calculus. Students with limited deficiencies may be admitted but must make up their deficiencies concurrently with their graduate studies. B.S.-level applicants with good academic records who have had strong training in plant biology and related courses, including research experience, are generally admitted directly into the Ph.D. program and bypass the M.S. degree.

Master's Degree Requirements

Candidates for the M.S. must take a written diagnostic examination during the first academic year in the program. The functions of this test are (1) to determine the areas of expertise and deficiency in the student’s academic preparation and (2) to serve as an early screening system to eliminate students with too great an academic deficiency to continue in the program.

As part of the core courses for any degree in the Plant Biology program, all students must enroll in the two tutorial courses, PLBIO 512 and PLBIO 513, and an ethics course, IBIOS 591. Students are presented with advanced lectures in various areas of plant biology and must prepare approximately three written solutions to problems per semester. This dossier of papers constitutes the written diagnostic examination for the M.S. degree and is also used for evaluation of English writing competency. At the end of the respective semesters, the faculty coordinator will present a summary and evaluation of the student’s progress to the Candidacy Examination Committee. The committee will then decide if the student has passed the written diagnostic examination and satisfied English writing competency.

All M.S. degree candidates will be required to complete 30 credits of course work. In addition to the courses mentioned previously, students must include two biochemistry courses, 1 credit of colloquium (PLBIO 590), and at least 6 credits of thesis research (PLBIO 600 or PLBIO 810) in their program and they must complete a thesis. Upon recommendation of the advisory committee, equivalent courses taken at another university may be substituted for the above requirements.

The Pennsylvania State University
Doctoral Degree Requirements

Students in the Ph.D. program must successfully pass the candidacy, comprehensive, and final examinations required by the Graduate School. One of the main goals of the candidacy examination is to determine the potential of a student to successfully obtain a Ph.D. degree and is intended to be a vigorous test of a student's abilities, prior to the major investment in time and effort necessary to pass the comprehensive examination.

As in the M.S. program, students enrolled in the Ph.D. program must pass a written English competency evaluation based on the dossier of papers written for PLBIO 512 and PLBIO 513. This evaluation is done at the end of the student's first year. The oral candidacy examination is based on two of the papers, jointly chosen by the student and the Candidacy Examination Committee, and must be passed by the end of the student's third semester.

Ph.D. candidates must complete the core courses required for the M.S. plus three 2-credit courses dealing with theory and techniques of plant ecophysiology, plant cell biology, and plant molecular biology (PLBIO 514, PLBIO 515, PLBIO 516) and 2 credits of colloquium (PLBIO 590). Upon recommendation of the candidacy committee, equivalent courses taken at another university may be substituted for some of the above requirements. Based on the results of the candidacy examinations, the major professor and the student's advisory committee will determine other course requirements.

Other Relevant Information

The following courses are some of the courses available for Plant Biology majors, in addition to the required courses. Their descriptions may be found under the offerings of several departments: AGRO 517, AGRO 518; BIOL 407, BIOL 431, BIOL 441, BIOL 448, BIOL 510, BIOL 513; BMMB 514, BMMB 520, BMMB 525; HORT 402W, HORT 407, HORT 412W, HORT 420, HORT 440W, HORT 444, HORT 445, HORT 517, HORT 520; PPATH 405, PPATH 516, PPATH 543; any course offered by the Plant Biology program.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the Student Aid section of the Graduate Bulletin. In most participating departments, Plant Biology applicants are eligible for departmental teaching or research assistantships, and other assistantships supported by grant funds of individual faculty who make these award decisions.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Fred Gildow, Head of the Department of Plant Pathology
212 Buckhout Laboratory
814-865-7448

Degrees Conferred:
Ph.D., M.S.

The Graduate Faculty

- Paul A. Backman, Ph.D. (California) Professor of Plant Pathology
- David M. Beyer, Ph.D. (Penn State) Professor of Plant Pathology
- Barbara J. Christ, Ph.D. (British Columbia) Senior Associate Dean; Professor of Plant Pathology
- Donald D. Davis, Ph.D. (Penn State) Professor of Plant Pathology
- David W. Gilszter, Ph.D. (Georgia) Professor of Plant Pathology
- Frederick E. Gildow, Ph.D. (Cornell) Department Head; Professor of Plant Pathology
- Beth K. Gugino, Ph.D. (Penn State) Assistant Professor of Plant Pathology
- John M. Habibrendt, Ph.D. (Missouri) Associate Professor of Plant Pathology
- Scott A. Isard, Ph.D. (Indiana) Professor of Aerobiology
- Maria del Mar Jimenez Gasco, Ph.D. (Cordoba, Spain) Assistant Professor of Plant Pathology
- Seogchan Kang, Ph.D. (Wisconsin) Professor of Plant Pathology
- Gretchen A. Kulda, Ph.D. (California) Associate Professor of Plant Pathology
- Timothy W. McNelis, Ph.D. (Yale) Associate Professor of Plant Pathology
- Gary W. Moorman, Ph.D. (North Carolina State) Professor of Plant Pathology
- Henry Ngugi, Ph.D. (Reading, UK) Assistant Professor of Plant Pathology
- C. Peter Romaine, Ph.D. (Cornell) Professor of Plant Pathology
- Daniel J. Royse, Ph.D. (Illinois) Professor of Plant Pathology
- Elwin L. Stewart, Ph.D. (Oregon State) Professor of Plant Pathology
- James W. Travis, Ph.D. (North Carolina State) Professor of Plant Pathology
- Wakar Uddin, Ph.D. (Georgia) Associate Professor of Plant Pathology
- Yinong Yang, Ph.D. (Florida) Associate Professor of Plant Pathology

Plant pathology is the study of disease in plants and concerns the dynamic interaction between the plant, the causal agent (bacteria, fungi, viruses, nematodes, etc.), and their environments. A student prepares for a professional career in research, teaching, extension, or industry through advanced studies of the principles of plant infection, the physiology of disease in plants, the ecology of root diseases, the nature and inheritance of disease resistance in plants, epidemiology, ecology and physiology of air pollution injury to plants, or plant disease control by biological or chemical means. A student also may specialize in the nature and control of the diseases of forest trees, agronomic or horticultural crops, and commercial mushrooms. Advanced studies in molecular systematics of fungi and applied mycology, related to the production of the commercial mushroom, also may be taken. Modern, well-equipped laboratories, controlled environment facilities and greenhouses, and well-developed field research areas are available for graduate study.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students scoring in the fiftieth percentile or above on each section of the GRE will be given preference. The best-qualified applicants will be accepted up to the number of spaces and advisers that are available for new students. Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Students are expected to have a strong foundation in biological and physical sciences. Generally, students with B.S. degrees in biology, microbiology, plant science, molecular biology, or biochemistry are well prepared.

Degree Requirements

M.S. DEGREE

The master of science degree program in Plant Pathology leads students either to the development of special proficiencies in Plant Pathology, which will allow the individual to directly enter a professional career, or to the development of a basic knowledge of the discipline, allowing for advancement to the Ph.D. degree. M.S. degree students will be introduced to the broad aspects of the field of plant pathology, including exposure to the various causal agents of plant disease and the diseases they incite; diseases of current and classical importance affecting a wide range of crop plants; a variety of techniques used to isolate, characterize, and identify causal agents of plant disease; and an appreciation for the relationship between plant pathology and other biological and physical sciences.

Required Courses for the M.S. Degree are: PPATH 405, 416, 417, 425, 502, and 590. Candidates are required to take a minimum of 6 additional credits of Plant Pathology courses from a list provided by the department.

Candidates for the M.S. degree in Plant Pathology must present a thesis to their graduate advisory committee.

Ph.D. DEGREE

Students earning a Ph.D. degree from Penn State should have a thorough understanding of the complex interaction between the pathogen and its host. They should know how representative pathogens are dispersed and enter hosts and how the environment mediates these processes. They should understand the role that the pathogen, host genes, and metabolic products play in pathogenesis. They must be aware of the mechanisms the host has to defend it and how these are breached by a successful pathogen. They must know the parameters involved in disease development and with this knowledge be able to apply measures of control.

Candidates for the Ph.D. degree in Plant Pathology are required to have an M.S. in plant pathology or a closely related field, or equivalent educational background. In addition, all students must enroll in PPATH 505 and other courses tailored to the individual by the candidate’s doctoral advisory committee. Ph.D. candidates must prepare a thesis and present seminars in the departmental colloquium (PPATH 590), through which English communication skills will be evaluated. During their studies, Ph.D. students will have an opportunity to assist in teaching a disciplinary subject.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

The Pennsylvania State University
Dual-Title Graduate Degree in Plant Pathology (PPATH) and International Agriculture and Development (INTAD)

Graduate students with research and educational interests in international education may apply to the Plant Pathology/intAD Dual-Title Degree Program. The goals of the dual-title degree Plant Pathology and intAD graduate program is to enable graduate students from Plant Pathology to acquire the knowledge and skills of their primary area of specialization in Plant Pathology, while at the same time gaining the perspective and methods needed for work in the international agriculture. Graduate study in this program seeks to prepare students to assume leadership roles in science, science education, outreach, and project management anywhere in the world. Students are required to write research proposals and expected to write grants to support their research activities, reflecting the dual-title degree. As part of their professional development presentations, publication of research articles and active participation in professional societies is expected. Emphasis is placed upon the professional development of the student. Students are able to specialize in the research program areas of plant-microbe interactions, plant disease biology and epidemiology, environmental microbiology, mycology, plant virology, mushroom biology, genomics and disease management. At the same time they will acquire a broad perspective about how to apply their research findings in the context of the broader international community. Thus, the dual-title will allow students to master their field of specialization from an international perspective so that they can compare practices and outcomes between countries and regions.

Admission Requirements

For admission to the dual-title doctoral degree under this program, a student must first apply and be admitted to the Plant Pathology graduate program. Once accepted into the Plant Pathology program, the student can then submit an application to the intAD Academic Program Committee for the dual-title degree program. The application consists of a written personal statement indicating the career goals that a student hopes to accomplish by earning a dual-title PPPH/intAD degree. Requirements listed here are in addition to the admission requirements for the Plant Pathology graduate program.

Degree Requirements

To qualify for this dual-title degree, students must satisfy the requirements of the Plant Pathology program. In addition, they must satisfy the requirements described below, determined by the student, the intAD advisor, and the Plant Pathology program advisor.

Degree Requirements for PPPH/intAD Dual-Title M.S.

The master's in Plant Pathology and intAD is a dual-title degree awarded only to students who are admitted to the Plant Pathology master's program and admitted to the dual-title degree in intAD and who complete all requirements for the degrees. In addition to the requirements of the Plant Pathology degree, dual-title degree students must:

Course Requirements

Complete a minimum of 12 intAD course credits (400, 500, or 800 level) as follows:

- 9 credits from the core curriculum:
  - Program Design and Delivery (AEE 450, 3 credits)
  - Leadership Development (CEDEV/R SOC/AEE 505, 3 credits, on-line)
  - International Agricultural Development Seminar (INTAD 820, 3 credits)

- 3 credits of internship or applied courses/independent studies with international development content

Thesis

Write a master's thesis on a topic that reflects both the graduate program in plant pathology and the dual-title offering in intAD. Thesis research credits (SUBJ 600) must be taken in the major program.

All members of the student's committee for the dual-title master's degree will be members of the graduate faculty. The committee must include at least one graduate faculty member from intAD. A Degree Committee form should be filed upon selection of the committee members and should be approved by the intAD Academic Program Committee Co-chair.

Candidates for the dual-title master's degree in Plant Pathology and intAD will also be required to pass a final oral examination covering the general field of plant pathology and intAD, with emphasis on the student's area of specialization. The oral exam is to be administered by the student's thesis committee. A favorable vote of a two-thirds majority is necessary for passing.

Some courses may satisfy both the graduate program requirements and those of the intAD program. Final course selection is determined by the students in consultation with their intAD advisors and their Plant Pathology program advisors. Permission from a student's academic advisor, in consultation with the program chair, is required to substitute a 400-level course for a 500-level course; however, the requirement for 18 credits at the 500-level or above must still be met, in total, across both the major and the dual-title courses of study. Students and advisors should maintain the intAD Master's Degree Plan of Study, which must be submitted to the intAD program office two months before the student files the "Intent to Graduate" via eLion.

Degree Requirements for PPPH/intAD Dual-Title Ph.D.

The doctoral degree in Plant Pathology and intAD is a dual-title degree awarded only to students who are admitted to the Plant Pathology doctoral program and admitted to the dual-title degree in intAD and who complete all requirements for the degrees. The minimum requirements for the dual-title Ph.D. degree in PPPH/intAD, in addition to the Plant Pathology requirements, are as follows.

Course Requirements

Students must complete a minimum of 18 intAD course credits with study in the following categories:

- 9 credits from the core curriculum
  - International Agricultural Development Seminar (INTAD 820, 3 credits)
  - International Rural Social Change (R SOC 517, 3 credits)
  - Sociology of Agriculture (R SOC 508, 3 credits) or Human Dimensions of Natural Resources (R SOC 555, 3 credits)

- 9 credits from intAD elective curriculum/courses with international development content/internships/independent study

Permission from a student's academic advisor, in consultation with the program chair, is required to substitute a 400-level course for a 500-level course. Permission from a student's academic advisor, in consultation with the program chair, is required to substitute a 400-level course for a 500-level course in consultation with the program chair. Students and advisors should maintain the intAD Master's Degree Plan of Study, which must be submitted to the intAD program office two months before the student files the "Intent to Graduate" via eLion.

Graduate Faculty

Students must be members of a graduate faculty, which may consist of any combination of Plant Pathology and intAD faculty members.

Graduates of the dual-title intAD master's degree program who wish to pursue an intAD doctoral degree must re-apply to the intAD program for admission. intAD master's degree credits may be carried over to the doctoral program. Six additional intAD credits will be required. intAD master's degree graduates who pursue an intAD Ph.D. are required to take the intAD 820 International Agricultural Development Seminar a second time.

Candidacy

Candidacy procedures will be based on the procedures of Plant Pathology and will have an international dimension. Although not encouraged, the dual-title
Committee Composition

The doctoral committee of the Ph.D. dual-title degree student must include a minimum of four faculty members, i.e., the chair and at least three additional members, all of whom must be members of the Graduate Faculty; and the committee must include at least one representative from the INTAD Program faculty. The chair of the committee can be a member of both Plant Pathology and the INTAD Program faculty. If the chair is not an INTAD Program faculty member, the INTAD representative must be the co-chair of the committee. An official "outside field member" also must be appointed to the committee, in accordance with the requirements outlined in the Graduate Bulletin.

Comprehensive Exam

At the end of the coursework, candidates for the dual-title doctoral degree in Plant Pathology and INTAD will be required to pass an oral comprehensive examination based on their dissertation proposal and area of specialization in plant pathology, while reflecting their dual-title curriculum. A separate comprehensive examination is not required by the INTAD program, but international agriculture must be one of the key areas of the comprehensive exam and the INTAD representative on the student’s doctoral committee must have input into the development of and participate in the evaluation of the comprehensive examination.

Dissertation and Dissertation Defense

Ph.D. students enrolled in the dual-title degree program are required to write and orally defend a dissertation on a topic that reflects their original research and education in both Plant Pathology and International Agriculture and Development. The dissertation should contribute to the body of knowledge in international agriculture. A public oral presentation of the dissertation is required.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400-499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up for deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
Ph.D., M.S.
Dual-Title Doctoral Degree in Psychology and Language Science

The Graduate Faculty

- Reginald B. Adams Jr., Ph.D. (Dartmouth) Assistant Professor of Psychology
- Peter A. Arnett, Ph.D. (Wisconsin, Madison) Associate Professor of Psychology
- Sandra T. Azar, Ph.D. (Rochester) Professor of Psychology
- Sheri Birenbaum, Ph.D. (California) Professor of Psychology
- Karen L. Bierman, Ph.D. (Denver) Distinguished Professor of Psychology
- Alysia Y. Blandon, Ph.D. (Michigan) Assistant Professor of Psychology
- Frederick M. Brown, Ph.D. (Virginia) Associate Professor of Psychology
- Kristen A. Buss, Ph.D. (Wisconsin) Associate Professor of Psychology
- Richard A. Carlson, Ph.D. (Illinois) Professor of Psychology
- Mark A. Casteel, Ph.D. (Nebraska) Associate Professor of Psychology
- Louis G. Castroguay, Ph.D. (SUNY, Stony Brook) Professor of Psychology
- Jeanette Cleveland, Ph.D. (Penn State) Professor of Psychology
- Pamela M. Cole, Ph.D. (Penn State) Professor of Psychology
- Peter B. Crabb, Ph.D. (Temple) Associate Professor of Psychology
- Nancy A. Dennis, Ph.D. (Catholic U of America) Assistant Professor of Psychology
- Julia L. Farr, Ph.D. (Maryland) Professor of Psychology
- Karen Gasper, Ph.D. (Illinois) Associate Professor of Psychology
- Mary Gordon, Ph.D. (Temple) Professor of Psychology
- Rick O. Gilmore, Ph.D. (Carnegie Mellon) Associate Professor of Psychology
- Alicia A. Grandey, Ph.D. (Colorado State) Associate Professor of Psychology
- Monica E. Gregory, Ph.D. (Oklahoma) Associate Professor of Psychology
- Frank G. Hillary, Ph.D. (Drexel) Assistant Professor of Psychology
- Cynthia L. Huang-Pollock, Ph.D. (Michigan State) Assistant Professor of Psychology
- Sam Hunter, Ph.D. (Oklahoma) Assistant Professor of Psychology
- Rick R. Jacobs, Ph.D. (California) Professor of Psychology
- John A. Johnson, Ph.D. (Johns Hopkins) Professor of Psychology
- Arye Kozol, Ph.D. (Yale) Assistant Professor of Physics and Psychology
- Judith F. Kroll, Ph.D. (Brandeis) Liberal Arts Research Professor of Psychology and Linguistics
- Kenneth N. Levy, Ph.D. (CUNY) Assistant Professor of Psychology
- Pierre Li, Ph.D. (Leiden U) Professor of Psychology and Linguistics
- Lynn S. Liben, Ph.D. (Michigan) Distinguished Professor of Psychology
- Melvin M. Mark, Ph.D. (Northwestern) Professor of Psychology
- Amy D. Marshalt, Ph.D. (Indiana) Assistant Professor of Psychology
- Gerald E. McCreary, Ph.D. (Wisconsin) Evan Pugh Professor of Health and Human Development and Psychology
- Michael D. McNeese, Ph.D. (Vanderbilt) Associate Professor of Information Sciences and Technology, and Psychology
- Susan Mohammed, Ph.D. (Ohio) Associate Professor of Psychology
- Ginger Moore, Ph.D. (Pittsburgh) Assistant Professor of Psychology
- Kevin R. Murphy, Ph.D. (Penn State) Professor of Psychology
- Janne Neiderhiser, Ph.D. (Penn State) Professor of Psychology
- Keith E. Nelson, Ph.D. (Yale) Professor of Psychology
- Michelle G. Newman, Ph.D. (SUNY, Stony Brook) Associate Professor of Psychology and Psychiatry
- Aaron L. Pincus, Ph.D. (British Columbia) Associate Professor of Psychology
- Brian Rabian, Ph.D. (George Washington) Clinical Associate Professor of Psychology
- Richard J. Ravizza, Ph.D. (Vanderbilt) Associate Professor of Psychology
- William J. Ray, Ph.D. (Vanderbilt) Professor of Psychology
- Frank E. Ritter, Ph.D. (Carnegie Mellon) Associate Professor of Information Sciences and Technology, and Psychology
- Distin A. Rosenbaum, Ph.D. (Stanford) Distinguished Professor of Psychology
- Stephanie A. Shields, Ph.D. (Penn State) Professor of Women's Studies and Psychology
- Margaret L. Signorella, Ph.D. (Penn State) Professor of Psychology
- José Soto, Ph.D. (California, Berkeley) Assistant Professor of Psychology
- Janet Swin, Ph.D. (Minnesota) Professor of Psychology
- Robert E. Thomas, Ph.D. (Claremont) Professor of Psychology
- Theres K. Vescio, Ph.D. (Kansas) Associate Professor of Psychology and Women's Studies
- Daniel J. Weiss, Ph.D. (Harvard) Associate Professor of Psychology
- Michael Wenger, Ph.D. (Binghamton) Associate Professor of Psychology
- Stephanie Wilson, Ph.D. (Pittsburgh) Assistant Professor of Psychology

The graduate Psychology program is characterized by highly individualized study leading to the Ph.D. degree. Emphasis is placed on research, teaching, and professional career development. Each student is associated with one of the six program areas offered in the department: Cognitive; Developmental; Psychobiology; Industrial/Organizational; and Social. An individual's particular pattern of interests dictates in part the course of study followed. Within all areas, research is an integral part of study; usually, the research is empirical in focus, but it may be applied or basic, depending on the problem of interest.

The department has laboratories, computer facilities, darkroom, and shop, and students have access to the large resources of the University, which include excellent computation facilities and a large open-stack library. Opportunities for practicum experience are available; e.g., clinical students find practicum in local mental health centers, while industrial students find placement in appropriate business or industrial settings.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) verbal and quantitative portions are required; scores from the Miller Analogies Test (MAT) are optional. All applicants who were psychology majors as undergraduates should provide scores from the advanced psychology (subject) GRE test. Applicants with superior undergraduate (particularly junior and senior years) or graduate grade-point averages will be considered for admission. Although a major in psychology is not required, applicants should have a broad undergraduate background that includes 12 credits in psychology. Undergraduate study in psychology should include a course in statistics and a psychological methodology course. Requirements listed above are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Master's Degree Requirements

The Pennsylvania State University
The psychology department does not have a graduate program designed for students seeking only the master's degree. A master's thesis, or the department's equivalent (an acceptable published journal article), is required for advancement to candidacy for the Ph.D. degree in Psychology. Usually, but not always, the master's thesis centers on an empirical research topic. The typical thesis involves a literature review, data collection, analysis, and discussion. A master's degree is not awarded unless a thesis is submitted to the Graduate School. Students must successfully propose a thesis study by the end of the second year and have a successfully defended a thesis by the end of their third year in the program.

**Doctoral Degree Requirements**

All students in their first year of residency must satisfactorily complete the department's English proficiency requirement (PSY 501). Students must complete (within their first 60 graduate credits for students without previous graduate credit) 6 departmentally approved graduate credits in statistics with a grade of B or better. Students must complete 18 credits in a suitably selected major area; majors usually are defined by one of the six program areas noted above. In addition to the major area credits, students must complete a minimum of 12 credits outside the major area. Two options exist for completing these 12 credits: (1) completing four courses in APA-recommended breadth areas, or (2) completing course work in a particular area of expertise outside the major. Some areas may have additional recommended or required courses as well. The Ph.D. comprehensive examination must be taken by the time 70 graduate credits are earned, or prior to the student's fourth year in residency, whichever comes first. The department has no foreign language requirement.

**Applied Linguistics Option**

The program offers an option in Applied Linguistics which includes 18 credits in APLNG/LING offered in the Linguistics and Applied Language Studies program. Underpinning the option is the synthesis of knowledge related to how language is acquired, understood, and spoken by children and adults who use one or more languages.

**Other Relevant Information**

The Department of Psychology makes every effort to recruit and train minority psychologists. Support for minority students is coordinated by the department, the Graduate School Minority Graduate Scholars Award Program, and the American Psychological Association Minority Fellowship Program. In addition, the department often has funded minority students through minority training programs and special minority research programs.

**Student Aid**

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the [STUDENT AID](#) section of the Graduate Bulletin.

**Courses**

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

**Dual-Title Graduate Degree in Psychology and Language Science**

Graduate students with research and educational interests in Psychology and Language Science may apply to Psychology and Language Science PH.D. Graduate Program. The goal of the dual-title degree Psychology and language Science graduate program is to enable graduate students from Psychology to acquire the knowledge and skills of their major area of specialization in Psychology, while at the same time gaining the perspective and methods of the Language Sciences.

**Admission Requirements**

To pursue a dual-title degree under this program, the student must first apply to the Graduate School and be admitted through the Psychology Department (see below for admission requirements for the Graduate Program in Psychology). Upon admission to the Psychology Program and with a recommendation from a Language Science program faculty member in the Department of Psychology, the student’s application will be forwarded to a committee that will include the Director of the Linguistics Program, one of the Co-Directors of the Center for Language Science, and a third elected faculty member within the Center for Language Science. All three committee members will be affiliated with the Program in Linguistics. Upon the recommendation of this committee, the student will be admitted to the dual-title degree program in Language Science.

**Admission Requirements for Incoming Graduate Students in Psychology**

Most incoming graduate students have earned an undergraduate degree in psychology. In some cases, students from other majors are also admitted, but it is expected that applicants will have a background in psychology before applying. Graduate Record Exam (GRE) is required; however, the subject exam is not required. The TOEFL exam is required for international students except for those applicants who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States and Wales. All international students will be required to take the English Proficiency Exam upon arrival at the Penn State campus. Students are asked to complete a departmental application form, write a statement of purpose, and include a writing sample in the application materials.

**Requirements for the Dual-Title Ph.D. Degree in Psychology and Language Science**

Two Language Science proseminar courses (Ling 521 and Ling 522: 6 credits). One 3 credit internship required with a Psychology program faculty mentor from an outside area. The 3 credit internship required by the Psychology program may satisfy both the Psychology requirement and the Language Science requirement (for 6 total credits of internship to be completed with two faculty members from the Language Science program). Students will choose one course among the following: CSD 596, GER 596, LING 596, PSY 596, SPAN 596.

Final course selection is determined by the student in consultation with their dual-title program advisors and their major program advisors. Students who already hold a master’s degree from another institution may petition to have equivalent course credits accepted.

Quality and Manufacturing Management (QMM)

Program Home Page
RUSSELL BARTON, Co-Director; Professor of Management Science and Information Systems
ROBERT VOIGT, Co-Director; Professor of Industrial and Manufacturing Engineering
344 Leonhard Building
814-863-5802
qmm@psu.edu

Degree Conferred:
M.M.M.

Penn State’s Master of Manufacturing Management (M.M.M.) degree is offered by the Quality and Manufacturing Management (QMM) program. The degree is conferred by both the College of Engineering and the Smeal College of Business. This interdisciplinary graduate program is designed to prepare students for careers in manufacturing, consulting, services, and operations. The program is offered on a full-time basis only and requires nine months of continuous study during a normal academic year. An appropriate internship experience is a precondition for entrance to the program if the applicant does not have sufficient work experience to waive the internship requirement. Students take 32 credits of work in eleven core courses.

The program develops future executives who possess in-depth, relevant manufacturing knowledge bridging engineering and management. Graduates are afforded a life-changing experience that provides them with a unique set of engineering, business, and quality skills combined with a suite of communication skills critical to management success. Students fuse Six Sigma certification with corporate social responsibility and emotional intelligence to become well-rounded leaders. MMM students develop business plans and analyze and predict corporate financial performance in a global marketplace. They emerge from Penn State as international leaders understanding the fundamentals of materials and processes and project confidence in product and manufacturing system design.

Admission Requirements

The program draws its students from two groups: practicing professionals from industry and individuals who have graduated from, or are currently enrolled in, a business administration, science, or engineering program. Applicants who expect to graduate with a B.S. in engineering, science, or business administration may apply for admission to the program in their senior year.

All applicants must submit scores from the GRE or the GMAT. International students must also submit TOEFL scores. However, the TOEFL requirement is waived for international students who have successfully completed undergraduate work in an American college or university. The average grade-point average is 3.0; the average GRE score is 1100 on the verbal and quantitative sections and 4.0 on the analytical section. The average GMAT score is 580.

All applicants must have taken the prerequisite mathematics, computer science, and statistics courses or equivalents prior to starting the program. Applicants cannot register until they have completed these courses. For a listing of the prerequisite courses, visit www.mmmdegree.psu.edu.

Degree Requirements

The M.M.M. degree requires 32 credits of graduate work on a full-time basis. The courses are as follows: QMM 491 or QMM 492; QMM 552, QMM 561, QMM 562, QMM 582, QMM 593, QMM 851, QMM 871, QMM 872, and QMM 891.

In some instances, course changes are being considered and prospective students should consult with the M.M.M. degree program to determine what new requirements might be in effect. The program co-directors are authorized to make suitable substitutions in the above curriculum in consultation with the faculty steering committee.

Student Aid

A limited number of partial scholarships are available for students in the program.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

QUALITY AND MANUFACTURING MANAGEMENT (QMM) course list

Only students enrolled in the M.M.M. degree program may take the 500- and 800-level courses.
Graduate Bulletin Archive - 2012  

Rural Sociology (R SOC)

Program Home Page
ANN R. TICKAMYER, Head of the Department of Agricultural Economics and Rural Sociology
103 Armsby Building
814-865-5461

Degrees Conferred:
Ph.D., M.S.

The Graduate Faculty
- Kathryn J. Brasier, Ph.D. (Wisconsin–Madison) Assistant Professor of Rural Sociology
- Gretchen T. Cornwell, Ph.D. (Penn State) Assistant Professor of Rural Sociology
- Leland L. Glenn, Ph.D. (Missouri) Assistant Professor of Rural Sociology and Science, Technology, and Society
- Clare Hinrichs, Ph.D. (Cornell) Associate Professor of Rural Sociology
- Leif I. Jensen, Ph.D. (Wisconsin) Professor of Rural Sociology
- Albert E. Luloff, Ph.D. (Penn State) Professor of Rural Sociology
- Diane K. McLaughlin, Ph.D. (Penn State) Associate Professor of Rural Sociology
- Anouk Patel-Campillo, Ph.D. (Cornell) Assistant Professor of Rural Sociology
- Carolyn E. Sachs, Ph.D. (Kentucky) Professor of Rural Sociology
- Joan S. Thomson, Ph.D. (Wisconsin) Professor of Agricultural Communications
- Ann R. Tickamyer, Ph.D. (North Carolina, Chapel Hill) Professor of Rural Sociology
- James Van Horn, Ph.D. (Ohio State) Professor of Rural Sociology
- Fern K. Willits, Ph.D. (Penn State) Distinguished Professor of Rural Sociology

All degree programs emphasize a comprehensive understanding of the various facets of societal organization pertinent to the rural sector. While breadth is encouraged, areas of special interest and research include rural social change, community structure, population, rural community development, the structure of agriculture, natural resources, and the environment.

Admission Requirements
Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Prerequisites for the master's program include 3 credits in rural sociology or sociology, and additional credits in either field. If the entering student does not have these prerequisites, they must be made up at the University during the early part of the master's program.

Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Degree Requirements
All students are required to have training in sociological theory, statistics, and research methods.

There is no foreign language requirement for the Ph.D. degree; the student is expected to substitute such courses and instruction necessary to generate superior capabilities of inquiry into an analysis of basic and/or applied rural sociological problems.

Student Aid
Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

RURAL SOCIOLOGY (R SOC) course list

Dual-Title Degree in Rural Sociology (R SOC) and International Agriculture and Development (INTAD)
Graduate students with research and educational experiences in rural sociology may apply to the Rural Sociology/INTAD Dual-Title Master's Degree Program.

The goal of the dual-title degree program is to enable graduate students from R SOC to acquire the knowledge and skills of their major area of specialization in R SOC, while at the same time gaining the perspective and methods needed to work internationally. Graduate study in this program seeks to prepare students to assume leadership roles in professions in international agriculture and development requiring state-of-the-art methodological training, as well as of conceptual expertise in rural sociology and in one or more of R SOC's four signature areas: (1) agriculture and food systems, (2) community and international development, (3) natural resources and environment, (4) rural social demography.

This dual-title graduate degree program does not duplicate any other degree program at the University.

Degree Requirements
To qualify for a dual-title degree, students must satisfy the requirements of the Rural Sociology program in which they are primarily enrolled. In addition, they must satisfy the requirements described below, determined by the student, their INTAD advisor, and their Rural Sociology program advisor.

Degree Requirements for R SOC/INTAD Dual Title M.S.
The Master's in Rural Sociology and INTAD is a dual-title degree awarded to students who are admitted to the Rural Sociology master's program and admitted to the dual-title degree in INTAD. In addition to the requirements of the Rural Sociology degree, dual-title degree students must:

Courses
Complete a minimum of 12 INTAD course credits (400, 500, or 800 level) as follows:

9 credits from the core curriculum:

The Pennsylvania State University
3 credits of internship or applied courses/ independent studies with international development content

**Master's Thesis & Final Oral Examination**

Write a master's thesis on a topic that reflects both the graduate program in Rural Sociology and the dual-title offering in INTAD.

All members of the student's committee for the dual-title master's degree will be members of the graduate faculty. The committee must include at least one graduate faculty member from INTAD. A Degree Committee form should be filed upon selection of the committee members and should be approved by the INTAD Academic Program Committee Co-chair.

Candidates for the dual-title master's degree in R SOC and INTAD will also be required to pass a masters' thesis defense covering the general field of Rural Sociology and INTAD, with emphasis on the student's area of specialization. The oral exam is to be administered by the student's thesis committee. A favorable vote of a two-thirds majority is necessary for passing.

Some courses may satisfy both the graduate major program requirements and those of the INTAD program. Students and advisors should maintain the INTAD Master's Degree Plan of Study, which must be submitted to the INTAD program office two months before the student files the "Intent to Graduate" via eLion.

**Degree Requirements for R SOC/INTAD Dual-Title Ph.D.**

The doctoral degree in R SOC and INTAD is a dual-title degree awarded only to students who are admitted to the R SOC doctoral program and admitted to the dual-title degree in INTAD. The minimum course requirements for the dual-title Ph.D. degree in R SOC and INTAD, in addition to the R SOC requirements, are as follows.

**Courses**

Students must complete a minimum of 18 INTAD course credits with study in the following categories:

- 9 credits from the core curriculum, which includes:
  - International Agricultural Development Seminar (INTAD 820, 3 credits)
  - International Rural Social Change (R SOC 517, 3 credits)
  - Sociology of Agriculture (R SOC 508, 3 credits)
  - OR
  - Human Dimensions of Natural Resources (R SOC 555, 3 credits)

- 9 credits from INTAD elective curriculum/courses with international development content/internships/independent study

Courses totaling a minimum of 18 credits must be taken at the 500-level or above; particular courses may satisfy both the R SOC requirements and those in the INTAD program. Final course selection is determined by the student in consultation with their INTAD advisors and their major program advisors. Students who already hold a master's degree from another institution may petition to have equivalent course credits accepted.

Graduates of the dual-title INTAD master's degree program who wish to pursue an INTAD doctoral degree must re-apply to the INTAD program for admission. INTAD master's degree credits may be carried over to the doctoral program. Six additional INTAD credits will be required. INTAD master's degree graduates who pursue an INTAD Ph.D. are required to take the INTAD 820 International Agricultural Development Seminar a second time.

**Candidacy**

Candidacy procedures will be based on the procedures of the major department and will have an international dimension. Although not encouraged, the dual-title degree student may require an additional semester or more to fulfill requirements for the dual-title degree program. Therefore, under exceptional circumstances, the candidacy exam may be delayed at the discretion of the student advisor in consultation with the INTAD program coordinators.

**Committee Composition**

The doctoral committee of a Ph.D. dual-title degree student must include a minimum of four faculty members, i.e., the chair and at least three additional members, all of whom must be members of the Graduate Faculty; and the committee must include at least one representative from the INTAD Program faculty. The chair of the committee can be a member of both the Major Program and the INTAD Program faculty. If the chair is not an INTAD Program faculty member, the INTAD representative must be the co-chair of the committee. An official "outside member" also must be appointed to the committee.

**Comprehensive Exam**

Each Ph.D. candidate must pass a comprehensive (combined written and oral) examination in rural sociology, research methods and statistics, and two or more chosen areas of specialization. It is expected that one of these areas will be INTAD. A separate comprehensive examination is not required by the INTAD program, but the INTAD representative on the student’s doctoral committee must have input into the development of and participate in the evaluation of the comprehensive examination.

**Doctoral Thesis & Final Oral Examination**

Ph.D. students enrolled in the dual-title degree program are required to write a doctoral thesis on a topic that reflects their original research and education in both Rural Sociology and International Agriculture and Development. The dissertation should contribute to the body of knowledge in international agriculture. Upon completion of the student’s doctoral thesis, a final oral examination is scheduled. The exam is administered by the student’s doctoral committee and focuses on the student’s thesis research. A public oral presentation of the dissertation is also required.

**Courses**

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400-499 may be used to meet some graduate degree requirements when taken by graduate students but courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up for deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

GARRY CHICK, Department Head, Recreation, Park, and Tourism Management
DEBORAH KERSTETTER, Professor-in-Charge
201C Mather Building
814-863-8983
debk@psu.edu

Degrees Conferred:
Ph.D., M.S.

The Graduate Faculty

- Christine Buzinde, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of Recreation, Park, and Tourism Management
- Linda L. Caldwell, Ph.D. (Maryland) Professor of Recreation, Park, and Tourism Management
- Garry Chick, Ph.D. (Pittsburgh) Professor of Recreation, Park, and Tourism Management
- John Dattilo, Ph.D. (Illinois, Urbana-Champaign) Professor of Recreation, Park, and Tourism Management
- Shawna Doerksen, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of Recreation, Park, and Tourism Management
- Alan R. Graefe, Ph.D. (Texas A&M) Associate Professor of Recreation, Park, and Tourism Management
- Ben D. Hickerson, Ph.D. (North Carolina State) Assistant Professor of Recreation, Park, and Tourism Management
- Deborah L. Kerstetter, Ph.D. (Penn State), Professor of Recreation, Park, and Tourism Management
- Andrew J. Mowen, Ph.D. (Penn State), Associate Professor of Recreation, Park, and Tourism Management
- George Vahovjak, Ph.D. (Penn State) Affiliate Associate Professor of Recreation, Park, and Tourism Management; Program Director, Shaver's Creek Center
- Careen Yarnal, Ph.D. (Penn State), Associate Professor of Recreation, Park, and Tourism Management
- Harry C. Zinn, Ph.D. (Colorado State), Associate Professor of Recreation, Park, and Tourism Management

The graduate program is designed to prepare students for administrative, supervisory, research, and teaching positions in public and private recreation and park systems, in colleges and universities, in voluntary agencies and institutions, and in commercial ventures.

The program is oriented to meet the specific needs and research interests of the candidate. Students may pursue interests in the community, including public park and recreation systems, voluntary agencies, and private commercial enterprises; tourism; institution and community-oriented therapeutic settings concerned with many different disabilities and utilizing a variety of activity modalities; park planning, resource management, interpretive services, outdoor education, and outdoor recreation services.

Admission Requirements

Scores from the Graduate Record Examination (GRE) are required for admission to the master's and doctoral programs. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

For admission to the graduate program, a bachelor's or master's degree is required. Candidates from majors other than recreation and parks are welcome to apply; however, additional coursework is required. Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. All students must write a thesis.

Degree Requirements

The master's program is designed for students who wish to continue their studies at the doctoral level at Penn State. Students who wish to pursue a Ph.D. degree but do not have an M.S. degree will complete a thesis and earn a master's degree in the process of working toward the doctorate.

The M.S. program requires a minimum of 30 graduate credits and a 3.00 (B) grade-point average for graduation. The master's degree must be completed within eight years from matriculation as a degree candidate.

The doctoral program builds on the master's program to achieve depth in scholarship and research. Students who have not completed a data-based thesis as part of their master's degree will be required to do so during the first three semesters as a doctoral student. The general requirements of the degree, sequentially, are (1) course work, (2) candidacy examination by the third semester,* (3) comprehensive examination (written and oral), (4) thesis proposal presentation, and (5) final defense of thesis. Between the candidacy examination and completion of the degree program, a Ph.D. candidate must have attended Penn State in residence a minimum of two semesters over a twelve-month period. (This may include the semester in which the candidacy exam is taken.) Students have a limit of eight years after candidacy to complete the doctoral program. A 3.00 (B) average is required for graduation.

Prerequisites for graduate students who do not have an undergraduate degree in RPTM typically range from 3 to 9 credits, depending on the student's background and experience. Prerequisites for incoming graduate students with undergraduate majors in RPTM range from 0 to 6 credits. Incoming graduate students with undergraduate degrees in Recreation, Park, and Tourism Management from Penn State are assumed to have met all prerequisite requirements. The graduate program director determines prerequisites for all incoming students.

*The master's thesis and oral defense may be used for the candidacy examination for continuing students.

Student Aid

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

RECREATION, PARK AND TOURISM MANAGEMENT (RPTM) course list

DATE LAST REVIEWED BY THE GRADUATE SCHOOL: 5/21/04

Blue Sheet Item #: 35-07-448
Review Date: 6/12/07
Last updated by Publications: 10/12/10

The Pennsylvania State University
Degree Conferred:
M.A. in Russian and Comparative Literature

The Department of Germanic and Slavic Languages and Literatures and the Department of Comparative Literature offer a joint master's degree in Russian and Comparative Literature. The program enables students to concentrate in Russian literature at the graduate level while having the advantages of a comparative context. Students completing this M.A. will acquire an in-depth understanding of Russian literature and culture and will be proficient in Russian and one other foreign language. Graduates should be prepared for service with the U.S. government or an international corporation, or to continue graduate study either in Russian or comparative literature.

Admission Requirements
Requirements listed here are in addition to the general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin. Students with appropriate course backgrounds and a 3.00 junior/senior average (on a 4.00 scale) will be considered for admission. Scores from the Graduate Record Examination (GRE) are required. It is expected that students entering this degree program will have proficiency in Russian language and will have completed the B.A. in Russian or Comparative Literature. Students in other humanistic fields such as philosophy or history who have studied some literature and are proficient in Russian are welcome to apply.

Master's Degree Requirements
Candidates for the M.A. degree must earn a minimum of 33 credits of which at least 18 must be at the 500 level. Required courses in Russian include RUS 530 (Seminar in Nineteenth-Century Russian Literature), RUS 525 (Pushkin), and RUS 560 (History of the Russian Language) or RUS 542 (Seminar in Russian Literature in the Twentieth Century) plus an additional 6 credits. Required courses in comparative literature include CMLIT 501 plus an additional 12 credits in comparative literature. Also required are an additional 3 credits in Russian, comparative literature, or another approved area; passing of a proficiency examination in Russian; demonstration of reading knowledge of one other foreign language; and the completion of an acceptable M.A. paper.

Student Aid
A number of teaching assistantships are available in the Departments of Comparative Literature and Germanic and Slavic Languages and Literatures for students taking advanced degrees in these disciplines. There is also a graduate assistant position for an editorial assistant. See also the fellowships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the Graduate Bulletin.

Degrees Conferred:
Ph.D., M.S., M.Ed.

The Graduate Faculty
- Teresa Clark, Ph.D. (Michigan State) Assistant Professor of Education
- James C. DiPerna, Ph.D. (Wisconsin) Associate Professor of Education
- Robert L. Hale, Ph.D. (Nebraska) Professor of Education
- Ronald A. Madle, Ph.D. (Penn State) Adjunct Associate Professor of Education
- Diane K. McLaughlin, Ph.D. (Penn State) Professor of Rural Sociology and Demography
- Bonnie J. F. Meyer, Ph.D. (Cornell) Professor of Educational Psychology
- Barbara A. Schaefer, Ph.D. (Pennsylvania) Associate Professor of Education
- Beverly J. Vandiver, Ph.D. (Ball State) Associate Professor of Education
- Shirley A. Woika, Ph.D. (Penn State) Assistant Professor of Education

This intercollege program is based primarily on courses in educational psychology, psychology, and special education. In addition, courses are often drawn from counselor education, human development and family studies, educational theory and policy, educational administration, and curriculum and instruction. The objective is to develop a psychologist capable of providing health care who is interested in and knowledgeable about education and psychology in the school setting. The school psychologist must utilize professional skill and knowledge about children and youth to make contributions that are meaningful to and utilized by teachers, other school personnel, and parents. The development of competencies needed by a fully qualified school psychologist requires at least the education needed by a doctoral degree.

Practicum facilities, in addition to those in nearby public schools, include the Center for Educational Diagnosis and Remediation, the School Psychology Clinic, the Communication Disorders Clinic, the Reading Center, and the Psychology Clinic. Facilities for work with children are also available through other academic units, as well as through assistantship assignments.

Admission Requirements
Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Only those students who anticipate a doctoral degree will be admitted. Students are selected within the limitations of program facilities. Priority is given to applicants with work experience with children.

An undergraduate major emphasizing work in psychology and/or education is preferred, but students with fewer than 20 upper-division credits in psychology, educational psychology, or special education may be admitted with limited deficiencies to be fulfilled concurrently with their graduate work. Requirements for admission include a minimum of one-third of graduate credits of A quality; undergraduate GPA of B or higher; satisfactory recommendations from two or more professors, preferably psychologists; and a score of 1000 or higher on the two general sections or a score of 1500 or higher, including the analytical or an advanced test, of the Graduate Record Examination. Exceptions may be made for students with special backgrounds, abilities, and interests.

Master's Degree Requirements
Students entering the program with a bachelor's degree complete the M.S. as prescribed by the Graduate School.

Students qualifying for a certificate to practice in the schools must meet standards specified by the Pennsylvania Department of Education. These include, but are not limited to, a master's degree, about 60 graduate credits, practicum experiences, and successful completion of precertification tests.

Doctoral Degree Requirements
Students may be admitted with a master's degree from school psychology programs from other institutions or from related programs in this or other universities. The doctoral program includes a predissertation research requirement; the core program described here (which qualifies the candidate for a school psychology certificate); a special proficiency of 6 to 18 credits; an internship; and a dissertation.

Students completing the School Psychology Core Program will have courses in the biological bases of behavior, the cognitive bases of behavior, the social bases of behavior, personality theory or abnormal psychology, human development, professional ethics and standards, research design and methodology, statistics, psychometrics, counseling theory, educational foundations, educational administration, the education of exceptional children, and curriculum.

Other Relevant Information
The program has been accredited by the American Psychological Association, the National Commission for Accreditation in Teacher Education (NASP), and the Pennsylvania Department of Education.

Student Aid
Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

M.P.S., S.C.M.

The Graduate Faculty

- Norman A. Aggon, M.B.A. (James Madison) Instructor of Operations and Supply Chain Management; Assistant Department Chair
- Francis (Frank) L. Cheko, M.M.M. (Penn State) Instructor of Operations and Supply Chain Management
- Gary L. Gittings, Ph.D. (Penn State) Instructor of Supply Chain Management
- Daniel Guide, Ph.D. (Georgia) Associate Professor of Operations and Supply Chain Management
- Terry P. Harrison, Ph.D. (Tennessee) Professor of Supply Chain and Information Systems
- C. Jeff Langley, Ph.D. (Penn State) Clinical Professor of Supply Chain Management
- Douglas J. Thoma,s Ph.D. (Georgia Tech) Associate Professor of Supply Chain Management
- Evelyn A. Thomchick, Ph.D. (Clemson) Associate Professor of Supply Chain Management
- John E. Tyworth, Ph.D. (Oregon) Professor of Supply Chain Management

The Master of Professional Studies in Supply Chain Management (MPS/SCM) is awarded to students who demonstrate mastery of the knowledge, problem-solving competencies, and leadership skills that are critical to leading business transformation through integrated supply chain planning and execution. The program emphasizes problem-based learning coupled with integrative, collaborative learning experiences to develop the requisite knowledge, skills, and abilities for effective supply chain management. Instruction is delivered on line and in a short course at an on- or off-campus location, so that working professionals will complete the degree as part-time students working largely or entirely, off campus.

Admission Requirements

Students applying to the professional MPS/SCM degree program must be admitted by both the MPS/SCM program and the Graduate School at The Pennsylvania State University. The Graduate School requires applicants to have earned a baccalaureate degree from a regionally accredited institution earned under resident and credit conditions substantially equivalent to those required by Penn State. Applicants whose first language is not English or who have received a baccalaureate or master's degree from an institution in which the language of instruction is not English must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) module and submit the results of that test with the application for admission. The TOEFL test is offered in different formats depending on location. A score of at least 600 on the paper-based TOEFL or 250 on the computer-based TOEFL must be attained. A minimum total score of 80, along with a minimum score of 23 on the speaking portion, is required for the Internet-based test (iBT). Information about the TOEFL can be obtained by writing to the Educational Testing Service, Box 6155, Princeton, NJ 08541-6155 or visiting their web site at www.toefl.org. Alternatively, a minimum composite score of 6.5 on the IELTS test is required for admission. Information about the IELTS can be obtained by contacting IELTS International, 100 East Corson Street, Suite 200, Pasadena, CA 91103 or visiting its Web site at www.ielts.org.

Additionally, the graduate program in Supply Chain Management requires:
- A completed application for graduate study, including Graduate School application fee
- A current resume, along with a statement of professional experience and goals. This statement of approximately two pages must describe the applicant's professional goals, experience, and responsibilities. The statement must also indicate why the applicant is applying to the professional MPS/SCM program at Penn State
- One letter of recommendation relevant to the applicant's professional capabilities, such as preferably from the employee's immediate supervisor, which should address the applicant's readiness for graduate study
- Official transcripts from all completed graduate and undergraduate coursework
- An undergraduate GPA of at least 3.0, or grade average of "B" or better in graduate courses completed since the first bachelor's degree, with at least 6 credits of graduate courses completed to qualify under this option
- Official Graduate Management Admission Test scores reported directly from the testing center to Penn State

A committee consisting of three SC&IS Department faculty meet annually to review applications and identify applicants qualified for admission. Admissions decisions are based on a review of a complete admission portfolio, including an application, the statement of professional experience and goals, a current resume, official transcripts from the undergraduate and graduate institution attended, the letter of recommendation, and GMAT scores. An applicant's credentials are compared to the standards set by other candidates in the current application pool. Approved applicants are admitted in time for the fall semester offerings that begin in early August.

Degree Requirements

Students earn the professional MPS/SCM degree by successfully completing 30 graduate credits in supply chain management courses and a high-quality professional paper as a culminating experience. All MPS/SCM credits must be earned in courses at the 500 level or above, including at least 6 credits at the 500 level. The professional paper demonstrates the student's ability to apply advanced supply chain management knowledge to a supply chain-related problem or situation in a way that makes a substantial contribution to the student's professional development. The program requires a cumulative grade point average of at least 3.00 and no course grade below a C. All requirements for the professional MPS/SCM degree, including acceptance of the professional paper, must be met within four years of admission to degree status. Students are expected to make continuous progress toward the degree. Leaves of absence, however, may be granted under exceptional circumstances on a case-by-case basis.

A maximum of 10 credits of high-quality graduate work completed at other accredited institutions may be applied toward the requirements for the professional MPS/SCM degree. However, credits earned to complete a previously completed professional or academic postbaccalaureate degree, whether at Penn State or elsewhere, may not be applied to a second postbaccalaureate degree program at Penn State. Approval to apply any transferred credits toward a degree program must be granted by the student's academic adviser or program and the Graduate School. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School, must be of at least B quality (grades of B- are not transferable), and must appear on an official graduate transcript of an accredited university.

Prescribed Courses

SUPPLY CHAIN MANAGEMENT (SCM)

The Pennsylvania State University
Student Aid

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the Student Aid section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Michael H契chi, Ph.D. (Illinois) Distinguished Professor of Speech Communication, and Crime, Law, and Justice
- Julie Horney, Ph.D. (California, San Diego) Professor of Crime, Law, and Justice; Graduate Officer
- Craig Humphrey, Ph.D. (Brown) Professor Emeritus of Sociology
- John Iceland, Ph.D. (Brown) Professor of Sociology and Demography
- David R. Johnson, Ph.D. (Vanderbilt) Professor of Sociology, and Human Development and Family Studies; Director, Survey Research Center
- Kurt Johnson, Ph.D. (Nebraska Research Associate, Social Science Research Institute
- Michael P. Johnson, Ph.D. (Michigan) Professor Emeritus of Sociology, Women's Studies, and African and African American Studies
- Valerie King, Ph.D. (Pennsylvania) Associate Professor of Sociology, Demography, and Human Development and Family Studies
- John H. Kramer, Ph.D. (Iowa) Professor of Sociology, and Crime, Law, and Justice
- David Kreager, Ph.D. (Washington) Assistant Professor of Crime, Law, and Justice
- Nancy S. Landale, Ph.D. (Washington) Professor of Sociology and Demography
- Barrett A. Lee, Ph.D. (Washington) Professor of Sociology and Demography
- Donald MacKenzie, Ph.D. (Penn State) Professor of Crime, Law, and Justice
- Molly Martin, Ph.D. (Wisconsin) Assistant Professor of Sociology and Demography
- Michael Massoglia, Ph.D. (Minnesota) Assistant Professor of Crime, Law, and Justice
- Jennifer Mastrofski, Ph.D. (Penn State) Associate Professor of Administration of Justice
- Stephen Matthews, Ph.D. (Wales) Associate Professor of Sociology, Anthropology, and Demography
- John D. McCarthy, Ph.D. (Oregon) Professor of Sociology
- Hart Nelsen, Ph.D. (Vanderbilt) Professor Emeritus of Sociology
- R. Salvador Oropeza, Ph.D. (Washington) Professor of Sociology and Demography
- D. Wayne Osgood, Ph.D. (Colorado) Professor of Crime, Law, and Justice
- William Parmenter, Ph.D. (South Dakota) Professor Emeritus of Crime, Law, and Justice
- Evelyn Patterson, Ph.D. (Pennsylvania) Assistant Professor of Crime, Law, and Justice
- Richard Pellerlein, Ph.D. (North Carolina) Professor Emeritus of Sociology
- Eric Plutzer, Ph.D. (Washington) Associate Professor of Political Science and Sociology
- Suet Ling Pong, Ph.D. (Chicago) Associate Professor of Education and Sociology
- Richard Ritt, Ph.D. (Cornell) Professor Emeritus of Crime, Law, and Justice
- R. Barry Ruback, Ph.D. (Pittsburgh) Professor of Crime, Law, and Justice
- Eric Silver, Ph.D. (SUNY, Albany) Associate Professor of Crime, Law, and Justice
- Gilbert H契chi, Ph.D. (North Carolina) Professor of Human Development, Sociology, and Community Medicine
- Jeremy Staff, Ph.D. (Minnesota) Assistant Professor of Crime, Law, and Justice
- Darrel J. Steffensmeier, Ph.D. (Iowa) Professor of Sociology and Crime, Law, and Justice
- C. Shannon Stokes, Ph.D. (Kentucky) Professor of Rural Sociology, Sociology, and Demography
- Marylee C. Taylor, Ph.D. (Harvard) Associate Professor of Sociology
- George Theodorson, Ph.D. (Cornell) Professor Emeritus of Sociology
- Kevin J. A. Thomas, Ph.D. (Pennsylvania) Assistant Professor of African and African American Studies, Sociology, and Demography
- Jenny Trinitapoli (Texas) Assistant Professor of Sociology, Demography, and Religious Studies
- Jeffery T. Ulmer, Ph.D. (Penn State) Associate Professor of Crime, Law, and Justice
- Jennifer Van Hook, Ph.D. (Texas) Associate Professor of Sociology and Demography
- Edward Walsh, Ph.D. (Michigan) Professor Emeritus of Crime, Law, and Justice
- Susan Welch, Ph.D. (Illinois) Professor of Political Science and Crime, Law, and Justice

The Graduate program in Sociology offers advanced education for students who intend to pursue academic careers in sociology or who aspire to nonacademic research positions.

The M.A. and Ph.D. programs provide training in general social theory, research methodology, statistics, and a number of traditional and developing substantive specialties. In consultation with faculty advisers, students select two specialties that are among the department's strengths, such as classical and contemporary theory; community and environment; demography; family, life course, and aging; quantitative methods; social psychology; and stratification and social change.

Alternate specialty areas not listed above may be selected as the major or the minor, with the approval of the graduate committee. Students may elect to pursue a dual-title degree in Sociology and Demography, For details, refer to the Demography program description. A separate Ph.D. program in Crime, Law, and Justice is also housed within the department. Please see the CLJ program description for details.

All students who intend to pursue doctoral work are expected to earn an M.A. degree in their normal progress to the Ph.D.

Course work outside the department is encouraged. Areas of study related to sociology, such as rural sociology, geography, economics, business administration, statistics, cultural anthropology, political science, and human development and family studies are available at the University.

Special department-related research and training facilities include on-site computer laboratories and the Social Science Research Center, the Population Research Institute, the Center for Research on Crime and Justice, and the Pennsylvania Commission on Sentencing. Additional University facilities used by sociology faculty and graduate students include the Computation Center (containing information about the extensive databases provided through the Inter-University Consortium for Political and Social Research) and the Gerontology Center.

The Pennsylvania State University
Admission Requirements

Applications will be accepted through January 1 for fall admission the following year. Selection is based on undergraduate grades (and where applicable, record of previous graduate work); letters of recommendation; statement of purpose; a sample of written work, such as a term paper; and Graduate Record Examinations (GRE) verbal and quantitative scores. The best-qualified applicants will be accepted up to the number of spaces available. Students with limited prior training in sociology may be accepted, with the provision that they make up background deficiencies in the early part of their graduate program.

Degree Requirements

Required courses for the M.A. include a two-semester proseminar, one seminar each in research methods and social theory, and two seminars in social statistics. Students complete an M.A. thesis during their second year of the program.

A candidacy examination is required of all students seeking the Ph.D. This evaluation by the departmental Graduate Committee is based on the student's seminar papers, research proposal, and record of course performance and on faculty assessments of the student's ability to complete a high-quality Ph.D. program. For those admitted to the Ph.D. candidacy, a lab in teaching sociology is required, along with substantive courses in the student's major and minor areas of concentration. A comprehensive examination must be passed before the period of intensive dissertation research begins.

The Department of Sociology has no formal foreign language or communication requirement. However, students are encouraged to pursue additional training in statistics, computer science, foreign language, technical writing, specialized methods, or specialized theory that will further dissertation and career plans.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the Graduate Bulletin, teaching assistantships support many students admitted to the program. Research assistantships also are available to qualified students through individual faculty members' grants and contracts. A number of federal agencies also offer fellowships for graduate study in sociology.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Jerzy Dec, Ph.D. (Warsaw, Poland) Research Associate
- Curtis J. Dell, Ph.D. (Kent State) Adjunct Assistant Professor of Soil Science
- Sjoerd W. Duiker, Ph.D. (Ohio State) Associate Professor of Soil Management and Applied Soil Physics
- W. D. E. Easterling, Ph.D. (UNC, Chapel Hill) Professor of Geography and Agronomy
- Daniel D. Fritton, Ph.D. (Iowa State) Professor of Soil Physics
- Peter J. A. Kleinman, Ph.D. (Cornell) Adjunct Assistant Professor of Soil Science
- Sridhar Komarneni, Ph.D. (Wisconsin) Professor of Clay Mineralogy
- Hangsheng Lin, Ph.D. (Texas A&M) Associate Professor of Hydropedology/Soil Hydrology
- Carmen Erin Martinez, Ph.D. (Rutgers) Assistant Professor of Environmental Soil Chemistry
- Andrew S. McNitt, Ph.D. (Penn State) Assistant Professor of Turfgrass Science
- Gary W. Petersen, Ph.D. (Wisconsin) Distinguished Professor of Soil and Land Resources
- Andrew S. Rogowski, Ph.D. (Iowa State) Adjunct Professor of Soil Physics
- Maxim J. Schlossberg, Ph.D. (Georgia) Assistant Professor of Turfgrass Nutrition and Soil Fertility
- Andrew N. Sharpley, Ph.D. (Massey, New Zealand) Adjunct Professor of Soil Science
- Richard C. Stehouwer, Ph.D. (Ohio State) Assistant Professor of Environmental Soil Science
- David M. Sylvis, Ph.D. (Cornell) Professor of Soil Microbiology
- John E. (Jack) Watson, Ph.D. (Arizona) Professor of Soil Science
- Ann M. Wolf, Ph.D. (Penn State) Affiliate Assistant Professor of Soil Science

The Soil Science program is administered in the Department of Crop and Soil Sciences, College of Agricultural Sciences. Each student will be associated with an advisor who serves as a research faculty advisor or office space. Applicants are encouraged to explore, study, and research opportunities by contacting faculty who may be prospective advisers.

This program provides opportunities for candidates interested in soil and related water resources to become a professional leader and an independent scholar. Faculty in this program are competent to prepare candidates in the subfields of Soil Science including: soil genesis, soil classification, soil morphology, soil mapping, soil physics, soil chemistry, soil mineralogy, soil microbiology, soil fertility, soil conservation, geographic information systems, computer mapping, watershed analysis, soil hydrology, soil and water management, resource inventory and assessment, remote sensing, land evaluation, land waste disposal, and land management.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination, are required for admission. At the discretion of the graduate standards committee, a student may be admitted provisionally for graduate study in the program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Prequisites for major work in Soil Science vary with the area of specialization and the degree sought, but courses in chemistry, mathematics, physics, geology, basic and applied biological sciences, and English communication skills are required. Applicants for the M.S. degree should have a baccalaureate degree including 76 credits of basic and applied natural sciences. Admission to the Ph.D. program usually requires an M.S. or equivalent degree with a minimum cumulative grade-point average of 3.25 (on a 4.00 scale). Applicants for the Ph.D. program will be evaluated on the quality of work completed in all previous degree programs. Students who lack some of the prerequisite courses may be admitted but are required to take these courses without degree credit. The best-qualified applicants will be accepted up to the number of spaces available for new students.

Master's Degree Requirements

In addition to the general requirements for the M.S. degree as defined by the Graduate School, the department requires 12 credits of 400- or 500-level formal courses in the major field of which 6 must be 500-level. Participation in at least one colloquium course each semester is required and students must complete at least 1 credit of colloquium (SOILS 590), as well as 1 credit of Teaching Experience (SOILS 602). An advisory committee will be appointed for each student and additional courses and requirements may be determined by this advisory committee.

A thesis based on field or laboratory research is required for the M.S. degree. M.S. candidates must pass a final examination.

Doctoral Degree Requirements

Beyond the general requirements for the Ph.D. defined by the Graduate School, the department has a number of specific requirements regarding course level and distribution that are defined in the departmental publication "Graduate Degrees in Soil Science." While a minimum number of courses for the degree is not specified, the doctoral advisory committee has the responsibility of specifying courses and credits essential for the education and development of the candidate. Students are expected to be educated in depth in a specific subfield of Soil Science and to have a perspective of the general field. Normally, 55 to 60 credits in formal course work beyond the B.S. degree are required.

Doctoral candidates are required to participate regularly in a departmental colloquium and to register for at least 2 credits of Colloquium (SOILS 590) during the Ph.D. program. A teaching experience, consisting of two separate semesters, is also required of all Ph.D. students.

The communication and foreign language requirement for the Ph.D. degree may be met either by demonstrating a knowledge of at least one foreign language or by taking 6 credits of course work in an area of English communications approved by the student's advisory committee.

Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Students in the Biogeochemistry Dual Title program are required to have two advisers from separate disciplines: one individual serving as a primary adviser in their major degree program and a secondary adviser in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework from an approved list of courses is required. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. A single candidacy examination that includes biogeochemistry will be administered for admission into the student's Ph.D. program, as well as the biogeochemistry dual-title. The structure and timing of this exam will be determined jointly by the dual-title and major program. The
student’s doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Other Relevant Information

Every student has a close professional relationship with his or her faculty adviser. While research that is done for the thesis will be on subjects that fall within the ongoing research program of the adviser, students are encouraged to propose research projects that are of interest to them. For the most part, all costs relative to the research program will be covered by the department. The department encourages professional development of students through participation in meetings of relevant professional societies and organizations.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:
Ph.D., M.A.
Dual-Title Graduate Degree in Spanish and Language Science

The Graduate Faculty
- Mary E. Barnard, Ph.D. (Michigan) Associate Professor of Spanish and Comparative Literature
- William R. Blue, Ph.D. (Penn State) Professor of Spanish
- Paola G. Dussias, Ph.D. (Arizona) Associate Professor of Spanish, Linguistics, and Psychology
- Nicolas Fernandez-Medina, Ph.D. (Stanford) Assistant Professor of Spanish
- Henry J. Gerfen, Ph.D. (Arizona) Associate Professor of Linguistics and Spanish Linguistics
- Marie Speicher, Ph.D. (Penn State) Senior Lecturer in Spanish
- Julia Cuervo Hewitt, Ph.D. (Vanderbilt) Associate Professor of Spanish and Portuguese
- James P. Lantolf, Ph.D. (Penn State) Professor of Spanish and Applied Linguistics
- John M. Lipski, Ph.D. (Alberta) Edwin Erle Sparks Professor of Spanish
- Matthew Marr, Ph.D. (Virginia) Assistant Professor of Spanish
- Guadalupe Marti-Perla, Ph.D. (Washington) Assistant Professor of Spanish
- Sophia McClennen, Ph.D. (Duke) Associate Professor of Comparative Literature, Spanish, and Women's Studies
- John Ochoa, Ph.D. (Yale) Associate Professor of Spanish and Comparative Literature
- Laurence E. Prescott, Ph.D. (Indiana) Associate Professor of Spanish and African/African American Studies
- Sherry Roush, Ph.D. (Yale) Associate Professor of Italian
- Nuria Sagarrà, Ph.D. (Illinois) Assistant Professor of Spanish and Applied Linguistics
- Maria R. Truglio, Ph.D. (Yale) Associate Professor of Italian

The program offers M.A. options in literature and linguistics, as well as doctoral emphasis in either of these two areas.

Admission Requirements
Scores from the Graduate Record Examinations (GRE) are required of all students educated (high school and college) in the continental United States. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

The minimum requirement for admission normally will be 24 credits of post intermediate work in Spanish language and literature. Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Degree Requirements
A candidate for the M.A. degree must take a minimum of 30 credits at the graduate level including 6 credits in a related minor field. An M.A. essay and a comprehensive written examination also are required. The M.A. degree (or equivalent) is normally a prerequisite to doctoral candidacy.

For the Ph.D. degree, a student must complete at least 60 credits (including M.A. credits) of graduate-level work, including a 15-credit minor. Other requirements include (1) a doctoral candidacy examination and written area examinations; (2) reading knowledge of two foreign languages or a comprehensive knowledge of one foreign language; and (3) a doctoral dissertation.

Dual-Title Graduate Degree in Spanish and Language Science
Graduate students with research and educational interests in Spanish may apply to the Spanish and Language Science Dual-Title Degree Program. The goal of the dual-title Spanish and Language Science is to enable graduate students from Spanish to acquire the knowledge and skills of their major area of specialization in Linguistics while at the same time gaining depth and methodological expertise in the areas associated with the language sciences.

Admission Requirements
To pursue a dual-title degree under this program, the student must first apply to the Graduate School and be admitted through the Department of Spanish, Italian and Portuguese (see above for admission requirements for the Graduate Program in Spanish). Upon admission to the Spanish Program and with a recommendation from a Language Science program faculty member in the Department of Spanish, Italian and Portuguese, the student’s application will be forwarded to a committee that will include the Director of the Linguistics Program, one of the Co-Directors of the Center for Language Science, and a third elected faculty member within the Center for Language Science. All three committee members will be affiliated with the Program in Linguistics. Upon the recommendation of this committee, the student will be admitted to the dual-title degree program in Language Science.

Requirements for the Dual-Title Ph.D. Degree in Spanish and Language Science
The doctoral degree in Spanish and Language Science is awarded only to students who are admitted to the Spanish doctoral program and admitted to the dual-title degree in Language Science. The minimum course requirements for the dual-title Ph.D. degree in the Spanish and Language Science, in addition to the Spanish Program requirements, are described below.

Spanish/Language Science Proposed Requirements
Total number of required credits: 60
The minimum course requirements for the dual-title Ph.D. degree in Spanish and Language Science, in addition to the Spanish Program requirements, are as follows:
- Language Science proseminar courses (LING 521 and LING 522; 6 credits)
- Research Methods/Statistics (LING 525 or equivalent; 3 credits)
- Theoretical Linguistics (LING 500 or LING 504; 3 credits)
- Cognitive Neuroscience or Psycholinguistics (LING/PSY 520, PSY 511 or equivalent; 3 credits)
- Research internships with two different Language Science faculty mentors (CSD 596, GER 596, LING 596, PSY 596, SPAN 596; 6 credits)

Particular courses may satisfy both the Spanish requirements and those in the Language Science program. Final course selection is determined by the student in consultation with the dual-title program advisors and the major program advisors. Students who already hold a master’s degree from another institution may petition to have equivalent course credits accepted.

The Pennsylvania State University
Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the Student Aid section of the Graduate Bulletin, the following awards typically have been available to graduate students in this program:

The department awards annually an Edwin Erle Sparks Fellowship in the Humanities. In the past several years, graduate students have received external NSF fellowships and awards such as Doctoral Dissertation Research Improvement grants.

Courses

*SPAN 001G. ELEMENTARY SPANISH FOR GRADUATE STUDENTS (3)
*SPAN 002G. ELEMENTARY SPANISH FOR GRADUATE STUDENTS (3)

*No graduate credit given for this course.

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Communication Arts and Sciences (CAS)

The Graduate Faculty

- Deborah F. Atwater, Ph.D. (SUNY, Buffalo) Associate Professor Emerita of Communication Arts and Sciences, and African and African American Studies
- Thomas W. Benson, Ph.D. (Cornell) Edwin Erle Sparks Professor of Rhetoric
- Stephen H. Browne, Ph.D. (Wisconsin) Professor of Communication Arts and Sciences
- J. Louis Campbell III, Ph.D. (Minnesota) Associate Professor of Speech Communication
- James P. Dillard, Ph.D. (Michigan State) Professor of Communication Arts and Sciences
- Rosa Eberly, Ph.D. (Penn State) Associate Professor of Communication Arts and Sciences, and English
- Jeremy Engels, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of Communication Arts and Sciences
- Dennis S. Gouran, Ph.D. (Iowa) Professor of Communication Arts and Sciences, and Labor Studies and Industrial Relations
- Michael L. Hecht, Ph.D. (Illinois) Professor of Communication Arts and Sciences, and Crime, Law, and Justice
- J. Michael Hogan, Ph.D. (Wisconsin) Professor of Communication Arts and Sciences
- Lisa S. Hogan, Ph.D. (Indiana) Lecturer in Communication Arts and Sciences, and Women's Studies
- Christopher L. Johnstone, Ph.D. (Wisconsin) Associate Professor of Communication Arts and Sciences
- Tony M. Lentz, Ph.D. (Michigan) Assistant Professor of Communication Arts and Sciences
- Wayne J. McKenney, Ph.D. (Penn State) Associate Professor of Communication Arts and Sciences
- Michelle Miller-Day, Ph.D. (Arizona State) Associate Professor of Communication Arts and Sciences
- Mary K. Min, Ph.D. (Penn State) Associate Professor of Communication Arts and Sciences
- Jon F. Nussbaum, Ph.D. (Purdue) Professor of Communication Arts and Sciences
- Mary Beth Oliver, Ph.D. (Wisconsin) Professor of Communications, and Communication Arts and Sciences
- Roxanne L. Parrott, Ph.D. (Arizona) Professor of Communication Arts and Sciences
- Rachel A. Smith, Ph.D. (Michigan State) Assistant Professor of Communication Arts and Sciences
- Denise Solomon, Ph.D. (Northwestern) Professor of Communication Arts and Sciences
- Judith L. Stephens, Ph.D. (Ohio State) Professor of Humanities and Theatre
- S. Shyam Sundar, Ph.D. (Stanford) Distinguished Professor of Communications, and Communication Arts and Sciences
- Jane Sutton, Ph.D. (Colorado) Associate Professor of Communication Arts and Sciences
- Molly Wertheimer, Ph.D. (Penn State) Professor of Communication Arts and Sciences
- Nancy J. Wyatt, Ph.D. (Penn State) Associate Professor Emerita of Communication Arts and Sciences, and Women's Studies

Students may specialize in communication theory (communication sciences) or rhetoric (communication arts).

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

The minimum undergraduate preparation is 12 credits in communication studies/speech communication. Students who cannot meet this requirement in full may be admitted but must make up their deficiencies without credit toward the graduate degree.

Additionally, students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. A student must have completed the master's degree before being admitted as a doctoral candidate.

Master's Degree Requirements

Students pursuing the M.A. degree in Communication Arts and Sciences must schedule a review of their program of courses during the first year of residence and receive approval by a duly constituted advisory committee. A total of 30 credits, including 6 for the master's thesis and at least 12 other 500-level credits, is required. Candidates must schedule a proposal meeting in which their research plan for their thesis is approved by their committee. They are also required to present an oral defense before their committee.

Although typically discouraged, students in unique circumstances may apply to complete a nonthesis track. Students must apply in advance for acceptance in the nonthesis track and additional course credits will be required, among other differences from the thesis track.

Doctoral Degree Requirements

The communication and foreign language requirement for the Ph.D. degree may be satisfied by options selected from designated areas including, but not restricted to, foreign languages. Doctoral candidates must schedule a candidacy evaluation during their first year. Following completion of the language requirement and all courses from the program of study, doctoral candidates must take a comprehensive examination to determine their mastery and competence in the discipline of communication. After successful completion of the written and oral component of the comprehensive exam, doctoral candidates must schedule a proposal meeting at which the research plan for their dissertation is approved by their committee. Doctoral candidates must present a final oral defense of their dissertation before their committee.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the Graduate Bulletin, the following awards typically have been available to graduate students in this program:

EDWIN ERLE SPARKS FELLOWSHIPS IN THE HUMANITIES (6)

Available to beginning and continuing graduate students in one of the following graduate programs: Communication Arts and Sciences, Comparative Literature, English, French, German, History, Linguistics, Philosophy, and Spanish; stipend $15,340 plus waiver of tuition. Apply to department before February 1.

Dual-Title Ph.D. in Bioethics (BIOET)

Degree Conferrers Students electing to pursue this program will earn a degree with a dual-title at the Ph.D. level, i.e. Ph.D. in CAS and Bioethics.

Admission Requirements

The Pennsylvania State University
Graduate Bulletin Archive - 2012 2011 - 2012

Dual-title bioethics graduate students will first be admitted to their primary programs in accordance with the requirements stipulated by the Graduate School and the primary program. They will then be admitted to graduate study in the Bioethics program by an admissions committee consisting of faculty affiliated with the Bioethics program. Applicants should have a junior/senior cumulative average of at least 3.0 (on a 4.0 scale) and an appropriate background in undergraduate coursework. Prospective dual-title students will write a statement of purpose that addresses the ways in which their research and professional goals reflect an interest in interdisciplinary bioethics research. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the CAS program in which they are primarily enrolled. In addition, they must satisfy the requirements described below, as established by the Bioethics program committee. Within this framework, final course selection is determined by the student, their CAS and Bioethics advisors.

Additional Required Coursework

Seven required credits (BIOET 501, BIOET 502, and BIOET 590). At least three additional BIOET credits at the 500 level.

Eight additional credits from a list of approved electives at the 400 and 500 level, with at least two credits at the 500 level.

Courses Available to Fulfill Requirements

BIOETHICS Courses (BIOET)

501. PERSPECTIVES AND METHODS IN BIOETHICS (3)
502. PERSPECTIVES IN MACRO-BIOETHICS (3)
503. ETHICS AND THE RESPONSIBLE CONDUCT OF BIOMEDICAL RESEARCH (3)
590. BIOETICS COLLOQUIUM (1)
594. RESEARCH TOPOGRAPHY (1-15)
595. INTERNSHIP (1-3)
596. INDEPENDENT STUDY (1-9)
597. SPECIAL TOPICS IN BIOETICS (1-9)

Elective Courses

The list of elective courses will be maintained by the Director of the Bioethics Graduate Program in consultation with the Bioethics Program Committee. The list currently includes the following courses:

ANTH/Biol 460 HUMAN GENETICS (3)
ANTH/Biol 460H HUMAN GENETICS (4)
ANTH 471H BIOLOGY, EVOLUTION AND SOCIETY (3)
BB H 501 BIOMEDICAL SYSTEMS IN HEALTH AND DEVELOPMENT: THEORY AND PROCESSES (3)
BB H 504 BEHAVIORAL HEALTH INTEVENTION STRATEGIES (3)
BB H 551 WORLD HEALTH PROMOTION (3)
BMH 490 BIOETHICS AND MEDICAL HUMANITIES CAPSTONE (3)
BMIMB 500 ETHICS IN BIOMEDICAL SCIENCE (1)
CAS 453 HEALTH COMMUNICATION THEORY AND RESEARCH (3)
CAS 557 HEALTH COMMUNICATION (3)
CAS 562 QUALITATIVE METHODS (3)
FRNRC 561 ETHICS IN FORENSIC SCIENCE (1)
H ADM 539 HEALTH SYSTEMS ORGANIZATION (3)
H ADM 540 HEALTH ADMINISTRATIVE POLICY FORMULATION (3)
H ADM 541 HEALTH ECONOMICS AND POLICY (3)
H ADM 542 HEALTH CARE POLITICS AND POLICY (3)
H ADM 543 LONG-TERM CARE ADMINISTRATION AND POLICY (3)
H ADM 551 HEALTH CARE LAW (3)
H P A 401 (IL) COMPARATIVE HEALTH SYSTEMS (3)
H P A 510 HEALTH SERVICES FINANCING AND POLICY (3)
H P A 511 RESEARCH SEMINAR ON HEALTH SERVICES FINANCING AND POLICY (3)
H P A 520 INTRODUCTION TO HEALTH SERVICES ORGANIZATION AND DELIVERY (3)
H P A 521 RESEARCH SEMINAR ON HEALTH SERVICES ORGANIZATION AND DELIVERY (3)
H P A 540 EPIDEMIOLOGICAL APPLICATIONS IN HEALTH SERVICES RESEARCH (3)
H P A 541 POVERTY, RACE, ETHNICITY AND CHILD HEALTH (3)
H P A 545 INTRODUCTION TO HEALTH ECONOMICS (3)
H P A 822 CLINICAL ISSUES FOR HEALTH SERVICES MANAGEMENT (3)
H P A 856 HEALTH LAW (3)
HLHED 516 EVALUATION OF HEALTH EDUCATION AND PROMOTION PROGRAMS (3)
HLHED 582 CURRENT HEALTH EDUCATION ISSUES (3)
HLHED 553 MULTICULTURAL HEALTH ISSUES (3)
IBIOS 591 ETHICS IN THE LIFE SCIENCES (1)
NURS 464 (US/IL) DYING AND DEATH (3)
NURS 501 ISSUES IN NURSING AND HEALTH CARE (3)
NURS 580 EPISTEMOLOGY OF NURSING SCIENCE (3)
NURS 591 DEVELOPING THEORETICAL CONSTRUCTS RELEVANT TO NURSING (3)
NURS 597 ETHICS IN NURSING RESEARCH (1)
NURS/T S 430 (IL) GLOBAL FOOD STRATEGIES: PROBLEMS AND PROSPECTS FOR REDUCING WORLD HUNGER (3)
PHIL 403 ENVIRONMENTAL ETHICS (3)
PHIL 418 ETHICS (3)
PHIL/STS 432: MEDICAL AND HEALTH CARE ETHICS (3)
PHS 570 HEALTH ECONOMICS AND ECONOMIC EVALUATION (3)
S T S 555 HUMAN DIMENSIONS OF NATURAL RESOURCES (3)
S T S 589 ETHICS AND VALUES IN SCIENCE AND TECHNOLOGY (3)
WNNST/BB H 458: CRITICAL ISSUES IN REPRODUCTION (3)

Candidacy

In order to be admitted to doctoral candidacy in the dual-title degree program, students must meet the Ph.D. candidacy requirements specified by the CAS program. During the candidacy process, the student will also be assessed for candidacy to the Bioethics program, and at least one member of the candidacy committee must come from the Bioethics program. Faculty members who hold appointments in both programs may serve in a combined role.

Committee Composition

In accordance with the Graduate Council’s requirements, the doctoral committee shall contain at least four members. At least one of the committee members must be a faculty-member affiliated with the Bioethics Program, but graduate students are encouraged to have a second committee member so qualified. Faculty members who hold appointments in both programs may serve in a combined role. If the committee chair does not serve in this combined role, the faculty member representing the Bioethics Program must be designated as co-chair of the committee. The Bioethics program representative(s) will be expected to participate in constructing and grading comprehensive examination questions that cover the secondary area of study. The outside member will be appointed in accordance with the Graduate School’s Graduate Student Committee Procedures. The Graduate Council’s current policy is that the Outside Member cannot have more than a 25% budgetary connection with either the graduate major program or the dual-title degree program.
Comprehensive Exam

The faculty member (or members) affiliated with the Bioethics Program will be responsible for administering a portion of the comprehensive exam that will require the student to demonstrate an understanding of various theoretical and methodological approaches to bioethics, and an ability to apply them to issues and problems (including, where appropriate, practical problems) in their primary field.

Dissertation and dissertation defense

A dissertation on a bioethics-related topic or with a substantial bioethics component is required of students in the dual-title Ph.D. program. The bioethics-related topic of the dissertation or the bioethics component will be approved by the student's committee.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

COMMUNICATION ARTS AND SCIENCES (CAS) course list

Last updated by Publications: 8/20/09
Special Education (SPLED)

Admission Requirements

Scores from the Graduate Record Examinations (GRE) (verbal and quantitative) are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the General Information section of the Graduate Bulletin.

Highest admission priorities are given to applicants who possess certification in special education or early education. Applicants for master’s and doctoral programs must present evidence of superior academic achievement, complete a personal statement, present GRE verbal and quantitative test scores, and provide professional references. Minimum GPA for master’s and doctoral applicants are, respectively, 3.00 for M.Ed. and M.S., and 3.50 for Ph.D.

Minimum GRE test scores of master’s and doctoral applicants, respectively, are (verbal and quantitative combined): 800 for M.Ed., 900 for M.S., and 1000 for Ph.D.

Doctoral applicants for doctoral study must have had at least three years of relevant experience with special-needs children or youth. Applicants from foreign countries whose first language is not English must submit TOEFL (Test of English as a Foreign Language) scores. Exceptions to the admissions criteria may be made only for highly qualified students with special backgrounds, abilities, and interests.

Master’s Degree Requirements

Prerequisites for the M.Ed. program include 26 credits basic to the education of exceptional children (courses comparable to SPLED 401, SPLED 425, SPLED 454, and SPLED 495E). Of the 30 credits required for the M.Ed. degree, 6 must be taken from fields outside of special education; at least 18 must be taken in special education; and 18 credits must be taken at the 500 level. SPLED 411, SPLED 412, and SPLED 573 are required along with two practica: SPLED 595A and SPLED 595B. M.Ed. students must submit a master’s paper. M.Ed. students must submit a master’s paper and meet all of the eligibility criteria for Pennsylvania certification at the completion of their programs.

Of the 30 credits required for the M.S. degree, 6 must be taken from one discipline outside of education; 18 must be taken in special education; and 18 must be taken at the 500 level or above. SPLED 573 and EDPSY 400 are required as are 6 credits of thesis research, SPLED 600. M.S. students must submit a master’s thesis and pass a comprehensive examination.

All requirements for either the M.Ed. or the M.S. degree, whether satisfied on the University Park campus or elsewhere, must be met within six years or a period spanning seven consecutive summers.

Doctoral Degree Requirements

The communication and foreign language requirement for the Ph.D. degree is prescribed by each student’s committee. The requirements include the successful completion of a philosophy of science course (e.g., PHIL 421) and additional language and communication abilities such as foreign language competence, computer programming, expertise with alternative communication systems, research publication, etc. Minimum requirements for the Ph.D. degree include 24 credits of research methods, 18 credits of a cognate area such as psychology, sociology, or child development; and 36 credits in education. The student also must enroll in SPLED 500 each semester prior to successful completion of the comprehensive examinations. A candidacy examination is required no later than the second semester of full-time study; written and oral comprehensive examinations are required following the satisfactory completion of the language requirement. A student is required to complete the program within seven years from the date of acceptance as a candidate.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the Student Aid section of the Graduate Bulletin, the following awards typically is available to graduate students in this program:

U.S. Office of Education Assistantships or Traineeships in Special Education. Open to graduate students being prepared as leadership personnel in special education; stipend varies, depending on conditions of existing grants. Other graduate assistantships also may be available. Apply to the Graduate Admissions Committee, 227 CEDAR Building.

The Pennsylvania State University
Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Donald St. P. Richards, Ph.D. (UW) Professor of Statistics
- James L. Rosenberger, Ph.D. (Cornell) Professor of Statistics
- T. D. (Cornell) Associate Professor Emeritus of Statistics
- Joseph L. Schafer, Ph.D. (Harvard) Associate Professor of Statistics
- Michele L. Shaffer, Ph.D. (Penn State) Associate Professor of Public Health Sciences and Statistics
- Damia Senthur, Ph.D. (California, Davis) Assistant Professor of Statistics
- Durand L. Shumway, Ph.D. (Penn State) Assistant Professor of Statistics; Research Associate
- Lynn S. Sirocraft, Ph.D. (Penn State) Lecturer in Statistics
- Aleksandra B. Slavkovic, Ph.D. (Carnegie Mellon) Assistant Professor of Statistics
- Linda C. Strauss, Ph.D. (Penn State) Professor of Statistics and Research Associate
- Arkady A. T sempel, D.Sc. (Vilnius, Lithuania) Professor of Statistics and Mathematics
- Rongling Wu, Ph.D. (U of Washington) Professor of Public Health Sciences and Statistics
- Fuqing Zhang, Ph.D. (North Carolina State) Professor of Meteorology and Statistics
- Yuji Zhang, Ph.D. (Southern California) Assistant Professor of Statistics
- Zibin Zhao, Ph.D. (Chicago) Assistant Professor of Statistics

Graduate instruction and research opportunities are available in most areas of statistics and probability, including linear models, nonparametric statistics, robustness, statistical computing, analysis of count data, multivariate analysis, experimental design, reliability, stochastic processes and probability (applied and theoretical), distribution theory, statistical ecology, and biometrics.

Graduate students can gain practical experience in the application of statistical methodology through participation in the department's statistical consulting center and collaborative research activities. In addition, collaborative projects with other departments provide longer term experience and support for selected students. Most students gain valuable teaching experience by assisting in the teaching and grading of courses. In addition, Ph.D. candidates with proper qualifications can receive support for teaching undergraduate courses.

The Master of Applied Statistics (M.A.S.) program is a professional degree designed to provide training in statistics focused on developing data analysis skills, and exploration of all core areas of applied statistics, without going deeply into the mathematical statistics foundations. It aims to provide its graduates with broad knowledge in a wide range of statistical application areas.

The Doctor of Philosophy (Ph.D.), Master of Arts (M.A.), and Master of Science (M.S.) degrees in Statistics are designed for advanced studies in applied and theoretical statistics. Special emphases include biostatistics, statistical ecology, environmental statistics, genomics, biometrics and statistical computation. The M.S. degree is appropriate preparation for the department's Ph.D. degree.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. Entering graduate students in statistics for whom English is not the first language are required to take the TOEFL (Test of English as a Foreign Language) examination. The results of this examination must be received by the Department of Statistics at least six months prior to the requested date of admission to the Graduate School and must pass the PSU test of spoken English in the first year of the program. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the internet-based test (iBT). Applicants with lower scores may be considered for provisional admission.

While applications from all students (including those who already have done graduate work) are reviewed, completion of a standard calculus sequence is regarded as a prerequisite. Students with a 3.00 or better junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Students hoping to earn a Ph.D. in statistics
may apply directly to the Ph.D. program without need for a master's degree.

### Degree Requirements

#### Professional Master of Applied Statistics Requirements

For the M.A.S. degree, a minimum of 30 credits and a minimum grade-point average of 3.0 are required for graduation. Of the 30 credits, 24 must be courses from the Statistics department and 21 must be at the 500 level. The candidate must complete 6 credits in applied statistics (STAT 501, STAT 502), 6 credits in mathematical statistics (STAT 414, STAT 415) and 3 credits in statistical consulting (STAT 580-581). For all M.A.S. students, the Stat 581 course will have a comprehensive written project report required as part of the course, which serves as the culminating experience. To complete the remaining credit requirements, a candidate can select 9-15 credits from the following applied statistics courses: STAT 484, STAT 480, STAT 500, STAT 503, STAT 504, STAT 505, STAT 506, STAT 507, STAT 509, and STAT 510. In addition, students with suitable backgrounds may choose up to 6 credits from a departmental list of additional courses with approval from their adviser.

#### Master of Arts and Master of Science Degree Requirements

For the M.A. and M.S. degrees, a candidate must complete at least 30 credits, including at least 27 at the 500 or 600 level; 21 of the 27 500-level credits must be formal course work from the department of Statistics. A candidate must complete 6 credits in applied statistics (STAT 511, STAT 512), 6 credits in mathematical statistics (STAT 513, STAT 514), 3 credits in stochastic processes (STAT 515) and 3 credits in statistical consulting (STAT 580-581). The student must also pass a written master's qualifying examination taken at the end of the first year. Finally, an M.A. candidate must submit an acceptable master's paper to the department, and an M.S. candidate must submit a thesis.

#### Doctoral Degree Requirements

In addition to the course requirements for the M.A. and M.S. degrees given above, a Ph.D. candidate in Statistics must complete further courses in linear models (STAT 551), asymptotic tools (STAT 553), statistical inference (STAT 561), and advanced probability (STAT 517), as well as 15 credits of electives taken from STAT 518, STAT 544, STAT 545, STAT 552, STAT 562, STAT 564, STAT 565, and STAT 572, or other courses suggested by the Ph.D. committee and approved by the Graduate Studies Committee. The student also must pass a written Ph.D. qualifying exam, typically during the second year, and a comprehensive exam given at the end of the third year. The comprehensive exam will have a written component, whose content will be determined and administered by the student's Ph.D. graduate committee, and an oral component, which includes the presentation of a thesis research proposal. The candidate then must submit an acceptable Ph.D. thesis and defend it.

The Ph.D. in Statistics offers options in Biometrics, Biostatistics, Environmental Statistics, and Genomics. The course and the examination requirements remain the same under these options; however, the candidate must take 15 credits from a list of courses identified by the option.

### Minor in Statistics Requirements

The Department of Statistics has three possible options for a Graduate Minor in Statistics:

- **Option 1:** STAT/MATH 414-415 and at least three 500-level courses from the department.
- **Option 2:** Five or more courses totaling 15 credits at the 500-level from the department. Stat 464 may also count toward the 15 credits.
- **Option 3:** Four 500-level courses totaling 12 credits from the department and one additional course of 3 credits approved by the department head or graduate studies chairman.

Please note: STAT 500 will not be counted toward the Graduate Minor in Statistics under any option.

For all options, a 3.5 GPA is required in the courses to be counted toward the minor. Completion of one of the options listed above, with the specified grade-point average, and the signature on the Graduate Minor Program form [www.stat.psu.edu/grad/degrees/Minor/Graduate_Minor_Application_Form.pdf](http://www.stat.psu.edu/grad/degrees/Minor/Graduate_Minor_Application_Form.pdf) constitutes approval of the Minor in Statistics. The candidate must indicate the wish to have a Graduate Minor in Statistics when the diploma card is filed and indicate the semester the Ph.D. degree is expected.

### Other Relevant Information

Students in the Statistics program may elect the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees. (See also Operations Research.)

### Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the [Student Aid](#) section of the Graduate Bulletin. GRE scores are required for consideration for assistantships.

### Integrated B.S. in Statistics and Master of Applied Statistics (M.A.S.)

The Integrated Undergraduate-Graduate (IUG) degree with B.S. in Statistics and Master of Applied Statistics (M.A.S.) is designed to be completed in five years. This integrated degree will enable a select number of highly qualified and career-oriented students to obtain training in statistics focused on developing data analysis skills and exploration of core areas of applied statistics at the undergraduate and graduate levels. The M.A.S. degree is a professional master's degree that emphasizes applications and does not provide as much training in the mathematical and statistical theory. The degree prepares students with interests in mathematics, computation, and the quantitative aspects of science for careers in industry and government as statistical analyst. Research divisions in the pharmaceutical industry, quality control and quality engineering divisions in manufacturing companies, clinical research units, corporate planning and research units, and other data-intensive positions require persons with training in mathematics, computation, database management, and statistical analysis, which this program will provide.

### Application Process

The number of openings in the integrated B.S./M.A.S. program is limited. Admission will be based on specific criteria and the recommendation of faculty. Applicants to the integrated program:

- Must be enrolled in the Statistics B.S. program.
- Must have completed at least 60 credits of the undergraduate degree program, including the two courses: STAT 414 and STAT 415 and the students must apply to the program prior to completing 110 credits.
- Must submit a transcript and a statement of purpose.
- Must present a departmental approved plan of study in the application process in consultation with the M.A.S. program director.
- Must be recommended by the chair of the department's undergraduate program committee.
- Must be accepted into the M.A.S. program in Statistics.

For the IUG B.S./M.A.S. degree, 120 credits are required for the B.S. and 30 credits for the M.A.S. The following twelve graduate-level credits (number of credits in parentheses) can apply to both B.S. and M.A.S. degrees; six of these are at the 500 level:

**STATISTICS (STAT)**

- 414. Introduction to Probability Theory (3)
- 415. Introduction to Mathematical Statistics (3)
- 501. Regression Methods (3)
- 502. Analysis of Variance and Design of Experiments (3)

Assuming all requirements for the B.S. are completed, students in the program can complete the B.S. degree and not advance to the M.A.S. Degree if they...
Degree Requirements

IUG Statistics B.S. prescribed Statistics courses (25 credits)

**STATISTICS (STAT)**
- 220. Basic Statistics (3)
- 414. Introduction to Probability Theory (3)
- 415. Introduction to Mathematical Statistics (3)
- 416. Stochastic Modeling (3)
- 464. Applied Nonparametric Statistics (3)
- 470W. Problem Solving and Communication in Applied Statistics (3)
- 480. Introduction to Statistical Analysis System (SAS) (1)
- 501. Regression Methods (3)
- 502. Analysis of Variance and Design of Experiments (3)

Note that students in IUG Statistics B.S. take STAT 501 and STAT 502 instead of STAT 460 and STAT 462 for the regular Statistics B.S.

IUG Statistics M.A.S. requirement (30 credits)

**STATISTICS (STAT)**
- 414. Introduction to Probability Theory (3)
- 415. Introduction to Mathematical Statistics (3)
- 501. Regression Methods (3)
- 502. Analysis of Variance and Design of Experiments (3)
- 580. Statistical Consulting Practicum (2)
- 581. Statistical Consulting Practicum II (1)

Electives (15 credits)

Select from STAT 503, STAT 504, STAT 505, STAT 506, STAT 507, STAT 509, STAT 510 and the departmental list of additional courses for the M.A.S program with the approval of the adviser.

**For all students in the M.A.S program, the STAT 581 courses will have a comprehensive written project report required as part of the course, which serves as the culminating experience.**

Integrated B.A./B.S. in Mathematics and Master of Applied Statistics (M.A.S.)

The Integrated Undergraduate-Graduate (IUG) degree with B.A./B.S. in Mathematics and Master of Applied Statistics (M.A.S.) is designed to be completed in five years. This integrated degree will enable a select number of highly qualified and career oriented students to obtain training in statistics focused on developing data analysis skills, and exploration of core areas of applied statistics at the graduate levels in addition to an undergraduate degree in Mathematics. The M.A.S. degree is a professional masters degree that emphasizes applications. The degree prepares students with interests in mathematics, computation, and the quantitative aspects of science for careers in industry and government as statistical analysts. Research divisions in the pharmaceutical industry, quality control, and quality engineering divisions in manufacturing companies, clinical research units, corporate planning and research units, and other data intensive positions require persons with training in mathematics, computation, and the quantitative aspects of science for careers in industry and government as statistical analysts. Research divisions in the pharmaceutical industry, quality control, and quality engineering divisions in manufacturing companies, clinical research units, corporate planning and research units, and other data intensive positions require persons with training in mathematics, computation, and the quantitative aspects of science for careers in industry and government as statistical analysts. Research divisions in the pharmaceutical industry, quality control, and quality engineering divisions in manufacturing companies, clinical research units, corporate planning and research units, and other data intensive positions require persons with training in mathematics, computation, and the quantitative aspects of science for careers in industry and government as statistical analysts.

Application Process

The number of openings in the integrated B.A./B.S. in Mathematics and M.A.S. program is limited. Admission will be based on specific criteria and the recommendation of faculty. Applicants to the integrated program:

- Must be enrolled in the Mathematics B.A./B.S. program.
- Must have completed at least 60 credits of the undergraduate degree program including the two courses: STAT 414 and STAT 415 and the students must apply to the integrated program prior to completing 110 credits.
- Must present a departmental approved plan of study in the application process in consultation with the M.A.S. program director.
- Must be recommended by the chair of Mathematics Department’s undergraduate program committee. Two additional recommendation letters must be sent to the M.A.S. admissions committee.
- Must submit a transcript and a statement of purpose.
- Must apply to the M.A.S. program in Statistics.

For the IUG B.A./B.S. in Mathematics and M.A.S. degree, 120 credits are required for the B.A./B.S. and 30 credits for the M.A.S. The following twelve graduate level credits (number of credits in parentheses) can apply to both B.A./B.S. and M.A.S. degrees, six of these are at the 500 level:

**STATISTICS (STAT)**
- 414. Introduction to Probability Theory (3)
- 415. Introduction to Mathematical Statistics (3)
- 501. Regression Methods (3)
- 502. Analysis of Variance and Design of Experiments (3)

Assuming all requirements for the B.A./B.S. in Mathematics are completed, students in the program can complete the B.A./B.S. degree and not advance to the M.A.S. degree if they desire.

Degree Requirements

IUG Math B.A./B.S. students must fulfill the Math B.A./B.S. requirement while counting these prescribed Statistics courses (15 credits)

**STATISTICS (STAT)**
- 220. Basic Statistics (3)
- 414. Introduction to Probability Theory (3)
- 415. Introduction to Mathematical Statistics (3)
- 501. Regression Methods (3)
- 502. Analysis of Variance and Design of Experiments (3)

IUG M.A.S. Requirements (30 credits)

**STATISTICS (STAT)**
- 414. Introduction to Probability Theory (3)
- 415. Introduction to Mathematical Statistics (3)
- 501. Regression Methods (3)
- 502. Analysis of Variance and Design of Experiments (3)
- 580. Statistical Consulting Practicum (2)
- 581. Statistical Consulting Practicum II (1)

Electives: (15 credits)

Select from STAT 484, STAT 503, STAT 504, STAT 505, STAT 506, STAT 507, STAT 509, STAT 510 and the departmental list of additional courses for the M.A.S. program with the approval of the adviser.

For the IUG B.A./B.S. in Mathematics and M.A.S. degree, the four courses: STAT 414, STAT 415, STAT 501 and STAT 502 can apply to both the B.A./B.S. and the M.A.S. degree.
M.A.S. degrees.

*Can be waived for students with an equivalent course, e.g., STAT 250 or STAT 301.

** For all students in the M.A.S. program, the STAT 581 course will have a comprehensive written project report required as part of the course, which serves as the culminating experience.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

The Graduate Faculty
- Adrian Barb, Ph.D. (University of Missouri) Assistant Professor of Information Science
- Joanna Defranco, Ph.D. (New Jersey Institute of Technology) Assistant Professor of Information Science
- Nil H. Ergin, Ph.D. (University of Missouri-Rolla) Assistant Professor of Systems Engineering
- Kathryn Jablokow, Ph.D. (Ohio State) Associate Professor of Mechanical Engineering
- Phillip A. Laplante, Ph.D. (Stevens Institute of Tech) P.E. Associate Professor of Software Engineering
- John I. McCool, Ph.D. (Temple) Distinguished Professor of Industrial and Manufacturing Engineering
- Colin J. Neill, Ph.D. (Wales) Associate Division Head and Professor of Software Engineering
- James A. Nemes, D.Sc. (George Washington University) Professor and Division Head
- Michael J. Piovoso, Ph.D. (Delaware) Professor of Electrical Engineering
- Robin G. Qui, Ph.D. (Penn State) Associate Professor of Information Science
- David W. Russell, Ph.D. (CNA, London) Professor of Electrical Engineering
- Raghvinder Sangwan, Ph.D. (Temple) Associate Professor of Software Engineering
- Kailasam Satyamurthy, Ph.D. (Clemson) Assistant Professor of Engineering and Management

This professional master's degree program, available at Penn State Great Valley, focuses on various aspects of software engineering. The primary goal of the program is to prepare students to develop the next generation of software products and services for consumers, industry, and government. The curriculum includes comprehensive, intensive coverage of modern software concepts and techniques, and emphasizes a holistic approach, encompassing financial, legal, and presales issues; technical concepts; software design techniques; methods; and project management.

The program is constituted by four, 9-credit modules of study. Each module is designed for in-depth coverage of a specific area of study (e.g., modern software methods, algorithms, information science). Two of the modules are required; one centers on professional, skill-based topics such as software project management or business communications, and includes the option to select a professional paper or the advanced software studio. The second required module comprises 9 credits of advanced software engineering course work. Graduate instruction is under the direction of a faculty committee.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

The Master of Software Engineering (MSE) program is designed for students with technical backgrounds. Admission will be granted if the applicant has the necessary program prerequisites and a faculty member in the student’s interest area agrees to serve as adviser. Candidates lacking in a modern programming language can meet that requirement by scheduling the 400-level software engineering studio. Scores from the Graduate Record Examinations (GRE) are not an entrance requirement unless the applicant has a junior/senior grade-point average below 3.00 (on a 4.00 scale).

Students with a 3.00 junior/senior average in an appropriate technical degree program will be considered for admission. The best-qualified applicants will be accepted. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Entering graduate students for whom English is not their first language are required to have a score of at least 550 on the TOEFL (Test of English as a Foreign Language).

Program Requirements

All candidates must complete two required 9-credit core modules, for a total core curriculum of 18 credits, and two other 9-credit modules. At least 15 credits of selected courses must be at the 500 level.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:
M.Eng. in Systems Engineering

The Graduate Faculty

- Adrian Barb, Ph.D. (University of Missouri) Assistant Professor of Information Science
- Joanna Defranco, Ph.D. (New Jersey Institute of Technology) Assistant Professor of Information Science
- Nil H. Ergin, Ph.D. (University of Missouri-Rolla) Assistant Professor of Systems Engineering
- Phillip A. Laplante, Ph.D. (Stevens Institute of Tech) P.E. Associate Professor of Software Engineering
- John I. McCool, Ph.D. (Temple) Distinguished Professor of Industrial and Manufacturing Engineering
- Colin J. Neill, Ph.D. (Wales) Associate Division Head and Professor of Software Engineering
- James A. Nemes, D.Sc. (George Washington University) Professor and Division Head
- Michael J. Piovoso, Ph.D. (Delaware) Professor of Electrical Engineering
- Robin G. Qui, Ph.D. (Penn State) Associate Professor of Information Science
- David W. Russell, Ph.D. (CNA) Professor of Electrical Engineering
- Raghvinder Sangwan, Ph.D. (Temple) Associate Professor of Software Engineering
- Kailasam Satyamurthy, Ph.D. (Clemson) Assistant Professor of Engineering and Management

This professional master's degree program, available at Penn State Great Valley, deals with the various aspects of systems engineering. The primary goal of the program is to prepare engineers to develop the next generation of engineering products, systems, and services for industry and government. The curriculum integrates the traditional engineering disciplines in a synergistic manner. Course work includes four 9-credit modules of study with each module designed for in-depth coverage of a specific area of study (e.g., systems and control, robotics). Two of the four modules, the Skill-Based module and the Systems Engineering module, are required and constitute an 18-credit core. To complete the program, students choose an additional 18 credits of electives in two modules of professional interest. As part of the 18-credit core curriculum, students who are nearing the end of their program complete a capstone research experience. Graduate instruction is under the direction of an interdisciplinary faculty committee and the departments participating in the program. The graduate faculty consists of members who have teaching and research interests in the area of systems engineering. Maximum flexibility is maintained by the program in an effort to meet both the professional needs of the individual students and academic quality standards.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin. The M.Eng. in Systems Engineering program is designed for students with backgrounds in science or engineering. Admission will be granted if the applicant has the necessary program prerequisites and a faculty member in the student's interest area agrees to serve as adviser. Normal admission requirements include mathematics through differential equations. Scores from the Graduate Record Examinations (GRE) are not an entrance requirement unless the junior/senior grade-point average is below 3.00 (on a 4.00 scale). There is no foreign language requirement. Students with a 3.00 junior/senior GPA in an appropriate technical degree program will be considered for admission. The best-qualified applicants will be accepted. Exceptions to the minimum 3.00 GPA may be made for students with special backgrounds, abilities, and interests. Entering graduate students for whom English is not their first language are required to have a score of at least 550 (paper) or 213 (computer) on the Test of English as a Foreign Language (TOEFL).

Degree Requirements

All candidates must take two required 9-credit core modules for a total core curriculum of 18 credits and two other 9-credit elective modules. At least 15 credits of selected courses must be at the 500 level.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

The Pennsylvania State University
Teaching and Curriculum (T & C)

Program Home Page
DENISE G. MEISTER, Coordinator of the Graduate Program in Teaching and Curriculum
Penn State Harrisburg
Middletown, PA 17057
717-948-6213

Degree Conferred:
M.Ed.

The Master of Education in Teaching and Curriculum is designed to enhance the skills of teachers for public and private schools. The program focuses on three essential components—curriculum, instruction, and assessment—that contribute to the organization's philosophy of learning. The Teaching and Curriculum program is unified by its vision of critical thinking, democracy, diversity, lifelong learning, nurturance, and scholarship. Courses are designed to reflect the standards of the National Council for Accreditation of Teacher Education (NCATE) and the National Board for Professional Teaching Standards (NBPTS). The program is offered at Penn State Harrisburg and other selected Penn State campuses.

Specifically, the goals of the program are to develop in students (1) the ability to communicate effectively either with school-age students and their parents or with co-workers and/or clients; (2) the ability to conduct an instructional program that provides a sound intellectual and emotional climate for learning; (3) competence in a variety of teaching methods and in the utilization of materials and content appropriate for an effective instructional program; (4) the ability to interpret educational literature and research; and (5) the ability to describe and to evaluate major issues and current trends in instructional curriculum practice and development.

Certification programs are also available in the areas of early childhood education, English as a second language, and principalship.

Admission Requirements
Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

The M.Ed. Program in Teaching and Curriculum has four important admission requirements.

First, candidates must have achieved an overall junior/senior grade point average of 3.00 or higher. For candidates applying for admission who have completed credits beyond the baccalaureate degree, we will evaluate the last (approximately) 60 credits completed.

Second, candidates must submit two letters of recommendation. These letters must be from former professors who can attest to the academic ability and potential of the candidate.

Third, candidates must submit a 200-300 word personal statement that addresses their career goals and reasons for pursuing a graduate degree.

Fourth, candidates must submit test scores from one of the following: Graduate Record Examination, Miller Analogies Test, or Praxis examinations completed for certification. In addition, the language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. The minimum composite score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a masters degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States and Wales.

Retention
Candidates must maintain a minimum 3.00 grade point average in courses approved by the program, satisfactorily complete all required key assessments, attain a grade of "C" or better in all required core courses. Candidates who do not make satisfactory progress will be notified in writing noting the specific deficiencies and requesting that they meet with the program coordinator to develop a remediation plan. Failure to meet or to satisfactorily complete the remediation plan will result in termination from the program.

In compliance with the National Council for the Accreditation of Teacher Education (NCATE) requirements, all persons enrolled in Teacher Education Programs at Penn State Harrisburg are expected to demonstrate the professional dispositions that are aligned with the unit's vision statement. The faculty shall evaluate the approved dispositions demonstrated by the candidates in class and during field experiences. Candidates may be rated as exemplary, acceptable, or unacceptable. Candidates are expected to attain acceptable or exemplary ratings in order to graduate.

Degree Requirements
The Master of Education degree in Teaching and Curriculum provides students with two alternatives to meet the required culminating or capstone experience:

1. A total of 30 credits must be completed: 18 credits in core courses and 12 credits in electives. At least 18 credits must be at the 500 level or higher. A minimum grade-point average of 3.00 for work done at the University and acceptable or higher ratings on the professional dispositions are required for graduation.

2. The objective of the mathematics education option is to provide courses that will emphasize current research and curriculum

The Pennsylvania State University
shifts related to the teaching of mathematics in K-12 classrooms. This option requires completion of four EDMTH courses (a total of 12 credits): EDMTH 441, 442, 443, 444 in addition to the other program requirements.

Transfer Credits

Subject to the limitations given below, a maximum of 10 credits of high-quality graduate work done at a regionally accredited institution may be applied toward the requirements for the master's degree. However, credits earned to complete a previous master's degree, whether at Penn State or elsewhere, may not be applied to a second master's degree program at Penn State. The student should distinguish carefully between the transferability of credit and its applicability in a particular degree program. Approval to apply any transferred credits toward a degree program must be granted by the student's academic adviser, the program head or graduate officer, and the Graduate School. Transferred academic work must have been completed within five years prior to the date of the first degree registration at the Graduate School of Penn State, must be of at least B quality (grades of B- are not transferable), and must appear on an official graduate transcript of an accredited university. Pass-fail grades can be substantiated by the former institution as having at least B quality.

A maximum of 15 graduate credits taken as a nondegree student prior to admission to a graduate degree program may be applied to a graduate program, with departmental approval. The credits must have been earned within five years preceding entry into the degree program.

Forms for transfer of credit can be obtained from the Office of Graduate Enrollment Services, 114 Kern Building.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit courses below the 400 level in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:
M.A.

The Graduate Faculty

- Lee Ahern, Ph.D. (Penn State) Assistant Professor of Communications
- Douglas Anderson, Ph.D. (Southern Illinois) Dean; Professor of Communications
- George Anghelice, Ph.D. (Minnesota) Associate Professor of Communications
- Robert A. Baukus, Ph.D. (Massachusetts) Associate Professor of Communications
- Ronald Bettig, Ph.D. (Illinois) Associate Professor of Communication
- Barbara Bird, M.F.A. (Northwestern) Associate Professor of Communications
- Denise Boree, Ph.D. (Florida) Assistant Professor of Communications
- Jeremy Cohen, Ph.D. (Washington) Professor of Communication
- Colleen Connelly-Ahern, Ph.D. (Florida) Assistant Professor of Communications
- Frank D'Amato, Ph.D. (South Carolina) Associate Professor of Communications
- Dennis K. Davis, Ph.D. (Minnesota) Professor of Communications
- Marcia DiStaso, Ph.D. (Miami) Assistant Professor of Communications
- Michael Eiss, Ph.D. (Illinois) Assistant Professor of Communications
- Lyn Elliot, Ph.D. (Iowa) Associate Professor of Communications
- Russell Frank, Ph.D. (Pennsylvania) Associate Professor of Communications
- Robert M. Frieden, J.D. (Virginia) Cable TV Pioneers Chair Professor in Telecommunications Studies and Law
- Michel Haigh, Ph.D. (Oklahoma) Associate Professor of Communications
- Joanne Hall, Ph.D. (Wisconsin) Associate Professor of Media Studies
- Martin E. Halstuk, Ph.D. (Florida) Associate Professor of Communications
- Marie Hardin, Ph.D. (Georgia) Associate Professor of Communications
- R. Dorn Hetzel, M.F.A. (New York) Associate Professor of Communications
- Anne Hoag, Ph.D. (Michigan) Associate Professor of Communications
- Matthew Jackson, Ph.D. (Indiana) Associate Professor of Communications
- Krishna Jayakar, Ph.D. (Indiana) Associate Professor of Communications
- Matthew Jordan, Ph.D. (Claremont) Assistant Professor of Communications
- Ann Marie Major, Ph.D. (Southern Illinois) Associate Professor of Communications
- Matthew P. McAllister, Ph.D. (Illinois) Professor of Communications
- John S. Nichols, Ph.D. (Minnesota) Professor Emeritus of Communications
- Mary Beth Oliver, Ph.D. (Wisconsin) Distinguished Professor of Communications
- Archana Padmanabhan, Ph.D. (Howard) Associate Professor of Communications
- Patrick R. Parsons, Ph.D. (Minnesota) Don Davis Professor in Ethics
- Robert D. Richards, J.D. (American) John and Ann Curley Professor of First Amendment Studies
- Fred Rieh, Ph.D. (Florida) Professor of Communications
- Michelle Rodino-Colocino, Ph.D. (Pittsburgh) Assistant Professor of Communications
- Amit M. Schejter, Ph.D. (Rutgers) Associate Professor of Communications
- Joseph Reina Schement, Ph.D. (Stanford) Professor of Communications
- Michael Schmielbach, Ph.D. (Wisconsin) Assistant Professor of Communications
- Fuyuan Shen, Ph.D. (North Carolina, Chapel Hill) Associate Professor of Communications
- Richard Sherman, M.F.A. (Ohio) Associate Professor of Communications
- Susan M. Strohm, Ph.D. (Minnesota) Assistant Professor of Communications
- S. Shyam Sundar, Ph.D. (Stanford) Distinguished Professor of Communications, and Communication Arts and Sciences
- Richard D. Taylor, J.D. (New York) Palmer Chair of Telecommunications Studies and Law
- Bu Zhong, Ph.D. (Maryland) Assistant Professor of Communications

The M.A. in Telecommunications Studies program offers a systematic approach to understanding the globalization of information technologies and the convergence of electronic media and telecommunications. It includes history, technology, policy, economics, industrial structures, and e-commerce issues. The program is for both recent undergraduates in communications and related fields, as well as for individuals currently associated with the media information and telecommunications industries wishing to advance themselves professionally. Applicants without an undergraduate degree or professional connection to the field may be required to acquire a basic background as a condition of admission, based on a case-by-case evaluation.

Admission Requirements

Scores for the Graduate Record Examinations (GRE) are required for admission. All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the Test of English as a Foreign Language (TOEFL) and submit the results of that test with the application for admission. The minimum TOEFL admittance score is 600. Applicants with an undergraduate 3.00 junior/senior grade-point average (on a 4.00 scale) are eligible for admission. Also required are three letters of recommendation and an autobiographical statement of 750 to 1,000 words indicating the nature of the applicant's interest in undertaking graduate study in telecommunications.

Program of Study

The M.A. in Telecommunications Studies program is a one-calendar year, 30-credit program that requires a 3-credit master’s paper. A student must enter the program in the fall semester.

Degree Requirements

Candidates must complete a minimum of 30 credits (including master's paper preparation): no more than 9 credits at the 400 level and no more than 6 credits in independent study (in addition to 3 credits researching and writing a master's paper). Candidates must complete a 9-credit core. The remaining credits are selected by the student in consultation with the adviser. Course work offered by departments outside the College of Communications may be scheduled as part of the student's program with prior approval of the student's academic committee. A candidate must maintain 3.00 grade-point average and complete a significant research paper (master's paper) under the direction of a faculty adviser. This paper shall be reviewed and approved by a faculty committee of at least three members. Students are required to schedule three separate, formal meetings with their advisers and academic committees for (1) discussion and approval of the general program plan, (2) the paper proposal, and (3) a formal presentation and defense of the paper at the final meeting of the student's advisory committee.

Student Aid

Graduate assistantship and other forms of student aid available to students in the program are described in the STUDENT AID section of the Graduate Bulletin.

The Pennsylvania State University
Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Teaching English as a Second Language (TESL)

Program Home Page
JOAN KELLY HALL, Department Head
305 Sparks Building
814-865-7365

Degree Conferred:
M.A.

The Graduate Faculty

- Gabriela Appel-Lantolf, Ph.D. (Delaware) Senior Lecturer in German and Applied Linguistics
- Suresh Ganagarajah, Ph.D. (Texas, Austin) Edwin Erle Sparks Professor of Applied Linguistics, English, and Asian Studies
- Joan Kelly Hall, Ph.D. (SUNY Albany) Professor of Applied Linguistics
- Karen E. Johnson, Ph.D. (Syracuse) Kirby Professor in Language Learning and Applied Linguistics
- Celeste Kinginger, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of Applied Linguistics
- James Lantolf, Ph.D. (Penn State) Greer Professor of Language Acquisition and Applied Linguistics
- Sinfree Makoni, Ph.D. (Edinburgh, Scotland) Associate Professor of Applied Linguistics and African Studies
- Mark A. Ouellette, Ph.D. (Pennsylvania) Senior Lecturer in Applied Linguistics
- Sandra J. Savignon, Ph.D. (Illinois, Urbana-Champaign) Professor of Applied Linguistics
- Steve Thorne, Ph.D. (California, Berkeley) Assistant Professor of Applied Linguistics

Completion of this degree program does not automatically provide teacher certification in the Commonwealth of Pennsylvania. Further information on teaching certification is available from the College of Education. Students who desire to continue their studies in ESL at Penn State may be admitted to the Ph.D. program in Applied Linguistics through the program in Linguistics and Applied Language Studies.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Applicants whose native language is not English must take the TOEFL examination and attain a score greater than 600. All applicants are also required to arrange for three letters of reference to be submitted along with a one- to two-page statement of the applicant's goals and professional objectives.

Degree Requirements

The M.A. in TESL requires 36 credits, of which 18 credits must consist of 500-level courses. In lieu of a thesis, students must prepare a master's paper and compile a teaching portfolio. The following courses are required: APLNG 484, APLNG 493, APLNG 591, APLNG 595; 9 credits of electives from the following APLNG courses: APLNG 410, APLNG 482W, APLNG 572, APLNG 573, APLNG 581, APLNG 583, APLNG 593, APLNG 597; and 6 credits of approved electives.

Student Aid

Graduate Assistantships that may be available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

BARRY KUR, Head of the Graduate Program in Theatre
118C Arts Building
814-863-1453

Graduate assistantships available to students in this program and other forms of student aid are described in the Student Aid section of the Graduate Bulletin.

Degree Conferred:
M.F.A.

The Graduate Faculty

- Dan Carter, M.F.A. (Florida State) Professor of Theatre; Director, School of Theatre
- Travis DeCastro, M.F.A. (Utah) Associate Professor of Theatre
- Suzanne S. Elder, M.F.A. (Texas) Associate Professor of Theatre
- John C. Franceschina, M.F.A. (Catholic U) Distinguished Professor of Theatre
- Barry M. Kur, M.A. (SUNY) Professor of Theatre
- Cary Libkin, M.F.A. (Carnegie Mellon) Professor of Theatre
- Annette K. McGregor, Ph.D. (Oregon) Associate Professor of Theatre
- Richard Nichols, Ph.D. (Washington) Professor of Theatre
- Brant Pope, Ph.D. (Michigan State) Professor of Theatre
- Jane Ridley, M.F.A. (Ohio State) Professor of Theatre
- Daniel Robinson, M.F.A. (Missouri, Kansas City) Associate Professor of Theatre
- James Wise, M.F.A. (Purdue) Professor of Theatre

Faculty Emeriti

- Douglas N. Cook, M.A. (Stanford) Professor Emeritus of Theatre
- Charles Firmin, M.F.A. (Penn State) Associate Professor Emeritus of Theatre
- Anne A. Gibson, M.F.A. (Carnegie Mellon) Professor Emerita of Theatre
- Robert E. Leonard, M.F.A. (Goodman School of Drama) Professor Emeritus of Theatre
- Helen A. Manfull, Ph.D. (Minnesota) Professor Emerita of Theatre
- Douglas R. Marmee, M.F.A. (Brandeis) Associate Professor Emeritus of Theatre
- Barry M. Kur, M.A. (SUNY) Professor Emeritus of Theatre
- Suzanne S. Elder, M.A. (Texas) Associate Professor Emeritus of Theatre
- Travis DeCastro, M.A. (Utah) Associate Professor Emeritus of Theatre
- Charles Firmin, M.A. (Penn State) Associate Professor Emeritus of Theatre
- Anne A. Gibson, M.A. (Carnegie Mellon) Professor Emerita of Theatre
- Robert E. Leonard, M.F.A. (Goodman School of Drama) Professor Emeritus of Theatre
- Helen A. Manfull, Ph.D. (Minnesota) Professor Emerita of Theatre
- Douglas R. Marmee, M.F.A. (Brandeis) Associate Professor Emeritus of Theatre
- James Wise, M.F.A. (Purdue) Professor Emeritus of Theatre

The master of fine arts degree program in Theatre pursues the following objectives: (1) to assist each student in acquiring discriminating taste and critical judgment in theatre; (2) to help each student attain skills and proficiencies in theatre; (3) to provide the training, discipline, and opportunities essential to the development of a professional ability in at least one area of theatre; and (4) to prepare each student for an active career in academic and/or professional theatre or other areas within the entertainment industry.

Facilities include the Playhouse, a 450-seat proscenium theatre; the Pavilion, a 249-seat thrust theatre; a 150-seat proscenium theatre in the heart of downtown State College; theatre production studios for scenic, property, and costume preparation; two computer-assisted design laboratories; a lighting laboratory; a sound and media studio; and rehearsal and dance studios.

Admission Requirements

Graduate Record Examination (GRE) scores, or comparable examination scores, are not required for admission to the School of Theatre. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Requirements for admission to the M.F.A. program are (1) a broad undergraduate preparation in theatre, including 3 credits each in acting, directing, stagecraft, and theatre history; and 6 credits of dramatic literature; (2) 12 credits in related subject areas such as communications, oral interpretation, art, business, music, and dance; and (3) submission of a vita and at least three letters of recommendation.

Additional requirements for M.F.A. candidates are (1) submission of evidence of professional potential in the proposed area of specialization-auditions, prompt books, portfolios, manuscripts, and other appropriate presentations—to the applicable study program(s) by arrangement with the department; and (2) a personal interview to be arranged by the student.

Master of Fine Arts Degree Requirements

The program entails specialized professional training in one of the following areas: acting, directing, scene design, costume design, costuming, lighting design, and technical direction. Six semesters in residence are normally required to complete the minimum 60-credit degree.

Students are evaluated on a semester-by-semester basis on academic progress, creative achievement, and professional potential. The M.F.A. is a professional degree and is granted by the Graduate Faculty on the basis of academic and creative excellence over and above the fulfillment of requirements. Satisfactory academic progress does not guarantee continuance in the program, nor does continuance in the program imply the automatic granting of a degree. M.F.A. candidates are required to participate in the School of Theatre productions in positions of responsibility. Additionally, each student must complete a committee-approved monograph project in the area of specialization. An international residency is required and is funded by the school.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

THEATRE (THEA) course list

DATE LAST REVIEWED BY GRADUATE SCHOOL: 5/17/04
Last updated by Publications: 8/28/06
Training and Development (TRDEV)

Degree Conferred:
M.Ed.

The Graduate Faculty
- Margaret Lohman, Ph.D. (Ohio State) Associate Professor of Training and Development
- Jo Tyler, Ed.D. (Columbia) Assistant Professor of Adult Learning and Leadership
- William Milheim, Ph.D. (Kent State) Professor of Education; Director, School of Behavioral Sciences

The master of education degree program in Training and Development at Penn State Harrisburg helps students prepare for professional careers in training and development in diverse organizational settings, including business and industry, government, and health care. Graduates of the Training and Development Program frequently assume positions such as trainers, instructional designers, program evaluators, performance analysts, career development specialists, and organization developers.

The overarching goal of the Training and Development Program is to help students develop the ability to assess and improve employee learning and performance. Accordingly, specific goals of the program include developing the ability to: analyze employee performance; design a broad range of performance improvement interventions, with particular emphasis on the design, development, and delivery of training programs; evaluate training and development programs; facilitate work group discussions and group processes; translate training and development theory into practice; and critically evaluate research in training and development.

Admission Requirements
An applicant must hold a baccalaureate degree in any field from a regionally accredited, college-level institution. Admission decisions are based primarily on an applicant's junior/senior cumulative grade-point average and career-goal statement. Additional information pertaining to any postbaccalaureate course work and professional experience are considered. The best-qualified applicants will be accepted up to the number of spaces available for new students. Applicants with low grade-point averages may be required to take the Graduate Record Examinations (GRE) or take 9 credits of course work recommended by a program faculty member and maintain a GPA of B or higher in order to be reconsidered.

Students are required to submit the following:
- A completed application with the application fee
- Two copies of official transcripts from all colleges/universities attended
- A brief career-goal statement

International Students
All applicants whose first language is not English or who have not received a baccalaureate degree from an institution in which the language of instruction is English must take the Test of English as a Foreign Language (TOEFL; www.toefl.org).

The test must be passed with a score of 550 (paper-based test) or 213 (computer-based test) or higher.

All students with international credentials must submit transcripts to Educational Credential Evaluator, Inc. (ECE) for a "Course by Course" academic evaluation of transcripts and degree. An ECE application can be obtained at www.ece.org.

Application Deadlines
Candidates may enter the program at the beginning of fall or spring semester, or the summer session. Application deadline dates for U.S. students and international students are posted on the Training and Development program website. [http://www.hsd.psu.edu/hbo/programs/gradprog/trdev.html]

Please note: Each graduate program reserves the right to set earlier deadlines than those noted above.

Degree Requirements
Students may enter the Training and Development program from a variety of backgrounds and enroll in courses to help them develop competencies in training and development. Coursework includes both required and elective courses in training and development as well as electives from outside the program. Students select one of two areas of professional practice, training or human resource development, as a focus for their electives in the training and development program. Courses are scheduled to accommodate part- and full-time students.

There are two options in the program: the Paper option requires the completion of a master's paper (TRDEV 587) and a total of 36 credits (excluding an internship if one is needed); the Non-Paper option does not require a master's paper, but does require Research Designs Applied to Training (TRDEV 588) and an extra elective in Training and Development for a total of 39 credits (excluding an internship if one is needed). For both the Paper and Non-Paper options, at least half of the total credits must be earned in 500-level courses.

Both options require successful completion of Instructional Methods in Training and Development (TRDEV 418), Foundations in Training and Development (TRDEV 460), Performance Analysis (TRDEV 465), Systematic Instructional Design (TRDEV 518), Technology in Training (TRDEV 531), and Educational Research Design (EDUC 586).

Prescribed (Required) Courses:
- TRDEV 418: Instructional Methods in Training & Development (3 credits)
- TRDEV 460: Foundations in Training & Development (3 credits)
- TRDEV 465: Performance Analysis (3 credits)
- TRDEV 518: Systematic Instructional Design (3 credits)
- TRDEV 531: Technology in Training (3 credits)
- EDUC 586: Educational Research and Design (3 credits)
**Additional Courses**

**A.** From Training and Development courses, select three courses for the Paper option or four courses for the Non-Paper option:

- TRDEV 421: Presentation Skills for New Trainers (3 credits)
- TRDEV 432: Video Production for Training (3 credits)
- TRDEV 470: HRD Tools and Techniques (3 credits)
- TRDEV 475: Career and Succession Management (3 credits)
- TRDEV 505: Project Management (3 credits)
- TRDEV 507: Program Evaluation (3 credits)
- TRDEV 520: Learning Styles and Theories for Trainers (3 credits)
- TRDEV 532: Web-Based Training (3 credits)
- TRDEV 533: Distance Learning in Training (3 credits)
- TRDEV 565: Implementing Training and HRD Programs (credit)
- TRDEV 583: Issues in Training & Development (3 credits)
- TRDEV 596: Individual Studies (1-3 credits)
- TRDEV 597: Special Topics (3 credits)

**B.** Select two three-credit courses at the 400/500 level from programs outside Training and Development. The two courses should assist you in preparing for professional roles and responsibilities in training and development. The following courses are highly recommended:

- BE SC 408: Group Facilitation and Leadership Skills (3 credits)
- BE SC 468: Industrial Psychology (3 credits)
- PUBADM 510 or MNGMT 510: Organizational Behavior (3 credits)

**Required Experience:**

One of the following:

**A.** Holds or has held a position in training and development successfully for six months or more. Submit request for waiver for approval.

**B.** TRDEV 595 Internship (3 credits which are not counted in the 36 credit or 39 credit requirement)

**Capstone Requirement:**

Choose one of the following options:

**A.** TRDEV 588: Research Designs Applied to Training (3 credits - plus one additional 3-credit elective)

**B.** TRDEV 587: Master's Paper (3 credits)

**Transfer Credits and Course Substitutions**

A maximum of 10 credits of high-quality graduate work done at a regionally accredited institution may be applied toward the requirements for the master's degree in Training and Development. Approval to apply any transferred credits toward a degree program must be granted by the student's academic adviser and the Graduate School. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School, must be of at least B quality (grades of B- are not transferable), and must appear on an official graduate transcript. Credits earned toward a previously completed postbaccalaureate professional degree program (law, medicine, etc.) are not transferable. However, up to 10 credits can be transferred from a professional degree program if the degree has not been conferred.

A maximum of 15 credits earned as a special nondegree student at Penn State University may be applied to the Training and Development program, with departmental approval. The credits must have been earned within five years preceding entry into the program.

**Grade-point Average and Time Limit**

A 3.00 (out of 4.00) minimum grade-point average is required to graduate from the program. All course work must be completed within eight years.

**Financial Aid**

There are a limited number of scholarships, fellowships, and research grants available, as well as graduate assistantships. Many students work full-time and take classes part-time. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition. To find other options available to you, contact the Financial Aid Office at 717-948-6307.

**Courses**

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not be used to meet graduate degree requirements. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

The Pennsylvania State University
Master of Professional Studies in Turfgrass Management

ANDREW S. MCNITT, In Charge of Master of Professional Studies in Turfgrass Management Graduate Program
445 ASI Building
814-863-1368, asm4@psu.edu

The Graduate Faculty

- David R. Huff, Ph.D. (California, Davis) Professor of Turfgrass Breeding, Department of Crop and Soil Sciences
- Andrew S. McNitt, Ph.D. (Penn State) Assistant Professor of Soil Science, Department of Crop and Soil Sciences
- Maxim J. Schlossberg, Ph.D. (Georgia) Associate Professor of Turfgrass Nutrition and Soil Fertility, Department of Crop and Soil Sciences
- J. Turgeon, Ph.D. (Michigan State) Professor of Turfgrass Management, Department of Crop and Soil Sciences
- Wakar Uddin, Ph.D. (Georgia) Associate Professor of Plant Pathology, Department of Plant Pathology

The Master of Professional Studies in Turfgrass Management (MPS-TM) is a 30-credit terminal master’s degree program that emphasizes a systems approach to turfgrass management. The program balances theory and practice. Courses taught in MPS-TM use Web-based lessons, quizzes, exams, and team projects and exercises to provide a balance between individualized study and interactive learning. Individuals who currently work as managers of turfgrass facilities, including golf courses and professional sports complexes, would benefit from this program. The MPS-TM program requires the completion of four core courses in which students learn to apply scientific concepts to fundamental problems encountered in the management of complex turfgrass ecosystems. Additionally, a capstone individual study in turfgrass management coursework is a project that integrates theory and practice in addressing real problems encountered in turfgrass facility management.

Degree Requirements

The professional master’s degree requires 30 credits including a final integrative project. All students complete the required MPS-TM core program of turfgrass courses. The MPS-TM turfgrass courses consist of TURF 850 (Turfgrass Physiology), AGRO 851 (Applied Plant Population Biology), TURF 852 (Turfgrass Health Management), TURF/PATH 853 (Turfgrass Science Literature), and AGRO 596 (Individual Studies in Agronomy). An integrative project is required in which the student demonstrates the capability to integrate and apply concepts, principles, analytical techniques, and interpretation skills learned in the program to a real problem faced in turfgrass facility management. In consultation with their advisor, students also take an additional 15 credits of elective coursework to focus on their particular interest within turfgrass facility management. A total of 18 credits must be 500-level or higher, with at least 6 credits of 500-level coursework; this Graduate School requirement is met through the required courses, the project, and at least one 500-level elective course.

*See Appendix B for elective courses

Admissions Requirements

Applicants must submit a letter of professional introduction in which they describe their professional experiences and education, delineate their career goals, and discuss how the MPS-TM program will enable them to meet their objectives. Applicants must also provide three letters of reference and recommendation. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Scores from Graduate Record Exam (GRE), or from a comparable substitute examination accepted by a graduate program are required for admission; however, exceptions may be considered on a case-by-case basis. The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section. Students may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial coursework. The minimum composite score for the IELTS is 6.5. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin http://www.psu.edu/bulletins/whitebook/Gradregs.htm.

Transfer Credits

If students have successfully completed courses from another institution that are equivalent to the elective turfgrass courses (TURF 425, 434, 435, and 436) with grades of B or better, these can be applied toward satisfying the MPS-TM degree requirements. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School, must be equivalent to “B” quality (grades of B- are not transferable) on Penn State’s grading system, and must appear on an official graduate transcript.

Student Aid

Students in this program may receive financial assistance from their workplace or bear the cost of the degree personally. Other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin http://www.psu.edu/bulletins/whitebook/Gradregs.htm. The forms of financial aid noted in the bulletin available to residential graduate students are not available to students studying via the World Campus, e.g., assistantships, fellowships. The other common form of financial aid is loans.

Typical Schedule

Flexibility is a key principle of the design of this program. Each course will be offered once each academic year. Sequencing of courses is determined by the semester the student begins the program. Students and their advisor will develop a plan of study upon completion of the second course taken in the program or the end of the first year, whichever occurs sooner. Many students may take three or four courses per year while others may only take one or two. Because of this, the time to degree will average three years and one semester. The typical schedule for offering the required MPS-TM courses is shown in Table 1.

Table 1. MPS-TM REQUIREMENTS (30 credits)

The Pennsylvania State University
REQUICK COURSES (12 credits)

FALL SEMESTER
TURF 852 (3) Turfgrass Health Management
TURF/PPATH 853 (3) Turfgrass Science Literature
AGRO 596 (3) Individual Studies

SPRING SEMESTER
AGRO 851 (3) Applied Plant Population Biology
AGRO 853 (3) Turfgrass Physiology

INTEGRATIVE PROJECT (3 credits)
AGRO 596 (3) Individual Studies

ELECTIVES (15 credits)

See list of approved elective courses available through Penn State. All electives listed are offered online. Must include at least one 500-level (3 credit) course.

Elements of Residency

We propose several strategies to meet the elements of residency in MPS-TM. We describe these strategies and then indicate how each contributes to various elements of residency. Table 2 provides a summary of the program strategies that contribute to each element of residency. These elements will be phased into the program over the first five years the program is in existence. The elements will be evaluated for their effectiveness and modifications made, as necessary, to ensure a quality educational experience. This section is organized by the strategies we plan to use to meet the elements of residency.

Strategy A–Seminars and discussions: CSS offers departmental seminars during Fall and Spring Semesters. Topics that are relevant to MPS-TM students will be made available for students to view using appropriate technology. We then would offer chat-room time and threaded discussion opportunities for the students to interact with each other and with the presenter and/or a faculty advisor. Faculty and graduate students in the program will be invited to participate in the discussions. We will explore the use of real-time teleconferencing for students to join the seminars, but the geographical (time zone) distribution of our students may make this difficult. Strategy A contributes to residency elements 1, 2, 4, and 7. Strategy A provides opportunity for interaction in real time with each other and others who have experiences in the field. It provides broader exposure to and socialization to the field and to related fields (crop science, soil science, horticulture, plant pathology, entomology) (4); and it increases interaction with Penn State faculty by giving students the opportunity to discuss topics with faculty and graduate students in the other two graduate programs in the department (i.e., Agronomy, Soil Science). It will increase student awareness of the department and the breadth of its substantive expertise. We expect that at least one seminar per semester will be made available in this way and we expect all students currently enrolled in the program to take part in one of these seminar/discussion opportunities each academic year. Strategy A will be phased in during year 1 of the new program.

Strategy B–Student seminar or discussion of their capstone project in the program: An important part of socialization and sharing of information is student-led seminars and discussions. Each student in the program will be required to offer a seminar and/or to lead a discussion about their capstone project. This is the integrative experience in the program and will be a required element for completion of the program. As part of this, the student will post the presentation and project report prior to their seminar/discussion. The student will work with their faculty advisor and the MPS-TM program coordinator to develop the content of the seminar and/or discussion questions. The faculty advisor and the MPS-TM program coordinator will provide support to the student during the seminar and/or discussion. This will give other students an opportunity to become familiar with the requirements of the integrative experience as well as allowing for sharing of the experiences of the student completing the program. We will evaluate the feasibility of videoconferencing for those students interested in giving a formal seminar, and recording the presentation for distribution to students and others unable to participate in real-time. Alternatives to video conferencing include a threaded discussion format based on the written document, and/or specific times for students and faculty to visit a chat room for a guided discussion led by the student. Strategy B contributes to residency elements 1, 2, 4, 6, and 7. Strategy B offers an opportunity for interaction between students and faculty outside the course context (1); encourages interaction among students with student led discussions (2); provides students an opportunity to explore substantive or socialization issues in the field (4); allows students to contribute their own insights, knowledge and experience to and socialize among students on which they can draw in their professional careers, not just in the program context. Second, MPS-TM students will be asked if they would be interested in volunteering to mentor one or two undergraduate students in MPS-TM complete their programs. This provides MPS-TM students with experience in mentoring and providing leadership to those with less knowledge and experience, and it enhances the experiences of the undergraduate students to have a practitioner to whom they can turn with substantive/career-related questions. Strategy E contributes to residency elements 2, 4, 5, 6, and 7. This strategy encourages interaction among students (2); provides a socialization/professionalization experience guided by faculty (4); provides a student perspective on the program and courses in terms of advising (5); allows MPS-TM students to make valuable contributions to the program, college and university through involvement in undergraduate education (6), and increases student involvement and identification with Penn State and its programs (7). Strategy E will be phased in during years 2 and 3 of the MPS-TM program and the Turfgrass Science undergraduate program, as feasible.

Strategy C–Informal discussions: An online ‘coffee room’ will be set up as a space for informal discussions among students and faculty. Topics are likely to include issues of socialization in the field and practical application of course content and so will contribute to residency element (4). The discussions and interactions will allow students to contribute their expertise and experiences, shaping faculty knowledge of applications in the field and providing valuable research. Thus, these discussions will contribute to the program, college and university (6). Participation will increase identification with Penn State (7). Strategy C will be phased in during year 1 of the program.

Strategy D–Student seminar or discussion of their capstone project in the program: An important part of socialization and sharing of information is student-led seminars and discussions. Each student in the program will be required to offer a seminar and/or to lead a discussion about their capstone project. This is the integrative experience in the program and will be a required element for completion of the program. As part of this, the student will post the presentation and project report prior to their seminar/discussion. The student will work with their faculty advisor and the MPS-TM program coordinator to develop the content of the seminar and/or discussion questions. The faculty advisor and the MPS-TM program coordinator will provide support to the student during the seminar and/or discussion. This will give other students an opportunity to become familiar with the requirements of the integrative experience as well as allowing for sharing of the experiences of the student completing the program. We will evaluate the feasibility of videoconferencing for those students interested in giving a formal seminar, and recording the presentation for distribution to students and others unable to participate in real-time. Alternatives to video conferencing include a threaded discussion format based on the written document, and/or specific times for students and faculty to visit a chat room for a guided discussion led by the student. Strategy D contributes to residency elements 1, 2, 4, 6, and 7. In developing the undergraduate course presentation, MPS-TM students will work with the faculty member in the course to develop content and instructional strategies thus providing socialization and experience with instruction (1, 4); if a panel is used then MPS-TM students on the panel will need to interact to organize the presentation (2); MPS-TM students would make a clear and valuable contribution to the program, college, and university by participating as experts, panel members in undergraduate courses related to their coursework and professional experiences (6). Such participation will increase the identification with Penn State (7). Students will be encouraged to participate in one such activity during their program.

Strategy E–Students as mentors. MPS-TM students will be asked to serve as mentors in two capacities. First, ‘senior students’ will be asked to serve as mentors to new students in the MPS-TM program. This will include providing advice, responding to questions that new students in the program might have, and helping new students to navigate the somewhat less-structured world of online courses (where there is no formal class meeting time). Since many students are already practitioners, these mentoring relationships should help to build networks among students on which they can draw in their professional careers. Second, second and third year students in the MPS-TM program will be asked to mentor undergraduate students in the TS program. This provides MPS-TM students with experience in mentoring and providing leadership to those with less knowledge and experience, and it enhances the experiences of the undergraduate students to have a practitioner to whom they can turn with substantive/career-related questions. Strategy E contributes to residency elements 2, 4, 5, 6 and 7. This strategy encourages interaction among students (2), provides a socialization/professionalization experience guided by faculty (4), provides a student perspective on the program and courses in terms of advising (5), allows MPS-TM students to make valuable contributions to the program, college and university through involvement in undergraduate education (6), and increases student involvement and identification with Penn State and its programs (7). Strategy E will be phased in during years 2 and 3 of the MPS-TM program and the Turfgrass Science undergraduate program, as feasible.
sessions. Student and alumni mentors could then meet those they are mentoring. Opportunities for advising sessions on coursework and an introduction to the program would be included for students new to the program. Times also would be available for students to set up meetings with their academic advisors to discuss their integrative experience. Some sessions in the Institute may be made available to those unable to attend in person. The Annual Institute contributes to all of the elements of residency. The institute provides opportunities for face-to-face interaction among faculty and students (1); among students (2); will increase access to information and instructional resources of the program, department and University (3); offer opportunities for socialization to the field (4); provide face-to-face academic and program advising (5); enable students to contribute by helping to organize sessions and use their expertise (6); and a visit to University Park is generally a good way to increase identification with Penn State (7). We view the Institute as an important element of the program, and will work to develop funding mechanisms to assist students and alumni in covering the costs of travel to and living expenses while visiting Penn State. We expect to offer the first institute during the second fall following the approval of the MPS-TM program.

Strategy G: Academic advising and support services. Academic advising is provided initially by the Graduate Program Coordinator who is a tenure-line faculty member in the program. Students will be encouraged to identify a permanent faculty advisor as soon as possible in the program and will work through a proposed schedule of courses and a tentative timeline within the first year. This process will be facilitated by the Graduate Program Coordinator. Advising is conducted by email and phone. Once a faculty advisor is identified, the student can seek advice from the faculty advisor, the Graduate Program Coordinator, or from other faculty and students in the program. Advising also will be available through an online advising ‘coffee room’, the Annual Institute, and the use of senior students in MPS-TM as mentors/peer advisors. Materials providing specific information on program requirements, the unique aspects and responsibilities of participating in an online program, identifying a faculty advisor and committee, and the integrative experience are being developed and will be available on the program web site. Support for MPS-TM will be provided by a staff assistant in CSS and through initial contact with World Campus personnel/advisors. Students will apply for admission directly to the MPS-TM program in the academic department. Strategy G meets residency elements 1, 3, 4 and 5.

Strategy H: MPS TM program web site. We view the MPS-TM program web site as an essential element in creating a ‘home and identity’ for the MPS-TM program. The web site will contain the typical elements of an educational program with information on application guidelines, course offerings, requirements for the degree, information on faculty in the program, and links to broader Penn State resources. We also propose to develop elements of the web site that will provide opportunities for interaction (formal and informal), program and course review and evaluation, professional networking, and building program identity. Interaction linked through the web site would be the opportunities to participate in organized chat rooms or threaded discussions related to the departmental or student seminars or discussion ( Strategies A and B) informal discussion chat-rooms and threaded discussions (Strategy C), and the ‘coffee room’ (Strategy C, E and F). The ‘coffee room’ also can be used for course review and evaluation where access would be restricted to students in a particular course and the faculty peer evaluator of the course. One page on the web site would include links to professional organizations, nationally and within states, that provide training and conferences for practitioners and researchers in topics related to community and economic development. We plan to identify these through searches, but also by the organizations in which our students and alumni participate. This site also will include a link to a discussion area about insights obtained from student/faculty/alumni participation in particular conferences. Another element would be a restricted access site that includes information on former and current students in MPS-TM. This would include information on current positions, locations, and areas of expertise of the students and alumni; lists of the capstone projects completed by the students with links to electronic copies, and a map showing locations of current and former students. We see this information as building identity with the program and Penn State and encouraging continued participation in the program by alumni. This alumni/student/faculty space would include access to chat rooms, threaded discussions, and coffee rooms on organized topics and informal discussion topics introduced by members. The web site contributes to all elements of residency. It offers opportunities for interaction among faculty and students (1), interaction among students and among students and alumni (2), provides access to information and instructional resources (3), increases exposure to substantive issues in the field and to professional networks and experiences (4), provides access to advising information and support services (5), offers a means for students and alumni to stay connected with the program and contribute substantively both formally and informally (6), and creates a location and reason for continuing active participation in and identification with the Penn State community. We plan to develop a new website for the MPS-TM program and to phase in various elements within the first three years of the program.

Ultimately, we would like to employ all of the above strategies to increase participation and interaction available to alumni of the MPS-TM program. The alumni of this program are practitioners in the field or work in related areas and can provide an invaluable resource to current graduate and future undergraduate students, the program, and Penn State. We would hope to use the ‘friends of Penn State’ accounts to provide access to the web sites and associated activities. Recent efforts by the Penn State Alumni Association and University Libraries to offer some restricted access to library resources to members of the Alumni Association also will increase the benefits to alumni of retaining their contact and interaction with the program and with Penn State. The special interaction elements related to community and economic development offered to alumni and students should increase the attractiveness to alumni of staying involved.

Another element would be a virtual coffee room for informal discussions with and among students. We will maintain alumni and former student lists. As we develop the program website, we will consider an electronic newsletter for alums and a special alums page on the web site.

Wildlife and Fisheries Science (W F S)

Program Home Page

Michael G. Messina, Director of the School of Forest Resources and Professor of Forest Resources

121 Forest Resources Building
814-863-7093

Degrees Conferred:
Ph.D., M.S.

The Graduate Faculty

- Victoria Braithwaite-Read, D.Phil. (Oxford) Professor of Fisheries and Biology
- Margaret C. Brittingham, Ph.D. (Wisconsin) Professor of Wildlife Resources
- Hunter Carrick, Ph.D. (Michigan) Associate Professor of Aquatic Biology
- Duane R. Diefenbach, Ph.D. (Georgia) Adjunct Professor of Wildlife Ecology; Leader--Wildlife, PaCFW RU
- C. Paola Ferreri, Ph.D. (Michigan State) Associate Professor of Fisheries Management
- Matt Marshall, Ph.D. (Georgia) Adjunct Assistant Professor of Wildlife Conservation
- Susan E. Parks, Ph.D. (MIT & Woods Hole Oceanographic Inst) Assistant Professor of Acoustics and Ecology
- Gary J. San Julian, Ph.D. (Colorado State) Professor of Wildlife Resources
- Charles Schaad, Ph.D. (McGill) Assistant Professor of Wildlife Technology
- Jay R. Stauffer, Jr., Ph.D. (Virginia Tech) Distinguished Professor of Ichthyology
- Walter M. Tilkowski, Ph.D. (Massachusetts) Associate Professor of Wildlife Science
- Tyler Wagner, Ph.D. (Michigan State) Adjunct Assistant Professor of Fisheries Ecology; Assistant Unit Leader, PaCFW RU
- Richard H. Yahner, Ph.D. (Ohio) Professor of Wildlife Conservation

Programs are designed to give students an understanding of the biology and management of terrestrial or aquatic wildlife species and their environments, and include training in fish and wildlife ecology, nutrition, physiology, behavior, genetics, and management of various habitats and their impact on fish and wildlife populations; population dynamics and manipulation of animal numbers; and studies of recreational, aesthetic, and socioeconomic values of fish and wildlife. Most programs of study are strengthened by including appropriate courses offered by related departments.

Admission Requirements
Scores from the Graduate Record Examinations (GRE) are required for admission. A student may be admitted provisionally without GRE scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Application materials should be submitted before February by those who want to begin in summer or fall. For admission, an applicant should have at least a 2.75 grade-point average, a 3.00 junior/senior average, and courses that are basic to the individual's field of specialization. Ordinarily these include 12 credits in communication, 12 credits in social sciences and humanities, 10 credits in quantification including calculus and statistics, 8 credits in chemistry and/or physics, 8 credits in biological sciences, and 18 credits in fish, wildlife, forestry, or related courses. Three reference reports (forms supplied on request), and a brief statement describing the applicant's academic goals, career interests, and special qualifications are required. The best-qualified applicants will be accepted up to the number of spaces available. Exceptions to admission requirements may be made for students with special backgrounds, abilities, and interests.

Admission to the Ph. D. program in Wildlife and Fisheries Science requires a master's degree in wildlife and fisheries science or a closely related field, or a bachelor's degree with a minimum grade-point average of 3.30 and demonstrated research ability.

Master's Degree Requirements
M.S.: In addition to Graduate School requirements, 6 credits of statistics and 2 credits of colloquium are required.

Doctoral Degree Requirements

Doctoral students would normally emphasize either wildlife or fisheries in their course selection. Course work shall include at least 15 graduate credits beyond those required for an M.S. in Wildlife and Fisheries Science. At least 9 of these credits must include courses at the 500 level with a Wildlife and Fisheries Science designation.

An international communications or cultural requirement is required for the Ph.D. degree. This requirement may be satisfied by demonstrating competence in one foreign language equivalent to passing two or three college-level courses. It also may be met by two courses in one or two contemporary foreign cultures. With approval of the doctoral committee, a student may petition the Graduate Faculty of the school for waiver of the international communications or culture requirement.

Students must pass the candidacy examination during their first year of residence and a comprehensive examination which is given after all course requirements have been completed. The final examination is oral; all doctoral students are required to present a public seminar on their dissertation prior to the final examination.

Watershed Stewardship Option

The Graduate Option in Watershed Stewardship is intended to provide enhanced educational opportunities for students with an interest in water resources management who are enrolled in a graduate degree program within Wildlife and Fisheries Science. The objective of the Graduate Option in Watershed Stewardship is to educate students to facilitate team-oriented, community-based watershed management planning directed at water resources problems encountered in Pennsylvania communities, especially nonpoint source water pollution. The Graduate Option in Watershed Stewardship requires 22 credits of graduate course work: 12 credits of breadth courses, 2 credits of Watershed Stewardship Seminar courses (FOR 591A and 591B or LARCH 510.2), and 8 credits of Watershed Stewardship Practicum I and II courses (FOR 570 and FOR 571 or LARCH 540.2 and LARCH 550.2). One credit of FOR 591 would count as a colloquium course toward degree requirements, but at least 1 additional credit of FOR 590 is required. Breadth courses will consist of three graduate credits of course work from each of four subject matter areas: (1) water resources science, (2) social science, public policy and economics, (3) humanities, and (4) communications and design. In the watershed stewardship practicum courses students work in teams with community, government and business leaders to analyze and understand natural resources problems and creatively synthesize appropriate solutions in the form of a written watershed management plan.

A representative pattern of scheduling for the Graduate Option in Watershed Stewardship in addition to a student's other degree requirements might be:

First Year:

**Fall Semester**
- Breadth electives--6 credits
- FOR 591A or LARCH 510.2
- Watershed Stewardship
- Issues Colloquium--1 credit

**Spring Semester**
- Breadth electives--6 credits

The Pennsylvania State University
Joint Degree Programs between The Pennsylvania State University Dickinson School of Law (J.D.) and the School of Forest Resources (M.S., Ph.D.)

Joint Degree Program. The Pennsylvania State University Dickinson School of Law (DSL) and the School of Forest Resources (SFR) will offer coordinated programs of studies leading to the degrees of Juris Doctor (J.D.) and a Master of Science (M.S.), or a Doctor of Philosophy (Ph.D.) in Wildlife and Fisheries Science. The SFR programs are interdisciplinary.

Admissions. In order to be admitted to the program, students may a) first be admitted and enrolled in either SFR or DSL, and be subsequently admitted to the other program; or b) be admitted to the joint degree program prior to commencing studies at Pennsylvania State University. Credits earned in the SFR program before admission to DSL cannot, however, be credited to the J.D. degree. Each program will make a separate admission decision. Students admitted to both programs will be admitted as joint degree candidates. Applications for transfer into the joint degree program from another law school or forestry/natural resources program at another University will be considered on a case-by-case basis.

Admission Requirements

Dickinson School of Law (DSL). A bachelor’s or equivalent degree from an accredited college is a prerequisite for admission. However, there is no standard prescribed undergraduate curriculum. An applicant should have acquired significant oral, and written communications skills before entering law school. The following are required of applicants: a completed application form for DSL; taking of the Law School Admissions Test (LSAT); completion of an LSDAS report; a one-page personal statement; employment record since high school; and two recommendations.

School of Forest Resources: A bachelor’s or equivalent degree from a regionally accredited college is a prerequisite for admission to a master’s degree program, with a cumulative grade point average of 2.75 and junior-senior average of 3.0, based on a maximum 4.0 system. The following are also required of applicants to the joint degree program: taking of the Graduate Record Examination (GRE) or the LSAT; an official undergraduate transcript or transcripts; a personal statement; employment record since high school; and three recommendations. There is no prescribed undergraduate curriculum, and, because of the diversity of programs in the School, professional preparation may vary considerably. As a guide, SFR suggests having 8 credit hours in chemistry and/or physics; 12 in calculus, statistics, and/or computer science; 8 in biology, botany, and/or zoology; 12 in writing and speaking; 12 in economics, social sciences, and history; and 16 in forest science, wildlife and fisheries science, and/or wood products. Completed applications showing that a student has completed courses in these areas will be considered for admission.

Other Relevant Information

Each entering student receives individual guidance from an adviser, and later from his or her committee, in designing a program of studies and research based on his or her own interests. The student is responsible for conforming to all requirements summarized in the “Graduate Studies Handbook” of the School of Forest Resources, and for completing the degree program within a reasonable time, i.e., two years for a master’s degree and three years for a Ph. D.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the Graduate Bulletin, the following awards typically have been available to graduate students in this program:

Forest Resources: Jesse Rossiter Rapp Memorial Scholarship Available to graduate students in the School of Forest Resources who are not holding assistantships as graduate students. Apply to the School of Forest Resources’ Scholarships, Loans, and Awards Committee.

Roger M. Latham Memorial Award Awarded to outstanding graduate students specializing in wildlife or fisheries after at least one semester in residence.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

WILDLIFE AND FISHERIES SCIENCE (W F S) course list

See also Forest Resources.
Interprogram Transfer of Credits

**J.D.** A maximum of 12 credits for SFR course work may be transferred for credit toward the J.D. degree at DSL. Students must obtain a grade satisfactory to DSL for the course work to be credited toward the J.D. degree. What courses may qualify for credit shall be determined by the DSL liaison. Because of the interdisciplinary nature of many SFR degrees, courses from other Departments and Colleges are credited towards an SFR degree with the approval of the SFR committee (e.g. courses in Economics, Agricultural Economics, Agricultural and Extension, Agronomy, Entomology, Geosciences, Landscape Architecture, Leisure Studies, Meteorology, Plant Pathology, Soil Science, EPC) and credits of these courses will be treated as SFR courses (i.e. may be credited to the DSL program with DSL approval, subject to the 12-credit limit).

**SFR Degrees:** The SFR programs are interdisciplinary programs and typically credits from other Departments and Colleges may be credited. What courses may be credited will be determined by the student’s SFR committee. Normally, a maximum of 12 credits of DSL course work will be counted for credit toward the minimum requirements for an SFR Master’s degree, subject to approval by the student’s SFR committee.

**Sequence.** The sequence of courses will be determined by the students and their advisers. Generally, however, students will complete the first year of the DSL program before beginning the SFR program. Thereafter, students may concurrently enroll in courses in the DSL and SFR programs, provided that they abide by the requirements of each program. The ordinary expectation will be that students will spend entire semesters at one location or the other.

**Recommended Program of Study and Advising.** All students in the program will have two advisers, one from DSL and one from SFR (the committee chair). Periodic interaction between the two advisers will be encouraged. A program of study will be developed for each student taking into account the fact that some courses at both locations are offered on a rotating or intermittent basis. Many courses are offered every year, but some are offered every two or three years. Advisers will have available a list of projected relevant offerings in order to work with the student on an individualized program of study. The standard committee structure will apply to the SFR programs.

**Tuition.** Students will be charged the applicable DSL tuition to cover the J.D. program and the applicable SFR tuition to cover the SFR degree program. The DSL tuition will be paid for the semesters that the student is in residence at DSL and the SFR tuition will be paid for the semesters that the student is in residence at University Park. A student may take up to one course (3 credit hours) per semester at the campus where the student is not residence without, any change in tuition, but must pay additional tuition to the nonresidential campus if he or she wishes to take additional course work at that campus during that semester.*

**Financial Aid and Assistantships.** Decisions on financial aid and assistantships will be made by each school according to that school’s procedures. Generally, SFR assistantships and financial aid will not apply to time spent at DSL.

**Fulfillment of Degree Requirements and Graduation.** A student in the program may complete the requirements for one of the degrees and be awarded that degree prior to completing all the requirements for the other degree, provided, however, that the student shall have successfully completed at least two semesters of work towards the other degree. All courses in one program that will count toward meeting the requirements of the other program must be completed before award of either degree. Students will be required to fulfill all requirements for each degree in order to be awarded that degree, subject to the interprogram transfer of credits. With respect to SFR’s requirement for a thesis or paper, work done while at DSL under the supervision of a DSL faculty member may be appropriate for incorporation into the thesis or paper with the approval of the SFR committee (in such cases, the committee should consider whether credits afforded such work will be subject to the 12-credit maximum for interprogram transfers described in paragraph 6(b) and the DSL faculty member should be a member of the committee).

*After taking comprehensive examinations, a Ph.D. student must pay tuition for all courses taken at any campus where the Ph.D. student is not registered.

314 Keller Building
814-863-2596

Degrees Conferred:
Ph.D., M.S., M.Ed.

The Graduate Faculty
- Rose Baker, Ph.D. (Penn State) Assistant Professor of Education
- Robert W. Clark, Ph.D. (Penn State) Associate Professor of Education
- Wesley E. Donahue, Ph.D. (Penn State) Associate Professor of Management Development
- Edgar I. Farmer, D.Ed. (Penn State) Professor of Education
- Kenneth C. Gray, Ed.D. (Virginia Tech) Professor Emeritus of Education
- Judith A. Kolb, Ph.D. (U of Denver) Associate Professor of Education
- Mark Threeton, Ph.D. (Penn State) Assistant Professor of Education
- Cynthia Pellock, Ph.D. (Penn State) Associate Professor of Education
- William J. Rothwell, Ph.D. (Illinois) Professor of Education
- Mark Threeton, Ph.D. (Penn State) Assistant Professor of Education
- Richard A. Walter, Ph.D. (Penn State) Associate Professor of Education

The general focus of the program is preparation for entry into professional positions within the broadly conceived field of workforce education and development, including human resource development in industry, secondary and postsecondary technical education, and employability programs for special populations. Emphases within the program include: training and development/human resources, leadership/administration, school-to-work, and postsecondary technical and community college leadership.

Admission Requirements
Admission to graduate programs in Workforce Education and Development (WF ED) is based on the faculty's evaluation of a candidate's prior undergraduate and graduate work, relevant prior work experience including military service, and career goals. A minimum undergraduate GPA of 2.50 is required for admission to the master's degree program. A GPA of 3.00 in prior graduate course work is required for admission to the doctoral program.

Degree Requirements
Master's Degrees Requirements
M.Ed. and M.S. degrees are offered in Workforce Education and Development, both of which require a minimum of 30 credits beyond the baccalaureate degree. M.S. candidates must complete a master's thesis or paper. Candidates for the M.Ed. degree must complete a written comprehensive examination.

Doctoral Degrees Requirements
The Ph.D. degree is offered in Workforce Education and Development. Two or more years of prior full-time work experience that is relevant to WF ED is an important consideration in evaluating applications for the doctoral program. Students are admitted only for the fall semester. Beginning students are not formally granted candidate status for a doctoral degree until successfully completing the candidacy exam given in the spring semester. Please see WF ED Web site for further details.

Student Aid
A limited number of graduate assistantships available to students in this program and other forms of student aid are described in the Student Aid section of the Graduate Bulletin.

Courses
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

The Pennsylvania State University
Dual-Title Graduate Degrees in Women's Studies (WMNST)

Program Home Page
CAROLYN SACHS, Head, Department of Women's Studies
LORI GINZBERG, Graduate Officer
133 Willard Building
814-863-4025; fax: 814-863-3578

Degrees Conferred

Students electing this program through participating departments will earn a degree with a dual title at both the Ph.D. and M.A./M.S. levels, i.e., Ph.D. in (graduate program name) and Women's Studies, or M.A./M.S. in (graduate program name) and Women's Studies.

The following graduate programs offer dual degrees in Women's Studies: Adult Education, Curriculum and Instruction, English, French, Geography, History, Philosophy, Political Science, Psychology, and Rural Sociology.

The Graduate Faculty

Women's Studies-affiliated faculty include individuals with budgeted appointments in Women's Studies and individuals with courtesy joint appointments. The following faculty members have budgeted and courtesy joint appointments in Women's Studies:

- Micaela Amato, M.F.A. (Colorado) Professor of Art and Women's Studies
- Lee Ann Banaszak, Ph.D. (Washington U) Associate Professor of Political Science and Women's Studies
- Wenda Bauchspies, Ph.D. (Rensselaer) Assistant Professor of Science, Technology, and Society, and Women's Studies
- Robin Becker, Ph.D. (Boston) Associate Professor of English and Women's Studies
- John P. Christman, Ph.D. (Illinois) Associate Professor of Philosophy and Women's Studies
- Corinne Clark-Evans, Ph.D. (Bryn Mawr) Associate Professor of French, Women's Studies and African American Studies
- Deborah Clarke, Ph.D. (Yale) Associate Professor of English and Women's Studies
- Mary De Jong, Ph.D. (S. Carolina) Associate Professor of English and Women's Studies
- Linda Dowker, Ph.D. (Syracuse) Associate Professor of Geography and Women's Studies
- Robert Drago, Ph.D. (UMass) Professor of Labor Studies and Industrial Relations and Women's Studies
- Yvonne Gaudelius, Ph.D. (Penn State) Associate Professor of Art Education and Women's Studies
- Lori Ginzberg, Ph.D. (Yale) Associate Professor of History and Women's Studies
- Cheryl Glenn, Ph.D. (Ohio) Associate Professor of English and Women's Studies
- Marina Goniick, Ph.D. (Toronto) Assistant Professor of Curriculum and Instruction, and Women's Studies
- Amy Greenberg, Ph.D. (Harvard) Associate Professor of History and Women's Studies
- Irene Harvey, Ph.D. (York) Associate Professor of Philosophy and Women's Studies
- Lisa Hogan, Ph.D. (Indiana) Senior Lecturer in Communication Arts and Sciences, and Women's Studies
- Charlotte Hosten, M.F.A. (Columbia) Associate Professor of English and Women's Studies
- Kathryn E. Hood, Ph.D. (Temple) Associate Professor of Human Development and Women's Studies
- Patricia D. (Michigan) Associate Professor of Anthropology and Woman's Studies
- Jane Juffer, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of English and Women's Studies
- Julie Kasdorff, Ph.D. (NYU) Associate Professor of English and Women's Studies
- Claire Katz, Ph.D. (Michigan) Associate Professor of Philosophy, Jewish Studies, and Women's Studies
- Karen Keifer-Boyd, Ph.D. (Oregon) Associate Professor of Art Education and Women's Studies
- Patricia Koch, Ph.D. (Penn State) Associate Professor of Biobehavioral Health, Health Education, and Women's Studies
- Joan Landes, Ph.D. (NYU) Ferrer Professor of Early Modern History and Women's Studies
- Margaret Lyday, Ph.D. (Catholic U of America) Associate Professor of English and Women's Studies
- Janet Lyon, Ph.D. (Virginia) Associate Professor of English and Women's Studies
- Christiane Makward, Ph.D. Docteur en Lettres (Sorbonne) Professor of French and Women's Studies
- Phyllis Mansfield, Ph.D. (Penn State) Professor of Women's Studies
- Sophia McClenenn, Ph.D. (Duke) Associate Professor of Comparative Literature, Spanish, and Women's Studies
- Sally McCorkle, M.F.A. (Rutgers) Associate Professor of Art and Women's Studies
- Sally McMurry, Ph.D. (Cornell) Professor of American History and Women's Studies
- Jennifer Mittelstadt, Ph.D. (Michigan) Assistant Professor of History and Women's Studies
- Benedicte Moncau, Ph.D. (Maryland) Associate Professor of French and Women's Studies
- Cecelia Novero, Ph.D. (Chicago) Assistant Professor of German, Comparative Literature, and Women's Studies
- Stacy Rogers, Ph.D. (Ohio State) Associate Professor of Sociology, Crime, Law, and Justice, and Women's Studies
- Carolyn Sachs, Ph.D. (Kentucky) Professor of Rural Sociology and Women's Studies
- Stephanie Shields, Ph.D. (Penn State) Professor of Psychology and Women's Studies
- Miriam Shafer, Ph.D. (SUNY, Stony Brook) Associate Professor of History and Women's Studies
- Sandra Spanier, Ph.D. (Penn State) Associate Professor of English and Women's Studies
- Stephanie Springgay, Ph.D. (U of British Columbia) Assistant Professor of Art Education and Women's Studies
- Susan Squier, Ph.D. (Stanford) Julia Gregg Brill Professor of English and Women's Studies
- Shannon Sullivan, Ph.D. Assistant Professor of Philosophy and Women's Studies
- Nancy Tuana, Ph.D. (California) DuPont/Class of 1949 Professor in Ethics; Professor of Philosophy and Women's Studies; Director, Rock Ethics Institute; Interim Head, Department of Philosophy
- Cassandra Veney, Ph.D. (Missouri) Assistant Professor of Philosophy and Women's Studies, and African and African American Studies
- Theresa K. Vescio, Ph.D. (Kansas) Professor of Psychology and Women's Studies
- Annarone M. White, Ph.D. (Washington U) Assistant Professor of Women's Studies, African and African American Studies
- Linda Woodbridge, Ph.D. (UCLA) Professor of English and Women's Studies
- Linda Wright, Ph.D. (Southern California) Assistant Professor of Biobehavioral Health and Women's Studies
- Melissa Wright, Ph.D. (Johns Hopkins) Assistant Professor of Geography and Women's Studies

Dual-title degrees grounded in both Women's Studies and a given discipline will acknowledge and foster scholarly work across disciplines. A dual-title degree program will increase the intellectual rigor and breadth of graduate work through immersion of candidates in Women's Studies and their discipline. The dual-title degree will also provide a context in which students can learn to synthesize knowledge within and across disciplinary boundaries. In addition, a dual-title degree program provides students with an opportunity for increased work within a pedagogical framework that also encourages an interdisciplinary approach to teaching.

The primary advantages of dual-title degrees include the intellectual and academic advantages of interdisciplinarity, strengthening the reputation of individual programs/departments through innovative degree programs, increased recruitment of quality graduate students, and improved placement of doctoral graduates.

The dual-title degree programs do not duplicate other degree programs in the University.

Admission Requirements

In addition to the admission requirements set forth by the Graduate School and the cooperating department, students will be admitted to graduate study in Women's Studies by an admissions committee of Women's Studies-affiliated faculty. The Women's Studies program will follow the timetable and admission requirements of the cooperating department. Applicants should have a junior/senior cumulative average of at least 3.00 (on a 4.00 scale) and appropriate
course background should be considered for study. It is required that prospective students seeking admission to a dual-title degree program will write a statement of purpose that addresses the ways in which their research and professional goals will reflect an interest in interdisciplinary and feminist research.

Degree Requirements

The dual-title degree will have requirements above those for the graduate minor, which currently requires 9 credit hours for the M.A./M.S. and 15 credit hours for the Ph.D. The requirements for the dual-title degree include increased course work, additional components to the comprehensive exams at the doctoral level, and the completion of women's studies related theses at both the master's and doctoral level. Degree requirements for dual-title degrees in Political Science, French, History, English, Education, Geography, Curriculum and Instruction, and Philosophy will be added to the Women's Studies Graduate Handbook.

Master's Degree

9 required credits (WMNST 501, WMNST 502, WMNST 507)
3 additional credits of Women's Studies course work
Thesis on a Women's Studies-related topic, or another 3 additional credits of Women's Studies course work and a master's essay will be approved by the student's committee

Ph.D. Degree

9 required credits (WMNST 501, WMNST 502, WMNST 507)
9 additional credits of Women's Studies course work (at least 6 of these should be at the 500 level)
Comprehensive examination in Women's Studies and the disciplinary field
Dissertation on a Women's Studies-related topic will be approved by the student's committee

Foreign Language and English Competency Requirements

The student will fulfill the language requirement specified by the cooperating department through which the student is admitted to the dual-title degree program.

Candidacy

In order to be admitted to doctoral candidacy in the dual-title degree program, students must meet the Ph.D. candidacy requirements specified by the cooperating department. In addition, the student will be required to present a portfolio of work in Women's Studies to their committee. Such a portfolio would include a statement of the student's interdisciplinary research interests, a program plan, and samples of writing that indicate the student's work in Women's Studies.

Committee Composition

For a dual-title M.A./M.S., the recommended student's committee will include at least one Women's Studies-affiliated faculty member.
For a dual-title Ph.D., 2 out of 4 members of the committee will be Women's Studies-affiliated faculty members.

Comprehensive Exams

The Women's Studies affiliated faculty members on the student's committee are responsible for administering a comprehensive examination in Women's Studies that constitutes a portion of the student's comprehensive exams. The women's studies portion of the exam will focus on the following areas: feminist theory, feminist methodology, global feminism, and feminist studies in the student's discipline.

Dissertation

A dissertation on a women's studies topic is required of students in the dual-title degree program. The women's studies-related topic of the dissertation will be approved by the student's committee.

Women's Studies Minor

An interdisciplinary dual-degree graduate minor is available, administered by the Women's Studies program. Each student's major and minor is planned by the student and the Women's Studies graduate adviser in consultation with the student's graduate adviser in his or her major field.

Master's Minor Requirements: Master's-level dual-title degree students are required to take 9 credits of course work in Women's Studies: WMNST 501 Feminist Perspectives on Research and Teaching (3 credits); WMNST 502 Global Feminism (3 credits); and WMNST 507 Feminist Theory (3 credits). Students also must complete 3 additional credits in Women's Studies, chosen in consultation with the Women's Studies graduate adviser.

Doctoral Minor Requirements: Doctoral-level dual-title degree students are required to take 9 credits of course work in Women's Studies: WMNST 501 Feminist Perspectives on Research and Teaching (3 credits); WMNST 502 Global Feminism (3 credits); and WMNST 507 Feminist Theory (3 credits). Students also must complete 9 additional credits of Women's Studies course work (at least 6 of which should be at the 500 level), chosen in consultation with the Women's Studies graduate adviser.

9 credits required credits of Women's Studies courses for master's level
15 credits required credits of Women's Studies courses for doctoral level

The above credits are in addition to the requirements for the student's major. Six credits consist of required courses in feminist theory (3) and feminist methodology (3). The remaining credits may include a combination of WMNST 400- and 500-level courses, as well as special topics courses (numbered 497 and 597) and independent/individual studies (496 and 596).

Prescribed courses (6 credits): WMNST 507 Feminist Theory; WMNST 501 Feminist Perspectives on Research and Teaching
Additional courses (a minimum of 3 credits at the 500 level)

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.
Applied Youth, Family and Community Education (AYFCE)

Degree Conferred:
M.Ed.

The Graduate Faculty
- Connie D. Baggett, Ph.D. (Penn State) Associate Professor of Agricultural and Extension Education
- Blannie E. Bowen, Ph.D. (Ohio State) Professor of Agricultural and Extension Education
- Cathy F. Bowen, Ph.D. (Ohio State) Professor of Agricultural and Extension Education
- Mark A. Brennan, Ph.D. (Penn State) Associate Professor of Agricultural and Extension Education
- Thomas H. Bruening, Ph.D. (Iowa State) Associate Professor of Agricultural and Extension Education
- Marilyn Corbin, Ph.D. (Kansas State) Professor of Agricultural and Extension Education
- John G. Ewing, Ph.D. (Ohio State) Professor of Agricultural and Extension Education
- Daniel D. Foster, Ph.D. (Ohio State) Assistant Professor of Agricultural and Extension Education
- Tracy S. Hoover, Ph.D. (Penn State) Professor of Agricultural and Extension Education
- Patrese D. Ingram, Ed.D. (Western Michigan) Professor of Agricultural and Extension Education
- Claudia C. Mincemoyer, Ph.D. (Penn State) Professor of Agricultural and Extension Education
- Daniel F. Perkins, Ph.D. (Michigan State) Professor of Agricultural and Extension Education
- Rama B. Radhakrishna, Ph.D. (Penn State) Associate Professor and Interim Head of Agricultural and Extension Education
- Jan F. Scholl, Ph.D. (Iowa State) Associate Professor of Agricultural and Extension Education
- Nicole S. Webster, Ph.D. (Michigan State) Associate Professor of Agricultural and Extension Education
- Edgar P. Yoder, Ph.D. (Ohio State) Professor of Agricultural and Extension Education

The curriculum prepares students to assume leadership roles in education and human service organizations whose goals are to support and enhance the well-being of youth and families within community settings. Through this graduate program, students will: (1) design, implement, and evaluate educational programs for youth and families; (2) interpret relevant research in youth and family education; and (3) apply research and problem-solving strategies to increase professional effectiveness.

Admission Requirements
Applicants whose junior/senior grade-point average is below 3.00 on a 4.00 scale for their baccalaureate degree are required to submit Graduate Record Examinations (GRE) scores. The program is tailored to students with baccalaureate degrees in family and consumer science, youth development, or other disciplines closely related to the human sciences.

Degree Requirements
For the M.Ed., a minimum of 30 credits is required, including a 3-credit professional paper or thesis. The paper or thesis is defended in a one-hour oral examination. The graduate program is organized around the following themes: youth and family education, community-based education, and research. Students have the flexibility to focus their programs in areas of professional interest within youth and family education.

Student Aid
Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin. Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Graduate Minors

A graduate minor may be taken in one of the approved graduate degree programs offered at Penn State. However, some formal graduate minors have been approved by the Graduate Council, such as the minors listed on this page. A minor at the graduate level must represent curriculum and study that reflect graduate-level concepts and scholarship, with a preponderance of courses at the 500 level.

A student seeking a minor must have the approval of the student's major program of study, the minor program, and the Graduate School. A student may not pursue more than three minors at one time. If a student pursues more than one minor, each minor must have a separate group of courses to support it (i.e., none of the courses may be used concurrently).

A doctoral minor consists of no fewer than 15 graduate credits of integrated or articulated work in one field related to, but different from, that of the major with a preponderance of courses at the 500 level; however, at a minimum, 6 credits must be at the 500 level. Official requests to add a minor to a doctoral candidate's academic record must be submitted to Graduate Enrollment Services prior to establishing the doctoral committee and prior to scheduling the comprehensive examination. For more information regarding minors, please see the following web pages.

--- For doctoral students:
http://bulletins.psu.edu/bulletins/whitebook/degree_requirements.cfm
--- For Ph.D. candidates:
http://bulletins.psu.edu/bulletins/whitebook/degree_requirements.cfm?section=degreeReq2
--- For D.Ed. candidates:
http://bulletins.psu.edu/bulletins/whitebook/degree_requirements.cfm?section=degreeReq3

A master's minor consists of no fewer than 6 credits of integrated or articulated work in one field related to, but different from, that of the major; however, at a minimum, 3 credits must be at the 500 level. Official requests to add a master's minor to a student's academic record must be submitted to Graduate Enrollment Services at least one semester prior to the semester the student intends to graduate.

Updated: 12/14/11
Bioinformatics

The interdisciplinary graduate minor in Bioinformatics is administered by the Engineering Division at Penn State Great Valley and requires 15 graduate credits. The minor offers an opportunity for graduate students in all Penn State colleges and majors to pursue a focused set of graduate courses and gain core competency and experience in informatics, statistics, and ethics as they relate to the field of biotechnology.

Students complete a 9-credit core curriculum of SYSEN 509 Biostatistics, SWENG 552 Bioinformatics, and S T S 589 Ethics and Values in Science and Technology. Students then build upon the core by selecting 6 credits of electives focusing on database design concepts, data mining, and genetic algorithms.

Nine of the 15 credits in this minor may be applied toward the student’s major program of graduate study. Students seeking admission to the Bioinformatics minor without appropriate prerequisite courses may be required to complete preparatory courses that are not applicable to either their major or minor program of study.

Additional information and application materials may be found at www.gv.psu.edu/bioinformatics.

Computational Science

The Department of Aerospace Engineering administers this interdisciplinary minor. Each student’s program is planned by the student and a designated computational science adviser, in consultation with the graduate adviser in the student's major field.

The minor offers an opportunity for students in all colleges and majors to pursue a focused set of courses that emphasize computational science. The minor requires 9 credits in computational science courses for a master's degree and 15 credits for a doctoral minor. All students must take at least one of these: AENSP 424, CMPSC 450, NUC E 550, or CSE 557 and at least one of these: MATH 523, MATH/CSE 550, STAT 500, or STAT/IST 557. The additional credits will be chosen from a list of approved courses on the CSCI Web site (www.csci.psu.edu). In addition, for the Masters Minor and Ph.D. Minor the students can use at most 6 and 9 credits, respectively, from (or cross-listed with) their home department.

More information can be found on the CSCI Web site: http://www.csci.psu.edu.

The interdisciplinary graduate minor in Gerontology is administered by a committee of faculty appointed by the Gerontology Center Advisory Board. The committee members represent diverse programs within the University. Students admitted to the minor will develop a course of study that includes both prescribed course work and additional course work suited to the student’s interests. The minor course of study will be developed jointly by the student, the student’s academic adviser, and one member of the graduate minor gerontology committee. Contact the Gerontology Center (S-105 Henderson) for information regarding the committee membership.

The minor requires a minimum of 10 credits of the master’s level and 15 credits at the doctoral level, 10 of which are prescribed. The prescribed courses are: BIOL 409 Biology of Aging (3); HD FS/PSYCH 445 Development throughout Adulthood (3); HD FS 590 Gerontology Colloquium (1); and SOC 435/HD FS 434 or SOC 535 (3). Doctoral students must select a minimum of 5 additional credits from among the following courses: ADTED 460, 505, CN ED 415, EDPSY 527, HD FS 446, 447, 573, H PA 442, KINES 481, 482, NURS 464, 500, SOC 535, and gerontology-related special topics courses (SUBJ 497, 597) or independent studies (SUBJ 496, 596).

Latin American Studies

The Latin American Studies graduate minor is administered by the Latin American Studies committee. The minor offers students the ability to study the region of Latin America from an interdisciplinary perspective and is open to students from across the University. It is housed in three departments: History; Comparative Literature; and Spanish, Italian and Portuguese. Graduate students from across the University are encouraged to participate. Students who are admitted to the minor will develop courses of study suited to their special interests. The minor for each student will be planned jointly by the student, the student’s doctoral adviser, and an adviser designated by the Latin American Studies committee. Any change in the plan must be approved by both advisers. A minimum of 15 credits must be completed, with a minimum of 6 credits at the 500-level. Per graduate school regulations for the minor, a representative of the minor will participate on the student’s doctoral committee.

Latina and Latino Studies

The Latina and Latino Studies graduate minor is an interdisciplinary minor that will be administered by a faculty committee appointed by the dean of Liberal Arts and made up of faculty in English, Comparative Literature, Spanish, and other appropriate disciplines. Graduate students from across the university are encouraged to participate. Students who are admitted to the minor will develop courses of study suited to their special interests. The minor for each student will be planned jointly by the student, the student's doctoral adviser, and an adviser designated by the Latina and Latino Studies committee. Any change in the plan must be approved by both advisers.

A minimum of 15 credits must be completed. Per graduate school regulations for the minor, a representative of the minor will participate on the student's doctoral committee. This representative may be a member of the Latina and Latino Studies committee or any other faculty member approved by that committee.

Literary Theory, Criticism, and Aesthetics

This is an interdisciplinary doctoral minor that is administered by two designated advisers, one from the Department of Comparative Literature and one from the Department of Philosophy. Students who are admitted to the minor will develop courses of study suited to their special interests. The minor for each student will be planned jointly by the student and the two advisers, in consultation with the student's doctoral adviser in his or her major field. Any change in the plan must be approved by all of the advisers. A minimum of 15 credits must be selected from among the following courses (including at least 3 credits each in comparative literature and philosophy, chosen from the asterisked courses): ART H 410, CMLIT 502*, 503*, 580, ENGL 581, 582, 583, FR 571, GER 591, PHIL 413, 414*, 516*, 581, 582, SPAN 587, SPCOM 503, 505, 507, or THEA 503, 504. Note 1: 3 credits of SUBJ 596 in one of the nine subject areas indicated may be substituted for one of the non-asterisked 3-credit courses. Note 2: A student majoring in one of the nine subject areas may not include any courses in that field as part of the minor. Appropriate courses may be substituted.

Linguistics

The doctoral minor provides interested students with an opportunity to complete a program of scientific study focused on the nature, structure, and use of human language. The minor is designed to cover the foundations of the discipline of linguistics by reviewing fundamental core areas such as phonology and syntax. Course work is also available in many additional areas of linguistics such as semantics, morphology, language variation, historical linguistics, and discourse analysis.

The minor requires a minimum of 15 credits, 6 of which must be at the 500 level. Nine credits are prescribed in syntax (LING 400), phonology (LING 404), and a general introduction to linguistics (LING 401), although a linguistics course at the 500 level may be substituted for LING 401 with the approval of the director of the program in Linguistics.

Medieval Studies

The graduate minor in Medieval Studies offers graduate students in the humanities an interdisciplinary field of study in an important era in European development. The minor provides students with a broader historical and cultural background for their major discipline. Graduate status is required for admission to the minor.

The graduate minor in Medieval Studies requires 9 credits of course work (of which 3 credits are at the 500 level) for a master's candidate and 15 credits of course work (of which 6 credits are at the 500 level) for a doctoral candidate; the courses will be selected in consultation with an adviser for the minor, who will normally be a member of the Liberal Arts Medieval Studies Committee; and with the chair of the student's graduate committee. The courses for the minor will be chosen from at least two of the following areas outside the students' area of specialization: arts; history; literature and language; medieval studies; philosophy and religious studies; and other areas as available. The sequence of the courses will be determined by the student's major department.

Religious Studies

This is a graduate minor administered by the Religious Studies program leading to a minor at the master's or doctoral level. Each student's course of study would be planned jointly by the student and an adviser selected from the Religious Studies faculty, in consultation with the student's adviser in his or her major field.

The minor requires a minimum of 9 credits of Religious Studies courses for a master's degree and 15 credits for a doctorate. These credits are in addition to the requirements for a student's major. Three credits consist of a required course, Research in Religious Studies (RL ST/HIST 565). Students would select among 500-level Religious Studies course to fulfill the remaining requirements. These include: RL ST 532, 536, 539, 596, RL ST/HIST 510, 560, 561, 562, 563, 564.

With the consent of a student's adviser, the student may elect to take a 500-level course in a field closely related to Religious Studies that may help to satisfy the minor's requirements. This may not be in the student's major field.

Science, Technology, and Society

This interdisciplinary graduate minor is administered by the Science, Technology, and Society Program. Each student's program will be planned by the student and designated S T S graduate adviser, in consultation with the graduate adviser in the student’s major field.

The goal of the graduate minor in Science, Technology, and Society is to complement graduate and professional students’ major programs through study of the interactions among science, technology, and society. More specific objectives are to promote scholarship in the humanities and social sciences concerning the social and ethical dimensions of science and technology; to inform those training in the scientific and technical professions about the social and ethical dimensions of their professional practice; and to develop research and rhetorical skills used in shaping public discourses about, and public policies regulating, science and technology.

The minor requires 9 credits in S T S courses for a master's and 15 credits for a doctoral minor. Six credits consist of S T S 589 Ethics and Values in Science and Technology and S T S 591 Research and Writing in S T S. The remaining credits may include 400- and 500-level, special topics (S T S 497 and 597), and independent study (S T S 496 and 596) courses.

Second Language Acquisition

This interdepartmental doctoral minor draws upon the opportunities that various departments offer to study the processes of language acquisition and pedagogy, and to conduct research in these fields. Developments in the theories of language acquisition, the practices in language instruction, and the technical innovations provide a wide range of resources for secondary specializations in second language acquisition theory. The minor provides an official credential for doctoral students who complete an organized program of study.

The minor requires a minimum of 15 credits at the 400, 500, or 600 levels (beyond credits used for degree requirements in the student's field of study), consisting of one or two methodology courses totaling 3 credits and 12 additional credits selected from an interdepartmental list of eligible courses, with approval both by the student's doctoral committee in his or her major field, and by the person in charge of the minor. A maximum of 6 credits may be taken at the 400 level, and no more than 3 credits of 602 may count toward the minor. Courses in at least two departments must be included. Further, students must complete at least two semesters' experience in supervised teaching of either a foreign language or ESL, or alternative equivalent practicum if approved by the doctoral committee and the person in charge of the Minor.

In general, students whose major field of study in the Ph.D. is a concentration in foreign language acquisition or ESL are not eligible for this minor, as their field of specialization already includes this area. However, students in English as a Second Language may do the minor with a focus on foreign language acquisition or a student with a specialty area in forced language acquisition may complete the minor with a specialty area in English as a Second Language.
Social Thought

The purpose of the Social Thought minor is to enable graduate students in a variety of fields to study theories of society across conventional disciplinary boundaries. The minor enables qualified students to enrich their own chosen fields of study with readings and discoveries from other, contiguous fields. The minor requires at least 15 credits of courses with social thought content. These are courses taught by STP Affiliated Faculty or those approved by the STP Advisory Committee. Those 15 credits must include the following: at least 9 credits of courses from outside the student's major discipline and SOCTH 501 -- Introduction to Social Thought. In addition, at least one member of the student's dissertation committee must be an STP Affiliated Faculty and preferably be from outside the student's major discipline.

Women's Studies

This interdisciplinary dual degree graduate minor is administered by the Women's Studies program. Each student's major and minor is planned by the student and the Women's Studies graduate adviser in consultation with the student's graduate adviser in his or her major field.

**MASTER'S REQUIREMENTS:** Master's-level dual-title degree students are required to take 9 credits of course work in Women's Studies: WMNST 501 Feminist Perspectives on Research and Teaching (3 credits); WMNST 502 Global Feminism (3 credits); and WMNST 507 Feminist Theory (3 credits). Students also must complete 3 additional credits in Women's Studies, chosen in consultation with the Women's Studies graduate adviser.

**DOCTORAL REQUIREMENTS:** Doctoral-level dual-title degree students are required to take 9 credits of course work in Women's Studies: WMNST 501 Feminist Perspectives on Research and Teaching (3 credits); WMNST 502 Global Feminism (3 credits); and WMNST 507 Feminist Theory (3 credits). Students also must complete 9 additional credits of Women's Studies course work (at least 6 of which should be at the 500 level), chosen in consultation with the Women's Studies graduate adviser.

The minor requires a minimum of 9 credits of Women's Studies courses for a master's degree and 15 credits for a doctorate. These credits are in addition to the requirements for the student's major. Six credits consist of required course in feminist theory (3) and feminist methodology (3). The remaining credits may include a combination of WMNST 400- and 500-level courses, as well as special topics courses (numbered 497 and 597) and independent/individual studies (496 and 596).

**Prescribed courses (6 credits):** WMNST 507 Feminist Theory; WMNST 501 Feminist Perspectives on Research and Teaching. Additional courses (a minimum of 3 credits at the 500 level).

Postbaccalaureate and Graduate Credit Certificate Programs

Postbaccalaureate and graduate credit certificate programs are innovations that reflect emerging academic areas, and may be supplements or enhancements to existing degree programs. These credit certificate programs are designed to foster development of an area of specialty or competency within a discipline and flexibility is essential to accommodate the parameters of the discipline as well as the educational needs of the students. The programs consist of a sequence, pattern, or group of courses developed, supervised, and evaluated by the faculty members of the academic unit offering the program.
Addiction Studies

Postbaccalaureate Credit Certificate Program

Dr. Richard Hazler
331 Cedar Building
University Park, PA 16802
Phone: 814-863-2415
Fax: 814-863-7750
E-mail: rjh29@psu.edu

The postbaccalaureate certificate in Addiction Studies has emerged in response to the growing need among counselors, educators, nurses, clergy, other helping professionals, and individuals working directly in chemical dependency treatment and prevention settings. It is designed to enhance an individual's understanding of clients or students who are experiencing addiction, who may be at risk to experience addiction, or who are affected by somebody else's addiction. Students may opt for either the treatment track or the prevention track. All students must take four 3-credit core courses (12 credits total), as well as one additional 3-credit course for the Prevention track or two additional 3-credit courses for the Treatment track.

Admission Requirements

All applicants must have a baccalaureate degree from a regionally accredited undergraduate institution whose credit conditions are substantially equivalent to Penn State. Students whose baccalaureate degree is not in a field substantially similar to counseling (e.g., psychology, rehabilitation services, human services, human development and family studies) and/or without substantive work experience in either the addictions field or the field of counseling must take CN ED 403 as a prerequisite prior to being admitted to the certificate program.

PRESCRIBED COURSES

COUNSELOR EDUCATION (CN ED)

• 401. Foundations of Chemical Dependency Counseling (3)
• 416. Interpersonal Relationships and Alcohol and Other Drugs Dependency (3)
• 420. Chemical Dependency: Youth at Risk (3)
• 840. Trends and Issues in Addiction Counseling (3)

ADDITIONAL COURSES -- TREATMENT TRACK

COUNSELOR EDUCATION (CN ED)

• 541. Counseling Addicted Clients (3)
• 542. Dual Diagnosis (3)

ADDITIONAL COURSES -- PREVENTION TRACK

COUNSELOR EDUCATION (CN ED)

• 843. Prevention (3)

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

COUNSELOR EDUCATION (CN ED) course list

Effective Date: Summer Session 2009
Expiration Date: Spring Semester 2014

Adult Gerontology Primary Care Nurse Practitioner

Graduate Credit Certificate Program
Patricia Sweeney, PhD, CRNP, FNP, BC
203 Health and Human Development East
University Park, PA 16802
Telephone: 814-863-2211
Fax: 814-863-2925
E-Mail: pxs29@psu.edu

The purpose of the Adult Gerontology Primary Care Nurse Practitioner certificate is to prepare individuals with a Master's degree in nursing seeking additional certification as an Adult Gerontology Primary Care Nurse Practitioner. The curriculum includes the didactic and clinical courses required for application of the NP role and required for certification. The program of study is variable and may require a total of 29 credits. Some credits may be waived based on evaluation of transcripts and prior course completion.

Admission Requirements:
Applicants are required to have a Master's degree in nursing from a NLNAC or CCNE accredited institution. In addition, undergraduate chemistry and statistics are required. Students need to submit two recommendations and official transcripts from all undergraduate and graduate programs.

List of Courses Included in the Certificate:
NURS 502 (3), NURS 503 (3), NURS 504 (3), NURS 870 (3), NURS 871 (3), NURS 872A (3), NURS 873A (4), NURS 874A (6)

Agricultural Biosecurity

Graduate Credit Certificate Program
Gretchen A. Kuldau
321 Buckhout Laboratory
Department of Plant Pathology
Penn State University
University Park, PA 16802
Telephone: 814-863-7232
Fax: 814-863-7217
E-mail: kuldau@psu.edu

This 12-credit graduate certificate program is designed to provide students with broad training in the field of agricultural biosecurity. Courses cover animal and plant health, and food defense aspects of agricultural biosecurity. Content is both theoretical and applied but with an emphasis on practical application of knowledge gained. A distance education format is used to accommodate the needs of professionals already active in this area.

The certificate program is an attractive option for those who desire advanced graduate training but do not require the full Master Degree program. It is also ideal for students who wish to move into the degree program once all admissions requirements are fulfilled (e.g., GRE).

ADMISSION REQUIREMENTS

Applicants must present a baccalaureate degree from a regionally accredited institution and are expected to have a 3.0 or higher undergraduate grade point average. Applicants whose native language is not English must provide evidence of proficiency in English with a minimum TOEFL score of 550 (paper-based test), 220 (computer-based test) or 80 (internet-based test). Special backgrounds, abilities, and interests related to agricultural biosecurity are desirable.

COURSES

AGRICULTURAL BIOSECURITY (AGBIO)

520. Agricultural Biosecurity (3)
521. Food Defense (3)
801. Veterinary Infectious Disease Diagnostic and Surveillance Systems (3)
802. Plant Protection (3)

Effective Date: Spring Semester 2010

Applied Behavior Analysis

Postbaccalaureate Credit Certificate Programs

http://www.worldcampus.psu.edu/AppliedBehaviorAnalysis_AppliedBehaviorAnalysisAdmissions.shtml

Two options are offered for educators or other professionals in the field who want to develop their skills in the area of applied behavior analysis:

- Board Certified Associate Behavior Analyst Certificate Program—This 12-credit series of courses is designed for those who have earned at least a bachelor's degree and who wish to continue their professional development in the area of applied behavior analysis.
- Board Certified Behavior Analyst Certificate Program—This 15-credit series of courses is designed for those who have earned a master’s degree and seek advanced knowledge in the field of applied behavior analysis.

The board certified associate behavior analyst program and the board certified behavior analyst program share the first three courses. All courses are graduate-level courses that students can complete in one academic year. Each course is only offered once a year.

- SPLED 503A (ABA I)—Applied Behavior Analysis for Special Education: Basic Principles I
- SPLED 503B (ABA II)—Applied Behavior Analysis for Special Education: Basic Principles II
- SPLED 503C (ABA III)—Applied Behavior Analysis for Special Education: Extended Principles I
- SPLED 597* (ABA IV)—Applied Behavior Analysis for Special Education: Extended Principles II

*Students travel to Penn State University to attend “live” course held in conjunction with the National Autism Conference

Applied Statistics

Graduate Credit Certificate Program

James L. Rosenberger
326 Thomas Building
University Park, PA 16802
Telephone: 814-865-1340
Fax: 814-863-7114
E-mail: jlr@psu.edu

The graduate certificate in Applied Statistics helps quantitative professionals in a variety of fields become knowledgeable and skillful in applied statistics. The certificate was designed specifically for researchers working with statistical data who wish to advance their careers, and for those who seek career changes. The certificate is offered through Penn State’s World Campus. Students earn the certificate by completing 12 credits of instructor-led online course work. Two 3-credit courses are required, and the remaining 6 credits are selected from a list of electives. Students who successfully complete the certificate earn 12 academic credits and receive the graduate certificate in Applied Statistics. Students subsequently admitted to the Department of Statistics’s professional Master of Applied Statistics degree program may count up to 15 credits of certificate courses toward the M.A.S. degree.

Admission Requirements

An applicant must have received, from a regionally accredited institution, a baccalaureate degree earned under residence and credit conditions substantially equivalent to those required by Penn State. Applicants from countries in which English is not the primary language must earn TOEFL scores of at least 550 for the paper test or 213 for the computer-based test.

Admission Procedures

Students interested in applying for admission to the Graduate Certificate in Applied Statistics program should go to the World Campus web site: http://www.worldcampus.psu.edu/AppliedStatisticsCertificate_Admissions.shtml

PRESCRIBED COURSES

STATISTICS (STAT)

- 500. Applied Statistics (3)
- 501. Regression Methods (3)

ELECTIVES

Choose at least 6 credits from:

STATISTICS (STAT)

- 414. Introduction to Probability Theory (3)
- 415. Introduction to Mathematical Statistics (3)
- 480. "Introduction to SAS (1)
- 481. Intermediate SAS for Data Management (1)
- 482. "Advanced Topics in SAS (1)
- 502. Analysis of Variance and Design of Experiments (3)
- 503. Design of Experiments (3)
- 504. Analysis of Discrete Data (3)
- 505. Applied Multivariate Statistical Analysis (3)
- 506. Sampling Theory and Methods (3)
- 507. Epidemiologic Research Methods (3)
- 509. Design and Analysis of Clinical Trials (3)
- 510. Applied Time Series Analysis (3)

* Note: credits cannot be taken for both 483 and 480-482.

GEOGRAPHY (GEOG)

- 483. Problem-Solving with GIS (3)

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

 Penn State's 12-credit professional development certificate program in autism provides students with advanced training in the area of autism spectrum disorders and will help students earn continuing education credit in their profession, such as Pennsylvania Act 48 hours. A bachelor's degree in education or a related field is required for participation in the program.

Each course is a prerequisite for the following course. The courses must be taken in the order they are listed. All 5 courses must be taken from Penn State in order to earn this certificate.

Required Courses:
- **SPLED 481** (1 credit) Autism: Issues and Concerns
- **SPLED 482** (4 credits) Autism and Applied Behavior Analysis
- **SPLED 483** (3 credits) Communication and Social Competence
- **SPLED 484** (3 credits) Assessment and Curriculum
- **SPLED 485** (1 credit) Asperger Syndrome

Children's Literature

Postbaccalaureate Credit Certificate Program

http://www.worldcampus.psu.edu/ChildrensLiteratureCertificate_Admissions.shtml

Penn State's online graduate certificate in children's literature is designed for teachers, school librarians, and aspiring authors and illustrators who want to help children discover the joys of reading. All credits earned in this 15-credit graduate certificate program can be applied toward the children's literature track of the online master of education degree program in curriculum and instruction. To enroll in graduate-level courses, or to earn the graduate certificate in children's literature, you must have a baccalaureate degree.

Required Courses:

- LL ED 497E (3 credits) The Art of the Picture Book
- LL ED 497K (3 credits) Fantasy Literature for Children
- LL ED 502 (3 credits) Studies in Literature for Children
- LL ED 597C (3 credits) Doing Research in Children's Literature
- LL ED 597K (3 credits) Myth and Folklore for Children

E-mail: mds21@psu.edu

In the current medical climate, there is a growing need for academic clinicians and health care professionals who are trained in clinical research. Unfortunately, there are few programs that offer the didactic preparation for the unique requirements of a clinical researcher.

The primary goal of this program is to provide a formal, structured program that will prepare certificate candidates to pursue a successful career in clinical research. The curriculum includes courses in biostatistics, epidemiology, clinical trials, decision and cost-effectiveness analysis, outcomes measurement, quality management, health care economics and policy, scientific communication, and SAS statistical analysis computing. The 15 credit hour program offers courses on weekday evenings, enabling the student to continue clinical or employment activities. Certificate candidates will be able to complete the 15 credit hour requirement in 2 semesters.

Admission Requirements

The successful applicant must have completed a medical, nursing, or baccalaureate degree from a regionally accredited institution. Fellows and junior faculty members with current appointments at the Penn State College of Medicine, as well as nursing graduates and public health personnel, are target candidates for the certificate program.

COURSES

Core (6 prescribed credits)

PUBLIC HEALTH SCIENCES (PHS)

520. Principles of Biostatistics (3)
550. Principles of Epidemiology (3)

In addition to the 6 credits of required core coursework, students must select an additional 9 credits from the following list of electives:

PUBLIC HEALTH SCIENCES (PHS)

500. Research Ethics (1)
511. Methods in Translational Research (1)
518. Scientific Communications (1)
519. Patient Oriented Research (1)
535. Quality of Care Measurement (3)
536. Health Survey Research Methods (3)
551. Advanced Epidemiological Methods (3)
580. Clinical Trials Design Analysis (3)
581. Clinical Trials Case Studies (1)
801. Data Management (1)

Advanced Graduate Studies in Psychology: Applications in Clinical Psychology

Postbaccalaureate Credit Certificate Program

Barbara A. Bremer, Ph.D.
W157 Olmsted Building
Penn State Harrisburg
Telephone: 717-948-6362
Fax: 717-948-6519
E-mail: bab12@psu.edu

The certificate of Advanced Graduate Studies in Psychology: Applications in Clinical Psychology is treatment oriented and intended to prepare mental health counselors to work in community mental health settings. The four courses provide exposure to major subfields of applied clinical psychology, to enhance training received in a traditional master's degree program. This program helps enhance mental health professionals’ skills in providing services for individuals and families coping with psychological issues such as relationship difficulties, depression, decision making, trauma, anxiety, child custody, or adjustment.

Admission Requirements (including completion of a baccalaureate degree) as Applicable: Students must have obtained a master's degree from a regionally accredited institution of higher education in clinical or counseling psychology, or be concurrently enrolled as a degree student in Penn State Harrisburg's Applied Clinical Psychology master's program. For students currently enrolled in the master's program in Applied Clinical Psychology at Penn State Harrisburg, the certificate will be awarded upon completion of the 12 credits required for the certificate. The certificate cannot be awarded prior to completion of the master's degree. Course work counting for a graduate or undergraduate degree may not also be used to fulfill the requirements for the certificate.

Required Courses

COUNSELOR EDUCATION (CN ED)

- 505. Foundations of Career Development and Counseling Information(3)

PSYCHOLOGY (PSYC)

- 515. Clinical Health Psychology(3)
- 525. Forensic Psychology(3)
- 572. Neuropsychological Assessment(3)

If one of the required subdisciplines of applied clinical psychology was included in a student's masters program, the program will permit the student to select a substitute course that would provide the student with exposure to an area to which the student was not exposed in her or his masters program. Students, with program permission may substitute a 500-level psychology course, such as those listed below, for a required course she or he had previously taken in a masters program.

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Community and Economic Development

Graduate Credit Certificate Program

Dr. Diane McLaughlin
Department of Agricultural Economics and Rural Sociology
118-C Armsby Building
University Park, PA 16802
Phone: 814-863-8626
Fax: 814-865-3746
Email: dkk@psu.edu

The Graduate Certificate program in Community and Economic Development helps students prepare to confront the multidimensional challenges faced by community development practitioners. The main objective of the certificate program is to educate professionals who will assume leadership roles in helping establish and maintain viable communities. Recipients of the certificate will become deeply involved in assisting localities with a variety of issues, including: developing new organizations and new industries; growth management; protecting the environment; revitalizing downtown areas; enhancing the local quality of life; assisting educational, social, health, and human service systems; and developing vital infrastructure—in short, working with communities to help shape their own futures.

The certificate program teaches the theory, skills, and tools that allow practitioners to address the important issues in community and economic development. The certificate program emphasizes topical problems, drawing from the experiences of both students and the faculty. Students in Community and Economic Development gain a broad understanding of the dynamics of communities and their social, economic, and political systems. With this training, graduates have a wide range of career opportunities in an expanding job market. Some work for local or regional governments, industrial development authorities and chambers of commerce, major corporations, nongovernmental organizations, or consulting firms. Others may work for development authorities, housing authorities, planning commissions, or environmental planning and development agencies.

Program Requirements

The Graduate Certificate in Community and Economic Development (CEDEV Certificate) requires 15 credits, consisting of five 3-credit courses. The CEDEV Graduate Certificate is designed to build a basic level of knowledge and skills required for practitioners to address the important issues in community and economic development. Admission to the certificate requires applicants to provide evidence of completion of a baccalaureate degree from a regionally accredited institution.

The certificate program is designed primarily for professionals in the field who wish to expand their existing knowledge and for those who wish to learn about community and economic development, including those working in or interested in dealing with the variety of development issues in America's towns, boroughs, small cities and rural areas. All courses are delivered online through the Penn State World Campus.

The five required courses introduce students to the field and cover the topics of principles of community and economic development, leadership, community structure, capacity and processes, local economic development, planning, population, land use and municipal finance, and the methods and techniques of effective community and economic development. Courses in the certificate program are required courses in the master's degree program in Community and Economic Development and can be transferred into the master's program for qualified applicants.

Admission Requirements

Students with a 3.00 average (on a 4.00 scale) for the most recent two years of college/university education, or with an advanced degree, and with appropriate course or experiential backgrounds will be considered for admission. To complete an application for the graduate certificate in Community and Economic Development, please visit:

COURSES

COMMUNITY AND ECONOMIC DEVELOPMENT (CEDEV)

- 430. Principles of Economic Development Planning (3)
- 452. Rural Organization (3)
- 500. Principles of Community and Economic Development and Leadership (3)
- 509. Population, Land Use and Municipal Finance (3)
- 575. Methods and Techniques for Community and Economic Development (3)

Program is jointly offered by Penn State's World Campus and the Department of Agricultural Economics and Rural Sociology, College of Agricultural Science.

The Pennsylvania State University
The goal of this certificate program is to prepare security analysts and researchers to develop and apply advanced security needs of enterprise and personal environments. To be awarded the Certificate in Computer and Network Security, students must successfully complete 12 credits of graduate course work including CSE 543, and three of the following courses: CSE 443, CSE 544, CSE 545, or CSE 546.

Admission Requirements

The successful applicant will possess a baccalaureate degree in computer science, computer engineering, or a closely aligned field from Penn State or another accredited institution and is generally expected to have a minimum GPA of 3.0. International students must satisfy the Graduate School’s English language requirement. Professional experience will be taken into consideration for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

GRE scores are not required for nondegree graduate students. Individuals who wish to apply to the graduate degree program in Computer Science & Engineering must submit an application for admission, along with all of the required supporting documentation, including GRE scores.

COMPUTER SCIENCE AND ENGINEERING (CSE)

- 443. Introduction to Computer & Network Security (3)
- 543. Computer & Network Security (3)
- 544. System Security (3)
- 545. Network Security (3)
- 546. Cryptography (3)

To be awarded the Certificate in Computer and Network Security, students must successfully complete CSE 543, and three (3) of the following courses: CSE 443, CSE 544, CSE 545, or CSE 546. All courses must be completed with an average GPA of 3.0; students may not earn a grade of less than B- in any single course.

Corporate Finance

Graduate Credit Certificate Program

Dr. Simon Pak  
The School of Graduate Professional Studies  
Penn State Great Valley  
30 East Swedesford Road  
Malvern, PA 19355  
Phone 610-725-5348  
Fax 610-725-5224  
Email sjp14@psu.edu

The Finance faculty in the Master of Finance program at the School of Graduate Professional Studies at Penn State Great Valley offers a four-course (12-credit) graduate certificate program in corporate finance.

The program is designed to provide preparation for individuals who work or aspire to work in the corporate finance field as financial analysts, credit managers, investor relations officers, treasurers, controllers, or in related positions in the treasury department or controller's office of an organization, investment banking firms, and commercial lending, or in the area of mergers and acquisitions.

The curriculum focuses on a set of knowledge and skills in financial analysis and reporting, financial modeling and valuation, and capital structure. Course work emphasizes the development of competencies in building pro forma financial statements, company valuation, advanced capital budgeting based on a real options approach, and understanding of 10K reports, as well as mergers and acquisitions, internal control and planning, and decision making under uncertainty. Content is both theoretical and applied, with an emphasis on practical application of knowledge gained.

This certificate program is an attractive option for individuals who desire advanced education but who do not wish to pursue a master's degree at this time. It is valuable for recent college graduates and others who wish to enroll in courses to determine if they are interested in a complete master's degree program, as well as for professionals who already hold a master's degree and wish to update or expand their knowledge and skills. With program approval, the courses in this graduate certificate program may be applied to the Master of Finance degree program or the Master of Business Administration program at Great Valley.

Admission Requirements

Individuals wishing to enroll in this graduate certificate program must hold a baccalaureate degree from a regionally accredited institution earned under residence and credit considerations substantially equivalent to those required by Penn State. Applicants are expected to have achieved a 3.0 (B) or higher undergraduate grade point average and should have satisfactorily completed some course work in Business Statistics, Financial Management/Corporate Finance, and Microeconomics.

Applicants holding a master's degree should have attained at least a cumulative grade point average of 3.0 in previous graduate work. Professional experience will be taken into consideration for admission. Applicants should submit an online nondegree application, available at http://www.gradsch.psu.edu/portal/gateway.html, and the application fee (payable online), along with supporting credentials. Supporting credentials include two official transcripts from each undergraduate and graduate institution attended, a current résumé, and a statement of intent or career objective. Supporting credentials should be sent directly to the Admissions Office at Penn State Great Valley, 30 East Swedesford Road, Malvern, PA 19355.

Admission decisions are made by a faculty committee and are based on the quality of the applicant's credentials in relation to those of other applicants. Evaluation criteria include professional and academic accomplishments. Upon approval, certificate program students will enroll in course work on a nondegree basis. Students must complete each course with a grade of B or better in order to receive the certificate. Note that admission as a nondegree graduate student neither guarantees nor implies subsequent admission to a degree program. Nondegree students are not eligible to receive fellowships or graduate assistantships.

With program approval, all four courses in the certificate program may be applied to the master's degree program in Finance or the Master of Business Administration program at Great Valley. Certificate program students who wish to have the certificate courses applied to a master's degree program must formally be admitted to the master's degree program. Admission into the master's degree program is a separate step and is not guaranteed. Interested students should contact the Great Valley Admissions Office (telephone 610-648-3242 or email gyadmiss@psu.edu) for more information about how to apply and make a change from nondegree to degree status. Once a certificate program student is admitted to the master's degree program and enrolls on a degree basis, certificate courses completed with a B or better will be “transferred” into the program.

Up to 15 credits of course work taken on a nondegree basis may be applied to a graduate degree program at Penn State. However, admission into a graduate program, and credit toward a graduate degree for specific courses taken on a nondegree basis, is up to the graduate program.

International Applicants

International applicants should consult with a program adviser prior to applying for admission for more information about admission and enrollment requirements. International applicants must satisfy all Graduate School requirements for admission. The language of instruction at Penn State is English.

Curriculum

The graduate certificate program in corporate finance requires a total of four courses (12 graduate credits). Three of the courses are required (ACCTG 512, BUSAD 526, and FIN 531), and the fourth course is an elective selected from a list of three courses (ACCTG 524 or BUSAD 528 or FIN 532). Students completing each of the four courses with a grade of B or better will be eligible to receive a graduate certificate. All courses are 3 graduate credits.

Prescribed Courses (9 credits)

Accounting (ACCTG)

512. Financial Accounting Theory and Reporting Problems (3 credits)

Business Administration (BUSAD)

526. Current Issues in Corporate Finance (3 credits)

Finance (FIN)

531. Financial Management (3 credits)

Elective Courses (Choose 1 from the following 3 courses) (3 credits)

Accounting (ACCTG)

524. Managerial Accounting (3 credits)

Business Administration (BUSAD)

528. Mergers and Acquisitions (3 credits)

Finance (FIN)

532. Financial Decision Processes (3 credits)

The Pennsylvania State University
Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Career opportunities in the field of dietetics continue to expand. In addition to careers in traditional settings such as hospitals, nutrition professionals have more opportunities available in sports nutrition, corporate wellness programs, food and nutrition related industries, and public/community health settings. The Penn State College of Health and Human Development Dietetic Internship Certificate Program is committed to providing a broad range of educational and practical experiences that enable future dietetic professionals to strengthen their critical thinking skills and explore the myriad of opportunities available to them in the field. Students completing the certificate program receive a Verification Statement and are eligible to take the Registration Examination for Dietitians administered by the Commission on Dietetic Registration. The program has been granted accreditation by the Commission on Accreditation for Dietetic Education of the American Dietetic Association.

Admission Requirements

As required by the Commission on Accreditation for Dietetic Education, students must have a baccalaureate degree conferred before they enter the program. Additionally, applications are to be submitted by February 15 for the internship class starting in the fall. All applications must include (1) completed and signed standard American Dietetic Association application, (2) official transcripts from all schools, (3) three letters of recommendation (at least one from a registered dietitian), (4) personal statement, (5) Verification Statement or Declaration of Intent stating completion or proposed date of completion of required undergraduate course work, and (6) $50 nonrefundable application fee.

Selection criteria are based on strength of undergraduate academic record, relevant work experience in the field of dietetics, personal statement, letters of recommendation, and volunteer and other experiences. The selection committee, composed of professionals in the field of dietetics and faculty members, evaluates the applications and ranks them accordingly. The selections are then submitted to a computer matching service contracted by the American Dietetic Association. In mid-April, applicants as well as dietetic internship programs are notified of results.

PRESCRIBED COURSES

NUTRITION (NUTRN)

- 595A. Application of Community Nutrition -- Internship (3)
- 595B. Application of Food Service Management -- Internship (3)
- 595C. Application of Basic Clinical Nutrition -- Internship (1)
- 595D. Application of Advanced Clinical Nutrition -- Internship (4)
- 595E. Introduction to Nutrition Research -- Internship (1)
- 595F. Professional Portfolio -- Internship (1)

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Review Date: 08/24/2010
The certificate in Distance Education is a postbaccalaureate program designed for educators and trainers who want to expand their knowledge and build competencies in the field of distance education. The certificate program consists of 12 credits of course work in Adult Education (ADTED) of which 6 credits must be at the 500 level. The goal of the program is to assist the students in learning the latest trends, issues, and applications within the field of distance education while experiencing them firsthand as a student.

Admission Requirements

An applicant must hold either (1) a baccalaureate degree from a regionally accredited U.S. institution or (2) a tertiary (postsecondary) degree that is deemed comparable to a four-year bachelor's degree from a regionally accredited U.S. institution. This degree must be from an officially recognized degree-granting institution in the country in which it operates. Applicants must submit the following materials:

- A one-page resume
- A statement describing professional goals, experiences, and responsibilities (2 page maximum)
- One letter of recommendation
- Official transcripts from all undergraduate and graduate programs previously attended

List of Courses Included in the Certificate:

- ADTED 460: Introduction to Adult Education
- ADTED 470: Introduction to Distance Education
- ADTED 531: Course Design and Development in Distance Education
- ADTED 532: Research and Evaluation in Distance Education

Effective Date: Spring Semester 2012
Expiration Date: Fall Semester 2016

Phone: (814) 865-0472
Fax: (814) 865-0128
Email: davepopp@psu.edu

This 15-credit certificate program prepares educators and instructional design professionals who want to advance their skills in the design, development, and implementation of technology-based learning experiences. The 6-credit core prepares professionals in the use of instructional design principles to select and use appropriate educational technologies to meet learning goals. The remaining 9 credits of study can be used to develop integration skills with additional technologies or to acquire skills that prepare candidates to address issues that are encountered by technology integration leaders.

An applicant must hold either (1) a baccalaureate degree from a regionally accredited U.S. institution or (2) a tertiary (post secondary) degree that is deemed comparable to a four-year bachelor’s degree from a regionally accredited U.S. institution. This degree must be from an officially recognized degree-granting institution in the country in which it operates.

Core Courses (required courses for all candidates, 6 credits)
EDTEC 440: Educational Technology Integration (3 credits)
INSYS 415: Systematic Instructional Development (3 credits).

Candidates must complete three additional courses from the following list. (9 credits)
EDTEC 448: Using the Internet in the Classroom (3 credits).
EDTEC 449: Using Video in the Classroom (3 credits).
EDTEC 461: Designing Computer Networks for Education (3 credits).
EDTEC 462: Coordinating Technology Use in Education (3 credits).

E-mail: sms20@psu.edu

The certificate in Family Literacy, based on a multidisciplinary approach to literacy instruction involving both adult educators and early childhood education and family literacy specialists, is intended for location-bound students who work in a variety of literacy-related settings, both formal and informal. These settings include public schools and preschools (teachers, teaching assistants, reading specialists), organizations such as Head Start and grant-funded family literacy programs. The goal of the certificate is to build the capacity of the field to provide high-quality, research-based instruction and program development in family literacy. The certificate consists of a 12-credit program delivered online through the World Campus. The program objectives include strengthening program effectiveness through developing an understanding of staff roles and responsibilities as part of a collaborative family literacy team and supporting a learner-centered approach to delivering program services.

Admission Requirements

Students must have a baccalaureate degree to enroll.

PRESCRIBED COURSES

ADULT EDUCATION (ADTED)

- 456. Introduction to Family Literacy (3)
- 457. Adult Literacy (3)
- 458. Early Literacy Development (3)
- 459. Interactive Literacy: Parents and Children (3)

The Postbaccalaureate Certificate Program in Geographic Information Systems (GIS) helps professionals in a variety of fields become knowledgeable and skillful users of geographic information systems. The program was designed specifically for experienced GIS practitioners who lack formal education in geography and GIS and wish to advance their careers, and for those who seek to make career changes. The program is offered through Penn State's World Campus. Students earn the certificate by completing four instructor-led online courses -- three required and one elective. Students who successfully complete the program earn 11 academic credits (2 credits for the first course, 3 credits each for the rest). Students subsequently admitted to the Department of Geography's Master of GIS degree program may count up to 15 credits of certificate program courses toward the MGIS degree.

Admission Requirements

Applicants must have received, from a regionally accredited institution, a baccalaureate degree earned under residence and credit conditions substantially equivalent to those required by Penn State. Applicants from countries in which English is not the primary language must earn TOEFL scores of at least 550 for the paper test or 213 for the computer-based test.

PRESCRIBED COURSES

GEOGRAPHY (GEOG)

- 482. The Nature of Geographic Information (2)
- 483. Problem-Solving with GIS (3)
- 484. GIS Database Development (3)

ELECTIVES

Choose at least 3 credits from:

GEOGRAPHY (GEOG)

- 485. GIS Programming and Customization (3)
- 486. Cartography and Visualization (3)
- 487. Environmental Applications of GIS (3)
- 488. Acquiring and Integrating Geospatial Data (3)

Graduate courses carry numbers from 500 to 599 - 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

School of Nursing
106 Health and Human Development East
Phone: 814-863-9901
Fax: 814-865-6625
E-mail: amk20@psu.edu

In conjunction with the Hartford Center of Geriatric Nursing Excellence, the Penn State School of Nursing offers a Geriatric Nursing Education Graduate Certificate program. The primary goal of the program is to prepare individuals with a current Master's degree in Nursing to teach geriatric nursing education at both the Associate and Baccalaureate degree levels. The curriculum includes 6 credits (two 3 credit courses) of didactic content in geriatric nursing and 6 credits (two 3 credit courses) of didactic content in education. All four courses will be delivered using distance technology. The education courses are currently available through the World Campus.

The Geriatric Nursing Education certificate program consists of four graduate-level courses (12 credits).

Admission Requirements

Applicants must hold either a Master's degree from a U.S. regionally accredited institution, or a Master's degree that is equivalent to a U.S. Master's degree from an officially recognized degree-granting international institution. The credit conditions for the Masters degree must be substantially equivalent to those required by Penn State's Master's degree programs in Nursing or related health disciplines. Copies of all undergraduate and graduate degree transcripts must accompany the application.

Prior to admission, transcripts are evaluated by the Director of the Hartford Center in collaboration with the admissions committee to ascertain successful completion of the core nursing courses. A recommendation regarding admission is discussed with the Associate Dean for Graduate Education prior to making an offer of admission.

PREScribed COURSES

NURSING (NURS)
522. Assessment of the Older Adult (3)
523. Nursing Interventions for Complex Problems of the Older Adult (3)

ADULT EDUCATION (ADTED)
460. Introduction to Adult Education (3)
506. Program Planning in Adult Education (3) OR
507. Research and Evaluation in Adult Education (3)

OR

CURRICULUM AND INSTRUCTION (C I)
501. Teaching as Inquiry (3)

EDUCATIONAL LEADERSHIP (EDLDR)
551. Curriculum Design: Theory and Practice (3)

To be awarded the Graduate Certificate in Geriatric Nursing Education, students must successfully complete
NURS 522, NURS 523, ADTED 460, and ADTED 506 or ADTED 507
- OR -
NURS 522, NURS 523, C I 501 and EDLDR 551.

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Graduate Credit Certificate Program

Dr. Jeremy Plant
Penn State Harrisburg
School of Public Affairs
Middletown, PA 17057
Phone: 717-948-6045
E-mail: jfp2@psu.edu

This 12-credit graduate certificate program is designed to provide students interested in the subject with a certificate to demonstrate knowledge of the Homeland Security and Defense system. Students will learn about the major legislation shaping homeland security policy, the interaction of key actors needed for successful homeland security and defense, and applications to the Commonwealth of Pennsylvania.

The certificate program is an attractive option for those who desire advanced education but do not wish a full Master's Degree program. It is also an attractive option for students who might wish to take a certificate to determine if they are interested in a complete degree program. For students in the i-MPS in Homeland Security, this would provide an additional credential. Finally, this certificate features classes that could serve as electives for current students at Penn State.

The curriculum consists of four required courses: P ADM 401 (Foundations of Homeland Security), P ADM 404 (Homeland Security and Defense in Practice), P ADM 802 (Collaboration and Integration: Multifaceted Approaches to Homeland Security), P ADM 803 (Strategic Planning and Organizational Imperatives in Homeland Defense and Security).

Admission Requirements

Applicants must present a baccalaureate degree from an accredited institution and must have a 3.0 or higher undergraduate grade point average.

PRESCRIBED COURSES:

12 credits

PUBLIC ADMINISTRATION (P ADM)

- 401. Introduction to Homeland Security (3)
- 404. Homeland Security and Defense in Practice (3)
- 802. Multifaceted Approaches to Homeland Security (3)
- 803. Strategic Planning and Organizational Imperatives in Homeland Defense and Security (3)

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

E-mail: axr32@psu.edu

Individuals involved in the design and development of products for human use will find the program content immediately applicable to their job. With an emphasis on the application of user engineering design principles, the tools and methods to assess and enhance quality and productivity for both consumers and employees are provided. Applications include medical devices, consumer products, military systems, software design and the workplace. The program is comprised of three courses from the Penn State curriculum. These courses provide students with both a breadth and depth in their exposure to user engineering tools and principles.

Admission Requirements

The successful applicant will possess a baccalaureate degree in a related technical field (with courses in calculus and physics) and is generally expected to have a minimum GPA of 3.0. International students must satisfy the Graduate School’s English language requirement. Professional experience will be taken into consideration for admission. Exceptions to the minimum 3.0 grade-point average may be made for students with special backgrounds, abilities, and interests.

GRE scores are not required for nondegree graduate students. Individuals who wish to apply to the graduate degree program in Industrial Engineering must submit an application for admission, along with all of the required supporting documentation, including GRE scores.

PRESCRIBED COURSES (9 credits)

INDUSTRIAL ENGINEERING (I E)

- 479. Human Centered Product Design and Innovation (3)
- 553. Engineering of Human Work (3)
- 558. Engineering of Cognitive Work (3)

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

The Pennsylvania State University
Information Systems Security

Postbaccalaureate Credit Certificate Program

Lead Certificate Chair:
Michael McNeese
Associate Dean for Research and Graduate Programs
mdm25@psu.edu
814-865-6170

This postbaccalaureate certificate program is designed to provide students or professionals with both a breadth and depth of training in information security. The certificate will enable those completing the program to market to academic institutions, government, and technology-based businesses.

Student will be exposed to principles, models, tools, and applications in information security that specifically focus on network security, security and risk management, digital forensics, crisis and disaster management, and web security and privacy. A distance education format is used to accommodate the needs of professionals already active in this area.

The certificate program is an attractive option not only for those who desire advanced education but do not wish a full Master's Degree program, but also for students who might wish to take a certificate to determine if they are interested in a complete post-baccalaureate degree program in Information Sciences and Technology (IST). Up to 15 credits of coursework taken in non-degree status can count towards a graduate degree in IST.

To be awarded the Certificate, students must successfully complete 15 credits of graduate course work including IST 554, IST 515, and three of the following courses: IST 451, IST 454, IST 456, or IN SC 561.

Admission Requirements

An applicant must have received, from an accredited institution, a baccalaureate degree equivalent to those required by Penn State. A bachelor's degree in a related area (e.g., engineering and science), while not necessary for admission, is helpful in the successful completion of the certificate. It is expected that students will have a basic level of competency in computer language and information technology (related work experience can be used to demonstrate such competency). International students must satisfy the Graduate School's English language requirement.

GRE scores are not required for nondegree graduate students. Individuals who wish to apply to the graduate degree program in Information Sciences and Technology must submit an application for admission, along with all of the required supporting documentation, including GRE scores.

Required Courses (6 credits)
IST 515. Information Security and Assurance (3 cr.)
IST 554. Network Management and Security (3 cr.)

Elective Courses (Select 9 credits from the following courses or other courses as approved by the College)
IST 451. Network Security (3 cr.)
IST 454. Computer and Cyber Forensics (3 cr.)
IST 456. Security and Risk Management (3 cr.)
IST 564. Crisis, Disaster, and Risk Management (3 cr.)
IN SC 561. Web Security and Privacy (3 cr.)

The primary goal of the program is to improve the skills of institutional researchers on college and university campuses. The curriculum includes research design, assessment and evaluation, and the integration of strategic planning with institutional finance. All candidates are required to take 18 credits of coursework (21 credits if Intro Statistics is needed).

Admission Requirements

An applicant must have received, from an accredited institution, a baccalaureate degree earned under resident and credit conditions substantially equivalent to those required by Penn State. Students are expected to have knowledge of introductory statistics. Students without a background in statistics will enroll in a statistics course online before commencing their coursework in the certificate program.

PRESCRIBED COURSES

HIGHER EDUCATION (HI ED)
- 801. Foundations and Fundamentals of Institutional Research (3)
- 830. Designing Institutional Research Studies (3)

ELECTIVES (select four)

HIGHER EDUCATION (HI ED)
- 810. Planning and Resource Management Studies (3)
- 820. Studying Students and Student Affairs Programs (3)
- 840. Assessing Student Outcomes and Evaluating Academic Programs (3)
- 850. Analyzing Faculty Workload, Performance, and Compensation (3)
- 860. Conducting Enrollment Management Studies (3)

The purpose of this program is to prepare engineers to integrate laser-materials processing into the concurrent design and manufacture of multiscale components and systems of the future. Its objective is to offer a multidisciplinary curriculum drawing upon the strengths of several engineering departments and the Applied Research Laboratory. To be awarded the certificate in Laser-Materials Processing, students must successfully complete 12 credits of graduate course work, including E SC 540, E SC 541, and two of the following courses: E SC 542, E SC 543, or E SC 544.

Admission Requirements

The successful applicant will possess a baccalaureate degree in engineering, the sciences, or medicine from Penn State or another accredited institution and is generally expected to have a minimum grade-point average of 3.0. International students must satisfy the Graduate School's English language requirement. Professional experience will be taken into consideration for admission. Exceptions to the minimum 3.00 GPA may be made for students with special backgrounds, abilities, and interests.

GRE scores are not required for nondegree graduate students. Individuals who wish to apply to the graduate degree program in Engineering Science and Mechanics must submit an application for admission, along with all of the required supporting documentation, including GRE scores.

PRESCRIBED COURSES

ENGINEERING SCIENCE (E SC)

- 540. Laser Optics Fundamentals (3)
- 541. Laser-Materials Interactions (3)
- 542. Laser Integrated Manufacturing (3)
- 543. Laser Microprocessing (3)
- 544. Laser Laboratory (3)

To be awarded the Certificate in Laser-Materials Processing, students must successfully complete E SC 540, E SC 541, and two of the following courses: E SC 542, E SC 543, or E SC 544.

Effective Date: Spring Semester 2006

Blue Sheet Item #: 34-05-144
Review Date: 2/28/06
The Master of Health Administration program at Penn State Harrisburg offers a Long-Term Care Administration and Policy certificate program. This certificate program is designed for working long-term care administrators, professionals, and policymakers in for-profit, not-for-profit, and public organizations who need more knowledge and skills in long-term care administration and policy, as well as in long-term care systems and their relationship to and integration with health-care systems. Persons completing the program will receive a certificate from Penn State attesting to their accomplishment.

The Long-Term Care Administration and Policy certificate program consists of four graduate-level courses (12 credits).

**Admission Requirements**

Applicants for the certificate program must hold at least a bachelor's degree from a regionally accredited college or university and must have at least three years of professional experience.

To apply for the certificate program, all applicants must complete an application for nondegree admission to Penn State Harrisburg. Copies of all undergraduate and graduate degree transcripts must accompany the application.

Applicants admitted into the certificate program must have a master's degree or a 3.0 grade-point average in the last two years of undergraduate work. This requirement may be waived in exceptional circumstances. All courses must be taken for a letter grade. A 3.0 grade-point average in the certificate program courses is needed for the awarding of the certificate.

The courses for the certificate program must be taken at Penn State Harrisburg. If an applicant to the certificate program already holds a graduate degree in health care administration or a related field and has taken graduate courses that duplicate courses in the certificate program, he or she may, in conjunction with the certificate program coordinator, substitute other courses in the M.H.A. curriculum for those redundant courses.

**PRESCRIBED COURSES**

**HEALTH ADMINISTRATION (H ADM)**

- 542. Health Politics and Policy (3)
- 543. Long-Term Care Administration and Policy (3)
- 545. Health Financial Management (3)

**ELECTIVE COURSES (select one)**

**HEALTH ADMINISTRATION (H ADM)**

- 539. Health Systems Organization (3)
- 551. Health Care Law (3)
- 552. Health Delivery Systems: Managed Care (3)

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Adult Education in the Health and Medical Professions

Graduate Credit Certificate Program

Dr. Elizabeth Tisdell
Dr. Edward W. Taylor
W330 Olmsted, Penn State Harrisburg
Phone: 717-948-6640
Fax: 717-948-6064
E-mail: ejt11@psu.edu; ewt1@psu.edu

The primary goal of the Graduate Certificate in Adult Education in the Health and Medical Professions is to assist medical/health professionals in increasing their knowledge and competence in educating adult learners in medical education/health science settings.

The objectives are to promote: awareness of how learning theory informs practice; effective methods for teaching adults; development of a reflective practice; understanding of program/instructional design

Candidates are required to take 12 graduate credits, including the 9-credit core of three required classes and one other advisor-approved 3-credit graduate course related to the candidate’s specific area of interest. The required classes, in which assignments will relate to health/medical education issues, are:

ADTED 460: Introduction to Adult Education
ADTED 501: Foundations of Medical Education
ADTED 505: Teaching of Adults

The 3-credit graduate elective will be related to the candidate’s specific interest in medical/health education.

ADMISSION REQUIREMENTS

U.S. applicants must have a baccalaureate degree from a regionally accredited institution. International applicants must have a tertiary (post secondary) degree that is deemed comparable to a four-year U.S. bachelor’s degree. This degree must be from an officially recognized degree-granting institution in the country in which it operates. Additionally, all international applicants must meet the Graduate School’s English proficiency requirements.

Applicants must submit the following materials:
* A one-page resume
* A statement describing professional goals, experience, and responsibilities (2 pages maximum)
* One letter of recommendation
* Official transcripts for all undergraduate and graduate programs previously attended.

LIST OF COURSES INCLUDED IN THE CERTIFICATE

The three required classes include the following and assumes that the candidate would relate a part of their papers or assignments to the areas of health or medical education:

ADTED 460: Introduction to Adult Education
ADTED 501: Foundations of Medical Education
ADTED 505: Teaching of Adults

The 3-credit graduate elective will be related to the candidate’s particular interest related to health or medical education, and could include other graduate courses in the Adult Education Program or another related area.

Effective Date: Summer Session 2010
Expiration Date: Spring Semester 2015

The Pennsylvania State University
Nonprofit Administration

Postbaccalaureate Credit Certificate Program

Dr. Triparna Vasavada  
School of Public Affairs  
Penn State Harrisburg  
777 West Harrisburg Pike  
Middletown, PA 17057-4898  
Telephone: 717-948-6363  
Fax: 717-948-6320  
E-mail: tvv1@psu.edu

The purpose of the certificate is to provide comprehensive knowledge of the dynamics of conceptualizing, managing, and leading the nonprofit sector. It consists of four graduate courses (12 credits). One course is at the 500 level, and all courses have been approved by the School of Public Affairs and the Academic Affairs Committee.

Admission Requirements

An applicant must have received, from a regionally accredited institution, a baccalaureate degree under credit conditions substantially equivalent to those required by Penn State, with a grade-point average equivalent to that required by the M.P.A. Program.

PREScribed COURSES

PUBLIC ADMINISTRATION (P ADM)

- 510. Organization Behavior (3)
- 514. Public Organization and Managerial Consultation (3)
- 516. Strategic Planning (3)
- 517. Nonprofit Organizations: History and Evolution (3)
- 518. Nonprofit Organizations: Management and Leadership (3)
- 519. Nonprofit Organizations: Resource Development and Management (3)
- 522. Government Financial Management (3)
- 523. Governmental and Nonprofit Accounting (3)
- 550. Program Planning and Evaluation (3)

Graduate courses carry numbers from 500 to 599 and 800-899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

PUBLIC ADMINISTRATION (P ADM) course list

The Pennsylvania State University
Policy Analysis and Evaluation

Postbaccalaureate Credit Certificate Program

Dr. Goktug Morcol
School of Public Affairs
Penn State Harrisburg
777 West Harrisburg Pike
Middletown, PA 17057-4898
Phone: 717-948-6126
Fax: 717-948-6320
E-mail: gxm27@psu.edu

The primary goal of the program is to educate the current and future policy analysts and policy/program evaluation specialists in the public and nonprofit sectors about the basics principles and methods of policy analysis and evaluation. The program also helps them gain an understanding about a substantive public policy area of their choice. The certificate program consists of four graduate courses (12 credits). All courses are at the 500 level and have been approved by the School of Public Affairs and the Academic Affairs Committee.

Admission Requirements

An applicant must have received, from a regionally accredited institution, a baccalaureate degree under credit conditions substantially equivalent to those required by Penn State with a grade-point average equivalent to that required by the MPA program. An applicant also must have taken at least one graduate course in basic research methods/statistics or a recent undergraduate research methods/statistic course. The research methods/statistics course may be PADM 503: RESEARCH METHODS, which is currently offered in the MPA program, or its equivalent. If the course a student has taken is not PADM 503, then the student must obtain the approval of the person in charge of the certificate.

PRESCRIBED COURSES

PUBLIC ADMINISTRATION (P ADM)

- 507. Introduction to Public Policy Analysis (3)
- 535. Policy Analysis and Planning (3)
- 550. Policy and Program Evaluation (3)

One substantive public policy course (3 credits) must also be taken. This course may be at the 400, 500 or 800 level. It must be approved by the person in charge of the certificate program.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Project Management

Graduate Credit Certificate Program

Dr. Jeffrey K. Pinto, Professor of Management
Sam and Irene Black School of Business
Penn State Erie, The Behrend College
5091 Station Road
Erie, PA 16563-1400
Fax: 814-898-6223
E-mail: jkp4@psu.edu

Delivering complex projects on time and under budget is a daily challenge for most corporations. More organizations now use project-based methods to accomplish such tasks, resulting in increased demand for project managers. The online Graduate Certificate in Project Management is an interdisciplinary, 12-credit program that uses problem-based learning to provide a strong foundation in project management theory and practice. The program is offered by the AACSB Accredited Sam and Irene Black School of Business and Penn State is a Project Management Institute (PMI®) Registered Education Provider (R.E.P.), making this certificate a well-respected credential. In addition to being an excellent stand-alone credential, all of the courses in the Graduate Certificate in Project Management can be applied toward the Master of Project Management degree program also offered through Penn State’s World Campus. Approval to apply nondegree graduate credits toward a degree program must be granted by the student’s academic adviser, the program head or graduate officer, and the Graduate School. A maximum of 15 credits earned as a nondegree student may be applied to a degree program.

Admission Requirements

Only candidates who demonstrate high promise of success for graduate work are admitted to the program. All applicants must have received from a regionally accredited institution a baccalaureate degree earned under residence and credit conditions that are deemed substantially equivalent to those currently required by Penn State. Admission decisions are based on undergraduate grade-point average, Graduate Management Admission Test (GMAT) scores, and a personal essay.

Applicants must achieve a minimum GMAT score of 450. When this score is added to the applicant’s undergraduate grade-point average, multiplied by 200, the total must be at least 1,050 in order to meet minimum requirements for admission to the MPM program. Either the applicant’s cumulative undergraduate grade-point average or the junior/senior grade-point average can be used for this calculation. Applicants must also demonstrate proficiency in writing by obtaining at least a 4.0 on the analytical writing assessment portion of the GMAT, or by earning a grade of B or higher in a college English composition course. The MPM program emphasizes application of course concepts to actual project management opportunities and problems. Therefore, students who currently are, or were previously, employed as project managers or project team members will derive the greatest benefit from the program. All applicants must provide evidence of sufficient current or previous work experience that will enable them to successfully complete course assignments requiring the application of course concepts to real project management situations. This evidence may be provided in either the form of three letters of recommendation from individuals who know the applicant in a professional capacity or through nomination to participate in the program by an appropriate official within the applicant’s employing organization. Those who write letters of recommendation or submit nominations on behalf of the candidate will be asked to attest to the nominee’s suitability for the program of study concerning factors such as the applicant’s length of employment, level and areas of work responsibility, personal qualities, career goals, maturity of purpose, and program requirements to apply course concepts to work-related issues. Applicants are encouraged to consult with the program chair concerning the suitability of their work experiences in relationship to program requirements.

The language of instruction at Penn State is English. All international applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the Internet-based test (iBT). The minimum composite score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a graduate degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

All students must be computer literate and have ready and reliable access to a computer and the Internet to successfully complete the MPM program. They must know how to use word processing software, log on to an Internet provider, and use e-mail. Additionally, MPM students will use Microsoft Office in their coursework that will require they have a working knowledge of Microsoft Office programs such as Word, Excel, Power Point, and Access. Access to fax facilities may be needed as an additional form of communication between student and instructor or between students.

COURSES

Students complete MANGT 510, Project Management (3), in their first semester of study and three additional courses from the following list for a total of 12 credits:

MANAGEMENT (MANGT)

- 515. Cost and Value Management (3)
- 520. Planning and Resource Management (3)
- 525. Commercial and Procurement (3)
- 531. Organizations (3)
- 535. Interpersonal and Group Behavior (3)
- 540. Strategy: Corporate, Business and Project (3)

MANGT 515 through 540 may be taken either concurrently or subsequently with MANGT 510.

The certificate in advanced graduate studies in Psychology: Health Psychology is wellness oriented and is intended to prepare counselors to work in either a mental health or medical setting. This program of study enhances mental health professionals' skills in developing prevention programs, and in providing services for individuals and families coping with death, traumatic injuries, and chronic or terminal illnesses as well as general mental health concerns.

The certificate in advanced graduate studies in Psychology: Health Psychology requires taking four courses (12 credits) -- three required courses and one elective course.

Admission Requirements

Students must have obtained a master's degree from a regionally accredited institution of higher education in clinical or counseling psychology, or be concurrently enrolled as a degree student in Penn State Harrisburg's Applied Clinical Psychology master's degree program. For students currently enrolled in the master's program in Applied Clinical Psychology at Penn State Harrisburg, the certificate will be awarded upon completion of the 12 credits required for the certificate. The certificate cannot be awarded prior to completion of the master's degree. Course work counting for a graduate or undergraduate degree may not also be used to fulfill the requirements for the certificate.

PRESCRIBED COURSES

PSYCHOLOGY (PSYC)

- 514. Preventive Psychology (3)
- 515. Clinical Health Psychology (3)
- 516. Child Health Psychology (3)

ELECTIVE COURSES (select one)

PSYCHOLOGY (PSYC)

- 500. Ethics and Professional Practice in Psychology and Counseling (3)
- 501. Multicultural Counseling (3)
- 572. Neuropsychological Assessment (3)
- 594. Research Project (3)
- 595B. Clinical Internship (3)

COUNSELOR EDUCATION (CN ED)

- 505. Foundations of Career Development and Counseling Information (3)

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

E-mail: ojs10@psu.edu

The certificate program in Public Budgeting and Financial Management is offered by the Master of Public Administration program at Penn State Harrisburg, which is accredited by the National Association of Schools of Public Affairs and Administration.

The certificate is designed for administrators and professionals in government and not-for-profit organizations who need to acquire additional knowledge and skills in the following areas:

- fiscal and governmental aspects of budgeting and financial management
- development of organizational budgets
- governmental and not-for-profit accounting

Participants earn a certificate in Public Budgeting and Financial Management from Penn State Harrisburg upon completion of the three required courses (9 credits). All courses must be taken for a letter grade with at least a 3.0 average maintained.

Admission Requirements

Individuals who have a baccalaureate degree from a regionally accredited college or university and at least two years of managerial or administrative experience requiring significant work with budgets and other financial activities may enroll in this certificate program.

Participants will register for these courses as non-degree students and will receive the certificate upon successful completion of all three courses.

PRESCRIBED COURSES

PUBLIC ADMINISTRATION (P ADM)

- 502. Governmental Fiscal Decision-Making (3)
- 522. Government Financial Management (3)
- 523. Governmental and Not-for-Profit Accounting (3)

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Public Sector Human Resources Management

Postbaccalaureate Credit Certificate Program

Dr. Bing Ran
School of Public Affairs
Penn State Harrisburg
777 W. Harrisburg Pike
Middletown, PA 17057-4898
Phone: 717-948-6057
Fax: 717-948-6320
E-mail: bur12@psu.edu

The certificate program in Public Sector Human Resources Management is offered by the Master of Public Administration program at Penn State Harrisburg. The M.P.A. program is accredited by the National Association of Schools of Public Affairs and Administration.

The certificate is designed for administrators and other professionals in government and not-for-profit organizations who need to acquire additional knowledge and skills in the following areas:

- personnel/human resource management
- labor relations
- problem solving
- planning
- management of organizational change and development

The certificate program in Public Sector Human Resources Management requires taking four courses (12 credits) -- two required and two elective courses.

Admission Requirements

Individuals who have a baccalaureate degree from a regionally accredited college or university may apply for the certificate program. An application for non-degree admission to Penn State Harrisburg must be completed and submitted with copies of all undergraduate degree transcripts.

Applicants must have a 3.0 grade-point average in the last two years of undergraduate work. This requirement may be waived in exceptional circumstances.

Applicants who have graduate degrees in public administration or a related field, and who have taken graduate courses that duplicate courses in the certificate program, may substitute other courses in the M.P.A. curriculum for those courses. Graduate transcripts will be needed for this evaluation process. M.P.A. program certificate courses may be used toward completion of the master's degrees in Public Administration and in Health Administration but completion of a certificate neither implies nor guarantees acceptance into a graduate degree program. Please contact certificate coordinators.

PREScribed Courses

PUBLIC ADMINISTRATION (P ADM)

- 505. Personnel Management: Public and Nonprofit Sectors (3)
- 510. Organizational Behavior (3)

ELECTIVE COURSES (select two)

PUBLIC ADMINISTRATION (P ADM)

- 511. Organizational Change and Development (3)
- 512. Issues in Human Resources (3)
- 514. Public Organization and Managerial Consultation (3)
- 515. Labor Management Relations (3)
- 516. Strategic Planning (3)

TRAINING AND DEVELOPMENT (TRDEV)

- 518. Systematic Instructional Design in Training (3)

*Note: MNGMT 505, MNGMT 510 or H ADM 510, and MNGMT 515 may be substituted for these courses.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

University Park, PA 16802
Telephone: 814-863-1639
Fax: 814-863-1002
E-mail: cah14@psu.edu

The primary goal of the program is to assist educators with their efforts to teach students with special needs to read using research supported methods. The focus is on working with students in grades 4-12. Content of these courses provides a balanced mix of theory, research, and practical application in the areas of decoding, comprehension, vocabulary, fluency, and reading in the content areas as well as spelling and written expression. Candidates in this program will be required to take four 3-credit courses via distance and continuing education.

Admission Requirements

An applicant must have received, from a regionally accredited institution, a baccalaureate degree.

Required Courses

SPECIAL EDUCATION (SPLED)

- 498D. Teaching and Assessing Reading Skills (3)
- 498E. Specialized Applications in Special Education (3)
- 498F. Fundamentals of Reading Instruction (3)

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Structural Engineering

Postbaccalaureate Credit Certificate Program

Dr. Alex Aswad
Penn State Harrisburg
777 West Harrisburg Pike
Middletown, PA 17057-4898
Phone: 717-948-6132
Fax: 717-948-6276
E-mail: axa11@psu.edu

The Structural Engineering certificate program provides graduate-level study in the area of structural analysis and design. The flexibility of the program allows participants the opportunity to choose courses that will broaden their understanding and upgrade the specific skills which are essential to their jobs.

The program is designed for structural and civil engineers and graduates of certain engineering technology programs who are interested in developing a deeper insight into the principles and applications of structural design as it relates to different types of structures and materials. Individuals who are, or plan to be, active in the structural design field (consulting engineers; local, state, or federal agencies; and other organizations) should benefit from these courses by keeping current with design and analysis procedures and broadening their education.

The Structural Engineering certificate program consists of five courses (15 credits). To receive the certificate, participants must take one analysis course, three structural design courses, and one elective course. One engineering-related graduate course taken at another accredited institution may be considered for application toward the certificate.

All courses must be taken for a letter grade with a B average (3.0) maintained in order to receive the certificate. Courses in which a grade of D is received will not count toward the certificate. Individuals who complete certificate program courses and then proceed to a graduate program may be eligible to transfer the credits to the graduate program and the graduate school subject to the approval and the requirements of the specific program, such as the Master of Engineering degree in Engineering Science offered at Penn State Harrisburg.

Admission Requirements

Individuals with a baccalaureate degree in civil, architectural, or a related engineering program may enroll in this certificate program. Prerequisites include the basic undergraduate courses in mechanics, structural analysis, and structural design.

ANALYSIS COURSES (select one)

CIVIL ENGINEERING (C E)

- 447. Structural Analysis by Matrix Needs (3)
- 540. Structural Analysis by Classical Methods (3)
- 541. Structural Analysis (Finite Methods) (3)
- 597. Special Topics (Analysis-Related) (3)

ENGINEERING MECHANICS (E MCH)

- 500. Advanced Mechanics of Materials (3)
- 527. Structural Dynamics (3)

STRUCTURAL DESIGN COURSES (select three)

CIVIL ENGINEERING (C E)

- 449W. Design of Prestressed Concrete Structures (3)
- 513. Advanced Foundation Engineering (3)
- 544. Behavior and Design of Reinforced Concrete Members (3)
- 545. Design of Metal Structures (3)
- 546. Reinforced Concrete Slabs (3)
- 548. Structural Design for Dynamic Loads (3)
- 597. Special Topics (Design-Related) (3)

*ELECTIVES (select one)

CIVIL ENGINEERING (C E)

- 432. Construction Project Control (3)
- 550. Engineering Construction Management (3)

COMPUTER SCIENCE (COMP)

- 401. Numerical Analysis (3)

STATISTICS (STAT)

- 451. Introduction to Applied Statistics (3)

*An additional analysis course or design course may be used as the elective course.

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Graduate Bulletin Archive - 2011 - 2012

Effective Date: Fall Semester 2003
Expiration Date: Summer Session 2008

The Pennsylvania State University
Supply Chain Management

Graduate Credit Certificate Program

Dr. John E. Tyworth
454B Business Building
University Park, PA 16802
Telephone: 814-865-1866
Fax: 814-863-7067
E-mail: jet@psu.edu

The primary goal of the program is to prepare supply chain professionals to manage value-creating supply chain networks that modern business enterprises employ to acquire, produce, and deliver goods and services on a global scale. Students learn how to analyze and manage core business processes including sourcing and procuring raw materials, supplies and components and planning and fulfilling customer demand. All candidates are required to complete with a passing grade the three prescribed 800-level, 4-credit courses to earn the certificate.

Admission Requirements

The curriculum is designed for working supply chain management professionals. Accordingly, successful applicants will normally have, before the start of their first semester, at least two years' post baccalaureate work experience in supply chain management or a closely allied field.

An applicant must have received, from a regionally accredited institution, a baccalaureate degree under residence with credit conditions substantially equivalent to those required by Penn State. Additionally, the applicant's baccalaureate degree should be in business, engineering, economics, information sciences, or a related field and the applicant should have completed a college-level course in microeconomic principles.

To assure a smooth transition into the curriculum prospective students should have Microsoft Office Excel skills, knowledge of business statistics, and an understanding of basic accounting and microeconomic terms and principles.

Required Courses

**SUPPLY CHAIN MANAGEMENT (SCM)**

- 800. Supply Chain Management (4)
- 810. Transportation and Distribution (4)
- 820. Strategic Procurement (4)

**SUPPLY CHAIN MANAGEMENT (SCM) course list**

Effective Date: Summer Session 2011
Expiration Date: Spring Semester 2016
Last Revised by the Department: Fall Semester 2011

Blue Sheet Item #: 40-04-200
Review Date: 01/10/2012
The Certificate in Survey Research Methods shall provide supplemental training to doctoral students in social science, health, education, and policy-related graduate programs. The collection of data by questionnaire, web surveys, phone or personal structured interviews is a highly specialized technique whose "best practices" and "cutting edge" change frequently. The data collected by surveys typically violate assumptions of random sampling that undergird graduate-level courses in applied statistics. Those earning this certificate will have supplemental training in data collection and take a coherent cluster of courses in applied statistics that will provide them with superior preparation for completing their dissertation, and for employment in the academic, public, and private sectors.

All certificate recipients will be required to complete two core courses, two additional electives at the 500 level, and one hands on internship or apprenticeship experience.

**Admission Requirements (including completion of a baccalaureate degree) as applicable:**

All applicants must hold a bachelor's degree and have completed 18 credits in a graduate degree program at Penn State. A graduate school grade point average of 3.3 or higher shall normally be required. All applicants will be required to submit a letter from their academic advisor or department head that explains why the certificate program will enhance the student's primary course of study.

**Required courses:**

- PLSC 518/SOC 518. SURVEY METHODS I: MODES OF SURVEY ANALYSIS (3)
- PLSC 519/SOC 519. SURVEY METHODS II: ANALYSIS OF SURVEY DATA (3)
- PLSC 495, SOC 495, or equivalent. INTERNSHIP (1)

**Electives:**

Student may select any two additional three-credit courses in intermediate and advanced applied statistics or interviewing techniques, as approved by the chair of the SRC Faculty Advisory Committee.

There is no specific list of courses, because offerings in the social and behavioral sciences change frequently and are most often offered under the 597 rubric. As a general rule, these courses must be at the 500 level, and they must have pre-requisites equivalent to two semesters of applied statistics. For example, offerings in SOC that require prior completion of SOC 574-575 and offerings in PL SC that require prior completion of PL SC 592-593 would normally be eligible. We will apply comparable criteria for advanced methodology electives in departments such as (but not restricted to) Human Development and Family Studies, Education Psychology. These departments have offered relevant 597 offerings in recent years on topics such as Hierarchical Modeling, Latent Class Analysis, Item Response Theory, Time Series Analysis, Survival Analysis, and the Analysis of Missing Data. In addition, some regularly offered classes, such as HD FS 526, SOC 578, and STAT 506 would satisfy the requirement.

Each year, the professor in charge shall circulate a list of suggested classes that meet the necessary requirements. Students may propose additional classes not on this annual list.

Students accepted into the certificate program will submit a "Planned Program of Study" form annually. Approval by the Chair of the SRC Faculty Advisory Committee shall constitute formal approval for a course to count in meeting this requirement. All courses used to meet the requirements of the Certificate may be double counted towards student's primary degree program if permitted by the relevant department.

**POLITICAL SCIENCE (PL SC) course list**

**SOCIOMETRY (SOC) course list**

**EFFECTIVE DATE:** Spring Semester 2010

**EXPIRATION DATE:** Fall Semester 2014

Blue Sheet Item#: 37-07-073

Review Date: 6/16/09

The Pennsylvania State University
User-Centered Design

Postbaccalaureate Credit Certificate Program

John Yen
332G Information Sciences & Technology Building
University Park, PA 16802
Phone: 814-865-6179
Fax: 814-865-6426
E-mail: gradinfo@ist.psu.edu

This postbaccalaureate certificate program is designed to provide students or professionals with both a breadth and depth of training in the field of user-centered design. Students will be exposed to principles, models, methods, tools, visualization, and applications in human computer interaction (HCI), usability engineering, or user-centered design. A distance education format is used to accommodate the needs of professionals already active in this area. The certificate program is an attractive option not only for those who desire advanced education but do not wish a full Master's Degree program, but also for students who might wish to take a certificate to determine if they are interested in a complete post-baccalaureate degree program in Information Sciences and Technology. Up to 15 credits of coursework taken in nondegree status can count towards a graduate degree in Information Sciences and Technology.

To be awarded the Certificate on User-Centered Design, students must successfully complete 12 credits of graduate course work, including IST 413, IST 521 and two of the following courses: IST 516, IST 525 or IST 526.

Admission Requirements

An applicant must have received, from an accredited institution, a baccalaureate degree equivalent to those required by Penn State. A bachelor's degree in a related area (e.g., engineering and science), while not necessary for admission, is helpful in the successful completion of the certificate. It is expected that students will have a basic level of competency in computer language and information technology (related work experience can be used to demonstrate such competency). International students must satisfy the Graduate School's English language requirement.

GRE scores are not required for nondegree graduate students. Individuals who wish to apply to the graduate degree program in Information Sciences and Technology must submit an application for admission, along with all of the required supporting documentation, including GRE scores.

Required Courses (6 Credits)

INFORMATION SCIENCES AND TECHNOLOGY (IST)

521. Human Computer Interaction (3 cr.)
413. Usability Engineering (3 cr.)

Elective Courses (Select 6 credits from the following courses or other courses as approved by the College)

INFORMATION SCIENCES AND TECHNOLOGY (IST)

516. Web and Internet Information Retrieval (3 cr.)
525. Computer-supported Cooperative Work (3 cr.)
526. Tools and Visualization for HCI (3 cr.)

777 Harrisburg Pike  
Middletown, PA 17057  
Phone: 570-385-6195  
Fax: 570-385-6135  
E-mail: bjj6@psu.edu

The School of Humanities at Penn State Harrisburg offers a 15-credit postbaccalaureate certificate in the theory, pedagogy, and practice of writing. This Writing Instruction Specialist certificate is designed to serve the continuing educational and professional development needs of educators and other professionals in writing and writing instruction. Completion of the program will prepare candidates to provide specialized assistance in composition and to serve as a resource on writing pedagogy.

The Writing Instructional Specialist certificate program is composed of five courses (15 credits).

Admission Requirements

Admission to the Writing Instruction Specialist certificate program will be granted to those candidates who possess a requisite combination of education and classroom teaching experience. Candidates must hold a baccalaureate degree or a master of arts degree from a regionally accredited college or university. Candidates should also have completed 9 to 12 credits in English composition. All candidates must submit a letter of application indicating their interest in the program.

A candidate in the certificate program may also become a candidate in the Master of Arts in Humanities, Master of Arts in American Studies, or in the Master of Education (Teaching and Curriculum) degree programs if the candidate meets criteria for admission. Students enrolled in any of these master's degree programs may apply as electives credits earned in the program with program approval.

PRESCRIBED COURSES

ENGLISH (ENGL)

- 409. Composition Theory and Practice for Teachers (3)
- 503. Research Methods in Composition (3)
- 507. English Composition Studies (3)
- 553. Literacy Studies (3)

EDUCATION (EDUC)

- 452. Teaching Writing (3)

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Providing Services to Youth At Risk

Postbaccalaureate Credit Certificate Program

Responsible Department: Counselor Education, Counseling Psychology, and Rehabilitation Services

Program and Admission Requirements

The plan of study is composed of 15 postbaccalaureate credits to be completed within three years. All applicants for this certificate must have a minimum of a baccalaureate degree from an accredited undergraduate institution.

Applicants with a master's degree or higher in counseling, psychology, social work, marriage and family, or a clearly related degree that will qualify them to perform professional counseling duties can use this professional development certification to strengthen their professional credentials. Applicants holding a baccalaureate degree from an accredited undergraduate institution as their highest degree may qualify for the certificate and use it to support them in their work setting (e.g., teaching, college student affairs, human resources, personnel work), but it will not qualify them to perform professional counseling duties with youth or any other age group.

This certification is not a part of any formal master's or doctoral degree program at Penn State and does not presume admission to such a program. Individuals interested in a graduate degree program leading to a professional counseling credential should contact the Department of Counselor Education, Counseling Psychology, and Rehabilitation Services for more information (814-865-3427) or explore the Department Web site: http://www.ed.psu.edu/cecprs/default.asp.

Application Procedures

Applicants seeking admission into the Providing Services to Youth At Risk Certificate Program must complete (1) the Graduate School application (indicate "certification" in the Graduate Degree Sought area), and (2) submit the Counselor Education PERSONAL DATA form and two (2) original transcripts directly to Penn State University, Counselor Education Programs, 327 CEDAR Building, University Park, PA 16802-3110.

Electronic Graduate School Application is available at: http://www.gradsch.psu.edu/prospective/apply.html.

PRESCRIBED COURSES: 12 credits

COUNSELOR EDUCATION (CN ED)
422. Foundations of Addictions Counseling (3)
430. Couples and Family Counseling (3)
431. Counseling and Teaching Youth at Risk (3)
432. Ethical, Legal, and Professional Issues in Counseling (3)

A total of 3 elective credits that emphasize work with youth at risk are required. Courses may be selected in consultation with the program adviser.

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.
