This is the official bulletin of The Pennsylvania State University. Graduate program and Graduate Council requirements are those in effect at the time of admission to a graduate degree program.

The University reserves the right to change the requirements and regulations listed here and to determine whether a student has satisfactorily met requirements for admission or graduation, and to reject any applicant for any reason the University determines to be material to the applicant's qualifications to pursue higher education. Nothing in this material should be considered a guarantee that completion of a program and graduation from the University will result in employment.

The Graduate Council has responsibility for and authority over all academic information contained in the Graduate Degree Programs Bulletin.
About Graduate Education at Penn State

For information about specific areas, see the links on the left. For general information, see www.gradsch.psu.edu/index.cfm/about-us.
The Graduate Faculty
For information, see http://www.gradsch.psu.edu/facstaff/faculty.cfm.
Administration

For information, see http://www.gradsch.psu.edu/index.cfm/about-us/staff.
Program Locations

Programs of graduate study are offered at five locations in Pennsylvania:

- **Penn State Erie** - [pennstatebehrend.psu.edu](http://pennstatebehrend.psu.edu)
- **Penn State Harrisburg** - [www.hbg.psu.edu](http://www.hbg.psu.edu)
- **College of Medicine** - [http://www.pennstatehershey.org/web/guest/education](http://www.pennstatehershey.org/web/guest/education)
- **Penn State Great Valley** - [www.gv.psu.edu](http://www.gv.psu.edu)
- **University Park Campus** - [www.gradsch.psu.edu](http://www.gradsch.psu.edu)

**Off-site courses**—Graduate degree programs based at any of the five administrative centers of the Graduate School listed previously, but offered at locations away from those centers, may be discontinued at any time. Degree candidates will be eligible to continue the program, but this may require attendance at courses offered only at the center where the program is based. The University will provide notice of the discontinuance of any program offered at an off-center site at least one semester in advance and furnish information concerning available options for continuance in the program.
GRADUATE LIFE

Current graduate enrollment at University Park campus is about 6,790 students, of whom 78 percent are engaged in
graduate study full time, 47 percent are women, and 35 percent are residents of Pennsylvania. (Undergraduate enrollment
at University Park campus exceeds 40,000.) International students make up about 35 percent of the graduate student
population, and about 8 percent of enrolling graduate students report themselves as members of recognized U.S. ethnic
minority groups.

University Park campus is one of the most naturally beautiful American campuses. On any given day of the semester,
about 50,000 people will be on the campus: 38,000 students, 12,000 employees, and several hundred visitors. Although
the size of the campus can be intimidating, graduate students soon find that its size and diversity afford a variety of
stimulating activities. This variety reflects the University's view that a person's graduate experience should include, in
addition to course work and research, living in a scholarly atmosphere, profiting from the perspectives of visiting scholars
and artists, and engaging in informal discussions with faculty and fellow students. It also should mean participating in
student affairs and University governance, and allowing time to reflect, to explore fields related to one's specialty, and to
enjoy leisure activities.

Although the mailing address of the largest campus is University Park, PA 16802, this name ordinarily does not appear on
maps. The University Park campus is located in State College, Pennsylvania, an area with a population of more than
67,000. State College is located on U.S. Highway 322, near Interstates 80 and 99, and can be reached directly by bus or
airline service. The town retains a collegiate atmosphere enhanced by many small shops, restaurants, cinemas, and
bookstores.

GRADUATE STUDENT ASSOCIATION
For information, see www.clubs.psu.edu/up/qsa.

GRADUATE SCHOOL ALUMNI SOCIETY
For information, see www.gradsch.psu.edu/index.cfm/alumni/gsas.

RECREATIONAL AND ATHLETIC FACILITIES
For information, see www.psu.edu/ur/athrec.html.

THE ARTS
For information, see www.psu.edu/ur/arts.html.
REGULATIONS AND CONDUCT STANDARDS FOR STUDENTS ENROLLED IN THE GRADUATE SCHOOL

It is the responsibility of students to be cognizant of the rules, regulations, and procedures of the University. This information is contained in the graduate school policies at www.gradsch.psu.edu/policies (Opens New Window).

MOTOR VEHICLE REGULATIONS
For information, see guru.psu.edu/policies/BS04.html (Opens New Window).

BICYCLE REGULATIONS
For information, see guru.psu.edu/policies/SY16.html (Opens New Window).

STANDARDS OF CONDUCT

By virtue of their maturity and experience, graduate students are expected to have learned the meaning and value of personal honesty and professional integrity before entering the Graduate School. Every student is expected to exhibit and promote the highest ethical and moral standards. A violation of such standards is regarded as a serious offense, raising grave doubt that the student is worthy of continued membership in the Graduate School community. The University Code of Conduct is found in Appendix I in this Bulletin. Violation of the Code may result in suspension or dismissal from the academic program and/or from the Graduate School. For additional information, please go to www.sa.psu.edu/ja.

Research Integrity--Graduate students are expected to adhere to the highest standards of research integrity in the conduct of their research and other educational activities. They are subject to University policy AD-47, "General Standards of Professional Ethics," and RA-10 "Handling Inquiries/Investigations into Questions of Ethics in Research and in Other Scholarly Activities," which apply to all University personnel engaged in research activities. This policy may be accessed electronically through the University's General University Reference Utility (GURU). For information on Research Integrity, please go to guru.psu.edu/policies/RA10.html. For more information on general standards of professional ethics, please go to guru.psu.edu/policies/AD47.html.

RESOLUTION OF PROBLEMS
For information regarding procedures for resolving or appealing problems in the classroom and outside, see Appendix II in this bulletin.

OWNERSHIP OF INTELLECTUAL PROPERTY
For information, see www.research.psu.edu/ipo (Opens New Window) and guru.psu.edu/policies/RA11.html (Opens New Window).

RESEARCH PROTECTIONS
To ensure compliance with applicable federal and state laws, certain University activities require review and approval by appointed institutional review committees. Projects involving any of the following concerns must be reviewed and approved through the Office for Research Protections (ORP) before the project is initiated.

For information, see www.research.psu.edu/orp (Opens New Window).

Conflict of Interest--See guru.psu.edu/policies/RA20.html (Opens New Window).

For policy statements on these issues, see guru.psu.edu/policies/RA14.html and guru.psu.edu/policies/RA15.html. See also policies on safety issues at guru.psu.edu/policies/SY24.html (Opens New Window).

NOTE: The College of Medicine at the Penn State Milton S. Hershey Medical Center is a unique Penn State campus in that it maintains a separate IRB, IACUC, UBC, and UIC. Students conducting projects at Hershey should contact their local committees for approval of research.

DATE LAST REVISED: 05/18/07
Application and Admission Procedures

Each step of the educational process, from admission through graduation, requires continuing review and appropriate approval by University officials. The University, therefore, reserves the right to change the requirements and regulations contained in this Bulletin and to determine whether a student has satisfactorily met its requirements for admission or graduation, and to reject any applicant for admission for any reason the University determines to be material to the applicant's qualification to pursue higher education.

An applicant for admission to the Graduate School should understand that graduate work is not a simple extension of an undergraduate program but, rather, demands scholarship of a higher order, and emphasizes research, creativity, and professional competence with a minimum of formal requirements and a maximum of student initiative and responsibility.

Objective--The objective of the admission process of the Graduate School is to identify and admit a qualified graduate student body up to the limit of the University's resources to provide outstanding graduate programs. In most programs, a student may begin graduate work in the fall or spring semester or in the summer session.

As at all universities, Penn State's staff, facilities, and other resources are limited, so that not all qualified persons can be admitted. The number accepted will vary by program and from semester to semester. In some graduate programs all vacancies will have been filled long before the deadline for submitting applications, so that even outstanding students cannot be accepted.

Degree Admission--Applicants interested in applying to a graduate program at Penn State should obtain information on individual program requirements via the website at www.gradsch.psu.edu/prospective/program.cfm. Applicants may apply for admission to only one program at a time.

Qualifications--For admission to the Graduate School, an applicant must hold either (1) a bachelor's degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution. Ordinarily, an entering student must have completed, in a satisfactory manner a minimum of course work in designated areas, the specific courses and amount of work depending upon the intended field of advanced study. Scores on the Graduate Record Examinations (GRE) General Test are required by most programs. Individual program requirements for admission are included under the specific program descriptions. Information about GRE publications can be obtained by calling the Educational Testing Service in Princeton, New Jersey, USA at 1-866-473-4373 or writing to GRE, Educational Testing Service, P.O. Box 6000, Princeton, NJ USA 08541-6000. If you prefer, you may send an e-mail to gre-info@ets.org or order publications through the website at www.gre.org.

Provisional admission may be granted to applicants whose credentials are not complete at the time of application because the baccalaureate degree has not yet been conferred, grades for the current semester are not yet available, etc. Such admission is subject to cancellation if the complete credentials, on arrival, do not meet the requirements for admission. In the interim, certification of any earned credits will be withheld. If admission is canceled for any reason, the student is dropped automatically from the Graduate School. Completion of admission in such cases is dependent upon receipt of the missing credentials. (See Provisional Admission under Classification of Students.)

Admission is granted jointly by the Graduate School and the department or graduate program in which the student plans to study. The establishment of standards by which applicants are admitted is a departmental or program responsibility. Although the Graduate School has no fixed minimum grade-point requirement for admission, an applicant is generally expected to maintain a junior-senior grade-point average of at least 2.50 on Penn State's grading scale of A (4.00) to D (1.00). Individual programs often establish higher grade-point average requirements and use other criteria to judge candidates for admission. In exceptional cases, departments or major programs may also approve admission by reason of special backgrounds, abilities, and interests. Departmental or program requirements are given in the descriptive statements appearing under the graduate programs listed in the latter part of this publication. A student who has been admitted to a program in which the doctorate is offered may begin working toward that degree but has no official status as a doctoral student and no assurance of acceptance as a doctoral candidate until a candidacy examination administered by the major department or committee has been passed. (See Candidacy Examination under Degree Requirements.)

Deadlines--Applicants should obtain application deadlines by contacting the individual graduate program. Because the admission process is time consuming, applications should be submitted as early as possible.

Pennsylvania Act 34 Clearance—Applicants should note that some programs may require clearance of students participating in internships/practicums in Pennsylvania school districts. Pennsylvania Act 34 of 1985 (Criminal History Record Information) specifies that employees of Pennsylvania public and private schools must undergo background checks. School districts accepting graduate students for internships/practicums increasingly require Act 34 clearance before permitting students to begin their practicums in the district, even though they are not employees. In addition, non-Pennsylvania residents are expected to present evidence of an FBI background information check. Applicants are encouraged to contact the program to which they are applying if they have questions as to this requirement and how it may affect them.

Nondegree Admission—If you do not intend to pursue a graduate degree, but want to take graduate-level courses for personal enrichment, professional development, permanent certification, or to apply for degree status at a later date, you can seek admission as a nondegree graduate student. Information on applying for nondegree graduate status may be obtained via the website at www.gradsch.psu.edu/prospective/apply.
Changing from graduate nondegree status to regular status requires a new admission application. No more than 15 graduate credits of course work taken prior to admission to a graduate degree program may be applicable to a graduate program. (See "Nondegree Student" under Classification of Students.) However, admission as a nondegree graduate student neither guarantees nor implies subsequent admission to a degree program. Nondegree students are not eligible to receive fellowships or graduate assistantships and preference for courses is given to degree students. Programs control access to some courses.

Applicants for nondegree admission must have received from a regionally accredited institution a baccalaureate degree under residence and credit conditions substantially equivalent to those required by Penn State.

Minority Students—Minority students are encouraged to apply for admission to any of the programs offered in the Graduate School. Information concerning programs and financial aid can be obtained from the chair of the graduate program, the dean of the college of the student's major interest, or from the Office of Graduate Educational Equity, 304 Kern Building.

International Students—International applicants must hold the equivalent of an American four-year baccalaureate degree. They must submit official or attested university records, with certified translations if the records are not in English. Notarized copies are not sufficient.

English Proficiency—The language of instruction at Penn State is English. All international applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, or a total score of 80 with a 19 on the speaking section for the Internet-based test (iBT). Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires completion of specified remedial English courses ESL 114G (American Oral English for Academic Purposes) and/or ESL 116G (ESL/Composition for Academic Disciplines) and attainment of a grade of B or higher. The minimum acceptable composite score for the IELTS is 6.5. Graduate programs may have more stringent requirements.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a graduate degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Please note that specific graduate programs may require all international applicants to submit a TOEFL or IELTS score, regardless of their academic background and country of origin.

Information about the TOEFL can be obtained by writing to the Educational Testing Service, Box 6155, Princeton, NJ 08541-6155 or visiting its website at www.toefl.org. Information about the TOEFL is handled by the IECP. Information about the IELTS can be obtained by contacting IELTS International, 100 East Corson Street, Suite 200, Pasadena, CA 91103 or visiting its website at www.ielts.org.

Undergraduate Students—Any senior with a 3.50 grade-point average may be admitted to 500- or 800-level courses with the consent of the instructor; other seniors with a B average or better may be admitted to graduate courses with the consent of the instructor, the student’s academic adviser, and the director of Graduate Enrollment Services. Forms to request permission to take 500- or 800-level courses are available in the Office of Graduate Enrollment Services, 114 Kern Building.

Undergraduate students in The Schreyer Honors College who undertake integrated undergraduate–graduate study (IUG) can pursue concurrent bachelor's and master's degrees. Information on IUG study can be obtained at the office of the dean of The Schreyer Honors College, 10 Schreyer Honors College.

In certain cases undergraduate students may subsequently apply credits they have earned in 400, 500, and 800 series courses toward an advanced degree at Penn State. After admission to the Graduate School, and with the approval of the major field, a maximum of 9 credits relevant to the graduate program of study that were not used to satisfy undergraduate requirements may be applied toward an advanced degree. The time limitation on the completion of a master’s degree program applies to these as well as to other credits.

Postdoctoral Fellows, Scholars, and Guests of the University—Postdoctoral Fellow appointments are financed under a Postdoctoral Fellow Program of a granting agency outside the University. A Postdoctoral Scholar is the usual designation for all other postdoctoral appointments that meet the standards enumerated by the National Research Council. Postdoctoral appointments are considered appointments of a temporary nature that are intended to offer an opportunity for continued experience in research or teaching, usually, though not necessarily, under the supervision of a senior mentor.

Individuals holding the highest degree in their fields from Penn State or other accredited colleges and universities are invited to apply to the dean of the Graduate School for guest privileges for purposes of noncredit study. Guests may attend seminars and courses with the privileges of faculty members and, if space and facilities are available, carry on research. Individuals may also be appointed to temporary positions in all University ranks. All guests are expected to affiliate formally or informally with one of the departments, institutes, or other subdivisions of the University engaged in scholarly pursuits.

Policy on Second Doctorates—The Graduate School does not admit applicants to concurrent double Ph.D. degree programs, D.Ed. degree programs, or D.M.A. degree programs, or to concurrent doctoral degree programs in any combination (Ph.D., D.Ed., and/or D.M.A.). In general, the Graduate School discourages the pursuit of a second Ph.D., D.Ed., or D.M.A. degree. However, if an applicant who holds one of these degrees requests admission to a second doctoral degree program (either Ph.D., D.Ed., or D.M.A.), the applicant is asked to give the Graduate School the reason why the second doctorate is necessary (as opposed to taking course work or obtaining a master's degree in the second field or working in a postdoctoral appointment in the second field). The Graduate School then may solicit responses concerning...
the necessity of the second doctorate from representatives of the field at Penn State or elsewhere. This information is then given to the Dean of the Graduate School for the final decision. If approved, all Graduate School requirements for the second doctorate must be resubmitted.

**Student Pennsylvania Resident Status**--When it appears that an applicant for admission is not a resident of Pennsylvania for tuition purposes, a non-Pennsylvanian classification is assigned. If the student who is thus admitted believes that circumstances do not justify classification as a non-Pennsylvanian, a petition may be addressed to the Fee Assessor, The Pennsylvania State University, 108 Shields Building, University Park, PA 16802 for reclassification. Penn State Harrisburg students may petition the Penn State Harrisburg financial officer.

A copy of the Policy for Determination of Eligibility for Reclassification as a Pennsylvania Resident for Tuition Purposes can be obtained in the office mentioned above or online and should be reviewed before requesting reclassification. Any reclassification resulting from a student's petition shall be effective for tuition purposes as of the date such petition was filed. A student who changes residency from Pennsylvania to another state must promptly give written notice to the University. See also Appendix V to this bulletin.

Updated: 4/6/12
TRANSFER COURSES

Subject to the limitations given below, a maximum of 10 credits of high-quality graduate work (credits must be equivalent to 400-level or higher at Penn State) transferred from a regionally accredited U.S. institution or a recognized degree-granting international institution may be applied toward the requirements for a graduate degree. However, credits earned to complete a previous degree, whether at Penn State or elsewhere, may not be applied to a graduate degree program at Penn State, except for those students who are approved to double-count credits as part of an approved concurrent or integrated undergraduate-graduate degree or those students approved by the Graduate School to receive a master's degree along the way to a doctorate.

The student should distinguish carefully between the transferability of credit and its applicability in a particular degree program. Approval to apply any transferred credits toward a degree program must be granted by the student’s academic adviser, the program head or graduate officer, and the Graduate School. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School of Penn State, must be of at least B quality (grades of B- are not transferable), and must appear on an official transcript of a regionally accredited U.S. institution or recognized degree-granting international institution.

Pass-fail grades are not transferable to a graduate degree program unless the "Pass" can be substantiated by the former institution as having at least B quality.

Forms for transfer of credit can be obtained from each graduate program. (See www.gradsch.psu.edu/index.cfm/prospective-students/program-contact-information for graduate program contact information.)

Updated: 9/18/13
Classification of Students

A graduate student may be admitted as a degree student, a certificate student, or a nondegree student, depending upon the student's objectives. A student who has held only nondegree status and who later wants to apply for degree status should contact his or her intended program of study. Admission as a nondegree student neither guarantees nor implies subsequent admission to a degree program. Any other change in classification must be arranged through the Office of Graduate Enrollment Services, 114 Kern Building.

Degree Student--A degree student is one who plans to become a candidate for an advanced degree at Penn State and who has been formally admitted for advanced studies in a particular program. The program of study is developed under the guidance of an adviser appointed by the head of the student's major program. A degree student who has passed a candidacy examination is classified as a doctoral candidate.

Provisional Admission--Provisional admission is a temporary classification in which an applicant may remain for a period of either one or two semesters (depending on the provisional type) following admission. If the conditions of provisional admission are not met within that time, the student may be dropped from the program. In addition, all provisional conditions must be met before a student reaches an academic benchmark. Benchmarks include completion of a master's program, the doctoral candidacy, comprehensive, and the final oral examinations. A student will not be permitted to graduate who has not met the conditions of his or her provisional admission.

Nondegree Student--If you do not intend to pursue a graduate degree, but want to take graduate-level courses for personal enrichment, professional development, permanent certification, or to apply for degree status at a later date, you can seek admission as a nondegree graduate student. Information on applying for nondegree graduate status may be obtained via the Web site at www.gradsch.psu.edu/prospective/apply.

A maximum of 15 graduate credits taken as a nondegree student prior to admission to a graduate degree program may be applied to a graduate program, with departmental approval. The credits must have been earned within five years preceding entry into the degree program. For additional information, see Transfer of Nondegree Graduate Credits, under Transfer Credits. Forms for transfer of nondegree credits may be obtained from the graduate program.

Applicants for nondegree admission must have received from a regionally accredited institution a baccalaureate degree earned under residence and credit conditions substantially equivalent to those required by Penn State.

Certificate Student--A certificate student is one who is engaged in a program of study leading to a certificate or equivalent recognition of accomplishment rather than a graduate degree program at Penn State. Certification students, i.e., candidates for Instructional, Supervisory, Educational Specialist, and Administrative certificates, have the same University privileges and responsibilities as graduate degree students. (See additional information under Pennsylvania Department of Education Certificate Candidates.)

Undergraduate Student--Such a student is not a graduate student because a baccalaureate degree has not been attained. The student may not register for graduate courses (500 or 800 series) unless he or she is a senior with at least a 3.50 cumulative GPA or with at least a 3.0 GPA and special permission from the Office of Graduate Enrollment Services. Forms to request permission to take 500- or 800-level courses are available in the Office of Graduate Enrollment Services, 114 Kern Building.
CREDIT BY EXAMINATION

Examinations to establish credit for work done in absentia or without formal class work may be used to remove undergraduate deficiencies, but not to earn credits toward an advanced degree. Arrangements are made by the student directly with the major department head or program chair.
Student Aid

For general information regarding available sources of student aid, see www.psu.edu/studentaid and click on the link for Graduate Students.

Assistantships, Fellowships, Traineeships, Scholarships, Loans, Employment

For information, see http://www.gradsch.psu.edu/index.cfm/graduate-funding/funding.

Veterans' Benefits

For information, see www.equity.psu.edu/veterans/outreach.asp.
THE UNIVERSITY LIBRARIES

The University Libraries constitute a major resource for students and researchers in all fields of study. The Libraries are ranked among the top ten research libraries in North America by the Association of Research Libraries and contain more than 53 million volumes, 6.9 million microforms, 88,668 serial subscriptions, plus more than 536 databases and 45,906 online full-text journals, and 100,000 e-books.

The University Libraries include a central facility and five other libraries at University Park campus, plus libraries at 23 Penn State locations throughout the state, including the Dickinson School of Law and the Milton S. Hershey Center and the Penn State affiliated Pennsylvania College of Technology. At University Park, the Arts and Humanities, Business, Education and Behavioral Sciences, Gateway Commons, Social Sciences, Maps, Life Sciences, Special Collections, and News and Microforms libraries are maintained in Pattee Library and Paterno Library. Other Libraries at University Park include the Architecture and Landscape Architecture, Earth and Mineral Sciences, Engineering, Law, and Physical and Mathematical Sciences libraries.

In addition Pattee Library houses Course Reserves Services, the Extended Hours Study Area, (now offering 24-hour service), and Library Services for Persons with Disabilities. The Special Collections Library in Paterno Library includes Historical Collections and Labor Archives, Rare Books and Manuscripts, and the Penn State University Archives. Additional library services include assigned carrels, photocopiers, a student lounge with vending machines, change machines, and MacKinnon's Cafe.

Among special collections of national importance are those on Arnold Bennett, Kenneth Burke, Jean Giraudoux, John O'Hara, Vance Packard, Joseph Priestley, Conrad Richter; the Allison-Shelley collection of Anglo-Americana-Germanica; and materials on Utopian literature and on Australia. The Historical Collections and Labor Archives contain a wide variety of documentary sources, including the papers of Pennsylvania leaders and businesses and records of labor unions. The most notable of these documents are those of Richard Schweiker, William Scranton, the United Steelworkers of America, and the United Mine Workers of America. The Penn State University Archives house an extensive collection of materials about the University and the surrounding community.

Faculty members may recommend books and other library material purchases by contacting a subject specialist at www.libraries.psu.edu/psul/cataloging/services_policies/specialists.html. Faculty at locations other than University Park can also contact their head librarian.

Access to holdings is obtained through The CAT, a computerized catalog, part of the Library Information Access System (LIAS), available on the Web at www.libraries.psu.edu. LIAS is a dynamic, integrated information system that provides electronic access to a great variety of materials in many subject areas.

The Libraries maintain a comprehensive program of general and specialized reference and instructional services. The Libraries’ faculty teach credit courses as part of the Library Studies Program and offer a variety of topical seminars. Introductory sessions, offered by Library Learning Services, are scheduled on a regular basis to familiarize faculty, students, and other library users with LIAS. Class sessions designed for specific courses can be arranged in the library to help students learn how to find, use, and evaluate relevant books, articles, Web sites, and other information resources. Assistance is available to help design assignments that use library resources to enhance student research skills and critical thinking. Library instruction rooms (hands-on labs or traditional classrooms) can be reserved for on-site instruction in the use of library resources. For information, go to: www.libraries.psu.edu/psul/lls.html.

Penn State holds membership in the Association of Research Libraries, the Consortium for Institutional Cooperation, and the Online Computer Library Center (OCLC). Participation in these organizations provides faculty and students with access to the collections of more than 2,500 libraries across the United States and internationally, including major research libraries. It is the largest research library in Pennsylvania and one of four resource libraries that provide service and collections to all other libraries and citizens of the Commonwealth.

The publication Guide to the University Libraries offers additional information on services and programs and is available at Libraries service desks and by calling 814-863-4240. More information is also available at www.libraries.psu.edu/psul/pram/publications.html.

An Open House is held each fall semester.

Media and Technology Support Services (MediaTech), www.libraries.psu.edu/mtss/, a division of the University Libraries, has a collection of more than 24,000 films and videotapes and more than 5,000 pieces of technology and audio-visual equipment available to faculty, staff, and students. Titles in the Media Tech collection are listed in The CAT, the Libraries’ online catalog and in the MediaTech database at http://extranet.libraries.psu.edu/mtss/media/searchMedianet.html.

Services include:

- Consultation for purchase of technology or audiovisual equipment: 814-863-0665
- Consultation for purchase of technology or audiovisual equipment: 814-863-0665
- Equipment scheduling: 814-865-5400, or 26 Willard Building; e-mail to mtssseq@psuilias.psu.edu
- Media Duplication: Call 814-863-8144 or e-mail mjs149@psu.edu. Downloadable duplication order form (PDF) at www.libraries.psu.edu/mtss/services/duplication.html.

The Pennsylvania State University
Media Site Live: www.libraries.psu.edu/mtss/mediasitelive/mediasitelive.html
Preview facilities: 814-863-3202 and 814-865-5400, Wagner Annex
Program scheduling: 814-865-5400; e-mail to mtssmed@psulias.psu.edu
Repair and Installation Services: 814-863-4389
Video/Photo Production Studios: Students and faculty may reserve time and space in the studios to produce, edit, and export their video/audio projects. Green Screen is also available for use, with on-site staff available to answer questions and conduct demonstrations. Call 814-865-5400.
Video Taping Class Presentations: Schedule taping at least thirty-eight hours before the presentation by contacting MTSS Equipment at 814-865-5400 or mtsseq@psulias.psu.edu. Indicate desired format when scheduling—mini-DV tape or DVD (digital).
MediaTech Info Line: 814-863-1234 (touch-tone phones only). Includes current weather forecasts as provided by the Campus Weather Service, the University Calendar of Events, information on town and campus movies, JOBS-Penn State's employment information service, open house schedules for the Department of Astronomy, and construction barriers on or around the University Park campus.

For more information about services available from MediaTech, e-mail mtssmed@psulias.psu.edu or visit www.libraries.psu.edu/mtss.
THE PENN STATE PRESS

The Penn State Press is a publisher of books and journals that contribute to the advancement of scholarship. It publishes in most areas of the humanities and social sciences, giving emphasis to art and architectural history, literature and literary criticism, philosophy, religious studies, history, political science, women's studies, sociology, Latin American studies, and East European and Russian studies. Its journals include the Chaucer Review, Journal of Nietzsche Studies, the Good Society, Philosophy and Rhetoric, Journal of General Education, Journal of Speculative Philosophy, Comparative Literature Studies, Journal of Policy History, Pennsylvania History, Book History, and Shaw: The Annual of Bernard Shaw Studies. The Press publishes eight series: Issues in Policy History (Editor: Donald T. Critchlow); Literature and Philosophy (Editor: Anthony J. Cascardi); Penn State Series in the History of the Book (Editor: James L. W. West III); Re-reading the Canon (Editor: Nancy Tuana); Studies of the Greater Philadelphia Philosophy Consortium (Editor: Michael Krausz); Rural Studies Series (Editor: Clare Hinrichs); Penn State Library of Jewish Literature (Editors: Baruch Halpern and Aminadav Dykman); American and European Philosophy Series (Editors: Charles Scott and John Stuhr); Buildings, Landscapes, and Societies; and Refiguring Modernism.
INFORMATION TECHNOLOGY SERVICES

Information Technology Services (ITS) ensures that faculty, students, and staff have the information technology tools and infrastructure necessary to carry out the University’s mission. ITS is working to achieve five broad goals: help faculty improve the way education is delivered; provide students with resources to enrich their educational experience; create and sustain an environment that enables leading-edge research; help to improve productivity; and establish the information technology infrastructure necessary to maintain Penn State’s preeminence in integrating high-quality programs in teaching, research, and outreach. For additional information, see its.psu.edu on the Web.
SPECIALIZED COMPUTING FACILITIES

Penn State also provides distributed computing and information systems. Many academic computing facilities exist to support the specialized research and instructional requirements of the colleges and the intercollege research programs. Some of these facilities are described below.

Colleges

College of Arts and Architecture

The School of Architecture and Landscape Architecture operates dedicated student computer labs and has integrated desktop computers into the studio environment. Students have access to high-performance networks via either wired or wireless connections. The school's computer labs, including the Stuckeman Center for Design Computing, are primarily used for teaching and research in such areas as computer graphics, computer-assisted design, GIS, and digital imaging, as well as exploration into computer visualization, virtual reality, and digital fabrication. A wide variety of available input and output equipment, such as large-format printers, color printers, scanners, a CNC laser cutter, site survey, and video imaging and capturing equipment, provides faculty and students with opportunities to explore and master a variety of technologies and presentation techniques.

The Immersive Environments Lab (IEL) is a joint venture between Penn State’s Information Technology Services (ITS) and the School of Architecture and Landscape Architecture (SALA). The IEL is a stereo visualization system consisting of a three-screen panorama display and a cluster of graphics workstations. Students have the capability of displaying a range of 2D and 3D presentations or they may launch 3D to a full three-screen stereo panorama for a group walk-through. Using virtual reality to visualize interior and exterior spaces allows students to follow the design process from conception to construction to completion.

The School of Music provides students and faculty in all disciplines within the school with a Macintosh-based electronic music laboratory and two computerized music rooms. These facilities afford faculty and students opportunities to create, analyze, and perform music as well as develop innovative music teaching materials.

The School of Theatre maintains lab facilities to support its technical theatre program, including set design, lighting, sound, and costume design. Interaction with common and professional applications affords students the opportunity to gain familiarity and experience with tools being used in the field. In addition, computers are regularly used in performance to control lighting and sound systems and to facilitate such complex tasks as moving scenery.

The School of Visual Arts computer facilities are customized for the advanced technological needs of students and faculty in the School of Visual Arts and the Department of Integrative Arts. Located in 302, 304, and 401 Patterson Building and maintained by Information Technology Services (ITS), the Patterson computer laboratories are specialized for design, animation, and high-end multimedia production. Within close proximity, the Graphic Design computer laboratory, 208 Visual Arts Building, is designed to meet the specific needs of students enrolled in the Graphic Design program. The Digital Photography computer laboratory, customized for students enrolled in the Photography program, is located in 209 Visual Arts Building. All five labs are Macintosh environments and are used as both teaching and study facilities. Most labs are open twenty-four hours a day, seven days a week.

College of Earth and Mineral Sciences

The School of Earth and Mineral Sciences has installed a high-speed communications network that provides computer-to-computer communications within the college, as well as with external networks and computers via University facilities. Wireless access to this network is provided throughout the college. Computing facilities are distributed throughout the departments and institutes of the college, and include extensive local PC, UNIX/LINUX, and Macintosh computer laboratories accessible to undergraduate and graduate students. Many graduate students have a PC or UNIX computer supplied to their desktop. In addition to these distributed facilities, high-performance computing is available on high-end Linux clusters operated by the ITS GeARS group in concert with the college's departments and institutes.

College of Education

In the College of Education, the Education Technology Center, located in 201 Chambers Building, provides technical support services, multimedia and graphic design services, Web design and development services, and computer application training for College of Education faculty and staff. The Education Technology Center also maintains the Education Technology Demonstration Classroom and video conferencing services. The Demonstration Classroom is used by College of Education faculty for implementing technology into teaching and learning for undergraduate and graduate College of Education courses. It also provides a computer facility equipped to instruct College of Education students how to use technology in their teaching and learning experiences.

The IBM Personal Computer Lab, located in 202 Chambers Building and the Macintosh Computer Lab located in 205 Chambers provide microcomputer access to the University community. Thirty networked IBM and twenty-eight Macintosh computers are available for student and faculty use. (The labs are restricted during certain hours; check schedule outside each room.)

College of Engineering

The College of Engineering has a number of general and special purpose computational resources and services to support
the College’s educational and research endeavors. Each department maintains multiple laboratories that include various servers and workstations. These laboratories employ a number of Sun, PC, and Macintosh workstations running under the latest Sun, Microsoft, LINUX, or UNIX operating system. In addition to these general purpose facilities, several departments have faculty who maintain High-Performance Parallel Computing facilities with multiprocessor computing nodes for research initiatives. These facilities typically use PC-based systems running LINUX or Macintosh OSX servers running Open BSD in Beowulf clustering configurations. The University’s Information Technology Services also maintains a multidisciplinary High-Performance Parallel Computing facility for faculty and graduate student research. The College of Engineering also operates and maintains a multimode High-Performance Computing cluster to support undergraduate and graduate education. The College system is available during non-peak usage times to support graduate research.

The Department of Computer Science and Engineering at Penn State uses a network of Solaris, Linux, OS X, and Windows workstations and servers to support academic computing needs. Instruction is supported by pairs of Sun V240 and V880 servers. These servers act as application, Web, e-mail, and license servers for over 400 workstations in labs, graduate student offices, and faculty offices. Funded research efforts utilize any one of the departments nine High Performance Computing servers, providing nearly 400 multi-processor computer nodes sharing IRIX, DolpinNet, Myrinet, and GigE interconnection. Researchers currently share approximately 15TB of BlueArc NAS storage. Additionally, the department is constructing a cognition and perception lab with cutting edge computer vision technology. NSF CISE/Instrumentation, Infrastructure, and IGERT grants have funded much of CSE’s research equipment. Computing resources are connected via a fail-safe pair of 3Com 7700 Switching Routers. The routers provide GigE service to all backbone-connected devices, including all edge switching devices. CSE’s GigE connection to the campus backbone (including I and 12) is hosted with a resilient pair of interfaces through an HSRP enabled firewall. All of this equipment is housed in the Information Sciences and Technology building, Penn State’s new technology showcase building.

The Institute for Computational Science is a University-wide initiative conceived and chaired by a faculty member in the College of Engineering. The institute addresses the need for resources and computing power required for fields such as computational fluid dynamics, computational chemistry, computational meteorology, computational physics, artificial intelligence, computational materials science, business computing, etc. Annual conferences focus on collaboration among researchers in the aforementioned computation intensive programs.

Electronic and Computer Services (ECS) within the College of Engineering provides faculty and graduate students with engineering expertise and support in the areas of hardware and software system design, prototyping, and complete systems integration. ECS resources include high-performance workstations and design tools (ViewLogic, H-Spice, Cadence, LabView, AutoCAD, etc.). Also available are tools for embedded system development. Prototyping facilities consist of Xilinx and Altera systems for FPGA design. Distributed access to College, departmental, and ECS resources is through the College’s maintained high-speed secure data network. ECS maintains the College’s High-Performance Computing cluster and network throughout 26 buildings; ECS also maintains and operates core College e-mail, Web and computing resources, providing nightly backup services to these critical systems. Virtual Private Networking and secure wireless services throughout the College enables mobile computing and data access from anywhere Internet connectivity is available.

College of Health and Human Development

The Department of Kinesiology maintains several specialized computer systems dedicated to automated motion analyses, musculoskeletal modeling, medical imaging, physiological testing, and the generation of virtual reality environments for experimental purposes.

Eberly College of Science

Within the Eberly College of Science, each department has an array of computer facilities.

- The Department of Astronomy and Astrophysics computing resources include a large and ever-expanding network of workstations and personal computers. The current census includes 50 Sun workstations, 12 Power Macs, and 70 PCs. Many of the workstations are configured for maximum processing power so that data sets from various ground- and space-based observing platforms from around the world can be intensively analyzed by faculty and graduate students. The Department has a 100-MB intranet with a fiber optic 100-MB connection to the University backbone. Ten terabytes of online disk space serves data to Department research teams.
- The Department of Biochemistry and Molecular Biology maintains a 100-Mbps Ethernet with ~500 IP addresses currently in use. Most of these serve desktop computers in individual research groups. Twelve desktop computers are maintained in one room for general or instructional use, and eight workstations are dedicated to special equipment for phosphorimaging, laser densitometry, analytical ultracentrifugation, surface plasmon resonance measurements, and X-ray crystallography. Laptops and projectors also are available for general use.
- The Department of Biology maintains two 100-MB fiber backbones that support nearly 500 PC and Macintosh machines. Most of these computers are used to run research machinery and for individual research laboratories. The department also houses thirteen servers, including a state-of-the-art firewall, two domain controllers, automated Windows patch management, automated antivirus system management, and an advanced Web application cluster. Licensed software within the department includes a wide array of Microsoft and Macintosh products.
- The Department of Chemistry provides network access for approximately 1,024 nodes comprising numerous PCs, workstations, and servers of varying operation systems, supported by 10/100/1000 MB Fast Ethernet. Chemistry also Penn State Wireless 2.0 access, VPN service and Web space for courses and research as well as computer an instrumentation repair services for Penn State-funded equipment. Several individual research groups within Chemistry boast their own PC clusters. Some of the computer-intensive research groups participate in the shared resources of the Graduate Educational and Research Services (GEaRs) and the Institute for High-Performance Computing Applications.
- The Department of Mathematics maintains a high-speed switched network of UNIX-based workstations and servers for use by faculty, students, and staff. Most workstations are for use by individuals or small groups. A lab is
maintained for use by undergraduates, graduates, faculty, and visitors. Supported operating systems are Solaris and OSX. Supported software includes Mathematica, Matlab, TeX, and LaTeX. Supported programming languages include C, C++, Java, Fortran, and Perl. Some research groups maintain their own computing equipment including a Beowulf cluster and computers used to control high-speed cameras.

- The Department of Physics maintains a high-speed switched network that provides several connections to each office and supports a wide variety of computing environments. In addition to this wired networking, the department provides wireless internet access in several areas. Many research groups have their own computing systems, which range from simple PCs to Beowulf clusters. At the departmental level, a group of UNIX and MAC servers supports mail, Web, printing, backup, etc. All department members are entitled to accounts on general access Windows XP, Linux, and Sun system with a variety of appropriate software. A computer lab, available to all department members, has workstations, printers, and scanners. The department hosts a Reconfigurable Advance Visualization Environment (RAVE) for stereoscopic visualization of simulation results.

- The Department of Statistics maintains computer systems and laboratories to provide facilities for both research and instruction. Equipment includes thirty Sun UNIX workstations, sixty PCs (operating Windows and LINUX), high-quality laser printers, color printers, a color scanner, and video-capture facilities. Faculty and students have computers in their offices. Software packages include BMDP, MINITAB, SAS, Splus, R, ArclInfo, Mathematica, FORTRAN, C, Java, LaTeX, and TeX. The department has two full-time system administrators to maintain a high-quality computer infrastructure.

Many colleges operate computing laboratories that provide students and faculty with microcomputing capabilities and/or batch and interactive access to the University’s principal computers through Information Technology Services (ITS).

Interdisciplinary—The Applied Research Laboratory (ARL) uses more than 2,000 computers in multiple networks of Microsoft Windows, LINUX, Solaris, and VAX workstations, with software supporting data acquisition and processing, process control, modeling and simulation, visualization, data fusion, interactive problem solving, and business applications. MATLAB is used extensively. A synthetic environment lab is available for 3-D visualization. High-performance computer resources include multiple Linux clusters and grids, and access to U.S. government HPC resources. Mechanical and printed circuit CAD software is used for design, and computer-aided manufacturing software is used extensively to run the shop’s multi-axis CNC machines. Student access is dependant upon their relationship with ARL.

The Materials Research Institute (MRI, at www.mri.psu.edu), together with more than a dozen academic departments/units, offers students access to professionally staffed materials processing, characterization, and computer simulation facilities. MRI enables new opportunities for multidisciplinary education and research within the materials-related disciplines.

Materials Simulation Center (MSC)
A group of faculty and professional staff develop state-of-the-art atomic-scale materials modeling for design of high-performance alloys, evaluation of precursors for epitaxial growth, calculation of electronic and structural properties of nanoscale materials, and simulations for materials processing.

Center for Computational Materials Design (CCMD)
An NSF I/UCRC Center based on needs identified by CCMD members, which initially includes 13 organizations representing both large and small businesses and DOE and DOD laboratories. Faculty from Penn State and Georgia Tech will carry out short and long term research in innovative materials design. The proposed research will be at the interface of industrial relevance and scientific knowledge and will include interdisciplinary groups of materials science and engineering faculty and graduate students, as well as engineering systems design faculty, computer scientists, and applied mathematicians.

Institute for Computational Science
Computational science refers to the use of computers, networks, storage devices, software, and algorithms to solve problems, do simulations, build things, or create new knowledge.

The Penn State Institutes of Energy and the Environment (PSIE) at the Land and Water Research Building provide computing and network infrastructure to support the research of affiliated faculty, researchers, and graduate students. Resources include a firewalled local network as well as web servers and infrastructure for public presentation of research, applications, and data. Additionally, PSIE maintains a 25-person capacity videoconferencing facility for faculty and research use.
Academic Information and Procedures

It is each student's responsibility to know or seek out as needed the regulations and pertinent procedures of Graduate Council and the Graduate School as set forth in the Graduate Degree Programs Bulletin and in the Thesis/Dissertation Guide, published by the Office of Theses and Dissertations, and to meet the standards and requirements expressed by these regulations. Graduate students are encouraged to contact the Office of Graduate Enrollment Services, 114 Kern Graduate Building (814-865-1795), for guidance if they have any questions, uncertainties, or difficulties concerning any procedure or regulation of Graduate Council, the Graduate School, or the University as it may affect them.

In addition, all programs should have a graduate handbook, which provides students with information on specific program requirements and procedures from admission to degree completion (i.e., arrangement of courses in accordance with degree requirements, including required courses and typical elective courses; appointment of advisers and/or committees; responsibilities of the student, adviser, and committee; scheduling of exams; assistantship duties; etc.).

UNSATISFACTORY SCHOLARSHIP

A graduate student who fails to maintain satisfactory scholarship or to make acceptable progress in a degree program may be dropped from the University. One or more failing grades or a cumulative grade-point average below 3.00 for any semester or session or combination of semesters and/or sessions may be considered as evidence of failure to maintain satisfactory scholarship. Action may be initiated by the department or committee in charge of the graduate major or by the chair of the student's doctoral committee. The procedures to be followed in such action are found in Appendix III in this bulletin.

CONFIDENTIALITY OF STUDENTS' RECORDS

The Pennsylvania State University collects and retains data and information about students for designated periods of time for the express purpose of facilitating the students' educational development. The University recognizes the privacy rights of individuals in exerting control over what information about themselves may be disclosed and, at the same time, attempts to balance that right with the institution's need for information relevant to the fulfillment of its educational missions.

The University further recognizes its obligation to inform the students of their rights under the Family Educational Rights and Privacy Act of 1978 (FERPA); to inform students of the existence and location of records as well as to define the purposes for which such information is obtained; to provide security for such material; to permit students access to, disclosure of, and challenge to this information as here-in described; and to discontinue such information when compelling reasons for its retention no longer exist.

Student Record Policy--No information from records, files and data directly related to a student shall be disclosed by any means (including telephone) to individuals or agencies outside the University without the written consent of the student, except pursuant to lawful subpoena or court order, or in the case of specifically designated educational and governmental officials as required by FERPA. Information contained in such records may be shared within the University by University officials with "legitimate educational interest" in such information.

A more complete description of the University's policy on confidentiality of student records, including educational records and alumni records; disclosures to students, third parties, agencies, and parents of dependent students; and challenges to entries, is contained in Policies and Rules, which is available at departmental and deans' offices.
Programs and Advanced Degrees

PROGRAMS

Graduate Major Program--A student's major program is the field of primary interest and the one in which the greater portion of graduate work is taken. Programs are designed to prepare students to assume positions of informed and responsible authority in their fields and to contribute creatively to them. They promote not only specialization, but also breadth of scholarship, the ability to study and think independently, and familiarity with the principal techniques and important literature in the field. The research undertaken by the candidate should deal with a problem that can yield a significant contribution to knowledge.

In general, departments of the University are identified with specific major programs. Thus, Aerospace Engineering is a graduate major program that is offered by the Department of Aerospace Engineering. In some cases, a single department offers work in more than one degree program. Occasionally, two or more departments within a college or across colleges collaborate in offering an interdisciplinary program.

Intercollege Graduate Degree Programs--When faculty members from departments in two or more colleges collaborate in offering a graduate major, the program is designated as an intercollege graduate degree program. A committee of graduate faculty members approved by the Graduate School is responsible for administering the program under a program chair. The University currently offers more than a dozen such programs, primarily at the doctoral level.

ADVANCED DEGREES OFFERED

The degrees of Doctor of Philosophy, Doctor of Education, and Doctor of Musical Arts are conferred by the University. The Ph.D. places a strong emphasis on research and writing, and the Ph.D. candidate is expected to demonstrate the ability to do original and independent work, and to contribute to the body of knowledge in the field. The D.M.A. recognizes professional-level performance and scholarly knowledge of the instrument and the discipline of music. All require high attainment and productive scholarship.

The Master of Arts (M.A.) and the Master of Science (M.S.) degrees are academic in nature, the programs placing emphasis on basic knowledge and research. Various professional master's degrees also are conferred.

Graduate degree programs are offered at five campuses of the University: University Park (State College); Penn State Erie, The Behrend College (Erie); Penn State Harrisburg (Harrisburg); the Penn State Milton S. Hershey Medical Center (Hershey); and Penn State Great Valley School of Graduate Professional Studies (Malvern). Some graduate programs also are offered online through Penn State’s World Campus at www.worldcampus.psu.edu.

CHANGE OF DEGREE OR PROGRAM

A graduate student who has been admitted for work in one major program but who wants to transfer to another should complete a “Resume Study/Change of Degree or Major” form and submit the request to the Office of Graduate Enrollment Services. The student's credentials will be reviewed and the proposed new graduate program head or committee chair consulted. If the change is approved but the student is inadequately prepared for the new major, the student may be required to make up certain deficiencies.

A graduate student admitted for either an academic/research degree (M.A., M.S., or Ph.D.) or a professional degree who wants to change from one type of degree program to another must complete a “Resume Study/Change of Degree or Major” form and submit the request to the Office of Graduate Enrollment Services. Similarly, a student who has earned a master's degree at Penn State but who wants to earn a doctoral degree in a different field must complete a “Resume Study/Change of Degree or Major” form and submit the request to the Office of Graduate Enrollment Services, 114 Kern Graduate Building. A student may be required to make up certain deficiencies if inadequately prepared for the new program.

CONCURRENT GRADUATE DEGREE PROGRAMS

In general, graduate students are best advised to focus on one degree objective at a time. However, a candidate for a master’s degree in one major field who wishes to begin work for either a master’s or a doctoral degree in a second field; or a candidate for a doctoral degree who wishes to begin work on a master’s degree in a second field while concurrently completing the doctoral program can petition to do so (approval will not be granted for any combination of concurrent doctoral degrees, including the Ph.D., D.Ed., or D.M.A. degrees). The department or program heads of both majors and the director of Graduate Enrollment Services must approve any such plan. Guidelines for preparation of a proposal for concurrent graduate degrees have been established by Graduate Council. The guidelines and form are available on the Graduate School website at: http://www.gradschool.psu.edu/index.cfm/forms-and-documents/ges-owned-forms-and-documents/concurrentgraduatedegreeteensplanofstudy/.

DUAL-TITLE GRADUATE DEGREE PROGRAMS

Students may apply for dual-title degrees in one of the dual-title graduate degree programs approved by Graduate Council. Students wishing to follow this course of action must already be enrolled in an existing graduate program; it is this primary program in which the greater portion of the work will be conducted. The primary program will be supplemented by a secondary program in which substantial work is carried out under the supervision of a faculty adviser from the secondary program, and in which a thesis or culminating/capstone experience integrating both fields is completed. Guidelines and information are available from the Dean of the Graduate School.

INTEGRATED UNDERGRADUATE-GRADUATE (IUG) DEGREE PROGRAMS

Programmatic Integrated Undergraduate-Graduate Degree Programs--Graduate Council-approved Integrated Undergraduate-Graduate (IUG) degree programs are available. These programs allow students to work on a baccalaureate and a master’s degree at the same time and are intended for exceptional students who can perform academic studies at an accelerated pace and take on the challenges of graduate courses and research while still enrolled as undergraduates. Typically, up to 12 of the credits required for the master's degree may be applied to both degrees (excluding the graduate thesis or other graduate culminating/capstone experience, including any associated credits and/or deliverables, which may not be double-counted toward any other degree; if the thesis or culminating/capstone experience is recognized as meeting requirements for the undergraduate degree, it will not be recognized and cannot be used to meet requirements for the graduate degree), and the total time for completing both degrees is less than if the degrees were earned separately. These programs include those within a single department and those that are interdepartmental or intercollege programs. Guidelines and information are available at www.gradsch.psu.edu/index.cfm/policies/faculty/iugguideelines.

Schreyer Honors College Integrated Undergraduate-Graduate Degree Programs--The Graduate School, by special exception from the Dean of the Graduate School, offers Schreyer Scholars the opportunity to integrate any existing Penn State baccalaureate degree program with any existing Penn State master’s degree program in a continuous program of study culminating in both a baccalaureate and a master’s degree.

A Schreyer Scholar who is granted IUG status will have dual enrollment in an undergraduate program and in a master’s program. Some credits earned as an undergraduate may be applied to both degree programs; however, the graduate thesis or other graduate culminating/capstone experience (including associated credits and/or deliverables) may not be double-counted toward any other degree. If the thesis or culminating/capstone experience is recognized as meeting requirements for the undergraduate degree, it will not be recognized and cannot be used to meet requirements for the graduate degree. Schreyer Scholars must adhere to the Graduate Council guidelines for establishing IUG programs that may be found at www.gradsch.psu.edu/index.cfm/policies/faculty/iugguidelines when constructing their individual IUG programs, including those related to timing of admission. In addition, the Schreyer Honors College has established procedures for Schreyer Scholars who wish to explore this opportunity (see www.shc.psu.edu/students/iug/program/IUGGuideline.pdf).

Updated: 12/18/13

The Pennsylvania State University
**Registration**

A graduate student who is in residence at the University is expected to be properly registered. In residence means that the student (whether full- or part-time, whether commuting to campus or other instructional site or living nearby or on campus) is pursuing graduate credits and/or an advanced degree by (a) attending classes or seminars for credit or audit; (b) doing a thesis, term project, independent study, or similar research or scholarly work in a University laboratory or other research facility; (c) consulting in person or by other means of communication with one or more faculty members on scholarly matters, research projects, or dissertation; (d) using the library, Computation Center, or other University information resources; or (e) using other University facilities provided for graduate study.

The responsibility for being properly registered rests first with the student and secondarily with the student's advisor if the student has one (nondegree students may not). A student may register for course work or research or a combination of the two. In the case of research the number of credits shall be determined by the amount of time devoted to the investigation, with 1 credit representing approximately the equivalent of one week of full-time work. In the later stages of the program, the situation will determine the requirements for the student's registration. (See Registration Near the Completion of a Program.)

**International Students**—Because international students on an F1 or J1 visa are required by the Department of Homeland Security regulation to be in residence, all international students need to be registered for full-time status (fall and spring semester), unless an exception to full-time enrollment has been approved by the University Office of Global Programs Directorate of International Student Advising (DISA). Students who fail to register may jeopardize their status.

**Advisers**—Advising is an important factor in enhancing the quality of a student's program. To assist the student in planning a coherent program and meeting all degree requirements, the head of the major department or program chair will designate a member of the faculty to serve as adviser. It is the student's responsibility to secure an adviser from the department or program and to seek a conference before each registration.

**Time of Registration**—Registration days are indicated in the calendar at the beginning of this bulletin. A student is expected to complete registration during the officially designated period and to attend the first meeting of all classes. If this is impossible because of some emergency or unusual circumstance, the student may be granted permission by the instructor to miss a few class meetings, it being understood that work missed will be made up subsequently.

Under these conditions permission may be granted through the Office of Graduate Enrollment Services for the student to register late. In general, a student who receives permission to register late will be required to reduce the course load in proportion to the length of absence.

A student who fails to complete the process of registration within the officially designated registration period will be liable for the late registration charge, regardless of when the student begins attending classes.

**Continuity of Registration**—A student who is a degree candidate at any of the five graduate campuses of the University and who registers there without interruption for each fall and spring semester is considered to have maintained a normal continuity of registration. A student who has been admitted as a "summers only" D.Ed. candidate (see D.Ed. Residence Requirements) can maintain continuity by registering each summer for a six-week summer session.

Anyone who has interrupted such a normal sequence and now plans to return and register for course work is required to submit a request to the appropriate campus graduate admissions office using the form found at the corresponding links below:

- **Penn State Great Valley School of Professional Studies**
- **Penn State Harrisburg**
- **All other campuses**

The policy may be summarized for any specific semester or session as follows:

- **Summer Session**—Resume Study/Change of Degree or Major form required unless the student was registered for the preceding spring semester or the preceding summer session (if “summers only” student).
- **Fall Semester**—Resume Study/Change of Degree or Major form required unless the student was registered for the preceding summer session or the preceding spring semester.
- **Spring Semester**—Resume Study/Change of Degree or Major form required unless the student was registered for the preceding fall semester.

**Withdrawal**—The dropping of all academic work for which a student is registered in any semester constitutes withdrawal from the University, and changes the student's status to nondegree. A "Resume Study/Change of Degree or Major" form must then be submitted and approved if the student wants to enroll for further work toward a degree.

**Procedure**—For each registration, it is expected that the student, in consultation with the adviser, will prepare a schedule of courses and research designed to fit individual needs and meeting the pertinent credit limits. The registration process is completed in the manner specified for all students at the University.

Under certain conditions credit may be earned for work done away from the campus. A student contemplating such work should first consult with his or her adviser and then inquire at the Office of Graduate Enrollment Services about the procedures and conditions. The student must assume responsibility for the registration process, by accessing the Registrar's Web site at [www.registrar.psu.edu](http://www.registrar.psu.edu). Registration must be completed before the close of central registration at University Park campus.

A student must register for courses audited as well as those taken for credit.

**REGISTRATION NEAR THE COMPLETION OF A PROGRAM**

A candidate for the Ph.D. degree is required to register continuously for each semester from the time the comprehensive examination is passed and the two-semester residence requirement is met until the thesis is accepted by the doctoral committee, regardless of whether work is being done on the thesis during this interval. (See Registration and Continuous Registration.)

Although there is no general continuous registration requirement for D.Ed. degree candidates and master's students, individual programs may require it. It should be noted, moreover, that (a) proper registration (see Registration) is expected of all graduate students; (b) graduate assistants must carry the prescribed credit loads (see Credit Loads and Academic Status); and (c) because of visa considerations, international students typically will register every semester, no matter what their degree objectives.

A master's candidate is not required to register for the final semester in order to graduate or in order to make minor revisions to the thesis and/or to take a final examination for the degree, unless required to do so by the program.

4/16/12

The Pennsylvania State University
Graduate Credits

Typically, a candidate for an advanced degree is required to earn a certain minimum number of credits at Penn State. Consequently, there is a limit to the number of credits that may be earned at another approved institution to meet the minimum requirements of the degree. Moreover, the department or committee in charge of a major program may require a student to do more of the work at the University than specified by the limitations set by the Graduate Faculty.

Full-time participation in graduate study involves a wide range of activities. The nature of these activities varies because of the diversity of programs throughout the University. The graduate student is responsible for ascertaining, through the adviser and/or program office, the range of total activity of his or her individual program that constitutes normal progress toward the degree.

A self-supported or fellowship student who is registered for at least 9 credits is considered to be engaged in full-time academic work for that semester. If such a student wishes to register for more than 15 credits, an exception to the normal maximum load must be granted through petition (with adviser’s approval) to the Office of Graduate Enrollment Services.

Credit limits and full-time status for assistants and University employees are described under Credit Loads and Academic Status.

Graduate courses carry numbers from 500 to 599 and 800 to 899.

--A 500-level graduate course builds on advanced undergraduate and/or graduate courses, dealing with the frontiers of knowledge in the field. It is grounded in theories, hypotheses, and methodologies as expounded in current and/or primary literature sources. Synthesis of knowledge and independent analytical work by the student must be demonstrated. Significant and regular instructor-initiated interaction between students and the instructor(s) should occur in all 500-level courses, whether delivered in residence or at a distance, including online.

--An 800-level graduate course pertains to the most recently established knowledge and methodologies in a field of study, as applied to practice. It emphasizes analytical thinking and application of knowledge by the student in the context of providing pragmatic solutions for professionals. Significant and regular instructor-initiated interaction between students and the instructor(s) should occur in all 800-level courses, whether delivered in residence or at a distance, including online.

Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. Language courses used to meet foreign language requirements are exceptions, as are the ESL courses for international students.

No student is permitted to count audited credits toward the minimum credit load for full-time or part-time status.

Course-Numbering System—Courses in the series 1–399 are not listed in this bulletin because they are strictly undergraduate courses and yield no graduate credit. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Courses in the series 400–499 are for upperclass students with at least a junior standing and for graduate students. Only a limited number of credits earned in these courses may be counted toward the requirements for an advanced degree. Detailed regulations concerning the restrictions are given under the specific requirements for the various master’s degrees.

Courses in the series 500–599 and 800–899 are restricted to students registered in the Graduate School, senior undergraduate students with an average of at least 3.50, and certain other students with averages of at least 3.00 who have been granted special permission to enroll through the Office of Graduate Enrollment Services. (See the introduction to Graduate Programs, Faculty, and Courses for a more detailed description of these courses.)

The numbers 600 (on campus) and 610 (off campus) are available for credit in thesis research in all graduate major programs. The numbers 601 and 611 do not denote conventional courses but are used for noncredit special registration for thesis preparation by a Ph.D. candidate. (Note that 596 course numbers may not be used for thesis research work.) Registration under these numbers will maintain status as a full-time (601) or part-time (611) student during the interval that begins at the time the student passes the comprehensive examination and meets the two-semester residence requirement and ends at the time the doctoral committee accepts the thesis. The student may register for 601 if engaged full-time in the preparation of a thesis or for 611 if engaged only part-time in thesis preparation. Candidates for the Ph.D. degree do not receive grades for noncredit registrations (601 and 611). [See also Ph.D.—Additional Specific Requirements and the common course descriptions in the introduction to Graduate Programs, Faculty, and Courses.]

Schedule of Courses—The most current information on courses that will be offered in any specific semester is at http://schedule.psu.edu. It gives the number of the class, the hours at which the class will meet, the location of the class, and in some cases the instructor’s name.

Visiting and Auditing Classes—A graduate student registered for a given semester who wants to attend classes without receiving credit may secure permission either to visit or to audit courses during that semester.

As a visitor, a student may attend classes with the approval of the instructor but may not claim the usual privileges of class membership, such as participating in discussion, doing practicum work, or taking examinations. Registration is not required for the privilege of visiting, and no record appears on the student’s transcript.

As an auditor, a student may participate in class discussion, do practicum work, take examinations, and generally enjoy the privileges of a class member. Registration procedures and fee payment are the same as for taking the course for credit. Attendance is required. No credit is given, either on completion of the course or at a later time; however, the number of credits assigned to the course appears on the grade report and on the student’s transcript. Thus, when a student receives an audit grade, the number of credits audited is shown. The symbol AU shall be used if attendance has been regular, the symbol W if attendance has been unsatisfactory.

A graduate assistant or Fellow who is required to register for a certain minimum number of credits is not permitted to count audited course credits toward the minimum credits needed. Undergraduate courses taken to meet foreign language or English requirements do count in the total credit load. The student may register for credit or audit beyond the required minimum but may not exceed the normal maximum without special permission.

Updated: 9/24/13
Credit Loads and Academic Status

**Graduate Assistants**—Graduate assistants must be enrolled at Penn State as graduate students. More specifically, since assistantships are provided as aids to completion of advanced degrees, assistants must be degree-seeking and enrolled in residence for credit loads each semester that fall within the limits indicated in the table below. Maximum credit loads are indicated in order to allow the student to give appropriate attention both to academic progress and assistantship responsibilities. These considerations give rise to the table of permissible credit loads below.

<table>
<thead>
<tr>
<th>Level of Assistantship</th>
<th>Credits Per Semester</th>
<th>Credits per 6-Week Summer Session</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quarter-time</td>
<td>9-14</td>
<td>5-7</td>
</tr>
<tr>
<td>Half-time</td>
<td>9-12</td>
<td>4-6</td>
</tr>
<tr>
<td>Three-quarter-time</td>
<td>6-8</td>
<td>3-4</td>
</tr>
</tbody>
</table>

*Credits taken during the Maymester and over each six-week summer session must total a minimum of 9 (for 1/4- and 1/2-time assistantships) or 6 (for 3/4-time assistantships) and cannot exceed a maximum of 8 (for 3/4-time assistantships), 12 (for 1/2-time assistantships), or 14 (for 1/4-time assistantships).

To provide for some flexibility, moderate exceptions to the specified limits may be made in particular cases. The credit limits specified above may only be increased or decreased in exceptional cases for a specific semester or summer session by permission of the assistantship supervisor, the student's academic adviser, and the dean of the Graduate School (requests should be submitted for the dean's approval via the Office of Graduate Enrollment Services). The Graduate School expects that an exception made in one semester or summer session will be compensated for by a suitably modified credit load in the subsequent semester or summer session, so that, on the average, normal progress is maintained at a rate falling within the limits above. Failure to do so may jeopardize the student's academic status. Maintenance of the established credit loads and responsibility for consequences of a graduate student's change of course load rest with the student and adviser. The course load is a factor in determining whether a graduate student is classified as full-time or part-time student; has met residence requirements; and is eligible to hold a fellowship, traineeship, assistantship, or departmental or program appointment.

**Full-Time Academic Status**—Students holding fellowships, traineeships, or other awards based on academic excellence are required to carry 9 or more credits each semester (fall and spring). For awards that require full-time summer registration, students should register for a minimum cumulative total of 9 credits (over all summer sessions), or SUBJ 601 (in the case of post-comprehensive doctoral candidates). A graduate assistant whose semester or summer session credit load meets or exceeds the minima in the above credit table and whose assistantship duties are directly related to his or her degree objectives is considered by the Graduate School to be engaged in full-time academic work for that semester or summer. A post-comprehensive doctoral candidate who is registered for SUBJ 601 also is so considered.

**Part-Time Academic Status**—A student who in any semester or summer session is registered for study but who does not meet the criteria for full-time status is considered to be engaged in part-time academic work for that semester. This includes students registered for SUBJ 611.

**Credit Loads for Internationals**—The Department of Homeland Security requires that international students proceed in a timely fashion toward completion of their degrees, as established by the academic department and (usually) stated on their initial immigration document. Failure to maintain normal progress toward completion of the degree during this period will jeopardize the student’s ability to continue academic study, adjust status, or seek future employment in the United States. Because of this, students should not be enrolled less than full-time during fall or spring semester without prior approval of the University Office of Global Programs Directorate of International Student Advising (DISA).

The U.S. Department of Homeland Security requires the DISA to report violations of status, including failure to maintain full-time enrollment. The following is intended to provide guidance for international graduate students and for DISA in determining full-time status:

- A graduate student is considered full-time if registered for a minimum of 9 credits, excluding courses taken for audit, or if a Ph.D. candidate who has successfully completed the comprehensive examination and is registered for SUBJ 601.
- On rare occasions, and under exceptional circumstances, international students in master’s degree programs who have completed all required course work and, if applicable, research for their degree, may be granted an exception to the need to maintain full-time status as defined above, for a limited period (in no case to exceed two semesters), by special petition to DISA in advance of the semester in which the exception is needed. This request must be initiated by the student using the DISA eForm system. The academic adviser will be asked through this eForm system to justify the reduced course load.
- Under all circumstances, international students must be enrolled—either full-time or approved by DISA for a reduced course load. (See Academic Information and Procedures/Registration/International Students.)

**Employment**—Many students depend upon part-time employment to help meet their expenses. A student who is thus employed, whether on or off campus, must recognize the time demands of a work schedule in planning an academic program. A student holding a fellowship or scholarship may not accept employment of any kind for service beyond that specifically permitted by the appointment. A graduate assistant may assist in classroom or laboratory instruction, in research or in other work. The tasks assigned to a graduate assistant often are identical in nature to those required for the advanced degree sought. Additional compensation is paid to a graduate assistant by the University for additional hours of work only with special, advance approval of the administrative head of the academic unit in which the assistantship is held, and the chair of the student’s graduate academic program, and provided that such compensation is not for additional hours of work on the assigned assistantship duties. A graduate assistant may not hold a concurrent appointment with the University other than a Fellowship Supplement.

For international students, guidelines for assistantships or employment are the same as for domestic students, with the following distinctions: (a) I-9 and W-4 forms must be processed through DISA; (b) vacation period employment may be up to forty hours per week; and (c) since Department of Homeland Security regulations on employment are subject to change, all employment off campus for international students must be cleared through DISA.

**Full-Time Employment Off Campus**—A candidate for the Ph.D. degree at a particular campus of the University may not count the work of any semester toward the residence requirement for this degree while engaged in full-time employment off campus or at a different campus of the University.

**Staff Employee Credit Status**—A full-time staff employee of the University may schedule up to 16 credits per academic year, either for credit or audit. Full-time University employees may meet Ph.D. degree residence requirements by registering for 6 credits per semester or 4 credits per eight-week summer session and by obtaining certification from the department head as being principally engaged in activities directly relating to their degree objectives. A post-comprehensive full-time University employee may not register for SUBJ 601 (i.e., full-time thesis preparation), but may register for SUBJ 611 (part-time thesis preparation).

No academic employee above the rank of instructor or research assistant or equivalent may receive from the University a master’s degree or doctoral degree in any graduate program where the faculty member has membership, teaches courses, serves on master’s or doctoral committees, or has other supervisory responsibilities that might give rise to conflicts of interest. The faculty member should inform his/her department head of his/her intention to pursue an advanced degree.

University staff employees who want to take graduate degree work must first be admitted to the Graduate School.

Updated: 4/15/12

The Pennsylvania State University
Grading System

A grade is given solely on the basis of the instructor’s judgment as to the student’s scholarly attainment. The following grading system applies to graduate students: A (EXCELLENT) indicates exceptional achievement; B (GOOD) indicates substantial achievement; C (SATISFACTORY) indicates acceptable but substandard achievement; D (POOR) indicates inadequate achievement and is a failing grade for a graduate student—a course in which a D has been obtained cannot be used to meet graduate degree requirements and will not count toward total credits earned; and F (FAILURE) indicates work unworthy of any credit, and suggests that the student may not be capable of succeeding in graduate study. The grade-point equivalents for the above marks are: A, 4.00; B, 3.00; C, 2.00; D, 1.00; F, 0. A minimum grade-point average of 3.00 for work done at the University is required for all graduate degrees. In Fall 1995 a +/- grading system went into effect that includes A-, B+, B-, and C+. The grade-point equivalents are A-, 3.67; B+, 3.33; B-, 2.67; and C+, 2.33.

In addition to the quality grades listed above, three additional grade designations, DF (deferred), NG (no grade), and R, may appear on a student’s transcript. If work is incomplete at the end of a semester because of extenuating circumstances, the instructor may report DF in place of a grade, which will appear temporarily on the student’s record. It is not appropriate to use the DF either casually or routinely to extend a course beyond the end of the semester or to extend a course for a student who has failed so that the individual can do extra work to improve the grade. Required work should be completed and the DF resolved as soon as possible once assigned, but must be resolved (i.e., the course must be completed) no later than twenty-five weeks after the course end date as noted on the Registrar’s Schedule of Courses. A deferred grade that is not resolved before the end of this period automatically converts to an F, unless an extension to a specified date is agreed upon by the instructor and student that allows for a completion deadline longer than 25 weeks. A memo with a justifying statement and the agreed-upon date must be submitted by the instructor to the Office of Graduate Enrollment Services in order to request an extension.

If an instructor does not submit a grade (including a quality grade, DF, or R) for a graduate student by the grade-reporting deadline, the designation NG (no grade) appears on the transcript. An NG that is not reconciled within twenty-five weeks following the posting of the NG automatically becomes an F.

A DF or NG that has converted to an F may not be changed without approval from the Office of Graduate Enrollment Services. Requests for approval must be submitted by the instructor and include a justification for the change.

It is to be emphasized that no deferred (DF), missing(*), or no grades (NG) may remain on the record at those times when a student reaches an academic benchmark. Benchmarks include completion of a degree program (e.g., master’s completed for a student continuing through for a doctoral degree) and the doctoral candidacy, comprehensive, and final oral examinations. Graduate programs may add additional benchmarks.

It is further noted that there are only three circumstances under which a course grade, once assigned, can be changed: (1) if there was a calculational or recording error on the instructor’s part in the original grade assignment (Senate Policy 48-30); (2) if it is a course for which an R grade has been approved and in which an initial R can be assigned and changed later to a quality grade; (3) if, as discussed above, a DF was assigned and the deadline for course completion has not yet passed.

Grade changes are governed by Senate Policy 48-30, found in Policies and Rules.

In the case of thesis work, either in progress or completed, and in certain courses (e.g., 590, 594, 595, 596, 597, 598, 599, 894, 895, 896, 897, 899, and a few others) approved by the Graduate Council, the instructor may report the symbol R in place of a grade. An R does not influence the grade-point average. It indicates that the student has devoted adequate effort to the work scheduled but gives no indication of its quality. The symbol may be used, for instance, in courses that are officially designed to extend over more than one semester or in courses for which a quality grade is not appropriate. An R in an approved graduate course need not be changed later to a quality grade. Graduate courses approved for R grading may be credited toward fulfilling graduation requirements. However, if the instructor deems it appropriate, the R grade may be changed to a quality grade when the course work has been completed. Normally, if a quality grade is to be assigned, the grade must be reported no later than the end of the following semester.

When reported for thesis work, an R will not influence the grade-point average and remains on the student’s transcript if not converted to a quality grade within one semester of its recording. The Graduate Council has established upper limits of 6 credits of quality grades for master’s thesis research and 12 credits for doctoral dissertation research. The remaining credits must be assigned Rs except in the case of academic or disciplinary sanctions, in which case an F or XF grade may be assigned, as appropriate, up to the total number of thesis research credits (600 or 610) on record. (See Senate Policy 49-20 and Procedures G-9, as well as Appendix L of this bulletin).

Pass-Fail (P/F) grading is used exclusively in certain graduate courses where it has been requested by the program and approved by the graduate dean following guidelines established by the Graduate Council. A grade of P does not influence the GPA, but an F does.

Revised by Graduate Council, April 2011

6/6/13

The Pennsylvania State University
Thesis

Thesis Research—To register for thesis/dissertation research in all graduate major programs, a student uses the appropriate course number (600 for on campus, 610 for off campus) preceded by the abbreviation designating the major field. The Bursar’s office assesses charges for these courses at the current rate of tuition according to the student’s status at the time of registration.

Students registering for 600 or 610 should be aware that Graduate Council has established limits on the total number of research credits that can be assigned letter grades in a student’s program (i.e., other than R): 6 credits for master’s candidates and 12 credits for doctoral candidates.

Ph.D. Dissertation Preparation—The numbers 601 and 611 are available to Ph.D. degree candidates only and are used for special noncredit registration for dissertation preparation work. Such candidates must have passed the comprehensive examination and must have met the two-semester residence requirement. A candidate registered for SUBJ 601 is classified as a full-time student, while one registered for SUBJ 611 is classified as a part-time student.

The numbers 600, 601, 610, and 611 may not always appear in the Schedule of Courses for each semester, but they are available for registration each semester.

Thesis/Dissertation Submission—When a student completes a thesis or a dissertation, an archival copy must be submitted to the Graduate School. After acceptance by the Graduate School, the document is available through the University Libraries.
Graduation

Students who plan to graduate at the end of the current semester/session are responsible for indicating an intent to graduate. A student must initiate an intent to graduate via eLion during the designated period for that semester. Any changes to a student's graduation status after this time period must be made by contacting Graduate Enrollment Services at 814-865-1795.

Students who have been removed from the graduation list will need to initiate their intent to graduate again for the semester in which they plan to graduate.

A preliminary graduation list is prepared and reviewed by Graduate Enrollment Services soon after the deadline for each semester or summer session. Accepted theses, master's papers, and project reports are noted as may be relevant. The records of candidates who appear to have met requirements are forwarded to major and minor department heads or program chairs for review and recommendation. The final list of approved candidates appears in the fall, spring, or summer commencement program.

Only those transfer credits that have been accepted by the Graduate School and entered upon the student's transcript before the graduation deadline will be considered in evaluating a student for graduation at the end of that particular semester or summer session.

The University holds commencement exercises for graduate students three times a year: at the end of the fall and spring semesters and at the end of the summer session. Attendance at commencement exercises is expected. Diplomas are mailed to all students unable to participate in the commencement exercises. Information is available at the Office of the University Registrar, 112 Shields Building, or by accessing the Registrar's Web site at www.registrar.psu.edu.

Even though the student's name may appear in the commencement program, no degrees are conferred until final grade reports have been received and all requirements fulfilled. A student's transcript or diploma, or both, may be withheld until any outstanding financial obligations to the University have been paid.
DOCTORAL DEGREES

The Doctor of Philosophy (Ph.D.), an academic degree, and the Doctor of Education (D.Ed.) and Doctor of Musical Arts (D.M.A.), both professional degrees, are conferred by the University. Recognized as different in purpose, the three doctoral programs consequently have different requirements in certain respects.

ADMISSION

A student who has been admitted to the Graduate School and has been accepted by the department or committee in charge of a major program in which the doctorate is offered may begin working toward a doctoral degree. However, the student has no official status as a doctoral student and no assurance of acceptance as a doctoral candidate until the candidacy examination has been passed. This examination is administered by the major department or graduate program and is given early in the student's program.

It is the policy of Graduate Council not to encourage applicants to work for a second doctoral degree. (See Policy on Second Doctorates). However, the President, on recommendation of the dean of the Graduate School, will welcome, as guests, holders of earned doctoral degrees who may be visiting the University for purposes of noncredit study. Guest privileges apply to persons holding the degree from Penn State or other accredited colleges and universities. Guests may attend seminars and courses and, if space and facilities are available, carry on research. There will be no charge except for laboratory expenses. Arrangements must be made in advance with the dean of the Graduate School.

GENERAL REQUIREMENTS

No specified number of courses completed or credits earned will assure attainment of the doctorate. The general requirements are based upon a period of residence, the writing of a satisfactory dissertation accepted by the doctoral committee and the Graduate School (Ph.D./D.Ed.), and the passing of a comprehensive examination and either a final oral examination (Ph.D./D.Ed.) or a final performance (D.M.A.). A doctoral program consists of such a combination of course seminars and individual study and research/scholarship as meets the minimum requirements of Graduate Council and is approved by the doctoral committee for each individual student.

A master's degree is not a prerequisite for the doctorate in some major programs. However, the first year of graduate study leading to the Ph.D. may be substantially the same as that provided for the M.A. or M.S. degree. Similarly, the first year of the D.Ed. program may be essentially the same as that provided for the M.Ed. degree, and the first year of the D.M.A. program may be essentially the same as that provided for the M.Mus. degree.

SATISFACTORY SCHOLARSHIP

A graduate student who fails to maintain satisfactory scholarship or to make acceptable progress in a degree program may be dropped from the University. One or more failing grades or a cumulative grade-point average below 3.00 for any semester or session or combination of semesters and/or sessions may be considered as evidence of failure to maintain satisfactory scholarship. Action may be initiated by the department or committee in charge of the graduate major or by the chair of the student’s doctoral committee. The procedures to be followed in such action are found in Appendix III of this Bulletin.

GRADE-POINT AVERAGE

A minimum grade-point average of 3.00 for work done at the University is required for admission to the candidacy examination, the comprehensive examination, and the final oral examination/final performance, and for graduation.

TIME LIMITATION

A doctoral student is required to complete the program, including acceptance of the doctoral dissertation or the passing of the final performance, within eight years after the date of successful completion of the candidacy examination. Individual programs may set shorter time limits. Extensions may be granted by the director of Graduate Enrollment Services in appropriate circumstances.

TRANSFER CREDIT

A maximum of 30 credits from a completed master’s degree earned from an institution that does not grant the doctorate in the student's major program may be accepted in partial fulfillment of the requirements for a D.Ed. degree at Penn State with no intervening time limitation. The master’s degree must have been earned at a regionally accredited U.S. institution or a recognized degree-granting international institution in the country in which it operates. Thirty (30) such credits are awarded for only one master’s degree.

A maximum of 30 credits from a completed master’s degree earned at a regionally accredited U.S. institution or a recognized degree-granting international institution in the country in which it operates may be accepted in partial fulfillment of the requirements for a D.M.A. degree at Penn State with no intervening time limitation. Thirty (30) such credits are awarded for only one master's degree. All D.M.A. students must complete a minimum of 60 credits at Penn State.

A maximum of two full academic years of work (60 credits) beyond the baccalaureate earned at a regionally accredited U.S. institution, or a recognized degree-granting international institution in the country in which it operates, that grants
the doctorate in the candidate's major program may be accepted by the Graduate School to apply toward D.Ed. degree requirements.

Because there is no Graduate Council minimum total-credit requirement for a Ph.D. degree at Penn State, 30 credits are not accepted towards Ph.D. requirements for a completed master's degree.

A maximum of 10 credits of high-quality graduate work may be transferred toward any doctoral degree at Penn State. Refer to the Transfer Courses section of this Bulletin for more information.

Subject to the approval of the adviser and the head of the major department or program chair, a student may register for research to be done away from the campus that offers the doctoral degree program.

CANDIDACY EXAMINATION

Every student who wishes to pursue a doctorate must take a candidacy examination administered by the Graduate Faculty in the graduate major program. The purpose of the candidacy examination should be to assess whether the student is capable of conducting doctoral research/scholarship based on evidence of critical thinking or other measures that the Graduate Faculty of the program view as important to a successful doctoral student. It should be taken early in the student's program (see degree-specific guidelines below). The nature of the examination varies with the program and may be the master's examination, if applicable and so prescribed by the program. The decision to admit or not to admit a student to candidacy must be made by the graduate faculty or a designated committee of graduate faculty in the program. All graduate students are required to have a minimum grade-point average of 3.00 for work done at the University and may not have deferred or missing grades at the time the candidacy examination is given.

The graduate student must be in good academic standing and must be registered as a full-time or part-time graduate degree student for the semester (excluding summer session) in which the candidacy examination is taken.

If the student is seeking dual candidacy in an approved dual-title graduate degree program, the dual-title field must be integrated into the candidacy examination of the student's major program (i.e., a single candidacy examination is administered, which incorporates both the graduate major field and the dual-title field). For the Ph.D. student, the examination may be given after at least 18 credits have been earned in graduate courses beyond the baccalaureate. The examination must be taken within three semesters (excluding summer sessions) of entry into the doctoral program.

For the D.Ed. student, the examination should be given when the student has earned a total of at least 30 credits toward the graduate degree, including the master's program and graduate work done elsewhere. A student transferring from another graduate school with 30 or more credits earned toward a graduate degree must take the candidacy examination prior to earning more than 25 credits toward the graduate degree at Penn State.

For the D.M.A. student, the examination should be given when the student has completed two semesters in residence.

The results of all candidacy examinations, regardless of the outcome, must be reported to Graduate Enrollment Services via the Candidacy Reporting Form immediately following the examination.

ADVISERS AND DOCTORAL COMMITTEES

Following admittance to a graduate degree program, the student should confer with the head of that major program concerning procedures and the appointment of an academic adviser. Consultation or arrangement of the details of the student's semester-by-semester schedule is the function of the academic adviser. The academic adviser may be a member of the doctoral committee, or may be another member of the Graduate Faculty designated by the program head or chair of the major program for this specific duty. The academic adviser may be different than the major adviser who supervises the culminating experience (dissertation/final performance; i.e., dissertation/performance adviser).

Doctoral Committee

General guidance of a doctoral candidate is the responsibility of a doctoral committee consisting of four or more active members of the Graduate Faculty, which includes at least two faculty members in the major field. The dissertation/performance adviser must be a member of the doctoral committee. The dissertation/performance adviser usually serves as chair, but this is not required. If the candidate is also pursuing a dual-title field of study, a co-chair representing the dual-title field must be appointed. In most cases, the same individual (e.g., dissertation/performance adviser) is a member of the Graduate Faculty in both the major and dual-title fields, and in such cases may serve as sole chair.

At least one regular member of the doctoral committee must represent a field outside the candidate’s major field of study in order to provide a broader range of disciplinary perspectives and expertise. This committee member is referred to as the "Outside Field Member." In cases where the candidate is also pursuing a dual-title field of study, the dual-title representative to the committee may serve as the Outside Field Member.

Additionally, in order to avoid potential conflicts of interest, the primary appointment of at least one regular member of the doctoral committee must be in an administrative unit that is outside the unit in which the dissertation/performance adviser's primary appointment is held (i.e., the adviser's administrative home; in the case of tenure-line faculty, this is the individual's tenure home). This committee member is referred to as the “Outside Unit Member.” In the case of co-advisers, the Outside Unit Member must be from outside the administrative home(s) of both co-advisers. In some cases, an individual may have a primary appointment outside the administrative home of the student’s dissertation/performance adviser and also represent a field outside the student’s major field of study; in such cases, the same individual may serve as both the Outside Field Member and the Outside Unit Member.

If the candidate has a minor, that field must be represented on the committee by a "Minor Field Member." (For additional information related to minors for D.Ed. students, see "Major Program and Minor Field" under D.Ed.—Additional Specific Requirements in this Bulletin.)

The Pennsylvania State University
The doctoral committee is appointed by the director of Graduate Enrollment Services, upon recommendation of the head of the major program, soon after the student is admitted to candidacy. The dean of the Graduate School may, on occasion, appoint one or more members of the committee in addition to those recommended by the head of the program.

A person who is not a member of the Graduate Faculty (and may not be affiliated with Penn State) who is otherwise qualified and has particular expertise in the candidate's research area may be added as a “Special Member,” upon recommendation by the head of the program and approval of the director of Graduate Enrollment Services. A Special Member is expected to participate fully in the functions of the doctoral committee. If the Special Member is asked only to read and approve the doctoral dissertation or to evaluate the final performance, that person is designated a Special Signatory. Occasionally, Special Signatories may be drawn from within the Penn State faculty in particular situations.

Graduate Faculty officially appointed by the Graduate School to a doctoral committee who then leave Penn State may maintain that committee appointment for up to one year if the student’s graduate program and the dean of the Graduate School, through the Office of Graduate Enrollment Services, approve the request for this exception. A retired or emeritus faculty member may serve as a doctoral committee chair if, and only if, he/she was officially appointed and began chairing the committee prior to retirement and has the continuing approval of the program head and the dean of the Graduate School, through the Office of Graduate Enrollment Services. Requests must be sent by the program head to the director of Graduate Enrollment Services. Otherwise, the committee must be revised to either remove the faculty member from the committee or change the individual's appointment to a Special Member.

The membership of doctoral committees should be reviewed periodically by the chair or head of the program to ensure that all members continue to qualify for service on the committee in their designated roles. For example, if type of appointments, employment at the University, etc., have changed since initial appointment to the committee, changes to the committee membership may be necessary. If changes are warranted, they must be made as soon as possible to prevent future problems that may delay academic progress for the student (e.g., ability to conduct the comprehensive examination or final oral examination/final performance).

The graduate program head/chair also must review periodically the Graduate Faculty listing for his/her program on both the Graduate School's website and the graduate program’s listing in this Bulletin to ensure that those listings are accurate.

Chair

The chair or at least one co-chair must be a member of the graduate faculty of the doctoral program in which the candidate is enrolled. A retired or emeritus faculty member may chair a doctoral committee if he/she was officially appointed and began chairing the committee prior to retirement and has the approvals noted above. The primary duties of the chair are to: (1) maintain the academic standards of the doctoral program, Graduate Council, and the Graduate School and assure that all procedures are carried out fairly, (2) ensure that the comprehensive examination and final oral examination/final performance are conducted in a timely fashion, (3) arrange and conduct all meetings, and (4) ensure that requirements set forth by the committee are implemented in the final version of the dissertation (Ph.D./D.Ed.)/final performance (D.M.A.).

Responsibilities of Doctoral Committees

The doctoral committee is responsible for approving the broad outline of the student’s program and should review the program as soon as possible after the student’s admission to candidacy. Moreover, continuing communication among the student, the committee chair, the dissertation/performance adviser, and the members of the committee is strongly recommended, to preclude misunderstandings and to develop a collegial relationship between the candidate and the committee.

COMPETENCIES

ENGLISH COMPETENCE

Candidates for all doctoral degrees are required to demonstrate high-level competence in the use of the English language, including reading, writing, and speaking, as part of the language and communication requirements for the doctorate. Graduate programs are expected to establish mechanisms for assessing and improving competence of both domestic and international students. Assessments should include pieces of original writing. Programs and advisers should identify any deficiencies before or at the candidacy examination and direct students into appropriate remedial activities. Competence must be formally attested by the program before the doctoral candidate’s comprehensive examination is scheduled. (Note: Passage of the minimal TOEFL or IELTS requirement does not demonstrate the level of competence expected of a doctoral degree candidate and for conferral of a doctorate from Penn State.)

COMMUNICATION AND FOREIGN LANGUAGE COMPETENCE

Although no Graduate Council requirement for communication and foreign language competence exists, doctoral programs may have program-specific communication and/or foreign language requirements that provide an important benefit to students and are appropriate to the field. In addition to demonstrating competence in English as described above, each candidate for a doctoral degree is required to meet any communication and foreign language requirements set forth by the respective doctoral degree program. The candidate should ascertain specific communication and foreign language requirements, if any, by contacting the head of the graduate program, whose name appears in the program description under Graduate Programs.

DOCTORAL EXAMINATION REQUIREMENTS

[Comprehensive Examinations [all doctoral degrees]; Final Oral Examinations [Ph.D./D.Ed.]/Final Performances]  
The Pennsylvania State University
The doctoral examinations (the comprehensive examination and the final oral examination/final performance) are administered/overseen and evaluated by the entire doctoral committee.

All candidates are required to have a minimum grade-point average of 3.00 for work done at the University at the time a doctoral examination is given, and may not have deferred or missing grades.

The graduate student must be in good academic standing and must be registered as a full-time or part-time graduate degree student for the semester in which the doctoral examination is taken.

The program head will notify Graduate Enrollment Services, providing two weeks' notice, when the candidate is ready to schedule the comprehensive examination or the final oral examination/final performance. Doctoral examinations are scheduled and announced officially by the Office of Graduate Enrollment Services upon recommendation of the program head, and must not be held without official notification from the Graduate School. Two weeks' notice is required by the Office of Graduate Enrollment Services for scheduling any doctoral examination.

It is expected that doctoral examinations will take place at the campus location of the graduate center offering the program, and the graduate student must be physically present at any doctoral examination.

- Ph.D./D.Ed.: The dissertation adviser, as well as the chair of the doctoral committee (if not the same individual as the dissertation adviser), along with additional members of the committee to total a minimum of three, also must be physically present at the comprehensive/final examinations. (Thus, for a five-person committee, two members could participate via distance.) Requests for exceptions to allow participation of any committee member via distance must accompany the Examination Request Form, and must be submitted to the director of Graduate Enrollment Services for approval at least two weeks prior to the date of the examination. Of those approved to participate via distance, no more than one member may participate via telephone; any or all of those approved to participate via distance may participate via interactive videoconferencing. Special arrangements, i.e., requirements for meeting participation via distance, must be communicated to the student and all doctoral committee members well in advance of the examination.
- D.M.A.: All committee members must be physically present at the oral comprehensive examination and the final performance; the examination and the performance will be scheduled at a time when all members agree to be present.

If a committee member is unable to participate in any of the doctoral examinations and this results in not enough members serving on the committee (i.e., four or more active members of the Graduate Faculty), another Penn State graduate faculty member will need to be appointed officially to the doctoral committee to replace the absent member in order to constitute a legitimate doctoral committee. A revised committee appointment form must be submitted to Graduate Enrollment Services, removing the individual as a regular committee member and requesting the replacement committee member. These changes and approvals must occur before the actual examination takes place (ad hoc substitutes are not permitted).

A favorable vote of at least two-thirds of the members of the committee is required for passing a comprehensive or final oral examination or a final performance. If a candidate fails an examination/performance, it is the responsibility of the doctoral committee to determine whether the student will be granted a second opportunity to take the examination or to perform. Regardless of the outcome and of the committee's decision about whether to grant a second opportunity, the program head must report the results of each scheduled examination/performance immediately to Graduate Enrollment Services.

COMPREHENSIVE EXAMINATION

When a candidate for a doctoral degree has substantially completed all course work, a comprehensive examination is given (for the D.M.A., all required recitals except the final performance [i.e., two solo recitals, two chamber music recitals, and a lecture-recital with pre-approved monograph] also must have been completed successfully prior to the scheduling of the comprehensive examination). The examination is intended to evaluate the candidate's mastery of the major, and if appropriate, the minor field and whether the candidate is prepared to embark upon his/her dissertation research (Ph.D./D.Ed.) or preparation for the final performance (D.M.A.).

Official requests to add a minor to a doctoral candidate's academic record must be submitted to Graduate Enrollment Services prior to establishment of the doctoral committee and prior to scheduling of the comprehensive examination. More information regarding minors may be found as noted below.

- For Ph.D. candidates:
  http://bulletins.psu.edu/bulletins/whitebook/degree_requirements.cfm?section=degreeReq2
- For D.Ed. candidates:
  http://bulletins.psu.edu/bulletins/whitebook/degree_requirements.cfm?section=degreeReq3
- For general information regarding minors:
  bulletins.psu.edu/graduate/programs/minors

As noted above, doctoral candidates must have satisfied the English competence and any program-specific communication and foreign language requirement before scheduling the comprehensive examination.

(Note: Some programs require students to pass various "area" examinations, "cumulative" examinations, or other similar examinations, or require presentation of a dissertation proposal, prior to the comprehensive examination. These are matters of graduate program policy, distinct from the general policies of Graduate Council described here.)

The format for the comprehensive examination may be entirely oral, or it may have both a written and an oral component. When a period of more than six years has elapsed between the passing of the comprehensive examination and the completion of the program, the student is required to pass a second comprehensive examination before the final oral
Both the dissertation adviser/committee chair and the student are responsible for the culminating experience of the D.M.A. degree, which is a public final performance (solo recital). The ultimate step for the Ph.D. or the D.Ed. and is to be made available to the public through inclusion in the University Graduate Bulletin Archive - 2013 - 2014. The Pennsylvania State University constitutes a suitable archival document for inclusion in the University Libraries. Thus, it is to be noted that passage of the doctoral signatory page, and by its acceptance as meeting the editorial standards of the Graduate School, so that it will need to be appointed officially to the doctoral committee as noted above to replace the absent member in order to constitute a legitimate doctoral committee. These changes and approvals must occur before the actual performance takes place (ad hoc substitutes are not permitted). Exceptions to accommodate unexpected last-minute situations that may prevent a committee member's attendance in person but that may allow for the committee member to participate at a distance (e.g., by interactive videoconferencing) may be granted but must be requested and approved through Graduate Enrollment Services before the actual performance takes place. A revised committee appointment form must be submitted to Graduate Enrollment Services, removing the individual as a regular committee member and requesting the replacement committee member. These changes and approvals must occur before the actual examination takes place (ad hoc substitutes are not permitted). The committee examines the dissertation and administers the final oral examination, and once any final revisions have been made and the dissertation is deemed acceptable, committee members sign the doctoral signatory page. The student who approaches the final recital will have passed the comprehensive examination, as well as all previous required recitals (as described above, under "Comprehensive Examination"). The repertoire for the final performance will be decided by the student in consultation with the performance adviser and other faculty members in the major area, after which the student will prepare the final performance independently, without weekly coaching. The performance adviser may request a pre-hearing of the recital material before the doctoral committee members from the major area; the results of this pre-hearing are intended to be advisory and will not necessarily affect the scheduled final performance. The student's full doctoral committee will attend the public recital (i.e., the final performance) at University Park and evaluate it; as part of the evaluation, the doctoral committee will discuss the final performance with the student in private. If a committee member is unable to participate in the final oral examination, the member may sign as a special signatory. A revised committee appointment form will need to be submitted to Graduate Enrollment Services, removing the individual as a regular committee member and if it is desired to designate that individual as a special signatory, a memo from the program head must accompany the revised committee form, requesting that the committee member be moved to a special signatory. As noted above, if there are then not enough members serving on the committee (i.e., four or more active members of the Graduate Faculty), another Penn State graduate faculty member will need to be appointed officially to the doctoral committee to replace the absent member in order to constitute a legitimate doctoral committee. These changes and approvals must occur before the actual examination takes place (ad hoc substitutes are not permitted). If a committee member is unable to attend the final performance in person, resulting in not enough members serving on the committee (i.e., four or more active members of the Graduate Faculty), another Penn State graduate faculty member will need to be appointed officially to the doctoral committee as noted above to replace the absent member in order to constitute a legitimate doctoral committee. A revised committee appointment form must be submitted to Graduate Enrollment Services, removing the individual as a regular committee member and requesting the replacement committee member. These changes and approvals must occur before the actual performance takes place (ad hoc substitutes are not permitted). Exceptions to accommodate unexpected last-minute situations that may prevent a committee member’s attendance in person but that may allow for the committee member to participate at a distance (e.g., by interactive videoconferencing) may be granted but must be requested and approved through Graduate Enrollment Services before the actual performance takes place.

**DISSErTATION ACCEPTANCE**

Completion of the requirements of a Ph.D. or D.Ed. degree program entails acceptance of the dissertation, as indicated by the signatures of at least two-thirds of the doctoral committee, as well as the head of the graduate program, on the doctoral signatory page, and by its acceptance as meeting the editorial standards of the Graduate School, so that it constitutes a suitable archival document for inclusion in the University Libraries. Thus, it is to be noted that passage of the final oral examination is necessary but not sufficient for award of the degree; the dissertation must be accepted as the ultimate step for the Ph.D. or the D.Ed. and is to be made available to the public through inclusion in the University.
Ph.D.—ADDITIONAL SPECIFIC REQUIREMENTS

The degree of Doctor of Philosophy is conferred in recognition of high attainment and productive scholarship in some special field of learning as evidenced by:

1. The satisfactory completion of a prescribed period of study and investigation;
2. The preparation and formal acceptance of a dissertation involving independent research;
3. The successful passing of examinations covering both the special subject and the general field of learning of which this subject forms a part.

Residence Requirements—There is no required minimum number of credits or semesters of study, but over some twelve-month period during the interval between admission to the Ph.D. program and completion of the Ph.D. program, the candidate must spend a minimum of two semesters (summer sessions are not included) as a registered full-time student engaged in academic work at the University Park campus, the Penn State Milton S. Hershey Medical Center, or Pennsylvania State University Harrisburg. Full-time University employees must be certified by the department as devoting half-time or more to graduate studies and/or thesis research to meet the degree requirements. Students should note that 601 cannot be used to meet the full-time residence requirement. (See Credit Loads and Academic Status.)

Continuous Registration—It is expected that all graduate students will be properly registered at a credit level appropriate to their degree of activity. (See Registration.) After a Ph.D. candidate has passed the comprehensive examination, the student must register continuously for each fall and spring semester until the final oral examination is passed. (Students who are in residence during summers must also register for summer sessions if they are using University facilities and/or faculty resources, except for Graduate Lecturers/Researchers, who are not required to enroll for any credits unless they are first-semester graduate students, or are required to be enrolled by their graduate program.)

Post-comprehensive Ph.D. students can maintain registration by registering for credits in the usual way, or by registering for noncredit 601 or 611, depending upon whether they are devoting full time or part time to thesis preparation. Students may take 601 plus up to 3 additional credits of course work for audit by paying only the dissertation fee. Students wishing to take up to 3 additional credits of course work for credit, i.e., 590, 602, etc., with 601 may do so by paying the dissertation fee and an additional flat fee. Enrolling for either 3 credits for audit or credit will be the maximum a student may take with SUBJ 601 without special approval by the Graduate School. NOTE: Registration for additional credits above this will incur an additional charge at the appropriate tuition per-credit rate (in state or out of state). Students wishing to take more than 3 additional credits of course work must register for 600 or 611 (i.e., not for 601, which is full-time thesis preparation).

Note that the least expensive way for a student to maintain full-time status while working on research and thesis preparation is to register for 601. This clearly is the procedure of choice for international students who need to maintain status as full-time students for visa purposes.

If a Ph.D. student will not be in residence for an extended period for compelling reasons, the director of Graduate Enrollment Services will consider a petition for a waiver of the continuous registration requirement. The petition must come from the doctoral committee chair and carry the endorsement of the department or program chair.

Minor Field—A Ph.D. candidate is not required by the Graduate Council to have a minor field of study. However, a department or a committee in charge of a major field may require a candidate to offer work in a minor field, or a student may elect such a program with the permission of the doctoral committee.

A doctoral minor consists of no fewer than 15 graduate credits of integrated or articulated work in one field related to, but different from, that of the major. Programs should consider that a doctoral minor should represent curriculum and study that reflect graduate-level concepts and scholarship, with a preponderance of courses at the 500-level, however, at a minimum, 6 credits must be at the 500-level. A minor may be taken in one of the approved graduate degree programs offered at Penn State, or in a formal graduate minor program that has been approved by the Graduate Council, such as those listed in this Bulletin on the following web page: http://bulletins.psu.edu/bulletins/whitebook/minors.cfm. The minor field chosen must have the approval of the departments or committees responsible for both the major program and the minor field. If more than one minor is being proposed, a separate group of courses must be taken for each (i.e., none of the courses may be used concurrently). If the student received a master’s minor in the same field as is being proposed for a doctoral minor, the 15 credits taken must be above and beyond those used for the master’s minor. However, credits earned in the master’s program over and above those applied to either the master’s minor or major may be applied to a minor in the Ph.D. program.

At least one faculty member from the minor field must be on the candidate’s doctoral committee.

Dissertation—The ability to do independent research and competence in scholarly exposition must be demonstrated by the preparation of a dissertation on some topic related to the major subject. It should represent a significant contribution to knowledge, be presented in a scholarly manner, reveal an ability on the part of the candidate to do independent research of high quality, and indicate considerable experience in using a variety of research techniques. The contents and conclusions of the dissertation must be defended at the time of the final oral examination.

When a complete draft of the dissertation has been compiled, the student must submit it to the Thesis Office for format review. Submission for format review must be made by the announced deadline for the semester/session in which the degree will be conferred. After a successful defense and after signed approval by the advisers and/or committee members and the department head or graduate program chair, the final archival copy of the dissertation (incorporating any format changes requested by the Thesis Office), must be uploaded as an eTD (electronic dissertation) by the announced deadline for the semester/session in which the degree will be conferred. It is also expected that the student will provide a final archival copy of the dissertation to the office of the department or program head.

A Thesis Guide, which gives details concerning format and other requirements, can be accessed at: The Pennsylvania State University
D.Ed.--Additional Specific Requirements

The D.Ed. degree is conferred in recognition of advanced preparation of a high order for work in the profession of education as evidenced by:

1. Satisfactory completion of a prescribed period of study;
2. Ability to apply scientific principles to practitioner problems in a variety of education endeavors;
3. Preparation of dissertation demonstrating ability to undertake an educational problem with originality and independence;
4. Successful performance on major and minor examinations, showing a satisfactory grasp of the field of specialization and its relation to allied education areas.

Residence Requirement--A minimum of 90 credits, of which at least 30 credits must be earned in residence at University Park campus, or Penn State Harrisburg if the degree is offered at that location, is required for the D.Ed. degree. The D.Ed. candidate may meet the requirements by attending summer sessions unless the major department requires a period of registration during the regular academic year. A candidate may register for a maximum of 30 credits of research in absentia, but none of these may count toward the minimum of 30 credits that must be earned at the University Park campus or Penn State Harrisburg if the degree is offered at that location. It is expected that students will register for a minimum of 15 credits of thesis research.

Major Program and Minor Field--The program of study includes a major and either a minor or a group of general studies. A majority of the courses offered in fulfillment of the requirements must be in the major program of study.

A candidate choosing to minor in a major outside the fields of professional education (such as history) shall have a minor consisting of no fewer than 15 graduate credits in professional education, as recommended to the director of Graduate Enrollment Services early in the major program with the approval of a faculty adviser from the major and minor areas.

A candidate choosing a major in one of the approved programs in professional education must also choose either a minor or a group of general studies with the approval of the major program chair. In this case, a minor consists of no fewer than 15 graduate credits in a field considered by the major program committee to provide valuable intellectual and/or professional depth and breadth for the candidate.

There must be at least one faculty member from the minor field on the candidate’s doctoral committee. The minor may include courses taken as part of a previous master’s degree program, if the minor is in an area different from the master’s, and if the courses were not a required part of the program, e.g., used to meet a total credit requirement.

An acceptable general studies group consists of at least 15 graduate credits, including those taken as part of a previous master’s degree (up to 6 credits), considered by the major program committee to provide valuable intellectual breadth for the candidate. (Note that a general studies group is not a minor and is not entered as such on the student’s transcript.)

A candidate entering with a master’s degree in a field that would normally be regarded as appropriate for a minor may petition the major program committee for a waiver of the minor requirement. If the program chair then approves, a request for a waiver may be submitted by the chair to the director of Graduate Enrollment Services. Waiving the minor requirement does not reduce the residence or total credit requirements for the D.Ed. degree.

Comprehensive Examination--In addition to demonstrating a high level of competence in the subject matter in the major program and minor field, each candidate must show, by a comprehensive examination, an understanding of current theories of education and the ability to apply the techniques and findings of educational research so far as they bear upon the teaching of the subject matter. The candidate must also be able to understand and contribute to the technical and professional literature in the field, and to criticize learned procedures in the light of historical trends and practices in this and other countries. Command of the tools for a thorough study of the problems of education is necessary and must include competence in the use of statistical methods. For certain students the requirements may include a reading knowledge of one or more foreign languages.

All candidates are required to have a minimum grade-point average of 3.00 for academic work done at the University at the time the comprehensive examination is given, and may not have deferred or missing grades. The student must be in good academic standing and must be registered as a full-time or part-time student for the semester in which the examination is taken.

Dissertation--Evidence of a high degree of scholarship, competence in scholarly exposition, and ability to select, organize, and apply knowledge must be presented by the candidate in the form of a written dissertation. The candidate must demonstrate a capacity for independent thought, as well as ability and originality in the application of educational principles or in the development of a new generalization under scientific controls. A dissertation may be based upon a product or project of a professional nature, provided scholarly research is involved. For example, it may be based upon the solution of a professional problem concerned with the development of a curriculum, or a product of creative effort related to education. However, in order to be acceptable as a dissertation, professional project must be accompanied by a written discourse demonstrating the nature of the research and including such theories, experiments, and other rational processes as were used in effecting the final result. The topic and outline of the proposed dissertation must have the approval of the doctoral committee.

When a complete draft of the dissertation has been compiled, the student must submit it to the Thesis Office for format review. Submission for format review must be made by the announced deadline for the semester/session in which the degree will be conferred. After a successful defense and after signed approval by the advisers and/or committee members and the department head or graduate program chair, the final archival copy of the dissertation (incorporating any format changes requested by the Thesis Office), must be uploaded as an eTD (electronic dissertation) by the announced deadline for the semester/session in which the degree will be conferred. It is also expected that the student will provide a final archival copy of the disseration to the office of the department or program head.

A Thesis Guide, which gives details concerning format and other requirements, can be accessed at:

The Pennsylvania State University
D.M.A.--Additional Specific Requirements

The Doctor of Musical Arts requires four semesters in residence. The degree is designed to provide students with a thorough background of preparation and experience in professional-level performance and in the literature of the instrument, while becoming sufficiently knowledgeable about the discipline of music as a whole, in order to teach at the collegiate or university level. This background knowledge would include, but not be limited to, music theory, analysis, and history. Sixty credits are required beyond the Master of Music; if an exceptional student is admitted before completion of a prior Master of Music degree, the student will complete a total of 30 credits in categories equivalent to those required for the M.Mus., in addition to the 60 required for the D.M.A. A candidacy examination will follow upon two semesters completed in residence. The comprehensive examination will occur upon the completion of course work, before the final recital. The culminating experience of the D.M.A. degree is a public performance: three memorized solo recitals are required (the final recital is prepared independently), and two recitals of chamber music. Although no written thesis is required, a lecture-recital is required, with a pre-approved monograph text.
Pennsylvania Department of Education Certificate Candidates

For information, see www.ed.psu.edu/certification

PROFESSIONAL DEVELOPMENT CERTIFICATES

Postbaccalaureate candidates who want to pursue course work simply for their professional development and/or a permanent Level II certificate should apply to the Graduate School as special nondegree graduate students.
M.A. and M.S.--Additional Specific Requirements

The Master of Arts and the Master of Science degrees have similar requirements, the general major area determining which degree is conferred. Programs for both degrees are strongly oriented toward research.

A minimum of 30 credits at the 400 level or higher is required, of which at least 20 must be earned at the established graduate campus/center of the University where the program is offered. Some graduate programs require additional credits; the exact number can be determined by consulting the specific program description in the Graduate Programs section of the Graduate Bulletin. A minor is not required of all candidates for the M.A. or M.S. degree. A department or committee in charge of a major program may require a candidate to offer work in a minor field, or the minor may be elected with the permission of the student's committee.

Any member of the Penn State faculty with at least assistant professor rank may participate in the guidance and examination of master's candidates and sign master's thesis signatory pages. Special signatories occasionally are requested and approved for master's thesis. The supervisor of the master's work must be a member of the Graduate Faculty.

A master's minor consists of no fewer than 6 credits of integrated or articulated work in one field related to, but different from, that of the major. Programs should consider that a minor at the graduate level should represent curriculum and study that reflect graduate-level concepts and scholarship, with a preponderance of courses at the 500 level; at a minimum, 3 credits must be at the 500 level. A minor program must be in one of the approved graduate degree programs offered at Penn State and must have the approval of the departments or committees responsible for both the major program and the minor field. For more information regarding minors, please see the Graduate Minors section of the Graduate Bulletin.

The major department or the committee in charge of the major program is the judge as to the suitability of a field for the minor and of its relevance to the major. The minor field department has the responsibility of accepting or rejecting students, advising on courses to be taken by the candidate in the field, examining the candidate in the area of studies undertaken in the field, and certifying that the minor requirements have been met.

At least 18 credits in the 500 and 600 series, combined, must be included in the program. A minimum of 12 credits in course work (400, 500, and 800 series), as contrasted with research, must be completed in the major program, with a minimum number of 800-level credits as appropriate to the degree and as approved by the graduate program to be applied to degree requirements. A thesis is required of many candidates for these degrees; if no thesis is required, students must present a suitable scholarly essay or paper.

If a student is required to write a thesis, at least 6 credits in thesis research (600 or 610) must be included in the program. If no thesis is required, at least 18 credits must be in 500-level courses.

A thesis is prepared under the direction of the department or program in which the candidate's major work is taken. Under certain conditions a student may complete the thesis off campus. To do so, satisfactory arrangements must be made in advance with the adviser and the head of the major department or program.

When a complete draft of the thesis has been compiled, the student must submit it to the Office of Theses and Dissertations for format review. Submission for format review must be made by the announced deadline for the semester/session in which the degree will be conferred. After a successful defense and after signed approval by the advisers and/or committee members and the head of the graduate program, the final archival copy of the thesis (incorporating any format changes requested by the Office of Theses and Dissertations) must be deposited with the Office of Theses and Dissertations or uploaded to the eTD website by the announced deadline for the semester/session in which the degree will be conferred. It is also expected that the student will provide a final archival copy of the thesis to the office of the head of the program.

The Thesis/Dissertation Guide provides details concerning format and other requirements.

As noted above, candidates who are not required to write a thesis must present a suitable scholarly essay or paper. Its nature and extent shall be determined by the major program. The department head or program chair shall report to the Office of Graduate Enrollment Services that the student has met the approved requirement. The department or program is responsible for ensuring that the work is finalized by the published deadline for the semester/session. The program head may require one or more copies of the essay for the program's library or files.

Some graduate programs that emphasize research admit only students interested in pursuing the Ph.D. degree.

Requirements for the M.A. degree at Penn State Harrisburg differ somewhat from the above and are outlined under the major programs in American Studies, Humanities, Community Psychology and Social Change, and Applied Psychology. These programs are available only at Penn State Harrisburg.

Updated: 12/18/13
Master of Accounting (M.Acc.)

The Master of Accounting is designed to prepare students to enter careers in public accounting, corporate accounting, management accounting, governmental accounting, financial analysis, and law enforcement. The program is designed to allow students to complete the educational requirements for becoming a certified public accountant in Pennsylvania as well as most other states. A minimum of 30 graduate credits is required, with at least 18 credits earned in courses at the 500- or 800-level of which at least 6 credits must be earned in 500-level courses. A capstone course (with a final project) integrating material learned in the other program courses is required.
M.Agr.--Additional Specific Requirements

The Master of Agriculture is a professional degree with an industrial orientation. A student, according to individual objectives, may obtain intensive training encompassing a wide spectrum of subject matter area or intensive training in a specialized area. The program emphasizes the development of professional skills in the communication of technical knowledge and its application to the solution of current and future technical, economic, and social problems of individuals and groups.

The head of the department or program chair appoints a three-member committee to guide and monitor the candidate's professional development. Members of this committee must represent at least two departments. The chair of the appointed committee serves as the candidate's adviser. The candidate will inform the committee of personal aspirations and background early in the program. The committee will suggest to the student how best to achieve these goals and the standard of professional competence required for the Master of Agriculture degree.

A minimum of 30 graduate credits is required, of which 18 credits must be at the 500 level or above. A maximum of 10 credits may be earned in special problem-type courses.

Students in the Master of Agriculture degree program can major in Agricultural Economics, Agronomy, Animal Science, Forest Resources, Horticulture, Plant Pathology, Rural Sociology, Soil Science, or Wildlife and Fisheries Science.

The candidate must present an acceptable paper on a selected professional problem or a report of internship training. Up to 3 graduate credits will be given for an acceptable paper. The candidate may be required to provide one or more copies of the paper for the University.

The candidate's committee shall report, through the department head or program chair, to the Office of Graduate Enrollment Services the title of the paper and that a draft of the work has been submitted by the published draft deadline for the semester. The department or program is responsible for ensuring that the work is finalized by the published deadline for the semester.
M.Arch.--Additional Specific Requirements

The Master of Architecture degree is a postprofessional degree intended for persons already holding an accredited Bachelor of Architecture degree. (Postprofessional architecture degrees are not eligible for NAAB accreditation.) The M.Arch. is a 30-credit program that requires 24 credits of course work and 6 credits of thesis or thesis project. At least 18 credits must be at the 500 or 600 levels, and at least 24 credits must be taken in residence at University Park. The core courses consist of a total of 12 credits. The capstone of the M.Arch. degree program is a master's thesis or thesis (design) project, requiring the student to identify and formulate an area of inquiry within which to do original research and then to complete a project or a written thesis.
M.A.S.--Additional Specific Requirements

The professional Master of Applied Statistics degree requires a minimum of 30 graduate credits of which 24 must be courses from the Department of Statistics. Twenty-one credits must be at the 500 level. The program has been approved for both in residence at University Park campus and online via the World Campus.
M.B.A.--Additional Specific Requirements

Master of Business Administration degree programs are offered at the University Park campus, Penn State Great Valley, Penn State Harrisburg, and Penn State Erie.

University Park Campus--The purpose of the MBA program at the University Park campus is to develop professional managerial knowledge and skills as these are applied to decisions in complex organizations. The curriculum was developed by the graduate business faculty to blend technical rigor, managerial theory, and integrative learning experiences through case studies and other teaching methods.

A minimum of 48 graduate credits is required, with a minimum of 42 credits at the 500 level. Twenty-six credits must be in specific core courses. Also required are 22 credits in portfolio and breadth electives. Work for this degree may be started in the fall semester only. Applications for this AACSB-accredited M.B.A program must include the results of the Graduate Management Admission Test.

Penn State Harrisburg--The goals of the Harrisburg MBA program are to provide graduates with a foundation for personal and professional growth and lifelong learning; a firm grounding in the academic disciplines underlying the field of business; participative strengths; and decision making, problem solving, and critical thinking skills. Major emphasis is placed on the social, legal, and ethical context of business—particularly ethical values needed in the conduct of business. Program faculty place high value on teaching and currency of curriculum, an emphasis on oral and written communication, collaborative learning, and cross-functional integration of concepts. The students served by the MBA program are, primarily, employees of area business, government, and not-for-profit organizations who reside within the Capital Region and study on a part-time basis. However, either full- or part-time study is possible. The M.B.A. is also offered as a concurrent MBA/Ph.D. program with the College of Medicine at the Penn State Milton S. Hershey Medical Center Department of Pharmacology, and concurrent MBA/J.D. degree program with The Dickinson School of Law.

The M.B.A. requires a minimum of 30 graduate credits, and is offered at the college's Middletown campus and in Lancaster, Pennsylvania. Eighteen of these credits are in prescribed areas of business, including accounting, finance, management, marketing, and information systems. An additional 12 credits are elective, permitting students to select courses in such areas as e-business, human resource management, financial analysis, or general business to meet their personal and professional goals. Depending on their level of preparation, some students may need to take additional coursework beyond the baccalaureate to permit them to begin their advanced business studies with a common conceptual foundation and adequate understanding of the integrated nature of the business enterprise. Applications to this AACSB-accredited program must include results of the Graduate Management Admission Test and two letters of recommendation. In addition, applicants whose first language is not English or who have not received a prior degree from an institution in which the language of instruction was English must provide scores on the Test of English as a Foreign Language (TOEFL).

Penn State Erie--The Penn State Erie M.B.A. is a general degree emphasizing development of the planning and problem-solving skills crucial in middle and upper management. Course work emphasizes the integration of business functions and the practical application of theory in the business world, using simulated problems and actual situations students are experiencing at work. Many students are fully employed professionals who bring a wealth of knowledge and experience to the classroom. Both full- and part-time study is possible and the program can be completed by attending evening classes. The Master of Business Administration degree program consists of three parts:

1. Foundation Core Courses (18 credits): The courses introduce students to the ethical, legal, social, political, technological, and societal environment of business, accounting, economics, finance, management, marketing, operations management, and the application of quantitative methods to the analysis of business problems. The foundation core is required of all applicants who have not completed an undergraduate degree in business or previous undergraduate or graduate course work relevant to the foundation core requirements.

2. Advanced Required Courses (15 credits): These courses build on the knowledge base established in the foundation core and provide greater depth of knowledge in the subject areas included. This component of the MBA program consists of five 3-credit courses that cover advanced topics in cost management, information systems management, managing a diverse workforce, global operations and supply chain management, and strategic management and business policy.

3. Elective Courses (15 credits): All students are required to take 15 credits of elective courses covering advanced topics of their choice. Electives must include at least 3 credits of community outreach-oriented and 3 credits of internationally focused course work from the program-approved list of courses.

Penn State Great Valley--The M.B.A. at Great Valley's School of Graduate Professional Studies is designed to meet the needs of the working professional desiring to advance her or his career. The M.B.A. requires 45 credits for degree completion. Courses are categorized into four groups: core, advanced, elective, and capstone. Students may be exempt from up to 15 credits from the core courses based on academic preparation and test scores. Students entering the program are expected to meet preprogram requirements that build a foundation for effective communication skills and quantitative analysis.

In addition to the general M.B.A. program, options are available in Biotechnology and Health Industry Management, and New Ventures and Entrepreneurial Studies. Classes are offered evenings and Saturdays in seven-week sessions, and the program may be completed in as little as 18 months. M.B.A. students are admitted year-round at the beginning of each of the seven-week sessions. Applications must include the results of a Graduate Management Admissions Test. For more information, refer to the Web at http://www.gv.psu.edu.
The programs leading to the degree of Master of Education provide preparation for increased professional competence in education. They should be distinguished carefully from the research-oriented programs that lead to the academic degrees of Master of Arts or Master of Science. In most major programs the requirements for admission include 18 credits in education and related fields.

A minimum of 30 graduate credits is required for the degree, of which at least 20 must be earned at the campus/center where the degree program is offered; at least 24 must be in course work. This degree is also offered in certain programs at Penn State Harrisburg and Penn State Great Valley.

**Major Programs in the Fields of Education**--A student can major in one of the approved programs in professional education and proceed under the guidance of a graduate faculty member of the appropriate major. At least 18 credits at the 500 level or above (with at least 6 credits in 500 level) must be included in the program. Most programs of this type require at least 6 credits to be earned outside the major as providing valuable breadth for the candidate. However, this policy differs among programs. Specific information about such requirements is found under the individual program listings in this bulletin or from the program's coordinator. It is important for potential students to obtain the degree requirements of the programs in which they are interested, because many programs specify degree requirements in excess of 30 credits and the manner in which credits are to be earned: required, elective, in or out of the major.

**Major Programs Outside the Fields of Education**--A student who wants to earn an M.Ed. in a specific subject-matter field, such as economics, mathematics, German, or a broader area, can choose such a program as a major and take a majority of work in it under the guidance of the department offering that major. The candidate is required to earn 6 credits in education as directed by the faculty of one of the approved graduate programs in professional education.

**Culminating Experience**--All M.Ed. programs require a significant culminating or “capstone” experience. Each program has established the specific manner for meeting the requirement, which may take the form of a thesis, production, paper, exhibition, comprehensive examination or other similar experience serving to demonstrate comprehensive and in-depth knowledge of the field of study. The nature and extent of this work and when it is to be undertaken within the program of study shall be determined by the major program and reported to the Office of Graduate Enrollment Services of the Graduate School.

**Thesis or Paper**--The thesis or paper must be of considerable proportion and must be clearly and definitively indicative of the capacity to describe a serious intellectual investigation, study, critical analysis, or evaluation; to acquire, integrate, and analyze information; to draw conclusions logically; and to present the experience adequately and professionally in writing. The requirements of the Graduate School regarding a thesis must be met. Programs may impose other requirements regarding the master's paper, including submission of more than one copy for disposition at the program level.

**Exhibition or Production**--The capstone experience must be of comparable rigor as that required for a thesis or master's paper. While the format of the experience will differ among programs, all such capstone experiences must result in definitive evidence of satisfaction of the above noted qualities. Some tangible written report is required, although the length and nature of this report are to be left to the department or program.

**Other Capstone Experience**--If the program wishes to use some other mechanism to demonstrate culminating evidence of analytical ability and synthesis of material, it may do so upon approval by the Graduate Council. The program or department must report to Graduate Enrollment Services evidence that the student has met the approved requirement.
M.E.M. -- Additional Specific Requirements

The Master of Engineering Management is developed for students with a background in engineering or science. Applicants with a four-year undergraduate degree in engineering, mathematics, physics, computer science, or a related discipline will be considered. All students in the Master of Engineering Management program must complete a minimum of 33 credits, including 18 credits in core courses at the 500 level and completion of the capstone course.
The Master of Engineering degree programs provide training for advanced professional competence in several fields of engineering. This professional master's degree emphasizes practical application of knowledge for solving problems and should be distinguished carefully from the research-oriented programs that lead to the academic degree of Master of Science. A minimum of 30 graduate credits is required, of which 20 must be earned at the campus/center where the degree program is offered. At least 18 credits must be earned in graduate courses (500 series).

Culminating Experience--All M.Eng. Programs require a significant culminating or "capstone" experience. Each program has established the specific manner for meeting the requirement, which may take the form of a paper, writing portfolio, or other similar experience serving to demonstrate comprehensive and in-depth knowledge of the field of study. The nature and extent of this work and when it is to be undertaken within the program of study shall be determined by the major program and reported to the Office of Graduate Enrollment Services of the Graduate School.

Work for this degree is not required to be done specifically at the University Park campus. A complete program of study can be pursued at Penn State Harrisburg or Penn State Great Valley.
M.E.P.C.--Additional Specific Requirements

The Master of Environmental Pollution Control (M.E.P.C.) is an intercollege professional degree program designed to improve competence in various fields of the control, management, and prevention of environmental pollution. The degree should be distinguished from the research-oriented program that leads to the academic degree of master of science, since the M.E.P.C. emphasizes application, analysis, and synthesis of knowledge rather than creating new information through traditional research.

A minimum of 30 graduate credits is required, of which 20 must be earned at the campus where the degree program is offered. Special requirements include 1112 credits of core courses covering air pollution, water quality, solid/hazardous waste management, and policy/risk assessment. At least 18 credits at the 500 level or above (with at least 6 credits in 500 level) must be included in the program, which includes 1 credit of E P C 590 and up to 3 paper-writing (596) credits offered through the student's department of affiliation.

A scholarly master's paper must be completed by all M.E.P.C. candidates. It must be of considerable proportion and must demonstrate the ability to formulate objectives, acquire and document relevant information, critically analyze, draw logical conclusions, and relate findings to professional problems and practices.
M.F.A.--Additional Specific Requirements

The programs leading to the Master of Fine Arts degree provide professional training in art, creative writing, and theatre. The M.F.A. is one of two terminal degrees in the arts. (The other is the research-oriented Ph.D.) The M.F.A. is a 48- to 60-credit degree and usually requires two to three years to complete.

The greater number of credits in the major should be at the 500 level, but the needs of the student will be considered in arranging the best combination of courses and research for preparing the candidate in a particular field.

A professional creative project is required. This project will include a monograph (an artist's statement for the M.F.A. in studio art) in support of the creative or interpretative aspect of the program. Continuance in the program is dependent upon the student's academic and artistic progress as evaluated at the end of each semester.
M.Fin. -- Additional Specific Requirements

The Master of Finance (M.Fin.) degree is intended to provide an advanced and specialized graduate education in finance for individuals who have career interests in financial management, financial analysis, or financial consulting with a focused, intensive curriculum that will develop and expand their quantitative, analytical, and technical expertise.

The M.Fin. degree requires 30 graduate credits-18 in prescribed core courses, 9 in electives, and 3 for a capstone course, including a research paper, which provides a culminating experience for students to develop their analytical abilities to identify strategies that enhance value creation, building upon knowledge acquired from the core courses.
M.F.R.--Additional Specific Requirements

The Master of Forest Resources (M.F.R.) is a professional degree designed for students who want to specialize in fields of wood products marketing or industries, forest management, silviculture, urban forestry, watershed management, or wildlife and fisheries management. This degree differs from the research-oriented Master of Science degree programs in the School of Forest Resources, because the M.F.R. emphasizes applications, analysis, and synthesis of knowledge rather than creating new information through more traditional types of research. This program is especially attractive to returning students interested in gaining state-of-the-art information rather than thesis research in their specialized field.

Students who have baccalaureate degrees in forestry, wood products, or wildlife and fisheries may complete the M.F.R. degree requirements in one year, whereas those with degrees in related fields generally require longer because of deficiencies in prerequisite undergraduate courses.

A minimum of 30 graduate credits (400- to 500-level courses) is required, of which 20 credits must be earned at an established graduate campus of the University, with at least 18 credits as formal courses (excluding paper writing, colloquia, and independent studies) related to forest resources, wood products, and wildlife and fisheries. At least 18 credits at the 500 level or above (with at least 6 credits in 500 level) must be included in the program, including 6 credits of formal courses. A paper (3 to 6 credits of FOR/W P/WFS 596) and formal oral presentation (1 credit of FOR/W P/WFS 596) are required as part of the 30 credits that demonstrate ability to apply the knowledge gained during the program to the specialized field of interest. The program must also include 3 credits of statistics at the graduate level.
M.G.I.S.--Additional Specific Requirements

The Master of Geographic Information Systems (M.G.I.S.) degree program is for adult professionals who aspire to leadership in the GIS profession but who are able to study only part-time and at a distance.

MGIS is a 35-credit program. Six to 9 credits are earned through an independent project that culminates in a formal public presentation attended by the student's academic adviser. The independent project demonstrates students' ability to apply advanced knowledge and skills in a way that makes a substantial contribution to their professional work.

Designed in consultation with an advisory board of experienced professionals in industry, government, and private practice, the MGIS curriculum nurtures not only technical competence but also the articulacy, analytical skills, and professionalism required for leadership in any organization.

Throughout the program students create and maintain personal e-portfolios that chronicle their achievements, outline long-term professional development strategies, and foster meaningful interactions among fellow students and faculty members.
M.H.A.--Additional Specific Requirements

Penn State's Department of Health Policy and Administration helps students prepare for positions in health care organizations, the nation's second-largest and fastest-growing industry. Master of Health Administration (MHA) graduates become executives in hospitals, health systems, skilled nursing facilities, insurance companies, consulting firms, home health agencies, federal regulating agencies, medical group practices, health maintenance organizations, public health agencies, mental health agencies, and clinics. The curriculum emphasizes strategic thinking, management, communication, and a broad understanding of the U.S. health care system. Areas of study include health law, epidemiology management, payment mechanisms, ethics, managed care, long-term care, health care technology, marketing, and strategic planning.

Satisfactory scores on either the Graduate Management Test (GMAT) or the Graduate Record Examinations (GRE) are required for admission. In addition, a junior/senior grade-point average of 3.00 or better, a relevant personal statement, and two letters of recommendation are necessary. Some work experience in health care is preferred, but not required.

The MHA program is designed to be completed in twenty-one months of full-time study, although it may be completed on a part-time basis. A minimum of 49 credits is required for completion of the degree. Students take 46 preselected Health Policy and Administration credits and 3 credits of electives selected in consultation with an adviser. Students are required to complete a ten-week residency in a health care practice setting. For full-time students, this is completed during the summer between the first and second years of academic study.

Penn State Harrisburg--Based on eight prescribed core courses defined as the foundation of administration in health care, the degree program is designed for part-time professional students already engaged in, or interested in, health administration careers. Three years of relevant experience is an admission requirement. If the applicant's GPA is less than 3.0, GRE or GMAT scores are required.
M.H.S.--Additional Specific Requirements

The M.H.S. is designed to provide students with broad training in issues surrounding homeland security. The target audience may include federal, state, and local public health officials, public affairs administrators, emergency management professionals, health care professionals, first responders, criminal justice and law enforcement personnel, military staff, and members of corporate security.

The Master of Homeland Security requires a minimum of 30 graduate credit hours, of which at least 18 must be in 500-level courses. Each candidate must complete a project report on a topic related to homeland security. The department head or program chair shall report, to the Office of Graduate Enrollment Services, the successful completion of the report and is responsible for ensuring that the work is finalized by the deadline for the semester in which the student intends to graduate.
M.I.A. -- Additional Specific Requirements

Students admitted to the Master of International Affairs program must take a total of 30 graduate credits, including 18 credits of required core courses with the remaining credits chosen from elective courses that will cluster around areas of concentration designed by the program faculty. A minimum of 18 credits must be at the 500 level or above. In addition to the core curriculum and elective courses, degree candidates must complete either (1) a master’s paper or (2) a supervised internship placement. The master’s paper will involve integrating and showing mastery of the subject matter of the student’s curricular emphasis; the supervised internship placement must be of sufficient depth and professionalism to allow the student to experience the integration of his/her curricular studies in a professional environment. A reflective paper will be submitted as a part of this credit requirement.
M.L.A.--Additional Specific Requirements

The Master of Landscape Architecture program is structured as advanced scholarly inquiry within the professional discipline. The intent is to provide specialized expertise in a niche area of landscape architecture to individuals who already have completed a practice-oriented professional program. Prospective students must hold a degree from an accredited program (or foreign equivalent) in landscape architecture or architecture.

Penn State's MLA program offers particular opportunities for study in four expertise areas: community and urban design, through affiliation with the Hamer Center for Community Design Assistance; ecological issues with emphasis on watershed stewardship, through affiliation with the Center for Watershed Stewardship; design computing, through affiliation with the Stuckeman Center for Design Computing; and landscape history, through affiliation with the Historic Places Initiative.

Students may choose one of two curricular tracks in the MLA: a practicum-oriented option in one of the four centers, or pursuit of a unique independent study in conjunction with a center topic or faculty research. In both tracks, students pursue individual inquiry intended to contribute to advancement of the profession: a paper (or papers) in the option track, and in the independent track a major project that forms the focus of the student's curriculum.

A minimum of 44 credits is required, at least 34 credits at University Park campus: 19 credits are studio/research, 4 are in seminar, 21 are supporting electives. The majority of the course work must be at the 500 level.
M.L.D.--Additional Specific Requirements

The Master of Leadership Development is a 36-credit interdisciplinary professional graduate program that blends the social and behavioral sciences with ethical studies to develop outstanding organizational and community leaders. A series of cornerstone, competency, and context courses are required to provide all students with a common body of knowledge. All students must complete a capstone course (LEAD 582 Social Entrepreneurship and Community Leadership) that provides students with an opportunity to enact what is learned in the course work in the context of promoting a positive change in the community. The program is geared to individuals in mid- to upper levels of management and administration who have at least five years of related professional experience.
M.Mus.--Additional Specific Requirements

The program leading to the Master of Music degree provides training for increased professional competence in performance, pedagogy, conducting, composition. It should be distinguished carefully from the research-oriented program that leads to the academic degree of Master of Arts.

Admission requirements include an audition for performance and conducting applicants and submission of a composition portfolio for composition applicants.

A minimum of 36 credits is required, of which 30 must be earned at the University Park campus. At least one-half of the required credits must be at the 500 level.

Depending on the major option, a professional project in performance, conducting, or composition is required. A master's paper and a comprehensive examination also are required in certain areas.
M.M.E.--Additional Specific Requirements

The Master of Music Education degree provides opportunity for advanced study in the art of music, pedagogy, and systematic problem solving. In addition to the traditional academic year program, a “summer only” option is available.

A minimum of 30 credits is required, of which 20 must be earned at the University Park campus. At least 18 credits at the 500 level or above (with at least 6 credits in 500 level) must be included in the program.

Admission requires 12–15 credits in music education methods at the undergraduate level, successful teaching or student teaching experience, and a video taped demonstration of teaching and musical competence. Also required are a master’s paper and a comprehensive examination.
M.P.A.--Additional Specific Requirements

The Master of Public Administration (MPA) program is intended for those with career interests in public management, health and human services, government, and other public service and nonprofit organizations. The MPA program is accredited by the National Association of Schools of Public Affairs and Administration. The M.P.A. degree is offered at Penn State Harrisburg.

The M.P.A. degree requires 36 graduate credits—18 in prescribed core courses, 15 in electives, and 3 for a professional master’s project. In addition, a 9-credit internship is required of students who do not have at least three years of full-time, relevant work experience, which consists of supervisory, managerial, or professional work. The internship is waived for students with this experience before they enter the program or who gain it during the program.
M.P.M.--Additional Specific Requirements

The Master of Project Management is a 30-credit graduate program that emphasizes all aspects of project management theory and practice. The M.P.M. is interdisciplinary and utilizes problem-based learning as well as a combination of face-to-face and Web-based instructional methods to transcend time and space, and to support effective teaching and learning. The M.P.M. curriculum requires the completion of eight courses (24 credits) in which students are required to apply course concepts to project management situations in their employing organizations. In addition, an applied research project (6 credits) focusing on some aspect of project management is required.
M.P.S. -- Additional Specific Requirements

The Master of Professional Studies is a professional degree. Programs leading to the M.P.S. degree provide opportunities for students to increase their knowledge and competencies in specific careers (as practitioners). The M.P.S. is often considered the "terminal" degree in the field and students entering often need not have undergraduate training in the field, as the curriculum provides foundation material assuming a diversity of backgrounds.

A minimum of 30 graduate credits is required, of which at least 18 credits must be at the 500-level and above, with a minimum of 6 credits of 500-level course work. A significant culminating or "capstone" experience or other mechanism to demonstrate evidence of analytical ability and synthesis of material is required. These may typically include, but are not limited to, a paper, an internship, an exhibition, a production, a comprehensive examination, or a capstone course. The specific form of the culminating experience is determined by the major program.

The department head or program chair shall report to the Office of Graduate Enrollment Services the nature of the culminating experience and is responsible for ensuring that the work is finalized by the deadline for the semester in which the student intends to graduate.
M.S.E.--Additional Specific Requirements

The Master of Software Engineering degree is a professional degree that focuses on exploring and examining software engineering practices and solutions that address emerging industry issues, such as e-commerce and enterprise integration.

The program is designed to meet the educational needs of technical professionals who want to build upon their software engineering knowledge.

Applicants for admission should hold an undergraduate degree in an appropriate technical field. Applicants not holding a technical degree should present a minimum of three years’ work experience in the software profession. All applicants must have proficiency in a high-level language and in the principles of computer architecture, or complete prerequisite courses upon admission to the program.

The degree program requires completion of 36 credits of graduate course work, including a 3-credit advanced studio leading to the development of an actual software product, participation in a research institute, or a 3-credit professional paper.

For maximum career flexibility, students may broaden their study by selecting approved courses from allied fields, such as artificial intelligence, computer science and engineering, and management information systems.
University Course Descriptions

COURSE-NUMBERING SYSTEM

UNDERGRADUATE COURSES (1 to 399): General courses accepted in fulfillment of requirements for the bachelor's degrees.

ADVANCED UNDERGRADUATE COURSES (400 to 499): Courses open to graduate students and to juniors and seniors and, with the special written permission of the head of the department or the chair of the program sponsoring the course, to qualified students in earlier semesters.

GRADUATE COURSES (500 to 699; 800 to 899): Courses restricted to students registered in the Graduate School, seniors with an average of at least 3.50, and other students who have been granted permission to enroll by the dean of the Graduate School. These courses are described in the Penn State Graduate Degree Programs Bulletin.

MEDICAL COURSES (700-799): Courses restricted to students registered in the College of Medicine.

LAW COURSES (900-999): Courses restricted to students registered in The Dickinson School of Law.

COMMON COURSE NUMBERS

The following courses for which students may register have been set up for common use by major programs to encourage innovation and provide flexibility in designing graduate programs. For courses 594, 595, 596, 597, 598, and 599, special titles may be requested by a graduate program for a given semester, through the Senate Curriculum Coordinator, 101 Kern Building, University Park campus.

590. COLLOQUIUM--Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

594. RESEARCH TOPICS--Supervised student activities on research projects identified on an individual or small-group basis. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

595. INTERNSHIP--Supervised, research-oriented, off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc. Prerequisite: prior approval of proposed assignment by instructor.

596. INDIVIDUAL STUDIES--Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

597, 598. SPECIAL TOPICS--Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

599. FOREIGN STUDIES (1-2 per semester, maximum of 4) Courses offered in foreign countries by individual or group instruction. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

600, 610. THESIS RESEARCH--In registering for thesis research a student uses the appropriate number (600, 610) preceded by the abbreviation designating the major field. The numbers 600 (on campus) and 610 (off campus) are available for credit in thesis research in all graduate major programs. The bursar assesses charges for these courses at the current rate of tuition, according to the student's status at the time of registration.

601, 611. PH.D. DISSERTATION--The numbers 601 and 611, with associated special fees, are available to Ph.D. degree candidates who have passed the comprehensive examination and met the two-semester residence requirement. They may be used for dissertation preparation work during its later stages, when the academic activity of the candidate consists partly (611) or solely (601) of work on the completion of research and writing of the dissertation.

SUBJ 601 and SUBJ 611 do not carry academic credit. They are entered on the academic transcript to indicate the registration and the nature of the candidate's academic activity. A candidate registered for SUBJ 601 is classified as a full-time student, while one registered for SUBJ 611 is classified as a part-time student. (See also Thesis/Dissertation, in the General Information section of this bulletin.)

The numbers 600, 601, 610, and 611 may not appear in the Schedule of Courses for each semester.

602. SUPERVISED EXPERIENCE IN COLLEGE TEACHING--May be offered by any graduate program in a department that also offers undergraduate courses. A graduate program with no counterpart undergraduate program may offer SUBJ 602 when cooperative arrangements are made with an administrative unit that does not offer graduate degrees but that uses graduate assistants in its teaching. SUBJ 602 may be offered in any semester and is subject to the following restrictions:

1. SUBJ 602 will not be counted in fulfilling any specific credit requirement for an advanced degree.
2. SUBJ 602 will be graded (A, B, C, D, F). The grade will appear on the student's transcript.
3. SUBJ 602 will not be used in calculating grade-point averages.
4. SUBJ 602 shall be offered only in those graduate programs that want to provide opportunity for supervised and graded teaching experience. Enrollment will be restricted to students for whom the major program is prepared to provide such experience.
5. SUBJ 602 will be counted as a part of the student's credit load unless the program specifies otherwise.
SUBJ 603. FOREIGN ACADEMIC EXPERIENCE (1–12)--Foreign study and/or research approved by the graduate program for students enrolled in a foreign university constituting progress toward the degree.

890. COLLOQUIUM--Continuing, professionally oriented seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

894. CAPSTONE EXPERIENCE--Supervised, professionally oriented student activities that constitute the culminating experience for the program. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

895. INTERNSHIP--Supervised, professionally oriented, off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc. Prerequisite: prior approval of proposed assignment by instructor.

896. INDIVIDUAL STUDIES--Creative projects with a professional orientation, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

897, 898. SPECIAL TOPICS--Formal courses given on a topical or special interest subject with a professional orientation that may be offered infrequently; several different topics may be taught in one year or semester. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

899. FOREIGN STUDIES (1-2 per semester, maximum of 4) Courses with a professional orientation offered in foreign countries by individual or group instruction. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

COURSE ABBREVIATION CODES AND DESCRIPTIONS TO BE USED FOR TRANSFER OF CREDIT

NOTE: The following course abbreviation codes are for use by the Office of Graduate Enrollment Services in The Graduate School only and may appear on transcripts/degree audits.

EXTR (EXT TRNSF FOR DGR RQ)
Course(s) transferred from an external institution to meet requirements toward a graduate degree.

EXTMJ (EXT TRNSF FOR MJR RQ)
Course(s) transferred from an external institution to meet program-specific requirements toward a graduate degree.

CIPTR (CIP TRNSF FOR DGR RQ)
Course(s) transferred from an external institution to meet requirements toward a collaborative institutional integrated undergraduate-graduate or concurrent graduate degree program.

CIPMJ (CIP TRNSF FOR MJR RQ)
Course(s) transferred from an external institution to meet program-specific requirements toward a collaborative institutional integrated undergraduate-graduate or concurrent graduate degree program.

4/25/12
Accounting (ACCTG)

ACCTG 403 Auditing (3) Financial compliance, internal, and operational audits; standards and procedures; sampling; EDP auditing; professional issues; application of concepts through written responses.
Effective: Spring 2008
Prerequisite:

ACCTG 403W Auditing (3) Financial, compliance, internal, and operational audits; standards and procedures; sampling; EDP auditing; professional issues; application of concepts through written responses.
Effective: Spring 2008
Prerequisite:

ACCTG 404 Managerial Accounting: Economic Perspective (3) Accounting techniques as planning, control, and motivating devices in business and other organizations; accounting data for decision making and performance evaluation.
Effective: Spring 2011
Prerequisite:

ACCTG 405 Principles of Taxation I (3) Elements of tax policy and tax-planning concepts for personal and business decision making; with emphasis on taxation of individuals.
Effective: Spring 2008
Prerequisite:

ACCTG 406 Principles of Taxation II (3) Impact of federal tax structure on business decisions, research methodology, tax planning; ethical considerations of tax practice.
Effective: Spring 2008
Prerequisite:

ACCTG 410 Federal Taxation II (3) An examination of the rules and forms used to compute the federal tax liability of corporations and partners.
Effective: Spring 2008
Prerequisite:

ACCTG 411 Accounting Practicum: VITA (3) Introduces students to practical aspects of tax preparation through the IRS’ VITA program and completion of a tax research project.
Effective: Spring 2008
Prerequisite:

ACCTG 422 Accounting Systems (3) Understanding flow and documentation of accounting information and internal controls in the context of accounting cycles.
Effective: Spring 2008
Prerequisite:

ACCTG 426 Financial Statement Analysis (3) The exploration of conventional and advanced methods of analyzing financial statements, including the assessment of earnings quality.
Effective: Spring 2008
Prerequisite:

ACCTG 431 Advanced Auditing (3) Examination of legal liability, EDP, statistical sampling, SEC reporting, internal control, and financial reporting in specialized industries.
Effective: Spring 2008
Prerequisite:

ACCTG 432 Accounting Information Systems (3) Systems analysis tools and techniques; internal control concepts; development of computer control procedures.
Effective: Spring 2008
Prerequisite:

ACCTG 440 Advanced Management Accounting (3) Management accounting topics such as decision models, quantitative techniques, variance analysis, and their use in accounting.
Effective: Spring 2014
Prerequisite:

ACCTG 450 Advanced Accounting (3) Accounting theory and practice for business combinations, branches, international operations, partnerships, consolidated financial statements, corporate liquidations, nonprofit organizations, estates, and trusts.
Effective: Spring 2008
Prerequisite:

ACCTG 461 (IL) International Accounting (3) Study of international accounting issues with emphasis on need, use, and interpretation of financial accounting required in global business environment.
Effective: Fall 2012
Prerequisite:

ACCTG 462 Governmental and Not-for-Profit Accounting (3) Provides an understanding of governmental and not-for-profit accounting theory, procedures, and financial statements.
Effective: Spring 2010
Prerequisite:
Effective: Spring 2008
Prerequisite:

ACCTG 471 **Intermediate Financial Accounting I** (3) Theory and practice issues in income concepts and value measurement; GAAP; revenues, costs, assets, liabilities, and equities. 
Effective: Spring 2008
Prerequisite:

ACCTG 472 **Intermediate Financial Accounting II** (3) Off-balance-sheet financing; special issues in cost capitalization, liabilities, and equities; matching; funds flow statements; statement analysis; inflation accounting. 
Effective: Spring 2008
Prerequisite:

ACCTG 473 **Advanced Financial Accounting** (3) Reporting for multi-corporate enterprises, business combinations, quasi-reorganizations, and selected contemporary reporting problems. 
Effective: Spring 2010
Prerequisite:

ACCTG 481 **Financial Statement Analysis: Accounting Based Evaluation and Decision Making** (3) An accounting based evaluation and decision making approach to analyzing financial statements by studying business and firm valuation. 
Effective: Spring 2008
Prerequisite:

ACCTG 483 **Forensic Accounting** (3) Study of investigative accounting, consulting and litigation support activities undertaken in forensic accounting engagements. 
Effective: Spring 2011
Prerequisite:

ACCTG 489 **Seminar in Accounting** (3) New trends and concepts in accounting; applications and impact on problem solving and decision making. 
Effective: Spring 2008
Prerequisite:

ACCTG 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis. 
Effective: Summer 2003

ACCTG 494H **Research Project** (1-3 per semester/maximum of 6) Supervised student activities on research projects identified on an individual or small-group basis. 
Effective: Summer 2005

ACCTG 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. 
Effective: Spring 2008
Prerequisite:

ACCTG 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Fall 1992

ACCTG 496A **Advanced Accounting** (1-6) Accounting theory and practice for business combinations, branches, international ops, partnerships, corporate liquidations, non-profits, estates, and trusts. 
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

ACCTG 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. 
Effective: Fall 1992

ACCTG 497A **Hot Tax Topics** (3) The course will highlight principles and concepts in US international tax, trusts, and estates, and estate planning.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ACCTG 497B **Financial Reporting in Special Industries** (3) Covers definitions, measurements and disclosures for revenues, expenses, assets, and liabilities not traditionally covered by financial accounting courses. 
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

ACCTG 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. 
Effective: Summer 2003

ACCTG 499 **(IL) Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

The Pennsylvania State University
ACCTG 501 Research Methods in Accounting (3) An introduction to the methods and techniques of contemporary research in accounting.
Effective: Fall 1992
Prerequisite:

ACCTG 504 Seminar in Managerial Accounting (3-6) Accounting and the managerial processes of planning, control, and decision making.
Effective: Fall 1992

ACCTG 507 Seminar in Financial Accounting (3) Theoretical basis of financial accounting.
Effective: Fall 1992

ACCTG 511 Financial and Managerial Accounting (3) Fundamental financial and managerial accounting concepts and issues from the viewpoint of the report user.
Effective: Fall 1992

ACCTG 512 Financial Accounting Theory and Reporting Problems (3) Measurement and reporting of financial information for external purposes, with particular attention to current problems in asset and income measurement.
Effective: Fall 1992
Prerequisite:

ACCTG 524 Managerial Accounting (3) Concepts and techniques of accounting for planning, control, and motivation.
Effective: Fall 1992
Prerequisite:

ACCTG 550 Taxation and Management Decisions (2) Framework for understanding the effects of taxes on business decisions and for devising effective tax planning strategies.
Effective: Summer 2002
Prerequisite:

ACCTG 560 Accounting and Business Analysis (2) Develop ability to assess the relation between accounting data in financial statements and the economic fundamentals represented.
Effective: Summer 2002
Prerequisite:

ACCTG 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1992

ACCTG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

ACCTG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 1992

ACCTG 597A Hot Tax Topics (3) The course will highlight principles and concepts in US international tax, trusts, and estates, and estate planning.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ACCTG 597B Financial Reporting in Special Industries (3) Covers definitions, measurements and disclosures for revenues, expenses, assets, and liabilities not traditionally covered by financial accounting courses.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

ACCTG 597C Accounting Scandals (3) Special topics course that will review past ethics issues and "scandals" the accounting profession.
Effective: Summer 2014 Ending: Summer 2014

ACCTG 599 (IL) Foreign Study--Accounting (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite:

ACCTG 600 Thesis Research (1-15) No description.
Effective: Fall 1992

ACCTG 601 Ph.D. Dissertation Full-Time (0) No description.
ACCTG 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) The student assists in teaching one of the following courses: Acctg. 16, 101, 104, 201, 202, 206, or 400.

Effective: Fall 1992

ACCTG 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1992

ACCTG 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Fall 1992

ACCTG 803 **Forensic Accounting and Litigation Support** (3) Study of investigative accounting, consulting and litigation support activities undertaken in forensic accounting engagements.

Effective: Summer 2009

Prerequisite:

ACCTG 806 **Taxes and Business Planning** (3) Effects of tax regimes on decision-making, tax planning and market outcomes. Also, ethics, tax research, and policy.

Effective: Summer 2009

Prerequisite:

ACCTG 873 **Advanced Topics in Financial Reporting** (3) Financial disclosure and reporting for complex business enterprises and activities; current issues in financial reporting.

Effective: Summer 2009

Prerequisite:

ACCTG 881 **Financial Statement Analysis** (3) Analysis of financial reports to identify business strategy, assess performance and economic standing, and value claims.

Effective: Summer 2009

Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Accounting - Behrend (ACNTG)

ACNTG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

ACNTG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

Last Import from UCM: May 24, 2014 3:00 AM
Accounting-Cl (ACCT)

ACCT 501 Financial Statement Analysis (3) Study of financial reporting, financial statement analysis, capital markets, asset pricing and impact of ethical, legal, regulatory and environmental concerns.
Effective: Spring 2002
Prerequisite:

ACCT 504 Auditing Theory and Practice (3) Auditing theory pertaining to the regulatory environment, risk assessment, internal controls, materiality, computerization, analytical procedures, sampling, fraud, ethics, and professional responsibilities.
Effective: Summer 2012
Prerequisite:

ACCT 510 Business Tax Planning Theory and Practice (3) Tax theory pertaining to corporations, partnerships and conduit entities, estates, trusts, ethics, and professional tax responsibilities.
Effective: Summer 2012

ACCT 540 Accounting for Managerial Decisions (2) Application of accounting to monitoring and improving the internal operation of an organization.
Effective: Fall 2005
Prerequisite:

ACCT 545 Strategic Cost Management (3) Current managerial accounting topics such as activity-based costing, theory of constraints, performance measures and their use in organizations.
Effective: Spring 2002
Prerequisite:

ACCT 561 Financial Statement Analysis II (3) The exploration of conventional and advanced methods of analyzing financial statements, including earnings quality and financial distress assessment.
Effective: Summer 2004
Prerequisite:

ACCT 571 Strategic Tax Planning (3) Study of strategic aspects of tax for planning business operations, growth, expansion, capital transactions, and transfer of wealth.
Effective: Summer 2004
Prerequisite:

ACCT 572 Financial Reporting I (3) Accounting theory and practice for reporting consolidations, foreign currency transactions, and preparing financial statements for governmental and NGOs.
Effective: Summer 2012
Prerequisite:

ACCT 573 Financial Reporting II (3) Topics involving consolidated financial statements, special purpose entities, derivative financial instruments, and use of the Financial Accounting Research System (FARS).
Effective: Summer 2012
Prerequisite:

ACCT 574 Accounting and Management Control Systems (3) Study of theories, practices and issues associated with accounting and management control as reflected in relevant literature.
Effective: Summer 2004
Prerequisite:

ACCT 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2009

ACCT 596 Individual Studies (1-9) Creative projects, including research and design, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2002

ACCT 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2002

Last Import from UCM: May 24, 2014 3:00 AM
Acoustics (ACS)

ACS 402 Introduction to Acoustics (3) Basic principles of acoustics and perception of sound; fundamentals of applications: electroacoustic transducers, noise measurement and control, architectural and building acoustics, underwater sound. Offered for science and engineering majors.
Effective: Fall 1983
Prerequisite:

ACS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

ACS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

ACS 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

ACS 501 Fundamentals of Acoustics I (2) Vibrational concepts of acoustics: natural frequency and modes, resonances of lumped parameter systems, strings, elastic rods, beams and membranes.
Effective: Spring 1991
Prerequisite:

ACS 502 Fundamentals of Acoustics II (2) Acoustical wave phenomena: propagation, transmission, reflection and energy; periodic and transient waves; plane, spherical, and standing waves.
Effective: Spring 1991
Prerequisite:

ACS 505 Experimental Techniques in Acoustics (2) Properties of acoustical and vibrational transducers, electronic and other instrumentation used in fundamental data measurement, acquisition and analysis.
Effective: Fall 1990
Prerequisite:

ACS 511 Underwater Sound Propagation (3) Theoretical and empirical treatment of sound propagation in the ocean, including effects of the environment, characteristics of targets, and transducers.
Effective: Winter 1978

Effective: Spring 1984

ACS 514 Electroacoustic Transducers (3) The theory, design, and calibration of passive, linear, reciprocal electroacoustic transducers for use in both air and water media.
Effective: Spring 2012
Prerequisite:

ACS 515 Acoustics in Fluid Media (3) Wave propagation in stationary and moving fluids; acoustic radiation and scattering; standing waves in ducts and cavities.
Effective: Spring 2012
Prerequisite:

ACS 516 Acoustical Data Measurement and Analysis (3) Presents the engineering applications of recent developments in correlation and spectral analysis to acoustical measurement problems.
Effective: Fall 1983

ACS 519 Sound-Structure Interaction (3) Acoustic radiation from and effects of fluid-loading on vibrating infinite and finite plates and shells. Acoustic transmission through and reflection from elastic plates and shells, acoustic excitation of elastic plates and coupling between panels and acoustic spaces.
Effective: Spring 2012
Prerequisite:

ACS 521 (E MCH 521) Stress Waves in Solids (3) Recent advances in Ultrasonic Nondestructive Evaluation: waves; reflection and refraction; horizontal shear; multi-layer structures; stress; viscoelastic media; testing principles.
Effective: Spring 1998
Prerequisite:

ACS 530 Flow-Induced Noise (3) Introduction to the basic and applied aspects of flow-induced noise created by subsonic flows of various complexities.
Effective: Summer 2004

The Pennsylvania State University
Prerequisite:
ACS 537 **Noise Control Engineering I** (3) As the first of three courses, this course provides an orientation to the program and covers fundamentals of noise control.
Effective: Spring 2003

Prerequisite:
ACS 573 (M E 573) **Designing Quiet Structures** (3) Course integrates structural dynamics, acoustics and optimization into unified method for designing quiet structures virtually for early product development.
Effective: Fall 2007

Prerequisite:
ACS 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

ACS 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2005

ACS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

ACS 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

ACS 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1996

ACS 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

ACS 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

ACS 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

ACS 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Adult Education (ADTED)

ADTED 456 Introduction to Family Literacy (3) Explores comprehensive family literacy models, focusing upon families, services, outcomes, and roles and responsibilities of individuals, organizations, and communities.
Effective: Spring 2008 Ending: Summer 2014
Prerequisite:

ADTED 456 Introduction to Family Literacy (3) Introduces family literacy concepts, models, and components supporting families; adult, child, and parent education, interactive literacy activities, and case management.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

ADTED 457 Adult Literacy (3) Introduces family literacy concepts, models, and components supporting families; adult, child, and parent education, interactive literacy activities, and case management.
Effective: Spring 2008 Ending: Summer 2014
Prerequisite:

ADTED 457 Adult Literacy (3) Surveys adult basic and literacy education research, theory, programming, and instruction; highlights learners' roles as parents, workers, and community members.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

ADTED 458 Early Literacy Development and Parental Involvement (3) Focuses on young children's language and literacy development, including parental and staff support, grounded in scientifically based reading research.
Effective: Spring 2008 Ending: Summer 2014
Prerequisite:

ADTED 458 Early Literacy Development (3) Focuses on young children's language and literacy development, including parental and staff support, grounded in scientifically based reading research.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

ADTED 459 Interactive Literacy: Parents and Children (3) Focuses on literacy and language interactions between parents and their young children (including English language learners), implementing intentional/planned learning.
Effective: Spring 2008 Ending: Summer 2014
Prerequisite:

ADTED 459 Interactive Literacy and Parental Involvement: Supporting Academic Success (3) Explores parental involvement in education and parent-child literacy activities that support children's language and literacy development, especially among diverse families.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

ADTED 460 Introduction to Adult Education (3) History, methods, agencies, program areas, and problems of adult education in the United States.
Effective: Fall 2001

ADTED 470 (CI ED 470) Introduction to Distance Education (3) An introduction to the history, philosophy, organizations, learning theories, and instructional procedures used in American and foreign distance education.
Effective: Summer 1996

ADTED 496 Independent Studies (1-18) Creative projects supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1996

ADTED 497 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1996

ADTED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

ADTED 501 Foundations of Medical Education (3) This course provides an overview of medical education, and considers how it operates as a specific form of adult education.
Effective: Summer 2010
Prerequisite:

ADTED 502 Program and Instructional Design in Medical Education (3) This course focuses on program planning and instructional design in a medical setting with an emphasis on teaching with simulation.
Effective: Spring 2011
Prerequisite:
ADTED 505 **The Teaching of Adults** (3) Examination of direct and indirect teaching; contracts, application of current technology, andragogy, motivation, evaluation; knowledge of research.
Effective: Summer 1996
Prerequisite:

ADTED 506 **Program Planning in Adult Education** (3) Intensive study of theoretical foundations, policies, evaluation models, methods, and materials in program planning in adult education.
Effective: Summer 1996
Prerequisite:

ADTED 507 **Research and Evaluation in Adult Education** (3) Guided discussion and reading in selected research and evaluation methods and trends as applied in adult education settings.
Effective: Summer 1996
Prerequisite:

ADTED 508 (CI ED 508) **Globalization and Lifelong Learning** (3) Examination of globalization discourses and their relationships, implications and impacts on lifelong learning processes and contexts.
Effective: Summer 2004

ADTED 509 (CI ED 509) **Language, Literacy, Identity, and Culture in a Global Context** (3) Examines the relationship between issues of language, identity and culture for adult learners in an increasingly global context.
Effective: Spring 2004
Prerequisite:

ADTED 510 **Historical and Social Issues in Adult Education** (3) Social and historical foundations of adult education in the United States and selected nations.
Effective: Summer 1996
Prerequisite:

ADTED 531 **Course Design and Development in Distance Education** (3) In depth study of the practices of designing courses taught by print, broadcast, and telecommunications media to adult distance learners.
Effective: Summer 1996
Prerequisite:

ADTED 532 **Research and Evaluation in Distance Education** (3) Study of previous, current, and needed research strategies, and issues concerning evaluation in distance education.
Effective: Fall 2001

ADTED 541 (WMNST 541) **Women and Minorities in Adult Education** (3) Seminar on women and minority adults as learners and leaders in the various contexts of adult education.
Effective: Spring 1998
Prerequisite:

ADTED 542 **Perspectives on Adult Learning Theory** (3) Introduction to adult education learning theory, principles, and models of adult learning by adults alone, in groups, and in communities.
Effective: Fall 1997

ADTED 549 (HI ED 549) **Community Junior College and the Technical Institute** (2-3) Distinctive contributions to meeting the need for postsecondary education; development, functions, curriculum and instruction, government, administration, and finance.
Effective: Summer 1996

ADTED 550 **Qualitative Research in Adult Education** (3) Introduction to the theory, principles, and practice of qualitative research.
Effective: Fall 1997

ADTED 551 **Qualitative Data Analysis** (3) Students learn to analyze data qualitatively by engaging in, and continuously reflecting on the process.
Effective: Summer 2004
Prerequisite:

ADTED 552 **Participatory Action Research** (3) Examines origins, historical development, main characteristics, methodological assumptions and models, practice of participatory action research adult education and community development.
Effective: Summer 2004

ADTED 560 **Teaching Reading to College Students and Adults** (3) Reading literacy for adults, including college reading, Adult Basic Education (ABE), and General Educational Development (GED) programs.
Effective: Spring 2014
Prerequisite:

ADTED 561 **Family Literacy** (3) Examines the research related to the four components of family literacy, program effectiveness, and theoretical underpinnings.
Effective: Summer 2004

The Pennsylvania State University
ADTED 562 Politics, Language and Pedagogy: Applying Paulo Freire today (3) Examines the work of Paulo Freire as it applies to community action projects. Effective: Fall 2011 Ending: Summer 2014

ADTED 562 (CI ED 562) Politics, Language and Pedagogy: Applying Paulo Freire today (3) Examines the work of Paulo Freire as it applies to community action projects. Effective: Fall 2014 Future: Fall 2014

ADTED 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 1997

ADTED 595 Internship in Adult Education (3-9) Supervised student internship in adult education agency. Effective: Summer 1996 Prerequisite: ADTED 596 Individual Studies (1-9) Creative projects including non-thesis research, supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1996

ADTED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Summer 1996

ADTED 597A (CI ED 597A) Cross-Cultural (Comparative) Research Methods in Education (3) This course will explore concept maps as analytical tools for research in cross-cultural and comparative education. Effective: Summer 2014 Ending: Summer 2014

ADTED 597A Doctoral Pro-Seminar in Adult Education (3) This course provides both an orientation to the field of adult education as an area of study and an initial seminar for doctoral students to understand the process of graduate study in this program. It is intended for both practitioners who have experience in working with adult learners and people with little or no experience who have an interest in learning about the field. We will take a broad view of adult education and will accommodate the interest of persons concerned with non-formal education, informal learning, and formal learning in diverse settings. The principal aim is to develop a basic understanding of adult education in a global context as well as to begin preparing students for candidacy. The focus of the course will be on the socio-historical context of its methods, agencies, programs and issues. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
ADTED 597B (COMM 597A) The Public Pedagogy of Consumerism, US Media, and Popular Culture (3) This discussion-based course will focus on the connections among media, popular culture, informal education, and consumer society, with particular attention to global and international implications.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

ADTED 597C Global Online and Distance Education (3) In this course we will explore the development of open and distance education throughout the world, and discuss key issues such as: how much the global and local matter in online and distance education (DE); how information and communication technologies are changing DE in various countries; the growth of the open learning movement; technology access, educational access, e-readiness and the growth of online education; the role of open educational resources; educational and cultural issues with MOOCs and mLearning; policymaking in online DE institutions; issues of quality assurance in DE.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ADTED 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1996

ADTED 600 Thesis Research (1-15) No description.
Effective: Summer 1996

Effective: Spring 2014
Prerequisite:

ADTED 602 College Teaching (1-3) Experience in teaching in the Adult Education Program.
Effective: Fall 2006
Prerequisite:

Effective: Summer 1996

ADTED 611 Ph.D. Dissertation Part-Time Ph.D. dissertation research
Effective: Spring 2014
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Aerospace Engineering (AERSP)

AERSP 401A Spacecraft Design--Preliminary (3) Conceptual and preliminary design of a spacecraft, its constituent subsystems, and related systems, to satisfy a given set of specifications.
Effect: Spring 2007
Prerequisite:

AERSP 401B Spacecraft Design--Detailed (2) Detailed design of the constituent subsystems and related support systems for a spacecraft.
Effect: Spring 2007
Prerequisite:

AERSP 402A Aircraft Design--Preliminary (3) Conceptual and preliminary design of an aircraft, its constituent subsystems, and related systems, to satisfy a given set of specifications.
Effect: Spring 2007
Prerequisite:

AERSP 402B Aircraft Design--Detailed (2) Detailed design of the constituent subsystems and related support systems for an aircraft.
Effect: Spring 2007
Prerequisite:

AERSP 404H Flight Vehicle Design and Fabrication II (3 per semester/maximum of 12) Project management, design, fabrication, aerodynamic and structural testing, and flight evaluation of an advanced composite flight vehicle.
Effect: Spring 2000
Prerequisite:

AERSP 405 Experimental Methods and Projects (3) Experimental methods involving a variety of aerospace engineering topics; teams of students focus on advanced measurement techniques and project engineering.
Effect: Summer 2012
Prerequisite:

AERSP 407 Aerodynamics of V/STOL Aircraft (3) Rotary wing aircraft; VTOL and STOL performance; propeller-wing combinations; jet flap; high lift devices.
Effect: Fall 1984
Prerequisite:

Effect: Fall 1983
Prerequisite:

AERSP 412 Turbulent Flow (3) Homogeneous turbulence; spectral transfer of energy, viscous dissipation; turbulent shear flow: mixing-length theory, eddy viscosity, scaling laws, energy budget.
Effect: Winter 1978
Prerequisite:

AERSP 413 Stability and Control of Aircraft (3) Static and dynamic stability and control of aircraft; open and closed loop systems.
Effect: Fall 1989
Prerequisite:

AERSP 420 Principles of Flight Testing (3) In-flight and analytical studies of airplane performance, stability, and control; reduction of data; instrumentation; flight test techniques.
Effect: Fall 1983
Prerequisite:

AERSP 423 Introduction to Numerical Methods in Fluid Dynamics (3) Finite difference methods applied to solving viscous/inviscid fluid dynamics problems, error control, numerical stability.
Effect: Spring 2008
Prerequisite:

AERSP 424 Advanced Computer Programming (3) Engineering and scientific programming topics: object oriented programming, parallel programming, and various modern languages (e.g. C++, Java, and Ada).
Effect: Spring 2008
Prerequisite:

AERSP 425 Theory of Flight (3) Advanced wing and airfoil theory, conformal mapping, slender body theory.
Effect: Spring 2001
Prerequisite:

AERSP 430 Space Propulsion and Power Systems (3) Analysis and performance of chemical and nuclear rockets, electric propulsion systems. Introduction to solar, chemical, thermoelectric, and nuclear power sources.
Effect: Fall 2007
Prerequisite:

AERSP 440 Introduction to Software Engineering for Aerospace Engineers (3) Software engineering for safety- and mission-critical systems, including requirements, management, processes, designs, programming, validation/ verification,
AERSP 450 Orbit and Attitude Control of Spacecraft (3) Principles of mechanics and vector analysis applied to basic concepts of satellite motion and control, rocket ballistics, and gyroscopic instruments.
Effective: Fall 1987
Prerequisite:

AERSP 460 Aerospace Control Systems (3) Design and analysis of feedback control systems for aerospace applications; stability, root locus, time- and frequency-domain, state-space methods.
Effective: Summer 2006
Prerequisite:

AERSP 470 Advanced Aerospace Structures (3) Design and analysis of aerospace structures. Plates and sandwich panels; composite materials; structural dynamics; aeroelasticity; damage tolerance.
Effective: Spring 2008
Prerequisite:

AERSP 473 (E MCH 473) Composites Processing (3) An introduction to the principles of mechanics governing manufacturing, computer-aided design, and testing of composite materials and structures.
Effective: Summer 1988
Prerequisite:

AERSP 490 (E E 471, NUC E 490) Introduction to Plasmas (3) Plasma oscillations; collisional phenomena; transport properties; orbit theory; typical electric discharge phenomena.
Effective: Spring 2008
Prerequisite:

AERSP 492 (E E 472) Space Astronomy and Introduction to Space Science (3) The physical nature of the objects in the solar system; the earth’s atmosphere, ionosphere, radiation belts, magnetosphere, and orbital mechanics.
Effective: Spring 2008
Prerequisite:

AERSP 494 Aerospace Undergraduate Thesis (1-3 per semester/maximum of 6) Individual problem investigations reported in written thesis and seminar lectures. Cooperative research with faculty guidance on topics of current interest.
Effective: Fall 1992
Prerequisite:

AERSP 494H Aerospace Undergraduate Thesis (1-3 per semester/maximum of 6) Individual problem investigations reported in written thesis and seminar lectures. Cooperative research with faculty guidance on topics of current interest.
Effective: Fall 2007
Prerequisite:

AERSP 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

AERSP 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1983

AERSP 497D Autonomous Underwater Vehicle (AUV) Design (1.5) Students taking this course will design and build an autonomous underwater vehicle (AUV) capable of carrying out simple tasks (e.g. find and mark or retrieve small objects) in water depths less than 30’. Component technologies include underwater proposers, vehicle attitude control, acoustic and optical sensing, ballast control for vehicle stability, beacon-based position estimation, simple manipulators, power system design and control.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

AERSP 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2006

AERSP 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2008

AERSP 504 Aerodynamics of V/STOL Aircraft (3) Jet wings, high lift devices, propellers and ducted propellers, circulation and boundary layer control, unsteady airfoil theory.
Effective: Fall 1983
Prerequisite:

AERSP 505 Aero- and Hydroelasticity (3) Interaction of elastic systems having several degrees of freedom with fluid flows in various configurations.
Effective: Winter 1978
Effective: Fall 2007
Prerequisite:

AERSP 507 Theory and Design of Turbomachinery (3) Theory and principles of machinery design: compressors, turbines, pumps, and rotating propulsors; opportunity to work out design examples.
Effective: Winter 1978

AERSP 508 Foundations of Fluid Mechanics (3) Mathematical review, fluid properties, kinematics, conservation laws, constitutive relations, similarity principles, the boundary layer, inviscid flow, vorticity dynamics, wave motion.
Effective: Spring 1972

AERSP 509 Dynamics of Ideal Fluids (3) Irrotational flow theory, two-dimensional and axisymmetric flows, airfoil theory, complex variables, unsteady phenomena; flow with vorticity, finite wing theory.
Prerequisite:

AERSP 510 Compressible Flow (3) Classification and solution of compressible flow problems, high-speed gasdynamics, unsteady motion, transonic and hypersonic flows, atmospheric reentry.
Effective: Fall 1983

Effective: Winter 1978

AERSP 514 Stability of Laminar Flows (3) The stability of laminar motions in various geometries as influenced by boundary conditions and body forces of various kinds.
Effective: Winter 1978

AERSP 518 Dynamics and Control of Aerospace Vehicles (3) Dynamical problems of aircraft and missiles, including launch, trajectory, optimization, orbiting, reentry, stability and control, and automatic control.
Effective: Fall 1987
Prerequisite:

AERSP 524 (M E 524) Turbulence and Applications to CFD: DNS and LES (3) First of two courses: Scalings, decompositions, turbulence equations; scale representations, Direct and Large-Eddy Simulation modeling; pseudo-spectral methods; 3 computer projects.
Effective: Spring 2011
Prerequisite:

AERSP 525 (M E 525) Turbulence and Applications to CFD: RANS (3) Second in two courses: Scalings, decomposition, turbulence equations; Reynolds Averaged Navier Stokes (RANS) modeling; phenomenological models; 3 computer projects.
Effective: Spring 2011
Prerequisite:

AERSP 526 (M E 526) Computational Methods for Shear Layers (3) Study of numerical solution methods for steady and unsteady laminar or turbulent boundary-layer equations in two and three dimensions.
Effective: Fall 2007
Prerequisite:

AERSP 527 (M E 527) Computational Methods in Transonic Flow (3) Numerical solution of partial differential equations of mixed type, with emphasis on transonic flows and separating boundary layers.
Effective: Fall 2007
Prerequisite:

AERSP 530 Aerothermochemistry of Advanced Propulsion Systems (3) Physics and chemistry needed to analyze high performance rocket propulsion systems including reacting high temperature radiating gas and plasma flows.
Effective: Fall 2007
Prerequisite:

AERSP 535 (M E 535) Physics of Gases (3) An introduction to kinetic theory, statistical mechanics, quantum mechanics, atomic and molecular structure, chemical thermodynamics, and chemical kinetics of gases.
Effective: Spring 2010

AERSP 540 (NUC E 540) Theory of Plasma Waves (3) Solutions of the Boltzmann equation; waves in bounded and unbounded plasmas; radiation and scattering from plasmas.
Effective: Spring 2012
Prerequisite:

AERSP 550 Astrodynamics (3) Applications of classical celestial mechanics to space flight planning. Determination and construction of orbital parameters by approximation methods, Perturbation techniques.
Effective: Fall 1987 Ending: Summer 2014
Prerequisite:
Prerequisite:

Prerequisite:

AERSP 571 (E MCH 571, M E 571) Foundations of Structural Dynamics and Vibration (3) Modeling approaches and analysis methods of structural dynamics and vibration. Effective: Fall 2007
Prerequisite:

AERSP 583 Wind Turbine Aerodynamics (3) Analysis of wind turbine performance, aeroacoustics, and loads; turbine selection for site-specific application. Effective: Summer 2013

AERSP 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

AERSP 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

AERSP 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Fall 1983

AERSP 597A Experimental Methods and Projects (3) Experimental methods used in a variety of research areas in Aerospace Engineering. Team projects will be chosen to design experiments and fabricate modifications to existing apparatus, conduct the experiments, process and interpret the data, and assemble progress reports and a final report. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

AERSP 597D Autonomous Underwater Vehicle (AUV) Design (1.5) Design and construction of an autonomous underwater vehicle (AUV). Component technologies include underwater proposers, vehicle attitude control, acoustic and optical sensing, ballast control for vehicle stability, beacon-based position estimation, simple manipulators, power system design and control. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

AERSP 597F Multifunctional Materials and Structures (3) "Smart Materials" for adaptive configurations related to multifunctional structures with actuation and sensing capabilities; piezoelectric materials, shape-memory alloys (SMA), and electro- and magneto-theological (ER, MR) fluids; concepts of continuum mechanics, micro-mechanics, and thermodynamics to develop constitutive relationships to model mentioned structures; active systems for different regimes, and explores basic design features, fabrication and testing techniques of representative smart material configurations. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

AERSP 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction. Effective: Fall 2008

AERSP 600 Thesis Research (1-15) No description. Effective: Fall 1983

AERSP 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 1983

AERSP 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Provides an opportunity for supervised and graded teaching experience in aerospace engineering courses. Effective: Fall 1983

AERSP 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. Effective: Fall 2006
AERSP 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

AERSP 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

AERSP 880 Wind Turbine Systems (3) Wind turbine technology and the critical elements of turbine systems design.
Effective: Summer 2013

AERSP 886 Engineering of Wind Project Development (3) An overview of the wind project development process and technical considerations for onshore and offshore applications.
Effective: Summer 2013

AERSP 897 Special Topics (1-9 per semester/maximum of 9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2012

Last Import from UCM: May 24, 2014 3:00 AM
Afr Amer Studies (AF AM)

AF AM 401 Afro-American Studies Seminar (3) A seminar examining theoretical and methodological issues in Afro-American Studies.
Effective: Spring 2013
Prerequisite:

AF AM 409 (US) (SOC 409) Racial and Ethnic Inequality in America (3) The impact of inequality and discrimination on individual and group identity among various racial and ethnic groups.
Effective: Spring 2013
Prerequisite:

AF AM 409U (US) Racial and Ethnic Inequality in America (3) The impact of inequality and discrimination on individual and group identity among various racial and ethnic groups.
Prerequisite:

AF AM 410 Spirit, Space, Survival: Contemporary Black Women (3) How recent Black women have used spirit and space to survive.
Effective: Fall 2012
Prerequisite:

AF AM 412 (US;IL) (THEA 412) African American Theatre (3) Exploration of the development of African American theatre from its roots in Africa through the Diaspora to the present time.
Effective: Spring 2013
Prerequisite:

AF AM 416 (US;IL) (S T S 416, WMNST 416) Race, Gender and Science (3) The class will focus on race and gender as products of science, and how societal values shape scientific activity.
Effective: Spring 2013
Prerequisite:

AF AM 422 (US) (CAS 422) Contemporary African American Communication (3) A focused study on the continuities between African and African American culture and communication.
Effective: Spring 2013
Prerequisite:

AF AM 431 (US;IL) (HIST 431) Black Liberation and American Foreign Policy (3) This course deals with American foreign policy and Black liberation in Africa since 1945.
Effective: Spring 2013
Prerequisite:

AF AM 432 (IL) (HIST 432) Between Nation and Empire: The Caribbean in the 20th Century (3) An exploration of the political evolution of the Caribbean Region over the course of the 20th Century.
Effective: Fall 2012
Prerequisite:

AF AM 445Y (US) (LER 445Y, PL SC 445Y) Politics of Affirmative Action (3) Examines history, politics, and economics of the use of special programs to advance racial interests in the U.S.
Effective: Fall 2012
Prerequisite:

AF AM 460 (US;IL) (PHIL 460) African American Philosophy (3) Major works by African American Philosophers, on topics of race, freedom, citizenship, nationhood, law and society.
Effective: Spring 2013
Prerequisite:

Effective: Spring 2013 Ending: Fall 2014
Prerequisite:

Effective: Spring 2015 Future: Spring 2015
Prerequisite:

AF AM 469 (US) (ENGL 469) Slavery and the Literary Imagination (3) The impact of slavery on the petitions, poetry, slave narratives, autobiographies, and novels of African Americans.
Effective: Fall 2012
Prerequisite:

AF AM 494 Research Project (1-12 per semester/maximum of 12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2012

AF AM 494H Research Project (1-12 per semester/maximum of 12) Supervised student activities on research projects
identified on an individual or small-group basis.
Effective: Summer 2012

AF AM 495 Internship (1-18 per semester/maximum of 18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships.
Effective: Summer 2012

AF AM 496 Independent Studies (1-18 per semester/maximum of 18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2012

AF AM 497 Special Topics (1-9 per semester/maximum of 9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2012

AF AM 497A Hurricane Katrina: Lessons & Legacy (3) This course covers the influence of Hurricane Katrina disaster and New Orleans to US culture, public life, race relations, and history.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

AF AM 499 Foreign Studies (1-12 per semester/maximum of 12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2012

AF AM 501 Seminar in African American Studies (3) A survey of the academic field of African American Studies.
Effective: Summer 2013

AF AM 502 Blacks and African Diaspora (3) Seminar in the theory and history of Blacks in the African Diaspora.
Effective: Summer 2013

AF AM 503 Sexual and Gender Politics in the African Diaspora (3) A seminar in the theory and history of sexual and gender politics in the Black Diaspora from the Colonial Era forward.
Effective: Summer 2013

Prerequisite:
AF AM 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2013

AF AM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 2013

Last Import from UCM: May 24, 2014 3:00 AM
African Studies (AFR)

AFR 403 South Africa Today (3) A course examining the South African government’s policy of apartheid: its history, why it exists, how it works, and the prospects for change. 
Effective: Spring 2014
Prerequisite:

AFR 405 African Studies Methodologies (3) Multidisciplinary research techniques for studying in and about Africa. 
Effective: Fall 2012

AFR 434 (IL) (PL SC 434) War and Development in Africa (3) This course will examine the relationship between war and development in sub-Saharan Africa in the post colonial era. 
Effective: Fall 2012
Prerequisite:

AFR 440 (US:IL) (I B 440, PL SC 440) Globalization and Its Implications (3) This course explores the socioeconomic implications of globalization. 
Effective: Spring 2013
Prerequisite:

AFR 443 (IL) (PL SC 443) Ethnic Conflict in Africa (3) This course explores the various causes and impacts of ethnic conflicts in the African context. 
Effective: Spring 2013
Prerequisite:

AFR 446 (IL) (ART H 446) Topics in African Art (3 per semester/maximum of 9) Topics vary from "Arts of Eastern and Southern Africa" to "Art of West Africa." 
Effective: Spring 2014
Prerequisite:

AFR 447 (IL) (ART H 447) Topics in the Art of the African Diaspora (3 per semester/maximum of 6) Selected topics in arts of the African Diaspora (South America, Caribbean, USA) including masquerades, textiles, architecture and other art forms. 
Effective: Spring 2014
Prerequisite:

Effective: Fall 2012
Prerequisite:

AFR 459 (IL) (PL SC 459) Culture and World Politics (3) Role of culture in world politics. 
Effective: Spring 2013
Prerequisite:

Effective: Fall 2012
Prerequisite:

AFR 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. 
Effective: Fall 2012

AFR 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. 
Effective: Fall 2012
Prerequisite:

AFR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Fall 2012

AFR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. 
Effective: Fall 2012

AFR 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. 
Effective: Fall 2012

Effective: Summer 2012
AFR 527 (SOC 527) Migration, Urbanization, and Policy in the Developing World (3) This course examines the dynamics of migration and urbanization processes, as well as their policy implications, in non-industrialized regions of the world. Effective: Summer 2012

AFR 530 Globalization in Africa (3) Students will examine globalization and its socioeconomic implications in Africa. Effective: Fall 2014 Future: Fall 2014

AFR 532 Environment and Livelihoods in Africa (3) An enquiry into the relationships between the environment, resource control, resource conservation, rural livelihood systems and poverty in Africa. Effective: Summer 2013

AFR 534 (PL SC 534) Political Economy of Energy and Extractive Industries in Africa (Oil and Mining) (3) Students will examine how the expansion of petroleum and mining industries has impacted Africa's political economies and external relations. Effective: Spring 2013

AFR 537 (WMNST 537) Gender, Sexuality and Islam in Africa: Exploring Contemporary Feminist Scholarship (3) A course about discourses of sexuality and gender in studies of Islam in Africa, with South Africa as a case study. Effective: Spring 2013

AFR 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 2013

AFR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Fall 2013

Last Import from UCM: May 24, 2014 3:00 AM
African and African American Studies (AAA S)

AAA S 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

AAA S 530 Globalization in Africa (3) Students will examine globalization and its socioeconomic implications in Africa.
Effective: Fall 2008 Ending: Summer 2014

Last Import from UCM: May 24, 2014 3:00 AM
Agricult Biosecurity (AGBIO)

AGBIO 520 **Agricultural Biosecurity: Protecting a Key Infrastructure** (3) Course will explore intentional and unintentional threats to the agriculture-food system, history and current approaches for safeguarding this key infrastructure.
Effective: Spring 2012
Prerequisite:

AGBIO 521 (FD SC 521) **Food Defense: Prevention Planning for Food Processors** (3) Course prepares current and aspiring professionals to learn, recognize and apply measures to prevent intentional contamination of the food supply.
Effective: Summer 2013
Prerequisite:

AGBIO 594 **Agricultural Biosecurity and Food Defense Capstone Experience** (3) Culminating experience in the iMPS-HLS for the online Agricultural Biosecurity and Food Defense option.
Effective: Summer 2013
Prerequisite:

AGBIO 801 (PATH 801) **Veterinary Infectious Disease Diagnostic and Surveillance Systems** (3) This course provides knowledge of diagnostic and surveillance systems used to detect infectious diseases and protect against animal agricultural biological attack.
Effective: Summer 2013
Prerequisite:

AGBIO 802 (PPATH 802) **Plant Protection: Responding to Introductions of Threatening Pests and Pathogens** (3) This course provides knowledge of plant biosecurity, plant disease, regulations, and technologies using case study examples.
Effective: Summer 2013
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Agricultural Economics & Rural Sociology (AEREC)

AEREC 502 Economics of Natural Resources and Rural Development (3) Emphasis will be placed on the application of economic concepts to problems and policies in rural areas.
Effective: Spring 2011
Prerequisite:

AEREC 503 Agricultural Marketing (3) Economic analysis of food marketing firms and institutions; identification and measurement of dimensions of market performance; public policy.
Effective: Spring 2011
Prerequisite:

AEREC 510 Econometrics I (3) General linear model, multicolinearity, specification error, autocorrelation, heteroskedasticity, restricted least squares, functional form, dummy variables, limited dependent variables.
Effective: Spring 2011
Prerequisite:

AEREC 511 Econometrics II (3) Stochastic regressors, distributed lag models, pooling cross-section and time-series data, simultaneous equation models.
Effective: Summer 2013

AEREC 519 Resource and Environmental Economics I (3) Theories and methods for economic analysis of natural resource and environmental policies with applications to current issues.
Effective: Spring 2011
Prerequisite:

AEREC 527 Quantitative Methods I (3) Quantitative techniques applied to agricultural economic issues.
Effective: Spring 2011
Prerequisite:

AEREC 533 (CEDEV 533) Rural Development Research Methods and Topics (3) Advanced theories and methods for rural economic development research.
Effective: Spring 2011
Prerequisite:

AEREC 534 Agricultural Production Economics II (3) Current problems and methods of analysis in production economics research.
Effective: Spring 2011
Prerequisite:

AEREC 536 Agricultural Commodity Markets (3) Specification, identification, and estimation of models for use in the evaluation and control of agricultural market behavior.
Effective: Spring 2011
Prerequisite:

AEREC 541 Resource and Environmental Economics II (3) Key theories and analytical methods of resource and environmental economics.
Effective: Spring 2011
Prerequisite:

Effective: Spring 2011
Prerequisite:

AEREC 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2011

AEREC 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2011

AEREC 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2013

AEREC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and fall outside the scope of formal courses.
Effective: Summer 2013

AEREC 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of specific interest.
Effective: Spring 2011

AEREC 597A **Applied Microeconometrics** (3) This course builds on first-year econometrics and theory courses to develop methods for analysis of micro-level economic data.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:
AEREC 597E **Applied Microeconomic Theory** (3) Microeconomic theory and concepts that provide a foundation for applied research and analysis.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

AEREC 598 **Special Topics** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2011

AEREC 599 (IL) **Foreign Studies** (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2011

Effective: Summer 2013

AEREC 601 **Thesis Preparation** No description.
Effective: Summer 2013

AERC 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description.
Effective: Summer 2013

AERC 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Spring 2011

AERC 611 **Ph.D. Dissertation Part-Time** No description.
Effective: Spring 2011

Last Import from UCM: May 24, 2014 3:00 AM
Agricultural and Biological Engineering (A B E)

A B E 500 (B RS 500) Research Methods (3) Foundation in research philosophies, methodologies, issues and policies; measures of research quality; critical thinking and discourse; research report writing; professional development; research ethics. Effective: Spring 2014

A B E 513 Applied Finite Element, Finite Difference, and Boundary Element Methods (3) Applications of numerical methods in the areas of structures, fluid dynamics, heat and mass transfer, and machine design. Effective: Fall 1996

A B E 517 Surface Transport of Agricultural Pollutants (3) Understanding and modeling the surface transport processes of agricultural pollutants; particularly erosion, sediment transport, and movement of sediment-attached constituents. Effective: Spring 1996

A B E 559 Biological and Agricultural Systems Simulation (3) Continuous simulation modeling of biological and physical systems, numerical simulation techniques, validation and verification, difference measures, sensitivity analysis. Effective: Spring 2006
Prerequisite:
Prerequisite:
A B E 568 Food Safety Engineering (3) Predictive microbiology and modeling, conventional and novel detection and enumeration methods, conventional and novel processing methods, applied to plant layout, construction materials, and equipment design for microbial food safety. Effective: Spring 2008
Prerequisite:
Prerequisite:
A B E 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1996

A B E 596 Individual Studies (1-9) Creative projects, including nontesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1996

A B E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 1996

A B E 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in development of instructional materials, organizing and conducting lectures, laboratories, and evaluating students in undergraduate Agricultural Engineering courses (1-499). Effective: Spring 1996

A B E 611 Ph.D. Dissertation Part-Time (0) No description.

The Pennsylvania State University
A B E 884 Biomass Energy Systems (3) Theories and applied technologies for production and conversion of biomass into energy and co-products.
Effective: Summer 2013

A B E 885 Biomass Harvesting and Logistics (3) Biomass harvesting and handling scenarios and relevant cost analysis and systematic considerations.
Effective: Summer 2013
Prerequisite:

A B E 888 Conversion Technologies for Bioenergy Production (3) Applications of chemical, biochemical, thermochemical, and bioseparation technologies for the production of bioenergy.
Effective: Summer 2013
Prerequisite:

A B E 897 Special Topics (1-9 per semester/maximum of 15) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2013

Last Import from UCM: May 24, 2014 3:00 AM
Agricultural and Extension Education (AEE)

AEE 400 Educational Programs in Agriculture for Developing Countries (3) Development and implementation of educational programs in agriculture in developing countries. Effective: Summer 2013
Prerequisite:

AEE 412 Methods of Teaching Agriculture and Environmental Science (4) Instructional strategies and media; directing individual and group learning activities; assessing student performance and quality of instruction in vocational agriculture. Effective: Summer 2013

AEE 413 Program Planning and Instructional Development (3-4) A course in planning, developing, and organizing school-based curriculum, summer programs, advisory councils, and facilities for environmental/agricultural education. Effective: Summer 2013

AEE 413 Agricultural and Environmental Development (1-6) Intensive professional and technical treatment of various subject-matter fields to aid teachers in maintaining competence. Effective: Summer 2013
Prerequisite:

AEE 437 (AN SC 437) Equine Facilitated Therapy (3) Equine Facilitated Therapy uses equine-related activities to contribute positively to the wellbeing of people with disabilities. Effective: Fall 2013
Prerequisite:

AEE 440 Communication Methods and Media (3) Mass media techniques for reporting and promoting extension and related programs, including message preparation, presentation, and strategy development. Effective: Summer 2013
Prerequisite:

AEE 450 Program Design and Delivery (3) Principles, methods, and practices of extension education in agriculture, community resource development, family living, environmental affairs, 4-H, and youth programs. Effective: Summer 2013
Prerequisite:

AEE 460 Foundations in Leadership Development (3) This course explores historical and contemporary leadership theories, models and perspectives within social, cross-cultural, and political contexts. Effective: Summer 2013
Prerequisite:

AEE 465 Leadership Practices: Power, Influences, and Impact (3) Explores the leader role as it relates to issues of purpose, social responsibility, political influences, and legal constraints. Effective: Summer 2013

AEE 490 Colloquium (1-3) Seminars consisting of a series of individual lectures by faculty, students, or outside speakers. Effective: Summer 2013

AEE 494 Undergraduate Research (1-12) Supervised student activities on research projects identified on an individual or small group basis. Effective: Summer 2013

AEE 495 Internship in Agricultural and Extension Education (1-15) Participation in the total program of instruction in agriculture in a selected high school. Effective: Summer 2013
Prerequisite:

AEE 495D Leadership Development Minor Internship (3) Participation in the total program of instruction in agriculture in a selected high school. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

AEE 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2013

AEE 497 Special Topics (1-9) Formal courses given on topical or special interest subjects which may be offered infrequently. Effective: Summer 2013

AEE 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
AEE 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. 
Effective: Summer 2013

AEE 499B (IL) School-Based Agricultural Education in South Korea (0.5) Travel component of AEE 499A. 
Effective: Summer 2014 Ending: Summer 2014

AEE 501 Foundations of Agricultural and Extension Education (3) Historical development, social and philosophical foundations, and current status in relation to the total vocational-technical education program. 
Effective: Summer 2013

AEE 505 (CEDEV 505) Leadership Development (3) Exploration, understanding, and application of leadership roles, strategies, and principles in group and community settings. 
Effective: Summer 2013

AEE 508 Administration and Supervision of Agricultural and Extension Education (3) Basics of vocational funding, supervision, leadership, and management for agricultural education. 
Effective: Summer 2013

AEE 509 Contemporary Research in Agricultural and Extension Education (1-6) Analysis of contemporary research issues in agricultural education and extension education through lecture, review of literature, discussion, speakers, and active participation. 
Effective: Summer 2013

AEE 511 Youth Leadership Development in the Agricultural and Life Sciences (3) This course will address youth leadership development theories and emphasize formal and nonformal youth programs in agricultural and life sciences. 
Effective: Summer 2013

AEE 515 Engagement Through Outreach Scholarship in Higher Education (3) To develop an understanding of outreach scholarship as a nonformal educational system and its relationship to relevant social systems. 
Effective: Summer 2013
Prerequisite: 

AEE 520 Scientific Method in the Study of Agricultural and Extension Education (1-4) Methods of procedure in investigation and experimentation in education, accompanied by a critical examination of studies made in agricultural education. 
Effective: Summer 2013

AEE 521 Basic Applied Data Analysis in Agricultural and Extension Education (1-4) Continuation of AEE 520; emphasis upon statistical techniques for students' individual problems. 
Effective: Summer 2013

AEE 524 Change in Education (1-3) Analysis of occupational needs of students and employment prospects; organization of courses of study and other activities of teachers. 
Effective: Summer 2013

AEE 530 Teaching and Learning in Agricultural Science (3-4) Organization, planning and delivery of effective college teaching methods, matching/learning styles, evaluation of instruction and learning. 
Effective: Summer 2013

AEE 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. 
Effective: Summer 2013

AEE 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. 
Effective: Summer 2013
Prerequisite: 

AEE 596 Individual Studies (1-9) Creative projects including non-thesis research, supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Summer 2013

AEE 596A Agriculture in the Classroom (1-3) Development of curriculum materials designed to integrate agricultural science concepts and principles into elementary and middle school curricula. 
Effective: Summer 2014 Ending: Summer 2014
Prerequisite:

AEE 596C Basics of Qualitative Methods (3) Designing qualitative research studies including strategies for implementing such designs and collecting qualitative data.
Effective: Summer 2014 Ending: Summer 2014

AEE 596D Basic Data Analysis Applications (3) Using basic descriptive statistics, correlations, and inferential statistics such as analysis of variance and regression to analyze data.
Effective: Summer 2014 Ending: Summer 2014

AEE 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2013

AEE 600 Thesis Research (1-15) No description.
Effective: Summer 2013

AEE 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 2013

AEE 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Involves experience in teaching undergraduate agricultural education courses under the supervision of the faculty.
Effective: Summer 2013

Effective: Summer 2013

AEE 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 2013

Last Import from UCM: May 24, 2014 3:00 AM
Agronomy (AGRO)

AGRO 410W Physiology of Agricultural Crops (4) Study of the relation of plants to their environment and the physiology of crop plant growth.
Effective: Summer 2013
Prerequisite:

AGRO 423 Forage Crop Management (3) Application of agronomic, ecological, and physiological principles to the production and management of pasture and forage crops.
Effective: Summer 2013
Prerequisite:

AGRO 425 Field Crop Management (3) Application of agronomic, ecological, and physiological principles to management systems for the efficient production of the major field crops.
Effective: Summer 2013
Prerequisite:

AGRO 438 (AGECO 438) Principles of Weed Management (4) Weedy plant taxonomy, biology and ecology of weedy plant populations, and integration of biological, chemical, cultural and biological controls.
Effective: Summer 2013
Prerequisite:

AGRO 460 (BIOTC 460) Advances and Applications of Plant Biotechnology (3) This course provides a comprehensive overview and current status of plant biotech research. The course provides knowledge of plant systems that fall in the category of GMOs.
Effective: Summer 2013
Prerequisite:

AGRO 489 Supervised Experience in College Teaching (1-3) Participate with instructors in teaching an undergraduate agronomy course; assist with teaching, evaluation, and development of instructional materials.
Effective: Summer 2013
Prerequisite:

AGRO 490 (SOILS 490) Colloquium (1) Continuing written and oral presentations developed by students in consultation with the course instructor.
Effective: Summer 2013
Prerequisite:

AGRO 495 Internship (1-5) Supervised field experience related to the student's major.
Effective: Summer 2013
Prerequisite:

AGRO 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2013

AGRO 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2013

AGRO 501 Graduate Student Dialogue (1) Orientation discussion group for incoming graduate students. Review departmental policies and learn about the diverse faculty programs in the department.
Effective: Summer 2013

AGRO 510 Ecology of Agricultural Systems (3) Examination of ecological concepts and research on agroecosystem processes and dynamics via discussion and analysis of review and research papers.
Effective: Summer 2013
Prerequisite:

AGRO 518 Responses of Crop Plants to Environmental Stress (3) Physiological and ecological aspects of the response of crop plants to environmental stresses in establishment, persistence, and reproduction.
Effective: Summer 2013
Prerequisite:

AGRO 555 Effective Scientific Communications (2) Instruction and practice in verbal communication of scientific information to technical and non-technical audiences through realistic exercises with invited audiences.
Effective: Summer 2013

AGRO 590 Colloquium (1-3 per semester/maximum of 3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2014

AGRO 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis.
basis and which fall outside the scope of formal courses.
Effective: Summer 2013

AGRO 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2013

AGRO 597A Applied Computational Analysis (3) A 3-credit course that appraises experimental designs for the agricultural and environmental field research, outlines methods of data collection and management, describes practical aspects of modern statistical analysis, and reviews computational techniques supporting critical analysis of field data.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:
AGRO 600 Thesis Research (1-15) No description.
Effective: Summer 2013

AGRO 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 2013

AGRO 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised training in teaching methodology for classroom and laboratory type instruction. Supervision provided by faculty member responsible for course.
Effective: Summer 2013

AGRO 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 2013

AGRO 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 2013

AGRO 851 Applied Plant Population Biology (3) Lectures and exercises designed to develop student competency in plant selection to promote ecological diversity and genetically superior plants.
Effective: Summer 2013

Last Import from UCM: May 24, 2014 3:00 AM
American Studies (AM ST)

AM ST 400 Early America to 1765 (3) American society and culture in the colonial period. 
Effective: Fall 2007 
Prerequisite:

AM ST 401 Revolution and Early Republic, 1765-1815 (3) American society and culture during the period of the Revolution and the Early Republic. 
Effective: Fall 2007 
Prerequisite:

AM ST 402 Antebellum and Civil War Era, 1815-1876 (3) Social and cultural conditions, sectional rivalry, political crises, warfare, and Reconstruction from 1815 to 1876. 
Effective: Fall 2007 
Prerequisite:

AM ST 404 Industrial America (3) An analysis of American politics, literature, society, and economics from the 1870s to World War II. 
Effective: Fall 2007 
Prerequisite:

AM ST 405 Cold War (3) Examination of social and cultural currents in American life from World War II to 1990. 
Effective: Fall 2007 
Prerequisite:

AM ST 406 Contemporary America (3) A study of the historic and cultural currents of life in the United States during the recent past. 
Effective: Fall 2007 
Prerequisite:

AM ST 412 American Eras (3) Examination in depth of various and distinctive American time periods; subtitle expresses specific content. (May be repeated for credit.) 
Effective: Fall 2007 
Prerequisite:

AM ST 417 American Beliefs and Myths (3) A study of symbols, beliefs, and myths in the American experience; subtitles express specific content. (May be repeated for credit.) 
Effective: Fall 2007 
Prerequisite:

AM ST 421 (PHIL 401) American Philosophy (3) Survey of key figures and movements in American thought, including the Transcendentalists, the Pragmatists, and contemporary developments. 
Effective: Fall 2007 
Prerequisite:

AM ST 422 (RL ST 422) Religion and American Culture (3 per semester, maximum of 6) Selected topics, problems, or historical movements in American religion; relation between religion and American culture. 
Effective: Summer 1996 

Effective: Fall 2007 
Prerequisite:

AM ST 431 National Character (3) An examination of the characteristics of the American people and other national groups. 
Effective: Fall 2007 
Prerequisite:

AM ST 432 Ethnicity and the American Experience (3) Theoretical and conceptual framework of ethnic studies: examination of specific issues related to major American ethnic and racial groups. 
Effective: Fall 2007 

AM ST 435 Americans at Work (3) A study of occupational and organizational cultures in America. 
Effective: Fall 2007 
Prerequisite:

AM ST 439 American Regional Cultures (3-6) An interdisciplinary study of the culture of a region of the United States, such as the south or the west. 
Effective: Fall 2007 
Prerequisite:

AM ST 441 (US) (KINES 441) History of Sport in American Society (3) Background, establishment, and growth of sport in America from colonial times to the present. 
Effective: Fall 2007 
Prerequisite:
AM ST 447 (US) (HIST 447) **Recent American History** (3) Contemporary economic, social, and political aspects of the United States and its role as a world power since 1945.
Effective: Spring 2014
Prerequisite:

AM ST 448 (ANTH 448) **Ethnography of the United States** (3) Ethnographic descriptions of various dimensions of life in the United States.
Effective: Fall 2007
Prerequisite:

AM ST 451 (COMM 451) **Topics in American Film** (3 per semester/maximum of 6) Critical and historical studies of American films. Analysis of directing, cinematography, editing, screenwriting, and acting.
Effective: Fall 2013
Prerequisite:

Effective: Fall 2007

AM ST 472 (ENGL 434) **Topics in American Literature** (3) Focused study of a particular genre, theme, or problem in American literature. (May be repeated for credit.)
Effective: Fall 2007
Prerequisite:

AM ST 475 (US) (ENGL 431) **Black American Writers** (3 per semester, maximum of 6) A particular genre or historical period in the development of Black American literature.
Effective: Fall 2007
Prerequisite:

AM ST 476 (ENGL 492, WMNST 491) **American Women Writers** (3) A study of selected American women writers.
Effective: Spring 2008
Prerequisite:

AM ST 479 **American Expressive Forms** (3) Examination in depth of various and distinctive American expressive forms; subtitle expresses specific content. (May be repeated for credit.)
Effective: Fall 2007
Prerequisite:

AM ST 480 **Museum Studies** (3) An introduction to the basic purposes, philosophies, and functions of a museum, with emphasis on the problems of museum administration. (May be repeated for credit.)
Effective: Fall 2007
Prerequisite:

AM ST 481 **Historic Preservation** (3) A study of preservation practices and programs in America.
Effective: Fall 2007
Prerequisite:

AM ST 482 **Public Heritage** (3) A study of public heritage practices and programs in America. (May be repeated for credit.)
Effective: Fall 2007
Prerequisite:

AM ST 483 **Oral History** (3) A study of oral history techniques and issues in America.
Effective: Fall 2007
Prerequisite:

AM ST 491W **American Themes, American Eras** (3-6) Interdisciplinary American culture course on major themes and eras such as the American Revolutionary Era or the 1930s.
Effective: Fall 2007
Prerequisite:

AM ST 493 (ENGL 493) **The Folktale in American Literature** (3) A survey of the literary uses of the folktale and legendary materials, with particular concentration on the literature of America.
Effective: Spring 1986
Prerequisite:

AM ST 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

AM ST 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

AM ST 495 **Internship** (1-6) Supervised internship for undergraduate or graduate American Studies majors at a museum or another cultural, historical, or arts agency.
Effective: Fall 2007
Prerequisite:
AM ST 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

AM ST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

AM ST 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

AM ST 500 Theory and Methods (3) Introduction to graduate work in American Studies through exploration of the approaches, materials, and interpretations of the field.
Effective: Fall 2007

AM ST 502 Problems in American Studies (3-6) A variable-content course, addressed each term to a specific problem, topic, or period in American culture.
Effective: Summer 1970

AM ST 510 U.S. Literature and Culture (3) Studies exploring the relationship between literature and culture in American Studies.
Effective: Summer 2007

AM ST 511 Pivotal Books (3-9) Exploration of a number of books which have been particularly influential in shaping thinking about American civilization.
Effective: Fall 2007

AM ST 520 Topics in Popular Culture (3) A detailed exploration of aspects of American popular culture, including popular culture's relationship to society and scholarship.
Effective: Summer 2007

AM ST 530 Topics in American Folklore (3) A detailed exploration of aspects of folklore and folklife in America.
Effective: Fall 2007

AM ST 531 Material Culture and Folklife (3) Investigation of American material culture and folklife, including topics such as traditional design, cultural landscape, architecture, art, craft and food.
Effective: Summer 2007

AM ST 533 American Civilization in the Eighteenth Century (3-9) Detailed investigation of specific topics in eighteenth-century American civilization.
Effective: Fall 2007

AM ST 534 American Civilization in the Nineteenth Century (3-9) Representative interdisciplinary investigation of social, historical, economic, and aesthetic forces predominant in nineteenth-century America.
Effective: Fall 2007

AM ST 535 American Civilization in the Twentieth Century (3-9) Detailed investigation of specific periods or topics in twentieth-century American civilization.
Effective: Fall 2007

Effective: Summer 2007

AM ST 540 Ethnography and Society (3) An advanced course on ethnographic theories, methods, and case studies, emphasizing current controversies and new strategies in field work.
Effective: Summer 2007

AM ST 550 Seminar in Public Heritage (3) A study of the ways Americans use and understand heritage in public settings.
Effective: Summer 2007
Prerequisite:

AM ST 551 Seminar in Local and Regional Studies (3) Detailed investigation of local and regional historical themes and topics, emphasizing research methods.
Effective: Summer 2007

The Pennsylvania State University
AM ST 560 Seminar in Race and Ethnicity (3) Studies exploring issues of race and ethnicity in America that can be addressed with theories and methods of American Studies.
Effective: Summer 2007

AM ST 561 Seminar in Gender and Culture (3) Thematic study of gender issues in American history and culture.
Effective: Summer 2007

AM ST 570 Topics in American Art (1-6) Various themes within the American arts will be explored under this rubric.
Effective: Fall 2007

AM ST 575 Museum Internship (3) A supervised museum internship experience featuring a "hands on" introduction into aspects of the curatorial profession.
Effective: Fall 2007

AM ST 579 Readings in American Studies (3-9) Directed readings in selected areas of American Studies.
Effective: Fall 2008
Prerequisite:
AM ST 580 Projects in American Studies (1-6) Independent exploration within American Studies; evidenced by major paper, film, exhibition or specialized examination.
Effective: Fall 2007

AM ST 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2007

AM ST 591 Seminar in American Studies (3) An advanced seminar covering particular themes and issues in American Studies.
Effective: Fall 2007
Prerequisite:
AM ST 592 Field Experience in American Studies (3) Field projects and study tours to off-campus sites using American Studies methodologies.
Effective: Summer 2007
Prerequisite:
AM ST 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

AM ST 595 Internship (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Fall 2008

AM ST 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

AM ST 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2007

AM ST 600 Thesis in American Studies (6) A thesis supervised by the American Studies Program.
Effective: Summer 2007
Prerequisite:
AM ST 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 2008

AM ST 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Fall 2008
Prerequisite:
Effective: Fall 2008

AM ST 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 2008
Anatomy-Hy (ANAT)

ANAT 503 **Gross Anatomy** (6) Gross structure, organization, and function of the human body with laboratories devoted to dissection of the human body. 
Effective: Summer 1983

ANAT 505 **Histology and Embryology I** (2) Light and electron microscopic structure of cells, specialized tissues, organization, basic organogenesis, correlation between cellular structure and physiological function. 
Effective: Spring 1995

ANAT 506 **Histology and Embryology II** (2) Continuation of ANAT 505; microscopic structure of cells, specialized tissues, organization, basic organogenesis, correlation between cellular structure and physiological function. 
Effective: Summer 1994
Prerequisite: 
ANAT 511 (NEURO 511) **Neurobiology II** (3) Structure and physiology of central and peripheral nervous system, including specific sense organs. 
Effective: Summer 1987
Prerequisite: 
ANAT 512 **Human Embryology and Teratology** (2) Study of developing human embryo including gamete production and fusion, implantation, organogenesis and major abnormalities of organ systems. 
Effective: Fall 1983

ANAT 515 (NEURO 515) **Developmental Neurobiology** (2) Development of the nervous system in all its aspects. 
Effective: Fall 1986

ANAT 584 (PHARM 584) **Human Anatomy and Development A: Gross Human Anatomy** (1) Explore gross human anatomy providing orientation to organs and the overall relationship of organs and structures within the human body. 
Effective: Fall 2007

ANAT 585 (PHARM 585) **Human Anatomy and Development B: Human Development** (1) Explores human embryology and organogenesis beginning at the third week of gestation through parturition. 
Effective: Fall 2007

ANAT 586 (PHARM 586) **Human Anatomy and Development C: Stem Cell Biology and Regenerative Medicine** (1) Exploration of stem cell biology and the role of stem cells in regenerative medicine. 
Effective: Fall 2007

ANAT 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. 
Effective: Spring 1987

ANAT 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Spring 1987

ANAT 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. 
Effective: Spring 1987

ANAT 600 **Thesis Research** (1-15) No description. 
Effective: Fall 1983

ANAT 601 **Ph.D. Dissertation Full-Time** (0) No description. 
Effective: Fall 1983

ANAT 602 **Supervised Experience in College Teaching** (1-6 per semester/maximum of 99) Supervised experience in the development of instructional materials, the organization and conduct of lectures/laboratories, the evaluation and counseling of students. 
Effective: Fall 2005

ANAT 610 **Thesis Research Off Campus** (1-15) No description. 
Effective: Fall 1983
ANAT 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

ANAT 715 Human Gross Anatomy (6) This course will provide exposure to core human anatomical structures, emphasizing critical relationships and clinical significance.
Effective: Summer 2013
Prerequisite: Concurrent: Foundations of Patient Centered Care; Public Health and Socio- Ecological Medicine

ANAT 743 Musculoskeletal Advanced Anatomy (3) This course provides exposure to the relevancy of anatomy to the clinical setting and specifically covers topics related to musculoskeletal clinical presentations.
Effective: Spring 2012
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
**Anesthesiology-Hy (ANSTH)**

**ANSTH 700 Anesthesia for Third Year Students** (5) Introduction to clinical anesthesia practice, local and general and cardiopulmonary resuscitation.
Effective: Spring 2010
Prerequisite:

**ANSTH 740 Anesthesia Acting Internship** (5) The acting internship in anesthesia is designed to expand on the experiences obtained in courses ANSTH 700 and 770.
Effective: Spring 2009
Prerequisite:

**ANSTH 770 Anesthesiology Clinical Elective** (5) The objectives for this course utilize the objectives of Ansth. 700 as a base.
Effective: Winter 1978
Prerequisite:

**ANSTH 772 Pain Management** (5) Includes evaluation, diagnosis, and treatment of complex chronic pain problems in an outpatient model. A hands-on approach will be emphasized.
Effective: Summer 1985
Prerequisite:

**ANSTH 796 Anesthesia Individual Studies** (5) Special studies program, usually involving investigative work, all hours and assignments by arrangement with a member of the anesthesia staff-faculty.
Effective: Spring 2009
Prerequisite:

**ANSTH 796A Anesthesiology Individual Studies** (2.5) Anesthesiology Individual Studies for 3rd year medical students.
Effective: Spring 2009

**ANSTH 797 Anesthesia Special Topics** (5) Anesthesia Special Topics
Effective: Spring 2009
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Animal Science (AN SC)

AN SC 405 Advanced Canine Nutrition and Management (3) Application of biological principles to the care and nutrition of dogs; interactive discussions of contemporary nutrition and management issues.
Effective: Fall 2013
Prerequisite:

AN SC 407 Advanced Horse Management (3) Detailed study of anatomy and physiology of the horse as related to nutrition, reproduction, athletic ability, unsoundness and control of diseases and parasites. Detailed discussion of management practices, facility design and contemporary issues.
Effective: Fall 2013
Prerequisite:

AN SC 410 Advanced Dairy Herd Management (4) Application of dairy herd management principles using case studies and actual dairy farm situations.
Effective: Fall 2013
Prerequisite:

AN SC 413 Transgenic Biology (3) The principles and concepts used to generate genetically engineered animals by pronuclear, knockout, and cloning methods; and applied biotechnology applications.
Effective: Fall 2013
Prerequisite:

AN SC 415 Companion Animal Behavior (3) Detailed study of companion animal behavior; including individual, developmental, and environmental bases of behavior with applied demonstration and discussion.
Effective: Spring 2013
Prerequisite:

AN SC 417 Horse Judging (2) Evaluation and selection of halter and performance horses, and presentation of oral reasons.
Effective: Fall 2013
Prerequisite:

Effective: Summer 2013

AN SC 419W Applied Animal Welfare (3) Assessment of management practices impacting animal welfare; devoted to livestock species, companion animals, captive exotic species, and animals in research.
Effective: Summer 2013
Prerequisite:

AN SC 420 Animal Nutrition and Feed Technology (4) Feedstuff evaluation, quality control, handling, storage: life cycle feeding of beef cattle, dairy cattle, sheep, swine, horses, and poultry.
Effective: Summer 2013
Prerequisite:

AN SC 421 Poultry Evaluation and Selection (2) Introduction and application of standards and principles used to evaluate live poultry and poultry products.
Effective: Summer 2013
Prerequisite:

AN SC 422 Dairy Cattle Evaluation and Selection (3) Methods used in evaluation of production and type traits and their role in selecting dairy breeding stock domestically and internationally.
Effective: Summer 2013
Prerequisite:

AN SC 423 Comparative Physiology of Domestic Animals (3) A comparative approach to understanding body function in domesticated avian and mammalian species.
Effective: Summer 2013
Prerequisite:

Effective: Summer 2013
Prerequisite:

AN SC 425 (VB SC 425) Principles of Avian Diseases (3) Principles of pathogenesis and control of diseases in poultry and other avian populations. Case material used where appropriate.
Effective: Summer 2013
Prerequisite:

AN SC 426 Advanced Judging and Selection (2 per semester, maximum of 4) Development of critical thinking and communication skills through evaluation and selection of animals and animal products.
Effective: Summer 2013
Prerequisite:
AN SC 427 Milk Secretion (3) Development and physiology of the mammary gland and factors which affect the amount and composition of milk produced. 
Effective: Fall 2013  
Prerequisite: 

AN SC 429 Advanced Beef Cattle Production (3) Application of scientific and business principles to practical production and management issues using case studies or selected live settings. 
Effective: Summer 2013  
Prerequisite: 

AN SC 431W Physiology of Mammalian Reproduction (4) Physiological processes of reproduction in animals, including the use of current and emerging technologies. 
Effective: Summer 2013  
Prerequisite: 

AN SC 432 Techniques in Livestock Reproduction (2) Demonstration and practice in estrus detection, inseminating techniques, pregnancy detection, embryo recovery and transfer methods. 
Effective: Summer 2013 Ending: Summer 2014  
Prerequisite: 

AN SC 432 Techniques in Cattle Reproduction (1) Demonstration and practice in cattle artificial insemination technique and semen handling. Instruction in reproductive systems anatomy, estrous cycle and estrus synchronization programs. 
Effective: Fall 2014 Future: Fall 2014  
Prerequisite: 

AN SC 437 (AEE 437) Equine Facilitated Therapy (3) Equine Facilitated Therapy uses equine-related activities to contribute positively to the wellbeing of people with disabilities. 
Effective: Fall 2013  
Prerequisite: 

AN SC 447 Applied Equine Behavior (3) Theory and application of behavior principles as they apply to horses in free-running and domestic situations. 
Effective: Summer 2013  
Prerequisite: 

AN SC 450 Dairy Farm Management Systems (3) Capstone course emphasizing integration of dairy farm management principles into whole farm systems. 
Effective: Fall 2013  
Prerequisite: 

AN SC 451 Dairy Systems Analysis (1-2 per semester/maximum of 2) Students will evaluate all systems of a working dairy farm business. 
Effective: Summer 2013  
Prerequisite: Concurrent: AN SC 450 prerequisite or concurrent: AN SC 410 

AN SC 457 Equine Reproduction and Breeding Farm Management (3) Advanced aspects of equine reproduction will be covered, including collection of semen, processing it for shipment, and insemination of mares. 
Effective: Fall 2013  
Prerequisite: 

AN SC 467W Equine Nutrition and Feeding (3) Equine gastrointestinal anatomy and physiology; energy and nutrient requirements for body functions; applied interrelationships between nutrition, health, and performance. 
Effective: Summer 2013  
Prerequisite: 

AN SC 477 Riding Instructor Training (1) Management of equestrian riding lessons, teaching techniques, lesson plans, program planning, time management, and handling of mounted groups. 
Effective: Summer 2013  
Prerequisite: 

AN SC 479 (BIOL 479) General Endocrinology (3) Endocrine mechanisms regulating the morphogenesis, homeostasis, and functional integration of animals. 
Effective: Summer 2013  
Prerequisite: 

AN SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Summer 2013  

AN SC 496A Animal Science Teaching Assistant (2) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014  

AN SC 496A Animal Science Training Assistant (2) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. 

AN SC 496H Animal Science Honors Independent Study (1-18) Creative projects, including research and design, which
are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

AN SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2013

AN SC 497A Natural Toxicants in Feedstuffs and Poisonous Plants: Effects on Animal Health and Productivity (3) An overview of plant toxicants and mycotoxins in cereal grains, roots and tubers, protein supplements, grain legumes, and forages, and the adverse effects that they cause when consumed by animals. Emphasis will be placed on the occurrence and chemical nature of plant and fungal toxins, their mechanism of action and metabolism, the pathological effects that they produce in livestock, poultry, and companion animals, and strategies to overcome their toxicity.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

AN SC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2013

AN SC 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2013

AN SC 499C (IL) Normandy France Equine Industry Studies (0.5) Students will explore/compare United States and French Equine Industry. Topics will include breeding, training, trade issues, agricultural trade policy, animal welfare, animal health and research, marketing equestrian event management, and farm management.
Effective: Summer 2014 Ending: Summer 2014
Prerequisite:

AN SC 500 Foundation Readings in Animal Science (1 per semester/maximum of 2) Scientific articles that have significantly impacted the animal sciences will be read and discussed.
Effective: Summer 2013

AN SC 502 Scientific Scholarship (2) Consideration of the scientific method and thinking relative to scholarship, grantsmanship, and the mechanism of grantsmanship.
Effective: Summer 1996

AN SC 506 (NUTR 506) Ruminology (3) Physiological, biochemical, and microbiological activities occurring within the rumen and the relation of rumen function to animal response.
Effective: Summer 2013
Prerequisite:

AN SC 515 Advanced Physiology of Reproduction in Farm Animals (1-6) Advanced physiology of reproduction in farm animals.
Effective: Summer 2013
Prerequisite:

AN SC 590 Colloquium (1-9; 1 per semester) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2013

AN SC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2013

AN SC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2013

AN SC 597A Animal Genomics (3) Introduction to genomics, proteomics, epigenomics, and basic bioinfromatics, and their applications in animal breeding, animal health and production.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

AN SC 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2013

AN SC 600 Thesis Research (1-15) No description.
Effective: Summer 2013
AN SC 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 2013

AN SC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Experience in developing, organizing, and conducting lectures/laboratories; evaluation and counseling students and related resident education activities.
Effective: Summer 2013

AN SC 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Summer 2013

AN SC 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 2013

AN SC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 2013

NOTE: Also see course listed under Animal Nutrition, Poultry Science, and Veterinary Science.

Last Import from UCM: May 24, 2014 3:00 AM
Anthropology (ANTH)

Effective: Fall 1986
Prerequisite:

ANTH 403 Evolution of Human Walking (3) An in depth analysis of the biology, biomechanics, evolutionary history of human walking and running.
Effective: Spring 2013
Prerequisite:

ANTH 403H Evolution of Human Walking (3) An in depth analysis of the biology, biomechanics, evolutionary history of human walking and running.
Prerequisite:

ANTH 405 Primatology (3) Nonhuman primate origins, evolution, comparative physical and behavioral characteristics, ecological context, phylogeny and taxonomy; and their importance in anthropology.
Effective: Spring 2001
Prerequisite:

ANTH 408 Anthropological Demography (3) Analysis of demographic studies in traditional and very small populations.
Effective: Fall 2003
Prerequisite:

ANTH 410 Osteology (4) Introduction to the systematic study of the human skeleton from an evolutionary developmental biological perspective.
Effective: Spring 2007
Prerequisite:

ANTH 411 Skeletal Forensic Anthropology (3) An introduction to anthropological forensic science with an emphasis on what can be learned from human skeletons and archaeological recovery methods.
Effective: Spring 2007
Prerequisite:

ANTH 412 Settlement Demography (3) Examination of the demography and ecology of human settlement systems in the preindustrial past.
Effective: Summer 2008
Prerequisite:

ANTH 413 Molecular Forensic Anthropology (3) An introduction to the field of the application of DNA methods to estimating forensically useful phenotypes.
Effective: Summer 2006
Prerequisite:

ANTH 416 The Evolution of Human Mating (3) The Evolution of Human Mating is a science course designed to familiarize students with the primary literature on the evolution and development of human mating behavior and sex differences.
Effective: Spring 2013
Prerequisite:

ANTH 420 (J ST 420) Archaeology of the Near East (3) Culture of the Near East and India from Paleolithic times through the Bronze Age.
Effective: Summer 1999
Prerequisite:

ANTH 421 Intro to Geospatial Science in Anthropology and Archaeology (3) This course is a practical, data driven, introduction to applications of Geospatial tools in anthropological and archaeological research.
Effective: Summer 2009
Prerequisite:

ANTH 422 Meso-American Archaeology and Ethnography (3) Survey of ethnohistorical and ethnographic patterns of Meso-American society; origin and development of ancient civilization in Mexico, Guatemala, and Honduras.
Effective: Spring 1999
Prerequisite:

ANTH 423 The Evolution of American Indian Culture (3) Historic and archaeological sources used to trace American Indian lifestyles from the first immigrants to the period of Euro-American contact.
Effective: Spring 1999
Prerequisite:

ANTH 424 Andean Ethnology and Archaeology (3) Cultures of the Andes from earliest settlements to Inka Empire; includes discussion of life in modern Andean communities.
Effective: Spring 2002
Prerequisite:

ANTH 425 Zooarchaeology (3) Introduction to the systematic study of animal skeletal remains from archaeological sites.
ANTH 426W **Archaeological Laboratory Analysis** (3) Scientific laboratory methods used in the analysis of ceramic and lithic artifacts.
Effective: Summer 2004
Prerequisite:

ANTH 427W **Forensic Archaeology** (3) Application of archaeological techniques to crime scene investigations, with practical experience in field and laboratory contexts.
Effective: Summer 2007
Prerequisite:

ANTH 428 **Archaeological Methods and Theory** (3) Scientific methods as applied to archaeological data: evolution, ecology, diffusion, and cyclicism theory.
Effective: Spring 1999
Prerequisite:

ANTH 429 **Paleoethnobotany** (3) Introductory course in paleoethnobotany, the study of the interrelationships between people of the past, natural environment, and plant resources.
Effective: Spring 2010
Prerequisite:

ANTH 430 **The Aztecs** (3) This course examines the development and organization of the great Aztec culture of highland Mexico.
Effective: Summer 2013
Prerequisite:

ANTH 431 **Advanced Geospatial Science for Anthropologists and Archaeologists** (3) This course is an intensive, data driven, treatment of the use of geographic information systems in anthropological and archaeological research.
Effective: Summer 2009
Prerequisite:

ANTH 432 **Environmental Archaeology** (3) Introductory course in Environmental Archaeology, with emphasis on method and theory in the subfields archaeobotany, pedoarchaeology, and zooarchaeology.
Effective: Spring 2010
Prerequisite:

ANTH 433 **Archaeological Ethics and Law** (3) Introductory course that examines prominent ethical and legal issues in archaeology integral to modern applied research and practice.
Effective: Spring 2010
Prerequisite:

ANTH 435 (IL) **Ancient Economy** (3) The course examines the comparative organization and development of ancient economies in both the Old and New Worlds.
Effective: Summer 2013

ANTH 440 **South American Tribal Societies** (3) Ethnographic survey of tribal societies in South America. Special emphasis on non-Andean area.
Effective: Fall 1986

ANTH 441 (IL) **From Stone Ax to Uzi: Tradition and Change in the New Guinea Highlands** (3) This course explores cultural change and innovation among tribal peoples of Highland New Guinea from stone tool technology to globalization.
Effective: Fall 2009
Prerequisite:

ANTH 444 **Primitive Warfare** (3) Critical overview of the ethnography and theory of primitive warfare.
Effective: Summer 2002
Prerequisite:

ANTH 445W **Ethnographic Film** (3) Comparisons of written and visual ethnography; critical assessment of ethnographic film; cross-cultural variation.
Effective: Summer 2000
Prerequisite:

ANTH 446 **Mating and Marriage** (3) An examination of human mating mainly from the viewpoint of behavioral ecology, centering on the species-typical institution of marriage.
Effective: Summer 2006
Prerequisite:

ANTH 448 (AM ST 448) **Ethnography of the United States** (3) Ethnographic descriptions of various dimensions of life in the United States.
Effective: Fall 2007
Prerequisite:

ANTH 450 **Comparative Social Organization** (3) Social structure and cultural change among nonliterate societies.
Effective: Fall 1986
Prerequisite:
ANTH 450W **Comparative Social Organization** (3) Social structure and cultural change among nonliterate societies.
Effective: Summer 1996
Prerequisite:

ANTH 451 **Economic Anthropology** (3) Different approaches to the study of the economics of non-Western societies, emphasizing the interrelationships between noneconomic factors and economic behavior.
Effective: Fall 1986
Prerequisite:

ANTH 453 **Anthropology of Religion** (3) Traditional and modern religions and historical and contemporary religious movements from an anthropological perspective.
Effective: Fall 2003
Prerequisite:

ANTH 455 **Global Processes and Local Systems** (3) Ethnographic, comparative, historic, evolutionary treatment of global economic, political, and cultural processes and their consequences for local systems.
Effective: Fall 2001
Prerequisite:

ANTH 456 **Cultural Ecology** (3) Survey of the methods and concepts of cultural ecology, focusing on the interaction between cultural and geographical systems.
Effective: Fall 1986
Prerequisite:

ANTH 457 (US;IL) (J ST 457, SOC 457) **Jewish Communities: Identity, Survival, and Transformation in Unexpected Places** (3) Examines the global array of smaller Jewish communities that have flourished outside the main urban centers of Jewish settlement.
Effective: Summer 2006
Prerequisite:

ANTH 458 **Ethnographic Field Methods** (3) Course introduces students to ethnographic field methods, includes student projects and simple analyses that don't require statistical sophistication.
Effective: Spring 2009
Prerequisite:

ANTH 459 **Applied Anthropology** (3) A survey of the development of applied anthropology and the current issues facing anthropologists working in non-academic settings.
Effective: Summer 2002
Prerequisite:

ANTH 460 (BIOL 460) **Human Genetics** (3) The human genome, its variation, origins, and relation to disease and other traits.
Effective: Fall 2012
Prerequisite:

ANTH 460H (BIOL 460H) **Human Genetics** (4) Gene mapping in humans; molecular basis of genetic disease; genomic structure; immunogenetics; and genetic evidence for human evolutionary history.
Effective: Fall 2001
Prerequisite:

ANTH 461 **Molecular Anthropology** (3) Provides framework to understand current issues in biology, genetics, and anthropology as they relate to the evolution of our species.
Effective: Spring 2005
Prerequisite:

ANTH 465H **Fifteen Great Biology Papers** (3) Reading and discussion of the most influential papers in the history of biology that illustrate exceptional insight and elegant reasoning.
Effective: Spring 2003
Prerequisite:

ANTH 466 **The Skull** (3) Survey of the mammalian skull from many perspectives including evolution, development, anatomy, function, and variability of the skull.
Effective: Spring 2003
Prerequisite:

ANTH 468 **Evolution and Development of Human Origins** (3) In depth analysis of the genetic and developmental basis for phenotypic variation and evolution of humans and primates.
Effective: Summer 2013
Prerequisite:

ANTH 470H **Our Place in Nature** (3) An evolutionary and genetic consideration of our understanding of human beings as a part of the natural world.
Effective: Fall 2001
Prerequisite:

ANTH 471H **Biology, Evolution, and Society** (3) Exploration of the genetic theory of evolution and development, its history and application within Biology and beyond.
Effective: Spring 2008
Prerequisite:

ANTH 472 **The Ecology of Traditional Farming** (3) This course will examine the ecology of traditional farming, focusing
on the farming household, its farm, and its subsistence needs.
Effective: Summer 2013
Prerequisite:

ANTH 476W Anthropology of Gender (3) Cross-cultural construction of gender and sex roles; theories of gender construction; case studies and practical effects.
Effective: Summer 2011
Prerequisite:

ANTH 477 (US;IL) Language, Culture, and Society (3) Relationships among language, culture and society, with an anthropological emphasis.
Effective: Spring 2007
Prerequisite:

ANTH 478 (IL) Cannibalism (3) Explores the cultural institution of cannibalism, uses of the "cannibal" label, and cannibalism's meaning among those who practiced it.
Effective: Spring 2010
Prerequisite:

ANTH 492 Intermediate Field Methods (3-6) On-site experience in collecting archaeological, behavioral, or biological data.
Effective: Spring 2001
Prerequisite:

ANTH 493 Field Techniques (3-6) Training in techniques involving analyses of archaeological, behavioral, or biological data.
Effective: Spring 2001
Prerequisite:

ANTH 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

ANTH 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

ANTH 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2000
Prerequisite:

ANTH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1986

ANTH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1986

ANTH 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

ANTH 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Effective: Spring 2002
Prerequisite:

ANTH 508 Research Problems in Culture History (3-9) No description.
Effective: Spring 1987

Effective: Summer 1990
Prerequisite:

ANTH 521 Current Literature in Archaeology (1) Seminar designed to expand general knowledge of archaeology through exposure to current research and related issues in contemporary archaeology.
Effective: Fall 2000

The Pennsylvania State University
ANTH 541 Current Literature in Cultural Anthropology (1) This seminar is designed to expand general knowledge of cultural anthropology through exposure to current research/related issues in contemporary cultural anthropology. Effective: Spring 2002

ANTH 545 Seminar in Anthropology (1-9) Critical analysis of research in selected areas of anthropology. Effective: Spring 1987

ANTH 556 Social Organization of Traditional Societies (3) Cultural bases of social organization of traditional societies. Effective: Summer 1990

ANTH 559 Human Ecology (3) Ecological anthropology, emphasizing the adaptive aspects of subsistence, including foraging and settlement pattern. Effective: Spring 2011

ANTH 560 History of Anthropological Theory (3) Survey of origin and development of anthropology in the Nineteenth Century and trends during the Twentieth Century. Effective: Fall 1986

Prerequisite:

ANTH 562 Laboratory Methods in Anthropology (3-9) Supervised laboratory research, utilizing materials from physical anthropology or archaeology or cultural anthropology. Effective: Spring 1987

ANTH 563 Current Literature in Biological Anthropology (1) Seminar designed to expand general knowledge of Biological Anthropology through exposure to current research and issues in contemporary Biological Anthropology. Effective: Fall 2001

ANTH 566 Infectious Diseases in Anthropological Populations (3) Surveys infectious diseases in history and prehistory; introduces concepts from microbiology, immunology, and epidemiology, applies them to past human populations. Effective: Spring 2002

ANTH 575 Population, Food, and Traditional Farming (3) This course explores the relationship between demographic processes (fertility, mortality, migration) and traditional farming, especially farming near the subsistence level. Effective: Summer 2009

Prerequisite:

ANTH 579 (SOC 579) Spatial Demography (3) This graduate course will expose students to spatial analysis tools and analytical methods applied to demographic research. Effective: Spring 2008

Prerequisite:

ANTH 588 Method and Theory in Archaeology (3) Methodological strategies and tactics in archaeological research; major theories in cultural anthropology as applied to archaeological data. Effective: Spring 2002

ANTH 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Summer 1987

ANTH 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2001

ANTH 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1987

Prerequisite:

ANTH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 1987

ANTH 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Courses offered in foreign countries by individual or group instruction.
ANTH 600 **Thesis Research** (1-15) No description.
Effective: Fall 1986

ANTH 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1986

ANTH 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at the Pennsylvania State University.
Effective: Fall 2003

ANTH 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2002

ANTH 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1986

ANTH 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1986

Last Import from UCM: May 24, 2014 3:00 AM
Appellate Team (APTEM)

Effective: Fall 1998

APTEM 995B Jessup International Law Team (2) See Handbook for description.
Effective: Fall 1998

APTEM 995C National Appellate Moot Court Team (2) See Handbook for description.
Effective: Fall 1998

APTEM 995D Environmental Law Team (2) See Handbook for description.
Effective: Fall 1998

Effective: Spring 1998

APTEM 995F Information and Privacy Law Team (2) See Handbook for description.
Effective: Fall 1998

APTEM 995G Constitutional Law Team (2) See Handbook for description.
Effective: Fall 1998

APTEM 995I Miscellaneous Appellate Moot Court Teams (2) See Handbook for description.
Effective: Fall 1998

APTEM 995K BLSA Appellate Moot Court Team (2) See Handbook for description.
Effective: Spring 2005

Last Import from UCM: May 24, 2014 3:00 AM
Applied Behavioral Analysis (ABA)

ABA 500 Experimental Analysis of Behavior (3) This course covers the scientific, conceptual, theoretical, and philosophical roots of the experimental analysis of behavior. Effective: Summer 2003

Prerequisite:

ABA 511 Behavior Modification (3) Provides an overview of principles and procedures and use of behavior modification with individuals in diverse settings. Effective: Spring 2009

ABA 522 Single Subject Research (3) This course aims to teach how to critique, design, and analyze single subject research. Effective: Fall 2001

Prerequisite:

ABA 533 Applied Analysis of Behavior (3) Overview of the application of behavior analysis in education, rehabilitation, medicine, business, counseling, and therapy across the age range. Effective: Summer 2006

Prerequisite:

ABA 555 Behavioral Intervention in Autism (3) Overview of the use of Behavior Analysis in the education, assessment, and treatment of individuals with autism. Effective: Summer 2006

Prerequisite:

ABA 566 Behavioral Pediatrics (3) Overview of behavioral pediatrics and discusses the role of Behavior Analysis within this field. Effective: Summer 2006

Prerequisite:

ABA 577 Behavioral Assessment and Treatment of Behavior Disorders (3) Overview of the use of Applied Behavior Analysis in the assessment and treatment of individuals with behavior and emotional disorders. Effective: Summer 2006

Prerequisite:

ABA 588 Ethics and Legal Issues in Applied Behavior Analysis (3) This course will cover ethical and legal issues related to applied behavior analysis research and practice. Effective: Spring 2004

Prerequisite:

ABA 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2001

ABA 594A Research Topics (3-9 per semester/maximum of 18) Supervised research project in behavior analysis for degree candidates. Effective: Fall 2013

ABA 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Fall 2001

Prerequisite:

ABA 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Fall 2001

Last Import from UCM: May 24, 2014 3:00 AM
Applied Linguistics (APLNG)

APLNG 410 Teaching American English Pronunciation (3) Study and application of principles of North American English phonetics and theories of teaching pronunciation.
Effective: Fall 2001

APLNG 412 Teaching Second Language Writing (3) This course provides opportunities for exploring various perspectives on theory, research, and pedagogical applications in second language writing.
Effective: Summer 2003

APLNG 482Y (IL) Introduction to Applied Linguistics (3) Application of theories of language to psycholinguistics, philosophy of language, anthropological linguistics, sociolinguistics, bi/multilingualism, second language acquisition and teaching.
Effective: Spring 2006

APLNG 484 Discourse-Functional Grammar (3) Develop a working knowledge of the structure of English and apply such knowledge to research and/or classroom situations.
Effective: Fall 2004

APLNG 491 Theory: Second Language Acquisition (3) An investigation into current issues in the theoretical bases of second language acquisition.
Effective: Fall 2006

APLNG 493 (IL) Teaching English as a Second Language (3) Theory, research, and pedagogy that focus on the teaching of English to speakers of other languages in varied contexts.
Effective: Spring 2006

APLNG 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2001

APLNG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2002

APLNG 500 Practice Teaching in ESL (3) Provides instructional support and professional mentoring for second language teachers during the practice teaching experience.
Effective: Fall 2009

APLNG 510 Health and Aging in Multilingual Contexts (3) This course focuses on anthropological approaches to health and aging in multilingual contexts.
Effective: Spring 2007

APLNG 511 Applied Linguistics and Health Sciences (3) A theoretical and practical introduction to concepts and methods associated with multilingualism and health care services and research.
Effective: Summer 2006

APLNG 512 Language and Adult Lifespan Development (3) The effects of adult cognitive development and decline on the production and comprehension of language in mono- and multilinguals.
Effective: Summer 2006

APLNG 570 Second Language Reading (3) Theoretical and practical introduction to concepts, methods and practices of research and instruction of second language reading development.
Effective: Summer 2006

APLNG 571 'Foreign' Language Materials Development (3) This course focuses on the development and critical analysis of 'foreign' language teaching materials in applied linguistics and language learning.
Effective: Summer 2005

APLNG 572 Communication in Second Language Classrooms (3) The study of communication in second language classrooms.
Effective: Spring 2002
APLNG 573 **Communicative Language Teaching** (3) Cognitive, linguistic, and sociocultural foundations of communicative language teaching (CLT) as reflected in current international language teaching policies/practices.
Effective: Fall 2001

APLNG 574 **World Englishes: Pluralizing Policy, Pedagogy, and Proficiency** (3) This course explores the global spread of English, the diversification of its norms, and their pedagogical and policy implications.
Effective: Summer 2012

APLNG 575 **Language Ideology** (3) This course is designed to offer a range of perspectives on language ideology as an analytical construct.
Effective: Summer 2006

APLNG 576 **Language Socialization across Home, School, and Community Contexts** (3) A survey of research on language socialization from a variety of sociocultural groups across a range of sociolinguistic contexts.
Effective: Summer 2006

APLNG 577 **Language Analysis** (3) An overview of cognitive/conceptual/functional approaches to language analysis with applications to research, second language acquisition, and language pedagogy.
Effective: Fall 2006

APLNG 578 **Computational and Statistical Methods for Corpus Analysis** (3) A hands-on introduction to the core and advanced computational and statistical methods for analyzing corpus data.
Effective: Fall 2006

APLNG 580 **Proseminar in Applied Linguistics** (1) This team-taught seminar introduces PhD students to the scholarly areas and research perspectives in Applied Linguistics represented by department faculty.
Effective: Summer 2008

APLNG 581 **Discourse Analysis** (3) Overview of theories and approaches to the analysis of spoken and/or written discourse.
Effective: Fall 2008

APLNG 582 **Seminar in Approaches to Language Use** (3) Examines the historical and contemporary landscape of research on language use.
Effective: Fall 2008

APLNG 583 **Methods of Language Assessment** (3) Introduces methodology for selecting, developing, applying, and analyzing tests and questionnaires for research and evaluation in communication and language education.
Effective: Spring 2002

APLNG 584 **Sociocultural Theory and Second Language Learning** (3) The course is an introduction to research on second language learning from a sociocultural theoretic perspective.
Effective: Spring 2004

APLNG 586 **Analyzing Classroom Discourse** (3) A theoretical and practical introduction to concepts and methods associated with the analysis of classroom discourse.
Effective: Summer 2006

APLNG 587 **Theory & Research in L2 Teacher Education** (3) Examines the historical and contemporary landscape of theory and research in second language teacher education.
Effective: Fall 2009

APLNG 588 **Design and Research of Technology-Mediated Language Learning** (3) Using computer and multimedia technologies to support materials development and second language acquisition research.
Effective: Spring 2010

APLNG 589 **Technology in Foreign Language Education: An Overview** (3) Approaches to the uses and research applications of multimedia and other educational technologies applied to the teaching of foreign languages. (also crosslisted with SPAN 589)
Effective: Fall 2003

Effective: Spring 2002
APLNG 592 Qualitative Research in Applied Linguistics (3:2) This course offers an introduction to qualitative research methods in applied linguistics.
Effective: Spring 2009

APLNG 593 Experimental Research on Language (3) Standard methodologies for planning, conducting, interpreting, and reporting research in Applied Linguistics.
Effective: Spring 2009

APLNG 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Fall 2001
Prerequisite:

APLNG 596 Individual Studies (1-9) Creative projects, including nontesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2001

APLNG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2001

APLNG 597A Exploring L2 Classroom Practice (3) This class will introduce a wide variety of readings and hands-on practical activities that have been broadly accepted as “core best practices” in ESL/EFL classrooms.
Effective: Summer 2014 Ending: Summer 2014

APLNG 597A Research in Cognitive Linguistics (3) Course aims to introduce to the students cognitive linguistic research on how embodied cognition is manifested in language and contributions to human meaning and understanding.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

APLNG 597B Linguistic Anthropology (US and Asia) (3) This course addresses the connections between the disciplines of linguistics and anthropology.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

APLNG 597C Student Mobility and Language Learning (3) This course will examine policy, research, and pedagogy related to language learning and student mobility (i.e., study or residence abroad).
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

APLNG 600 Thesis Research (1-15) No description.
Effective: Fall 2001

APLNG 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 2001

APLNG 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Students experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Fall 2001

APLNG 610 Thesis Research Off Campus (1-15) No description.
Effective: Spring 2003

APLNG 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 2001

APLNG 802 Focus on English: Teaching Form, Meaning and Use (3) Develops an understanding of the various domains of the English language as relevant for adult English language learning and teaching.
Effective: Summer 2010

APLNG 804 Focus on Learners: Identity, Community and Language Learning (3) Explores how individual identities shaped by cultural differences, social positioning, institutional roles and structures influence English language learning and teaching.
Effective: Summer 2010

APLNG 806 Focus on Classrooms: Planning and Supporting Language Learning (3) Develops a critical awareness of one’s teaching practice and highlights instructional planning and classroom interactions with adult English language learners.
Effective: Summer 2010
APLNG 808 Focus on Instruction: Teaching and Assessing Language Learning (3) Develops an understanding of and ability to use effective teaching and assessment practices that support adult English language learning. Effective: Summer 2010

Last Import from UCM: May 24, 2014 3:00 AM
Applied Youth, Family and Community Education (AYFCE)

AYFCE 438 (US) Living in an Increasingly Diverse Society (1-3) Students in this course will explore selected dimensions of diversity through lecture, discussion, speakers, active participation, and experiential learning. Effective: Summer 2013

AYFCE 455 Extension Youth Development Programs and Volunteer Management (3) A study of 4-H/Extension youth programs and the variety of roles played by volunteer leaders. Effective: Summer 2013

Prerequisite:

AYFCE 495 Internship in Youth and Family Education Programs (6-18) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships. Effective: Summer 2013

Prerequisite:

AYFCE 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2013

AYFCE 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2013

AYFCE 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Summer 2013

AYFCE 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2013

AYFCE 535 Youth Civic Development (3) This course critically examines processes enabling youth to become members of local communities and "citizens" of nations and global societies. Effective: Summer 2013

AYFCE 550 Program Development and Evaluation in Youth, Families and Communities (3) Examination of concepts, theories, models, and procedures relative to program development and evaluation in youth, families and communities. Effective: Summer 2013

Prerequisite:

AYFCE 555 Volunteer Program Management (3) The study and application of concepts and principles of volunteered and administration relevant to volunteer program management. Effective: Summer 2013

AYFCE 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Summer 2013

AYFCE 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Summer 2013

Prerequisite:

AYFCE 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2013

AYFCE 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Summer 2013

The Pennsylvania State University
AYFCE 840 **Applied Youth Development** (3) Background and current issues related to youth development programs in their application to actual youth programs in community settings. Effective: Summer 2013

AYFCE 845 (CI ED 845) **Intergenerational Programs and Practices** (3) Background, intervention strategies, and issues related to developing intergenerational programs and practices aimed at addressing vital social and community issues. Effective: Summer 2013

Last Import from UCM: May 24, 2014 3:00 AM
Architectural Engineering (A E)

A E 401 Design of Steel and Wood Structures for Buildings (3) Application of principles of engineering mechanics to layout, analysis, design, and detailing of structural elements in steel and wood of simple buildings.
Effective: Fall 2005
Prerequisite:

A E 402 Design of Concrete Structures for Buildings (3) Application of principles of engineering mechanics to layout, analysis, design, and detailing of structural elements in concrete of simple buildings.
Effective: Fall 2005
Prerequisite:

A E 403 Advanced Steel Design for Buildings (3) Continuation of A.E. 401. Advanced analysis, design, and detail of the structural elements in wood and steel.
Effective: Fall 2005
Prerequisite:

A E 404 Building Structural Systems in Steel and Concrete (3) Basic analysis, design, and detailing of steel and concrete structural elements for buildings, emphasizing systems design and comparisons. A E 404 is not permitted for AE Structural Option students or for Architecture students.
Effective: Fall 2005
Prerequisite:

A E 421 Architectural Structural Systems I (3) Qualitative and quantitative analysis and design of architectural structures, force flow; structure configurations; measurement and experiments; design studio critique.
Effective: Spring 1990
Prerequisite:

A E 422 Architectural Structural Systems II (3) Continuation of A E 421, with emphasis on structural configuration and construction assemblies.
Effective: Spring 1990
Prerequisite:

A E 424 Environmental Control Systems I (3) Fundamental principles and applications of environmental systems in buildings. This course is intended for Architecture students.
Effective: Fall 2005
Prerequisite:

A E 430 Indeterminate Structures (3) Classical methods of analysis for beams, frames, arches, and secondary stresses as applied to buildings; introduction to modern methods.
Effective: Summer 1984
Prerequisite:

Effective: Fall 2005
Prerequisite:

A E 432 Design of Masonry Structures (3) Analysis and design of unreinforced and reinforced masonry: non-bearing walls, bearing walls, shear walls, masonry building systems.
Effective: Spring 2005
Prerequisite:

A E 439 Modern Structural Systems (3) Analysis and design of building structures of unusual types.
Effective: Summer 1981
Prerequisite:

A E 444 Micro CADD Applications for Buildings (3) Application of microcomputer based CADD systems to architectural engineering problems including graphics, system customization, and AI programming techniques.
Effective: Spring 2008
Prerequisite:

A E 454 Advanced Heating, Ventilating, and Air Conditioning (3) Engineering design and performance analysis procedures for complex commercial building systems, including energy conservation techniques; design project.
Effective: Fall 1986
Prerequisite:

A E 455 Advanced Heating, Ventilating, and Air Conditioning System Design (3) Design of several different systems for a course project building; control strategy; economic comparisons using life-cycle cost techniques.
Effective: Fall 1983
Prerequisite:

A E 456 Solar Energy Building System Design (3) Solar radiation, collectors, and thermal storage; design and analysis of a heating system using system-simulation computer program.
Effective: Summer 1984
Prerequisite:

A E 457 HVAC Control Systems (3) Theory of automatic control. HVAC control applications. Control system components,
control loops, development and documentation of control logic, control commissioning.
Effective: Summer 2006
Prerequisite:

A E 458 Advanced Architectural Acoustics and Noise Control (3) Advanced consideration of noise control in buildings; ventilating system noise and vibration; acoustic design variables.
Effective: Fall 1983
Prerequisite:

A E 461 Architectural Illumination Systems & Design (3) Lighting units & photometry; lighting equipment; design criteria, calculation methods; the design process; energy codes.
Effective: Fall 2005
Prerequisite:

A E 464 Advanced Architectural Illumination Systems & Design (3) Flux transfer theory; advanced lighting and control systems; emergency lighting; daylighting; visual performance issues; psychological aspects of lighting.
Effective: Fall 2005
Prerequisite:

A E 466 Computer Aided Lighting Design (3) Design and analysis for outdoor area; floodlighting; and interior applications, including design criteria; economic analysis; modeling algorithms; and visualization.
Effective: Fall 2005
Prerequisite:

A E 467 Advanced Building Electrical System Design (3) Design of electrical systems for commercial and industrial facilities emphasizing design practice and integration with codes and standards.
Effective: Spring 2008
Prerequisite:

A E 469 Photovoltaic Systems Design and Construction (3) Criteria and analysis methods pertaining to the design and construction of photovoltaic (PV) systems and their integration with buildings.
Effective: Spring 2014
Prerequisite:

A E 470 Residential Building Design and Construction (3) Managerial aspects; architectural and code considerations; cost estimating, design, and construction of structural, plumbing, HVAC, and electrical systems.
Effective: Spring 1994
Prerequisite:

A E 472 Building Construction Planning and Management (3) Construction organization and contracts; preconstruction services; estimating; scheduling; cash flow; site planning and preparation; building construction sequences; construction business presentations; value engineering.
Effective: Fall 2005
Prerequisite:

A E 473 Building Construction Management and Control (3) Building construction project planning; construction cost, schedule, quality and safety control systems; project cost accounting; change management; construction company management.
Effective: Fall 2005
Prerequisite:

Effective: Spring 2001
Prerequisite:

A E 475 Building Construction Engineering I (3) Project planning, supervision, inspection of architectural and structural operations in major buildings; mobilization, coordination of trades; offsite testing and fabrication.
Effective: Fall 2012
Prerequisite:

A E 476 Building Construction Engineering II (3) Construction of mechanical and electrical systems in major buildings; fire protection, sound control, elevating; trade coordination; manufacturers' developments; computer application.
Effective: Fall 1983
Prerequisite:

A E 481W Comprehensive Architectural Engineering Senior Project I (4) Building project selection and preparation of overall plan; preliminary investigation of building design and construction issues; creation of individual Capstone Project Electronic Portfolio (CPEP) and project proposal required.
Effective: Fall 2005
Prerequisite:

A E 482 Comprehensive Architectural Engineering Senior Project II (4) Continuation of A E 481W. Engineering analysis of building systems; emphasis on analysis and design of building structural, mechanical, lighting/electrical, and construction related systems. Final written report, web-based project portfolio and verbal presentation are required.
Effective: Fall 2005
Prerequisite:

A E 486 Professional Engineering Practice (3) A study of the influences which affect the practice of architectural engineering, particularly codes, ethics, legal considerations, and contract documents.
Effective: Fall 1983
Prerequisite:

A E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

A E 496E Building Electrical and Communication Systems (3) This course addresses specialized topics in building electrical and communications systems that are typically the responsibility of the electrical engineer in a building design firm, including emergency power, coordinator and fault studies, alternate and sustainable power sources, fire alarm systems, voice, video, and data communication systems, and HVAC control systems.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

A E 496F Study of Urbanization in China (3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

A E 496G Building Case Studies (3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

A E 496K International Construction (3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

A E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1993

A E 497D Daylight Analysis of Roman Architecture (3) Developing models of the time dependent loads on building system on the basis of fundamental conservation of energy and heat transfer relationships; energy utilization modeling skills that allow alternative building system designs to be explored.
Effective: Summer 2014 Ending: Summer 2014

A E 497E Building Electrical and Communication Systems (3) This course addresses specialized topics in building electrical and communications systems that are typically the responsibility of the electrical engineer in a building design firm, including: emergency power, coordination and fault studies, alternate and sustainable power sources, fire alarm systems, voice, video, and data communication systems, and HVAC control systems.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

A E 497F Load/Energy Simulation (3) Developing models of the time dependent loads on building system on the basis of fundamental conservation of energy and heat transfer relationships; energy utilization modeling skills that allow alternative building system designs to be explored.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

A E 497G BAE/MAE Capstone Management (1) Project Management for capstone project for students in BAE/MAE integrated program.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

A E 498 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

Effective: Fall 1989
Prerequisite:

A E 530 Computer Modeling of Building Structures (3) Theory and application of structural analysis using the direct stiffness method. Modeling assumptions, validation, interpretation of computer output.
Effective: Summer 2011
Prerequisite:

A E 534 Analysis and Design of Steel Connections (3) Connection analysis and design for steel buildings with an emphasis on the AISC Specification.
Effective: Summer 2005

The Pennsylvania State University
Prerequisite:

A E 536 Stability of Building Structures (3) Elastic and inelastic buckling of beams, beam-columns, frames; applications to design of multi-story buildings.
Effective: Spring 1999
Prerequisite:

A E 537 Building Performance Failures and Forensic Techniques (3) This course provides a background in identification, evaluation, and analysis of a broad set of architectural and structural performance failures.
Effective: Summer 1999
Prerequisite:

A E 538 Earthquake Resistant Design of Buildings (3) Introductory engineering seismology, basic principles of structural dynamics, application of earthquake design provisions of model building codes to design of buildings.
Effective: Spring 2005
Prerequisite:

A E 542 (C E 542) Building Enclosure Science and Design (3) The building enclosure: nature, importance, loadings; building science: control of heat, moisture, air, hygrothermal analysis; design: walls, windows, roofs, joints.
Effective: Summer 2002

A E 543 Research Methods in Architectural Engineering (3) Research skills, critical thinking, academic writing, presentations, use of electronic media, and experimental design applied to AE research topics.
Effective: Spring 2012

A E 551 Combined Heat and Power System Design for Buildings (3) Thermodynamic and thermo-economic analyses methods for determination of optimal, on-site, total energy systems for commercial buildings.
Effective: Fall 2008
Prerequisite:

A E 552 Air Quality in Buildings (3) Indoor air pollutants, their sources and health effects; transport of pollutants; modelling of pollutant concentration in buildings.
Effective: Fall 2007
Prerequisite:

A E 553 Building Energy Analysis (3) Fundamentals of building energy dynamics and the simulation of energy flows in a building; validation of programs; practical applications.
Effective: Fall 2007
Prerequisite:

A E 554 Building Thermal Systems Design and Optimization (3) A study of building thermal comfort systems emphasizing analytical peak and off-peak design performance modeling, simulation, optimization and economics.
Effective: Fall 1989
Prerequisite:

A E 555 Building Automation and Control Systems (3) Advanced techniques in the theoretical analysis and practical design of the automatic comfort controls used in building thermal systems.
Effective: Fall 2011
Prerequisite:

Effective: Fall 2007
Prerequisite:

A E 557 Centralized Cooling Production and Distribution Systems (3) Central cooling plant and distribution components and systems; thermal, hydraulic, and economic modeling for planning and design.
Effective: Fall 2007
Prerequisite:

A E 558 Centralized Heating Production and Distribution Systems (3) Description and analysis of central heating plant and distribution components and systems; thermal and economic modeling for planning and design.
Effective: Fall 2007
Prerequisite:

A E 559 Computational Fluid Dynamics in Building Design (3) Theory and applications of building environmental modeling with Computational Fluid Dynamics (CFD).
Effective: Fall 2007
Prerequisite:

A E 561 Science of Light Sources (3) In-depth scientific principles of light generation in modern electric light sources, and the resultant characteristics that influence their use for buildings.
Effective: Spring 1999
Prerequisite:

A E 562 Luminous Flux Transfer (3) Radiative transfer applied to lighting analysis; methods for computing direct and interreflected illumination; nearfield photometry.
Effective: Spring 2008
Prerequisite:
A E 563 Luminaire Optics (3) Optical design of reflectors and refractors for lighting systems; manufacturing methods. Effective: Spring 1999
Prerequisite:

Prerequisite:

A E 565 Daylighting (3) Design concepts, solar position, sky luminance distribution models, integration of daylighting and electric lighting controls, physical modeling, computer analysis techniques. Effective: Fall 1996
Prerequisite:

A E 569 Research Topics in Illumination Engineering (3) Seminar on prior and current research in illumination engineering which define current recommendations and design practice. Effective: Spring 1999
Prerequisite:

A E 570 Production Management in Construction (3) Applications of production management tools to capital facility projects; theory of production systems in construction; development of production control manual. Effective: Fall 2007
Prerequisite:

A E 571 International Construction Management and Planning (3) Evaluation of international project environments and participants, modeling and planning international projects. Effective: Spring 2005
Prerequisite:

A E 572 Project Development and Delivery Planning (3) Methods employed by owners and developers to initiate capital facility projects; defining project objectives, constraints, participants, financing, and delivery methods. Effective: Summer 2006
Prerequisite:

A E 573 Strategic Management in Construction (3) Analysis tools and principles for design of effective construction organizations’ strategy and structure in various markets. Effective: Spring 2002
Prerequisite:

A E 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

A E 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis. Effective: Spring 1987

A E 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

A E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 1987

A E 597F Virtual Facility Prototyping (3) Computer modeling tools to develop virtual prototypes for building design and construction projects. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

A E 597G Building Information Modeling Execution Planning (3) This course will focus on the skills and information needed to create a building information modeling execution plan for building construction project. Effective: Spring 2015 Ending: Spring 2015 Future: Spring 2015

A E 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 2006

A E 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1993

A E 602 Supervised Experience in College Teaching (1-3 per semester, maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the professional at the Pennsylvania State University.
Effective: Summer 2006

A E 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Summer 2004

Effective: Fall 1983

A E 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 1993

A E 862 Distributed Energy Planning and Management (3) Theories and practices of distributed energy production and management in the context of regional and integrated energy grid structures.
Effective: Summer 2013

A E 868 Commercial Solar Electric Systems (3) Theories and practices of solar electric systems including component selection, performance simulation, grid interconnection, codes, and design documentation.
Effective: Summer 2013

A E 878 Solar Project Development and Finance (3) Economic analysis of solar energy projects, project development process, energy policies, finance methods, and economic analysis tools.
Effective: Summer 2013

A E 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2008

A E 897G BAE/MAE Capstone Project (3) Continuation of A E 481W for students in BAE/MAE integrated program. Engineering analysis of building systems; emphasis on analysis and design of building structural, mechanical, lighting/electrical, and construction related systems. Final written report, web-based project portfolio and verbal presentations are required.

The Pennsylvania State University
Architecture (ARCH)

ARCH 412 Integrative Energy and Environmental Design (3) Concepts and strategies for the environmentally conscious design of the built environment.
Effective: Spring 2013

ARCH 417 The Language of Boundaries in Architecture and the Landscape (3) This course examines the development and significance of boundaries in the construction of human space and time. Students who have taken other courses from Architecture Visual Arts, Geography, or Philosophy that treat some aspect of spatial perception, conception, construction, or visualization, or who have completed equivalent study independently, may enroll with the permission of the program.
Effective: Summer 2009
Prerequisite:

ARCH 431 Architectural Design V (6) Continuation of ARCH 331 and 332, with design and research in program option areas.
Effective: Fall 2011
Prerequisite:

ARCH 431A (IL) Architectural Design V--Foreign Study (6) A studio offered in Rome, Italy, which emphasizes urban planning and architectural design in an urban context.
Effective: Fall 2011
Prerequisite: Concurrent: ARCH 499B and ARCH 499C

ARCH 432 Architectural Design VI (6) A continuation of ARCH 431, this course explores in greater depth urban planning and architectural design in an urban context.
Effective: Fall 2011
Prerequisite:

ARCH 432A (IL) Architectural Design VI--Foreign Study (6) A continuation of ARCH 431, this course explores urban planning and architectural design in an urban context in Rome, Italy.
Effective: Fall 2011
Prerequisite: Concurrent: ARCH 499B and ARCH 499C

ARCH 441 Architectural Design Analysis (3) Studies in principles and elements of design; planning for human use; the relationship of space to physical and social environment. Architectural Engineering majors only.
Effective: Spring 2008
Prerequisite:

ARCH 442 Architectural Design Analysis (3) Continuation of ARCH 441, with emphasis on functional relationship of space, form, structure, and building groups. Architectural Engineering majors only.
Effective: Spring 2008
Prerequisite:

ARCH 443 Architectural Design Analysis Inspection Trip (1) Faculty guided trip to metropolitan areas to investigate noteworthy architecture and building construction and to visit professional offices.
Effective: Spring 2001
Prerequisite:

Effective: Fall 2011
Concurrent: ARCH 491

ARCH 480 Technical Systems Integration (3) Presentations of buildings' analyses from a multiplicity of viewpoints: architectural, spacial, environmental, mechanical, construction assembly.
Effective: Fall 2013
Prerequisite: Concurrent: ARCH 431

ARCH 481 Digital Design Media (3) Advanced course in digital modeling, rendering, animation and non-linear video for architectural investigations.
Effective: Summer 2006
Prerequisite:

ARCH 491 Architectural Design VII-Thesis (6) Problems in architectural planning and design; programming and/or implementation methodologies and applications for various environmental design scales.
Effective: Fall 2011 Ending: Fall 2014
Prerequisite: Concurrent: ARCH 451

ARCH 491 Architectural Design Studio (6-12 per semester/maximum of 12) Problems in architectural planning and design; and/or programming, implementation methodologies and applications for various environmental design scales.
Effective: Spring 2015 Future: Spring 2015
Prerequisite: Concurrent: ARCH 451

ARCH 492H Architectural Design VIII-Thesis (6) Continuation of ARCH 491 with concentration and specialization options.
Effective: Summer 2012 Ending: Fall 2014
ARCH 492H Architectural Design Studio (6) Continuation of select ARCH 491 sections with concentration and specialization options.
Effective: Spring 2015 Future: Spring 2015
Prerequisite: Concurrent: ARCH 480

ARCH 495 Advanced Architectural and Related Design/Construction Work Experience II (1-3 per semester/maximum of 6) Supervised off-campus, nongroup instruction including field experiences, practica, or architectural and related design/construction work experience.
Effective: Fall 2011
Prerequisite:

ARCH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1986

ARCH 496H Independent Study - Honors (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

ARCH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1986

ARCH 497B PARTI* (3) You will be working on your own projects, thinking architecture through germinal drawings and study models, long before form is defined. Monday evenings will be a time for speculation: the hand, the sketch, the diagram, the abstract model, the graphic function, montage & display, layers & series. In addressing your current proposals, you will blur the boundaries between ideas and objects. Our objective: to shorten the distance between thought and the documents that produce and reflect it, an iterative transformation that is a continuum, ideas into things, things into ideas.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ARCH 497C Building Material Reclamation and Recycling (3) This course is a very hands-on, project-based seminar focusing on the theory and practice of building material salvage and recycling. Through active and applied learning, students will gain experience in handling, preserving and adding value to salvaged materials. The course will consist of a variety of small-scale design-build projects, where students will learn and practice the methods and techniques of reclamation and explore the design possibilities of reused material.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ARCH 497D Master Planning (3) Architects, landscape architects, and graphic designers will collaboratively design master plans to examine each discipline’s construction of identity and time.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ARCH 497G Algorithmic Tectonics (3) This course is an introduction to advanced computational techniques for design. Students will learn to write their own computer code for creating and manipulating data, images, and artifacts, extending or bypassing existing software environments. By the end of the course, students will be able to formulate and pursue computational approaches to design exploration, visualization, and fabrication.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ARCH 497G Technology and the Imagination of Design (3) The subject of this seminar is the emergence of technology as a pivotal concept in contemporary design discourses. Through weekly reading, writing, and discussion, we will examine architectural responses - chiefly in technological discourses, design theories, and film - to the so-called computer revolution, cybernetics, information theory, and the linked transformations to the conceptions of nature, work, authorship, and the human. This course is recommended for research students preparing a thesis in Design Computing, or undergraduate students interested in developing a critical understanding of design technologies.

ARCH 498 Special Topics (1-15) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2001

ARCH 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2006
Prerequisite:

ARCH 499A (IL) Foreign Study--Architectural Design VI (6) Individual or group instruction conducted in a foreign country.
Effective: Spring 2007 Ending: Fall 2014
Prerequisite:
Prerequisite: Concurrent: ARCH 499B and ARCH 499C

ARCH 499B (IL) Architectural Analysis (3) Comparative study of architectural elements and building types through on-site drawing, recording, measurement, sketching and decomposition activity. Effective: Fall 2011
Prerequisite: Concurrent: ARCH 431A or ARCH 432A and ARCH 499C

ARCH 499C (IL) Urban Studies Topics (3) A presentation of the history of Rome through the medium of its maps and walking tours of the city. Effective: Fall 2011
Prerequisite: Concurrent: ARCH 431A or ARCH 432A and ARCH 499B

ARCH 499D (IL) Studio (4) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2014 Ending: Summer 2014
Prerequisite:

ARCH 499E (IL) Cartography (2) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2014 Ending: Summer 2014
Prerequisite:

ARCH 499F (IL) Architectural Design--Foreign Study (6) Group instruction conducted in a foreign country. Effective: Summer 2014
Prerequisite:

ARCH 511 Theoretical Perspectives in Architecture (3) The impact of rationalism and romanticism on contemporary developments and theoretical postures in architectural design. Effective: Summer 1992

Prerequisite:

ARCH 520 Methods of Inquiry in Architecture and Urban Design (3) Introduction to the methods of research and inquiry commonly used in architecture and urban design. Effective: Summer 1992

ARCH 536 Design-Inquiry (1-12) Integration of research with the designing of architectural and urban settings. Effective: Fall 1995
Prerequisite:

ARCH 541 Topics in Theory (3) A series of presentations on the development of contemporary architectural theory. Effective: Summer 2002
Prerequisite:

ARCH 542 Topics in Community and Urban Design (3) Community and urban design as an area of design inquiry and interdisciplinary practice. Effective: Summer 2002
Prerequisite:

ARCH 543 Topics in Digital Design (3) Inquiry into digital design paradigms of architecture and related disciplines; exploration design principles and operations supported in digital/virtual design environments. Effective: Summer 2002
Prerequisite:

ARCH 545 Pedagogical Practices in Architectural Education (3) Review and application of pedagogical topics in studio teaching. Comparative evaluation of accepted and experimental practices. Effective: Summer 2010

Prerequisite:

ARCH 550 Ethics in Architecture: Green to Post-Green (3) GREEN to POST-GREEN - Environmental thinking in the Twenty-first Century. Effective: Fall 2014 Future: Fall 2014

ARCH 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Summer 1995

ARCH 591 Architectural Research (2-12) Guided research project. Effective: Winter 1978

The Pennsylvania State University
ARCH 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

ARCH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Fall 1983

ARCH 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2006

ARCH 600 Thesis Research (1-15) No description. Effective: Fall 1983

ARCH 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. Effective: Summer 2007

ARCH 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 1983

ARCH 897 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject. Effective: Spring 2011

Last Import from UCM: May 24, 2014 3:00 AM
Art (ART)

ART 402 Portfolio Design and Professional Practices (3) This course emphasizes the development of presentation skills for digital artists in audience/client interactions.
Effective: Summer 2010
Prerequisite:

ART 405 Advanced Studio Art (3 per semester/maximum of 9) Advanced work in drawing and painting, with an emphasis on individual development.
Effective: Spring 2008
Prerequisite:

ART 409 (ART H 409) Museum Studies (3) An introduction to the professional activities that occur in art museums.
Effective: Summer 2004
Prerequisite:

ART 411 (US) Seminar in Contemporary Art (3 per semester/maximum of 6) Trends in contemporary art investigated within the framework of studio visitations, museum tours, and through other related avenues of encounter.
Effective: Fall 2006
Prerequisite:

ART 413 Performance Art (3) The development, production, and presentation of performance art works, and the study of performance art theory and history.
Effective: Spring 2000
Prerequisite:

ART 415 Integrating Media: Convergence in Practice (4 per semester/maximum of 12) A studio course concentrating on the integration of new media technologies in contemporary art practice.
Effective: Fall 2006
Prerequisite:

ART 416 Advanced Web and Net Art: Multimedia Publishing (4 per semester/maximum of 12) A studio course concentrating on multimedia online "net art" practice and Web publishing.
Effective: Spring 2008
Prerequisite:

ART 417 Metal Art/Technology III (4 per semester/maximum of 12) Advanced exploration of current and emerging metal art technologies and processes as medium for conceptual, aesthetic, and functional artworks.
Effective: Spring 2005
Prerequisite:

ART 419 Advanced New Media: Capstone (4 per semester/maximum of 8) A new media and digital arts capstone course concentrating on the integration of art and technology in advanced thesis projects.
Effective: Summer 2007
Prerequisite:

ART 421 Drawing (4 per semester/maximum of 12) Drawing for advanced students, with total emphasis on sustained individual approaches.
Effective: Summer 1992
Prerequisite:

ART 422 Advanced Figure Drawing (4 per semester/maximum of 8) Concentrated work in recording and understanding the human figure.
Effective: Fall 1998
Prerequisite:

ART 430 Advanced Sculpture (4 per semester/maximum of 12) Advanced work in sculpture, with an emphasis on individual development.
Effective: Summer 1992
Prerequisite:

ART 431 Installation Art (4) Study and production of original visual statements through installation work as an art form.
Effective: Spring 1998
Prerequisite:

ART 440 Advanced Printmaking (4 per semester/maximum of 12) Individual projects in one or more of the printmaking processes. Emphasis is on developing a portfolio of prints.
Effective: Fall 1998
Prerequisite:

ART 446 Artists Books (4) Study and production of original visual statements through the book as an art form.
Effective: Spring 2009
Prerequisite:

ART 447 Photo Based Printmaking (4) Study and production of original visual statements through photographic based printmaking as an art form.
Effective: Spring 2000
Prerequisite:
ART 450 Advanced Painting (4 per semester/maximum of 12) Development of the artist through a series of commitments; each semester serves as a contractual agreement along professional lines.
Effective: Summer 1992
Prerequisite:

ART 455 Advanced Painting Critique (4 per semester/maximum of 8) The painter in relation to his peers and his profession.
Effective: Fall 1983
Prerequisite:

ART 465 Individual Approaches I (3) An advance studio where students are expected to explore personal themes and individual concepts in their art work.
Effective: Spring 2007
Prerequisite:

ART 466W Individual Approaches II (6) An advance studio/lecture addressing the preparation for potential employment and/or entrance into graduate studies.
Effective: Summer 2007
Prerequisite:

ART 468 The Intermediate Digital Medium (3) An advanced studio course using the computer as an artistic media.
Effective: Spring 2007
Prerequisite:

ART 469 Methods and Materials II (3 per semester/maximum of 9) A studio course that focuses on specific media or techniques reflecting varied faculty expertise.
Effective: Spring 2007
Prerequisite:

ART 475 (US) (ART H 475) Contemporary Women Artists (3) An interdisciplinary course that investigates women artists who were integral to the production of contemporary art primarily in the Americas, Europe, and Asia.
Effective: Spring 2009
Prerequisite:

ART 476 (ART H 476) History and Theory of Digital Art (3) History and theories of contemporary digital art emphasizing humanistic approaches to technology.
Effective: Spring 2007
Prerequisite:

ART 480 Advanced Ceramic Arts (4 per semester/maximum of 12) Individual exploration of ceramic materials and construction leading to graduate study or career development as a professional potter.
Effective: Summer 1992
Prerequisite:

ART 481 Ceramic Materials and Glaze Calculation (3) The study of raw materials and their use in formulating clays and glazes.
Effective: Fall 2006
Prerequisite:

ART 490 View Camera Photography (4) Experience with diverse camera formats and applications; particular emphasis on view camera.
Effective: Summer 2002
Prerequisite:

ART 494H Research Projects Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2012

ART 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1995
Prerequisite:

ART 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

ART 496H Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012

ART 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

ART 497A 3D Digital Arts II (4) This studio course provides advanced students with an enviroment within which to work
on computer animated projects using 3D software.
Effective: Fall 2014 Ending: Fall 2014

ART 497B Ceramic Sculpture (4) Explore the inexhaustible expressive potential of clay as a contemporary sculptural medium. The porous boundary between Sculpture and Ceramics is articulated and challenged via discussion and production.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ART 497B Compositing in 3D (4) This course covers intermediate to advanced 3D compositing techniques like color correction, render pass and post effects for 3D video.

ART 497C Functional Pottery (4) Designed to address the potential for handmade pottery to define culture. Food, readings and pottery making set the stage where theoretical dissection and informed hands-on making of dishes will take place.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ART 497D Art & Life: Where They Intersect (3) The connection between life and art will be explored from both a personal and cultural perspective. Taking risks is expected.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ART 497E Advanced Metal Casting and Mold Making (4) Advanced development of technical and conceptual skills through casting and mold making processes.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ART 497F D.I.Y. Digital Fabrication (4) Participants in this course will work collaboratively to build and utilize robust Digital Fabrication tools from open source hardware plans. Laser cutting and 3D printing will be explored in depth.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ART 497G Words and Images: Artists and Writers Collaborate (3) This collaborative course is designed for visual arts and creative writing students. The student will consider the artist's book as a form and locate it within the broader context of contemporary writing and visual art. Students will collaborate with others outside of their home college, through the process of combining text and image to construct an artist's book. A broad range of historical, conceptual and theoretical approaches to the artist's book as a genre will be explored.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ART 499 (IL) Foreign Studies--Art (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

ART 501 Art Research (2-6) Original study and practice in art relating to material, concept, or technique.
Effective: Winter 1978

ART 505 Graduate Seminar (2 per semester, maximum of 8) Seminar covering special topics at the graduate level, emphasizing interdisciplinary discourse including criticism and review of graduate work.
Effective: Summer 1999

ART 511 Issues in Contemporary Art (1-3 per semester, maximum of 6) A critical survey of issues in contemporary art.
Effective: Summer 1999

ART 515 New Media Art I (1-7 per semester/maximum of 14) Individual problems in new media arts practice leading to development of a body of work representative of the artist.
Effective: Spring 2008

ART 516 New Media Art II (1-7 per semester/maximum of 14) Individual problems in new media arts practice leading to development of a body of work representative of the artist.
Effective: Spring 2008
Prerequisite:

ART 530 Sculpture I (1-7 per semester/maximum of 14) Individual problems in sculpture leading to the development of a collection or body of work representative of the artist.
Effective: Spring 2000

ART 531 Sculpture II (1-7 per semester, maximum of 14) Individual problems in sculpture leading to the resolution of a collection or body of work representative of the artist.
Effective: Summer 1999
Prerequisite:
ART 545 Printmaking I (1-7 per semester/maximum of 14) Individual problems in printmaking leading to the development of a collection or body of work representative of the artist.
Effective: Spring 2000

ART 546 Printmaking II (1-7 per semester, maximum of 14) Individual problems in printmaking leading to the resolution of a collection or body of work representative of the artist.
Effective: Summer 1999
Prerequisite: ART 550 Painting I (1-7 per semester/maximum of 14) Individual problems in painting leading to the development of a collection or body of work representative of the artist.
Effective: Spring 2000

ART 550 Painting I (1-7 per semester/maximum of 14) Individual problems in painting leading to the development of a collection or body of work representative of the artist.
Effective: Spring 2000

ART 551 Painting II (1-7 per semester, maximum of 14) Individual problems in painting leading to the resolution of a collection or body of work representative of the artist.
Effective: Summer 1999
Prerequisite: ART 570 Graphic Design I (1-7 per semester/maximum of 14) Individual projects in design with special emphasis on specialized topics of graphic design.
Effective: Spring 2000

ART 570 Graphic Design I (1-7 per semester/maximum of 14) Individual projects in design with special emphasis on special topics of graphic design.
Effective: Spring 2000

ART 571 Graphic Design II (1-7 per semester, maximum of 14) Individual problems in design, with special emphasis on professional practice in the area of graphic design.
Effective: Summer 1999
Prerequisite: ART 580 Ceramics I (1-7 per semester/maximum of 14) Individual problems in ceramics leading to the development of a collection or body of work representative of the artist.
Effective: Spring 2000

ART 580 Ceramics I (1-7 per semester/maximum of 14) Individual problems in ceramics leading to the development of a collection or body of work representative of the artist.
Effective: Spring 2000

ART 581 Ceramics II (1-7 per semester, maximum of 14) Individual problems in ceramics leading to the resolution of a collection or body of work representative of the artist.
Effective: Summer 1999
Prerequisite: ART 592 Photography I (1-7 per semester/maximum of 14) Individual problems in photography leading to the development of a body of specialized work representative of the artist.
Effective: Spring 2000
Prerequisite: ART 593 Photography II (1-7 per semester, maximum of 14) Individual problems in photography leading to the resolution of a collection or body of work representative of the artist.
Effective: Summer 1999
Prerequisite: ART 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1988

ART 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1999

ART 600 Thesis Research (1-15) No description.
Effective: Fall 1983

ART 602 Supervised Experience and College Teaching (1-3 per semester/maximum of 6) Supervised and graded teaching experience.
Effective: Spring 1990

ART 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Art Education (A ED)

A ED 401 Curricula, Pedagogy, and Assessment in Art Education (3) Preparation of curricula, pedagogical, and assessment strategies for elementary/secondary school and museum art education programs. Effective: Summer 2002
Prerequisite:

A ED 440 Cultural Institutions (3) Role of the educator and educational programming in museums and other cultural institutions. Effective: Spring 2003
Prerequisite:

A ED 488 Cultural Institutions Practicum (1-3) Supervised field experience in a museum or other cultural institution, including planning, implementation, and evaluation of an educational project. Effective: Summer 2002
Prerequisite: Concurrent: A ED 490

A ED 489 Advanced Practicum (3) Supervised observation, unit planning, and teaching in Saturday Morning Arts School: analysis of creative expressions and art programs for learners. Effective: Spring 2003
Prerequisite: Concurrent: A ED 490

A ED 490 Capstone Course in Art Education (3) Synthesis of preservice art education coursework; introduction to professional practices and standards; completion of teaching and learning portfolio. Effective: Spring 2009
Prerequisite: Concurrent: A ED 489 majors in the Schools option

A ED 494 Schools and Museums (3) Museum education: issues, theories of aesthetic education and practices in schools, museums, and community art centers. Effective: Winter 1978
Prerequisite:

A ED 494H Schools and Museums (3) Museum education: issues, theories of aesthetic education and practices in schools, museums, and community art centers. Effective: Fall 2007
Prerequisite:

A ED 495 Internship in Art Experiences (15) Comprehensive instruction in craft, health, cultural, museum, studio, gallery or social agency. Students supervised by University personnel and arts personnel. Effective: Spring 1989
Prerequisite:

A ED 495A Art Education Student Teaching Practicum (7) The elementary student teaching practicum fulfills requirements for Pennsylvania certification to teach Art in both elementary and secondary schools. Effective: Summer 2006
Prerequisite: Concurrent: A ED 495B

A ED 495B Art Education Student Teaching Practicum (8) The secondary student teaching practicum fulfills requirements for Pennsylvania certification to teach Art in both elementary and secondary schools. Effective: Summer 2006
Prerequisite: Concurrent: A ED 495A

A ED 495C Art Education Student Teaching Practicum (7) The elementary student teaching practicum fulfills requirements for Pennsylvania certification to teach Art in both elementary and secondary schools. Effective: Summer 2006
Prerequisite: Concurrent: A ED 495D

A ED 495D Art Education Student Teaching Practicum (8) The secondary student teaching practicum fulfills requirements for Pennsylvania certification to teach Art in both elementary and secondary schools. Effective: Summer 2006
Prerequisite: Concurrent: A ED 495A

A ED 495E Internship in Museums and Cultural Institutions (15) Twelve week, full time supervised internship in education in museums or other cultural institutions. Effective: Summer 2006
Prerequisite:

A ED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

A ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

A ED 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

The Pennsylvania State University
A ED 502 Research in Art Education (3) Examination of past and present research in art education, an introduction to general methods of research, and critical evaluation of research in art education. Effective: Summer 1995

A ED 505 Foundations of Art Education (3) An examination of classic theories in art education and their relevance to current developments. Effective: Summer 1987

Prerequisite:

A ED 541 Theories of Child Art (3) Study of current theories of child art; application of recent psychological and anthropological theories to understanding child art. Effective: Winter 1978

Prerequisite:

A ED 570 Artistic Creation and Theories of Knowing (3) A thematically organized course that makes connections between art-making and art as a way of knowing and inquiry. Effective: Spring 1995

A ED 588 History of Art Education (3) Historical development of philosophies in art education in the United States and abroad. Effective: Winter 1978

A ED 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

A ED 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 1995

A ED 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Fall 1995

A ED 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1995

A ED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 1995

A ED 597A Professional Development Summer Institute (3) Graduate-level course focuses on intersections between contemporary art and curriculum. Innovative instructional approach includes intensive one-week, on-campus experience and on-line correspondence. Students enrolled must attend the Summer Institute on Contemporary Art at the Palmer Museum June 24-28, 2014. Effective: Summer 2014 Ending: Summer 2014

Prerequisite:

A ED 597A The Performance and Practice of Research (3) This course examines the trans-disciplinary theories and practices of the field of Performance Studies and their multiple intersections with research and practice in art education. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

A ED 597B (WMNST 597B) Including Difference (3) Including Difference invites a dynamic exchange regarding a broad spectrum of learners, designed to counteract marginalization, exclusion, and circumscribed opportunities. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

A ED 600 Thesis Research (1-15) No description. Effective: Fall 1983

A ED 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 1983
A ED 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching of undergraduate art education classes under the supervision of two members of the graduate faculty.
Effective: Fall 1983
Prerequisite:

A ED 603 **Foreign Academic Experience** (1-12) Foreign study and/or research approved by the graduate program for students enrolled in a foreign university constituting progress toward the degree.
Effective: Fall 2003

A ED 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

A ED 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

A ED 811 **New Media and Pedagogy** (3) Exploration of relationships between communication technologies and beliefs about the nature of knowledge and the nature of art.
Effective: Summer 2010

Effective: Summer 2010

A ED 813 **Public Pedagogy** (3) Inquiry into the public pedagogy of contemporary visual culture for relevancy to museum and K-12 art education contexts.
Effective: Summer 2010

A ED 814 **Informal Learning** (3) Pedagogy and contexts for learning in museums and other cultural institutions.
Effective: Summer 2010

A ED 815 **Action Research in Art Education** (3) Develop a reflective process to improve strategies, practices, and knowledge of the environments within which art education is practiced.
Effective: Summer 2010

Last Import from UCM: May 24, 2014 3:00 AM
Art History (ART H)

ART H 401 (IL) Greek Art and Architecture (3-9) Developments in Greek art and architecture, tenth century B.C. to first century B.C.; emphasis on the importance of Greek sanctuaries.
Effective: Spring 2006
Prerequisite:

ART H 402 (IL) The Illuminated Manuscript (3) Specific stylistic periods in manuscript painting from A.D. 500-1500 in Western Europe and Byzantium.
Effective: Spring 2006
Prerequisite:

ART H 405 (US;IL) Pioneers of Modern Architecture (3 per semester/maximum of 6) Selected period or theme in the development of modern architecture during the nineteenth and/or early twentieth centuries.
Effective: Spring 2006
Prerequisite:

ART H 409 (ART 409) Museum Studies (3) An introduction to the professional activities that occur in art museums.
Effective: Summer 2004
Prerequisite:

ART H 410 Taste and Criticism in Art (3) History and literature of art criticism demonstrating the varied philosophic, cultural, iconographic, technical, and visual approaches.
Effective: Summer 1999
Prerequisite:

ART H 411 (IL) Roman Art (3-9) Roman sculpture and painting from Augustus to Constantine.
Effective: Spring 2006
Prerequisite:

ART H 412 (IL) The Gothic Cathedral (3) Specific aspects of Romanesque and Gothic church architecture of western Europe, especially France and England, between 1000-1500.
Effective: Spring 2006
Prerequisite:

ART H 413 Architecture of the Medieval Monastery (3) This course will examine design, construction, function and symbolism in the monastic architecture of Western Europe during the Middle Ages.
Effective: Spring 2013
Prerequisite:

ART H 414 (IL) Italian Baroque Painting (3) Survey of Italian Baroque painting from sixteenth-century proto-Baroque masters to painters of the late Baroque and Rococo periods.
Effective: Spring 2006
Prerequisite:

ART H 415 (US) The Skyscraper (3) Origin and evolution of the skyscraper as seen against the background of cultural conditions and technological factors.
Effective: Spring 2006
Prerequisite:

ART H 416 (US) Studies in American Art (3 per semester/maximum of 6) Selected time periods and/or issues in the art of the United States.
Effective: Fall 2013
Prerequisite:

ART H 420 (IL) Russian Architecture (3) Russian architecture from the first Orthodox churches of the late tenth century to the end of the Soviet Union.
Effective: Spring 2006
Prerequisite:

ART H 422 (IL) Studies in Medieval Sculpture (3-9) Specific studies of western European sculpture, 300-1500, with attention to sources, styles, type, and iconography.
Effective: Spring 2006
Prerequisite:

ART H 423 (IL) Studies in Italian Renaissance Art (3-9) Specific studies of Italian Renaissance art, including the work of artists such as Leonardo da Vinci, Michelangelo, and Raphael.
Effective: Spring 2006
Prerequisite:

ART H 424 (IL) Masters of Northern Baroque Art (3) Seventeenth-century painters in Flanders and Holland, including the works of artists such as Rubens, Rembrandt, and Vermeer.
Effective: Spring 2006
Prerequisite:

ART H 425 (IL) Topics in Northern Renaissance Art (3 per semester/maximum of 6) Focuses on a topic of interest in Netherlandish and/or German art between 1300 and 1600.
Effective: Spring 2014

The Pennsylvania State University
ART H 426 (US;IL) Iconoclasm: Powerful Images and their Destruction (3) Iconoclasm: exploring the political, religious, and social motivations behind the destruction of powerful imagery throughout history. Effective: Summer 2009
Prerequisite:

ART H 427 (IL) Topics in Global Artistic Communication (3 per semester/maximum of 6) Explores a specific time period in art history cross-culturally in Europe, Asia, Africa, and/or the Americas. Effective: Summer 2014
Prerequisite:

ART H 429 (IL) Studies in Baroque Art (3) Selected topics in the painting, sculpture, and architecture of seventeenth-century Italy, France, Flanders, Holland, and Spain. Effective: Spring 2009
Prerequisite:

ART H 435 (IL) Studies in Modern Art (3-6) Lectures focusing on a selected movement of nineteenth- or twentieth-century art. Effective: Spring 2006
Prerequisite:

ART H 440 (IL) (ASIA 440) Monuments of Asia (3-9 per semester/maximum of 9) An exploration of major Asian sites and monuments through a focus on their historical and cultural significance. Effective: Summer 2012
Prerequisite:

ART H 442 (IL) Late Antique and Early Christian Art (3) Survey of the architecture, painting, and minor arts of Christian society from the beginning to the mid-sixth century. Effective: Spring 2006
Prerequisite:

ART H 445 (IL) Oceanic Art (3) Survey of the arts of Oceania (Polynesia, Micronesia, Melanesia), including masks, sculpture, textiles, architecture and other art forms. Effective: Summer 2012
Prerequisite:

ART H 446 (IL) (AFR 446) Topics in African Art (3 per semester/maximum of 9) Topics vary from “Arts of Eastern and Southern Africa” to “Arts of West Africa.” Effective: Spring 2014
Prerequisite:

ART H 447 (IL) (AFR 447) Topics in the Art of the African Diaspora (3 per semester/maximum of 6) Selected topics in arts of the African Diaspora (South America, Caribbean, USA) including masquerades, textiles, architecture and other art forms. Effective: Spring 2014
Prerequisite:

ART H 450 (US;IL) The History of Photography (3) The history of photography from 1839, with particular emphasis on the relationship with the plastic arts. Effective: Spring 2006
Prerequisite:

ART H 452 (IL) Byzantine Art (3) Monumental and minor arts of Byzantium and related areas from the reign of Justinian to the Turkish conquest of Constantinople. Effective: Spring 2006
Prerequisite:

ART H 456 (IL) Renaissance and Baroque Palaces (3) This course examines palace architecture and decoration in Italy, France, England, and Germany from 1450-1700. Effective: Spring 2011
Prerequisite:

ART H 458 (IL) Baroque Capitals of Europe (3) This course examines the architecture and urbanism of European capital cities from 1600-1800. Effective: Spring 2010
Prerequisite:

ART H 460 (IL) Art and Empire: Aztec, Inca and Spanish (3) This course is a comparative study of the artistic production used in Aztec, Inca and Spanish empires. Effective: Summer 2012
Prerequisite:

ART H 462 (IL) Studies in Latin American Art (3 per semester/maximum of 6) Specific studies of the visual and material culture created in Latin America from the colonial through the modern era. Effective: Summer 2012
Prerequisite:

ART H 464 (IL) French Baroque Painting (3) Examination of seventeenth-century French painting, including Italian influences; the provincial, Classical, and official styles in France. Effective: Spring 2006
Prerequisite:

ART H 470 **Contemporary Art** (3 per semester/maximum of 9) A focused investigation of a special topic relating to art made after 1940. 
Effective: Fall 2013 
Prerequisite:

ART H 475 (US) (ART 475) **Contemporary Women Artists** (3) An interdisciplinary course that investigates women artists who are integral to the production of contemporary art primarily in the Americas, Europe, and Asia. 
Effective: Spring 2009 
Prerequisite:

ART H 476 (ART 476) **History and Theory of Digital Art** (3) History and theories of contemporary digital art emphasizing humanistic approaches to technology. 
Effective: Spring 2007 
Prerequisite:

ART H 494H **Research Projects - Honors** (1-12 per semester/maximum of 12) Supervised student activities on research projects identified on an individual or small group basis. 
Effective: Spring 2012 

ART H 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written or oral critique of activity required. 
Effective: Fall 2012 

ART H 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Fall 1983 

ART H 496A **Pop Art and Its Legacies** (1-6) This course examines the origins of pop art, its international reception, and its legacies in contemporary art. 
Effective: Summer 2014 Ending: Summer 2014 
Prerequisite:

ART H 496H **Independent Studies - Honors** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Spring 2012 

ART H 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. 
Effective: Fall 1983 

ART H 497A **Italian Renaissance Architecture** (3) This course provides a survey of architecture in Italy during the Renaissance (1400-1600). It will examine the work of major figures, such as Brunelleschi, Alberti, Bramante, Michelangelo, and Palladio. The urbanism of Rome, Florence, Venice, and Naples will also be examined. 
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014 
Prerequisite:

ART H 497B **History of Prints and Printmaking** (3) This course examines the history of prints and printmaking, focusing primarily, but not exclusively, on the development and significance of various print mediums in Europe and the United States from the fifteenth through the twentieth centuries. Class lectures are supported by numerous visits to the Palmer Museum of Art’s print room to view first hand many of the objects discussed in the course. 
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014 
Prerequisite:

ART H 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. 
Effective: Fall 1992 

ART H 499 (IL) **Foreign Study--Art History** (1-12) Courses offered in foreign countries by individual or group instruction. 
Effective: Summer 2005 

ART H 511 **Seminar in Ancient Art** (3-12) Selected topics from the history of Greek and Roman art. 
Effective: Fall 1983 

ART H 512 **Seminar in Medieval Art** (3-12) Original research into problems dealing with the art of the Middle Ages. 
Effective: Fall 1983 

ART H 513 **Seminar in Renaissance Art** (3-12) Investigations in the area of Renaissance art, centering around major masters and monuments. 
Effective: Winter 1978
ART H 514 Seminar in Baroque Art (3-12) Investigations in the area of baroque art, centering around major masters and monuments. Effective: Winter 1978

ART H 515 Seminar in Modern Art (3-12) Lectures, readings, reports, and discussions in the field of modern art. Effective: Winter 1978

ART H 522 Seminar in Byzantine Art (3-12) Specific iconographical and stylistic problems in Byzantine art and its relation to classical antiquity, the medieval West, and Islam. Effective: Winter 1978

ART H 525 Seminar in Modern Architecture (3-12) Investigation into the works and problems of modern architecture as they relate to the culture of our times. Effective: Winter 1978

ART H 551 Historiography of Art History (1-6) The relationship between the definition of, and approach to, art-historical problems from Vasari to the present. Effective: Winter 1978

ART H 552 Problems in Connoisseurship (3) A study of the problems of authenticating, attributing, and dating paintings and sculpture through internal evidence. Effective: Winter 1978

ART H 560 Methods of Research in Art History (3) Preparation of graduate students for professional careers in academia and museum work, involving creation of publishable articles and grant writing. Effective: Summer 2013

ART H 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

ART H 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 1987

ART H 597A Idolatrous Worlds: Analyzing Materialized Sacrality in the Early Modern Atlantic Context (3) This course analyzes the concept of "idolatry" in the trans Atlantic early modern world as European powers conquered and then colonized great expenses of the American continents. We will examine the roll of images in these complex cultural encounters and their protracted aftermaths. To do so, we will read both primary and secondary source material from the Old World and the New to more fully appreciate how sacred images (crucifixes, Marian icons, etc.) were deployed and employed in the creation of a hybridized Latin America. To being, we will briefly trace Catholic understandings of the power, function, and appropriate veneration of sacred images, in both the western and eastern traditions, from early Christianity through the Counter Reformation. We will then examine how Pre-Columbian Amerindian cultures, such as the Axtecs and the Mayas, relied on visual artifacts in the context of various religious rites. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ART H 600 Thesis Research (1-15) No description. Effective: Fall 1983

ART H 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 1983

ART H 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience for teaching assistants in art history. Effective: Fall 1983

ART H 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 1983
Asian Studies (ASIA)

ASIA 401 East Asian Studies (3-6) An interdisciplinary, variable content, lecture-discussion course on the history, culture, politics, and international relations of China, Japan, and Korea. Effective: Spring 2010
Prerequisite:

ASIA 404 (IL) (CMLIT 404) Topics in Asian Literature (3) Selected works from the major poetry, fiction, and drama of such countries as India, China, Japan. Effective: Fall 2010
Prerequisite:

ASIA 404Y (IL) Topics in Asian Literature (3) Selected works from the major poetry, fiction, and drama of such countries as India, China, Japan, taught with focus on written analysis and interpretation. Effective: Summer 2013

ASIA 405 Seminar in Asian Studies (3-6 per semester/maximum of 6) Advanced seminar in Asian Studies. Effective: Summer 2013
Prerequisite:

ASIA 405Y (IL) Seminar in Asian Studies (3-6 per semester/maximum of 6) An advanced, writing-focused seminar in Asian Studies. Effective: Fall 2009
Prerequisite:

ASIA 440 (IL) (ART H 440) Monuments of Asia (3-9 per semester/maximum of 9) An exploration of major Asian sites and monuments through a focus on their historical and cultural significance. Effective: Summer 2012
Prerequisite:

ASIA 469 (IL) (PL SC 469) Government and Politics of South Asia (3) This course offers an overview of the politics of modern South Asia with specific focus on Afghanistan, India and Pakistan. Effective: Summer 2014
Prerequisite:

Prerequisite:

ASIA 475Y (IL) (HIST 475Y) The Making and Emergence of Modern India (3) India's transition to social, economic, and political modernity through the experience of British colonial rule and the nationalist struggle. Effective: Spring 2015 Future: Spring 2015
Prerequisite:

ASIA 476 (IL) (HIST 476) Technology & Society in Modern Asia (3) Role of technology in modernization, national identity, and foreign relations of an Asian country from 19th century to present day. Effective: Summer 2014
Prerequisite:

ASIA 480 (IL) (HIST 480) Japan in the Age of Warriors (3) An overview of Japan from the 10th to 17th century, a period of political decentralization, cultural efflorescence, and social change. Effective: Fall 2014 Future: Fall 2014

ASIA 481 (IL) (HIST 481) Modern Japan Since 1800 (3) The transformation of Japan from a relatively isolated, agricultural nation into a highly industrialized world power. Effective: Fall 2014 Future: Fall 2014
Prerequisite:

ASIA 482 (CHNS 424, HIST 482) Confucius and the Great Books of Early China (3) This course familiarizes students with the critical texts and intellectual cultures of Warring States and early imperial China. Effective: Fall 2014 Future: Fall 2014
Prerequisite:

ASIA 483 (IL) (HIST 483) Middle China (3) The social, political, and cultural issues and developments from the 8th to 16th century. Effective: Spring 2015 Future: Spring 2015
Prerequisite:

ASIA 484Y (IL) (HIST 484Y) History of Chinese Thought (3) A study of the dynamic historical development of Chinese thought with its diverse expressions from antiquity to the present. Effective: Fall 2014 Future: Fall 2014
Prerequisite:

ASIA 485Y (IL) (HIST 485Y) China's Last Empire: The Qing Dynasty, 1644-1911 (3) China from 1644 founding of Qing dynasty to 1911 fall; Chinese society and institutions, imperialism and China's internal diversity. Effective: Fall 2014 Future: Fall 2014

The Pennsylvania State University
Prerequisite:

ASIA 486 (IL) (HIST 486) China in Revolution (3) China from 1900 to the present; nationalism, cultural change; development of communism.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

ASIA 489 (IL) (HIST 489, PL SC 486) International Culture in East Asia (3) Study of the role of culture in East Asian regional and East-West international relations.
Effective: Summer 2013
Prerequisite:

ASIA 493 (IL) (HIST 493) Japan in the World (3) Study of Japan's foreign relations and position in the international community from the early 19th century to the present.
Effective: Spring 2015 Future: Spring 2015
Prerequisite:

ASIA 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2010

ASIA 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2010

ASIA 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2010

ASIA 501 Proseminar in Asian Studies I (1-3) A seminar for graduate students in the Asian Studies dual-degree PhD programs.
Effective: Summer 2009

ASIA 502 Proseminar in Asian Studies II (1-3) Introduction to theories, methods, and disciplines of Asian Studies.
Effective: Fall 2009

ASIA 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2009

ASIA 595 Internship (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2009

ASIA 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2009

ASIA 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2009

ASIA 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2009

ASIA 600 Thesis Research (1-15 per semester/maximum of 99) No description.
Effective: Summer 2009

Last Import from UCM: May 24, 2014 3:00 AM
Astrobiology (ABIOL)

ABIOL 570 Astrobiology Field Experience (2) Geological field excursions to sites where the early evolution of life and the environment is revealed and to modern analogues. 
Effective: Summer 2004

ABIOL 574 Planetary Habitability (3) Aspects of star and planet formation, habitable zones, biospheric evolution, life in extreme environments, planet and life detection. 
Effective: Summer 2004

ABIOL 590 Astrobiology Seminar (2) Student-led presentations and discussions of current and classic literatures relevant to the themes of Astrobiology. 
Effective: Summer 2004

ABIOL 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. 
Effective: Summer 2005

Last Import from UCM: May 24, 2014 3:00 AM
Astronomy and Astrophysics (ASTRO)

ASTRO 400H Honors Seminar (1 per semester, maximum of 2) Presentations of various branches and modes of modern astrophysical research, based on lectures, visits to telescopes and facilities, and discussions.
Effective: Spring 2003
Prerequisite:

ASTRO 401 Fundamentals of Planetary Science and Astronomy (4) Overview of the techniques used and results from studies of the Solar System, stars, and galaxies.
Effective: Summer 2013
Prerequisite:

ASTRO 402 Astronomical Telescopes, Techniques, and Data Analysis (3) Properties and use of optical telescopes, imaging and spectroscopy, multi-wavelength techniques, data analysis and statistics, practical research methods.
Effective: Summer 2013
Prerequisite:

ASTRO 410 Computational Astrophysics (3) Applications of numerical methods and computer programming to astrophysics, including stellar physics and cosmology.
Effective: Spring 2008
Prerequisite:

ASTRO 414 Stellar Structure and Evolution (3) Theory of Stellar structure and evolution including energy generation and transport and an examination of stellar models.
Effective: Summer 2010
Prerequisite:

ASTRO 420W Planets and Planetary System Formation (3) Solar system properties, star formation, protoplanetary disks and planet formation, solar system model, extrasolar planets, and astrobiology.
Effective: Summer 2004
Prerequisite:

ASTRO 440 Introduction to Astrophysics (3) Theoretical investigation of physical processes in astronomical objects and systems; modern physical interpretation of astronomical phenomena.
Effective: Spring 1994
Prerequisite:

ASTRO 451 Astronomical Techniques (3) Practical methods of modern observational astronomy, detectors, filters, instrumentation for both ground-based and space observations, and data analysis.
Effective: Fall 2008
Prerequisite:

ASTRO 475W Stars and Galaxies (3) Astronomical studies concerning the distribution and evolution of stars and gas in our and other galaxies.
Effective: Fall 1993
Prerequisite:

ASTRO 480 Nebulae, Galaxies, and Cosmology (3) Emission-line spectroscopy, structure and evolution of galaxies, physics of galactic nuclei and quasars, observational cosmology.
Effective: Spring 2002
Prerequisite:

ASTRO 485 Introduction to High-Energy Astronomy (3) The study of black holes, neutron stars, white dwarfs, supernova remnants, and extragalactic objects through x-ray and gamma ray observations.
Effective: Spring 1994
Prerequisite:

ASTRO 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1991

ASTRO 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1991

ASTRO 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

ASTRO 501 Fundamental Astronomy (3) Concepts, tools and techniques, and essential background in stellar, Galactic, extragalactic astronomy and cosmology.
Effective: Fall 2008

ASTRO 502 Fundamental Astrophysics (3) Fundamental tools and results of modern astrophysical theory. Gravitation; gas dynamics; radiation processes; radiative transfer; atomic structure and transitions.

The Pennsylvania State University
ASTRO 504 **Extragalactic Astronomy** (3) Properties and evolution of galaxies including their stellar, interstellar, black hole and Dark Matter components.
Effective: Fall 2008
Prerequisite:

ASTRO 513 **Observational Techniques in Astronomy** (3) Theoretical and practical aspects of modern multiwavelength observational astrophysics including detector physics, imaging techniques, spectroscopic techniques, and data analysis principles.
Effective: Spring 2008
Prerequisite:

ASTRO 527 (PHYS 527) **Computational Physics and Astrophysics** (3) Introduction to numerical methods for modeling physical phenomena in condensed matter, atomic and high energy physics, gravitation, cosmology and astrophysics.
Effective: Fall 2008

ASTRO 530 **Stellar Atmospheres** (3) The structure, physics and observational manifestations of atmospheres of stars.
Effective: Fall 2008
Prerequisite:

ASTRO 534 **Stellar Structure and Evolution** (3) Physics of stellar interiors, stellar structure, and evolutionary changes of stars from pre-main sequence through final states.
Effective: Fall 2008
Prerequisite:

ASTRO 542 **Interstellar Medium and Star Formation** (3) Theory and observation of the interstellar medium of our Galaxy and the process of star and planet formation.
Effective: Spring 2012

ASTRO 545 (PHYS 545) **Cosmology** (3) Modern cosmology of the early universe, including inflation, the cosmic microwave background, nucleosynthesis, dark matter and energy.
Effective: Spring 2005

ASTRO 550 **High Energy Astrophysics** (3) Theory and observations of X-rays, gamma-rays and other high energy radiation from Galactic and extragalactic sources.
Effective: Spring 2013

ASTRO 585 **Topics in Astronomy and Astrophysics** (3) Advanced study of issues in planetary, stellar, galactic, extragalactic and theoretical astronomy and astrophysics.
Effective: Summer 2008
Prerequisite:

ASTRO 589 **Seminar in Current Astronomical Research** (1) Contemporary issues in instrumental, observational and theoretical astronomy and astrophysics.
Effective: Summer 2008
Prerequisite:

ASTRO 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1991

ASTRO 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1991

ASTRO 597 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1991

ASTRO 600 **Thesis Research** (1-15) No description.
Effective: Summer 1991

ASTRO 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 1991

ASTRO 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description.
Effective: Summer 1991

ASTRO 610 **Thesis Research Off Campus** (1-15) No description.
ASTRO 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 1991

ASTRO 801 Planets, Stars, Galaxies, and the Universe (3) Overview of the structure, formation, and evolution of planets, stars, galaxies, and the universe.
Effective: Summer 2008

ASTRO 897 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2007

ASTRO 897A The Origins and Fate of Our Cosmos: Understanding Big-Bang Cosmology (2) This workshop will introduce cosmology, the study of the Universe as a whole. We will cover what modern observational and theoretical work has taught us about the origin, fate, and nature of the Universe.
Effective: Summer 2014 Ending: Summer 2014

Last Import from UCM: May 24, 2014 3:00 AM
Bar Preparation (BPREP)

BPREP 900 Fundamentals of the Bar Examination (2) The course provides students with a substantive review of selected material routinely tested on the bar exam, primarily through problems and exercises in a bar exam format designed to familiarize students with the exam and techniques for answering multiple choice questions. Individualized feedback is provided every week to assist each student identify areas of strength and weakness. The goal is to enhance student ability to prepare for the bar exam and is intended to supplement, not replace, commercial bar preparation courses. This course is not focuses on any particular state, so all students will benefit regardless of where they are sitting for the bar exam. Students enrolled in BPREP 900 are not permitted to use laptops, phones or other devices during class. This course is not recommended for students ranked in the top third of their class. BPREP 900 is graded on a pass/fail basis but is not subject in any other respect to the Pass/Fail Option.

Effective: Fall 2011

BPREP 997 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2009

Last Import from UCM: May 24, 2014 3:00 AM
Behavior Influ Hlth (BIH)

BIH 722 Behavioral Influences on Health (3) Fundamental course addressing the physician's role in teaching the importance of individual choice and responsibility in maintaining health.
Effective: Fall 2008
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Behavioral Sci-Hy (BEHSC)

BEHSC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

BEHSC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be OFFERED INFREQUENTLY.
Effective: Spring 1987

Last Import from UCM: May 24, 2014 3:00 AM
Biobehavioral Health (BB H)

BB H 402 (IL) African Health & Development (3) Course will address African health and development strategies in the context of health promotion programs. Effective: Summer 2010
Prerequisite:

BB H 407 (IL) Global Health Equity (3) Health, social disparities, and equity in the global environment. Effective: Summer 2010 Ending: Fall 2014

Prerequisite:

BB H 410 Developmental and Health Genetics (3) Discussion of genetic influences on development and the interrelationships between genetics and health. Effective: Spring 2008
Prerequisite:

BB H 411W Research and Applications in Biobehavioral Health (3) Research methods, multi-level analyses, and applications in biobehavioral health. Effective: Spring 2011
Prerequisite:

BB H 416 Health Promotion II: Planning, Implementation, and Evaluation (3) Planning, implementation, and evaluation of health promotion, prevention, and intervention programs; emphasizing evaluation. Effective: Fall 2010
Prerequisite:

BB H 417 Advanced Applications in Health Promotion (3) Advanced learning experience in health promotion applications in which students will actively participate in planning, implementing, evaluating health programs. Effective: Spring 2000
Prerequisite:

BB H 432 Biobehavioral Aspects of Stress (3) Comprehensive discussion on the mechanisms of stress-induced diseases. Effective: Fall 2010
Prerequisite:

BB H 440 (US;IL) Principles of Epidemiology (3) Theory of epidemiology and significant case studies; potential applications to health care. Effective: Fall 2008
Prerequisite:

BB H 446 Human Sexuality as a Health Concern (3) Examination of human sexuality as an integral part of basic health education and health care for persons of all ages. Effective: Fall 2001
Prerequisite:

BB H 451 Pharmacological Influences on Health (3) Biological and behavioral aspects of therapeutic and recreational drug use and misuse, and their relationships to health. Effective: Fall 2001 Ending: Fall 2014
Prerequisite:

Prerequisite:

BB H 452 (US) Women's Health Issues (3) Exploration of major health issues concerning women today, with an emphasis on social, cultural, and medical influences. Effective: Fall 2013
Prerequisite:

BB H 458 (GS) Critical Issues in Reproduction (3) Examination and analysis of the new reproductive technologies from the standpoint of medical ethics, feminism, and sociocultural influences. Effective: Fall 2013
Prerequisite:

Prerequisite:
BB H 469 (BIOL 469) **Neurobiology** (3) Comprehensive examination of neuroanatomy and physiology designed to integrate the principles of neurochemistry, neuroendocrinology and molecular biology.
Effective: Fall 1994
Prerequisite:
BB H 470 (BIOL 470) **Functional and Integrative Neuroscience** (3) Neurobiological function in motivated behaviors, motor and sensory function, learning and memory, development, sexual differentiation, and pathology.
Effective: Summer 1995
Prerequisite:
BB H 490 **Introduction to Internship Experience** (3) Provide an integrative learning experience to develop professional skills encountered in an internship experience and future careers in biobehavioral health.
Effective: Summer 2014
Prerequisite:
BB H 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1995

BB H 494H **Senior Honors Thesis** (1-6) Independent study related to a student's interests directed by a faculty supervisor and culminating in the production of a thesis.
Effective: Summer 2005
Prerequisite:

BB H 495 **Internship Experience in Biobehavioral Health** (6-12) This course provides experiential learning in the field. Internship Supervision and support will be provided by site and university personnel.
Effective: Summer 2014
Prerequisite:

BB H 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 1995

BB H 496H **Independent Honors Study in BB H** (1-3 per semester/maximum of 6) For non-thesis independent study/research by Schreyer Honors College scholars.
Effective: Summer 2011

BB H 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1995

BB H 497A **Clinical Volunteer Training** (3) Course offered through continuing education.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

BB H 497B **Health Works** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

BB H 497D **Internship Experience in Biobehavioral Health** (3-6) This course will be scheduled by appointment and is part of the new internship program in Biobehavioral Health. Instruction provided by the internship coordinator.
Effective: Summer 2014 Ending: Summer 2014

BB H 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2009

BB H 501 **Biobehavioral Systems in Health and Development: Theory and Processes** (3) Examination of theories and basic processes for understanding individuals as dynamic biobehavioral complex systems functioning through continual interactions.
Effective: Spring 2001
Prerequisite:

BB H 502 (PSY 502) **Health: Biobehavioral Perspectives** (3) Introduction to the role of psychology in maintaining health and in treating nonpsychiatric disorders.
Effective: Spring 1992

BB H 503 **Biobehavioral Systems in Health and Development: Processes and Integration** (3) Examination and integration of basic processes for understanding individuals as dynamic biobehavioral complex systems functioning through continual interactions.
Effective: Spring 2001
Prerequisite:
BB H 504 Behavioral Health Intervention Strategies (3) Evaluation of intervention strategies from a biobehavioral health context. Theories of change processes as they pertain to health are analyzed. Effective: Spring 1991
Prerequisite:

BB H 505 Behavioral Health Research Strategies (3) Research strategies in behavioral health investigations are examined. Designs and data analytic models relevant to biobehavioral research are included. Effective: Spring 1991
Prerequisite:

BB H 521 Structural Equation Modeling (3) Structural Equation Modeling with LISREL and Amos. Confirmatory factor analysis; regression and path analysis with manifest/latent variables; special applications. Effective: Summer 2002
Prerequisite:

BB H 551 World Health Promotion (3) Analysis of the various health problems that affect humans throughout the world; emphasis will be placed on personal health issues. Effective: Spring 1998

BB H 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1991

BB H 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis. Effective: Spring 1991

BB H 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Spring 1991

BB H 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1991

BB H 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 1991

BB H 597A NSF Graduate Research Fellowship Applications (1) This course is designed to introduce first-year graduate students to the National Science Foundation’s Graduate Research Fellowship Program and to guide them in preparing their individual applications. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

BB H 597A Advanced Behavioral Research Strategies (3) The major focus of this course is to provide BBH graduate students with a basic orientation to epidemiological terminology, epidemiological methodology, and epidemiological analyses. A secondary goal of this course is to introduce BBH graduate students to the use and interpretation of logistic regression as used in epidemiological research. Effective: Spring 2015 Ending: Spring 2015 Future: Spring 2015

BB H 597B NRSA/NIH Grant Preparation (1) The focus of this course is to educate students to prepare a successful NIF F31 NRSA Grant application. Students in their third year of study should take this course. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

BB H 597C Stress and Health Across the Lifespan: Stress and Cellular Aging (1) This is part one of a three part 1.0 credit course module, which is designed to teach students about the biobehavioral effects of stress across the lifespan. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

BB H 597D Stress and Health Across the Lifespan: Biomarkers of Stress and Individual Differences (1) This is part two of a three part 1.0 credit course module, which is designed to teach students about the biobehavioral effects of stress across the lifespan. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

BB H 600 THESIS RESEARCH (1-15) NO DESCRIPTION. Effective: Spring 1991

BB H 601 PH.D. DISSERTATION FULL-TIME (0) NO DESCRIPTION. Effective: Spring 1991
BB H 602 **SUPERVISED EXPERIENCE IN COLLEGE TEACHING** (1-3 PER SEMESTER, MAXIMUM OF 6) NO DESCRIPTION.
Effective: Spring 1991

BB H 610 **Thesis Research Off-Campus** (1-15) No description.
Effective: Spring 1991

BB H 611 **PH.D. DISSERTATION PART-TIME** (0) NO DESCRIPTION.
Effective: Spring 1991

Last Import from UCM: May 24, 2014 3:00 AM
Biochm Micrb & Molbi (BMMB)

Effective: Fall 2008
Prerequisite:

B M B 401 General Biochemistry (3) Principles of the structure and function of biological molecules, including carbohydrates, lipids, membranes, proteins, and enzymes. Students may not receive credit for both CHEM 476 and B M B 401.
Effective: Fall 2009
Prerequisite:

B M B 401H General Biochemistry (3) Principles of the structure and function of biological molecules, including carbohydrates, lipids, membranes, proteins, and enzymes. Students may not receive credit for both CHEM 476 and B M B 401H.
Effective: Fall 2009
Prerequisite:

B M B 402 General Biochemistry (3) Comprehensive survey of the pathways and regulation of intermediary metabolism.
Effective: Fall 2007
Prerequisite:

B M B 402H General Biochemistry (3) Comprehensive survey of the pathways and regulation of intermediary metabolism.
Effective: Summer 2005
Prerequisite:

B M B 403 Biochemistry Laboratory (1) An introduction to techniques of experimental biochemistry, illustrating principles covered in B M B 402.
Effective: Spring 2010
Prerequisite:

B M B 406 Molecular Biology (3) A discussion of current aspects of cell molecular biology with a laboratory emphasizing current biotechnology techniques.
Effective: Fall 2007
Prerequisite:

B M B 408 Instructional Practice (1-2) Participation in the instruction of undergraduate laboratory and lecture courses, including classroom preparation; discussion of principles and objectives of each exercise.
Effective: Spring 2014
Prerequisite:

B M B 411 Survey of Biochemistry and Molecular Biology Literature (1) An introduction to readings and oral presentations in biochemistry and molecular biology.
Effective: Spring 1995
Prerequisite:

B M B 428 Physical Chemistry with Biological Applications (3) Chemical thermodynamics and kinetics with applications to biological problems.
Effective: Summer 2007
Prerequisite:

B M B 430 (BIOL 430, ENT 430) Developmental Biology (3) Molecular and genetic analyses of mechanisms involved in differentiation and determination in biological systems.
Effective: Summer 1994
Prerequisite:

B M B 432 (MICRB 432, VB SC 432) Advanced Immunology: Signaling in the Immune System (3) The study of signaling pathways that regulate the immune response.
Effective: Fall 2007
Prerequisite:

B M B 433 (VB SC 433) Molecular and Cellular Toxicology (3) In-depth coverage of processes by which drugs/chemicals interact with biological systems and the experimental approaches used to study these interactions.
Effective: Fall 2007
Prerequisite:

B M B 435 (MICRB 435, VB SC 435) Viral Pathogenesis (2) A study of the molecular, immunological and pathological aspects of viral diseases as well as laboratory methods of diagnosis.
Effective: Fall 2007
Prerequisite:

B M B 437 Physiological Biochemistry (2) Physiological aspects of biochemistry, with emphasis on mammalian metabolism, specialized tissue and fluid functions, detoxification mechanisms, energetics, and physiological interrelationships.
Effective: Spring 1995
Prerequisite:
B M B 442 Laboratory in Proteins, Nucleic Acids, and Molecular Cloning (3) Laboratory in enzyme purifications and assay techniques; nucleic acid isolation and characterization, including plasmid preparation. Effective: Summer 2012
Prerequisite:

B M B 443W Laboratory in Protein Purification and Enzymology (3) Laboratory in protein isolation methodology, enzyme kinetics, and physico-chemical properties of proteins. Effective: Spring 2009
Prerequisite:

B M B 445W Laboratory in Molecular Genetics I (2) Laboratory in molecular techniques in gene analysis and microbial genetics, emphasizing in vitro methodologies. Effective: Spring 2009
Prerequisite:

B M B 448 Model Systems and Approaches in Cell Biology Inqury (2) Advanced laboratory that uses inquiry-based approaches to the analysis of organelles, genetic mechanisms, and metabolic processes in eukaryotic organisms. Effective: Spring 2013
Prerequisite:

B M B 450 (MICRB 450) Microbial/Molecular Genetics (2) Genetic phenomena, with emphasis on molecular mechanisms: gene transfer, recombination, gene conversion, gene fusion, suppression, transposons. Effective: Fall 2010
Prerequisite:

Prerequisite:

B M B 464 Molecular Medicine (3) An exploration of the impact of advances in molecular biology on understanding disease mechanisms, medical diagnosis, and therapeutics. Effective: Spring 1999
Prerequisite:

B M B 465 Protein Structure and Function (3) A study of the relationship between structure and function of proteins; internet analysis to predict structure and function is included. Effective: Fall 2007
Prerequisite:

B M B 474 Analytical Biochemistry (3) Physical/chemical theory and techniques that emphasize purification and characterization of biological macromolecules, including proteins, lipids and nucleic acids. Effective: Fall 2008
Prerequisite:

B M B 480 (MICRB 480) Tumor Viruses and Oncogenes (3) Oncogenes, DNA and RNA tumor viruses, and relevant experimental techniques with emphasis on molecular basis of carcinogenesis and gene regulation. Effective: Spring 2001
Prerequisite:

B M B 484 Functional Genomics (3) Biochemical, genetic and evolutionary approaches to comprehensive discovery of functional DNA segments in genomes, including genes and regulatory sequences. Effective: Spring 2014
Prerequisite:

B M B 485 Human Genomics and Biomedical Informatics (3) This course covers the basics of measuring genomic variation and exploring how variation in DNA is related to common, complex disease. Effective: Summer 2013
Prerequisite:

B M B 488 Communities of Practice in Biochemistry and Molecular Biology (2 per semester/maximum of 16) The course combines laboratory research in a community of practice and a seminar on topics in science, ethics, and society. Effective: Spring 2013
Prerequisite:

B M B 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1995

B M B 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 1995

B M B 497F Introduction to Bioinformatics (3) Introduction to the biological problems and computational solutions that motivate current applications in computational biology. Topics will be organized around three main themes: 1) Genomes, including assembly and annotation of genomic sequences; 2) Evolution, including sequence comparison, reconstruction of evolutionary relationships, and detection of disease associated traits; and 3) Function, including analysis of functional genomics experiments and characterization of regulatory relationships between genes. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

B M B 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1995

B M B 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Effective: Summer 2007
Prerequisite:

BMMB 502 Critical Analysis of the Biochemical, Microbial, and Molecular Biology Scientific Literature (1) A course focusing on critical reading, understanding and evaluation of primary literature in Biochemistry, Microbiology and Molecular Biology.
Effective: Spring 2014
Prerequisite:

BMMB 507 Seminar in Biochemistry, Microbiology, and Molecular Biology (2 per semester/maximum of 4) No description.
Effective: Fall 2013

BMMB 509 Ethics in Biomedical Science (1) Discussion of ethical issues relevant to scientific research in the biomedical sciences.
Effective: Summer 1995

BMMB 510 Current Literature in Molecular Biology (1) Discussion and analysis of recent scientific papers that form the core of current literature in molecular biology and related disciplines.
Effective: Spring 1996

BMMB 511 (IBIOS 511, VB SC 511) Molecular Immunology (2) The study of molecular and biochemical events that influence immune responses and define current questions in immunology.
Effective: Spring 2008
Prerequisite:

BMMB 515 (VB SC 515) Macrophage Biology (2) The role of macrophages at the interface between innate and adaptive immunity.
Effective: Spring 2008
Prerequisite:

BMMB 518 (VB SC 518) T Cell Recognition and Development (2) An in-depth analysis of the mechanisms of T cell recognition, activation and development, and the acquired immune response.
Effective: Spring 2008
Prerequisite:

BMMB 521 Microbial Biology I (4) Survey of cutting-edge aspects of microbial ecology, phylogenetics, physiology, molecular biology, pathogenesis and genomics.
Effective: Summer 2013
Prerequisite:

BMMB 525 (CHEM 525) Analytical Separations (3) Fundamentals and applications of modern chromatographic separations.
Effective: Spring 2013

BMMB 531 Biomolecular Structure (2) Crystal structure determination and analysis of protein and nucleic acid three-dimensional structures.
Effective: Fall 2013
Prerequisite:

BMMB 533 Protein Evolution (2) Consequences of evolution of protein-coding sequences: structures and functions.
Effective: Summer 2013 Ending: Summer 2014
Prerequisite:

BMMB 533 Protein Evolution (2) Consequences of evolution of protein-coding sequences: structures and functions.
Effective: Fall 2014 Future: Fall 2014

BMMB 538 (CHEM 538) Spectroscopic Methods in Bioinorganic Chemistry (3) Foundations in spectroscopic methods employed for the determination of the geometric and electronic structure of transition metal clusters in nature.
Effective: Spring 2013

BMMB 539 (CHEM 539) Biochemical Reaction Mechanisms (3) Mechanisms of the most important biochemical reactions,

Bioengineering (BIOE)

BIOE 401 Introduction to Bioengineering Research and Design (3) Challenges and constraints of bioengineering research and design. Emphasis on immunoresponse, tissue mechanics, biological transport phenomena, and biomaterials. Effective: Spring 2007 Ending: Summer 2014 Prerequisite: Concurrent: BIOE 404

BIOE 402 Biomedical Instrumentation and Measurements (3) Biomedical measurements, including consideration of techniques, equipment, and safety. Effective: Spring 2008 Ending: Summer 2014 Prerequisite:

BIOE 403 Biomedical Instrumentation Laboratory (1) Biomedical measurements laboratory including measurement of bioptentials, experiments in medical imaging techniques, and use of cardiovascular and pulmonary system instrumentation. Effective: Spring 2007 Ending: Summer 2014 Prerequisite:

BIOE 404 Data Analysis and Experiment Design (1) Statistical measures of data, and selection of experiment sample size to meet criteria. Effective: Summer 2006 Ending: Fall 2014 Prerequisite: Concurrent: BIOE 401

BIOE 406 Medical Imaging (3) Physical principles and clinical applications of medical imaging methods. Effective: Summer 2000 Ending: Summer 2014 Prerequisite:

BIOE 409 Biofluid Mechanics (3) The fundamental relations in fluid mechanics and their application to biofluids including steady/unsteady flows, diseased states, devices and bio rheology. Effective: Summer 2006 Ending: Summer 2014 Prerequisite:

BIOE 410 Biomedical Applications of Microfluidics (3) Study of fluid mechanics at small length scales. Low Reynolds number flow, electrokinetic flows, bioseparations in microfluidic devices. Effective: Fall 2007 Ending: Summer 2014 Prerequisite:

BIOE 413 Bioengineering Transport Phenomena (3) An integrated study of the fundamentals of mass transport processes with emphasis on the analysis of physiological systems. Effective: Summer 2007 Ending: Summer 2014 Prerequisite:

BIOE 419 Artificial Organs and Prosthetic Devices (3) Analysis of function and consideration of design concerns for biomedical implants, including prosthetic joints, electrical stimulators, and cardiovascular pumps. Effective: Fall 2007 Ending: Summer 2014 Prerequisite:

BIOE 423 Reaction Kinetics of Biological Systems (3) Chemical kinetics and reaction equilibria with applications to the analysis of physiological function and the design of synthetic organs. Effective: Spring 2007 Ending: Summer 2014 Prerequisite:

BIOE 440 Clinical Corelations (1) Engineering analysis applied to common disease states and therapies. Effective: Summer 2000 Ending: Summer 2014 Prerequisite:

BIOE 443 (MATSE 403) Biomedical Materials (3) Describe properties of materials and composites and their in vivo interactions. Effective: Spring 2007 Ending: Summer 2014 Prerequisite:

BIOE 444 (IL) (MATSE 404) Surfaces and the Biological Response to Materials (3) Focus is on special properties of surface as an important causative and mediating agent in the biological response to materials. Effective: Summer 2007 Ending: Fall 2014 Prerequisite:

BIOE 445 Tissue Engineering: Concepts, Calculations and Applications (3) Introduction to interdisciplinary tissue engineering concepts, associated biochemical and biomechanical engineering calculations, and cardiovascular, musculoskeletal, and other tissue application examples. Effective: Spring 2011 Ending: Summer 2014 Prerequisite:

BIOE 450W Bioengineering Senior Design (3) Application of engineering and physiological principles to design of artificial organs and life supportive devices. Effective: Spring 2009 Ending: Summer 2014 Prerequisite:

BIOE 494H Honors Thesis (1-3 per semester/maximum of 6) Independent study research and design, leading towards
BIOE 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983 Ending: Summer 2014

BIOE 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983 Ending: Summer 2014

BIOE 499 **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2008 Ending: Summer 2014

BIOE 501 (CH E 501) **Bioengineering Transport Phenomena** (3) Application of the equations of mass, energy, and momentum conservation to physiological phenomena and to the design of artificial organs. Effective: Summer 1990

BIOE 503 (CH E 503) **Fluid Mechanics of Bioengineering Systems** (3) Cardiovascular system and blood flow, non-Newtonian fluid description, vessel flows, unsteady flows and wave motion, windkessel theory, transmission line theory. Effective: Spring 2014 Ending: Summer 2014

BIOE 505 **Bioengineering Mechanics** (3) Passive and active mechanical properties of tissues, rheological materials, models of muscle contraction, pulmonary mechanics, forces in muscular-skeletal system. Effective: Winter 1978

BIOE 506 **Medical Imaging** (3) Medical diagnostic imaging techniques, including generation and detection of ultrasound, x-ray, and nuclear radiation; instrumentation and biological effects. Effective: Fall 1983

BIOE 508 (MATSE 508) **Biomedical Materials** (3) Properties and methods of producing metallic, ceramic, and polymeric materials used for biomedical applications. Effective: Spring 2003

BIOE 509 **Mechanobiology** (3) This course explores the molecular bases of cell mechanics and the role of mechanics in cell biology. Effective: Summer 2013

BIOE 510 **Biomedical Applications of Microelectromechanical Systems (BioMEMS) and Bionanotechnology** (3) Introduction to BioMEMS and Bionanotechnology. Topics include: electromechanical and chemical biosensors, microfluidics microscale separations, and surface patterning for cellular engineering. Effective: Spring 2008 Ending: Summer 2014

BIOE 512 **Cell and Molecular Bioengineering** (3) Graduate level cell and molecular biology course for engineers emphasizing molecular mechanisms. Effective: Summer 2004

BIOE 513 **Bioengineering Laboratory Techniques** (3) Laboratory techniques in cell molecular biology, protein biochemistry and cell culture with an emphasis on engineering analysis and quantification. Effective: Summer 2008

BIOE 514 **Quantitative Microscopy** (3) Application of advanced microscopy to quantification of cellular and molecular function. Effective: Fall 2013
BIOE 515 **Cell Mechanics and Biophysics** (3) Advanced topics and recent developments in cellular engineering; applications of engineering science to cell biology. Effective: Spring 1997

Prerequisite:

BIOE 517 (MATSE 507) **Biomaterials Surface Science** (3) Special properties of surfaces as an important causative and mediating agent in the biological response to materials. Effective: Spring 2003

BIOE 519 **Artificial Organs Design** (3) Basic techniques and principles of a multidiscipline approach to artificial organs design. Effective: Spring 1991

BIOE 520 **Biophotonics** (3) Physical and engineering underpinnning of different modalities of laser microscopy and spectroscopy in biophysics, biomedical engineering, and life science applications. Effective: Fall 2007

Prerequisite:

BIOE 552 (IE 552) **Mechanics of the Musculoskeletal System** (3) Structure and biomechanics of bone, cartilage, and skeletal muscle; dynamics and control of musculoskeletal system models. Effective: Summer 1998

Prerequisite:

BIOE 553 (IE 553) **Engineering of Human Work** (3) Physics and physiology of humans at work; models of muscle strength, dynamic movements; neural control; physical work capacity; rest allocation. Effective: Summer 1985

Prerequisite:

BIOE 576 **Bioengineering of the Cardiovascular System** (3) Experimental and analytical studies of network branching patterns, regional blood flow, rheology and mechanics of blood cells and vessels. Effective: Summer 1991

Prerequisite:

BIOE 590 **Bioengineering Colloquium** (1-3) Continuous seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1991

BIOE 591 **Bioengineering Ethics and Professional Development** (1) Problem solving methods in ethical decision making, best practices in research communication, and strategies for professional development. Effective: Summer 2013

BIOE 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

BIOE 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 1987

BIOE 597K **Regenerative Medicine** (3) Foundation in regenerative medicine, the integration of cell biology with biomaterials and engineering to develop strategies for regeneration of tissues. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Prerequisite: Concurrent: BIOE 445

BIOE 599 **Foreign Studies** (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction. Effective: Fall 2008

BIOE 600 **Thesis Research** (1-15) No description. Effective: Fall 1983

BIOE 601 **Ph.D. Dissertation Full-Time** (0) No description. Effective: Fall 1983

BIOE 610 **Thesis Research Off Campus** (1-15) No description. Effective: Fall 1983

BIOE 611 **Ph.D. Dissertation Part-Time** (0) No description. Effective: Fall 1983
Bioethics (BIOET)

BIOET 501 (PHIL 571) Perspectives and Methods in Bioethics (3) This course explores a variety of theories and methods in bioethics and applies them to a selection of current topics.
Effective: Fall 2011

BIOET 502 (PHIL 572) Perspectives in Macro-Bioethics (3) This course explores systemic and structural issues in bioethics, and the theories and methodologies required to address them.
Effective: Fall 2011

BIOET 503 (PHIL 573) Ethics and the Responsible Conduct of Biomedical Research (3) Provides an understanding of ethical issues arising in the responsible conduct of biomedical research and frameworks for critically analyzing them.
Effective: Fall 2011

BIOET 533 Ethical Dimensions of Renewable Energy and Sustainability Systems (2) Examination of ethical issues relevant to research procedure, professional conduct, social and environmental impacts, and embedded values in research and practice.
Effective: Summer 2013

BIOET 590 Bioethics Colloquium (1-3 per semester/maximum of 36) Continuing seminars in bioethics that consist of a series of individual presentations by faculty, students, or outside speakers.
Effective: Fall 2011

BIOET 594 Research Topics (1-12 per semester/maximum of 15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2011

BIOET 595 Internship (1-12 per semester/maximum of 12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships related to bioethics.
Effective: Fall 2011

BIOET 596 Individual Studies (1-9 per semester/maximum of 9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011

BIOET 597 Special Topics (1-9 per semester/maximum of 9) Formal courses given infrequently to explore a topic or topics in bioethics in depth.
Effective: Fall 2011

BIOET 597B Bioethics: Ethical Issues and Bio-Power (3) The primary emphasis in this course will be to expand the functional notions of life (bios) and ethics (ethos, ways we live together). We will include considerations of the historical formation of institutions (such as asylums, systems of justice, educational institutions, etc.), forms of authoritative knowledge, punishment, and above all, relations of powers that control human lives (bio-power). We will read major portions of these works by Michel Foucault: Madness and Civilization, The Order of Things, Discipline & Punish, and Power/Knowledge. A guiding question for our discussions will be, how might we understand human health in this expanded sense of bio-ethics? The course will be conducted interactively with text based discussions and participation by all seminar members.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

BIOET 597C Research Ethics in Science and Engineering (2) This course will explore a broader understanding of research ethics embedded in the sciences and engineering.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

BIOET 598 Special Topics (1-9 per semester/maximum of 9) Formal courses given infrequently to explore a topic or topics in bioethics in depth.
Effective: Fall 2011

BIOET 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Fall 2011

BIOET 600 Thesis Research (1-12 per semester/maximum of 99) Thesis Research in Bioethics.
Effective: Fall 2011

The Pennsylvania State University
Effective: Fall 2011

BIOET 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Students will teach lower-level undergraduate courses in bioethics, including courses on the undergraduate minor in bioethics and medical humanities.
Effective: Fall 2011

BIOET 603 **Foreign Academic Experience** (1-9 per semester/maximum of 18) Foreign study and/or research approved by the graduate program for students enrolled in a foreign university constituting progress toward the degree.
Effective: Fall 2011

BIOET 610 **Thesis Research Off-Campus** (1-12 per semester/maximum of 99) Thesis Research, Off Campus.
Effective: Fall 2011

Effective: Fall 2011

Last Import from UCM: May 24, 2014 3:00 AM
Bioinformatics (BIIFM)

BIIFM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2004

BIIFM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2003

BIIFM 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2003

BIIFM 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2003

BIIFM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2003

Last Import from UCM: May 24, 2014 3:00 AM
Biological Basis-Dis (BBD)

BBD 716 Biological Basis of Disease (6) This integrated course includes topics in microbiology, immunology, pathology, pharmacology, and human genetics.
Effective: Summer 1997
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Biological Chem-Hy (BCHEM)

BCHEM 510 Carcinogenesis and Chemoprevention (2) Mechanisms of cancer induction by environmental carcinogens and chemoprevention by natural and synthetic agents. Effective: Spring 2011 Prerequisite:

BCHEM 521 Biochemistry: Structure/Function/Regulation of Biological Molecules (3) The fundamentals of biochemistry in evaluating the forces that govern inter- and intra-molecular interactions are studied. Effective: Summer 2011 Prerequisite:

BCHEM 522 Molecular Genetics: Genes to Genomes (3) This course focuses on concepts of molecular genetics and genomics, and DNA-protein interactions and their functions within macromolecular complexes. Effective: Summer 2011 Prerequisite:

BCHEM 584 Glycobiology A: Carbohydrate Chemistry (1) Graduate course for students interested in carbohydrates. Effective: Fall 2007 Prerequisite:

BCHEM 585 Glycobiology B: Glycoconjugates (1) Graduate course for students interested in carbohydrates. Effective: Fall 2007 Prerequisite:

BCHEM 586 Glycobiology C: Glycans in Health and Disease (1) Graduate course for students interested in carbohydrates. Effective: Fall 2007 Prerequisite:

BCHEM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

BCHEM 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

BCHEM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 1987

BCHEM 600 Thesis Research (1-15) No description. Effective: Fall 1983

BCHEM 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 1983

BCHEM 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 1983

BCHEM 611 Ph.D. Dissertation Part-Time (0) No description.
Biology (BIOL)

BIOL 400 Teaching in Biology (1-3) This course will train biology teaching assistants to teach in the laboratory/recitation setting with emphasis on critical thinking skills. Enrollment will be limited to students of at least fifth semester standing that have been accepted as teaching assistants for biology. Effective: Fall 2006
Prerequisite:

BIOL 402W Biological Experimental Design (3) Discussion of experimental design, analysis and presentation, with a practicum providing for student design, analysis and presentation of biological experiments. Students may not take this course if they have taken BIOBD 350W. Effective: Fall 2007
Prerequisite:

BIOL 404 Cellular Mechanisms in Vertebrate Physiology (3) This course considers cellular mechanisms governing physiological aspects of vertebrate cell signaling and their adaptation to particular organismal functions. Effective: Spring 2001
Prerequisite:

BIOL 405 Molecular Evolution (3) Introduction to concepts and techniques of analysis of molecular sequence data from an evolutionary point of view. Effective: Fall 1994
Prerequisite:

BIOL 406 Symbiosis (3) This course covers a variety of different types of symbiotic relationships between unicellular symbionts and plants, fungi, or animals. Effective: Summer 1998
Prerequisite:

BIOL 407 Plant Developmental Anatomy (3) This course will examine the development of basic vascular plant anatomical structures including leaves, stems, roots, and flowers. Effective: Fall 2005
Prerequisite:

Prerequisite:

BIOL 411 Medical Embryology (3) Develops an understanding of human reproductive physiology, embryological processes, their time frames, and the development of major human body systems. The course emphasizes clinical correlations and the medical consequences of developmental abnormalities. Effective: Summer 1998
Prerequisite:

BIOL 412 Ecology of Infectious Diseases (3) This course examines how ecological processes impact upon the epidemiology of infectious diseases. Effective: Fall 2004
Prerequisite:

BIOL 413 Cell Signaling and Regulation (3) Introduction to the themes of cellular signaling and regulation through critical review of primary literature. Effective: Spring 1998
Prerequisite:

BIOL 414 Taxonomy of Seed Plants (3) Basic principles and procedures in the practice of angiosperm systematics. Effective: Fall 1994
Prerequisite:

BIOL 415 Ecotoxicology (3) Major concepts and controversies in the interdisciplinary field of ecological toxicology; toxicity analysis, remediation, and case studies of environmental pollution. Effective: Spring 1995
Prerequisite:

BIOL 416 Biology of Cancer (3) This course intends to illustrate biological basis of cancer development, and discusses aspects on prevention, detection, and treatment of cancer. Effective: Spring 1999
Prerequisite:

BIOL 417 Invertebrate Zoology (4) Function and form of major invertebrate phyla. Effective: Fall 1994
Prerequisite:

BIOL 419 Ecological and Environmental Problem Solving (3) Overview of processes involved in solving environmental problems. Provides students with toolkit for understanding ecological and environmental problems. Effective: Spring 2004
Prerequisite:
BIOL 420 (GEOSC 420) Paleobotany (3) Classification, morphology, phylogeny, and stratigraphic occurrence of fossil plants; practicum includes field trips and study of paleobotanical techniques and specimens.
Effective: Spring 2005
Prerequisite:

BIOL 421 (VB SC 421) Comparative Anatomy of Vertebrates (4) The comparative anatomy of representative vertebrate animals discussed from a descriptive and an evolutionary viewpoint.
Effective: Spring 2008
Prerequisite:

BIOL 422 Advanced Genetics (3) Chromosomal mechanism of heredity; cytoplasmic and polygenic inheritance, chemical genetics, genomics, and experimental evolution.
Effective: Fall 2010
Prerequisite:

BIOL 424 Seeds of Change: The Uses of Plants (3) Interdisciplinary approach to the biology, chemistry, history, and culture of the interactions between plants and people.
Effective: Spring 2009
Prerequisite:

Effective: Spring 2014
Prerequisite:

BIOL 426 Developmental Neurobiology (3) Overview of basic developmental processes as they apply to the central nervous system.
Effective: Spring 2004
Prerequisite:

BIOL 427 Evolution (3) Selected topics on the evolution of life.
Effective: Spring 1995
Prerequisite:

BIOL 428 Population Genetics (3) Mathematical formulation of evolution by natural selection, genetic equilibrium under selection, mutation, migration, random drift.
Effective: Spring 2001
Prerequisite:

BIOL 429 Animal Behavior (3) Physiological mechanisms, ecological relevance, and adaptive significance of animal behavior.
Effective: Spring 1999
Prerequisite:

BIOL 430 (B M B 430, ENT 430) Developmental Biology (3) Molecular and genetic analyses of mechanisms involved in differentiation and determination in biological systems.
Effective: Summer 1994
Prerequisite:

BIOL 431 Reproductive Biology (3) Reproduction is essential to all life and the course will explore development, physiology, cell biology, genetic and evolutionary aspects of this area.
Effective: Summer 2013
Prerequisite:

BIOL 432 Developmental Genetics (3) An advanced course in developmental biology, focusing on the use of genetics techniques to study fundamental questions of animal development.
Effective: Summer 1998
Prerequisite:

BIOL 433 Evolution of Vertebrates (3) Evolution of vertebrate animals, including classification systems based upon morphology and genetics, insights for special adaptations.
Effective: Spring 2014
Prerequisite:

BIOL 434 Pathobiology of Emerging Infectious Disease (3) The course will analyze the pathology, immunology, microbiology, evolutionary biology, and policy of important emerging and reemerging infectious diseases.
Effective: Summer 2013
Prerequisite:

BIOL 435 Ecology of Lakes and Streams (3-4) Physical, chemical, and biological characteristics of freshwater environments, with special emphasis on factors regulating productivity in freshwater ecosystems.
Effective: Fall 2011
Prerequisite:

BIOL 436 Population Ecology and Global Climate Change (3) Ecological responses of individuals, populations, and communities to environmental variation, with emphasis on climate change.
Effective: Spring 2004
Prerequisite:

BIOL 437 Histology (4) Microscopic structure of the tissue of the animal body.
Effective: Fall 1994
Prerequisite:

BIOL 438 **Theoretical Population Ecology** (3) Theoretical discussions of demographics, population and metapopulation growth models, life histories, and species interactions such as competition, predation, host-parasitoid relationships.
Effective: Fall 2007
Prerequisite:

BIOL 439 **Practical Bioinformatics** (3) Practical aspects of retrieving and analyzing biological information residing in common databases.
Effective: Spring 2004
Prerequisite:

BIOL 441 **Plant Physiology** (3) Classical and current concepts in plant constituents, mineral nutrition, water relations, respiration, photosynthesis, photoperiodism, plant hormones, growth, and development.
Effective: Spring 1995
Prerequisite:

BIOL 443 **Evo-devo: Evolution of Developmental Mechanisms** (3) How evolution of animals and plants can be traced to changes in the regulation and/or interactions of genes controlling development.
Effective: Spring 2004
Prerequisite:

BIOL 444 **Field Ecology** (3) This field course will explore the flora and fauna of the mid-Atlantic area.
Effective: Fall 2007
Prerequisite:

BIOL 446 **Physiological Ecology** (3) The physiological abilities of plants and animals to adapt to their abiotic environment.
Effective: Fall 1994
Prerequisite:

BIOL 448 **Ecology of Plant Reproduction** (3) Analysis of the ecology, evolution, and natural history of angiosperm reproduction, including pollination, fruit-set, dispersal, and relevant plant-animal interactions.
Effective: Fall 1994
Prerequisite:

BIOL 450W **Experimental Field Biology** (3-5) A practical introduction to modern experimental techniques for ecological study of terrestrial, marine, and fresh water habitats.
Effective: Fall 2007
Prerequisite:

BIOL 451 **Biology of RNA** (3) Survey of the roles of RNA in biology, emphasizing evolutionary relationships and relevance to human health.
Effective: Spring 2014
Prerequisite:

BIOL 459 (BIOTC 459, HORT 459) **Plant Tissue Culture and Biotechnology** (3) Principles and techniques for the in vitro culture, propagation, and genetic manipulations of plant cells.
Effective: Fall 1999
Prerequisite:

BIOL 460 (ANTH 460) **Human Genetics** (3) The human genome, its variation, origins, and relation to disease and other traits.
Effective: Fall 2011
Prerequisite:

BIOL 460H (ANTH 460H) **Human Genetics** (4) Gene mapping in humans; molecular basis of genetic disease; gnomic structure; immunogenetics; and genetic evidence for human evolutionary history.
Effective: Fall 2001
Prerequisite:

BIOL 461 **Contemporary Issues in Science and Medicine** (3) Current/classical issues relating to health, research, agriculture, environment, and biotechnology. Active exploration of the impact of science on society.
Effective: Spring 2003
Prerequisite:

BIOL 463 **General Ecology** (3) Illustrates science of ecology, from individual, population, and community-level perspectives, discusses applications of this science to issues of conservation of biodiversity.
Effective: Spring 2002
Prerequisite:

BIOL 464 **Sociobiology** (3) The study of the adaptive function of social behavior, the comparative analysis of social organization, and the ecology of sociality.
Effective: Summer 2012
Prerequisite:

BIOL 467 **Molecular Basis of Neurological Diseases** (3) Students taking this course will learn about neurological diseases in a biological molecular context.
Effective: Summer 2013
Prerequisite:

BIOL 469 (BB H 469) **Neurobiology** (3) Comprehensive examination of neuroanatomy and physiology designed to
integrate the principles of neurochemistry, neuroendocrinology, and molecular biology.  
Effective: Spring 1995  
Prerequisite:  
BIOL 470 (BB H 470) **Functional and Integrative Neurosciences** (3) Neurobiological function in motivated behaviors, motor and sensory functions, learning and memory development, sexual differentiation, and pathology.  
Effective: Summer 1995  
Prerequisite:  
BIOL 472 **Mammalian Physiology** (3) Mechanisms concerned with normal animal function, with special emphasis on humans.  
Effective: Summer 2007  
Prerequisite:  
BIOL 473 **Laboratory in Mammalian Physiology** (2) Laboratory experiments demonstrating fundamentals in physiology.  
Effective: Summer 1985  
Prerequisite:  
BIOL 474 (GEOSC 474) **Astrobiology** (3) In depth treatment of principles/concepts of biochemical evolution, the origin/evolution of life; evaluation of distribution of life in the universe.  
Effective: Summer 2007  
Prerequisite:  
BIOL 479 (AN SC 479) **General Endocrinology** (3) Endocrine mechanisms regulating the morphogenesis, homeostasis, and functional integration of animals.  
Effective: Fall 2009  
Prerequisite:  
BIOL 482 **Coastal Biology** (3-4) Marine organisms, their interactions with each other, and their relationships with several coastal habitats.  
Effective: Spring 2010  
Prerequisite:  
BIOL 492 **Senior Seminar in Biology** (1) Discussion of selected topics from recent biological literature; reports on current research or internship experiences.  
Effective: Fall 2007  
Prerequisite:  
BIOL 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.  
Effective: Summer 2010  
---  
BIOL 495 **Internship in Biology** (1-12) Practical off-campus experience in Biology under the supervision of a professional and a faculty member.  
Effective: Spring 2013  

---  
BIOL 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Fall 1983  

---  
BIOL 496A **Ecology of Infectious Disease Curriculum Development** (3) This course focuses on curriculum development for the Ecology of Infectious Disease.  
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014  

---  
BIOL 496C **Field Practicum in Costa Rica and Panama** (1) Two and a half week field summer practicum that will provide real-world research and conservation experiences.  
Effective: Summer 2014 Ending: Summer 2014  
Prerequisite:  

---  
BIOL 496D **Summer Independent Research for Undergraduates - C-Fern Mutations** (3) Analysis of C-Fern Mutations.  
Effective: Summer 2014 Ending: Summer 2014  

---  
BIOL 496E **Summer Independent Research for Undergraduates - Creek Character** (3) Characterization of Poor House Creek.  
Effective: Summer 2014 Ending: Summer 2014  

---  
BIOL 496F **Seed Germination** (3) An analysis of differential gene expression during seed germination of tomato.  
Effective: Summer 2014 Ending: Summer 2014  

---  
BIOL 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Fall 1983  

---  
The Pennsylvania State University
BIOL 497A History of Biology (3) History of Biology is a 3 credit lecture course designed to introduce students to the long history that led to our current biological knowledge. The course is organized around themes representing some of the most important concepts in biology, such as macromolecules, the cell, inheritance, evolution, metabolism, biodiversity, and ecosystems. Lectures illustrate the interplay between observations, theories, experiments, and techniques. The history of biology is placed within a broader historical and cultural context (scientists and institutions from many different periods and countries are studied).
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

BIOL 498 (ENT 498) Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1993

BIOL 498A Biology of Eco-Health (3) This three-week summer session course is taught entirely in Tanzania during the first summer session at Penn State. Students will examine topics related to human health, human-environment interactions, and conservation of natural resources. In addition to lectures and discussions, this exceptional opportunity allows students to participate in guided field studies contributing to long term datasets and research projects in both pastoral and agricultural ecosystems. The course will include guest lectures by local experts in biology, conservation, and health as well as visits to research institutions, national parks and a medical clinic/lab.
Effective: Summer 2014 Ending: Summer 2014

BIOL 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

BIOL 499A (IL) Tropical Field Ecology (3) An intensive introduction to tropical biodiversity to be taught in Belize, Central America.
Effective: Summer 2005
Prerequisite:

BIOL 505 Statistical Methods in Evolutionary Genetics (3) Statistical methods that are used for analyzing and interpreting genetic data in molecular evolution will be discussed.
Effective: Spring 1994
Prerequisite:

BIOL 514 Topics in Systematics and Evolution (2) Discussion of pertinent current literature in systematic biology and evolution.
Effective: Spring 1995

BIOL 519 Ecological and Environmental Problem Solving (4) Overview of processes involved in solving environmental problems. Provides students with toolkit for understanding ecological and environmental problems.
Effective: Spring 2005
Prerequisite:

BIOL 546 Ecology of Populations (3) Ecological responses of organisms to environmental variables (food, etc.) that determine population behavior. Demography, competition, predation, and community principles.
Effective: Summer 1991

BIOL 555 (STAT 555, IBIOS 555) Statistical Analysis of Genomics Data (3) Statistical Analysis of High Throughput Biology Experiments
Effective: Spring 2014

BIOL 571 (PHSIO 571) Animal Physiology (3) Mammalian cardiovascular, respiratory, renal, and gastrointestinal systems.
Effective: Summer 1985
Prerequisite:

BIOL 572 (PHSIO 572) Animal Physiology (3) Mammalian nervous, endocrine, metabolic, and reproductive systems.
Effective: Summer 1985
Prerequisite:

BIOL 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2005

BIOL 591 Molecular Evolutionary Biology Seminar (1) Continuing seminars in Molecular Evolutionary Biology consisting of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1995

BIOL 592 Critical Evaluation of Literature in Biology (1) Weekly readings and critiques of recent papers from primary literature are used to teach independent thinking and effective scientific communication.
Effective: Fall 2001
Prerequisite:

BIOL 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual The Pennsylvania State University
basis and which fall outside the scope of formal courses. Effective: Spring 1994

BIOL 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 1990

BIOL 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 2001

BIOL 598A Experiential Teaching in Biology I (2) BIOL 598A is intended to prepare graduate students to teach in biology courses. This course will cover issues related to national reform efforts in science education, as well as our current understanding of how people learn, and research based understanding of effective pedagogy. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

BIOL 600 Thesis Research (1-15) No description. Effective: Fall 1983

BIOL 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 1983

BIOL 602 Supervised Experience in College Teaching (1-3) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University. Effective: Summer 1997

BIOL 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 1983

BIOL 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 1983

BIOL 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Summer 2007

Last Import from UCM: May 24, 2014 3:00 AM
Biomedical Sci-Hy (BMS)

BMS 501 Regulation of Cellular & Systemic Energy Metabolism (3) Teaches biochemical and signal transduction concepts while exploring the control of bioenergetic processes.
Effective: Fall 2007

BMS 502 Cell and Systems Biology (3) Explores the cellular and intracellular organization of biology, assembly of cells into tissues, and further integration into biological systems.
Effective: Fall 2007

BMS 503 Flow of Cellular Information (3) Teaches concepts underlying the inheritance, transmission and translation of genetic information.
Effective: Fall 2007

BMS 504 Art of Scientific Communication I (1) Introduction to scientific analysis, writing, and oral presentation using primary literature sources.
Effective: Summer 2011
  Concurrent: BMS 501 BMS 502 BMS 503

BMS 505 Art of Scientific Communication II (1) Advanced topics in scientific analysis, writing, and oral presentation using primary literature sources.
Effective: Summer 2011
  Prerequisite:

BMS 506A Biological Basis of Human Health and Disease A (2) Cellular, molecular, genetic, and biochemical basis of organ function pathology.
Effective: Fall 2013
  Prerequisite:

BMS 506B Biological Basis of Human Health and Disease B (2) Cellular, molecular, genetic, and biochemical basis of organ function pathology.
Effective: Summer 2013
  Prerequisite:

BMS 520 Human Integrative Physiology (3) This course explores whole organ physiology emphasizing skeletal muscle and exercise physiology, cardiovascular, renal and urinary, respiratory, gastrointestinal, and endocrine.
Effective: Summer 2011
  Prerequisite:

BMS 568 Current Topics in Translational Cancer Research (3) The course covers current topics in cancer research, with a focus on translation to the clinic.
Effective: Summer 2013
  Prerequisite:

BMS 571 Graduate Clinical Rotation (1-3) This course allows graduate students at Hershey and University Park to gain experience in the clinical arena.
Effective: Spring 2009
  Prerequisite:

BMS 581 Molecular and Translational Approaches to Human Disease (3) This course teaches students the scientific process used to understand the molecular bases of diseases and the development of novel therapies.
Effective: Summer 2011
  Prerequisite:

BMS 590 Colloquium (1 per semester/maximum of 4) A series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2011

BMS 591 Biomedical Research Ethics (1) Education in research ethics for biomedical scientists. Meets U.S. Public Health standards for education in responsible conduct of research.
Effective: Fall 2011

BMS 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

BMS 595 Internship (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2008

BMS 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual
basis and which fall outside the scope of formal courses.

Effective: Spring 2008

BMS 596B **Tutoring** (0.5-2) Tutoring students in the Summer Foundations course.
Effective: Summer 2014 Ending: Summer 2014
Prerequisite:

BMS 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2008

BMS 597A **Foundations in Biomedical Research** (4) The goals of Foundations of Biomedical Research are: 1) to provide experience with important laboratory, experimental, and scientific communication skills; 2) to help the formation of peer groups that will support personal and professional development in the coming years; 3) to begin developing professional and personal interactions with graduate faculty members.
Effective: Summer 2014 Ending: Summer 2014

BMS 597B **Grant Writing and Comprehensive Exame Preparation** (1) Grant writing and comprehensive exam preparation for graduate students.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

BMS 597C **Organizing Principles of Biomedical Science I** (3) BMS 597C Organizing Principles of Biomedical Science I is a shared portion of the core curriculum for the Graduate Programs in Anatomy, Biomedical Sciences and Neuroscience at the College of Medicine.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

BMS 597D **Organizing Principles of Biomedical Science II** (3) BMS 597D Organizing Principles of Biomedical Science II is a shared portion of the core curriculum for the Graduate Program in Anatomy, Biomedical Sciences and Neuroscience at the College of Medicine.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

BMS 600 **Thesis Research** (1-9 per semester/maximum of 36) Laboratory work on thesis project.
Effective: Fall 2011

BMS 601 **Thesis Preparation** (0) BMS 601 is available to full-time Ph.D.-degree candidates who have passed the comprehensive examination and met the two-semester residence requirement.
Effective: Spring 2013

BMS 610 **Thesis Research Off Campus** (1-9 per semester/maximum of 36) Off-campus laboratory work on thesis project.
Effective: Spring 2014

BMS 611 **Thesis Preparation** (0) BMS 611 is available to part-time Ph.D.-degree candidates who have passed the comprehensive examination and met the two-semester residence requirement.
Effective: Spring 2013

Last Import from UCM: May 24, 2014 3:00 AM
Biorenewable Systems (BRS)

BRS 411 Biobased Fiber Science (4) Theoretical and practical aspects of structure-property relationships for biobased industrial fibers, including fiber biological and chemical constitution and fiber-water relationships.
Effective: Spring 2014
Prerequisite:

BRS 422 Energy Analysis in Biorenewable Systems (3) Energy management, energy conversions, renewable energy alternatives, engineering economic analyses, national and international perspectives on energy resources.
Effective: Spring 2014
Prerequisite:

BRS 423 Deterioration and Protection of Bioproducts (3) Timber, wood, and bioproduct deterioration from fungi, insects, fire; treatment of bioproducts for in-service protection.
Effective: Spring 2014
Prerequisite: Concurrent: BRS 411

BRS 426 Safety and Health in Agriculture and Biorenewable Industries (3) Managing occupational safety and health in production agriculture, bioproducts and related operations.
Effective: Spring 2014
Prerequisite:

BRS 428 Electric Power and Instrumentation (3) Principles and application of electric circuits for power distribution, motors, automatic controls, and instrumentation used in agricultural and biorenewable industries.
Effective: Spring 2014
Prerequisite:

BRS 429W Biorenewable Systems Analysis and Management (3) Theory of systems thinking; optimization and quantitative techniques for analysis of agricultural production and other biorenewable systems.
Effective: Spring 2014
Prerequisite:

BRS 437 Bioprodcut Marketing and Sales (4) Business-to-business bioproduct sales and marketing fundamentals and market overview of key forest industry sectors including biorefinery value chain outputs.
Effective: Spring 2014
Prerequisite:

BRS 490 BioRenewable Systems Colloquium (1) Presentations and discussions of solutions to problems within the biorenewable systems industries.
Effective: Spring 2014
Prerequisite:

BRS 500 (A B E 500) Research Methods (3) Foundation course in research philosophies, methodologies, issues, policies; research quality; critical thinking and discourse; professional development; and research ethics.
Effective: Spring 2014

BRS 501 Biobased Polymers (3) The chemistry, structure-property relationships, and industrial applications of biobased polymers from plant and agricultural feedstocks.
Effective: Summer 2013

BRS 502 Human Behavior in Management and Technology (1) Explore the relationship between human behavior and professional activities including ethical leadership and decision-making.
Effective: Fall 2013

BRS 511 Structural BioComposites (3) Manufacture and practices related to the production of engineered biocomposites processed from lignocellulosic materials.
Effective: Summer 2013

BRS 550 Applied Bioproducts Marketing (3) Bioproduct marketing applications for solid and engineered wood products and biorefinery value chain output including environmental services, energy, fuels, and co-products.
Effective: Summer 2013

BRS 551 Sustainable Business Strategies (2) Coverage of business strategies that relate to sustainability and environmental issues.
Effective: Summer 2013

BRS 590 Colloquium (1-6 per semester/maximum of 12) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2013

BRS 594 Research Topics (1-9 per semester/maximum of 12) Supervised student activities on research projects identified
on an individual or small-group basis. Effective: Summer 2013

BRS 595 Internship (1-9 per semester/maximum of 12) Supervised, research-oriented, off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Summer 2013

BRS 596 Individual Studies (1-9 per semester/maximum of 12) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2013

BRS 597 Special Topics (1-9 per semester/maximum of 15) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 2013

BRS 598 Special Topics (1-9 per semester/maximum of 15) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 2013

BRS 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2013

BRS 600 Thesis Research (1-9 per semester/maximum of 36) No description. Effective: Summer 2013

BRS 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Summer 2013

BRS 602 Supervised Experiences in College Teaching (1-3 per semester/maximum of 6) Provides an opportunity for supervised and graded teaching experience in undergraduate biorenewable systems courses. Effective: Summer 2013

BRS 610 Thesis Research Off Campus (1-9 per semester/maximum of 36) No description. Effective: Summer 2013

BRS 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Summer 2013

Last Import from UCM: May 24, 2014 3:00 AM
Business (BUS)

BUS 500 Negotiation, Communication, Teamwork (2) Experience-based learning approach to developing effective teams and work organizations; emphasis on developing reflective thinking and interpersonal skill sets.
Effective: Summer 2004
Prerequisite:

Effective: Summer 1995
Prerequisite:

BUS 502 Business Research Applications (3) Critical evaluative techniques of business research.
Effective: Spring 2001
Prerequisite:

BUS 505 Data Analysis for Business Decisions (2) Selection and application of statistical methods, and use of business data bases, to support managerial decision-making; interpretation and presentation.
Effective: Spring 2005
Prerequisite:

BUS 515 Business Ethics and Corporate Governance (2) Social, legal and ethical obligations of key organizational participants; organizational structure and goals; conduct in global and multicultural contexts.
Effective: Summer 2004
Prerequisite:

BUS 554 Master's Project (3) Development of an original master's project in the student's professional field of interest and preparation of a paper.
Effective: Spring 1987
Prerequisite:

BUS 555 International Business (3) Studying theories and practices of international business activities, strategies, structures and operations of multinational companies across nations.
Effective: Fall 2000

BUS 584 Business in a Global Society (3) Business sector and society relations; international and cultural issues; corporate values and ethics; relationship to stakeholders; social, political, legal environments.
Effective: Spring 2012

BUS 588 Strategic Management (2) Analysis of current theory and practice for the formulation and implementation of organizational strategies in complex dynamic environments; capstone course.
Effective: Fall 2005
Prerequisite:

BUS 589 Strategic Venture Planning and Innovation (2) Development and presentation of a venture plan including product development; market research; competitive analysis; financing and capitalization; organizational structure.
Effective: Spring 2005
Prerequisite:

BUS 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

BUS 595 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2001
Prerequisite:

BUS 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

BUS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

Last Import from UCM: May 24, 2014 3:00 AM
Business Admin (B ADM)

Effective: Spring 2004

Effective: Fall 2003

B ADM 502 Demand, Operations, and Firm Performance (6) A project-oriented investigation into the critical principles of management, marketing, and operations.
Effective: Fall 2003

B ADM 503 Integrated Business Analysis (3) Overview of the statistical analyses of a variety of business problems.
Effective: Fall 2003
Prerequisite:

B ADM 510 Cost Management for Decision Making and Control (3) The study and use of accounting information for cost management, product costing, planning and controlling operations, and managerial decision making.
Effective: Fall 2003
Prerequisite:

B ADM 511 Information Systems Management and Strategy (3) Fundamental uses of IS/T and guiding principles associated with the development and management of IS/T as a strategic organizational asset.
Effective: Fall 2003

B ADM 512 Managing Effective Organizations (3) Understanding the critical and changing role of management in contemporary organizations.
Effective: Fall 2012
Prerequisite:

B ADM 513 Quantitative Methods for Business (3) This course is designed to provide a systematic understanding of design, operation, and control of business processes that transform inputs into outputs.
Effective: Fall 2012
Prerequisite:

B ADM 514 Strategic Planning and Business Policy (3) Formulation of objectives and the implementation of programs to promote long-range success of the organization in a changing environment.
Effective: Fall 2012
Prerequisite:

B ADM 520 Entrepreneurial Ventures (3) The contribution of the entrepreneur to the enterprise system, supporting public policies and personal requirements for entrepreneurial success.
Effective: Spring 2004
Prerequisite:

B ADM 521 Leadership Seminar (3) Experiential problem-based seminar providing leadership opportunities and practice.
Effective: Fall 2003
Prerequisite:

B ADM 522 Business Solutions (3) Practicum experience in solving problems in real business situations.
Effective: Fall 2003
Prerequisite:

Effective: Fall 2003
Prerequisite:

B ADM 525 Innovation and Change Management (3) Analysis of innovation sources, effects on industry structure and firm resources, and how firms can manage adoption and implementation process.
Effective: Fall 2003
Prerequisite:

B ADM 526 Leadership and Ethics (3) A multiperspective review of leadership theory and research with special emphasis given to the ethical dimensions of leadership.
Effective: Fall 2012
Prerequisite:

B ADM 530 Investment Theory (3) Advanced literature pertaining to investments; special reference to the theory of random walks, stock valuation models, and portfolio management.
Effective: Spring 2004
Prerequisite:
B ADM 532 **Corporate Finance** (3) Application of modern corporate finance theory to corporate practice. Effective: Fall 2003
Prerequisite:

B ADM 533 **Derivatives** (3) Applied theory of derivative instruments in hedging risk and management strategies. Effective: Fall 2003
Prerequisite:

B ADM 550 **Global Marketing** (3) Marketing decision making from a global perspective. Effective: Fall 2003
Prerequisite:

B ADM 551 **Marketing Research** (3) Examination of marketing research today, including research and marketing decisions, sampling and measurement, and collection and analysis of data. Effective: Spring 2004
Prerequisite:

B ADM 552 **Service Marketing** (3) The application of marketing concepts to special needs of a service environment. Effective: Fall 2003
Prerequisite:

B ADM 553 **Consumer Behavior** (3) Project-oriented course introducing consumer research techniques to formulate marketing strategies. Effective: Summer 2007
Prerequisite:

B ADM 554 **Marketing Strategy** (3) An application of marketing theoretical principles from popular press publications. Effective: Summer 2007
Prerequisite:

B ADM 562 **Financial Statement Analysis** (3) Utilizes concepts in accounting, economics, and business strategy to analyze financial statements of real companies. Effective: Fall 2003
Prerequisite:

B ADM 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 2003

B ADM 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small group basis. Effective: Fall 2003

B ADM 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Fall 2003

B ADM 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 2003

Prerequisite:

B ADM 597 **Special Topics** (1-9) Formal courses given on a topic or special interest subject which may be offered infrequently. Effective: Fall 2003

B ADM 597A **Strategic Management of Technology** (3) Understand how core competencies are created by having appropriate technology. Understand how to make technology and generic business strategies merge. Effective: Summer 2014 Ending: Summer 2014

B ADM 597B **Negotiations** (3) Learn negotiation skills and explore how real-world challenges can be solved through enhanced negotiation abilities. Effective: Summer 2014 Ending: Summer 2014

B ADM 597C **Project Management** (3) A problem-based, interdisciplinary course in project management skills and techniques needed to manage projects in a modern business environment. Effective: Summer 2014 Ending: Summer 2014
Prerequisite:

B ADM 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered
infrequently; several different topics may be taught in one year or semester
Effective: Fall 2003

B ADM 599 (IL) **Foreign Studies** (1-12 per semester, maximum of 24) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

B ADM 894 **Capstone Experience** (1-3 per semester/maximum of 3) Supervised, professionally-oriented student activities that constitute the culminating experience for the program.
Effective: Summer 2013

B ADM 895 **Internship** (1-6) Supervised, professionally-oriented, off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2013
Prerequisite:

B ADM 896 **Individual Studies** (1-6) Creative projects with a professional orientation, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2013

B ADM 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject with a professional orientation that may be offered infrequently.
Effective: Spring 2013

B ADM 898 **Special Topics** (1-9) Formal courses given on a topical or special interest subject with a professional orientation that may be offered infrequently.
Effective: Spring 2013

B ADM 899 **Foreign Studies** (1-2 per semester/maximum of 3) Courses with a professional orientation offered in foreign countries by individuals or group instruction.
Effective: Spring 2013

Last Import from UCM: May 24, 2014 3:00 AM
BUSAD 501 **Statistical Analysis for Managerial Decision Making** (3) Use of statistical methods for managerial decision making, with emphasis on problem formulation, data analysis and interpretation, and business applications. Effective: Summer 2006

BUSAD 511 **New Ventures 1** (3) Introduction to the issues involved in the development of new ventures within existing business organizations or from start-up. Effective: Spring 2005
Prerequisite:

BUSAD 515 **Acquiring the Existing Enterprise** (3) The process of acquiring an existing company as an alternative to starting a new venture is explored. Effective: Spring 2005
Prerequisite:

BUSAD 519 (LEAD 519) **Developing Creative High Performance Organizations** (3) This course focuses on how to create high performing organizations based on models provided by business, science and the arts. Effective: Spring 2007
Prerequisite:

BUSAD 522 **New Ventures 2** (3) Examines the financial and legal issues that are critical in the formation, development, and management of new ventures. Effective: Spring 2005
Prerequisite:

BUSAD 523 **Prices and Markets** (3) A survey of analytical concepts and techniques essential to an understanding of the business environment. Effective: Summer 2002
Prerequisite:

BUSAD 525 **Quantitative Methods in Finance** (3) Study of quantitative methods used in financial and investment analysis and modeling. Effective: Summer 2006

BUSAD 526 **Current Issues in Corporate Finance** (3) Finance topics involving strategic financial decisions, including capital structure and cost of capital, financial forecasting, valuation, and corporate control. Effective: Spring 2011
Prerequisite:

BUSAD 527 **Fixed Income Securities** (3) Analysis and valuation of fixed income securities and interest rate derivatives. Effective: Summer 2006
Prerequisite:

BUSAD 528 **Mergers and Acquisitions** (3) Survey of drivers of success in M&A and develop knowledge and skills in the design and evaluation of M&A transactions. Effective: Fall 2011
Prerequisite:

BUSAD 530 **Biotechnology and Health Industry Overview** (3) Organization, financing, policy, trends, problems and issues in the biotechnology, pharmaceutical, and health industries. Overview of cost, quality, access issues. Effective: Fall 2002

BUSAD 534 **Ethical Dimensions of Management in the Biotechnology and Health Industry** (3) Ethical managerial decision-making in biotechnology, pharmaceuticals, and health including ethical implications of technological/scientific advances, medical interventions, and business decisions. Effective: Summer 2002
Prerequisite:

BUSAD 537 **Management Information Systems** (3) Information system theories and methods applied to administrative structures and management decisions in organizations. Effective: Summer 2006
Prerequisite:

BUSAD 542 **Global Intercultural Management** (3) This course develops students' global cross-cultural competencies and cultural intelligence to enhance ability to manage global organizations and work interculturally. Effective: Summer 2009
Prerequisite:

BUSAD 545 **Negotiation Strategies** (3) This course covers strategies and tactics for understanding conflicts, for negotiating effectively, and for dealing successfully with power in organizations. Effective: Spring 2003
Prerequisite:

BUSAD 551 **Business, Ethics, and Society** (2-3) The course focuses upon the exploration and analysis of the ethical,
political, technological, social, legal and regulatory environments of business.
Effective: Fall 2011
Prerequisite:

BUSAD 555 (LEAD 555) Full Range Leadership Development (3) Development of behavioral skills associated with outstanding leadership of individuals, teams, and organizations through advanced information technology, experimental exercises, and case analysis.
Effective: Fall 2010
Prerequisite:

BUSAD 556 (LEAD 556) Diversity Leadership (3) Analysis and application of models, theories, and strategies for managing an increasingly diverse workforce and customer base.
Effective: Fall 2005
Prerequisite:

BUSAD 558 Knowledge Management (3) This course examines the strategic value of knowledge and how organizations can manage their knowledge assets for competitive advantage.
Effective: Summer 2008
Prerequisite:

BUSAD 559 Career Management (3) Provides students with a conceptual understanding of careers/career design making through an examination/discussion of the literature in career management.
Effective: Spring 2002
Prerequisite:

BUSAD 575 High Tech Venture Development (3) How high tech entrepreneurs and intrapreneurs design, develop, and market new information technology products (e.g., software) and services.
Effective: Spring 2002
Prerequisite:

BUSAD 576 Ethical Issues in Information Technology (3) Exploration of ethical issues affected by IT: privacy, free speech, computer crime, intellectual property, IT professionalism, and software product liability.
Effective: Spring 2012
Prerequisite:

BUSAD 577 Management of Information Technology (3) This course focuses upon the challenges of aligning IT strategy with organizational goals.
Effective: Spring 2012
Prerequisite:

Effective: Spring 2011
Prerequisite:

BUSAD 581 Venture Strategy, Planning and Development (3) This is the capstone course in the New Ventures option of the MBA program. Students develop a strategic or operational plan for a new venture.
Effective: Spring 2005
Prerequisite:

BUSAD 582 (LEAD 582) Social Entrepreneurship and Community Leadership (3) This course will provide an opportunity for students to explore concepts of developing and leading businesses that create social value.
Effective: Fall 2011
Prerequisite:

BUSAD 583 Future of the Biotechnology and Health Industry: Strategic Implications (3) Strategy in biotechnology, pharmaceutical, and health industries; impact of technological innovation and economic, social, political trends, and events.
Effective: Summer 2002
Prerequisite:

Effective: Summer 2006
Prerequisite:

BUSAD 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2001

BUSAD 802 Cornerstone of Sustainability (3) In-depth exploration of the social, environmental, and organizational sustainability challenges facing business leaders in the 21st Century.
Effective: Summer 2012

BUSAD 809 Triple Bottom Line Accounting (3) In-depth exploration of the issues related to implementing measurement, reward and reporting systems for economic, social, and environmental impacts.
Effective: Summer 2012

BUSAD 824 Finance and Investment for Sustainable Growth (3) In-depth exploration of the methods of financing
available for sustainable growth in developed and emerging markets.
Effective: Summer 2012

BUSAD 835 Commercialization of Biopharmaceuticals (3) Review organizational processes, regulatory, and environmental issues in the development and commercialization of biopharmaceuticals in the United States and globally. Effective: Spring 2011
Prerequisite:

BUSAD 879 Sustainable Products and Service Development (3) In-depth exploration of the creation and development of sustainable products and services. Effective: Summer 2012

Last Import from UCM: May 24, 2014 3:00 AM
Business Administration (B A)

B A 411 Analyzing Business and Industry (3) Prepares students to obtain an enterprise-wide view of business and industry by integrating operational and financial decisions in a team and learning environment.
Effective: Fall 2011
Prerequisite:

B A 412H Honors Integration and Research (2-3) The integration of the business core into a detailed financial, strategy and market analysis of actual companies selected by student teams.
Effective: Spring 2011
Prerequisite:

B A 420 Preparation for Career Management (1) This course emphasizes effective career planning by closely examining oneself, the business world, communication styles and strategies.
Effective: Fall 2012
Prerequisite:

B A 421 Project Management (3) Introduction to Project Management covering all phases of a project including proposal development, planning, execution, and closing.
Effective: Fall 2012
Prerequisite:

B A 422W Strategic Business Planning (3) Study of strategic planning and implementation in multi-industry, multi-cultural, and multi-national settings with emphasis on sustaining competitive advantages.
Effective: Fall 2012
Prerequisite:

B A 441 Strategies for Enterprise Sustainability (3) An understanding and analysis of how environmental and sustainability issues are impacting business strategies and ultimately profits.
Effective: Spring 2014
Prerequisite:

B A 442 Sustainable Behavior of Consumers, Firms, and Societies (3) Strategies to influence sustainable behavior considering consumer response and marketing communications.
Effective: Spring 2014

B A 462 Business Strategy (3) Interpretation of business concept in the analysis of problems related to the successful management of a company, institution, or organization.
Effective: Spring 2008
Prerequisite:

B A 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

B A 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

B A 495A Business Internship (3-6 per semester/maximum of 6) Guided professional practicum in business consisting of 3 or 6 credits of supervised fieldwork in business.
Effective: Fall 2012
Prerequisite:

B A 495B Undergraduate Research in Business (3-6 per semester/maximum of 6) Guided student research in business, culminating in the presentation of the research project at a professional conference.
Effective: Fall 2012
Prerequisite:

B A 495C Undergraduate Research in Business (3-9) Guided student research in business administration; application of analytical or research techniques to business problems.
Effective: Spring 2003
Prerequisite:

B A 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

B A 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

B A 497B Sustainable Marketing Strategy for Consumers, Firms, and Societies (3) Sustainability is a broad domain
concerning the extent to which environmental, economic, and social practices are viable for current and future generations. Consumer awareness of sustainability issues has evolved from an emerging social movement to mainstream values, and marketing strategy plays an important role in a business' ability to respond to these issues in a genuine manner. This course focuses on the role of sustainability in the marketplace and marketing strategies to effectively engage customers and stakeholders around sustainable issues.

Prerequisite:

B A 499 (IL) Foreign Study--Business Administration (1-18) Study in selected countries of business institutions, functions, and current business problems.
Effective: Spring 2011
Prerequisite:

B A 500 Marketing Management (1-3) An examination of the role of the market place in company management.
Effective: Fall 2008

B A 501 Management (2) Examination and application of concepts of human behavior and organization to managing people in work organizations.
Effective: Spring 2002

B A 502 Team Process and Performance (1-3) Development of managerial skills and techniques for diagnosing, intervening and leading effective teams.
Effective: Fall 2008

B A 504 Ethical Leadership (2) This course introduces students to their ethical responsibilities as business leaders.
Effective: Fall 2008
Prerequisite:

B A 505 Negotiation Theory and Skills (1-3) Development of managerial skills for distributive and integrative negotiations at the two-party and team levels.
Effective: Summer 2010

B A 510 Supply Chain and Operations Management (1-3) Introduction to the organizational processes and methods used to create and deliver goods and services.
Effective: Fall 2008

B A 511 Financial Accounting (1-3) Basic concepts and principles (i.e. the jargon) underlying financial accounting practices.
Effective: Fall 2008

B A 512 Quantitative Analysis for Managerial Decision Making (2) Construction and use of quantitative methods in business decision-making.
Effective: Summer 1995

B A 515 Business Statistics for Contemporary Decision Making (2) Conceptual understanding of statistics through both numerical and applied approach.
Effective: Summer 2008

B A 517 Communication Skills for Management (1-3) Development of communication skills required for management; audience awareness, style, individual and group presentations.
Effective: Fall 1983
Prerequisite:

B A 521 Introduction to Managerial Accounting (2) Cost accounting and the design of management accounting systems for planning and controlling operations, and for motivating personnel.
Effective: Fall 2001

B A 523 IT Strategy (2) An introduction to information technologies critical to business organizations.
Effective: Spring 2009

B A 528 Business Simulation (1-3) A team-based course during which students will manage a simulated firm.
Effective: Summer 2008

B A 531 Introduction to Finance (1-3) An examination of the techniques available to aid the financial manager in decision making.
Effective: Fall 2008

B A 533 Economics for Managers (2) An introduction to the tools of economic decision making and a consideration of firm, industry, and global economic influences on economic decision making.
Effective: Spring 2002

B A 535 Global Perspectives (1) An overview of the global business environment.
Effective: Fall 2001

B A 536 Global Immersion (1-3) Exploration of the opportunities and the challenges of doing business in another economic region.
Effective: Spring 2011

B A 545 Business, Government and International Economics (2) Understand how macroeconomic events and policies affect the global economy and business decisions.
Effective: Summer 2008

B A 565 Strategic Leadership (1-3) Presents a senior executive perspective on key opportunities and challenges faced by business leaders.
Effective: Summer 2008

B A 571 Strategic Management (1-3) Analysis and application of concepts and techniques aimed at successfully developing and implementing competitive strategy in a complex business environment.
Effective: Fall 2008

B A 572 Introduction to Business Research (3) An introduction to issues involved in framing, defending, and evaluating business research programs.
Effective: Spring 2004
Prerequisite:

B A 574 Business Research (1-3) A project paper, comparable in quality and scope of work to a graduate thesis, on problems of a company.
Effective: Winter 1978
Prerequisite:

B A 575 Capstone Business Case (4) A team-based project course that requires students to analyze an actual business problem from a firm or nonprofit organization.
Effective: Summer 2008

B A 576 Entrepreneurship (3) Study of the development or acquisition of a business appropriate to the objectives and resources of the individual entrepreneur.
Effective: Winter 1978

B A 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

B A 591 Applied Communications (1) Develop oral and written communication strategies to succeed in professional and academic contexts.
Effective: Spring 2010
Prerequisite:

B A 595 Internship (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2013

B A 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

B A 596A Behavioral Science in Business (3) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

B A 596B Prices and Markets (3) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014
B A 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 1987

B A 597A **Preparing for the Professoriate** (1) This course provides a hands-on approach to develop the above skills, essential to success in academia. Primarily for MKTG, SCIS and MGMT students. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

B A 597A **Preparing for the Professoriate** (2) This course provides a hands-on approach to develop the above skills, essential to success in academia. Primarily for MKTG, SCIS, and MGMT students. Effective: Spring 2015 Ending: Spring 2015 Future: Spring 2015

B A 597D **Advanced Microeconomic Analysis** (3) Topics in advanced microeconomic analysis including competitive analysis, game theory, and mechanism design. Effective: Spring 2015 Ending: Spring 2015 Future: Spring 2015

B A 599 (IL) **Foreign Study--Business Administration** (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established. Effective: Summer 2005
Prerequisite:

B A 601 **Ph.D. Dissertation Full-Time** (0) No description. Effective: Fall 1983

B A 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. Effective: Fall 1999

B A 611 **Ph.D. Dissertation Part-Time** (0) No description. Effective: Fall 1983

B A 850 **Sustainability Driven Innovation** (3) This course explores sustainability as a business opportunity for developing innovative products and services. It will focus on consumer needs related to sustainability, willingness to pay for these needs, and the innovative processes necessary to create sustainable solutions. Effective: Summer 2013

Last Import from UCM: May 24, 2014 3:00 AM
Business Economics (BUSEC)

BUSEC 502 Prices, Markets and Competitive Strategy (2) Determination of outputs and prices in markets used by the firm; market structure and the design of competitive strategy.
Effective: Summer 2004
Prerequisite:

BUSEC 503 Economic Environment of Business (2) Analysis of the regulatory and global economic environment within which the firm operates and its implications for business strategy.
Effective: Summer 2004
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Business Law (B LAW)

B LAW 424 (R M 424) Real Estate Law (3) Analyze contemporary law applicable to various types of ownership interests and rights, methods of transferring ownership, and use of real property.
Effective: Spring 2012
Prerequisite:

B LAW 425 (R M 425) Business and Environmental Regulation (3) Examines the interplay between environmental regulation and commercial activities, including property interests.
Effective: Spring 2012
Prerequisite:

Effective: Fall 2011
Prerequisite:

B LAW 444 Advanced UCC and Commercial Transactions (3) All articles of the Uniform Commercial Code, banking relationships, debtor-creditor law, and bankruptcy law.
Effective: Fall 2011
Prerequisite:

B LAW 445 Advanced Intellectual Property and Competition Law (3) Copyrights, trademarks, patents, and trade secrets followed by related topics in the regulation of competition.
Effective: Fall 2011
Prerequisite:

B LAW 446 Employment Law (3) Examines the legal and regulatory environment of employment relationships. Topics include anti-discrimination; worker health and safety; and labor relations laws.
Effective: Summer 2012
Prerequisite:

B LAW 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2011

B LAW 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2011

B LAW 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

B LAW 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

B LAW 497A (R M 497B) Entertainment Law (3) Provide students with an understanding of fundamental issues in entertainment law that arise in a business context.

B LAW 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

B LAW 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2011

B LAW 525 Business Law for Innovation and Competition (2) Nature of intellectual property rights, as well as process for obtaining and enforcing them.
Effective: Summer 2011

B LAW 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

B LAW 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2011

Effective: Summer 2011

Last Import from UCM: May 24, 2014 3:00 AM
Business Logistics (B LOG)

B LOG 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Winter 1978

B LOG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

B LOG 597 Special Topics (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

B LOG 599 (IL) Foreign Study--Business Logistics (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Cardiology-Hy (CAR)

CAR 713 Cardiovascular Medicine (1-2) Course provides exposure to basic concepts in histology/pathology, biochemistry, physiology, pharmacology, and clinical medicine related to cardiovascular medicine.
Effective: Summer 2014
Prerequisite:

CAR 722 Cardiology (4.5) These areas will be studied: Symptoms and Signs; Systemic Arterial Hyper-tension; Atherosclerosis; Heart Failure; Congenital Heart Disease; Infectious, Inflammatory, and Immunologic Disease; Connective Tissue Disorders; Electrical Abnormalities; and Lipid Disorders.
Effective: Fall 2001
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Cell & Molec Biol-Hy (CMBIO)

CMBIO 590 Colloquium (1-3) Continuing seminars which consist of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2011
Prerequisite:

CMBIO 594 Research topics (1-18) Supervised student activities on research projects identified on an individual or group basis.
Effective: Spring 2011
Prerequisite:

CMBIO 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2007

CMBIO 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 2011
Prerequisite:

CMBIO 600 Thesis Research (1-15) No description.
Effective: Spring 2007

CMBIO 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 2007

CMBIO 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1986

CMBIO 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 2011
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Cellular/Mollec Bas (CMBMP)

CMBMP 711 Cellular and Molecular Basis of Medical Practice (7) This integrated course includes topics in biochemistry, physiology, pharmacology, and molecular genetics. Effective: Summer 1997
Prerequisite:

CMBMP 712 Cellular and Molecular Basis of Medical Practice (7) Continuation of CMBMP 711. Effective: Summer 1997
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Ceramic Science (CERSC)

CERSC 590 Colloquium (1-3) Current developments in ceramic science and related fields. Required of all graduate students in ceramic science.
Effective: Summer 1988

CERSC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

CERSC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

CERSC 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

CERSC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Chemical Engineering (CH E)

CH E 410 Mass Transfer Operations (3) Introduction to principles and applications of mass transfer, with focus on the design of equilibrium stage and continuous contacting separation processes. 
Effective: Fall 2013 
Prerequisite:

CH E 423 Chemical Energy Technology (3) This course provides an overview of current and prospective chemical energy storage and conversion technologies. 
Effective: Spring 2013 
Prerequisite:

CH E 430 Chemical Reaction Engineering (3) Chemical reaction rates and equilibria, reactors, reactor design; emphasis on industrial chemical processes. 
Effective: Fall 2013 
Prerequisite:

CH E 432 (F SC 432) Petroleum Processing (3) A study of physical and chemical processes to convert crude oil into desired products with an outlook from present to future. 
Effective: Summer 2007 
Prerequisite:

CH E 438 Bioprocess Engineering (3) Introduction to the biotechnology field including consideration of upstream and downstream processing of biochemicals. 
Effective: Summer 2007 
Prerequisite:

CH E 442 (MATSE 448) Polymer Processing Technology (3) Basic principles of polymer melt processing are reviewed and subsequently applied to the most important industrial processing operations. 
Effective: Fall 2006 
Prerequisite:

CH E 446 Transport Phenomena (3) Fundamental treatment of mass, heat, and momentum transfer; emphasis on transport properties and mathematical models of chemical engineering transport processes. 
Effective: Spring 2006 
Prerequisite:

CH E 446H Transport Phenomena (3) Fundamental treatment of mass, heat, and momentum transfer; emphasis on transport properties and mathematical models of chemical engineering transport processes. 
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014 
Prerequisite:

CH E 448 Advanced Mass Transfer Operations (3) Diffusion and mass transfer as applied to stagewise and continuous contact operations, including equipment design. 
Effective: Spring 2006 
Prerequisite:

CH E 449 Bioseparations (3) Analysis and design of separation processes for the purification of biological molecules. 
Effective: Spring 2006 
Prerequisite:

CH E 450 Process Dynamics and Control (3) Analysis of time-dependent variables in chemical process plants; reactor design and control; computer applications. 
Effective: Spring 2006 
Prerequisite:

CH E 452 Chemical Process Safety (3) This course provides an overview of Process Safety in the Chemical Industry, focusing on the nature of chemical plant accidents. 
Effective: Spring 2007 
Prerequisite:

CH E 470 Design of Chemical Plants (3) Lectures and practicum on methods and calculations, including economic evaluations for the design of chemical plants; formal technical report required. 
Effective: Spring 2006 
Prerequisite:

CH E 480M Chemical Engineering Laboratory (Honors) (3) Data interpretation and analysis from student-operated experiments on pilot-plant equipment. Individual written and oral technical reports. 
Effective: Fall 2013 
Prerequisite:

CH E 480W Chemical Engineering Laboratory (3) Data interpretation and correlation from student-operated experiments on pilot-plant equipment. Individual written and oral technical reports. 
Effective: Fall 2013 
Prerequisite:

CH E 494 Research Projects in Chemical Engineering (1-6) An original problem, including a search of the literature, experimental investigation, and preparation in formal thesis form.
CH E 494H *Research Projects in Chemical Engineering (Honors)* (1-6) An original problem, including a search of the literature, experimental investigation, and preparation in formal thesis form.

CH E 496 *Independent Studies* (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

CH E 497 *Special Topics* (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

CH E 497B *Physics of Community* (3) Students will examine decision-making processes for social systems, using principles of Chemical Engineering, including reactions, transport, and separations.

CH E 497C *Polymers* (3) Introduction to synthesis, structure, characterization and processing of polymers. Single molecule properties, polymer solutions, glasses, crystals and blends.

CH E 497D *Engineering Product Design* (3) Students develop skills and techniques for managing and executing engineering design projects that are applied to projects sponsored by industry.

CH E 499 (IL) *Foreign Studies* (1-12) Courses offered in foreign countries by individual or group instruction.

CH E 501 (BIOE 501) *Bioengineering Transport Phenomena* (3) Application of the equations of mass, energy, and momentum conservation to physiological phenomena and to the design of artificial organs.

CH E 503 (BIOE 503) *Fluid Mechanics of Bioengineering Systems* (3) Cardiovascular system and blood flow, non-Newtonian fluid description, vessel flows, unsteady flows and wave motion, windkessel theory, transmission line theory.

CH E 503 (BIOE 503) *Fluid Mechanics of Bioengineering Systems* (3) Cardiovascular system and blood flow, non-Newtonian fluid description, vessel flows, unsteady flows and wave motion, windkessel theory, transmission line theory.

CH E 510 (MATSE 510) *Surface Characterization of Materials* (3) Physical and chemical principles of characterization techniques widely used in materials science, chemistry and engineering.

CH E 524 *Chemical Engineering, Application of Thermodynamics* (3) Elements of thermochemistry and thermodynamics of greatest importance in chemical engineering.

CH E 528 *Colloidal Forces and Thermodynamics* (3) Unified treatment of formation, growth and stability of colloids based on principles of intermolecular and colloidal forces and thermodynamics.

CH E 535 *Chemical Reaction Engineering* (3) Optimal design of batch and continuous chemical reactors and reactor batteries; effect of mixing on reactor operation.

CH E 536 *Heterogeneous Catalysis* (3) Thermodynamics and kinetics of adsorption and reactions on solid surfaces, heat and mass transfer effects, theory and correlations in catalysis.
CH E 544 General Transport Phenomena (3) Formulation and solution of transport problems involving momentum, heat, and mass transfer, with chemical engineering applications. Effective: Spring 2007
Prerequisite:

CH E 545 Transport Phenomena I (3) Momentum transport, laminar and turbulent flow, boundary layer analysis, non-Newtonian flow, mechanical energy balance, chemical engineering applications. Effective: Fall 1982

CH E 546 Transport Phenomena II (3) Heat and mass transfer, steady and unsteady state, coupling, molecular diffusion, moving boundaries, transfer coefficients, chemical engineering applications. Effective: Fall 1982

CH E 576 (C E 576) Environmental Transport Processes (3) Fundamentals of chemical transport in engineered environments, such as biofilm reactors, and natural systems including aquifers and rivers. Effective: Fall 2001
Prerequisite:

CH E 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Summer 1988

CH E 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 2004

CH E 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

CH E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 1987

CH E 597A Topics in Statistical Thermodynamics and Stochastic Processes (3) Probabilistic foundation of statistical thermodynamics with applications to stochastic processes, including molecular systems, stochastic populations, and networks and graphs. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

CH E 597B Research Topics in Chemical Engineering (1) Lecture and discussion by visiting faculty and engineers on the most recent topics in Chemical Engineering. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

CH E 597C Membrane Separations and Transport (3) This course will focus on membrane separations fundamentals and applications primarily for aqueous separations. Low pressure, high pressure and electrically as well as osmotically driven membrane separations will be covered in detail. A module will cover biological membrane transport and modeling. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

CH E 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction. Effective: Fall 2007
CH E 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

CH E 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

CH E 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Opportunity for supervised and graded teaching experience for graduate students in chemical engineering.
Effective: Fall 1983
Prerequisite:

CH E 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

CH E 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Chemistry (CHEM)

CHEM 400 Chemical Literature (1) Instruction in use of the library and of the literature of chemistry.
Effective: Summer 2007
Prerequisite:

CHEM 402 Chemistry in the Environment (3) Chemistry of the atmosphere, natural waters, and the land surface with particular focus on human influence on processes occurring therein.
Effective: Summer 2007
Prerequisite:

CHEM 406 (NUC E 405) Nuclear and Radiochemistry (3) Theory of radioactive decay processes, nuclear properties and structure, nuclear reactions, interactions of radiation with matter, biological effects of radiation.
Effective: Summer 2007
Prerequisite:

CHEM 408 Computational Chemistry (3) Introduction to numerical and nonnumerical computer uses in physical science.
Effective: Summer 2007
Prerequisite:

CHEM 410 Inorganic Chemistry (3) Conceptual and descriptive aspects of nontransition elements, covering structural, thermodynamic, and kinetic features.
Effective: Summer 2007
Prerequisite:

CHEM 412 Transition Metal Chemistry (3) Structure and bonding of compounds containing transition metals.
Effective: Summer 2007 Ending: Summer 2014
Prerequisite:

CHEM 412 Transition Metal Chemistry (3) Structure and bonding of compounds containing transition metals.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

CHEM 413 Chemistry of the Elements (4) Theoretical and descriptive chemistry of the elements; laboratory synthesis and measurements in inorganic, coordination, and transition metal chemistry.
Effective: Fall 2012
Prerequisite:

CHEM 423W Chemical Spectroscopy (4) Modern methods and instruments of spectroscopy and their applications to problems of chemical structure and analysis.
Effective: Spring 2013 Ending: Summer 2014
Prerequisite:

CHEM 423W Chemical Spectroscopy (4) Modern methods and instruments of spectroscopy and their applications to problems of chemical structure and analysis.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

CHEM 425 Chromatography and Electrochemistry (3) Gas, liquid, and other forms of chromatography; important techniques of electrochemistry.
Effective: Spring 2013
Prerequisite:

CHEM 427W (FRNSC 427W) Forensic Chemistry (4) Analytical and instrumental methods used in the forensic sciences with special emphasis on the analysis and characterization of trace evidence.
Effective: Fall 2012
Prerequisite:

CHEM 430 Structural Analysis of Organic Compounds (3) Spectroscopic methods as tools in gross and detailed structural analysis and interpretation within the framework of modern theory.
Effective: Fall 2010
Prerequisite: Concurrent: CHEM 213

CHEM 431W Organic and Inorganic Preparations (4) Preparation, purification, and characterization of both organic and inorganic compounds by modern methods.
Effective: Fall 2010
Prerequisite:

CHEM 432 Organic Reaction Mechanisms (3) The study, evaluation, and discussion of the mechanisms of selected organic reactions.
Effective: Summer 2012
Prerequisite:

CHEM 440 Instrumental Analysis (3) General instrumental theory and methods used in common atomic and molecular analyses.
Effective: Summer 2007
Prerequisite:
CHEM 441 Elemental Analysis and Instrumental Design Laboratory (1) An introduction to the use of modern instruments for problems in chemical structure and analysis. Effective: Summer 2007
Prerequisite:

CHEM 443 Electrochemistry and Chromatography Laboratory (1) An introduction to the use of modern instruments for problems in chemical structure and analysis. Effective: Summer 2007
Prerequisite:

CHEM 445 Atomic and Molecular Spectroscopy Laboratory (1) An introduction to the use of modern instruments for problems in chemical structure and analysis. Effective: Summer 2007
Prerequisite:

CHEM 446 X-Ray Crystallography (3) Theoretical and practical aspects of structure determination using x-ray diffraction, from crystal growth to structure solution. Effective: Summer 2007
Prerequisite:

CHEM 448 Surface Chemistry (3) Surface chemistry, emphasizing the physical and chemical aspects of surfaces important for applications in colloids, catalysis, microelectronics and biocompatibility. Effective: Summer 2007
Prerequisite:

CHEM 450 Physical Chemistry - Thermodynamics (3) Introduction to physical chemistry with primary emphasis on chemical thermodynamics and its molecular interpretation. Graduate credit not allowed for students majoring in Biochemistry and Molecular Biology, Chemistry, or Chemical Engineering. Effective: Summer 2007
Prerequisite:

CHEM 452 Physical Chemistry - Quantum Chemistry (3) Introduction to physical chemistry with primary emphasis on molecular structure, spectroscopy, and chemical kinetics. Graduate credit not allowed for student majoring in Biochemistry and Molecular Biology, Chemistry, or Chemical Engineering. Effective: Summer 2007
Prerequisite:

CHEM 457 Experimental Physical Chemistry (1-2 per semester/maximum of 2) Laboratory experiments designed to illustrate the principles of physical chemistry and teach techniques of error analysis and the presentation of quantitative data. Graduate credit not allowed for student majoring in Biochemistry and Molecular Biology, Chemistry, or Chemical Engineering. Effective: Summer 2007
Prerequisite:

CHEM 459W Advanced Experimental Physical Chemistry (4) Laboratory experiments and projects for students interested in advanced study in physical chemistry. Effective: Summer 2010
Prerequisite:

CHEM 464 Chemical Kinetics and Dynamics (3) Introduction to chemical kinetics and molecular dynamics. Effective: Spring 2009
Prerequisite:

CHEM 466 Molecular Thermodynamics (3) Introduction to physical chemistry with a primary emphasis on the statistical and molecular interpretation of thermodynamics. Effective: Summer 2007
Prerequisite:

CHEM 472 General Biochemistry I (3) Basic structure and function of cellular components; principles of enzyme kinetics and regulation. Effective: Summer 2007
Prerequisite:

Prerequisite:

CHEM 476 Biological Chemistry (3) Fundamentals of Biochemistry for Chemists. Students cannot receive credit for both CHEM 476 and B M B 401. Effective: Fall 2009 Ending: Summer 2014
Prerequisite: Concurrent: CHEM 452

CHEM 476 Biological Chemistry (3) Fundamentals of Biochemistry for Chemists. Students cannot receive credit for both CHEM 476 and B M B 401. Effective: Fall 2014 Future: Fall 2014
Prerequisite:

CHEM 494 Chemical Research (1-10 per semester/maximum of 20) Experimental investigation of an original research problem. Preparation of a formal thesis is optional. (Credit not allowed for graduate students in Biochemistry, Chemistry or Chemical Engineering.)
CHEM 494H Chemical Research (1-10 per semester/maximum of 20) Experimental investigation of an original research problem. Preparation of a formal thesis is optional. (Credit not allowed for graduate students in Biochemistry, Chemistry or Chemical Engineering.)
Effective: Fall 2007

CHEM 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2007
Prerequisite:

CHEM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1988

CHEM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1982

CHEM 497A Biological Chemistry (3) The subject of this course is biological chemistry, or the molecular logic of the chemistry of life. This course presents the nomenclature, structure, synthesis, and reactivity of organic molecules with an emphasis upon reaction mechanisms and topics of relevance to biochemistry. This knowledge will then be applied to the understanding of the design and function of common pharmaceutical products.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

CHEM 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

CHEM 500 Seminar in Chemistry (1-2 per semester) No description.
Effective: Spring 2001

CHEM 516 Inorganic Chemistry (3) Overview of systematic inorganic chemistry including main group, transition metal, lanthanide, and actinide chemistry.
Effective: Spring 2013

CHEM 517 Organometallic Chemistry (3) Organometallic compounds and their use in catalysis and organic synthesis.
Effective: Summer 1990

CHEM 518 Symmetry and Spectroscopy in Inorganic Chemistry (3 per semester) Group theoretical methods and spectroscopies of importance in modern inorganic chemistry.
Effective: Spring 2013
Prerequisite:

CHEM 519 Materials Chemistry (3) An overview of the role played by chemistry in the field of materials science.
Effective: Fall 2012
Prerequisite:

CHEM 524 Electroanalytical Chemistry (3) Electrochemical principles, techniques, and analytical applications.
Effective: Spring 2013

CHEM 525 (BMMB 525) Analytical Separations (3) Fundamentals and application of modern chromatographic separations.
Effective: Spring 2013

CHEM 526 Spectroscopic Analysis (3) An overview of modern instrumental techniques including FTIR, optical spectroscopy, mass spectrometry, and electron spectroscopies.
Effective: Spring 2013

CHEM 535 Physical Organic Chemistry (3) Reactive intermediates, reaction kinetics and thermodynamics, solvent effects, conformational analysis, reaction mechanisms, noncovalent interactions in synthesis, and stereochemistry.
Effective: Spring 2013
Prerequisite:

CHEM 536 Medicinal Chemistry (3) Topics from classical bioorganic chemistry, modern chemical biology, and organic chemistry related to drug design and drug action.
Effective: Spring 2013
Prerequisite:

CHEM 537 Organic Synthesis (3) Organic synthesis including both classical and modern synthetic methodology as well as
CHEM 538 (BMMB 538) Spectroscopic Methods in Bioinorganic Chemistry (3) Foundations in spectroscopic methods employed for the determination of the geometric and electronic structure of transition metal clusters in nature.
Effective: Spring 2013
Prerequisite:

CHEM 539 (BMMB 539) Biochemical Reaction Mechanisms (3) Mechanisms of the most important biochemical reactions, with emphasis on enzyme catalysis.
Effective: Spring 2013
Prerequisite:

CHEM 540 Biophysical Chemistry (3) Structure of biomacromolecules, physical techniques for the study of structure and function, thermodynamic and kinetic studies of biomacromolecules in solution.
Effective: Spring 2013
Prerequisite:

CHEM 543 (MATSE 543) Polymer Chemistry (3) This graduate course discusses the new advances in polymer chemistry that leads to new polymeric materials with interesting structures and properties.
Effective: Spring 2005
Prerequisite:

CHEM 544 Chemical Thermodynamics (3) Development of thermodynamic theory, with special reference to common physical changes and chemical reactions.
Effective: Fall 1984
Prerequisite:

CHEM 545 Statistical Thermodynamics (3) Basic principles of statistical mechanics with application to the calculation of thermodynamic properties of gases and condensed phases.
Effective: Summer 2007
Prerequisite:

CHEM 560 Topics in Physical Chemistry (2-6) No description.
Effective: Fall 1983

CHEM 563 Chemical Dynamics (3) Molecular dynamics of chemical reaction, energy transfer, and scattering. Reaction rate theory and experiment.
Effective: Fall 1986
Prerequisite:

CHEM 565 Quantum Chemistry I (3) A foundation in the principles of quantum mechanics and their applications to chemistry.
Effective: Spring 2013
Prerequisite:

CHEM 566 Quantum Chemistry II (3) Additional techniques in quantum mechanics, with applications to problems in molecular structure and light-matter interactions.
Effective: Spring 2013
Prerequisite:

CHEM 567 Molecular Spectroscopy (3) Principles and applications of classical and modern spectroscopic methods.
Effective: Spring 2013
Prerequisite:

CHEM 572 (BMMB 572) Nucleic Acids Chemistry (3) Biophysical and biochemical approaches for studying structure-function relationships in nucleic acids.
Effective: Spring 2013
Prerequisite:

CHEM 573 (BMMB 573) NMR Spectroscopy for Synthetic and Biological Chemistry (3) Nuclear magnetic resonance approaches for characterizing the structure and dynamics of synthetic compounds, natural products, and biological macromolecules.
Effective: Fall 2012
Prerequisite:

CHEM 589 Studies in Chemistry (1-9) Theoretical research, experimental research, or a critical survey of the literature in an area of chemistry.
Effective: Winter 1978

CHEM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

CHEM 600 Thesis Research (1-15) No description.
Effective: Fall 1983
CHEM 601 **Ph.D. Dissertation Full-Time** (0) No description.  
Effective: Fall 1983

CHEM 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching of chemistry undergraduate laboratory and recitation classes with senior faculty instruction supervision.  
Effective: Fall 1983

CHEM 610 **Thesis Research Off Campus** (1-15) No description.  
Effective: Fall 1983

CHEM 611 **Ph.D. Dissertation Part-Time** (0) No description.  
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Chinese (CHNS)

CHNS 401 (IL) **Level Three Chinese A** (4) Emphasis on oral proficiency through discussions of aspects of contemporary Chinese culture. Effective: Spring 2011
Prerequisite:

CHNS 402 (IL) **Level Three Chinese B** (4) Readings in representative works of traditional and modern literature; practice in composition; study of aspects of Chinese culture. Effective: Spring 2011
Prerequisite:

CHNS 403W **Level Four Chinese A** (4) Continuation of CHNS 402. Aims to improve students' proficiency in all four language skills, with a special emphasis on writing. Effective: Fall 2012
Prerequisite:

CHNS 404 **Level Four Chinese B** (4) Continuation of CHNS 403W. Aims to improve students' proficiency in all four language skills through content-based language learning. Effective: Spring 2012
Prerequisite:

CHNS 410 (IL) **Chinese Through Film** (3) This course is designed for students who finish Level Two Chinese or higher and aims to help them develop Chinese proficiency through movies. Effective: Summer 2013
Prerequisite:

CHNS 411 (IL) **Chinese Written Characters** (3) This course aims to establish a solid foundation of students' Chinese orthography and prepare students for continuing study in subsequent Chinese courses. Effective: Summer 2013
Prerequisite:

CHNS 421 (IL) **China Beyond China** (3) Study of modern and contemporary Chinese culture in its diversity and its intercultural contexts. Effective: Summer 2011
Prerequisite:

CHNS 422 (IL) **Gender and Sexuality in China** (3) Study of gender roles and the imaginary of sexuality in the literary, filmic, and artistic production of modern China. Effective: Summer 2011
Prerequisite:

CHNS 423 (IL) **The Warrior, the Courtesan and the Ghost in Classical Chinese Novels** (3) This course provides an introduction to major classical Chinese novels by focusing on three character types: the warrior, the courtesan, and the ghost. Effective: Spring 2012
Prerequisite:

CHNS 424 (HIST 482) **Confucius and the Great Books of Early China** (3) This course familiarizes students with the critical texts and intellectual cultures of Warring States and early imperial China. Effective: Spring 2013 Ending: Summer 2014

CHNS 424 (HIST 482, ASIA 482) **Confucius and the Great Books of Early China** (3) This course familiarizes students with the critical texts and intellectual cultures of Warring States and early imperial China. Effective: Fall 2014 Future: Fall 2014

CHNS 426 (IL) **The Chinese Rhetorical Tradition** (3 per semester/maximum of 6) Study of the rhetorical works in ancient China as well as multiple facets of modern Chinese rhetoric. Effective: Summer 2011
Prerequisite: Concurrent: ENGL 471

CHNS 452 (IL) **Contemporary China: Culture and Trends** (3 per semester/maximum of 6) Survey of aspects of the contemporary Chinese-speaking world. Includes readings from Chinese newspapers, magazines, and fiction. Topics may vary each semester. Effective: Spring 2010
Prerequisite:

CHNS 453 (IL) **Chinese Film** (3 per semester/maximum of 6) Selected films and directors representing various aspects of Chinese culture and cinema. Topics may vary each semester. Taught in Chinese. Effective: Spring 2010
Prerequisite:

CHNS 454 (IL) **Introduction to Classical Chinese** (3 per semester/maximum of 6) Basic patterns and structures of Classical Chinese to the first millennium B.C. to the 19th century. Effective: Spring 2010
Prerequisite:

CHNS 455 (IL) **Masterpieces of Traditional Chinese Literature** (3) Survey of traditional Chinese literature, including poetry, historical narratives, philosophical texts, and drama and novel.
Effective: Spring 2010
Prerequisite:

CHNS 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2010

CHNS 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2010

CHNS 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2010

CHNS 496A **Level Two Chinese** (1-6) Continued audio-lingual practice of Mandarin Chinese, more extensive practice in reading and writing; study of Chinese culture.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

CHNS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2010

CHNS 497A **Essentials of Chinese Grammar** (3) Equip intermediate learners of Chinese with a comprehensive and profound understanding of the form, meaning and use of essential grammatical structures in Chinese.
Effective: Summer 2014 Ending: Summer 2014

CHNS 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2010

CHNS 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2010

CHNS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1997

CHNS 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

CHNS 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Civil Engineering (C E)

C E 410W Sustainable Residential Subdivision Design (3) Residential subdivision process; site selection; conservation and neo- traditional design; utility design and layout; best management practices for erosion and stormwater.  
Effective: Fall 2001  
Prerequisite:  

C E 421W Transportation Design (3) Design of streets and highway facilities; emphasis on geometric elements, intersections and interchanges, roadway drainage, and pavement design.  
Effective: Spring 2002  
Prerequisite:  

C E 422 Transportation Planning (3) Transportation systems planning, programming, and management; modeling and simulation, data collection, analysis, and forecasting.  
Effective: Spring 2002  
Prerequisite:  

C E 423 Traffic Operations (3) The highway capacity manual, concepts and analyses, freeway operations, signalized and unsignalized intersections, signal coordination, traffic impact studies.  
Effective: Spring 1997  
Prerequisite:  

C E 432 Construction Project Management (3) Fundamentals of project management, construction scheduling using the CPM technique, construction project preplanning, and control of quality, safety, and costs.  
Effective: Fall 2007  
Prerequisite:  

C E 435 Foundation Engineering (3) Bearing capacity, settlement, and structural design of shallow foundations; lateral earth pressure; retaining and sheet-pile walls; introduction to deep foundations  
Effective: Fall 2001  
Prerequisite:  

Effective: Fall 2001  
Prerequisite:  

C E 437 Engineering Materials for Sustainability (3) Environmental impact of materials; life-cycle assessment; material selection to optimize performance; design, evaluation, and production of green construction materials.  
Effective: Spring 2013  
Prerequisite:  

C E 438W Construction Engineering Capstone Design (3) Construction project integrating geotechnical reports; materials specifications; quality control; equipment; estimation; scheduling; design details: excavations, foundations, retaining walls, formwork, pavements.  
Effective: Fall 2007  
Prerequisite:  

C E 439W Geotechnical and Materials Engineering Design Capstone (3) Subsurface site evaluation; integrated design of retaining walls, foundations, pavements, and materials for airports, highways, dams, or other facilities.  
Effective: Spring 2013  
Prerequisite:  

C E 441 Structural Design of Foundations (3) Design of concentrically and eccentrically loaded square, rectangular, and combined footings; analysis and design of mat foundations; retaining walls; piles caps; flexible retaining design, and caissons.  
Effective: Spring 2013  
Prerequisite:  Concurrent: C E 342  

Effective: Spring 2008  
Prerequisite:  

Effective: Fall 1992  
Prerequisite:  

C E 448W Advanced Structural Design (3) Wind, snow, seismic, bridge loads; building design using steel, concrete, and prestressed concrete; advanced steel connections; capstone project; computer applications.  
Effective: Spring 2013  
Prerequisite:  

C E 449 Advanced Structural Design (3) Special systems, frames and bracing in steel, wood and reinforced or precast concrete. Introduction to composite construction.  
Effective: Spring 2008  

The Pennsylvania State University
Prerequisite:

C E 454 Safety (3) This course will focus on safety issues as they relate to OSHA.
Effective: Spring 2008
Prerequisite:

C E 456 Planning and Scheduling (3) Theory and practice used in planning and scheduling projects; defining task and resources, creating logic diagrams, and monitoring the projects.
Effective: Spring 2008
Prerequisite:

C E 458 Construction Management II (3) Procedures in construction organization including procurement, ethics, field supervision, legal and managerial problems, personnel, cost accounting, and construction business practices.
Effective: Spring 2008
Prerequisite:

C E 458 Water-resource Engineering (3) Qualitative and quantitative description of the hydrologic cycle, flood and drought frequency analysis, climate and land use change impacts, risk analysis and uncertainty, water resource management at regional, national and global scale.
Effective: Spring 2010
Prerequisite:

C E 462 Open Channel Hydraulics (3) Free surface flow in rivers, canals, steep chutes, stilling basins, and transitions.
Effective: Spring 2002
Prerequisite:

C E 465W Water Resources Capstone Course (3) Hydraulic design of river structures and open channels including supercritical and spatially varied flow; hydrologic/hydraulic computer modeling; design project.
Effective: Spring 2010
Prerequisite:

C E 472W Environmental Engineering Capstone Design (3) Principles and design of unit operations for water; domestic and industrial wastewater treatment; equipment selection and application.
Effective: Spring 2002
Prerequisite:

C E 475 Water Quality Chemistry (4) Chemistry applicable to the understanding and analysis of water quality, pollution, and treatment.
Effective: Spring 2011
Prerequisite:

C E 476 Solid and Hazardous Wastes (3) Characteristics and treatment of solid wastes and hazardous wastes.
Effective: Spring 2002
Prerequisite:

C E 479 Environmental Microbiology for Engineers (3) Intro microbiology for engineers; microbe structure, function, and diversity; environmental ecosystems; diagnostic labs.
Effective: Spring 2011
Prerequisite:

C E 488C Capstone Project - Construction (4) This course consists of a project either selected by the students with approval or assigned by the instructor.
Effective: Spring 2008
Prerequisite:

C E 488D Capstone Project - Structural Design (4) This course consists of a structural design project either selected by the students with approval or assigned by the instructor.
Effective: Spring 2008
Prerequisite:

C E 494 Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.
Effective: Fall 1992

C E 494H Honors Senior Thesis (1-6) Investigation of an original project in the area of Civil Engineering.
Effective: Summer 2006

C E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

C E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

C E 497A Building Information Modeling (3) Building Information Modeling (BIM) is a centralized data-rich virtual project model that facilitates documentation, design exploration, model-based quantity take off and estimating, interference checking, construction coordination and sequencing, digital fabrication and 3D building information capture and
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

C E 497B Ecological Engineering (3) Design, construction, and operation of wetland systems for water pollution control.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

C E 497C Residential Construction Design Project (1) Designed for students who have an interest in residential or real estate development. Interdisciplinary teams will develop a complete design and investment package for a real life new residential or real estate development.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

C E 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

C E 511 Engineering Soil Characteristics (3) Applications of physico-chemical principles in soil engineering; soil composition; factors influencing engineering soil properties.
Effective: Fall 1992
Prerequisite:

C E 512 Soil Mechanics II (2-5) Evaluation of strength parameters and compressibility of soils; elastic analysis of stress and strain; techniques of forecasting foundation settlement; slope stability analysis.
Effective: Fall 1992

C E 513 Advanced Foundation Engineering (3) Practical applications of soil mechanics principles to geotechnical engineering problems; dewatering techniques; design of deep foundations and retaining structures.
Effective: Fall 1992
Prerequisite:

C E 521 Transportation Networks and Systems Analysis (3) Techniques of transportation network, user, stochastic user, and variable demand equilibrium; transportation activity system; computer simulation techniques and forecasting methods.
Effective: Fall 1992
Prerequisite:

C E 522 Traffic Simulation and Control (3) Simulation theory, traffic modeling using GPSS, traffic signal optimization using TEXAS, EVIPAS, PASSERII, TRANSYT-7F, TRAF-NETSIM, FRESIM and CORFLO.
Effective: Summer 1997
Prerequisite:

C E 523 Analysis of Transportation Demand (3) Theories of travel behavior, least squares and maximum likelihood, estimation methods, continuous dependent variable models, utility maximization, discrete econometric techniques.
Effective: Fall 1992
Prerequisite:

C E 524 Advanced Problems in Civil Engineering Materials (2-6) Study in the literature and by laboratory investigation of selected topics on field-controlled civil engineering materials.
Effective: Summer 2011

C E 525 Traffic Flow Theory (3) Microscopic and macroscopic traffic flow characteristics; traffic stream models; shockwaves and queuing for traffic operations.
Effective: Spring 1997
Prerequisite:

C E 526 Highway and Street Design (3) Technical analysis of the design elements of roadways, alignment, cross-section features, and intersection and interchange design considerations.
Effective: Spring 1994
Prerequisite:

C E 527 Roadside Design and Management (3) Roadside safety and design, safety management, pavement management, lighting, signs, signals, and markings, clear zone, guiderail, impact attenuators.
Effective: Spring 1996
Prerequisite:

C E 528 Transportation Safety Analysis (3) Issues and methods in transportation safety analysis; factors contributing to crashes; crash causation; modeling accident occurrence; identifying sites for treatment.
Effective: Spring 2005
Prerequisite:

C E 531 Legal Aspects of Engineering and Construction (3) Basic legal doctrines, contractual relationships between parties, analysis of construction contract clauses, contract performance, and professional practice problems.
Effective: Fall 2001
Prerequisite:

C E 533 Construction Productivity Analysis and Performance Evaluation (3) Construction productivity concepts and models; productivity measurement, control, and forecasting; analysis of factors affecting productivity; methods.
improvement techniques.
Effective: Fall 1992
Prerequisite:

C E 539 Approximate Methods of Structural Analysis (3) Structural analysis through the application of initial-value methods, Newmark's method, Fourier series, finite difference techniques, and work and energy procedures.
Effective: Fall 1992
Prerequisite:

C E 540 Statically Indeterminate Structures (3) Analysis of statically indeterminate straight/curved beams, grids, 2D/3D frames, arches, cables, and shells using classical and modern techniques.
Effective: Spring 2005

C E 541 Structural Analysis (3) Theory of various finite elements as applied to civil engineering structures. Term paper required.
Effective: Fall 1992
Prerequisite:

C E 542 (A E 542) Building Enclosure Science and Design (3) The building enclosure: nature, importance, loadings; building science: control of heat, moisture, air, hygrothermal analysis; design: walls, windows, roofs, joints.
Effective: Summer 2002

C E 543 Prestressed Concrete Behavior and Design (3) Design and behavior of prestressed concrete structures: materials and systems loss, flexure, shear, bond, deflections, partial prestressing, continuous beams.
Effective: Summer 2003
Prerequisite:

C E 544 Design of Reinforced Concrete Structures (3) Advanced topics in design of reinforced concrete structures. Torsion and shear; beam moment-curvature; two-way slab systems; slender columns; strut- and-tie methodology.
Effective: Spring 2007

C E 545 Metal Structure Behavior and Design (3) Design philosophies and basis; seismic loading; fatigue; bending, column, plate, and beam-column stability; tapered members; torsion; connections; bracing; frame stability.
Effective: Spring 2007

C E 546 Reinforced Concrete Slabs (3) Behavior, analysis, and design of floor systems; elastic, ACI Code method, yield line theory; two-way, flat slab, flat plate.
Effective: Fall 1992
Prerequisite:

C E 548 Structural Design for Dynamic Loads (3) Dynamic behavior of structural systems of one and more degrees of freedom; earthquake, blast-resistant analysis, and design of structures.
Effective: Spring 2008
Prerequisite:

C E 549 Bridge Engineering I (3) Engineering of modern steel and concrete bridge structures; loading; analysis; design.
Effective: Spring 2000
Prerequisite:

C E 550 Engineering Construction Management (3) Management fundamentals for construction contracting; organization, project planning, scheduling and control, bonding and insurance, labor legislation and regulation, cost and control.
Effective: Fall 1992
Prerequisite:

C E 551 Random Processes in Hydrologic Systems (3) Hydrologic systems analysis, simulation; design using probability, time series and dynamical systems; formulating models, parameter estimation, environmental impact, resource assessment.
Effective: Summer 1996
Prerequisite:

C E 552 Coastal and Nearshore Processes (3) Hydrodynamics of the near-shore environment, including waves, currents, and storm surges. Coastal response, sediment transport, engineering structures.
Effective: Summer 2004
Prerequisite:

C E 555 Groundwater Hydrology: Analysis and Modeling (3) Introduction to groundwater resource analysis, model formulation, simulation, and design of water resource systems using symbolic and numerical methods.
Effective: Spring 1996
Prerequisite:

C E 561 Surface Hydrology (3) Quantification of the processes that govern the movement and storage of water near the land-surface including precipitation, evapotranspiration, and runoff.
Effective: Spring 2005

C E 563 Systems Optimization Using Evolutionary Algorithms (3) Comprehensive introduction to genetic and
evolutionary computation: genetic algorithms, evolutionary strategies, multi-objective optimization, parallelization approaches, and fitness approximation.

Effective: Spring 2005

C E 564 Sediment Transport in Alluvial Streams (3) River flow, river channel formation, the physical characteristics of rivers, responses of rivers to natural and human-made changes.
Effective: Spring 2005
Prerequisite:

C E 566 Uncertainty and Reliability in Civil Engineering (3) Introduction to probabilistic modeling, simulation, uncertainty analysis, and reliability estimates applied to civil engineering.
Effective: Spring 2005

C E 567 River Engineering (3) Introduction to river mechanics and fluvial geomorphology applied to problems of sediment transport and channel morphology.
Effective: Fall 1999

C E 570 Environmental Aquatic Chemistry (3) Speciation, reactivity, and distribution of contaminants in water, with emphasis in inorganic chemicals.
Effective: Fall 1992
Prerequisite:

C E 571 Physical-Chemical Treatment Processes (3) The theory of physical-chemical processes used in the treatment of potable water and municipal and industrial wastewaters.
Effective: Fall 1992
Prerequisite:

C E 572 Biological Treatment Processes (3) The theory and application of biological processes to treat organic wastes, including wastewater, solid residuals, and toxic priority pollutants.
Effective: Summer 2011
Prerequisite:

C E 573 Environmental Organic Chemistry (3) Theory, measurement, and estimation of the characteristics and environmental transformations of hazardous materials.
Effective: Spring 2000
Prerequisite:

C E 574 Laboratory Analyses in Water Quality Control (3) Experiments illustrating current chemical and biochemical methods of water and waste treatment and analytical methods used in research and control.
Effective: Fall 1992
Prerequisite:

C E 575 Industrial Waste Management (3) Surveys and analysis, pollution prevention, regulatory requirements, treatment and disposal of liquid, gaseous and solid residues.
Effective: Spring 1997
Prerequisite:

C E 576 (CH E 576) Environmental Transport Processes (3) Fundamentals of chemical transport in engineered environments, such as biofilm reactors, and natural systems including aquifers and rivers.
Effective: Fall 2001
Prerequisite:

C E 577 Treatment Plant Design (1-6) Design of works for the treatment of water and wastewater for municipalities and industries.
Effective: Fall 1992
Prerequisite:

C E 578 Groundwater Remediation (3) Application of fundamental physical/chemical/biological processes in natural and engineered systems for remediation of contaminated soil and groundwater.
Effective: Summer 2011
Prerequisite:

C E 579 Environmental Pollution Microbiology (3) Fundamentals of microorganisms in water and wastewater treatment; indicators of pollution; activities of microorganisms in polluted waters, including biogeochemical cycles.
Effective: Summer 2011

Effective: Spring 2005

C E 581 Pavement Management and Rehabilitation (3) Techniques of network and project level pavement management, field evaluation methods and equipment, maintenance and rehabilitation strategies, overlay design procedures.
Effective: Fall 1992
Prerequisite:

C E 582 Pavement Design and Analysis (3) Viscoelastic analysis; non-linear analysis; fatigue and permanent deformation;
C E 583 Bituminous Materials and Mixtures (3) Composition, physical behavior, production, and performance of bituminous materials and mixtures. Effective: Spring 1998

C E 584 Concrete Materials and Properties (3) Study of concrete properties and associated variables, prediction models, testing, preventative measures, pozzolans, admixtures. Effective: Spring 1997 Prerequisite:

C E 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 2012

C E 591 Environmental Engineering Seminar (1) Seminar topics selected by faculty and students based on research interests on topics related to environmental engineering and science. Effective: Spring 2005

C E 592 Environmental Engineering & Science Topics (1) Current topics in environmental engineering and science. Effective: Spring 2005

C E 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1992

C E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Fall 1992

C E 597A Human Factors in Transportation (3) Special topics in transportation engineering. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

C E 597A Traffic Operations on Highways and Urban Networks (3) This course will examine traffic operations on freeways and in urban networks, including traffic dynamics and methods on control. Effective: Spring 2015 Ending: Spring 2015 Future: Spring 2015

C E 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 1996

C E 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction. Effective: Spring 2008

C E 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 1992
C E 603 Foreign Academic Experience (1-9 per semester/maximum of 18) Foreign study and/or research constituting progress towards the degree at a foreign university.
Effective: Fall 2011

Effective: Fall 1992

C E 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1992

Last Import from UCM: May 24, 2014 3:00 AM
Classics and Ancient Mediterranean Studies (CAMS)

CAMS 400W Comparative Study of the Ancient Mediterranean World (3) Comparative study of ancient Mediterranean civilizations. Effective: Spring 2001 Prerequisite:

CAMS 405 (IL) Law & Economy in the Ancient Near East (3) This course is an overview of the legal and economic texts and institutions in the Ancient Near East. Effective: Spring 2009 Prerequisite:

CAMS 410 Classical Epic (3) Homer, Hellenistic Epic, and Vergil; influences on later epic. Effective: Spring 1998

CAMS 411W Classical Drama (3) Masterpieces of Greek tragedy (Aeschylus, Sophocles, Euripides) and comedy (Aristophanes, Menander); their influence on Roman writers. Effective: Spring 2001

CAMS 440W Studies in Classical and Ancient Mediterranean Archaeology (3-6) Selected topics in the literary sources and material evidence for classical and ancient Mediterranean society. Effective: Summer 2000 Prerequisite:

CAMS 442 (IL) (KINES 442) Sport in Ancient Greece and Rome (3) An examination of the continuity of sport in Greek and Roman societies. Effective: Spring 2008 Prerequisite:

CAMS 470 (IL) Languages and Cultures of the Ancient Near East (3) This course is an overview of the languages and cultures that populated the Ancient Near East. Effective: Spring 2009 Prerequisite:

CAMS 471 Sumerian (3) Introduction to the Sumerian language and the cuneiform writing system. Effective: Spring 2009 Prerequisite:

CAMS 472 Akkadian (3) Introduction to the Akkadian language (Babylonian & Assyrian) and the cuneiform writing system. Effective: Spring 2009 Prerequisite:

CAMS 480 (J ST 480) Greeks and Persians (3) Development and achievements of the Achaemenid kingdom; relationships between Persians and Greeks. Effective: Spring 2001 Prerequisite:

CAMS 481 (IL) Introduction to Middle Egyptian & Hieroglyphics (3) An introduction to the language and script of Ancient Egypt, familiarizing the student with grammar, syntax and lexicon. Effective: Summer 2012 Prerequisite:

CAMS 490 Ancient Mediterranean Languages (3-6) Variable topic study of an ancient language of the Mediterranean basin and related areas, other than Greek, Latin, or Hebrew. Effective: Summer 2011 Prerequisite:

CAMS 492 Intermediate Field Methods (3-6) On-site experience in archaeological fieldwork in the ancient Mediterranean region. Effective: Spring 2000 Prerequisite:

CAMS 493 Intermediate Field Analysis (3-6) On-site experience in archaeological analysis in the ancient Mediterranean region. Effective: Spring 2000 Prerequisite:

CAMS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 1997
CAMS 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2001

CAMS 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1999

CAMS 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 1996

CAMS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1997

CAMS 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Effective: Summer 2011
Prerequisite:

CAMS 503 Seminar on Ancient Mediterranean Languages (3 per semester, maximum of 6) An in-depth examination of the ancient languages of the Mediterranean basin, including Indo-European and non-Indo-European languages.
Effective: Summer 2011
Prerequisite:

CAMS 504 Topography of Ancient Rome (3) Lectures and readings on physical development of the ancient city of Rome from earliest habitation to time of later empire.
Effective: Spring 2007

CAMS 520 Advanced Sumerian (3) Advanced study of Sumerian grammar and cuneiform writing through the reading of Sumerian literary texts.
Effective: Summer 2009

CAMS 521 Advanced Akkadian (3) Advanced study of Akkadian grammar and the cuneiform script through the reading of texts in various dialects.
Effective: Summer 2009

CAMS 522 Comparative Semitics (3) Overview of the Semitic language family and introduction to its comparative linguistic study.
Effective: Summer 2009

CAMS 592 Proseminar (3) Introduction to the history, research methods, historiography of modern scholarship on ancient Mediterranean studies.
Effective: Summer 2008

CAMS 593 Research Seminar (3-6) Significant research experience in the fields represented by CAMS; guided supervision in the preparation of a scholarly article.
Effective: Summer 2008
Prerequisite:

CAMS 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1997

CAMS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2001

CAMS 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005

CAMS 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.

The Pennsylvania State University
Clinical Lrng Compet (CLC)

CLC 712 Clinical Learning Competencies I (3) This course will begin to develop the medical students' basic clinical reasoning methods, self-learning concepts and the development of clinical competencies.
Effective: Fall 2008
Prerequisite: Concurrent: Cellular and Molecular Basis of Medical Practice Biological Basis of Disease

CLC 713 Clinical Learning and Competencies I (1-2) This course will develop basic clinical reasoning methods, self-learning skills, and clinical competencies appropriate for first-semester medical students.
Effective: Summer 2014
Prerequisite: Concurrent: all first semester medical school courses

CLC 714 Clinical Learning and Competencies II (1-2) This course will continue development of basic clinical reasoning methods, self-learning skills, and clinical competencies appropriate for second-semester medical students.
Effective: Summer 2014
Prerequisite: Concurrent: all second semester medical school courses including hematology cardiology renal medicine and pulmonary medicine

CLC 721 Clinical Learning and Competencies II (8) This course will continue the development of medical students' basic clinical reasoning methods, self-learning concepts and development of clinical competencies that were provided in CLC 721.
Effective: Fall 2008
Prerequisite: Concurrent: HEM 721 CAR 722 PLM 726 REN 728 GI 729

CLC 722 Clinical Learning and Competencies III (5) This course will continue the development of medical students' basic clinical reasoning methods, self-learning concepts and development of clinical competencies that were provided in CLC 721.
Effective: Fall 2008
Prerequisite: Concurrent: NBS 725 MSC 727 DERM 720 REP 730 END 731 FCM 723 Behavioral Influences on Health

CLC 723 Clinical Learning and Competencies III (1-2) This course will further continue the development of basic clinical reasoning methods, self-learning skills, and clinical competencies appropriate for third-semester medical students.
Effective: Summer 2014
Prerequisite: Concurrent: all third semester medical school courses

CLC 724 Clinical Learning and Competencies IV (1-2) This course will continue development of basic clinical reasoning methods, self-learning skills, and clinical competencies for fourth-semester medical students.
Effective: Summer 2014
Prerequisite: Concurrent: the fourth semester medical school courses

Last Import from UCM: May 24, 2014 3:00 AM
Clinical&Transscience (CTS)

CTS 590 Colloquium (1 per semester/maximum of 3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2014

Last Import from UCM: May 24, 2014 3:00 AM
Co-Curricular Activ (COCUR)

COCUR 900 Moot Court Board (1 per semester/maximum of 6) See Handbook for Description. Effective: Fall 2009

COCUR 901A Member Arbitration L Rev (1 per semester/maximum of 6) See handbook for description. Effective: Spring 2011

COCUR 901E Member Environmental Law Review (1 per semester/maximum of 6) See handbook for description. Effective: Fall 2009

COCUR 901I Member Journal of Law and International Affairs (1 per semester/maximum of 6) See handbook for description. Effective: Fall 2011

COCUR 901P Member Penn State Law Review (1 per semester/maximum of 6) See handbook for description. Effective: Fall 2009

COCUR 902E Editor Environmental Law Review (2 per semester/maximum of 8) See handbook for description. Effective: Fall 2009

COCUR 902I Editor Journal of Law and International Affairs (2 per semester/maximum of 4) See handbook for description. Effective: Fall 2011

COCUR 902P Editor Penn State Law Review (2 per semester/maximum of 8) See handbook for description. Effective: Fall 2009

Prerequisite: COCUR 995D Appellate Moot Court Board (2) See Handbook for description. Effective: Fall 1998

Prerequisite:

Prerequisite:

COCUR 997 Special Topics (1-2 per semester/maximum of 2) Special topics. Effective: Fall 2013

Prerequisite:

The Pennsylvania State University
College Student Affs (CSA)

CSA 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2009

CSA 501 Introduction to Student Affairs (3) An introduction to student affairs in higher education with consideration of various functional areas of the profession.
Effective: Spring 2004

CSA 502 Organization and Administration in Student Affairs (3) Formulation of policies as guides to the student personnel service programs; integration of program elements; research; current problems and trends.
Effective: Spring 2004

CSA 503 Student Development in College Environments (3) This course covers the knowledge and methods of human development theories and their applications in college settings.
Effective: Fall 2003 Ending: Summer 2014

CSA 504 Research and Assessment in Student Affairs (3) This course provides the basic knowledge and skills necessary to plan, design, implement, and evaluation assessment programs in student affairs.
Effective: Fall 2003 Ending: Summer 2014

CSA 505 Capstone Seminar (2) This seminar provides advanced students an opportunity to apply concepts from previous course work to current issues facing student affairs.
Effective: Summer 2004

CSA 506 Campus Environments (3) Examination of theoretical concepts and empirical findings that describe the college environment and explain its impact on students and staff.
Effective: Summer 2009

CSA 507 Social Justice Issues in Higher Education (3) Exploration of diverse student population, their different experiences, and the value university communities place on these differences.
Effective: Fall 2010 Ending: Fall 2014

CSA 594 Research Topics (1-9) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2005

CSA 595 Internship (1-9) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2005

CSA 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2005

CSA 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2005

Last Import from UCM: May 24, 2014 3:00 AM
Communication (COMMU)

COMMU 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

COMMU 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

Last Import from UCM: May 24, 2014 3:00 AM
Communication Arts and Sciences (CAS)

CAS 402 Speech and Human Behavior (3) General semantics, thought, and human behavior; not offered at University Park campus.
Effective: Spring 2003

CAS 403 Interpersonal Communication Theory and Research (3) Examining behavior within interpersonal encounters, with emphasis on both theoretical/applied explanations for how and why people act during such interactions.
Effective: Spring 2003
Prerequisite:

CAS 404 Conflict Resolution and Negotiation (3) Theories and strategies important for conceptualizing, developing, and managing conflict negotiation, mediation, and third-party intervention.
Effective: Spring 2003
Prerequisite:

CAS 405 Family Communication Theory and Research (3) Explores the nature and functions of communication in family life; emphasis on meaning, patterns, and styles of family communication.
Effective: Summer 2002
Prerequisite:

CAS 406H Honors Course in Communication Arts and Sciences (3) Individual study and seminar in selected areas or issues of speech communication.
Effective: Spring 2003
Prerequisite:

CAS 409 (PL SC 409) Democratic Deliberation (3) Explores the theory and practice of democratic deliberation in elections, town meetings, juries, legislatures, and other public institutions.
Effective: Spring 2014
Prerequisite:

CAS 410W Mother-Daughter Communication (3) Explores the mother-daughter relationship with an emphasis on understanding mother-daughter communication.
Effective: Summer 2010
Prerequisite:

CAS 411 Rhetorical Criticism (3) Principles of rhetorical criticism examined through analysis of selected texts and critics.
Effective: Spring 2003
Prerequisite:

CAS 415 Rhetoric of Film and Television (3) Rhetorical analysis of the artistic forms and cultural structures of film and television; intensive study of selected examples.
Effective: Spring 2003
Prerequisite:

CAS 420 Rhetorical Theory (3) Ancient, medieval, Renaissance, Enlightenment, and contemporary theories of rhetoric.
Effective: Spring 2003
Prerequisite:

CAS 421 Communication and Aging (3) Concentrates on the pivotal role that communication plays in the social process of aging.
Effective: Summer 2007
Prerequisite:

CAS 422 (US) (AF AM 422) Contemporary African American Communication (3) A focused study on the continuities between African and African American culture and communication.
Effective: Spring 2013
Prerequisite:

CAS 426W Communication Ethics (3) Ethical issues in public and private communication; role of communication in expressing and realizing individual and social values.
Effective: Spring 2003
Prerequisite:

CAS 438 Rhetoric of Documentary (3) Rhetorical analysis of the documentary in film, television, and other media; historical and critical analysis of functions and form.
Effective: Spring 2003
Prerequisite:

CAS 450W Group Communication Theory and Research (3) Selected theories of problem solving through group discussion emphasizing participation and leadership.
Effective: Spring 2003
Prerequisite:

CAS 452 Organizational Communication Theory and Research (3) Explores the nature and functions of communication in organizations; emphasis on concepts, tools, and skills for effective management of communication.
Effective: Spring 2003
Prerequisite:

CAS 452W Organizational Communication Theory and Research (3) Explores the nature and functions of communication in organizations; emphasis on writing and exploring concepts, tools, and skills for effective management of communication.
Effective: Spring 2004
Prerequisite:

CAS 453 Health Communication Theory and Research (3) Principles of communication about health across the lifespan and within health-care contexts.
Effective: Spring 2006
Prerequisite:

CAS 455 (US) (WMNST 455) Gender Roles in Communication (3) Explores the literature on gender research in the discipline of human communication.
Effective: Summer 2005
Prerequisite:

CAS 460H Introduction to Honors Thesis (3) This course will guide students through steps that result in Honors Thesis Proposal.
Effective: Summer 2013
Prerequisite:

CAS 470 Nonverbal Communication (3) Examining ways nonverbal messages, such as gestures, posture, vocal intonation, and facial expressions, affect us on a daily basis.
Effective: Spring 2003
Prerequisite:

CAS 471 (US;IL) Intercultural Communication Theory and Research (3) Intercultural and cross-cultural communication research theory and practice as applied within and across national boundaries.
Effective: Summer 2005
Prerequisite:

CAS 475 Studies in Public Address (3) History and criticism of public discourse; intensive analysis of selected public addresses and social movements.
Effective: Spring 2003
Prerequisite:

CAS 478 Contemporary American Political Rhetoric (3) Analysis of selected speeches, debates, and persuasive campaigns and movements in recent American political history.
Effective: Spring 2003
Prerequisite:

CAS 480 Group Performance of Literature (3) Applying storytelling skills and performance theory to the group presentation of literature; criticism of literature through group presentations.
Effective: Spring 2003
Prerequisite:

CAS 483 Communication and Information Technology II (3) Theory and application of interactive internet-based communication and information management; for students who want a Liberal Arts approach.
Effective: Fall 2003
Prerequisite:

CAS 490 Peer Tutoring for Public Speaking (3) This course will prepare students to become peer tutors in public speaking.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

CAS 494 Research Topics (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2003
Prerequisite:

CAS 494H Research Topics (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Summer 2008
Prerequisite:

CAS 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2003
Prerequisite:

CAS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2002

CAS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2002
CAS 497A **Interpersonal Influence** (3) Examines how individuals in friend, family, and work relationships create and evaluate messages intended to change the behavior of others.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

CAS 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2002

CAS 498A **Lesbian and Gay History** (3) Critical exploration of the history of sexuality, focusing especially on the emergence of modern lesbian and gay identities.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

CAS 498A **Communication, Training, and Development** (3) Instruction in the knowledge and skills needed to effectively design and deliver customized training programs; specific focus on the role of communication systems and rhetoric in the process.

CAS 499 (IL) **Foreign Studies** (1-9) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

CAS 500 **Historical Public Address** (3 per semester, maximum of 9) Special topics in American public address, 1765-1900; emphasis on rhetoric of revolution, reform, and reaction.
Effective: Spring 2003

CAS 503 **Rhetorical Criticism** (3 per semester/maximum of 6) An advanced seminar in the history, theory, methods, and practice of rhetorical criticism.
Effective: Spring 2003
Prerequisite:

CAS 504 **Contemporary Public Address** (3 per semester, maximum of 9) Special topics in recent history of American public address, including speeches, debates, persuasive campaigns, and social movements in America 1900-present.
Effective: Summer 2002

CAS 505 **Historical Development of Rhetorical Theory** (3 per semester/maximum of 9) Study of one or more periods of rhetorical theory from Greek antiquity to 1900.
Effective: Spring 2005
Prerequisite:

CAS 506 **Contemporary Rhetorical Theory** (3 per semester/maximum of 6) A study of rhetorical theory from 1930 to the present, focusing on semantic, political, sociological, symbolic, and philosophical perspectives.
Effective: Spring 2005
Prerequisite:

CAS 507 **Issues in Rhetorical Theory** (3 per semester, maximum of 6) Theoretical, analytical, philosophical, and critical problems in human communication, with application of humanistic and social scientific research framework.
Effective: Fall 2003
Prerequisite:

CAS 515 **Rhetoric and Media** (3 per semester, maximum of 9) Seminar in the application of rhetorical theory and criticism to television, film, and other media.
Effective: Spring 2003

CAS 530 **Political Communication and Media** (3) Study of rhetorical and communicative dimensions of contemporary political communication with particular attention to electronic media.
Effective: Spring 2004

CAS 550 **Social Influence** (3 per semester/maximum of 6) Theory and devices of persuasion; analysis of persuasive discourse.
Effective: Spring 2003
Prerequisite:

CAS 553 (PHP 553) **Disaster Communication** (3) This seminar provides students with a comprehensive understanding of the multifaceted nature of disaster communication across phases of a disaster.
Effective: Spring 2012

CAS 554 **Small Group Communication** (3 per semester/maximum of 6) Communication variables in small groups. Experimental research and innovations in communication in vocational, therapeutic, and educational groups.
Effective: Fall 2003
CAS 555 Interpersonal Communication (3 per semester/maximum of 6) Investigation of the communicative management of ongoing relationships; examination of how communication both creates and responds to exigencies of friendship. Effective: Spring 2003
Prerequisite:

CAS 556 Relational Communication (3) Examines theories and research focused on understanding communication in intimate (or potentially intimate) relationships. Effective: Spring 2003
Prerequisite:

CAS 557 Health Communication (3) Provides experience in making decisions about planning, implementing, and evaluating communication in community-based health campaigns to achieve health promotion/education. Effective: Summer 2002
Prerequisite:

CAS 558 Family Communication (3) Examines theories and research focused on understanding communication in family contexts. Effective: Spring 2003
Prerequisite:

CAS 559 Lifespan Communication (3) How various communication processes such as language skills, interpersonal relationship definition and management, social support change cross the lifespan. Effective: Spring 2003
Prerequisite:

CAS 560 Communication Theory (3) This course introduces graduate students to the philosophical underpinnings of communication research and develops skills in theory construction. Effective: Summer 2002
Prerequisite:

CAS 561 Quantitative Research Methods (3) Introduces graduate students to principles, issues, and design considerations underlying social scientific methodology; material is applied to communication research. Effective: Summer 2002
Prerequisite:

CAS 562 Qualitative Research Methods (3) Qualitative approaches to investigating human experience using tools such as interviewing and observation. Effective: Spring 2008

Prerequisite:

CAS 581 (APLNG 581) Discourse Analysis (3) Overview of theories and approaches to the analysis of spoken and/or written discourse. Effective: Spring 2004

CAS 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 2004

CAS 594 Research Topics (1-12) Supervised student activities on research projects identified on an individual or small group basis. Effective: Spring 2004
Prerequisite:

CAS 595 Internship (1-9) Supervised off-campus, nongroup instruction. Effective: Spring 2004
Prerequisite:

CAS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2004

CAS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Fall 2002

CAS 597A Communication Information and Advice (3) This course examines how information and advice contribute to
decision making and problem solving, with a focus on communication processes that influence how information and advice are received and utilized. Readings draw from multiple disciplines, and emphasis is placed on synthesizing from diverse sources to improve theory and research.

CAS 600 Thesis Research (1-15) No description.
Effective: Spring 2004

CAS 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 2004

CAS 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Students enrolled will, under supervision, teach SPCOM 100--introduction to speech communication: formal speaking, group discussion, analysis and evaluation of messages.
Effective: Spring 2004

CAS 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2004

CAS 610 Thesis Research Off Campus (1-15) No description.
Effective: Spring 2004

CAS 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 2004

Last Import from UCM: May 24, 2014 3:00 AM
Communication Disorders (CMDIS)

CMDIS 610 Thesis Research Off Campus (1-15) No description.
Effective: Spring 1992

CMDIS 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 1992

Last Import from UCM: May 24, 2014 3:00 AM
## Communication Sciences and Disorders (CSD)

**CSD 433 Aural Rehabilitation** (3) Methods for improving receptive skills of persons with hearing impairments; clinical observation and practice.  
Effective: Fall 2003  
Prerequisite:  

**CSD 442 Introduction to Disorders of Articulation and Phonology** (3) Etiology, diagnosis, and treatment of articulation disorders.  
Effective: Fall 2010  
Prerequisite:  

**CSD 444 Introduction to Organic Disorders of Speech and Language** (3) Etiology, diagnosis, and principles of treatment of stuttering, and of speech-language disorders having organic bases.  
Effective: Fall 2010  
Prerequisite:  

**CSD 451 An Introduction to Augmentative and Alternative Communication** (3) Examination of assessment and intervention issues in augmentative and alternative communication techniques with persons with severe communication disorders.  
Effective: Fall 2010  
Prerequisite:  

**CSD 459W Principles of Clinical Management in Communication Disorders** (3) Survey of principles and practices for diagnosing, interviewing, counseling, treating, reporting, and programming in Communication Disorders.  
Effective: Fall 2010  
Prerequisite:  

**CSD 462 (US;IL) Clinical Bases of Language Disorders** (3) Description of pathological language and cognitive development, and principles of assessment and remediation among individuals with communication disorders.  
Effective: Fall 2010  
Prerequisite:  

**CSD 494H Senior Honors Thesis** (1-6) Independent study related to a student's interests directed by a faculty supervisor and culminating in the production of a thesis.  
Effective: Spring 2006  
Prerequisite:  

**CSD 495A Speech Therapy Practicum** (1-6) Demonstration and practice in examination, diagnosis, and treatment of speech problems.  
Effective: Spring 2013  
Prerequisite:  

**CSD 495B Audiology Practicum** (1-5) Demonstration and practice in examination, diagnosis, and treatment of hearing impairment problems.  
Effective: Spring 2013  
Prerequisite:  

**CSD 496 Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Fall 2003  

**CSD 497 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Fall 2003  

**CSD 497H Neural Mechanisms of Speech and Language** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014  

**CSD 500 Research Methods in Communication Sciences and Disorders** (3) Methodology necessary for understanding and conducting research in communication disorders.  
Effective: Spring 2004  
Prerequisite:  

**CSD 520 Physiologic and Acoustic Issues in Speech Science** (3) Seminar in the physiologic and acoustic aspect of normal and disordered speech production.  
Effective: Spring 2004  
Prerequisite:  

Effective: Spring 2006  
Prerequisite:
CSD 541 The Voice and Its Disorders (3) Physical, physiological, and psychological bases of voice production; causes, nature, and symptoms of its disorders; current clinical methods in voice improvement. Effective: Spring 2006
Prerequisite:

CSD 542 Stuttering (3) Modern theories of causes of disorders of rhythm; methods of examination, diagnosis, and treatment. Effective: Spring 2004
Prerequisite:

CSD 545 Neuromotor Disorders of Speech (3) Etiology and symptomatology of dysarthric and apraxic speech: diagnosis, treatment, and the team rehabilitative program approach to these disorders. Effective: Spring 2006
Prerequisite:

Prerequisite:

Prerequisite:

CSD 548 Dysphagia (3) Understanding the process of the swallowing mechanism and the management and treatment of swallowing disorders. Effective: Summer 2006
Prerequisite:

CSD 549 Speech-Language Pathologists in the Schools (3) Topics concerning service delivery in the school setting; legislation related to service delivery, special education enrollment, collaboration, caseload management, special populations. Effective: Summer 2006

CSD 550 Seminar in Communication Sciences and Disorders (1-6) Advanced study of special problems and new developments in communication sciences and disorders. Effective: Spring 2006

CSD 551 Assessment and Intervention in Augmentative and Alternative Communication (3) Research results in augmentative and alternative communication (AAC); implications for assessment, prescription of AAC systems, and intervention planning in AAC. Effective: Spring 2006

CSD 595A Speech/Language Intervention (1-3) Instruction in and application of therapy procedures, including a weekly class and direct therapeutic intervention with individuals across the lifespan. Effective: Spring 2006

CSD 595C Speech/Language Therapy Externship (7-15) Full-time clinical experience in speech/language intervention and assessment procedures at an off-campus site. Effective: Spring 2006
Prerequisite:

CSD 595G Speech/Language Diagnostics Practicum (1-2) Instruction in and application of assessment procedures, including pre- and post-evaluation meetings and direct assessment with individuals across the lifespan. Effective: Spring 2006

CSD 595I Speech Pathology Mini-Placement (1-6) Part-time clinical experience in speech/language intervention and assessment procedures at an off-campus site. Effective: Spring 2006

CSD 595J Audiology Third Site (1-2) Internship course. Effective: Spring 2004

CSD 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2004

CSD 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
CSD 597C **Issues and Phonological Assessment and Intervention** (2) This seminar will introduce students to the principles of phonological processing. Students will learn to assess clients with disordered phonological processes. Intervention strategies using evidence based practices will be reviewed.
Effective: Summer 2003 Ending: Summer 2014

CSD 597E **Craniofacial Anomalies-Cleft Lip and Cleft Palate** (1) This seminar will introduce students to the etiology, assessment and treatment of craniofacial anomalies. Special focus on treatment of resonance disorders associated with cleft lip and cleft palate.
Effective: Summer 2014 Ending: Summer 2014

CSD 600 **Thesis Research** (1-15) No description.
Effective: Spring 2005

CSD 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Spring 2005

CSD 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description.
Effective: Spring 2005
Prerequisite:

CSD 603 **Foreign Academic Experience** (1-12 per semester/maximum of 12) For students who are enrolled in a foreign university, or foreign study and/or research and constituting progress towards the degree.
Effective: Spring 2013

Last Import from UCM: May 24, 2014 3:00 AM
Communications (COMM)

COMM 400 In the Game: TV Sports Magazine (3) Students will produce, report, anchor and direct half-hour sports magazine show.
Effective: Spring 2014
Prerequisite:

COMM 401 Mass Media in History (3) Relationship of news media to social, economic, and political developments in the Western world.
Effective: Fall 1986

COMM 402 International Reporting (3) International Reporting is an advanced level course in the College of Communications designed to give student journalists experience in reporting the news in a foreign country.
Effective: Summer 2011
Prerequisite:

COMM 403 Law of Mass Communications (3) Nature and theories of law; the Supreme Court and press freedom; legal problems of the mass media.
Effective: Fall 1986

COMM 403H Law of Mass Communications (3) Nature and theories of law; the Supreme Court and press freedom; legal problems of the mass media.
Effective: Spring 2006

COMM 405 Political Economy of Communications (3) Structure and functions of American and other mass communications systems and their relationship to political and economic systems.
Effective: Spring 2011
Prerequisite:

COMM 405H Political Economy of Communications (3) Structure and functions of American and other mass communications systems and their relationship to political and economic systems.
Effective: Spring 2011
Prerequisite:

COMM 406 Electronic News Gathering and Editing (3) Intermediate level skills in creating and editing television news packages.
Effective: Spring 2008
Prerequisite:

COMM 407A Media and Government (3) This course examines the relationship between politics, governance, and news media, and provides a foundation for understanding media’s role in public policy.
Effective: Summer 2012
Prerequisite:

COMM 407B Perspectives on American Journalism (3) The course examines a number of current issues and topics surrounding journalism including: ethics, state of the industry, and news vs. entertainment.
Effective: Summer 2012
Prerequisite:

COMM 407C Media and World Politics (3) COMM 407C helps to make sense of the impact of media, public opinion and non-state actors shaping foreign policy.
Effective: Spring 2013
Prerequisite:

COMM 408 (S T S 408) Cultural Foundations of Communications (3) Examination of oral, scribal, print, industrial, and electronic cultures; analysis of impact of technology on communications and social structure.
Effective: Spring 2009
Prerequisite:

COMM 409 News Media Ethics (3) Ethical problems in the practice of journalism; principal public criticisms of news media; case study approach.
Effective: Fall 2006

COMM 409H News Media Ethics (3) Ethical problems in the practice of journalism; principal public criticisms of news media; case study approach.
Effective: Fall 2006

COMM 410 (IL) International Mass Communications (3) The role of international media in communication among and between nations and peoples.
Effective: Spring 2014
Prerequisite:

COMM 411 Cultural Aspects of the Mass Media (3) The mass media as creators and critics of mass culture in American
COMM 411H Cultural Aspects of the Mass Media (3) The mass media as creators and critics of mass culture in American life; relationships between the media and mass culture.
Effective: Spring 2009
Prerequisite:

COMM 412 Sports, Media and Society (3) Sport and media relationship in American culture.
Effective: Summer 2006

COMM 413 The Mass Media and the Public (3) Nature of mass communications, relationships between mass media and public, media influences on opinion; social pressures on the media.
Effective: Spring 2009
Prerequisite:

COMM 413W The Mass Media and the Public (3) Social-level and political theories of the relationships between media and public; media influences on public opinion; social pressure on the media; political communications.
Effective: Spring 2011
Prerequisite:

COMM 414 Media Management (3) Theoretical bases and practical approaches for management and administration of communications projects, organizations, and resources.
Effective: Spring 2008
Prerequisite:

COMM 415 Advanced Photography for Communications (3) Advanced applications in documentary photography emphasizing the narrative qualities of imagery, and utilizing digital technologies.
Effective: Fall 2010
Prerequisite:

COMM 417 Ethics and Regulation in Advertising and Public Relations (3) Ethical issues in practice of advertising and public relations; legal and regulatory issues; case studies.
Effective: Spring 2007
Prerequisite:

COMM 418 Media Effects: Theory and Research (3) Investigation of social and psychological effects of media messages and technologies via theories and empirical evidence pertaining to processes of effects.
Effective: Spring 2007
Prerequisite:

COMM 419 (US;IL) World Media Systems (3) Comparative study of modern mass systems and the evolution and structure of specific countries’ systems.
Effective: Spring 2014
Prerequisite:

COMM 419H (US;IL) World Media Systems (3) Comparative study of modern media systems of mass communications in selected foreign countries.
Effective: Spring 2009
Prerequisite:

COMM 420 Research Methods in Advertising and Public Relations (3) Primary and secondary research methods used in the development of solutions to advertising and public relations problems.
Effective: Summer 2002
Prerequisite:

COMM 421W Advertising Creative Strategies (3) Planning, designing, writing advertisements; introduction to graphics and production techniques and processes; layout and copywriting practice and critiques.
Effective: Spring 2004
Prerequisite:

COMM 422 Advertising Media Planning (3) Analysis, selection, and scheduling of advertising media; examination of algorithms, technologies, and software used in media planning.
Effective: Fall 1986
Prerequisite:

COMM 424 Advertising Campaigns (3) Advertising campaign problems from the viewpoint of the national advertiser and advertising agency; production of a complete advertising campaign.
Effective: Spring 2007
Prerequisite:

COMM 425 Advanced Advertising Campaigns (3) An academic option for student AAF members who will develop an integrated advertising campaign to be presented in District competition.
Effective: Spring 2013
Prerequisite:

COMM 426 International and Intercultural Strategic Communication (3) Advertising and public relations in the international and intercultural arenas; multicultural strategic communications strategies.
Effective: Summer 2006
Prerequisite:
COMM 427 Client/Agency Relations (3) Building and maintaining client/agency relationships in advertising, public relations and direct response agency business functions.
Effective: Summer 2006
Prerequisite:

COMM 428A Principles of Strategic Communications (3) Principles of Strategic Communications provides an overview of the various media and communications methods that comprise modern integrated marketing campaigns.
Effective: Summer 2012 Ending: Summer 2014
Prerequisite: Concurrent: COMM 260W

COMM 428A Principles of Strategic Communications (3) Principles of Strategic Communications provides an overview of the various media and communications methods that comprise modern integrated marketing campaigns.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

COMM 428B Strategic Communications Law (3) Analysis of laws and regulations affecting online advertising and strategic communications.
Effective: Summer 2012
Prerequisite:

COMM 428C Strategic Communications in a Global Environment (3) Strategic Communications in a Global Environment will provide students with a framework for applying public relations and advertising tools across media platforms and across cultures.
Effective: Summer 2012
Prerequisite:

COMM 428D Research & Analytics (3) This course covers online research methods for strategic communication, including web analytics, online surveys, online interviews, and content analysis.
Effective: Summer 2012 Ending: Fall 2014
Prerequisite:

COMM 428D Research & Analytics (3) This course covers online research methods for strategic communication, including web analytics, online surveys, online interviews, and content analysis.
Effective: Spring 2015 Future: Spring 2015
Prerequisite:

COMM 428E Social Media Strategies (3) This course covers social media theory, tools and best practices to prepare students for current and future use of social media.
Effective: Summer 2012
Prerequisite:

COMM 430 Mass Media and Politics (3) Study of mass media as institutions and the effects of the mass media on politics, public policy, and citizens.
Effective: Spring 2008
Prerequisite:

COMM 433 Film History for Filmmakers II: The Development of the Cinema from 1960 to the Present (3) History of the art, industry, economics, culture, and technology of cinema from 1960 to the present.
Effective: Summer 2010
Prerequisite:

COMM 436 Advanced Audio Production (3) Advanced concepts and techniques of audio production in analog and digital formats with hands-on experience in recording, mixing and editing.
Effective: Spring 2008
Prerequisite:

COMM 437 Advanced Documentary Production (3 per semester/maximum of 6) Advanced exploration of documentary production techniques and aesthetics through the completion of a short video project.
Effective: Spring 2011
Prerequisite:

COMM 438 Advanced Narrative Production (3 per semester/maximum of 6) Advanced exploration of narrative production techniques and aesthetics through the completion of a short film or video project.
Effective: Spring 2011
Prerequisite:

COMM 439 Advanced Alternative Production (3 per semester/maximum of 6) Advanced exploration in experimental and animation forms through the production of a film or video project.
Effective: Spring 2011
Prerequisite:

COMM 440 Advanced Cinematography and Lighting Techniques (3) Advanced exploration in camera, lighting, audio, and color-grading techniques, emphasizing technical skills as well as aesthetics.
Effective: Spring 2011
Prerequisite:

COMM 441 Advanced Graphic Design for Communications (3) Theory and practice designing graphic visual communication in commercial, non-commercial, and fine art formats for print and on-line media.
Effective: Spring 2011
Prerequisite:

**COMM 443 Producing Workshop** (3) This course will immerse students in the language and practice of producing film and video projects.
Effective: Spring 2011
Prerequisite:

**COMM 444 Advanced Post-Production Techniques** (3) This course offers intensive practical experience in editing, motion graphics and sound mixing techniques, emphasizing both technical skills and aesthetics.
Effective: Summer 2010
Prerequisite:

**COMM 445 Directing Workshop** (3) An advanced aesthetic and skill production course in directing for the screen.
Effective: Spring 2011
Prerequisite:

**COMM 446 Writing for the Screen II** (3) An advanced course in screenwriting that further develops elements of storytelling technique.
Effective: Spring 1994
Prerequisite:

**COMM 448 Advanced Group Production I** (3) A two semester advanced production course emphasizing intensive collaborative film-video production from script through post-production.
Effective: Spring 2011
Prerequisite:

**COMM 449 Advanced Group Production II** (3) Continuation of advanced production course emphasizing intensive collaborative film-video production from script through post-production.
Effective: Spring 2011
Prerequisite:

**COMM 451 (AM ST 451) Topics in American Film** (3 per semester, maximum of 6) Critical and historical studies of American films. Analysis of directing, cinematography, editing, screenwriting, and acting.
Effective: Fall 2013
Prerequisite:

**COMM 452 Topics in International Cinema** (3 per semester, maximum of 6) Critical and historical studies of topics in non-American film. Analysis of theory, direction, cinematography, editing, and screenwriting.
Effective: Summer 1989
Prerequisite:

**COMM 453 (IL) (CMLIT 453) Narrative Theory: Film and Literature** (3) Comparative study of the aesthetics and techniques of film and literature; close analyses of masters of each art form.
Effective: Fall 2006
Prerequisite:

**COMM 454 Documentary in Film and Television** (3 per semester, maximum of 6) Study of representative films from various documentary movements, examining form, technique, trends, and audience objectives.
Effective: Spring 2001
Prerequisite:

**COMM 455 Advanced Film Theory and Criticism** (3 per semester, maximum of 6) Close examination of classic and contemporary film theory and critical perspectives.
Effective: Summer 1989
Prerequisite:

**COMM 456 Media Criticism and Theory** (3) Critical and theoretical approaches to the analysis of media and communication.
Effective: Spring 2008
Prerequisite:

**COMM 457 Media Audiences and Contexts** (3) Survey of the ways media attempt to influence audience reception and how audiences hold sway over media content.
Effective: Spring 2008
Prerequisite:

**COMM 458 Media Law and Ethics** (3) The study and practice of key issues in media law and ethics, including libel law, conflict of interest, truth in advertising.
Effective: Spring 2008
Prerequisite:

**COMM 459 Cultural Effects of Interactive and Online Media** (3) Study of the global social impact and rhetorical limitations of converging media, emphasizing cross-cultural media influences.
Effective: Spring 2008
Prerequisite:

**COMM 460W Reporting Methods** (3) Techniques in reporting news and trends at the local, regional, and county levels. Emphasis on both deadline and interpretive reporting.
Effective: Fall 1990
Prerequisite:
COMM 461 Magazine Writing (3 per semester/maximum of 6) Students will learn about idea conception, writing, and editing of magazine stories. Effective: Spring 2013
Prerequisite:

COMM 462 Feature Writing (3) Reporting and writing the human interest article for newspapers and magazines. Effective: Spring 2008
Prerequisite:

COMM 463 Newspaper Design (3) This course will cover newspaper design. Students will learn to solve design problems, edit photos, and work with industry software. Effective: Spring 2009
Prerequisite:

COMM 464W Editorial, Opinion and Commentary Writing (3) Introduces techniques of editorial, opinion and commentary writing. Effective: Spring 2008
Prerequisite:

COMM 465 Television Reporting (3) Television news reporting and production. Effective: Spring 2008
Prerequisite:

Prerequisite:

COMM 466 Public Affairs Broadcasting (3) Students research, write, produce and direct public affairs shows and in-depth reports. Effective: Fall 2014 Future: Fall 2014
Prerequisite:

COMM 467 News Editing and Evaluation (3) Concepts and procedures involved in processing news for various news media, but with emphasis on print media editing. Effective: Spring 2001
Prerequisite:

COMM 468 Graphic Applications in Print Communications (3) Issues, concepts, and practice identified with contemporary design strategies for print journalism, advertising, and public relations. Effective: Summer 1989
Prerequisite:

COMM 469 Photography for the Mass Media (3) Development of an informed and critical approach to photo communication; individual and team projects, seminars, and critiques. Effective: Fall 1986
Prerequisite:

COMM 470A Convergent Media News Service: Newspaper Production (3) Practicum emphasizing newsgathering and reporting for newspaper and for additional media formats. Effective: Summer 2002
Prerequisite:

COMM 470B Convergent Media News Service: TV (3) Practicum emphasizing television news package production for periodic campus news program and for additional media formats. Effective: Summer 2002
Prerequisite:

COMM 470C Convergent Media News Service: Radio and Online Publications (3) Practicum emphasizing streaming radio news package production or production of news pieces for online publications and for additional media formats. Effective: Fall 2008
Prerequisite:

COMM 471 Public Relations Media and Methods (3) Analyzing media and audiences for public relations purposes; planning, designing, and writing public relations communications; press relations and publicity methods. Effective: Spring 2004
Prerequisite:

COMM 472 Public Relations Event Planning (3) Effective planning, organization, implementation and evaluation of events planning. Effective: Spring 2008
Prerequisite:

COMM 473 Public Relations Campaigns (3) Case studies and problems in publicity and public relations in industry, government, and institutions. Effective: Spring 2012
Prerequisite:

COMM 474 Depth Reporting (3) Exploration of strategies for developing indepth newspaper or magazine articles, with an emphasis on gathering information and long-form writing. Effective: Spring 2004
Prerequisite:

COMM 475 Issues for Newsroom Managers (3) Newspaper and television management, the state of the industry and topics that prospective employees should know about. Effective: Spring 2004
Prerequisite:

COMM 476 Sports Writing (3) Techniques in sports reporting and writing for newspapers and magazines. Effective: Summer 2005 Ending: Summer 2014
Prerequisite:

COMM 476 Sports Writing (3) Techniques in sports reporting and writing for media. Effective: Fall 2014 Future: Fall 2014
Prerequisite:

COMM 477 Sports Broadcasting (3) Techniques of sports broadcasting for radio and television. Effective: Summer 2005
Prerequisite:

COMM 478 Sports Information (3) Techniques of effective media relations used in a sports information office. Effective: Summer 2005
Prerequisite:

COMM 479 Telecommunication Economics (3) Economic, regulatory/business issues in the design/operation of large-scale telecommunication networks such as telephone, cable, wireless, and computer networks. Effective: Fall 2011
Prerequisite:

COMM 480 Television News (6) Produce a weekly television newscast. Effective: Fall 2011
Prerequisite:

COMM 481 Advanced Multimedia Production (3) Advanced work in multimedia production using web authoring, video editing, audio editing, image editing and animation software. Effective: Fall 2010
Prerequisite:

COMM 482 Advanced Communication Workshop (4) Conceptualization, planning, and execution of a visual product on a selected topic utilizing an intensive group project-oriented laboratory approach. Effective: Spring 2008
Prerequisite:

COMM 483 Wireless Communications Industry (3) A broad examination of the wireless phone industry including its development, current structure and future. Effective: Spring 2011
Prerequisite:

COMM 484 Emerging Telecommunications Technologies (3) Overview of technology of electronic media and related societal issues. Effective: Spring 1992
Prerequisite:

COMM 484H Emerging Telecommunications Technologies (3) Overview of technology of electronic media and related societal issues. Effective: Spring 2005
Prerequisite:

Prerequisite:

COMM 486 Telecommunications Ethics (3) Drawing on normative theory and political philosophy, this course explores problems in ethics and social responsibility in telecommunications. Effective: Summer 2011
Prerequisite:

COMM 487 Advanced Telecommunications Management and Leadership (3) Strategic management, leadership and ethics issues including marketing, financing, entrepreneurship, and innovation. Effective: Fall 2011
Prerequisite:

COMM 488 Writers’ Seminar (3) Workshop designed for advanced students interested in professional writing, involving extensive mutual and self-criticism. Effective: Spring 2008
Prerequisite:

COMM 489W Media and Information Industries (3) The structure, conduct and performance of firms and industries in the electronic media and information sectors. Effective: Spring 2004
Prerequisite:
COMM 490 **Issues in Electronic Commerce: Policy and Implementation** (3) Analysis of policy, strategic issues, and implications raised by the rapid growth of electronic commerce over the Internet.  
Effective: Fall 2001  
Prerequisite: 

COMM 490A **Convergent Media Seminar** (3) This seminar examines media convergence issues, trends, and effects on society through discussions, presentations, and creation of a capstone project.  
Effective: Summer 2002  
Prerequisite: 

COMM 491 **International Telecommunications and Trade Policy** (3) Development in the law, policy, and business of international telecommunications; emphasis on multilateral forums--International Telecommunications Union and World Trade Organization.  
Effective: Fall 2001  
Prerequisite: 

COMM 492 **Internet Law and Policy** (3) Development in the law, policy, and business of Internet-mediated communications and commerce; emphasis on impact on existing legal, regulatory, and economic models.  
Effective: Fall 2001  
Prerequisite: 

COMM 493 **Entrepreneurship in the Information Age: Senior Seminar** (3) Provides students with knowledge/tools to take their innovation/technology idea through the business planning, capital, and operations budgeting processes.  
Effective: Fall 2001  
Prerequisite: 

COMM 494 **Research Project Courses** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.  
Effective: Spring 1994  

COMM 494H **Research Project Courses** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.  
Effective: Fall 2007  

COMM 495 **Internship** (1-3 per semester/maximum of 6) Supervised practicum with newspapers, broadcasting stations, public relations, and advertising agencies.  
Effective: Spring 2008  
Prerequisite: 

COMM 495A **Internship** (1-6 per semester/maximum of 6) Supervised practicum with newspapers, broadcasting stations, public relations, and advertising agencies.  
Effective: Spring 2008  
Prerequisite: 

COMM 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Fall 1986  

COMM 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Fall 1986  

COMM 497A **Promotional Video Agency** (3) Advanced experience in a team environment producing strategic communication videos for campus clients, including those in athletics and academic units. Students will fill a variety of roles related to strategic marketing, including needs analysis, developing solutions, managing client relations and creating effective video.  
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014  

COMM 497B **International Documentary Production** (3) UP classroom work will consist of research and proposal of a short personal observation film. Students will shoot their film during an 9 day trip to Ireland. Project will be edited upon return, and shown at final screening June 11.  
Effective: Summer 2014 Ending: Summer 2014  

COMM 497F **Sports Journalism Projects** (3) Students will trave to Ireland to cover the Croke Park Classic, with the stories, photos, and multimedia elements produced by the students distributed in real time to the commonwealth’s newspaper through the Pennsylvania News Media Association. On their return, the team will produce a final round of stories to be packaged in the Lion's Roar, a College of Communications showcase.  
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014  

COMM 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Fall 2001
COMM 498A In the Game (3) Produce half-hour sports magazine style show to air on College HD channel and Web. Students will produce, report, anchor and direct the show. Registration by application.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

COMM 498B Wireless Devices and Global Markets (3) Wireless Devices and Global Markets is a new course that examines the market for wireless devices, from Android smartphones to iPhones and iPads. Students will learn about next generation smartphones and get to develop a unique product design concept.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

COMM 498C Business Reporting (3) Skills of business reporting and writing for the news media.

COMM 498D Business of Sports Journalism (3) Contemporary issues where business and sports intersect in the college and professional ranks.

COMM 499 (IL) Foreign Study--Mass Communications (1-12) Study of mass communication systems and practices in selected foreign countries.
Effective: Summer 2005
Prerequisite:

COMM 501 Proseminar in Mass Communications (3 per semester/maximum of 99) Overview of paradigms in mass communications research
Effective: Spring 2003
Prerequisite:

COMM 502 Pedagogy in Communications (3) The purpose of this seminar is to train doctoral students to teach in the communications discipline at the college/university level.
Effective: Spring 2004

COMM 504 Seminar in the History of Mass Communication (3) No description.
Effective: Fall 1986

COMM 505 International Communication Problems (3) Legal and communications problems of the international flow of news and opinion; international press codes.
Effective: Fall 1986

COMM 506 Introduction to Mass Communications Research (3) The scientific method; survey of basic concepts of theoretical and empirical research; variety of methodology; criteria for adequate research.
Effective: Fall 1986 Ending: Fall 2014

COMM 506 Research Methods in Communications (3) The scientific method; survey of basic concepts of theoretical and empirical research; variety of methodology; criteria for adequate research.
Effective: Spring 2015 Future: Spring 2015

COMM 507 News Media and Public Opinion (3) Problems in the function, techniques, and responsibilities of press, radio, and television in forming and interpreting opinion.
Effective: Fall 1986

COMM 508 The Literature of Journalism (3) No description.
Effective: Fall 1986

COMM 510 Comparative Theories of Press Systems (3) Institutional structure and normative functions of press systems in modern societies, as shaped by prevailing world view and social organization.
Effective: Fall 1986

COMM 511 Mass Communications Research Methods II (3) Problems of bibliographical research; evaluation of sources and materials in mass communications history, biography, structure, ethics, and other areas.
Effective: Fall 1986
Prerequisite:

COMM 512 Government and Mass Communications (3) Problems of freedom of information; governmental efforts to control mass communication agencies; government news coverage; public information agencies.
Effective: Fall 1986

COMM 513 Constitutional Problems of the News Media (3) Problems involving conflict between guarantees of press freedom in the First and Fourteenth Amendments and rights and privileges of others.
Effective: Fall 1986
COMM 514 Political Economy of Communications (3) Structure and functions of United States and global media systems and their relationship to political and economic systems.
Effective: Fall 2003

COMM 515 MA Proseminar in Mass Communications (3) An introduction to graduate studies for MA students in Media Studies and Telecommunications Studies.
Effective: Fall 2003
Prerequisite:

COMM 516 Introduction to Data Analysis in Communications (3) To understand and be able to use data analysis techniques common to research in communications.
Effective: Spring 2004
Prerequisite:

COMM 517 Psychological Aspects of Communication Technology (3) Investigation of psychological aspects of human-computer interaction (HCI) and computer-mediated communication (CMC).
Effective: Spring 2007
Prerequisite:

COMM 518 Media Effects (3) Advanced study of the effects of media messages and technologies via theories and empirical evidence pertaining to processes of effects.
Effective: Spring 2005
Prerequisite:

COMM 520 Seminar in Advertising Problems (3) No description.
Effective: Fall 1986

COMM 521 Advertising Perspectives (3) An overview of advertising in industrial societies including institutional issues; socio-demographic issues; public policy issues; and ethical issues.
Effective: Spring 1992

COMM 522 Social and Cultural Aspects of Advertising (3) Analysis of advertising from a cultural-literary perspective; emphasis on semiotic and hermeneutic analysis; advertising as social communication.
Effective: Spring 1992

COMM 550 Film Theory and Criticism (3) Studies in traditional and contemporary film theory and criticism.
Effective: Spring 2005

COMM 553 Special Problems in Film and TV (1-3) No description.
Effective: Fall 1986

COMM 555 Media and Culture (3) An overview and history of critical theories that aim to explain the relationship between media and culture.
Effective: Summer 2014

COMM 580 Seminar in Telecommunications (3) Study of the historical and contemporary issues and problems in telecommunications.
Effective: Fall 1986

COMM 582 Ethics and Emerging Communications Technology (3) Identification and analysis of ethical issues raised by electronic communications technologies.
Effective: Spring 2004

COMM 583 Seminar on United States Telecommunications Policy (3) Examination of the United States telecommunications policy process and current issues.
Effective: Spring 2004

COMM 584 International Telecommunications and Trade Policy (3) An interdisciplinary perspective that investigates contemporary debates and ongoing or anticipated conflicts in international telecommunications and trade policy.
Effective: Fall 2000

COMM 585 Media & Telecommunications Industries (3) Study the structure and performance of media, telecommunications and information industries applying principles and ideas from microeconomics, finance and communications.
Effective: Spring 2005

COMM 587 Internet Law and Policy (3) Examination of legal, policy and business developments in Internet-mediated...
communications emphasizing the impact on existing regulatory and economic models.
Effective: Summer 2003

COMM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

COMM 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2000

COMM 594A Telecommunications Studies Masters Paper (3) A significant research paper completed under the direction of a faculty adviser.
Effective: Spring 2002
Prerequisite:

COMM 594B Research Project Apprenticeship (1-3 per semester, maximum of 3) Provides opportunities for doctoral students to enhance their knowledge of comparative research methods by working on established faculty research projects.
Effective: Spring 2002
Prerequisite:

COMM 595 Internship (1-18) Supervised off-campus, non-group instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2000

COMM 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1986

COMM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

COMM 597A (ADTED 597B) The Public Pedagogy of Consumerism, US Media, and Popular Culture (3) This discussion based course will focus on the connections among media, popular culture, informal education, and consumer society, with particular attention to global and international implications.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

COMM 597B Advanced Data Analysis (3) An examination of advanced data analytic techniques in communications, with an emphasis on applied understanding and hands-on application of data-analysis software.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

COMM 597C Advanced Qualitative Methods (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

COMM 597D Media Innovation and Entrepreneurship (3) This special topics seminar is a grounding in the emerging scholarly agenda in media innovation and entrepreneurship. The focus is on entrepreneurs, the people who start media enterprises and their contribution to broadening the marketplace of ideas. Readings and discussion of foundational topics include: entrepreneurship theory and research, the media environment, and recent research and methods in media entrepreneurship, in teaching digital media and mapping the research agenda.
Effective: Summer 2014 Ending: Summer 2014

COMM 597E Cultural Industries (3) This course will provide an introduction to the scholarly study of the cultural industries, exploring how scholars have theoretically and methodologically engaged them as cultural entities/sites of practice/ideological constructs. As such, it seeks to parse out terms, concepts, and scholarship related to understanding the ideology/praxis nexus connected to creativity as sets of processes/negotiations under capitalist imperatives and dynamics. Critical to all of this is discerning the dialogic relationship between culture and these industries which operate in contextually-specific ways, as well as considerations of how theoretical conceptions of agency and structure (as they intersect in these sites) figure into understanding the outcomes of these mediations.
Effective: Summer 2014 Ending: Summer 2014

COMM 600 Thesis Research (1-15) No description.
Effective: Fall 1986

COMM 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1990
COMM 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Teaching or assisting in School of Communication courses by graduate students with previous news-editorial, advertising, and broadcasting experience. Effective: Fall 1986

COMM 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 1986

COMM 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 1990

Last Import from UCM: May 24, 2014 3:00 AM
## Communications-CI (COMMS)

**COMMS 438 Magazine Editing** (3) Study and practice of the editing and design of magazines and newsletters. Effective: Spring 2008

**COMMS 500 Communications and Cultural Theory** (3) This course is designed to provide students a broad background in communications and cultural theory. Effective: Summer 2011

**COMMS 503 Research Methods in Communications** (3) This course prepares students to conduct research in communications using both qualitative and quantitative research methods. Effective: Summer 2011

**COMMS 519 Communication Technology and Culture in History** (3) An advanced study of various interpretive approaches and methodological tools that are central to the analysis of cultural artifacts. Effective: Summer 2011

**COMMS 525 Advanced Writer's Seminar** (3-9 per semester/maximum of 9) This course supports the development of advanced writing projects in a range of different genres. Effective: Summer 2011

**COMMS 555 Media Discourse Analysis** (3) This course provides students with advanced theoretical approaches and methodological tools to analyze a variety of media discourses. Effective: Summer 2011

**COMMS 560 Seminar on Global Culture and Communication** (3) This course explores the globalization of communication and communication technologies within a broad political, economic and cultural context. Effective: Summer 2011

**COMMS 568 Media Production Workshop** (3-9 per semester/maximum of 9) This course prepares students for the creation of advanced media projects in traditional and digital media. Effective: Summer 2011

**COMMS 580 Communications Master's Project** (3-6 per semester/maximum of 6) An original master's paper or creative production with critical paper. Effective: Summer 2011

Prerequisite:

**COMMS 600 Thesis Research** (1-15 per semester/maximum of 99) No description. Effective: Fall 2010

**COMMS 610 Thesis Research** (1-15 per semester/maximum of 99) No description. Effective: Fall 2010

---

The Pennsylvania State University
Community Psychology (CMPSY)

CMPSY 500 **Theories and Issues in Community Psychology** (3) Contemporary issues in community psychology will be discussed within the framework of its development from clinical and social psychology.
Effective: Spring 1997

CMPSY 510 **Change Processes** (3) Social change as it takes place within institutions and communities.
Effective: Spring 1997

CMPSY 511 **Social Impacts on Psychological Functioning** (3) Psychological functioning, as it is affected by social contexts.
Effective: Fall 1996
Prerequisite:

CMPSY 519 **Research Methods I** (3) In-depth examination of research methods utilized by community psychologists and social change activists; course followed by CMPSY 520.
Effective: Fall 1999
Prerequisite:

CMPSY 520 **Research Methods II** (3) In-depth examination of research methods utilized by community psychologists and social change activists. (Continuation of CMPSY 519).
Effective: Summer 2000
Prerequisite:

CMPSY 521 **Roles and Methods in Community Psychology** (3) Advanced course entailing the development of Master's Projects with both fieldwork and research; each student writes a formal proposal.
Effective: Spring 1997
Prerequisite:

CMPSY 522 **Practicum** (3-6) Fieldwork implementing planned change.
Effective: Fall 1996
Prerequisite:

CMPSY 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1996

CMPSY 594 **Research** (3-6) Supervised research on a master's paper.
Effective: Spring 1997
Prerequisite:

CMPSY 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1996

CMPSY 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1997
Community S P & D (CSP D)

CSP D 590 Collegeium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

CSP D 596 (H P A 596) Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1987

Effective: Fall 1983

CSP D 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

CSP D 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised and graded teaching experience in undergraduate Community Development, Health Planning and Administration, and Law Enforcement and Corrections courses.
Effective: Fall 1983
Prerequisite:

Effective: Fall 1983

CSP D 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Community and Economic Development (CEDEV)

CEDEV 430 Principles of Local Economic Development (3) Concepts, strategies, and techniques of local economic analysis, planning, and development; case studies and decision-making exercises. Effective: Summer 2013

Prerequisite:

CEDEV 452 Community Structure, Processes and Capacity (3) Social organization, processes and change in communities; use of sociological principles in analysis of community problems and development. Effective: Spring 2012

Prerequisite:

CEDEV 500 Community and Economic Development: Theory and Practice (3) Understanding theories, concepts, and frameworks of community and economic development and community decision-making models in application to community development practice and issues. Effective: Summer 2013

CEDEV 505 (R SOC 505, AEE 505) Leadership Development (3) Exploration, understanding, and application of leadership roles, strategies, and principles in group and community settings. Effective: Summer 2013

CEDEV 509 Population, Land Use, and Municipal Finance (3) Understanding the interaction of population characteristics, land use, municipal funds, and taxation in a locality and how they impact the operation and management of government jurisdictions. Effective: Summer 2013

Prerequisite:

CEDEV 516 (R SOC 516) Change in Rural Society (3) Social change in rural society, emphasizing prediction and control of the change process; even years. Effective: Summer 2013

Prerequisite:

CEDEV 517 (R SOC 517) International Rural Social Change (3) Implications of planned change for international rural societies, considering basic structural constraints, known institutional linkages, and potential synergetic consequences. Effective: Summer 2013

Prerequisite:

CEDEV 533 (AEREC 533) Rural Development Research Methods and Topics (3) Advanced theories and methods for rural economic development research. Effective: Summer 2013

Prerequisite:

CEDEV 560 Regional Development: Principles, Policy, and Practice (3) Regional growth and development, focusing on challenges to theory, policy, and practice, emphasizing change in metropolitan, micropolitan, and rural areas. Effective: Summer 2013

Prerequisite:

CEDEV 567 Resilient Communities and Environments (3) Understanding connections between communities and surrounding ecosystems; exploration of management techniques for building adaptive, resilient, and sustainable communities and environments. Effective: Summer 2013

Prerequisite:

CEDEV 575 Methods and Techniques for Community and Economic Development (3) Understanding and applying methods and hands-on experience with techniques used in community and economic development. Lab. Effective: Summer 2013

Prerequisite:

Prerequisite:

CEDEV 580 Community and Economic Development Research Application and Practice (3) Course outlines the steps for students to apply CEDEV theories and methods to a topic in writing their Master's paper. Effective: Spring 2014

CEDEV 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Summer 2013

CEDEV 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

The Pennsylvania State University
CEDEV 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 2013

CEDEV 597A Launching Community Ventures, Nonprofits, and Organizations (3) Entrepreneurship has become widely recognized as an economic driver in many communities, while also satisfying citizen needs and improving the quality of life through thoughtful and innovative products and services. But, entrepreneurship in the 21st Century is not just about launching businesses anymore. The social entrepreneurship movement has shown that entrepreneurial thinking can be applied widely throughout the community. The common goal connecting entrepreneurship to social entrepreneurship is knowing how to launch an idea, from concept through creation, in a way that will ensure the sustainability and adaptability of the idea. This course is all about launching ideas, from socially- and environmentally-conscious for-profit businesses to nonprofits to spin-offs of existing organizations. Effective: Summer 2014 Ending: Summer 2014 Prerequisite:

CEDEV 597B Topics in Economic Development (3) Topics in Economic Development provides an overview of modern approaches to developing places and regions, including policy options and limitations; fundamental reasons for the world-wide decline of some rural areas and the growth of cities are also explored. Effective: Summer 2014 Ending: Summer 2014 Prerequisite:

CEDEV 597D Principles and Practices of Planning (3) The course is an overview of the field of planning. It examines the history of planning and the theories behind it, and corresponding roles that planners can play in their communities. It establishes the legal framework for planning as a profession, then looks at the different types and levels of planning. Finally, it examines the process of planning, what data needs to be collected, how a comprehensive plan is made and implemented, who planners must interact with in the course of doing their job, and current issues in planning, such as sustainability. Throughout the course attempts to emphasize both the positive and negative impacts of planning. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

CEDEV 599 (IL) Foreign Studies (1-12, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established. Effective: Summer 2013

CEDEV 602 Supervised Experience in College Teaching (1-3) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University. Effective: Summer 2013

Last Import from UCM: May 24, 2014 3:00 AM
Comparative Literature (CMLIT)

CMLIT 400Y (US;IL) **Senior Seminar in Literary Criticism and Theory** (3) Discussions of theories of literature, of literary criticism, and particularly of the distinct methods of comparative study; individual projects.
Effective: Spring 2006
Prerequisite:

CMLIT 401Y (IL) **The Western Literary Heritage I** (3) Major literary movements and authors in the literature of the Western world from the beginnings through the early Renaissance.
Effective: Spring 2006
Prerequisite:

CMLIT 402Y (US;IL) **The Western Literary Heritage II** (3) Major literary movements and authors in the literature of the Western world from the late Renaissance to the present time.
Effective: Spring 2006
Prerequisite:

CMLIT 403 (US) (LNST 403) **Latino/a Literature and Culture** (3) Literary and other forms of cultural expression (film, music, art, and theater) are compared across different Latina/o communities.
Effective: Spring 2011
Prerequisite:

CMLIT 404 (IL) (ASIA 404) **Topics in Asian Literature** (3) Selected works from the major poetry, fiction, and drama of such countries as India, China, Japan.
Effective: Spring 2011
Prerequisite:

CMLIT 404Y (IL) (ASIA 404Y) **Topics in Studies of Asian Literature** (3) Selected works from the major poetry, fiction, and drama of such countries as India, China, Japan, taught with focus on written analysis and interpretation.
Effective: Summer 2013
Prerequisite:

CMLIT 405 (US;IL) **Inter-American Literature** (3) This course examines the development of literature in Canada, the United States, Spanish America, the Caribbean area, and Brazil.
Effective: Spring 2006
Prerequisite:

CMLIT 406 (IL) **Women and World Literature** (3) Literature written by women, especially women from non-Western cultures; the spectrum of genres in which women writers have excelled.
Effective: Spring 2006
Prerequisite:

CMLIT 408 (IL) **Heroic Literature** (3) Traditional heroes, their traits and adventures; typical themes and examples chosen from the epics and sagas of world literature.
Effective: Spring 2006
Prerequisite:

CMLIT 410 (IL) **Literary Translation: Theory and Practice** (3) Emphasizing literary translation, a study of the theoretical and practical problems encountered in the processes of translation, transmission, and interpretation.
Effective: Spring 2011
Prerequisite:

CMLIT 415 (GH;US;IL) **World Graphic Novels** (3) Critical analyses of form, genre, medium, and discourse of the graphic novel and its historical precedents in an international and comparative context.
Effective: Summer 2010
Prerequisite:

CMLIT 422 (IL) **African Drama** (3) Traditional and popular drama forms; modern anglophone and francophone drama; nationalism and social criticism in contemporary African drama.
Effective: Spring 2006

CMLIT 423 (IL) **African Novel** (3) From traditional oral narratives to modern autobiographical, historical, satirical, sociological, and allegorical forms; novelist as social critic.
Effective: Spring 2006

CMLIT 429 (ENGL 429) **New Media and Literature** (3) New media literary genres; critical discussion of creative works in digital media.
Effective: Summer 2010

CMLIT 430 (IL) **Global Modernisms** (3) A comparative investigation of global Modernisms, with an emphasis on the relations between modernism, modernity, and modernization.
Effective: Summer 2010
Prerequisite:

CMLIT 435 (IL) **Cultures of Globalization** (3) Cultural and literary effects of the process of globalization, with an emphasis...
on world literatures and transnationalism.
Effective: Summer 2010
Prerequisite:

CMLIT 438 (IL) **Fantastic Worlds: International and Comparative Perspectives** (3) A comparative, international study of fantastic worlds in literature and visual culture.
Effective: Summer 2010
Prerequisite:

CMLIT 443 (US:IL) **Transatlantic Literature** (3 per semester/maximum of 6) Comparative literary and cultural relations across the Atlantic Ocean; may include Europe, Africa, the Americas, and/or the Caribbean.
Effective: Spring 2011
Prerequisite:

CMLIT 446 (IL) **Postcolonial Literature and Culture** (3) Postcolonial literature and theory in a comparative and international context.
Effective: Summer 2010
Prerequisite:

CMLIT 448 (IL) **Literary Cultures of Buddhism** (3) Comparative exploration of various Buddhist literary cultures, from the classical Indian subcontinent to modern movements like the Beats and dalit writing.
Effective: Summer 2010
Prerequisite:

CMLIT 449 (IL) **Literary Cultures of Islam** (3) Comparative discussion of the literary cultures of Islam from the seventh century to the present.
Effective: Summer 2010
Prerequisite:

CMLIT 453 (IL) (COMM 453) **Narrative Theory: Film and Literature** (3) Comparative study of the aesthetics and techniques of film and literature; close analyses of masters of each art form.
Effective: Fall 2006
Prerequisite:

CMLIT 455 (IL) **Ethics, Justice, and Rights in World Literature** (3) Concepts of ethics, justice, and rights, appearing in world literature and/or film.
Effective: Summer 2010
Prerequisite:

CMLIT 459 **Topics in Theory** (3) Selected topics in this history of theory and literary criticism within a global, comparative context.
Effective: Summer 2010
Prerequisite:

CMLIT 470 (IL) **The Modern Novel** (3) Major novels of Joyce, Proust, Kafka, Thomas Mann, Nabokov, and others; their contributions to the art of the novel.
Effective: Spring 2011
Prerequisite:

CMLIT 471 (IL) **Poetry and Poetics** (3) Theoretical and practical concepts in the comparative, global history of poetry and/or poetics.
Effective: Summer 2010
Prerequisite:

CMLIT 480 (IL) **The International Folktale** (3) Traditional tales from various parts of the world: their origin, characteristics, forms; their transmission as oral narrative and written literature.
Effective: Spring 2006
Prerequisite:

CMLIT 486 (IL) **Tragedy** (3) Development of tragic drama and its relationship to social background and philosophical theory.
Effective: Spring 2006

CMLIT 487 (IL) **Comedy** (3) Development of comic drama and its relationship to social background and philosophical theory.
Effective: Spring 2006

CMLIT 488 (IL) (ENGL 488) **Modern Continental Drama** (3) From Ibsen to the drama of today: Strindberg, Chekhov, Hauptmann, Pirandello, Ionesco, Beckett, Genet, and others.
Effective: Spring 2006
Prerequisite:

CMLIT 489 (IL) **Contemporary World Fiction** (3) A survey of developments in contemporary world fiction in translation.
Effective: Spring 2012
Prerequisite:

CMLIT 490 **Video Game Studies** (3) A comparative look at the nature and history of video games as cultural artifacts, from Pond to online role-playing.
Effective: Summer 2010

The Pennsylvania State University
Prerequisite:
CMLIT 491 (IL) Literary Adaptation: International and Comparative Perspectives (3) A comparative, international study of adaptations between literature and other media (film, theater, photography, music).
Effective: Summer 2010
Prerequisite:
CMLIT 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1995

CMLIT 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

CMLIT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1995

CMLIT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1995

CMLIT 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1995

CMLIT 499 (IL) Foreign Study--Comparative Literature (3-6) Advanced courses offered on comparative literary topics as part of a foreign-study program.
Effective: Summer 2005
Prerequisite:
CMLIT 501 Comparative Method in Literary Studies (1-6 per semester/maximum of 6) Bibliography, research methods, and studies in comparative literature.
Effective: Spring 2012

CMLIT 502 Comparative Criticism I: Classical to Neoclassical (1-3 per semester/maximum of 3) Issues in literary criticism from Plato and Aristotle to the mid-eighteenth century.
Effective: Spring 2012

CMLIT 503 Comparative Criticism II: Romantic to Contemporary (1-3 per semester/maximum of 3) Principles and theories of literary criticism from eighteenth- and nineteenth-century beginnings to twentieth-century expansion and application.
Effective: Spring 2012

CMLIT 504 Studies in Literary Genres (3-6) The concept of genre and the evolution of genre theory; application to a specific genre, e.g., the lyric or the novel.
Effective: Summer 1995

CMLIT 505 Studies in Literary Periods and Movements (3-6) Comparative approaches to cohesive units within literary history, e.g., the Renaissance, the Enlightenment, Romanticism, Surrealism.
Effective: Summer 1995

CMLIT 506 Studies in Literary Themes and Motifs (3-6) Comparative approaches to recurrent literary themes and motifs; application to a specific example, e.g., literary Utopias or the Faust theme.
Effective: Summer 1995

CMLIT 507 Comparative Poetics (3 per semester/maximum of 6) Theoretical and practical concepts in the comparative, global history of poetry and/or poetics.
Effective: Summer 2010

CMLIT 508 Global Visual Culture (3-6 per semester/maximum of 6) Comparative study of transnational forms of visual cultural production; e.g. new media, cinema, television, public culture.
Effective: Fall 2011

CMLIT 509 Comparative Modernisms (3-6 per semester/maximum of 6) Aesthetic and historical development of Modernism in diverse cultures.
Effective: Fall 2011
CMLIT 510 Theory and Practice of Translation (3) Theories of translation and interpretation; importance of translation in literary transmission; application of theoretical concepts to individual translation projects.
Effective: Summer 1995
Prerequisite:

CMLIT 521 Comparative Seminar in Inter-American Literatures (1-12) Comparative topics presenting literary works of the Americas--North America, South America, and the Caribbean--from early to present times.
Effective: Summer 2000

CMLIT 522 Comparative Seminar in Asian Literatures (1-12) Comparative topics presenting literary works of Asia, from the origins of literature in Asia to the present time.
Effective: Summer 2000

CMLIT 523 Comparative Seminar in African Literatures (1-12) Comparative topics presenting literary works of Africa, from the origins of literature in Africa to the present time.
Effective: Summer 2000

CMLIT 543 Literary Relations (3 per semester/maximum of 6) Mutual influences among specific literatures and cultures; for example, German-American, French-American, Inter-American, or East-West literary relations.
Effective: Summer 1995

CMLIT 570 Forces in Contemporary Literature (3-6) Intellectual currents and experimental forms in contemporary world literature.
Effective: Summer 1995

CMLIT 580 Contemporary Literary Theory (3) Major issues in contemporary literary theory and their significance for criticism, with emphasis on continental European theorists and their influence.
Effective: Summer 1995

CMLIT 589 (FR 589, GER 589, SPAN 589) Technology in Foreign Language Education: An Overview (3) Approaches to the uses and research applications of multimedia and other educational technologies applied to the teaching of foreign languages. (also crosslisted with APLNG 589)
Effective: Spring 2004

CMLIT 590 Colloquium (1-3) Continuing seminars which consist of a series of lectures by faculty, students or outside speakers.
Effective: Summer 1995

CMLIT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1995

CMLIT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1995

CMLIT 599 (IL) Foreign Study--Comparative Literature (1-12) Graduate-level courses offered on comparative literary topics as part of a foreign-study experience approved by the program head.
Effective: Summer 2005
Prerequisite:

CMLIT 600 Thesis Research (1-15) No description.
Effective: Summer 1995

CMLIT 601 Ph.D. Dissertation Full Time (0) No description.
Effective: Summer 1995

CMLIT 602 Supervised Experience in College Teaching (1-3 per semester, maximum of 6) Supervision of teaching; consideration of instructional aims and objectives, methods of lecturing and leading discussions, evaluation of student work.
Effective: Summer 1995

CMLIT 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2000
Effective: Summer 1995

CMLIT 611 PH.D. Dissertation Part-Time (0) No description.
Effective: Summer 1995

Last Import from UCM: May 24, 2014 3:00 AM
Comparative Med-Hy (C MED)

C MED 501 Biology and Care of Laboratory Animals (3) Presentation of the anatomic and physiologic characteristics of the commonly used laboratory animal species and their relation to biomedical research. Effective: Fall 1984

C MED 503 Laboratory Animal Genetics (3) Genetic principles applied to laboratory animals used for investigations of diseases that may be controlled or influenced by genetic factors. Effective: Fall 1984

C MED 507 Techniques of Laboratory Animal Experimentation (3) Techniques of drug administration, infusion, and collection of body fluids and materials; gnotobiology; use of radioisotopes and bioinstrumentation. Effective: Fall 1984

C MED 515 Experimental Surgery of Laboratory Animals (3) Surgical techniques, including nephrectomy and Goldblatt clamp, bladder and gastric pouches, bile duct cannulation, intraventricular operation, cardiac and cerebrovascular catheterization. Effective: Winter 1978

C MED 530 Diseases of Laboratory Animals I (3) Physiological and pathological expressions of both infectious and metabolic-degenerative diseases of rodents, with emphasis on diagnostic and control methods. Effective: Winter 1978

C MED 531 Diseases of Laboratory Animals II (3) Physiological and pathological expressions of both infectious and metabolic-degenerative diseases of nonhuman primates and other species of animals. Effective: Winter 1978

C MED 535 Comparative Pathology (3) Comparative pathologic characteristics of infectious and metabolic diseases of animals and man. Effective: Fall 1983

C MED 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

C MED 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

C MED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 1987

C MED 600 Thesis Research (1-15) No description. Effective: Fall 1983

C MED 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Comparative and International Education (CI ED)

CI ED 401 (IL) (EDTHP 401) Introduction to Comparative Education (3) Origins, nature, scope, basic literature, and methodology of comparative education. Study of sample topics.
Effective: Fall 2007
Prerequisite:

CI ED 440 (EDTHP 440) Introduction to Philosophy of Education (3) Introduction to the examination of educational theory and practice from philosophical perspectives, classical and contemporary.
Effective: Spring 2013
Prerequisite:

CI ED 444 (WL ED 444) Language, Culture and the Classroom: Issues for Practitioners (3) Critical understanding of cultural linguistic diversity to facilitate the inclusion of English Language Learners in a globalized classroom.
Effective: Fall 2007
Prerequisite:

CI ED 457 (AGECO 457) Principles of Integrated Pest Management (3) Integrated study of pest complexes and their management, emphasizing ecological principles drawing on examples from a range of agricultural, forestry and urban systems. This course is designed for sixth, seventh, and eighth semester and graduate students.
Effective: Spring 2014 Ending: Summer 2014
Prerequisite:

CI ED 457 Principles of Integrated Pest Management (3) Integrated study of pest complexes and their management, emphasizing ecological principles drawing on examples from a range of agricultural, forestry and urban systems. This course is designed for sixth, seventh, and eighth semester and graduate students.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

CI ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998

CI ED 497A Cultural Diversity in the Workplace (3) The purpose of this course is to encourage students to engage in critical thinking and dialogue regarding diversity in a rapidly globalizing workplace. The material in this course will help identify sources and implications of "otherness" in the work environment through the use of personal accounts, texts, news media, movies, and a final project.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

CI ED 500 Comparative Education Proseminar I (3) Methods of comparative education and case studies of governance and administration; first of two part sequence.
Effective: Spring 1995

CI ED 503 (EDTHP 507, HI ED 503) Ethnicity, National Identity, and Education (3) Surveys group-oriented education policies internationally, especially comparing those of Britain, Taiwan, India.
Effective: Summer 1995

CI ED 504 Perspectives in African Education (3) Educational systems in selected african countries are examined with respect to colonial history, social, political, and cultural factors.
Effective: Spring 2012

CI ED 508 (ADTED 508) Globalization and Lifelong Learning (3) Examination of globalization discourses and their relationships, implications and impacts on lifelong learning processes and contexts.
Effective: Summer 2004

CI ED 509 (ADTED 509) Language, Literacy, Identity, and Culture in a Global Context (3) Examines the relationship between issues of language, identity, and culture for adult learners in an increasingly global context.
Effective: Spring 2004
Prerequisite:

CI ED 516 (EDTHP 516) Education and Demographic Change in the United States and Abroad (3) Interrelationship between schooling and employment, marriage, fertility, and migration. Focus comparatively on the United States and developing countries.
Effective: Spring 1998

CI ED 534 (EDTHP 534, SOC 534) Childhood and Education in Sociological and International Comparative Perspective (3) The course objective is to use an international comparative lens and sociological perspective to examine the social, cultural, political and economic forces that shape childhood and the role education plays in this process.
Effective: Spring 2013

CI ED 542 (LL ED 542) Issues in Literacy Education (3) Discussion of philosophical, sociological, historical, and curricular issues in literacy education. Effective: Spring 1997

CI ED 553 (EDTHP 553, SOC 553, HI ED 553) Educational Mobility in Comparative Perspective (3) Role of education in social mobility, using quantitative, qualitative, and historical methods; focuses comparatively on Britain, East Asia, and South America. Effective: Spring 2003

CI ED 555 (EDPSY 555) Validity of Assessment Results (3) Concepts, issues, and methods of validation of educational and psychological assessment including models and approaches to validation, bias, and utility. Effective: Spring 2008
Prerequisite:

CI ED 562 (ADTED 562) Politics, Language and Pedagogy: Applying Paulo Freire Today (3) Examines the work of Paulo Freire as it applies to community action projects. Effective: Fall 2014 Future: Fall 2014

CI ED 564 (ADTED 564) Social and Cultural Contexts of Learning and Work (3) Examines the relationship between learning and work with special attention given to how certain forms of learning are legitimized. Effective: Summer 2004
Prerequisite:

CI ED 570 (ADTED 570) Comparative and International Adult Education (3) Critical and comparative analysis of adult education theory and practice outside North America, including international agency involvement. Effective: Spring 1995
Prerequisite:

CI ED 571 (HI ED 571) Comparative Higher Education (3) Comparative methods of studying structural variations in systems of higher education in principal industrialized nations and other selected countries. Effective: Spring 1995

CI ED 572 (ADTED 572) Policy Studies in Lifelong Learning (3) Examine lifelong learning policies and the relationship between lifelong learning issues and problems, policy development, policy actors and institutional structures. Effective: Summer 2004
Prerequisite:

Prerequisite:

CI ED 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1995

CI ED 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 1995

CI ED 596 Individual Studies (1-9) Creative projects, including nongesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1995

CI ED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 1995

CI ED 597A (ADTED 597A) Cross-Cultural (Comparative) Research Methods in Education (3) This course will explore concept maps as analytical tools for research in cross-cultural and comparative education. Effective: Summer 2014 Ending: Summer 2014

CI ED 845 (AYFCE 845) Intergenerational Programs and Practices (3) Background, intervention strategies, and issues related to developing intergenerational programs and practices aimed at addressing vital social and community issues. Effective: Fall 2011
CAM 742 Herbal and Natural Products as Therapeutics (5) This course will assess safety, efficacy, and applicability of natural products as therapeutic options for management of common medical conditions.

Effective: Fall 2008

Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Computer Science (CMPSC)

CMSC 402 UNIX and C (3) UNIX OS including file system, utilities, and shell scripting; C programming, including I/O, pointers, arrays, dynamic memory, macros, and libraries.
Effective: Fall 2010
Prerequisite:

CMSC 412 Data Structures Lab (1.5) Programming with common data structures; recursion; stacks, queues, dictionaries, priority queues; string searching and manipulation; sorting; trees; combinatorics.
Effective: Spring 2013
Concurrent: CMPSC 462 or CMPSC 465

CMSC 413 Algorithms Lab (1.5) Programming with common algorithm design techniques; divide and conquer, greedy method, dynamic programming, and tree and graphy traversals.
Effective: Summer 2013
Concurrent: CMPSC 463

CMSC 421 Net-centric Computing (3) This course introduces JavaScript and AJAX for creating Rich Internet Applications, and XML for client-server communication and Web Services.
Effective: Spring 2011
Prerequisite:

CMSC 426 Object-oriented Design (3) Object-oriented analysis and design; design patterns such as creational, structural, and behavioral patterns; UML; and unified process.
Effective: Spring 2014
Prerequisite:

CMSC 428 Programming in Ada (3) Structured program design using Ada; strong typing, data abstraction, packages, subprograms, separate compilation, visibility, exceptions, generic units.
Effective: Fall 2010
Prerequisite:

CMSC 430 Database Design (3) Relational database model, query languages, integrity, reliability, normal forms for design.
Effective: Fall 2010
Prerequisite:

CMSC 431W Database Management Systems (3) Topics include: conceptual data modeling, relational data model, relational query languages, schema normalization, database/Internet applications, and database system issues.
Effective: Fall 2013
Prerequisite:

CMSC 436 Communications and Networking (3) Data transmission, basic signaling, data encoding, error control, communication protocols, security, network topologies, routing, switching, internetworking, emerging high speed networks.
Effective: Spring 2008
Prerequisite:

CMSC 438 Computer Network Architecture and Programming (3) Network architectures, communication protocols, internetworking, network security, client-server computing, web application development, programming with APIs.
Effective: Spring 2014
Prerequisite:

CMSC 441 Artificial Intelligence (3) Problem solving, search techniques including local search and genetic algorithms, knowledge representation, planning, learning, and neural networks.
Effective: Spring 2014
Prerequisite:

CMSC 442 Artificial Intelligence (3) Introduction to the theory, research paradigms, implementation techniques, and philosophies of artificial intelligence.
Effective: Spring 2008
Prerequisite: Concurrent: CMPSC 465

CMSC 443 Introduction to Computer and Network Security (3) Introduction to theory and practice of computer security with an emphasis on Internet and operating system applications.
Effective: Spring 2008
Prerequisite:

CMSC 444 Secure Programming (3) Secure software design principles/practice, common threats, applied cryptography, trust management, input validation, OS-/programming language- specific issues, software validation.
Effective: Spring 2014
Prerequisite: Concurrent: CMPSC 430 or CMPSC 431 or CMPSC 421W

CMSC 448 Machine Learning and Algorithmic AI (3) Evaluation and use of machine learning models; algorithmic elements of artificial intelligence.
Effective: Spring 2013
Prerequisite:
CMPSC 450 Concurrent Scientific Programming (3) Problems of synchronization, concurrent execution, and their solution techniques. Design and implementation of concurrent software in a distributed system.
Effective: Spring 2008
Prerequisite:

CMPSC 451 (MATH 451) Numerical Computations (3) Algorithms for interpolation, approximation, integration, nonlinear equations, linear systems, fast FOURIER transform, and differential equations emphasizing computational properties and implementation. Students may take only one course for credit from CSE/MATH 451 and CSE/MATH 455.
Effective: Spring 2008
Prerequisite:

CMPSC 452 Numerical Analysis (3) Algorithm efficiency and accuracy, function interpolation and polynomial approximation, numerical differentiation and integration, initial-value problems, and approximation of eigenvalues.
Effective: Fall 2010
Prerequisite:

CMPSC 455 (MATH 455) Introduction to Numerical Analysis I (3) Floating point computation, numerical rootfinding, interpolation, numerical quadrature, direct methods for linear systems. Students may take only one course for credit from CMPSC (MATH) 451 and CMPSC (MATH) 455.
Effective: Spring 2008
Prerequisite:

CMPSC 456 (MATH 456) Introduction to Numerical Analysis II (3) Polynomials and piecewise polynomial approximation; matrix least square problems; numerical solution of eigenvalue problems; numerical solutions of ordinary differential equations.
Effective: Spring 2008
Prerequisite:

Effective: Fall 2010
Prerequisite:

Effective: Spring 2008
Prerequisite:

CMPSC 459 Scientific Visualization (3) Visualization techniques for data analysis and presentation. Applying visualization and perceptual theory. Using extending platform independent visualization software.
Effective: Spring 2008
Prerequisite:

CMPSC 460 Principles of Programming Languages (3) Design and implementation of high level programming languages and survey of language paradigms including imperative, functional, and object-oriented programming.
Effective: Spring 2014
Prerequisite: Concurrent: CMPSC 469

CMPSC 461 Programming Language Concepts (3) Fundamental concepts of programming language design, specifications, and implementation; programming language paradigms and features; program verification.
Effective: Spring 2008
Prerequisite:

CMPSC 462 Data Structures (3) In-depth theoretical study of data structures such as balanced trees, hash tables, priority queues, B-trees, binomial heaps, and Fibonacci heaps.
Effective: Spring 2014
Prerequisite:

CMPSC 463 Design and Analysis of Algorithms (3) Recurrences, algorithms design techniques, searching, sorting, selection, graph algorithms, NP-completeness, approximation algorithms, local optimization algorithms.
Effective: Spring 2014
Prerequisite: Concurrent: MATH 318 STAT 301 or STAT 318

CMPSC 464 Introduction to the Theory of Computation (3) Computability/Complexity: finite automata, regular & context-free languages, Turing machines, Church-Turing Thesis, undecidability, reducibility, completeness, time/space complexity, P versus NP.
Effective: Fall 2009
Prerequisite:

CMPSC 465 Data Structures and Algorithms (3) Fundamental concepts of computer science: data structures, analysis of algorithms, recursion, trees, sets, graphs, sorting.
Effective: Fall 2012
Prerequisite:

CMPSC 467 (MATH 467) Factorization and Primality Testing (3) Prime sieves, factoring, computer numeration systems, congruences, multiplicative functions, primitive roots, cryptography, quadratic residues. Students who have passed MATH 465 may not schedule this course.
Effective: Spring 2008
Prerequisite:

CMPSC 469 Formal Languages with Applications (3) Regular, context free, recursive, and recursively enumerable

The Pennsylvania State University
languages; associated machine models; applications.
Effective: Spring 2014
Prerequisite:

CMPSC 470 Compiler Construction (3) Compiler design and implementation; scanning, parsing, semantic analysis, optimization (including static analysis), code generation, garbage collection, and error detection.
Effective: Spring 2014
Prerequisite:

CMPSC 471 Introduction to Compiler Construction (3) Design and implementation of compilers; lexical analysis, parsing, semantic actions, optimization, and code generation.
Effective: Spring 2008
Prerequisite:

CMPSC 472 Operating System Concepts (3) Theoretical and practical issues of operating systems design and implementation, process management, concurrent programming, memory management, scheduling, I/O, and security.
Effective: Fall 2010
Prerequisite:

CMPSC 473 Operating Systems Design & Construction (3) Design and implementation of computer operating systems; management of various system resources: processes, memory, processors, files, input/output devices.
Effective: Spring 2008
Prerequisite:

CMPSC 474 Operating System & Systems Programming (3) Operating Systems overview and principles; processes and signals; concurrency and synchronization; memory and file management; client-server computing; scripts; systems-programming.
Effective: Spring 2008
Prerequisite:

CMPSC 475 Applications Programming (3) Development of software for devices including smart phones, tablets, handheld units, and other general purpose computing platforms.
Effective: Spring 2014
Prerequisite:

CMPSC 479 Language Translation (3) Design and implementation of compilers, lexical analysis, syntax/semantic analysis, optimization, and code generation.
Effective: Spring 2008
Prerequisite:

CMPSC 483W Software Design Methods (3) Applications of scientific knowledge and methods in the design and construction of computer software using engineering concepts.
Effective: Spring 2008
Prerequisite:

CMPSC 484 Computer Science Senior Project I (2) Computer science capstone project with documentation emphasis.
Effective: Spring 2008
Prerequisite:

CMPSC 485W Computer Science Senior Project II (3) Computer science capstone project with documentation emphasis.
Effective: Spring 2008
Prerequisite:

CMPSC 487W Software Engineering and Design (3) Software development process, life cycle; requirements analysis, specification, design, prototyping, testing, project management, and documentation.
Effective: Spring 2014
Prerequisite:

CMPSC 488 Computer Science Project (3) Project design and implementation with an emphasis on team work, documentation, and the employment and integration of computer science concepts.
Effective: Summer 2013
Prerequisite:

CMPSC 494H Senior Honors Thesis (1-6) Supervised Honors thesis research in computer science and engineering.
Effective: Spring 2008
Prerequisite:

CMPSC 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experience, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008
Prerequisite:

CMPSC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2008

CMPSC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2008
CMPSC 497A Game Development with HTML 5 (3) Game design of 2D assets using HTML 5, with the specific intention of creating games for mobile applications.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

CMPSC 497B Big Data Analytics (3) The ease of large-scale data collection is driving commercial interest in distributed processing algorithms for performing various analytic tasks. In this course we will take an in-depth look at MapReduce (and related programming models) with applications to processing text data such as Tweets and also an emphasis on graph data. The course will be graded based on projects, class participation, and exams.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

CMPSC 497C Cyber Security Contest Problem Practice (1-6) Students will learn about common offensive and defensive cyber security strategies. They will apply these strategies to solve scenarios created by the instructor.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

CMPSC 497D Hands-on Experience on Programming Manycores (3) This course focuses on programming emerging manycore architectures. Specifically, we will focus on Intel Xeon Phi and NVIDIA Kepler, and the students will optimize (in a collaborative fashion) two large scale parallel applications from the parallelism, data locality and energy angles.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

CMPSC 497F Introduction to Bioinformatics (3) This course will introduce the biological problems and computational solutions that motivate computational biology. Topics will be organized around the three main themes: 1) Genomes, including assembly and annotation of genomic sequences; 2) Evolution, including reconstructing evolutionary relationships, personal genomics, and detecting disease associated traits; and 3) Function, including analysis of functional genomics experimental assays and regulatory relationships between genes. We welcome participation from students majoring in BMB, CMPSC, and other disciplines, and therefore lecture material will not assume prior knowledge of biological or computational topics.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

CMPSC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2008

CMPSC 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

CMPSC 598 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest; several different topics may be taught in one year or semester.
Effective: Summer 1993

CMPSC 600 Thesis Research (1-15) No description.
Effective: Fall 1995

CMPSC 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1995

CMPSC 602 Supervised Experience in College Teaching (1-3 per semester, maximum of 6) Teaching of computer science undergraduate sections with senior faculty instruction supervision.
Effective: Fall 1989
Prerequisite:

Effective: Fall 1983

CMPSC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM

The Pennsylvania State University
Computer Science and Engineering (CSE)

CSE 511 Operating Systems Design (3) Concurrent programming; design of I/O subsystem, memory management, and user interface; kernel design; deadlocks, protection and security; case studies.
Effective: Spring 2008
Prerequisite:

CSE 513 Distributed Systems (3) Protocol hierarchies; routing and flow control algorithms; distributed operating systems; communication and synchronization mechanisms; resource allocation problems.
Effective: Spring 2009
Prerequisite:

CSE 514 Computer Networks (3) Network subsystems, ARPANET, SNA, DECNET, network protocols (physical databank, network, transport, sessions, presentation, application), routing and congestion control, network optimization.
Effective: Spring 2011
Prerequisite:

CSE 515 (E E 565) Reliable Data Communications (3) Discussion of problems and solutions for ensuring reliable and efficient communication over wired and wireless links and data networks.
Effective: Spring 2008
Prerequisite:

CSE 516 Mobile Networking (3) Algorithms, systems and design of mobile telecommunication voice and data networks.
Effective: Fall 2010

CSE 517 Performance Evaluation (3) Tools and techniques for PE, Analytical and Simulation models, evaluation of multiprocessors, multicomputer and LANs, scheduling policies, case studies.
Effective: Fall 1995

CSE 520 Science of Computer Programming (4) Weakest preconditions, nondeterminism, terminating constructs, formal derivation of some often used algorithms, correctness of programs, formal specification of large systems.
Effective: Spring 2008
Prerequisite:

CSE 521 Compiler Construction (3) Design and implementation of compilers.
Effective: Spring 2001

CSE 522 Semantics of Programming Languages (3) Operational, axiomatic, and denotational semantics of programming languages; fixpoint theory of computation, verification of recursive programs; goto statements and continuations.
Effective: Spring 2008
Prerequisite:

CSE 530 Fundamentals of Computer Architecture (3) Advances in computer architecture, Pipelining, parallelism, and multiprocessing.
Effective: Spring 2008
Prerequisite:

CSE 531 Parallel Processors and Processing (3) Parallel processor organization; basic algorithms suitable for such systems; parallel sorting and interconnection networks; applications and discussion of specific processors.
Effective: Fall 1995
Prerequisite:

CSE 532 Multiprocessor Architecture (3) Fundamental structures of multiprocessors; interprocess communications, system deadlocks and protection, scheduling strategies, and parallel algorithms; example multiprocessor systems.
Effective: Fall 1995
Prerequisite:

CSE 536 Fault Tolerant Systems (3) Attributes of fault-tolerant systems and their definitions; realability and availability techniques; maintainability and testing techniques; practice of reliable system design.
Effective: Fall 1995
Prerequisite:

CSE 537 Interconnection Networks in Highly Parallel Computers (3) Study and comparative analysis of various classes of interconnection networks; routing problem; fault tolerance issue; performance evaluation; VLSI implementation.
Effective: Summer 1997
Prerequisite:

CSE 539 Topics in Computer Architecture (3) Study of current advanced issues in design, implementation and applications of complex computer systems.
Effective: Fall 1995
Prerequisite:

CSE 541 Database Systems I (3) Data models and relational database design; database integrity and concurrency control; distributed database design and concurrency control; query optimization.
Effective: Spring 2008
Prerequisite:

CSE 542 Database Systems II (3) Important in-depth issues relating to data engineering such as distributed databases, information management for engineering design, data models.
Effective: Spring 1996
Prerequisite:

CSE 543 Computer Security (3) Specification and design of secure systems; security models, architectural issues, verification and validation, and applications in secure database management systems.
Effective: Spring 2008
Prerequisite:

CSE 544 System Security (3) Review current research in computer and operating system security.
Effective: Summer 2008
Prerequisite:

CSE 545 Network Security (3) Advanced methods and technologies for network security.
Effective: Summer 2008
Prerequisite:

CSE 546 Cryptography (3) Introduction to the theory and techniques of modern cryptography, with emphasis on rigorous analysis and mathematical foundations.
Effective: Fall 2008
Prerequisite:

CSE 550 (MATH 550) Numerical Linear Algebra (3) Solution of linear systems, sparse matrix techniques, linear least squares, singular value decomposition, numerical computation of eigenvalues and eigenvectors.
Effective: Spring 2008
Prerequisite:

Effective: Spring 2008
Prerequisite:

Effective: Spring 2008
Prerequisite:

CSE 553 (MATH 553) Introduction to Approximation Theory (3) Interpolation; remainder theory; approximation of functions; error analysis; orthogonal polynomials; approximation of linear functionals; functional analysis applied to numerical analysis.
Effective: Fall 1995
Prerequisite:

CSE 554 (E E 564) Error Correcting Codes for Computers and Communication (3) Block, cyclic, and convolutional codes. Circuits and algorithms for decoding. Application to reliable communication and fault-tolerant computing.
Effective: Spring 2008
Prerequisite:

CSE 555 (MATH 555) Numerical Optimization Techniques (3) Unconstrained and constrained optimization methods, linear and quadratic programming, software issues, ellipsoid and Karmarkar's algorithm, global optimization, parallelism in optimization.
Effective: Spring 2008
Prerequisite:

CSE 556 (MATH 556) Finite Element Methods (3) Sobolev spaces, variational formulations of boundary value problems; piecewise polynomial approximation theory, convergence and stability, special methods and applications.
Effective: Fall 1995
Prerequisite:

CSE 557 Concurrent Matrix Computation (3) This course discusses matrix computations on architectures that exploit concurrency. It will draw upon recent research in the field.
Effective: Spring 2008
Prerequisite:

CSE 560 Theory of Graphs and Networks (3) Theory and applications of graphs, including structure of graphs, network analysis, and algorithms for computer solution of graph-theoretic problems.
Effective: Spring 1996
Prerequisite:

CSE 561 (EDSGN 561, I E 561, IST 561) Data Mining Driven Design (3) The study and application of data mining/machine learning (DM/ML) techniques in multidisciplinary design.
Effective: Summer 2014

CSE 562 Probabilistic Algorithms (3) Design and analysis of probabilistic algorithms, reliability problems, probabilistic complexity classes, lower bounds.
Effective: Fall 1995
CSE 563 Parallel Algorithms (3) Computational aspects of VLSI: synthesis/analysis of efficient parallel and distributed algorithms; computational structures; models of parallel computers and their interrelationships. Effective: Fall 1995

CSE 564 Complexity of Combinatorial Problems (3) NP-completeness theory; approximation and heuristic techniques; discrete scheduling; additional complexity classes. Effective: Fall 1995

CSE 565 Algorithm Design and Analysis (4) An introduction to algorithmic design and analysis. Effective: Fall 2012

CSE 572 Microprocessors and Systems Design (3) Contemporary design issues in microprocessors, including advanced features and system integration issues. Effective: Spring 2008

CSE 575 Architecture of Arithmetic Processors (3) Algorithms and techniques for designing arithmetic processors; conventional algorithms and processor design; high-speed algorithms and resulting architectural structures. Effective: Spring 2013

CSE 577 VLSI Systems Design (3) Engineering design of large-scale integrated circuits, systems, and applications; study of advanced design techniques, architectures, and CAD methodologies. Effective: Spring 2013

CSE 578 VLSI Computer-Aided Design Tools (3) VLSI circuit design tools: placement, routing, extraction, design rule checking, graphic editors, simulation, verification, minimization, silicon compilation, test pattern generation. Effective: Spring 2013

CSE 579 Topics in Computer Hardware Design (3) Computer hardware design; emerging technologies in hardware design; new challenges for nano-scale VLSI design. Effective: Fall 2012

CSE 586 (E E 554) Topics in Computer Vision (3) Discussion of recent advances and current research trends in computer vision theory, algorithms, and their applications. Effective: Spring 2008

CSE 588 (MATH 588) Complexity in Computer Algebra (3) Complexity of integer multiplication, polynomial multiplication, fast Fourier transform, division, and calculating the greatest common divisor of polynomials. Effective: Spring 2008

CSE 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1997

CSE 591 Research Experience in Computer Science and Engineering (1) Research experience for new doctoral students in computer science and engineering. Research is performed in conjunction with another 500-level CSE course. Effective: Spring 1998

CSE 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 1997

CSE 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1996
CSE 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 1996

CSE 597A Data Mining and Analytics (3) Data mining and analytics; concepts, algorithms, and techniques for data mining and their application to large-scale data warehouses and big data analytics. Topics include algorithms for data processing/cleaning/analysis, classification, association analysis, cluster analysis, and anomaly detection. Research topics in data mining and applications, with emphasis on various data types such as temporal data, sequence data, spatial data, trajectory data, graph data, textual data, social data will be covered in the course.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

CSE 597B Advanced Big Data Analytics (3) Distributed processing algorithms for performing various analytic tasks; an in-depth look at MapReduce (and related programming models) with applications to processing text data such as Tweets and also an emphasis on graph data.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

CSE 597C Numerics of Imaging and Data Mining (3) Numerical linear algebra is playing a growing role in data mining applications such as text mining and face recognition. It is also important in solving ill-posed systems of linear equations that arise in image deblurring. This course will give the matrix decomposition background needed for these applications. After giving some necessary background in the first few weeks, we will move on to linear algebra techniques that are important in data mining including principal components regression, Krylov subspace methods, and tensor decomposition. The last part of the course will consider ill (posed least squares problems arising out of the solution of Fredholm integral equations of the first kind such as those that arise in the deblurring of digital images.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

CSE 597D Hands-on Experience on Programming Manycores (3) This course focuses on programming emerging manycore architectures. Specifically, we will focus on Intel Xeon Phi and NVIDIA Kepler, and the students will optimize (in a collaborative fashion) two large scale parallel applications from the parallelism, data locality and energy angles.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

CSE 599 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1996

CSE 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2008

CSE 600 Thesis Research (1-15) No description.
Effective: Spring 1995

CSE 601 Ph.d. Dissertation Full-Time (0) No description.
Effective: Spring 1995

CSE 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Spring 1995

Effective: Spring 1995

CSE 611 Ph.d. Dissertation Part-Time (0) No description.
Effective: Spring 1995

Last Import from UCM: May 24, 2014 3:00 AM
Computer Science-Cl (COMP)

COMP 505 Theory of Computation (3) Topics in discrete mathematics, discrete probability, first order logic and models of computation.
Effective: Spring 2013
Prerequisite:

COMP 511 Design and Analysis of Algorithms (3) Amortized analysis, graph algorithms, NP-complete problems, approximation algorithms, parallel algorithms.
Effective: Spring 2013
Prerequisite:

COMP 512 Advanced Operating Systems (3) A study of the principles and practice of distributed system design, including communication, synchronization, processes, file systems, and memory management.
Effective: Spring 2008
Prerequisite:

COMP 513 Formal Methods for Software Engineering (3) Object-oriented software development, formal specification techniques and related CASE tools, software re-use, verification and validation, transformational development.
Effective: Spring 2008
Prerequisite:

COMP 516 Advanced Programming Languages (3) Programming paradigms and styles, object-oriented programming, formal semantics, programming language design.
Effective: Spring 2008
Prerequisite:

COMP 517 Computer Security (3) Introduction to the area of computer security and current issues associated with computer security.
Effective: Spring 2007
Prerequisite:

COMP 519 Advanced Topics in Database Management Systems (3) Concurrency control, crash recovery, query processing, semantic data models, advanced file access, distributed database systems, performance, case studies, advanced applications.
Effective: Spring 2008
Prerequisite:

COMP 520 Artificial Intelligence (3) Problem solving, knowledge representation, language understanding, perception, learning, artificial neural networks.
Effective: Spring 2013
Prerequisite:

COMP 524 Evolutionary Computation (3) Topics in evolutionary algorithms and genetic algorithms.
Effective: Spring 1998
Prerequisite:

COMP 545 Computer Architecture (3) Cache, pipelining, memory design, interconnection networks, multiprocessor systems.
Effective: Spring 2008
Prerequisite:

COMP 580 Master’s Project (3 per semester/maximum of 6) Research into a specific computer science problem, development of a scholarly written paper, and oral defense of the work.
Effective: Spring 1998
Prerequisite:

COMP 594 Master’s Studies (3) Presentation of various research techniques, in-depth study of a specific computer science problem, development of a written paper or project, and an oral defense.
Effective: Fall 2003
Prerequisite:

COMP 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1997

COMP 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1997

COMP 597A Secure Programming (3) Secure software design principles/practice, common threats, applied cryptography, trust management, input validation, OS-/programming language- specific issues, software validation.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

COMP 600 Thesis Research (1-6) Research into a specific computer science problem, development of a scholarly written
paper, and an oral defense.
Effective: Fall 2003
Prerequisite:
Constl Law/Civil Rgt (CL&CR)

CL&CR 956 Civil Liberties Litigation (3) This course examines the protection of individual rights afforded by the Constitution by analyzing litigation involving violations of individual rights by the government and its officers. The principal substantive areas addressed are prisoners’ rights, police misconduct, and political surveillance. In the process of examining the substantive civil rights issues, the course will analyze advanced concepts of civil procedure, constitutional law, federal jurisdiction, and trial practice.
Effective: Summer 2011

CL&CR 957 The Constitutional Law of Religion (3) This course examines current constitutional doctrine concerning religion under the First Amendment to the Constitution. The focus will be on the essential cases and principles of the Free Exercise and Establishment Clauses of the First Amendment. These cases and principles are organized along three thematic lines: (1) the regulation of religions activity (free exercise and neutrality, governmental interests, legislative accommodation), (2) the funding of religions activity (establishment and neutrality, governmental support of religious institutions), and (3) the treatment of religion in government’s culture shaping activities (public schools, school curriculum, religious speech). The course ends with a discussion of the definition of “religion” for purposes of federal constitutional law.
Effective: Summer 2011

CL&CR 963 Constitutional Law II (3) This course studies the development of equal protection law under the 5th and 14th Amendments, the state action issue, and the free exercise and establishment clauses of the 1st amendment.
Effective: Fall 2009

CL&CR 965 First Amendment-Free Speech (3) This course examines the history, values and function of free expression, advocacy of illegal action, expression that provokes a hostile audience reaction, defamation, commercial advertising, obscenity, hate speech and pornography, expression in public places, symbolic speech, campaign finance laws, and speech in restricted environments.
Effective: Fall 2012

CL&CR 976 Advanced Torts (3) This course focuses on torts not involving physical injury, such as misrepresentation, defamation, invasion of privacy, interference with business relations, and misuse of legal procedure. These subjects are not ordinarily covered in the four-hour Torts course required in the first year, but have become burgeoning areas of potential liability due to the emergence of electronic communications. An effort will be made to integrate substantive doctrine and practice implications with legal, economic, political and social theory.
Effective: Summer 2011

CL&CR 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2008

Last Import from UCM: May 24, 2014 3:00 AM
Core Courses (CORE)

CORE 900 Civil Procedure (4) Civil Procedure concerns the rules and principles that govern the litigation of a civil case. The course addresses systemic issues related to how and where a lawsuit is filed including: personal and subject matter jurisdiction; venue; the notice required once a lawsuit has been filed; and which substantive law-- state or federal--should apply in federal court. The course also familiarizes the student with the stages of a lawsuit including: pleading; structuring the lawsuit; discovery; termination of a lawsuit without trial; trial; and actions that may be taken after a jury verdict or bench trial. Although reference is made to state laws, the course concentrates on the Federal Rules of Civil Procedure.
Effective: Summer 1999

CORE 902 Elements of Law (3) Elements of Law orients students to legal research and reasoning through caselaw, statutory interpretation, and legal history, processes, and institutions. The course covers topics across many substantive areas of law, and addresses legal methodology as it arises in the legal profession.
Effective: Summer 2011

CORE 903 Constitutional Law I (3) This course examines the roles of the executive, legislative, and judicial branches in determining limits of national and state powers and protection of the individual and civil rights provided in the United States Constitution.
Effective: Fall 2009

CORE 905 Contracts (4) Contracts is concerned with the formation of contracts. The traditional offer and acceptance are analyzed in light of problems presented by modern bargaining techniques. Voidability of contracts formed by fraud, mistake, illegality, and unconscionable advantage is also stressed. The performance of contracts and the parol evidence rule are discussed.
Effective: Summer 1999

CORE 907 Criminal Procedure (3) Criminal Procedure explores part of the interface between the criminal justice system and the United States Constitution. It introduces students to constitutional analysis by examining key provisions of the Fourth, Fifth, Sixth, and Fourteenth Amendments as they apply to police investigation and interrogation as well as the circumstances under which indigent defendants are guaranteed the assistance of counsel.
Effective: Fall 2013

CORE 910 Criminal Law (3) This course deals with what is called substantive criminal law, i.e. crimes. Numerous crimes such as homicide, theft, and conspiracy are examined, and defenses such as self-defense and insanity are scrutinized. A primary focus of the course is the utilization and interpretation of criminal statutes.
Effective: Fall 2006

CORE 912 Legal Analysis, Research and Writing I (2) The Legal Analysis, Research & Writing (LARW) course is designed to teach each student to think, write, and speak like a lawyer. Students must learn to solve clients problems by using effective research techniques, accurate and in-depth legal analysis, and clear and concise written and oral communication. These skills will improve only with practice. Therefore, the LARW course uses a problem-solving approach through which students will represent a fictional client and provide those clients with legal advice. Through this approach, students will learn essential skills of successful lawyers, including researching legal authorities, applying the law to a client's situation, and communicating that analysis in writing and verbally.
Effective: Summer 2011

CORE 914 Legal Analysis, Research and Writing II (2) LARW II continues to build on the skills learned in LARW I. Students continue to analyze clients' problems using various sources of legal authority, to use additional research sources, and to further refine their writing style. However, LARW II focuses on persuasive writing, so students will learn to draft documents that are submitted to a court called "briefs" or "memoranda of law." Students also will learn to present an oral argument to a court. LARW II continues to implement the problem-solving approach to teach persuasive writing, and students continue to receive individualized feedback throughout the course.
Effective: Summer 2011
Prerequisite:

CORE 920 Property (4) This course introduces the basic concepts and principles in the law of property. Topics include: acquisition and allocation of property rights; restrictions on owners' rights to use, limit access to, and sell or dispose of their property; and the relationships among multiple owners of rights in the same property. The emphasis is on real property, although the course also addresses intellectual property and other types of personal property.
Effective: Summer 1999

CORE 925 Torts (4) Tort law seeks to remedy civil wrongs that result in harm to person or property. The class will focus on basic concepts such as the international torts, negligence, strict liability, and products liability.
Effective: Summer 1999

CORE 934 Professional Responsibility (3) Through the use of hypothetical situations, this course attempts to generate

The Pennsylvania State University
student sensitivity to ethical problems faced by lawyers in various kinds of practice. The ABA Model Rules of Professional Conduct and the older Code of Professional Responsibility are the basic tools, but discussion centers as well on case law, ABA opinions and standards, statutes, and the dictates of conscience. Discipline and professional malpractice are also treated.

Effective: Fall 2011
**Corp & Comm Law (CCLAW)**

**CCLAW 952 Secured Transactions** (3) This course deals with the creation, enforcement, and priorities of personal property security interests under Article 9 of the Uniform Commercial Code and related statutes. It addresses: (a) encumbrances on consumer, commercial, and industrial goods, (b) inventory and receivables financing for manufacturers, distributors, and dealers, and (c) personal property agricultural financing. Relevant provisions of other articles of the UCC and other state and federal statutes are integrated into the course as required.

Effective: Fall 2008

**CCLAW 954 Nonprofit Organizations** (3) This course provides an overview of laws and policies that affect that nonprofit sector, a vital component of national and international economics. It covers alternative organizational structures, including the creation and operation of a nonprofit corporation under U.S. laws. The course examines the status, rights and fiduciary obligations of directors and members. The course introduces tax laws applicable to nonprofit organizations, including the importance of obtaining and maintaining tax exempt status, public charity or private foundation status, and the taxable status of "unrelated business income." The course looks at the laws governing charitable giving.

Effective: Spring 2012

**CCLAW 955 Agency, Partnerships, and Limited Liability Entities** (3) This course surveys the law of unincorporated business entities. The agency law part of the course will focus on agents' powers and responsibilities, liabilities of principals for acts of agents, and termination of the agency relationship. The partnership law part of the course will cover the fiduciary obligations of partners, partners' management and property rights, and partnership dissolutions. The final part of the course will examine the "new" limited liability entities now provided for by the law of all states; with emphasis on the formation, organization, and dissolution of limited liability companies. Although not a prerequisite, this course is strongly recommended for students planning to enroll in Corporations.

Effective: Fall 2011

**CCLAW 956 Agricultural Law** (3) This course will introduce students to the range of current and emerging issues that confront agricultural producers, agri-business firms, and other segments of that broader sector of the economy referred to as the "food industry." The course will address a variety of issues including the history and objectives of agricultural policy, land use planning for agricultural activities, resource use and allocation, industrialization in the agricultural sector, intergenerational transfers of farm businesses, international trade, and ethical issues that confront practitioners.

Effective: Summer 2011

**CCLAW 957 Banking Regulation** (2) This course will focus on banks as financial intermediaries and compare them to both the securities and insurance industries. The dual banking system of state and federal regulation will be explored as to bank formation, supervision and regulation. The course will explore the ownership and control issues affecting banks and the supervision and regulation of bank holding companies and their subsidiaries engaged in nontraditional banking activities. The causes of the financial crisis of 2007-2009, together with the reaction of financial institutions, the states, the U.S. Congress and the regulators to the crisis, will also be examined. The course will include an assessment of the deposit insurance system and the problems associated with troubled and failed banks. The course will emphasize the potential administrative enforcement, civil and criminal exposure of both regulated entities and individuals involved within those industries.

Effective: Fall 2012

**CCLAW 958 Business Planning for Small Business Enterprises** (3) Selected practical problems involving the planning of business transactions, with emphasis upon the small business enterprise, are examined. Topics include: organization of close corporations, partnerships and LLCs; employee compensation; sexual harassment and discrimination issues; executive hiring negotiations; and raising capital through the sale of securities. This course is strongly suggested for anyone who plans on representing businesses.

Effective: Spring 2012

Prerequisite:

**CCLAW 959 Business Reorganizations** (3) This course is a study of the law governing the reorganization of businesses under Chapter 11 and related provisions of the U.S. bankruptcy code. It includes such topics as prepetition planning, the filing of a business reorganization case (either voluntary or involuntary), jurisdiction and venue, the automatic stay and "adequate protection," the bankruptcy estate, "first day" orders, use of cash collateral, postpetition financing, wage payment orders, rights of utilities, reclamation rights, executory contracts, employment and payment of professionals, professional responsibility in the bankruptcy context, creditors' (and other) committees, chapter 11 trustees and examiners, substantive consolidation, chapter 11 plans and disclosure statements, plan confirmation, claims objections, avoidance actions, coordination of international insolvency cases.

Effective: Summer 2012

Prerequisite:

**CCLAW 960 Consumer Protection** (2) This course will deal with federal and state statutes and regulations that primarily protect the consumer. Federal laws covered in detail are the Magnuson-Moss Warranty-Federal Trade Commission Improvement Act, the Consumer Credit Protection Act, and federal tax lien statutes. State laws on false and misleading advertisements and full disclosure will be examined, along with state procedures for attachments in the enforcement of money judgments.

Effective: Summer 2011
CCLAW 961 Bankruptcy (3) The rights, duties, and remedies of both debtor and creditor are examined. The course covers the collection process, enforcement of money judgments and insolvency proceedings. Federal bankruptcy law is emphasized.
Effective: Fall 2009

CCLAW 963 Corporations (3) This course primarily addresses organization and operation of commercial organizations in the Anglo-American community. Preliminarily, sole proprietorships and partnerships are considered, after which corporations-for-profit are emphasized with some attention to business trusts and non-profit corporations. In the corporate context, duties of promoters, directors, officers, and other insiders are considered. Availability in the U.S. of the derivative action is treated in terms of both unincorporated and corporate forms of organization. Also treated are the basics of securities regulation at the federal and state levels in the U.S. and the provincial level in Canada.
Effective: Spring 2003

CCLAW 964 Business Planning for Mergers and Acquisitions I (3) This course first focuses on various topics that are important in M&A transactions involving both closely-held corporations, including directors duties, shareholder voting and dissenters’ rights, basic issues under the Federal securities laws, fundamentals of Federal income taxation and accounting, use of modern valuation techniques, including DCF and CAPM, in M&A, and basic issues in antitrust and pre-merger notification. The course then turns to an analysis of various forms of negotiated acquisition, including acquisitions of stock and assets of closely-held corporations and acquisitions of publicly-held corporations in negotiated transactions. The course is based on the first half of Thompson, Business Planning for Mergers and Acquisitions: Corporate, Securities, Tax, Antitrust, International, and Related Aspects (2008).
Effective: Fall 2012
Prerequisite:

CCLAW 965 Business Planning for Mergers and Acquisitions II (3) This course builds on the topics covered in Business Planning for Mergers and Acquisition I, and is based on the second half of Thompson, Business Planning for Mergers and Acquisitions: Corporate, Securities, Tax, Antitrust, International, and Related Aspects (2008). The course starts with an examination of leveraged buyouts, and then focuses on the drafting of various types of acquisition agreements. The course then looks at proxy contests and then turns to hostile takeovers and going private transactions regulated by the Williams Act provisions of the Securities Exchange Act of 1934. The course then looks at special topics in M&A, including spinoffs, international M&A, bank acquisitions, acquisitions of public utilities, bankruptcy acquisitions, joint ventures and ethics issues in M&A.
Effective: Spring 2012
Prerequisite:

CCLAW 966 Financial Accounting (2) Students will acquire a basic understanding of the concepts and principles of financial accounting practice, confidence analyzing common forms of financial data (e.g., 10K or annual reports), competence to communicate effectively with accountants, awareness of the uses and limits of financial accounting data in decision-making, and perspective necessary to understand how an event affects a firm’s financial statements.
Effective: Fall 2012

CCLAW 967 Commercial Litigation (2) The purpose of this course is to provide students with an overview of modern commercial litigation.
Effective: Spring 2014

CCLAW 968 Multinational Corporations (3) This course will introduce students to the multinational corporation as object and source of law and legal regulation, and the role of multinational corporations in world affairs.
Effective: Spring 2014
Prerequisite:

CCLAW 969 Insurance Law (3) A study of special legal principles applicable to insurance contracts is undertaken with an examination of the insurance industry and insurance marketing, the identity of persons and interests protected, the nature and selection of risks, the rights and duties of the contracting parties, and the enforcement of claims.
Effective: Spring 2009

CCLAW 971 International Business Transactions (3) This course considers private business transactions that cross national boundaries. Topics include formation and enforcement of commercial agreements, forms of international transactions (e.g., agencies, distributorships, licensing agreements, franchising, and foreign subsidiaries), government regulation, electronic commerce, international and cross-cultural business negotiation and techniques for resolution of international business disputes (e.g., judicial procedure, arbitration, mediation).
Effective: Fall 2013

CCLAW 972 Operational Issues for Small Business Enterprises (3) This course will provide practical experience for students who wish to become transactional attorneys through business problems designed to allow them to identify relevant issues and draft documents resolving those issues.
Effective: Spring 2014
Prerequisite:

CCLAW 973 International Trade Law (3) Coverage of the principal laws that govern business transactions across international borders.
Effective: Fall 2005

The Pennsylvania State University
CCLAW 978 Payment Systems and Financial Transactions (3) Payment Systems and Financial Transactions is a general overview of the law of negotiable instruments (e.g., checks) and other mechanisms for making payments, including credit cards, debit cards, ACH payments, and wire transfers. The course also will cover credit enhancement systems such as guaranties and letters of credit. The course will address both uniform state law (UCC Articles 3, 4, 4A, and 5), and applicable federal statutes and regulations (such as the Expedited Funds Availability Act, the Truth-in-Lending Act, and the Electronic Fund Transfer Act).
Effective: Fall 2012

CCLAW 979 Regulation of Financial Institutions (3) This course will focus on the regulation of commercial banks in the U.S., and will include an overview of the regulation of other financial institutions, such as insurers, securities brokers-dealers and investment companies.
Effective: Fall 2014 Future: Fall 2014

CCLAW 980 International Commercial Transactions (3) This course considers private business transactions that cross national boundaries. Topics include formation and enforcement of commercial agreements, forms of international transactions (e.g., agencies, distributorships, licensing agreements, franchising, and foreign subsidiaries), government regulation, electronic commerce, international and cross-cultural business negotiation and techniques for resolution of international business disputes (e.g., judicial procedure, arbitration, mediation).
Effective: Fall 2014 Future: Fall 2014

CCLAW 982 Products Liability (2) This course incorporates and expands the concepts derived from the basic Torts, Contracts, and Uniform Commercial Code coverage of products liability. Emphasis will be on the substantive and procedural law of contract, negligence, and strict liability developed by courts and administrative tribunals. Proposals for legislative reforms will also be studied.
Effective: Fall 1998

CCLAW 984 Sales (3) Article Two of the Uniform Commerical Code is an integrated body of statutory law that prescribes the rights and obligations of parties involved in transactions in goods. Although we will review general principles of contract law and contrast them with the approach adopted in Article Two, this course emphasizes the special techniques of statutory construction utilized in interpreting a code as opposed to an isolated statute. Classroom discussion is devoted almost exclusively to developing analyses of written problems distributed to the students in advance of the class. The problems require students to fashion arguments based on the statutory language. The problems also require students to develop an understanding of the legal and commercial context based on the assigned readings, and then to interpret the statutory language in light of the context.
Effective: Summer 2011

CCLAW 986 Federal Securities Regulation (3) This course is intended to provide an overview of the federal securities laws. Securities regulation plays a crucial role in many different fields of business law, and every lawyer should have at least a basic knowledge of its general principles. The course focuses on issues such as the offering of securities, civil liabilities connected with the sale and purchase of financial instruments, insider trading, proxy voting and M&As, takeovers, stock exchanges and brokers/dealers regulation. Specific attention is devoted to securities litigation aspects, including class actions.
Effective: Fall 2011
Prerequisite:

CCLAW 991 Antitrust (3) This course is principally an examination of antitrust law and policy in the U.S. as evolved through prosecutions by the U.S. Department of Justice and the Federal Trade Commission. There is brief coverage of: (a) European Union and Canadian competition laws plus evolving proposals for supranational norms; and (b) leading market regulatory schemes such as those affecting marketing of foods, drugs, textiles, toxic substances, securities, and consumer products. In the antitrust area, commercial conduct alleged to violate price fixing, market allocation, tying, exclusive dealing, asset acquisition, and price discrimination norms are considered at length with some attention to state antitrust law.
Effective: Spring 2001

CCLAW 993 Merger Finance and Economics (2) The purposes of the course are to provide the student with (1) a fundamental understanding of the finance and economics of the M&A marketplace, and (2) the basic skills needed to succeed in various professional capacities in the M&A marketplace, such as investment banker, management consultant, strategic planner, and lawyer.
Effective: Spring 2010

CCLAW 994 Telecommunications Law and Regulation (3) This course will examine and debate a series of legal and regulatory issues raised by spectrum management, broadcasting, cable television, common carrier, Internet, resource allocation, and technology planning topics.
Effective: Spring 2012

CCLAW 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2007

The Pennsylvania State University
Counseling Psychology (CNPSY)

CNPSY 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2011

CNPSY 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

CNPSY 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2011

CNPSY 502 (CN ED 502) Advanced Counseling Theory and Method (3) Assessment, intervention, and evaluation procedures for counseling problems frequently encountered in school, college, and rehabilitation settings.
Effective: Summer 2011
Prerequisite:

CNPSY 515 Family Systems Therapy: Theory, Research and Practice (3) Examines theory, research, and interventions grounded in family systems framework (e.g., Bowenian, Structural Strategic, etc.) from a psychological perspective.
Effective: Summer 2011
Prerequisite:

CNPSY 554 (CN ED 554) Cross-Cultural Counseling (3) Examines theory, research, and models of counseling relationships between counselors and clients of different racial and sociocultural backgrounds.
Effective: Summer 2011
Prerequisite:

CNPSY 555 (CN ED 555) Career Counseling (3) The examination of historical, legislative, and current models of career counseling and the development of pertinent individual and group techniques.
Effective: Summer 2011
Prerequisite:

CNPSY 582 (CN ED 582) Advanced Group Psychotherapy (3) Study of group psychotherapy and interventions, with an experiential component. Available only to majors in CN ED and CNPSY.
Effective: Summer 2011

CNPSY 589 Seminar on Counseling Supervision (1) Study of research about and theoretical models of clinical supervision of counselors; includes preparation for a practicum in counseling supervision.
Effective: Spring 2014
Prerequisite:

CNPSY 594 Research in Counseling (2-6) The design, implementation, and evaluation of counseling research projects.
Effective: Summer 2011

CNPSY 595A Counseling Psychology Practicum (1-3 per semester, maximum of 12) Practice in the application of counseling psychology principles and methods to cases counseled under supervision; case conferences.
Effective: Summer 2011
Prerequisite:

CNPSY 595D (CN ED 595D) Supervision of Counselors (3-9) Practical experience in supervising and evaluating work of counselors.
Effective: Summer 2011
Prerequisite:

CNPSY 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

CNPSY 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2011

CNPSY 600 THESIS RESEARCH (1-15) NO DESCRIPTION.
Effective: Summer 2011

CNPSY 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 2011

The Pennsylvania State University
CNPSY 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description available.
Effective: Summer 2011

CNPSY 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Summer 2011

Last Import from UCM: May 24, 2014 3:00 AM
Counselor Education (CN ED)

CN ED 401 Foundations of Chemical Dependency Counseling (3) An overview of diagnosis and assessment, models for chemical dependency prevention, counseling, and recovery; contexts of chemical dependency treatment.
Effective: Summer 2011
Prerequisite:

CN ED 404 Group Procedures in Guidance and Counseling (3) The nature and functioning of groups in educational and agency settings. Provides prospective counselors with experience in the group process.
Effective: Summer 2011
Prerequisite:

CN ED 416 Interpersonal Relationships and Alcohol and Other Drugs (AOD) Dependency (3) This course examines families with chemically dependent members, dynamics, appropriate interventions, and treatment.
Effective: Summer 2011
Prerequisite:

CN ED 420 Chemical Dependency: Youth at Risk (3) Study of youth who are at-risk of developing chemical dependency including the characteristics and factors related to chemical dependency.
Effective: Summer 2011
Prerequisite:

CN ED 421 Counseling Strategies for Preventing Chemical Dependency (3) Examines helping professional's role in primary and secondary prevention of substance abuse, and related problems like delinquency, suicide, and pregnancy.
Effective: Summer 2011
Prerequisite:

CN ED 422 Foundations of Addictions Counseling (3) Study of the fundamental principles of counseling individuals with a wide variety of addictions.
Effective: Summer 2011
Prerequisite:

CN ED 423 Student Assistance Programs (3) Exploration of early stages of adolescent "at-risk" behavior and skills for student assessment and intervention within schools and communities.
Effective: Summer 2011
Prerequisite:

CN ED 424 (WF ED 424) Facilitating Career Development (3) This course provides individuals with relevant skills and knowledge to assist others in planning careers and obtaining meaningful work.
Effective: Summer 2012
Prerequisite:

CN ED 430 Couples and Family Counseling (3) The theory and practice of counseling with couples and families emphasizing family development and major intervention approaches.
Effective: Summer 2011
Prerequisite:

CN ED 431 Counseling and Teaching Youth at Risk (3) This course is focused on how to counsel and/or teach youth at risk for a variety of social, emotions, and educational problems.
Effective: Summer 2011
Prerequisite:

CN ED 432 Ethical, Legal, and Professional Issues in Counseling (3) Examination of the current ethical and legal issues related to professional counselors and counseling.
Effective: Summer 2011
Prerequisite:

CN ED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

CN ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

CN ED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

CN ED 500 Introduction to Counseling and Development (3) Introduces students to the profession of counseling and to the major models of human growth and development.
Effective: Summer 2011

CN ED 501 Counseling Theory and Method (3) Survey of psychodynamic, humanistic, behavioral and
cognitive-behavioral approaches to counseling individuals.
Effective: Summer 2011

CN ED 502 (CNPSY 502) **Advanced Counseling Theory and Method** (3) Assessment, intervention, and evaluation procedures for counseling problems frequently encountered in school, college, and rehabilitation settings.
Effective: Summer 2011
Prerequisite:

CN ED 503 **Guidance Services in Elementary Education** (3) Guidance services to elementary school students; guidance opportunities for elementary teachers and principals.
Effective: Summer 2011

CN ED 504 **Guidance Services in Secondary Education** (3) Nature and scope of guidance in secondary schools--services, models, and strategies; the counselor as an agent of change.
Effective: Summer 2011

CN ED 505 **Foundations of Career Development and Counseling Information** (3) Accelerating change in economic, psychological, social, educational influences upon counselees. Utilization of information systems in effecting counselee change.
Effective: Summer 2011

CN ED 506 **Individual Counseling Procedures** (3) Training in listening, responding, challenging skills, and action-oriented techniques for individual counseling.
Effective: Summer 2011
Prerequisite:

CN ED 507 **Multicultural Counseling: Foundations** (3) Provide foundational information that controverts, complements and extends traditional psychology and counseling theory and practice.
Effective: Summer 2011

CN ED 508 **Organization and Administration of Pupil Services** (3) Principles, organization, personnel, functions, integration with school programs, evaluation.
Effective: Summer 2011
Prerequisite:

CN ED 509 **Introduction to Rehabilitation Counseling** (3) Provides information about rehabilitation history, legislation, philosophy, and agencies, as well as an overview of a variety of disabling conditions.
Effective: Summer 2011

CN ED 510 **Foundations of Clinical Mental Health Counseling in Schools and Communities** (3) Foundational content for the profession of clinical mental health counseling.
Effective: Summer 2014

CN ED 516 **Helping Skills for Student Affairs Professionals** (3) Develop beginning content knowledge and skills related to practice of active listening, attending, and referral necessary for student affairs work.
Effective: Summer 2011
Prerequisite: Concurrent: CN ED 501

CN ED 523 **Counseling Children** (3) Provides school and clinic approaches for school counselors and others mental health professionals to help children with developmental problems.
Effective: Summer 2011

CN ED 524 **Counseling Adolescents** (3) Provides approaches for school counselors and others working with a variety of adolescent obstacles and developmental needs
Effective: Summer 2011

CN ED 525 **Applied Testing in Counseling** (3) Using counseling assessments effectively and ethically in applied settings, with an emphasis on test analysis and evaluation of psychometric properties.
Effective: Summer 2011
Prerequisite:

CN ED 526 **Research in Counselor Education** (3) Evaluating counselor education research from scientist-practitioner perspective; emphasis on how to develop and use research with an applied focus.
Effective: Summer 2011

CN ED 530 **Family Counseling: Theory and Practice** (3) Conceptualization and application of family counseling frameworks to EC-12 school settings are learned in this course.
Effective: Summer 2011
Prerequisite:

CN ED 531 **Grief and Loss Counseling** (3) Course focus is on counseling people with a variety of grief and loss issues.
CN ED 532 Diagnosis Counseling (3) Course examines elements of counseling diagnosis, including identification and assessment of symptoms and behaviors in determining appropriate diagnoses. Effective: Fall 2012

CN ED 542 Dual Diagnosis (3) Examines issues related to diagnosis and treatment of individuals who have both a mental disorder and a substance abuse disorder. Effective: Summer 2011

CN ED 554 (CNPSY 554) Multicultural Counseling (3) Examines theory, research, and models of counseling relationships between counselors and clients of different racial and sociocultural backgrounds. Effective: Summer 2011
Prerequisite:

CN ED 555 (CNPSY 555) Career Counseling (3) The examination of historical, legislative, and current models of career counseling and the development of pertinent individual and group techniques. Effective: Summer 2011
Prerequisite:

CN ED 560 Psychosocial Aspects of Disability (3) Psychological models of reaction to disability and social consequences in adulthood; generalizations to other life crises; implications for counselor interventions. Effective: Summer 2011
Prerequisite:

CN ED 561 Job Development and Employment of Persons with Disabilities (3) Assessing client readiness for work, job-seeking skills training, job placement strategies, modifications to the worksite, methods for employer development. Effective: Summer 2011
Prerequisite:

CN ED 580 Foundations: History and Trends in Counselor Education (3) Overview of the foundations and issues relevant to the counseling profession and counselor education. Course available only to majors in CN ED. Effective: Summer 2011
Prerequisite:

CN ED 581 Professional Issues in Counselor Education (3) Forum for doctoral students to examine and analyze issues relevant for counselor educators. Available only to majors in CN ED. Effective: Summer 2011
Prerequisite:

CN ED 582 (CNPSY 582) Advanced Group Psychotherapy (3) Study of group psychotherapy and interventions, with an experiential component. Available only to majors in CN ED and CNPSY. Effective: Summer 2011
Prerequisite:

CN ED 589 Seminar on Counseling Supervision (3) Study research and theoretical models of clinical supervision of counselors. Includes experiential supervision component as preparation for counseling supervision practicum. Effective: Fall 2013

CN ED 593 Management of College and University Career Centers (3) The course focuses on the design, management, implementation, and promotion of Career Services in higher education. Effective: Spring 2014
Prerequisite:

CN ED 594A Research Topics (3) The design, implementation, and evaluation of counseling research projects. Effective: Summer 2013

CN ED 595A Counseling Practicum (1-6) Practice in the application of guidance principles and methods to cases counseled under supervision; case conferences; seminar in guidance techniques. Effective: Summer 2011
Prerequisite:

CN ED 595B Supervised Practicum in Rehabilitation Counseling (1-6) Application of principles and techniques of rehabilitation counseling to cases involving people with disabilities. Effective: Summer 2011
Prerequisite:

CN ED 595C Professional Experience in Rehabilitation Counseling (1-15) Supervised internship, with responsibility for a regular case load. Effective: Summer 2011
Prerequisite:

CN ED 595D (CNPSY 595D) Supervision of Counselors (3-9) Practical experience in supervising and evaluating work of counselors. Effective: Summer 2011
Prerequisite:
CN ED 595E  **Elementary School Counseling Internship and Seminar** (1-3 PER SEMESTER/MAXIMUM OF 6) Off-campus, supervised internships in elementary school settings with supplementary related topics, discussion, and skills training in on-campus seminars.
Effective: Summer 2011
Prerequisite:

CN ED 595F  **Secondary School Counseling Internship and Seminar** (1-3 PER SEMESTER/MAXIMUM OF 6) Off-campus, supervised internships in secondary school settings with supplementary related topics, discussion, and skills training seminars.
Effective: Summer 2011
Prerequisite:

CN ED 595G  **Counseling Internship and Integrative Seminar** (3-6 per semester/maximum of 12) Off-campus, supervised internships in counseling settings with pertinent topics, discussion; skills training seminars on campus.
Effective: Fall 2013
Prerequisite:

CN ED 595J  **Counselor Education Doctoral Teaching Internship** (3) Practical experience in undergraduate and graduate level teaching under supervision. Available only to CN ED doctoral students.
Effective: Summer 2011
Prerequisite:

CN ED 595K  **Counselor Education Doctoral Counseling Internship** (3) Supervised internship, with responsibility for a regular counseling caseload. Available only to CN ED doctoral Students.
Effective: Summer 2011
Prerequisite:

CN ED 595P  **Counselor Education Doctoral Counseling Practicum** (3) Practice in the application of counselor education principles and methods to cases counseled under supervision; case conferences. Available only to CN ED doctoral students.
Effective: Summer 2011

CN ED 596  **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

CN ED 597  **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2011

CN ED 600  **Thesis Research** (1-15) No description.
Effective: Summer 2011

CN ED 601  **Thesis Preparation** No description.
Effective: Summer 2011

CN ED 602  **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching of counselor education laboratory, clinical practice, and recitation classes under senior faculty supervision.
Effective: Summer 2011

CN ED 610  **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 2011

CN ED 840  **Trends and Issues in Addiction Counseling** (3) This course provides an overview of current professional and ethical issues facing the addictions field.
Effective: Summer 2011

CN ED 843 (S PSY 843)  **Prevention Strategies and Programming** (3) Addresses prevention program development, implementation, and evaluation, along with theoretical and empirical underpinnings, ethical and multicultural issues related to prevention.
Effective: Summer 2011

Criminal Justice (CRIMJ)

CRIMJ 406 (SOC 406, CRIM 406) **Sociology of Deviance** (3) Theory and research concerning behaviors and lifestyles viewed as significant departures from a group's normative expectations.
Effective: Spring 2008
Prerequisite:

CRIMJ 407 (US) (CRIM 407) **Victimology** (3) This course will explore the legal, emotional, and social responses to the process of victimization by offenders and third parties.
Effective: Spring 2008

CRIMJ 408 **Police Administration** (3) Principles of administration as they relate to a police organization; and policy development.
Effective: Spring 2008
Prerequisite:

CRIMJ 410 **The Pennsylvania Court System** (3) Tracing the steps of criminal cases through the investigative stage, arrest, trial, sentencing and appellate review in Pennsylvania.
Effective: Spring 2004
Prerequisite:

CRIMJ 412 (SOC 412, CRIM 412) **Crime, Social Control, and the Legal System** (3) Legal and extralegal control; public opinion on crime; criminal justice and correctional processes; legal sanctions; control strategies. Field trip.
Effective: Spring 2008
Prerequisite:

CRIMJ 413 (CRIM 413, SOC 413) **Advanced Criminological Theory** (3) This course provides an in-depth look at theories of crime and examines influential empirical studies designed to these theories.
Effective: Spring 2008
Prerequisite:

CRIMJ 414 (SOC 414, CRIM 414) **Criminal Careers and the Organization of Crime** (3) Research on and theory of criminal careers and crime organizations, emphasizing recruitment and disengagement; offender characteristics and lifestyles; policy implications.
Effective: Spring 2008
Prerequisite:

CRIMJ 415 (PUBPL 415) **Drug Control Policy in Comparative Perspective** (3) Examines the history of drug control policy in the United States; comparisons and contrasts with other countries' experiences.
Effective: Summer 2004
Prerequisite:

CRIMJ 420 **Criminal Law and Procedure** (3) Common law and statutory crimes; constitutional rights of accused persons, liability of criminal justice professionals.
Effective: Spring 2008
Prerequisite:

CRIMJ 421 (CRIM 421) **Violent Crime in the United States** (3) The impact of violent crime on victims, their families, and communities; the police process as it relates to violent crime.
Effective: Spring 2008
Prerequisite:

CRIMJ 422 (CRIM 422) **Victimization** (3) Examines the history, how victimization is measured/studied in social sciences, public policy implications of victimization movement in U.S.
Effective: Spring 2008
Prerequisite:

CRIMJ 423 (US) (WMNST 423, CRIM 423) **Sexual and Domestic Violence** (3) Legal, sociological, and psychological perspectives on sexual and domestic violence.
Effective: Spring 2008
Prerequisite:

CRIMJ 424 (CRIM 424) **Drugs and Crime** (3) Analysis of international narcotics trafficking in the twentieth century.
Effective: Spring 2008
Prerequisite:

CRIMJ 424W **Drugs and Crime** (3) Analysis of international narcotics trafficking in the twentieth century.
Effective: Spring 2008
Prerequisite:

CRIMJ 425 (CRIM 425) **Organized Crime** (3) This course examines organized crime in terms of historical antecedents, structure, related theories, and policy issues.
Effective: Spring 2008
Prerequisite:

CRIMJ 426 **Special Offender Types** (3-6) Study of special offender types; relationships with criminal justice system (drug abuse, victimless crime, white collar crime considered different semesters).

The Pennsylvania State University
Effective: Spring 2008
Prerequisite:

CRIMJ 430 Alternatives to Incarceration (3) Control and treatment of offenders in the community, probation and parole organizations, diversion programs, innovative sentences, supervision techniques.
Effective: Spring 2008
Prerequisite:

CRIMJ 431 Offender and Prisoner Rights (3) The identification of correctional problems and the setting of objectives as reflective of court rulings, legislative change, and administrative law.
Effective: Spring 2008
Prerequisite:

CRIMJ 432 (CRIM 432) Crime and the American Court System (3) This course examines the American court system including structure and the way courts process offenders with special focus on sentencing.
Effective: Spring 2008
Prerequisite:

CRIMJ 435 Border Security (3) This course provides knowledge about government organizations charged with American border security, guiding laws and policies.
Effective: Summer 2011
Prerequisite:

CRIMJ 439 (PL SC 439) The Politics of Terrorism (3) Analysis of political terrorism as a violent alternative for peaceful change and traditional warfare in the nuclear age.
Effective: Spring 2008
Prerequisite:

CRIMJ 441 (US) (CRIM 441) The Juvenile Justice System (3) Historical and contemporary view of the juvenile justice system. Focus on analyzing components of the system, their interactions, processing, and handling of youths.
Effective: Spring 2008
Prerequisite:

CRIMJ 441W The Juvenile Justice System (3) Historical and contemporary view of the juvenile justice system. Focus on analyzing components of the system, their interactions, processing, and handling of youths.
Effective: Spring 2008
Prerequisite:

CRIMJ 450W Senior Seminar (3 per semester/maximum of 6) Capstone course exploring past, current and future developments in criminal justice.
Effective: Spring 2008
Prerequisite:

CRIMJ 451 (US) (CRIM 451) Race, Crime, and Justice (3) This course focuses on the significance of race, class, and ethnicity to criminal justice processing and criminal offending.
Effective: Spring 2008
Prerequisite:

CRIMJ 453 (US) (WMNST 453, CRIM 453) Women and the Criminal Justice System (3) This course focuses on the experiences of women as offenders, victims, and professionals in the criminal justice system.
Effective: Spring 2013
Prerequisite:

CRIMJ 460 History and Function of Criminal Justice Components (3) Historical development of criminal justice system components (police, courts, corrections) related to formulation and function of the state.
Effective: Spring 2008

CRIMJ 462 Comparative Criminal Justice Systems (3) A comparison of American and selected foreign justice systems to illustrate the variety of possible responses to crime.
Effective: Spring 2008
Prerequisite:

CRIMJ 465 Ethics in Criminal Justice (3) Ethical behavior in the criminal justice system.
Effective: Spring 2008
Prerequisite:

CRIMJ 467 (SOC 467, CRIM 467) Law and Society (3) Law and society studies the social origins of law and legal systems; occupational careers, and decision-making of legal officials.
Effective: Spring 2008
Prerequisite:

CRIMJ 469 (HIST 469) Drugs and Drug Policy in the United States (3) Examines the history and dimensions of drug use and analyzes the impact of drug policy.
Effective: Spring 2008
Prerequisite:

CRIMJ 471 Legal Rights, Duties, Liabilities of Criminal Justice Personnel (3) Civil law issues within a justice agency and between criminal justice agencies and members of the public.
Effective: Fall 2013
Prerequisite:
CRIMJ 473 Criminal Procedure and Evidence in the Business Community (3) Law of evidence and proof, constitutional constraints on police procedures (arrest, search, etc.) in society and the business community. Effective: Fall 2013
Prerequisite:

CRIMJ 482 (CRIM 482) Seminar, Criminal Justice Agency Administration (3) Relates organizational and public policy management approaches to police, courts, and correctional institutions. Effective: Spring 2008
Prerequisite:

CRIMJ 489W Victimology: Predatory Crime (3) This course uses medical, social scientific and legal research to study the complexities of predatory crime. Effective: Spring 2004
Prerequisite:

CRIMJ 494 Research Topics (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 2002

CRIMJ 494H Research Topics (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007

CRIMJ 495 Internship in Criminal Justice (3-12) Experience with a criminal justice agency coordinated through readings and discussion. Effective: Spring 2008
Prerequisite:

CRIMJ 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Summer 1987

CRIMJ 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Summer 1987

CRIMJ 497A Issues in Law Enforcement (3) This course will examine several contemporary issues of relevance to law enforcement professionals. Students who are seeking a career in law enforcement would benefit from discussion and understanding of four key areas of concern facing law enforcement professionals on a daily basis. The course will provide both instruction and application of key concepts covered through lecture. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

CRIMJ 497A Problem Solving Courts (3) This course provides students with an understanding and appreciation of the procedures, functioning and criteria that govern these new tribunals by examining the operation of drug, mental health, veterans, DUI, and reentry courts. It also analyzes whether such courts adequately address the needs of the offender, safeguard the constitutional rights of the accused, and protect the safety and security of the community. Effective: Spring 2015 Ending: Spring 2015 Future: Spring 2015

CRIMJ 497B Media and Crime (3) This seminar course will include an examination of the relationship between media and crime. Specifically, the impact of the media on the criminal justice system, as well as the impact of crime on media, will be discussed. Additionally, media portrayal of special offender types, such as women and juveniles, will be covered. Various theories regarding the relationship between media and crime will also be examined. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

CRIMJ 499 (IL) Foreign Studies (6) Courses offered in foreign countries by individual or group instruction. Effective: Spring 2008

CRIMJ 500 Advanced Criminological Theory (3) This course reviews and critiques the major theories of crime causation. Effective: Summer 2002
Prerequisite:

CRIMJ 501 Quantitative Methods for Criminal Justice (3) Advanced research methodology for criminal justice and criminology. Effective: Summer 2002
Concurrent: CRIMJ 503

CRIMJ 502 Public Policy and the Criminal Justice System (3) This course studies the concepts and methods of political and legal activity within the criminal justice system and their impact on society. Effective: Summer 2002
Prerequisite:

CRIMJ 503 Advanced Statistics in Criminal Justice (3) Advanced statistics in criminal justice and criminology.

The Pennsylvania State University
CRIMJ 504 Criminal Justice Organization and Management (3) The course will be a broad overview of the structure and management of criminal justice organizations.
Effective: Summer 2002
Prerequisite:

CRIMJ 563 Concepts and Practices in Police Administration (3) Discusses application of police research and management principles to the contemporary policing context.
Effective: Spring 2006
Prerequisite:

CRIMJ 564 Administrative and Legal Aspects of Corrections (3) This course addresses historical and contemporary correctional policy, accountability, and possible remedial alternatives.
Effective: Spring 2006
Prerequisite:

CRIMJ 565 Courts in the Criminal Justice System (3) An analysis of the function and role of the courts and the personnel involved in the American criminal justice system.
Effective: Spring 2006
Prerequisite:

CRIMJ 567 Juvenile Justice: Issues and Practice (3) The systematic application of the juvenile justice system and issues related to juvenile delinquency and constitutional law.
Effective: Summer 2002
Prerequisite:

CRIMJ 568 Qualitative Methods for Criminal Justice (3) This course examines the many facets of qualitative research methodology.
Effective: Fall 2002
Prerequisite:

CRIMJ 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2002

CRIMJ 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2002

CRIMJ 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2006
Prerequisite:

CRIMJ 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2002

CRIMJ 600 Thesis Research (1-15) No description.
Effective: Summer 2002

CRIMJ 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 2002

Last Import from UCM: May 24, 2014 3:00 AM
Criminal Law (CRIML)

CRIML 952 Federal Criminal Practice (2) This course is an in-depth examination of all stages of a federal criminal prosecution, commencing with the decision to charge, and continuing through trial and sentencing. Subjects will include the Bail Reform Act of 1984, investigative techniques, motions to suppress, immunity, privileges, trial techniques, and the Federal Sentencing Guidelines. Strategic decisions involving pre-trial proceedings, trials, and sentencings will be addressed via presentations by experienced judges, practitioners, and other participants in the process. The goal of the course is to provide students with practical advice and insightful tips regarding every aspect of federal criminal litigation.
Effective: Summer 2013

CRIML 953 Advanced Criminal Procedure (3) This course examines the constitutional, statutory and rule-based issues that arise in the formal processing of a criminal case. Subject include the decision to charge, prosecutorial discretion, grand jury and preliminary hearing, joinder and severance, bail and pretrial release, discovery, plea bargaining and guilty pleas, speedy trial, jury composition and selection, pre-trial publicity, confrontation, cross-examination and the privilege against self-incrimination.
Effective: Fall 2012

CRIML 970 International Criminal Law (3) A study of the principles, history, procedures and substance of international criminal law.
Effective: Summer 2005

CRIML 974 Juvenile Law (2) This course examines the legal position of the child in society and the extent to which the child may be legally controlled by parent(s) or state. Subject matters include the right of the child to control reproductive decision-making, child support and paternity issues, child pornography and minors’ access to pornography, child abuse and neglect, foster care, termination of parental rights, adoption, medical treatment of juveniles, and medical experimentation on juveniles. The course also examines the delinquency jurisdiction of juvenile court, the constitutional protections afforded the child accused of criminal activity, adjudications of delinquency, punishment or placement of the child in the dispositional phase of juvenile proceedings, and treatment of the child as an adult offender.
Effective: Spring 2012

CRIML 981 Pennsylvania Criminal Law Practice (2) This course is a step-by-step analysis of the procedure, planning, tactics, and strategy in defending and prosecuting a criminal case in Pennsylvania from pre-arrest through appeal. Special emphasis is placed on all aspects of the procedure and law relating to the suppression of evidence.
Effective: Fall 1998

CRIML 984 Post-Conviction Process (3) This is a study of guilty pleas and sentencing alternatives, post-conviction remedies, parole, probation, commutation, and pardon. The course will also examine the law of corrections and prisoners’ rights.
Effective: Spring 2013

CRIML 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2008

CRIML 998 White-Collar Crime (3) This course will cover the substantive law and procedures of major white-collar crimes, including conspiracy, fraud, the Racketeer Influenced and Corrupt Organizations law (RICO), money laundering, public corruption, and economic crimes. It will also examine their civil counterparts and civil and administrative consequences and analyze the theory and policies of these hybrid criminal statutes. Finally, the class will learn and practice skills associated with white-collar crime cases, for example, investigative techniques, negotiation, and development of effective theories of the case.
Effective: Fall 1998

Last Import from UCM: May 24, 2014 3:00 AM
Criminology (CRIM)

CRIM 406 (CRIMJ 406, SOC 406) Sociology of Deviance (3) Theory and research concerning behaviors and lifestyles viewed as significant departures from a group's normative expectations.
Effective: Spring 2008
Prerequisite:

CRIM 407 (CRIMJ 407) Victimology (3) This course will explore the legal, emotional, and social responses to the process of victimization by offenders and third parties.
Effective: Spring 2008

CRIM 412 (CRIMJ 412) Crime, Social Control, and the Legal System (3) Legal and extralegal control; public opinion on crime; criminal justice and correctional processes; legal sanctions; control strategies. Field trip.
Effective: Spring 2008
Prerequisite:

CRIM 413 (SOC 413, CRIMJ 413) Advanced Criminological Theory (3) This course provides an in-depth look at theories of crime and examines influential empirical studies designed to test these theories.
Effective: Spring 2008
Prerequisite:

CRIM 414 (CRIMJ 414, CRIM 414) Criminal Careers and the Organization of Crime (3) Research on and theory of criminal careers and crime organizations, emphasizing recruitment and disengagement; offender characteristics and lifestyles; policy implications.
Effective: Spring 2008
Prerequisite:

CRIM 421 (CRIMJ 421) Violent Crime (3) Examines the nature and causes of violence. Several theoretical perspectives are reviewed including biological, psychological, social, and cultural.
Effective: Spring 2008
Prerequisite:

CRIM 422 (CRIMJ 422) Victimization (3) Examines the history, how victimization is measured/studied in social sciences, public policy implications of victimization movement in U.S.
Effective: Spring 2008
Prerequisite:

CRIM 423 (US) (CRIMJ 423, WMNST 423) Sexual and Domestic Violence (3) Legal, sociological, and psychological perspectives on sexual and domestic violence.
Effective: Spring 2013
Prerequisite:

CRIM 424 (CRIMJ 424) Drugs and Crime (3) Analysis of international narcotics trafficking in the twentieth century.
Effective: Spring 2013
Prerequisite:

CRIM 425 (CRIMJ 425) Organized Crime (3) This course examines organized crime in terms of historical antecedents, structure, related theories, and policy issues.
Effective: Spring 2008
Prerequisite:

CRIM 429 Seminar in Criminal Behavior (3-4 per semester/maximum of 7) This course explores the study of the application of criminological theories to our understanding of various forms of criminal behavior.
Effective: Spring 2008
Prerequisite:

CRIM 430 American Correctional System (3) Study of corrections from probation, intermediate punishment, adult and juvenile correctional institutions to parole.
Effective: Spring 2008
Prerequisite:

CRIM 432 (CRIMJ 432) Crime and the American Court System (3) This course examines the American court system including structure and the way courts process offenders with special focus on sentencing.
Effective: Spring 2008
Prerequisite:

CRIM 433 Sentencing (3) This course studies sentencing from prosecutorial charging decisions through revocation of probation, and the complex goals and responsibilities at sentencing.
Effective: Spring 2008
Prerequisite:

CRIM 435 Policing in America (3) This course will focus on current, historical, theoretical, and research issues surrounding law enforcement in the United States.
Effective: Spring 2008
Prerequisite:

CRIM 441 (US) (CRIMJ 441) Delinquency and Juvenile Justice (3) Course examines delinquency and the juvenile justice
system including delinquency's nature, causes, and prevention and the processing of juveniles.
Effective: Spring 2008
Prerequisite:

CRIM 451 (US) (CRIMJ 451) **Race, Crime, and Justice** (3) This course focuses on the significance of race, class, and ethnicity to criminal justice processing and criminal offending.
Effective: Spring 2008
Prerequisite:

CRIM 453 (US) (CRIMJ 453, WMNST 453) **Women and the Criminal Justice System** (3) This course focuses on the experiences of women as offenders, victims, and professionals in the criminal justice system.
Effective: Spring 2013
Prerequisite:

CRIM 467 (CRIMJ 467, SOC 467) **Law and Society** (3) Law and society studies the social origins of law and legal systems; occupational careers, and decision-making of legal officials.
Effective: Spring 2008
Prerequisite:

CRIM 469 **Seminar in the Law** (3-4 per semester/maximum of 7) The focus of this seminar is the law such as the laws of sentencing, appellate course decisions and their impact.
Effective: Spring 2008
Prerequisite:

CRIM 480H **Research Topics in Crime, Law, and Justice** (1) Students are exposed to a variety of research topics related to crime, law, and justice.
Effective: Spring 2008
Prerequisite:

CRIM 481H **Information Literacy in Crime, Law, and Justice** (1) Students are exposed to a variety of information sources related to crime, law, and justice.
Effective: Spring 2008
Prerequisite:

CRIM 482 (CRIMJ 482) **Seminar, Criminal Justice Agency Administration** (3) Relates organizational and public policy management approaches to police, courts, and correctional institutions.
Effective: Spring 2008
Prerequisite:

CRIM 490 **Crime Policy** (3) This course focuses on criminal justice policy and the factors that influence policy development and implementation.
Effective: Spring 2008
Prerequisite:

CRIM 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

CRIM 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2008

CRIM 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2008

CRIM 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2008

CRIM 805 (HLS 805) **Violence, Threats, Terror, and Insurgency** (3) This course provides an overview of the domestic and global issues related to homeland security.
Effective: Summer 2010

Last Import from UCM: May 24, 2014 3:00 AM
Curriculum and Instruction (C I)

C I 400 Introduction to Research Literature (3) Introduction to research literature and methodology; stress on interpretation, sources, and research reporting.
Effective: Fall 1981
Prerequisite:

C I 405 (EDLD 405) Strategies in Classroom Management (3) Managing and coping with disruptive student behavior in instructional settings so that they support the teaching/learning process.
Effective: Fall 2008
Prerequisite:

C I 412W Secondary Teaching (3) Study of the teacher’s responsibilities, steps in planning instruction, and various strategies for implementing and assessing teaching.
Effective: Spring 2007
Prerequisite:

C I 494H Research Techniques in Curriculum and Instruction (1-3) Examination, application, assessment, and presentation of research modes and techniques in Curriculum and Instruction. Limited to University scholars in the College of Education.
Effective: Spring 1988
Prerequisite:

C I 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Fall 2001
Prerequisite:

C I 495A Clinical Application of Instruction--PK--4 (3) Practicum situation for demonstration of selected instructional strategies and management skills acquired in professional training. To be offered only for Satisfactory/Unsatisfactory grading.
Effective: Spring 2014
Prerequisite: Concurrent: regular professional methods courses in area of certification.

C I 495B Clinical Application of Instruction--Middle Level Education (3) Practicum situation for demonstration of selected instructional strategies and management skills acquired in professional training. To be offered only for Satisfactory/Unsatisfactory grading.
Effective: Spring 2014
Prerequisite: Concurrent: MTHED 420 SCIED 458 SS ED 430W

C I 495C Clinical Application of Instruction--Secondary Education (3) Practicum situation for demonstration of selected instructional strategies and management skills acquired in professional training. To be offered only for Satisfactory/Unsatisfactory grading.
Effective: Spring 1997
Prerequisite: Concurrent: C I 412 and special methods course(s) in area of certification

C I 495D Practicum in Student Teaching--Childhood and Early Adolescent Education (12) Full-time classroom instruction in early childhood and elementary education. Students supervised by University personnel and practicing teachers. No concurrent courses other than C I 495F permitted.
Effective: Spring 2014
Prerequisite:

Effective: Spring 1997
Prerequisite:

C I 495F Professional Development Practicum (3) Instruction concurrent with student teaching practicum. Students focus on the solution of instructional problems identified at the practicum site.
Effective: Spring 1997
Prerequisite: Concurrent: C I 495D

C I 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

C I 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

C I 497B CEAED Disciplinary Inquiry Block (12) Block of four 3 credit courses required of all students in CEAED major including CI 495A, MTHED 420, SCIED 458 and SS ED 430W.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
C I 497B CEAED Discipline Inquiry Block (12) Course serves as block until CEAED students are registered by Department for appropriate section of MTHED 420, SCIED 458, SS ED 430W and C I 495A.

C I 497C IUG and Honors Thesis Writing Workshop (3) Workshop offering support for students writing theses in the Readings/SPLED IUG as well as Honors theses in any education major.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

C I 497E Teaching Reading and Writing to English Language Learners (3) This course prepares teachers to develop literacy instruction that supports the social, emotional, cultural, linguistic, and academic development of ELLs.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

C I 497F Analyses of Classroom Interaction (3) This course introduces students to foundational discourse-analytic studies in education and widely-used analytic techniques through hands-on data analysis sessions.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

C I 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

C I 500 Multiple and Mixed Methods in Curriculum Inquiry (3) Multiple and mixed methods of inquiry to investigate problems in the practice of curriculum and instruction.
Effective: Summer 2007

C I 501 Teaching as Inquiry (3) Course guides teachers to develop systematic inquires into effective teaching and learning.
Effective: Summer 1998

C I 502 Qualitative Research in Curriculum and Instruction I (3) Presentation of theoretical and practical issues related to designing and proposing qualitative research concerning curriculum, teaching and/or learning.
Effective: Summer 1998
Prerequisite:

C I 503 Qualitative Research in Curriculum and Instruction II (3) Considers forms of qualitative data, data analyses, procedures to generate data relationships, interpretation, and presentation of data.
Effective: Summer 1998
Prerequisite:

C I 528 Theories of Identity (3) Survey of 20th century theories of identity from post-colonial, critical race, psychoanalytic, Marxist, and post-structural feminist and queer perspectives.
Effective: Summer 2014

C I 529 Foucault in Education (3) Reading major works in Michel Foucault and applications of his work in the field of Education.
Effective: Spring 2014

C I 534 Historical Research in the Curriculum (3) The course addresses the practice of historical research in curriculum, burrowing from the techniques of historians, journalists, and educators.
Effective: Spring 1999

C I 542 (WMNST 542) Girls' Cultures and Popular Cultures (3) This seminar explores educational implications in popular texts created for and by girls across time and cultures.
Effective: Summer 2014

C I 550 Overview of Contemporary School Curriculum (3) Current school programs and options and their impact on pupils; problems in introducing new content into the curriculum.
Effective: Fall 1981
Prerequisite:

C I 560 Theories of Childhood (3) The study of childhood from cultural, historical, psychological and philosophical perspectives.
Effective: Spring 2014

C I 565 Writing Research Articles in Curriculum and Instruction (3) Graduate course on revising a written product for publication in a peer-reviewed research journal in curriculum and instruction or related fields.
Effective: Summer 2014

C I 577 (LL ED 577) Multicultural Issues in Literacy Education (3) Explores research questions, and theoretical
frameworks, and analyzes multicultural issues in popular media in the context of American schools.
Effective: Spring 1997
Prerequisite:

CI 580 (LL ED 580) Media Literacy, Language, and Literacy in Schools (3) Theories of media literacy, issues of non-print technology in language and literacy.
Effective: Spring 1997
Prerequisite:

CI 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

CI 595 Internship in Curriculum, Supervision, or Instruction (1-6) Internship in schools or other educational settings under supervision of graduate faculty in student’s area of specialization.
Effective: Spring 1987
Prerequisite:

CI 595G Practicum in Student Teaching - Secondary Education (9) Full-time professional development internship in secondary English education. Students supervised by University personnel and practicing teachers.
Prerequisite:

CI 596 Individual Studies (1-9) Creative projects including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

CI 596A Doing Research in the Professional Development Schools (3) Individual study.

CI 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered frequently.
Effective: Spring 1987

CI 597A Girls’ Cultures and Popular Cultures Created For and By Girls (3) This participatory seminar uses a historical approach to girlhood cultures to explore educational implications in different popular cultures created for and by girls.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

CI 597C Curriculum Leadership (3) Course intends to extend students’ foundational knowledge in order to better position them for roles of responsibility for leading, organizing, evaluating and managing curriculum.
Effective: Summer 2014 Ending: Summer 2014

CI 597C Teaching English Language Learners: Issues in Policy, Teacher Education, and Instruction (3) This course explores issues in teaching ELLs at multiple levels of the educational system from federal policy to the classroom.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

CI 597D Foundations of New Literacy Studies (3) This course surveys research that incited the foundation of New Literacy Studies, that which stabilized it, and currently propels it.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

CI 597E (EDTHP 597B, EDLDR 597B, HI ED 597B) Foundations Educational Research (3) This class has been designed primarily for students in doctoral programs in the College of Education. Within the highly politicized environment of the United States Education Sciences Reform Act of 2002, we are studying to become what it called "scientifically-based" education research. Understandably, the act has caused controversy among education researchers who find their work affirmed or discounted by this definition. In order to explore these controversies and to begin to identify our place as doctoral students and researchers among them, this course is designed to begin a reading of the history and philosophies of education research (primarily focusing on the United States).
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

CI 597F Language, Identity and the Development of Knowing (3) It explores the role of language in constructing identity through “becoming” in relation to race, ethnicity, gender, and class.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

CI 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2005

The Pennsylvania State University
C I 600 **Thesis Research** (1-15) No description.  
Effective: Fall 1983

C I 601 **Ph.D. Dissertation Full-Time** (0) No description.  
Effective: Fall 1983

C I 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching experience in Curriculum and Instruction undergraduate faculty supervision.  
Effective: Fall 1983  
Prerequisite:  
C I 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.  
Effective: Summer 2000

C I 610 **Thesis Research Off Campus** (1-15) No description.  
Effective: Fall 1983

C I 611 **Ph.D. Dissertation Part-Time** (0) No description.  
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Curriculum and Supervision (C & S)

Prerequisite:

C & S 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

Prerequisite:

C & S 553 (EDLDR 553) Issues in Curriculum (3 per semester/maximum of 6) In-depth study of issues and trends in the understanding and practice of curriculum. Effective: Spring 2011
Prerequisite:

C & S 555 Development of Teacher Education Programs (3) Study of the components and design of teacher education programs within the constraints of institutional, professional, and legal contexts. Effective: Spring 2012
Prerequisite:

C & S 557 (EDLDR 557) Seminar in Curriculum Research (3) Analysis of particular curriculum studies, methods and paradigms, and the general status of current research in the general curriculum field. Effective: Spring 2011
Prerequisite:

C & S 558 Standard Works in Curriculum and Instruction (3) Study of significant empirical, historical, evaluative, philosophical, and critical works having an impact on curriculum and instruction practice. Effective: Spring 2012
Prerequisite:

C & S 560 (EDLDR 560) Principles of Instructional Supervision (3) Social and institutional settings for instructional supervision; functions, activities, and practices of supervision; supervisory case studies. Effective: Spring 2011
Prerequisite:

C & S 562 (EDLDR 562) Methods of Classroom Supervision and Coaching (3) Strategies and techniques for supervision/coaching of instruction intended to enhance teacher reflection, self-direction, and autonomy. Effective: Spring 2011
Prerequisite:

C & S 563 (EDLDR 563) Designing Staff Development Programs (3) Designing, implementing, and evaluating effective staff development programs for personnel in educational settings. Effective: Spring 2011
Prerequisite:

Prerequisite:

C & S 576 (EDPSY 576) Research Methods in Teacher Education (3) A basis in theory, findings from research, research design, and methodologies related to teacher education. Effective: Spring 2013

Last Import from UCM: May 24, 2014 3:00 AM

The Pennsylvania State University
Demography (DEMOG)

DEMOG 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1987

DEMOG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1987

DEMOG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 1987

Last Import from UCM: May 24, 2014 3:00 AM
Dermatology (DERM)

DERM 720 Dermatology (3) Interdisciplinary - Medical Education Course
Effective: Spring 2008
Prerequisite:

DERM 723 Dermatology (1-2) This course is an introduction to the skin that includes cellular structure and function as well as clinical conditions.
Effective: Summer 2014
Prerequisite:

DERM 732 Dermatology Elective (5) Designed to provide students with an extensive, in-depth exposure to clinical dermatology; involved in the evaluation and management of patients in dermatology clinics.
Effective: Fall 2003
Prerequisite:

DERM 740 Dermatology/Pathology Elective (5) Intended for students pursuing a career in dermatology or pathology; involves the study of the pathology of cutaneous disorders. The elective complements what is learned in dermatology and pathology rotations.
Effective: Summer 2009
Prerequisite:

DERM 796 Dermatology Individual Studies (5) This course provides an opportunity for senior medical students to pursue individual dermatology research projects with a supervising faculty dermatologist.
Effective: Fall 2008
Prerequisite:

DERM 796A Dermatology Individual Studies for 3rd Year Students (2.5) Dermatology Individual Studies for 3rd Year Students.
Effective: Spring 2009

DERM 797 Dermatology Special Topics (5) Dermatology Special Topics.
Effective: Spring 2010
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
E-Business (EBIZ)

EBIZ 543 (MKTG 543) e-Marketing (2) Using the Internet and related technologies to enhance and transform marketing functions and processes.
Effective: Spring 2012

EBIZ 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2002

Last Import from UCM: May 24, 2014 3:00 AM
Early Childhood Education (E C E)

E C E 451 Instruction in Early Childhood Education Derived from Development Theories (3) Curriculum and instruction for early childhood education; program practice with pluralistic theoretical foundations for early childhood education. Effective: Spring 2014
Prerequisite:

E C E 452 Approaches to Contemporary Early Childhood Education Programs (3) Description and analysis of early childhood programs; cycles, trends, progressions in early childhood education. Effective: Spring 1992
Prerequisite:

E C E 453 Parent Involvement in Home, Center, and Classroom Instruction (2-3) Parent involvement, programs, and methodologies that strengthen bonds between home and community for educators of children. Effective: Spring 1992
Prerequisite:

E C E 454 (HD FS 454) Development and Administration of Child Service Programs (3) Planning, administering, and evaluating child service programs at several administrative levels using methods from relevant disciplines. Effective: Spring 1992
Prerequisite:

E C E 479 The Young Child’s Play as Educative Processes (3) Young child’s play as educative processes and uses of materials in curricular settings are examined. Effective: Spring 2007
Prerequisite:

E C E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1991

E C E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Summer 1991

E C E 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 1992

E C E 572 Issues and Trends in Early Childhood Education (3 per semester/maximum of 9) Research, experimental programs, and emerging trends in early childhood education; relationships between educational experiences and later intellectual and emotional development. Effective: Spring 1992
Prerequisite:

E C E 580 Young Multilingual/Multicultural Learners (3) Multilingual/multicultural dimensions of young learners; language, cultural- ethnic social milieu and family, school, community, religious impacts, and acculturation philosophies. Effective: Summer 1993
Prerequisite:

Prerequisite:

E C E 588 Educational Role of the Family (3) Parent-child-teacher relationships, cognitive socialization, and academic attainments; proximal/distal variables: family structure, history, processes, content, community, culture. Effective: Summer 1992
Prerequisite:

E C E 589 Play and Early Childhood Education (3) Developmental significance of play, processes, and development; role of the adult in child’s play; educational practices. Effective: Spring 2007
Prerequisite:

E C E 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1995

E C E 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1991
E C E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1991

E C E 597A Educational Ethnography I (3) This seminar shows students how to use ethnographic methods for education research to inform classroom practice and education policy.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Last Import from UCM: May 24, 2014 3:00 AM
Early Start Program (ESPRG)

ESPRG 997 Special Topics (0.5) Early Start Program Course.
Effective: Summer 2008

Last Import from UCM: May 24, 2014 3:00 AM
Earth Sciences (EARTH)

EARTH 400 Earth Sciences Seminar (3) Interdisciplinary study of environmental problems in the earth sciences. Effective: Spring 2001
Prerequisite:

EARTH 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Spring 2001
Prerequisite:

EARTH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

EARTH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

EARTH 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

EARTH 501 Contemporary Controversies in the Earth Sciences (3) Exploration of current areas of research in the Earth Sciences. Effective: Summer 2008

EARTH 520 Plate Tectonics and People: Foundations of Solid Earth Science (3) Solid Earth geophysics and geological hazards presented within the grand unifying theory of plate tectonics. Effective: Summer 2008

EARTH 530 Earth Surface Processes in the Critical Zone (3) Introduction to Earth surface processes including weathering and soils, geomorphology, erosion and sedimentation, hydrogeology, low-temperature geochemistry and Earth systems. Effective: Summer 2008

EARTH 540 Essentials of Oceanography for Educators (3) Chemical and physical principles of the oceans and their interaction with the biosphere, atmosphere and the solid Earth. Effective: Summer 2008

EARTH 591 Individual Studies: Research Project (3) Development of a capstone project, supervised on an individual basis outside the scope of formal courses. Effective: Summer 2008
Prerequisite:

EARTH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 1994

EARTH 597A Climate (2) This workshop is designed to help teachers integrate classroom activities and practice with the national principles of climate literacy and the Pennsylvania Standards Aligned System. Climate is an ideal theme for integrating the study of matter and energy, natural element cycles, atmospheric principles, the impacts of human endeavor, world geography, modeling based on authentic data and the conceptualization of large spatial and temporal frameworks. Effective: Summer 2014 Ending: Summer 2014

EARTH 600 Thesis Research (1-15) No description. Effective: Fall 1983

EARTH 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Earth and Mineral Sciences (EM SC)

EM SC 420 (SOC 420, S T S 420) **Energy and Modern Society** (3) Technology and economics of energy resources, production, and consumption; environmental factors, exhaustion, new technology.
Effective: Fall 1986

EM SC 440 **Science Diving** (4) Advanced scuba diving skills applied to underwater research.
Effective: Spring 2012
Prerequisite:

EM SC 441 **Advanced Science Diving** (4) Advanced scuba diving skills applied to underwater data collection and research.
Effective: Summer 2011
Prerequisite:

EM SC 470W **Undergraduate Collaborative Research in Earth and Materials Sciences** (1-6 per semester/maximum of 6)
Interdisciplinary research seminar involving students in the process of discovery, writing, and debate on issues of broad interest to Earth and Materials Sciences.
Effective: Spring 2013

EM SC 494 **Research Project Courses** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1994

EM SC 494H **Research Project Courses** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

EM SC 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2003

EM SC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

EM SC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

EM SC 602 **Supervised Experience in College Teaching** (2-3) Students enrolled will lead discussion sections, grade papers and examinations, give an occasional lecture, and assist instructors in planning survey level courses.
Effective: Fall 2004

Last Import from UCM: May 24, 2014 3:00 AM
Ecology (ECLGY)

Effective: Fall 2008

ECLGY 515 Advances in Ecology (3) Advances in Ecology.
Effective: Spring 2013

ECLGY 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2005

ECLGY 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2004

ECLGY 600 Thesis Research (1-15) No description.
Effective: Fall 1983

ECLGY 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

ECLGY 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in development of instructional materials, organizing and conducting lectures, laboratories, and evaluating students in Ecology-related undergraduate courses.
Effective: Spring 2014

Effective: Fall 1983

ECLGY 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Economics (ECNMS)

ECNMS 510 Managerial Economics (3) Economic analysis of demand for the firm’s output and production costs; implications of various market structures; government regulation.
Effective: Summer 1995
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Economics (ECON)

ECON 400M Honors Seminar in Economics (3-12) Readings, discussion, and oral and written reports on selected topics in economics.
Effective: Spring 1993
Prerequisite:

ECON 401 History of Economic Thought (3) Survey of economic ideas from Greco-Roman times to the present.
Effective: Spring 2001
Prerequisite:

ECON 402 Decision Making and Strategy in Economics (3) Development and application of the tools for decision making under uncertainty and for game theoretic analysis of economic problems.
Effective: Spring 2007
Prerequisite:

ECON 403 The Economics of Arts and Entertainment (3) Supply and demand of creative goods and services; industry structures; role of information; policy issues.
Effective: Spring 2013
Prerequisite:

ECON 404W Current Economic Issues (3) An analytical survey of significant problems of current economic policy and the application of economic analysis to important social issues.
Effective: Spring 1993
Prerequisite:

ECON 406 The Economics of Social Conflict (3) Economic theory of the resolution of social conflicts: social choice theory, voting, noncooperative games, voluntary trade, and allocation by force.
Effective: Spring 2013
Prerequisite:

ECON 406W The Economics of Social Conflict (3) Economic theory of the resolution of social conflicts: social choice theory, voting, noncooperative games, voluntary trade, and allocation by force.
Effective: Summer 2008
Prerequisite:

ECON 407 Political Economy (3) Applications of the tools of game theory to analyze topics in collective decision making.
Effective: Spring 2013
Prerequisite:

ECON 407W Political Economy (3) Applications of the tools of game theory to analyze topics in collective decision making.
Effective: Summer 2008
Prerequisite:

ECON 408 Intellectual Property (3) A comparative and cost-benefit analysis of intellectual property that examines patents, copyrights, governmental supported research, and prizes.
Effective: Spring 2013
Prerequisite:

ECON 408W Intellectual Property (3) A comparative and cost-benefit analysis of intellectual property that examines patents, copyrights, government supported research, and prizes.
Effective: Summer 2008
Prerequisite:

ECON 409 Economics of Terrorism (3) Terrorism throughout history; economic causes, costs, sources, and consequences.
Effective: Spring 2013
Prerequisite:

ECON 409W Economics of Terrorism (3) Terrorism throughout history; economic causes, costs, sources, and consequences.
Effective: Summer 2008
Prerequisite:

ECON 410 Economics of Labor Markets (3) Economic analysis of the employment relationship from the microeconomic perspective, with emphasis on current labor-market problems and public policy issues.
Effective: Spring 2011
Prerequisite:

ECON 411 Behavioral Economics (3) Topics in behavioral economics; selected games; evolutionary models of social behavior, herding, overconfidence.
Effective: Spring 2013
Prerequisite:

ECON 411W Behavioral Economics (3) Topics in behavioral economics; selected games; evolutionary models of social behavior; culture and social behavior; herding; overconfidence.
Effective: Summer 2008
Prerequisite:

Effective: Spring 2009
Prerequisite:

ECON 413 Economic Growth and the Challenges of World Poverty (3) Challenges imposed by poverty; growth; growth rates; microfinance; foreign aid.
Effective: Spring 2013
Prerequisite:

ECON 415 The Economics of Global Climate Change (3) Evidence on climate change; economic models of the environment and market failure; cost-benefit analysis of policy options; carbon markets.
Effective: Spring 2013
Prerequisite:

ECON 417 The Economics of Uncertainty (3) Uncertainty and Risk as related to finance, insurance, health, labor, industrial organization, and macroeconomics.
Effective: Spring 2013
Prerequisite:

ECON 421 Analysis of Economic Data (3) Economic analysis of data: sources, variable definitions, miscodings, missing observations, censoring and truncation, applications.
Effective: Summer 2008
Prerequisite:

ECON 422 Applying Monetary Theory and Monetary History (3) Monetary history is examined. Special attention is paid to commodity-based systems, private money, and government monopolies on currency.
Effective: Spring 2013
Prerequisite:

ECON 424 Income Distribution (3) Inequality and poverty in the United States, measurement problems, determinants of inequality, arguments for and against equality, impact of redistributive policies.
Effective: Fall 1992
Prerequisite:

ECON 425 Economics of Public Expenditures (3) Analytic and policy aspects of public expenditure decisions; applications from areas of contemporary public interest.
Effective: Summer 1992
Prerequisite:

ECON 427 Economics of Energy and Energy Security (3) Energy economics studies topics related to the supply, energy markets, and environmental impacts of energy use.
Effective: Spring 2013
Prerequisite:
ECON 428 Environmental Economics (3) Environmental pollution, the market economy, and optimal resource allocation; alternative control procedures; levels of environmental protection and public policy.
Effective: Summer 1992
Prerequisite:

ECON 429 Public Finance and Fiscal Policy (3) Analysis of public revenue and expenditure structure primarily at the federal level; federalism; fiscal policy and public debt.
Effective: Fall 1983
Prerequisite:

ECON 430 Regional Economic Analysis (3) Analysis of personal and industrial location decisions, regional economic growth, migration patterns, and regional policy; emphasis on tools and techniques.
Effective: Spring 2011
Prerequisite:

ECON 432 Urban Economics (3) Theories and methods for economic analysis of such urban problems as housing, segregation, government services, and transportation.
Effective: Summer 1992
Prerequisite:

ECON 433 Advanced International Trade Theory and Policy (3) Causes/consequences of trade; effects of tariffs and quotas; strategic trade policy; political economy of trade restrictions and other topics.
Effective: Summer 1992
Prerequisite:

ECON 434 International Finance and Open Economy Macroeconomics (3) Trade balance movements, exchange rate determination; monetary and fiscal policies in open economies; international policy coordination; the world monetary system.
Effective: Spring 1992
Prerequisite:

ECON 436 Economics of Discrimination (3) Analysis of the economic characteristics of women and minorities; with examination of race and sex discrimination and related government policies.
Effective: Spring 2013
Prerequisite:

ECON 436W (US) Economics of Discrimination (3) Analysis of the economic characteristics of women and minorities, with examination of race and sex discrimination and related government policies.
Effective: Fall 2007
Prerequisite:

ECON 437 Multinationals and the Globalization of Production (3) Globalization entails many dimensions: trade, migration, FDI, offshoring, cross-border licensing of technologies.
Effective: Spring 2013
Prerequisite:

ECON 437W Multinationals and the Globalization of Production (3) This course will focus on trade, multinationals and offshoring, and explore their implications for the U.S. and developing countries.
Effective: Summer 2008
Prerequisite:

Effective: Spring 2013
Prerequisite:

ECON 438W Winners and Losers from Globalization (3) The economic effects of globalization on individuals, governments, nation-states and business.
Effective: Summer 2008
Prerequisite:

ECON 439 Economics of Technology Diffusion (3) Technology Diffusion: Globalization, productivity measurement, intellectual property.
Effective: Summer 2008
Prerequisite:

ECON 442 Managerial Economics (3) Application of economic theory to managerial decision making; risk, uncertainty; models and statistical techniques.
Effective: Spring 2011
Prerequisite:

ECON 443 Economics of Law and Regulation (3) An economic analysis of property rights, contractual arrangements, illegal activities, and regulation; competitive problems due to externalities and market failure.
Effective: Summer 1992
Prerequisite:

ECON 444 Economics of the Corporation (3) Coordination and incentive issues within a corporation. Topics include employment contracts, performance incentives and pricing of financial assets.
Effective: Summer 1997
Prerequisite:
Prerequisite:

Prerequisite:

ECON 446 Economics of Industry Evolution (3) Dynamics of industry evolution; empirical evidence and theoretical modeling of firm entry, growth, and exit; entrepreneurship; investment and strategic behavior. Effective: Spring 2013
Prerequisite:

ECON 446W Economics of Industry Evolution (3) Dynamics of industry evolution; empirical evidence and theoretical modeling of firm entry, growth, and exit; entrepreneurship; investment and strategic behavior. Effective: Summer 2008
Prerequisite:

ECON 447 Economics of Sports (3) Topics in sports; demand, owners, ticket resale, leagues, markets, efficiency, antitrust, discrimination, collegiate sports. Effective: Spring 2013
Prerequisite:

ECON 447W Economics of Sports (3) Examination of economic issues pertaining to professional and collegiate sports, including analysis of industrial organization, labor markets, and local economies. Effective: Spring 2009
Prerequisite:

ECON 448 Economics of Auctions and Procurements (3) Theoretical and empirical analyses of auctions and procurements; different modeling environments; econometric analysis of auction and procurement data. Effective: Spring 2013
Prerequisite:

ECON 448W Economics of Auctions and Procurements (3) Theoretical and empirical analyses of auctions and procurements; different modeling environments; econometric analysis of auction and procurement data. Effective: Summer 2008
Prerequisite:

ECON 449 Economics of Collusion (3) Collusion, Bidding Rings, Antitrust, Price Fixing, Incentives, Law Effective: Spring 2013
Prerequisite:

ECON 449W Economics of Collusion (3) Theoretical and empirical analysis of collusion among firms, case studies of cartel behavior, bidding behavior at auctions and procurements. Effective: Spring 2008
Prerequisite:

ECON 450 The Business Cycle (3) Measurement and theories of the business cycle; stabilization policies; forecasting. Effective: Summer 1992
Prerequisite:

ECON 451 Monetary Theory and Policy (3) Monetary and income theory; monetary and fiscal policy. Effective: Winter 1978
Prerequisite:

ECON 452 Economics of the Financial Crisis (3) This course studies the economics of financial crises with special emphasis on 2008. Effective: Spring 2013
Prerequisite:

ECON 452W Financial Crises (3) Examination of causes and consequences of financial crises; asset pricing theory, market efficiency, speculative bubbles; policy considerations. Effective: Summer 2008
Prerequisite:

ECON 454 Economics of Mergers (3) Economic analysis of horizontal and vertical mergers; econometric issues in measurement of unilateral and coordinated effects; policy issues. Effective: Summer 2008
Prerequisite:

ECON 455 Economics of the Internet (3) Economics of the Internet; electronic commerce and network economics; pricing issues; intellectual property. Effective: Spring 2013
Prerequisite:

ECON 455W Economics of the Internet (3) Economics of the Internet; electronic commerce and network economics; pricing issues; intellectual property. Effective: Summer 2008
Prerequisite:

Prerequisite:

ECON 457W Economics of Organizations (3) An advanced course in the economics of organizations. The focus is on coordination, incentives, contracts, and information in corporations. Effective: Summer 2008
Prerequisite:

ECON 460 Issues in Sports Economics (3) Economic analysis of professional and collegiate sports: organization, input and output markets, the public sector, decision-making, and public policy. Effective: Summer 2013
Prerequisite:

ECON 463 (IL) Economic Demography (3) Microeconomics of demographic behavior; interrelationships between demographic and economic factors, in developing and industrialized economies; economic welfare and policy implications. Effective: Spring 2006
Prerequisite:

ECON 463W Economic Demography (3) Microeconomics of demographic behavior; interrelationships between demographic and economic factors, in developing and industrialized economies; economic welfare and policy implications. Effective: Summer 2008
Prerequisite:

Prerequisite:

ECON 465W Cross Sectional Econometrics (3) Discrete choice models, censored and truncated regression models, longitudinal models, applications. Effective: Summer 2008
Prerequisite:

ECON 466 Panel Data Models (3) Random and fixed effects, endogeneity, balanced and unbalanced panels, censoring of spells, differences in differences, applications. Effective: Spring 2013
Prerequisite:

ECON 466W Panel Data Models (3) Random and fixed effects, endogeneity, balanced and unbalanced panels, censoring of spells, differences in differences, applications. Effective: Summer 2008
Prerequisite:

ECON 470 (IL) International Trade and Finance (3) Economic analysis of why nations trade, barriers to trade, the international monetary system, and macroeconomic policy in an open economy. Effective: Spring 2011
Prerequisite:

ECON 471 Growth and Development (3) Problems of capital formation, institutional considerations, theories of economic growth. Effective: Summer 2011
Prerequisite:

ECON 472 Transition to Market Economies (3) Economics of transition to a market economy; problems of former Soviet-type economies; privatization, stabilization, and institutional change. Effective: Fall 2005
Prerequisite:

Prerequisite:

ECON 475 Migration and Development (3) Human Capital Approach to Migration; Economics of Family Migration; Evidence: Micro and Macro Perspectives; Migration Policies. Effective: Spring 2013
Prerequisite:

ECON 475W Migration and Development (3) Human Capital Approach to Migration; Economics of Family Migration; Evidence: Micro and Macro Perspectives; Migration Policies. Effective: Summer 2008
Prerequisite:

ECON 476 The Economics of Fertility in the Developing World (3) Demand for children, supply of children, and costs of fertility regulation; fertility transition; public policies to affect fertility. Effective: Spring 2013
Prerequisite:

ECON 476W The Economics of Fertility in the Developing World (3) Demand for children, supply of children, and costs of fertility regulation; fertility transition; public policies to affect fertility. Effective: Summer 2008

Prerequisite:

ECON 477 Labor Markets in Developing Countries (3) Labor demand and supply in developing countries; urban and rural labor markets, modern and informal sectors; policy issues. Effective: Summer 2008

Prerequisite:

ECON 478 Incomplete Markets (3) Rural land markets, fragmented credit markets, risk and insurance, human capital and labor markets, innovation and technology spillovers, coordination failures. Effective: Summer 2008

Prerequisite:

ECON 479 Economics of Matching (3) Economic application of matching to employment, marriage, organ markets, and medical residents. Effective: Spring 2013

Prerequisite:

ECON 479W Economics of Matching (3) Economic application of matching to employment, marriage, organ markets, and medical residents. Effective: Summer 2008

Prerequisite:

ECON 480 Mathematical Economics (3) Mathematical techniques employed in economic analysis; formal development of economic relationships. Effective: Summer 1992

Prerequisite:

ECON 481 Business Forecasting Techniques (3) A survey of contemporary business forecasting techniques, with emphasis on smoothing, decomposition, and regression techniques. Effective: Spring 2008

Prerequisite:

ECON 483 Economic Forecasting (3) Forecasting time series, using linear regression models and econometric software; useful forecasting models; financial and seasonal time series; trends. Effective: Summer 2008

Prerequisite:

ECON 485 Econometric Techniques (3) Applying statistical techniques to test and explain economic relationships; integration of economic theory with observed economic phenomena. Effective: Spring 2011

Prerequisite:

ECON 489M Honors Thesis (1-6) No description. Effective: Spring 1993

Prerequisite:

ECON 490 Introduction to Econometrics (3) Use of simple and multiple regression models in measuring and testing economic relationships. Problems including multicollinearity, heteroskedasticity, and serial correlation. Effective: Summer 2000

Prerequisite:

ECON 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 1994

ECON 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007

ECON 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Summer 1995

Prerequisite:

ECON 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

ECON 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983
ECON 499 (IL) Foreign Study--Economics (2-6) Study in selected countries of economic institutions and current economic problems. Effective: Spring 2011
Prerequisite:

ECON 500 Introduction to Mathematical Economics (3) Mathematical Economics: Applications of Mathematical Techniques to Economics. Effective: Spring 1990

ECON 501 Econometrics (3) Econometrics: Applications of Statistical Techniques to Economics. Effective: Summer 1989

ECON 502 Microeconomic Analysis (3) Economic behavior under pure and imperfect competition; price and output determination in product markets; prices and employment in factor markets. Effective: Winter 1978

ECON 503 Macroeconomic Analysis (3) National income accounts; determination of income, employment, interest rates, and the price level; stabilization policy. Effective: Winter 1978

ECON 507 International Trade (3-6) Theory of international trade and investment; effect of commercial policy on trade and income distribution; multinational corporations and international trade. Effective: Spring 1993

ECON 510 Econometrics I (3) General linear model, multicollinearity, specification error, autocorrelation, heteroskedasticity, restricted least squares, functional form, dummy variables, limited dependent variables. Effective: Fall 2003
Prerequisite:

ECON 511 Econometrics II (3) Stochastic regressors, distributed lag models, pooling cross-section and time-series data, simultaneous equation models. Effective: Fall 2003
Prerequisite:

ECON 512A Empirical Methods in Economics I (1) The course will provide a foundation for students in the computational methods used to numerically solve and simulate economic models and program econometric estimators. Effective: Spring 2013
Prerequisite:

ECON 512B Empirical Methods in Economics II (2) The course will provide continued exposure to the computational methods used to numerically solve and simulate economic models and program econometric estimators. Effective: Fall 2012
Prerequisite:

ECON 515 Labor Economics I (3) Labor supply and income maintenance; human capital, job search and training; labor demand, minimum wage, and discrimination. Effective: Fall 1983

ECON 516 Labor Economics II (3) Earnings differentials, unemployment, and related policy. Institutional aspects of labor economics, including dual labor markets, collective bargaining, and unionism. Effective: Fall 1983

ECON 517 Open Economy Macroeconomics and International Finance (3-6) The balance of payments, portfolio allocation, monetary and fiscal policy in an open economy, exchange rate regimes, selected policy issues. Effective: Spring 1993

ECON 521 Advanced Microeconomic Theory (3-6) Theory of consumer behavior; theory of the firm; price determination in product and factor markets; introduction to welfare economics. Effective: Fall 1983

ECON 522 Advanced Macroeconomic Theory (3-6) Measurement of income; theories of consumption, investment, and money holdings; static determination of income and employment; introduction to dynamic analysis. Effective: Winter 1978

ECON 529 Public Finance (3-6) Effects of taxes, expenditures, debt on allocation, employment, distribution; cost-benefit analysis; collective decision mechanisms; fiscal federalism; current fiscal policy problems. Effective: Fall 1983

ECON 534 Game Theory (3) Foundations of current research in game theory. Effective: Summer 2006

The Pennsylvania State University
Prerequisite:

ECON 543 **Industrial Organization and Public Policy** (3-6) The structure of American industry; performance and behavior; public policies toward business.
Effective: Summer 1980

ECON 558 **Development of Monetary Theory** (3) Classical and neoclassical quantity theories of money and contemporary criticism; Keynesian monetary theory and its critics.
Effective: Fall 1983

ECON 559 **Current Monetary Theory and Policy** (3) Post-Keynesian reformulation of quantity and Keynesian theories of money; liquidity and general equilibrium approaches; current issues in theory and policy.
Effective: Fall 1983

ECON 570 **Development Economics** (3-6) Resources and institutions; quantitative measures; theories of economic growth in developing areas; developmental policies.
Effective: Summer 1997

ECON 589 **Seminar in Econometric Theory** (3) Theories and methods relevant to the application of statistical methods to economics.
Effective: Fall 2003
Prerequisite:

ECON 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

ECON 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

ECON 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

ECON 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

ECON 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

ECON 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Economics-Behrend (ECNS)

ECNS 596 **INDIVIDUAL STUDIES** (1-9) CREATIVE PROJECTS, INCLUDING NONTHESES RESEARCH, WHICH ARE SUPERVISED ON AN INDIVIDUAL BASIS AND WHICH FALL OUTSIDE THE SCOPE OF FORMAL COURSES.
Effective: Spring 1987

ECNS 597 **SPECIAL TOPICS** (1-9) FORMAL COURSES GIVEN ON A TOPICAL OR SPECIAL INTEREST SUBJECT WHICH MAY BE OFFERED INFREQUENTLY; SEVERAL DIFFERENT TOPICS MAY BE TAUGHT IN ONE YEAR OR SEMESTER.
Effective: Spring 1987

Last Import from UCM: May 24, 2014 3:00 AM
Educ Leadership Prog (EDLDR)

EDLDR 405 (C I 405) Strategies in Classroom Management (3) Managing and coping with disruptive student behavior in instructional settings so that they support the teaching/learning process.
Effective: Fall 2008
Prerequisite:

EDLDR 409 Leadership Studies in Popular Film (3) In-depth analysis of leadership dynamics revealed in popular film. Focus on cinematic depictions of theory and practical application of leadership.
Effective: Spring 2012
Prerequisite:

EDLDR 476 The Teacher and the Law (3) An introduction to education law as it affects the teacher.
Effective: Fall 2004
Prerequisite:

EDLDR 480 Introduction to Educational Leadership (3) Development of educational leadership. Relationships among local, state, and federal agencies. Introduction to current concepts and theories.
Effective: Fall 2004
Prerequisite:

EDLDR 485 Principal as Instructional Leader (3) Knowledge and skills principals need to lead instructional design and implementation.
Effective: Fall 2004
Prerequisite:

EDLDR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012

EDLDR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2012

EDLDR 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2004

EDLDR 528 Educational Politics in the United States (3) Social and institutional forces which shape the public school system and determine national, state, and local educational policy and politics.
Effective: Fall 2004

EDLDR 530 Leadership for Inclusive Education (3) In-depth analysis and discussion of the school leaders's role in creating and sustaining an inclusive learning enviroment for all.
Effective: Spring 2012

EDLDR 531 Leadership and Diversity (3) This course examines what it means to lead educational orgnaizations in an increasingly diverse society.
Effective: Spring 2012

EDLDR 533 The Politics of Local School Districts (3) Theory and practice of the politics and governance of local school districts: issues and methods in studying political decision making.
Effective: Fall 2004

EDLDR 535 Interagency Relations in Education (3) This course examines historical and contemporary relationships between schools and other service agencies interacting with the education of American youth.
Effective: Spring 2012

EDLDR 536 Federal Role in Education (3) This course examines the Federal role in education, emphasizing relationships between the Federal government and states, tribes and schools.
Effective: Spring 2012

EDLDR 540 Technology Applications in Educational Leadership (3) Development and use of information technology applications to analyze common problems faced by educational administrators.
Effective: Spring 2008

EDLDR 549 School District Improvement and Systemic Change (3) This course focuses on understanding and leading systemic district improvement efforts.
EDLDR 551 (C & S 551) Curriculum Design: Theory and Practice (3) The analysis and use of the foundations which underlie models of curriculum design.
Effective: Spring 2012
Prerequisite:

EDLDR 553 (C & S 553) Issues in Curriculum (3 per semester/maximum of 6) In-depth study of issues and trends in the understanding and practice of curriculum.
Effective: Spring 2012
Prerequisite:

EDLDR 557 (C & S 557) Seminar in Curriculum Research (3) Analysis of particular curriculum studies, methods and paradigms, and the general status of current research in the general curriculum field.
Effective: Spring 2012
Prerequisite:

EDLDR 559 School Improvement (3) The course examines how educational leaders at all levels can determine, promote, support, and achieve successful school improvement.
Effective: Spring 2012

EDLDR 560 (C & S 560) Principles of Instructional Supervision (3) Social and institutional settings for instructional supervision; functions, activities, and practices of supervision; supervisory case studies.
Effective: Spring 2012
Prerequisite:

EDLDR 562 (C & S 562) Methods of Classroom Supervision and Coaching (3) Strategies and techniques for supervision/coaching of instruction intended to enhance teacher reflection, self-direction, and autonomy.
Effective: Spring 2012
Prerequisite:

EDLDR 563 (C & S 563) Designing Staff Development Programs (3) Designing, implementing, and evaluating effective staff development programs for personnel in educational settings.
Effective: Spring 2012
Prerequisite:

EDLDR 565 Personnel Management and Contract Administration (3) Practice and theory of personnel supervision at the central office and building level, including contract administration and grievance handling.
Effective: Fall 2004
Prerequisite:

EDLDR 567 Organizational Supervision (3) Principles and practices of supervision in schools related to instructional and support personnel.
Effective: Fall 2004
Prerequisite:

EDLDR 568 The Principalship (3) Principles and practices of administration of elementary and secondary schools.
Effective: Fall 2004

EDLDR 569 Decision Making in Educational Organizations (3) Decision making in organizational and environmental contexts; case studies of administrative problems; application of decision making models.
Effective: Fall 2004
Prerequisite:

EDLDR 573 Public School Finance (3) Financing of public education, including values underlying system, revenue sources and taxation, school funding formulas, equity, and school finance reform.
Effective: Fall 2004
Prerequisite:

EDLDR 575 Ethics in Educational Leadership (3) Course explores the moral and ethical dimensions of the work of educational leaders.
Effective: Spring 2012

EDLDR 576 The Law and Education (3) Legal bases for education; rights and responsibilities of school board members, administrators, teachers, students, and parents; due process.
Effective: Fall 2004
Prerequisite:

EDLDR 577 Law and Ethics in Education (3) Course focuses on legal and ethical dimensions issues for educational leaders and their impact on best interests of the students.
Effective: Spring 2012

EDLDR 578 Schools as Organizations (3) Intraorganizational relationships; administration and the school in its organizational and environmental contexts.
Effective: Fall 2004
Prerequisite:
Prerequisite:

EDLDR 580 The Use of Theory in Educational Administration (3) Critical analysis of current theories; problem finding and hypothesis formulation. Effective: Fall 2004
Prerequisite:

EDLDR 581 Field Research in Educational Leadership (3) Field study and qualitative methods in research on educational organizations. Effective: Fall 2004
Prerequisite:

EDLDR 583 Current Administrative Practice (3) Practice oriented skills and experiences facilitating effective administration. Effective: Fall 2004
Prerequisite:

EDLDR 584 Evaluation in Educational Organizations (3) Naturalistic and empirical evaluation methods and procedures for educational organizations. Effective: Fall 2004
Prerequisite:

EDLDR 585 (EDTHP 585, HI ED 585) Research Design: Implications for Decisions in Higher Education (3) A capstone course on research design and analytical approaches to support decision-making in administration and policy-making. Effective: Fall 2004
Prerequisite:

EDLDR 586 (EDTHP 586, HI ED 586) Qualitative Methods in Educational Research (3) Exploration of the theoretical framework undergirding qualitative research and its attendant practices and techniques. Effective: Fall 2004

EDLDR 587 (EDTHP 587, HI ED 587) Education Policy and Politics (3) The political economy and bureaucratic politics of educational organizations, with special attention to the policy making, implementation, and evaluation processes. Effective: Fall 2004

EDLDR 588 (EDTHP 588, HI ED 588) Qualitative Methods in Educational Research II (3) Advanced study of methods involved in executing and analyzing qualitative research in education. Effective: Spring 2012
Prerequisite:

EDLDR 589 Mixed Methods in Educational and Social Scientific Research (3) This course considers the epistemological and paradigmatic implications of mixed methods research within educational and other social scientific research contexts. Effective: Spring 2012

EDLDR 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 2012

EDLDR 594 Seminar in School Law (3) Research in substantive issues in school law. Effective: Fall 2004
Prerequisite:

EDLDR 595 Internship (1-15) Guided experience in a school or other educational organization in which the student is not regularly employed, under supervision of a graduate faculty member. Effective: Fall 2004
Prerequisite:

EDLDR 595A Principal Internship (3) Required field experience for students in order to receive their principal certificate from the Pennsylvania Department of Education. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

EDLDR 595B Superintendent Internship (3) Required field experience for students seeking their letter of eligibility certificate from the Pennsylvania Department of Education. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

EDLDR 596 Individual Studies (1-9) Creative projects including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2012

EDLDR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered
EDLDR 597A Research in Educational Equity (3) The Advanced Research Seminar in Educational Equity will examine educational equity from the perspective of social science, education policy, and law with a strong focus on Pennsylvania. Students will have structured opportunity to write and get feedback on their writing of group research projects from other students and the instructor. The aims of the course are to enhance students' capacity for participating in issues of educational equity through project-based work that results in the completion of publication-quality original papers and policy briefs. Effective: Summer 2014 Ending: Summer 2014 Prerequisite:

EDLDR 597A Pro-Seminar in Educational Leadership (3) The primary purpose of this course are: to introduce new EDLDR graduate students to the field of educational research and to graduate studies at Penn State; to offer some preliminary discussions about the disciplinary and methodological traditions within educational research; to examine some educational topics, problems, or policies of current importance; to work on analytic skills through academic writing; to address essential issues in research ethics and to complete online training offered through the Collaborative Institutional Training Initiative (CITI) program; and to familiarize students with the EDLDR faculty members and their research. This course is designed to meet the University's SARI requirements for first-year graduate students. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EDLDR 597B (HI ED 597B, EDTHP 597B) Foundations of Educational Research (3) This class has been designed primarily for students in doctoral programs in the College of Education; however, this course may be taken by doctoral students from programs across the university with the instructor's permission. Within the highly politicized environment of the United States Education Sciences Reform Act of 2002, we are studying to become education researchers. The act provides opportunities for and sets limits upon our work as education researchers by defining what it called "scientifically-based" education research. Understandably, the act has caused controversy among education researchers who find their work affirmed or discounted by this definition. In order to explore these controversies and to begin to identify our place as doctoral students and researchers among them, this course is designed to begin a reading of the history and philosophies of education research (primarily focusing on the United States). Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EDLDR 597F (HI ED 597F, EDTHP 597F) Race, Law, and Education: Six U.S. Supreme Court Cases (3) This class is designed to introduce students to the legal standards used to examine "race-conscious" policies intended to address racial/ethnic inequities in K-12 and higher education. We will consider the justifications educators have presented to support these policies, which justifications have been convincing to the court, and how these justifications intersect across K-12 and higher education. We will also focus on how social science research has informed the legal developments in these cases. Over the course, we will cover six landmark U.S. Supreme Court cases on race and education, including Brown v. Board of Education (1954), the Court's most recent decision on K-12 voluntary desegregation policies. Parents Involved in Community Schools v. Seattle School District No. 1 (2007), and the Court's forthcoming opinion on affirmative action in higher education. Fisher v. University of Texas (2013). Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EDLDR 597G (HI ED 597G, EDTHP 597G) Leading Organizations that Learn (3) This course is designed to equip students with a body of knowledge about leadership for learning. The course will challenge students to examine prevailing theories and their own assumptions about how learning happens at the individual, team, and organizational level. Through case study, students will also examine the actions of leaders in a variety of learning contexts including schools, musical groups, medical teams, and alpine climbing teams. The course is appropriate for those who intend to work in K-12 education, higher education, non-profit organizations, government agencies, or private corporations. The course is appropriate for Masters or Doctoral students and available to undergraduates with permission from the instructor. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EDLDR 600 Thesis Research (1-15) No description. Effective: Fall 2004

EDLDR 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 2004

EDLDR 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 2004

EDLDR 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 2004

EDLDR 801 Introduction to Teacher Leadership (3) This course focuses on understanding teacher leadership and its function with the school system. Effective: Spring 2012

EDLDR 802 How Schools Work (3) Course focuses on understanding schools as learning organizations and how teacher
EDLDR 894A **Capstone Inquiry Project** (3) Completion and public presentation of an inquiry project reflecting an understanding of the five leadership strands.
Effective: Spring 2012
Prerequisite: 

Last Import from UCM: May 24, 2014 3:00 AM
Education (EDUC)

EDUC 400 Diversity and Cultural Awareness Practices in the K-12 Classroom (3) This course addresses diversity, cultural awareness and sensitivity about cultures, concepts and methods in society, communities and educational settings.
Effective: Summer 2008

EDUC 401 Early Childhood Education (3) Organization, methodology, and materials for nursery school and kindergarten programs.
Effective: Winter 1981

Effective: Winter 1981 Ending: Fall 2014

Effective: Spring 2015 Future: Spring 2015

EDUC 403 Curriculum for Early Childhood (3) Examining early childhood programs and methodology, focusing on areas of social studies, mathematics, and science.
Effective: Winter 1981

EDUC 404 Young Children’s Behavior: Observation and Evaluation (3) Observation, recording and evaluation of student behaviors, and the use of prescription techniques for early childhood students with special needs.
Effective: Winter 1981

EDUC 408 Administration of Early Childhood Education Programs (3) The role of the early childhood administrator as it relates to regulations, staffing, management, funding and curriculum.
Effective: Winter 1981
Prerequisite:

EDUC 410 The Child and Social Institutions (3) The effects of the family on a child’s development, especially in the infancy and preschool years.
Effective: Winter 1981

EDUC 412 Early Literacy Intervention I (3) Participants will better understand factors affecting early reading behavior through diagnostic techniques, observation techniques, and literacy intervention strategies.
Effective: Summer 1996
Prerequisite:

EDUC 415 Teaching Secondary Social Studies (3) Study of the objectives, content, methods, and evaluation of procedures of social studies. Students design units and lesson plans.
Effective: Spring 2011 Ending: Fall 2014
Prerequisite:

EDUC 415 Teaching Secondary Social Studies (3) Study of the objectives, content, methods, and evaluation of procedures of social studies. Students design units and lesson plans.
Effective: Spring 2015 Future: Spring 2015
Prerequisite:

EDUC 416 Teaching Secondary English and the Humanities (3) Study of the objectives, content, and methods of English and humanities courses.
Effective: Spring 2011 Ending: Fall 2014
Prerequisite:

EDUC 416 Teaching Secondary English and the Humanities (3) Study of the objectives, content, and methods of English and humanities courses.
Effective: Spring 2015 Future: Spring 2015
Prerequisite:

EDUC 417 Teaching Secondary Mathematics (3) Study of the objectives, content, methods, and evaluation procedures of mathematics.
Effective: Spring 2011 Ending: Fall 2014
Prerequisite:

EDUC 417 Teaching Secondary Mathematics (3) Study of the objectives, content, methods, and evaluation procedures of mathematics.
Effective: Spring 2015 Future: Spring 2015
Prerequisite:
EDUC 418 Positive Classroom Climate for Positive Attitudes About Learning (3) Participants will learn strategies for creating classroom climates which encourage positive attitudes toward learning while preventing and correcting student misbehavior.
Effective: Summer 1995
Prerequisite:

EDUC 421 Children's Literature (3) Knowledge of literature appropriate for elementary school children and utilization of literature-related activities in teaching reading.
Effective: Spring 2001
Prerequisite:

EDUC 422 Literature for Children and Adolescents (3) Literature for children and adolescents, approaches for using such literature in the school curriculum.
Effective: Fall 2008

EDUC 425 Literacy Assessment (3) This course emphasizes alternative literacy measures focusing on portfolio assessment and performance assessments.
Effective: Spring 1997
Prerequisite:

EDUC 431 Children's Literature in Teaching Writing (3) Introduction to introduces methods for transferring writing skills and literary devices from literature to student writing in all subject areas.
Effective: Summer 2008

EDUC 435 Addressing the Needs of Special Learners (1) An examination of attitudes toward, barriers experienced by, and special needs of special learners in the schools.
Effective: Spring 2001
Prerequisite:

EDUC 436 Inclusion Practices in Education (3) The educational, social, and political foundations for inclusion practices in public education.
Effective: Summer 1995
Prerequisite:

EDUC 440 Educational Statistics and Measurements (3) Descriptive statistics, correlation, reliability, validity, scaling techniques, and introduction to item analysis.
Effective: Winter 1981

EDUC 450 Current Topics in Education (1-15) No description.
Effective: Fall 1983

EDUC 452 Teaching Writing (3) Techniques for teaching the writing process, kindergarten through grade 12, including writing in content areas; workshop format.
Effective: Fall 1983

EDUC 458 Behavior Management Strategies for Inclusive Classrooms (3) Provides knowledge and skills essential for designing positive learning environments in secondary classrooms with the inclusion of exceptional learners.
Effective: Summer 2009
Prerequisite:

EDUC 459 Strategies for Effective Teaching in Inclusive Classrooms (3) Course examines effective strategies for accommodating and adapting instruction for exceptional learners in secondary classrooms.
Effective: Fall 2012
Prerequisite:

EDUC 460 Field Study in Ecology (4) Study and analysis of the ecology of various regions of the world. May be repeated for credit.
Effective: Summer 1995
Prerequisite:

EDUC 462 Computers for Classroom Teachers (3) An introduction: microcomputers and their educational applications.
Effective: Spring 2001
Prerequisite:

EDUC 463 The Internet and K-12 Education (3) Relates educational theory and practice to applications of the Internet, applying content from educational foundations, curriculum, and research.
Effective: Spring 2003 Ending: Fall 2014
Prerequisite:

EDUC 463 Teaching With Modern Web Technologies (3) Relates educational theory and practice to applications of the modern Web, applying content from educational foundations, curriculum, and research.
Effective: Spring 2015 Future: Spring 2015

EDUC 464 Technology and the Learning Process (3) Evaluates the relationship between technology-based resources and learning theories through design, implementation, and evaluation of online instructional modules.
EDUC 465 Serving Culturally and Linguistically Diverse (CLD) Learners (3) The course provides teachers with knowledge, understandings, and skills to engage culturally and linguistically diverse (CLD) students in mainstream classrooms.
Effective: Spring 2003
Prerequisite:

EDUC 466 Foundations of Teaching English as a Second Language (3) Overview of various legal, historical, and socio-cultural implications of teaching and learning English as a Second Language.
Effective: Summer 2006
Prerequisite:

EDUC 467 English Language Structure for English as a Second Language Teachers (3) An in-depth study and review of general linguistic concepts and their application to ESL pedagogy.
Effective: Summer 2006
Prerequisite:

EDUC 468 Language Acquisition for English as a Second Language Teachers (3) Study of the theory, research, and processes involved in first and second language development, acquisition, and assessment.
Effective: Summer 2006
Prerequisite:

EDUC 469 Teaching Methods and Assessment of English as a Second Language (3) Integration of theory, research, and practice about ESL curriculum, instructional methods, assessment, and literacy development.
Effective: Summer 2006
Prerequisite:

EDUC 470W Higher-Order Thinking for Educators (3) Presentation of strategies, techniques, and principles of higher-order thinking which are grounded in relevant research and practice will be presented.
Effective: Fall 2006
Prerequisite:

EDUC 471 Best Practices in Literacy (3) An application of best literacy practices to classroom instruction and assessment of reading, writing, listening, and speaking.
Effective: Spring 2003
Prerequisite:

EDUC 472 Teaching Reading Through the Content Areas (3) Designed to enable teachers of content areas to improve the reading/study skills needed by their students.
Effective: Winter 1981

EDUC 475 ESL Leadership, Research and Advocacy (3) Teachers will develop their skills as instructional leaders and researchers by conducting school-based action research projects.
Effective: Summer 2010
Prerequisite:

EDUC 477 Teaching Struggling Readers and Writers (3) A comprehensive overview of learning problems and effective strategies for teaching K-12 students who have difficulties reading and writing.
Effective: Spring 2008

EDUC 478 Secondary Transition for Students with Disabilities (3) Process and procedures for successful transition of secondary students with disabilities.
Effective: Summer 2013
Prerequisite:

EDUC 484 School Law for Teachers (3) This course will focus on increasing teacher awareness of law and how it impacts on daily performance and job security.
Effective: Summer 1995
Prerequisite:

EDUC 490 Student Teaching (1-12) Observation and teaching in selected elementary or secondary schools under direction of cooperating classroom teachers and University supervisors. Regular seminars. GPA 3.0 or higher. Passing scores on required Praxis I tests.
Effective: Fall 2003
Prerequisite:

EDUC 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1994

EDUC 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

EDUC 495 Internship (1-15) Supervised off-campus, non-group instruction including individual field experiences,
practicums or internships. Written and oral critique of activity required.
Effective: Fall 1983
Prerequisite:

EDUC 495A Junior Field Experience (1) Second semester juniors assigned to a suburban elementary school for the purpose of actively participating in classroom activities.
Effective: Summer 2003
Prerequisite:

EDUC 495B Senior Field Experience (1) First semester seniors assigned to an urban elementary school for the purpose of actively participating in classroom activities.
Effective: Summer 2003
Prerequisite:

EDUC 495C Early Childhood Field Experience (1) First semester seniors assigned to an urban elementary school for the purpose of actively participating in an early childhood classroom.
Effective: Summer 2003
Prerequisite:

EDUC 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 1983

EDUC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1983

EDUC 497A Crucial Role of Technology Within the Framework for Teaching (3) Designed to guide educators in the purposeful planning for integration of technology into their teaching practices. Participants will experience presentations from nationally recognized leaders in educational technology through large group presentations, small group seminars, and collaboration with colleagues. Participants will develop an action plan that defines intention, and delineates necessary steps for successful implementation.
Effective: Summer 2014 Ending: Summer 2014

EDUC 497A iWRITE: Using Digital Technology to Engage Writers and Encourage Student Voices (3) This course is designed to explore the intersection between technological, pedagogical, and content knowledge.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EDUC 497B Navigating Non-Fiction Reading and Writing in a Common Core (3) Designed to explore a variety of methods to improve and modify instructional strategies to promote maximum engagement and increase effective teaching of non-fiction reading and writing. The course will assist in the development of a knowledge base and subsequent use of research-based models of effective teaching practices and areas of: non-fiction reading, non-fiction writing, mentor texts, technology, assessment, and professional collaboration.
Effective: Summer 2014 Ending: Summer 2014

EDUC 497C International Field Experience: Germany (0.5-3) This course is intended to: develop student perceptions on education, provide pre-service teachers with opportunities to participate in culturally diverse classrooms, and engage in political dialogue regarding education in Germany.
Effective: Summer 2014 Ending: Summer 2014

EDUC 497D Using a Writer's Notebook to Empower Writers (3) This course will explore the endless possibilities of using a writer's notebook to strengthen and broaden both student writing and classroom instruction. Best suited for grades kindergarten-8th grade.
Effective: Summer 2014 Ending: Summer 2014

EDUC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1995

EDUC 499 (IL) Foreign Studies (1-12) Study of educational topics in a country other than the United States.
Effective: Summer 2007
Prerequisite:

EDUC 500 Professional Learning Communities (3) Defines elements of effective learning communities and explores educators’ roles as consumers and creators of research, theory, and best practices.
Effective: Spring 2008
Prerequisite:

EDUC 501 History of American Education (3) An examination of the rise and transformation of American public schools from pre-colonial America to the present.
Effective: Spring 1998
Prerequisite:
EDUC 503 Cultural and Ethnic Groups Education (3) Approaches to teaching in an environment of differing cultures and ethnic groups.
Effective: Spring 1998
Prerequisite:

EDUC 505 Curriculum Foundations (3) Provides a comprehensive overview of the philosophical, historical, psychological, and social foundations that affect the school curriculum.
Effective: Spring 2010
Prerequisite:

EDUC 506 Curriculum Development and Instructional Design (3) Examination of theory, issues, problems, organization, and application of instructional design in planning and developing a curriculum.
Effective: Fall 2008
Prerequisite:

EDUC 508 Teaching Gifted Students in Heterogeneous Groups (3) This course is designed to help regular classroom teachers to meet the needs of gifted students in a heterogeneous classroom.
Effective: Summer 1997
Prerequisite:

EDUC 520 Learning Theory for the Classroom (3) An application of learning theories from psychological, sociological, and physiological disciplines to educational settings for children and adolescents.
Effective: Spring 2011
Prerequisite:

EDUC 539 Educational Assessment (3) This course will prepare students with the knowledge and skills necessary to monitor, assess, and report student achievement.
Effective: Fall 2008
Prerequisite:

EDUC 560 Classroom Management (3) Analysis of teaching styles, classroom behavior and interaction, organization and correlation of classroom activities and subject areas. (Requires practical application in an actual teaching situation.)
Effective: Winter 1981

EDUC 561 Psychology of Reading (3) Examination of the theoretical bases for reading which have direct practical implication for teaching reading.
Effective: Fall 2008
Prerequisite:

EDUC 562 Diagnostic Evaluation of Reading Problems (3) Utilization of formal and informal instruments and techniques appropriate in analyzing reading disabilities, grade K through 12; includes practicum.
Effective: Spring 2009
Prerequisite:

EDUC 563 Methods in Teaching Reading (3) Development of advanced diagnostic and instructional techniques for teaching reading, with emphasis on individual and small group instruction.
Effective: Fall 2008
Prerequisite:

EDUC 564 Reading Clinic (6) Culminating course for the M.Ed. degree in literacy education requiring demonstration of competency in working with children possessing reading problems.
Effective: Fall 2008
Prerequisite:

EDUC 565 Literacy and Leadership (3) Principles of supervision, organization, management, and evaluation of literacy programs will be presented.
Effective: Spring 2009
Prerequisite:

EDUC 567 Great Teachers (3) Study of one or more great teachers, e.g., Socrates, Comenius, Locke, Rousseau, Pestalozzi, Herbart, Froebel, Dewey, Kilpatrick.
Effective: Winter 1981

EDUC 572 Comparative Education: World Perspectives (3) An evaluative comparison of American education with Western and non-Western educational systems.
Effective: Winter 1981

EDUC 582 (HLHED 582) Spirituality and Culture in Health and Education Professions (3) This course focuses on the cultural aspects of spirituality and its place in the health and education professions.
Effective: Summer 2009

EDUC 583 Problems in Teaching: Selected Subject Areas (3) An analysis of a teaching problem with review of research literature to seek solutions to that problem.
Effective: Fall 1983

EDUC 584 Analysis of Research: Selected Topics (3) A review and analysis of research in a specified area.
EDUC 586 Educational Research Designs (3) Focuses on methods of research in educational settings to help participants become informed consumers of the educational research literature.
Effective: Fall 2008
Prerequisite:

EDUC 587 Master's Project (3) The development of an original master's project (paper, essay, production, practicum) supervised and judged by an appropriate faculty committee.
Effective: Fall 1983

EDUC 589 Problems in Urban Education (3) Independent study of selected topics related to urban education.
Effective: Fall 1983

EDUC 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

EDUC 591 Education Seminar (1-6) The capstone seminar course for the M.Ed. degree requiring an appropriate scholarly term paper.
Effective: Spring 2011
Prerequisite:

EDUC 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

EDUC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

Last Import from UCM: May 24, 2014 3:00 AM
Educational Psychology (EDPSY)

EDPSY 400 Introduction to Statistics in Educational Research (3) The foundations of statistical techniques used in educational research; distributions, central tendency, variability, correlation, regression, probability, sampling, hypothesis testing. Effective: Summer 2011

EDPSY 406 Applied Statistical Inference for the Behavioral Sciences (3) Common techniques (parametric) covered through two-factor analysis of variance (independent samples); hypothesis testing, confidence interval, power, robustness; MINITAB frequently used. Effective: Summer 2011

EDPSY 408 (SPLED 408) Meeting Instructional Needs of English Language Learners with Special Needs (3) The course content and activities focus on instruction and assessment for English Language Learners with special needs. Effective: Summer 2011

EDPSY 421 Learning Processes in Relation to Educational Practices (3) An introduction to the empirical study of variables and conditions that influence school learning. Effective: Summer 2011

EDPSY 450 (PSYCH 404) Principles of Measurement (3) Scale transformation, norms, standardization, validation procedures, estimation of reliability. Effective: Summer 2011

EDPSY 475 Introduction to Educational Research (3) Scientific method; classes of variables in educational research; the measurement of classroom behavior; survey, predictive, and experimental studies. Effective: Summer 2011

EDPSY 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2011

EDPSY 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2011

EDPSY 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2011

EDPSY 505 Statistical Applications in Educational Research (3) Statistical techniques for education research including multiple regression, one-way, two-way, and repeated measures ANOVA. Use computer software for statistical analyses. Effective: Fall 2013

EDPSY 506 Advanced Techniques for Analyzing Educational Experiments (3) Analytical and experimental control considerations for designs involving nested and/or crossed subjects. Analysis of variance and multiple comparisons via computers. Effective: Fall 2014 Future: Fall 2014

EDPSY 507 Multivariate Procedures in Educational Research (3) Introduction to matrix algebra, computer programming, multiple regression analysis, multiple and canonical correlation, multiple discriminant analysis, classification procedures, factor analysis. Effective: Fall 2014 Future: Fall 2014

The Pennsylvania State University
EDPSY 512 **Group Processes in the Classroom** (3) Basic concepts and perspectives in the study of group processes; instructional group interaction; analysis of classroom behavior.
Effective: Summer 2011

EDPSY 513 **Individual and Group Differences** (3) Description, causes, and interpretation of individual variation over the life-span, with application to school and institutional practices.
Effective: Summer 2011
Prerequisite:

EDPSY 521 **Learning and Cognition: Educational Applications** (3) This course focuses on understanding human learning and thinking through examining learning theories and research related to educational psychology.
Effective: Spring 2013
Prerequisite:

EDPSY 523 **Concept Learning and Problem Solving** (3-4) Theoretical-empirical trends in concept learning, problem solving, and creativity related to instructional psychology.
Effective: Spring 2014
Prerequisite:

EDPSY 524 **Theories of Learning and Instruction** (3) Study of major classical theories of learning and recent developments in learning and instructional theory.
Effective: Spring 2014
Prerequisite:

EDPSY 526 **The Psychology of Reading** (3) Psychological principles underlying the process of reading and comprehending, with application to instruction.
Effective: Spring 2014
Prerequisite:

EDPSY 527 **Psychology of Adults as Learners** (3) Psychological principles related to learning by adults, with application to instruction and other educational practices.
Effective: Spring 2014
Prerequisite:

EDPSY 528 **Instructional Psychology** (3) Application to instructional design of current developments in research on human development, information processing, learning strategies, memory structures, instructional processes.
Effective: Spring 2014
Prerequisite:

EDPSY 530 **Achievement Motivation** (3) Within a seminar format, this course addresses both theoretical and empirical approaches to motivation and other related affective constructs.
Effective: Summer 2011
Prerequisite:

EDPSY 550 **Design and Construction of Psychological Measures** (3) Lecture-practicum involving planning, construction, administration, and analysis of a psychological test; lectures stress construct validity, item analysis, and predictive validity.
Effective: Summer 2011
Prerequisite:

EDPSY 554 **Theories of Psychological Measurement** (3) Basic true-score and error models; their extensions to test reliability and test validity; problems of item analysis and weighting.
Effective: Summer 2011
Prerequisite:

EDPSY 555 (CI ED 555) **Validity of Assessment Results** (3) Concepts, issues, and methods of validation of educational and psychological assessment including models and approaches to validation, bias, and utility.
Effective: Summer 2011
Prerequisite:

EDPSY 556 **Foundations and Applications of Item Response Theory** (3) Unidimensional models for dichotomously scored and polytomously scored items and their applications in instrument/test development.
Effective: Summer 2011
Prerequisite:

EDPSY 557 **Hierarchical Linear Modeling in Educational Research** (3) Statistical techniques for the analysis of multilevel data such as in nested designs or hierarchical data.
Effective: Fall 2013
Prerequisite:

EDPSY 558 **Foundations and Applications of Structural Equation Modeling** (3) Model specification, identification, estimation, evaluation, and modification for measurement models, path models, and full structural models.
Effective: Summer 2012
Prerequisite:

EDPSY 560 **Contemporary Issues in the Evaluation of Educational Programs** (3) Practical and theoretical issues in the planning, execution, and interpretation of program evaluations.
Effective: Summer 2011
Prerequisite:
EDPSY 575 Seminar in Educational Psychology (1-6) A seminar dealing with specific topics in educational psychology. Open to advanced students in the behavioral sciences.
Effective: Summer 2011

EDPSY 576 (C & S 576) Research Methods in Teacher Education (3) A basis in theory, findings from research, research design, and methodologies related to teacher education.
Effective: Spring 2013

EDPSY 596 Individual Studies (1-9) Creative projects, including nontesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

EDPSY 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2011

EDPSY 597A Data Analysis Workshop (3) This course is designed for students with a desire to increase their conceptual understanding of basic statistics and their proficiency with analytical techniques. This course will be held in a computer lab and the primary statistical analysis package used will be SPSS.
Effective: Summer 2014 Ending: Summer 2014

EDPSY 597A Cognitive Processes in Learning from Multiple Representations (3) Multiple external representations (MERs) refer to instructional materials that include more than one representation from which students must learn. Examples include text that contains both written words and diagrams; combinations of formulas, graphs, and tables, or even multiple verbal texts.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EDPSY 600 Thesis Research (1-15) No description.
Effective: Summer 2011

EDPSY 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 2011

EDPSY 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Teaching of Educational Psychology classes under senior faculty supervision.
Effective: Summer 2011

EDPSY 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 2011

EDPSY 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 2011

Last Import from UCM: May 24, 2014 3:00 AM
Educational Technology (EDTEC)

EDTEC 400 Introduction to Instructional Technology for Educators (1-3) Use of microcomputers, video, and other media in education; models use technologies including video, audio, print, computer, and telephone.
Effective: Fall 2005
Prerequisite:

EDTEC 440 Educational Technology Integration (3) Technology integration in educational settings.
Effective: Fall 2008
Prerequisite:

EDTEC 448 Using the Internet in the Classroom (3) This course introduces students to methods and models of using the Internet effectively in their classroom.
Effective: Fall 2005
Prerequisite:

EDTEC 449 Using Video in the Classroom (3) Skills and knowledge needed to direct the use of video technologies in educational settings.
Effective: Fall 2005
Prerequisite:

EDTEC 461 Designing Computer Networks for Education (3) Applying fundamental concepts of computer networking to design effective networks for educational purposes.
Effective: Spring 2013
Prerequisite:

EDTEC 462 Coordinating Technology Use in Education (3) Skills and knowledge needed to direct the use of learning technologies in educational settings.
Effective: Spring 2013
Prerequisite:

EDTEC 467 Emerging Web Technologies and Learning (3) This course examines emerging Web technologies and explores their application to learning and education.
Effective: Spring 2013
Prerequisite:

EDTEC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2010

EDTEC 561 Measuring the Impact of Technology on Learning (3) Prepares teachers to evaluate the effects of technology use.
Effective: Summer 2005
Prerequisite:

EDTEC 566 Computers as Learning Tools (3) Amplifying thinking or organizing mental functions with computers.
Effective: Fall 2006
Prerequisite:

EDTEC 594 Research Topics (1-9) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2010
Prerequisite:

EDTEC 595 Internship (1-9) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships.
Effective: Summer 2010

EDTEC 596 Independent Studies (1-9) Creative projects, including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2010

EDTEC 597 Special Topics (1-9 per semester/maximum of 12) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 2014

EDTEC 897 Special Topics (1-9 per semester/maximum of 12) Formal courses given on a topical or special interest subject with a professional orientation that may be offered infrequently.
Effective: Spring 2014
Educational Theory and Policy (EDTHP)

EDTHP 401 (IL) (CI ED 401) Introduction to Comparative Education (3) Origins, nature, scope, basic literature, and methodology of comparative education. Study of sample topics.
Effective: Fall 2007
Prerequisite:

EDTHP 411 (US) Ethnic Minorities and Schools in the United States (3) Analysis of the social and cultural factors which affect educational outcomes among minority pupils, especially Blacks, Hispanics, and Indians.
Effective: Spring 2006

Effective: Spring 2005

EDTHP 416 (US) (SOC 416) Sociology of Education (3) The theoretical, conceptual, and descriptive contributions of sociology to education.
Effective: Spring 2006

EDTHP 420 Education and Public Policy (3) Focus on the development and analysis of education policy, and policy’s influence on schools.
Effective: Fall 2011
Prerequisite:

EDTHP 427 Intelligence and Educational Policy (3) This course explores the concept of intelligence and its assessment from historical, psychological, educational and policy perspectives.
Effective: Spring 2006
Prerequisite:

EDTHP 430 History of Education in the United States (3) American educational ideas and practice critically examined in terms of their historical development and contemporary significance.
Effective: Summer 1995

EDTHP 434H Honors Teaching Experience in Leadership Jumpstart (1) Guided instruction and practical experience for teaching assistants to the Honors Leadership Jumpstart course (EDTHP 234H).
Effective: Fall 2006
Prerequisite:

EDTHP 435 Child Labor and Education in the Global Economy (3) The legal instruments and social science theories useful for understanding and combating child labor through education policy and practice.
Effective: Spring 2014

EDTHP 440 (CI ED 440) Introduction to Philosophy of Education (3) Introduction to the examination of educational theory and practice from philosophical perspectives, classical and contemporary.
Effective: Spring 2013
Prerequisite:

EDTHP 441 Education, Schooling, and Values (3) Studies in education and schooling as problems in value; axiological problems and positions; examination of practical applications, including moral education.
Effective: Summer 1995

EDTHP 496 Individual Studies (1-18) Creative projects supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1995

EDTHP 497 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1995

EDTHP 497A Gender Issues in Education and Family (3) This course will help students explore the relationship between gender, education, and families. Students examine issues such as gender role development and families, gay, lesbian, and transgender children and families, educational access, gender bias, sexual harassment, gender and children’s literature, the impact of the media on gender role development, and strategies for teaching boys and girls in elementary classrooms.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EDTHP 498 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1995

The Pennsylvania State University
EDTHP 500 **Proseminar in Educational Theory and Policy** (3) An introduction to disciplinary and interdisciplinary studies in educational theory and policy.
Effective: Spring 2002

EDTHP 507 (CI ED 503, HI ED 503) **Ethnicity, National Identity, and Education** (3) Surveys group-oriented education policies internationally, especially comparing those of Britain, Taiwan, India.
Effective: Summer 1995

EDTHP 516 (CI ED 516) **Education and Demographic Change in the United State and Abroad** (3) Interrelationship between schooling and employment, marriage, fertility, and migration. Focus comparatively on the United States and developing countries.
Effective: Spring 1998

EDTHP 518 **Analysis of U. S. Educational Policy** (3) The interaction between educational theory and social structure, focusing on the role of practicing intellectuals in contemporary institutional settings.
Effective: Summer 1995

EDTHP 520 **Perspectives on Contemporary School Reform** (3) Examination of contemporary U.S. school reform, with a focus on contrasting theoretical perspectives and the application of policy analysis principles.
Effective: Spring 2006

EDTHP 523 **Interpreting and Analyzing Quantitative Studies in Education Policy** (3) Effective reading of academic articles in educational policy based on quantitative methods.
Effective: Summer 2013
Prerequisite:

EDTHP 525 **Alternative Assessment of National Educational and Health Policies** (3) Overview of alternative research strategies in education, nursing and health education studies used to study impact of national policies.
Effective: Spring 2006

EDTHP 527 **Testing and Educational Equity** (3) This course considers testing, the reasons that policymakers have widely adopted testing, and implications of testing for educational equity.
Effective: Spring 2006

EDTHP 533 **Social History and Education Policy** (3) Historical study of social dimensions in the formation of education policy.
Effective: Summer 1995

EDTHP 534 (SOC 534, CI ED 534) **Childhood and Education in Sociological and International Comparative Perspective** (3) The course objective is to use an international comparative lens and sociological perspective to examine the social, cultural, political and economic forces that shape childhood and the role education plays in this process.
Effective: Spring 2013

EDTHP 536 **Studies in Educational Thought** (3) Studies in the historical development of educational theory.
Effective: Summer 1995

EDTHP 538 (SOC 538) **Sociology of Education** (3) Provides students with an overview of dominant sociological theoretical perspectives on schools, schooling, and education in modern society.
Effective: Spring 2008

EDTHP 541 (CI ED 541) **Contemporary Philosophies of Education** (3) Educational theory and practice in relation to contemporary movements in philosophy.
Effective: Spring 2008

EDTHP 553 (HI ED 553, SOC 553, CI ED 553) **Educational Mobility in Comparative Perspective** (3) Role of education in social mobility, using quantitative, qualitative, and historical methods; focuses comparatively on Britain, East Asia, and South America.
Effective: Spring 2003

EDTHP 555 **Migration and Children’s Education** (3) The research theories and policies useful for understanding the schooling processes and outcomes of immigrants’ children.
Effective: Summer 2014

EDTHP 557 (SOC 557, HI ED 557) **Sociology of Higher Education** (3) Reviews theory and current sociology research on student access, achievement, and governance in postsecondary education, with applications to policy analysis.
EDTP 580 **Improving Educational Writing** (3) Focus on components of high quality academic writing for educational research, with a special emphasis on improving the writing process.

Effective: Summer 2009

EDTP 585 (HI ED 585, EDLDR 585) **Research Design: Implications for Decisions in Higher Education** (3) A capstone course on research design and analytical approaches to support decision-making in administration and policy-making.

Effective: Fall 2004

Prerequisite:

EDTP 586 (HI ED 586, EDLDR 586) **Qualitative Methods in Educational Research** (3) Exploration of the theoretical framework underlying qualitative research and its attendant practices and techniques.

Effective: Fall 2004

EDTP 587 (EDLDR 587, HI ED 587) **Education Policy and Politics** (3) The political economy and bureaucratic politics of educational organizations, with special attention to the policy-making, implementation, and evaluation process.

Effective: Fall 2004

EDTP 588 (HI ED 588, EDLDR 588) **Qualitative Methods in Educational Research II** (3) Advanced study of methods involved in executing and analyzing qualitative research in education.

Effective: Summer 2007

Prerequisite:

EDTP 596 **Individual Studies** (1-9) Creative projects including non-thesis research, supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1995

EDTP 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 1995

EDTP 597A **Advanced Topics in Educational Policy Analysis** (3) This course is designed to offer students a broad familiarity with recent methods developed for evaluating the causal effect of educational policy and intervention in observational and quasi-experimental settings.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EDTP 597B (HI ED 597B, EDLDR 597B) **Foundations of Educational Research** (3) This class has been designed primarily for students in doctoral programs in the College of Education; however, this course may be taken by doctoral students from programs across the university with the instructor’s permission. Within the highly politicized environment of the United States Education Sciences Reform Act of 2002, we are studying to become education researchers. The act provides opportunities for and sets limits upon our work as education researchers by defining what it called "scientifically-based" education research. Understandably, the act has caused controversy among education researchers who find their work affirmed or discounted by this definition. In order to explore these controversies and to begin to identify our place as doctoral students and researchers among them, this course is designed to begin a reading of the history and philosophies of education research (primarily focusing on the United States).

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EDTP 597C (HI ED 597C) **Economics of Education** (3) This course is an introduction to the economics of education. It has three main components. The first is to provide an economic perspective in studying education, especially issues related to education policies. Students will learn about economic theories that apply to education, including, for example, theory of the consumer (e.g., human capital and investment in education, individual choices, and demand), theory of the firm (e.g., production, revenues, and costs), and theory of the market (e.g., economics of the public sector and competition).

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EDTP 597D (HI ED 597D) **Data Analysis for Education Policy** (3) This course bridges theoretical statistics coursework and practical research with real, large-scale datasets. It emphasizes hands-on data preparation and analysis using Stata. Although we will mainly use education related datasets as examples, the skills that we will be learning in this course are transferable to other fields of empirical research.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EDTP 597F (EDLDR 597F, HI ED 597F) **Race, Law, and Education: Six U.S. Supreme Court Cases** (3) This class is designed to introduce students to the legal standards used to examine "race-conscious" policies intended to address racial/ethnic inequities in K-12 and higher education. We will consider the justifications educators have presented to support these policies, which justifications have been convincing to the court, and how these justifications intersect across K-12 and higher education. We will also focus on how social science research has informed the legal developments in these cases. Over the course, we will cover six landmark U.S. Supreme Court cases on race and education, including Brown v. Board of Education (1954), the Court’s most recent decision on K-12 voluntary desegregation policies. Parents Involved in Community Schools v. Seattle School District No. 1 (2007), and the Court’s forthcoming opinion on affirmative action in

The Pennsylvania State University
EDTHP 597G (HI ED 597G, EDLDR 597G) Leading Organizations That Learn (3) This course is designed to equip students with a body of knowledge about leadership for learning. The course will challenge students to examine prevailing theories and their own assumptions about how learning happens at the individual, team, and organizational level. Through case study, students will also examine the actions of leaders in a variety of learning contexts including schools, musical groups, medical teams, and alpine climbing teams. The course is appropriate for those who intend to work in K-12 education, higher education, non-profit organizations, government agencies, or private corporations. The course is appropriate for Masters or Doctoral students and available to undergraduates with permission from the instructor. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EDTHP 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Summer 1995

EDTHP 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) This class enables doctoral students to gain experience in college teaching under the supervision of a course instructor. Effective: Fall 2012

EDTHP 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. Effective: Summer 2002

EDTHP 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Summer 1995

Last Import from UCM: May 24, 2014 3:00 AM
Electrical Engineering (E E)

EE 400 Engineering Design Concepts (3) Engineering design and modelling, engineering economy, project planning, capstone project selection, and technical communication skills.
Effective: Spring 2008
Prerequisite:

EE 401 Electrical Design Projects (3) Group design projects in the areas of electronics and electrical/computer systems.
Effective: Spring 2008
Prerequisite:

EE 403M Senior Project Design (3) Project designs of electrical engineering systems, encompassing various subdisciplines within Electrical Engineering, with an emphasis on technical communications skills.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite: Concurrent: ENGL 202C

EE 403W Senior Project Design (3) Project designs of electrical engineering systems, encompassing various subdisciplines within Electrical Engineering, with an emphasis on technical communications skills.
Effective: Spring 2008
Prerequisite: Concurrent: ENGL 202C

EE 405 Capstone Proposal Preparation (1) Performing the initial research needed for the capstone course, and the preparation of the written project proposal.
Effective: Fall 2012
Prerequisite:

EE 406W Electrical Engineering Capstone Design (3) Project designs of analog and digital systems, interfacing, and relevant electronic circuits, with an emphasis on technical communications skills.
Effective: Fall 2012
Prerequisite:

EE 410 Linear Electronic Design (3) Linear circuit design via integrated circuit processes; A/D converters, switched capacitor filters, phase lock loops, multipliers, and voltage-controlled oscillators.
Effective: Spring 2008
Prerequisite:

EE 413 Power Electronics (3) Switch-mode electrical power converters. Electrical characteristics and thermal limits of semiconductor switches.
Effective: Fall 2012
Prerequisite:

EE 416 (CMPEN 416) Digital Integrated Circuits (3) Analyses and design of digital integrated circuit building blocks, including logic gates, flip-flops, memory elements, analog switches, multiplexers, and converters.
Effective: Spring 2008
Prerequisite:

EE 417 (CMPEN 417) Digital Design Using Field Programmable Devices (3) Field programmable device architectures and technologies; rapid prototyping using top down design techniques; quick response systems.
Effective: Spring 2008
Prerequisite:

EE 420 Electro-optics: Principles and Devices (3) Spatially linear system and transform; diffraction theory, partial coherence theory, optical image detection, storage and display, holography.
Effective: Spring 1997
Prerequisite:

EE 421 Optical Fiber Communications (3) Operational principles of optical components, including sources, fibers and detectors, and the whole systems in optical fiber communications.
Effective: Spring 2014
Prerequisite:

EE 422 Optical Engineering Laboratory (3) Hands-on experience covering areas of optical transforms, electro-optics devices, signal processing, fiber optics transmission, and holography.
Effective: Fall 1993
Prerequisite:

EE 424 Principles and Applications of Lasers (3) Principles of lasers--generation, propagation, detection and modulation; applications in fiber optics communication, remote sensing, holography, optical switching and processing.
Effective: Spring 2008
Prerequisite:

EE 430 Principles of Electromagnetic Fields (3) Laws of electrodynamics, boundary value problems, relativistic effects, waves in dielectrics and ferrites, diffraction and equivalence theorems.
Effective: Spring 2008
Prerequisite:

EE 432 RF and Microwave Engineering (3) Transmission line and waveguide characteristics and components; design of RF and microwave amplifiers, oscillators, and filters; measurement techniques; design projects.
Effective: Fall 2013
Prerequisite:

E E 438 **Antenna Engineering** (3) Radiation from small antennas, linear antenna characteristics, arrays of antennas, impedance concepts and measurements, multifrequency antennas, and aperture antennas.
Effective: Spring 2001
Prerequisite:

E E 439 **Radiowave Propagation in Communications** (3) Radiowave propagation in mobile, terrestrial, and satellite communications; applications at microwave and lower frequencies.
Effective: Spring 2008
Prerequisite:

E E 441 **Semiconductor Integrated Circuit Technology** (3) An overview of fundamentals of processes involved in silicon integrated circuit fabrication through class lectures and hands-on laboratory.
Effective: Spring 2014
Prerequisite:

E E 442 **Solid State Devices** (3) The physics of semiconductors as related to the characteristics and design of solid state electronic devices.
Effective: Spring 2014
Prerequisite:

E E 450 **Signal and Image Processing** (3) Linear system analysis in one-dimension and two-dimensions, emphasis on filtering; multi-dimensional signal analysis; image enhancement and reconstruction; computer simulation applications.
Effective: Spring 2008
Prerequisite:

E E 453 **Fundamentals of Digital Signal Processing** (3) Design of FIR and IIR filters; DFT and its computation via FFT; applications of DFT; filter implementation; finite arithmetic effects.
Effective: Spring 2008
Prerequisite:

E E 454 (CMPEN 454) **Fundamentals of Computer Vision** (3) Introduction to topics such as image formation, segmentation, feature extraction, shape recovery, object recognition, and dynamic scene analysis.
Effective: Spring 2008
Prerequisite:

E E 455 (CMPEN 455) **An Introduction to Digital Image Processing** (3) Overview of digital image processing techniques and their applications; image sampling, enhancement, restoration, and analysis; computer projects.
Effective: Spring 2008
Prerequisite:

E E 456 (E SC 456, EGEE 456) **Introduction to Neural Networks** (3) Artificial Neural Networks as a solving tool for difficult problems for which conventional methods are not applicable.
Effective: Spring 2008
Prerequisite:

E E 458 **Digital Image Processing and Computer Vision** (3) Principles of DSP and computer vision, including sensing preprocessing, segmentation, description, recognition, and interpretation.
Effective: Spring 2008
Prerequisite:

E E 460 **Communication Systems II** (3) Probability fundamentals, digital/analog modulation/demodulation, system noise analysis, SNR and BER calculations, optimal receiver design concepts, introductory information theory.
Effective: Spring 2008
Prerequisite:

E E 461 **Communications I** (4) Element of analog and digital communication systems, AM, FM, and digital modulation techniques, receivers, transmitters, and transmission systems, noise.
Effective: Spring 2008
Prerequisite:

E E 471 (AERSP 490, NUC E 490) **Introduction to Plasmas** (3) Plasma oscillations; collisional phenomena; transport properties; orbit theory; typical electric discharge phenomena.
Effective: Spring 2008
Prerequisite:

E E 472 (AERSP 492) **Space Astronomy and Introduction to Space Science** (3) The physical nature of the objects in the solar system; the earth's atmosphere, ionosphere, radiation belts, magnetosphere, and orbital mechanics.
Effective: Spring 2008
Prerequisite:

E E 474 **Satellite Communications Systems** (3) Overview of satellite communications systems, principles, space platforms, orbital mechanics, up/down links and link budgets, modulation techniques.
Effective: Spring 2008
Prerequisite:

E E 477 (METEO 477) **Fundamentals of Remote Sensing Systems** (3) The review of fundamental physical properties leads into discussions of various techniques, including imaging, spectroscopy, radiometry, and active sensing.
Effective: Spring 2008
Prerequisite:

E E 481 Control Systems (4) Classical/modern approaches to system analysis/design; time/frequency domain modeling, stability, response, optimization, and compensation. Effective: Spring 2008
Prerequisite:

E E 482 Introduction to Digital Control Systems (3) Sampling and hold operations; A/D and D/A conversions; modeling of digital systems; response evaluation; stability; basis of digital control; examples. Effective: Spring 2008
Prerequisite:

E E 483 Introduction to Automation and Robotics Systems (3) Introduction to robotics systems with emphasis on robotic motion and control, and robotic components such as actuators and sensors. Effective: Summer 2008
Prerequisite:

E E 484 Control System Design (3) Analysis and design of automatic control systems using time, frequency domain and state variable methods. Effective: Spring 2008
Prerequisite:

E E 485 Energy Systems and Conversion (3) Overview of energy alternatives available, and study of theory of operation and models of major energy conversion devices. Effective: Spring 2008
Prerequisite:

E E 487 Electric Machinery and Drives (3) Analysis of variable-speed drives comprised of AC electric machines, power converters, and control systems. Effective: Summer 2007
Prerequisite:

E E 488 Power Systems Analysis I (3) Fundamentals, power transformers, transmission lines, power flow, fault calculations, power system controls. Effective: Spring 2008
Prerequisite:

E E 489 Power Systems Analysis II (3) Symmetrical components, unbalanced networks, unsymmetrical faults, unbalanced operation of rotating machines, transient transmission line modeling, system protection. Effective: Spring 2008
Prerequisite:

E E 494 Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course. Effective: Fall 1993

E E 494H Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course. Effective: Spring 2008

E E 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Spring 2008
Prerequisite:

E E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1993

E E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1993

E E 497A Principles of Signal Integrity (3) Transmission lines and reflections, lossy lines, rise time, material properties, cross talk in transmission lines. Time and frequency domain measurements. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

Prerequisite: Concurrent: E E 311

E E 497B Probability and Random Processes for Electrical Engineers (3) Probability elective for EE/CMPEN students with
applications in information theory, signal detection, control systems and circuit analysis.

Prerequisite:

E E 497C Application of Optics in Communications, Lighting and Power (3) Applications of optical engineering in communications (e.g. fiber optics), lighting (e.g. LEDs), and Power (e.g. solar energy). st.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Prerequisite:

E E 497E Space Systems Engineering Seminar (1) Seminar overviewing the systems engineering approach as applied to practical space systems.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Prerequisite:

E E 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

E E 500 Colloquium (1) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2008

E E 510 Linear Integrated Circuits (3) Design of monolithic, thin-film, and hybrid linear integrated circuits; D.C., video, tuned, r.f., and microwave applications. Emphasis on reliability.
Effective: Spring 2008

Prerequisite:

Effective: Summer 1997

Prerequisite:

E E 521 Fiber Optics and Integrated Optics (3) Theories and applications of linear and nonlinear optical phenomena in optical fibers and integrated optical devices.
Effective: Spring 2006

Prerequisite:

E E 522 Electro-Optics Laboratory (3) Basic concepts and fundamentals of light diffraction, optical signal processing, and holography.
Effective: Fall 1993

Prerequisite:

E E 524 Lasers and Optical Electronics (3) Study of several advanced nonlinear optical phenomena, laser propagation, optical and optoelectronic devices, principles, and applications.
Effective: Spring 2008

Prerequisite:

E E 526 Nonlinear Optical Materials (3) Mechanisms of polarization nonlinearity, nonlinear optical processes and analyses, optoelectronic materials and their device application.
Effective: Spring 2012

Prerequisite:

E E 531 Engineering Electromagnetics (3) Electromagnetic field theory fundamentals with application to transmission lines, waveguides, cavities, antennas, radar, and radio propagation.
Effective: Spring 2008

Prerequisite:

E E 534 Conformal Antennas (3) Introduction to advanced analysis and design techniques as well as applications for conformal antennas mounted on planar and curved surfaces.
Effective: Spring 2008

Prerequisite:

E E 535 Boundary Value Methods of Electromagnetics (3) Theory and application of boundary value problems in engineering electromagnetics; topics include microwave and optical waveguides, radiation, and scattering.
Effective: Spring 2008

Prerequisite:

E E 537 Numerical and Asymptotic Methods of Electromagnetics (3) Finite difference time domain, geometric theory of diffraction and method of moments applied to antennas and scattering.
Effective: Summer 1995

E E 538 Antenna Engineering (3) In-depth studies of synthesis methods, aperture sources, broadband antennas, and signal-processing arrays.
Effective: Fall 1993
Prerequisite:

E E 541 Manufacturing Methods in Microelectronics (3) Methods, tools, and materials used to process advanced silicon integrated circuits.
Effective: Spring 2008

Prerequisite:

E E 542 Semiconductor Devices (3) Characteristics and limitations of bipolar transistors, diodes, transit time, and bulk-effect devices.
Effective: Spring 2008

Prerequisite:

E E 543 Ferroelectric Devices (3) Theoretical background of ferroelectric devices, practical materials, device designs, drive/control techniques, and typical applications.
Effective: Summer 2009

E E 544 Micromechatronics (3) Theoretical background of solid state actuators, practical materials, device designs, drive/control techniques and typical applications.
Effective: Summer 2009

E E 545 (MATSE 545) Semiconductor Characterization (3) Physical principles and experimental methods used to characterize the electrical, optical, structural and chemical properties of semiconductor materials.
Effective: Spring 2014

E E 546 Field-Effect Devices (3) The physical background, characteristics, and limitations of surface field-effect and junction field-effect devices and related structures.
Effective: Spring 2008

Prerequisite:

E E 547 Dielectric Devices (3) Applications of insulator physics and devices based on insulator properties.
Effective: Spring 2008

Prerequisite:

E E 549 Acoustic Wave Devices (3) Examines materials commonly used for acoustic wave devices, fundamentals of acoustic waves and resonance modes, and characteristics of these devices.
Effective: Fall 2008

Prerequisite:

E E 550 (M E 550) Foundations of Engineering Systems Analysis (3) Analytical methods are developed using the vector space approach for solving control and estimation problems; examples from different engineering applications.
Effective: Fall 2012

Prerequisite:

E E 551 Wavelets, Filter Banks, and Multi-resolution Analysis (3) Gram-Schmidt orthogonalization and orthonormal bases, filter banks, orthogonal wavelets and multiresolution analysis, fast wavelet transforms, various applications.
Effective: Spring 2008

Prerequisite:

E E 552 (CSE 583) Pattern Recognition--Principles and Applications (3) Principles and applications decision-theoretic classification, discriminant functions, pattern processing and feature selection, syntactic pattern recognition, shape analysis and recognition.
Effective: Spring 2008

E E 553 Topics in Digital Signal Processing (3) Parametric modeling, spectral estimation, efficient transforms and convolution algorithms, multirate processing, and selected applications involving non-linear and time-variant filters.
Effective: Fall 1993

Prerequisite:

E E 554 (CSE 586) Topics in Computer Vision (3) Discussion of recent advances and current research trends in computer vision theory, algorithms, and their applications.
Effective: Spring 2008

Prerequisite:

E E 555 (CSE 585) Digital Image Processing II (3) Advanced treatment of image processing techniques; image restoration, image segmentation, texture, and mathematical morphology.
Effective: Spring 2008

Prerequisite:

E E 556 Graphs, Algorithms, and Neural Networks (3) Examine neural networks by exploiting graph theory for offering alternate solutions to classical problems in signal processing and control.
Effective: Spring 1996

Effective: Fall 1993

The Pennsylvania State University
Prerequisite:

Prerequisite:

E E 561 Information Theory (3) Mathematical measurement of information; information transfer in discrete systems; redundancy, efficiency, and channel capacity; encoding systems. Effective: Spring 2008

Prerequisite:

Prerequisite:

E E 564 (CSE 554) Error Correcting Codes for Computers and Communication (3) Block, cyclic and convolutional codes; circuits and algorithms for decoding; application to reliable communication and fault-tolerant computing. Effective: Spring 2008

Prerequisite:

E E 565 (CSE 515) Reliable Data Communications (3) Discussion of problems and solutions for ensuring reliable and efficient communication over wired and wireless links and data networks. Effective: Spring 2008

Prerequisite:

E E 566 Wireless and Mobile Communications (3) Development of key wireless networks systems analysis and design tools utilizing telecommunications principles; current and emerging mobile wireless techniques. Effective: Spring 2008

Prerequisite:

E E 568 Digital Communications I (3) Linear and nonlinear digital modulation techniques; performance in additive Gaussian noise channel; continuous phase modulation; carrier acquisition and recovery. Effective: Spring 2008

Prerequisite: Concurrent: E E 560

E E 569 Digital Communications II (3) Baseband pulse transmission; baseband systems optimization; bandlimited channels performance in ISI; equalization; MLSE and ISI; fading channels; diversity; CDMA. Effective: Spring 2008

Prerequisite:

E E 573 Constitution of the Ionosphere (3) Properties of neutral and ionized atmosphere above 60 km; photochemical processes; solar, meteoric perturbations of the ionosphere; large-scale movements in ionization. Effective: Spring 2008

Prerequisite:

E E 574 Propagation Through Random Media (3) RF/optical wave propagation through turbulent, turbid, and heterogeneous media (atmosphere/ionosphere/sea). Impacts and mitigation discussed for various scenarios. Effective: Spring 2008

Prerequisite:

E E 575 Inversion Techniques in Remote Sensing (3) Introduce skills to address a wide variety of inverse problems such as found in atmospheric sensing, geosciences, and acoustics. Effective: Spring 2008

Prerequisite:

Prerequisite:

E E 580 Linear Control Systems (3) Continuous and discrete-time linear control systems; state variable models; analytical design for deterministic and random inputs; time-varying systems stability. Effective: Spring 2008

Prerequisite:

E E 581 Optimal Control (3) Variational methods in control system design; classical calculus of variations, dynamic programming, maximum principle; optimal digital control systems; state estimation. Effective: Spring 2008

Prerequisite:

Prerequisite:

E E 584 (M E 558) Robust Control Theory (3) Fundamentals of Robust Control Theory with emphasis on stability, performance analysis, and design. Effective: Spring 2008

Prerequisite:
E E 587 (M E 559) Nonlinear Control and Stability (3) Design of nonlinear automatic control systems; phase-plane methods; describing functions; optimum switched systems; Liapunov stability; special topics in stability.
Effective: Spring 2008
Prerequisite:

E E 588 Power System Control and Operation (3) Steady-state and dynamic model of synchronous machines, excitation systems, unit commitment, control of generation, optimal power flow.
Effective: Spring 2008
Prerequisite:

E E 594 Research Projects (1-3) Supervision of individual research projects leading to M.S. or M.Eng. papers. Written and oral reports are required.
Effective: Summer 1998 Ending: Summer 2014

E E 594 Research Projects (1-9) Supervision of individual research projects leading to M.S. or M.Eng. papers. Written and oral reports are required.
Effective: Fall 2014 Future: Fall 2014

E E 596 Individual Studies (1-9) Creative projects including non-thesis research which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1993

E E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 1993

E E 597A Analysis and Design of RF Circuits and Systems (3) RF transceiver architecture, low-noise amplifiers and mixers, oscillators, frequency synthesizers, power amplifiers.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

E E 597B Advanced Digital VLSI Design (3) Digital circuit design techniques that can be instrumental in achieving higher energy efficiency and resilience to process variations in scaled technologies.
Prerequisite:

E E 597B Organic Optoelectronics (3) Molecular structure, physical structure, excitation, transport and applications of organic optoelectronic devices.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

E E 597C Exploring Microelectro-opto-mechanical Resonance Phenomenon for Sensing (3) Resonance phenomenon for designing sensors capable of achieving the ultimate sensitivity limited only by fundamental thermodynamic fluctuations.
Prerequisite:

E E 597C Introduction to Ultrafast Nonlinear Imaging and Spectroscopy (3) This course teaches the fundamentals of ultrafast nonlinear optical technologies with a focus on the applications to imaging and spectroscopy.
Prerequisite:

E E 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2008

Effective: Fall 1993

E E 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1993

E E 602 Supervised Experience in College Teaching (3 per semester/maximum of 6) College Teaching Experience
Effective: Summer 2012

Effective: Fall 1993

E E 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1993

The Pennsylvania State University
Elements Of Clin Res (ELCLR)

ELCLR 700 Elements of Clinical Research (3) This interactive course covers the fundamentals of clinical research, logistic and ethical issues, manuscript and grant writing, and presentation training. Effective: Fall 1999
Prerequisite: 

Last Import from UCM: May 24, 2014 3:00 AM
Emergency Med-Hy (EMED)

EMED 740 Emergency Medicine Ultrasound (5) This course provides hands-on exposure to bedside ultrasound image acquisition and interpretation in the Emergency Department.
Effective: Spring 2010
Prerequisite:

EMED 752 Emergency Medicine Acting Internship (5) Supervised experience in the management of acute medical and surgical conditions in the emergency care unit.
Effective: Fall 2008
Prerequisite:

EMED 754 Toxicology Elective (5) Toxicology admissions and consults; weekly two-hour conferences; poison center sign-out rounds; exposure to the most common toxicologic poisonings; research opportunities.
Effective: Spring 2002
Prerequisite:

EMED 756 Emergency Medicine Elective for Third Year Students (2.5) Introduction for the 3rd year medical student to various aspects of Emergency Medicine.
Effective: Summer 2009
Prerequisite:

EMED 796 Emergency Medicine Independent Studies (5) Emergency Medicine Independent Studies
Effective: Fall 2008
Prerequisite:

EMED 797 Emergency Medicine Special Topics (5) Emergency Medicine Special Topics
Effective: Fall 2008
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Endocrinology (ENDO)

ENDO 723 Endocrinology (2) Course provides exposure to basic concepts in histology/pathology, biochemistry, physiology, pharmacology, public health, and population and clinical medicine related to hormonal regulation of homeostasis. Effective: Summer 2014

Prerequisite: 

Last Import from UCM: May 24, 2014 3:00 AM
Endocrinology-Hy (END)

END 731 Endocrinology (3) These areas will be studied: Pituitary Disease; Thyroid Disease; Hyper-thyroidism; Sexual Development; disorders of Calcium and Phosphorous; Adrenal Disease; Diabetes Mellitus; Hypoglycemia; and Normal and Abnormal Growth.
Effective: Fall 2001
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Energy and Geo-Environmental Engineering (EGEE)

EGEE 401 **Energy in a Changing World** (3) Energy is in transition, with increased international energy demand and increasing environmental pressures. Energy transitions, approaches, and outcomes are addressed. Effective: Spring 2008
Prerequisite:

EGEE 411 **Energy Science and Engineering Lab** (3) A comprehensive introduction to classic and modern laboratory skills and experimentation of relevance to energy science and engineering practice. Effective: Spring 2008 Ending: Fall 2014
Prerequisite:

EGEE 411W **Energy Science and Engineering Lab** (3) A comprehensive introduction to classic and modern laboratory skills and experimentation of relevance to energy science and engineering practice. Effective: Spring 2015 Future: Spring 2015
Prerequisite:

EGEE 412 **Green Engineering & Environmental Compliance** (3) Material and energy flows as they relate to industrial systems, environmental concerns, pollution prevention, and the development of clean technologies. Effective: Summer 2007
Prerequisite:

EGEE 420 **Hydrogen and Fuel Cells** (3) Course will cover the fundamental principles of electrochemical engineering, hydrogen production and storage, and the design and application of the main types of fuel cells. Effective: Fall 2009
Prerequisite:

EGEE 430 (M E 430) **Introduction to Combustion** (3) Concepts related to laminar and turbulent premixed and nonpremixed combustion with applications to propulsion and stationary systems. Effective: Fall 2009
Prerequisite:

Prerequisite:

EGEE 436 **Modern Thermodynamics for Energy Systems** (3) Thermodynamics of external fields, theory of stability and fluctuations, irreversible and non-linear thermodynamics, and bifurcation theory and their applications in energy and environmental processes are discussed. Effective: Fall 2009
Prerequisite:

EGEE 437 **Design of Solar Energy Conversion Systems** (3) A review of fundamental concepts in solar energy conversion including photovoltaic (PV) and solar thermal conversion systems. Effective: Spring 2010
Prerequisite:

EGEE 438 **Wind and Hydropower Energy Conversion** (3) Principles of sustainability and renewable energy conversion with emphasis on wind and hydrokinetic energy resources. Effective: Spring 2012
Prerequisite:

EGEE 441 **Electrochemical Engineering Fundamentals** (3) Course covers fundamental principles of electrochemistry, including electrochemical thermodynamics, kinetics, catalysis, and corrosion and focuses on applications such as fuel cells, batteries, and photovoltaics. Each application covers: principles of method, criteria determining performance, present state of development, and advantages/disadvantages. Laboratory demonstration of the performance (current-voltage) measurements of an electrochemical converter is scheduled in this course. Effective: Fall 2012
Prerequisite:

EGEE 451 **Energy Conversion Processes** (3) Emphasizes processes for conversion of fossil fuels, nuclear and biomass to other fuel forms as transportation fuels and electricity. Effective: Summer 2007
Prerequisite:

EGEE 455 **Materials for Energy Applications** (3) Overview of key principles and technologies for materials relevant to energy applications, including membranes, catalysis, supercapacitors, adsorbents, and semi-conductors. Effective: Summer 2007
Prerequisite:

EGEE 456 (E E 456, E SC 456) **Introduction to Neural Networks** (3) Artificial Neural Networks as a solving tool for difficult problems for which conventional methods are not applicable. Effective: Spring 2008
Prerequisite:

EGEE 464W **Energy Design Project** (3) A team and capstone design project on an industrial energy-related problem.

The Pennsylvania State University
EGEE 470 Air Pollutants from Combustion Sources (3) Generation of pollutants in combustion chambers; reduction by combustion control; pre- and post-combustion treatment of fuels and effluents.
Effective: Fall 2009
Prerequisite:

EGEE 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1999

EGEE 494A Research Project (2) Supervised research on a selected topic of energy science and engineering and preparation of written and oral presentation of the research results.
Effective: Summer 2007
Prerequisite:

EGEE 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

EGEE 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1999

EGEE 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 1999

EGEE 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1999

EGEE 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1999

EGEE 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

EGEE 500 Engineering Physics of Energy and Geo-Environmental Systems (3) Momentum, heat and mass transport phenomena in fluids and solids, including phase equilibria.
Effective: Spring 2005
Prerequisite:

EGEE 510 Engineering Chemistry of Energy and Geo-Environmental Systems (3) Chemical and electrochemical equilibria, surface and interfacial phenomena and chemical kinetics, in natural and engineered systems.
Effective: Spring 2005
Prerequisite:

EGEE 520 Mathematical Modeling of Energy and Geo-Environmental Systems (3) Physical and reactive chemical modeling, model formulation and solution, validation and verification.
Effective: Spring 2005
Prerequisite:

EGEE 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1999

EGEE 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1999

EGEE 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1999

EGEE 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1999
EGEE 597A **Machine Learning for Engineering Problems** (2) Overview of the theory and application of various machine learning algorithms to problems in engineering.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EGEE 597B (MATSE 597B) **Nanoscale Energy and Environmental Engineering** (3) The course will cover the synthesis, characterization and applications of nanomaterials to energy generation, storage, conversion, conservation, control and environmental engineering. Selected topics in nanomaterial toxicity and production/process/product economics will be included.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EGEE 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1999

EGEE 599 (IL) **Foreign Studies** (1-2 per semester, maximum of 24) Full-time graduate-level foreign study at overseas.
Effective: Summer 2005

EGEE 600 **Thesis Research** (1-15) No description.
Effective: Summer 2005

EGEE 602 **Supervised Experience in College Teaching** (1-3 per semester, maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Summer 2004

EGEE 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 2006

Last Import from UCM: May 24, 2014 3:00 AM
# Energy and Mineral Engineering (EME)

**EME 407 Electrochemical Energy Storage** (3) Electrochemical concepts in energy storage devices, cell construction and materials involved in batteries and capacitors, electrochemical testing methods and applications.
- Effective: Spring 2012
- Prerequisite: 

**EME 432 (GEOG 432) Energy Policy** (3) Analysis, formulation, implementation, and impacts of energy-related policies, regulations, and initiatives.
- Effective: Summer 2010
- Prerequisite: 

**EME 444 Global Energy Enterprise** (3) Industry perspective on the resources, technologies, engineering approaches and externalities involved in satisfying worldwide energy demand profitably and sustainably.
- Effective: Summer 2010
- Prerequisite: 

**EME 460 Geo-resource Evaluation and Investment Analysis** (3) The course covers engineering evaluation of geo-resources, present value and rate of return analysis, mineral property and reserve estimation, and cost estimation and engineering economy concepts applied to geo-resources including energy and minerals.
- Effective: Spring 2011
- Prerequisite: 

**EME 466 Energy and Sustainability in Society** (3) Capstone course in energy technology and policy options for reduced-carbon communities. Covering agent/stakeholder relations, sustainability, communication and public engagement.
- Effective: Summer 2010
- Prerequisite: 

**EME 500 Energy and Mineral Project Investment Evaluation** (3) Emphasizes enterprise level cost review, estimation, and prediction methodology and investment evaluation as a means for project engineering management.
- Effective: Spring 2009

**EME 504 Foundations in Sustainability Systems** (3) Theoretical background of sustainability issues and studies of sustainability systems.
- Effective: Summer 2013

**EME 510 Health and Safety Engineering** (3) Develop the ability to use scientific and engineering principles to evaluate and control health and safety hazards in the workplace.
- Effective: Spring 2009

**EME 525 Theory and Practice of Policy Analysis for Engineers** (3) The course provides a broad introduction to analytical methods commonly used in science, technology, and energy policy analysis.
- Effective: Summer 2008

**EME 570 (MATSE 570) Catalytic Materials** (3) Preparation and characterization of solid catalytic materials and the relationships between their surface, defect, and electronic properties and catalytic activity.
- Effective: Summer 2008
- Prerequisite: 

**EME 580 Interdisciplinary Team Project in EME Systems** (3) Problem-based, integrative, and collaborative learning to solve interdisciplinary problems on energy and mineral systems based on engineering and business principles.
- Effective: Fall 2012
- Prerequisite: 

**EME 581 Research and Geostatistics Methods** (3) Presents methods essential for the conduct and analysis of scientific research and spatial characterization in energy and mineral engineering disciplines.
- Effective: Summer 2012

**EME 590 (P N G 590, F SC 590, MNG 590) Colloquium** (1-3) Continuing seminars that consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.
- Effective: Spring 2009

**EME 600 Thesis Research** (1-12) Thesis research culminating into the doctoral degree in Energy and Mineral Engineering.
- Effective: Summer 2008

**EME 601 Thesis Preparation** (0) Thesis research after successful comprehensive exam culminating into the doctoral degree in Energy and Mineral Engineering.
- Effective: Summer 2008
EME 801 Energy Markets, Policy, and Regulation (3) Structure and function of energy markets; existing and emerging environmental regulations; decision-making by energy companies.
Effective: Summer 2013

EME 802 Renewable and Sustainable Energy Systems (3) An overview of renewable energy technologies and sustainable energy system analysis.
Effective: Summer 2013

EME 803 Applied Energy Policy (3) Provides in-depth exploration of energy policy development, implementation, and assessment at multiple governmental and corporate scales with emphasis on energy markets.
Effective: Summer 2013

EME 805 Renewable Energy and Nonmarket Enterprise (3) Industry perspective on the resources, technologies, engineering approaches and externalities involved in deploying renewable energy businesses profitably and sustainably.
Effective: Summer 2013

EME 807 Technologies for Sustainability Systems (3) This course examines strategies and applications of sustainable technologies in manufacturing, energy, water, transportation, food, and building systems.
Effective: Summer 2013

EME 810 Solar Resource Assessment and Economics (3) Methods, economic criteria, and meteorological background for assessing the solar resource with respect to solar energy conversion technologies.
Effective: Summer 2013

EME 811 Solar Thermal Energy for Utilities and Industry (3) Applications of solar thermal energy (STE) including district heating/cooling (buildings), industrial process heating, fuel synthesis, desalination, and materials processing.
Effective: Summer 2013
Prerequisite:

EME 812 Utility Solar Power and Concentration (3) Technical and theoretical background for utility scale solar energy conversion technologies to generate electric power.
Effective: Summer 2013
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Energy, Environmental, and Mineral Economics (ENNEC)

ENNEC 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Spring 2002
Prerequisite:

ENNEC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2002

ENNEC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2001

ENNEC 499 (IL) Foreign Study--Mineral Industries (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

ENNEC 540 Economic Analysis of Energy Markets (3) This course uses economic analysis to explain the history of world energy and its regulation since 1945. Effective: Spring 2002
Prerequisite:

ENNEC 541 Economics of Energy and the Environment (3) Economic analysis of topics such as global warming, alternative energy sources and new technologies, and resources and sustainable development. Effective: Spring 2002
Prerequisite:

Prerequisite:

ENNEC 590 (I H S 590) Colloquium (1-3) Continuing seminars which consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues. Effective: Spring 2009

ENNEC 596 Individual Studies (1-9) Creative projects, including nonthesis research which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2002

ENNEC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 2002

ENNEC 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Spring 2002

ENNEC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised and graded teaching experience. Effective: Spring 2002

ENNEC 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Spring 2002

Last Import from UCM: May 24, 2014 3:00 AM
Engineering (ENGR)

ENGR 405 Project Management for Professionals (3) Covers the essential concepts and skills needed to make effective contributions on projects, on time and within budget.
Effective: Spring 2014
Prerequisite:

ENGR 407 Technology-Based Entrepreneurship (3) Technology innovation coupled with business planning and development.
Effective: Spring 2011
Prerequisite:

ENGR 408 (US) Leadership Principles (2) An introduction to an exploration of theories and principles of leadership, supplemented by presentations given by industry and government leaders.
Effective: Spring 2006

ENGR 409 (US) Leadership in Organizations (3) Development of leadership skills essential for engineers to guide colleagues or an organization in a productive direction.
Effective: Spring 2006

ENGR 411 Entrepreneurship Business Basics (3) Three critical entrepreneurship skills are covered for non-business majors: business finance, intellectual property, and marketing.
Effective: Summer 2002
Prerequisite:

ENGR 415 Technology Launch for Entrepreneurs (3) Development of a technology-based product or service that includes creative ideation, concept evaluation, market and sales analysis, prototyping, and manufacturing with potential for commercialization.
Effective: Summer 2013
Prerequisite:

ENGR 421 Materials Properties Measurements II (4) Materials powder characterization, compaction and densification techniques, density measurements, micro structural evaluation, thermal and electrical properties of materials.
Effective: Summer 2010
Prerequisite:

ENGR 425 (IST 425, MGMT 425) New Venture Creation (3) Via problem-based learning, teams define new business ventures to meet current market needs, develop business plans, and present to investors.
Effective: Spring 2011
Prerequisite:

ENGR 426 (IST 426, MGMT 426) Invention Commercialization (3) Working with Penn State inventions selected by the Intellectual Property Office, student teams define an optimum commercialization path each technology.
Effective: Spring 2011
Prerequisite:

ENGR 450 Materials Design and Applications (3) Engineering design considerations for materials selection, organization of property trends of materials families, materials design strategies and property compatibility.
Effective: Summer 2010
Prerequisite:

ENGR 451 Social Entrepreneurship (3) Students develop business models and implementation strategies for social ventures in diverse world regions.
Effective: Summer 2013
Prerequisite:

ENGR 455 Humanitarian Engineering and Social Entrepreneurship Reflection and Research Dissemination (3) This post-fieldwork course focuses on reflection on ethical issues and grassroots diplomacy challenges, and workshops on research dissemination.
Effective: Summer 2013
Prerequisite:

ENGR 475 Space Systems Engineering Seminar (1) Seminar overviewing the systems engineerng approach as applied to practical space systems.
Effective: Summer 2014
Prerequisite:

ENGR 486 Business Opportunities in Engineering (2) Business principles, leadership and management strategies, accounting fundamentals, engineering and business ethics, creativity, and personal character as a formula for success.
Effective: Summer 2014
Prerequisite:

ENGR 487 Business Opportunities in Engineering: The Business Plan (1) Essential elements, development, and presentation of the Business Plan from both an engineering and business point of view.
Effective: Summer 2014
Prerequisite:

ENGR 490W **Senior Design I** (1) Analysis of environmental impacts on a design, designing products for the global environment and discussion on engineering ethics and professionalism.
Effective: Fall 2012
Prerequisite:

ENGR 491W **Senior Design II** (3) Capstone of research projects from conception to prototype through industry sponsored collaboration on common technical interests between faculty and student.
Effective: Summer 2010
Prerequisite:

ENGR 493 **Individual Leadership Experience** (1) Approved individual project or internship for students to practice the leadership skills developed in the Engineering Leadership Development Minor.
Effective: Fall 2007
Prerequisite:

ENGR 494 **Research Project Courses** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1994

ENGR 494H **Research Project Courses** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

ENGR 495 **Engineering Co-Op Work Experience III** (1-3) A supervised work experience where the student is employed in an engineering position in industry or government. (To be offered only for SA/Un grading.)
Effective: Fall 1987
Prerequisite:

ENGR 495A **Engineering Cooperative Education** (1-3 per semester) A supervised work experience in research, industry or government relevant to a student's major.
Effective: Summer 2003
Prerequisite:

ENGR 495I (IL) **Engineering International Cooperative Education** (1-3 per semester) A supervised work experience in research, industry or government relevant to a student's major.
Effective: Spring 2006
Prerequisite:

ENGR 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 1993

ENGR 496A **International Experience-Hungary** (0.5) Independent Study in Engineering Leadership Topics.
Effective: Summer 2014 Ending: Summer 2014

ENGR 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1988

ENGR 497A **Politico-Engineering** (3) This course overviews the current "politico-engineering (politically-initiated engineering)"; technologies for the society sustainability and crisis technologies for natural disaster, infectious disease, enormous accident, terrorist/criminal incident, and war/territorial invasion, including risk management in the international relationship.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

ENGR 497C **Global Engineering Teams Seminar** (1) Preparation for a career in international engineering enterprise. Prerequisite for students traveling internationally with the Engineering Leadership Development Program. Students must earn a B or better in this class to qualify for travel.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

ENGR 497I **Seminars for Teaching Interns** (0.5) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ENGR 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

ENGR 594 **Master's Paper Research** (1-3) Investigation of a specific engineering problem and development of a scholarly written report in partial fulfillment of requirements for a master's degree in engineering.
Effective: Fall 1985
ENGR 595 Engineering Internship (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2011

ENGR 595A Engineering Internship (1 per semester/maximum of 4) A supervised work experience in a professionally relevant position in research, industry, or government.
Effective: Spring 2005

ENGR 595I International Engineering Internship (0.5 per semester/maximum of 4) A supervised work experience in a professionally relevant position in research, industry, government or service sector.
Effective: Fall 2012

ENGR 596 Independent Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2011

ENGR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1993

ENGR 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2011

ENGR 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2008

ENGR 600 Thesis Research (1-15) No description.
Effective: Fall 1983

ENGR 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Opportunity for supervised and graded experience for graduate students in the College of Engineering.
Effective: Fall 1983

ENGR 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

ENGR 888 Seminar for Engineering Teaching Assistants (1) Study of recently established knowledge and methodologies as applied to practice. Significant interaction among students and with instructor is expected.
Effective: Fall 2009

ENGR 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2008

Last Import from UCM: May 24, 2014 3:00 AM
Engineering Design (EDSGN)

EDSGN 401 Engineering Systems Design (3) Design requirements for complex systems; trade-offs between market opportunities and technology; translation of priorities and needs into an operational concept.
Effective: Spring 2012
Prerequisite:

EDSGN 410 Robotics Design and Applications (4) Introduction to robotics, with emphasis on the design of robotics systems through multidisciplinary integration of electrical, mechanical, and software components.
Effective: Spring 2012
Prerequisite:

EDSGN 452 Projects in Humanitarian Engineering (2) Multidisciplinary student teams engage in integrated design of real-world humanitarian ventures.
Effective: Spring 2014
Prerequisite: Concurrent: EDSGN 453

EDSGN 453 Design for Developing Communities (1) A seminar series related to the context and integrated design of Humanitarian Engineering and Social Entrepreneurship ventures in developing communities.
Effective: Summer 2013
Prerequisite:

EDSGN 454 Humanitarian Engineering and Social Entrepreneurship Field Experience (0.5) A hands-on integrated learning research and entrepreneurial engagement experience for students working on various humanitarian projects.
Effective: Summer 2013
Prerequisite:

EDSGN 460W Multidisciplinary Capstone Design Project (3 per semester/maximum of 6) Course provides multidisciplinary industry-sponsored and service-based senior design projects in conjunction with the Learning Factory.
Effective: Summer 2013 Ending: Summer 2014
Prerequisite:

EDSGN 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2004

EDSGN 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

EDSGN 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2004

EDSGN 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2004

EDSGN 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2004

EDSGN 497A Projects in Sustainability Leadership (3) This hands-on course challenges students to apply concepts of sustainability. An emphasis on residential energy and sustainability is used to prepare students to conduct home energy assessments and related activities in their community.
Effective: Summer 2014 Ending: Summer 2014

EDSGN 497B Solidworks Fundamentals (3) Fundamentals of solidworks.
Effective: Summer 2014 Ending: Summer 2014

EDSGN 497B Solid Works Fundamentals (3) First level of solid works instruction.
EDSGN 497G **Current Cad Applications** (3) Students will use the latest version of AutoCAD as a design tool for 2D and 3D applications in a variety of disciplines.
Effective: Summer 2014 Ending: Summer 2014

EDSGN 497G **Current CAD Applications** (3) Students will use the latest version of AutoCAD as a design tool for 2D and 3D applications in a variety of disciplines.
Effective: Fall 2014 Ending: Fall 2014

EDSGN 497H **Open Source and the Design of Technology** (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

EDSGN 497H **Open Source and the Design of Technology** (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

EDSGN 497K **Engineering Design and Analysis with Advanced CAD** (3) The course objectives are to understand how engineering design efforts are supported through the use of advanced computer aided design (CAD). Advanced CAD makes creating rich and complex designs possible. Advanced CAD (in this offering CATIA V5) is used as a design tool to build parts and assemblies, and to create drawings of those parts and assemblies. Students will learn basic FEA (Finite Element Analysis) capabilities to conduct structural analysis and computer simulation of designs. Students will learn how to generate models, establish meshes, apply boundary conditions, loads, and material properties to the model for structural analysis, and then generate an FEA report. Through various exercises, design projects with rapid prototyping models, and building design portfolios, students will obtain a solid foundations in the use of advanced CAD for their design and engineering analyses.
Effective: Fall 2014 Ending: Fall 2014

EDSGN 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2008

EDSGN 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

EDSGN 507 (SYSEN 507) **Systems Thinking** (3) The theory and practice of systems thinking. General systems theory; system dynamics, emergent properties, structure, feedback and leverage.
Effective: Spring 2015 Future: Spring 2015

EDSGN 547 (M E 547) **Designing for Human Variability** (3) Statistics, optimization, and robust design methodologies to design products and environments that are robust to variability in users.
Effective: Summer 2009

EDSGN 548 **Interaction Design** (3) Strategies in user-centered design, ergonomic product analysis, statistical data analysis, low and high fidelity prototyping, and innovative design techniques.
Effective: Summer 2014
Prerequisite:
EDSGN 549 (I E 549) **Design Decision Making** (3) Complexity of design-making; state-of-the-art methods and tools.
Effective: Summer 2011

EDSGN 558 **Systems Design** (3) Systems engineering, principles, practices, and applications of systems engineering in analysis, design, development, integration, verification and validation of complex systems.
Effective: Summer 2014

EDSGN 561 (IST 561, CSE 561, I E 561) **Data Mining Driven Design** (3) The study and application of data mining/machine learning (DM/ML) techniques in multidisciplinary design.
Effective: Summer 2014

EDSGN 581 **Engineering Design Studio I** (3) Cross-disciplinary teams learn in a studio environment to consider broad aspects and context of engineering design activities.
Effective: Summer 2014

EDSGN 582 **Engineering Design Studio II** (3) Cross-disciplinary teams in an engineering design studio environment with project emphasis on technical and analytical depth.
Effective: Summer 2014
Prerequisite:

EDSGN 585 Engineering Design Portfolio (1) Preparation of a portfolio summarizing the student’s experience with engineering design research and practice.
Effective: Summer 2014

Prerequisite:

EDSGN 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2004

EDSGN 594 Research Topics (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2004

EDSGN 595 Internship (1-9) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2004

EDSGN 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2004

EDSGN 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2004

EDSGN 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2004

EDSGN 599 (IL) Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: May 24, 2014 3:00 AM
Engineering Mechanics (E MCH)

E MCH 400 Advanced Strength of Materials and Design (3) Combined stresses; energy methods; special problems in bending and torsion; plates; thin-walled structures; buckling and stability; design projects.
Effective: Spring 2008
Prerequisite:

E MCH 402 Applied and Experimental Stress Analysis (3) Experimental design of structural and machine components; photoelasticity, electrical resistance strain gauge techniques, Moire techniques, interferometry, holography.
Effective: Spring 2008
Prerequisite:

E MCH 403 Strength Design in Materials and Structures (4) Determination, interpretation, significance, and application of mechanical properties such as plastic flow, fatigue strength, creep resistance, and dynamic properties.
Effective: Spring 2008
Prerequisite:

Effective: Spring 2008
Prerequisite:

E MCH 409 Advanced Mechanics (3) Continuation of E MCH 012; Euler’s equations for the rotation of a rigid body, gyroscopic motion, impulsive motion, Lagrangian mechanics.
Effective: Spring 2008
Prerequisite:

E MCH 416H Failure and Failure Analysis of Solids (3) Examination and analysis of the various modes of failure of solid materials.
Effective: Spring 2008
Prerequisite:

E MCH 440 (MATSE 440) Nondestructive Evaluation of Flaws (3) Methods and limitations of nondestructive evaluation of mechanical flaws; optical, acoustical, electromagnetic, x-ray, radiography, thermography, and dye techniques.
Effective: Spring 2008
Prerequisite:

Effective: Spring 2008
Prerequisite:

E MCH 461 (M E 461) Finite Elements in Engineering (3) Computer modeling and fundamental analysis of solid, fluid, and heat flow problems using existing computer codes.
Effective: Spring 2011
Prerequisite:

E MCH 470 (M E 470) Analysis and Design in Vibration Engineering (3) Application of Lagrange’s equations to mechanical system modeling, multiple-degree-of-freedom systems, experimental and computer methods; some emphasis on design applications.
Effective: Spring 2008
Prerequisite:

E MCH 471 Engineering Composite Materials (3) Properties, manufacture, forms of composites; micromechanics; orthotropic lamina properties; laminate analysis; theories; failure analysis; thermal, environmental effects.
Effective: Spring 2008
Prerequisite:

E MCH 473 (AERSP 473) Composites Processing (3) An introduction to the principles of mechanics governing manufacturing, computer-aided design, and testing of composite materials and structures.
Effective: Summer 1988
Prerequisite:

E MCH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

E MCH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

E MCH 500 (M E 560) Solid Mechanics (3) Introduction to continuum mechanics, variational methods, and finite element formulations; application to bars, beams, cylinders, disks, and plates.
E MCH 506 Experimental Stress Analysis (3) Experimental methods of stress determination, including photoelasticity, stress coat, and electric strain gauge techniques; stress analogies; strain rosettes for combined stress determinations. Effective: Summer 2011
Prerequisite:

E MCH 507 Theory of Elasticity and Applications (3) Equations of equilibrium and compatibility; stresses and strains in beams, curved members, rotating discs, thick cylinders, torsion and structural members. Effective: Spring 2008
Prerequisite:

E MCH 509 Theory of Plates and Shells (3) Bending and buckling of plates; elastic foundations; deformation of shells, multilayer shells, stress and stability analysis, weight optimization, application problems. Effective: Spring 2008
Prerequisite:

E MCH 516 Mathematical Theory of Elasticity (3) Fundamental equations and problems of elasticity theory; uniqueness theorems and variational principles; methods of stress functions and displacement potential; applications. Effective: Winter 1978
Prerequisite:

E MCH 520 Advanced Dynamics (3) Dynamics of a particle and of rigid bodies; Newtonian equations in moving coordinate systems; Lagrange's and Hamilton's equations of motion; special problems in vibrations and dynamics. Effective: Spring 2008
Prerequisite:

E MCH 521 (ACS 521) Stress Waves in Solids (3) Recent advances in Ultrasonic Nondestructive Evaluation: waves; reflection and refraction; horizontal shear; multi-layer structures; stress; viscoelastic media; testing principles. Effective: Spring 1998
Prerequisite:

E MCH 523 Ultrasonic Nondestructive Evaluation (3) Methods, techniques, applications of Ultrasonic Nondestructive Evaluation wave propagation; signal processing and pattern recognition applied to UNDE; practical laboratory demonstrations. Effective: Spring 1998

E MCH 524A Mathematical Methods in Engineering (3) Special functions, boundary value problems, eigenfunctions and eigenvalue problems; applications to engineering systems in mechanics, vibrations, and other fields. Effective: Spring 1999
Prerequisite:

E MCH 524B Mathematical Methods in Engineering (3) Boundary-value problems in curvilinear coordinates, integral transforms; application to diffusion, vibration, Laplace and Helmholtz equations in engineering systems. Effective: Spring 1999
Prerequisite:

E MCH 524C Mathematical Methods in Engineering (3) Green's functions applied to problems in potentials, vibration, wave propagation and diffusion with special emphasis on asymptotic methods. Effective: Spring 1999
Prerequisite:

E MCH 527 Structural Dynamics (3) Dynamic behavior of structural systems; normal modes; input spectra; finite element representation of frameworks, plates, and shells; impedance; elastic-plastic response. Effective: Fall 2007
Prerequisite:

E MCH 528 Experimental Methods in Vibrations (3) Investigation of one or more degrees of freedom, free and forced mechanical vibrations, vibration properties of materials, nondestructive testing. Effective: Fall 2007
Prerequisite:

E MCH 530 Mechanical Behavior of Materials (3) Engineering materials mechanical responses; stress/strain in service context of temperature, time, chemical environment; mechanical testing characterization; design applications. Effective: Spring 1989

E MCH 531 Theory of Plasticity and Applications (3) Yield condition; plastic stress-strain relations; theory of slip-line fields; applications to bending, torsion, axially symmetric bodies, metal processing. Effective: Winter 1978
Prerequisite:

E MCH 532 Fracture Mechanics (3) Stress analysis of cracks; stable and unstable crack growth in structures and materials; materials fracture resistance.
Effective: Fall 1983
Prerequisite:

E MCH 533 Scanned Image Microscopy (3) Imaging principles, quantitative data acquisition techniques, and applications for scanned image microscopy are discussed.
Effective: Summer 2003
Prerequisite:

E MCH 534 (MATSE 563) Micromechanisms of Fracture (3) Mechanisms of fracture and their relationship to loading conditions, environment, flow behavior, processing history, and microstructure.
Effective: Spring 2003
Prerequisite:

E MCH 535 (MATSE 564) Deformation Mechanisms in Materials (3) Deformation of crystalline/amorphous solids and relationship to structure; elastic, viscoelastic and plastic response over a range of temperatures and strain rates.
Effective: Fall 2004
Prerequisite:

E MCH 536 Thermal Stress Analysis (3) Thermoelasticity, thermal shock, and design.
Effective: Summer 2013
Prerequisite:

E MCH 540 Introduction to Continuum Mechanics (3) Algebra and analysis of tensors; balance equations of classical physics; the linear theories of continuum mechanics.
Effective: Winter 1978

E MCH 546 Theory of Viscoelasticity and Applications (3) Linear and nonlinear viscoelastic theories; generalized isotropic and anisotropic viscoelastic stress-strain relations.
Effective: Winter 1978
Prerequisite:

E MCH 550 Variational and Energy Methods in Engineering (3) Application of variational calculus and Hamilton's principle to various conservative and nonconservative systems; closed form and approximate technique.
Effective: Spring 1984
Prerequisite:

E MCH 560 Finite Element Analysis (3) General theory; application to statics and dynamics of solids, structures, fluids, and heat flow; use of existing computer codes.
Effective: Spring 2008
Prerequisite:

E MCH 562 (A B E 562) Boundary Element Analysis (3) Numerical solution of boundary value problems using fundamental solutions; application to problems in potential theory, diffusion, and elastostatics.
Effective: Spring 1996
Prerequisite:

E MCH 563 (M E 563) Nonlinear Finite Elements (3) Advanced theory of semidiscrete formulations for continua and structures; emphasizes dynamic and nonlinear problems.
Effective: Spring 1996
Prerequisite:

E MCH 571 (AERSP 571, M E 571) Foundations of Structural Dynamics and Vibration (3) Modeling approaches and analysis methods of structural dynamics and vibration.
Effective: Fall 2007
Prerequisite:

E MCH 581 Micromechanics of Composites (3) A rigorous application of mechanics to the understanding of relationships between microstructure and thermomechanical properties of composites.
Effective: Summer 2011
Prerequisite:

E MCH 582 Metal Matrix Composites (3) Processing and properties of metal matrix composites, with emphasis on fabrication techniques, interfaces, fatigue, fracture, and micromechanics.
Effective: Fall 1988
Prerequisite:

E MCH 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1996

E MCH 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

E MCH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987
E MCH 597F Multifunctional Materials and Structures (3) "Smart Materials" for adaptive configurations related to multifunctional structures with actuation and sensing capabilities; piezoelectric materials, shape-memory alloys (SMA), and electro- and magneto-theological (ER, MR) fluids; concepts of continuum mechanics, micro-mechanics, and thermodynamics to develop constitutive relationships to model mentioned structures; active systems for different regimes, and explores basic design features, fabrication and testing techniques of representative smart material configurations.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

E MCH 600 Thesis Research (1-15) No description.
Effective: Fall 1983

E MCH 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

E MCH 602 (E SC 602) Supervised Experience in College Teaching (1-3 per semester/maximum of 6) No description.
Effective: Fall 2003

Effective: Fall 1983

E MCH 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Engineering Mgmt (ENGMT)

ENGMT 501 Engineering Management Science (3) Mathematical models involving optimization, simulation and forecasting to provide quantitative solutions to engineering management problems; scheduling, distribution, inventory control.
Effective: Summer 2009

ENGMT 510 Economics and Financial Studies for Engineers (3) Economic feasibility of projects, systems and products. Project budgets, estimation, return on investment, supply and demand, and earned value management.
Effective: Summer 2009

ENGMT 511 Engineering for Energy and the Environment (3) Engineering analysis of new technologies with environmental consideration leading to alternative energy sources and sustainable development.
Effective: Summer 2013

ENGMT 530 Engineering Law (3) Overview of the legal system and legal issues applied to engineering: contracts, bidding, proposals, torts, professional liability, the intellectual property.
Effective: Summer 2009

ENGMT 539 Engineering Management Strategy (3) Project- and discussion-based capstone to the engineering management program.
Effective: Summer 2009
Prerequisite:

ENGMT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2011

Last Import from UCM: May 24, 2014 3:00 AM
Engineering Science (E SC)

E SC 400H Electromagnetic Fields (3) Irrotational and solenoidal fields, potentials, vector and scalar field and wave equations, harmonic and wave functions in various coordinates, radiation.
Effective: Fall 2003
Prerequisite:

E SC 404H Analysis in Engineering Science (3) Unified application of coordinate transformations; Laplace’s, heat, and wave equations to boundary value problems and problems of continua in engineering.
Effective: Spring 2001
Prerequisite:

Effective: Fall 1983
Prerequisite:

Effective: Spring 2007
Prerequisite: Concurrent: MATH 220

E SC 409H Senior Research and Design Project Preparation, Honors (1) Preliminary identification and planning for the senior year research and design project.
Effective: Summer 2014
Prerequisite:

E SC 410H Senior Design Project, Honors (3) Design and synthesis in the context of a specific design project undertaken during the senior year.
Effective: Summer 1998 Ending: Summer 2014
Prerequisite:

E SC 410H Senior Research and Design Project I, Honors (3) Design and synthesis in the context of a specific design project undertaken during the senior year.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

E SC 411H Senior Research and Design Project II, Honors (3) Design and synthesis in the context of a specific design project undertaken during the senior year.
Effective: Spring 2007 Ending: Summer 2014
Prerequisite:

E SC 411H Senior Research and Design Project II, Honors (2) Design and synthesis in the context of a specific design project undertaken during the senior year.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

E SC 414M Elements of Material Engineering (3) Structure and imperfections in engineered materials; their influence on properties, behavior, and processing. Applications of metals, ceramics, polymers, and composites.
Effective: Spring 2008
Prerequisite:

E SC 417 (MATSE 417) Electrical and Magnetic Properties (3) Electrical conductivity, dielectric properties, piezoelectric and ferroelectric phenomena; magnetic properties of ceramics.
Effective: Summer 2006 Ending: Fall 2014
Prerequisite:

E SC 417 (MATSE 417) Electrical and Magnetic Properties (3) Electrical conductivity, dielectric properties, piezoelectric and ferroelectric phenomena; magnetic properties of ceramics.
Effective: Spring 2015 Future: Spring 2015
Prerequisite: Concurrent: MATSE 402

E SC 419 Electronic Properties and Applications of Materials (3) The course covers the electrical, optoelectronic, dielectric, and other electron-based properties of solids, semiconductors in particular, and their engineering/device applications.
Effective: Summer 2006
Prerequisite:

E SC 433H Engineering Science Research Laboratory Experience (1) Hands-on lab experience and exposure to campus-wide interdisciplinary experimental research. Experimental probability and statistics. Applications across all Engineering Science disciplines.
Effective: Spring 2007
Prerequisite:

E SC 445 Semiconductor Optoelectronic Devices (3) The course will present the basic engineering science and technology involved in modern semiconductor optoelectronic devices.
Effective: Spring 2007
Prerequisite:

E SC 450 (MATSE 450) Synthesis and Processing of Electronic and Photonic Materials (3) The materials science of applying thin film coatings, etching, and bulk crystal growth; includes materials transport, accumulation, epitaxy, and defects.
Effective: Fall 2005
Prerequisite:

E SC 455 Electrochemical Methods Engineering and Corrosion Science (3) The objective of the course is to give students hands-on experience in assessing environmental degradation of engineering materials.
Effective: Fall 2013
Prerequisite:

E SC 456 (E E 456, EGEE 456) Introduction to Neural Networks (3) Artificial Neural Networks as a solving tool for difficult problems for which conventional methods are not available.
Effective: Spring 2008
Prerequisite:

E SC 475 (MATSE 475) Particulate Materials Processing (3) Fundamentals of processing particulate materials including production, characterization, handling, compaction, and sintering of metal, carbide, intermetallic, and composite powders.
Effective: Spring 2008
Prerequisite:

E SC 475 (MATSE 475) Particulate Materials Processing (3) Fundamentals of processing particulate materials including production, characterization, handling, compaction, and sintering of metal, carbide, intermetallic, and composite powders.
Effective: Spring 2008
Prerequisite:

E SC 481 Elements of Nano/Micro-electromechanical Systems Processing and Design (3) Interdisciplinary fundamentals of nano/microelectromechanical systems (NEMS/ MEMS), including design, fabrication and machining of miniature systems. Draws from mechanics, science and materials.
Effective: Spring 2008
Prerequisite:

E SC 482 Micro-Optoelectromechanical Systems (MOEMS) and Nanophotonics (3) Principles and applications of Micro-Optoelectromechanical and Nanophotonic devices and systems.
Effective: Summer 2006
Prerequisite:

E SC 483 (MATSE 483) Simulation and Design of Nanostructures (3) Introduction to computer simulation techniques and their applications at the physical/life sciences interface.
Effective: Fall 2007
Prerequisite:

E SC 484 Biologically Inspired Nanomaterials (3) Advances in biomolecular-based Science and technology at the physical/life sciences interface.
Effective: Summer 2006
Prerequisite:

E SC 494 Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.
Effective: Summer 1986

Effective: Fall 2007

E SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

E SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

E SC 497A Business Opportunities in Engineering and Independent Study (3) The principal goal of this course is to inform engineering students of business opportunities in Engineering.
Effective: Summer 2014 Ending: Summer 2014

E SC 497A Multidisciplinary Design (3) Multidisciplinary teams engage students from other departments to provide a broad perspective typical of real-life experiences.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

E SC 497B Business Opportunities in Engineering (2) The principal goal of this course is to inform engineering students of business opportunities in Engineering.
Effective: Summer 2014 Ending: Summer 2014

The Pennsylvania State University
Effective: Fall 2013
Prerequisite:

E SC 502 Semiconductor Heterojunctions and Applications (3) Theory, fabrication techniques, and electronic applications of semiconductor heterojunctions, including metal-semiconductor and electrolyte-semiconductor junctions.

Effective: Fall 1989
Prerequisite:

E SC 511 Engineering Materials for Energy Conversion and Storage (3) This course treats engineering materials and systems employed in conventional and unconventional direct energy conversion and energy storage.

Effective: Summer 1981

E SC 514 (E MCH 514) Engineering Science and Mechanics Seminar (1 per semester) Current literature and special problems in engineering mechanics.

Effective: Summer 1998

E SC 536 Wave Propagation and Scattering (4) Survey of analytical and numerical methods for solving acoustic, electromagnetic and elastic wave propagation and scattering problems.

Effective: Spring 1988
Prerequisite:

E SC 537 Multiple Scattering Theories and Dynamic Properties of Composite Materials (3) Acoustic, dielectric, elastic dynamic properties; periodic, random composites; wave propagation and scattering; attenuation, dispersion; superviscous absorption; sonar, optical, ultrasonic applications.

Effective: Summer 1988

E SC 540 Laser Optics Fundamentals (3) Selected topics in optics and laser physics, and their application in laser-materials processing.

Effective: Spring 2005

E SC 541 Laser-Materials Interactions (3) Laser beam interactions with metallic, ceramic, polymeric and biological materials; effects of wavelength, power, spatial and temporal distributions of intensity.

Effective: Spring 2005

E SC 542 Laser-Integrated Manufacturing (3) Integration of lasers into manufacturing processes: laser-assisted surface modifications; laser joining; laser-based material shaping processes.

Effective: Fall 2013
Prerequisite:

Effective: Fall 2013
Prerequisite:

E SC 544 Laser Laboratory (3) Laser systems for materials processing, safety, critical processing parameters, diagnostic measurements, automation, sensing and control.

Effective: Fall 2013
Prerequisite:

E SC 577 Engineered Thin Films (3) Broad overview of the preparation-characterization-property relations for thin films used in a wide range of industrial applications.

Effective: Spring 1993
Prerequisite:

E SC 581 Microelectromechanical Systems/Smart Structures (3) Methods of micromachining, smart structure fabrication. Design, modeling for physical, chemical, biomedical microsensors/actuators. Smart structures and microsystems packaging/integration.

Effective: Spring 1998
Prerequisite:

E SC 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Fall 1996

E SC 596 Individual Studies (1-9) Creative projects, including nnonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

E SC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Spring 1987

E SC 597A Neural Engineering: Fundamentals of Interfacing with Brain (3) The course will describe the biophysical basis
of neural function, the origin of measurable signals, electrical interactions used for neural stimulation.

**Prerequisite:**

Effective: Fall 1983

E SC 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

E SC 602 (E MCH 602) **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description.
Effective: Fall 2003

E SC 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

E SC 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
English (ENGL)

ENGL 400 Authors, Texts, Contexts (3 per semester, maximum of 6) Styles, cultural milieus, critical perspectives toward particular English-language authors and/or movements they represent, and the idea of authorship. (Section subtitles may appear in the Schedule of Courses.) Effective: Fall 1997  
Prerequisite:  

ENGL 401 Studies in Genre (3 per semester, maximum of 6) English-language texts exemplifying particular genres, with attention to critical theories, historical development, rhetorical strategies, and social, cultural, and aesthetic values. (Section subtitles may appear in the Schedule of Courses.) Effective: Fall 1997  
Prerequisite:  

ENGL 401W Creative Writing Theory (3) Theories of art and creativity which inform the making of literary works. Effective: Fall 2007  
Prerequisite:  

ENGL 402 Literature and Society (3 per semester, maximum of 6) Texts confronting social, political, technological, or other issues in the English-speaking world. (Section subtitles may appear in the Schedule of Courses.) Effective: Fall 1997  
Prerequisite:  

ENGL 403 Literature and Culture (3 per semester, maximum of 6) Historical, theoretical, and practical issues within cultural studies in relation to English-speaking texts. (Section subtitles may appear in the Schedule of Courses.) Effective: Fall 1997  
Prerequisite:  

ENGL 404 Mapping Identity, Difference, and Place (3 per semester, maximum of 6) Ethnicity, gender, class, race with reference to theoretical inquiry into identity, difference, and place in English-language literatures. (Section subtitles may appear in the Schedule of Courses.) Effective: Fall 1997  
Prerequisite:  

ENGL 405 Taking Shakespeare From Page to Stage (3) Students experience a Shakespeare play as a text to be explicated and as a script to be performed. Effective: Summer 2003  
Prerequisite:  

ENGL 407 History of the English Language (3) Historical and structural study of developments in English sounds, forms, inflections, syntax, derivations, and meanings. Effective: Spring 1987  
Prerequisite:  

ENGL 409 Composition Theory and Practice for Teachers (3) An overview of the theory and practice of writing for teachers, with emphasis on the writing process. Effective: Summer 2000  
Prerequisite: Concurrent: EDUC 452  

ENGL 412 Advanced Fiction Writing (3 per semester/maximum of 6) Advanced study of the techniques of fiction writing; regular practice in writing the short story; group discussion of student work. Effective: Spring 1992  
Prerequisite:  

ENGL 413 Advanced Poetry Writing (3 per semester/maximum of 6) Advanced study of the techniques of poetic composition; regular practice in writing poetry; group discussion of student work. Effective: Fall 2013  
Prerequisite:  

ENGL 414 Biographical Writing (3) Writing of biography and autobiography, character sketches, "profiles," and literary portraits; analysis and interpretations of source materials. Effective: Spring 1987  
Prerequisite:  

ENGL 415 Advanced Nonfiction Writing (3 per semester/maximum of 6) Advanced study of the principles of nonfiction; substantial practice in writing and submitting magazine articles for publication. Effective: Spring 1992  
Prerequisite:  

ENGL 416 Science Writing (3 per semester/maximum of 6) Prepares scientists and writers to gather, interpret, and present scientific information to the layman with clarity and accuracy. Effective: Spring 2001  
Prerequisite:  

ENGL 417 The Editorial Process (3) The process of editing from typescript through final proof. Effective: Summer 2011  
Prerequisite:
ENGL 418 **Advanced Technical Writing and Editing** (3 per semester/maximum of 6) Preparing and editing professional papers for subject specialists and for others interested in careers as writers or editors.
Effective: Fall 1987
Prerequisite:

ENGL 419 **Advanced Business Writing** (3) Preparing and editing reports and presentations common to business, industry, and government.
Effective: Fall 1987
Prerequisite:

ENGL 420 **Writing for the Web** (3) Analysis and composition of informative, persuasive, and “creative” Web texts, based on rhetorical principles; no prior Web writing experience required.
Effective: Spring 2002
Prerequisite:

ENGL 421 **Advanced Expository Writing** (3) Develops skill in writing expository essays, with particular attention to style. Intended for liberal arts majors.
Effective: Spring 1987
Prerequisite:

ENGL 422 **Fiction Workshop** (3 per semester/maximum of 6) Practice and criticism in the composition of the short story and the novel.
Effective: Spring 1985
Prerequisite:

ENGL 423 **Poetry Writing Workshop** (3 per semester/maximum of 6) Extensive practice in writing poetry; consideration of contemporary poetic forms; selected readings.
Effective: Spring 1985
Prerequisite:

ENGL 424 (ENVST 424) **Creative Writing and the Natural World** (3) Creative writing workshop focused on the environment and related issues.
Effective: Summer 2011
Prerequisite:

ENGL 425 **Nonfiction Workshop** (3 per semester/maximum of 6) Extensive writing of nonfiction for publication; an introduction to the principles of writing the nonfiction book.
Effective: Spring 1985
Prerequisite:

ENGL 426 (US) (LTNST 426) **Chicana and Chicano Cultural Production: Literature, Film, Music** (3) An in-depth study of Chicana/Chicano literature, film, and music from the inception of the Chicano Movement (1965-1975) to the present.
Effective: Spring 2007
Prerequisite:

ENGL 427 (J ST 427) **Topics in Jewish American Literature** (3 per semester/maximum of 9) An in-depth examination of important themes, writers, and/or historical developments in Jewish Literature of the United States.
Effective: Spring 2014 Ending: Summer 2014
Prerequisite:

ENGL 427 (J ST 427) **Topics in Jewish American Literature** (3 per semester/maximum of 9) An in-depth examination of important themes, writers, and/or historical developments in Jewish Literature of the United States.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

ENGL 428 (US) (AAS 428) **Asian American Literatures** (3 per semester/maximum of 6) A seminar on the literatures and cultures of Asian America, with attention to forms of geographic, historical, and ethnic diversity.
Effective: Summer 2010

ENGL 429 (CMLIT 429) **New Media and Literature** (3) New media literary genres; critical discussion of creative works in digital media.
Effective: Summer 2010

ENGL 430 **The American Renaissance** (3) Studies in the works and the interrelationships of writers such as Emerson, Hawthorne, Poe, Thoreau, Whitman, Melville, and Dickinson.
Effective: Spring 1995
Prerequisite:

ENGL 431 (US) (AM ST 475) **Black American Writers** (3 per semester, maximum of 6) A particular genre or historical period in the development of Black American literature.
Effective: Fall 2007
Prerequisite:

ENGL 432 **The American Novel to 1900** (3) Such writers as Hawthorne, Melville, Stowe, Mark Twain, James, Crane, Chopin, and others.
Effective: Spring 1992
Prerequisite:

ENGL 433 **The American Novel: 1900-1945** (3) Such writers as Wharton, Dreiser, Cather, Fitzgerald, Faulkner,
Hemingway, Hurston, Wright, and others.

Effective: Spring 1992
Prerequisite:

ENGL 434 (AM ST 472) Topics in American Literature (3 per semester) Focused study of a particular genre, theme, or problem in American literature. (May be repeated for credit.)
Effective: Fall 2007
Prerequisite:

ENGL 435 The American Short Story (3) Development of the short story as a recognized art form, with emphasis on major writers.
Effective: Spring 1984
Prerequisite:

ENGL 436 American Fiction Since 1945 (3) Representative fiction by such writers as Barth, Bellow, Ellison, Heller, Mailer, Morrison, Nabokov, Oates, O'Connor, Pynchon, Updike, Walker.
Effective: Spring 1992
Prerequisite:

ENGL 437 The Poet in America (3) American poets such as Bradstreet, Taylor, Poe, Emerson, Whitman, Dickinson, Frost, Eliot, Stevens, Hughes, Brooks, Moore, Williams, Plath, Rich, Lowell.
Effective: Spring 1992
Prerequisite:

ENGL 438 American Drama (3) Development from the colonial period to playwrights such as O'Neill, Wilder, Hellman, Miller, Williams, Albee, Shepard, Norman, Wilson, and others.
Effective: Spring 1992
Prerequisite:

ENGL 439 American Nonfiction Prose (3) Major prose writers such as Franklin, Emerson, Thoreau, Fuller, Henry Adams, Mailer, Baldwin, McCarthy, Dillard, Didion, Angelou, and others.
Effective: Spring 1992
Prerequisite:

ENGL 440 Studies in Shakespeare (3) Intensive study of a single genre, topic, or critical approach to selected plays.
Effective: Summer 1991
Prerequisite:

ENGL 441 Chaucer (3) The principal narrative poems and their background.
Effective: Spring 1984
Prerequisite:

ENGL 442 Medieval English Literature (3) Study of major works and genres of medieval English literature, exclusive of Chaucer.
Effective: Spring 1992
Prerequisite:

ENGL 443 The English Renaissance (3) Such writers as More, Sidney, Spenser, Shakespeare, Donne, Jonson, Bacon, and Marvell.
Effective: Spring 1984
Prerequisite:

ENGL 444 Shakespeare (3) Selected tragedies, comedies, and histories.
Effective: Spring 1984
Prerequisite:

ENGL 445 Shakespeare's Contemporaries (3) Selected plays by Shakespeare's major predecessors and contemporaries: Kyd, Marlowe, Jonson, Webster, Marston, Middleton, and others.
Effective: Spring 1984
Prerequisite:

ENGL 446 Milton (3) Analysis of principal poems and their background.
Effective: Spring 1984
Prerequisite:

Effective: Spring 1995
Prerequisite:

ENGL 448 The English Novel to Jane Austen (3) Novelists such as Defoe, Richardson, Fielding, Smollett, Sterne, and Austen.
Effective: Spring 1995
Prerequisite:

ENGL 450 The Romantics (3) Poets such as Blake, Wordsworth, Coleridge, Keats, Shelley, and Byron; also prose by writers such as Hazlitt, Lamb, and DeQuincey.
Effective: Spring 1995
Prerequisite:

ENGL 451 Literary Modernism in English (3) Survey of literary modernism in English and English translation in a variety
of genres, including poetry, fiction, and drama.
Effective: Fall 2007
Prerequisite:
ENGL 452 The Victorians (3) Poets such as Tennyson, Browning, Arnold, and Hopkins; also prose by writers such as Carlyle, Mill, Ruskin, and Arnold.
Effective: Spring 1995
Prerequisite:
ENGL 453 Victorian Novel (3) Novelists such as the Brontes, Thackeray, Dickens, George Eliot, Meredith, and Hardy.
Effective: Spring 1995
Prerequisite:
ENGL 454 Modern British and Irish Drama (3) From Wilde and Shaw to the present season.
Effective: Fall 2004
Prerequisite:
ENGL 455 Topics in British Literature (3) Focused study of a particular genre, theme, or problem in British literature. (May be repeated for credit.)
Effective: Fall 2001
Prerequisite:
ENGL 456 British Fiction, 1900-1945 (3) Major writers such as Conrad, Lawrence, Mansfield, Forster, Joyce, Woolf, Waugh, Greene, Bowen, Beckett, and others.
Effective: Spring 1995
Prerequisite:
ENGL 457 British Fiction Since 1945 (3) Readings in British fiction since World War II.
Effective: Spring 1995
Prerequisite:
ENGL 458 Twentieth-Century Poetry (3) Poets writing in English such as Yeats, Pound, Eliot, Frost, Auden, Stevens, Plath, Bishop, Brooks, H.D., and others.
Effective: Spring 1995
Prerequisite:
ENGL 461 (US) The Vernacular Roots of African American Literature (3) The relationship between oral tradition and literary texts and the double consciousness of African American voice in "print."
Effective: Summer 2005
Prerequisite:
ENGL 462 (US) (WMNST 462) Reading Black, Reading Feminist (3) Female identity and its construction in textual representations of gender, class, color, and cultural difference in English-language literatures.
Effective: Summer 2005
Prerequisite:
Effective: Summer 2005
Prerequisite:
ENGL 466 (US) African American Novel I (3) Thematic, structural, and stylistic characteristics of the African American novel from residually oral forms to satiric realism.
Effective: Summer 2005
Prerequisite:
ENGL 467 (US) African American Novel II (3) Thematic, stylistic, and structural characteristics of the African American novel from naturalism to modernism and postmodernism.
Effective: Summer 2005
Prerequisite:
ENGL 468 (US) African American Poetry (3) African American poetry within the contexts of the black oral tradition and transformed European literary tradition.
Effective: Summer 2005
Prerequisite:
ENGL 469 (US) (AF AM 469) Slavery and the Literary Imagination (3) The impact of slavery on the petitions, poetry, slave narratives, autobiographies, and novels of African Americans.
Effective: Fall 2012
Prerequisite:
ENGL 470 Rhetorical Theory and Practice (3) Application of certain rhetorical principles to problems in composition. Writing exercise. Designed as preparation for the teaching of composition.
Effective: Spring 1995
Prerequisite:
ENGL 471 Rhetorical Traditions (3 per semester, maximum of 6) Introduces major traditions of rhetorical inquiry and their relevance for English studies. (Section subtitles may appear in the Schedule of Courses.)
Effective: Fall 1997
Prerequisite:
ENGL 472 **Current Theories of Writing and Reading** (3 per semester, maximum of 6) Investigates models of textual production and reception current within English studies. (Section subtitles may appear in the Schedule of Courses.)
Effective: Fall 1997
Prerequisite:

ENGL 473 **Rhetorical Approaches to Discourse** (3 per semester, maximum of 6) Practices the criticism of written texts from selected rhetorical perspectives. (Section subtitles may appear in the Schedule of Courses.)
Effective: Fall 1997
Prerequisite:

ENGL 474 **Issues in Rhetoric and Composition** (3 per semester, maximum of 6) Examines selected topics in the field of rhetoric and composition. (Section subtitles may appear in the Schedule of Courses.)
Effective: Fall 1997
Prerequisite:

ENGL 477 **Teaching Children’s Literature** (3) Teaching Children’s Literature in light of recent literary pedagogy, the history of childhood, and critical approaches to Children’s Literature.
Effective: Fall 2007
Prerequisite:

ENGL 479 **Business or Technical Writing Practicum** (1-3) Practical experience applying business or technical writing principles, working with advanced business, science, or engineering students on classroom projects.
Effective: Fall 2007
Prerequisite:

ENGL 480 **Communication Design for Writers** (3) This course explores visual design, non-verbal communication, and software packages used in professional settings to most effectively present written communications.
Effective: Summer 2005
Prerequisite:

ENGL 481 **Literary Theory: Historical Perspectives** (3) Selected topics in the history of literary criticism and theory within the English-language tradition.
Effective: Summer 1994
Prerequisite:

ENGL 482 **Contemporary Literary Theory and Practice** (3 per semester, maximum of 6) Contemporary literary theories and their implication for critical practice as applied to British, American, and other English-language literary works.
Effective: Summer 1992
Prerequisite:

ENGL 482W **Contemporary Literary and Cultural Theory** (3) Contemporary literary and cultural theories and their implication for critical practice as applies to a variety of texts, e.g. literary, linguistic, visual, multimedia, and/or popular.
Effective: Fall 2007
Prerequisite:

ENGL 483 **Problems in Critical Theory and Practice** (3) Intensive study of one or more recent theoretical approaches as applied to British, American, and other English-language literary works.
Effective: Summer 1994
Prerequisite:

ENGL 484 **James Joyce** (3) Analysis of principal works and their background.
Effective: Fall 2007
Prerequisite:

ENGL 485 **Australian and New Zealand Literature and Culture** (3) Questions of nationality, identity, gender, race, class, colonialism, and postcolonialism in these literatures.
Effective: Summer 1995
Prerequisite:

ENGL 486 (IL) **The World Novel in English** (3) Studies in the novel, written in English, by writers outside of the United States and Great Britain.
Effective: Fall 2007
Prerequisite:

ENGL 487W **Senior Seminar** (3) Issues, themes, periods, critical theories, etc., that invite students to use prior English studies, limited to seniors majoring in English.
Effective: Summer 1997
Prerequisite:

ENGL 488 (IL) (CMLIT 488) **Modern Continental Drama** (3) From Ibsen to the drama of today: Strindberg, Chekhov, Hauptmann, Pirandello, Ionesco, Beckett, Genet, and others.
Effective: Spring 2006
Prerequisite:

ENGL 489 (WMNST 489) **British Women Writers** (3) A study of selected British women writers.
Effective: Spring 2008
Prerequisite:

ENGL 490 (US;IL) (WMNST 490) **Women Writers and Their Worlds** (3) American and British literature written from the perspective of women.
Effective: Summer 2005
Prerequisite:

ENGL 491 **The Capstone Course in Professional Writing** (3) This culminating course for Professional Writing majors concentrates on reflective analyses, design, and presentation of documents in the development of professional portfolios. Effective: Summer 2004

Prerequisite:

ENGL 492 (AM ST 476, WMNST 491) **American Women Writers** (3) A study of selected American women writers. Effective: Spring 2008

Prerequisite:

ENGL 493 (AM ST 493) **The Folktale in American Literature** (3) A survey of the literary uses of the folktale and legendary materials, with particular concentration on the literature of America. Effective: Spring 1986

Prerequisite:

ENGL 494 **Senior Thesis in English** (1-6) Senior English (ELISH) majors write a thesis arranged with in-charge person and submit it to a faculty committee for appraisal. Effective: Fall 2007

Prerequisite:

ENGL 494H **Senior Thesis in English** (1-6) Senior English (ELISH) majors write a thesis arranged with in-charge person and submit it to a faculty committee for appraisal. Effective: Fall 2007

Prerequisite:

ENGL 495 **Internship** (3-12) Supervised practicum in fields appropriate to the English major. Effective: Spring 2001

ENGL 496 **Independent Studies** (1-18) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

ENGL 496H **Creative Fiction** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ENGL 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

ENGL 497A **Words and Images: Artists and Writers Collaborate** (3) Students consider the artist's book as a form and locate it within the context of contemporary writing and visual art. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ENGL 497B **London Calling: Ordering the World - The Trip** (0.5) This course will take students on an 8-day exploration of London and surrounding areas. Students will be expected to attend all scheduled visits and to act as responsible representatives of Penn State Altoona while abroad. Students will also be asked to compose short writings during the trip that respond to our site visits and to write a final evaluative paper after the trip. Effective: Summer 2014 Ending: Summer 2014

ENGL 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

ENGL 499 (IL) **Foreign Study--English** (3-6) Studies abroad in English language and/or literature. Effective: Summer 2005

ENGL 501 **Materials and Methods of Research** (3) Materials and techniques of research in English and American literary history; form and content of these. Required of all graduate students with an English major. Effective: Fall 1983

ENGL 502 **Theory and Teaching of Composition** (3) Study of grammar, logic, rhetoric, and style in their applicability to teaching composition. Effective: Winter 1978

ENGL 503 (LL ED 503) **Research Methods in Composition** (3) Introduction to the issues and methods of empirical research in composition. Effective: Fall 1993
ENGL 504 Rhetoric and Poetics (3) Historical relations between rhetorical theory and poetics; approaches to rhetorical criticism of poetic discourse.
Effective: Summer 1995

ENGL 506 The English Language (3) A problem-centered approach to literary and oral forms of English, utilizing historical and analytic perspectives.
Effective: Winter 1978

ENGL 507 English Composition Studies (3) An overview of composition studies, with particular attention to the schools of writing pedagogy.
Effective: Spring 2001
Prerequisite:
ENGL 510 Scholarly Editing: Theory and Practice (3) Study of editorial theory from McKerrow and Greg to the present; experience in scholarly editing and manuscript study.
Effective: Fall 1989
Prerequisite:
ENGL 511 Thesis Workshop and Professional Writing (3) Professional writing for graduate students.
Effective: Summer 2008

ENGL 512 The Writing of Fiction (3 per semester/maximum of 15) Supervised workshop in advanced techniques of writing fiction.
Effective: Fall 1996

ENGL 513 The Writing of Poetry (3 per semester/maximum of 15) For the student with considerable experience in writing poetry; a workshop devoted to advanced poetic technique.
Effective: Fall 1996

ENGL 515 The Writing of Nonfiction (3 per semester/maximum of 15) Supervised workshop in advanced nonfiction techniques.
Effective: Fall 1996

ENGL 521 Old English Language (3) An introduction to the main features of the Old English language; readings in simple Old English prose and poetry.
Effective: Winter 1978

ENGL 522 Beowulf (3) Reading and critical analysis.
Effective: Winter 1978
Prerequisite:
ENGL 530 The Literature of Biography and Autobiography (1-3 per semester, maximum of 6) Study of biographical and autobiographical theory and practice through analysis of major English and American works in each genre.
Effective: Spring 1992

ENGL 540 Studies in Elizabethan Prose and Poetry (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include figures such as Spenser and Sidney.
Effective: Summer 1997

ENGL 541 Medieval Studies (1-3 per semester, maximum of 12) Studies in medieval English literature. Topics studied might include medieval romances, drama, or major figures aside from Chaucer.
Effective: Summer 1997

ENGL 543 Studies in Early Seventeenth-Century Literature (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Donne, Herbert, Jonson, Bacon.
Effective: Summer 1997

ENGL 545 Chaucer (1-3 per semester, maximum of 12) Major and minor works of Geoffrey Chaucer. The works studied will vary from year to year.
Effective: Summer 1997

ENGL 546 Milton (3) The poetry and prose of John Milton.
Effective: Winter 1978

ENGL 548 Elizabethan and Jacobean Drama (1-3 per semester, maximum of 12) English drama from 1558 to 1642, exclusive of Shakespeare.
Effective: Summer 1997

The Pennsylvania State University
ENGL 549 Shakespeare (1-3 per semester, maximum of 12) Special problems of sources, chronology, text, characterization, and motivation in the drama.
Effective: Summer 1997

ENGL 550 English Literature 1660-1800 (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Dryden, Swift, Pope, Johnson, Fielding, Gibbon.
Effective: Summer 1997

ENGL 553 Literacy Studies (3) An overview of current research on literacy, with particular attention to language, thought, and learning and their applications to writing.
Effective: Spring 2001
Prerequisite:

ENGL 554 Studies in Early American Literature (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Bradstreet, Taylor, Mather, Franklin, Edwards, Paine.
Effective: Summer 1997

ENGL 558 Nineteenth-Century British Fiction (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Dickens, Thackeray, the Brontes, George Eliot, Hardy.
Effective: Summer 1997

ENGL 560 American Romanticism (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Hawthorne, Melville, Emerson, Thoreau, Whitman.
Effective: Summer 1997

ENGL 561 Studies in the Romantic Movement (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Blake, Wordsworth, Coleridge, Byron, Shelley, Keats.
Effective: Summer 1997

ENGL 562 Studies in the Literature of Victorian England (1-3 per semester, maximum of 12) Figures will vary from year to year. Writers studied might include Tennyson, Browning, Arnold, Newman, Ruskin, Trollope.
Effective: Summer 1997

ENGL 564 Studies in Nineteenth-Century American Literature (1-3 per semester, maximum of 12) Writers will vary from year to year. Writers studied might include Cooper, Poe, Dickinson, Twain, James.
Effective: Summer 1997

ENGL 565 Period Studies in African-American Literature (3 per semester/maximum of 9) Studies of periods in African-American literature. Periods might include the Harlem Renaissance or the Black Arts Movement.
Effective: Spring 1998

ENGL 566 Genre Studies in African-American Literature (3 per semester/maximum of 9) Genre will vary from year to year, but will include categories such as poetry, fiction, essays, sermons, autobiographies, short stories.
Effective: Spring 1998

ENGL 567 Thematic Studies in African-American Literature (3 per semester/maximum of 9) Exploration of key concepts in African-American culture as manifested in various literary discourses.
Effective: Spring 1998

ENGL 568 Gender Issues in African-American Literature (3 per semester/maximum of 9) Gender issues in African-American literature and culture. Issues may include the Black woman writer or Gay and Lesbian writers.
Effective: Spring 1998

ENGL 570 The Writer as Critic: Reviewing Contemporary Poetry, Fiction, and Non-Fiction (3) Students will write and revise book reviews of poetry, fiction, and non-fiction for a variety of newspapers and literary magazines.
Effective: Summer 2002

ENGL 571 Writer in the Community (3) Students study the theory and practice of creative writing pedagogy in non-university settings.
Effective: Summer 2009

ENGL 573 Studies in Twentieth-Century British Literature (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Yeats, Conrad, Joyce, Shaw, Lawrence, Auden.
Effective: Summer 1997

The Pennsylvania State University
ENGL 574 Studies in Twentieth-Century American Literature (1-3 per semester, maximum of 12) Figures studied will vary from year to year. Writers studied might include Dreiser, Wharton, Eliot, Hemingway, Fitzgerald, Faulkner, O'Neill, Williams.
Effective: Summer 1997

ENGL 575 Experimentation and Modernism in Twentieth-Century British and American Fiction (1-3 per semester, maximum of 12) Figures studied will be drawn from the era of Joyce and Virginia Woolf to the present.
Effective: Summer 1997

ENGL 576 Studies in Twentieth-Century American Fiction (1-3 per semester, maximum of 12) Concentrated study in such major American writers as Hemingway, Faulkner, and Fitzgerald.
Effective: Summer 1997

ENGL 577 Contemporary Fiction (1-3 per semester, maximum of 12) Exploration of contemporary English language fiction.
Effective: Summer 1997

ENGL 578 Survey of Contemporary Literary Theory (3) Exploration of the dimensions of discourse as reflected in recent theories of rhetoric, poetics, and literary criticism.
Effective: Summer 1990

ENGL 579 Studies in Critical Theory (1-3 per semester/maximum of 12) Study of specific contemporary critical approaches to literature and application to English and/or American literary works.
Effective: Summer 1997

ENGL 580 Studies in Rhetoric (1-3 per semester/maximum of 12) Specific rhetorical problems, issues, or figures; topics will change from year to year.
Effective: Summer 1997

ENGL 581 Studies in British Fiction (1-3 per semester, maximum of 6) No description.
Effective: Spring 1988

ENGL 582 Readings in Literature (1-12) Programs of readings designed to meet specific needs of individual students.
Effective: Winter 1978

ENGL 583 Studies in American Fiction (1-3 per semester, maximum of 12) No description.
Effective: Summer 1997

ENGL 584 Studies in American Poetry (1-3 per semester, maximum of 12) No description.
Effective: Summer 1997

ENGL 585 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1996

ENGL 586 Individual Studies (1-12) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2009

ENGL 587 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

ENGL 587A Reading Beyond Race (3) We read contemporary Ethnic American literature by considering how authors challenge the conventions of racial, ethnic, and cultural representation. term.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ENGL 587B Media Theory and Modernity (3) A close and careful reading of major works of media theory understood as a branch of modernity theory.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ENGL 587C Remapping the Time/Space of American Literature: Regionalism, Modernism, and Transnationalism (3) Focuses on the interdynamic relations between US and Caribbean literary regionalisms and modernisms from the mid-nineteenth to the mid-twentieth centuries.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
ENGL 600 **Thesis Research** (1-15) No description.  
Effective: Fall 1983

ENGL 601 **Ph.D. Dissertation Full-Time** (0) No description.  
Effective: Fall 1983

ENGL 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.  
Effective: Fall 1983

ENGL 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.  
Effective: Spring 2000

ENGL 610 **Thesis Research Off Campus** (1-15) No description.  
Effective: Fall 1983

ENGL 611 **Ph.D. Dissertation Part-Time** (0) No description.  
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Enterprise Architecture (EA)

Effective: Spring 2013

EA 871 **Enterprise Architecture Foundations I** (3) Theoretical foundations and practice of enterprise architecture.
Effective: Fall 2012

EA 872 **Enterprise Architecture Foundations II** (3) Develops additional capabilities for justifying Enterprise Architecture decision making.
Effective: Fall 2012
Prerequisite:

EA 873 **Enterprise Modeling** (3) Theoretical foundations and practice of enterprise modeling.
Effective: Summer 2012
Prerequisite:

EA 874 **Enterprise Information Technology Architecture** (3) Theoretical foundations and practice of the enterprise information technology architecture.
Effective: Summer 2012 Ending: Summer 2014
Prerequisite:

EA 874 **Enterprise Information Technology Architecture** (3) Theoretical foundations and practice of the enterprise information technology architecture.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

EA 875 **Enterprise Architecture Leadership** (3) Develops additional capabilities for leading, communicating, and implementing Enterprise Architecture.
Effective: Summer 2012 Ending: Summer 2014
Prerequisite:

EA 875 **Enterprise Architecture Leadership** (3) Develops additional capabilities for leading, communicating, and implementing Enterprise Architecture.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Entomology (ENT)

ENT 402W (VB SC 402W) Biology of Animal Parasites (3) An introduction to animal parasitology. Emphasizes placed on host/parasite interactions, parasites of zoonotic importance, control programs and taxonomy.
Effective: Spring 2010
Prerequisite:

ENT 410 Insect Structure and Function (3) Integrated physiology and anatomy of insects; emphasis on unique adaptations, genetic regulation of development, insects as model systems, environmental physiology.
Effective: Summer 1994
Prerequisite:

ENT 420 Introduction to Population Dynamics (3) Principles of population regulation, demographic analysis, modeling of dynamic processes are discussed; laboratories involve the exploration of population growth models.
Effective: Summer 1994
Prerequisite:

ENT 424 Sensory Biology of Insects (3) This course provides students an understanding of insect sensory systems contributing to behaviors performed for survival and reproduction.
Effective: Summer 2013
Prerequisite:

ENT 425 Freshwater Entomology (3) Collection and identification of insects and other arthropods in freshwater ecosystems; field study of habitats.
Effective: Fall 2000

ENT 430 (Biol 430, B MB 430) Developmental Biology (3) Molecular and genetic analyses of mechanisms involved in differentiation and determination in biological systems.
Effective: Summer 1994
Prerequisite:

ENT 432 Insect Biodiversity and Evolution (4) In this course students learn insect taxonomy, evolutionary history, collection and preservation techniques, morphology, fossils, and natural history.
Effective: Spring 2014
Prerequisite:

ENT 445 Evolution of Insect Societies (3) Basic principles of Darwinian theory and their application to understanding the evolution of complex social behavior in insects are addressed.
Effective: Spring 2012
Prerequisite:

ENT 457 (AGECO 457) Principles of Integrated Pest Management (3) Integrated study of pest complexes and their management, emphasizing ecological principles drawing on examples from a range of agricultural, forestry and urban systems. This course is designed for sixth, seventh, and eighth semester students and graduate students.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

ENT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

ENT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

ENT 518 Insect Natural History (2) Experiential learning in field ecology highlighting insect dynamics, diversity and adaptations in terrestrial and aquatic systems.
Effective: Spring 2012
Prerequisite:

ENT 520 Frontiers in Insect Science (4) This graduate course is designed to provide an overview of the diversity of subjects that fall within the subject of entomology.
Effective: Fall 2011

ENT 522 Critical Thinking and Professional Development in Entomology (6) This is a required course for Entomology graduate students focusing on developing the professional skills needed for a successful career in basic or applied research.
Effective: Spring 2012

ENT 530 Seminar in Insect Science (1 per semester/maximum of 4) Seminar in insect science. Topics range from insect phys & immunology to chemical ecology & epidemiology.
Effective: Spring 2012

The Pennsylvania State University
Prerequisite:

ENT 535 **Statistical Techniques in Entomology** (3) Research methods course covering experimental design and analysis in entomology, ecology, and the agricultural science.
Effective: Summer 2012

ENT 539 **Chemical Ecology of Insects** (3) Interactions of insects with environmental chemicals, including natural and synthetic compounds; host finding and other behavior modifying cues.
Effective: Spring 1986

ENT 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

ENT 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses
Effective: Spring 1987

ENT 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

ENT 597D **Insect Chemical Ecology** (3) Discussion and basic evolutionary and applied aspects of chemical signaling affecting insect behavior, physiology, interactions with plants and other organisms.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

ENT 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

ENT 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

ENT 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience in development of instructional materials, organizing and conducting lectures, laboratories, and evaluating students in Entomology courses (1-599).
Effective: Fall 1983

ENT 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 2008

ENT 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

ENT 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Entreprenuership (ENTR)

ENTR 400 Financing Entrepreneurial Ventures (3) Overview of alternative forms of financing including seed capital, valuing a company, going public, partnerships, and acquisitions.
Effective: Summer 2000
Prerequisite:

ENTR 410 Entrepreneurial Marketing (3) Principles of Internet marketing and strategies for marketing new ventures on the Web.
Effective: Spring 2007
Prerequisite:

ENTR 420 Leadership and Growth of New Ventures (3) Leadership of an entrepreneurial organization, including organizational effectiveness, stages of entrepreneurial growth, strategies for the future, and developing people.
Effective: Summer 2000
Prerequisite:

ENTR 430 Entrepreneurship and New Product Development (3) Examines the process of designing, testing and launching new products, and developing a strategy for commercialization of the technology.
Effective: Summer 2000
Prerequisite:

ENTR 440 Entrepreneurship and Franchising (3) Overview of the entire franchising process with a focus on licensing and distributorship, trade marks, strategy, and growing the enterprise.
Effective: Summer 2000
Prerequisite:

ENTR 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2000

ENTR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2000

ENTR 497A Sheetz Fellows Program (1) This course is an introduction to the Sheetz Fellows Program. It prepares students with an entrepreneurial mindset for leadership roles by providing them with mentoring opportunities, academic challenges, and resources. Topic areas include: servant leadership, business networking, social networking, study abroad exploration, and resume development. The Sheetz Fellows experience offers "an education for leadership" in the best tradition of the Business program. It molds well-rounded students who are ready for the world and prepares students for citizenship for life-long learning.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

ENTR 500 Innovation and Entrepreneurship (1-3) Practical and theoretical insights into analyzing a new business opportunity that you have created.
Effective: Summer 2008

ENTR 501 Opportunity Creation and Launch (2) Identify a new opportunity, quantify its potential, understand key competitive factors, and develop presentations to secure venture financing.
Effective: Summer 2002

ENTR 502 Starting and Growing a New Business (2) An overview of traditional entrepreneurship considerations including competition, management teams, financing, and exit plans.
Effective: Summer 2002

ENTR 503 Garber Venture Capital Practicum (1-2) Structure investment opportunities, conduct due diligence, and potentially invest funds from the Smeal College of Business Garber Venture Capital Fund.
Effective: Summer 2002

ENTR 504 Essentials of Business Planning (2) Create a concise and coherent business plan for a start-up or a new corporate initiative.
Effective: Spring 2011

ENTR 571 Strategic Innovation in Corporate Networks (2) Capstone course integrating themes related to innovation by exploring entrepreneurship as strategic force throughout a full range of corporate entities.
Effective: Spring 2010

ENTR 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual
basis and which fall outside the scope of formal courses.
Effective: Summer 2002

ENTR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2002

ENTR 597F Entrepreneurial Finance (2) Students will learn by examining real cases including bootstrapping, grants, corporate partnering, etc. This course is suitable to students wishing to start their own companies or wishing to learn more about private equity models.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Last Import from UCM: May 24, 2014 3:00 AM
Envirn Poll Control (E P C)

E P C 590 Colloquium (1) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1996

Effective: Fall 1983

Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Environmental Engineering (ENVE)

ENVE 401 Occupational Safety and Environmental Health (1) Regulations, management practices, hazard identification, exposure assessment, monitoring, employee protection, and program management for occupational safety and health.
Effective: Fall 2011
Prerequisite:

ENVE 411 Water Supply and Pollution Control (3) Water supply, wastewater characteristics, design of unit processes for water and wastewater treatment, sludge processing, and related new technologies.
Effective: Fall 2011 Ending: Fall 2014
Prerequisite:

ENVE 411 Water Supply and Pollution Control (3) Water supply, wastewater characteristics, design of unit processes for water and wastewater treatment, sludge processing, and related new technologies.
Effective: Spring 2015 Future: Spring 2015
Prerequisite:

ENVE 413W Operation and Control of Treatment Systems (3) Wastewater treatment, water treatment, solids handling, hazardous waste site control and operations, operator certification, report writing.
Effective: Fall 2011
Prerequisite: Concurrent: ENVE 416

ENVE 415 Hydrology (3) Watershed response to rainfall events; hydrologic systems; ground water flow.
Effective: Fall 2011
Prerequisite:

ENVE 416 Treatment Plant Design (3) Design of treatment facilities for water and waste water based on regulatory requirements and standards.
Effective: Fall 2011
Prerequisite: Concurrent: ENVE 417

ENVE 417 Hydraulic Design (3) Design of water and waste water conveyance systems and storage facilities.
Effective: Fall 2011
Prerequisite:

ENVE 424 Solid Waste Management (3) Solid waste collection and disposal techniques; recycling and design optimization; including content analysis, legislation, and planning.
Effective: Fall 2011
Prerequisite:

ENVE 425 Hazardous Waste Management (3) Overview of regulations, risk assessment, waste minimization and pollution prevention, treatment of hazardous waste, and remediation of contaminated sites.
Effective: Fall 2011
Prerequisite:

ENVE 430 Sustainable Engineering (3) A course on engineering which uses ecological principles to minimize waste and maximally use input materials.
Effective: Summer 2003
Prerequisite:

ENVE 460 Environmental Law (3) This course provides a survey of Federal and State environmental laws, including statutory, common and administrative law. May not be taken for graduate credit by Dickinson School of Law students in the concurrent J.D./EPC programs.
Effective: Summer 2003
Prerequisite:

ENVE 470 Air Quality (3) Overview of air quality issues with regard to the sources, measurements, effects, transport and control of potential air contaminants.
Effective: Fall 2011 Ending: Fall 2014
Prerequisite:

ENVE 470 Air Quality (3) Overview of air quality issues with regard to the sources, measurements, effects, transport and control of potential air contaminants.
Effective: Spring 2015 Future: Spring 2015
Prerequisite:

ENVE 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2005

ENVE 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

ENVE 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

The Pennsylvania State University
ENVE 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1996

Effective: Spring 2013
Prerequisite:
ENVE 550 Chemical Fate and Transport (3) Chemical fate and transport modeling of environmental systems as applied to ecological systems, treatment technologies, and human health exposure assessments.
Effective: Summer 2004

ENVE 569 Environmental Risk Assessment (3) Overview of ecological and human risk, including hazard identification, dose response, exposure assessment, and risk characterization.
Effective: Fall 1996

ENVE 591 Research Methods in Environmental Engineering (1) Preparing a research proposal, critical reading of literature, understanding ethics in research, experimental design, data analysis and presentation.
Effective: Spring 2014
Prerequisite:
ENVE 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2003

ENVE 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2003

ENVE 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2001

ENVE 599 (IL) Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2005

Last Import from UCM: May 24, 2014 3:00 AM
Evid-Based Medicine (EBM)

EBM 713 Evidence-based Medicine I (1) This is fundamentally a course about applying the basic principles of clinical epidemiology/biostatistics to clinical medicine. Physicians need to be knowledgeable consumers of medical literature/information whatever the source. Physicians need to be able to judge the validity of scientific evidence and apply it to patient care.
Effective: Spring 2008

EBM 723 Evidence-based Medicine II (1) This is fundamentally a course about applying the basic principles of clinical epidemiology/biostatistics to clinical medicine. Physicians need to be knowledgeable consumers of medical literature/information whatever the source. Physicians need to be able to judge the validity of scientific evidence and apply it to patient care.
Effective: Spring 2008

Last Import from UCM: May 24, 2014 3:00 AM
Exercise/Sport Scien (EXSCI)

EXSCI 595 (PHSIO 595) Internship in Exercise Physiology and Cardiac Rehabilitation (1-15) Clinical and related research aspects of exercise physiology and exercise prescription with respect to cardiac and cardiovascular rehabilitation. Effective: Spring 1988
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Family Law/Est Plan (FMEST)

FMEST 960 Wills, Trusts and Estates (3) This course examines the disposition of property at death by intestate succession and by will. The execution, revocation, construction, and contest of wills, as well as limits on the power to dispose of property by will, are studied. This course also examines the creation, purposes and termination of trusts, including informal trusts, and the interrelationship between trusts and wills.
Effective: Fall 2013

FMEST 962 Family Law (3) This course studies legal problems pertaining to the organization, operation, and dissolution of the family. It includes material on privacy, alternative families, marriage and annulment, child and spousal support, termination of parental rights, adoption and care of the child, divorce, alimony, property distribution at divorce, and custody of children.
Effective: Summer 2011

FMEST 963 Elder Law (2-3) This course presents a survey of the legal issues associated with aging, including introduction to national and global demographics on population aging; comparative policies on Social Security; quality of health care, including care under Medicare and Medicaid (and alternative forms of payment systems for health care and long term care); age discrimination in employment; housing for older adults, including nursing homes, assisted living and continuing care facilities; advance health care decision making; and fiduciary duties of agents and family members.
Effective: Fall 2013

FMEST 964 Estate Planning (3) Studies the concepts and techniques required to develop estate plans. Topics include the initial client interview, drafting of wills and trusts, powers of attorney, living wills, disability planning and income taxation of trusts and estates. The psychological and ethical aspects of estate planning will be covered. The course will also survey the federal gift, estate and generation skipping taxes. The course is intended to be an introduction to estate planning, valuable to both the person intending to specialize in the field and the general practitioner.
Effective: Fall 2012
Prerequisite:

FMEST 970 Probate Practice (2) This course deals primarily with the handling of estates following the decedent’s death. Emphasis is thus placed on accounts and distribution, the responsibilities of estate administrators and personal representatives, inheritance tax problems and will contests. Other topics include avoidance of probate and the drafting of wills.
Effective: Fall 1998
Prerequisite:

FMEST 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2008

Last Import from UCM: May 24, 2014 3:00 AM
Family/Community Med-Hy (FCMED)

FCMED 722 Family Medicine Acting Internship (5) The goal of the inpatient experience is to allow the fourth-year medical student to accept responsibility for the planning and execution of ongoing care of hospitalized patients, evaluate patients in the emergency room to determine if hospitalization is necessary and to perform the duties of an admitting physician. The student will work as a member of the family medicine inpatient service team and will remain in the hospital until the days' work is completed. The student will have one weekend free. Three weekends will be spent working with the inpatient team.
Effective: Spring 2003
Prerequisite:

FCMED 730 Advanced Communications Elective - Paired Observation & Video Editing (POVE) (5) Provides the opportunity for students working together to advance their communication skills in clinical settings.
Effective: Fall 2010
Prerequisite:

FCMED 771 Family & Community Medicine Clerkship (5) Student participation in ambulatory clinical care of the patient in his own environment and in a variety of health care centers.
Effective: Spring 2009

FCMED 796 Family & Community Medicine Individual Studies (5) Creative projects including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2010
Prerequisite:

FCMED 796A Family & Community Medicine Individual Studies for 3rd Year (2.5) Family & Community Medicine Individual Studies for 3rd Year.
Effective: Spring 2009

FCMED 797 Family & Community Medicine Special Topics (5) Advanced training in interpersonal communication skills, community health, rural health, ambulatory care analysis, clinical nutrition, geriatrics, and other topics.
Effective: Spring 2009
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Field Placemnt Clini (FPC)

FPC 998 Special Topics (1-12) Externship Placements offer students the opportunity to work and learn in a variety of settings outside the Law School under the supervision of a full-time faculty member.
Effective: Spring 2012
Prerequisite:
Finance (FIN)

FIN 405 Advanced Financial Management (3) An examination of the development and application of decision rules for major long-term financial and investment problems of the firm.
Effective: Summer 1993
Prerequisite:

FIN 406 Security Analysis and Portfolio Management (3) Advanced valuation theory; fundamentals of security analysis; portfolio construction and management.
Effective: Spring 2011
Prerequisite:

FIN 406H Security Analysis and Portfolio Management (Honors) (3) Advanced valuation theory; fundamentals of security analysis; portfolio construction and management.
Effective: Summer 2011
Prerequisite:

FIN 407 Multinational Financial Management (3) Analysis of the international aspects of managerial finance; emphasis on the impact of the international financial environment on firm operations.
Effective: Spring 2005
Prerequisite:

FIN 408 Financial Markets and Institutions (3) Functional analysis of major credit institutions; sources and uses of funds; impact of government regulation.
Effective: Fall 1994
Prerequisite:

FIN 408H Financial Markets and Institutions (Honors) (3) Introduction to bonds, equities, derivatives, and financial institutions including insurance, pension funds and mutual funds.
Effective: Spring 2012
Prerequisite:

FIN 409 Real Estate Finance and Investment (3) The sources and uses of credit; instruments and methods of financing; the theory and practice of real estate investment analysis.
Effective: Summer 2011
Prerequisite:

FIN 410 Derivative Markets (3) Functions, techniques, and impact of speculation conducted through forward markets; the nature of speculative transactions, pricing, and methods of trading.
Effective: Spring 2011
Prerequisite:

FIN 412 Commercial Bank Management (3) Fundamental principles underlying management of a commercial bank; capital funds; asset and liability management; value maximization; legal and operational constraints.
Effective: Fall 1994
Prerequisite:

FIN 413 Risk Management of Financial Institutions (3) Measuring and managing risk faced by financial institutions.
Effective: Summer 2007
Prerequisite:

FIN 414 Financial Trading and Applications (3) This course focuses on financial modeling and analysis of trading strategies. Bloomberg, Reuters, spreadsheets and trading simulations are used extensively.
Effective: Summer 2007
Prerequisite:

FIN 415 Advanced Financial Modeling (3) Develop financial models using spreadsheets, VBA programming, and trading room applications such as Bloomberg and @Risk.
Effective: Spring 2011
Prerequisite:

FIN 418 Introduction to Energy Finance (3) This course provides an introduction to the physical and financial energy markets, along with concepts important to managing risk.
Effective: Summer 2014
Prerequisite:

FIN 419 Advanced Energy Finance (3) This course provides an investigation of energy products; energy commodity price formation; credit, counterparty, country risk assessment, and ethics.
Effective: Summer 2014
Prerequisite:

FIN 420 Investment and Portfolio Analysis (3) Investment and risk, types of security investments, sources of investment information, the broker, the stock market, portfolio management.
Effective: Spring 2008
Prerequisite:

FIN 427 Derivative Securities (3) Introduction to futures contracts and options, leading to a working understanding of their importance in financial management applications.
FIN 430 Estate Planning (3) Liquidity planning, titling and transfer of property, trusts, federal unified tax system, gifting, incapacity planning, legal documents.
Effective: Spring 2008 Ending: Summer 2014
Prerequisite:
FIN 430 Estate Planning (3) Liquidity planning, titling and transfer of property, trusts, federal unified tax system, gifting, incapacity planning, legal documents.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:
FIN 450 Retirement Planning (3) Retirement planning: qualified and non-qualified plans, characteristics, provisions, regulations administration, application approach with case studies.
Effective: Spring 2008

FIN 451 Intermediate Financial Management (3) Case studies are used to develop skills in solving a variety of financial management problems.
Effective: Spring 2010
Prerequisite:

FIN 456 (IL) International Capital Markets (3) This course develops understanding of international capital markets by striking a balance between institutional details, theoretical foundation and practical application.
Effective: Spring 2008
Prerequisite:

FIN 460 (R M 460) Real Estate Financial Analysis (3) Debt and equity financing, capital structure, "creative financing," risk analysis, corporate asset management.
Effective: Spring 2012
Prerequisite:

FIN 461 Portfolio Management and Analysis (3) Investement policy and process, modern portfolio theory, portfolio construction, and portfolio performance measurement and evaluation.
Effective: Fall 2011
Prerequisite:

FIN 470 (R M 470) Real Estate and Capital Markets (3) Analysis of publicly-traded real estate of both the equity, (REITs) and debt (MBSs) sides. The course also provides international perspectives.
Effective: Spring 2012
Prerequisite:

FIN 471 International Finance (3) Financial decision making in an international environment. Emphasis on topics relevant to small businesses and entrepreneurs.
Effective: Spring 2010
Prerequisite:

FIN 475 Financial Decision Making (3) Problems and cases in financial decision making for non-financial corporations and financial institutions.
Effective: Fall 2009
Prerequisite:

FIN 481 Advanced Financial Analysis (3) Capstone course integrating financial analysis coursework. This course is based on the case study method which provides a challenging setting in which to apply business concepts.
Effective: Spring 2009
Prerequisite:

FIN 489 Seminar in Finance (3) In-depth study of new trends, concepts, and practices in financial or portfolio management.
Effective: Spring 2008
Prerequisite:

FIN 491 Financial Planning Capstone (3) Critical thinking and decision-making about personal financial planning topics in the context of the financial planning process.
Effective: Summer 2012
Prerequisite:

FIN 494 Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2003

FIN 494H Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2008

FIN 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008
FIN 495A **Nittany Lion Fund -- Lead Fund Manager Practicum** (3 per semester/maximum of 6) Advanced work with the Nittany Lion Fund. Lead Fund Managers are accountable for sector and stock performance as well as reports. Students delegate work to Associate Fund Managers while focusing a great amount of attention to all aspects of stock pitches, weekly and quarterly reports, along with conducting weekly training session for new analysts.
Effective: Summer 2011
Prerequisite:

FIN 495B **Nittany Lion Fund - Executive Board Practicum** (3 per semester/maximum of 6) Oversight of the Nittany Lion Fund (NLF) and its overall performance. Executive Board members and Directors are accountable for all aspects of the Nittany Lion Fund. Students interact with investors and are responsible for delivering professionally developed performance reports, weekly information updates, and annual shareholder meetings. Executive Board members assume specific duties within the NLF associated with their position, along with a shared responsibility for being a spokesperson for the fund.
Effective: Summer 2011

FIN 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

FIN 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

FIN 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2003

FIN 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

FIN 504 **Problems in Finance** (3-6) Planned individual projects involving library, laboratory, or field work.
Effective: Winter 1978

FIN 505 **Multinational Managerial Finance** (3) Analysis of the international aspects of managerial finance. Emphasis on the environmental and institutional factors influencing capital acquisition and allocation.
Effective: Spring 2012
Prerequisite:

FIN 506 **Portfolio Theory and Policy** (3) Rigorous examination and analysis of asset-holder behavior under conditions of risk and uncertainty.
Effective: Winter 1978

Effective: Winter 1978

FIN 513 **Speculative Markets** (3) Analysis of derivative securities covering options, forwards, futures, OTC derivatives; topics include valuation, trading, hedging. Involves computer analysis.
Effective: Spring 1998
Prerequisite:

FIN 515 **Nittany Lion Fund Manager** (3) Focuses on applied issues and topics in the management of investments.
Effective: Summer 2008

FIN 531 **Financial Management** (3) An intensive examination of techniques available to aid the financial manager in decision making.
Effective: Spring 2006
Prerequisite:

FIN 532 **Financial Decision Processes** (3) Financial decision making under uncertainty; positive and normative models and current issues in financial management.
Effective: Winter 1978

FIN 541 **Security Analysis** (3) Discussion and application of analytical techniques in security valuation, including use of computers.
Effective: Winter 1978

FIN 550 **Financial Analysis and Valuation** (2) Builds upon and reinforces the theoretical and institutional finance frameworks learned in introductory business finance.

The Pennsylvania State University
Effective: Summer 2002
Prerequisite:
FIN 555 (1 B 555) Global Finance (1-3) Analyze international business finance problems, impact of evolving inter-national payment systems on business, financial management in modern multi-national enterprise.
Effective: Fall 2008
Prerequisite:
FIN 563 Financial Management Simulation and Corporate Interaction (2) An immersion experience in financial decision-making through a simulation exercise and interaction with senior financial officers.
Effective: Summer 2002
Prerequisite:
FIN 565 Investment Management Portfolio Analysis Immersion (2) An intensive familiarization with the Smeal College Trading Room in combination with a visit to Wall Street trading rooms.
Effective: Summer 2002
Prerequisite:
FIN 570 Financial Modeling (2) Introduces and applies equity, debt, derivative models and computational techniques using Excel and Visual Basic for Applications.
Effective: Summer 2008

FIN 571 Strategic Financial Management (2) Comprehensive course in corporate finance and the strategic implications of various financial decisions.
Effective: Summer 2002
Prerequisite:
FIN 577 Financial Engineering and Corporate Strategy (2) Study and application of derivative strategies, financial innovation, and modern financial techniques to re-engineer risk exposure and enhance strategic opportunities.
Effective: Summer 2002
Prerequisite:
FIN 581 Fundamentals of Financial Markets (2) Operation, structure of money, bond markets and concepts; and techniques used in evaluating and managing fixed income portfolios.
Effective: Summer 2002
Prerequisite:
FIN 583 Modern Portfolio Management: Theory and Practice (2) Theoretical foundations and tools needed for structuring, managing, and monitoring the performance of an investment portfolio.
Effective: Spring 2012
Prerequisite:
FIN 585 Financial Innovation and Portfolio Risk Management (2) Introduction to fundamental derivatives, standard valuation models, and practical applications to portfolio management; recognition, measurement, and management of portfolio risk.
Effective: Spring 2012
Prerequisite:
FIN 587 Investment Management I (1) Applied issues and topics in the management of investments.
Effective: Summer 2002
Prerequisite:
FIN 588 Investment Management II (1) Complex applied issues and topics in the management of investments.
Effective: Summer 2002
Prerequisite:
FIN 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

FIN 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

FIN 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

FIN 597B Corporate Finance I (3) Doctoral seminar which will cover the fundamental topics in corporate finance, covering both theoretical and empirical work in corporate finance.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

FIN 597E Corporate Finance II (3) Doctoral seminar focused mostly on recent articles in empirical corporate finance.
Prerequisite:
FIN 599 (IL) FOREIGN STUDY--FINANCE (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite:
FIN 600 Thesis Research (1-15) No description.
Effective: Fall 1983

FIN 601 PH.D. DISSERTATION FULL-TIME (0) NO DESCRIPTION.
Effective: Summer 1993

FIN 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Graduate students will be assigned on a selective basis teaching responsibilities in FIN 301, 305, and 306.
Effective: Spring 1984

FIN 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

FIN 611 PH.D. DISSERTATION PART-TIME (0) NO DESCRIPTION.
Effective: Summer 1993

Last Import from UCM: May 24, 2014 3:00 AM
Finance - Behrend (FNC)

FNC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

FNC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year of semester.
Effective: Spring 1987

Last Import from UCM: May 24, 2014 3:00 AM
Financial Analysis (FINAN)

FINAN 518 Financial Markets and the Economy (3) Operation, regulation, use, and evaluation of principal financial markets and institutions; monetary policy, asset pricing, and their effects on business. Effective: Spring 2005
Prerequisite:

FINAN 521 Corporate Finance (3) An in-depth analysis of concepts and techniques of corporate financial management. Effective: Spring 1996
Prerequisite:

FINAN 522 Investment and Portfolio Management (3) Investment analysis and portfolio management theory and applications. Effective: Spring 1997
Prerequisite:

Prerequisite:

FINAN 526 International Finance (3) Basics of corporate finance extended to the international environment through a special consideration of exchange rate behavior and its management. Effective: Spring 1996
Prerequisite:

FINAN 527 Derivative Securities (3) Use of financial futures, options, and swaps for risk management and investment; pricing models, trading strategies hedging price risk. Effective: Spring 2002
Prerequisite:

Prerequisite:

FINAN 575 Seminar in Current Issues in Finance (3) In depth analysis of current issues in financial management; topics will be rotated to reflect the current needs of managers. Effective: Summer 2002
Prerequisite:

FINAN 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 2009

FINAN 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1999

FINAN 597 Special topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 1999
FIELD PLACEMENT INT JUST (FPIJP)

FPIJP 995 International Justice Externship Program (10) The International Justice Externship Program will provide students with the opportunity to spend a semester at the Hague in the Netherlands earning 10 hours of academic credit for approximately 30 hours of supervised work. Students will work in the Office of the Special Prosecutor at the Hague. The externship will enable students to pursue advanced practical training and research opportunities in international criminal law beyond our curricular offerings. Students will have the opportunity to analyze sophisticated areas of international law in a real world context. Each student participating in the Hague semester is required to enroll in a concurrent two-credit seminar. The seminar component will address international trial investigative techniques, tribunal jurisdiction and procedure, and areas of international civil and criminal law that are most relevant to legal practice before international tribunals.
Effective: Summer 2011
Prerequisite:
Fld Plcmt Harrisburg (FPHBG)

FPHBG 995 Field Placement Harrisburg Program (8) Program will provide experiential learning opportunities for law students relating to legislative and administrative law practice and the formulation of public policy at the state government level.
Effective: Fall 2010
   Concurrent: GOVMT 987 and FPHBG 996

FPHBG 996 Field Placement Harrisburg Program (1) Guided reflection component of the Harrisburg Externship Program.
Effective: Fall 2010
   Concurrent: GOVMT 987 and FPHBG 995

Last Import from UCM: May 24, 2014 3:00 AM
Food Science (FD SC)

FD SC 400 Food Chemistry (4) Chemical properties of food constituents as influenced by processing and storage.
Effective: Fall 2009
Prerequisite:

FD SC 404 Sensory Evaluation of Foods (3) Sensory evaluation of food, methods of test analyses, panel selection and training, taste sensation theory, consumer testing methods.
Effective: Spring 2001
Prerequisite:

FD SC 405 Food Engineering Principles (3) Engineering principles of importance to food manufacturing, including units, dimensions, mass and energy balance, fluid flow, rheology, heat transfer, and psychrometrics.
Effective: Spring 2009
Prerequisite:

FD SC 406 Physiology of Nutrition (3) Physiological mechanisms involved in thirst and appetite, digestion, absorption, utilization of nutrients, respiration, and body temperature regulation.
Effective: Spring 2001
Prerequisite:

FD SC 407 Food Toxins (2) Microbiological and chemical aspects of food poisoning; toxicological principles; case histories and prevention of problems.
Effective: Winter 1978
Prerequisite:

FD SC 408 Food Microbiology (2) Significance of microorganisms in food commodities, microbial spoilage, food-borne infections, and intoxication; methods of preservation, processing, and control.
Effective: Fall 2009
Prerequisite:

FD SC 409W Laboratory in Food Microbiology (3) Methods of isolation, detection of spoilage, pathogenic microorganisms in foods; effects of processing and preservation on survival of food microorganisms.
Effective: Fall 2009
Prerequisite:

FD SC 410 Chemical Methods of Food Analysis (3) Qualitative and quantitative determinations of food constituents.
Effective: Spring 2001
Prerequisite:

FD SC 411 Managing Food Quality (2) Principles and applications of Hazard Analysis Critical Control Points. Statistical tools for the control and improvement of food quality.
Effective: Summer 1999
Prerequisite:

FD SC 413 Science and Technology of Plant Foods (3) Physical and chemical behavior of plant-based raw materials and ingredients, with emphasis on parameters influencing finished product quality.
Effective: Fall 2009
Prerequisite:

FD SC 414 Science and Technology of Dairy Foods (3) Physical and chemical behavior of dairy-based raw materials and ingredients, with emphasis on parameters influencing finished product specifications.
Effective: Fall 2009
Prerequisite:

FD SC 415 Science and Technology of Muscle Foods (3) Physical and chemical properties of muscle food commodities, with emphasis on muscle-based ingredients in formulated foods.
Effective: Fall 2009
Prerequisite:

FD SC 430 Unit Operations in Food Processing (3) Thermal processing, refrigeration, freezing, dehydration, and concentration in the food industry, including effects on food quality; food packaging; waste management.
Effective: Fall 2009
Prerequisite:

FD SC 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1992
Prerequisite:

FD SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

FD SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983
Research Basics: Learning How to Communicate Scientifically (1) Developed to enhance the undergraduate food science research experience. Prepares students for graduate school and provide set of skills that are applicable to any career.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

Topics in Dairy Products Processing (3) Special topics covering the science and technology associated with manufacturing a variety of dairy products including fluid milk, yogurt, and ice cream.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

Challenging Dogmas: How Major Discoveries in Microbiology Revolutionized Biology (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

Foreign Studies (1-12 per semester/maximum of 12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2013

Fundamentals of Food Science - Microbiology (1) Overview of the field of Food Science with the focus on microbiology.
Effective: Spring 2011

Fundamentals of Food Science - Engineering (1) Overview of the field of Food Science with the focus on engineering.
Effective: Spring 2011

Fundamentals of Food Science - Chemistry (1) Overview of the field of Food Science with the focus on chemistry.
Effective: Spring 2011

Fundamentals of Food Science - Nutrition (1) Overview of the applications of nutrition in the field of Food Science.
Effective: Spring 2011

Research Methods in Food Science (2) Planning and conducting research in food science including: problem definition, experimental design, collecting and recording data, and effective communication.
Effective: Summer 2002

Flavor Chemistry (3) Formation, analysis and release of flavors in food systems.
Effective: Fall 2003
Prerequisite:

Advanced Food Microbiology (3) Roles of microorganisms in food preservation, spoilage, health and disease. Recent advances in detection, tracking and control of foodborne pathogens.
Effective: Fall 2011
Prerequisite:

Carbohydrate Hydrocolloids (3) Physicochemical behavior of edible carbohydrate hydrocolloids, with emphasis on starch and selected exudates, extracts, flours, and fermentation products.
Effective: Fall 1988
Prerequisite:

Food Physical Chemistry (3) Physical principles underlying food structure and quality.
Effective: Fall 2011
Prerequisite:

Food Defense: Prevention Planning for Food Processors (3) Course prepares current and aspiring professionals to learn, recognize and apply measures to prevent intentional contamination of the food supply.
Effective: Summer 2010
Prerequisite:

Readings in Ingestive Behavior (1 per semester/maximum of 6) Students lead discussions of original research in the field of ingestive behavior; focus on food intake in particular.
Effective: Summer 2014
FD SC 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students or outside speakers.
Effective: Spring 1987

FD SC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on individual basis and fall outside the scope of formal courses.
Effective: Spring 1987

FD SC 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

FD SC 597G (NUTR 597G) **Readings in Ingestive Behavior** (1) Students lead discussions of original research in the field of ingestive behavior with a focus on food intake in particular.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Effective: Fall 1983

FD SC 601 **Ph.D. Dissertation Full Time** (0) No description.
Effective: Fall 1983

FD SC 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience in the development of instructional materials, the organization and conduct of lectures/laboratories, the evaluation and counseling of students.
Effective: Fall 1983

FD SC 603 **Foreign Academic Experience** (1-12) Foreign study and/or research approved by the food science program constituting progress toward the degree.
Effective: Fall 2010

Effective: Fall 1983

FD SC 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Forensic Science (FRNSC)

FRNSC 400 Courtroom Proceedings and Testimony (1) Introduction to courtroom proceedings and testimony as they related to forensic science.
Effective: Fall 2012
Prerequisite:

FRNSC 410 A Scientific Approach to Crime Scene Investigation (2) Principles of crime scene investigation with emphasis on scientific philosophy, concepts, and procedures.
Effective: Fall 2012
Prerequisite:

FRNSC 411 Criminalistics: Trace and Impression Evidence (3) Laboratory-based examination of forensic evidence; microscopy, classification and identification.
Effective: Fall 2012
Prerequisite:

FRNSC 413 Criminalistics: Biology (3) Laboratory-based examination of forensic evidence; biological fluid identification, hair microscopy.
Effective: Fall 2012
Prerequisite:

FRNSC 415W Laboratory in Crime Scene Investigation (2) Laboratory course covering crime scene investigation with emphasis on scientific philosophy, concepts, procedures, problem solving, and hands-on activities.
Effective: Summer 2012
Prerequisite:

FRNSC 421W Forensic Molecular Biology (4) Concepts and application of serology of molecular biology techniques to analyze biological evidence collected at crime scenes.
Effective: Fall 2012
Prerequisite:

FRNSC 427W (CHEM 427W) Forensic Chemistry (4) Analytical and instrumental methods used in the forensic sciences with special emphasis on the analysis and characterization of trace evidence.
Effective: Fall 2012
Prerequisite:

FRNSC 475 Forensic Science Seminar (1) Presentation and discussion of special issues in forensic science; extension and application of background knowledge to unusual topics and cases.
Effective: Spring 2008
Prerequisite:

FRNSC 485W Coalescence of Forensic Science Concepts. (4) Advanced concepts in criminalistics as they apply to criminal and civil investigations.
Effective: Spring 2013
Prerequisite: Concurrent: FRNSC 421W FRNSC 427W

FRNSC 494 Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

FRNSC 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2008

FRNSC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2006

FRNSC 497A Special Topics in Crime Scene Investigation (2) This laboratory course in crime scene investigation is designed for students registered with the Penn State ADA Office. Laboratory course covering crime scene investigation with emphasis on scientific philosophy, concepts, procedures, problem solving, and hands-on activities.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

FRNSC 497B Chromatography and Electrochemistry (3) The course topics include gas, liquid, and other forms of chromatography, mass spectroscopy, and important techniques of electrochemistry. The course material is designed to increase student understanding of both the analytical instruments used in the laboratory and the principles underlying the measurements. Evaluation of student performance is based on the level to which a student understands how an instrument operates and how particular components determine overall performance and specifications; limitations to measurements as a function instrument design; criteria by which one selects an appropriate instrument to obtain the desired measurements; and criteria by which one selects appropriate components to build an instrument for specific uses.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:
FRNSC 532 Drug Chemistry and Toxicology (3) Chemical and toxicological properties of therapeutic and non-therapeutic drugs and the analytical and instrumental methods of their identification and quantification. Effective: Spring 2010

FRNSC 541 Forensic Seminar Series (1) Advanced concepts in forensic science through presentation of journal articles, case studies, and research findings. Effective: Spring 2009

FRNSC 561 Ethics in Forensic Science (1) The ethics of forensic science, including issues of evidence handling, data analysis, and courtroom testimony. Effective: Spring 2009

FRNSC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Summer 2006

FRNSC 597A Applied Forensic Science Statistics (1) The goal of this course is to introduce students to a statistical software package for the analysis, interpretation and representation of forensic datasets. This course is not designed to teach statistics, therefore solid statistical knowledge is requested. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:
FRNSC 801 Criminalistics III (4) Advanced CSI investigation, criminalistics, and scene reconstruction with mock courtroom testimony. Effective: Summer 2013 Ending: Summer 2014

FRNSC 801 Criminalistics III (4) Advanced CSI investigation, criminalistics, and scene reconstruction with mock courtroom testimony. Effective: Fall 2014 Future: Fall 2014
Prerequisite:
FRNSC 821 Forensic Molecular Biology II (4) Advanced concepts and application of molecular biology techniques to the analysis of biological evidence collected at crime scenes. Effective: Spring 2014
Prerequisite:
FRNSC 831 Forensic Chemistry II (3) Advanced chemical techniques in forensic science, including examination of complex trace evidence and advanced instrumental analysis. Effective: Summer 2013
Prerequisite:
FRNSC 832 Forensic Drug Chemistry (3) Advanced chemical techniques in forensic science, including analytical and instrumental methods used in the analysis and characterization of drugs. Effective: Spring 2007
Prerequisite:
FRNSC 833 Forensic Toxicology (3) Advanced chemical techniques in forensic science, including the elements of industrial and environmental toxicology. Effective: Spring 2007
Prerequisite:
FRNSC 894 Research Projects in Forensic Science (1-12) Supervised student research projects identified on an individual or small-group basis. Effective: Spring 2007

FRNSC 895 Internship (1-6) Supervised off-campus, non-group instruction, including field experiences, a practicum, or internships; written and oral critique of activity required. Effective: Spring 2007

FRNSC 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 2007

Last Import from UCM: May 24, 2014 3:00 AM
Forestry (FOR)

FOR 400 Senior Forest Practicum (2) Application of forest management concepts and principles. Students will collect, analyze, and interpret forest management data and present project solutions.
Effective: Spring 2014
Prerequisite:

FOR 401 Urban Forest Management (3) Uses and values of urban vegetation, open space, and wildlife; planning, financing, support, management, and administration of urban forestry programs.
Effective: Summer 2013
Prerequisite:

FOR 403 Invasive Forest Plants: Identification, Ecology, and Management (3) Survey of common nonnative ("exotic") herbs, forbs, shrubs, trees, and vines that invade forested habitats in Pennsylvania and the region. Field identification, life history traits, ecosystem-related challenges and problems, and management options and considerations are reviewed.
Effective: Spring 2013
Prerequisite:

FOR 409 Tree Physiology (2) Fundamentals of the relationship of the basic physiological functions of forest trees to form.
Effective: Summer 2013
Prerequisite:

FOR 410 Elements of Forest Ecosystem Management (3) Fundamentals of forest ecosystem management for goods and services.
Effective: Summer 2013
Prerequisite:

FOR 416 Forest Recreation (3) The management and administration of multiple-use forest lands and wilderness for forest recreational experiences, with emphasis on public forests.
Effective: Summer 2013
Prerequisite:

FOR 418 (US:IL) Agroforestry: Science, Design, and Practice (3) Agroforestry integrates trees in agricultural landscapes, and/or agriculture products into forested areas for multiple benefits.
Effective: Summer 2013

FOR 421 Silviculture (3) The application of the principles of forest ecology to control of establishment, composition, and growth of forest stands.
Effective: Summer 2014
Prerequisite:

FOR 430 (W F S 430) Conservation Biology (3) The application of biological principles to issues in the conservation of biodiversity.
Effective: Summer 2013
Prerequisite:

FOR 439 Timber Sale Administration (2) Practical aspects of the logistical, environmental, managerial, and regulatory oversight of active and retired timber sales.
Effective: Summer 2014
Prerequisite:

FOR 440 Forest and Conservation Economics (3) The role and application of economics and finance to forest resource conservation and management.
Effective: Spring 2013
Prerequisite:

FOR 450W Human Dimensions of Natural Resources (3) Addresses human needs and desires, from individuals to nations, for social, ecological, and economic benefits derived from natural resource decisions.
Effective: Spring 2014
Prerequisite:

FOR 455 Remote Sensing and Spatial Data Handling (3) Remote sensing systems, with emphasis on application to forest ecosystem analysis. Includes introduction to computer systems for spatial data handling.
Effective: Summer 2013
Prerequisite:

FOR 466W Forest Management and Planning (3) Rationale, process, and tools for forest management decision-making and planning. Developing and communicating forest plans for forested properties.
Effective: Spring 2014
Prerequisite:

FOR 470 Watershed Management (3) Management of wild land watersheds for control of the amount and timing of water yield, water quality, erosion, and sedimentation.
Effective: Summer 2013
Prerequisite:
FOR 471 Watershed Management Laboratory (1) Introduction to hydrologic and climatic measurements and computations useful in watershed management.
Effective: Summer 2013
Prerequisite:

FOR 475 Principles of Forest Soils Management (3) Effect of current forest management practices on the properties and productive capacity of forest soils.
Effective: Summer 2013
Prerequisite:

FOR 480 Policy and Administration (3) Forest resources policy objectives; criteria and goals of society; policy implementation by ownership classes; planning, administration, and evaluation of programs.
Effective: Summer 2014
Prerequisite:

FOR 488Y (IL) Global Forest Conservation (3) Ecological, economic, technological, and political aspects of forested ecosystems in a global context, emphasizing tropical and developing countries.
Effective: Spring 2013
Prerequisite:

FOR 494 Forestry Research (3) Introduction to the theory, principles, and practices of forestry research; supervised research experience.
Effective: Summer 2013
Prerequisite:

FOR 494H Forestry Research (3) Introduction to the theory, principles, and practices of forestry research; supervised research experience.
Effective: Summer 2013
Prerequisite:

FOR 495 Forestry Internship (1-6) Supervised field experience related to the student's major.
Effective: Summer 2013
Prerequisite:

FOR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2013

FOR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2013

FOR 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2013

FOR 508 Forest Ecology (3) The forest ecosystem, variations in space and time, classification, ordination techniques, dynamic aspects such as energy flow and nutrient cycling.
Effective: Summer 2013

FOR 517 Forest Microclimatology (3) A quantitative treatment of climate near the ground, with special reference to the role of forests and terrain.
Effective: Summer 2013
Prerequisite:

FOR 520 Snow Hydrology (2) Role of snow and ice in the hydrologic cycle, with special emphasis on effects of forests and land use.
Effective: Summer 2013
Prerequisite:

FOR 521 Advanced Silviculture (3) Specific silvicultural practices for the establishment and manipulation of forest stands with respect to recent developments and research needs.
Effective: Summer 2013
Prerequisite:

FOR 530 Conservation Genetics (3) Discussion of the use of genetic principles and technologies in the conservation and management of biological diversity.
Effective: Summer 2013
Prerequisite:

FOR 550 Multivariate Analysis in Forestry Research (3) Analysis and interpretation of research data involving several response variables. Includes computational considerations for large data sets.
Effective: Summer 2013

FOR 555 Multispectral Remote Sensing (3) Computer analysis of data from nonimaging remote sensors as applied to mapping of natural resources and land use.
Effective: Summer 2013

The Pennsylvania State University
Prerequisite:

FOR 565 GIS Based Socio-Ecological Landscape Analysis (3) GIS-based socio-ecological analysis of landscape context for natural resources in relations to present and prospective patterns of land use.
Effective: Summer 2013
Prerequisite:

FOR 570 Watershed Stewardship Practicum I (3) Application of integrated community-based watershed planning for water resources management.
Effective: Summer 2013
Prerequisite:

FOR 571 Watershed Stewardship Practicum II (3) Application of integrated community-based watershed planning for water resources management.
Effective: Summer 2013
Prerequisite:

FOR 590 (W F S 590) Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2013

FOR 591A Seminar in Watershed Stewardship Issues (1) Exploration of watershed stewardship issues.
Effective: Summer 2013
Prerequisite:

FOR 591B Seminar in Watershed Stewardship Planning (1) Exploration of watershed stewardship planning processes.
Effective: Summer 2013
Prerequisite:

FOR 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2013

FOR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2013

FOR 597A Quantitative Forest Ecosystem Modeling (2) In this course students will train in quantitative forest ecosystem modeling under two frameworks: a parametric modeling framework (linear and nonlinear regression, mixed effects models, etc.) and a machine learning modeling framework (Random Forests, neural networks, etc.) to understand, quantify, and predict processes in forested ecosystems. This is a data- analysis, based course where students will develop, evaluate and compare models, understand strengths and weakness of models and each framework, and review relevant literature. The course will use the statistical environment R. If suitable, students will use their own data.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

FOR 597G (SOILS 597G, W F S 597G) Research Integrity and Research Communications (1) Instruction and practice in developing presentation skills for professional meetings. Includes SARI (Scholarship and Research Integrity) training, and introduction to related online courses offered through the Collaborative Institutional Training Initiative (CITI) program.
Prerequisite:

FOR 600 Thesis Research (1-15) No description.
Effective: Summer 2013

FOR 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 2013

FOR 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Provides an opportunity for supervised and graded teaching experience in forestry courses.
Effective: Summer 2013

FOR 603 Foreign Academic Experience (1-12) Foreign study and/or research approved by the graduate program for students enrolled in a foreign university constituting progress toward the degree.
Effective: Summer 2013

FOR 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 2013

FOR 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 2013
FOR 880 Bioenergy Feedstocks (3) This course comprehensively addresses the characteristics, production, and improvement of plants as feedstocks for conversion to energy.
Effective: Summer 2013
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Found Clinical Med (FCM)

FCM 713 Foundations of Clinical Medicine I (2) Foundational course that teaches the basics of physical diagnosis, clinical interviewing and the doctor-patient relationship.
Effective: Summer 2007
Prerequisite:

FCM 714 Foundations of Clinical Medicine I (2) Foundational course that teaches the basics of physical diagnosis, clinical interviewing and the doctor-patient relationship.
Effective: Summer 2007
Prerequisite:

FCM 723 Foundations of Clinical Medicine II (2) Advanced course that teaches the basics of physical diagnosis, clinical interviewing and the doctor-patient relationship.
Effective: Summer 2007
Prerequisite:

FCM 724 Foundations of Clinical Medicine II (2) Advanced course that teaches the basics of physical diagnosis, clinical interviewing and the doctor-patient relationship.
Effective: Summer 2007
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Founda Patient Cente (FPCC)

FPCC 713  **Foundations of Patient Centered Care - I** (2) First semester of a four-part course to learn and apply clinical interviewing and examination skills at the novice level integrated with healthcare practice topics. Effective: Summer 2013

FPCC 714  **Foundations of Patient Centered Care - 2** (2) Second semester of a four-part course to learn and apply clinical interviewing and examination skills at the advanced beginner level integrated with healthcare practice topics. Effective: Summer 2014

FPCC 723  **Foundations of Patient Centered Care - 3** (2) Third semester of a four-part course to learn and apply clinical interviewing and examination skills at the competent level integrated with healthcare practice topics. Effective: Summer 2013

FPCC 724  **Foundations of Patient Centered Care - IV** (2) Fourth semester of a four-part course to learn and apply clinical interviewing and examination skills at the proficient level integrated with healthcare practice topics. Effective: Summer 2014

Fp-Misc Summer Extn (FPEXT)

FPEXT 995 Externship Placement (2-6 per semester/maximum of 9) Externship Placements offer students the opportunity to work and learn in a variety of settings outside the Law School under the supervision of a full-time faculty member. Placements are in public service or nonprofit offices, including local, state and federal government and judicial offices. Students work with experienced supervisors in those offices to develop skills in legislative drafting, opinion writing, client counseling, research, administrative and criminal practice, statutory analysis and interpretation, and application and enforcement of regulations. Through their work and class discussions, students are expected to develop a heightened awareness of the methods and functions of the legislative, regulatory, judicial, and public interest representation functions.
Effective: Summer 2011
Prerequisite:

Effective: Spring 2004

FPEXT 997 Special Topics (1-10) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2007

French (FR)

FR 401 (IL) Advanced Oral Communication (3) Emphasis on speaking and listening comprehension through discussion of current issues, using journalistic materials.
Effective: Spring 2006
Prerequisite:

Effective: Spring 2006
Prerequisite:

FR 407 (IL) Business Writing in French (3) Common forms of business communication; writing of reports and abstracts.
Effective: Spring 2007
Prerequisite:

FR 408 (IL) French-American Business Translation (3) Translation from French to English of actual documents from the business world; theoretical consideration and systematic vocabulary building.
Effective: Spring 2007
Prerequisite:

FR 409 (IL) Commercial and Technical Translation (3) Translation from English to French of commercial and technical materials; vocabulary building; writing of abstracts and summaries.
Effective: Spring 2006
Prerequisite:

FR 410 (IL) French Press (3) Extensive readings of selected French daily and weekly newspapers and magazines, along with newscast viewings.
Effective: Spring 2007
Prerequisite:

FR 417 (IL) French Phonology (3) A formal study of the sound pattern of French.
Effective: Spring 2007
Prerequisite:

FR 418 (IL) French Syntax (3) A formal theory of word order and related issues in French grammar.
Effective: Spring 2006
Prerequisite:

FR 419 French Semantics (3) The study of meaning in human language with a special focus on how it is encoded in French.
Effective: Summer 2011
Prerequisite:

FR 422 (IL) Old French Literature (3) Medieval masterpieces in original and modern French versions.
Effective: Fall 2006
Prerequisite:

FR 426Y (IL) French Literature of the Renaissance (3) Survey of key texts from sixteenth century France, with attention to historical and philosophical currents of French social thought.
Effective: Fall 2006
Prerequisite:

FR 430 (IL) Contemporary France (3) Study of contemporary French society, politics, and culture from 1870 to the present.
Effective: Summer 2013

Effective: Fall 2006
Prerequisite:

FR 440 (IL) Teaching of Romance Languages (3) Theories of second language acquisition. Current classroom practices in the teaching of Romance languages.
Effective: Spring 2006
Prerequisite:

FR 445Y (IL) Self and Society in Eighteenth-Century France (3) The changing relationship of the individual to society in pre-Revolutionary France will be explored in texts by major writers.
Effective: Spring 2006
Prerequisite:

FR 452Y (IL) Nineteenth-Century French Literature (3) Selected readings in romanticism, realism, and symbolism, including Balzac, Stendhal, Sand, Baudelaire, and others, with emphasis on cultural issues.
Effective: Fall 2006
Prerequisite:
Effective: Summer 2013
Prerequisite:

FR 458 (IL) African Literature of French Expression (3) Genesis of Franco-African literature in the 1930s; phases of the negritude movement; colonial and national literature.
Effective: Fall 2006
Prerequisite:

FR 460 (IL) Contemporary French Literature (3) Major authors and movements in French novel, drama, and poetry from Proust to the present.
Effective: Fall 2006
Prerequisite:

FR 470 (IL) Race and Gender Issues in Literatures in French (3) A critical presentation, taught in French, of changing ideas and values on race and gender in French and Francophone literatures.
Effective: Summer 2005
Prerequisite:

FR 475 Women's History in Post-Revolutionary France (3-6 per semester/maximum of 6) Women's history and creativity in post-revolutionary France.
Effective: Summer 2013
Prerequisite:

FR 487 (IL) Topics in French Film History and Theory I: 1895-1945 (3) Provide background needed to understand the broad outlines of French film history and theory in their first fifty years (1895-1945).
Effective: Spring 2006
Prerequisite:

FR 488 (IL) Topics in French Film History and Theory II: 1945-2002 (3) Provide background needed to understand the broad outlines of French film history and theory in their second half-century (1945-2002).
Effective: Spring 2006
Prerequisite:

FR 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

FR 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

FR 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1998
Prerequisite:

FR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

FR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

FR 499 (IL) Foreign Study--French (3-12) Advanced studies in French language and literature.
Effective: Summer 2005
Prerequisite:

FR 500 History of the French Language (3) Evolution of French from its origins to the present-day, with emphasis on Old French philology.
Effective: Fall 1984

FR 501A Pro-Seminar in French Studies I (1.5) Professional and scholarly development in interdisciplinary French Studies.
Effective: Fall 2013

FR 501B Pro-Seminar in French Studies II (1.5 per semester/maximum of 3) Professional and scholarly development in interdisciplinary French Studies.
Effective: Fall 2012
Prerequisite:

FR 502 Introduction to French Linguistics (3) An overview of the major subfields of linguistics as they apply to the French language.
FR 503 French Phonology (3) A theoretical approach to the sound structure of French. Effective: Spring 2007

FR 505 Semantics of French (3) An in-depth study of how meaning is computed based on French data. Effective: Spring 2007

FR 510 Stylistique Avancée (3) An introduction to literary creativity through practice of textual analysis, interpretation, and to basic concepts of contemporary poetics. Effective: Summer 1999

FR 529 Seminar in Renaissance Literature (3 per semester/maximum of 6) Intensive study of various French Renaissance writers in relation to selected artistic issues of the period. Effective: Fall 1983

FR 530 La France Contemporaine (3) A comprehensive cross-sectional view of French society and its institutions since World War II. Effective: Winter 1980

FR 531 Francophone Culture (3 per semester/maximum of 6) Concept of francophone; French minorities in Europe and North America; role of French language in Africa, Middle East, Far East. Effective: Fall 1983

FR 532 French Regions and Regionalisms (3) Interdisciplinary perspectives on the culture, history, and geography of the French regions and their regionalist identity movements. Effective: Spring 1992

FR 533 Baroque Aesthetics in Seventeenth-Century French Literature and Intellectual History (3) Based on the Foucauldian notion of episteme, the course analyzes major literary texts and intellectual trends. Effective: Fall 1999

FR 535 Texts and Performances (3) Based upon current theories of theater, the course focuses on problematics of French drama from the Seventeenth-Century to the present. Effective: Summer 1999

FR 540 Eighteenth-Century French Novel (3) Examination of the rise of the genre including formal considerations of narrative technique as well as historical context. Effective: Summer 1999

FR 545 Analysis of French Civilization (3 per semester/maximum of 6) French cultural aspects, other than language and literature, conducted in French with the collaboration of specialists outside the French department. Effective: Summer 1990

FR 547 Modernism and Postmodernism (3-6) Interdisciplinary approaches to these concepts, with a focus on artistic and literary objects in the French context. Effective: Spring 1994 Prerequisite:

FR 558 African Novel in French (3) Development of novel in French from colonial era to independence; Africanization of genre with African verbal artforms. Effective: Spring 1986

FR 559 Issues in Francophone Literatures (3) Diversity issues in Francophone literatures explored through various literary genres; variable focus may combine genre and topic. Effective: Spring 1997

FR 562 French Romanticism and Realism (3) Romanticism, realism, and their variations in the context of social and...
FR 564 Figures of Alterity in Nineteenth-Century French Literature (3) Representations of otherness in nineteenth-century French literature examined through race, gender, religion, and class paradigms.
Effective: Spring 1998

FR 565 Seminar: Nineteenth-Century Studies (1-6) Various nineteenth-century French writers considered in relation to selected esthetic and cultural problems raised during the period.
Effective: Fall 1983

FR 566 Women Writers in Nineteenth-Century France (3) Women's literary production in nineteenth-century France, including novels, poetry, travel narratives, children's literature, and essays.
Effective: Spring 1995

FR 569 Major Texts of Twentieth-Century French Literature (3-6) Established contemporary literary texts, figures, and aesthetic movements in various genres from Proust to Sartre and from Genet to Conde.
Effective: Summer 1999

FR 570 Modern French Poetry (3 per semester/maximum of 6) Exploration of the poetic genre and its diversification through poetic prose, free verse, and metaphorical narrative, from Baudelaire to Cixous.
Effective: Summer 1999

FR 571 French Literary Theory and Criticism (3) Major trends in contemporary theory and criticism from genre debates to socio-political approaches to literature, post-structuralism, deconstruction, and reception theories.
Effective: Summer 1999

FR 572 Seminar: Twentieth-Century French Literature (3 per semester/maximum of 6) Specialized consideration of contemporary writers; for advanced students.
Effective: Fall 1983

FR 574 French Folklore and Popular Culture (3) Historical survey of French folklore and popular culture, with an emphasis on the modern period.
Effective: Summer 1993

FR 580 Approaches to French Civilization (3) French interdisciplinary methods of cultural analysis and cultural history, with applications to French cultural artifacts.
Effective: Spring 1992

FR 581 Theory and Techniques of Teaching French (1-6) No description.
Effective: Fall 1983

FR 589 (CMLIT 589, GER 589, SPAN 589) Technology in Foreign Language Education: An Overview (3) Approaches to the uses and research applications of multimedia and other educational technologies applied to the teaching of foreign languages. (also crosslisted with APLNG 589)
Effective: Spring 2004

FR 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

FR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

Effective: Fall 1983

FR 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

FR 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Activities to be included in the teaching assignment will be lecturing, leading discussions, conducting recitations, correcting and grading student papers and examinations.
Effective: Fall 1983
FR 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. Effective: Fall 1999

FR 610 **Thesis Research Off Campus** (1-15) No description. Effective: Fall 1983

FR 611 **Ph.D. Dissertation Part-Time** (0) No description. Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Fuel Science (F SC)

F SC 401 Introduction to Fuel Technology (3) An introduction to the scientific and engineering principles of fuel technology. For non-fuel science majors; fuel science majors will not receive credit.
Effective: Summer 2007
Prerequisite:

F SC 431 The Chemistry of Fuels (3) Nature and properties of fossil and other fuels, including aerospace, in relation to use; preparation of fuels; by-products; fuel analysis.
Effective: Spring 2008
Prerequisite:

F SC 432 (CH E 432) Petroleum Processing (3) A study of physical and chemical processes to convert crude oil into desired products with an outlook from present to future.
Effective: Summer 2007
Prerequisite:

F SC 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2000

F SC 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

F SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

F SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1999

F SC 503 Analytical Methods in Fuel Science (3) Analytical and characterization methods used in fuel science and applied to fuel processing, combustion, and conversion are emphasized.
Effective: Spring 2009
Prerequisite:

F SC 504 Problems in Fuels Engineering (3) A problem-based, active learning course on the utilization of fossil fuels and renewable energy.
Effective: Fall 2009
Prerequisite:

F SC 506 Carbon Reactions (3) Current approaches to heterogeneous reactions in combustion and gasification of carbonaceous solids, including those derived from coal and petroleum sources.
Effective: Spring 1999
Prerequisite:

F SC 590 (MNG 590, P N G 590, EME 590) Colloquium (1-3) Continuing seminars which consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.
Effective: Spring 2009

F SC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

F SC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1999

Effective: Spring 1999

F SC 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1999

Effective: Spring 1999
F SC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 1999

Last Import from UCM: May 24, 2014 3:00 AM
Gastroenterology-Hy (GI)

GI 723 Gastrointestinal Pathophysiology and Nutrition (1) Course provides exposure to foundational sciences and clinical medicine relating to the gastrointestinal tract, pancreas, biliary system, and liver, and nutrition.
Effective: Summer 2014
Prerequisite:

GI 729 Gastroenterology (5) Some of the areas studied will be: smooth muscle physiology; peristalsis and sphincter function; neuro-homonal control of motility; psychophysiologic interaction in the gut; and symptoms of altered GI motility.
Effective: Fall 2001
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Genetics (GENET)

GENET 581 Genetics of Model Organisms: Bacterial and Viral Pathogenesis: A (1) Examines uses of genetic studies in understanding biological processes associated with bacterial and viral pathogenesis.
Effective: Fall 2007
Prerequisite:

GENET 582 Genetics of Model Organisms: Molecular Genetic Analysis of Signaling Pathways: B (1) Examines uses and interrelationships of genetic studies with model systems from yeast to mice in elucidating signaling pathways.
Effective: Fall 2007
Prerequisite:

GENET 583 Genetics of Model Organisms: Genetic Analysis of Cancer and Cancer-related Phenotypes: C (1) Examines uses and interrelationships of genetic studies with model eukaryotes in understanding biological processes.
Effective: Fall 2007
Prerequisite:

GENET 584 Human Genetics A: Human Chromosomes (1) This course explores the human chromosome analysis and disease gene identification for simple mendelian disorders.
Effective: Fall 2007
Prerequisite:

GENET 585 Human Genetics B: Non-mendelian Genetics (1) This course explores genetic disease mechanisms that alter chromosome behavior or show non-mendelian patterns of inheritance.
Effective: Fall 2007
Prerequisite:

GENET 586 Human Genetics C: Complex Traits (1) This course explores the human genome landscape, how individuals vary, and gene identification for multigenic traits and disorders.
Effective: Fall 2007
Prerequisite:

GENET 587 Genetic Approaches to Biomedical Problems (3) Advanced training of students with interest in genetic approaches to problem solving.
Effective: Spring 2010
Prerequisite:

GENET 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

GENET 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1990

GENET 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1990

GENET 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1996

GENET 600 Thesis Research (1-15) No description.
Effective: Fall 1983

GENET 601 Ph.D. Dissertation Full Time (0) No description.
Effective: Fall 1983

GENET 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

GENET 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Geo-Environmental Engineering (GEOEE)

GEOEE 557 Computational Geomechanics I (3) Finite element and boundary element analysis of rock mechanics, groundwater flow, and mass transport.
Effective: Spring 2012

GEOEE 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1999

GEOEE 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1999

GEOEE 597 Special Topics (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1999

GEOEE 600 Thesis Research (1-15) No description.
Effective: Spring 2000

GEOEE 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 2000

Effective: Spring 2000

GEOEE 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 2000

Last Import from UCM: May 24, 2014 3:00 AM
Geodesign (GEODZ)

GEODZ 511 Geodesign History, Theory, Principles (3) Students study the theory and principles of geospatially-based design by investigating the methods and collaborative nature of the geodesign process.
Effective: Summer 2013
Prerequisite:

GEODZ 596A Individual Studies--Geodesign Capstone Project Proposal and Peer Review (3) Preparation and peer-review presentation of proposal for an individual capstone geodesign project.
Effective: Spring 2014
Prerequisite:

GEODZ 596B Individual Studies--Geodesign Capstone Project Dissemination (3) Preparation and dissemination of geodesign capstone project results in a formal professional venue.
Effective: Spring 2014
Prerequisite:

GEODZ 822 GeoDesign Models I: Evaluation and Decision (3) The principles, inherent values and practical applications of Evaluation and Decision models as implemented within the Geodesign Framework.
Effective: Summer 2013
Prerequisite:

GEODZ 824 GeoDesign Models II: Process and Impact (3) The principles, inherent values and practical applications of Process and Impact models as implemented within the Geodesign Framework.
Effective: Summer 2013
Prerequisite:

GEODZ 826 GeoDesign Models III: Representation and Change (3) The principles, inherent values and practical applications of Representation and Change models as implemented within the Geodesign Framework.
Effective: Summer 2013
Prerequisite:

GEODZ 842 Geodesign Studio I: Rural/Regional Challenges (6) Problems-based workshop where students apply geodesign process, in a collaborative setting, to regional-scale landscape change and land planning topics.
Effective: Spring 2014
Prerequisite:

GEODZ 852 Geodesign Studio II: Urban/District-scale Challenges (6) Problems-based workshop where students apply geodesign process, in a collaborative setting, to urban-scale landscape change and land planning topics.
Effective: Spring 2014
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Geography (GEOG)

GEOG 411 Forest Geography (3) This course studies processes that control spatial and temporal change in forests.
Effective: Fall 2007
Prerequisite:

GEOG 411W Forest Geography (3) This course studies processes that control spatial and temporal change in forests.
Effective: Fall 2007
Prerequisite:

GEOG 412W Climatic Change and Variability (3) Theories and observations of past, present, and future climatic change and variability; introduction to techniques used in climatic change research.
Effective: Spring 2007
Prerequisite:

GEOG 414 Principles and Applications in Landscape Ecology (1-3) Introduction to the ways in which spatial patterns and processes operate in an ecological context.
Effective: Spring 2014
Prerequisite:

GEOG 417 Satellite Climatology (3) A discussion of the application of satellite data to current and planned large-scale climate experiments.
Effective: Spring 2007
Prerequisite:

GEOG 420Y (US;IL) Comparative Urbanism (3) This course investigates selected urban issues through the lens of comparative urbanism.
Effective: Fall 2011
Prerequisite:

GEOG 423Y (US) Historical Geography of North America (3) Exploration, settlement, and changing patterns of human occupancy from the seventeenth century to the 1930s.
Effective: Fall 2011
Prerequisite:

GEOG 424 (US;IL) Geography of the Global Economy (3) Focus on industrial location theory, factors in industrial location, studies of selected industries and problems of industrial development.
Effective: Spring 2011
Prerequisite:

GEOG 425 (US) Geography of Race, Class, and Poverty in America (3) This class examines the spatial interactions of race, class and poverty in the United States.
Effective: Fall 2011
Prerequisite:

GEOG 426Y (US;IL) (WMNST 426Y) Gender Geographies (3) Description and explanation of the links between gender relations and spatial structures.
Effective: Fall 2013
Prerequisite:

GEOG 427 (US;IL) Urban Historical Geography (3) Study of the development and transformation of the historical urban built environment.
Effective: Spring 2007
Prerequisite:

GEOG 428 (US) Political Geography (3) Geographical foundations of political phenomena; significant geographic factors in growth and development of states, boundary problems, population distribution, colonies, and internal and international regional problems.
Effective: Spring 2007
Prerequisite:

GEOG 428Y (US;IL) Political Geography (3) Geographical foundations of political phenomena; significant geographic factors in growth and development of states, boundary problems, population distribution, colonies, and internal and international regional problems.
Effective: Spring 2012
Prerequisite:

GEOG 429 (US;IL) Geographic Perspectives on Global Urbanization (3) This course reflects critically on a number of issues related to global urbanization, including the culture and political economy of urban space.
Effective: Spring 2012
Prerequisite:

GEOG 430 Human Use of Environment (3) The human use of resources and ecosystems and social causes and consequences of environmental degradation in different parts of the world; development of environmental policy and management strategies.
Effective: Fall 2008
Prerequisite:
GEOG 431 Geography of Water Resources (3) Perspectives on water as a resource and hazard for human society; water resource issues in environmental and regional planning.
Effective: Spring 2007
Prerequisite:

GEOG 432 (EME 432) Energy Policy (3) Analysis, formulation, implementation, and impacts of energy-related policies, regulations, and initiatives.
Effective: Summer 2010
Prerequisite:

GEOG 434 Politics of the Environment (3) This course explores politics related to the use, transformation, valuation, and representation of the environment.
Effective: Spring 2007
Prerequisite:

GEOG 435H (IL) Global Change and Sustainability - Bulgaria (3) Sustainability in the context of climate change, global socioeconomic change and regional transformation in Bulgaria; embedded foreign fieldwork (honors).
Effective: Summer 2008
Prerequisite:

GEOG 436 Ecology, Economy, and Society (3) Analyses of major themes in ecology and economic development, poverty-alleviation, and sustainability.
Effective: Summer 2006
Prerequisite:

Effective: Spring 2012
Prerequisite:

GEOG 439 Property and the Global Environment (3) This course reviews theoretical and empirical relationships between multiple legal, economic, and cultural approaches to property, and environmental quality and conflicts.
Effective: Summer 2006
Prerequisite:

GEOG 440 Topics in Regional Geography (3) Analysis of historical, contemporary and future environmental and societal issues in a specified world region from a geographical perspective.
Effective: Summer 2006
Prerequisite:

GEOG 444 African Resources and Development (3) Ecological and cultural factors in the geography of Africa; natural resources and development.
Effective: Spring 2001
Prerequisite:

GEOG 461W Dynamic Cartographic Representation (3) Theory and practice of mapping and geo-representation in a dynamic media context. Applications in science, policy, travel, and education.
Effective: Spring 2010
Prerequisite:

GEOG 463 Geospatial Information Management (3) This course examines geospatial data representations and algorithmic techniques that apply to spatially-organized data in digital form.
Effective: Fall 2011
Prerequisite:

GEOG 464 Advanced Spatial Analysis (3) Skills and knowledge for applying quantitative methods to analyze information with spatial distributions.
Effective: Spring 2012
Prerequisite:

GEOG 467 Applied Cartographic Design (3) Project-based map production problems with emphasis on map design and advanced mapping tools in geographic information systems.
Effective: Fall 2011
Prerequisite:

GEOG 468 Geographic Information Systems Design and Evaluation (3) Design and evaluation of Geographic Information Systems and other forms of integrated spatial data systems.
Effective: Spring 2007
Prerequisite:

GEOG 469 Energy Industry Applications of GIS (3) Roles of geographic information systems in energy siting decisions focusing on electric energy transmission networks.
Effective: Summer 2010
Prerequisite:

GEOG 475H (LER 475H) Labor in the Global Economy: U.S. and South African Perspectives (3) This course focuses on how the nature of work is changing in the global economy, and the implications for economic opportunity and inequality in both.
Effective: Spring 2008
Prerequisite:
GEOG 480 Exploring Imagery and Elevation Data in GIS Applications (3) Using imagery and terrain data in typical application scenarios faced by the geospatial professional.
Effective: Spring 2013
Prerequisite:

GEOG 482 The Nature of Geographic Information (2) Orientation to the properties of geographic data and the practice of distance learning.
Effective: Summer 2004
Prerequisite:

GEOG 483 Problem-Solving with GIS (3) How geographic information systems facilitate data analysis and communication to address common geographic problems.
Effective: Summer 2004
Prerequisite:

GEOG 484 GIS Database Development (3) Database design, creation, maintenance, and data integration using desktop GIS software.
Effective: Summer 2004
Prerequisite:

GEOG 485 GIS Programming and Customization (3) Customizing GIS software to extend its built-in functionality and to automate repetitive tasks.
Effective: Fall 2007
Prerequisite:

GEOG 486 Cartography and Visualization (3) Theory and practice of cartographic design emphasizing effective visual thinking and visual communication with geographic information systems.
Effective: Summer 2004
Prerequisite:

GEOG 487 Environmental Applications of GIS (3) Real-world applications of GIS and spatial analysis to investigate a variety of current environmental issues.
Effective: Spring 2010
Prerequisite:

GEOG 488 Acquiring and Integrating Geospatial Data (3) Advanced technical, legal, ethical and institutional problems related to data acquisition for geospatial information systems.
Effective: Summer 2004
Prerequisite:

GEOG 489 GIS Application Development (3) Advanced topics in GIS customization, including the Systems Development Life Cycle, packaging and deployment, and consuming Web services.
Effective: Summer 2004
Prerequisite:

GEOG 493 Service Learning (3-12) Classroom instruction with supervised student activity on a group community service project.
Effective: Summer 2006
Prerequisite:

GEOG 494 Research Project in Geography (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2006
Prerequisite:

GEOG 494H Research Project in Geography (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007
Prerequisite:

GEOG 495 Internship (1-13) Supervised off-campus, non-group instruction including individual field experience, practicums, or internships. Written and oral critique of activity required.
Effective: Fall 1981
Prerequisite:

GEOG 495B Geography Teaching Internship (1-10) Supervised undergraduate teaching experience in which students serve as peer tutors, laboratory assistants, or course material developers.
Effective: Summer 2004

GEOG 495C Internship Supervision and Mentoring (1) Candidates for the Master of GIS degree sponsor a GIS-related internship for students in Penn State’s resident undergraduate program.
Effective: Summer 2004

GEOG 495G Giscience Internship (1-10) Supervised research experience within the Department of Geography's GeoVISTA Center, Gould Center, or an appropriate external agency.
Effective: Spring 2007
Prerequisite:

GEOG 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an
GEOG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

GEOG 497B Location Intelligence for Business (3) Understanding location technology and geospatial analysis to support an efficient and effective pathway to better business decisions.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

GEOG 497C GIS for Transportation Principles, Data, and Applications (3) This course examines the use of GIS principles, data, and applications that have been developed for the field of transportation.
Effective: Summer 2014 Ending: Summer 2014
Prerequisite:

GEOG 497D Lidar Technology and Applications (3) Understanding lidar systems’ design, operation, data processing techniques, and product generation to address typical application scenarios faced by the geospatial professional.
Effective: Summer 2014 Ending: Summer 2014

GEOG 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1998

GEOG 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2006
Prerequisite:

GEOG 500 Introduction to Geographic Research (1-3) No description.
Effective: Spring 1981

GEOG 501A Research Perspectives in Physical Geography (1) This course presents contemporary perspectives on Physical Geography, emphasizing the major issues and integrative themes of the sub-discipline.
Effective: Summer 2008

GEOG 501B Research Perspectives in Human Geography (1) This course presents contemporary perspectives on Human Geography, emphasizing the major issues and integrative themes of the sub-discipline.
Effective: Fall 2007

GEOG 501C Research Perspectives in Human-Environment Geography (1) Contemporary perspectives on Human-Environment Geography, emphasizing major issues and integrative themes of the sub-discipline.
Effective: Summer 2008

GEOG 501D Research Perspectives in GIScience (1) This course presents contemporary perspectives on Geographic Information Science, emphasizing the major issues and integrative themes of the sub-discipline.
Effective: Summer 2008

GEOG 502 Research Scholarship in Geography (3) Learning the craft of scholarly research in geography.
Effective: Summer 2008
Prerequisite:

GEOG 510 Seminar in Physical Geography (3 per semester/maximum of 18) Analysis of current literature in physical geography focusing on theoretical and methodological debates.
Effective: Summer 2012
Prerequisite:

GEOG 520 Seminar in Human Geography (3 per semester/maximum of 18) Analysis of current literature in human geography focusing on theoretical and methodological debates.
Effective: Spring 2012

GEOG 521 Map Symbolization and Design Theory (3) Introduction to theoretical issues in map design and symbolization with emphasis on current research trends and practical application of research. Students who have passed GEOG 421 may not schedule this course for credit.
Effective: Spring 2007
Prerequisite:
GEOG 530 Human-Environment Seminar (3 per semester/maximum of 18) Theory and method in human-environment interaction subfields; may be re-taken when topics vary; readings, discussions, research. Effective: Spring 2012

GEOG 560 Seminar in Geographic Information Science (3 per semester/maximum of 18) Geographic information science problems/theory, e.g. GIS, cartography, remote sensing, spatial analysis, modeling. Effective: Fall 2011

GEOG 565 Selected Topics in Geographic Information Science (3) Examination of geographic information science topics: GIS, cartography, remote sensing, spatial analysis, modeling, spatial cognition, geospatial semantics, geovisualization. Effective: Spring 2012

GEOG 571 Intelligence Analysis, Cultural Geography, and Homeland Security (3) The application of cultural geography in the intelligence analysis and synthesis process by identifying prominent threats to civil security. Effective: Summer 2014

GEOG 580 Spatial Data Structures and Algorithms (3) In-depth examination of geographic information system components; representation and storage of spatial data, spatial algorithms, input-output considerations. Students who have passed GEOG 480 may not schedule this course for credit. Effective: Summer 1987

Prerequisite:

GEOG 583 Geospatial System Analysis and Design (3) Systematic approach to requirements acquisition, specification, design and implementation of geospatial information systems. Effective: Summer 2004

Prerequisite:

GEOG 584 Geospatial Technology Project Management (3) Principles of effective project management applied to the design and implementation of geospatial information systems. Effective: Summer 2004

Prerequisite:

GEOG 585 Open Web Mapping (3) Design, development, and implementation of web mapping applications using OGC standards and open source software. Effective: Spring 2008

Prerequisite:

GEOG 586 Geographical Information Analysis (3) Choosing and applying analytical methods for geospatial data, including point pattern analysis, interpolation, surface analysis, overlay analysis, and spatial autocorrelation. Effective: Summer 2004

Prerequisite:

GEOG 587 Conservation GIS (3) Conservation GIS applies geospatial problem solving to ecological research and resource management issues to enhance conservation planning. Effective: Summer 2009

Prerequisite:

GEOG 588 Planning GIS for Emergency Management (3) Requirements analysis and proposal writing to plan and implement GIS solutions supporting emergency management activities of government agencies and contractors. Effective: Summer 2008

Prerequisite:

GEOG 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

GEOG 591 GIS for Health Analysis (3) Applications and theory in geographic information systems for analyzing the geographic dimensions of human health. Effective: Fall 2013

Prerequisite:

GEOG 594A Culminating Experiences in Geospatial Intelligence (1-3 per semester/maximum of 3) Culminating experiences in current professional and ethical problems facing the geospatial intelligence professional. Effective: Spring 2011

Prerequisite:

GEOG 594B Geospatial Intelligence Capstone Experience (2) Culminating experience in the iMPS-HLS for the online geospatial intelligence option. Effective: Summer 2012

Prerequisite:

GEOG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

The Pennsylvania State University
GEOG 596A Individual Studies -- Peer Review (3) Preparation and presentation of a proposal for an individual capstone project, and reviews of presentation by student peers. Effective: Summer 2014 Ending: Summer 2014

GEOG 596B Individual Studies -- Capstone Project (3) Preparation and delivery of a formal professional presentation of the results of an individual capstone project. Effective: Summer 2014 Ending: Summer 2014

GEOG 596I Independent Study in Geospatial Intelligence (3) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2014 Ending: Summer 2014

GEOG 596K Independent Study in Geospatial Intelligence (1) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2014 Ending: Summer 2014

GEOG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 1987

GEOG 597A Data Mining for Geoinformatics (3) Different computational methodologies to solve geospatial problems, focusing on remote sensing, numerical models and social media 'big data'. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

GEOG 597E Emerging Trends in Remote Sensing and Advanced Image (3) Advanced topics in remote sensing and image processing, including new sensors, applications, and decision making. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

GEOG 597I Special Topics in Geospatial Intelligence Futures (3) Addresses cutting edge Geospatial Intelligence topics that impact the global academic and professional community. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

GEOG 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Fall 2006

GEOG 600 Thesis Research (1-15) No description.

The Pennsylvania State University
GEOG 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

GEOG 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Theoretical and practical aspects of undergraduate instruction in geography.
Effective: Fall 1983
Prerequisite:

GEOG 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 2001

GEOG 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

GEOG 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

GEOG 860 Comparative GIS (3) Formal methodology for evaluating, comparing, and recommending geospatial software solutions for a variety of professional uses.
Effective: Summer 2009
Prerequisite:

GEOG 861 Map Projections for Geospatial Professionals (1) Cultivates a working knowledge of map projections that professionals need to process geospatial data effectively for mapping and analysis.
Effective: Spring 2008
Prerequisite:

GEOG 862 GPS and GNSS for Geospatial Professionals (3) Cultivates a working knowledge of current and future capabilities of GPS and the emerging Global Navigation Satellite System.
Effective: Spring 2010

GEOG 863 GIS Mashups for Geospatial Professionals (3) Cultivates a working knowledge of how and why geospatial professionals develop web mapping applications that combine data from multiple sources.
Effective: Spring 2010
Prerequisite:

GEOG 864 Professionalism in Geographic Information Science and Technology (2) Prepares current and aspiring professionals to recognize, analyze and address legal and ethical issues in the GIS&T (geospatial) field.
Effective: Summer 2009

GEOG 865 Cloud and Server GIS (3) Theory and practical applications of using cloud computing and server resources to solve geospatial problems.
Effective: Summer 2014
Prerequisite:

GEOG 862 Geographic Foundations of Geospatial Intelligence (3) Orientation to the geographic foundations of geospatial intelligence and its applications in national security, international relief work, and disaster management.
Effective: Summer 2008

GEOG 883 Remote Sensing for the Geospatial Intelligence Professional (3) Understanding remote sensing systems’ operation, data products, and processing techniques to address typical problem scenarios faced by the GEOINT professional.
Effective: Summer 2008
Prerequisite:

GEOG 884 Geographic Information Systems for the Geospatial Intelligence Professional (3) How geographic information systems facilitate data analysis and communication to address common geographic problems faced by the geospatial intelligence professional.
Effective: Summer 2008
Prerequisite:

GEOG 885 Advanced Analytic Methods in Geospatial Intelligence (3) Prepares current and aspiring geospatial intelligence professionals to apply and interpret results of non-quantitative analysis and modeling techniques.
Effective: Summer 2009
Prerequisite:

GEOG 889 Seminar in Geospatial Intelligence (2) Culminating experience that synthesizes topics addressed in earlier classes and explores emerging topics and methods of geospatial intelligence analysis.
Effective: Spring 2010
Prerequisite:
GEOG 897 Special Topics (1-9) Formal courses given on a topical or special interest subject.
Effective: Summer 2009

GEOG 897A Cultural Intelligence, Applied Geography, and Homeland Security (3) The process of geographically analyzing social, political, economic, and demographic information to understand human history, institutions, beliefs, and behaviors.
Effective: Summer 2014 Ending: Summer 2014

GEOG 897C Cloud and Server GIS (3) Students will evaluate and implement GIS which use cloud and server resources, using infrastructure, platform, and software service models.
Effective: Summer 2014 Ending: Summer 2014

GEOG 897D Spatial Database Management for Geospatial Professionals (3) Advanced topics in the storage, management, and retrieval of geospatial data using common proprietary and open-source relational database technologies.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

GEOG 897K Map Projections for Geospatial Professionals (3) Cultivates a working knowledge of map projections that professionals need to process geospatial data effectively for mapping and analysis.
Effective: Summer 2014 Ending: Summer 2014
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Geosciences (GEOSC)

GEOSC 402Y (IL) Natural Disasters (3) Case studies of the causes and consequences of natural disasters; analysis of disaster impact in different economic, cultural, and social conditions.
Effective: Summer 2005
Prerequisite:

GEOSC 405 (SOILS 405) Hydropedology (3) Soil and water interactions across scales, integrated studies of landscape-soil-water relationships, fundamental processes of water flow and chemical transport.
Effective: Spring 2008
Prerequisite:

GEOSC 409W Geomicrobiology (3) Investigation of modern and ancient microbial interactions with soils, sediments, the atmosphere, minerals, rocks, nutrients, and pollutants.
Effective: Summer 2008
Prerequisite:

GEOSC 410 Marine Biogeochemistry (3) Exploration of the ways in which life influences and is influenced by chemical, physical, and geological processes in the ocean.
Effective: Summer 2012
Prerequisite:

GEOSC 412 Water Resources Geochemistry (3) Aqueous geochemistry of silica, alumina, carbonate minerals, and selected metals; organic species in water; isotope geochemistry applied to water.
Effective: Summer 2007
Prerequisite:

GEOSC 413W Techniques in Environmental Geochemistry (3) This course teaches techniques needed for the collection, chemical analysis, and data analysis of environmental geochemical measurements. This course has one or more required field trips for which a fee is charged to the student.
Effective: Spring 2002
Prerequisite:

GEOSC 415 Geochemistry (3) Element abundance and genesis, application of chemical principles to earth materials, element fractionation in geologic processes.
Effective: Spring 2011
Prerequisite:

GEOSC 416 Stable and Radioactive Isotopes in Geosciences: Introduction (3) Discussions on theories for natural isotopic and element variations and their applications to the solution of geologic and cosmologic problems.
Effective: Summer 2007
Prerequisite:

GEOSC 418 (SOILS 419) Soil Environmental Chemistry (3) Introduction to chemical constituents and processes occurring in soils. Topics include mineral weathering, soil solution chemistry and adsorption of solutes.
Effective: Summer 2007
Prerequisite:

GEOSC 419 The Organic Geochemistry of Natural Waters and Sediments (3) Composition, sources, and fates of particulate and dissolved organic matter in natural environments; biogeochemical processes; organic geochemistry of anthropogenic contaminants.
Effective: Summer 2007
Prerequisite:

GEOSC 420 (BIOL 420) Paleobotany (3) Classification, morphology, phylogeny, and stratigraphic occurrence of fossil plants; practicum includes field trips and study of paleobotanical techniques and specimens.
Effective: Spring 2005
Prerequisite:

GEOSC 422 Vertebrate Paleontology (3) Course covers scientific thinking and skills in scientific writing, the history of vertebrates, and modern evolutionary theory applied to vertebrates. This course contains from one to several field trips for which an additional charge will be made to cover transportation.
Effective: Spring 2009
Prerequisite:

GEOSC 424 Paleontology and Fossils (3) Concepts and procedures using fossils to solve problems in systematics, evolution, biostratigraphy, correlation, sedimentation, paleoecology, and global change.
Effective: Spring 2001
Prerequisite:

GEOSC 434 Volcanology (3) Phenomena and products of volcanic eruptions; physical characteristics of lava and
pyroclastic material.
Prerequisite:

GEOC 439 Principles of Stratigraphy (3) An introduction to the description and genesis of sedimentary rock bodies, the determination of their stratal geometries, and their correlation. (This course includes from one to several field trips for which an additional charge will be made to cover transportation.)
This course contains from one to several field trips for which an additional charge will be made to cover transportation.
Effective: Spring 2011
Prerequisite:

GEOC 440 Marine Geology (3) Chemical and physical processes affecting the topography and sediments of the sea floor.
Effective: Spring 2001
Prerequisite:

Effective: Spring 2009
Prerequisite:

GEOC 450 Risk Analysis in the Earth Sciences (3) An introduction to concepts and methods of quantitative risk analysis with focus on water, climate, and energy related risks.
Effective: Spring 2010
Prerequisite:

GEOC 451 Natural Resources: Origins, Economics and Environmental Impact (3) Geologic, economic and environmental issues related to exploitation of non-renewable natural resources (metals, minerals, rocks, and fossil fuels).
Effective: Fall 2006
Prerequisite:

GEOC 452 Hydrogeology (3) Hydrologic cycle: occurrence, movement, quality, and quantity of groundwater; solute transport; quantitative hydrogeologic methods: role of water in geologic processes. This course has one or more required field trips for which a fee may be charged to the student.
Effective: Spring 2008
Prerequisite:

GEOC 454 Geology of Oil and Gas (3) Properties, origin, migration, and occurrence of oil and gas. This course has one or more required field trips for which a fee is charged to the student.
Effective: Spring 2002
Prerequisite:

GEOC 461 Geology of North America (3) Evolution of structural-stratigraphic framework of continent; interpretation of relevant data obtained from field, experimental, and geophysical observation.
Effective: Spring 2001
Prerequisite:

GEOC 465 Structural Geology (4) Effects and mechanics of deformation of the earth's crust; practicum includes field trips and studies of maps and structural problems. This course has one or more field trips for which a fee is charged to the student.
Effective: Spring 2002
Prerequisite:

GEOC 470W Introduction to Field Geology (3) Field interpretation of geologic features; principles and techniques of geologic mapping; interpretation of geologic maps and diagrams. This course has one or more required field trips for which a fee is charged to the student.
Effective: Spring 2002
Prerequisite:

GEOC 472A Field Geology I (Introduction to Field Methods) (3) Introduction to geologic field methods and the 3-D characterization of earth structure and the reconstruction of geologic histories. This course includes travel outside the University for which an additional charge will be made to cover transportation, food, and lodging.
Effective: Summer 2005
Prerequisite:

GEOC 472B Field Geology II (Advanced Field Methods) (3) Advanced application of geologic field methods to the 3-D characterization of earth structure and the reconstruction of geologic histories. This course includes travel outside the University for which an additional charge will be made to cover transportation, food, and lodging.
Effective: Summer 2005
Prerequisite:

GEOC 474 (BIOL 474) Astrobiology (3) In depth treatment of principles/concepts of biochemical evolution, the origin/evolution of life; evaluation of distribution of life in the universe.
Effective: Summer 2007
Prerequisite:

GEOC 479 Advanced Stratigraphy (3) Modern topics of sequence stratigraphy are addressed, with a heavy emphasis on field and laboratory data analysis and interpretation.
Effective: Spring 1999
Prerequisite:
GEOSC 483 Environmental Geophysics (3) This course presents the principles and applications of the variety of techniques geophysicists use to address environmental problems.
Effective: Fall 2001
Prerequisite:

GEOSC 487 Analysis of Time Series (3) Nonstatistical approach to data analysis; spectral and correlation analysis; filter theory; signal-to-noise improvement applied to geoscience data.
Effective: Fall 2010
Prerequisite:

GEOSC 488 An Introduction to Seismology (4) An overview of the observations, methods, and frameworks used in seismogram analysis for earthquake and earth-structure investigations (includes laboratory).
Effective: Spring 2003
Prerequisite:

GEOSC 489 Dynamics of the Earth (4) Constitution and dynamics of the solid earth; mechanics and consequences of Plate Tectonic processes.
Effective: Fall 2001
Prerequisite:

GEOSC 494M Senior Thesis (1-4) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2007
Prerequisite:

GEOSC 494W Senior Thesis (1-4) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Spring 2001
Prerequisite:

GEOSC 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2001

GEOSC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

GEOSC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

GEOSC 497A Geoscience Scholarship (3) Intended for geoscience majors seeking research careers. Major focus on core skills: writing, speaking, discussion, scientific literature, professionalism.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

GEOSC 497A Geologic Maps in ARCGIS (1) This course provides an introduction to Geographic Information Systems (GIS) and their use in making geologic maps.

GEOSC 497B Introduction to Remote-Sensing (3) Comprehensive introduction to theory and methods in remote-sensing, covering optical, thermal and radar methods and their application in geosciences.
Prerequisite:

GEOSC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1997

GEOSC 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

GEOSC 500 Issues in Geosciences (3) Introduction of first year graduate students to issues in geosciences.
Effective: Summer 2003
Prerequisite:

GEOSC 502 Evolution of the Biosphere (4) The geologic history of the co-evolution of life and the surface environment is examined from a systems perspective.
Effective: Spring 1999
Prerequisite:

GEOSC 505 Quantitative Physical Sedimentology (3) Principles of fluid mechanics and mathematical modeling; their use in describing sediment transport, sedimentary structures, and sedimentary environments.
Effective: Summer 1996

The Pennsylvania State University
GEOSC 508 Mechanics of Earthquakes and Faulting (3) An in-depth treatment of fundamental concepts in brittle faulting and earthquake mechanics with emphasis on physical processes.
Effective: Spring 2005
Prerequisite:

Effective: Spring 2005

GEOSC 512 (MATSE 512) Principles of Crystal Chemistry (3) Relation of structure to ionic size and nature; influence of pressure and temperature on structure; chemical-structural defects, crystalline solutions, phase-transitions.
Effective: Spring 2003

GEOSC 514 Data Inversion in the Earth Sciences (3) This course focuses on how one finds theoretical parameters to explain observed data using discrete inverse theory.
Effective: Spring 1999
Prerequisite:

GEOSC 518 Stable Isotope Geochemistry (3) Theory of isotope fractionation mechanisms; its application to a wide range of problems in the earth and planetary sciences.
Effective: Fall 1989

GEOSC 519 Mineral Equilibria (3) A thermodynamic treatment of minerals and their reactions under geochemically important conditions of temperature and pressure.
Effective: Summer 2007
Prerequisite:

GEOSC 521 Thermal State of the Earth (2-3) Analytical and numerical solutions to earth-related heat conduction and convection problems; geothermal energy; earth's heat flow and temperature.
Effective: Spring 1998

GEOSC 522 Geochemistry of Aqueous Systems (2-3) Ionic and molecular equilibria related to stabilities and solubilities of minerals, with applications to ground water, sea water, and hydrothermal fluids.
Effective: Summer 2007
Prerequisite:

GEOSC 523 Sedimentary Geochemistry (2) Kinetics and thermodynamics of low-temperature processes in sediments. Applications to weathering processes, natural waters, deposition of sediments, and diagenesis.
Effective: Summer 1996

GEOSC 529 Paleontology (1-6 per semester/maximum of 9) Morphology and distribution of significant fossil groups; sampling, preparation, and applications to biostatigraphy, evolution, paleoecology, sedimentation, and petrography.
Effective: Fall 1989

GEOSC 533 Principles of Geochemistry (3) A comprehensive treatment of the principles of geochemistry applied to a wide variety of geologic settings and scales.
Effective: Summer 2007
Prerequisite:

GEOSC 540 Ore Deposits I (3) Geochemistry and geology of ore deposits formed by igneous and high-temperature hydrothermal processes.
Effective: Fall 1989
Prerequisite:

GEOSC 541 Ore Deposits II (3) Geochemistry and geology of ore deposits formed by low-temperature hydrothermal, sedimentary, and metamorphic processes; continuation of GEOSC 540.
Effective: Fall 1989
Prerequisite:

GEOSC 542 Quantitative Methods in Hydrogeology (1-4) Investigation of groundwater systems and resources, emphasizing both the practical use and limitations of modeling techniques.
Effective: Fall 1989
Prerequisite:

GEOSC 545 Glacial Geology (3) Glaciers: their characteristics, causes, deposits, landforms, effects in periglacial regions.
Effective: Fall 1989

GEOSC 548 Surface Processes (3) Principles, application, and interpretation of Quaternary geochronology, surface process studies, and landscape evolution.
Effective: Spring 1999
Prerequisite:
GEOSC 555 Advanced Structure and Petrofabrics (1-3) Macroscopic and mesoscopic recognition, measurement, and interpretation of small-scale rock structures and mineral orientation patterns in deformed rocks. Effective: Fall 1989

GEOSC 558 Multi-channel Seismic Processing and Interpretation (4) This course covers the basics of seismic energy propagation, modern 2- and 3-D multi-channel seismic data acquisition methods, and data processing. Effective: Spring 1999
Prerequisite:

GEOSC 559 Seismology II (3) Rigorously covers the methods of computing wave fields for point and distributed seismic sources in vertically inhomogeneous elastic media. Effective: Spring 2005
Prerequisite:

GEOSC 560 Kinetics of Geological Processes (3) General development of the kinetic theory of crystal growth, diffusion, irreversible thermodynamics, and heterogeneous reactions needed for geosciences and related fields with applications to current problems. Effective: Summer 2007
Prerequisite:

GEOSC 561 Mathematical Modeling in the Geosciences (4) The process of transforming a conceptual geoscience model into a numerical model is presented; students create and solve numerical models. Effective: Spring 2000
Prerequisite:

GEOSC 565 Tectonic Geomorphology (3) Tectonic geomorphology examines interactions between tectonic and surface processes, paleosceismology, geodesy, structure, active deformation, and landform evolution. Effective: Summer 1998
Prerequisite:

GEOSC 572 Field Stratigraphy (1-2) This course introduces students to field techniques used by stratigraphers, with the capstone experience being a field trip during May. Effective: Fall 2005
Prerequisite:

GEOSC 584 Clastic Depositional Environments (3) Readings, group discussions, and field work on processes and sedimentary responses of common rock-forming environments. Effective: Fall 1989
Prerequisite:

Prerequisite:

GEOSC 587 Preparing for an Academic Career in the Geosciences (3) The course focuses on successful strategies for the academic job market and for launching an academic career. Effective: Spring 2009
Prerequisite:

GEOSC 589 Seminar in Aqueous Geochemistry (1) A seminar aimed at reading current articles in aqueous geochemistry and biogeochemistry. Effective: Fall 2001
Prerequisite:

GEOSC 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1989

GEOSC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1989

GEOSC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 1988

GEOSC 597A Ancient Carbonate Environments in the Field (2) Description and interpretation of Carbonate rocks in the field. Effective: Summer 2014 Ending: Summer 2014
Prerequisite:

GEOSC 597A Climatic Change: Past, Present, and Possible Futures (3) A seminar analyzing the current knowledge (and research needs) relevant to the climate system in the past and possible futures. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
GEOSC 597A Earth Talks (2) EarthTalks is an interdisciplinary seminar series that meets weekly and seeks to examine complex environmental challenges facing our world today.

GEOSC 597B Paleobiology Seminar (2) Discussion of foundational papers and current, including student, research in paleobiology.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

GEOSC 597C Topics in Earth Systems Science (2) EarthTalks is an interdisciplinary seminar series that meets weekly and seeks to examine complex environmental challenges facing our world today.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

GEOSC 597D Petroleum Geosystems (3) Provides an understanding of all phases of hydrocarbon exploration and production through a combination of team-based problems, field trips, industry lecture and site-visits. Required for Petroleum Geosystems emphasis.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

GEOSC 597E (SOILS 597E) Topics in Biogeochemistry (2) This seminar addresses chemical interactions between the biosphere and the physical environment over Earth’s history and as impacted by humans.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

GEOSC 597F Advanced Topics in Isotope Geochemistry (2) Detailed coverage of topics in high and low temperature geochemistry, including radioactive, radiogenic, and stable isotope systems (traditional and non-traditional).
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

GEOSC 597G Advanced Volcanology (2) Exploring the integration of geochemical and geophysical techniques for investigating active volcanic systems.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

GEOSC 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 1999

GEOSC 600 Thesis Research (1-15) No description.
Effective: Spring 1989

GEOSC 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1989

GEOSC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in teaching geosciences courses.
Effective: Fall 1983

GEOSC 610 Thesis Research Off Campus (1-15) No description.
Effective: Spring 1989

GEOSC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 1989

GEOSC 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2008

GEOSC 897A FTN and Astrobiology (1) Falcon Telescope Network 3-day educator workshop for teachers familiar with Astrobiology to learn how to request and access data drom the telescope network and utilize the telescope to explore space in real time with K-12 students.
Effective: Summer 2014 Ending: Summer 2014

Last Import from UCM: May 24, 2014 3:00 AM

The Pennsylvania State University
German (GER)

GER 401Y (IL) Advanced Composition (3) Intensive practice in writing different text types in German.
Effective: Spring 2012
Prerequisite:

GER 408 (IL) Advanced German Business Communications (3) Study of German business organization, forms of business communications, business terminology; writing of reports and abstracts.
Effective: Spring 2006
Prerequisite:

GER 411 The Teaching of German (3) Theory, methods, techniques, materials, bibliography; use of inter-active media; contributions of linguistics or psychology to language learning.
Effective: Summer 1994
Prerequisite:

GER 412 (IL) Contrastive Analysis of Modern German and English (3) Structural comparison of the German and English grammatical systems: morphology, syntax, phonology.
Effective: Spring 2006
Prerequisite:

GER 420 (IL) Genre (3-9) Special studies in a particular literary genre in German literature, such as lyrical poetry, drama, or narrative prose.
Effective: Spring 2006
Prerequisite:

GER 430 (IL) History of the German Language (3) Development of German from its earliest stages, including historical and cultural aspects.
Effective: Fall 2007
Prerequisite:

GER 431 (IL) History of German Literature and Culture I (3) Significant works of German literature before the mid-eighteenth century considered in their cultural context.
Effective: Spring 2006
Prerequisite:

GER 432 (IL) History of German Literature and Culture II (3) Significant works of German literature from the mid-eighteenth century to the present considered in their cultural context.
Effective: Spring 2006
Prerequisite:

GER 440 (IL) Seminar in German Culture (3-6) Seminar devoted to a special topic in the field of German culture and civilization.
Effective: Spring 2006
Prerequisite:

GER 472 (IL) Romanticism (3) A study of both early and late romanticism, including such writers as Novalis, the Schlegels, E.T.A. Hoffmann, and Heine.
Effective: Spring 2006
Prerequisite:

GER 489 Introduction to German Film History and Theory in Context (3) Introduces films in German since the 1960s and addresses issues relevant to German and European cultures and politics.
Effective: Spring 2005
Prerequisite:

GER 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

GER 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

GER 495 Internship (3-9) Supervised off-campus, non-group instruction including individual field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 1981
Prerequisite:

GER 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

GER 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

The Pennsylvania State University
GER 499 (IL) **Foreign Study--German** (3-12) Advanced studies in German language, literature, and culture. Effective: Summer 2005
Prerequisite:
GER 510 **Literary Theory: An Introduction** (3) Introduction to the major theoretical approaches to the contemporary study of culture (literature, film, art and politics). Effective: Spring 2004

GER 511 **The Teaching of College German** (3) Theory, methods, techniques, materials, bibliography contributions of linguistics and psychology to language learning; methods of teaching post-secondary German. Effective: Fall 2005

GER 513 **German Phonetics and Phonology** (3) This course examines German speech sounds and their organization into a linguistic system. Effective: Spring 2009

GER 514 **German Syntax** (3) This course provides an overview of morphosyntactic processes in German. Effective: Spring 2009

GER 515 **Introduction to German Applied Linguistics** (3) Introduction to the major areas of the broad field of Applied Linguistics as relevant to the study of German. Effective: Spring 2003

GER 516 **The Acquisition of German and Dutch** (3) This course examines how children and adult learners acquire German and Dutch in naturalistic settings (i.e. non-classroom situations). Effective: Spring 2009

GER 520 **Introduction to Middle High German** (3) Descriptive and historical grammar; readings in simple Middle High German texts. Effective: Winter 1978

GER 523 **Gothic** (3) Introduction to the historical and comparative Germanic grammar; emphasis on the Gothic language and texts. Suitable for advanced students in English. Effective: Winter 1978

GER 540 **Seminar in German Culture and Civilization** (3-12) Examination of special problems in German culture and civilization. Effective: Fall 1997

GER 541 **German Literature of the Renaissance and Baroque** (3) Intensive survey and review of German literature between 1450 and 1700. Effective: Fall 1997

GER 551 **German Literature from the Early Enlightenment to Storm and Stress** (3) Advanced overview of major developments in German literature from the early to the late 18th century. Effective: Fall 1997

GER 552 **German Classicism and Romanticism** (3) Intensive survey of German literature from the late 18th through the first third of the 19th centuries. Effective: Spring 1997

GER 561 **German Literature of the 19th Century--From Biedermeier to Realism** (3) Survey of major developments in German literature from the mid- to the late-19th century. Effective: Fall 1997

GER 571 **German Literature from the Turn of the Century to 1945** (3) Advanced survey of German literature from the era of Naturalism to that of Exile literature. Effective: Fall 1997

GER 572 **Post-War and Contemporary German Literature** (3) Intensive survey of German literature from Gruppe 47 through the literature of the GDR and down to the present. Effective: Spring 1997
GER 581 *Topics in Literary Genres* (3-12) Special studies in the German lyric, drama, short story, and novel.
Effective: Fall 1997

GER 582 *Topics in Germanic Philology and German Linguistics* (3 per semester, maximum of 12) Special studies of modern or older Germanic languages.
Effective: Summer 1997

GER 589 (CMLIT 589, FR 589, SPAN 589) *Technology in Foreign Language Education: An Overview* (3) Approaches to the uses and research applications of multimedia and other educational technologies applied to the teaching of foreign languages. (also crosslisted with APLNG 589)
Effective: Spring 2004

GER 591 *German Literary Theory and Criticism* (3-6) Examination of major movements in literary theory and criticism with special reference to German literary thought.
Effective: Fall 1997

GER 592 *Seminar in German Literature* (3 per semester, maximum of 12) Focused investigation of a major figure or theme in German literature.
Effective: Summer 1997

GER 593 *Seminar in German Philology and German Linguistics* (3 per semester, maximum of 12) Focused investigation of a major topic in Germanic philology or linguistics.
Effective: Summer 1997

GER 596 *Individual Studies* (1-9) Creative projects including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

GER 597 *Special Topics* (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

Effective: Fall 1983

GER 601 *Ph.D. Dissertation Full-Time* (0) No description.
Effective: Fall 1983

GER 602 *Supervised Experience in College Teaching* (1-3 per semester/maximum of 6) Instruction of lower division German courses with observation by the supervisor and attendance at regular meetings to discuss classroom techniques.
Effective: Fall 1983

GER 603 *Foreign Academic Experience* (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2000

Effective: Fall 1983

GER 611 *Ph.D. Dissertation Part-Time* (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Global Health (GH)

GH 717 Global Health Scholars First Year Elective (1-5) This course provides exposure to basic concepts of global health, tailored to first year medical students with a focus on community health assessment and engagement. Effective: Spring 2010
Prerequisite:

GH 727 Global Health Scholars Second Year Elective (1-5) This course provides exposure to basic concepts of global health, designed for the second year medical students, with a focus on the global burden of disease and community-oriented participatory research. Students will utilize the knowledge and skills gained during this year, guided by faculty, to develop a health improvement intervention for the host site (e.g. San Pablo, Ecuador). This elective does not meet graduation requirements. It is offered as part of the Global Health Scholars Program. Effective: Spring 2010
Prerequisite:

GH 747 Global Health Scholars Fourth Year Elective (4) Global Health Scholars 4th year elective. Effective: Summer 2011
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Government & Politic (GOVMT)

GOVMT 952 Administrative Law (3) This course is an introduction to the law of the administrative state - to the constitutional, statutory and judge-made rules governing what agencies may do, the procedures they must follow, and how they can be held to account.
Effective: Summer 2014

GOVMT 954 Election Law (2) This course covers federal and state election law and will examine the constitutional basis for the regulation of elections, the development of the law in this area over the last 30 years, as well as criminal and civil enforcement of the law, the role of the Federal Election Commission, the formation and regulation of political action committees, as well as related federal tax law provisions impacting operation of political committees and advocacy organizations. The course will also examine the intersection of the election law with congressional ethics rules, lobbying regulations and representation of political candidates and entities in election law matters.
Effective: Spring 2012

GOVMT 970 Legislation (3) This course deals with the enactment and construction of statutes with specific attention to the organization, procedures and powers of federal and state legislative bodies, to statutory drafting and construction, and to lobbying.
Effective: Summer 2011

GOVMT 971 Statutory Interpretation (3) The course covers the wide variety of tools that lawyers and judges use to interpret statutes. A basic introduction to the legislative process and how important aspects of that process are relevant to statutory interpretation is also included. Students will be introduced to important techniques of statutory interpretation and the theoretical support for varying approaches to how judges do and should interpret statutes.
Effective: Summer 2011

GOVMT 985 Aviation Law (2) This course seeks to give the students a firm grounding in the law governing the domestic use of airspace for transportation and recreation. The licensing requirements of pilots, the struggle of the aviation industry to adapt to the market, the safety and security of passengers and the problems involved in building airports are just a few of the topics covered. The course provides an opportunity for those students who are interested in aviation to apply many of the subject they have studied in law school to a particular area of human activity. The cases studied in the course involve, inter alia: Administrative Law, Antitrust, Bankruptcy, Conflicts of Law, Contracts, Local Government Law, Environmental Law, Labor Law, Property Sales, Taxation and Torts.
Effective: Summer 2011

GOVMT 987 State and Local Government Law (3) Important issues in governmental organization and management are surveyed. Emphasis is placed on intergovernmental relations, the legislative process, personnel issues, financing, and contracting. The course will conclude with a consideration of recent trends toward metropolitan regionalism.
Effective: Fall 1998

GOVMT 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2008

Last Import from UCM: May 24, 2014 3:00 AM
Knowledge of Greek or Latin not required. See also CLASSICS AND ANCIENT MEDITERRANEAN STUDIES and LATIN.

GREEK 401 Introductory Reading in Greek Literature (3-6) Analysis of selected passages of ancient Greek literature; attention will be paid to grammatical as well as literary details.
Effective: Summer 2011
Prerequisite:

GREEK 420 Greek Prose Authors (3-6) Readings in representative authors.
Effective: Summer 2011

GREEK 425 Greek Historians (3-6) Translation and study of one or more of the ancient Greek historians.
Effective: Summer 2011
Prerequisite:

GREEK 430 Greek Poetry (3-6) Translation and analysis of selected readings in Greek poetry.
Effective: Summer 2011
Prerequisite:

GREEK 440 Greek Drama (3-6) Translation and study of a selected play.
Effective: Summer 2011
Prerequisite:

GREEK 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

GREEK 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

GREEK 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

GREEK 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

GREEK 499 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

GREEK 509 Greek Seminar (3-9) No description.
Effective: Fall 1983

GREEK 520 Greek Mythography (3) This graduate seminar focuses on ancient Greek mythographic authors from the beginnings of the genre (6th C.B.C.E.) to the Roman period.
Effective: Fall 2008

GREEK 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2000

GREEK 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005

Last Import from UCM: May 24, 2014 3:00 AM
Health Administration (H ADM)

H ADM 503 (P ADM 503) Research Methods (3) Examination of research methodologies relevant to administration, planning, and public policy.
Effective: Fall 2012
Prerequisite:

H ADM 506 (P ADM 506) Management Information Systems for Public and Health Administration (3) The design, implementation, and purpose of computerized management information systems in health and non-profit organizations.
Effective: Spring 2003

H ADM 510 (P ADM 510) Organization Behavior (3) Examines the concepts of human behavior in formal organizations, systems analysis, conceptual models, and decision processes.
Effective: Spring 2003

H ADM 539 Health Systems Organization (3) Health care delivery presented as a socio-technical systems focusing upon resources, policy issues, institutions, technology, and innovations.
Effective: Fall 1997
Prerequisite:

H ADM 540 Health Administrative Policy Formulation (3) Analysis of administrative problems from a total organization viewpoint. Case studies of actual organizations are used for analysis.
Effective: Summer 1997
Prerequisite:

Effective: Summer 1997
Prerequisite:

H ADM 542 Health Care Politics and Policy (3) This course reviews political considerations and the policy process as they pertain to health care in the United States.
Effective: Summer 1997
Prerequisite:

H ADM 543 Long-Term Care Administration and Policy (3) This course reviews theory and practice related to long-term care administration and policy.
Effective: Summer 1997
Prerequisite:

H ADM 545 Health Financial Management (3) Theory and techniques of financial management applied to health organizations; forecasting, control systems, working capital, capital budgeting, and institutional financing.
Effective: Summer 1997
Prerequisite:

H ADM 546 Health Planning for Public Administration (3) Comprehensive planning and program planning for health services, facilities, and manpower; social, economic, and political considerations; methodological problems.
Effective: Summer 1997
Prerequisite:

H ADM 548 Health Care Quality Assurance (3) This course reviews theory, methods, outcomes, and management of quality assurance in health care organizations.
Effective: Summer 1997
Prerequisite:

H ADM 551 Health Care Law (3) Course on health law for administrators with coverage including hospital governance, taxation, licensure, liability, malpractice, patients’ rights, anti-trust.
Effective: Summer 1997
Prerequisite:

H ADM 552 Health Delivery Systems (3) This course discusses design and implementation of health care delivery systems and the pressure and stakeholders which impact those systems.
Effective: Spring 2005
Prerequisite:

H ADM 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1998

H ADM 595 Internship (1-9) Supervised research-oriented off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2014

H ADM 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual

The Pennsylvania State University
H ADM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 1997

H ADM 597A Healthcare Ethics (3) This course exposes the student to contemporary ethical issues in medicine. The class will function as a hospital ethics committee and each students will be assigned a role in the committee. A lecture will be presented on each topic after which there will be presented a case to the ethics committee for discussion and decision.
Effective: Summer 2014 Ending: Summer 2014

H ADM 597A Comparative Health Policy (3) This course will examine global health systems from a comparative perspective. For each country (from developed to developing countries) we will examine the following: a very general overview of the economy and very brief history; a description of their healthcare system; an evaluation of each health system in terms of cost, quality, and access; and current and emerging challenges facing each country. In an increasingly globalized society, a clear understanding of international healthcare systems is a fundamental step toward improving the quality of health and healthcare systems in the United States and abroad.

H ADM 597B Health Care Marketing (3) Introduction to the theory, concepts, skills, and principles of marketing applied to health related organizations and networks.

H ADM 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2006

H ADM 897A MIS for Health Administration (3) The design, implementation, and purpose of computerized management information systems in health and non-profit organizations.

Last Import from UCM: May 24, 2014 3:00 AM
Health Education (HL ED)

HL ED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

HL ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

HL ED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1993

HL ED 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1992

HL ED 596 Individual Studies (1-9) Individual studies course.
Effective: Spring 1987

HL ED 597 Special Topics (1-9) Special topics course.
Effective: Spring 1987

HL ED 600 Thesis Research (1-15) No description.
Effective: Fall 1983

HL ED 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

HL ED 602 Supervised Experience in College Teaching (1-3 per semester maximum of 6) Preparation and presentation of materials in lecture and laboratory classes under the supervision of a full-time faculty member.
Effective: Fall 1983
Prerequisite:
Effective: Fall 1983

HL ED 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Health Education (HLHED)

HLHED 406 Human Sexuality (3) Examination of physiology, diseases, attitudes, morality, and controversial topics related to human sexuality.
Effective: Fall 2012
Prerequisite:

HLHED 415 Planning and Developing Health Education Programs (3) Premises and strategies for planning, implementing, and evaluating wellness programs in corporate, hospital, and community agency settings.
Effective: Fall 1997
Prerequisite:

HLHED 420 Development of Stress Management Programs for Health Education (3) Planning, development, and implementing strategies for stress management programs for health education professionals in school, community, and corporate settings.
Effective: Fall 1997
Prerequisite:

HLHED 443 Alcohol and Drug Education (3) Principles of integration and coordination of alcohol and drug education programs for health education and other social service professions.
Effective: Fall 1997
Prerequisite:

HLHED 456 Advanced Techniques in School and Community Health Education (3) Public health, mental health, nutrition, dental school health, physical education, accident prevention, health teaching; projects, consultation, visitation, discussions, and resources.
Effective: Fall 1997
Prerequisite:

HLHED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1997

HLHED 501 World Health Promotion (3) Analysis of the various health problems that affect humans throughout the world; emphasis will be placed on personal health issues.
Effective: Fall 1997

HLHED 516 Evaluation of Health Education and Promotion Programs (3) Criteria and strategies to assess the impact of health education and health promotion programs in school, community, and corporate settings.
Effective: Fall 1997

HLHED 530 Research Techniques in Health Education (3) Research techniques, including methods, research design, techniques for data collection, as applied to relevant problems in the health education field.
Effective: Fall 1997

HLHED 552 Current Health Education Issues (3) Analysis of scientific and political foundations of current issues within health education tasks, with emphasis on research and action implications.
Effective: Fall 1997

HLHED 553 Multicultural Health Issues (3) This course is designed to explore cultural factors influencing the health status among racial/ethnic groups in the United States.
Effective: Summer 2002

HLHED 582 (EDUC 582) Spirituality and Culture in Health and Education Professions (3) This course focuses on the cultural aspects of spirituality and its place in the health and education professions.
Effective: Summer 2009

HLHED 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1997

HLHED 591 Capstone Seminar in Health Education (3) Culminating or capstone experience for students in the M. Ed. program in Health Education.
Effective: Fall 1997
Prerequisite:

HLHED 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1997

The Pennsylvania State University
HLHED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. 
Effective: Fall 1997

Last Import from UCM: May 24, 2014 3:00 AM
Health Law (HLTHL)

HLTHL 960 Food and Drug Regulation (3) This survey course covers the federal regulation of food, human and animal drugs, medical devices, cosmetics, biologies, and agricultural biotechnology. The primary focus will be on the Federal Food, Drug, and Cosmetic Act and the operations of the U.S. Food and Drug Administration. The course will also cover related status implemented by the U.S. Department of Agriculture, the interaction between federal regulation and private tort litigation, and international trade in FDA-regulated products.
Effective: Fall 2013 Ending: Summer 2014
Prerequisite:

HLTHL 960 Food and Drug Regulation (3) This survey course covers the federal regulation of food, human and animal drugs, medical devices, cosmetics, biologies, and agricultural biotechnology. The primary focus will be on the Federal Food, Drug, and Cosmetic Act and the operations of the U.S. Food and Drug Administration. The course will also cover related status implemented by the U.S. Department of Agriculture, the interaction between federal regulation and private tort litigation, and international trade in FDA-regulated products.
Effective: Fall 2014 Future: Fall 2014

HLTHL 961 Bioethics and Public Health Law (3) The course will focus on the laws governing ethical issues that arise in the course of providing medical care and ensuring public health. Specific topics include treatment at the end of life, reproductive rights, organ transplantation, genetic testing, human experimentation, and infectious disease control and prevention. A central theme is the conflict between patients' interests and the interests of others and/or social interests. This course also explores the intersection of ethics and economics in terms of the social right to care and the rationing of limited medical resources.
Effective: Summer 2012

HLTHL 963 Healthcare Organization and Finance (3) This introductory health law course will examine how the law influences the regulation, structure, financing, and delivery of healthcare in the United States. We will also consider the challenges facing healthcare providers, regulators, and consumers. Issues to be addressed include private health insurance and managed care, ERISA, COBRA, HIPAA, Medicare, Medicaid, fraud and abuse, and antitrust.
Effective: Summer 2012

HLTHL 971 Law and Medicine (3) This course focuses on law concerning the physician-patient relationship as well as bioethical issues that arise in that relationship. It covers confidentiality, medical malpractice, informed consent, the duty to treat, refusing life-sustaining medical treatment, physicians and patients on matters relating to patient care.
Effective: Fall 2008

HLTHL 997 Special Topics (1-9) Special topics in the Health Law field.
Effective: Spring 2008

Last Import from UCM: May 24, 2014 3:00 AM
Health Policy and Administration (H P A)

H P A 401 (IL) Comparative Health Systems (3) Comparative analysis of health services in selected developed and developing countries.
Effective: Summer 2011

H P A 410 Principles of Public Health Administration (3) The rationale for, and the patterns of, public health service at all levels of government in the United States.
Effective: Summer 2011

H P A 420 Principles of Managed Care (3) Survey of managed health care, including history, typology, current issues, management challenges, and impacts on patients, providers, and special populations.
Effective: Summer 2011

H P A 430 Health Care Leadership (3) This course provides an opportunity to students to learn about the challenges of leadership in health care.
Effective: Summer 2013
Prerequisite:

H P A 433 Administration of Hospital and Health Service Systems (3) Analysis of administrative structures and interorganizational arrangements among hospitals and other health care organizations.
Effective: Spring 1998
Prerequisite:

Effective: Fall 2008
Prerequisite:

H P A 440U (US;IL) Principles of Epidemiology (3) Theory of epidemiology and significant case studies. Potential application to health care.
Prerequisite:

H P A 442 Long-Term Care Management (3) Management and policy issues for institutional, community, and home settings for chronic care services.
Effective: Spring 1998
Prerequisite:

Effective: Spring 1994
Prerequisite:

Effective: Spring 2008
Prerequisite:

H P A 447 Financing Health Care (3) Analysis of financial flows, third party payment programs, and reimbursement practices in the health services sector.
Effective: Fall 2011
Prerequisite:

H P A 450 Healthcare Policies and Politics (3) Survey of health care’s political contexts: formulation, implementation, and modification stages of policy process; politics of private interests (associations) at national and state levels.
Effective: Summer 2011
Prerequisite:

H P A 455 Strategic Planning and Marketing for Health Services (3) Introduction to principles and methods of strategic planning and marketing.
Effective: Spring 1998
Prerequisite:

H P A 460 Human Resource Management in Health Care Organizations (3) Foundations of human resource management applied to health care organizations, including hospitals, long-term care facilities, and community health organizations.
Effective: Spring 1998
Prerequisite:

H P A 470 Health Care Information Management (3) This course introduces information systems terminology, data structures, software applications, and their management functions in health services organizations.
Effective: Summer 2000
Prerequisite:
H P A 490 **Physician Practice Management** (3) Development of skills needed to effectively manage physician practices. 
Effective: Spring 2012
Prerequisite:

H P A 494H **Senior Honors Thesis** (1-6) Independent study related to student's interests directed by a faculty supervisor and culminating in the production of a thesis. 
Effective: Summer 2006
Prerequisite:

H P A 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Fall 1983

H P A 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. 
Effective: Fall 1983

H P A 497A **Quality Management of Health Services Organizations** (3) Covers the historical evolution, current concepts, and future trends associated with the monitoring and evaluation of health care quality. The course explores the major components of quality improvement to include patient care assessment, risk management, patient safety, medical management, outcomes management, and process improvement. 
Effective: Summer 2014 Ending: Summer 2014

H P A 497A **Human Diversity and Health Administration** (3) Health care providers in contemporary society are faced with the important challenge of designing, implementing, and delivering health care to populations with diverse backgrounds. Meeting the health care needs of diverse individuals requires sensitivity and respect for individual differences. This course is designed to prepare students to be knowledgeable of people's differences based on race, ethnicity, culture, religion, age, sex, sexual orientation, social and economic status, disability and how these impact health care. In addition to learning about diverse populations and competent attitudes and behaviors for the provision of health services, each student will have an opportunity to reflect, assess, and determine their own potential sources of bias and preconceived attitudes so they may be more effective in serving health needs of all people. 

H P A 503 **Health Services Organizational Behavior** (3) A systematic application of the principles of organizational behavior to understanding professional roles in health services organizations. 
Effective: Spring 2011

H P A 510 **Health Services Financing and Policy** (3) Introduction to health policy focusing on health services financing, insurance and other current health policy topics. 
Effective: Spring 2011

H P A 511 **Research Seminar on Health Services Financing and Policy** (3) An examination of seminal and current research on health services financing, insurance and health policy. 
Effective: Spring 2011
Prerequisite: Concurrent: H P A 510

H P A 520 **Introduction to Health Services Organizations and Delivery** (3) Introduction to health systems, health services organization and health care delivery focused on trends, problems and issues. 
Effective: Spring 2011

H P A 521 **Research Seminar on Health Services Organization and Delivery** (3) An examination of seminal and current research on health services organization and delivery, emphasizing costs, access and quality. 
Effective: Spring 2011
Prerequisite: Concurrent: H P A 520

H P A 523 **Managerial Epidemiology** (3) Introduction to the principles and methods of managerial epidemiology and its application to health care. 
Effective: Spring 2011
Prerequisite:

H P A 524 **Management of Health Services Organizations** (3) A systematic study of the roles of health services managers and the organizational and environmental context within which they work. 
Effective: Spring 2011

H P A 526 (SOC 526) **Health Disparities** (3) This course provides an overview of social factors that lead to demographic disparities in health. 
Effective: Summer 2012

H P A 528 **Health Data Analysis for Research** (3) Introduction to data sources and use of software for data management and analysis in health services research. 
Effective: Spring 2011
Prerequisite:

H P A 531 Health Problem Analysis (3) Logic of empirical inquiry in study of community problems in health; integration of theory and practice, technical data, and values. 
Effective: Summer 1995

H P A 540 Epidemiological Applications in Health Services Research (3) The course emphasizes theoretical as well as practical issues relating to applying advanced methods of epidemiology in health services research. 
Effective: Fall 2001
Prerequisite:

H P A 541 Poverty, Race, Ethnicity and Child Health (3) Seminar focusing on disparities in infant, child, and adolescent health, and policies and programs impacting these disparities. 
Effective: Spring 2011

H P A 545 Introduction to Health Economics (3) Survey of the application of economics to the roles of markets and government in health care. 
Effective: Spring 2011

H P A 547 Health Services Reimbursement (3) Analysis of third party reimbursement of health care providers. 
Effective: Summer 1992
Prerequisite:

H P A 551 Quality Improvement in Healthcare (3) Examination of major approaches to performance improvement in contemporary healthcare systems. 
Effective: Summer 2010

H P A 555 Strategy Development in Health Services Organization (3) Integration of prior course work in the program to develop a strategic plan for a health services organization. 
Effective: Spring 2011
Prerequisite:

H P A 561 Introduction to Research Design in Health Services Research (3) Review and critical analysis of state-of-the-art health services research methods. 
Effective: Summer 1999

H P A 562 Economics Applications in Health Services Research (3) Application of theoretical and empirical tools of microeconomics to issues in health services utilization and delivery. 
Effective: Spring 2011
Prerequisite:

H P A 563 Organizational Studies in Health Services Research (3) Applications of theoretical and empirical tools of organizational studies in the delivery of health care. 
Effective: Spring 2011
Prerequisite:

H P A 564 Research Methods in Health Services Research (3) Introduction to regression models in health services research, including violations and tests of model assumptions and solutions for those violations. 
Effective: Spring 2011
Prerequisite:

H P A 566 Advanced Methods in Health Services Research I (3) Advanced topics course focusing on extensions of the ordinary least squares regression model and nonlinear methods in health services research. 
Effective: Summer 2010
Prerequisite:

H P A 567 Advanced Methods in Health Services Research II (3) Application of advanced methods to health services research topics focused on empirical approaches to causal inference in nonexperimental data. 
Effective: Fall 2013
Prerequisite:

H P A 590 Colloquium (1-3) Introduction to the field of health services research. 
Effective: Summer 1998

H P A 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. 
Effective: Summer 1990
Prerequisite:

H P A 596 (CSP D 596) Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Summer 1987

H P A 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered.
H P A 597A Special Considerations for Research with Vulnerable Populations (3) Introduces students to the application of special considerations when conducting research on vulnerable populations.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

H P A 597A Health and Health Services Across the Life Course (3) In H P A 597A, we'll explore health and health services across the life course using a population health policy and administration through discussions of such theories and concepts as: the intersectionality of gender, race, class and immigration; fundamental causes, the role of history, geography and migration in shaping health contexts; the weathering hypothesis; John Henryism; and much more.

H P A 600 THESIS RESEARCH (1-15) NO DESCRIPTION.
Effective: Summer 1992

H P A 601 PH.D. DISSERTATION FULL-TIME (0) NO DESCRIPTION.
Effective: Summer 1992

H P A 602 Supervised Experience in College Teaching (1-3 per semester, maximum of 6) Supervised and graded teaching experience in selected undergraduate Health Policy and Administration courses.
Effective: Fall 1989
Prerequisite:

H P A 610 THESIS RESEARCH OFF-CAMPUS (1-15) NO DESCRIPTION.
Effective: Summer 1992

H P A 611 PH.D. DISSERTATION PART-TIME (0) NO DESCRIPTION.
Effective: Summer 1992

H P A 805 Change Leadership in Health Services Organizations (3) Exploration of diagnostic and intervention strategies employed in planned change in health services organizations and programs.
Effective: Spring 2011

H P A 822 Clinical Issues for Health Services Management (3) Introduction to current clinical issues in health services organizations focusing on the role of managers.
Effective: Spring 2011

H P A 835 Financial Management in Health Institutions (3) The financial environment of health institutions; financial aspects of management decision making; emphasis on revenue sources, budgeting, and cost control.
Effective: Fall 2009
Prerequisite:

H P A 836 Health Law (3) The legal process as it applies to the health administrator, health organization, medical provider, and patient.
Effective: Spring 2011
Prerequisite:

H P A 850 Health Care Marketing (3) Introduction to the theory, concepts, skills, and principles of marketing applied to health related organizations and networks.
Effective: Spring 2011
Prerequisite:

H P A 855 Information Systems in Health Services Administration (3) Foundations of information systems for supporting clinical services, quality improvement, and administrative functions in health services management.
Effective: Summer 2010
Prerequisite:

H P A 895 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2010

H P A 896 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2009

H P A 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2008
H P A 897A Health Care Operations Management (3) Introduction to operations management techniques and analysis in health services.
Effective: Summer 2014 Ending: Summer 2014
Hebrew (HEBR)

HEBR 401 Advanced Hebrew--Conversation Emphasis (3 per semester, maximum of 6) Development of oral proficiency through discussions focusing on issues in contemporary Jewish culture.
Effective: Summer 2011

HEBR 402 Advanced Hebrew--Reading Emphasis (3 per semester, maximum of 6) Readings in representative works of traditional and modern literature; practice in composition; study of aspects of Jewish culture.
Effective: Summer 2011

HEBR 451 Advanced Biblical Hebrew (3) Translation and analysis of selected readings in Biblical Hebrew texts; attention will be paid to grammatical as well as literary details.
Effective: Spring 2007
Prerequisite:

HEBR 452 Readings in Biblical Hebrew (3) Translation and analysis of selected readings in Biblical Hebrew texts; attention will be paid to grammatical as well as literary details.
Effective: Spring 2007
Prerequisite:

HEBR 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

HEBR 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

HEBR 496 Independent Studies (1-18) Creative projects including research and design which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1982

HEBR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1983

HEBR 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

HEBR 499 (IL) Foreign Study--Advanced Hebrew (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

HEBR 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1997

HEBR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2003

Last Import from UCM: May 24, 2014 3:00 AM
Hematology-Hy (HEM)

HEM 721 Hematology (3) Some of the areas studied will be: Erythrocyte Disorders; Hemostasis; Myeloid Stem Cell Disorders; Lymphoproliferative and Immunoproliferative Diseases; Blood Banking; and Hematology Laboratory. Effective: Fall 2001
Prerequisite:

HEM 723 Hematology (1-2) This course will provide an introduction to normal structure, function and diseases of the blood and blood forming organs and lymphatics, including topics relevant to both the basic science and clinical aspects of the science of hematology. Effective: Summer 2014
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Higher Education (HI ED)

HI ED 490 Exploration of Careers in Higher Education (3) Foundation of graduate study in the field of higher education.
Effective: Summer 2014

HI ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1995

HI ED 497A Professional Graduate Seminar in Higher Education (3) This course is designed as an introduction to graduate study, to professional careers, and to professionalism in higher education. Students should leave this course with a plan for successfully completing their M.Ed. program of study and a road map for career success in higher education.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HI ED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1995

HI ED 503 (CI ED 503, EDTHP 507) Ethnicity, National Identity, and Education (3) Surveys group-oriented education policies internationally, especially comparing those of Britain, Taiwan, India.
Effective: Summer 1995

HI ED 504 Research and Assessment in Student Affairs (3) Course provides basic knowledge and skills necessary to plan, design, implement, and evaluate and assess programs in student affairs and higher education.
Effective: Fall 2014 Future: Fall 2014

HI ED 505 College Student Development (3) This course covers the knowledge and methods of human development theories and their applications in college settings.
Effective: Fall 2014 Future: Fall 2014

HI ED 507 Social Justice Issues and Helping Skills for Student Affairs Professionals (3) Explores diverse student populations, the value university communities place on these differences, and development of skills to assist these populations.
Effective: Spring 2015 Future: Spring 2015

HI ED 545 Higher Education in the United States (3) Introduction to the educational context and major organizational and academic characteristics of postsecondary education; analysis of issues and future trends.
Effective: Summer 1995 Ending: Summer 2014

HI ED 545 Foundations in Higher Education and Student Affairs (3) Foundations in the policy context and student characteristics of postsecondary education; analysis of issues and future trends in the field.
Effective: Fall 2014 Future: Fall 2014

HI ED 546 College Teaching (2-3) Principles involved in teaching at the college level; effective use of teaching aids; criteria used in evaluation.
Effective: Summer 1995

HI ED 548 Curriculums in Higher Education (2-3) Various types of curriculums and philosophies underlying them; ways in which curriculums are developed; elective versus required courses; evaluation of achievement.
Effective: Summer 1995

HI ED 549 (ADTED 549) Community Junior College and the Technical Institute (2-3) Distinctive contributions to meeting the need for postsecondary education; development, functions, curriculum and instruction, government, administration, and finance.
Effective: Summer 1995

HI ED 552 Administration in Higher Education (3) Philosophy of administration; principles of scientific management and their application in colleges and universities; case studies of administrative problems.
Effective: Summer 1995
Prerequisite:

HI ED 553 (CI ED 553, EDTHP 553, SOC 553) Educational Mobility in Comparative Perspective (3) Role of education in social mobility, using quantitative, qualitative, and historical methods; focuses comparatively on Britain, East Asia, and
HI ED 554 The History of American Higher Education (3) An examination of the development of American higher education against the background of influential social, political, economic, and intellectual issues. Effective: Summer 1995

HI ED 556 Higher Education Students and Clientele (3) Characteristics of higher postsecondary education students and other clientele; changes during postsecondary education years and during college; educational challenges and responses. Effective: Summer 1995

HI ED 557 (EDTHP 557, SOC 557) Sociology of Higher Education (3) Reviews theory and current sociology research on student access, achievement, and governance in postsecondary education, with applications to policy analysis. Effective: Fall 2000 Prerequisite:

HI ED 560 Legal Issues in Higher Education and Student Affairs (3) Analyzing case law issues of access, student rights, employment, collective bargaining, church/state, etc., relevant to higher education and student affairs. Effective: Fall 2014 Future: Fall 2014

HI ED 562 Organizational Theory and Higher Education (3) Application of social science theory and research to postsecondary education organizations and administration; use of research in administrative practice. Effective: Summer 1995 Prerequisite:

HI ED 571 (CI ED 571) Comparative Higher Education (3) Comparative methods of studying structural variations in systems of higher education in principal industrialized nations and other selected countries. Effective: Spring 1995

HI ED 585 (EDLDR 585, EDTHP 585) Research Design: Implications for Decisions in Higher Education (3) A capstone course on research design and analytical approaches to support decision-making in administration and policy-making. Effective: Fall 2004 Prerequisite:

HI ED 586 (EDLDR 586, EDTHP 586) Qualitative Methods in Educational Research (3) Exploration of the theoretical framework undergirding qualitative research and its attendant practices and techniques. Effective: Fall 2004 Prerequisite:

HI ED 587 (EDLDR 587, EDTHP 587) Education Policy and Politics (3) The political economy and bureaucratic politics of educational organizations, with special attention to the policy-making, implementation, and evaluation processes. Effective: Fall 2004

HI ED 588 (EDLDR 588, EDTHP 588) Qualitative Methods in Educational Research II (3) Advanced study of methods involved in executing and analyzing qualitative research in education. Effective: Summer 2007 Prerequisite:

HI ED 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Summer 1995

HI ED 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 1995

HI ED 595 Internship in Higher Education (1-9) Supervised experience in administrative offices, in research, on instructional teams, and in college teaching. Effective: Summer 1995

HI ED 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and fall outside the scope of formal courses. Effective: Summer 1995

HI ED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
HI ED 597A  **College Student Development** (3) Administrative and teaching effectiveness in postsecondary educational settings is largely dependent upon one’s familiarity with and appreciation for the unique development needs of students. Student outcomes can be significantly enhanced when programs, services, curricula, and pedagogical techniques are designed by those who understand and intentionally apply appropriate theoretical frameworks to their work. Exposure to student development theory is essential in the academic preparation of postsecondary administrators and faculty, as students unarguably should be the primary focus of current and future efforts in higher education.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Prerequisite:

HI ED 597B (EDLDR 597B, EDTHP 597B, C I 597E) **Foundations of Educational Research** (3) This class has been designed primarily for students in doctoral programs in the College of Education; however, this course may be taken by doctoral students from programs across the university with the instructor's permission. Within the highly politicized environment of the United States Education Sciences Reform Act of 2002, we are studying to become education researchers. The act provides opportunities for and sets limits upon our work as education researchers by defining what it called "scientifically-based" education research. Understandably, the act has caused controversy among education researchers who find their work affirmed or discounted by this definition. In order to explore these controversies and to begin to identify our place as doctoral students and researchers among them, this course is designed to begin a reading of the history and philosophies of education research (primarily focusing on the United States).

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Prerequisite:

HI ED 597C (INSYS 597C) **Online Innovations in Learning and the Future of Education** (3) This appears to many to be a pivotal time in the history of education, and this course is designed to help you: Become aware of, understand, and think about technologies that have the potential to change education in important ways. Consider other factors that, in combination, have been described as a "perfect storm" with the potential to change longstanding trends and traditions. Find and think with others who are aware of these factors and are considering their potential impact. Predict changes in K-12 and Higher Education. Think about how to shape the future at the level of your choice.

Effective: Summer 2014 Ending: Summer 2014

HI ED 597C (EDTHP 597C) **Economics of Education** (3) This course is an introduction to the economics of education. It has three main components. The first is to provide an economic perspective in studying education, especially issues related to education policies. Students will learn about economic theories that apply to education, including, for example, theory of the consumer (e.g., human capital and investment in education, individual choices, and demand), theory of the firm (e.g., production, revenues, and costs), and theory of the market (e.g., economics of the public sector and competition).

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HI ED 597D (EDTHP 597D) **Data Analysis for Educational Policy** (3) This course bridges theoretical statistics coursework and practical research with real, large-scale datasets. It emphasizes hands-on data preparation and analysis using Stata. Although we will mainly use education related datasets as examples, the skills that we will be learning in this course are transferable to other fields of empirical research.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HI ED 597F (EDLDR 597F, EDTHP 597F) **Race, Law, and Education: Six U.S. Supreme Court Cases** (3) This class is designed to introduce students to the legal standards used to examine "race-conscious" policies intended to address racial/ethnic inequities in K-12 and higher education. We will consider the justifications educators have presented to support these policies, which justifications have been convincing to the court, and how these justifications intersect across K-12 and higher education. We will also focus on how social sciences research has informed the legal developments in these cases. Over the course, we will cover six landmark U.S. Supreme Court cases on race and education, including Brown v. Board of Education (1954), the Court's most recent decision on K-12 voluntary desegregation policies. Parents Involved in Community Schools v. Seattle School District No. 1 (2007), and the Court's forthcoming opinion on affirmative action in higher education, Fisher v. University of Texas (2013).

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HI ED 597G (EDTHP 597G, EDLDR 597G) **Leading Organizations That Learn** (3) This course is designed to equip students with a body of knowledge about leadership for learning. The course will challenge students to examine prevailing theories and their own assumptions about how learning happens at the individual, team, and organizational level. Through case study, students will also examine the actions of leaders in a variety of learning contexts including schools, musical groups, medical teams, and alpine climbing teams. The course is appropriate for those who intend to work in K-12 education, higher education, non-profit organizations, government agencies, or private corporations. The course is appropriate for Masters or Doctoral students and available to undergraduates with permission from the instructor.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HI ED 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 2005

HI ED 600 **Thesis Research** (1-15) No description.

Effective: Summer 1995
HI ED 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 1995

HI ED 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 9) Preparation and presentation of materials in undergraduate classes under the supervision of a full-time faculty member.
Effective: Fall 2012

HI ED 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 1995

HI ED 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 1995

HI ED 801 Foundations of Institutional Research (3) Survey course explores fundamental methods and research on campus decisions, enrollment management, faculty work analysis, institutional effectiveness, accreditation, student outcomes.
Effective: Spring 2010

HI ED 807 Foundations of Academic Advising (3) An overview of the academic advising profession and the role of academic advising in the collegiate setting.
Effective: Summer 2014

HI ED 810 Planning and Resource Management in Higher Education (3) Strategic planning and resource management in higher education through institutional research.
Effective: Spring 2010

HI ED 820 Studying Students & Student Affairs Program (3) Studying the relationship of college activities to academic success by students.
Effective: Spring 2010

HI ED 830 Designing Institutional Research Studies (3) Develop skills to design and execute IR studies using quantitative and qualitative research methods.
Effective: Spring 2010

HI ED 840 Assessing Student Outcomes & Evaluating Academic Programs (3) Academic program assessment/student outcomes in accountability and accreditation processes.
Effective: Spring 2010

HI ED 850 Analyzing Faculty Workload, Performance, and Compensation (3) Develop research skills to analyze faculty workload and performance in teaching, research, outreach, and compensation.
Effective: Spring 2010

HI ED 860 Conducting Enrollment Management Studies (3) Studies three stages of enrollment management: pre-admission, initial student experience, and student success and completion.
Effective: Spring 2010

Last Import from UCM: May 24, 2014 3:00 AM
History (HIST)

HIST 400 Research in Ancient Sources (3) Guided research in the literature of ancient Mediterranean civilizations. 
Effective: Spring 2008
Prerequisite:

HIST 401 (IL) (J ST 401) Ancient Technologies and Socio-cultural History in the Ancient Levant (3) Social and intellectual development in the Ancient Levant as they affected and were affected by technological development. 
Effective: Spring 2006

Effective: Fall 2009
Prerequisite:

HIST 493 (IL) Japan in the World (3) Study of Japan's foreign relations and position in the international community from the early 19th century to the present.
Effective: Spring 2014 Ending: Fall 2014
Prerequisite:

HIST 493 (IL) (JAPNS 427) Japan in the World (3) Study of Japan's foreign relations and position in the international community from the early 19th century to the present.
Effective: Spring 2015 Future: Spring 2015
Prerequisite:

HIST 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

HIST 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

HIST 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships.
Effective: Summer 1986
Prerequisite:

HIST 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

HIST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1993

HIST 497A World War I (3) Course studies how the Great War happened why it happened and how those nations and people involved were affected. Also it will look at WWI relevance a centry later.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HIST 497B Powering America (3) Discover how the United States became the world's biggest consumer and provider of energy. What is the impact of American energy production on the environment?
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HIST 497C Londong Calling: Ordering the World - the Trip (0.5) This course will take students on an 8-day exploration of London and surrounding areas. Students will be expected to attend all scheduled visits and to act as responsible representatives of Penn State Altoona while abroad. Students will also be asked to compose short writings during the trip that respond to our site visits and to write a final evaluative paper after the trip.
Effective: Summer 2014 Ending: Summer 2014

HIST 497C (J ST 497A, WMNST 497A) Gender and Autobiography in Modern Jewish History (3) In this course we will read autobiographies critically and carefully in examining the tremendous changes wrought by modernity in the Jewish community. In particular we will look at memoir literature to illuminate the role of gender in Jewish life over the past two hundred years.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HIST 499 (IL) Foreign Study--History (1-6) Study in selected foreign countries of various periods and topics in history.
Effective: Summer 2005
Prerequisite:

HIST 500 Theory, Method and the Practice of History (3) An examination of the theory and methodologies of the historical discipline and classic works of historiography.
Effective: Fall 2012

HIST 502 Historiography (3) No description.
Effective: Winter 1978

HIST 503 Studies in Greek History (3-6) No description.
HIST 504 Studies in Roman History (3-6) No description.
Effective: Winter 1978

HIST 505 (J ST 505) Biblical Historiography in its Ancient Setting (3 per semester/maximum of 6) Methods of historical reconstruction in Biblical and other historiography from the earliest Mesopotamian records through those of the 6th century B.C.E.
Effective: Spring 1995
Prerequisite:
HIST 509 Medieval Civilization (3-9) No description.
Effective: Winter 1978

HIST 511 Topics in Medieval Britain (3 per semester, maximum of 6) Readings and research in major themes of the history of medieval Britain.
Effective: Summer 1994

HIST 512 Church and State in Medieval Europe (3) This course provides students with an overview of the political developments of church and secular government in medieval Europe.
Effective: Fall 2011

HIST 514 The Early Modern World: Empires, Trade, and Religion (3) This course provides an overview of early modern history, with an emphasis on cultural encounters between the different global regions.
Effective: Summer 2012

HIST 515 Early Modern Europe (3-6) A graduate seminar examining selected topics in early modern European history through readings, discussions, and research papers.
Effective: Spring 1987

HIST 516 (WMNST 516) US Women's and Gender History (3) A critical analysis of gender and theories of gender in selected American historical contexts.
Effective: Fall 2012

HIST 520 Studies in Twentieth-Century Europe (3-6) No description.
Effective: Winter 1978

HIST 522 Studies in Modern European Intellectual History (3-6) A seminar examining developments in modern European intellectual history through readings, class discussions, and research papers.
Effective: Summer 1986

HIST 524 Deviance, Crime and Madness in Modern Europe (3) Historiography of deviance, crime, and madness in Europe from the late-18th century to the present.
Effective: Fall 2013

HIST 525 Imperial Borderlands in Modern Europe (3) This course provides students with an overview of the processes of constructing borders in a variety of forms, ethnic, religious, trade, and linguistic, in a European imperial context.
Effective: Summer 2012

Effective: Fall 2011

HIST 543 Antebellum America 1789-1860 (3 per semester, maximum of 6) Social, intellectual, and cultural developments from the period after the nation's founding until the start of the Civil War.
Effective: Fall 2013

HIST 544 Topics in the Civil War and Reconstruction (3 per semester, maximum of 6) Background and impact of the Civil War and the two succeeding decades, with emphasis on historiography and selected topics.
Effective: Summer 1994

HIST 545 Emergence of Modern America, 1860-1919 (3 per semester, maximum of 6) Social, political, economic, and cultural history of the United States from the Civil War through Progressivism and World War I.
Effective: Fall 2013

HIST 546 The Rise and Fall of Modern America, 1919 to the present (3 per semester, maximum of 6) Readings and research in major themes of the history of the United States in the twentieth century.
Effective: Fall 2013

HIST 547 Slavery in the Americas (3) Slavery in South America, the Caribbean, and North America from 16th century European colonization through the 19th century abolition movement.
Effective: Summer 2012

HIST 548 Topics in United States South (3 per semester, maximum of 6) Major themes of southern United States history.
Effective: Summer 1994

HIST 549 Topics in African-American History (3 per semester, maximum of 6) Readings, research, and methods in the study of African-American history.
Effective: Summer 1994

HIST 551 The African American Freedom Struggle in the Twentieth Century (3) Theory and history of African American freedom movements for social and political change in the 20th century US.
Effective: Summer 2012

HIST 552 Late Modern America Society, Culture, and Politics 1975-2008 (3) This course considers the political, cultural and social history of the United States from 1975 to the present.
Effective: Summer 2012
HIST 555 **Topics in American Labor History** (3 per semester/maximum of 6) American working-class experience from its artisanal and agricultural roots through the rise, maturation, and transformations of industrial capitalism.
Effective: Spring 2012

HIST 556 **Social Movements in the Twentieth Century US** (3) Students study the theory and history of movements for social and political change in the 20th century US.
Effective: Summer 2012

HIST 560 **Topics in American Religion** (3 per semester, maximum of 6) The social, political, and intellectual contexts of American religious thought.
Effective: Spring 2012

HIST 567 **Latin American Social History, 1500-1900** (3) This course provides students with an overview of the social history of Latin America, 1500-1900.
Effective: Summer 2012

HIST 568 **Early Modern Iberia and the Americas** (3) This course studies the creation of Portugal, Spain, and their empires in the Americas in the fifteenth to seventeenth centuries.
Effective: Summer 2012

HIST 569 **Seminar in Latin-American History** (3-6) No description.
Effective: Winter 1978

HIST 570 **Modern Latin American and Caribbean History** (3) This course provides students with an overview of the historiography of modern Latin America and the Caribbean.
Effective: Summer 2012

HIST 571 **History of the US-Mexico Borderlands** (3) This course examines the history and historiography of the US-Mexico Borderlands from the mid-nineteenth century to the mid-twentieth century.
Effective: Summer 2012

HIST 572 **Race and Empire in the Americas, Caribbean & Pacific** (3) An overview of the US as an empire in Latin America, the Caribbean and Pacific in the modern era.
Effective: Summer 2012

HIST 580 **Pre-modern China** (3) This course provides students with an overview of the literature and themes in pre-modern Chinese history.
Effective: Summer 2012

HIST 581 **Late Imperial and Modern China** (3) This course provides students with an overview of the literature and themes in late imperial and modern Chinese history.
Effective: Summer 2012

HIST 582 **Women and Gender in Modern Chinese History** (3) Examines the historical literature on women and gender in late imperial and twentieth century China.
Effective: Summer 2012

HIST 585 **Culture and Society in Late Imperial China** (3) This course examines the cultural developments of late imperial China (14th-18th century) in their broad social contexts.
Effective: Fall 2012

HIST 586 **Modern Japan** (3) This course provides students with an overview of the literature and themes in modern Japanese history.
Effective: Summer 2012

HIST 587 **Topics in Modern South Asian History** (3 per semester, maximum of 6) Research and readings in the history of South Asia since the late eighteenth century.
Effective: Summer 1994

HIST 588 **Ethnicity and Borderlands in Late Imperial China** (3) An examination and overview of literature and themes related to ethnicity, borderlands, and governance in late imperial China.
Effective: Summer 2012

HIST 589 **World History: Themes and Approaches** (3) This course provides students with the thematic and theoretical foundation for the study and teaching of world history.
HIST 591 Archives Practicum (3-6) Training and supervised work experience in archival activities--Option A: Archival Management; Option B: Oral History.
Effective: Winter 1978
Prerequisite:

HIST 592 Proseminar (3-9) Readings in fundamental historical works; different sections will treat such topics as United States History and Early Modern History.
Effective: Summer 1998

HIST 593 Research Seminar (3) Seminar in research methods of the discipline.
Effective: Summer 2009
Prerequisite:

HIST 595 Internship (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 1987
Prerequisite:

HIST 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

HIST 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

HIST 597A Islamic Studies (3) This course is designed to introduce graduate students to topics of current interest in the field of Islamic history and to a variety of genres of evidence. The time frame extends from the revelation of the Qur’an and the teachings of the Prophet in the seventh century to the middle of the thirteenth century. While the course is not dedicated to political narrative and dynastic history students will learn how Islamic history is structured and periodized.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HIST 600 Thesis Research (1-15) No description.
Effective: Fall 1983

HIST 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

HIST 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Students enrolled will lead discussion sections, grade papers and examinations, given an occasional lecture, and assist instructors in planning survey level courses.
Effective: Fall 1983

HIST 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2002

HIST 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

HIST 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Homeland Security (HLS)

HLS 558 (PHP 558, PSY 558) **Disaster Psychology** (3) Explores psychological impact of disasters and terrorist attacks on victims, families, rescuers, and society and methods of reducing negative effects. 
Effective: Spring 2012
Prerequisite:

HLS 594 (PHP 594) **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis. 
Effective: Spring 2012
Prerequisite:

HLS 597A **Comparative Homeland Security and Related Methods** (3) Since U.S. Homeland Security has evolved from the attacks of 9/11 that were not rooted nationally, but internationally, and its mission space includes addressing of transnational threats as well as working with international partners, a focus on comparative aspects is essential. The course will address how select topics of civil security - such as critical infrastructure protection, cybersecurity, use of armies in homeland security, public-private partnerships, security governance, etc. - are addressed in different countries. An emphasis is on US-EU comparisons. The course will further address comparative analysis of emergent threats and challenges by focusing on risk cultures and security cultures in different countries, and by addressing transnational missions to deliver security to citizens. This includes citizens' perceptions of homeland security and use of security technology for surveillance and other purposes. 
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

HLS 801 (P ADM 801) **Homeland Security Administration: Policies and Programs** (3) Foundation for understanding homeland security history, the development of homeland security policies and organizations, and current management approaches. 
Effective: Summer 2010

HLS 803 (PHIL 803) **Homeland Security: Social and Ethical Issues** (3) This course will examine the social, political, legal, and ethical issues that arise in the context of homeland security. 
Effective: Summer 2010

HLS 805 (CRIM 805) **Violence, Threats, Terror, and Insurgency** (3) This course provides overview of the domestic and global issues related to homeland security. 
Effective: Summer 2010

Last Import from UCM: May 24, 2014 3:00 AM
Horticulture (HORT)

HORT 402W Plant Nutrition (3) Mineral nutrition of higher plants, including nutrient acquisition, transport, metabolism, and practical implications.
Effective: Summer 2013
Prerequisite:

HORT 407 Plant Breeding (3) The scientific principles and techniques of utilizing genetic variability in improving the heredity of plants for specific purposes.
Effective: Summer 2013

HORT 408 Landscape Plant Establishment and Maintenance (4) The principles and practices involved in the establishment of plants in the landscape, and their subsequent maintenance.
Effective: Summer 2013
Prerequisite:

HORT 410W Issues in Landscape Contracting (3) This will be a survey of business management, regulatory, and environmental issues facing the landscape contracting profession. Laboratory.
Effective: Summer 2013
Prerequisite:

HORT 412W Post-Harvest Physiology (3) Harvesting, handling, storage, and transportation of horticultural crops; primary emphasis on physiological response to pre- and post-harvest environmental factors.
Effective: Summer 2013
Prerequisite:

HORT 420 Plant Growth Regulators (3) Plant growth regulators, their chemical and physical properties; general principles, practices, and applications in regulating plant growth and development.
Effective: Summer 2013
Prerequisite:

HORT 431 Small Fruit Culture (3) Cultural requirements and production practices of the principal small fruit crops: strawberries, grapes, blueberries, brambles, and cranberries.
Effective: Summer 2013
Prerequisite:

HORT 432 Deciduous Tree Fruits (3) Science, art, and techniques of regulated cropping; orchard designs and management systems.
Effective: Summer 2013
Prerequisite:

HORT 433 Vegetable Crops (3) Cultural requirements of important vegetable crops in conjunction with physiological processes and problems related to commercial production.
Effective: Summer 2013
Prerequisite:

HORT 445 Plant Ecology (3) Advanced lectures on plant ecology which stress integration of physiological, population-level and community-level phenomena, and ecology in agriculture.
Effective: Summer 2013
Prerequisite:

HORT 450 Greenhouse Management (3) Maintenance and manipulation of the greenhouse production systems including structures, covers, light, temperature, carbon dioxide, water, growing media, fertilizer and greenhouse cost accounting.
Effective: Summer 2013
Prerequisite:

HORT 453 Flower Crop Production and Management (3) Production of greenhouse flower and foliage plants; development of management skills for a greenhouse business.
Effective: Summer 2013
Prerequisite:

HORT 455 Retail Horticulture Business Management (3) The nature, operation, and management of retail horticulture business, emphasizing retail greenhouses, nurseries, and flower shops.
Effective: Summer 2013
Prerequisite:

HORT 457 Interior Plantscaping (3) Foliage identification, environmental factors affecting plants, concepts of interior plant design, installation and maintenance.
Effective: Summer 2013
Prerequisite:

HORT 459 (BIOTC 459, BIOL 459) Plant Tissue Culture and Biotechnology (3) Principles and techniques for the in vitro culture, propagation, and genetic manipulations of plant cells.
Effective: Summer 2013
Prerequisite:

HORT 464 Landscape Construction I (4) Standards, processes, and computations for site grading, drainage, earthwork,
vehicular circulation, parking; detailing, and finishing of landscape construction materials.
Effective: Summer 2013
Prerequisite:

HORT 466 Landscape Construction II (5) Project scheduling methods, plant installation techniques, and field layout principles and practices. Implications of site preparation.
Effective: Summer 2013
Prerequisite:

HORT 468 Landscape Estimating and Bidding (2) Reading and interpreting contract drawings and specifications, quantity take-offs, cost estimating, and bid document preparation.
Effective: Summer 2013
Prerequisite:

HORT 490 Senior Seminar (1) Exploration of the interrelationships of horticulture, science, and society; evaluation of attributes and abilities related to various career opportunities.
Effective: Summer 2013
Prerequisite:

HORT 495 Internship (1-13) Supervised off campus experience in a public or commercial horticultural enterprise. Written and oral critique of activity required.
Effective: Summer 2013
Prerequisite:

HORT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2013

HORT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2013

HORT 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2013

HORT 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2013

HORT 499A (IL) Landscape in Italy (0.5) Traveling with students that took HORT 499 to Italy to look at various real-life examples of landscape.
Effective: Summer 2014 Ending: Summer 2014

HORT 514 (PLBIO 514) Modern Techniques and Concepts in Plant Ecophysiology (2) An intensive introduction to concepts of plant ecophysiology and modern techniques used in this field.
Effective: Summer 2013
Prerequisite:

HORT 517 Ecology of Plant Roots (2) Form and function of roots from an ecological perspective using examples from both wild and crop plants.
Effective: Summer 2013

HORT 520 Advanced Plant Growth Regulators (2) Advanced topics in plant growth regulators, their chemical and physical properties; physiological, biochemical and molecular regulation of plant growth and development.
Effective: Summer 2013
Prerequisite:

HORT 524 Experimental Procedures in Plant Science Research (3) Experimental methods, computer techniques, interpretation of statistical analyses, and communication of research results.
Effective: Summer 2013
Prerequisite:

HORT 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2013

HORT 596 Individual Studies (1-9) Creative projects including non-thesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2013

HORT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2013
HORT 600 **Thesis Research** (1-15) No description. 
Effective: Summer 2013

HORT 601 **Ph.D. Dissertation Full-Time** (0) No description. 
Effective: Summer 2013

HORT 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Provides an opportunity for horticulture graduate students to gain experience in teaching under the supervision of a faculty member.  
Effective: Summer 2013

HORT 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.  
Effective: Summer 2013

HORT 610 **Thesis Research Off Campus** (1-15) No description.  
Effective: Summer 2013

HORT 611 **Ph.D. Dissertation Part-Time** (0) No description.  
Effective: Summer 2013

Last Import from UCM: May 24, 2014 3:00 AM
Hotel, Restaurant, and Institutional Management (HRIM)

HRIM 411 **Beverage Management and Wine Selection** (3) Management issues in beverage service and products. Students taste wines, brews, and distilled spirits.
Effective: Spring 2004 Ending: Fall 2014
Prerequisite:

HRIM 413 **New Product Development for Commercial Foodservice** (3) This course introduces students to a new product development process that requires coordination, communication, and integration throughout the organization.
Effective: Spring 2010 Ending: Summer 2014
Prerequisite:

HRIM 415 **International Cuisine** (3) Cooking and eating practices of cultures around the world, including historical, religious, cultural, geographic, and political influences on each cuisine.
Effective: Spring 2007 Ending: Summer 2014
Prerequisite:

HRIM 430 **Advanced Food Production and Service Management** (3) Simulation and application of technical, conceptual, interpersonal skills. Emphasis on group dynamics; improvement in managerial skills; management team functions.
Effective: Spring 2007 Ending: Summer 2014
Prerequisite:

HRIM 435 **Financial Management in Hospitality Operations** (3) Fiscal techniques in the development, management, and control of hospitality establishments.
Effective: Spring 2014 Ending: Fall 2014
Prerequisite:

HRIM 437 **Hospitality Project Evaluation and Funding** (3) Current techniques for project evaluation in the hospitality industry; trends in hospitality project funding.
Effective: Spring 2004 Ending: Summer 2014
Prerequisite:

HRIM 438 **Cases in Financial Analysis** (3) Financial analysis and decision making is examined through a series of hospitality-oriented cases.
Effective: Spring 2004 Ending: Summer 2014
Prerequisite:

HRIM 442 **Hospitality Marketing** (3) Marketing management in the hospitality industry, including analyzing the market through market research and developing a marketing plan.
Effective: Fall 2010 Ending: Summer 2014
Prerequisite:

HRIM 443 **Sales Planning and Advertising for Hospitality Operations** (3) Elements of sales management, advertising, promotion, and public relations as applied to hospitality organizations.
Effective: Fall 2010 Ending: Summer 2014
Prerequisite:

HRIM 466 (US) **Human Resource Management in the Hospitality Industry** (3) Recruitment, selection, training, performance appraisal, and compensation of hospitality human resources in today's culturally diverse work force.
Effective: Fall 2010 Ending: Summer 2014
Prerequisite:

HRIM 467 **Management of Hotel and Restaurant Employee Relations** (3) Survey and analysis of managerial strategies for employee relations in hospitality operations.
Effective: Fall 2010 Ending: Summer 2014
Prerequisite:

HRIM 471 **New Trends and System Selection in Hospitality Information Technology** (3) This course introduces the student to new information technology in the hospitality industry and to the system selection process.
Effective: Spring 2014 Ending: Spring 2015
Prerequisite:

HRIM 480 **Advanced Hotel Management** (3) Advanced hotel operations, internal control systems, and service philosophy. Integretes management, departmental operations, law, technology applications, marketing and managerial accounting.
Effective: Spring 2007 Ending: Summer 2014
Prerequisite:

HRIM 482 **Hospitality Real Estate** (3) The course focuses on commercial real estate concepts related to the hospitality industry.
Effective: Fall 2010 Ending: Summer 2014
Prerequisite:

HRIM 483 **Revenue Management** (3) Students learn how to effectively implement revenue management strategies and techniques in the hospitality industry.
Effective: Spring 2011 Ending: Summer 2014
Prerequisite:

HRIM 484 **Hospitality Entrepreneurship** (3) The course focuses on successfully launching new business ventures in the hospitality industry.
Hospitality Industry.

Effective: Summer 2013 Ending: Fall 2014
Prerequisite: HRIM 486
Casino Marketing (3) Students will learn marketing techniques for casinos which take into account the external environment, individual consumer choices, and ethical considerations.
Effective: Summer 2010 Ending: Summer 2014
Prerequisite: Concurrent: HRIM 487
HRIM 487 Casino Operations and Societal Impact of Gaming (3) Students will learn the structure, culture, and ethical responsibility toward disordered gambling and other lifestyle issues of modern casinos.
Effective: Summer 2010 Ending: Summer 2014
Prerequisite: Concurrent: HRIM 486
HRIM 490W Strategic Hospitality Management (3) This capstone writing-intensive class integrates content from throughout the previous curriculum, focusing on strategic application to current industry issues.
Effective: Fall 2010 Ending: Summer 2014
Prerequisite:
HRIM 492 Advanced Professional Seminar in Hotel, Restaurant and Institutional Management (1) Course prepares senior HR&IM students to assume leadership positions in the hospitality industry (Focus on careers, leadership, ethics, lifelong learning).
Effective: Spring 2004 Ending: Summer 2014
Prerequisite: Concurrent: HRIM 430 HRIM 466 HRIM 490
HRIM 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2004 Ending: Summer 2014
Prerequisite:
HRIM 495E External/Off Campus Internship (1-6) A supervised internship with an approved site participant. Internships are typically one semester or summer in length.
Effective: Summer 2014 Ending: Summer 2014
Prerequisite:
HRIM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2004 Ending: Summer 2014
HRIM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2004 Ending: Summer 2014
HRIM 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2008 Ending: Summer 2014
HRIM 498F International Food Service Management and Cuisine (3) This course is designed to cover major European cuisines and oenology in a European setting.
Effective: Summer 2014 Ending: Summer 2014
Prerequisite:
HRIM 498G French Cuisine and Culture (3) Program will including intensive classes on language and culture, products, cuisine, wine, and also design and atmosphere.
Effective: Summer 2014 Ending: Summer 2014
HRIM 498I International Hospitality Management (3) This course is designed to expose students to international hospitality management, organization, practices, and structures in a European setting.
Effective: Summer 2014 Ending: Summer 2014
HRIM 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual of group instruction.
Effective: Fall 2007 Ending: Summer 2014
HRIM 503 Research Methods in Hotel, Restaurant, and Institutional Management (3) An introduction to the process of research; problem-solving approaches; the research proposal and the development of the research question.
Effective: Fall 2003
Prerequisite:
HRIM 511 Services Marketing for the Hospitality Industry (3) Hospitality services marketing.
Effective: Spring 2003
HRIM 585 Seminar in Hotel, Restaurant, and Institutional Management (1-9) This course is a doctoral seminar in HR&IM that addresses the conceptual foundations of the HR&IM knowledge base.
Effective: Fall 2003

The Pennsylvania State University
HRIM 586 Research Methods and Evaluation in Hotel, Restaurant, and Institutional Management (1-9) This course is a doctoral seminar in HR&IM that addresses various research methodologies and evaluation procedures that are applicable to HR&IM.
Effective: Fall 2003

HRIM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2003

HRIM 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2003

HRIM 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Fall 2003

HRIM 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2003

HRIM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2003

HRIM 597A PhD Seminar on Services Marketing for the Hospitality Industry (3) The objective of this doctoral seminar is to explore the conceptual and applied dimensions of services marketing.

HRIM 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Fall 2007

HRIM 600 Thesis Research (1-15) No description.
Effective: Fall 2004

HRIM 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 2004

HRIM 602 Supervised Experience in College Teaching (1-3 per semester, maximum of 6) No description.
Effective: Fall 2004

HRIM 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 2004

HRIM 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 2004

Last Import from UCM: May 24, 2014 3:00 AM
Hum Dim Nat Res Env (HDNRE)

HDNRE 574 *Integrated Perspectives in Human Dimensions of Natural Resources and the Environment* (3)
Introduction to the integration and application of interdisciplinary concepts to contemporary natural resource and environmental issues.
Effective: Fall 2008

HDNRE 575 *Ethical Issues in Human Dimensions of Natural Resources and the Environment* (3)
Introduction to ethical issues in human dimensions of natural resources and the environment.
Effective: Summer 2013

HDNRE 590 *Human Dimensions in Natural Resources and the Environment Colloquium* (1)
Professional socialization and training, development, and assessment of meta-theoretical frameworks and cohort building.
Effective: Summer 2013
Prerequisite:

HDNRE 596 *Individual Studies* (1-9 per semester/maximum of 12)
Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2014

HDNRE 597 *Special Topics* (1-9)
Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2009

HDNRE 597A *Foundation of Environmental Education* (3)
HDNRE 597A is offered as a component of the still developing Environmental Education option in the Human Dimensions of Natural Resources and the Environment (HDNRE) Dual-Title Graduate Program. This course is designed to allow students to develop a common level of understanding of the history, definition, content, methodologies, and contemporary philosophies of environmental education and resultant environmental literacy. The course has its goals to introduce students to: (1) how environmental education has evolved into its present form with respect to definition and philosophy; and (2) the current content areas and methodologies used in environmental education. HDNRE 530 is comprised of two main components, the first focusing on the cognitive content associated with environmental literacy, and the second focusing on the methodologies employed in developing environmental literacy through environmental education.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HDNRE 600 *Thesis Research* (1-15 per semester/max of 99)
No description.
Effective: Summer 2009
Hum Res & Empmnt Rel (HRER)

HRER 500 Topics in Comparative Industrial Relations (3 per semester/maximum of 6) Similarities and differences of various aspects in industrial relations assessed within the political, economic, and historical contexts.
Effective: Spring 2008

HRER 501 Labor and Employment Law (3) Legal context of employment in the United States.
Effective: Spring 2008

HRER 502 Organization of the Workplace (3) Organization and transformations of the workplace and the labor process, including Taylorism, Fordism, and flexible forms.
Effective: Spring 2008

HRER 503 Seminar in International Human Resources Studies (3) Seminar course exploring human resource studies from an international perspective.
Effective: Summer 2013

HRER 504 Seminar in Employment Relations (3) Theory, process, and issues of employment relations, including collective bargaining and contract administration.
Effective: Fall 2012

HRER 505 Seminar in Human Resources (3) Current human resource topics in the context of organizational strategy, planning, and responsibility.
Effective: Spring 2011

HRER 510 Introduction to Graduate Studies in Human Resources and Employment Relations (1) An overview of professional development and research activities of scholars of Human Resources and Employment Relations.
Effective: Spring 2008

HRER 512 Research Methods in Human Resources and Employment Relations I (3) Research design, sampling design, data collection, and analysis; modeling, means and comparison of means, correlation analysis; and case study.
Effective: Spring 2008
Prerequisite:

HRER 513 Research Methods in Human Resources and Employment Relations II (3) Continuation of research design, validity and reliability; experimental design and ANOVA; survey design, and multiple regression models.
Effective: Spring 2012

HRER 516 Labor Market Analysis (3) Neoclassical, institutional and systemic theories of external and internal labor markets and their dynamics.
Effective: Spring 2008

HRER 536 Diversity in the Workplace (3) Women and minorities in the workplace.
Effective: Spring 2008

HRER 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

HRER 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2008

HRER 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2008

HRER 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2008

HRER 597A Research and Writing for Labor Practitioners (3) This course will teach students fundamental social science research skills, including how to use library resources, and understanding the basics of qualitative and quantitative methods. Students will also acquire solid writing skills relevant for labor practitioners, such as how to write
policy-oriented research reports on topics related to labor and global workers' rights.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HRER 597B (WMNST 597C) Work-Life Practices and Policies (3) Explore the causes and consequences of conflicts between work, family, and other life commitments, and how these may be resolved.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HRER 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at overseas institution with whom linkages have been established.
Effective: Spring 2008

Effective: Spring 2008

HRER 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2008

Effective: Spring 2008

HRER 800 International and Comparative Employment Relations (3) This course examines employment relations systems in the world today and the influence of globalization on employment relations practice.
Effective: Fall 2007

HRER 802 Organizations in the Workplace (3) This course provides students with an overview of selected managerial behavior and career topics in modern organizations.
Effective: Fall 2007

HRER 811 Labor and Employment Law II (3) Advanced topics in labor and employment law; such areas as immigration, unemployment compensation, and safety/health.
Effective: Fall 2011
Prerequisite:
HRER 816 Labor Market Analysis (3) Neoclassical economic and institutional theoretical perspectives on labor supply, demand for labor, internal labor markets, wage determination and labor policies.
Effective: Fall 2007

HRER 825 Strategic Business Tools for HRER Professionals (3) This course connects Business Strategy, Financial Tools, and HR to an organization's strategic business objectives.
Effective: Summer 2014
Prerequisite:
HRER 836 Diversity in the Workplace (3) This course examines workplace diversity, gender and race challenges facing employers and employees, and the skills for managing diversity.
Effective: Fall 2007

HRER 894 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

HRER 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2010

HRER 897C Ethical Decision Making for HR Professionals (3) Ethical decision making represents the way in which we resolve conflicting moral demands that we face. This course addresses that problem in the context of Human Resource Management professions. The course will identify the normative standards (moral principles) that are most frequently utilized when confronting such dilemmas, as well as a systematic approach to decide the appropriate course of action. The course will also explore recent research on the manner in which stakeholders actually do make such choices. Throughout the course students will study and discuss a variety of cases that typically confront HR professionals at work, using materials from the class to explore alternative solutions. The course will also contain a significant amount of information concerning non-Western moral principles as well as situations involving their application to problems that have emerged in the global business environment in which HR is frequently involved.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Human Development (H DEV)

H DEV 600 Thesis Research (1-15) No description.
Effective: Fall 1993

H DEV 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1993

Human Development and Family Studies (HD FS)

HD FS 401 Project Planning, Implementation, and Evaluation in the Human Services (3) Exercises and activities related to the design, planning, implementation and management, and evaluation of projects and programs in the human services.
Effective: Fall 2006
Prerequisite:

HD FS 402 Human Services Seminar (4) Presentations and discussion of contemporary human issues by students and visiting professionals.
Effective: Summer 1997
Prerequisite:

HD FS 405 (US) Gender and Social Development (3) A review of gender-related patterns of social development over the lifespan, as influenced by biological, sociological, and psychological factors.
Effective: Spring 2006
Prerequisite:

HD FS 410 Communities and Families (3) Family and community interaction, emphasizing strategies for intervention to solve family-community problems.
Effective: Spring 1996
Prerequisite:

HD FS 411 The Helping Relationship (3) Theory and research related to interpersonal conditions which facilitate personal growth; intensive interpersonal competency training.
Effective: Spring 1996
Prerequisite:

HD FS 412 Adult-Child Relationships (3) Theories, research, and application of adult behavior for maximizing adult-child relationships and optimizing child socialization and self-development.
Effective: Spring 2007
Prerequisite:

HD FS 413 Developmental Problems in Adulthood (3) Analysis of individual developmental problems from young adulthood through old age and their prevention and modification.
Effective: Spring 2001
Prerequisite:

HD FS 414 Resolving Human Development and Family Problems (3) Strategies for, and roles of professional specialists in, the solution of problems in human development and family functioning.
Effective: Spring 1996
Prerequisite:

HD FS 415 Program Development in Family Relationships (3) Methods for planning, developing, and evaluating human service programs for families across the life span.
Effective: Spring 2001
Prerequisite:

HD FS 416 (US) (SOC 411) Racial and Ethnic Diversity and the American Family (3) This course will explore the nature and determinants of racial and ethnic variation in family processes in the United States.
Effective: Spring 2005
Prerequisite:

HD FS 417 (US;IL) Biocultural Studies of Family Organization (3) Study of variability in family organization with an emphasis on cultural and economic factors influencing household organization and family roles.
Effective: Spring 2006
Prerequisite:

HD FS 418 Family Relationships (3) Dynamics of family interaction; effects of parenthood, sibling and intergeneration relationships on family solidarity.
Effective: Spring 2001
Prerequisite:

HD FS 420 Laboratory in Individual and Family Enhancement (3) Supervised practice in methods of assessment, intervention, and evaluation to enhance individual and family development.
Effective: Spring 1996
Prerequisite:

HD FS 424 (US) Family Development in an Economic Context (3) Economic conditions influencing family functioning; familial effects on the economy; strategies to enhance work-family relations.
Effective: Spring 2006
Prerequisite:

HD FS 425 (US) Work as a Context for Human Development (3) Theory and research on role of work in adult development; interrelationships between work and family; workplace interventions to enhance development.
Effective: Spring 2006
Prerequisite:
HD FS 427 (KINES 427) Developmental Sport & Exercise Psychology (3) Developmental changes in the antecedents and consequences of physical activity across the lifespan.
Effective: Spring 2008
Prerequisite:

HD FS 428 Infant Development (3) Conceptual analysis, assessment, and empirical investigation of normal and deviant development, prenatal through first two years of life.
Effective: Spring 2007
Prerequisite:

HD FS 429 Advanced Child Development (3) Processes of development during childhood from birth to adolescence. Emphasis upon theory, method, and empirical research.
Effective: Spring 2007
Prerequisite:

HD FS 430 Experience in Preschool Groups (6) Guided practicum experience in planning and facilitating developmentally appropriate activities for young children.
Effective: Spring 2007
Prerequisite:

HD FS 431 (SOC 431) Family Disorganization: Stress Points in the Contemporary Family (3) Focuses on divorce, remarriage, incest, family violence as well as problems associated with family formation and parent-child relations.
Effective: Spring 1996
Prerequisite:

HD FS 432 Developmental Problems in Childhood and Adolescence (3) Analysis of problems in individual development from infancy through adolescence; prevention and modification of developmental difficulties.
Effective: Spring 2007
Prerequisite:

HD FS 433 Developmental Transition to Adulthood (3) Conceptual analysis and empirical investigation of interrelationships between developmental processes during the period of pubertal growth.
Effective: Spring 1996
Prerequisite:

HD FS 434 (SOC 435) Perspectives on Aging (3) An analysis of the demographic, social, and cultural factors affecting the aged population in American society.
Effective: Fall 2007
Prerequisite:

HD FS 440 (SOC 440) Family Policy (3) An in-depth examination of family policy.
Effective: Spring 2007
Prerequisite:

HD FS 445 (PSYCH 416) Development Throughout Adulthood (3) Processes of development and change of behavior from early adulthood through old age, emphasizing theory, method, and empirical research.
Effective: Spring 2007
Prerequisite:

HD FS 446 Programs and Services in Gerontology (3) Theoretical and historical views of the conceptualization and delivery of programs and services to older persons within a multidisciplinary developmental framework.
Effective: Spring 1996
Prerequisite:

HD FS 447 Issues in Gerontology (3) Analysis of major issues in adulthood and aging, with an emphasis on integration of theory and research.
Effective: Spring 1996
Prerequisite:

HD FS 450 Developmental Child Programs and Services (3) Current and historical views of the conceptualization and delivery of child programs and services within a multidisciplinary developmental framework.
Effective: Spring 2007
Prerequisite:

Effective: Spring 2013
Prerequisite:

HD FS 453 Family Participation and Involvement in Child Services (3) Current and historical perspectives of roles and functions of family members in designing, delivering, and evaluating of child service programs.
Effective: Spring 2001
Prerequisite:

HD FS 454 (E C E 454) Development and Administration of Child Service Programs (3) Planning, administering, and evaluating child service programs at several administrative levels using methods from relevant disciplines.
Effective: Spring 1996
Prerequisite:

HD FS 455 Development and Administration of Human Services Programs (3) Fundamentals of program development
and administration of human service programs in community settings; emphasis given to program content, strategies, and
the overall planning process.
Effective: Fall 2009
Prerequisite:

HD FS 468 Biological Bases of Behavioral Development (3) Biological, genetic, and experiential influences in
development through the lifespan.
Effective: Spring 2007
Prerequisite:

HD FS 477 Analysis of Family Problems (3) Analysis of families' behavioral, managerial, interpersonal, and financial
problems and their interrelationships.
Effective: Spring 2001
Prerequisite:

HD FS 490 Introduction to Internship Experience (2) Planning and preparation for field experience in human service
setting. Analysis of human service system and arrangement of site.
Effective: Spring 1996
Prerequisite:

HD FS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or
small-group basis.
Effective: Spring 2000

HD FS 494A Research Practicum (3) Supervised student activities on research projects identified on an individual or
small-group basis.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HD FS 494B Research Paper (3) Supervised student activities on research projects identified on an individual or
small-group basis.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HD FS 494H Senior Honors Thesis (1-6) Independent study under the direction of the thesis advisor of topics related to
the interests of the student, culminating in presentation of a thesis.
Effective: Summer 1997
Prerequisite:

HD FS 495A Internship: Advanced Experience (9) Full-time, one semester experiential training in human service settings.
Open to HD FS majors only.
Effective: Spring 2014
Prerequisite:

HD FS 495B Internship: Advanced Project (3) Implementation of internship projects or scholarly paper. Open to HD FS
majors only.
Effective: Fall 2006
Prerequisite:

HD FS 495C Professional Practicum in Human Services (3-8) Guided professional practicum in human services, usually
in the form of a project related to a human services issue.
Effective: Summer 1997
Prerequisite:

HD FS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an
individual basis and which fall outside the scope of formal courses.
Effective: Summer 1990

HD FS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject
which may be topical or of special interest.
Effective: Summer 1990

HD FS 497A Autism - Providing Professional Support for Individual and Families (3) This course will emphasize
professional development for students planning to pursue careers in the field of autism. Topics include the stresses and
needs of families and siblings of children with Autism Spectrum Disorders (ASD), vocational and social challenges faced as
individuals with ASD age into adolescence and adulthood, and techniques to aid parents in becoming effective advocates
for their child's academic, social, and behavioral needs. Although the core symptomatology of ASD and empirically
validated interventions will be covered as foundational knowledge, these topics will not be the focus of this course.
Rather, this course will identify the challenges and strengths likely to be encountered in the lives of families and
individuals with ASD and provide current best practices used to help clients navigate life with ASD.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HD FS 497B Teaching Human Development and Family Studies (3) Students who excel in HD FS classes may be invited
to become an undergraduate teaching assistant.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

The Pennsylvania State University
HD FS 497C Peer and Consultation (1-3) Students register for this course if they will be serving as a teaching assistant in HD FS courses. Effective: Summer 2014 Ending: Summer 2014

HD FS 497C Peer and Consultation (1-3) Students register for this course if they will be serving as a teaching assistant in HDFS courses. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

HD FS 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

HD FS 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Fall 2007

HD FS 499A (IL) Early Childhood in Italy (3) This course will give students the opportunity to examine the way in which Italians structure the early childhood years, and the social policies that support this structure. Students will observe children in public, as well as having the opportunity to visit preschool and day care programs for young children. Effective: Summer 2014 Ending: Summer 2014

HD FS 499B (IL) Historical Roots of the Modern Italian Family (3) The purpose of this course is to examine the historical roots of the Italian family system as it has evolved from antiquity to modernity. Issues to be explored include the implications of economic, political, religious, and social factors, the status of Italian women over time with regard to legal rights, roles, societal expectations and cultural values, and the attitudes toward and practices regarding child rearing. Effective: Summer 2014 Ending: Summer 2014

HD FS 499C (IL) Italian Relationships, Both Cultural and Familial (3) The purpose of this course is to examine the cultural factors affecting business, friendship, and family relationships in Italy. Issues to be explored include the implications of economic, political, religious, and social factors on Italian families, and the influence of the Catholic Church on family and social roles in Italy. Effective: Summer 2014 Ending: Summer 2014

HD FS 501 Human Development Across the Lifespan (3) Multidisciplinary study of theories and research on human development across the lifespan. Effective: Spring 2002

HD FS 502 Biological Systems in Developmental Context (3) Discusses the development of key biological systems, and their influences on behavior across the lifespan. Effective: Spring 2013

HD FS 503 Human Development Intervention: Analysis of Theories and Approaches (3) Theoretical and empirical analyses of multilevel approaches for enhancing development of individuals and families. Effective: Spring 1993

HD FS 504 Consultation in Human Development Intervention (3) Principles of consultative and collaborative practice with human development intervention programs in formal or informal community settings. Effective: Spring 1993

HD FS 506 Design and Evaluation of Prevention Programs Across the Life Span (3) An introduction to the theory and application of program evaluation; both process and outcome evaluation strategies are addressed. Effective: Spring 2002

HD FS 507 Women, Families, and Society (3) Analysis and critique of research and theory on women's development and role in family and society. Effective: Spring 2002

HD FS 508 Best Practices in Preventive Intervention (1-6) Implementing empirically validated preventative programs; discussion and evaluation of theory and techniques. Effective: Spring 2002

HD FS 515 Professional Issues in Human Development and Family Studies (1-6) Overview of issues in professional development for careers in human development and family studies.
HD FS 516 Methods of Research in Human Development (3) Review of basic research methods and statistics as applied to human development and family studies.
Effective: Spring 2002

HD FS 517 Multivariate Study of Change and Human Development (3) Models of development and change derived from empirical research utilizing multivariate research design and procedures.
Effective: Spring 1992
Prerequisite:

HD FS 518 Applied Statistics Laboratory (1) This course provides graduate students with practical skills in data entry, data management, and applied statistical analyses.
Effective: Fall 2001

HD FS 519 Methods of Statistical Analysis in Human Development (3) An overview of basic statistical concepts, models, and methods for the analysis of development and change.
Effective: Summer 1990
Prerequisite:

HD FS 520 Seminar in Prenatal and Infant Development (1-6) Prenatal and infant development, with emphasis on multiple determinants of early development and their relationship to later behavior.
Effective: Summer 1990
Prerequisite:

HD FS 522 Risk and Resilience in Human Development: Foundation for Prevention (3) Reviews the concepts of risk, protection, resilience, and competence; examines these concepts in intervention and longitudinal studies.
Effective: Spring 2002
Prerequisite:

HD FS 523 Strategies for Data Analysis in Developmental Research (3) This course provides the skills necessary to confront the data analytic issues presented in the Human Development and Family Studies methodology core curriculum.
Effective: Spring 1996
Prerequisite:

HD FS 524 Work as a Context for Human Development (3) The interconnections between work, family life, and individual development.
Effective: Spring 2002
Prerequisite:

HD FS 525 Introduction to Family Studies (3) Introduction to current theory and research about micro and macro forces related to family relationships and development.
Effective: Spring 2002

Effective: Spring 2007
Prerequisite:

HD FS 527 Social Epidemiology (3) Application of epidemiological methods to issues in the study of human development.
Effective: Fall 2001
Prerequisite:

HD FS 528 (PSY 528) Observational Methodologies for Development (3) Design and application of observational methods in developmental research.
Effective: Spring 1994
Prerequisite:

HD FS 529 (PSY 529) Seminar in Child Development (1-6) Readings and reports on recent findings in child development.
Effective: Summer 1990
Prerequisite:

HD FS 530 Longitudinal Structural Equation Modeling (3) Exposure to a wide variety of statistical models as special cases of the General Linear Mixed Model with latent variables.
Effective: Spring 2014
Prerequisite:

HD FS 531 (SOC 531) Family Disorganization: Stress Points in the Contemporary Family (3) Focuses on divorce, remarriage, incest, family violence as well as problems associated with family formation and parent-child relations.
Effective: Summer 1994

HD FS 532 (NUTR 532) Childhood Obesity (3) This course addresses how genetic predispositions, behavioral and environmental factors affect children’s obesity risk and examines strategies for obesity prevention.
Effective: Spring 2012
HD FS 533 (NUTR 533) **Adult Obesity** (3) Important current and emerging topics in obesity research relevant to government policy and general public education; emphasis on adult obesity.
Effective: Spring 2012

HD FS 536 (PSY 536) **Research Methods in Developmental Processes** (3) Methodological issues in research on varying stages of development across the individual life span.
Effective: Spring 1995
Prerequisite:

HD FS 537 (SOC 537) **Biosocial Perspectives on the Family** (3) The implications of knowledge from behavioral endocrinology, behavior genetics, and evolutionary psychology for understanding family relationships and child development.
Effective: Summer 2002

HD FS 539 **Seminar in Adolescent Development** (1-6) Cultural, psychological, and biological aspects of the developmental transition to adulthood.
Effective: Summer 1990
Prerequisite:

HD FS 540 **Parenting: Theory, Research and Intervention** (3) Review of current theory, research, and intervention in the study of parenting.
Effective: Spring 2014
Prerequisite:

HD FS 544 **Seminar in Dysfunctional Patterns in Family Organization** (1-6) Processes of familial dysfunction and disorganization and their explanation in economic, social-psychological, and managerial terms.
Effective: Summer 1990
Prerequisite:

HD FS 545 **Families and Socioeconomic Systems** (1-6) Functional interrelationships between families and social and economic systems.
Effective: Summer 1990
Prerequisite:

HD FS 546 **Seminar in Family Relationships** (1-9) Interpersonal interaction within family systems throughout the life cycle.
Effective: Summer 1990
Prerequisite:

HD FS 549 (PSY 549) **Developmental Theory** (3) Conceptual frameworks and major contributions to the study of individual development across the life-span.
Effective: Summer 1990
Prerequisite:

HD FS 565 **Developmental Behavioral Genetics** (3) Theories and methods of developmental behavioral genetics and their application to human life-span development.
Effective: Spring 1990

HD FS 569 **Seminar on Development in Middle Age** (1-6) Interdisciplinary approach to study of human development in middle age, including psychological, cultural, and biological aspects.
Effective: Fall 2001
Prerequisite:

HD FS 577 **Poverty, Policies, and Child Development** (3) Focuses on interrelationships among families, poverty, and social policies.
Effective: Fall 2001
Prerequisite:

HD FS 579 **Seminar in Adult Development and Aging** (1-9) A seminar dealing with specific topics concerning adult development and aging.
Effective: Summer 1990
Prerequisite:

HD FS 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1990

HD FS 595 **Field Projects in Individual and Family Studies** (1-9) Supervised research or internship in human services program.
Effective: Summer 1990
Prerequisite:

HD FS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1990
Prerequisite:
An Introduction to Time Series Analysis

This course introduces concepts and methods in time series analysis. Topics will include descriptive characteristics of time series, auto- and cross-correlation, time series regression, and other related topics. Students will gain foundational knowledge to analyze and interpret time series data using statistical methods.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
ARIMA modeling (time domain), and introduction to spectral analysis (frequency domain), and an introduction to state-space models. Data examples will be used to illustrate the different methods.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Effective: Summer 1990

HD FS 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 1990

HD FS 602 Supervised Experience in College Teaching (1-3 per semester, maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Summer 2004

HD FS 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 2006

Effective: Summer 1990

HD FS 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 1990

Last Import from UCM: May 24, 2014 3:00 AM
Humanities (HUM)

HUM 500 Research Methods and Scholarly Inquiry in the Humanities (3) Study of the methods and materials of scholarship, use of reference tools, evaluation of evidence, and writing of research papers.
Effective: Spring 1989

HUM 515 Seminar (3 per semester/maximum of 9) A seminar focusing on typical methods and approaches of a single discipline within the humanities.
Effective: Summer 1988

HUM 525 Studies in Aesthetics (3) Philosophical investigation into the nature of art, aesthetic experience, artistic meaning, criticism, grounds for judgment, and history of aesthetic theory.
Effective: Spring 1989

HUM 530 Seminar in Comparative Arts (3 per semester/maximum of 9) A seminar focusing on selected periods or artists in two or more disciplines within the humanities.
Effective: Summer 1988

HUM 535 Topics in Cultural and Intellectual History (3 per semester/maximum of 9) Study of methods, issues, and selected topics in the history of thought, social values, and creative expression.
Effective: Summer 1988

HUM 550 Junior College Teaching Internship (3) Teaching humanities courses in a two-year college under a faculty supervisor, who will direct, criticize, and evaluate the intern.
Effective: Summer 1988
Prerequisite:

HUM 560 Interrelations in the Humanities (3) The study and practice of conducting interdisciplinary research and of investigating and supporting inter-art analogies.
Effective: Spring 1989
Prerequisite:

HUM 580 Master's Production (1-6) An original scholarly master's paper or creative production initiated by the student, supervised by an appropriate professor, and judged by a committee.
Effective: Winter 1981

HUM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

HUM 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

HUM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

Humanities-Hy (HMN)

HMN 713 Medical Humanities (5) Medical Humanities introduces the first-year student of medicine to topics which explore questions of value and meaning in and around medicine.
Effective: Summer 2007
Prerequisite:

HMN 740 Folk and Alternative Health Systems (2.5) Critical examination of alternative/folk health systems and some of the ways in which they influence current health care delivery.
Effective: Spring 1999

HMN 741 Education for Physicians on End of Life Care (EPEC) (2.5) This course introduces the essential clinical competencies required to provide quality end-of-life care.
Effective: Fall 2009
Prerequisite:

HMN 742 Putting It Into Words: A Right-Brain Retrospective of Formative Moments in Medical School (PIW) (2.5) This creative writing workshop requires MS IVs to convey their reflections as medical students in a variety of genres which, collectively, result in a portfolio and publication.
Effective: Fall 2009
Prerequisite:

HMN 743 Graphic Storytelling and Medical Narratives (2.5) In this course, students will explore the use of graphic storytelling (or Comics) as a medium for communicating medical narratives.
Effective: Fall 2009

HMN 744 Humanities: Patients as Teachers, Students as Filmmakers Video Project: The Video Slam (2.5) This course teaches medical students about the full impact of illness and serious procedures on patients and their families.
Effective: Fall 2009
Prerequisite:

HMN 745 Medicine and Ethics Under Pressure (2.5) This course explores situational and systemic challenges to ethical behavior in biomedical research and the practice of medicine.
Effective: Fall 2009

HMN 746 CAM and Integrative Holistic Medicine (2.5) This course presents current topics in Integrative Holistic Medicine and discusses the transition from Complementary and Alternative Medicine.
Effective: Fall 2009
Prerequisite:

HMN 747 Contemporary Issues in Bioethics (2.5) In this course, students will conduct in-depth examinations of current issues in bioethics. Topics will include: Organ transplantation; PVS & the Value of a Human Being; Childhood Immunizations; Mistakes; What Counts as Medically Necessary?; Child Abuse; Physician-Assisted Death; Genetics.
Effective: Fall 2009
Prerequisite:

HMN 748 Controlling Human Heredity: Lessons From History (2.5) This course reviews the key steps in the development of our thoughts and practices relating to childbirth and medical genetics over the past 400 years.
Effective: Spring 2010
Prerequisite:

HMN 749 Sufferers and Healers: Lessons From History (2.5) This course reviews the key steps in the development of medicine from its supernatural beginnings steeped in magic and religion through the creation of medical science.
Effective: Fall 2009
Prerequisite:

HMN 750 Creativity, Art, and Healing (CAH) (2.5) This course introduces students to the core components of the creative arts and healing.
Effective: Fall 2009
Prerequisite:

HMN 751 The Narratives of Aging: Exploring Creative Approaches to Dementia Care (2.5) This course invites students to examine brain aging in an historical and cultural context, and contrast dominant reductionist understandings of dementia with a more humanistic, biopsychosocial model of care resurgent in recent years that places greater relative emphasis on the remaining strengths, capacities, and creativity of persons with dementia rather than focusing on deficits and losses.
Effective: Spring 2012
Prerequisite:

HMN 752 Chronic Disease and the Self (2.5) Utilizes published autobiographical patient narratives and live patient interviews to explore the impact of illness.
Effective: Spring 2011
Prerequisite:
HMN 753 Finding 'Right' Answers: Solving Ethical Dilemmas in Medical Practice (2.5) At the end of the four weeks students will be equipped with four cognitive frameworks for thinking about and solving ethical issues in their clinical practice.
Effective: Spring 2012
Prerequisite:

HMN 754 The Practice of Virtue in Medicine (2.5) This course requires the student to study and recognize the great human virtues and to learn to practice virtue in medicine.
Effective: Spring 2012
Prerequisite:

HMN 756 Jazz and the Art of Medicine (2.5) This is a course that focuses on improving learners' patient-physician communication through building skill in improvisation.
Effective: Spring 2014
Prerequisite:

HMN 757 "Are You Listening?" Developing Effective Communication With Our Patients (5) Effective communication with patients is a vital skill for every physician. This course will delve into the interpersonal space between physician and patient.
Effective: Fall 2012
Prerequisite:

HMN 758 Documentary Filmmaking About Innovations in Patient Centered Care (5) Students make short documentary films about innovations that make care more patient centered.
Effective: Fall 2012
Prerequisite:

HMN 796 Individual Studies (1-15) Studies outside the scope of formal courses, supervised on an individual basis.
Effective: Spring 1988
Prerequisite:

HMN 797 Special Topics (1-6) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1988

Last Import from UCM: May 24, 2014 3:00 AM
Ihc - Appellate (IHAPP)

IHAPP 995 Civil Rights Appellate Clinic (4 per semester/maximum of 8) This clinical offering will provide intensive training in appellate advocacy by involving students in non criminal civil rights cases before the state appellate courts, federal courts of appeal and the United States Supreme Court. Students will assist in case selection, the development of substantive legal positions, provide research, assist in appellate strategy development and draft briefs. As this is a new clinical offering an initial focus will be an amicus briefs, however the driving decision for case selection will be which cases, during any particular clinic session, offer the best pedagogical value. In working on these cases students will have exposure to top civil rights and appellate litigators in the country.
Effective: Summer 2011
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Ihc - Immigration (IHIMM)

IHIMM 995 Center for Immigrants' Rights - Course Component (3) Students will acquire the skills necessary to be an effective immigration advocate and attorney. Students will work on innovative projects relating to U.S. immigration policy and immigrants' rights.
Effective: Spring 2011
Prerequisite:

IHIMM 995A Center for Immigrants' Rights: Course Component (5) The course component of the Center teaches students the skills necessary to be an effective immigration advocate and attorney.
Effective: Spring 2011
Prerequisite:

IHIMM 995B Advanced Immigration Clinic This two-credit clinical experience will be open to students who have previously enrolled in the 5 credit Center for Immigrants' Rights Course and will build upon the skills they have learned. The course will involve a senior role in pending cases at the center; involvement in new initiatives undertaken by the Clinic; and possible writing and editing of a publishable material in the area of immigrants' rights.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
IHc - Refugee Law (IHREF)

IHREF 995A In-House Clinic - Refugee Law Clinic (3) Representation of foreign nationals seeking political asylum or related forms of relief in US Courts.
Effective: Fall 2008
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Ihc-Art, Sprt, Ent Law (IHASE)

IHASE 995A In-House Clinic--Art, Sports, and Entertainment Law (1-2 per semester/maximum of 4) This clinic is designed to acquaint students with the unique yet pragmatic knowledge and skills incident to rendering quality legal service in the art, sports, and entertainment professions.
Effective: Spring 2011
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Ihc-Children'S Advoc (IHCAD)

IHCAD 995A In-House Clinic-Children’s Advocacy (4 per semester/maximum of 8) The course will provide instruction to students in the legal representation of children in various civil matters, including dependency, adoption and custody actions. Students will be managing a caseload of clients. Students will meet directly with their clients, and correspond with agencies and opposing counsel. Students will appear at all court appearances with a supervising attorney. The supervising attorney will meet with students individually on a regular basis for case reviews. The classroom component of the course will focus on various substantive and skills issues, including lectures on child interviewing skills and lectures from physicians on the medical aspects of child abuse, etc.

Effective: Summer 2011
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Ihc-Disability Law (IHDIS)

IHDIS 995A In-House Clinic--Disability Law (4 per semester/maximum of 8) Up to four students per semester represent indigent persons with disabilities who have legal concerns related to those disabilities. The bulk of the work consists of administrative hearings before the Social Security Administration and judicial review in federal court. Matters handled include Social Security and Supplemental Security Income, special education, disability discrimination, and Medicare and Medicaid claims. Students are obligated to work 12 hours per week in the Clinic, and there are weekly meetings with the supervisor, either individually or as a group. This course is graded.
Effective: Spring 2011
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Ihc-Family Law (IHFAM)

IHFAM 995A In-House Clinic--Family Law (4 per semester/maximum of 8) In this clinic, up to twelve students per semester represent indigent clients, primarily before the Court of Common Pleas of Cumberland County, in domestic matters. Cases include divorce, child support, spousal support, custody and visitation, dependency (neglect), domestic violence, and related matters. Students are required to work 16 hours a week at the Clinic, and there are weekly clinic meetings, either as a group or individually with supervisors.
Effective: Summer 2011
Prerequisite:

IHFAM 995B Family Law Clinic (5 per semester/maximum of 10) In this clinic, up to seven students per semester represent indigent clients and domestic abuse victims in family law cases. All cases are in the Court of Common Pleas of Centre County. The work includes divorce, child support, spousal support, custody/visitation, domestic violence, and related matters. Students should expect to work as much time as is necessary to represent their clients successfully, which will be an average of twenty hours per week. Students also participate in a weekly clinic seminar which includes skills training, theoretical examination of clinical work, and case rounds. Each student also meets individually with the clinic supervisor to discuss their case work and their progress in the clinic. Only third-year law students are admitted in the Fall Semester. Students earn 5 graded credits.
Effective: Spring 2012
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
In Hse Rur Econ Dev (IHRED)

IHRED 995 Rural Economic Development Clinic (4 per semester/maximum of 8) The Rural Economic Development Clinic will provide students with practical legal experience representing individuals and entities in Pennsylvania's rural communities, primarily within the broad fields of agricultural, food, and energy law. Students will work with agricultural producers, businesses, landowners, and nonprofit organizations on specific projects that will involve transactional work such as preparing/reviewing contracts, addressing basic business entity issues, and providing general legal counsel.

Effective: Fall 2012

Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
In-House Clinic (IHCLN)

IHCLN 997 Special Topics (1-8) Faculty approval required.
Effective: Fall 2010

Last Import from UCM: May 24, 2014 3:00 AM
In-House Inmate (IHINM)

IHINM 995B In-House Clinic - Inmate Assistance (2) The clinic provides legal advice to inmates in state and county prisons relating to civil and criminal matters.
Effective: Fall 2008
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
In-Hse Comm Lw Clinic (IHCLC)

IHCLC 995 Community Law Clinic (4 per semester/maximum of 8) A general civil litigation clinic, which includes various forms of medication, negotiation, etc., in addition to civil hearings and traditional courtroom litigation. Due to the litigation component of this clinic, it will serve only students residing in Carlisle. Areas of law which students will be exposed to include: divorce, custody, support, protection from abuse, adoption, social security and supplemental security income claims, guardianships, special education, American with Disabilities Act claims, civil rights actions, and health care directives. Cases will be selected based on educational value to students and expertise of the clinical faculty. Effective: Fall 2013

Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Indig Crim Just Clin (IHICJ)

IHICJ 995 Indigent Criminal Justice Clinic (5 per semester/maximum of 10) The Indigent Criminal Justice Clinic provides students with the opportunity to represent indigent criminal defendants accused of misdemeanor offenses in the Centre Court of Common Pleas under the supervision of an attorney from the Centre County Public Defender Office. Students learn litigation, negotiation and advocacy skills as they represent defendants through all stages of a criminal case.

Effective: Summer 2013
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Industrial Engineering (I E)

Prerequisite:

I E 405 Deterministic Models in Operations Research (3) Deterministic models in operation research including linear programming, flows in networks, project management, transportation and assignment models and integer programming. Effective: Spring 2014
Prerequisite:

I E 408 Cognitive Work Design (3) Design and evaluation of cognitive work, including the human/computer interface, visual displays, software design, and automated system monitoring, with emphasis on human performance. Effective: Spring 2006
Prerequisite:

Prerequisite:

I E 419 Work Design - Productivity and Safety (3) Methods improvement, physical work design, productivity, work measurement; principles and practice of safety. Effective: Spring 2006
Prerequisite:

I E 424 Process Quality Engineering (3) Statistical methods for engineering process characterization and improvement. Effective: Fall 2013
Prerequisite: Concurrent: I E 405

I E 425 Stochastic Models in Operations Research (3) Stochastic models in operations research with real world applications including dynamic programming, Markov chains, queueing models and inventory models. Effective: Spring 2014
Prerequisite: Concurrent: I E 405

I E 428 Metal Casting (3) Application of engineering principles to the design of castings; casting of ferrous and nonferrous alloys; laboratory and simulation projects. Effective: Summer 1995
Prerequisite:

I E 433 Regression Analysis and Design of Experiments (3) Theory and application of regression analysis and design of experiments to build models and optimize process and product parameters. Effective: Summer 2005
Prerequisite:

I E 434 Statistical Quality Control (3) Statistical techniques for univariate and multivariate monitoring of independent and autocorrelated processes; foundations of quality control and improvement. Effective: Summer 2007
Prerequisite:

I E 436 Six Sigma Methodology (3) Techniques for structured problem-solving to improve the quality and cost of products and processes. Effective: Spring 2010
Prerequisite:

I E 453 Simulation Modeling for Decision Support (3) Introduction of concepts of simulation modeling and analysis, with application to manufacturing and production systems. Effective: Fall 2009
Prerequisite:

I E 454 Applied Decision Analysis (3) Theory and practice of decision analysis applied to engineering problems. Effective: Fall 1992
Prerequisite:

I E 456 (M E 456) Industrial Robot Applications (3) Introduction to robotics, with emphasis on robot selection, programming, and economic justification for manufacturing applications. Effective: Spring 2011
Prerequisite:

I E 460 Service Systems Engineering (3) Use of quantitative models and methods for analysis, design and control of service systems. Effective: Spring 2011
Prerequisite:

I E 462 Introduction to Expert Systems (3) Building expert systems in general; emphasis on knowledge representation and inference mechanisms in the manufacturing domain.
Effective: Fall 2009
Prerequisite:

IE 463 **Computer Aided Design and Manufacturing** (3) Three dimensional modeling and manufacture of parts and assemblies using Computer Aided Design and manufacturing software, and numerically controlled machines.
Effective: Fall 2013
Prerequisite:

IE 464 **Assembly of Printed Circuit Boards** (3) Manufacturing processes and principles for assembly of printed circuit boards with surface mount and through-hole technology.
Effective: Spring 2008
Prerequisite:

IE 466 ** Concurrent Engineering** (3) Concurrent engineering methods for product/process development, capturing customer requirements, insuring manufacturability and serviceability.
Effective: Summer 1996
Prerequisite:

IE 467 **Facility Layout and Material Handling** (3) Analytical, simulation and computer-aided graphical methods to generate effective layout designs; design and integration of material handling systems and equipment. For Industrial Engineering majors.
Effective: Fall 2007
Prerequisite:

IE 468 **Optimization Modeling and Methods** (3) Mathematical modeling of linear, integer, and nonlinear programming problems and computational methods for solving these classes of problems.
Effective: Fall 2001
Prerequisite:

IE 469 **Global Industrial Engineering Experience** (1) Students will learn how to prepare for a short term, professional exchange in a foreign nation. Students will then travel to a designated university within a foreign nation for the purpose of a five day cultural and professional exchange.
Effective: Summer 2009
Prerequisite:

IE 470 **Manufacturing System Design and Analysis** (3) Contemporary design and analysis methodologies used to organize systems for economic manufacture of products.
Effective: Fall 2013
Prerequisite:

IE 477 **Computer Control of Manufacturing Machines and Processes** (3) Elements of computer control and discrete-time modeling. Design and analysis of digital controls for manufacturing machines and processes.
Effective: Fall 2009
Prerequisite:

IE 478 **Retail Services Engineering** (3) Introduction to retail services operations, process models, and application of information technologies to enhance productivity and profitability.
Effective: Spring 2010
Prerequisite:

IE 479 (EDSGN 479) **Human Centered Product Design and Innovation** (3) Consumer product design for a global market, incorporating human factors principles and user desires in a multicultural perspective.
Effective: Summer 2010
Prerequisite:

IE 480W **Capstone Design Project** (3) Industry-based senior capstone design project emphasizing manufacturing systems, service systems, and information systems in an interdisciplinary setting.
Effective: Spring 2009
Prerequisite:

IE 494H **Senior Honors Thesis** (1-9) Students must have approval of a thesis adviser before scheduling this course.
Effective: Spring 2000

IE 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

IE 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

IE 497D **Micro/Nano Fabrication** (3) An exploration of the emerging science and engineering concepts of how to fabricate very small components and devices on the micro/nano-scale.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

IE 499 (IL) **Foreign Studies--Industrial Engineering** (1-12) Courses offered in foreign countries by individual or group instruction.
I E 505 Linear Programming (3) An accelerated treatment of the main theorems of linear programming and duality structures plus introduction to numerical and computational aspects of solving large-scale problems.
Effective: Fall 1992
Prerequisite:

I E 507 Operations Research: Scheduling Models (3) Scheduling models with simultaneous job arrival and probabilistic job arrival, network scheduling, and scheduling simulation techniques.
Effective: Fall 1992
Prerequisite:

I E 509 Operations Research: Waiting Line Models (3) Waiting line models including models with infinite queues, finite queues, single and multiple servers under various priorities and disciplines.
Effective: Spring 1994
Prerequisite:

I E 510 Integer Programming (3) Study of advanced topics in mathematical programming; emphasis on large-scale systems involving integer variables.
Effective: Spring 1994
Prerequisite:

I E 511 Experimental Design in Engineering (3) Statistical design and analysis of experiments in engineering; experimental models and experimental designs using the analysis of variance.
Effective: Fall 1992
Prerequisite:

I E 512 Graph Theory and Networks in Management (3) Graph and network theory; application to problems of flows in networks, transportation and assignment problems, pert/CPM, facilities planning.
Effective: Spring 1994
Prerequisite:

I E 516 (SC&IS 516) Applied Stochastic Processes (3) Study of stochastic processes and their applications to engineering and supply chain and information systems.
Effective: Spring 2006
Prerequisite:

I E 518 Materials, Forming Processes, and Quality (3) Study of the principles and mechanisms of conventional and developing manufacturing processes and the methods of determining work piece quality and properties.
Effective: Summer 2013
Prerequisite:

I E 519 (SC&IS 519) Dynamic Programming (3) Theory and application of dynamic programming; Markov decision processes with emphasis on applications in engineering systems, supply chain and information systems.
Effective: Spring 2006
Prerequisite:

I E 520 Multiple Criteria Optimization (3) Study of concepts and methods in analysis of systems involving multiple objectives with applications to engineering, economic, and environmental systems.
Effective: Spring 2000
Prerequisite:

I E 521 Nonlinear Programming (3) Fundamental theory of optimization including classical optimization, convex analysis, optimality conditions and duality, algorithmic solution strategies, variational methods in optimization.
Effective: Spring 1994
Prerequisite:

I E 522 Discrete Event Systems Simulation (3) Fundamentals of discrete event simulation, including event scheduling, time advance mechanisms, random variate generation, and output analysis.
Effective: Spring 2002
Prerequisite:

I E 528 Metal Cutting Theory (3) Study of the theory of metal cutting, contemporary and future problems of metal removal processes; critical analysis of current literature.
Effective: Summer 2011

I E 530 Financial Engineering (3) Financial option pricing and portfolio design relevant to investment decision making.
Effective: Fall 2010
Prerequisite:

I E 532 Reliability Engineering (3) Mathematical definition of concepts in reliability engineering; methods of system reliability calculation; reliability modeling, estimation, and acceptance testing procedures.
Effective: Fall 1992
Prerequisite:

Effective: Spring 1998
Prerequisite:
I E 546 (M E 546) Designing Product Families (3) Product families, product platforms, mass customization, product variety, modularity, commonality, robust design, product architectures.  
Effective: Summer 2013  
Prerequisite:  

I E 547 (EDSGN 547, M E 547) Designing for Human Variability (3) Statistics, optimization, and robust design methodologies to design products and environments that are robust to variability in users.  
Effective: Summer 2009  

I E 549 (EDSGN 549) Design Decision Making (3) Complexity of design decision-making; state-of-the-art methods and tools.  
Effective: Summer 2011  

I E 550 Manufacturing Systems (3) Fundamental theory for analyzing manufacturing systems including structural analysis, optimization and economics of manufacturing systems, automated and computer-aided manufacturing.  
Effective: Summer 2013  

Effective: Summer 2011  

I E 552 (BIOE 552) Mechanics of the Musculoskeletal System (3) Structure and biomechanics of bone, cartilage, and skeletal muscle; dynamics and control of musculoskeletal system models.  
Effective: Summer 1998  
Prerequisite:  

I E 553 (BIOE 553) Engineering of Human Work (3) Physics and physiology of humans at work; models of muscle strength, dynamic movements; neural control; physical work capacity; rest allocation.  
Effective: Fall 1992  
Prerequisite:  

I E 554 Production, Planning, and Control (3) Analysis of research literature for topics including scheduling, capacity planning, and lot sizing applied to manufacturing and production.  
Effective: Summer 2013  
Prerequisite:  

I E 555 Statistical Process Monitoring and Analysis (3) Statistical techniques for univariate and multivariate monitoring of dependent and autocorrelated processes; theoretical and numerical approaches for analyzing performance.  
Effective: Spring 2008  

I E 556 (M E 556) Robotic Concepts (3) Analysis of robotic systems; end effectors, vision systems, sensors, stability and control, off-line programming, simulation of robotic systems.  
Effective: Fall 1992  
Prerequisite:  

I E 557 Human-in-the-Loop Simulation (3) Design and programming of simulations that facilitate human control, real-time discrete-event simulation, supervisory control of dynamic system.  
Effective: Spring 2009  
Prerequisite:  

I E 558 Engineering of Cognitive Work (3) Information processing and decision making models of the human in the modern workplace, emphasizing visual inspection and other industrial applications.  
Effective: Fall 1992  
Prerequisite:  

I E 559 Law and Technology: Products Liability (3) A seminar course on one area of law and technology, products liability.  
Effective: Spring 2008  

I E 561 (EDSGN 561, CSE 561, IST 561) Data Mining Driven Design (3) The study and application of data mining/machine learning (DM/ML) techniques in multidisciplinary design.  
Effective: Summer 2014  

I E 562 Expert Systems Design in Industrial Engineering (3) Methodological aspects of expert systems design and review of some existing systems with emphasis on manufacturing and industrial engineering.  
Effective: Summer 2013  
Prerequisite:  

I E 563 Computer-Aided Design for Manufacturing (3) Study of CAD systems and concepts including 3D wireframe and solid modeling systems, emphasizing manufacturing applications.  
Effective: Fall 1992  
Prerequisite:  

The Pennsylvania State University
I E 566 Quality Control (3) Advanced quality assurance and control topics, including multivariate methods, economic design for control and acceptance, dimensioning, tolerancing, and error analysis.
Effective: Summer 2013

I E 567 Distributed Systems and Control (3) Advances in distributed control and decision-making in enterprises and supply chains with emphasis on computing, algorithms, and dynamics.
Effective: Spring 2006

I E 570 (SC&IS 570) Supply Chain Engineering (3) Use of operations research models and methods for solving problems in supply chain systems.
Effective: Spring 2014
Prerequisite:

I E 582 Information Technology for Industrial and Manufacturing Engineering (3) Students will learn advanced information technology concepts, tools, and techniques for designing and implementing manufacturing systems.
Effective: Spring 2008
Prerequisite:

I E 583 Response Surface Methodology and Process Optimization (3) Response Surface Methodologies used for sequential experimentation and optimization of production processes. Statistical design and analysis of such experiments.
Effective: Spring 2002
Prerequisite:

Effective: Summer 2013

I E 588 Nonlinear Networks (3) Foundation in congestion games, including elements of non-cooperative game theory, equilibrium network flows, Braess paradox, and the price of anarchy.
Effective: Fall 2013
Prerequisite:

I E 589 Dynamic Optimization and Differential Games (3) Dynamic optimization and dynamic non-cooperative games emphasizing industrial applications.
Effective: Fall 2007
Prerequisite: Concurrent: I E 521

I E 590 I E Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1993
Prerequisite:

I E 594A Technical Paper Presentation (1) Preparation of a paper in a technical journal format based upon the student's course work project.
Effective: Spring 2000
Prerequisite:

I E 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

I E 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

I E 597A Convex Optimization (3) This course focuses on properties of convex sets and convex functions. It will cover convex optimization problems, their solution techniques and real life applications.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

I E 597C Service Networks: Empirical Analysis, Modeling & Management (3) Empirical analysis of contact center and patient flow data, fluid-models, asymptotic approximations system design, staffing, skill-based routing and scheduling.

I E 597D Healthcare Systems Engineering (3) Analysis of healthcare systems to improve service to patients and increase
the efficiency of providing cost-effective service.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

I E 597E **Workforce Engineering** (3) Quantitative applications related to determining workforce size, skill-sets, and multifunctionality in service and manufacturing systems based on measureable quality and productivity performances.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

I E 597F **Measurement System Design** (3) Theoretical and practical knowledge in discrete part metrology for the validation, monitoring and control of the output of manufacturing processes.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

I E 597I **Stochastic Optimization** (3) This course focuses on the solution of optimization problems when there is uncertainty in the underlying data. It will include a review of various models for decision-making under uncertainty.

I E 597J **Additive Manufacturing** (3) This course will cover the basics of various additive manufacturing processes, with emphasis on the fundamentals and applications of additive manufacturing.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

I E 597K **Machining Process Design and Theory** (4) Comprehensive study of the fundamentals of machining processes, including applications, process design, process implementation, and theory.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

Effective: Fall 1992

I E 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1992

I E 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1992

I E 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1992

Last Import from UCM: May 24, 2014 3:00 AM
Industrial Health and Safety (I H S)

I H S 500 Occupational Safety Engineering (3) Provides a basis to assist students in understanding/applying the scientific and engineering principles associated with the field of safety.
Effective: Summer 2002
Prerequisite:

I H S 510 Occupational Health (3) Introduction to Occupational Health including history, general concepts, hazardous workplace exposures, occupational disorders, and prevention of occupational disease.
Effective: Summer 2002
Prerequisite:

I H S 520 Contemporary Issues in Industrial Health and Safety (3) Evaluation of industrial processes, hazards, labor, and corporate structure, so that hazard control programs and implementation plans can be formulated.
Effective: Summer 2002
Prerequisite:

I H S 590 (ENNEC 590) Colloquium (1-3) Continuing seminars that consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.
Effective: Spring 2009

I H S 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2002

I H S 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2002

Effective: Summer 2002

Effective: Summer 2002

Last Import from UCM: May 24, 2014 3:00 AM
Information Science (IN SC)

IN SC 431 Information Systems Architecture (3) Principles and priorities of enterprise system design, middleware and service-oriented architectures and web services.
Effective: Summer 2005

IN SC 463 Languages of the Web (3) Taxonomy of programming languages and frameworks used in the development of web-based information systems.
Effective: Summer 2005

IN SC 480 Software Development Lifecycle (3) Modern Software Development Techniques and Processes. Software Paradigms including OO and lifecycle modeling and improvement.
Effective: Summer 2005

IN SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that they may be topical or of special interest.
Effective: Spring 1998

IN SC 497A Special Topics: Network Management II (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that they may be topical or of special interest.
Effective: Summer 2014 Ending: Summer 2014

IN SC 497B Special Topics: Enterprise Architecture (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that they may be topical or of special interest.
Effective: Summer 2014 Ending: Summer 2014

IN SC 497C Special Topics: Business Intelligence (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that they may be topical or of special interest.
Effective: Summer 2014 Ending: Summer 2014

IN SC 521 Database Design Concepts (3) The requirements capture, design, and development of relational database applications; analysis of business requirements and development of appropriate database systems.
Effective: Summer 2002
Prerequisite:

IN SC 525 Applied Data Mining (3) Functional overviews of algorithms used in data mining will be presented and contemporary data mining software used to conduct a project.
Effective: Spring 2006
Prerequisite:

IN SC 526 Business Process Management and Integration (3) Design and development of business processes that align business objectives with Information Technology (IT) systems.
Effective: Fall 2012

IN SC 531 Information Technology Law (3) Examines the legal concepts/issues applicable to the field of information technology and to information technology, software engineering, and computer professionals.
Effective: Summer 2002
Prerequisite:

IN SC 535 Information Technology: Economic Aspects (3) Course examines how changes in information technology affect established organizations and the development of new firms, products, and markets.
Effective: Summer 2002
Prerequisite:

IN SC 536 Information Technology: Economic Aspects Seminar (3) Course examines the start up of new technology firms or the transformation of old economy companies into Internet companies.
Effective: Fall 2003
Prerequisite:

IN SC 539 IT Systems Seminar (3) A culminating, integrative capstone experience for IN SC students, including a formal technical paper and in-class presentation.
Effective: Spring 2001
Prerequisite:

IN SC 561 Web Security and Privacy (3) A web-centric look at the latest techniques and practices in computer security as they apply to the Internet.
Effective: Fall 2013
Prerequisite:

IN SC 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or
IN SC 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1999

IN SC 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

IN SC 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998

Last Import from UCM: May 24, 2014 3:00 AM
Information Sciences And Technology (IST)

IST 402 Emerging Issues and Technologies (3 per semester/maximum of 9) Introduction to emerging issues, technology forecasting and analysis; overview of emerging issues and leading technologies in IST and how they impact information systems, users, the IT labor force and society. Effective: Fall 2006 Prerequisite:

IST 411 Distributed-Object Computing (3) Introduction to distributed-object computing and its use in client/server and real-world computing applications. Effective: Summer 1999 Prerequisite:

IST 412 The Engineering of Complex Software Systems (3) Introduction to the engineering of complex software systems including software system specification, design and implementation, integration and test, and evolution. Effective: Summer 1999 Prerequisite:

IST 413 Usability Engineering (3) This course addresses activities in the system development process that ensure usability. It considers the emerging concept of usability, requirements gathering and analysis, activity design, information design, interaction design, documentation design, user testing and usability evaluation. Effective: Spring 2007 Prerequisite:

IST 420 Fundamentals of Systems and Enterprise Integration (3) Introductory course on integration of information technology into different venues, including the planning, development, and implementation of the integration. Effective: Summer 2003 Prerequisite:

IST 421 Advanced Enterprise Integration: Technologies and Applications (3) Advanced course on the integration of information technology into systems applications. Effective: Spring 2004 Prerequisite:

IST 422 Enterprise Architecture Foundations (3) Theoretical foundations and practice of enterprise architecture. Effective: Summer 2013 Prerequisite:

IST 423 Enterprise Information Management and Storage Architecture (3) Provide in-depth study of the concepts, issues, and technologies associated with the complex world of enterprise information and storage architecture. Effective: Summer 2013 Prerequisite:

IST 424 Architectural Modeling of Organizations (3) Theoretical foundations and practice of enterprise modeling. Effective: Summer 2013 Prerequisite:

IST 425 (MGMT 425, ENGR 425) New Venture Creation (3) Via problem-based learning, teams define new business ventures to meet current market needs, develop business plans, and present to investors. Effective: Spring 2011 Prerequisite:

IST 426 (ENGR 426, MGMT 426) Invention Commercialization (3) Working with Penn State inventions selected by the Intellectual Property Office, student teams define an optimum commercialization path each technology. Effective: Spring 2011 Prerequisite:

IST 431 The Information Environment (3) Survey of social environment of information technology themes: Community, sovereignty, privacy, ethics, economics, and knowledge management. Effective: Fall 2004 Prerequisite:

IST 432 Legal and Regulatory Environment of Information Science and Technology (3) Legal environment of information technology, constitutional/political issues, intellectual property, management, e-commerce, privacy, access, computer contracting, cyberspace regulation. Effective: Spring 2007 Prerequisite:

IST 437 Digital Design & Innovation (3) This course introduces students to design thinking, user-driven innovation and user experience, and business model implementation issues for IT-driven innovation. Effective: Summer 2014 Prerequisite:

IST 440W Information Sciences and Technology Integration and Problem Solving (3) Problem-based approach to technology integration by focusing on real-life problems faced by an organization. Effective: Fall 2002 Prerequisite:
IST 441 Information Retrieval and Organization (3) Introductory course for seniors and graduate students covering the practices, issues, and theoretical foundations of organizing and analyzing information and information content for the purpose of providing access to textual and nontextual information resources. Introduces students to the principles of information storage and retrieval systems and databases.
Effective: Spring 2004
Prerequisite:

IST 442 (IL) Information Technology in an International Context (3) International concepts to improve strategies for the design, dissemination, and use of information technology.
Effective: Summer 2006
Prerequisite:

IST 443 IT Professional Services Theory and Practice (3) Explores and applies the basic concepts, methodologies, tools, and techniques of consulting and professional service organizations in information sciences and technology.
Effective: Spring 2006
Prerequisite:

IST 444 Advanced IT Professional Services (3) Explores advanced IT professional services topics, and the unique application of consulting methods in various industry sectors.
Effective: Summer 2005
Prerequisite:

IST 445H Globalization Trends and World Issues (3) This course covers trends in globalization and their influence on U.S. policy making as well as the role of the U.S. in international issues.
Effective: Summer 2005
Prerequisite:

IST 446 An Introduction to Building Computer/Video Games (3) An interdisciplinary course that introduces students to process and techniques involved in developing a video or computer game.
Effective: Summer 2006
Prerequisite:

Effective: Spring 2012
Prerequisite:

IST 452 Legal and Regulatory Environment of Privacy and Security (3) Exploration of legal, regulatory, public policy, and ethical issues related to security and privacy for information technology professionals in public institutions, private enterprise, and IT services.
Effective: Spring 2012
Prerequisite:

IST 453 Legal, Regulatory, Policy Environment of Cyber Forensics (3) Legal, regulatory and public policy environment of computer and network forensics that constrain investigatory and monitoring activities in computer and network environments.
Effective: Summer 2006
Prerequisite:

IST 454 Computer and Cyber Forensics (3) Fundamental issues and concepts of computer forensics; aspects of computer and cyber crime; methods to uncover, protect, exploit, and document digital evidence; tools, techniques, and procedure to perform computer and cyber crime investigation.
Effective: Spring 2012
Prerequisite:

IST 456 Information Security Management (3) Contemporary Security Issues; security management processes, architecture and models; risk analysis and management; security planning, analysis and safeguards; security policies development and administration; contingency planning, incidence handling and response; and security standards and certification processes.
Effective: Fall 2013
Prerequisite:

IST 461 Database Management and Administration (3) Introduces advanced topics in database management systems that are fundamental to effective administration of enterprise information systems.
Effective: Spring 2006
Prerequisite:

IST 462 Database Modeling and Applications (3) This course introduces advanced topics in database modeling and applications.
Effective: Spring 2006
Prerequisite:

IST 489H Research Methods for the Information Sciences and Technology (3) Seminar course focused on approaches to studying information and communication technologies and writing theses and other research reports.
Effective: Summer 2006
Prerequisite:

IST 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Fall 1999
Prerequisite:

IST 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2000

IST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2000

IST 497C Connective Media Fundamentals (3) The course introduces recent research and development efforts in connective media. Students will develop a real-world computer system.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

IST 497E Mobile and Ubiquitous Computing (3) Seminar focused on the research themes and hands-on development of mobile & ubiquitous computing applications.
Prerequisite:

IST 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2001

IST 501 Interdisciplinary Research Methods for Information Sciences and Technology (6) An interdisciplinary introduction to the research methods for investigating how information technologies are analyzed, designed, and evaluated to meet human needs at multiple levels of analysis.
Effective: Fall 2013

IST 503 Foundations for IST Research (3) Study of major methodological, normative, and theoretical issues in philosophy of science related to research in information sciences and technology.
Effective: Spring 2007
Concurrent: IST 501

IST 510 Foundations in Computational Informatics (3) Foundational theories and techniques in general computational informatics.
Effective: Summer 2013
Prerequisite:

IST 511 Information Management: Information and Technology (3) Introduction to theoretical, computational, and practical issues involved in managing textual, spatial, temporal, and multimedia information in a computerized system.
Effective: Fall 2001
Prerequisite:

IST 512 Information Processing Architecture and Technology (3) This course introduces the core theories, concepts, and methods regarding information and technology from an information processing point of view.
Effective: Summer 2005

IST 516 Web and Internet Information Retrieval (3) The course addresses aspects of searching, retrieving and modeling the Web/Internet as information repositories using mathematical and probabilistic treatments.
Effective: Spring 2007 Ending: Fall 2014
Prerequisite:

IST 516 Web Fundamentals (3) A practical treatment of fundamental web techniques.
Effective: Spring 2015 Future: Spring 2015
Prerequisite:

IST 520 Foundations in Human-Centered Design (3) Foundational theories in Human-Centered Interactions used for Human-Centered Design.
Effective: Spring 2014
Prerequisite:

IST 521 Human-Computer Interaction: The User and Technology (3) Users, models of users, developing the models, technology for creating interfaces; examples of good research and implications for Human-Computer Interface (HCI) design.
Effective: Fall 2001
Prerequisite:

IST 525 Computer-Supported Cooperative Work (3) IST 525 introduces theories, empirical findings, evaluation methods, and design frameworks in computer-supported cooperative work.
Effective: Spring 2014
Prerequisite:

IST 526 Development Tools and Visualizations for Human-Computer Interaction (3) IST 526 addresses concepts and tools for developing working user interface software and prototypes to provide effective information visualizations.
Effective: Spring 2014
Prerequisite:

IST 530 Foundations in Social Informatics (3) Foundations in social theories used in the study of the human context within which information and information technology exists.
Effective: Fall 2013

Prerequisite:

IST 532 Organizational Informatics (3) Researching Information and Information Systems in Organizations.
Effective: Summer 2005

Prerequisite:

IST 535 Information Technology Valuation, Markets and Innovation (3) This course covers the economic aspects of information technology and innovations.
Effective: Summer 2006

Prerequisite:

IST 536 Public and Community Informatics (3) Theories and uses of ICT in public sector and community organizations.
Effective: Spring 2007

Prerequisite:

IST 541 Qualitative Research in Information Sciences and Technology (3) Assists IST researchers in their efforts to learn about and employ appropriate qualitative methods in their research.
Effective: Spring 2004

Prerequisite:

IST 554 Network Management and Security (3) Essential skills and knowledge for effectively utilizing networks and Internet technologies to facilitate, manage and secure data communications and applications.
Effective: Summer 2009

IST 555 Intelligent Agents and Distributed Decision Making (3) Distributed decision making theories and agent-based technologies, models and systems with applications in command and control, emergency and resource management.
Effective: Summer 2009

IST 556 Web Analytics: Research Approaches for Online Data (3) The course will provide the theoretical and methodological foundations of web data with the major focus on the application of web analytics methods and data.
Effective: Summer 2014

IST 557 (STAT 557) Data Mining I (3) This course introduces data mining and statistical/machine learning, and their applications in information retrieval, database management, and image analysis.
Effective: Summer 2009

Prerequisite:

IST 558 (STAT 558) Data Mining II (3) Advanced data mining techniques: temporal pattern mining, network mining, boosting, discriminative models, generative models, data warehouse, and choosing mining algorithms.
Effective: Summer 2010

Prerequisite:

IST 561 (EDSGN 561, I E 561, CSE 561) Data Mining Driven Design (3) The study and application of data mining/machine learning (DM/ML) techniques in multidisciplinary design.
Effective: Summer 2014

IST 562 Theoretical Foundations of Information Science (3) This course introduces the theoretical foundations of information science, with applications in communication, signal processing, machine learning, and pattern recognition.
Effective: Summer 2009

Prerequisite:

IST 564 Crisis, Disaster and Risk Management (3) This course examines the fundamental elements of crisis, disaster, risk and emergency management.
Effective: Summer 2009

IST 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2000

IST 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2001

IST 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2000

IST 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered
infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2000

IST 597B Visualization and Advanced Analysis of Social Networks (3) Students will learn to aggregate and perform hypothesis testing on social network data (matrices) using UCINET, Pnet, and Gephi.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

IST 597C IST Integration of Theories and Methods (3) Surveys theories and methods of IST research for application to practical problems.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

IST 597D Big Data Fundamentals (3) Foundations and applications of big data science: complexity cyberinfrastructure, data structures, search, security, processing, analytics, visualization, mining, governance and management. Should be familiar with databases and statistics.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

IST 597E How the Mind Works: Methods, Experiments and Models in Cognitive Science (3) In this broad overview of the study of the human brain, we review research results in perception, memory and learning, and higher-level cognition. We will read foundational papers and interpret cutting-edge research results that help us understand how we think, communicate, make decisions - and how we make mistakes.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

IST 597F Principles of Artificial Intelligence (3) Automated problem solving, knowledge representation, reasoning, planning, decision making, learning, perception, action, communication and interaction.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

IST 597G Computer and Information Security: Economic and Psychological Considerations (3) Surveys theories, methods and key results of modern security research to understand the economic robustness of systems, and the behavior of users and attackers.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

IST 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2001

IST 600 Thesis Research (1-15) No description.
Effective: Fall 2001

IST 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 2001

IST 602 Supervised Experience in College Teaching (1-3 per semester, maximum of 6) No description.
Effective: Fall 2001

Effective: Fall 2001

IST 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 2001

IST 815 Information Security and Assurance (3) This course provides theoretical and practical foundations of information security assurance.
Effective: Fall 2013
Prerequisite:

IST 841 Search Engines & Information Retrieval (3) Introductory course on search engines and information retrieval. Search, indexing, ranking, and search evaluation are formally defined, explained, and used.
Effective: Summer 2010

IST 852 Knowledge Management (3) This course provides a foundation in knowledge management concepts and paradigms, emphasizing computational methodologies and tools for supporting data and knowledge management practices.
Effective: Spring 2014

IST 868 Topics in Visual Analytics for Security Intelligence (3) Introduce visual analytic techniques for security informatics and intelligence. Survey technical approaches for data analysis, threats and vulnerability, communicating risk.
Effective: Spring 2014

Prerequisite:

IST 885 Introduction to Multisensor Data Fusion (3) Understanding the concepts, techniques, and issues surrounding the fusion of information from multiple sensors and sources of data.
Effective: Summer 2009

IST 896 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

IST 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2011

IST 898 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2011

Last Import from UCM: May 24, 2014 3:00 AM
Information Systems (INFSY)

INFSY 535 **Object-Oriented Design and Program Development in Business** (3) Overview of key concepts in object design and the application of these concepts in business software development.
Effective: Fall 2001
Prerequisite:

INFSY 540 **Information Technology and Knowledge Management** (3) Information systems management, enterprise models of information technology, information technology and knowledge management.
Effective: Spring 2005
Prerequisite:

INFSY 543 **Electronic Commerce** (3) Overview of key aspects of E-Commerce within an organizational context including coverage of managerial issues and supporting technology.
Effective: Spring 2004
Prerequisite:

INFSY 544 **Design, Development, and Management of E-business** (3) Advanced topics in e-business including effective design, development, and management of E-business.
Effective: Summer 2004
Prerequisite:

INFSY 545 **Program, Data, and File Structures** (3) Program, data, and file structures are studied as they relate to management of data in information systems.
Effective: Fall 2001
Prerequisite:

INFSY 547 **WEB Enabled Technologies** (3) Integrating design principles and applying technologies that support business related, web-based applications.
Effective: Fall 2001
Prerequisite:

INFSY 554 **Master's Project** (3) Development of an original master's project in the student's field of interest and preparation of a paper.
Effective: Spring 1992
Prerequisite:

INFSY 555 **Data Management Systems** (3) Concepts and theory of database management systems explored through data modeling and planning techniques.
Effective: Fall 2001
Prerequisite:

INFSY 556 **Data Warehousing** (3) The study of the requirements collection, design, and development of data warehouses.
Effective: Fall 2001
Prerequisite:

INFSY 560 **Data Communications Systems and Networks** (3) Hardware and software concepts relevant to current communications and networking technology. The importance of telecommunications is emphasized.
Effective: Spring 1992
Prerequisite:

INFSY 563 **Network Security** (3) This is a study of network security concepts, technology and issues. Authentication, privacy and integrity of messages are analyzed.
Effective: Summer 2004
Prerequisite:

INFSY 564 **Wireless Networks** (3) This course is a study of wireless network standards, technology and applications. Both local and wide area networks are covered.
Effective: Summer 2004
Prerequisite:

INFSY 565 **Intelligent Systems in Business** (3) This course will emphasize the analysis, design, and application of intelligent systems within organizational settings.
Effective: Fall 2001
Prerequisite:

INFSY 566 **Data Mining and Knowledge Discovery** (3) The study and application of data mining techniques used to mine patterns in large transactional databases.
Effective: Fall 2001
Prerequisite:

INFSY 570 **Software Engineering in the Analysis and Design of Information Systems** (3) Software engineering concepts, specifically the analysis and design of structured information systems using computer-aided software engineering (CASE).
Effective: Spring 2001
Prerequisite:

INFSY 575 **Seminar in Information Technology Management** (3) Examination of selected topics relevant to current and
future managerial and organizational issues of information technology.
Effective: Spring 1992
Prerequisite:
INFSY 585 **Applications in Medical Informatics** (3) Analysis of complex systems specific to the support of healthcare management and delivery applications.
Effective: Summer 2004
Prerequisite:
INFSY 587 **Global Information Technology** (3) Comprehensive coverage of components, applications, and issues of global information technology management in organizations worldwide.
Effective: Summer 1997
Prerequisite:
INFSY 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2009

INFSY 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experience, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 1997

INFSY 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1992

INFSY 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1999

Last Import from UCM: May 24, 2014 3:00 AM
Instructional Systems (INSYS)

INSYS 415A Systematic Instructional Development (3) Preparation in the use of a nine-step model for systematically analyzing instructional problems and developing validated, practical solutions. Effective: Fall 2013

INSYS 415B Systematic Instructional Development for Teachers (3) Preparation of teachers to use a systematic model to design learning environments for K-12 classrooms. Effective: Summer 2012

Prerequisite:

INSYS 432 Designing Learning Within Course Management Systems (3) Hands-on design of didactic and constructivist instructor-facilitated online lessons within the affordances and constraints of course management systems. Effective: Summer 2013

Concurrent: ADTED 470

INSYS 433 Teaching and Learning Online in K-12 Settings (3) Explores uses of online technologies for K-12 settings including cybercharter and blended settings. Effective: Summer 2013

INSYS 442 Innovative Instructional Applications of Microcomputer Technology (3) Educators experience and develop innovative instructional applications of text-processing, database management, spreadsheet, and telecommunication software in their classrooms. Effective: Fall 2008

Prerequisite:

INSYS 447 Instructional Design for Multimedia Technologies (3) State of the art multimedia technology hardware such as interactive video, CD-ROM and digitizing audio and video. Effective: Fall 2001

INSYS 471 Introduction to Educational System Design (3) Investigates systems theory and how components of educational systems interact; develops insights on current issues and models in Educational System Design. Effective: Summer 1996

INSYS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1996

INSYS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 1996

INSYS 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Summer 1996

INSYS 521 Instructional Systems Analysis (3) Conducting needs analysis, performance analysis, task analysis, learner analysis, and environmental analysis in preparation for instructional design. Effective: Fall 2001

Prerequisite:

INSYS 522 Analyzing Outcomes and Learners (3) Analyzing instructional outcomes, analyzing tasks, and writing objectives for the instructional design; analyzing learners characteristics. Effective: Summer 1998

Prerequisite:

INSYS 525 Instructional Design Models, Strategies, and Tactics (3) Application of instructional design models and design of appropriate instructional strategies and tactics. Effective: Spring 1999

Prerequisite:

INSYS 527 Designing Constructivist Learning Environments (3) Designing learning environments based on constructivist principles of learning that provide modeling, coaching, and scaffolding. Effective: Summer 1996

Prerequisite:
INSYS 544 Designing Video for Instruction and Training (3) The application of theory to the design of visual instruction for multimedia instruction.
Effective: Summer 1996
Prerequisite:

INSYS 545 Research in Instructional Computing (3) The critical analysis of research in instructional computing and the application of research methodologies in instructional computing research.
Effective: Fall 2001
Prerequisite:

INSYS 549 Current Topics in Emerging Technologies (3) An in-depth seminar on the instructional and training design implications of specific new technologies as they emerge.
Effective: Fall 2001
Prerequisite:

INSYS 551 Performance Technology for Instructional Designers (3) Methods of identifying human performance problems in organizations and developing instructional and non-instructional interventions.
Effective: Summer 1996
Prerequisite:

INSYS 553 Managing and Consulting for Instructional Development (3) Knowledge and skills in managing and coordinating an instructional development project and consulting with subject matter experts and clients.
Effective: Summer 1996
Prerequisite:

INSYS 554 Applied Qualitative Research for Work Practice, Innovation, and Systems Design (3) Investigates qualitative research paradigms and methodologies; develops skills in use of ethnographic methods in work practice, innovation and systems design.
Effective: Summer 2000
Prerequisite:

INSYS 575 Designing Experimental Research in Instructional Systems (3) Designing research studies in Instructional Systems of a quantitative and experimental nature. Will result in a research proposal.
Effective: Spring 2007

INSYS 581 Theoretical Foundations of Instructional Systems (3) Analysis of theoretical foundations of the instructional systems (systems and cybernetics, communications, cognitive psychology, sociological, constructivist, ecological) for doctoral students.
Effective: Summer 1996
Prerequisite:

INSYS 583 Survey of Research in Instructional Systems and Technology (3) Analysis and evaluation of research in domains of instructional systems and technology.
Effective: Summer 1996
Prerequisite:

INSYS 586 Diffusion and Adoption of Innovations (3) Understanding change process in educational contexts, comparing various models, tailoring them to individual needs, and creating personalized model of change.
Effective: Summer 1998
Prerequisite:

INSYS 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1996

INSYS 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2003

INSYS 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 1996

INSYS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1996

INSYS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1996

INSYS 597A Integrating Mobile Technologies into Learning Environment (3) Integrating mobile and everyday technologies into learning environments examines how people use and learn with mobile devices in daily life.
Effective: Summer 2014 Ending: Summer 2014
INSYS 597B Learning and Design in Informal Educational Institutions (3) This graduate seminar explores two related concepts: how people learn in informal educational institutions and how to design for learning in informal institutions. Class members will engage in scholarly conversations around frameworks for research and design. Students will apply the course research to a design blueprint for one learning situation in an informal institution in the course’s three assignments. The design work will be informed by conversations with stakeholders, consultation of the research literature, iterative low fidelity prototyping in subgroups, and peer critique of design.
Effective: Summer 2014 Ending: Summer 2014

INSYS 597C (HI ED 597C) Online Innovations in Learning and the Future of Education (3) This course is designed to help you: 1) Become aware of, understand, and think about technologies and approaches that have the potential to change education in important ways 2) Consider other factors that, in combination, have been described as creating a "perfect storm" with the potential to change longstanding trends and traditions 3) Find and think with others who are aware of these factors and are considering their potential impact 4) Find and think with others who are aware of these factors and are considering their potential impact 5) Predict changes in K-12 and Higher Education 6) Think about how to shape education’s future at the level of your choice.
Effective: Summer 2014 Ending: Summer 2014

INSYS 600 Thesis Research (1-15) No description.
Effective: Summer 1996

INSYS 601 PH.D. DISSERTATION FULL-TIME (0) NO DESCRIPTION.
Effective: Summer 1996

INSYS 602 SUPERVISED EXPERIENCE IN COLLEGE TEACHING (1-3 PER SEMESTER, MAXIMUM OF 6) NO DESCRIPTION.
Effective: Summer 1996

INSYS 610 THESIS RESEARCH OFF-CAMPUS (1-15) NO DESCRIPTION.
Effective: Summer 1996

INSYS 611 PH.D. DISSERTATION PART-TIME (0) NO DESCRIPTION.
Effective: Summer 1996

Last Import from UCM: May 24, 2014 3:00 AM
Insurance (INS)

INS 575 Risk Management (2) Develop an understanding of the risks facing corporations and the methods available to deal with those risks. Effective: Summer 2011
Prerequisite:

INS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2011

INS 599 (IL) Foreign Study--Insurance (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established. Effective: Summer 2011
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Integrative Biosc (IBIOS)

IBIOS 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 1997

IBIOS 511 (VB SC 511, BMMB 511) **Molecular Immunology** (2) The study of molecular and biochemical events that influence immune responses and define current questions in immunology.
Effective: Spring 2008
Prerequisite:

IBIOS 530 (VB SC 530) **Regulation of gene expression by xenobiotics** (3) The mechanisms by which foreign chemicals alter gene expression and the techniques used to examine this effect are examined.
Effective: Spring 2008
Prerequisite:

IBIOS 532 (VB SC 532) **Developmental and Reproductive Toxicology** (3) Effects of environmental chemicals, nutrients and drugs on embryo/fetal development and maternal/paternal toxicity.
Effective: Spring 2008
Prerequisite:

IBIOS 541 **Critical Analysis of Bioinformatics and Genomics Research Topics** (1 per semester/maximum of 2) A weekly review of current literature related to the area of bioinformatics and genomics research.
Effective: Spring 2014

IBIOS 551 (BMMB 551) **Genomics** (3) Structure and function of genomes including use of some current web-based tools and resources for studies and research in genomics.
Effective: Summer 2007

IBIOS 554 (BMMB 554) **Foundations in Data Driven Life Sciences** (3) Expanded overview of current developments and technique in computational biology and genomics.
Effective: Summer 2014

IBIOS 555 (STAT 555, BIOL 555) **Statistical Analysis of Genomics Data** (3) Statistical Analysis of High Throughput Biology Experiments.
Effective: Spring 2014

IBIOS 570 **Molecular Toxicology Seminar Series** (2) This course provides an opportunity for students in the Cellular and Molecular Mechanisms of Toxicity program to interact with leading scientists.
Effective: Spring 1999

IBIOS 571 **Current Issues in Biotechnology** (2) Lecture-discussion series by academic and industry experts on the cutting-edge of science, business, intellectual property, legal, social, and ethical issues in biotechnology. The course also requires a group project, involving case studies or market research on various areas of biotechnology.
Effective: Spring 2006

IBIOS 572 **Benchmark Papers** (2) Discussion of current literature on molecular, cellular and developmental biology.
Effective: Summer 2007

IBIOS 580 **Critical Reading in Immunobiology** (1) Literature review of cellular, molecular, genetic and biochemical analysis of in vitro and in vivo immunology.
Effective: Summer 2004
Prerequisite:

IBIOS 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1997 Ending: Spring 2015

IBIOS 591 **Ethics in the Life Sciences** (1) An examination of integrity and misconduct in life sciences research, including issues of data collection, publication, authorship, and peer review.
Effective: Spring 1999 Ending: Spring 2015

IBIOS 592 **Current Research Seminar** (2) This course uses a weekly biological seminar as a springboard for discussion of a research topic of high current interest.
Effective: Spring 1999 Ending: Spring 2015

IBIOS 593 **Molecular biology Laboratory** (3) An intensive laboratory course on the principles and techniques of nucleic
acid purification, analysis by restriction enzymes, gel electrophoresis, nucleic acid labeling and hybridization, cloning, sequencing, PCR amplification, and analysis of cloned heterologous gene expression by western blotting.

Effective: Spring 2000

IBIOS 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2000

IBIOS 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 1997

IBIOS 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1997 Ending: Spring 2015

IBIOS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1997

IBIOS 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1999

IBIOS 600 Thesis Research (1-15) No description.
Effective: Spring 1998 Ending: Spring 2015

IBIOS 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1998 Ending: Spring 2015

IBIOS 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Summer 1997

IBIOS 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 2002

IBIOS 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 2002

Intercollege MBA (IMBA)

**IMBA 501 Markets, Industry Analysis, and Business Strategy** (3) How markets determine prices and activity in the business firm; the firm's microeconomic and macroeconomic environments; formulation of competitive strategy.
Effective: Summer 2008
Prerequisite:

**IMBA 502 Financial and Accounting Tools** (3) Introduction to financial systems and reports, ability to analyze financial information, apply financial tools, and communicate financial information.
Effective: Summer 2008
Prerequisite:

Effective: Summer 2008
Prerequisite:

**IMBA 515 Accounting for External Reporting** (2) Ability to read financial reports and analyze their content.
Effective: Summer 2008
Prerequisite:

**IMBA 516 Organizational Behavior and Performance** (2) Analysis of conceptual models, systems, and decision processes consistent with high levels of individual, group, and organizational performance.
Effective: Summer 2008
Prerequisite:

**IMBA 517 Corporate Governance** (2) Study of interrelationships among shareholders, boards of directors, and managers (owner agents) and other stakeholders in a modern public corporation.
Effective: Summer 2008
Prerequisite:

**IMBA 520 Managing Culture, Visions, Mission and Values** (2) Processes and models related to organizational culture and climate, leadership, and mentoring.
Effective: Spring 2005
Prerequisite:

**IMBA 521 Strategic Analysis** (2) Analysis of a company case; development of the ability to draw sound conclusions on business strategies and performance.
Effective: Summer 2008
Prerequisite:

**IMBA 522 Financial Management** (2) Analyze capital investment projects, examine the general principles of asset valuation, and study the valuation of stocks and bonds.
Effective: Summer 2008
Prerequisite:

**IMBA 523 Organizational Development, Intervention and Change** (2) Analysis and assessment of conceptual models, systems, and decision processes for organizational development, intervention and change; transformation and reengineering processes.
Effective: Summer 2008
Prerequisite:

**IMBA 530 Marketing in a Global Environment** (3) Global marketing planning and strategic formulation for profit and non-profit firms in creation, promotion, pricing, and distribution of goods and services.
Effective: Summer 2008
Prerequisite:

**IMBA 531 Project Management** (2) A problem-based, interdisciplinary course in project management skills and techniques needed to manage projects in a modern business environment.
Effective: Summer 2008
Prerequisite:

**IMBA 543 Accounting for Internal Decision Making** (2) Covers basic concepts, issues, tools, and techniques in the use of accounting information for internal decision making.
Effective: Summer 2008
Prerequisite:

**IMBA 544 Managing Human Resources** (3) Processes and issues related to staffing and retaining human resources.
Effective: Summer 2008
Prerequisite:

**IMBA 545 Research for Marketing Decisions** (1) Marketing research concepts/applications dealing with gathering, processing, and interpretation of primary/secondary data in identifying the needs/wants of prospective consumers.
Effective: Fall 2001
Prerequisite:

**IMBA 550 Corporate Information Strategy** (3) Information technology supporting management decision making, operations, and creation of new products and services; electronic commerce in global markets.
Effective: Summer 2008
Prerequisite:

IMBA 560 **Corporate Innovative Strategies** (3) Formulation and implementation of a corporate innovation or technology strategy.
Effective: Summer 2008
Prerequisite:

IMBA 561 **Global Operations and Supply Chain Management** (3) Effective management of the flow of goods and services.
Effective: Summer 2008
Prerequisite:

IMBA 562 **Global Business Management** (3) Establishing and expanding businesses in global markets and managing multinational firm strategies and operations.
Effective: Summer 2008
Prerequisite:

IMBA 573 **Strategic Planning** (3) Application of knowledge in creating and sustaining competitive advantage; development of skills necessary for writing a strategic plan.
Effective: Summer 2008
Prerequisite:

IMBA 574 **Strategic Financial Decisions** (3) Advanced capital project analysis; evaluating levered investments; application of option valuation principles to strategic decisions.
Effective: Fall 2008
Prerequisite:

IMBA 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2004

IMBA 597 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2004

Last Import from UCM: May 24, 2014 3:00 AM
Intern Agric Develop (INTAD)

INTAD 820 International Agricultural Development Seminar (3-6 per semester/maximum of 6) Students will examine international agricultural development issues through observation of systems, methods, and policies. Effective: Summer 2013

Last Import from UCM: May 24, 2014 3:00 AM
International Affair (INTAF)

INTAF 501 Water and Sustainable Development (3) This course addresses the scientific theory and practical considerations necessary to manage water resources in an international sustainable development context.
Effective: Summer 2013

INTAF 502 Science, Technology, and International Policy (3) Examines science and policy communities, importance of science and technology to international affairs, scientific issues likely to affect international policy.
Effective: Summer 2013

INTAF 503 Hazards, Disasters, and International Affairs (3) Hotspots, tipping points, and international approaches to prepare for, respond to, and recover from hazards, disasters and complex humanitarian emergencies.
Effective: Summer 2013

INTAF 504 Political Economy of Development and Growth (3) Theories of economic growth and established empirical evidence are used to explain differential levels of economic development across the world.
Effective: Spring 2014

INTAF 505 Strategy, Conflict, Peace (3) The course teaches the principal solution concepts to the analysis of strategic interaction in static and dynamic contexts, and under incomplete information.
Effective: Summer 2014

INTAF 590 Colloquium (3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2010

INTAF 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2008

INTAF 595 Internship (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2008

INTAF 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2008

INTAF 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2008

INTAF 597A Domestic Influences on Foreign Policy (3) This course will examine how domestic politics influences the formulation and implementation of foreign policy in the United States and other major powers. The role of lobbyists, ethnic groups, special interests, bureaucratic politics, and other factors will be considered.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

INTAF 597B Introduction to Research Design (3) This course provides an accessible approach to developing the research, empirical and analysis skills necessary for International Affairs careers and research. The approach is hands-on, with a focus on providing practical skills for evaluating real-world arguments and policies. The course has three objectives. First, to provide a background that prepares students for the required Multi-Sector and Quantitative Analysis (INTAF 803) core courses by giving them a solid foundation in research design and analysis. Second, to familiarize students with a variety of International Affairs methods (e.g. experiments, social networks, and data sources) not covered in other core-classes. Third, to provide law and other students sufficient knowledge of social science approaches to participate effectively in SIA courses.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

INTAF 597C The United States and the Middle East (3) American engagement in the Middle East, one of the world's most important regions, is and will continue to be a powerful factor shaping the character of contemporary international affairs. To help students deepen their understanding of U.S. foreign policy and the modern Middle East, this course explores two related sets of issues: 1) the strategic challenges facing U.S. policymakers in the Middle East and how policymakers have sought to address these challenges; and 2) Middle Eastern responses to U.S. engagement in the region.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
INTAF 597D Politics of the Maintenance of International Peace and Security (3) This course will examine the main characteristics of the relationships between States; their motivations and aims; conflicts between them, and how they are typically resolved or adjusted; the legal and political framework within which those relationships take place; the underlying conflict between interests and principles; the question of whether or not States are interested in peace and security, as against 'winning'; the main threats to peace and security, both military and non-military; and the role of non-State actors, such as global corporations and terrorist groups.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

INTAF 597E Introduction to Law and Legal Systems (3) The course focus is on American law as system, and through a study of that system, of the context within which national law systems intersect with international law and social norms.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

INTAF 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2008

INTAF 598A Member Journal of Law and International Affairs (1) See handbook for description.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

INTAF 598B Editor Journal of Law and International Affairs (2) See handbook for description.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

INTAF 801 Actors, Institutions, and Legal Frameworks in International Affairs (3) Addresses the principal actors, institutions, and legal frameworks which operate in international relations.
Effective: Summer 2008

INTAF 802 Foundations of Diplomacy and International Relations Theory (3) Addresses the central tenets of diplomacy and international relations and theories and concepts that underpin the study of international relations.
Effective: Summer 2008

INTAF 803 Multi-sector and Quantitative Analysis (3) Introduces students to quantitative methods applicable to various issue areas, including international relations, economics, business, law, education, health, and environment.
Effective: Summer 2008

INTAF 804 Global Cultures and Leadership (3) Introduces students to cultural theories and to an understanding of how socio-cultural beliefs may impede or accelerate social change.
Effective: Fall 2011

INTAF 805 International Economics: Principles, Policies, and Practices (3) Addresses principles, policies, and practices in international trade and finance that are fundamental for understanding international economic relations.
Effective: Summer 2008

INTAF 810 Energy, International Security, and the Global Economy (3) This course explores the economic, political, and strategic implications of ongoing trends in global energy markets, particularly oil and gas markets.
Effective: Summer 2013

INTAF 811 Estimative Analysis in International Strategy (3) Analytical methods to estimate future conditions as they might influence international policy, negotiations, or strategic planning.
Effective: Summer 2013

INTAF 812 The Role of Intelligence in International Relations (3) This course examines how governments gather intelligence, how it is analyzed and what impact it has on policy makers.
Effective: Summer 2014

INTAF 813 International Environmental Negotiations (3) Major international environmental negotiation issues with considerable controversy, uncertainty, and/or immediacy will be examined in classroom with experiential learning situations.
Effective: Fall 2013

INTAF 814 U.S. Policy in the Middle East (3) This course focuses on the strategic challenges facing U.S. policymakers in one of the world’s economically, politically, and strategically most important regions.
Effective: Summer 2014
International Bus (INT B)

INT B 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

INT B 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

Last Import from UCM: May 24, 2014 3:00 AM
International Business (I B)

I B 403 International Business and National Policies (3) Evaluation of national economic policies in the light of international economic theory; their impacts on operations of the international business firm.
Effective: Summer 2011
Prerequisite:

I B 404 Contemporary Issues in International Business (3) Investigation of issues in international business practice interpreted from the foundations of the social sciences. Topics will be chosen from contemporary issues in global business and economics.
Effective: Summer 2011
Prerequisite:

I B 440 (US;IL) (PL SC 440, AFR 440) Globalization and Its Implications (3) This course explores the socioeconomic implications of globalization.
Effective: Spring 2013
Prerequisite:

I B 450 The Business Environment of Europe (3) This course provides an overview of the economic, institutional, and regulatory environment in Europe at the EU and national levels.
Effective: Summer 2011
Prerequisite:

I B 460 International Business in Emerging Nations (3) An overview of international business strategies and economic environments of emerging nations with a specific focus on markets in China, India, and Southeast Asia.
Effective: Summer 2011
Prerequisite: Concurrent: I B 303

I B 480 (R M 480) International Real Estate Markets (3) International perspectives on real estate as property, evaluation of land use regulations, and differences in real estate markets across countries.
Effective: Fall 2013
Prerequisite:

I B 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2011
Prerequisite:

I B 494H Honors Research Project (1-3 per semester/maximum of 6) Supervised honors student research projects identified on an individual or small-group basis.
Effective: Summer 2011
Prerequisite:

I B 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

I B 497 Special Topics (1-9) Formal courses given infrequently to explore in depth, a comparatively narrow subject interest.
Effective: Summer 2011

I B 497A Sustainability and International Business (3) This course examines the global business environment in the context of sustainability and explores the challenges and opportunities facing multinational enterprises and the countries in which they do business.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

I B 497B The Global Financial Crisis (3) An overview of the growth of the financial industry in the U.S. economy and the globalization of financial markets. It will look at the role of government, consumers, mortgage companies, the rating agencies and the banking sector in the creation of the housing bubble. The impact of certain financial derivatives on the global economy in general and specific countries in particular will be explored. Through readings of key players involved in the crisis, it will identify risk management issues that are important to this case and look at proposed remedies designed to avoid future problems.

I B 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2011
I B 500 International Business Management (3) Concepts and institutions affecting the international conduct of business; interface between nations and international firms; alternative policies businesses employ internationally.
Effective: Summer 2011

I B 515 (R EST 515) Property Rights in a Global Economy (2) Analysis of economic, financial, legal, and political factors affecting international real estate decision making.
Effective: Summer 2011

Effective: Summer 2011
Prerequisite:

I B 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2011

I B 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

I B 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2011

I B 599 (IL) Foreign Study--International Business (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2011
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Internatl & Comp Law (INTER)

INTER 950 International Air and Space Law (2) This course will examine with an international perspective the legal status of national air space and outer space and the legal problems surrounding man's activities in these environments. The law governing international and domestic air transport will be surveyed, and the course will conclude with a look at law on the "high frontier."
Effective: Spring 2007

INTER 951 Introduction to Transnational Law and Legal Issues (3) This course will introduce the student to the nature of transnational law and to issues that lawyers will confront when legal issues transcend national borders. The course commences with an examination of the legal complexities of interactions (including economic transactions, civil litigation, and movement of people) in which national law, international law and private law may all simultaneously play a part. It examines the way in which private law, national law and international law play a role in a number of different sorts of transactions, from simple organizations in regulating private behavior on a global basis.
Effective: Summer 2011

INTER 952 Law of the Sea (2) Address all central aspects of the law of the sea as a branch of public international law.
Effective: Summer 2007

INTER 953 Law of Treaties (2) Treaties are the foundation of public and private international law and national foreign affairs law. This course examines: historical development of law of treaties; concept of treaty; treaty as source of international and national law; stages of concluding treaty; reservations; accession to treaties, functions of depositary; publication of treaties; breach of treaty obligations; invalidity, termination, and suspension of treaties; denunciation and other withdrawal from treaties; treaties and jus cogens; treaties and customary rules of international law; treaties and third States; treaties and municipal law; interpretation of treaties; languages and authentic texts of treaties.
Effective: Summer 2011

INTER 954 Foreign Investment in Russia and the CIS (2) Addresses principal aspects of the legal framework for foreign investment in Russia and other CIS countries.
Effective: Summer 2007

INTER 958 Comparative Constitutional & Public Law (3) The principal objective of this course is to provide students with a greater understanding of how their country's body of constitutional law is shaped by history, institutions, and current values. The comparative project, by focusing on narrow differences between two very similar countries, allows students to move beyond an acceptance of basic premises of constitutional law as "natural" or "inherent." As an important dividend, students will gain basic knowledge of foundational concepts in the legal landscape of their country's largest trading partner, hopefully providing students with a comparative advantage in seeking employment with government offices and private firms whose clients engage in substantial cross-border transactions.
Effective: Summer 2011

INTER 959 Russian Law (2) This 2-credit course is concerned with the development of the law, legal system, and legal institutions of what is popularly known as Russia but also correctly and officially known as the Russian Federation within the boundaries presently occupied and, historically, within the boundaries of the Russian Empire. By "law" we mean formal legislation, customary rules, relevant international legal rules, legal doctrine, and anything else regarded by the Russian State or by Russian jurists as comprising part of the "law." For our purposes "legal institutions" encompass all law enforcement agencies or any other agencies of the State or empowered by the state which are concerned with the law in any manner whatsoever, including educational institutions.
Effective: Summer 2011

INTER 961 Asylum and Refugee Law (3) This class surveys the laws of political asylum and related protection for those fleeing danger in their home countries. It examines asylum and refugee law and policy in the United States, and sets forth the legal grounds for barring someone from asylum. It also explores the politics driving immigration policy, including asylum and refugee policy, and the federal agencies that implement those policies.
Effective: Summer 2011

INTER 965 Immigration Law (3) This course is intended to provide students with a general knowledge of immigration law, including such critical subjects as the constitutional powers of the federal government over immigration matters, admission and exclusion, entry, deportation, and political asylum.
Effective: Summer 1999

INTER 966 International Litigation and Arbitration (3) This course is intended to acquaint students with the impact of globalization upon the process of litigation. It focuses upon the adjudicatory resolution of disputes created by international contracts and global business transactions through the standard legal trial process and arbitration. Various basic topics are treated, including (1) the certification and training of international lawyers; (2) the liability exposure of multinational enterprises; (3) the State as an actor in global commerce; (4) problems of comparative jurisdiction, service of process and evidence-gathering, proof of foreign law, and the enforcement of foreign judgements; (5) the extraterritorial application of national law; and (6) attempts to establish a transborder law and legal process. The course also provides a
This course focuses on the antitrust law of the European Union and selected other jurisdictions. It will cover international mergers, monopolies, price fixing cartels, distribution restraints, and related topics. The course examines principles of comity and cooperation among international enforcers investigating cases with a multi-national impact. We also review the antitrust laws of other selected jurisdictions, focusing on proposed and recently enacted competition laws including those of selected new entrants to the European Union and China, and on laws of other jurisdictions with an important impact on U.S. firms such as Japan. Finally, the course will consider issues such as advising multi-national clients, obtaining discovery internationally, and litigating complex cases.

Effective: Fall 2011

INTER 968 Comparative Antitrust Law (3) This course introduces students to key concepts and doctrines of international law. It examines the sources of international law such as custom and treaty, the bases of international jurisdiction, issues of statehood, recognition and succession, nationality, international agreements, and United States participation in the international legal system. The course provides students with the basics needed for both public and private international law practice.

Effective: Summer 2002

INTER 969 International Organizations (2) International organizations play an influential role in the world today. Just a few of the fields they address are peacemaking and peacekeeping, labor relations, food production and distribution, education, health, economic development, monetary affairs, international trade, civil aviation, tele-communications, protection of intellectual property and nuclear energy. This course will examine lawmaking and regulation by international organizations, the regulatory impact of governance by these organizations, issues of legal personality, membership, participation, rights of members and termination of membership, as well as enforcement and dispute settlement. Focus will be on the United Nations and its specialized agencies, including the World Health Organization, the Food and Agriculture Organization, UNESCO and the Inter- national Labor Organization.

Effective: Summer 2002

INTER 971 International Law (3) This course examines the cross-cutting relationship between political power and global governance. To this end, the course considers three inter-related sets of issues: first, how nation-states define international economic order through the formal sources of law and thereafter highlight some ways in which the difference in approach is manifested in actual regulation.

Effective: Spring 2011

PREREQUISITE:

INTER 973 Comparative Corporate Law (2) This course attempts a comparative analysis of American and European approaches to the regulation of business enterprises operating in corporate form. The goal is to provide the student with a basic understanding of the fundamental, and perhaps fundamentally different, approaches taken by governments in the United States and in the European communities to the regulation of the corporation. The course materials concentrate on the formal sources of law and thereafter highlight some ways in which the difference in approach is manifested in actual regulation.

Effective: Summer 2000

INTER 974 Civil Law From Empire to Union (3) The most important issue of Civil Law today is its Worldview and its perspectives on Citizenship as well as on International Justice. In other words, particularities of the Civil Law sustain a worldview that stems from Roman Law-traditions and practices of the Roman Empire. These pertain to more recent legal developments taking place in a unifying Europe. The profiles of the major functionaries in today's Civil Law domain: judges, attorneys, EU civil servants and administrators mirror such traditions. This course is not restricted to a traditional comparative perspective. Means are provided for a correct and effective transnational communication between legal professionals. To study Civil Law and EU Law implies an approach, understanding and management of the electronic means to communicate with its citizens, institutions and courts. The EU website is an outstanding instrument to understand the structures within lawyers must operate.

Effective: Summer 2011

INTER 975 History of the Western Legal Tradition (3) This course will provide an overview of Western legal systems in ancient, medieval, early modern and modern times.

Effective: Summer 2010

INTER 976 Maritime Law (3) Initial consideration of peculiarly American Admiralty jurisdiction and practice, after which a survey of substantive rules of the general maritime law respected by shipping and trading nations is essayed. Carriage by water (including bills of lading, charter parties, and general average), collisions, salvage, and seafarers' personal injuries are treated as discrete subjects with warranties of seaworthiness, applicability of multilateral treaties, harmonizing effects of worldwide London insurance markets, and modern English precedent being recurring themes.

Effective: Spring 2002

INTER 977 Transnational Law (3) This course will introduce the student to transnational law, defined as the law of non-state governance systems, that have emerged in the context of globalization.

Effective: Spring 2014

INTER 978 Dynamics of International Economic Order: Law, Politics, and Power Law (3) Dynamics of International Economic Order examines the cross-cutting relationship between political power and global governance. To this end, the course considers three inter-related sets of issues: first, how nation-states define international economic order through the creation of legal frameworks and rules-based regimes for cross-border trade, investment, and monetary relations; secondly, how shifts in the international distribution of economic and political power impact these frameworks and regimes; and third, how great powers—in the contemporary context more specifically, the United States (the emblematic established power) and China (the paradigmatic rising power)—approach global economic governance as part of their grand

The Pennsylvania State University
strategies to advance their interests and enhance their international position.
Effective: Fall 2014 Future: Fall 2014

INTER 979 Energy, International Security, and the Global Economy (3) This course explores the economic, political, and strategic implications of ongoing trends and structural shifts in global energy markets. It focuses especially on international markets for crude oil and natural gas; attention is also devoted to nuclear energy, the international nuclear industry, and nonproliferation challenges.
Effective: Fall 2014 Future: Fall 2014

INTER 981 International Environmental Negotiations (3) Major international environmental negotiation issues with considerable controversy, uncertainty, and/or immediacy will be examined in classroom with experiential learning situations.
Effective: Fall 2014 Future: Fall 2014

INTER 984 International Commercial Arbitration (3) By some measures up to 90% of all international and transnational contracts include agreements to resolve disputes between the parties through arbitration. For all its success, the international arbitration system is not a simple organism. It is the product of a complex interaction of national laws, contractual agreements, specialized procedural rules, and international treaties, customs and norms. The system is designed to balance party autonomy with the sovereign and transnational regulatory interests that are implicated in disputes. This course explores the amalgam of sources that undergrid the international arbitration system, as well as the strategic considerations, practical skills and policy implications that are involved.
Effective: Summer 2011 Ending: Summer 2014

INTER 984 International Commercial Arbitration (3) This course will consider the law, procedures, and practice of international arbitration, and the substantive rules that govern international commercial sales of goods under the U.N. Convention on Contracts for the International Sale of Goods (CISG) and related international instruments.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

INTER 985 Introduction to Research Design (3) This class provides a general introduction to empirical research methods appropriate for international affairs specialists and lawyers. The approach is hands-on, with a focus on learning practical skills for evaluating real-world events.
Effective: Spring 2014

INTER 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2006

INTER 997A Arbitration Workshop - Legal Counseling in International Arbitration (3) This three-hour offering is primarily clinical in character. With the help of teaching assistants and the conduct of round-table discussions with the professor, students will be introduced to an international commercial venture involving construction or the sale of goods. Students will be invited to play roles in the counseling process as the clients, the lawyers, third-party guarantors, or other participants. The simulation will involve defining the commercial project, assessing the risks of the venture, and determining how the contract can attenuate these risks. The participants with the aid of the teaching assistants, will prepare their version of the traditional phases of the contract: party rights and responsibilities, the goals of the transaction, the guarantees, choice-of-law, forum selection, the recourse to arbitration, and the building of an arbitration.
Effective: Summer 2014 Ending: Summer 2014

INTER 997A International Commercial Arbitration II (2) Students who are interested in participating in the Willem C. VIS Moot Court Team must enroll in this course.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Intl Prop/Media Law (INTPR)

INTPR 950 Communications Law (2) This course will explore current issues in communications law including First Amendment constraints on the regulation of the content of telephone calls and television advertising, cable TV monopolies, and telecommunications regulations and deregulation. Course materials explore regulatory, constitutional, and antitrust law principles as they apply to broadcast, cable, and telecommunications activities.
Effective: Fall 1998

INTPR 951 Internet Law (3) This course presents the range of legal issues arising from the emergence of cyberspace. The course considers how the law has reacted to challenges posed by the Internet as well as how the law is shaping its future. Specific areas covered include jurisdictional analysis, First Amendment/free speech, digital copyrights, trademarks and domain names, electronic privacy, e-commerce, and Internet governance.
Effective: Spring 2008

INTPR 952 Introduction to Intellectual Property This course will survey the protection of proprietary rights in intangible assets by patent, copyright, trademark, trade secrecy, and unfair competition law.
Effective: Fall 2014 Future: Fall 2014

INTPR 960 Copyrights (3) The course addresses the legal protection afforded to authors and artists under common law and statutory copyright. It considers the rights granted, procedure for their procurement, and protection through litigation. The course also deals with international rights, conveyancing, and interface with the antitrust laws.
Effective: Fall 2009

INTPR 980 Patent Law (3) This course is an examination of the legal requirements for obtaining patent protection for an invention. The statutory foundations of United States patent law are examined through an analysis of patent prosecution practice and patent litigation. The course also considers United States patent practice in the context of international intellectual property law.
Effective: Fall 2008

INTPR 982 Licensing of Intellectual Property (3) The retention of the intellectual property or the absolute transfer of such interests to other for purposes of economic exploitation is, however, declining in use and popularity. Rather, it has evolved that maximization of the holder's value in the intellectual property may, in some circumstances, be better achieved by sharing some of the rights, while retaining others. This is the topic of the course in the licensing of intellectual property. The offering explores the myriad business, legal, and negotiating issues involved in the drafting and use of intellectual property licensing agreements.
Effective: Summer 2011
Prerequisite:

INTPR 985 Trademarks (2) The law of trademarks is central to the concept of fair dealing in the commercial environment. The history of common law and statutory trademarks is explored as well as registration, conveyancing and foreign rights. The course deals with the duty of the merchant to compete honestly and remedies for failure to do so.
Effective: Spring 2011

INTPR 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2008
Intl Sust Dev Prj (IHSDP)

IHSDP 995 International Sustainable Development Project Law Clinic (1-4 per semester/maximum of 5) The Clinic will partner with, among others, university-sponsored humanitarian engineering (HE) and social entrepreneurship (SE) programs, like Penn State's multidisciplinary HESE program, and with foreign entrepreneurs with sustainable business objectives (economic, environmental and social). Clinic students will work collaboratively in multidisciplinary teams with HESE students to develop, design, and implement humanitarian ventures in the developing world.
Effective: Spring 2014

IHSDP 995A Advanced International Sustainable Development Projects Law Clinic Students in the Advanced section of the Clinic will provide important continuity to longer-term Clinic projects. Advanced Clinic students will meet with and work with first semester clinic students, with heightened expectations for leadership and more comprehensive research, analysis, and work product.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Italian (IT)

IT 412 Theory and Practice of Translation (3) Advanced practicum in Italian explores the technical, artistic, and practical applications of translation between Italian and American cultures.
Effective: Summer 2004
Prerequisite:

IT 415 Dante (3) Readings in the Divina Commedia and the related lesser works of Dante Alighieri.
Effective: Summer 2011

IT 422 Topics in the Italian Renaissance (3) Topics vary by year and may include "Theories of Love," "Magic, Witchcraft, Alchemy, and the Emergence of Modern Science," etc.
Effective: Fall 2005
Prerequisite:

IT 430 Italian Children's Literature (3) This course, conducted in Italian, examines Italian children's books from the post-unification period (1880s) to the present day.
Effective: Spring 2014
Prerequisite:

IT 450 Nineteenth-Century Italian Literature (3) Italian romanticism, Verismo and neoclassicism, their origin and development in the novel, poetry, and drama.
Effective: Winter 1978
Prerequisite:

IT 460 Twentieth-Century Italian Literature (3) Modern and contemporary Italian prose, drama, and poetry.
Effective: Winter 1978
Prerequisite:

IT 475 Modern Italian Literature and Cinema (3) Focus on silent films, fascism, WWII, Resistance, Neorealism, and reactions against Neorealism.
Effective: Spring 2003

IT 480 Italian Women Writers Through the Centuries (3) Analysis of the works of women authors in their historical and literary contexts.
Effective: Spring 2005
Prerequisite:

IT 485 Italian-American Cultural Studies (3) In-depth exploration of Italian-American cultural contributions.
Effective: Spring 2005
Prerequisite:

IT 490 Dante in Translation (3) The reading of Dante's Divine Comedy and selected minor works.
Effective: Fall 1983
Prerequisite:

IT 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

IT 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

IT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

IT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

IT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1997

IT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1988
IT 600 Thesis Research (1-15) No description.
Effective: Fall 1983

IT 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

IT 801 Fundamentals of Reading Italian for Research (3) This course provides the fundamental skills for reading Italian prose to graduate students with special interests in conducting research using Italian materials.
Effective: Spring 2010

Last Import from UCM: May 24, 2014 3:00 AM
Japanese (JAPNS)

JAPNS 401 (IL) Level Three Japanese A (4) Further acquisition of the four language skills in Japanese--reading, writing, speaking and listening comprehension.
Effective: Spring 2011
Prerequisite:

JAPNS 402 (IL) Level Three Japanese B (4) Exclusively for study abroad returnees. To further develop Japanese proficiency in speaking, listening, reading, and writing.
Effective: Spring 2011
Prerequisite:

JAPNS 403Y (IL) Level Four Japanese A (4) Continuation of JAPNS 402. Aims to improve students' proficiency in all four language skills, with a special emphasis on writing.
Effective: Fall 2012
Prerequisite:

JAPNS 404 (IL) Level Four Japanese B (4) Continuation of JAPNS 403Y. Aims to improve students' proficiency in all four language skills through content-based language learning.
Effective: Fall 2013
Prerequisite:

JAPNS 410 (IL) Japanese Through Manga (3) The course aims to expand students' knowledge and application of Japanese language beyond elementary and intermediate textbooks through the use of manga (graphic novels).
Effective: Summer 2013
Prerequisite:

JAPNS 421 (IL) Courtly Japan (3) Focused study of aristocratic society and culture of Heian period Japan.
Effective: Spring 2012
Prerequisite:

JAPNS 422 (IL) War and the Warrior in Japan (3) Survey of the role of warfare and the warrior in Japan, with attention to changing cultural settings. Taught in English.
Effective: Summer 2011
Prerequisite:

JAPNS 423 (IL) Men, Women, and Animals (3) Japanese history and culture through the lens of relations between men and women and between humans and animals.
Effective: Summer 2011
Prerequisite:

JAPNS 424 (IL) Traveling Voices (3) Transnational Writings of Japan: from Modern to Contemporary Eras.
Effective: Spring 2012
Prerequisite:

JAPNS 425 Beyond Anime (3) Selected works from the history of illustrated narrative from scrolls to chapbook, through film and anime; topics may vary. This seminar-style study of Japanese visual culture will help students see Japanese visual arts in terms that are local to Japanese aesthetics and through those that transcend local cultures.
Effective: Spring 2011
Prerequisite:

JAPNS 426 (HIST 474) Early Modern Japan (3) Japanese history from 1580 to 1880.
Effective: Spring 2013 Ending: Summer 2014
Prerequisite:

JAPNS 426 (HIST 474, ASIA 474) Early Modern Japan (3) Japanese history from 1580 to 1880.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

JAPNS 450 (IL) Introduction to Classical Japanese (3) Basic patterns and structures of Classical Japanese from its development in the 6th century through usage in the 20th century.
Effective: Summer 2013
Prerequisite:

JAPNS 452 (IL) Contemporary Japan: Cultures, Lifestyles, Trends (3 per semester/maximum of 6) Survey of aspects of modern Japanese society; includes readings from Japanese newspapers, magazines, and fiction; topics may vary each semester.
Effective: Spring 2010
Prerequisite:

JAPNS 453 (IL) Japanese Film (3 per semester/maximum of 6) Selected films and directors representing various aspects of Japanese culture and cinema; topics may vary each semester.
Effective: Spring 2010
Prerequisite:

JAPNS 454 (IL) Japanese Literature (3 per semester/maximum of 6) Selected works from important Japanese texts representing genres such as autobiography, poetry, fiction, and drama; topics may vary each semester.
Effective: Spring 2010
Prerequisite:

JAPNS 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2010

JAPNS 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2010

JAPNS 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2010

JAPNS 496B **Global Experiences in Japan** (0.5) This embedded course is a two-week education abroad program in which a group of PSU students visit Ibaraki University, Mito, Japan and communicated with Japanese students at Ibaraki.
Effective: Summer 2014 Ending: Summer 2014

JAPNS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1995

JAPNS 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2010

JAPNS 499 (IL) **Foreign Study--Advanced Japanese** (1-15) Small group instruction in spoken and written modern Japanese at the advanced level.
Effective: Spring 2010
Prerequisite:

JAPNS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1997

JAPNS 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2003

Last Import from UCM: May 24, 2014 3:00 AM

The Pennsylvania State University
Jewish Studies (J ST)

J ST 401 (IL) (HIST 401) Ancient Technologies and Socio-cultural History in the Ancient Levant (3) Social and intellectual development in the Ancient Levant as they affected and were affected by technological development.
Effective: Spring 2006
Prerequisite:

J ST 405 (IL) (RL ST 405) Ancient Jewish Traditions and Modern Food Movements (3) Jewish laws, customs and attitudes with regard to food production, agricultural policy and eating from biblical to modern times.
Effective: Spring 2012

J ST 409Y (IL) (HIST 409Y, RL ST 407Y) European Anti-Semitism from Antiquity to the Present (3) Surveys the history of anti-Semitism in Europe from antiquity through the Middle Ages to the present.
Effective: Summer 2005

Effective: Spring 2006

J ST 411 (US;IL) (RL ST 411) Jewish Studies (3) Study of the life and thought of a particular period or movement in the history of Judaism.
Effective: Spring 2006
Prerequisite:

J ST 412 (RL ST 412) American Judaism (3) The development of Jewish religion and culture in America from the colonial era to the present.
Effective: Summer 1999
Prerequisite:

J ST 416 (HIST 416) Zionist History 1890-1948 (3) History of Zionist thought and politics to the foundation of Israel 1948.
Effective: Summer 1997

J ST 420 (ANTH 420) Archaeology of the Near East (3) Culture of the Near East and India from Paleolithic times through the Bronze Age.
Effective: Spring 1999
Prerequisite:

J ST 424H (HIST 424H, RL ST 424H) Monotheism and the Birth of the West (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.
Effective: Fall 2012
Prerequisite:

J ST 427 (ENGL 427) Topics in Jewish American Literature (3 per semester/maximum of 9) An in-depth examination of important themes, writers, and/or historical developments in Jewish Literature of the United States.
Effective: Spring 2014 Ending: Summer 2014
Prerequisite:

J ST 427 (ENGL 427) Topics in Jewish American Literature (3 per semester/maximum of 9) An in-depth examination of important themes, writers, and/or historical developments in Jewish Literature of the United States.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

J ST 433 Introduction to Jewish Music and Art (3) Introduction to the study of Jewish music and art from antiquity to the present.
Effective: Summer 2011
Prerequisite:

J ST 434 Media and the American Jewish Experience (3) Study of United States Jewish history through film and accompanying written text.
Effective: Summer 2011
Prerequisite:

J ST 450H (PL SC 450H) Genocide and Tyranny (3) This course focuses on the conceptualization and socio-political determinants of genocide and tyrannical regimes, with an emphasis on the Holocaust.
Effective: Spring 2015 Future: Spring 2015
Prerequisite:

J ST 457 (US;IL) (ANTH 457, SOC 457) Jewish Communities: Identity, Survival, and Transformation in Unexpected Places (3) Examines the global array of smaller Jewish communities that have flourished outside the main urban centers of Jewish settlement.
Effective: Summer 2006
Prerequisite:

The Pennsylvania State University
J ST 468 Modern Jewish Philosophy (3) Explores the major figures in modern Jewish philosophy and their influences on contemporary philosophy.
Effective: Summer 2012
Prerequisite:

J ST 478 (RL ST 478) Ethics After the Holocaust (3) Explores the philosophical effects of the Holocaust for thinking about the primary question: Is ethics possible?
Effective: Summer 2012
Prerequisite:

J ST 480 (CAMS 480) Greeks and Persians (3) Development and achievements of the Achaemenid kingdom; relationships between Persians and Greeks.
Effective: Spring 2001
Prerequisite:

J ST 494 Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1998

J ST 494H Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

J ST 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 1998
Prerequisite:

J ST 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 1994

J ST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1994

J ST 497A (HIST 497C, WMNST 497A) Gender and Autobiography in Modern Jewish History (3) In this course we will read autobiographies critically and carefully in examining the tremendous change wrought by modernity in the Jewish community. In particular we will look to memoir literature to illuminate the role of gender in Jewish life over the past two hundred years.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

J ST 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998

J ST 499 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

J ST 505 (HIST 505) Biblical Historiography in its Ancient Setting (3 per semester/maximum of 6) Methods of historical reconstruction in Biblical and other historiography from the earliest Mesopotamian records through those of the 6th century B.C.E.
Effective: Spring 1995
Prerequisite:

J ST 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1998

J ST 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998
Kinesiology (KINES)

PROFESSIONAL COURSES

The following courses are designed for the major in Kinesiology and related disciplines as designated in the various curricular programs. They are pedagogically oriented and do not fulfill the Health Sciences and Physical Education (GPE) component of General Education.

KINES 400 Adapted Physical Education (3) Basic concepts of planning and conducting physical education programs for children with physical, sensory, and/or intellectual impairments.
Effective: Fall 2001
Prerequisite:

KINES 403 Emergency Medical Technology (4) Theoretical and practical aspects of emergency medical techniques as applied in the pre-hospital environment.
Effective: Spring 1998
Prerequisite:

KINES 404 Emergency Medical Technology Instructor (2) Educational concepts and skills necessary to present instruction in emergency care; lesson planning, methods of instruction, and evaluation techniques.
Effective: Summer 1997
Prerequisite:

KINES 410 Physical Growth and Motor Development (3) Study of biologically programmed growth processes and environmental influences leading to attained adult form and biomechanical function.
Effective: Fall 2013
Prerequisite:

KINES 411 Introduction to Musculoskeletal Injury and Rehabilitation (3) This course is designed to provide an overview of common musculoskeletal injuries and rehabilitation for pre-allied health and fitness professionals.
Effective: Summer 2011
Prerequisite:

KINES 420 Psychosocial Dimensions of Physical Activity (3) Discussion of theoretical and empirical findings, structuring a frame of reference for exploring man's involvement in physical activity.
Effective: Spring 2001
Prerequisite:

KINES 421 Exercise Psychology (3) Psychological antecedents and consequences of physical activity behaviors.
Effective: Spring 2014
Prerequisite:

KINES 422 Physical Activity Interventions (3) Principles of designing, planning, and implementing theory- and evidence-based physical activity interventions.
Effective: Spring 2014
Prerequisite:

KINES 423 Psychology of Sports Injuries (3) Psychological causes and consequences of sports related injuries in athletes.
Effective: Spring 2008
Prerequisite:

KINES 424 (US) (WMNST 424) Women and Sport (3) An interdisciplinary approach to contemporary issues related to women and sport from historical, physiological, psychological, and sociological perspectives.
Effective: Spring 2013
Prerequisite:

KINES 425W Physical Activity in Diverse Populations (3) An examination of the social, cultural, political, and environmental influences on health and physical activity promotion among diverse populations.
Effective: Summer 2013
Prerequisite:

KINES 426 Physical Activity and Public Health (3) Examines the role of physical activity in public health. Includes population level strategies for promoting physical activity in communities.
Effective: Summer 2014
Prerequisite:

KINES 427 (HD FS 427) Developmental Sport & Exercise Psychology (3) Developmental changes in the antecedents and consequences of physical activity across the lifespan.
Effective: Spring 2008
Prerequisite:

KINES 428 Motivation and Emotion in Movement (3) Theories of motivational and emotional processes and their applications in movement settings.
Effective: Spring 2014
Prerequisite:

KINES 429 Psychology of Sport Performance (3) Psychological theories of talent development and performance enhancement in sport.
Effective: Spring 2014
Prerequisite:

KINES 434 **Rehabilitation of Injuries to the Lower Extremities** (3) Theoretical foundation and laboratory experience in manual therapy techniques and therapeutic exercises for the lower extremities.
Effective: Fall 2006
Prerequisite: Concurrent: KINES 335 KINES 395F

KINES 435 **Rehabilitation of Injuries to the Trunk and Upper Extremities** (3) Theoretical foundation and laboratory experience in manual therapy techniques and therapeutic exercises for the trunk and upper extremities.
Effective: Fall 2006
Prerequisite: Concurrent: KINES 336 KINES 435 KINES 395G

KINES 436 **Therapeutic Modalities in Athletic Training** (4) Lecture and laboratory course exploring physiological principles and clinical evidence to the use of therapeutic modalities in athletic training.
Effective: Fall 2006
Prerequisite: Concurrent: KINES 336 KINES 435 KINES 395G

KINES 438W **Administration and Issues in Athletic Training** (3) Theoretical and practical aspects for management of an Athletic Training professional practice and identifying contemporary issues related to the profession.
Effective: Fall 2006
Prerequisite: Concurrent: KINES 395I

KINES 439W **Ethics in Sport and Sport Management** (3) Analysis of moral dilemmas in sport and sport management utilizing the tools of ethics.
Effective: Spring 2001
Prerequisite:

KINES 440 **Philosophy and Sport** (3) An examination of human nature from the perspective of our participation in sport.
Effective: Spring 2001
Prerequisite:

KINES 441 (US) (AM ST 441) **History of Sport in American Society** (3) Background, establishment, and growth of sport in America from colonial times to the present.
Effective: Fall 2007
Prerequisite:

KINES 442 (IL) (CAMS 442) **Sport in Ancient Greece and Rome** (3) An examination of the continuity of sport in ancient Greek and Roman societies.
Effective: Spring 2008
Prerequisite:

KINES 443 (IL) **The Modern Olympic Games** (3) An analysis of the modern Olympic Games from their inception through the current festival.
Effective: Spring 2006
Prerequisite:

KINES 444 (US) **History of Athletics in Higher Education** (3) Origin and development of athletics in American higher education from colonial times to the present.
Effective: Spring 2006
Prerequisite:

KINES 445 **Alcohol and Drug Education** (3) Principles of integration and coordination of alcohol and drug education programs for health education and other health related professions.
Effective: Spring 1998
Prerequisite:

KINES 446 (IL) **History of Sport in the Modern World** (3) History of sport in modern world, ca. A.D. 1500 to present; concentrates on role of sport in societies outside United States.
Effective: Summer 2005
Prerequisite:

KINES 447W **Representing Sport in Popular Film** (3) Critical, contextual, and theoretical analyses of sport films focusing on popular narratives of social inequalities.
Effective: Spring 2013
Prerequisite:

KINES 448 **Coping with Life After Sport** (1) Psychosocial concerns affecting student-athletes as they enter the transition period following sport disengagement, focusing on coping interventions.
Effective: Summer 2002
Prerequisite:

KINES 452 **Applied Cardiovascular Physiology** (3) In-depth study of cardiovascular regulation during postural, environmental, and exercise stress.
Effective: Spring 2010
Prerequisite:

KINES 453 **Environmental Physiology** (3) This course examines physiological function of humans at rest and during prolonged or maximal exercise in conjunction with environment stress (heat, cold, altitude, hyperbaria).
Effective: Spring 2013
Prerequisite:
KINES 454 Women's Health and Exercise Across the Lifespan (3) In-depth study of the physiological role of exercise in modulating the health of girls and women during different phases of the lifespan.
Effective: Summer 2010
Prerequisite:

KINES 455 Physiological Basis of Exercise as Medicine (3) Reviews the physiological basis of exercise for enhancing health and protecting against chronic diseases.
Effective: Summer 2014
Prerequisite:

KINES 456 Physical Fitness Appraisal (4) The basic components of physical fitness, how it can be measured, and how it can be developed.
Effective: Summer 1996
Prerequisite:

KINES 457 Exercise Prescription and Case Studies (3) Principles of exercise prescription; application of fitness appraisal based on current practices using evaluation and discussion of case studies.
Effective: Spring 2002
Prerequisite:

KINES 460 Movement Disorders (3) Major peripheral and central movement disorders and methods of their treatment.
Effective: Summer 1999
Prerequisite:

KINES 461W Preparation for Research Project (2) Planning and preparation for research project.
Effective: Fall 2006
Prerequisite:

KINES 462W Research Project (2) Completion of research topic.
Effective: Fall 2006
Prerequisite:

KINES 463 Acquisition of Motor Skills (3) Examination of principles of motor learning; the application of strategic factors such as: practice types, schedules, augmented information, and motivation.
Effective: Summer 2000
Prerequisite:

KINES 464 Children's Physical Education Curriculum and Practicum (3) Curriculum for elementary school physical education emphasizing the skill theme approach.
Effective: Fall 2006
Prerequisite:

KINES 465 Neurobiology of Sensorimotor Stroke Rehabilitation (3) This course is designed to expose students to the recent topics in motor stroke rehabilitation research through literature.
Effective: Spring 2011
Prerequisite:

KINES 466 Assessment and Evaluation in Physical Education and Health Education (2) Explores measurement as an important and distinct component in a variety of physical education and health education contexts.
Effective: Spring 2006
Prerequisite:

KINES 468 Health Instruction in the School--Content and Method (3) Methods, materials, and units of instruction.
Effective: Fall 2006
Prerequisite:

KINES 469W Curriculum Development in Health and Physical Education (3) The content and process of K-12 school health and physical education curriculum development for public school students.
Effective: Fall 2006
Prerequisite:

KINES 481W Scientific Basis of Exercise for Older Adults (3) Study of age-associated physical changes and the effects of exercise on the aging process.
Effective: Spring 2001
Prerequisite:

KINES 482 Motor Patterns of Children (3) Development of motor patterns. Fundamentals of movement, basic motor skills, and adaptation of the body to external forces.
Effective: Summer 1996
Prerequisite:

KINES 484 Advanced Biomechanics (3) The use of advanced biomechanics to provide an in-depth understanding of the principles which underpin human movement.
Effective: Spring 1999
Prerequisite:

KINES 485 Science of Training Athletes (3) Application of scientific data knowledge to analyze sport training.
Effective: Fall 1996
Prerequisite:

KINES 486 Legal Issues in Sport (3) Contemporary legal issues in sport and their implications for sport managers.

The Pennsylvania State University
Effective: Summer 1996  
Prerequisite:  
KINES 488 Mechanics of Locomotion (3) This course examines the forces and motions characteristic of locomotion, with emphasis on walking, the most common human activity.  
Effective: Summer 2002  
Prerequisite:  
KINES 492W Programming for Business and Agencies (3) Fundamentals of program development applied to corporate and private physical fitness businesses.  
Effective: Fall 2006  
Prerequisite:  
KINES 493 Principles and Ethics of Coaching (3) Integration of the practical and theoretical knowledge necessary for effective coaching through classroom and field experiences.  
Effective: Fall 2006  
Prerequisite:  
KINES 494H Senior Honors Thesis (1-6) Independent study directed by a faculty supervisor that culminates in the production of a thesis.  
Effective: Summer 2008  
Prerequisite:  
KINES 495A Practicum in Student Teaching (12) Supervised teaching of health and physical education in K-12 public schools with seminars focused on transition from student to professional.  
Effective: Fall 2006  
Prerequisite:  
KINES 495B Field and/or Research Practicum in Kinesiology (6) Participation under supervision in a field or research practicum.  
Effective: Fall 2006  
Prerequisite:  
KINES 495C Exercise Science Practicum (3 per semester/maximum of 6) Participation under supervision in a health and fitness setting.  
Effective: Fall 2006  
Prerequisite:  
KINES 495D Expanded Field and/or Research Practicum in Kinesiology (1-6) Additional participation under supervision in a field or research practicum.  
Effective: Spring 2006  
Concurrent: KINES 495B  
KINES 495E Advanced Professional Development in Kinesiology (3) Professional development preparation focused on knowledge, skills and abilities to complete national certification; obtain internships, employment or graduate school admission.  
Effective: Summer 2014  
Prerequisite: Concurrent: KINES 456 and KINES 457  
KINES 495F Field Practicum in Athletic Training (3) Participation under supervision in a field practicum.  
Effective: Summer 1996  
Prerequisite:  
KINES 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Summer 1996  
KINES 496A Independent Study Athletic Training (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Summer 2014 Ending: Summer 2014  
KINES 496B Independent Study Biomechanics (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Summer 2014 Ending: Summer 2014  
KINES 496C Independent Study Exercise Physiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Summer 2014 Ending: Summer 2014
KINES 496C **Independent Study Exercise Physiology** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2014 Ending: Fall 2014

KINES 496D **Independent Study History and Philosophy of Sport** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

KINES 496D **Independent Study History and Philosophy of Sport** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2014 Ending: Fall 2014

KINES 496E **Independent Study Motor Control** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

KINES 496E **Independent Study Motor Control** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2014 Ending: Fall 2014

KINES 496F **Independent Study Psychology of Movement and Sport** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

KINES 496F **Independent Study Psychology of Movement and Sport** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2014 Ending: Fall 2014

KINES 496G **Independent Study Teaching and/or Coaching** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

KINES 496G **Independent Study Teaching and/or Coaching** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2014 Ending: Fall 2014

KINES 496H **Kinesiology Honors Independent Study** (1-9 per semester/maximum of 18) For non-thesis independent study/research by Schreyer Honors College scholars.
Effective: Summer 2013

KINES 496K **Independent Study Applied Kinesiology** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

KINES 496K **Independent Study Applied Kinesiology** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2014 Ending: Fall 2014

KINES 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

KINES 497A **Advanced Anatomy** (3) This course is designed to provide students with an established anatomy background the basic concepts and applications of human cadaver dissection. The course includes: proper dissection techniques and upper and lower extremity cadaver dissection.
Effective: Summer 2014 Ending: Summer 2014
Prerequisite:

KINES 497A **Genetics and Human Performance** (3) Acquaint students with one of the most rapidly expanding areas of basic biological science that will influence Kinesiology. The course is along the lines of the interaction of genetic and environmental factors in human function at peak (performance) levels, as well as, normal functional baselines.
Effective: Fall 2014 Ending: Fall 2014

KINES 497B **Exercise is Medicine** (3) This course is designed for students interested in developing a deeper understanding of the physiological mechanisms behind exercise as medicine. In this course we will explore how exercise
modifies physiological function, and how these adaptations translate into protective and therapeutic benefits for a wide range of healthy and diseased populations.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

**KINES 497B Clinical Neuroanatomy** (3) The goal of this course is for students to obtain a working knowledge of the nervous system and neurological disorders. This course is most appropriate for students pursuing a career in medicine or the allied health professions.

Prerequisite:

**KINES 497C Nutrition, Exercise and Sport Performance** (3) This course is designed for students who have a background in exercise physiology and wish to develop a better understanding of the relationship between nutrition, exercise, and sport performance.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

**KINES 497C Nutrition, Exercise, and Sport Performance** (3) The course is designed to support critical thinking in exercise nutrition. This requires knowledge of fundamental principles of nutrition, exercise, and performance, as well as an understanding of the scientific methods that can be used to evaluate the benefits of harm of nutritional practices. These skills will enable students to independently acquire knowledge in the field of exercise nutrition, and to translate this knowledge into practice.

Prerequisite:

**KINES 497D High School Athletics - Administration and Coaching** (3) Examination and full disclosure of the role and responsibilities of the interscholastic athletic director.

Effective: Summer 2014 Ending: Summer 2014

**KINES 497E Sport Management** (3) Study of contemporary sport management issues.

Effective: Summer 2014 Ending: Summer 2014

**KINES 497E Ergogenic Aids** (3) Students will describe and evaluate the evidence base for agents and practices used to improve aerobic power, strength, body composition, metabolism and thermoregulation as they relate to exercise and physical activity.

Prerequisite:

**KINES 497F Physical Activity and Public Health** (3) An examination of the role of physical activity in public health. Includes introduction to basic epidemiology, measurement, dose-response relationships, chronic disease prevention, and population level strategies for promoting physical activity in communities through policy and environmental strategies.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

**KINES 497K EKG Interpretation** (3) Providing skills and experience needed to read and interpret normal and abnormal EKG’s. at may be topical or of special interest.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

**KINES 498 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 1996

**KINES 499 (IL) Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Spring 2011

**KINES 530 Experimental Design and Methodology in Kinesiology** (3) Research techniques, including methods, research design, techniques for data collection, as applied to relevant problems in Kinesiology.

Effective: Spring 1999
Prerequisite:

**KINES 531 Issues in Athletic Training** (3) Analysis of professional/academic issues related to athletic training; includes medical considerations, legal and professional developments, and current research.

Effective: Spring 2000

**KINES 532 Pathoetiology of Musculoskeletal Injuries** (3) In-depth study of physiological, mechanical, and neuromuscular mechanisms of common musculoskeletal injuries with applications for injury prevention, evaluation, and treatment.

Effective: Summer 2000
Prerequisite:

**KINES 540 History of Sport: Cultural and Social Dynamics** (3) This seminar explores the literature, methodologies, theoretical challenges, and research questions confronting the field.

Effective: Summer 2014

The Pennsylvania State University
KINES 551 Seminar in Motor Control (3) The course will address contemporary theories and methods in motor control as reflected in recently published scientific papers. Effective: Fall 2011

KINES 565 Neurophysiological Basis of Movement (3) The basic understanding of neurophysiological structures and mechanisms involved in the generation of human voluntary movement. Effective: Spring 1997

KINES 566 Psychophysiology of Movement (3) Basic concepts and principles of psychophysiology and their application for analyses of human movements. Effective: Summer 1997

KINES 567 (PHSIO 567) Advanced Exercise Physiology (3) Physiological changes during exercise with emphasis on the effects of physical conditioning and training. Effective: Fall 1996
Prerequisite:

KINES 574 Modeling in Biomechanics (3) Examination of the philosophies and tools used in biomechanical modeling and the insights into the musculo-skeletal system these provide. Effective: Spring 2000
Prerequisite:

KINES 575 Experimental Methods in Biomechanics and Motor Control (3) Introduces the theory and practice behind the primary experimental methods used in biomechanics and motor control. Effective: Summer 2005
Prerequisite:

KINES 577 (PHSIO 577) Cardiovascular Physiology (3) In-depth study of the heart and circulatory system with emphasis on the effects of exercise on cardiovascular function. Effective: Fall 1997
Prerequisite:

KINES 578 (PHSIO 578) Physiology and Mechanical Behavior of Skeletal Tissues (3) In-depth examination of the structure, composition, and material behavior of the basic skeletal tissues, including bone, cartilage, tendon, and ligament. Effective: Spring 1999
Prerequisite:

KINES 579 Advanced Biomechanics of Human Motion (3) Biomechanical foundation of human movement and injury prevention. Effective: Summer 1997
Prerequisite:

KINES 588 Scientific Writing in Kinesiology (3) Instruct students in writing grant proposals, abstracts, manuscripts, and effective presentations in their respective scientific fields of study in Kinesiology. Effective: Spring 2005

KINES 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students or outside speakers. Effective: Fall 1996

KINES 590B Exercise Physiology Colloquium (1 per semester/maximum of 4) Continuing colloquia in exercise physiology which consists of individual lectures by outside speakers, students and faculty. Effective: Spring 2013

KINES 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 2008

KINES 594F Research Readings - Psychology of Movement and Sport (1) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

KINES 596 Individual Studies (1-9) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1996

KINES 596A Independent Study Athletic Training (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2014 Ending: Summer 2014

The Pennsylvania State University
KINES 596A Independent Study Athletic Training (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

KINES 596B Independent Study Biomechanics (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

KINES 596B Independent Study Biomechanics (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

KINES 596C Independent Study Exercise Physiology (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

KINES 596C Independent Study Exercise Physiology (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

KINES 596D Independent Study History and Philosophy of Sport (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

KINES 596D Independent Study History and Philosophy of Sport (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

KINES 596E Independent Study Motor Control (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

KINES 596E Independent Study Motor Control (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

KINES 596F Independent Study Psychology of Movement and Sport (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

KINES 596F Independent Study Psychology of Movement and Sport (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

KINES 596G Independent Study Teaching and/or Coaching (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

KINES 596K Independent Study Applied Kinesiology (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2014 Ending: Summer 2014

KINES 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1996

KINES 597D History of Sport: Social and Cultural Dynamics (3) This seminar explores the literature, methodologies, theoretical challenges, and research questions confronting the field.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

KINES 600 Thesis Research (1-15) No description.
Effective: Fall 1996

KINES 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1996

The Pennsylvania State University
KINES 602 **Supervised Experience in College Teaching** (1-2 per semester, maximum of 6) Preparation and presentation of materials in lecture and laboratory classes under the supervision of a full time faculty member.
Effective: Fall 1996
Prerequisite:

KINES 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1996

KINES 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1996

Last Import from UCM: May 24, 2014 3:00 AM
Labor & Employment Law (LABOR)

LABOR 962 The Employment Relationship (3) This course covers common law employment doctrines (at-will employment, contract and tort erosions of at-will employment, employee duties, including the duty of loyalty and trade secrets), noncompetition agreements, and employee rights in inventions, and workplace injuries (including workers compensation, OSHA, and criminal and tort approaches to promoting a safe workplace.)
Effective: Fall 2013

LABOR 963 Workplace Regulation (3) This course covers workplace privacy issues, including free speech and political protections, and defamation and related torts; anti-discrimination laws; and wage, hour, and benefits legislation, including unemployment compensation; the WARN Act, the Family and Medical Leave Act; and NLRA issues commonly encountered in the unorganized workplace.
Effective: Spring 2014

LABOR 964 Employment Discrimination (3) This course will provide an overview of significant doctrinal issues in employment discrimination law, and will seek to develop students’ skills through a rigorous examination of statutory law, regulations and court decisions. It will introduce students to the fundamental legal theories underlying the substantive coverage of the most significant federal equal employment opportunity laws, and legal issues regarding their application.
Effective: Summer 2011

LABOR 965 Worker’s Compensation Law (3) This course will explore the history and development of, public policy considerations for, and state and federal systems for delivery of medical and wage benefits to injured workers.
Effective: Spring 2012

LABOR 966 The Law of Employee Benefits (3) Employe-provided pension and health care programs play a critical role in the lives of individuals, families, and communities. They also affect corporations, financial markets, and the economy as a whole. Employee benefit programs are, in short, an important staple of modern law practice. This course surveys the Employee Retirement Income Security Act and relevant portions of the Internal Revenue Code. Classes examine what benefit plans must do regarding reporting and disclosure, accrual, vesting, funding, and fiduciary standards. The course covers health care reform, the shift from defined benefit to defined contribution programs, and the effect of stock market volatility on benefit programs. Throughout the semester, students examine the policy goals underpinning federal benefits law. The course surveys major issues in ERISA litigation, including that statute’s claims and remedies provisions, as well as its preemption of state law.
Effective: Summer 2012

LABOR 970 Labor Law (3) This course is an extended study of the federal National Labor Relations Act focusing on the right to form and join labor organizations, strikes, boycotts and picketing, collective bargaining, and the enforcement of collective bargaining agreements.
Effective: Fall 1998

LABOR 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2008

Last Import from UCM: May 24, 2014 3:00 AM
Labor and Industrial Relations (L I R)

L I R 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1988

L I R 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1988
Labor&Globwkrsrghts (LGWR)

LGWR 510 International Labor Law (3) Seminar exploring international labor law, including its standards, reviewing bodies, procedures, information sources, remedies, and overall strenghts and weaknesses.
Effective: Summer 2014

LGWR 520 Global Workers' Rights (3) Seminar course exploring the issues of work and workers' rights in the global economy.
Effective: Summer 2014

LGWR 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2014

LGWR 894 Capstone Experience (3) Supervised, professionally-oriented student activities that constitute the culminating experience for the program.
Effective: Summer 2014

LGWR 895 Internship (1-6) Supervised, professionally-oriented, off campus, non-group instruction, including field experiences, practicums, or internships.
Effective: Summer 2014

Last Import from UCM: May 24, 2014 3:00 AM
LARCH 400 Introduction to Design and Theory (IUG) (5) Introductory landscape architectural design and applied theory for IUG students.
Effective: Summer 1998
Prerequisite: Concurrent: LARCH 400A

LARCH 414 Design and Theory V: Advanced Landscape Architectural Design (5 per semester/maximum of 15) Review of landscape architectural theories and issues; supports development of comprehensive design study and/or independent honors (Thesis-Based) design projects. LARCH Majors only.
Effective: Spring 2007
Prerequisite:

LARCH 424 Design Theory Seminar (3 per semester/maximum of 9) Inquiry-based reading and discussion of design theory literature relevant to contemporary landscape architecture issues. Topics vary each semester.
Effective: Spring 2012
Prerequisite:

LARCH 431 Landscape Architectural Design Implementation III (3) Introduces the principles and techniques of stormwater management and drainage design, including instruction in proper construction documentation, calculations and estimations. For Landscape Architecture majors only.
Effective: Spring 2012
Prerequisite:

LARCH 450 Geodesign: Geospatial Technology for Design (3) Interactive geodesign and digital design studio.
Effective: Fall 2012

LARCH 494H Research Projects - Honors (1-12 per semester/maximum of 12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2012

LARCH 495 Internship (1-13) Supervised off-campus, non-group instruction including individual field experiences, practicums or internships. Written and oral critique of activity required.
Effective: Fall 1981
Prerequisite:

LARCH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

LARCH 496H Independent Studies - Honors (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012

LARCH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

LARCH 497A Ecology and Field Identification of Central Appalachian Flora (3) This course is an introduction to the field identification and ecology of herbaceous and woody plants of the central Appalachian region. We will focus on field characteristics of common plants and learn how to identify them to the level of species, if possible. This class is entirely field based and we will be taking field trips each and every week, regardless of the weather. Some trips will be within walking distance, others will require a van. As such, class enrollment is limited to 13 students. There will be weekly quizzes of both common and scientific names. You will also develop a digital plant collection by the end of the semester. As the seasons change, certain plants die back and others come into flower. The end of the semester will likely be an examination of winter characteristics.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

LARCH 497B Advanced Digital Landscape Modeling and Rendering (3) As digital 3D modeling software has become more powerful and easy to use, it is now possible for the average student or professional to create stunning, photorealistic renderings of complex scenes that were once only possible by enlisting the most sophisticated Hollywood movie studios or professional computer graphics illustrators. As impressive as these computer renderings are, the quest for photographic realism has resulted in the loss of one of the most important qualities of traditional design drawings and renderings, imperfection. It’s the “imperfections” (or perhaps subtle variations) in nature and the built environment that helps produce beauty. Perhaps it’s the imperfection and ambiguity in traditional rendering techniques that helps make them so appealing and effective for visual communication.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

LARCH 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005
LARCH 499A (IL) **Design Theory Seminar** (1) Inquiry-based reading and discussion of design theory literature relevant to the focus and content of the associated design studio course, LARCH 499B. LARCH majors only.
Effective: Spring 2007
Prerequisite: Concurrent: LARCH 499B LARCH 499C LARCH 499D

LARCH 499B (IL) **Design and Theory VI: Contemporary/International Landscape Architectural Design Issues** (5) Study of and design for sites, programs, and social groups associated with ongoing contemporary landscape architectural concerns. LARCH majors only.
Effective: Spring 2012
Prerequisite: Concurrent: LARCH 499A LARCH 499C LARCH 499D

LARCH 499D (IL) **Contemporary/International Special Topics** (3) Special topics related to, and study in conjunction with 499B. Landscape Architecture majors only.
Effective: Spring 2012
Prerequisite: Concurrent: LARCH 499B

LARCH 499E (IL) **People and Protected Areas** (3) LARCH 499E is a three-credit seminar that aims to introduce students to key issues associated with communities, community design, biodiversity conservation, and the interface of people and conservation in the vicinity of Udzungwa Mountains National Park in south-central Tanzania. The format of the course is reading and discussion, where students read assigned literature and then contribute to discussions led by faculty, both to demonstrate their understanding of the reading assignments and to begin to explore key issues introduced by those readings. Students also write two papers, the first examining the interface of rural land use planning, community design, and biodiversity conservation; and the second focusing on biodiversity conservation in the context of human settlement near Udzungwa Mountains National Park. Student evaluation is based on seminar participation and the two papers.
Effective: Summer 2014 Ending: Summer 2014

LARCH 499F (IL) **Community Design in the Vicinity of Udzungwa Mountains** (5) LARCH 499F is a five-credit course that focuses on student research projects associated with communities along the eastern boundary of Udzungwa Mountains National Park. We have purposefully maintained a general definition for the course to allow students to design projects that best suit their interests and skills. For example, some students may focus on evaluating existing village configurations and propose new designs that help villagers better meet their daily needs. Other students, in turn, may focus on developing a more marketable park that attracts larger numbers of visitors who stay in or near the park for longer periods of time - generating more income that ultimately will find its way, in part, to local communities.
Effective: Summer 2014 Ending: Summer 2014

LARCH 499G (IL) **The Contribution of Service-Learning to Students and Community** (1) LARCH 499G is a one-credit course designed to enable students to reflect on what for most will be their first opportunity to visit and work in rural East Africa. It involves the development of daily journals to record reflections on their evolving awareness of Tanzania and the challenges that people and conservation face in this less-developed country. The journals provide a foundation of reflections about one or more issues that interest each - maybe (though not necessarily) something close to the focus of the specific education abroad experience involved (e.g., the relationship between people and protected areas in south-central Tanzania), maybe international development in general, or maybe another topic. The journals also should be important personally: In all likelihood, this six-week period will expose students to places, people, and challenges that they have never seen in person.
Effective: Summer 2014 Ending: Summer 2014

LARCH 500 **Environmental and Ecological Conditions in Regional Landscape** (1) Landscape architectural field trips within the Centre Region.
Effective: Summer 1996
Prerequisite:

LARCH 501 **Research and Writing in Landscape Architecture** (3) Landscape architectural research methods and writing techniques.
Effective: Fall 2009

LARCH 502 **Intellectual History and Theory of Landscape Architecture** (3) Introductory theory seminar covering the intellectual history of landscape architecture and theoretical contributions from related disciplines.
Effective: Spring 2009

LARCH 510 **Graduate Seminar in Landscape Architecture** (3) Landscape architectural theory exploration through readings and discussions.
Effective: Fall 2011
Prerequisite:

LARCH 515 **Design and Theory I: Introduction** (5) Introductory landscape architectural design and applied theory for MLA students.
Effective: Summer 2011

LARCH 520 **Design and Theory II: Introduction to Issues of Place** (5) Studio design with a focus in addressing issues of nature and culture.
Effective: Spring 2012
Prerequisite:
Prerequisite:

LARCH 531 **Option Studio I** (4) Studio inquiry in community and urban design. Effective: Spring 2006
Prerequisite:

LARCH 540 **Design and Theory IV: Site and Community Design** (5) Large site and Community Design. Effective: Spring 2012
Prerequisite:

LARCH 541 **OPTION STUDIO II** (4) Continued studio inquiry in community and urban design. Effective: Spring 2012
Prerequisite:

LARCH 550 **Master of Landscape Architecture Project Studio** (6) The final capstone studio for students completing the Master of Landscape Architecture. Effective: Spring 2014
Prerequisite:

LARCH 560 **Landscape Architecture Inquiry** (1-9) Research, planning, and/or design inquiry into landscape architectural issues. Effective: Summer 1996
Prerequisite:

LARCH 590 **Colloquium** (1-3 per semester/maximum of 6) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1988

LARCH 596 **Independent Studies** (1-9) Independent study opportunities open for graduate students covering topics which fall outside the scope of formal courses (non thesis). Effective: Spring 2009

LARCH 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 1987

LARCH 599 **Foreign Studies** (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2006

LARCH 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Opportunity for students to obtain supervised and graded teaching experience. Effective: Spring 1988

Last Import from UCM: May 24, 2014 3:00 AM
Language and Literacy Education (LL ED)

LL ED 400 Teaching Reading in the Elementary School (3) Introduction to the reading program; acquaintance with materials and techniques; observations of reading instruction; correlation with human growth and development. Effective: Spring 2014
Prerequisite: Concurrent: LL ED 401 LL ED 402 for CEAED majors

LL ED 401 Teaching Language arts in Elementary School (3) Principles, problems, materials, and techniques involved in teaching speaking, listening, writing, and reading in the elementary school. Effective: Spring 2014
Prerequisite: Concurrent: LL ED 400 LL ED 402 for CEAED majors

LL ED 402 Teaching Children’s Literature (3) Survey of children’s literature with an emphasis on the importance of literature in the development of the elementary school curriculum. Effective: Spring 2014
Prerequisite: Concurrent: LL ED 400 LL ED 401 for CEAED majors

LL ED 411 Teaching Language Arts in Secondary Schools I (3) Exploration of language, literacy, and culture and development of curricular designs for teaching language arts in secondary schools.
Effective: Spring 1994
Prerequisite: Concurrent: LL ED 420

LL ED 412W Teaching Language Arts in Secondary Schools II (3) Exploration of language, literacy, and culture and development of curricular designs for teaching language arts in secondary schools.
Effective: Spring 2014
Prerequisite: Concurrent: CI 412W

LL ED 420 Adolescent Literature and Literacy (3) Exploration of adolescent literacy and curricular designs for using the diversity of cultural voices in adolescent literature in secondary schools.
Effective: Spring 1992
Concurrent: LL ED 411

LL ED 445 Teaching English in Bilingual/Dialectal Education (3) Theories, techniques, materials for teaching English speaking, reading, and writing to bilingual and nonnative speakers in elementary and secondary schools.
Effective: Summer 2011

LL ED 450 Content Area Reading (3) Study of reading skills and materials for specific content areas; diagnostic and instructional procedures for classroom teachers.
Effective: Spring 2014
Prerequisite:

LL ED 462 The Art of the Picturebook 3 An in-depth study of picturebooks as art objects providing aesthetic experiences and contributing to our aesthetic development in literacy education.
Effective: Summer 2009
Prerequisite:

LL ED 465 Fantasy Literature for Children (3) A study of fantasy literature for children looking at a variety of fantasy stories and examining them from different perspectives.
Effective: Summer 2010
Prerequisite:

LL ED 480 Media Literacy in the Classroom (3) Exploration of media languages and literacy in classrooms, learning in an electronic age; issues, ideas, and teaching strategies.
Effective: Spring 2005
Concurrent: LL ED 411 LL ED 420

LL ED 495 School Practicum in Reading (1-18) Supervised practicum providing field experiences at any grade level, with opportunities to assume various teaching roles.
Effective: Spring 1992
Prerequisite:

LL ED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1992

LL ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1992

LL ED 497A CEAED PK-4 Literacy Block (15) Course serves as block until CEAED students are registered by Department for appropriate section of LL ED 400, 401, 402, A ED 303 and MUSIC 241.
Effective: Summer 2014 Ending: Summer 2014

LL ED 497A CEAED PK-4 Literacy Block (15) Block of five 3 credit courses required of all students in CEAED PK-4 major
LL ED 497A **CEAED PK-4 Literacy Block** (15) Course serves as block until CEAED students are registered by Department for appropriate section of LL ED 400, 401, 402, A ED 303 and MUSIC 241.

LL ED 497B **CEAED 4-8 Literacy Block** (9) Block of three 3 credit courses required of all students in CEAED 4-8 major including LL ED 400, 401, and 402.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

LL ED 497C **Children's Literature Through Picturebooks** (3) Students will gain knowledge of picture books and how picture books contribute to the literacy development of pre-K to 4th grade children.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

LL ED 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

LL ED 500 **The Reading and Writing Classroom** (3) Analysis of reading and writing processes and the development of integrated language arts programs for elementary schools.
Effective: Summer 1993
Prerequisite:

LL ED 501 **Teaching Writing in Elementary and Secondary Schools** (3) In depth examination of writing development and the development of writing components of language arts programs K-12.
Effective: Summer 1993
Prerequisite:

LL ED 502 **Studies in Literature for Children** (3) Study of various genres of children's literature from various critical perspectives; emphasis on role of literature in children's lives.
Effective: Summer 1992
Prerequisite:

LL ED 503 (ENGL 503) **Research Methods in Composition** (3) Introduction to the issues and methods of empirical research in composition.
Effective: Fall 1993

LL ED 512 **Teaching Language, Literacy, and Literature in Secondary Schools** (3) Collaborative inquiry into the curricular design and experience of language, literacy, media, and literature in adolescents' personal and social lives.
Effective: Summer 2010
Prerequisite:

LL ED 520 **Literature for Adolescents** (3) Critical study of adolescent literature, its diversity of cultural voices, and designs for its use in secondary school classrooms.
Effective: Summer 1992
Prerequisite:

LL ED 541 **Adolescent and Children's Literature Related to Ethnic and Social Issues** (3) Literature, K-12; study of literary symbolism, ethnic literature, issues, e.g., sex, death, adoption, divorce in trade books.
Effective: Summer 1993
Prerequisite:

LL ED 542 (CI ED 542) **Issues in Literacy Education** (3 per semester/maximum of 6) Discussion of philosophical, sociological, historical, and curricular issues in literacy education.
Effective: Fall 1997

LL ED 544 **Cross-Cultural Research in Bilingual Education** (3) Analysis of cross-cultural research methodology in bilingual education.
Effective: Spring 1993
Prerequisite:

LL ED 545 **LITERACY AND LANGUAGE ASSESSMENT FOR INSTRUCTIONAL DECISIONS** (3) Diagnosis of reading difficulties; genesis of reading problems; achievement, diagnostic, and capacity tests; application in simulation activities.
Effective: Summer 1993
Prerequisite:

LL ED 550 **Theory and Practicum in Assessment and Remediation of Reading Difficulties** (3) Links theory and practice in supervised practicum involving design and analysis of appropriate assessment and instructional procedures for elementary and secondary students.
Effective: Fall 1993
Prerequisite:

LL ED 561 **Cultural Pluralism in Children's and Adolescent Literature** (3) Reading/discussing literature from
multicultural/critical multicultural lenses and how this impacts literacy.
Effective: Summer 2012

LL ED 563 Myths and Folktales in Children's Literature (3) An in-depth study of myths and folktales shared with children and how these stories are remade and disseminated today.
Effective: Spring 2010
Prerequisite:

LL ED 564 Writing for Children (3) Supervised workshop in the craft and techniques of writing picture books, short stories, longer fiction, and nonfiction literature for children.
Effective: Spring 2014
Prerequisite:

LL ED 565 Analysis of Theory and Practice in Bilingual Education Program (3) Classroom analysis, observation, and research of instructional procedures, materials, and evaluation strategies used in bilingual education.
Effective: Summer 2011
Prerequisite:

LL ED 566 Bilingual Education and the Hispanic Child (3) Analysis of the research and literature related to teaching bilingual Hispanic students; examines problems, issues, and strategies.
Effective: Spring 1993
Prerequisite:

LL ED 567 Politics of Bilingual Education (3) To critically analyze the contemporary and historical political context of an education that is bilingual and bicultural.
Effective: Spring 2000

LL ED 568 Doing Research in Children's Literature (3) An examination of research traditions used to frame research in children's literature studies and preparation to write the master's paper.
Effective: Summer 2010
Prerequisite:

LL ED 577 (C I 577) Multicultural Issues in Literacy Education (3) Explores research questions, and theoretical frameworks, and analyzes multicultural issues in popular media in the context of American schools.
Effective: Spring 1997
Prerequisite:

LL ED 580 (C I 580) Media Literacy, Language, and Literacy in Schools (3) Theories of media literacy, issues of non-print technology in language and literacy.
Effective: Spring 1997
Prerequisite:

LL ED 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1996

LL ED 594 Research in Language and Literacy Education (3) Cooperative design and study of research in language and literacy education.
Effective: Spring 1993
Prerequisite:

LL ED 595A Practicum: Remedial Procedures and Diagnosis (3-6) Advanced practicum; diagnostic testing and remedial instruction of more severe types of reading disability; supervisory experiences, if appropriate.
Effective: Summer 1993
Prerequisite:

LL ED 595B Advanced Practicum in Bilingual Education (1-6) Advanced internship in curriculum, supervision, and instruction in a bilingual education setting.
Effective: Spring 1993
Prerequisite:

LL ED 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1993

LL ED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1993

LL ED 597A Preparing to Teach Secondary English Language Arts Methods (3) Culminating seminar for doctoral students engaged in preparation to design and teach undergraduate methods courses in secondary English Language Arts.
Effective: Summer 2014 Ending: Summer 2014

Last Import from UCM: May 24, 2014 3:00 AM

The Pennsylvania State University
Languages (LANG)

LANG 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2007

LANG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2007

LANG 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

LANG 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2007

Last Import from UCM: May 24, 2014 3:00 AM
Latin (LATIN)
Knowledge of Greek or Latin not required. See also CLASSICS AND ANCIENT MEDITERRANEAN STUDIES and GREEK.

LATIN 402 Republican Literature (3-12) Selected works by Plautus, Lucretius, Catullus, Cicero (content varies).
Effective: Summer 1995
Prerequisite:

LATIN 403 Augustan Age Literature (3-12) Selected works by Virgil, Horace, Propertius, Tibullus, Ovid, Livy (content varies).
Effective: Summer 1995
Prerequisite:

LATIN 404 Silver Age Literature (3-12) Selected works by Petronius, Seneca, Tacitus, Juvenal, Martial, Pliny the Younger (content varies).
Effective: Summer 1995
Prerequisite:

LATIN 420 Medieval Latin Literature (3-6) Survey of Medieval Latin literature.
Effective: Spring 1995
Prerequisite:

LATIN 450W History of Latin (3) History of the Latin language and its speakers, from their origins to the 2nd century C.E.
Effective: Summer 1994
Prerequisite:

LATIN 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

LATIN 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

LATIN 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

LATIN 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

LATIN 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

LATIN 510 Latin Seminar (3-6) No description.
Effective: Winter 1978

LATIN 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2000

LATIN 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005

Last Import from UCM: May 24, 2014 3:00 AM
Law (LAW)

LAW 903 Visiting Away Semester (1-17) Student approved by the law school to visit away for the semester. Course work successfully completed will transfer as progress toward the law degree.
Effective: Summer 2008

Last Import from UCM: May 24, 2014 3:00 AM
Law Research Doctora (SJDLW)

SJDLW 900 SJD Dissertation (1-12) SJD Dissertation. Effective: Fall 2012

SJDLW 901 Research Methods Seminar (1 per semester/maximum of 4) Introduction into research methods for advanced dissertations in law. Effective: Fall 2014 Future: Fall 2014 Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Ldrshp Development (LEAD)

LEAD 501 Leadership Across the Lifespan (3) Analysis and application of models, theories and strategies for developing an individual's full leadership potential at different life stages.
Effective: Summer 2004

LEAD 519 (BUSAD 519) Developing Creative High Performance Organizations (3) This course focuses on how to create high performing organizations based on models provided by business, science and the arts.
Effective: Spring 2007
Prerequisite:

LEAD 555 (BUSAD 555) Full Range Leadership Development (3) Development of behavioral skills associated with outstanding leadership of individuals, teams, and organizations through advanced information technology, experimental exercises, and case analysis.
Effective: Spring 2011
Prerequisite:

LEAD 556 (BUSAD 556) Diversity Leadership (3) Analysis and application of models, theories, and strategies for managing an increasingly diverse workforce and customer base.
Effective: Fall 2005
Prerequisite:

Effective: Summer 2010
Prerequisite:

LEAD 561 Dynamic Communication in Leadership Contexts (3) Articulating and promoting a vision; facilitating interaction and communicating with groups; theory and techniques of persuasion.
Effective: Fall 2005
Prerequisite:

LEAD 562 Strategic Leadership (3) Executive-level leadership of larger systems and organizations. Impact of developing human, intellectual, social, structural, financial and reputational capital as strategic tools.
Effective: Summer 2004
Prerequisite:

LEAD 582 (BUSAD 582) Social Entrepreneurship and Community Leadership (3) This course will provide an opportunity for students to explore concepts of developing and leading businesses that create social value.
Effective: Fall 2011
Prerequisite:

LEAD 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2005

LEAD 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2005

Last Import from UCM: May 24, 2014 3:00 AM
Learning Design & Tech (LDT)

LDT 505 Integrating Mobile Technologies into Learning Environments (3) Research on learning with mobile computers and models for mobile computer integration for K-12 schools, community organizations, and universities. Effective: Summer 2014

LDT 550 Learning Design Studio (3 per semester/maximum of 12) Examines a range of skills, processes, and theories for designing and developing interactive educational materials. Effective: Spring 2014

LDT 897 Special Topics (1-9 per semester/maximum of 12) Forma courses given on a topical or special interest subject with a professional orientation that may be offered infrequently. Effective: Spring 2014

Last Import from UCM: May 24, 2014 3:00 AM
Linguistics (LING)

LING 402 Syntax I (3) Principles of grammatical analysis in the generative framework; an overview of syntactic structures across languages.
Effective: Fall 2001

LING 404 Phonology I (3) The analysis of the sound systems of human languages; focus on common phonological processes across languages and on phonetics-phonology interface.
Effective: Fall 2001

LING 429 (PSYCH 426) Language and Thought (3) Relations between language and cognition; cognitive implications of normal and impaired language development; cognition and bilingualism.
Effective: Spring 2007
Prerequisite:

LING 446 (PSYCH 427) L1 Acquisition (3) How children learn their first language; psycholinguistic aspects of lexical, syntactic, semantic, and phonological development.
Effective: Spring 2010
Prerequisite:

LING 447 Bilingualism (3) Explores the social and psychological aspects of bilingualism; topics include languages in contact, transference, maintenance, and loss.
Effective: Fall 2001

LING 448 Sociolinguistics (3) Issues in the study of language in its sociocultural context; analysis of social dialects and speech styles.
Effective: Fall 2001

LING 449 Semantics I (3) The study of meaning in human language; methods of analysis; study of sense, reference, compositionality, quantification, presupposition, and sentence-level meaning.
Effective: Fall 2001

LING 457 (PSYCH 457) Psychology of Language (3) Overview of psychological research and theory on language processes, including speech perception, word recognition, meaning representation, comprehension, and language acquisition.
Effective: Fall 2013 Ending: Summer 2014
Prerequisite:

LING 457 (PSYCH 457) Psychology of Language (3) Overview of psychological research and theory on language processes, including speech perception, word recognition, meaning representation, comprehension, and language acquisition.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

LING 493 Field Methods (3) Primary linguistic investigation of a language different from English; field work with a native speaker; data gathering; linguistic analysis.
Effective: Fall 2001

LING 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

LING 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

LING 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

LING 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1983

LING 497A EEG/ERP Methods and Experimental Research (3) This course introduces students to the basic concepts, principles and research methods in scalp-recorded EEG, in particular the application of the Event-Related brain Potentials (ERPs) technique, signal-averaged EEG recordings that are time-locked to perceptual or cognitive events. The course also
includes a practical part in which students receive hands-on training in which they learn to record, analyze and interpret ERP data.

Effective: Summer 2014 Ending: Summer 2014

LING 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1992

LING 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

LING 500 Syntax II (3) Advanced topics in syntactic analysis and theory.
Effective: Spring 2002

LING 502 Historical Linguistics (3) Principles of comparative linguistics; language families; reconstruction of lost languages.
Effective: Spring 2002

LING 504 Phonology II (3) Advanced topics in phonological analysis and theory.
Effective: Spring 2002

LING 520 (PSY 520) Seminar in Psycholinguistics (3 per semester/maximum of 9) Consideration of theoretical and research issues relevant to psychological aspects of language sounds, syntax and semantics, and other cognitive support.
Effective: Spring 2004

LING 521 Proseminar in the Language Science of Bilingualism (3) This course provides a cross-disciplinary overview of language science approaches to bilingualism and second language learning.
Effective: Spring 2010

LING 522 Proseminar in Professional Issues in Language Science (3) This course addresses issues of professional development in the language sciences with special attention to cross-disciplinary research.
Effective: Spring 2010

LING 525 Experimental Research Methods in Psycholinguistics (3) This course provides an overview of experimental research techniques used in language science.
Effective: Spring 2010

LING 548 Sociolinguistics (3) Study of social and linguistic aspects of language change, varieties, policy, social inequality, language communities, language, society, and thought.
Effective: Spring 2002

LING 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

LING 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

LING 597A Codeswitching in the Lab and the Community (3) This course examines the production and processing of code-switching discourse. Questions we will address include: the status of single other-language items; syntactic-prosodic constraints on switch sites; cross-language syntactic priming; the role of code-switching in language change; the contribution of laboratory work to the study of code-switching.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

LING 600 Thesis Research (1-15) No description.
Effective: Fall 1983

LING 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Lit/Dispt Res/Skills (SKILS)

SKILS 950L Advocacy I (4) Advocacy I teaches pretrial and trial skills through a combination of lecture, written and oral courtroom exercises, and videotape review.
Effective: Fall 2007
Prerequisite:

SKILS 950R Advocacy I Advocacy I teaches pretrial and trial skills through a combination of lecture, written and oral courtroom exercises, and videotape review.
Effective: Fall 2007
Prerequisite:

SKILS 951 Advocacy II (3) Students synthesize the individual trial skills learned in Advocacy I by preparing and conducting an entire case, from the initial interview of the client through a trial on the merits. Each case is tried before a jury and judge from a Pennsylvania or federal court. All trials are videotaped in their entirety.
Effective: Summer 2013

SKILS 952 Strategic Legal Research (3) This course is designed to provide students with an advanced understanding of ways lawyers use primary and secondary legal research sources and finding tools to successfully represent their clients. An emphasis is placed on the development of effective legal research strategies that take into account choice of format (e.g., the relative advantages and disadvantages of print and electronic sources), cost/benefit analysis of format choice, evolving approaches by law firms and private practitioners to billable research hours, use of computerized tools to organize research results, and presentation of research results to case supervisors. Course content will be presented in a hybrid format consisting of two hours per week of in-class meetings with the remaining credit to be completed by coursework outside scheduled class time through online and written assignments.
Effective: Fall 2012
Prerequisite:

SKILS 954 Pretrial Advocacy (2) Students work with case files through written exercises and classroom simulations to gain a thorough understanding of the procedural rules and advocacy tools used in the pretrial stages of litigation. The course grade is based upon class participation and the written exercises.
Effective: Summer 2013

SKILS 955 Evidence (3) This course presents evidence in trials under the Federal Rules of Evidence, at common law and in equity and with reference to administrative bodies. The reasoning from which rules arise in areas including relevancy, competency, privilege, examination of witnesses, writing, the hearsay rule and its exceptions, burden of proof, presumptions, judicial notice, and constitutional evidence problems is also addressed.
Effective: Fall 2006

SKILS 957 Client Counseling (2) This course introduces students to the dynamics of a productive attorney-client relationship, the goals of interviewing and counseling, and structures and techniques that can be used to achieve those goals. The focus is on developing students' skills in interviewing and counseling. Instruction consists of assigned reading, problem-solving exercises, group discussion, and practice through simulations. Client Counseling is one of the core courses for the Certificate in Dispute Resolution and Advocacy. Preference is given to students seeking the Certificate in Dispute Resolution and Advocacy.
Effective: Summer 2011

SKILS 958 Conflict of Laws (3) How do we resolve problems when the substantive law or procedural rules of states or nations conflict? For example, if Hawaii enacts a statute permitting same-sex marriages, must other states recognize such a marriage? If an American-owned factory explodes in India, may the injured pursue claims under American tort law? The course will provide a review of jurisdictional concepts introduced earlier in first-year courses, introduce choice of law issues for multistate or multinational transactions or events, and examine the influence of the United States Constitution on the reach of a state's judicial decisions or legislation outside the state.
Effective: Fall 1998

SKILS 959 Mediation (3) This course examines the legal and ethical issues involved in mediation and develops students' skills as mediators and as attorneys representing clients in the process.
Effective: Fall 2004
Prerequisite:

SKILS 960 Negotiation/Mediation (3) This course combines the law and ethics of negotiation, mediation and settlement with economic and psychological bargaining theory and regulat hands-on practice in representing clients in negotiation and mediation. Bargaining theory (including distributive and integrative bargaining), relevant socio-psychological research, negotiation and mediation ethics, the law of settlement, and the basics of contract drafting are all introduced. Instruction consists of assigned reading, a series of simulations and exercises (including drafting a resulting contract), written negotiation planning and self-evaluation, feedback, and group discussion.
Effective: Summer 2011

SKILS 962 The U.S. Law of Arbitration (3) This course provides an introduction to the domestic law and practice of arbitration. It assess the statutory and decisional law basis for arbitration, especially the provisions of the Federal
Arbitration Act. It investigates the central doctrinal issues in the field: the enforceability of unilaterally-imposed arbitration agreements, the arbitrability of statutory rights - in particular, civil rights matters, and the use of contract to establish the law of arbitration between the arbitrating parties. Emphasis is placed upon practical problems that have emerged in the practice of arbitration law: the selection of arbitrators, the use of discovery and evidence-gathering in arbitral proceedings, and the content of arbitration agreements. The course also addresses the new uses of arbitration in the consumer, health, and employment fields.

Effective: Spring 2010

SKILS 964 Intensive Legal Writing and Drafting (2) This course develops students’ skills in common legal writing formats other than memos and briefs. Not intended as a remedial course, this course rather provides an opportunity for students to sharpen legal writing skills with an emphasis on clarity and precision of expression. Weekly writing assignments include a few fully drafted documents (e.g., short will, a short contract, a statue), as well as letters, short pleadings, jury instructions, and other short pieces. Students will concentrate on re-writing and editing their work.

Effective: Summer 2011

Prerequisite:

SKILS 965 Federal Courts (3) This course addresses the relationship of federal courts to administrative agencies and state courts.

Effective: Fall 2011

SKILS 966 Arbitration Workshop (3) The first part is the drafting of arbitral clauses in a variety of circumstantial settings (maritime, labor, commercial, consumer, and employment) in regard to CPR best practices standards and addressing the authority of the arbitrators and the configuration of the arbitral procedure. This process would take several sessions. The second branch would be to view and then construct an arbitration pursuant to one or several of the arbitral clauses. This would require the conduct and architecture of an arbitral trial along with the protocol for its management, both with the arbitrators and the parties. This would take some time as well. Third, the students would be asked to participate in a statutory drafting workshop that reflects their experiences in the two previous branches. They would be asked to evaluate the UNCITRAL Model Law and several national laws of arbitration and arrive at a new and better model law.

Effective: Summer 2011

Prerequisite:

SKILS 967 Federal Court Practice (2) This course introduces contemporary issues in several topical areas of particular interest to litigating in federal courts. The course topics are varied, with the unifying theme being that each topic possesses either particular prominence or exclusive jurisdiction within the country's federal court system. These topics include: the history and organization of the federal courts, the courts’ relationship with Congress, the practical dynamics of federal procedure, strategic considerations involved in a litigant's choice of federal court, employment discrimination, federal criminal matters, sentencing, civil rights cases, and habeas.

Effective: Fall 2011

SKILS 968 Judicial Opinion Writing (2) Students will learn about the role of a judicial clerk and how to draft judicial opinions. Students will recognize the impact of written advocacy on judicial opinion writing as they switch roles from advocating as a lawyer to deciding issues raised by the advocates and writing opinions that implement subtle persuasive writing techniques. Students will develop a deeper understanding of the process for creation of legal precedent through opinions, including the impact of standards of review and procedural posture. The course will cover the common forms of judicial writing. With individualized feedback, students will develop precision in self-editing and revision skills and will practice producing concise, clear, and accessible written work.

Effective: Spring 2014

Prerequisite:

SKILS 969 Legal Journalism (2) Students will learn journalistic writing styles to prepare them to contribute accurate and accessible legal information and analysis to general interest and legal trade media as legal analysts or professional journalists. For legal trade publication work, the emphasis will be on readability and appropriate depth for a professional audience. Students will learn journalistic standards of truth and interviewing techniques for print and broadcast media. Live broadcast techniques, including live interview hosting, will also be covered.

Effective: Summer 2013

SKILS 971 Scholarly Writing Workshop (1) This course provides students with the framework for developing a thesis, conducting research, and producing a significant scholarly paper. In an interactive workshop setting, students will discuss progress and receive feedback from faculty and fellow students on: (1) identification and refinement of a thesis; (2) developing and implementing a research plan; (3) appropriate use of authority, including legal citation form; and (4) developing and refining a critical perspective and scholarly argument. Students must be concurrently enrolled in a seminar (SEM) course or an independent study (PERSP 996) of at least two credit hours.

Effective: Spring 2014

Concurrent: SEM course at least 2 credits or PERSP 996 for at least 2 credits

SKILS 972 Mediation of Environmental and Public Conflicts (3) This course focuses on mediation and dispute resolution of complex public issues, particularly in the environmental and natural resource arena.

Effective: Spring 2014

SKILS 982 Pennsylvania Practice (2) This class will acquaint the student with civil procedure at the state trial court level. Using Pennsylvania as the model, the course traces a civil case from service of process to trial and includes discussion of venue, pleadings, discovery and dispositive motions. The course also deals with other important aspects of civil practice including statutes of limitation, comparative negligence, compulsory arbitration and settlement.

Effective: Summer 2011
SKILLS 983 Writing and Editing for Lawyers (2) The goal of the course is to improve the legal reading, writing, and editing skills of students. The course will reinforce rules of grammar, punctuation, sentence structure, usage, voice, tone, style, and organization. The emphasis will be on the application of these rules in the context of legal writing. Students will learn how to craft sentences that are accurate, brief, clear, precise, and sometimes persuasive.
Effective: Fall 2013

SKILLS 986 Remedies (3) Remedial devices focusing on the theory and application of legal and equitable relief are analyzed comparatively. The course covers the procedural and substantive law elements of damages, specific performance, injunctions, declaratory judgments, reformation, rescission, and restitution.
Effective: Fall 1998

SKILLS 987 Writing Workshop (2) The goal of this course is to improve the legal writing and editing skills of students. By engaging in the process of directed writing and editing, students will learn to write clearly, succinctly, precisely, and sometimes persuasively. Emphasis will be given to organization and integration of procedural and substantive aspects of cases.
Effective: Summer 2011
Prerequisite:

SKILLS 988 Legal Problems of Indigents (2) This course is an introduction to law relevant to assisting people in poverty including law addressing public benefits, housing, consumer issues, custody, domestic violence, and private rights of action. It will also address realities of existence for people in poverty and consider historical and policy perspectives. Finally, the course will focus on some practical skills, and students will participate in mock hearings and/or mock interviews.
Effective: Spring 2011

SKILLS 997 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2008

SKILLS 997A Appellate Advocacy (3) The purpose of this course is to provide students with skills training in writing, analysis, and oral argument in the context of appellate practice. Students will follow an actual securities enforcement action appealed to, and resolved by, the U.S. Supreme Court (June 2013) from the district court to the D.C. Court of Appeals to the U.S. Supreme Court. Using the actual case materials, we will examine all of the major strategic and tactical decisions, from both the U.S. Securities and Exchange Commission's and the defendant's perspective, in all phases of the case, including the complaint, motion to dismiss, and appeals to the D.C. Cour of Appeals and the Supreme Court, including the briefs and oral argument.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

SKILLS 997A Scientific Evidence (3) This course examines the legal principles governing the use of scientific evidence in criminal and civil litigation. Aspects of the Fourth, Fifth, and Sixth Amendments as they apply to scientific evidence in criminal cases will be considered. The course also introduces the basic scientific and statistical underpinnings of expert testimony from the physical, biological, medical, behavioral, and social sciences. A series of litigation-related writing exercises and occasional problem sets will be assigned. Depending on class size, oral presentations or trial or appellate practice simulations also may be part of the course.
Prerequisite:

SKILLS 997B Civil Pre-Trial Practice and Advocacy (3) Disposition before trial occurs in the vast majority of civil lawsuits (e.g., 98% of federal cases) which makes pre-trial advocacy the dominant part of legal practice at most law firms and agencies. Prior to entering the courtroom, most junior attorneys will cut their legal teeth on pre-trial activities and motions practice. This course will combine elements of core curriculum courses, legal writing, and experiential learning by engagin students with a robust fact pattern requiring research and analysis leading to written pre-trial advocacy including pleadings, discovery and disclosures, motions (procedural, substantive and dispositive), negotiation and settlement documents. Paralleling a case through complex civil litigation, this "in-context" course will provoke students with insight into the process of preparing a case for trial or, more likely, bettering the client's position for a pre-trial disposition.

SKILLS 997C Spanish and Bilingual Communication in Law Practice (2) Designed for students who want to improve their ability to understand and communicate with Spanish-speaking clients and colleagues in legal settings. Includes practical reading, speaking, and writing exercises using real documents from Spanish-speaking courts, attorneys, and statutes. Encompasses an introduction to research resources, citation norms, and other tools related to practicing law in Spanish, and includes discussions of regional variations in law, ethics, and language in the Spanish legal world. Guest speakers or other contact with native Spanish-speakers in the profession will also be scheduled.

Management (MANGT)

MANGT 510 Project Management (3) A problem-based, interdisciplinary course in project management skills and techniques needed to manage projects in a modern business environment. Effective: Fall 2000
Prerequisite:

MANGT 515 Cost and Value Management (3) A problem-based course that emphasizes project cost control and teaches students to apply techniques to control projects in business. Effective: Summer 2002
Prerequisite:

MANGT 520 Planning and Resource Management (3) A problem-based course that addresses techniques for planning the project development process, including securing resources and resource management. Effective: Summer 2002
Prerequisite:

MANGT 525 Commercial Law and Project Procurement (3) A problem-based course that addresses elements of commercial law and procurement practices and their implications for project management. Effective: Spring 2005
Prerequisite:

MANGT 531 Organizations (3) An examination of organizational theories and processes of organizational behavior. Effective: Spring 1986

MANGT 535 Interpersonal and Group Behavior (3) A human relations-based course that identifies the significant challenges that managing individuals on project teams represents. Effective: Summer 2003
Prerequisite:

MANGT 540 Strategy: Corporate, Business and Project (3) A problem-based course that focuses on linking projects to overall corporate strategy. Effective: Summer 2003
Prerequisite:

MANGT 545 Project Team Leadership (3) This course focuses on development of team leadership skills and the ability to solve team problems related to human interaction. Effective: Summer 2010
Prerequisite:

MANGT 575 Management of Projects (3) A problem-based capstone course that integrates the themes necessary to appreciate the overall challenge of project management. Effective: Summer 2003
Prerequisite:

MANGT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

MANGT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 1987

Last Import from UCM: May 24, 2014 3:00 AM
Management (MGMT)

MGMT 400 Organization Development (3) A study of organizational change and methodologies related with change and improvement. Examination of planned change on processes, strategies, people and culture in organizations. Effective: Spring 2008
Prerequisite:

MGMT 401 Contemporary Issues in Management (3) Advanced treatment of topics of current managerial significance. Issues examined will differ by instructor, section, and semester. Consult departmental office. Effective: Spring 2008
Prerequisite:

MGMT 402 Experiences in Organizational Relations (3) An experiential approach to study of behavior in organizations, applying concepts and theories of management to interpersonal situations. Effective: Spring 2008
Prerequisite:

MGMT 409 Project Management for Engineers (3) The course provides a real-time experience to students in engineering and engineering technology in project management with a focus on leadership behavior and decision making. Effective: Spring 2008
Prerequisite:

MGMT 410 Project Management (3) A problem-based, interdisciplinary course in project management skills and techniques needed to manage projects in a modern business environment. Effective: Spring 2008
Prerequisite:

MGMT 415 Project Portfolio Management and Organizations (3) An advanced course in project management focusing on portfolio planning and control within the context of specific organizational challenges. Effective: Summer 2013
Prerequisite:

MGMT 418 Project Planning and Resource Management (3) Advanced course in project management focusing on a more in-depth approach to project planning and scheduling and resource management. Effective: Summer 2013
Prerequisite:

MGMT 420 Negotiation and Conflict Management (3) An exploration of the sources of interpersonal conflict and strategies of resolution in the managerial context. Effective: Fall 2010
Prerequisite:

MGMT 424 Interpersonal Relationships in Organizations (3) Developing individual skills in interpersonal and group settings and experience-based and conceptual training in relating effectively to other people. Effective: Spring 2008
Prerequisite:

MGMT 425 (IST 425, ENGR 425) New Venture Creation (3) Via problem-based learning, teams define new business ventures to meet current market needs, develop business plans, and present to investors. Effective: Spring 2011
Prerequisite:

MGMT 426 (ENGR 426, IST 426) Invention Commercialization (3) Working with Penn State inventions selected by the Intellectual Property Office, student teams define an optimum commercialization path each technology. Effective: Spring 2011
Prerequisite:

MGMT 427 Managing an Entrepreneurial Start-Up Company (3) Exploration of the tensions and experiences of starting and growing a new company. Effective: Spring 2011
Prerequisite:

MGMT 431 Entrepreneurship and Small Business Management (3) Entrepreneurship, new ventures, and management of small firms. Effective: Spring 2008
Prerequisite:

MGMT 432 Small Business Field Study (3) Supervised field study with a small firm. Effective: Spring 2008
Prerequisite:

MGMT 433 Leadership and Team Building (3) Team-based learning approach to developing conceptual knowledge, skills sets, and personal competencies needed for leading and managing organizations. Effective: Spring 2008
Prerequisite:

MGMT 440 Advanced Human Resource Management (3) In depth study of human resource management and personnel administration functions and processes.

The Pennsylvania State University
Effective: Spring 2008  
Prerequisite:

MGMT 441 Organizational Staffing and Development (3) This course focuses on the skills and methods managers need to manage staffing and development activities in organizations. 
Effective: Spring 2011 
Prerequisite:

MGMT 443 Performance Management (3) This course focuses on skills and methods managers need to enhance the contribution of employees to organizational performance and effectiveness. 
Effective: Spring 2011 
Prerequisite:

MGMT 445 (US) Managing Differences in Organizations (3) This course focuses on developing knowledge and skills for dealing with demographic, functional, occupational and identity-based differences within and among organizations.  
Effective: Spring 2008 Ending: Fall 2014 
Prerequisite:

MGMT 445 (US) Managing a Diverse Workforce (3) This course focuses on developing knowledge and skills for managing demographic, functional, occupational and identity-based differences within and among organizations. 
Effective: Spring 2015 Future: Spring 2015 
Prerequisite:

MGMT 450 Labor Management Relations (3) Study of the key concepts and processes involved in current American labor/management relations. 
Effective: Spring 2008 
Prerequisite:

MGMT 451W Business, Ethics, and Society (3) Advanced examination of social, ethical, legal, economic, equity, environmental, public policy, and political influences on managerial decisions and strategies. 
Effective: Spring 2004 Ending: Fall 2014 
Prerequisite:

MGMT 451W Business, Ethics, and Society (3) Advanced examination of social, ethical, legal, economic, equity, environmental, public policy, and political influences on managerial decisions and strategies. 
Effective: Spring 2015 Future: Spring 2015 
Prerequisite:

MGMT 453 Creativity and Innovation (3) Analysis of the process of innovation in organizations and of how creativity and other variables influence the process. 
Effective: Summer 2007 
Prerequisite:

MGMT 461 IL International Management (3) Examines issues of nations and cultures including motivation, communication, negotiation, leadership, ethics and social responsibility, and women in management. 
Effective: Spring 2008 
Prerequisite:

MGMT 466 Organizational Learning and Knowledge Management (3) Examination of the social processes through which organizations continuously develop, acquire, interpret, and apply information and knowledge for performance enhancement and continuous improvement. 
Effective: Spring 2008 
Prerequisite:

MGMT 471 Strategic Management (3) Issues that influence the competitive performance of the firm are identified and examined. 
Effective: Spring 2004 
Prerequisite:

MGMT 471W Strategic Management and Business Policy (3) Study of strategic management and business policy formulation and implementation processes. 
Effective: Spring 2008 
Prerequisite:

MGMT 475W Strategic Product Development (3) Study of an organization, industry, and evaluation of the introduction to a new product. Preparation of proposal for industry product. 
Effective: Summer 2008 
Prerequisite:

MGMT 476 Product Realization Capstone (3) Study of an organization, industry, and evaluation of the introduction of a new product. Preparation of proposal for industry product. 
Effective: Summer 2008 
Prerequisite:

MGMT 483 Compliance and Fairness in Organizations (3) Compliance with employment laws with respect to managing human resources and fair treatment in employer-employee relationships. 
Effective: Summer 2007 
Prerequisite:

MGMT 489 Seminar in Management (3) A capstone course in management for students of high academic achievement. Emphasis on in-depth research of current interest.
Effective: Spring 2008

Prerequisite:

MGMT 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2003

MGMT 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

MGMT 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008

Prerequisite:

MGMT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1989

MGMT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1989

MGMT 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2003

MGMT 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

MGMT 501 Behavioral Science in Business (3) Application of behavioral science concepts and analytical methods to problems in business organizations. Analysis of administrative behavior and decision making.
Effective: Fall 1989

MGMT 507 Positive Organizational Behavior and Wellbeing (3) Exploration of positive organizational behavior and wellbeing concepts for developing the "human sustainability" factor in organizations.
Effective: Spring 2013

MGMT 520 Team Facilitation (2) To gain an in-depth understanding of team dynamics and develop skills for facilitating teams to achieve effective performance.
Effective: Summer 2002

MGMT 521 Complex Negotiations (2) Develop concepts and strategies for analyzing and conducting multiparty negotiations.
Effective: Spring 2003

MGMT 523 Organizational Change: Theory and Practice (3) Analysis of research, theory, and practice in dynamics of organizational change. Research literature reviewed for evaluation of concepts and methods.
Effective: Fall 1989

MGMT 528 Seminar in Organizational Behavior (3) Current theoretical and research issues applicable to the study of individual and group behavior within organizational settings.
Effective: Fall 1989

MGMT 531 Strategy Implementation and Organizational Change (2) Assess gap between current organization and that needed to implement new strategy or execute change; identify process for closing gap.
Effective: Summer 2002

MGMT 534 Leadership and Change in Organizations (2) Understanding yourself as a leader, particularly as a leader in organizations and especially a leader of organizations undergoing change.
Effective: Summer 2008

MGMT 535 The Upper Echelons Perspective: Theory and Research (3) To learn to evaluate and conduct research on top executives and their influence on organizational strategy, structure and performance.
Effective: Summer 2004

Prerequisite:

The Pennsylvania State University
MGMT 538 Seminar in Organization Theory (3) Current theoretical and research issues applicable to the study of design and management of complex organizations.
Effective: Fall 1989

MGMT 539 Seminar in Organizational Social Networks (3) Learn theory, concepts and methods for research on organizational social networks.
Effective: Summer 2004
Prerequisite:

MGMT 541 Human Resource Management (3) An in-depth examination of the strategic planning and implementation of human resource management, including staffing, development, appraisal, and rewards.
Effective: Summer 1990

MGMT 551 Growth and Innovation Strategy (2) Identify opportunities for growth and profitability through technological and organizational innovations and market independently or with strategic partners.
Effective: Summer 2002
Prerequisite:

MGMT 558 Seminar in Organizational Decision Making (3) An in-depth examination of decision making, including bounded rationality, political behaviors, choice and post-decision processes.
Effective: Spring 1990

MGMT 561 Global Strategy and Organization (1-3) Course focuses on three major aspects of international business: competitive strategy, organization design, and management processes.
Effective: Fall 2008
Prerequisite:

MGMT 565 Power and Influence (2) Provides a pragmatic and ethical framework for analyzing the sources of power in organizations and its effective use.
Effective: Summer 2008

MGMT 571 Strategic Management (3) This capstone course provides analysis and application of strategy concepts and techniques in business organizations.
Effective: Spring 2002
Prerequisite:

MGMT 573 Corporate Innovation Strategies (3) Survey of managerial issues involved in formulating and implementing a corporate innovation or technology strategy.
Effective: Summer 1991

MGMT 578 Seminar in Corporate Strategy (3) Current theoretical and research issues applicable to the study of corporate strategy formulation and implementation.
Effective: Fall 1989

MGMT 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1989

MGMT 591 Organizational Research Design (3) Experience in designing research for organizational science, to maximize the validity of eventual conclusions; methodological choices, constraints, and compromises (tradesoffs).
Effective: Summer 2004
Prerequisite:

MGMT 592 Qualitative Research Methods (3) This course provides students with an introduction to and experience with qualitative research methods employed in organizational contexts.
Effective: Summer 2004
Prerequisite:

MGMT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1989

MGMT 597 Special Topics (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1989

MGMT 597A Developing Global Leaders (3) The increase in cultural diversity and globalization in business require managers to develop cross-cultural competence. This course develops students' global understanding for working, following, and leading in European organizations. This course will help managers and organizational leaders make sense of French, German, Swiss, and other European cultures in order to prepare global leaders for work in highly diverse, intercultural environments. It explores how human resource management processes and organizational dynamics in...
European countries such as France, Germany and Switzerland differ from practices in the United States. The goal is to better understand how culture impacts the whole management process when working in Europe. Several case studies-describing both successful and unsuccessful practices - will be presented.

Effective: Summer 2014 Ending: Summer 2014

MGMT 597A Motivation Theories for Management Research (3) Motivation theories are unparalleled in scope, encompassing virtually all behavior (as well as many attitudes and emotions) of interest to management researchers and practitioners. Leaders must motivate followers, team members must motivate peers, and individuals even need to motivate themselves to strive for and ultimately achieve outcomes. The role of this course is to familiarize students with relevant management and psychological theories of motivation, focused primarily on motivation at the individual level (i.e., answering the question of why individuals behave the way they do, but not questions on why teams/organizations behave the way they do). Each week we will cover a single theory (e.g., regulatory focus theory; social exchange theory; self-determination theory) and recent empirical articles that have applied the theory to gain insight into various management research topics.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

MGMT 597B Team Facilitation Lab (1-2) Lab to work with 1st Year Teams.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

MGMT 599 IL FOREIGN STUDY--MANAGEMENT (1-12) Full-yime graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite:

MGMT 600 Thesis Research (1-15) No description.
Effective: Fall 1989

MGMT 601 PH.D. DISSERTATION FULL-TIME (0) NO DESCRIPTION.
Effective: Summer 1991

MGMT 602 SUPERVISED EXPERIENCE IN COLLEGE TEACHING (1-3 PER SEMESTER, MAXIMUM OF 6) COURSE INVOLVES SERVING AS A TEACHING ASSISTANT IN A SPECIFIED UNDERGRADUATE COURSE UNDER THE SUPERVISION OF A FACULTY MEMBER. REQUIRES PLANNING, DISCUSSION, AND APPLICATION OF ITS APPROACH.
Effective: Spring 1991

MGMT 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1989

MGMT 611 PH.D. DISSERTATION PART-TIME (0) NO DESCRIPTION.
Effective: Summer 1991

Last Import from UCM: May 24, 2014 3:00 AM
Management Information Systems (M I S)

M I S 538 Decision Support Systems (3) Analysis of information requirements for planning, decision making, and performance measurement in organizations.
Effective: Spring 2006
Prerequisite:

M I S 539 Management of MIS (3) Organizational issues in managing computer-based information systems.
Effective: Spring 2006
Prerequisite:

M I S 590 Management Information Systems Colloquium (1-3) This seminar will deal with current research areas dealing with the development and management of management information systems within organizations.
Effective: Spring 2006
Prerequisite:

M I S 596 Individual Studies (1-9) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

M I S 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

M I S 599 (IL) Foreign Study--Management and Information Systems (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Management Science and Information Systems (MS&IS)

MS&IS 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1998

MS&IS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1998

MS&IS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1998

MS&IS 599 (IL) Foreign Study--Management Science and Information Systems (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.

Management-CI (MNGMT)

MNGMT 505 Managing Human Resources (3) Issues in human resource management including recruitment and selection, employee development, performance management, employee and labor relations, and employee safety. Effective: Spring 2001
Prerequisite:

MNGMT 511 Organizational Behavior (2) Individual and group behavior in organizations; motivation, performance and rewards, job satisfaction, decision processes, conflict resolution; job and organizational design. Effective: Summer 2004
Prerequisite:

MNGMT 514 Organizational Learning (2) Structural, strategic, technical, and ecological approaches, including institutional, resource dependence, and discontinuous improvement models; evaluating and institutionalizing learning. Effective: Summer 2004
Prerequisite:

MNGMT 515 (P ADM 515) Labor Management Relations (3) Labor relations issues; collective bargaining agreement, negotiations, and administration; legal framework of collective bargaining; labor relations in larger social context. Effective: Fall 2011
Prerequisite:

MNGMT 520 Organizational Transformation (3) Treats methods, practices, and theory of organizational empowerment, quality management, process redesign, re-engineering, restructuring, and planned change. Effective: Spring 2005
Prerequisite:

MNGMT 522 Operations and Supply Chain Management (3) Design, development, management of manufacturing systems in a supply chain context; tools, techniques, and applications at tactical and strategic levels. Effective: Spring 2005
Prerequisite:

MNGMT 523 Service Operations Management (3) Design, development, and management of service systems. Tools and techniques for non-manufacturing operations at tactical and strategic levels. Effective: Summer 2004
Prerequisite:

MNGMT 545 Employment Law for Business (3) The regulation of the employer-employee relationship, discrimination in employment, and the employment environment with respect to managing human resources. Effective: Summer 2004
Prerequisite:

MNGMT 570 Leadership Development (3) Experientially based skill-building for development of managerial and leadership competencies. Effective: Spring 2012

MNGMT 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 2009

MNGMT 596 Individual studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1999

MNGMT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 1999

MNGMT 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 2007

MNGMT 897A Fixed Income (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 2014 Ending: Summer 2014

Last Import from UCM: May 24, 2014 3:00 AM
Manufacturing Sys Eng (MFGSE)

MFGSE 520 Analytical Techniques in Manufacturing and Design (3) Applied statistics, QC, SPC, design for experiments, six sigma, design tolerance and process optimization.
Effective: Fall 2000
Prerequisite:

MFGSE 550 Design for Manufacturability I (3) Introduction to DFM, a review of enabling technologies and the systematic use of quality tools during the DFM process.
Effective: Fall 2000
Prerequisite:

MFGSE 580 Masters Project (1-3) Manufacturing capstone or technology study utilizing both manufacturing and management skills.
Effective: Fall 2000
Prerequisite:

MFGSE 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2000

MFGSE 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2000

Last Import from UCM: May 24, 2014 3:00 AM
Marketing (MKTG)

MKTG 410 Personal Selling (3) Principles underlying the selling process and practical application of these principles to selling situations.
Effective: Spring 2008
Prerequisite:

MKTG 420 Direct Marketing (3) Applies principles of marketing management to the direct marketing of products by mail, telephone, print, and broadcast media.
Effective: Spring 2002
Prerequisite:

MKTG 422 Advertising and Sales Promotion Management (3) Perspectives and models of the key decisions involved in managing advertising and sales promotion campaigns.
Effective: Spring 2008
Prerequisite:

MKTG 426 Business Marketing (3) Developing marketing strategies and programs. The course emphasizes the special nature of the business and organizational markets.
Effective: Spring 2002
Prerequisite:

MKTG 428 Advanced Sales Management (3) Approaches to planning, organizing, staffing, training, directing, and controlling the sales force in support of marketing objectives.
Effective: Spring 2008
Prerequisite:

MKTG 437 Advanced Retailing and Merchandise Management (3) Analyzing planning and controlling the retail merchandising effort, including procurement, resource selection, vendor relations, product presentation, inventory control.
Effective: Spring 2002
Prerequisite:

MKTG 440 Services Marketing (3) Marketing theory and methods applied to profit and nonprofit service industries such as health care, finance, transportation, tourism, arts and consulting.
Effective: Spring 2002
Prerequisite:

MKTG 441 Sustainability in Marketing Strategy (3) This course examines sustainability in marketing strategy, including real-world applications, green solutions, and using marketing principles to solve social issues.
Effective: Spring 2014
Prerequisite:

MKTG 443 Sports Marketing (3) This course will focus on how companies develop, execute and measure marketing strategies and tactics to use sports teams, families, leagues and other organizations to market their products and services domestically and internationally to consumers and business partners. The course will examine the marketing strategies employed by sports teams and leagues.
Effective: Summer 2010
Prerequisite:

MKTG 445 (IL) Global Marketing (3) Role of international marketing in the global environment; political, economic, geographic, historical, cultural conditions; developing and implementing international marketing strategies.
Effective: Spring 2008
Prerequisite:

MKTG 450W Marketing Strategy (3) Market-oriented problems of the firm; identification and selection of market opportunities; formulation of competitive strategies; marketing policies and programs.
Effective: Spring 2008
Prerequisite:

MKTG 475 Innovation and Product Management (3) This course is an application-oriented interdisciplinary course on new product development concepts, and innovation management.
Effective: Spring 2011
Prerequisite:

MKTG 476 Sales Management (3) Application of modern management principles to field sales force planning, organization, and administration; selection, training, and compensation plans.
Effective: Spring 2008
Prerequisite:

MKTG 478 Services Marketing Management (3) Conceptual understanding of services and the analytical tools that are used in solving strategic services marketing problems.
Effective: Spring 2008
Prerequisite:

MKTG 480 Intermediate Social Media Marketing (3) Social Media Marketing tools, techniques, and strategies to build brands and customers.
MKTG 485 Business-to-Business Marketing (3) Application of marketing principles to commercial enterprises, industrial firms, government, and other non-profit institutions.

MKTG 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

MKTG 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

MKTG 495 Internship (1-18) Supervised off campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

MKTG 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

MKTG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

MKTG 497A Sports Business (3) This course will introduce you to the major marketing and business activities of the sports industry. Emphasis will be placed on understanding the unique aspects of the sports product that is being marketed and on the sports consumer to whom the product is targeted. The course will cover a wide range of marketing concepts in international, intercollegiate, and men's and women's professional sports.

MKTG 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

MKTG 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

MKTG 500 Marketing Management (3) Development of a marketing management focus, including market analysis, competition analysis, and decisions in pricing, product, promotion, and distribution channels.

MKTG 512 Consumer and Market Behavior (3) Application of buyer behavior concepts from the behavioral sciences, including utility, culture, life cycle, personality, attitudes, learning, decision making.

MKTG 513 Market Research (3) User-oriented analysis of marketing research process, including problem definition, design, data collection, data analysis, interpretation, and presentation.

MKTG 515 Business Marketing (3) Study of marketing of goods and services to business, institutions, and government. Focus on organizational buying, market planning and analysis, and development of marketing mix.

MKTG 516 Product Development and Management (3) Marketing and product strategies for new and old products are covered in this course.

MKTG 518 Global Marketing (3) Role of international marketing in the global business environment; development of marketing plans and implementation strategies under differing socio-economic conditions.

MKTG 521 Scientific Marketing Analysis and Implementation (2) An introduction to the tools used, rationale for, and the practice and implementation of a variety of current marketing techniques.
MKTG 532 Brand Management (2) To examine and understand the processes of building, designing, measuring, and maintaining brand equity.
Effective: Summer 2002
Prerequisite:

MKTG 533 Business Marketing (2) Study of marketing of goods and services to business, institutions, and government.
Effective: Summer 2002
Prerequisite:

MKTG 534 Integrated Market Communications (2) Provides the frameworks for thinking, tools, language, and skills for strategic management of integrated market communications.
Effective: Summer 2002
Prerequisite:

MKTG 541 Consumer Behavior (2) Introduce theories and concepts from psychology, sociology, economics, and other disciplines that are useful in understanding and marketing to consumers.
Effective: Summer 2002
Prerequisite:

MKTG 542 New Product Development and Management (2) Identify business opportunity, understand potential customer needs, and develop a new product from concept to virtual prototype.
Effective: Summer 2002
Prerequisite:

MKTG 543 (EBIZ 543) e-Marketing (2) Using the Internet and related technologies to enhance and transform marketing functions and processes.
Effective: Spring 2012

MKTG 551 Theoretical Perspectives on Buyer Behavior (3) Review of marketing and social sciences research related to understanding consumer and market behavior.
Effective: Fall 1983

MKTG 554 Research Methods in Marketing (3) Philosophical, methodological, and measurement issues involved in designing, conducting, analyzing, and interpreting research in marketing.
Effective: Fall 1983

MKTG 555 Marketing Models (3) Topics in the model building approach to marketing decision making, focusing on current research issues.
Effective: Spring 2012

MKTG 556 Marketing Management (3) To explore the conceptual and applied dimensions of marketing management.
Effective: Summer 2008
Prerequisite: Concurrent: MKTG 555

MKTG 571 Marketing Strategy (2) Examines business-level marketing issues and solutions to problems in competitive business environments.
Effective: Summer 2002
Prerequisite:

MKTG 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2008

MKTG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

MKTG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

MKTG 597A Bayesian Statistics and Marketing (3) In this course students will learn the basic concepts, tools and techniques needed to run standard Bayesian data analysis with a focus on business applications, in particular, marketing. The concept of hierarchical Bayesian analysis and Markov Chain Monte Carlo methods are emphasized.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

MKTG 599 (IL) Foreign Study--Marketing (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite:
MKTG 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

MKTG 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 1983

MKTG 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description available.
Effective: Fall 1982

MKTG 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Marketing-Bd (MRKTG)

MRKTG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

MRKTG 597 special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 1987

Last Import from UCM: May 24, 2014 3:00 AM
Marketing-Cl (MRKT)

MRKT 513 Marketing Management: Structures and Processes (2) This course examines concepts, techniques, and developments of strategic marketing plans and programs within domestic and international market environments. Effective: Summer 2004
Prerequisite:

MRKT 514 Marketing Management: Relationships and Institutions (2) Examination of relationships formation with customers and distribution channels; traditional and on-line marketing issues. Effective: Summer 2004
Prerequisite:

MRKT 570 Marketing Strategy and Planning (3) Analysis of management’s marketing problems, including marketing analyses, pricing, channels of distribution, promotion, competition, product strategies, and marketing research. Effective: Spring 2011
Prerequisite:

MRKT 571 Consumer Behavior (3) Factors influencing buyer behavior; contributions of the behavioral sciences to the study of selected phenomena. Effective: Spring 2005
Prerequisite:

MRKT 572 Marketing Research (3) Management information needs, evaluation of research proposals and findings, methods of data collection and analysis, integration of research and decisions. Effective: Spring 2005
Prerequisite:

MRKT 585 Business-to-Business Marketing (3) Marketing of products and services to other businesses and organizations including strategy, planning, research, communications, pricing, distribution, and global issues. Effective: Spring 2005
Prerequisite:

MRKT 586 Internet Marketing (3) Concepts, techniques, and applications of Internet marketing; buyer behavior; Web site design; marketing plans; legal, ethical, and international environments. Effective: Summer 2004
Prerequisite:

MRKT 587 Global Marketing (3) Exploration of strategic marketing planning concepts and techniques from a global perspective within diverse overseas market environments. Effective: Spring 2005
Prerequisite:

MRKT 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 2009

MRKT 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1999

MRKT 597 Special topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Summer 1999

Last Import from UCM: May 24, 2014 3:00 AM
Materials (MATL)

MATL 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1992

MATL 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1992

MATL 597 Special Topics (1-9) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1991

MATL 600 Thesis Research (1-15) No description.
Effective: Spring 1992

MATL 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1992

MATL 602 Supervised Experience in College Teaching (1-3 PER SEMESTER, MAXIMUM OF 6) NO DESCRIPTION.
Effective: Summer 1991

MATL 610 Thesis Research Off Campus (1-15) No description.
Effective: Spring 1992

MATL 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 1992

Last Import from UCM: May 24, 2014 3:00 AM
**Materials Science and Engineering (MATSE)**

**MATSE 400 Crystal Chemistry** (3) Principles of crystal chemistry applied to structures, structural defects and properties of organic, inorganic, intermetallic, and metallic crystals.
- Effective: Summer 2007
- Prerequisite:

**MATSE 401 Thermodynamics of Materials** (3) Review of equilibrium thermodynamics and applications to metallurgical and material systems.
- Effective: Fall 2012
- Prerequisite:

**MATSE 402 Materials Process Kinetics** (3) A treatment of process kinetics including chemical reaction kinetics and momentum, energy and mass transport.
- Effective: Fall 2012
- Prerequisite:

**MATSE 403 (BIOE 443) Biomedical Materials** (3) Describe properties of materials and composites and their in vivo interactions.
- Effective: Spring 2007 Ending: Summer 2014
- Prerequisite:

**MATSE 403 (BME 443) Biomedical Materials** (3) Describe properties of materials and composites and their in vivo interactions.
- Effective: Fall 2014 Future: Fall 2014
- Prerequisite:

**MATSE 404 (IL) (BIOE 444) Surfaces and the Biological Response to Materials** (3) Focus is on the special properties of surfaces as an important causative and mediating agent in the biological response to materials.
- Effective: Summer 2007 Ending: Fall 2014
- Prerequisite:

**MATSE 404 (IL) (BME 444) Surfaces and the Biological Response to Materials** (3) Focus is on the special properties of surfaces as an important causative and mediating agent in the biological response to materials.
- Prerequisite:

**MATSE 409 (NUC E 409) Nuclear Materials** (3) Nuclear reactor materials: relationship between changes in material properties and microstructural evolution of nuclear cladding and fuel under irradiation.
- Effective: Summer 2002
- Prerequisite:

**MATSE 410 Phase Relations in Materials Systems** (3) Phase rule; construction and interpretations of equilibrium diagrams; importance of nonequilibrium in materials.
- Effective: Fall 2006 Ending: Summer 2014
- Prerequisite: Concurrent: MATSE 201 MATSE 400 MATSE 430

**MATSE 411 Processing of Ceramics** (3) Principles of ceramic processing, including powder preparation and characterization, forming operations, and the basic phenomena underlying these operations.
- Effective: Fall 2005
- Prerequisite:

**MATSE 412 Thermal Properties of Materials** (3) Generation of high temperatures, measurement of temperature, heat transfer and furnace design, thermal stability of ceramic materials, applied thermodynamics.
- Effective: Fall 2005 Ending: Summer 2014
- Prerequisite: Concurrent: MATSE 401

**MATSE 412 Thermal Properties of Materials** (3) Generation of high temperatures, measurement of temperature, heat transfer and furnace design, thermal stability of ceramic materials, applied thermodynamics.
- Effective: Fall 2014 Future: Fall 2014
- Prerequisite: Concurrent: MATSE 401

**MATSE 413 Solid-State Materials** (3) Structures of metallic, ionic, and covalent solids, amorphous materials, and surfaces; electronic structure; electronic properties of solids and their manipulation.
- Effective: Spring 2001
- Prerequisite:

**MATSE 415 Introduction to Glass Science** (3) Composition, melting, fabrication, properties, and uses of glass; combinations of glass with metals and other materials.
- Effective: Summer 2002
- Prerequisite:

**MATSE 417 (E SC 417) Electrical and Magnetic Properties** (3) Electrical conductivity, dielectric properties, piezoelectric...
MATSE 417 (E SC 417) **Electrical and Magnetic Properties** (3) Electrical conductivity, dielectric properties, piezoelectric and ferroelectric phenomena; magnetic properties of ceramics.

**Effective:** Spring 2007 **Ending:** Fall 2014

**Prerequisite:**

MATSE 419 **Computational Materials Science and Engineering** (3) Introduction to computational material science and engineering. Overview of the computational methods for materials, from atomistic to the continuum scale.

**Effective:** Spring 2015 **Future:** Spring 2015

**Prerequisite:**

MATSE 421 **Corrosion Engineering** (3) Industrial forms of corrosion and preventive methods, and their description in terms of basic thermodynamic and kinetic considerations.

**Effective:** Summer 2007

**Prerequisite:**

MATSE 422 **Thermochemical Processing** (3) Physico-chemical aspects of high temperature extraction and processing of metals and alloys. Design and evaluation of processes and process options.

**Effective:** Summer 2002

**Prerequisite:**

MATSE 424 **Materials Selection and Design** (1) Introduction to the selection and design of materials for structural applications.

**Effective:** Summer 2002

**Prerequisite:**

MATSE 425 **Processing of Metals** (3) Modern methods of shaping metals in liquid and solid states: casting, joining, powder and deformation processing. Design of new technology.

**Effective:** Fall 2006

**Prerequisite:**

MATSE 426 (MN PR 426) **Aqueous Processing** (3) A study of the chemical and engineering principles pertinent to metal processing in aqueous systems: hydrometallurgical extraction, plating, materials preparation.

**Effective:** Fall 2009

**Prerequisite:**

MATSE 430 **Materials Characterization** (3) Elements of crystallography and the characterization of crystalline and non-crystalline materials using x-ray diffraction, electron microscopic, and other instrumental techniques.

**Effective:** Spring 2001 **Ending:** Summer 2014

**Prerequisite:**

MATSE 430 **Materials Characterization** (3) Elements of crystallography and the characterization of crystalline and non-crystalline materials using x-ray diffraction, electron microscopic, and other instrumental techniques.

**Effective:** Fall 2014 **Future:** Fall 2014

**Prerequisite:**

**Effective:** Spring 1996

**Prerequisite:**

MATSE 436 **Mechanical Properties of Materials** (3) Fundamental relationships between structure and mechanical behavior of materials.

**Effective:** Fall 2012

**Prerequisite:**

MATSE 440 (E MCH 440) **Nondestructive Evaluation of Flaws** (3) Methods and limitations of nondestructive evaluation of mechanical flaws; optical, acoustical, electromagnetic, x-ray, radiography, thermography, and dye techniques.

**Effective:** Spring 2008

**Prerequisite:**

MATSE 441 **Polymeric Materials I** (3) Manufacture of industrially significant polymers together with discussion of their major chemical, physical, and mechanical properties.

**Effective:** Fall 2012

**Prerequisite:**

MATSE 443 **Introduction to the Materials Science of Polymers** (3) Introduction to the nature and structure of high polymers. Characteristics of polymers and polymer systems.

**Effective:** Fall 2012

**Prerequisite:**

**Effective:** Spring 2003

**Prerequisite:**

MATSE 445 **Thermodynamics, Microstructure, and Characterization of Polymers** (3) The properties of individual polymer chains. Theoretical and experimental techniques pertaining to the characterization of polymeric microstructure.
Prerequisite:

MATSE 446 Mechanical and Electrical Properties of Polymers and Composites (3) The mechanical (viscoelastic) and electric properties of polymers and poly-based composites. Effective: Spring 2003 Ending: Summer 2014
Prerequisite:

MATSE 446 Mechanical and Electrical Properties of Polymers and Composites (3) The mechanical (viscoelastic) and electric properties of polymers and poly-based composites. Effective: Fall 2014 Future: Fall 2014
Prerequisite:

MATSE 447 Rheology and Processing of Polymers (3) This course deals with the fluid mechanics, rheology, and processing of polymeric materials. Effective: Fall 2002 Ending: Summer 2014
Prerequisite:

MATSE 447 Rheology and Processing of Polymers (3) This course deals with the fluid mechanics, rheology, and processing of polymeric materials. Effective: Fall 2014 Future: Fall 2014
Prerequisite:

MATSE 448 (CH E 442) Polymer Processing Technology (3) Basic principles of polymer melt processing are reviewed and subsequently applied to the most important industrial processing operations. Effective: Spring 2006
Prerequisite:

MATSE 450 (E SC 450) Synthesis and Processing of Electronic and Photonic Materials (3) The materials science of applying thin film coatings, etching, and bulk crystal growth; includes materials transport, accumulation, epitaxy, and defects. Effective: Fall 2005
Prerequisite:

Prerequisite:

MATSE 460 Introductory Laboratory in Materials (1) An introduction to comparative physical properties and characteristics of various materials including mechanical, electrical thermal, and structure/ morphology. Effective: Spring 2001
Prerequisite:

MATSE 462 General Properties Laboratory in Materials (1) An introduction to comparative physical properties of various materials including mechanical, thermal electrical properties and the measurement of said properties. Effective: Spring 2005
Prerequisite:

MATSE 463 Characterization and Processing of Electronic and Photonic Materials Laboratory (1) Provides experience with key processing methods for EPM materials and advanced characterization methods for EPM materials and simple device structures. Effective: Spring 2009
Prerequisite: Concurrent: MATSE 450 MATSE 455

MATSE 468 Ceramics Laboratory III (1) Cermaic processing and powder characteristics. Effective: Spring 2009
Prerequisite:

MATSE 471 Metallurgy Laboratory I (1) A laboratory integrating experimental aspects of material contained in MATSE 402, 413, and 410, e.g. phase diagram determination, solidification micro-structures, etc. Effective: Fall 2005
Prerequisite:

MATSE 472 Metallurgy Laboratory II (1) Application of principles of mechanical metallurgy, pyroprocessing, corrosion and metal processing. Effective: Fall 2006
Prerequisite:

MATSE 473 Polymeric Materials Laboratory--Synthesis (1) Principles and practices of polymerization, including condensation, free radical (bulk, solution, suspension, emulsion), ionic, and Zeigler-Natta procedures. Effective: Spring 2003
Prerequisite:

MATSE 474 Polymeric Materials Laboratory--Characterization (1) Principles and practices involved in determination of...
properties, structure and morphology, employing thermal, mechanical, spectroscopic, viscometric and computer techniques.

Effective: Spring 2003
Prerequisite:
MATSE 475 (E SC 475) *Particulate Materials Processing* (3) Fundamentals of processing particulate materials including production, characterization, handling, compaction, and sintering of metal, carbide, intermetallic, and composite powders.
Effective: Spring 2008
Prerequisite:
MATSE 483 (E SC 483) *Simulation and Design of Nanostructures* (3) Introduction to computer simulation techniques and their applications at the physical/life sciences interface.
Effective: Fall 2007
Prerequisite:
MATSE 484W (IL) *International Internship in Materials: Research Definition and Methodology* (3) A course focused on international research, specific design and methodology, facilitated through the International Internship in Materials and Program.
Effective: Summer 2006
Prerequisite:
MATSE 485W (IL) *International Internship in Materials: Experimentation and Documentation* (3) A course focused on international research, specifically experimentation and documentation, facilitated through the International Internship in Materials Program.
Effective: Summer 2006
Prerequisite:
MATSE 492W *Materials Engineering Methodology and Design* (3) Designed to familiarize students with the literature and technology developments in the use of, and design with, materials in industrial applications.
Effective: Fall 2005 Ending: Summer 2014
Prerequisite:
MATSE 492W *Materials Engineering Methodology and Design* (3) Designed to familiarize students with the literature and technology developments in the use of, and design with, materials in industrial applications.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:
MATSE 493W *Materials Science and Engineering Multidisciplinary Capstone Design Project* (3) This course focuses on multidisciplinary industry-sponsored and community service-based design projects offered in conjunction with the College of Engineering’s Learning Factory.
Effective: Summer 2012
Prerequisite:
MATSE 494M *Research and Design Senior Project* (1-3) Continuation of a research problem in materials culminating in a bound thesis describing the work.
Effective: Fall 2007

MATSE 494W *Research and Design Senior Project* (1-3) Continuation of a research problem in materials culminating in a bound thesis describing the work.
Effective: Spring 2006

MATSE 496 *Independent Studies* (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1994

MATSE 497 *Special Topics* (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1994

MATSE 497A *Nanomedical Applications in Materials Science and Engineering* (3) This course will cover topics in MATSE of special interest for nanomedical applications. Topics include nanoparticle systems for drug delivery and bioimaging, interfaces in biological systems, and material interactions in the physiological environment.
Prerequisite:
MATSE 501 *Thermodynamics of Materials* (3) Application of thermodynamics to materials equilibria and processes, including solution theory, electrochemical processes, capillarity, and the effect of stresses.
Effective: Spring 2004
Prerequisite:
MATSE 503 *Kinetics of Materials Processes* (3) Introduction to application of transition state theory and mass transfer to the kinetics of materials and mineral processes.
Effective: Summer 2007
Prerequisite:
MATSE 505 *Irreversible and Statistical Thermodynamics of Materials* (3) Introduction to statistical and irreversible
thermodynamics as applied to chemical and materials systems.
Effective: Spring 2007
Prerequisite:
MATSE 506 Interfacial Electrochemical Processes (3) Survey of thermodynamic and kinetic fundamentals of electrochemical processes at interfaces.
Effective: Spring 2006

MATSE 507 (BIOE 517) Biomaterials Surface Science (3) Special properties of surfaces as an important causative and mediating agent in the biological response to materials.
Effective: Fall 2003

MATSE 508 (BIOE 508) Biomedical Materials (3) Properties and methods of producing metallic, ceramic, and polymeric materials used for biomedical applications.
Effective: Spring 2003

MATSE 510 (CH E 510) Surface Characterization of Materials (3) Physical and chemical principles of characterization techniques widely used in materials science, chemistry and engineering.
Effective: Spring 2013

MATSE 511A Powder X-Ray Diffraction (1) Compound identification, lattice parameter measurement, and other applications of the powder diffraction method.
Effective: Spring 2012

Effective: Spring 2005

Effective: Spring 2012

MATSE 511G Analytical Electron Microscopy (1) Modern analytical electron microscope techniques: scanning transmission electron microscopy; electron energy loss spectroscopy; energy dispersive analysis of x-rays.
Effective: Spring 2012
Prerequisite:
MATSE 512 (GEOSC 512) Principles of Crystal Chemistry (3) Relation of structure to ionic size and nature; influence of pressure and temperature on structure; chemical-structural defects, crystalline solutions, phase-transitions.
Effective: Spring 2004

MATSE 514 Characterization of Materials (3) Classical and new (microprobe, scanning microscope, magnetic resonance, and Mossbauer) techniques for the characterization of composition, structure, defects, and surfaces.
Effective: Fall 2003

MATSE 518 Wetting Properties of Materials: Theory and Practice (3) Fundamentals of water wetting phenomenon are developed with special emphasis on thermodynamics of absorption and adhesion.
Effective: Summer 2004

MATSE 523 (NUC E 523) Environmental Degradation of Materials in Nuclear Power Plants (3) Degradation of materials performance when exposed to the combination of high temperature, neutron irradiation, and aggressive electrochemistry found in nuclear reactors.
Effective: Spring 2011
Prerequisite:
MATSE 530 X-Ray Crystallography and Diffraction (3) Reciprocal lattices and the Ewald sphere construction; crystal structure determination by powder and single crystal techniques; space groups.
Effective: Fall 2003
Prerequisite:
MATSE 531 Transmission Electron Microscopy (3) Diffraction pattern analysis and simple contrast theory applied to the structures of materials; analytical techniques in the microscope.
Effective: Fall 2003

MATSE 535 Geometrical Crystallography (3) Derivation of lattices, types, point groups, and space groups; and group theory applied to crystallography and spectroscopy.
Effective: Spring 2003

MATSE 540 Crystal Anisotropy (3) Symmetry aspects of crystals and physical properties. Matrix and tensor methods.

The Pennsylvania State University
Effective: Spring 2003
Prerequisite:
MATSE 542 Polymeric Materials: The Solid State (3) Introduction to the fundamental concepts necessary to understand solid state structure and properties of polymer materials.
Effective: Summer 2004
Prerequisite:
MATSE 543 (CHEM 543) Polymer Chemistry (3) This graduate course discusses recent advances in polymer chemistry that leads to new polymeric materials with interesting structures and properties.
Effective: Spring 2005
Prerequisite:
MATSE 544 Computational Materials Science of Soft Materials (3) Pursue applications of computational modeling methods to soft materials; explore use of these methods to different research areas.
Effective: Summer 2009

MATSE 545 (E E 545) Semiconductor Characterization (3) Physical principles and experimental methods used to characterize the electrical, optical, structural and chemical properties of semiconductor materials.

Effective: Spring 2014

MATSE 547 Thermophysical Properties of Ceramics (3) Heat capacity, heat of fusion, thermal conductivity, and thermal expansion in relation to macroscopic measurements and basic atomic concepts applied to ceramic materials.

Effective: Spring 2003

MATSE 548 Dielectric and Other Electroceramics (3) Preparation and properties of ceramic semiconductors, dielectrics, and magnetic materials.

Effective: Spring 2003

MATSE 550 Sintering of Ceramics (3) Design and interpretation of ceramic microstructures through an understanding of the physics and chemistry of sintering and grain growth.

Effective: Spring 2003

Prerequisite:

MATSE 555 (PHYS 555) Polymer Physics I (3) Introduction to the fundamental concepts needed to understand the physics applicable to polymer melts, solutions and gels.

Effective: Spring 2006

MATSE 560 (MN PR 507) Hydrometallurgical Processing (3) Fundamental physico-chemical factors underlying the aqueous extraction and recovery of metals and nonmetals from ores, minerals, and scrap metal.

Effective: Fall 2003

Prerequisite:

MATSE 561 Metal Electrode Reactions (2-3) Evaluation of electrode reaction mechanisms and kinetics at metal/electrolyte interfaces relevant to corrosion and industrial electrolyte processes.

Effective: Spring 2003

Prerequisite:

MATSE 562 Solid to Solid Phase Transformations (3) Mechanisms and rate-determining factors in solid-phase reactions in metals; diffusion processes, nucleation theory, precipitations from solid solution, eutectoid decomposition and order-disorder phenomena.

Effective: Spring 2003

MATSE 566 (E MCH 535) Deformation Mechanisms in Materials (3) Deformation of crystalline/amorphous solids and relationship to structure; elastic, viscoelastic and plastic response over a range of temperatures and strain rates.

Effective: Fall 2004

Prerequisite:

MATSE 565 Metals in Electronics (3) Processing and performance of metals in electronics, covering electrical resistivity, metal film deposition, metal/semiconductor contacts, interconnects, and electronic packaging.

Effective: Summer 2002

MATSE 570 (EME 570) Catalytic Materials (3) Preparation and characterization of solid catalytic materials and the relationships between their surface, defect, and electronic properties and catalytic activity.

Effective: Fall 2008

Prerequisite:

MATSE 575 Functional Polymeric Materials (3) In-depth discussions of structure/property relationships in functional polymers and modern concepts of polymerization methods.
MATSE 580 **Computational Thermodynamics** (3) The integration of fundamental principles and advanced computational approaches in the thermodynamics of materials, including hands-on computation, theory and application. Effective: Summer 2007

MATSE 581 **Computational Materials Science II: Continuum, Mesocale Simulations** (3) This course will focus on computational techniques and fundamentals of phase transformation simulations on the continuum, mesocale level. Effective: Spring 2008

MATSE 582 **Materials Science and Engineering Professional Development** (1) This course covers ethical conduct of research, pathways of professional development and strategies and tools for research. Effective: Fall 2012

MATSE 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 2004

MATSE 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2004

MATSE 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 2003

MATSE 597B (EGEE 597B) **Nanoscale Energy and Environmental Engineering** (3) The course will cover the synthesis, characterization and applications of nanomaterials to energy generation, storage, conversion, conservation, control and environmental engineering. Selected topics in nanomaterial toxicity and production/process/product economics will be included. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

MATSE 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 2003

MATSE 601 **Ph.D. Dissertation Full-Time** (0) No description. Effective: Spring 2004

MATSE 602 **Supervised experience in college teaching** (1-3 per semester/maximum of 6) Supervised assistance with the teaching program in metallurgy. Effective: Spring 2004

MATSE 611 **Ph.D. Dissertation Part-Time** (0) No description. Effective: Spring 2007

MATSE 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Summer 2008

Last Import from UCM: May 24, 2014 3:00 AM
Mathematics (MATH)

MATH 401 Introduction to Analysis I (3) Review of calculus, properties of real numbers, infinite series, uniform convergence, power series. Students who have passed Math. 403 may not schedule this course.
Effective: Fall 1983
Prerequisite:

MATH 403 Classical Analysis I (3) Topology of R^n, compactness, continuity of functions, uniform convergence, Arzela-Ascoli theorem in the plane, Stone-Wierstrass theorem.
Effective: Spring 1996
Prerequisite:

MATH 403H Honors Classical Analysis I (3) Development of a thorough understanding and technical mastery of foundations of classical analysis in the framework of metric spaces.
Effective: Spring 2010
Prerequisite:

MATH 404 Classical Analysis II (3) Differentiation of functions from R^n to R^m, implicit function theorem, Riemann integration, Fubini's theorem, Fourier analysis.
Effective: Fall 1985
Prerequisite:

MATH 405 Advanced Calculus for Engineers and Scientists I (3) Vector calculus, linear algebra, ordinary and partial differential equations. Students who have passed MATH 411 or 412 may not take this course for credit.
Effective: Spring 1994
Prerequisite:

MATH 406 Advanced Calculus for Engineers and Scientists II (3) Complex analytic functions, sequences and series, residues, Fourier and Laplace transforms. Students who have passed MATH 421 may not take this course for credit.
Effective: Spring 1994
Prerequisite:

MATH 408 Advanced Calculus (3) Differential and integral calculus of functions of several variables, line and surface integrals, infinite series, series of functions, power series.
Effective: Spring 2007
Prerequisite:

MATH 410 Complex Analysis for Mathematics and Engineering (3) Complex analytic functions; Cauchy-Riemann equations; complex contour integrals; Cauchy's integral formula; Taylor and Laurent series; residue theory; applications in engineering.
Effective: Summer 2014
Prerequisite:

MATH 411 Ordinary Differential Equations (3) Linear ordinary differential equations; existence and uniqueness questions; series solutions; special functions; eigenvalue problems; Laplace transforms; additional topics and applications.
Effective: Fall 1983
Prerequisite:

MATH 412 Fourier Series and Partial Differential Equations (3) Orthogonal systems and Fourier series; derivation and classification of partial differential equations; eigenvalue function method and its applications; additional topics.
Effective: Spring 2009
Prerequisite:

MATH 414 (STAT 414) Introduction to Probability Theory (3) Probability spaces, discrete and continuous random variables, transformations, expectations, generating functions, conditional distributions, law of large numbers, central limit theorems. Students may take only one course from MATH(STAT) 414 and 418 for credit.
Effective: Fall 2001
Prerequisite:

MATH 415 (STAT 415) Introduction to Mathematical Statistics (3) A theoretical treatment of statistical inference, including sufficiency, estimation, testing, regression, analysis of variance, and chi-square tests.
Effective: Fall 1989
Prerequisite:

Effective: Spring 1984
Prerequisite:

Effective: Spring 2009
Prerequisite:

MATH 418 (STAT 418) Introduction to Probability and Stochastic Processes for Engineering (3) Introduction to probability axioms, combinatorics, random variables, limit laws, and stochastic processes. Students may take only one
course from MATH(STAT) 414 and 418 for credit.
Effective: Fall 2011
Prerequisite:
MATH 419 (PHYS 419) Theoretical Mechanics (3) Principles of Newtonian, Lagrangian, and Hamiltonian mechanics of
particles with applications to vibrations, rotations, orbital motion, and collisions.
Effective: Spring 2007
Prerequisite:
MATH 421 Complex Analysis (3) Infinite sequences and series; algebra and geometry of complex numbers; analytic
functions; integration; power series; residue calculus; conformal mapping, applications.
Effective: Summer 1993
Prerequisite:
MATH 422 Wavelets and Fourier Analysis: Theory and Applications (3) Fundamental mathematical issues of the theory
of wavelets for senior undergraduate and graduate students in mathematics, engineering, physics, and computer science.
Effective: Summer 2000
Prerequisite:
MATH 425 Introduction to Operations Research (3) Nature of operations research, problem formulation, model
construction, deriving solution from models, allocation problems, general linear allocation problem, inventory problems.
Effective: Spring 2012
Prerequisite:
MATH 426 Introduction to Modern Geometry (3) Plane and space curves; space surfaces; curvature; intrinsic geometry of
surfaces; Gauss-Bonnet theorem; covariant differentiation; tensor analysis.
Effective: Spring 1994
Prerequisite:
MATH 427 Foundations of Geometry (3) Euclidean and various non-Euclidean geometries and their development from
postulate systems. Students who have passed MATH 427 may not schedule MATH 471.
Effective: Spring 1994
Prerequisite:
MATH 428 Geometry for Teachers (1) Research in mathematics education using ideas from Euclidean and non-Euclidean
geometry. Students who have passed MATH 471 may not schedule MTHBD 478.
Effective: Spring 2007
Prerequisite:
MATH 429 Introduction to Topology (3) Metric spaces, topological spaces, separation axioms, product spaces,
identification spaces, compactness, connectedness, fundamental group.
Effective: Spring 1994
Prerequisite:
MATH 430 Linear Algebra and Discrete Models I (3) Vector spaces, linear transformations, matrices determinants,
characteristic values and vectors, systems of linear equations, applications to discrete models.
Effective: Spring 2010
Prerequisite:
MATH 431 Linear Algebra and Discrete Models II (3) Vector spaces and linear transformations, matrices, determinants,
characteristic values and vectors, systems of linear equations, applications to discrete models.
Effective: Spring 2007
Prerequisite:
MATH 435 Basic Abstract Algebra (3) Elementary theory of groups, rings, and fields. Students who have passed MATH
435 may not schedule MATH 470.
Effective: Spring 2010
Prerequisite:
MATH 436 Linear Algebra (3) Vector spaces and linear transformations, canonical forms of matrices, elementary divisors,
invariant factors; applications. Students who have passed MATH 436 may not schedule MATH 441.
Effective: Fall 1983
Prerequisite:
MATH 437 Algebraic Geometry (3) Study of curves in the plane defined by polynomial equations \( p(x,y) = 0 \). Projective
equivalence, singular points, classification of cubics.
Effective: Spring 2009
Prerequisite:
MATH 441 Matrix Algebra (3) Determinants, matrices, linear equations, characteristic roots, quadratic forms, vector
spaces. Students who have passed Math 436 may not schedule this course.
Effective: Fall 1985
Prerequisite:
MATH 444 Mathematical Statistics and Applications I (3) Distributions of random variables, special distributions,
limiting distributions, sampling, statistical inference, point and interval estimation, orthogonal polynomials, and least
squares.
Effective: Spring 2007
Prerequisite:
MATH 445 Mathematical Statistics and Applications II (3) Further topics in point estimation, statistical hypotheses,
other statistical tests, nonparametric methods.

Effective: Spring 2007

MATH 446 Introduction to Applied Statistics I (3) Descriptive statistics, probability theory, discrete and continuous probability distributions, statistical inferences for means and proportions.

Effective: Spring 2007

Prerequisite:

MATH 447 Introduction to Applied Statistics II (3) Regression, correlation, analysis of variance, contingency tables, nonparametric methods, time series, index numbers.

Effective: Spring 2007

MATH 449 Applied Ordinary Differential Equations (3) Differential and difference equations and their application to biology, chemistry, and physics; techniques in dynamical systems theory.

Effective: Spring 2007

Prerequisite:

MATH 450 Mathematical Modeling (3) Constructing mathematical models of physical phenomena; topics include pendulum motion, polymer fluids, chemical reactions, waves, flight, and chaos.

Effective: Spring 2007

Prerequisite:

MATH 451 (CMPSC 451) Numerical Computations (3) Algorithms for interpolation, approximation, integration, nonlinear equations, linear systems, fast FOURIER transform, and differential equations emphasizing computational properties and implementation. Students may take only one course for credit from MATH 451 and 455.

Effective: Spring 2008

Prerequisite:

MATH 455 (CMPSC 455) Introduction to Numerical Analysis I (3) Floating point computation, numerical rootfinding, interpolation, numerical quadrature, direct methods for linear systems. Students may take only one course for credit from MATH 451 and MATH 455.

Effective: Spring 2008

Prerequisite:

MATH 456 (CMPSC 456) Introduction to Numerical Analysis II (3) Polynomial and piecewise polynomial approximation, matrix least squares problems, numerical solution of eigenvalue problems, numerical solution of ordinary differential equations.

Effective: Spring 2008

Prerequisite:

MATH 457 Introduction to Mathematical Logic (3) Propositional logic, first-order predicate logic, axioms and rules of inference, structures, models, definability, completeness, compactness.

Effective: Summer 2011

Prerequisite:

Effective: Fall 1986

Prerequisite:

MATH 465 Number Theory (3) Elements, divisibility of numbers, congruences, residues, and forms.

Effective: Spring 2009

Prerequisite:

MATH 467 (CMPSC 467) Factorization and Primality Testing (3) Prime sieves, factoring, computer numeration systems, congruences, multiplicative functions, primitive roots, cryptography, quadratic residues. Students who have passed MATH 465 may not schedule this course.

Effective: Spring 1995

Prerequisite:

MATH 468 Mathematical Coding Theory (3) Shannon’s theorem, block codes, linear codes, Hamming codes, Hadamard codes, Golay codes, Reed-Muller codes, bounds on codes, cyclic codes.

Effective: Fall 1983

Prerequisite:

MATH 470 Algebra for Teachers (3) An introduction to algebraic structures and to the axiomatic approach, including the elements of linear algebra. Designed for teachers and prospective teachers. Students who have passed Math 435 may not schedule this course.

Effective: Fall 1988

Prerequisite:

MATH 471 Geometry for Teachers (4) Problem solving oriented introduction to Euclidean and non-Euclidean geometries; construction problems and geometrical transformations via “Geometer’s Sketchpad” software. Intended primarily for those seeking teacher certification in secondary mathematics. Students who have passed MATH 427 may not schedule this course.

Effective: Spring 1996

Prerequisite:

MATH 475W (US;IL) History of Mathematics (3) A global survey of the history of mathematics as viewed as a human
response to cultural, political, economic, and societal pressures.
Effective: Spring 2012
Prerequisite:

MATH 479 (PHYS 479) **Special and General Relativity** (3) Mathematical description, physical concepts, and experimental tests of special and general relativity.
Effective: Spring 2007
Prerequisite:

MATH 482 **Mathematical Methods of Operations Research** (3) Survey of linear and nonlinear programming; mathematics of optimization; queues; simulation.
Effective: Spring 2007
Prerequisite:

MATH 484 **Linear Programs and Related Problems** (3) Introduction to theory and applications of linear programming; the simplex algorithm and newer methods of solution; duality theory.
Effective: Spring 1987
Prerequisite:

MATH 485 **Graph Theory** (3) Introduction to the theory and applications of graphs and directed graphs. Emphasis on the fundamental theorems and their proofs.
Effective: Spring 1987
Prerequisite:

MATH 486 **Mathematical Theory of Games** (3) Basic theorems, concepts, and methods in the mathematical study of games of strategy; determination of optimal play when possible.
Effective: Spring 2006
Prerequisite:

MATH 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1995

MATH 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

MATH 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2007
Prerequisite:

MATH 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

MATH 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

MATH 497A **Finite Fields and Applications** (4) This course will consist of an introduction to the theory of finite fields. We also discuss some of the many practical applications of finite fields. These applications will include algebraic coding theory for the error-free transmission of information, and cryptology for the secure transmission of information. Finite fields are also of great use in the construction of various kinds of combinatorial designs.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

MATH 497B **An Introduction to Dynamical Systems** (4) The theory of dynamical systems is a modern branch of mathematics. Its main objective is to analyze long-term behavior of systems that evolve over time. In this course, we will introduce the fundamental concepts and tools of dynamics and discuss an array of examples with gradual increase in complexity. The topics will include contractions, linear maps, differential equations, recurrence, equidistribution, hyperbolic systems, symbolic systems and coding, fractals, entropy, and chaos.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

MATH 497C **Affine and Projective Geometries** (4) This course is an introduction to Geometry and its goal is to describe Geometry following Felix Klein's Erlangen program, that is the action of the group of isometries. The emphasis is on Affine, Projective and non-Euclidean (Lobachevsky-Poincare hyperbolic geometries).
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

MATH 497D **MASS Interdisciplinary Seminar** (3) The seminar is designed to focus on selected interdisciplinary topics in algebra, analysis and geometry to coordinate core courses and to prepare students to MASS Colloquium.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

MATH 497E **MASS Colloquium** (1) Cover selected topics in Mathematics.
MATH 497G **MASS Research Project** (4) Supervised student activities on research projects identified on an individual or small-group basis.

MATH 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

MATH 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

MATH 499A (IL) **Geometry and Mathematical Physics** (2) PSU-PKU International Undergraduate Summer School, 2014 in Beijing, China.

MATH 504 **Analysis in Euclidean Space** (3) The Fourier transform in L1 and L2 and applications, interpolation of operators. Riesz and Marcinkiewics theorems, singular integral operators.

MATH 505 **Mathematical Fluid Mechanics** (3) Kinematics, balance laws, constitutive equations; ideal fluids, viscous flows, boundary layers, lubrication; gas dynamics.

MATH 506 **Ergodic Theory** (3) Measure-preserving transformations and flows, ergodic theorems, ergodicity, mixing, weak mixing, spectral invariants, measurable partitions, entropy, ornstein isomorphism theory.

MATH 507 **Dynamical Systems I** (3) Fundamental concepts; extensive survey of examples; equivalence and classification of dynamical systems, principal classes of asymptotic invariants, circle maps.

MATH 508 **Dynamical Systems II** (3) Hyperbolic theory; stable manifolds, hyperbolic sets, attractors, Anosov systems, shadowing, structural stability, entropy, pressure, Lyapunov characteristic exponents and non-uniform hyperbolicity.

MATH 511 **Ordinary Differential Equations I** (3) Existence and uniqueness, linear systems, series methods, Poincare-Bendixson theory, stability.

MATH 512 **Ordinary Differential Equations II** (3) Floquet theory, regular and singular boundary value problems, Green's functions, eigenfunction expansions.

MATH 513 **Partial Differential Equations I** (3) First order equations, the Cauchy problem, Cauchy-Kowalevski theorem, Laplace equation, wave equation, heat equation.

MATH 514 **Partial Differential Equations II** (3) Sobolev spaces and Elliptic boundary value problems, Schauder estimates. Quasilinear symmetric hyperbolic systems, conservation laws.
MATH 515 Classical Mechanics and Variational Methods (3) Introduction to the calculus of variations, variational formulation of Lagrangian mechanics, symmetry in mechanical systems, Legendre transformation, Hamiltonian mechanics, completely integrable systems.
Effective: Spring 1992
Prerequisite:

MATH 516 Stochastic Processes (3) Markov chains; generating functions; limit theorems; continuous time and renewal processes; martingales, submartingales, and supermartingales; diffusion processes; applications.
Effective: Summer 1995
Prerequisite:

MATH 517 (STAT 517) Probability Theory (3) Measure theoretic foundation of probability, distribution functions and laws, types of convergence, central limit problem, conditional probability, special topics.
Effective: Summer 2000
Prerequisite:

MATH 518 (STAT 518) Probability Theory (3) Measure theoretic foundation of probability, distribution functions and laws, types of convergence, central limit problem, conditional probability, special topics.
Effective: Fall 1983
Prerequisite:

MATH 519 (STAT 519) Topics in Stochastic Processes (3) Selected topics in stochastic processes, including Markov and Wiener processes; stochastic integrals, optimization, and control; optimal filtering.
Effective: Fall 1984
Prerequisite:

Effective: Spring 1992
Prerequisite:

MATH 523 Numerical Analysis I (3) Approximation and interpolation, numerical quadrature, direct methods of numerical linear algebra, numerical solutions of nonlinear systems and optimization.
Effective: Summer 2002
Prerequisite:

Effective: Spring 2013
Prerequisite:

MATH 527 Metric and Topological Spaces (3) Metric spaces, continuous maps, compactness, connectedness, and completeness. Topological spaces, products, quotients, homotopy, fundamental group, simple applications.
Effective: Spring 2013
Prerequisite:

Effective: Spring 2013
Prerequisite:

MATH 529 Algebraic Topology (3) Manifolds, Poincare duality, vector bundles, Thom isomorphism, characteristic classes, classifying spaces for vector bundles, discussion of bordism, as time allows.
Effective: Spring 1992
Prerequisite:

MATH 530 Differential Geometry (3) Distributions and Frobenius theorem, curvature of curves and surfaces, Riemannian geometry, connections, curvature, Gauss-Bonnet theorem, geodesic and completeness.
Effective: Spring 1992
Prerequisite:

MATH 531 Differential Topology (3) DeRham's theorem, geometry of smooth mappings, critical values, Sard's theorem, Morse functions, degree of mappings, smooth fiber bundles.
Effective: Spring 1992
Prerequisite:

MATH 533 Lie Theory I (3) Lie groups, lie algebras, exponential mappings, subgroups, subalgebras, simply connected groups, adjoint representation, semisimple groups, infinitesimal theory, Cartan's criterion.
Effective: Spring 1992
Prerequisite:

MATH 534 Lie Theory II (3) Representations of compact lie groups and semisimple lie algebras, characters, orthogonality, Peter-Weyl theorem, Cartan-Weyl highest weight theory.
Effective: Spring 1992
Prerequisite:

The Pennsylvania State University

MATH 537 Field Theory (3) Finite and infinite algebraic extensions; cyclotomic fields; transcendental extensions; bases of transcendence, Luroth's theorem, ordered fields, valuations; formally real fields.

MATH 538 Commutative Algebra (3) Topics selected from Noetherian rings and modules, primary decompositions, Dedekind domains and ideal theory, other special types of commutative rings or fields.

MATH 542 Group Theory I (3) Topics selected by instructor from abelian, solvable, and nilpotent groups; finite presentations; free products; group extensions; group representations.

MATH 547 Algebraic Geometry I (3) Affine and projective algebraic varieties; Zariski topology; Hilbert Nullstellensatz; regular functions and maps; birationality; smooth varieties normalization; dimension.

MATH 548 Algebraic Geometry II (3) Topics may include algebraic curves, Riemann-Roch theorem, linear systems and divisors, intersectino theory, schemes, sheaf cohomology, algebraic groups.

MATH 550 (CSE 550) Numerical Linear Algebra (3) Solution of linear systems, sparse matrix techniques, linear least squares, singular value decomposition, numerical computation of eigenvalues and eigenvectors.

MATH 551 (CSE 551) Numerical Solution of Ordinary Differential Equations (3) Methods for initial value and boundary value problems; convergence and stability analysis, automatic error control, stiff systems, boundary value problems.

MATH 552 (CSE 552) Numerical Solution of Partial Differential Equations (3) Finite difference methods for elliptic, parabolic, and hyperbolic differential equations; solutions techniques for discretized systems; finite element methods for elliptic problems.

MATH 553 (CSE 553) Introduction to Approximation Theory (3) Interpolation; remainder theory; approximation of functions; error analysis; orthogonal polynomials; approximation of linear functionals; functional analysis applied to numerical analysis.

MATH 554 Approximation Theory (3) Approximation in normed spaces; existence, uniqueness, characterization, computation of best approximations; error bounds; degree of approximation; approximation of linear functionals.

MATH 555 (CSE 555) Numerical Optimization Techniques (3) unconstrained and constrained optimization methods, linear and quadratic programming, software issues, ellipsoid and Karmarkar's algorithm, global optimization, parallelism in optimization.

MATH 556 (CSE 556) Finite Element Methods (3) Sobolev spaces, variational formulations of boundary value problems; piecewise polynomial approximation theory, convergence and stability, special methods and applications.

MATH 557 Mathematical Logic (3) The predicate calculus; completeness and compactness; Goedel's first and second incompleteness theorems; introduction to model theory; introduction to proof theory.

MATH 558 Foundations of Mathematics I (3) Decidability of the real numbers; computability; undecidability of the natural numbers; models of set theory; axiom of choice; continuum hypothesis.
MATH 559 Recursion Theory I (3) Recursive functions; degrees of unsolvability; hyperarithmetic theory; applications to Borel combinatorics. Computational complexity. Combinatory logic and the Lambda calculus.
Effective: Summer 2011
Prerequisite:

MATH 561 Set Theory I (3) Models of set theory. Inner models, forcing, large cardinals, determinacy. Descriptive set theory. Applications to analysis.
Effective: Spring 1992
Prerequisite:

MATH 565 Foundations of Mathematics II (3) Subsystems of second order arithmetic; set existence axioms; reverse mathematics; foundations of analysis and algebra.
Effective: Spring 1992
Prerequisite:

MATH 567 Number Theory I (3) Congruences, quadratic residues, arithmetic functions, partitions, classical multiplicative ideal theory, valuations and p-adic numbers; primes in arithmetic progression, distribution of primes.
Effective: Spring 1994
Prerequisite:

MATH 568 Number Theory II (3) Congruences, quadratic residues, arithmetic functions, partitions, classical multiplicative ideal theory, valuations and p-adic numbers; primes in arithmetic progression, distribution of primes.
Effective: Spring 1994
Prerequisite:

MATH 569 Algebraic Number Theory I (3) Dedekind rings; cyclotomic and Kummer extensions; valuations; ramification, decomposition, inertial groups; Galois extensions; locally compact groups of number theory.
Effective: Spring 1992
Prerequisite:

MATH 570 Algebraic Number Theory II (3) Topics chosen from class field theory; integral quadratic forms; algebraic and arithmetic groups; algebraic function of one variable.
Effective: Spring 1992
Prerequisite:

MATH 571 Analytic Number Theory I (3) Improvements of the prime number theorem, L-functions and class numbers, asymptotic and arithmetic properties of coefficients of modular forms.
Effective: Spring 1994
Prerequisite:

MATH 572 Analytic Number Theory II (3) Distribution of primes, analytic number theory in algebraic number fields, transcendental numbers, advanced theory of partitions.
Effective: Spring 1992
Prerequisite:

MATH 574 Topics in Logic and Foundations (3-6 per semester) Topics in mathematical logic and the foundations of mathematics.
Effective: Spring 1992
Prerequisite:

MATH 577 (M E 577) Stochastic Systems for Science and Engineering (3) The course develops the theory of stochastic processes and linear and nonlinear stochastic differential equations for applications to science and engineering.
Effective: Summer 1998
Prerequisite:

MATH 578 (M E 578) Theory & Applications of Wavelets (3) Theory and physical interpretation of continuous and discrete wavelet transforms for applications in different disciplines.
Effective: Spring 2012
Prerequisite:

MATH 580 Introduction to Applied Mathematics I (3) A graduate course of fundamental techniques including tensor, ordinary and partial differential equations, and linear transforms.
Effective: Fall 2003
Prerequisite:

MATH 581 Introduction to Applied Mathematics II (3) A graduate course of fundamental techniques including Ordinary, Partial, and Stochastic Differential Equations, Wavelet Analysis, and Perturbation Theory.
Effective: Summer 2003
Prerequisite:

MATH 582 Introduction to C* Algebra Theory (3) Basic properties of C* algebras, representation theory, group C* algebras and crossed products, tensor products, nuclearity and exactness.
Effective: Summer 2006
Prerequisite:

Effective: Summer 2006
Prerequisite:

MATH 584 Introduction to von Neumann Algebras (3) Comparison of projections, traces, tensor products, ITPFI factors

The Pennsylvania State University
and crossed products, the Jones index, modular theory, free probability.

Effective: Summer 2006
Prerequisite:

MATH 585 **Topics in Mathematical Modeling** (3) Introduction to mathematical modeling, covering the basic modeling and common mathematical techniques for problems from physical, biological and social sciences.
Effective: Summer 2012
Prerequisite:

MATH 588 (CSE 588) **Complexity in Computer Algebra** (3) Complexity of integer multiplication, polynomial multiplication, fast Fourier transform, division, calculating the greatest common divisor of polynomials.
Effective: Spring 2008
Prerequisite:

MATH 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

MATH 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

MATH 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

MATH 597A **Elliptic Operators and Topology of Manifolds** (3) We will learn about the relationships between linear elliptic partial differential equations and manifold topology, which is expressed by the Atiyah-Singer index theorem. Topics may include de Rham cohomology, generalized Dirac operators, elliptic estimates and Sobolev spaces, Hodge theory, symbols, heat kernels, characterics classes and the index theorem.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

MATH 597B **Special Topics on Complex Fluids: Energetic Varicational Approaches** (3) Complex fluids is ubiquitous in our daily life, from the food we eat, the things we use to exact materials we are made of. It is also important in many industrial, physical and biological applications. Studying these materials requires a wide range of tools and techniques for different disciplinary, even within mathematics. Here I will present a narrow glimpse of the area.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

MATH 597D **Partitions, Mock Theta Functions and Ramanujan** (3) In 2015, the fifth volume devoted to Ramanujan's Lost Notebook will be published. This course will be primarily devoted to the current research topics arising from Ramanujan's incredible assertions in the Lost Notebook. These include the theory of partitions, q-series and especially Ramanujan's mysterious mock theta functions. The topics will be related to but different from those treated by Professor Yee in the Fall 2013.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
MATH 597D Dynamical Systems with Applications in Physics, Engineering and Biology (3) The unifying theme of this course is an intuitive approach to dynamics. Key concepts will be given geometrical and physical motivations not found in most textbooks. Here is a more specific content of the course. Linear systems. Floquet theory, Sturm-Liouville theory and Krein theory. Adjoint linear systems and wave fronts. Lyapunov exponents. Applications: particle traps, celestial mechanics, vibrations. Chaotic behavior. Smale’s horseshoe and its appearance in the dynamics of electric circuits, pendula, celestial bodies, billiards, particle accelerators etc. Ergodicity and some examples. Fractals and how they arise in differential equations of physics. Fractal dimensions. Robustness of random behavior. Some open problems. Stable behavior. Completely integrable Hamiltonian systems. A short introduction into averaging and into adiabatic invariance with examples from mechanics and electrodynamics.

Prerequisite:

MATH 597E Loop Groups (3) Geometry and representation theory of loop groups. Central extensions, the Hilbert space Grassmannian, the determinant line bundle, positive energy representations, the Weyl-Kac character formula, affine Lie algebras, the Dirac operator.

Prerequisite:

MATH 597F A Spectral Analysis Approach to Characteristic Boundary Layers (3) I will introduce various types of boundary layers in fluid dynamics, mostly focusing on the classical Navier-Stokes models. The main focus of the course is to analyze the dynamical stability and the asymptotic expansions near boundary layers. Most of these fundamental questions have been widely open for characteristic boundary layers. I’ll present a spectral analysis approach to tackle these problems. The rough course outline is as follows: Introduction to boundary layers; Spectral analysis: spectrum of the linearization near boundary layers; Evans function, and the construction of unstable point spectrums for various boundary layers. Resolvent estimates and the study of linearized semigroups. Nonlinear stability and instability analysis and boundary-layer asymptotic expansions. Other possible applications.

Prerequisite:

MATH 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Spring 1994

MATH 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.

Effective: Summer 2005

MATH 600 Thesis Research (1-15) No description.

Effective: Fall 1983

MATH 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Winter 1978

MATH 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Teaching of mathematics undergraduate recitation classes with senior faculty instruction supervision.

Effective: Fall 1983

MATH 610 Thesis Research Off Campus (1-15) No description.

Effective: Fall 1983

MATH 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Winter 1978

NOTE: Courses in computer science and statistics are listed separately.
Mathematics Education (MTHED)

MTHED 411 Teaching Secondary Mathematics I (3) Conditions for learning mathematics; problem solving; subject matter types; curriculum; learning goals; nature and history of mathematics at secondary level
Effective: Spring 2007
Prerequisite: Concurrent: MTHED 427

MTHED 412W Teaching Secondary Mathematics II (3) Assessing learning and instruction; methods of evaluation and grading; long-term planning; accommodating needs of diverse learners; connecting theory and practice.
Effective: Summer 2010
Prerequisite: Concurrent: C I 412W C I 495C

MTHED 420 Teaching Mathematics in the Elementary Schools (3) Strategies for teaching mathematics at the elementary school level; analysis of the philosophy and content of contemporary programs of instruction.
Effective: Spring 2014
Prerequisite: Concurrent: C I 495A or C I 495B; SCIED 458 SS ED 430W

MTHED 424Contemporary School Mathematics Programs (3) In-depth analysis of school mathematics programs and the factors and forces influencing them; contemporary curriculum developments.
Effective: Summer 2010
Prerequisite:

MTHED 427 Teaching Mathematics in Technology-Intensive Environments (3) Interaction among pedagogy, content, and technology in mathematics teaching and learning in technology-intensive environments; secondary, early college curricula; laboratory experience.
Effective: Spring 2007
Prerequisite: Concurrent: MTHED 411

MTHED 430 Students' Mathematical Thinking (3 per semester, maximum of 6) Develop abilities in planning, conducting, and interpreting mathematics interviews to gain an understanding of students' thinking processes and current knowledge.
Effective: Summer 1994
Prerequisite:

MTHED 431 Data Analysis in Secondary School Mathematics (3) Intense development of foundations of data analysis for secondary mathematics as a process using statistical concepts for predictions and inferences.
Effective: Summer 2006
Prerequisite:

MTHED 432 Mathematical Modeling in Secondary School Mathematics (3) Students work from teaching and curricular perspective to explore and apply school and undergraduate mathematics to model real-world phenomena.
Effective: Summer 2006
Prerequisite:

MTHED 433 Function Concept in Secondary School Mathematics (3) This course develops the concept of function as an essential topic that underlies and connects school and collegiate mathematics.
Effective: Summer 2006
Prerequisite:

MTHED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

MTHED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

MTHED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

MTHED 501 Foundations of Mathematics Education I: Learning (3) This course focuses on understanding and application of theories of mathematical thinking and learning in research and practice.
Effective: Summer 2007
Prerequisite:

MTHED 502 Foundations of Mathematics Education II: Teaching (3) Teaching is the object of study encountered through connections among classical and contemporary theories of teaching and research on teaching.
Effective: Summer 2007
Prerequisite:

MTHED 503 Foundations of Mathematics Education III: Curriculum (3) Study of mathematics curriculum blends historical trends and current issues with research literature and techniques to study effects of innovations.
Effective: Summer 2007
Prerequisite:
Prerequisite:

MTHED 511 **Connections Between Mathematics and Mathematics Education** (3) Course connects college-level mathematics with secondary school mathematics in terms of curriculum content and research on teaching and learning. Effective: Spring 2014
Prerequisite:

MTHED 520 **Analysis of Research in Mathematics Education** (3) Survey of the status of knowledge about mathematics learning and instruction, K-12; analysis of research procedures; instruments for evaluating research. Effective: Summer 2010
Prerequisite:

MTHED 523 **Projects in Mathematics Education Research, Curriculum Development, and Evaluation** (1-3 per semester, maximum of 24) Conceptualizing, designing, conducting, and reporting mathematics education research, curriculum development and/or evaluation projects. Effective: Spring 1997
Prerequisite:

MTHED 525 **Research Participation in School Mathematics Curriculum Construction** (3) Development of theoretical bases for the construction of instructional materials in mathematics; research participation in preparing and testing curriculum materials. Effective: Fall 1983

MTHED 527 **Research on the Use of Technology in Mathematics Education** (3) Reviewing, critiquing, designing, and conducting research on mathematics learning and teaching in technology intensive environments. Effective: Spring 1997
Prerequisite:

MTHED 530 **Mathematical Thinking at the Secondary and Early College Levels** (3) Exploring and applying theories of advanced mathematical thinking; reviewing, conducting research on mathematical thinking at secondary and early college levels. Effective: Spring 1997
Prerequisite:

MTHED 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 1996

MTHED 595 **Advanced Clinical Internship in Mathematics Learning** (3) Supervised internship in advanced procedures for the implementation of diagnostic/prescriptive approaches as a strategy for improving mathematics learning. Effective: Spring 1987
Prerequisite:

MTHED 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

MTHED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 1987

Last Import from UCM: May 24, 2014 3:00 AM
Md Cikship Island-Hy (MCLKS)

MCLKS 701 Advanced Clinical Diagnostics (1) Advanced instruction for third-year medical students in laboratory medicine, neurology, ophthalmology, radiology and motivational interviewing.
Effective: Summer 2005
Prerequisite:

MCLKS 702 Clinical Therapeutics (1) Skill development: discussion of end of life issues; pain management; clinical pharmacology including use of antibiotics, nutrition, cost of medical care and reducing medical errors.
Effective: Summer 2005
Prerequisite:

MCLKS 704 Improving Healthcare (1) Skill development: discussion of end of life issues; pain management; medical literature evaluation; effective utilization and improvement of medical systems.
Effective: Fall 2008
Prerequisite:

MCLKS 705 Transition to Internship (1) Provide review of clinical skills prior to internship training, and introduce new skills in team building, education and time management.
Effective: Spring 2009
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Mechanical Engineering (M E)

M E 400 Thermodynamics of Propulsion and Power Systems (3) Analysis and modeling of propulsion and power systems, including combustion, compressible flow through nozzles, chemical equilibrium, and moist air systems. Effective: Fall 2007
Prerequisite:

M E 401 Refrigeration and Air Conditioning (3) Theoretical principles, design, performance, and selection of various refrigeration and air-conditioning systems; building heat and cooling loads; solar heating. Effective: Fall 2007
Prerequisite:

M E 402 Power Plants (3) A study of fossil-fuel steam generation and utility plants, including cogeneration, gas turbine, and combined cycles. Effective: Fall 2007
Prerequisite:

M E 403 Polymer Electrolyte Fuel Cell Engines (3) Introduction to Fundamentals of Polymer Electrolyte Fuel Cells (PEFCs). Includes fundamentals of electrochemistry, thermodynamics, fluid mechanics, heat transfer materials, and manufacturing issues of PEFCs. A brief survey of other fuel cell types is also included. Effective: Spring 2011
Prerequisite: Concurrent: M E 410 or equivalent

M E 404 Gas Turbines (3) Thermodynamic cycles relating to gas turbines; analysis and performance of compressors, combustion chambers, single- and multi-stage turbines; recent developments. Effective: Fall 2007
Prerequisite:

M E 405 Indoor Air Quality Engineering (3) Prediction of the motion of contaminants (both gaseous particulate) in gas streams; analysis of ventilation systems and air pollution control systems; comparison of experimental sampling techniques. Effective: Fall 2007
Prerequisite:

M E 406 (NUC E 406) Introduction to Statistical Thermodynamics (3) Statistical description of systems composed of large numbers of particles in the context of classical and quantum mechanics; basic concepts of probability theory and thermodynamics as they relate to statistical mechanics. Effective: Fall 2007
Prerequisite:

M E 408 Energy Systems (3) Theory, analysis, design, selection, and application of energy conversion systems. Effective: Fall 2011
Prerequisite:

M E 410 Heat Transfer (3) Thermal energy transfer mechanisms: conduction (steady, transient), convection (internal, external), radiation; lumped parameter method; heat exchangers; introduction to numerical methods. Effective: Spring 2011
Prerequisite:

M E 411 Heat-Exchanger Design (3) Thermal design and application of different heat-exchanger types, including surface selection and design optimization. Effective: Fall 2007
Prerequisite:

M E 420 Compressible Flow I (3) Introductory compressible flow (gas dynamics), mathematical background, and physical concepts of isentropic flow, shock waves, expansion waves, and applications. Effective: Fall 2007
Prerequisite:

M E 421 Viscous Flow Analysis and Computation (3) Apply analytical and computational methods to solve the differential equations describing fluid flow. Incompressible external flows past objects and internal flows in pipes and ducts are some problems considered. Effective: Spring 2011
Prerequisite:

M E 422 Principles of Turbomachinery (3) Application of Newton's laws of motion and basic laws of thermodynamics to analysis of fluid flow in turbomachinery. Effective: Fall 2007
Prerequisite:

M E 427 Incompressible Aerodynamics (3) Analysis of lift and drag using potential flow theory, effects of viscosity on potential flow calculations, wind tunnel testing. Effective: Fall 2007
Prerequisite:

M E 428 Applied Computational Fluid Dynamics (3) Introduction to theory and application of computational techniques for solving fluid flow and heat transfer.
M E 430 (EGEE 430) **Introduction to Combustion** (3) Concepts related to laminar and turbulent premixed and nonpremixed combustion with applications to propulsion and stationary systems. Effective: Fall 2009

M E 431 **Internal Combustion Engines** (3) Thermodynamic aspects of internal combustion engine design and performance; two- and four-stroke cycle, supercharged and non-supercharged, diesel and spark-ignition types. Effective: Fall 2007

M E 432 **Rocket Propulsion** (3) Design and performance of rocket propulsion components and systems; thermodynamics, solid and liquid fuels, heat transfer, materials, controls, and instrumentation. Effective: Fall 2007

M E 433 **Fundamentals of Air Pollution** (3) Natural and man-made sources of pollution; atmospheric dispersion; biological and health effects; control systems; legislation and regulations. Effective: Fall 2007

M E 441W **Thermal Systems Design Project** (3) Design of thermal systems through component design and/or selection, system simulation and optimization. Assessment of system economics and energy efficiency. Effective: Fall 2007 Ending: Fall 2014

M E 442W **Advanced Vehicle Design I** (2) Part one of a two course sequence; applications of design and analysis methods to open-ended advanced transportation vehicles. Two semester course; satisfies Senior Design or ME Technical Elective requirements (when combined with M E 443W). Effective: Summer 2010 Ending: Fall 2014

M E 442W **Advanced Vehicle Design II** (1) Part two of a two course sequence; applications of design and analysis methods to open-ended advanced transportation vehicles. Two semester course; satisfies Senior Design or ME Technical Elective requirements (when combined with M E 443W). Effective: Summer 2010

M E 444 **Engineering Optimization** (3) Problem formulation, algorithms and computer solution of various engineering optimization problems. Effective: Spring 2010

M E 445 **Microcomputer Interfacing for Mechanical Engineers** (4) Interfacing of electro-mechanical systems to microcomputers for data acquisition, data analysis and digital control. Effective: Fall 2007

M E 448 **Engineering Design Concepts** (3) Engineering design and modelling, engineering economic analysis techniques, technical communication skills, project planning and design. Effective: Fall 2011
M E 449 Mechanical Design Projects (3) Group or individual design projects in the areas of mechanical engineering.
Effective: Fall 2007
Prerequisite:

Effective: Fall 2007
Prerequisite:

M E 452 Vehicle Road Dynamics (3) Investigations of three-dimensional dynamics and design into the study of vehicle dynamics including tire forces, suspension, and stability.
Effective: Fall 2012
Prerequisite:

M E 455 Automatic Control Systems (3) Dynamic analysis of systems involving automatic control of position, speed, power, flow, pressure, temperature, and other physical quantities.
Effective: Fall 2007
Prerequisite:

M E 456 (I E 456) Industrial Robot Applications (3) Introduction to robotics, with emphasis on robot selection, programming, and economic justification for manufacturing applications.
Effective: Spring 2011
Prerequisite:

M E 460 Advanced Machine Design Problems (3) Special machine design problems in unusual types of springs; gear problems and involutometry; cam design and application; multiple diameter shaft deflections and ball bearings.
Effective: Fall 2007
Prerequisite:

M E 461 (E MCH 461) Finite Elements in Engineering (3) Computer modeling and fundamental analysis of solid, fluid, and heat flow problems using existing computer codes.
Effective: Spring 2011
Prerequisite:

M E 462 Lubrication in Machine Design (3) Lubricants and lubrication with applications to design aspects of machines and mechanisms including bearings, gears, cams, and automotive engines.
Effective: Fall 2007
Prerequisite:

M E 465 Introduction to Manufacturing Laboratory (1) A laboratory-based introduction to manufacturing processes including material removal, forming, casting and joining for metals and non-metals.
Effective: Fall 2011
Prerequisite:

M E 467 Applied Finite Element Analysis (3) Review of matrix algebra; discretization; finite element formulation; application of finite element computer codes.
Effective: Fall 2011
Prerequisite:

M E 468 Engineering for Manufacturing (3) Manufacturability, the selection of the most effective materials and processes, and quality assurance.
Effective: Spring 2009
Prerequisite:

M E 469 Metallic Manufacturing Processes (3) Principles of metal working and introduction to current theories; analysis of deformation, joining, and metal removal processes.
Effective: Fall 2011
Prerequisite:

M E 470 (E MCH 470) Analysis and Design in Vibration Engineering (3) Application of Lagrange's equations to mechanical system modeling, multiple-degree-of-freedom systems, experimental and computer methods; some emphasis on design applications.
Effective: Spring 2008
Prerequisite:

Effective: Fall 2007
Prerequisite:

M E 480 Mechanism Design and Analysis (3) Design and analysis of mechanical linkages including kinematic synthesis and dynamic analysis. Linkages for a variety of applications are considered.
Effective: Spring 2011
Prerequisite:

M E 481 Introduction to Computer-Aided Analysis of Machine Dynamics (3) Techniques and formulations for computer based kinematic and dynamic analyses of machines.
Effective: Spring 2011
Prerequisite:
M E 491 Bioengineering Applications of Mechanical Engineering (3) Application of mechanical engineering knowledge in the context of life sciences.
Effective: Fall 2011
Prerequisite:

M E 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

M E 494H Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.
Effective: Spring 2007
Prerequisite:

M E 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Fall 2007
Prerequisite:

M E 496 Independent Studies (1-18) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

M E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

M E 497K (NUC E 497K) Thermal-Hydraulics of Two-Phase Flow in Energy Systems (3) This course provides students with fundamental knowledge necessary for thermal-hydraulic analysis of single-phase and two-phase flow systems. The power reactor will be employed as a generic example of the thermal-hydraulic energy systems. In single-phase flow analysis, the one-dimensional thermal-hydraulic system analysis method, which is often employed by the industry's system analysis code, will be introduced for normal and off-normal plant operating conditions.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

M E 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2008

M E 504 Advanced Engineering Thermodynamics (3) Pure and applied thermodynamics including its application to advanced engineering problems; collateral reading and discussion of the classical works on the subject.
Effective: Fall 2007

M E 505 Design of Air Pollution Control Systems (3) Advanced principles of design drawn from professional literature, including mechanical collectors, electrostatic precipitators, filters, scrubbers, and industrial ventilation systems.
Effective: Fall 1983
Prerequisite:

M E 512 Heat Transfer--Conduction (3) One- and two-dimensional conduction heat transfer for steady state and transient systems with varying boundary conditions.
Effective: Fall 1983

M E 513 Heat Transfer--Convection (3) Laminar and turbulent flow heat transfer in natural and forced convection systems.
Effective: Fall 1983

M E 514 Heat Transfer--Radiation (3) Thermal radiation fundamentals; specular and diffuse systems; differential and integral methods; numerical techniques; industrial applications.
Effective: Fall 1983

M E 515 Two-Phase Heat Transfer (3) Heat transfer processes involving evaporation, boiling, and condensation.
Effective: Winter 1978

M E 517 Techniques for Heat Transfer Enhancement (3) Study of advanced concepts in convective and two-phase heat transfer, with emphasis on techniques of heat transfer enhancement.
Effective: Fall 2007
Prerequisite:

M E 520 Compressible Flow II (3) Two-dimensional subsonic flow; similarity rules; theory of characteristics; supersonic and hypersonic flows; nonsteady flow; oblique shock waves.
Effective: Fall 2007
Prerequisite:

M E 521 Foundations of Fluid Mechanics I (3) First semester of core sequence in fluid mechanics; Navier-Stokes
equations, potential flow, low Re flow, laminar boundary layers.
Effective: Fall 2007
Prerequisite:

M E 522 Foundations of Fluid Mechanics II (3) Second semester of core sequence in fluid mechanics; continuation of boundary layers, stability, transition, turbulence, turbulent boundary layers, turbulence models.
Effective: Summer 1990
Prerequisite:

Effective: Fall 2007

M E 524 (AERSP 524) Turbulence and Applications to CFD: DNS and LES (3) First of two courses: Scalings, decompositions, turbulence equations; scale representations, Direct and Large-Eddy Simulation; modeling; pseudo-spectral methods; 3 computer projects.
Effective: Spring 2011
Prerequisite:

M E 525 (AERSP 525) Turbulence and Applications to CFD: RANS (3) Second of two courses: Scalings, decomposition, turbulence equations; Reynolds Averaged Navier Stokes (RANS) modeling; phenomenological models; 3 computer projects.
Effective: Spring 2011
Prerequisite:

M E 526 (AERSP 526) Computational Methods for Shear Layers (3) Study of numerical solution methods for steady and unsteady laminar or turbulent boundary-layer equations in two and three dimensions.
Effective: Fall 2007
Prerequisite:

M E 527 (AERSP 527) Computational Methods in Transonic Flow (3) Numerical solution of partial differential equations of mixed type, with emphasis on transonic flows and separating boundary layers.
Effective: Fall 2007
Prerequisite:

M E 530 Fundamentals of Combustion (3) Theoretical formulations and methods of solution of engineering problems and physical/chemical processes in various propulsion systems.
Effective: Fall 2007

M E 531 Species Measurements in Combustion Systems (1-3) Study of modern instrumentation techniques for determination of species concentrations in combustion systems.
Effective: Fall 2007

M E 532 Turbulent and Two-Phase Combustion (3) Fundamentals of chemically reacting turbulent flows in homogeneous systems including turbulent flames, spray combustion, ignition, reacting boundary layers.
Effective: Fall 2007
Prerequisite:

M E 533 Solid Propellant Combustion (3) Introduction to phenomena of solid propellant combustion, analytical techniques for modeling propellant ignition and combustion behavior, experimental methods.
Effective: Fall 2007
Prerequisite:

Effective: Spring 2010

Effective: Summer 1990
Prerequisite:

M E 546 (I E 546) Designing Product Families (3) Product families, product platforms, mass customization, product variety, modularity, commonality, robust design, product architectures.
Effective: Summer 2013
Prerequisite:

M E 547 (EDSGN 547, I E 547) Designing for Human Variability (3) Statistics, optimization and robust design methodologies to design products and environments that are robust to variability in users.
Effective: Summer 2009

M E 550 (E E 550) Foundations of Engineering Systems Analysis (3) Analytical methods are developed using the vector space approach for solving control and estimation problems; examples from different engineering applications.
Effective: Fall 2012
Prerequisite:

M E 554 Digital Process Control (3) Analysis and design of control systems with digital controllers, including PID, finite
settling time, state feedback, and minimum variance algorithms.
Effective: Fall 2007
Prerequisite:

M E 555 **Automatic Control Systems** (3) Advanced problems and techniques in the design of automatic control systems with emphasis on stability, controller design, and optimum performance.
Effective: Winter 1978
Prerequisite:

M E 556 (I E 556) **Robotic Concepts** (3) Analysis of robotic systems; end effectors, vision systems, sensors, stability and control, off-line programming, simulation of robotic systems.
Effective: Fall 1983
Prerequisite:

M E 558 (E E 584) **Robust Control Theory** (3) Fundamentals of Robust Control Theory with emphasis on stability and performance analysis and design.
Effective: Spring 2008
Prerequisite:

M E 559 (E E 587) **Nonlinear Control and Stability** (3) Design of nonlinear automatic control systems; phase-plane methods; describing functions; optimum switched systems; Liapunov stability; special topics in stability.
Effective: Spring 2008
Prerequisite:

M E 560 (E MCH 500) **Solid Mechanics** (3) Introduction to continuum mechanics, variational methods, and finite element formulations; application to bars, beams, cylinders, disks, and plates.
Effective: Fall 2007

M E 561 **Structural Optimization Using Variational and Numerical Methods** (3) Shape and size optimization of elastic structures, continuous and discrete solution methods and numerical algorithms, design of compliant mechanisms.
Effective: Summer 2004
Prerequisite:

M E 563 (E MCH 563) **Nonlinear Finite Elements** (3) Advanced theory of semidiscrete formulations for continua and structures; emphasizes dynamic and nonlinear problems.
Effective: Spring 1996
Prerequisite:

M E 564 **Elastic and Dynamic Stability of Structures** (3) An introduction to the concept and analysis methods of structural stability; structures under static/dynamic loading and high speed conditions.
Effective: Spring 2008
Prerequisite:

M E 565 **Optimal Design of Mechanical and Structural Systems** (3) Application of numerical optimization techniques to design mechanical and structural systems; design sensitivity analysis.
Effective: Summer 1988

M E 571 (AERSP 571, E MCH 571) **Foundations of Structural Dynamics and Vibration** (3) Modeling approaches and analysis methods of structural dynamics and vibration.
Effective: Fall 2007
Prerequisite:

M E 572 **Experimental Modal Analysis** (3) The development of structural dynamic models from experimental data, analytical and experimental vibration, analysis methods, laboratory techniques.
Effective: Fall 2007
Prerequisite:

M E 573 (ACS 573) **Designing Quiet Structures** (3) Course integrates structural dynamics, acoustics and optimization into unified method for designing quiet structures virtually for early product development.
Effective: Fall 2007
Prerequisite:

M E 577 (MATH 577) **Stochastic Systems for Science and Engineering** (3) The course develops the theory of stochastic processes and linear and nonlinear stochastic differential equations for applications to science and engineering.
Effective: Summer 1998
Prerequisite:

M E 578 (MATH 578) **Theory and Applications of Wavelets** (3) Theory and physical interpretation of continuous and discrete wavelet transforms for applications in different engineering disciplines.
Effective: Spring 2012
Prerequisite:

M E 580 **Advanced Dynamics of Machines** (3) Linear and torsional vibrations in and balancing of rotating and reciprocating machinery; exact analysis of stresses produced by these and other dynamic forces in machine parts.
Effective: Spring 2008
Prerequisite:

M E 581 **Simulation of Mechanical Systems** (3) Introduces computational fundamentals, including digital logic; programming language, basic numerical analysis and data processing, as applied to mechanical simulation techniques.

The Pennsylvania State University
Effective: Fall 2007
Prerequisite:

M E 582 Mechanism Synthesis (3) Geometrical and algebraic methods for synthesizing planar and spatial mechanisms, dynamics of spatial mechanism.
Effective: Fall 2007

M E 590 Colloquium (1) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2009

M E 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

M E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

M E 597A Electrochemical Engine Fundamentals (3) Theory and practice of battery and fuel cell systems for vehicle electrification, renewable energy storage, and smart grids.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

M E 597B Optimal Control of Energy Systems (3) Optimal control theory and application to energy generation, storage, transmission, and management systems.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

M E 597F Vehicle Hardware in the Loops Method (3) This course is required for the Graduate Automotive Technology Education (GATE) Program in High Power, In-Vehicle Energy Storage.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

M E 597I (NUC E 597I) Uncertainty Quantification in Scientific Computing (3) Advances in scientific computing have made modeling and simulation an important part of engineering and science. Scientific computing applications have to be supplemented by a comprehensive framework for estimating the predictive uncertainty. This course provides students with understanding and knowledge of comprehensive and systematic development of concepts, principles, and procedures for verification, validation and uncertainty quantification of models and simulations. The two types of uncertainty (aleatory and epistemic) will be discussed along with approaches for propagating both types of uncertainties through the model to the system response quantities of interest. The methods discussed in class will be applied to wide range of technical fields of engineering (including nuclear and mechanical engineering) and technology.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Effective: Fall 1983

M E 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

M E 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) For graduate students helping to teach the beginning thermodynamics course, M.E. 22. Must have taken M.E. 504.
Effective: Fall 1983

M E 603 Foreign Academic Experience (1 per semester/maximum of 12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 2002

M E 610 Thesis Research Off Campus (1-15) No Description.
Effective: Fall 1983

M E 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Medical Ethics Profe (MEP)

MEP 721 Medical Ethics and Professionalism (3) This course provides an introduction to bioethics and professionalism and provides a framework for understanding ethical issues in medicine.
Effective: Summer 2009
Prerequisite: Concurrent: CAR 722 REN 728 PLM 726 GI 729

Last Import from UCM: May 24, 2014 3:00 AM
Medical Home Curricu (MHC)

MHC 797 Medical Home Longitudinal Curriculum - Pilot (2) Medical Home Longitudinal Curriculum (3rd year pilot course).
Effective: Summer 2011
Prerequisite:

MHC 797A Medical Home Longitudinal Advanced Elective (5) The Medical Home Longitudinal Advanced Elective will provide continuity experiences for students to learn and witness the natural progression of illnesses, develop treatment options over time in a team format, as well as develop empathetic healing relationship with patients.
Effective: Summer 2011
Prerequisite:
Medical Triag&Resusc (MEDTR)

MEDTR 743 Triage and Resuscitation (5) This course provides knowledge and skills necessary for recognition and initial management of the patient with a potentially life-threatening illness or injury.
Effective: Spring 2010
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Medicine-Hy (MED)

MED 700 Clinical Clerkship in Medicine (15) To provide supervised clinical experience in the management of patients with acute and chronic illness.
Effective: Winter 1978
Prerequisite:

MED 715 Clinical Elective in Infectious Disease (5-10) Principles of human-host defense mechanism, host-parasite interactions, manifestations of various infections, systematic approach to problem solving, rational use of antibiotics.
Effective: Winter 1978
Prerequisite:

MED 721 Cardiology Elective for 3rd Year Students (5) Students learn non-invasive and invasive cardiology procedures, then work as clinical clerks on an in-patient cardiology service.
Effective: Spring 2010
Prerequisite:

MED 722 Medicine Acting Internship (5) Active participation on an advanced level in the diagnosis and management of patients admitted to the General Internal Medicine Services. More responsibility for decision-making and patient management is afforded subinterns than clinical clerks.
Effective: Spring 2009
Prerequisite:

MED 723 Clinical Elective in Gastroenterology (5-15) A program in clinical gastroenterology to expose student to basic GI physiology, pathophysiology, and management of gastrointestinal and liver problems.
Effective: Winter 1978
Prerequisite:

MED 724 Clinical Elective in Hematology (5-15) Provides students with the basic understanding of the fundamental problems of hematology.
Effective: Winter 1978
Prerequisite:

MED 725 Clinical Elective in Medical Oncology (5-15) Introduces students to cancer chemotherapy and immunotherapy with emphasis on workings of lymphoma and solid tumor patients.
Effective: Winter 1978
Prerequisite:

MED 727 Elective in Pulmonary Medicine (5-15) A clinical program in pulmonary medicine with emphasis in pulmonary physiology, pathophysiology, and patient diagnosis and management.
Effective: Winter 1978
Prerequisite:

MED 728 Clinical Program in Nephrology (5-10) Problems in clinical nephrology with emphasis placed on a pathophysiologic approach. Introduction to renal biopsy, peritoneal dialysis, and hemodialysis.
Effective: Spring 1992

MED 733 Cardiology Acting Internship (5) Advanced training in cardiovascular pathophysiology and diseases for fourth-year students functioning as acting interns.
Effective: Spring 2009
Prerequisite:

MED 734 Clinical Elective in Endocrinology (5-15) Expose students to a large number of clinical endocrine problems, familiarize them with diagnostic laboratory procedures used in evaluating patients.
Effective: Winter 1978
Prerequisite:

MED 736 Clinical Management of Obesity (5) This course provides exposure to the multifaceted area of obesity management, including diabetes, bariatric surgery, medical management and pediatrics
Effective: Fall 2008
Prerequisite:

MED 738 Clinical Elective in Cardiology--Consultation Service (5) Students evaluate and follow in-patients on general non-cardiology services with cardiac problems referred to the Cardiology Consult Service.
Effective: Spring 1997
Prerequisite:

MED 742A Allergy and Immunology Clinical Elective for 3rd Year Students (2.5) Allergy and Immunology Clinical Elective for 3rd year students.
Effective: Spring 2009
Prerequisite:

MED 745 Geriatric Elective (5) Students will perform assessments and develop care plans for hospitalized elders who are transitioning to home or long-term care setting.
Effective: Fall 2008
Prerequisite:
MED 747 (PED 747) **Pediatric Allergy, Asthma and Immunology Elective** (5) This course provides exposure to basic concepts for diagnosis and management of children and adults with allergic and immunologic diseases and respiratory and cutaneous abnormalities.
Effective: Fall 2012
Prerequisite:

MED 748 **Adult Rheumatology Elective** (5) This course provides exposure to concepts utilized in the diagnosis and management of rheumatic diseases in adults.
Effective: Spring 2009
Prerequisite:

MED 749 **Medical Intensive Care Acting Internship (4th year)** (5) Senior students assume Acting Intern responsibilities for Medical ICU level patients. This intense training is recommended for highly motivated students interested in a "hands-on" experience in the critical care unit.
Effective: Spring 2009
Prerequisite:

MED 757 **Hematology-Oncology Subinternship** (5) Students will function as acting interns in the inpatient hematology/oncology unit under the direction of senior housestaff fellows and faculty.
Effective: Spring 1993
Prerequisite:

MED 766 **Medicine Individual Studies** (5) Clinical or laboratory research on a selected topic by special arrangement with member of faculty who will act as preceptor.
Effective: Spring 2009
Prerequisite:

MED 796 **Medicine Individual Studies for 3rd Year** (2.5) Medicine individual studies for 3rd year.
Effective: Spring 2009

MED 797 **Medicine Special Topics** (5) Advanced clinical training in internal medicine or subspecialty --neurology, cardiology, clinical pharmacology, hematology, gastroenterology, endocrinology, pulmonary medicine, renal disease.
Effective: Spring 2010
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Medieval Studies (MEDVL)

MEDVL 411 (IL) (HIST 411) Medieval Britain (3) Political, cultural, and economic history of Britain from circa 400 to 1485 with an emphasis on the kingdom of England.
Effective: Spring 2006
Prerequisite:

MEDVL 413 (IL) (HIST 413) Medieval Celtic Studies (3) Celtic civilization from antiquity to the end of the middle ages.
Effective: Spring 2006
Prerequisite:

MEDVL 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

MEDVL 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

MEDVL 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2002
Prerequisite:

MEDVL 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 1995

MEDVL 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1995

MEDVL 499 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

MEDVL 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2002

MEDVL 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2002

MEDVL 595 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2002

MEDVL 596 Individual Studies (1-9) Creative projects, including nonthesis research that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2002

MEDVL 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2002

MEDVL 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2002

MEDVL 599 (IL) Foreign Studies (1-12 per semester; maximum of 24) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

MEDVL 600 Thesis Research (1-15) No description.
Effective: Summer 2002
MEDVL 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 2002

MEDVL 602 **Supervised Experience in College Teaching** (1-3 per semester, maximum of 6) Students experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Summer 2002

MEDVL 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Summer 2002

MEDVL 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 2002

MEDVL 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Summer 2002

Last Import from UCM: May 24, 2014 3:00 AM
Meteorology (METEO)

METEO 410 Advanced Topics in Weather Forecasting (3) Exploring highly specialized topics and techniques in weather forecasting that span from mesoscale to planetary spatial scales and short-term to long-range time scales.
Effective: Spring 2004
Prerequisite:

METEO 411 Synoptic Meteorology Laboratory (4) Techniques of analyzing synoptic scale weather situations; introduction to weather forecasting.
Effective: Spring 2004
Prerequisite:

METEO 413 Map Analysis (3) Analysis of actual surface weather observations, with emphasis on the Norwegian cyclone model, missing or bad data, and mesoscale phenomena.
Effective: Fall 2002
Prerequisite:

METEO 414 Mesoscale Meteorology (4) A survey of conceptual models and analysis techniques for mesoscale atmospheric features.
Effective: Summer 1996
Prerequisite:

METEO 415 Forecasting Practicum (3) Modern techniques in weather analysis and forecasting.
Effective: Spring 2011
Prerequisite:

METEO 416 Advanced Forecasting (3) Competitive, simulated, operational, real-time forecasting is covered.
Effective: Spring 1998
Prerequisite:

METEO 418W Topics in Mesoscale Meteorology (3) Topics in mesoscale meteorology will be investigated in an independent study environment through computer-based modules, papers, and semester project.
Effective: Fall 1995
Prerequisite:

METEO 419 Air Quality Forecasting (3) Issues relating to the prediction and dispersion of air pollutants as discussed.
Effective: Summer 2010
Prerequisite:

METEO 421 Atmospheric Dynamics (4) Balanced and unbalanced flows, vorticity, circulation and potential vorticity, an introduction to wave dynamics and stability analysis, and a quantitative discussion of the general circulation.
Effective: Fall 2009
Prerequisite: Concurrent: METEO 431 MATH 251 PHYS 212

METEO 422 Advanced Atmospheric Dynamics (3) Survey of advanced dynamical topics including instabilities, numerical modeling, and others of current interest.
Effective: Fall 2009
Prerequisite:

METEO 431 Atmospheric Thermodynamics (3) Classical thermodynamics applied to both the dry and the moist atmosphere.
Effective: Spring 2001
Prerequisite:

METEO 434 Radar Meteorology (3) Fundamental operating principles of radars, with application to observation of meteorological phenomena.
Effective: Fall 2001
Prerequisite: Concurrent: METEO 414

METEO 436 Radiation and Climate (3) Elements of earth-sun geometry, radiative transfer, photochemistry, remote sensing of the atmosphere, physical climatology, climate forcing.
Effective: Spring 2013
Prerequisite: Concurrent: METEO 431

METEO 437 Atmospheric Chemistry and Cloud Physics (3) Properties of aerosols and clouds, cloud nucleation and precipitation processes, atmospheric electricity, cloud and precipitation chemistry, biogeochemical cycles.
Effective: Spring 2013
Prerequisite:

METEO 440W Principles of Atmospheric Measurements (3) Theory and practices used in measurement and analysis of meteorological variables.
Effective: Fall 2010
Prerequisite:

METEO 446 Laboratory in Atmospheric Physics II (1) Experimental practices in cloud and aerosol physics, atmospheric electricity, atmospheric chemistry, radar meteorology.
Effective: Spring 1991
Prerequisite:
Prerequisite:

METEO 452 Tropical Meteorology (3) Atmospheric processes in the tropics; mass, heat, energy, momentum, and water vapor budgets, cumulus convection, hurricanes and other disturbances. Effective: Fall 1983
Prerequisite:

METEO 454 Introduction to Micrometeorology (3) Physical processes and their measurement in the lowest layers of the atmosphere; application to hydrology, plant systems, and air pollution. Effective: Fall 2009
Prerequisite:

METEO 455 Atmospheric Dispersion (3) The basic principles of atmospheric flow, introduction to the modeling of turbulent diffusion, and the use of EPA dispersion models. Effective: Spring 2011
Prerequisite:

METEO 460 Weather Risk and Financial Markets (3) This course will introduce the role that weather plays as a source of financial and operational risk for businesses, market and other institutions. Effective: Spring 2012
Prerequisite:

METEO 465 Middle Atmosphere Meteorology (3) A topical survey of physical, chemical, and dynamical processes at work in the stratosphere and mesosphere (middle atmosphere). Effective: Spring 1988
Prerequisite:

METEO 466 Planetary Atmospheres (3) A survey of planetary atmospheres and the chemical and physical processes by which they form and evolve. Effective: Spring 2001
Prerequisite:

METEO 469 From Meteorology to Mitigation: Understanding Global Warming (3) Introduction to global warming and climate change: the basic, science, projected impacts, and approaches to mitigation. Effective: Summer 2010
Prerequisite:

METEO 470 Climate Dynamics (3) The fundamental principles that govern Earth's climate and their relevance to past and future climate change. Effective: Fall 2012
Prerequisite:

METEO 471W Observing Meteorological Phenomena (3) Teaching the observational and interpretative skills needed to read the sky. Effective: Spring 1999
Prerequisite:

METEO 473 Application of Computers to Meteorology (3) Application of statistical and numerical methods to practical problems in meteorology. Effective: Spring 2008
Prerequisite:

METEO 474 Computer Methods of Meteorological Analysis and Forecasting (3) Distribution of scalars and vectors; sampling; regression and correlation in two and three dimensions; time series, statistical forecasting; forecast verification. Effective: Summer 2010
Prerequisite:

METEO 477 (E E 477) Fundamentals of Remote Sensing Systems (3) The review of fundamental physical properties leads into discussions of various techniques, including imaging, spectroscopy, radiometry, and active sensing. Effective: Spring 2008
Prerequisite:

METEO 480M Undergraduate Research (3) A research thesis will be prepared. A written and oral presentation required. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

METEO 480W Undergraduate Research (3) A research thesis will be prepared. A written and oral presentation required. Effective: Summer 1991
Prerequisite:

METEO 481 Weather Communications I (3) Multi-instructor weather communications survey including forecasting, science teaching and writing, television and radio broadcasting, climate studies, forensics, industrial applications. Effective: Spring 2004
Prerequisite:

METEO 482 Weather Communications II (3) Multi-instructor workshop designed to mimic real-life applications of weather communications in industry, broadcasting, the courtroom, and the classroom.
Effective: Spring 2002
Prerequisite:

METEO 483 Weather Communications III (3) Individualized course designed for in-depth study of weather communications in industry, broadcasting, the courtroom and/or the classroom.
Effective: Spring 2002
Prerequisite:

METEO 486 Pennsylvania Climate Studies (1-2 per semester/maximum of 3) An overview of the Pennsylvania State Climate Office and an introduction to various aspects of its operations.
Effective: Spring 2011
Prerequisite:

METEO 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2010

METEO 495A Meteorology Communications Internship (3 per semester/maximum of 6) Internship focusing on communication of weather forecasts or other meteorological information.
Effective: Summer 2010
Prerequisite:

METEO 495B Meteorology Private Sector Internship (3 per semester/maximum of 6) Internship focusing on meteorological problems and applications pursued by private sector companies.
Effective: Summer 2010
Prerequisite:

METEO 495C Meteorological Operations Internship (3 per semester/maximum of 6) Internship focusing on time-sensitive meteorological applications such as weather or climate forecasts that are produced.
Effective: Summer 2010
Prerequisite:

METEO 495D Meteorological International Internship (3 per semester/maximum of 6) Meteorological internship in an international setting.
Effective: Summer 2010
Prerequisite:

METEO 495E Meteorological Off-Campus Research Internship (3 per semester/maximum of 6) Off-campus meteorological internship focusing on a research project.
Effective: Summer 2010
Prerequisite:

METEO 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

METEO 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

METEO 497A Professional Development in the Atmospheric Sciences (1) Geared towards rising juniors, this one-credit course will offer practical advice and ample opportunities for reflection about one's standing within the major of Meteorology. The course will help to develop students professionally for a career in the atmospheric sciences and help to put them in the best possible position for their next step after graduate, be it a treasured job or graduate school. Topics will include professionalism and ethics, the value of improving presentation and writing skills, applying to graduate schools, career counseling, developing professional reference, etc. There will be guest speakers, including successful alumni, university staff and others whose participation will enhance the value of the class.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

METEO 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

METEO 501 Atmospheric Phenomena (3) Overview of the complex interactions within the atmosphere, ranging from molecular to global scale.
Effective: Spring 1998

METEO 511 The Weather From Global to Micro Scales (3) Conceptual models and underlying physics for weather phenomena on scales from the global general circulation to turbulence.
Effective: Fall 2010
Prerequisite:

METEO 512 Topics in Synoptic Meteorology (3) Application of atmospheric dynamics to the diagnosis and prediction of synoptic-scale weather.
Effective: Spring 2011

The Pennsylvania State University
Prerequisite:

METEO 516 Mesoscale Forecasting (3) Competitive, simulated, operational, real-time forecasting is covered.
Effective: Summer 2005

Prerequisite:

METEO 520 Geophysical Fluid Dynamics (3) Fundamentals of fluid dynamics with an emphasis on basic concepts that are important for atmospheric and oceanic flows.
Effective: Spring 2009

Prerequisite:

METEO 521 Dynamic Meteorology (3) An overview of the major large-scale atmospheric motions of weather and climate.
Effective: Spring 1996

Prerequisite:

METEO 523 Modeling the Climate System (3) An introduction to the mathematical description and modeling of atmospheric and oceanic motions.
Effective: Summer 2005

METEO 526 Numerical Weather Prediction (3) Finite difference and spectral methods, barotropic and baroclinic models, filtered and primitive equation models, synoptic-scale and mesoscale models.
Effective: Fall 1983

Prerequisite:

METEO 527 Atmospheric Wave Motion (3) From classical and physical hydrodynamics to the numerical prediction of wave motion in a baroclinic atmosphere.
Effective: Spring 1988

Prerequisite:

METEO 529 Mesoscale Dynamics (3) A survey of concepts of mesoscale systems including frontogenesis, symmetric instability, mountain waves, wave CISK, and frontal waves.
Effective: Spring 1988

Prerequisite:

METEO 531 Atmospheric Thermal Physics (3) Advanced treatment of thermodynamic principles as they relate to atmospheric cloud physics, radiation and dynamics.
Effective: Fall 2010

METEO 532 Chemistry of the Atmosphere (3) Review of chemical principles in gaseous and multiphase environments; characteristics of key atmospheric components and chemical systems in the lower and middle atmosphere.
Effective: Summer 2007

Prerequisite:

METEO 533 Cloud Physics (3) Overview of cloud systems; theories of phase changes in clouds and micro-physical mechanisms of precipitation formation; cloud electrification.
Effective: Fall 1993

Prerequisite:

METEO 535 Radiative Transfer (3) Fundamentals of electromagnetic radiation and its interaction with matter; radiation and climate, atmospheric remote sensing, and observable atmospheric optical phenomena.
Effective: Spring 1996

METEO 538 Atmospheric Convection (3) Properties of shallow and deep atmospheric convection and interactions between convection, the boundary layer, and larger-scale weather systems.
Effective: Summer 1995

METEO 554 Atmospheric Turbulence (3) An introduction to the physics, structure, modeling, representation, and measurement of atmospheric turbulence.
Effective: Spring 1996

Prerequisite:

METEO 563 Bioclimatology (3) Climatic phenomena in their relation to life.
Effective: Fall 1988

METEO 565 Physics of the Upper Atmosphere (3) Graduate version of material that is covered in METEO 465.
Effective: Fall 1983

Prerequisite:

METEO 574 Atmospheric Dynamics Seminar (1-3 per semester/maximum of 15) A weekly seminar course that focuses on current and past research problems in dynamic meteorology and oceanography.
Effective: Spring 1988

METEO 575 Climate Dynamics Seminar (1-3 per semester/maximum of 15) Review of evolving climate dynamics and earth system science, including ongoing departmental research.
Effective: Spring 1988
METEO 580 **Communication of Meteorological Research** (1) Methods for effective written and oral presentation of meteorological research are reviewed.  
Effective: Spring 1994

METEO 581 **Topics in Atmospheric Chemistry** (1-3 per semester/maximum of 15) Discussion of recent research papers in, and concepts pertinent to, acidic deposition, photochemical air pollution, and global chemical budgets.  
Effective: Spring 1988

METEO 582 **Ice and Snow Physics** (1-3 per semester/maximum of 15) Structure of ice and its electrical, optical, mechanical, and surface properties; snow formation in the atmosphere.  
Effective: Fall 1991

METEO 588 **Oceans and Climate Seminar** (2) A focussed discussion on some aspect of the ocean's role in the climate system. Theme to vary from semester to semester.  
Effective: Spring 2012

METEO 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.  
Effective: Spring 1988

METEO 591 **Development and Ethics in the Atmospheric Sciences** (1) Provide a forum for discussion of scholarship and research integrity as well as critical components of professional development.  
Effective: Fall 2010

METEO 592 **Research Proposal Preparation in the Atmospheric Sciences** (1) This course familiarizes graduate students with research rigor, proposals, and processes.  
Effective: Fall 2010

METEO 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Spring 1987

METEO 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.  
Effective: Spring 1987

METEO 597A **Tropical Meteorology** (3) A dynamic discussion of current topics related to tropical meteorology.  
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

METEO 597C **Global Carbon Cycle** (3) A research-literature based review of the processes governing atmospheric CO2. Terrestrial, oceanic, and anthropogenic processes will be considered.  
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

METEO 600 **Thesis Research** (1-15) No description.  
Effective: Fall 1983

METEO 601 **Ph.D. Dissertation Full-Time** (0) No description.  
Effective: Fall 1983

METEO 602 **Supervised Experiences in College Teaching** (1-3 per semester/maximum of 6) No description.  
Effective: Fall 1983

METEO 610 **Thesis Research Off Campus** (1-15) No description.  
Effective: Fall 1983

METEO 611 **Ph.D. Dissertation Part-Time** (0) No description.  
Effective: Fall 1983

METEO 801 **Understanding Weather Forecasting for Educators** (3) Fundamental principles of synoptic and physical meteorology, remote sensing and data analysis in the setting of mid-latitude weather forecasting.  
Effective: Summer 2008

METEO 802 **Fundamentals of Tropical Forecasting for Educators** (3) Applying atmospheric principles to the tropics, with
an emphasis on the development, structure, prediction, and destructive impact of hurricanes.
Effective: Summer 2008

Prerequisite:

METEO 803 **Fundamentals of Mesoscale Weather Forecasting for Educators** (3) Applying atmospheric principles to small-scale weather systems, with an emphasis on the conceptual modeling and short-range prediction of severe thunderstorms.
Effective: Summer 2008

Prerequisite:

METEO 804 **Special Topics in Weather Forecasting for Educators** (3) Exploring specialized weather forecasting topics and techniques spanning from mesoscale to planetary spatial scales and short-term to long-range time scales.
Effective: Summer 2008

Prerequisite:

METEO 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2007

Last Import from UCM: May 24, 2014 3:00 AM
Microbiology-Hy (MICRO)

MICRO 550 Medical Microbiology (2) Principles of medical microbiology: host-parasite relationships; structure and function of viruses, bacteria, and fungi as agents causing human disease.
Effective: Fall 1984

MICRO 551 Medical Microbiology (3) Principles of medical microbiology: host-parasite relationships; structure and function of viruses, bacteria, and fungi as agents causing human disease.
Effective: Fall 1984
Prerequisite:

MICRO 553 Science of Virology (4) Replication of viruses and effects on host cells, including oncogenic properties of viruses and cellular growth and survival pathways disrupted.
Effective: Fall 2011

MICRO 554 Principles of Immunology (2) Study of immune response. Nature of antigens, structure, function of antibodies, hypersensitivity, transplantation and tumor immunology, autoimmunity, and immunosuppression.
Effective: Fall 1983

MICRO 560 Concepts in Immunology (4) Selected lectures/readings in advanced immunological concepts; emphasis on lymphocyte function and applications to anti-viral/tumor immunity.
Effective: Fall 2011
Prerequisite:

MICRO 572 Literature Reports (1 per semester) Weekly analysis of current literature in microbiology.
Effective: Fall 1983

MICRO 581 Immunology A: Basic Concepts in Innate and Adaptive Immunity (1) Discuss innate immune mechanisms and the basic concepts and molecular/cellular components of adaptive immune system.
Effective: Fall 2007

MICRO 582 Immunology B: Adaptive Immunity (1) Discuss adaptive immune mechanisms.
Effective: Fall 2007
Prerequisite:

MICRO 583 Viral Vectors (1) Use and design of viral vectors in research and use in gene therapy; exploration of viral vector strengths and limitations.
Effective: Fall 2007
Prerequisite:

MICRO 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

MICRO 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

MICRO 597 Special Topics (1-9) Formal courses on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

MICRO 600 Thesis Research (1-15) No description.
Effective: Summer 1983

MICRO 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 1983

MICRO 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Teaching students laboratory techniques and tests that are used to identify microorganisms and to aid in the diagnosis of disease.
Effective: Spring 2005

MICRO 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 1983

MICRO 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 1983
Mineral Engr Mgmt (M E M)

M E M 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1994

M E M 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005

Effective: Fall 1983

Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Mineral Processing (MN PR)

MN PR 401 Mineral Process Engineering (3) Unit operations for processing particulate materials: comminution, screening, classification, slurry pumping, thickening, filtration, etc.; application to mineral processing plant design. Effective: Spring 2001
Prerequisite:

MN PR 413 Mineral Processing Laboratory (1) A laboratory study of the chemical and physical principles involved in practical mineral processing operations. Effective: Spring 1999
Prerequisite:

MN PR 424 Coal Preparation (3) Unit operations, flowsheets, and testing methods used in preparation of coal. Effective: Spring 1999
Prerequisite:

MN PR 425 Interfacial Phenomena and Flotation (3) Surface and interfacial phenomena related to flotation agglomeration, flocculation, and dispersion of particles. Application to mineral separation and related processes. Effective: Fall 2009
Prerequisite:

MN PR 426 (MATSE 426) Aqueous Processing (3) A study of the chemical and engineering principles pertinent to metal processing in aqueous systems: hydrometallurgical extraction, plating, materials preparation. Effective: Fall 2009
Prerequisite:

MN PR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1999

MN PR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 1999

MN PR 505 Physical Separations in Mineral Processing (3) Intensive study of theory and applications of gravity, magnetic, electrostatic, centrifugal, and other methods of mineral processing. Effective: Spring 1999
Prerequisite:

MN PR 507 (MATSE 560) Hydrometallurgical Processing (3) Fundamental physico-chemical factors underlying the aqueous extraction and recovery of metals and nonmetals from ores, minerals, and scrap metal. Effective: Spring 2003
Prerequisite:

MN PR 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1999

MN PR 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1999

MN PR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 1999

MN PR 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 1999

MN PR 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Spring 1999

MN PR 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in development of instructional materials, organizing and conducting lectures and laboratories and evaluating students in undergraduate level courses (1-499). Effective: Spring 1999
Effective: Spring 1999

MN PR 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 1999

Last Import from UCM: May 24, 2014 3:00 AM
Mining (MNG)

MNG 401 Introduction to Mining Operations (1) An introduction to underground and surface mining methods; selection of extraction equipment; relevant auxiliary operations. Not intended for Mining Engineering majors.
Effective: Spring 2008
Prerequisite:

MNG 404 Mine Materials Handling Systems (2) Analysis and design of materials-handling systems in mining, such as belt conveyors, locomotives, and hoisting.
Effective: Spring 2011

MNG 410 Underground Mining (3) Underground mine design; extraction techniques; description of auxiliary operations as they relate to the mining methods.
Effective: Fall 2012
Prerequisite:

MNG 411 Mine Systems Engineering (2) Applied operations research and systems methods for decision making in mine operations; time and systems studies to improve productivity.
Effective: Spring 1999
Prerequisite:

MNG 412 Mineral Property Evaluation (3) Ore reserve estimation using statistics and geostatistics, mine cost estimation, engineering economy concepts applied to mineral deposits.
Effective: Spring 1999
Prerequisite:

MNG 422 Mine Ventilation and Air Conditioning (3) Quality, quantity, and temperature-humidity control of the mine atmosphere; general mine environmental control.
Effective: Fall 2007
Prerequisite:

MNG 441 Surface Mining Systems and Design (3) Design of surface mining for noncoal and coal minerals; emphasis on quarry and strip mining planning parameters: unit operations, systems, haulroads, draglines, spoil stability, reclamation, legal requirements, and health and safety.
Effective: Spring 1999
Prerequisite:

MNG 451W Mining Engineering Project (1-5) Independent and integrative design and report of specific mine evaluation, layout, equipment selection, environmental control, permitting, and financial analysis.
Effective: Spring 1999
Prerequisite:

MNG 460 Mine Maintenance Engineering (3) Mine maintenance system design; maintenance planning and management; safety and cost analysis of maintenance programs.
Effective: Spring 1999

MNG 470 Mining and Geologic Structures (3) Study of geologic structures and their impacts on mining operations.
Effective: Summer 2009
Prerequisite:

MNG 497 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2008

MNG 515 Mine Systems Simulation (3) Principles and practices of probabilistic and deterministic simulation in the analysis of operating systems related to mills and mines.
Effective: Spring 1999
Prerequisite:

MNG 541 Surface Mine Equipment Selection Analysis (3) Design analysis and selection criteria for principal surface mine equipment, their interaction in operation, and auxiliary equipment requirements.
Effective: Spring 1999
Prerequisite:

MNG 554 Rock Mechanics Design (3) Engineering design process; design of mines, tunnels, slopes, and underground chambers; guided design concept; creativity and innovation; group design project.
Effective: Spring 1999
Prerequisite:

MNG 590 (EME 590, F SC 590, P N G 590) Colloquium (1-3) Continuing seminars which consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.
Effective: Spring 2009

MNG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual
basis and which fall outside the scope of formal courses.
Effective: Spring 1999

MNG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1999

MNG 597A Mining Engineering Studies (1) This course will include study of various upcoming technologies in mining industry as part of an individual study in close supervision by the course teachers.
Effective: Summer 2014 Ending: Summer 2014

MNG 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1999

MNG 599 (IL) Foreign Study (1-12 maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005

MNG 600 Thesis Research (1-15) No description.
Effective: Spring 1999

MNG 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1999

MNG 610 Thesis Research Off Campus (1-15) No description.
Effective: Spring 1999

MNG 611 Ph.D. Dissertation Part Time (0) No description.
Effective: Spring 1999

Mngmt Info Systms-Bd (MISBD)

MISBD 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

MISBD 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

Last Import from UCM: May 24, 2014 3:00 AM
**Molec Cellu&Intg Bio (MCIBS)**

MCIBS 590 **Honors Leadership** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2015 Future: Summer 2015

MCIBS 591 **Ethics in the Life Sciences** (1) An examination of integrity and misconduct in life sciences research, including issues of data collection, publication, authorship, and peer review.
Effective: Summer 2015 Future: Summer 2015

MCIBS 592 **Current Research Seminar** (2) This course uses a weekly biological seminar as a springboard for discussion of a research topic of high current interest.
Effective: Summer 2015 Future: Summer 2015

MCIBS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2015 Future: Summer 2015

MCIBS 600 **Thesis Research** (1-15) No description.
Effective: Summer 2015 Future: Summer 2015

MCIBS 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 2015 Future: Summer 2015

Molecular Medicine (M M)

M M 596 Individual Studies (1-4 per semester/maximum of 36) M M Individual Studies.
Effective: Fall 2012

M M 597 Special Topics (1-3 per semester/maximum of 36) Special topics within the Molecular Medicine Graduate program.
Effective: Fall 2012

M M 600 Thesis Research (1-9 per semester/maximum of 36) Laboratory work on thesis project.
Effective: Summer 2012

Last Import from UCM: May 24, 2014 3:00 AM
Molecular Toxicology (M T)

M T 596 Individual Studies (1-3 per semester/maximum of 6) Laboratory Rotations for first year students. Effective: Summer 2012

M T 600 Thesis Research (1-9 per semester/maximum of 36) Laboratory work on thesis project. Effective: Summer 2012

M T 601 Thesis Preparation (0) MT full time thesis preparation. Effective: Summer 2012

Last Import from UCM: May 24, 2014 3:00 AM
Mstr Law Courses (LLMLW)

LLMLW 900 Introduction to U.S. Legal Systems (2) To develop a good foundation for the LL.M. student's other coursework, this course introduces the United States court system, the role of the Constitution in the United States legal system, and other foundational materials in United States law. The goal is to introduce students to distinctive aspects and/or fundamental principles in U.S. law. Enrollment in this course is limited to LL.M. candidates. Effective: Fall 2011

LLMLW 901 LLM Legal Analysis, Writing and Research (2) This course explores U.S. common law analytic methods and discourse. Students will analyze cases and statutes to solve client problems. Students will draft objective memoranda and other documents to communicate their legal analysis in writing. Students will also learn the basics of U.S. legal research. Effective: Fall 2011

LLMLW 902 Advanced LLM Legal Analysis Writing & Research (2) Building on the LL.M. Legal Analysis, Writing and Research course, students will develop common law communication and research skills in the persuasive writing/advocacy context. Students will also develop effective client letter writing skills in a U.S. legal setting. The final portion of the course will contract drafting. Effective: Spring 2012

LLMLW 903 Introduction to Common Law Analysis and Language (2) This course introduces students to fundamental concepts of U.S. common law analysis and methods. The course will explore the role cases play within a common law system, including how they interact with other sources of law, as well as the methods common law lawyers use to analyze cases. Students will apply this knowledge to solve real legal problems while at the same time building language skills for clear legal communications. Effective: Spring 2014

LLMLW 904 US Common Law Methods (2-4) The course is for LL.M. students who speak English as a second language. It serves as a companion to a substantive law course, e.g., Constitutional Law I. Students will build skills in analyzing cases, applying case holdings to hypothetical facts and understanding the material presented in the substantive law course. Also, students will learn and practice skills necessary for success in law school, e.g., preparation of effective case briefs, class notes, and course outlines. Effective: Summer 2013

LLMLW 905 LL.M. Scholarly Writing Workshop (1) This course provides LL.M. students with the framework for developing a thesis, conducting research and producing a significant scholarly paper. In an interactive workshop setting, students will discuss progress, and receive feedback from faculty and fellow students on: (1) identification and refinement of a thesis; (2) developing and implementing a research plan; (3) appropriate use of authority, including legal citation form; (4) developing and refining a critical perspective and scholarly argument. Exemplary papers selected by faculty may be published in the law school's digital repository. Effective: Spring 2013

LLMLW 906 U.S. Constitutional Law and Analysis (3) This course will examine the roles of the U.S. executive, legislative and judicial branches in determining the limits of individual and civil rights under the U.S. Constitution. It will also introduce LLM-level international students to analytical methods commonly used by U.S. lawyers with a focus on U.S. constitutional law. The goals of the course are to introduce students to U.S. constitutional law and to provide them with the analytical and English language skills necessary to succeed in a U.S. law school. Effective: Spring 2014

LLMLW 907 Introduction to U.S. Business Associations and Commercial Law (3) This course will examine common forms of business entities in the U.S. and the legal structure in which the entities operate. The course will introduce commercial law frequently encountered in business, including sales, negotiable instruments, and secured transactions. The course will require analysis of case law and statutory interpretation. Effective: Fall 2013

LLMLW 908 Special Topics (4) Special Topics Effective: Spring 2012

LLMLW 909 Foundations of Business Law (2) This course explores the sources and core concepts of U.S. business and commercial law including the common law of contractual obligation, sales of goods and payment systems under the Uniform Commercial Code, business entity law, and an introduction to international business transactions. It also considers how lawyers facilitate business transactions and add value to their clients' business operations. Students will read and discuss cases and statutes, and will practice negotiating business disputes and drafting agreements. Effective: Summer 2014 Ending: Summer 2014

LLMLW 910 Introduction to U.S. Common Law and Language (2) This course introduces students to the U.S. legal...
system. Students will learn to read and analyze U.S. cases, statutes, regulations, and constitutional provisions within the context of the common law system. Finally, students will use these analytical skills to write and speak about their legal analysis in English. Even for American students, the language of law is challenging. Participants will become immersed in listening, reading, speaking, and writing English. Participants will spend time in class and in tutorials with linguistic experts and will be expected to spend evening hours reading, writing, and on group assignments.

**Effective: Summer 2014 Ending: Summer 2014**

**LLMLW 997C Contracts and Arbitration (2)** This course provides an introduction to the elements of contract formation in the American common law. It also addresses the problems associated to the creation of unilateral contracts, in particular, the integration of arbitral clauses and class action waivers in consumer contracts. The incorporation of these provisions raises a problem of enforceability. The course then considers the latest U.S. Supreme Court opinions on the topic of arbitration in these types of contracts. Students, then, will be asked to make an oral presentation defending both sides of the issue.

**Effective: Summer 2014 Ending: Summer 2014**

Last Import from UCM: May 24, 2014 3:00 AM
Muscul Medicine-Hy (MSC)

MSC 727 Musculoskeletal Medicine (3) Interdisciplinary - Medical Education
Effective: Spring 2003
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Musculoskeletal Syst (MSK)

MSK 723 Musculoskeletal System (1-2) Course covers key concepts of anatomy, embryology, histology, biochemistry, physiology, pathology, pharmacology, and clinical medicine of bone, joint, and connective tissues.
Effective: Summer 2014
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Music (MUSIC)
Individual instruction in technique, literature, and pedagogy is offered in six categories covering eighteen instruments:

BRASS: Trumpet, French horn, trombone, euphonium, tuba
KEYBOARD: Piano, organ
STRINGS: Violin, viola, violoncello, doublebass
WOODWINDS: Flute, oboe, clarinet, bassoon, saxophone
PERCUSSION
VOICE

For each instrument individual instruction is offered to different types of students at different levels:

Primary instrument: Student in B.A. (Music) and B.S. (Music Ed) Levels I-VII
Performance instrument: Students in B.Mus. Level I-VII
Secondary instrument: Nonmajor students or others using this as secondary instrument.

The courses are designated according to a particular pattern for identification on the student’s transcript and in the Schedule of Classes. Applied music fees are required for individualized instruction: $175 for a 1-credit course; $250 for a 2-credit course; $250 for a 3-credit course. Examples of listings:

MUSIC 400J Solo Recital (1) Required recital for Performer’s Certificate.
Effective: Fall 2012
Prerequisite:

MUSIC 412 Jazz Pedagogy (2) The development of advanced skills in pedagogy for teaching jazz bands.
Effective: Summer 1994
Prerequisite:

MUSIC 414 String Pedagogy (1-2) The development of skills in pedagogy for teaching strings.
Effective: Spring 1992
Prerequisite:

MUSIC 415 Woodwind Pedagogy (1-2) The development of skills in pedagogy for teaching woodwinds.

The Pennsylvania State University
MUSIC 416 Brass Pedagogy (1-2) The development of skills in pedagogy for teaching brass.
Prerequisite: MUSIC 416
Effective: Spring 1992

MUSIC 417 Percussion Pedagogy (1-2) The development of advanced skills in pedagogy for teaching percussion.
Prerequisite: MUSIC 417
Effective: Summer 1992

MUSIC 418 Voice Pedagogy (2) Analysis of techniques of teaching voice and studies of related music literature and pedagogical writings.
Prerequisite: MUSIC 418
Effective: Spring 2004

MUSIC 419 Piano Pedagogy I (2) Analysis of beginning teaching methods and teaching strategies for children.
Prerequisite: MUSIC 419
Effective: Spring 1997

MUSIC 420 Song Writing and Recording (3) Song composition, arranging and recording in a variety of style genres.
Prerequisite: MUSIC 420
Effective: Spring 2011

MUSIC 421 Jazz Combo Class (1 per semester/maximum of 8) Study and performance of small group jazz.
Prerequisite: MUSIC 421
Effective: Fall 2013

MUSIC 422 Jazz Harmony and Arranging (3) Analysis and composition of jazz tunes and chord progressions; instrumental and vocal arranging in the jazz idiom.
Prerequisite: MUSIC 422
Effective: Fall 1983

MUSIC 424 Piano Pedagogy II (2) Analysis of techniques of teaching intermediate-early advanced level piano and studies of music literature and pedagogical writings.
Prerequisite: MUSIC 424
Effective: Spring 1997

MUSIC 425 Advanced Voice Pedagogy (2) Analysis of techniques of teaching voice, supervised teaching, studies of studio materials and related topics.
Prerequisite: MUSIC 425
Effective: Spring 2004

MUSIC 429 Aural Review for Graduate Students (1) An intensive review of the aural skills required for a theoretical understanding of 18th- and 19th-century music.
Prerequisite: MUSIC 429
Effective: Summer 1994

MUSIC 431 ADVANCED TONAL ANALYSIS (2-3) Advanced techniques of musical analysis.
Prerequisite: MUSIC 431
Effective: Fall 1996

MUSIC 432 Graduate Review of Twentieth-Century Analysis (2-3) The theory and analysis of style in music of the twentieth century.
Prerequisite: MUSIC 432
Effective: Fall 1997

MUSIC 433 Advanced Analysis of Twentieth Century Music (2-3) In-depth studies of selected twentieth-century repertoires and/or analytical models.
Prerequisite: MUSIC 433
Effective: Summer 1996

MUSIC 435 Score Reading (1) Introduction in score reading at the keyboard.
Prerequisite: MUSIC 435
Effective: Spring 1991

MUSIC 441W Emphasis in Elementary General and Choral Music (3) Selection and application of materials, methods, teaching and assessment strategies for elementary general and choral music settings.
Prerequisite: MUSIC 441W
Effective: Spring 2011

Prerequisite: MUSIC 442W
Effective: Fall 2013

MUSIC 444W Emphasis in Elementary and Intermediate Band (3) Examination and application of teaching strategies and materials for students planning to teach band in the elementary and middle schools.
Prerequisite: MUSIC 444W
Effective: Spring 2011

MUSIC 445W Emphasis in High School Band (3) Examination and application of teaching strategies and materials for students planning to teach high school bands.

The Pennsylvania State University
MUSIC 446W Emphasis in Strings and Orchestra (3) Development of teaching techniques for instructing elementary and secondary string/orchestra student musicians for music education majors. Effective: Spring 2011
Prerequisite:

MUSIC 450 Teaching Marching Band (2) Traditional and contemporary drill design principles, show development strategies, instructional techniques, and organizational procedures involved in teaching marching band. Effective: Fall 2007
Prerequisite:

MUSIC 451 Computer Programming for Musicians (3 per semester/maximum of 12) In-depth study of music programming techniques. Effective: Spring 2011
Prerequisite:

MUSIC 452 Computer Music Synthesis (3) Use of sound synthesis software for music creation. Effective: Spring 2013
Prerequisite:

MUSIC 453 Recording Studio Training (1) Training in how to use a professional multi-track recording studio. Effective: Summer 2013
Prerequisite:

MUSIC 455 Technology in Music (1-3:1.5:1.5) Survey of how musical information is stored and processed in computer systems. Effective: Spring 2008
Prerequisite:

MUSIC 458 Electronic Music Composition (3) An introduction to the art of composition in the electronic audio medium. Effective: Spring 2011
Prerequisite:

MUSIC 460 Teaching Musical Cultures (2) Exploration of the world's musical cultures and the implication of and procedures for teaching multicultural music. Limited to upper division music majors or permission of program. Effective: Summer 2006
Prerequisite:

MUSIC 461W Studies in Music History: Antiquity to 1600 (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from antiquity to 1600, with emphasis on writing and research. Effective: Fall 2010
Prerequisite:

MUSIC 462W Studies in Music History: 1550-1750 (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from 1550-1750, with emphasis on writing and research. Effective: Fall 2010
Prerequisite:

MUSIC 463W Studies in Music History: 1700-1900 (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from 1700-1900, with emphasis on writing and research. Effective: Fall 2010
Prerequisite:

MUSIC 464W Studies in Music History: 1850-Present (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from 1850 to the present, with emphasis on writing and research. Effective: Fall 2010
Prerequisite:

MUSIC 465 Advanced Conducting I (3) Advanced instruction in conducting; conducting techniques specific to instrumental or choral music; emphasis on score study and rehearsal technique. Effective: Summer 1994
Prerequisite:

MUSIC 466 Advanced Conducting II (2 per semester/maximum of 8) Standard scores of symphonies, tone poems, operas, oratorios, and shorter vocal and instrumental works studied from the viewpoint of the conductor. Effective: Spring 1995
Prerequisite:

MUSIC 467 Opera Workshop (1-3 per semester/maximum of 6) History, analysis, and production of operas from sixteenth century to present. Effective: Spring 2001
Prerequisite:

MUSIC 468 Acting for Singers (2 per semester/maximum of 4) To help students develop authentic and specific characters/portrayals on stage through physical and emotional awareness. Effective: Fall 2008
Prerequisite:

MUSIC 471 Structural and Sixteenth-Century Counterpoint (2) Advanced species counterpoint and its application to the
sixteenth-century style.

Effective: Fall 1983
Prerequisite:

MUSIC 472 Eighteenth-Century Counterpoint (2) Imitative and nonimitative counterpoint in the style of Bach.
Effective: Fall 1983
Prerequisite:

MUSIC 473J Composition VII (3) Composition instruction for fourth-year composition majors.
Effective: Fall 2012
Prerequisite:

MUSIC 474J Composition VIII (3) Composition instruction for fourth-year composition majors.
Effective: Fall 2012
Prerequisite:

MUSIC 476W B.A. Senior Project (3) A semester project appropriate to student's option in B.A. program (e.g., research paper, performance with program notes, or related paper).
Effective: Spring 1992
Prerequisite:

MUSIC 478 Vocal Literature (3) Introduction to the literature for solo voice in opera, oratorio, cantata, art song, and chamber music from the baroque to the present.
Effective: Spring 1997
Prerequisite:

MUSIC 480 Opera Literature (3) Studies in the development of the opera from 1600 to the present, treating both libretto and music.
Effective: Spring 1997
Prerequisite:

MUSIC 481 Keyboard Literature (3) Studies in the development of keyboard music and instruments; a survey of all eras using listening, analysis, and performance.
Effective: Spring 1997
Prerequisite:

MUSIC 483 Seminar in Voice Pedagogy (2) Survey of literature relevant to the teaching of voice from historical sources through recent pedagogical scholarship.
Effective: Spring 2004
Prerequisite:

MUSIC 485 Chamber Music Literature (3) Survey of chamber music for strings, winds, and brass instruments from the mid-16th century to the present day.
Effective: Spring 1997
Prerequisite:

MUSIC 487 Orchestral Literature (3) Survey of orchestral literature.
Effective: Spring 1997
Prerequisite:

MUSIC 488 Studies in the Major Performance Area (1-2) Selected studies in music literature specific to the student's major performance area. Will include research, analysis and performance.
Effective: Spring 2011

MUSIC 489 Studio and Recital Accompaniment (1 per semester/maximum of 4) Advanced keyboard accompaniment of student soloists in the studio and in public performance under faculty supervision.
Effective: Fall 1983
Prerequisite:

MUSIC 491 Advanced Chamber Ensemble (1 per semester/maximum of 4) Preparation and performance of advanced chamber music.
Effective: Spring 2014
Prerequisite:

MUSIC 493 Sonata Duos (1 per semester/maximum of 4) Preparation for performance of advanced sonata literature for various individual instruments with keyboard.
Effective: Fall 1983
Prerequisite:

MUSIC 494 Research Topics (1-3 per semester/maximum of 6) Supervised research leading to senior thesis or project.
Effective: Fall 2012

MUSIC 494H Research Topics (1-3 per semester/maximum of 6) Supervised research leading to senior thesis or project.
Effective: Fall 2012

MUSIC 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2013

The Pennsylvania State University
MUSIC 495A **Student Teaching: General Music** (5-7) Observation and teaching under supervision. Effective: Fall 2001
Prerequisite: Concurrent: MUSIC 442

MUSIC 495B **Student Teaching: Choral Music** (5-7) Observation and teaching under supervision. Effective: Fall 2001
Prerequisite: Concurrent: MUSIC 443

MUSIC 495C **Student Teaching: Instrumental Music** (5-7) Observation and teaching under supervision. Effective: Fall 2001
Prerequisite: Concurrent: MUSIC 444

MUSIC 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

MUSIC 496H **Independent Studies - Honors** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2011

MUSIC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

MUSIC 497A **Survey Music History I** (3) For graduate students who need remedial work in music history. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

MUSIC 497B **Double Bass Excerpts** (1) This course is designed to study in depth a series of double bass excerpts from standard orchestral and opera repertoire. We will look at how to prepare a mock audition behind a screen at the end of the semester. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

MUSIC 497C **Viola Orchestral Excerpts** (1) An introduction to excerpts from the viola parts of standard orchestral literature required for professional orchestral auditions. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

MUSIC 497D **Review of Harmony/Analysis** (2) Devoted to in-depth study of tonal harmony and analysis, beginning with a review of diatonic progressions and continuing with chromatic harmony. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

MUSIC 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

MUSIC 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Spring 2007

MUSIC 500 **Introduction to Music Reference and Research Materials** (2) A study of musicological reference and research materials in English and Western European languages, with exercises in their use. Effective: Fall 1983
MUSIC 505 **Symphonic Wind Ensemble** (1 per semester, maximum of 4) Rehearsal and performance of wind repertoire and concert band literature. Effective: Spring 1993
Prerequisite:

MUSIC 507 **Philharmonic Orchestra** (1 per semester, maximum of 4) Orchestra rehearsal and performance. Effective: Spring 1993
Prerequisite:

MUSIC 508 **Chamber Orchestra** (1 per semester, maximum of 4) Chamber orchestra rehearsal and performance. Effective: Spring 1993
Prerequisite:

MUSIC 519 **Graduate Seminar in Intermediate Piano Pedagogy** (2) Graduate seminar in intermediate teaching repertoire and strategies for piano from the Baroque to the 21st century. Effective: Summer 2008
Prerequisite:

MUSIC 520 **Chamber Music for Strings** (1 per semester, maximum of 4) Preparation for performance of (advanced) chamber music literature involving primarily stringed instruments—quartets and quintets. Effective: Spring 1993
Prerequisite:

MUSIC 521 **Chamber Music for Woodwinds** (1 per semester, maximum of 4) Preparation for performance of (advanced) chamber music literature involving primarily woodwind instruments—quartets and quintets. Effective: Spring 1993
Prerequisite:

MUSIC 522 **Chamber Music for Brass** (1 per semester, maximum of 4) Preparation for performance of (advanced) chamber music literature involving primarily brass instruments—quartets and quintets. Effective: Spring 1993
Prerequisite:

MUSIC 523 **Sonata Duos** (1 per semester, maximum of 4) Preparation for performance of (advanced) sonata literature for various individual instruments with keyboard. Effective: Spring 1993
Prerequisite:

MUSIC 524 **Graduate Seminar in Advanced Piano Pedagogy** (2) Graduate seminar in advanced repertoire, history of piano pedagogy, and strategies for piano from the Baroque to the 21st century. Effective: Summer 2008
Prerequisite:

MUSIC 531 **Analytical Techniques** (3) Twentieth-century theories of tonal music other than Schenker; emphasis on motivic, thematic, metric, and rhythmic analysis. Effective: Spring 1992
Prerequisite:

MUSIC 532 **Schenkerian Analysis** (3) An intensive introduction to the analytical method developed by the Twentieth-century Austrian theorist and musicologist, Heinrich Schenker. Effective: Summer 2011
Prerequisite:

MUSIC 533 **The Pedagogy of Undergraduate Theory and History** (2) A study of approaches to the teaching and learning of music theory (written and aural skills) and history. Effective: Summer 1995
Prerequisite:

MUSIC 535J **Composition** (1-4) Composition of vocal, instrumental, and electronic media and preparation of compositions for performance. Effective: Spring 2013
Prerequisite:

MUSIC 560J **Choral Conducting** (2 per semester/maximum of 16) Study of choral conducting techniques, comprehensive score analysis, and supervised rehearsal and performance practicum. Effective: Spring 2013
Prerequisite:

MUSIC 561J **Orchestral Conducting** (2 per semester, maximum of 16) Study of orchestral conducting technique, comprehensive score analysis, and supervised rehearsal and performance practicum. Effective: Spring 2013
Prerequisite:

MUSIC 562J **Band/Wind Ensemble Conducting** (2 per semester/maximum of 16) Study of band and wind ensemble conducting, comprehensive score analysis, and supervised rehearsal and performance practicum. Effective: Spring 2013

MUSIC 565 **Studio and Recital Accompaniment** (1 per semester, maximum of 4) Keyboard accompaniment of student...
soloists in the studio and in public performance, under faculty supervision.

Effective: Spring 1993

Prerequisite:

MUSIC 572 **Seminar in Musicology** (3 per semester/maximum of 9) Research in selected areas of music history.

Effective: Fall 1983

MUSIC 573 **Integrative Seminar in Music Theory and History** (3 per semester/maximum of 9) Special topics (composer, style, genre) taught from both theoretical and historical perspectives.

Effective: Fall 2000

Prerequisite:

MUSIC 574 **Seminar in Music Theory** (3) Study of analytical techniques, aesthetics, writings, in music theory, music cognition, musical sketches, and mathematical models taught from a theory perspective.

Effective: Summer 2012

Prerequisite:

MUSIC 575 **Integrative Conducting Seminar** (1 per semester/maximum of 2) A seminar for choral, orchestral, and band/wind ensemble graduate conducting majors, taught by conducting faculty in all three areas.

Effective: Summer 1998

MUSIC 580 **Studies in Orchestral Literature** (2 per semester/maximum of 8) Selected studies in orchestral literature from the seventeenth century to the present.

Effective: Spring 2013

MUSIC 582 **Studies in Band/Wind Ensemble Literature** (2 per semester/maximum of 8) Selected studies in band and wind ensemble literature from the Renaissance to the present.

Effective: Spring 2013

MUSIC 583 **Studies in Choral Literature** (2 per semester, maximum of 8) Selected studies in choral literature of all types from the Renaissance to the present.

Effective: Fall 2012

MUSIC 585 **Graduate Seminar in Keyboard Music 1710 to 1820** (2) Seminar in music for keyboards (organ, harpsichord, pianoforte) from the early works of J.S. Bach (c. 1710) to late Beethoven.

Effective: Summer 2008

Prerequisite:

MUSIC 586 **Graduate Seminar in Piano Music 1820-1920** (2) Seminar in music for pianoforte from the early works of Schubert, circa 1820, to Rachmaninoff (Romantic and post-Romantic).

Effective: Summer 2008

Prerequisite:

MUSIC 587 **Graduate Seminar in Piano Music 1890-Present** (2) Seminar in modern music for pianoforte from the early works of Debussy (circa 1890) to the present day.

Effective: Summer 2008

Prerequisite:

MUSIC 588 **Seminar in Music Literature of the Major Performance Area** (1-3) Selected studies in music literature specific to the student's major performance area. Will include research, analysis, and performance.

Effective: Summer 1991

MUSIC 589 **Seminar in Piano Pedagogy** (2) Selected variable topics in piano pedagogy; includes research, performance and discussion of appropriate literature, and class participation.

Effective: Summer 1992

Prerequisite:

MUSIC 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 1995

MUSIC 594 **Master's Paper Research** (1-6) Investigation of a specific problem in music or music education.

Effective: Fall 1983

MUSIC 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Summer 1994

Prerequisite:

MUSIC 595A **Internship in Piano Pedagogy** (1) Piano performance and pedagogy majors observe experienced teachers and gain supervised teaching experience. Gradually assume responsibility for the lessons of one or two students.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Prerequisite:
MUSIC 595B Internship in College Teaching (2) Identify goals for undergraduate courses in general music; develop and structure learning experiences in music for students in higher education. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

MUSIC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

MUSIC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Spring 1987

MUSIC 600 Thesis Research (1-15) No description. Effective: Fall 1983

MUSIC 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Fall 1983

MUSIC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience for teaching assistants in music. Effective: Fall 1983

MUSIC 610 Thesis Research Off Campus (1-15) No description. Effective: Fall 1983

MUSIC 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Fall 1983

MUSIC 801J Doctoral Solo Recital (DMA) (2 per semester/maximum of 4) Culminating solo recital(s) of artist-level repertoire; may be repeated with different repertoire. Effective: Spring 2013
Prerequisite:

MUSIC 802J DMA Lecture-Recital Monograph (1) Preparation of a monograph to be text of the DMA lecture-recital; must be approved prior to performance. Effective: Fall 2012
Prerequisite:

MUSIC 803J Performance of the DMA Lecture-Recital (2) Performance of the D.M.A. lecture-recital (the lecture monograph to be pre-approved as MUSIC 802). Effective: Fall 2012
Prerequisite:

MUSIC 804J Chamber Music Recital (DMA) (1 per semester/maximum of 2) Recital devoted to chamber music (including song groups or cycles for voice and piano). May be repeated. Effective: Spring 2013
Prerequisite:

MUSIC 805J DMA Final Recital (3) Final, culminating solo recital of artist-level repertoire; independently prepared. Effective: Fall 2012
Prerequisite:

MUSIC 810 Choral Ensemble (1 per semester/maximum of 4) Rehearsal and performance of choral music. Effective: Spring 2012

MUSIC 811 Instrumental Ensemble (1 per semester/maximum of 6) Rehearsal and performance of instrumental music. Effective: Summer 2012

MUSIC 891J Graduate Degree Performance (1) A juried recital performance for students majoring in performance, composition, or conducting. Effective: Spring 2013
Prerequisite:

MUSIC 896 Individual Studies (1-9 per semester/maximum of 18) Creative projects with a professional orientation, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2013
Music - Brass (BRASS)

BRASS 420J Trumpet: Primary VII (2) Individual instruction in trumpet one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

BRASS 421J French Horn: Primary VII (2) Individual instruction in French horn one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

BRASS 422J Trombone: Primary VII (2) Individual instruction in trombone one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

BRASS 423J Euphonium: Primary VII (2) Individual instruction in euphonium/baritone one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

BRASS 424J Tuba: Primary VII (2) Individual instruction in tuba one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

BRASS 430J Trumpet: Performance VII (3) Individual instruction in trumpet one hour per week. For B.Mus. trumpet performance majors.
Effective: Fall 1983
Prerequisite:

BRASS 431J French Horn: Performance VII (3) Individual instruction in French horn one hour per week. For B.Mus. French horn performance majors.
Effective: Fall 1983
Prerequisite:

BRASS 432J Trombone: Performance VII (3) Individual instruction in trombone one hour per week. For B.Mus. trombone majors.
Effective: Fall 1983
Prerequisite:

BRASS 433J Euphonium: Performance VII (3) Individual instruction in euphonium/baritone one hour per week. For B.Mus. euphonium/baritone majors.
Effective: Fall 1983
Prerequisite:

BRASS 434J Tuba: Performance VII (3) Individual instruction in tuba one hour per week. For B.Mus. tuba majors.
Effective: Fall 1983
Prerequisite:

BRASS 470J Trumpet: Primary VIII (2) Individual instruction in trumpet one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

BRASS 471J French Horn: Primary VIII (2) Individual instruction in French horn one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

BRASS 472J Trombone: Primary VIII (2) Individual instruction in trombone one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

BRASS 473J Euphonium: Primary VIII (2) Individual instruction in euphonium/baritone one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

BRASS 474J Tuba: Primary VIII (2) Individual instruction in tuba one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

BRASS 480J Trumpet: Performance VIII (3) Individual instruction in trumpet one hour per week. For B.Mus. trumpet performance majors.
Effective: Fall 1983
Prerequisite:

BRASS 481J French Horn: Performance VIII (3) Individual instruction in French horn one hour per week. For B.Mus. French horn performance majors.
Effective: Fall 1983
Prerequisite:

BRASS 482J Trombone: Performance VIII (3) Individual instruction in trombone one hour per week. For B.Mus. trombone majors.
Effective: Fall 1983
Prerequisite:

BRASS 483J Euphonium: Performance VIII (3) Individual instruction in euphonium/baritone one hour per week. For B.Mus. euphonium/baritone majors.
Effective: Fall 1983
Prerequisite:

BRASS 484J Tuba: Performance VIII (3) Individual instruction in tuba one hour per week. For B.Mus. tuba majors.
Effective: Fall 1983
Prerequisite:

BRASS 500J Trumpet: Secondary (1) Individual instruction in trumpet one-half hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 501J French Horn: Secondary (1) Individual instruction in French horn one-half hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 502J Trombone: Secondary (1) Individual instruction in trombone one-half hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 503J Euphonium: Secondary (1) Individual instruction in euphonium/baritone one-half hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 504J Tuba: Secondary (1) Individual instruction in tuba one-half hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 510J Trumpet: Secondary (2) Individual instruction in trumpet one hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 511J French Horn: Secondary (2) Individual instruction in French horn one hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 512J Trombone: Secondary (2) Individual instruction in trombone one hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 513J Euphonium: Secondary (2) Individual instruction in euphonium/baritone one hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 514J Tuba: Secondary (2) Individual instruction in tuba one hour per week.
Effective: Fall 1983
Prerequisite:

BRASS 530J Trumpet: Performance (4 per semester/maximum of 16) Individual instruction in trumpet one hour per week. For graduate trumpet performance majors.
Effective: Fall 1986
Prerequisite:

BRASS 531J French Horn: Performance (4 per semester/maximum of 16) Individual instruction in French Horn one hour per week. For graduate French horn performance majors.
Effective: Fall 1986
Prerequisite:

BRASS 532J Trombone: Performance (4 per semester/maximum of 16) Individual instruction in trombone one hour per week. For graduate trombone majors.
Effective: Fall 1986
Prerequisite:

BRASS 533J Euphonium: Performance (4 per semester, maximum of 16) Individual instruction in euphonium one hour per week. For graduate euphonium majors.
Effective: Spring 1992
Prerequisite:
BRASS 534J **Tuba: Performance** (4 per semester/maximum of 16) Individual instruction in tuba two sessions per week. For graduate tuba performance majors.

**Effective:** Fall 1986

**Prerequisite:**

Last Import from UCM: May 24, 2014 3:00 AM
Music - Keyboard (KEYBD)

KEYBD 420J Piano: Primary VII (2) Individual instruction in piano one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

KEYBD 430J Piano: Performance VII (3) Individual instruction in piano one hour per week. For B.Mus. piano performance majors.
Effective: Fall 1983
Prerequisite:

KEYBD 470J Piano: Primary VIII (2) Individual instruction in piano one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

KEYBD 480J Piano: Performance VIII (3) Individual instruction in piano one hour per week. For B.Mus. piano performance majors.
Effective: Fall 1983
Prerequisite:

KEYBD 500J Piano: Secondary (1) Individual instruction in piano one-half hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

KEYBD 501J Organ: Secondary (1) Individual instruction in pipe organ one-half hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

KEYBD 510J Piano: Secondary (1) Individual instruction in piano one hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

KEYBD 530J Piano: Performance (4 per semester/maximum of 16) Individual instruction in piano one hour per week. For graduate piano performance majors.
Effective: Fall 1986
Prerequisite:

KEYBD 580J Piano Performance Doctoral/Artist Level (4) One-hour weekly piano lessons with jury examination at end of each semester; repeatable course; four semesters required.
Effective: Summer 2008

Last Import from UCM: May 24, 2014 3:00 AM
Music - Percussion (PERCN)

PERCN 420J Percussion: Primary VII (2) Individual instruction in percussion one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

PERCN 430J Percussion: Performance VII (3) Individual instruction in percussion one hour per week. For B.Mus. percussion majors.
Effective: Fall 1983
Prerequisite:

PERCN 470J Percussion: Primary VIII (2) Individual instruction in percussion one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

PERCN 480J Percussion: Performance VIII (3) Individual instruction in percussion one hour per week. For B.Mus. percussion majors.
Effective: Fall 1983
Prerequisite:

PERCN 500J Percussion: Secondary (1) Individual instruction in percussion one-half hour per week.
Effective: Fall 1983
Prerequisite:

PERCN 510J Percussion: Secondary (2) Individual instruction in percussion one hour per week.
Effective: Fall 1983
Prerequisite:

PERCN 530J Percussion: Performance (4 per semester/maximum of 16) Individual instruction in percussion one hour per week. For graduate percussion performance majors.
Effective: Fall 1986
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Music - String (STRNG)

STRNG 420J Violin: Primary VII (2) Individual instruction in violin one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

STRNG 421J Viola: Primary VII (2) Individual instruction in viola one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

STRNG 422J Violoncello: Primary VII (2) Individual instruction in violoncello one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

STRNG 423J Double Bass: Primary VII (2) Individual instruction in double bass one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

STRNG 430J Violin: Performance VII (3) Individual instruction in violin one hour per week. For B.Mus. violin performance majors.
Effective: Fall 1983
Prerequisite:

STRNG 431J Viola: Performance VII (3) Individual instruction in viola one hour per week. For B.Mus. viola performance majors.
Effective: Fall 1983
Prerequisite:

STRNG 432J Violoncello: Performance VII (3) Individual instruction in violoncello one hour per week. For B.Mus. violoncello performance majors.
Effective: Fall 1983
Prerequisite:

STRNG 433J Double Bass: Performance VII (3) Individual instruction in double bass one hour per week. For B.Mus. double bass performance majors.
Effective: Fall 1983
Prerequisite:

STRNG 470J Violin: Primary VIII (2) Individual instruction in violin one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

STRNG 471J Viola: Primary VIII (2) Individual instruction in viola one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

STRNG 472J Violoncello: Primary VIII (2) Individual instruction in violoncello one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

STRNG 473J Double Bass: Primary VIII (2) Individual instruction in double bass one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite:

STRNG 480J Violin: Performance VIII (3) Individual instruction in violin one hour per week. For B.Mus. violin performance majors.
Effective: Fall 1983
Prerequisite:

STRNG 481J Viola: Performance VIII (3) Individual instruction in viola one hour per week. For B.Mus. viola performance majors.
Effective: Fall 1983
Prerequisite:

STRNG 482J Violoncello: Performance VIII (3) Individual instruction in violoncello one hour per week. For B.Mus. violoncello performance majors.
Effective: Fall 1983
Prerequisite:

STRNG 483J Double Bass: Performance VIII (3) Individual instruction in double bass one hour per week. For B.Mus.
double bass performance majors.
Effective: Fall 1983
Prerequisite:

STRNG 500J Violin: Secondary (1) Individual instruction in violin one-half hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRNG 501J Viola: Secondary (1) Individual instruction in viola one-half hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRNG 502J Violoncello: Secondary (1) Individual instruction in violoncello one-half hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRNG 503J Double Bass: Secondary (1) Individual instruction in double bass one-half hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRNG 510J Violin: Secondary (2) Individual instruction in violin one hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRNG 511J Viola: Secondary (2) Individual instruction in viola one hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRNG 512J Violoncello: Secondary (2) Individual instruction in violoncello one hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRNG 513J Double Bass: Secondary (2) Individual instruction in double bass one hour per week. For students who qualify.
Effective: Fall 1983
Prerequisite:

STRNG 530J Violin: Performance (4 per semester/maximum of 16) Individual instruction in violin one hour per week. For graduate violin performance majors.
Effective: Fall 1986
Prerequisite:

STRNG 531J Viola: Performance (4 per semester/maximum of 16) Individual instruction in viola one hour per week. For graduate viola performance majors.
Effective: Fall 1986
Prerequisite:

STRNG 532J Violoncello: Performance (4 per semester/maximum of 16) Individual instruction in violoncello one hour per week. For graduate violoncello performance majors.
Effective: Fall 1986
Prerequisite:

STRNG 533J Double Bass: Performance (4 per semester/maximum of 16) Individual instruction in double bass one hour per week. For graduate double bass performance majors.
Effective: Fall 1986
Prerequisite:
Music - Voice (VOICE)

Effective: Fall 2006
Prerequisite:

VOICE 420J Voice: Primary VII (2) Individual instruction in voice one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

VOICE 430J Voice: Performance VII (3) Individual instruction in voice one hour per week. For B.Mus. voice performance majors.
Effective: Fall 1983
Prerequisite:

Effective: Fall 2006
Prerequisite:

VOICE 470J Voice: Primary VIII (2) Individual instruction in voice one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

VOICE 480J Voice: Performance VIII (3) Individual instruction in voice one hour per week. For B.Mus. voice performance majors.
Effective: Fall 1983
Prerequisite:

VOICE 500J Voice: Secondary (1) Individual instruction in voice one-half hour per week.
Effective: Fall 1983
Prerequisite:

VOICE 510J Voice: Secondary (2) Individual instruction in voice one hour per week.
Effective: Fall 1983
Prerequisite:

VOICE 530J Voice: Performance (4 per semester/maximum of 16) Individual instruction in voice one and one-half hours per week. For graduate voice performance majors.
Effective: Fall 1986
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Music - Woodwinds (WWNDS)

WWNDS 420J Flute: Primary VII (2) Individual instruction in flute one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

WWNDS 421J Oboe: Primary VII (2) Individual instruction in oboe one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

WWNDS 422J Clarinet: Primary VII (2) Individual instruction in clarinet one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

WWNDS 423J Bassoon: Primary VII (2) Individual instruction in bassoon one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

WWNDS 424J Saxophone: Primary VII (2) Individual instruction in saxophone one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite:

Effective: Fall 1983
Prerequisite:

WWNDS 530J Flute: Performance (4 per semester/maximum of 16) Individual instruction in flute one and one-half hour per week. For graduate flute performance majors.
Effective: Fall 1986
Prerequisite:

WWNDS 531J Oboe: Performance (4 per semester/maximum of 16) Individual instruction in oboe one hour per week. For graduate oboe performance majors.
Effective: Fall 1986
Prerequisite:

WWNDS 532J Clarinet: Performance (4 per semester/maximum of 16) Individual instruction in clarinet one hour per week. For graduate clarinet performance majors.
Effective: Fall 1986
Prerequisite:

WWNDS 533J Bassoon: Performance (4 per semester/maximum of 16) Individual instruction in bassoon one hour per week. For graduate bassoon performance majors.
Effective: Fall 1986
Prerequisite:

WWNDS 534J Saxophone: Performance (4 per semester/maximum of 16) Individual instruction in saxophone one hour per week. For graduate saxophone performance majors.
week. For graduate saxophone performance majors.
Effective: Fall 1986
Prerequisite:
Music Education (MU ED)

MU ED 440 Music Learning and Development (2) Psychological principles related to music learning processes and applications of those to teaching music.
Effective: Spring 2010
Prerequisite:

MU ED 540 Reflective Practice and Inquiry I (2) This course will develop students' reflection in and on teaching through gaining understanding of systematic inquiry and reflection paradigms.
Effective: Spring 2010

MU ED 541 Developing Music Curricula (2) Introduction to the process for developing music curricula for grades K-12 that reflects current theories/research data as well as state/national guidelines.
Effective: Fall 2009

MU ED 545 Psychological Foundations of Musical Behavior (3) Study of psychoacoustical effects of musical stimuli; emphasis on responses affecting learning musical ability, musical taste, and aesthetic reactions.
Effective: Fall 2009

MU ED 546 Assessment of Music Learning (2) Exploration of the unique processes, techniques, and challenges involved in the assessment of music learning.
Effective: Fall 2009

MU ED 547 Mentoring Novice Teachers (1 per semester/maximum of 2) Strategies for mentoring novice music teachers in peer teaching experiences and in K-12 school field experiences.
Effective: Summer 2010

MU ED 550 Reflective Practice and Inquiry II (2) This course will use systematic inquiry and reflection to assist students' in understanding the relevance of research methods in music education.
Effective: Spring 2010
Prerequisite:

MU ED 555 Doctoral Seminar in Music Education (1 per semester, maximum of 6) Forum for the discussion of problems in theory and design encountered in individual and group research projects.
Effective: Fall 2009
Prerequisite:

MU ED 557 Readings in the History of American Music Education (2) Intensive reading course on the history of American music education and the social, theological, and educational influences on the profession.
Effective: Fall 2009

MU ED 559 Contemporary Issues in Music Education (1-2) Consideration of the current political and pedagogical issues that influence curriculum development, teaching, and administration of K-12 music programs.
Effective: Fall 2009

MU ED 597 Special Topics (1-3 per semester/maximum of 9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2014

MU ED 895 Practicum in Music Teaching (1 per semester/maximum of 4) Field experiences in music teaching for graduate students in music education.
Effective: Summer 2012

Last Import from UCM: May 24, 2014 3:00 AM
Neural & Behav Sci (NBS)

NBS 723 Neural and Behavioral Science (1-2) This course is a multidisciplinary introduction to the human nervous system that integrates both basic sciences and clinical disciplines.
Effective: Summer 2014

NBS 725 Neural and Behavioral Science (13) Organized around the neural and behavioral sciences; builds on Year I knowledge.
Effective: Fall 1998
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Neuroscience-Hy (NEURO)

NEURO 501 Neuroscience Seminar (2 per semester/maximum of 8) This is a weekly seminar involving discussion of research approaches and methodologies used by guest speakers for the neuroscience seminar series. Effective: Summer 2014

NEURO 511 (ANAT 511) Neurobiology II (3) Structure and physiology of central and peripheral nervous system, including specific sense organs. Effective: Summer 1987

Prerequisite:

NEURO 512 Comparative Neuroanatomy (4) This course elucidates the structural organization of the nervous system and describes the evolutionary principles that guide brain development. Effective: Fall 2013

NEURO 515 (ANAT 515) Developmental Neurobiology (2) Development of the nervous system in all its aspects. Effective: Fall 1986

NEURO 520 Cellular and Molecular Neuroscience (3) An introduction to neurons, glia, and the molecular basis of brain function. Effective: Fall 1998

NEURO 522 Seminars in Neuroscience I (2) Study at the cellular, molecular, and metabolic level of selected subjects in neuroscience. Effective: Spring 2007

NEURO 523 Seminars in Neuroscience II (2) Study at the cellular, molecular, and metabolic level of selected subjects in neuroscience. Effective: Spring 2007

NEURO 530 Professional Development and Responsible Conduct in Science (1) An introduction to the professional skills necessary for careers in biomedical sciences. Effective: Spring 1999

NEURO 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students or outside speakers. Effective: Spring 1987

NEURO 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis. Effective: Spring 1987

NEURO 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

NEURO 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. Effective: Spring 1987

NEURO 597A Introduction to Neuroscience Research (2) This course will provide an introduction to neuroscience research and its relevance to neurological research. The course meets every Tuesday 2-5, Wednesday 6-9 and Fridays 12-3 and will consist of lectures, laboratory (human brain specimens, microscope slides, models and radiology), patient demonstrations and group discussions. Fundamentals of techniques used in research like various forms of microscopy and morphometry, histology, immunohistochemistry, microdialysis, stereotactic surgery, cell culture, electrophysiology, signal processing, tracer injections, brain imaging, optogenetics, behavioral assessments, drug treatments, stem cells, gene therapy and use of recombinant technology in neurosciences will be covered. Diseases and disease models covered include Spinal Cord Injury, Parkinson’s Disease, Drug Abuse, and Drug Addiction, Alzheimer’s disease, ALS macular degeneration and others. Effective: Summer 2014 Ending: Summer 2014
NEURO 600 Thesis Research (1-15) No Description.
Effective: Spring 1987

NEURO 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1987

NEURO 610 Thesis Research Off Campus (1-15) No Description.
Effective: Spring 1987

NEURO 611 Ph. D. Dissertation Part-Time (0) No Description.)
Effective: Spring 1987

NEURO 740 Neurology Clerkship (5) To teach the principles and skills underlying the recognition and management of the neurologic diseases that a general medical practitioner is most likely to encounter in practice.
Effective: Summer 2006
Prerequisite:

NEURO 796 Neurology Individual Studies (5) Neurology individual studies.
Effective: Spring 2009
Prerequisite:

NEURO 796A Neurology Individual Studies for 3rd Year (2.5) Neurology individual studies 3rd year.
Effective: Spring 2009

NEURO 797 Neurology Special Topics (5) Neurology Special Topics.
Effective: Spring 2009
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Neurosurgery (NSURG)

NSURG 750 Neurosurgery Acting Internship (5) Neurosurgery Acting Internship.
Effective: Spring 2010
Prerequisite:

NSURG 750A Neurosurgery Elective for 3rd Year Medical Students (2.5) Neurosurgery Elective for 3rd Year Medical Students.
Effective: Spring 2010
Prerequisite:

Effective: Spring 2010
Prerequisite:

NSURG 796A Neurosurgery Individual Studies 3rd Year (2.5) Neurosurgery Individual Studies for 3rd Year Medical Students.
Effective: Spring 2010
Prerequisite:

NSURG 797 Neurosurgery Special Topics (5) Neurosurgery Special Topics.
Effective: Spring 2010
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Nuclear Engineering (NUC E)

NUC E 401 Introduction to Nuclear Engineering (3) Fundamental concepts of nuclear engineering, including fission, reactor theory, shielding, and radioisotopes; intended for other than nuclear engineering students. Effective: Fall 2001
Prerequisite:

NUC E 403 Advanced Reactor Design (3) Physical principles and computational methods for reactor analysis and design. Multigroup diffusion theory; determination of fast and thermal group constants; cell calculations for heterogeneous core lattices. Effective: Fall 1983
Prerequisite:

Prerequisite:

NUC E 406 (M E 406) Introduction to Statistical Thermodynamics (3) Statistical description of systems composed of large numbers of particles in the context of classical and quantum mechanics; basic concepts of probability theory and thermodynamics as they relate to statistical mechanics. Effective: Fall 2007
Prerequisite:

NUC E 408 Radiation Shielding (3) Radiation sources in reactor systems; attenuation of gamma rays and neutrons; point kernel methods; deep penetration theories; Monte Carlo methods. Effective: Spring 1985
Prerequisite:

Prerequisite:

NUC E 420 Radiological Safety (3) Ionizing radiation, biological effects, radiation measurement, dose computational techniques, local and federal regulations, exposure control. Effective: Spring 1997
Prerequisite:

Prerequisite:

NUC E 430 Design Principles of Reactor Systems (3) Nuclear power cycles; heat removal problems; kinetic behavior of nuclear systems; material and structural design problems. Effective: Fall 2007
Prerequisite:

Prerequisite:

Prerequisite:

NUC E 450 Radiation Detection and Measurement (3) Theory and laboratory applications of radiation detectors, including proton, neutron, charged particle detectors, NIM devices, and pulse-height analysis. Effective: Spring 2001
Prerequisite:

NUC E 451 Experiments in Reactor Physics (3) Acquisition and processing of nuclear and atomic data; application to nucleonic phenomena of importance in nuclear engineering. Effective: Spring 2008
Prerequisite:

NUC E 470 Power Plant Simulation (3) Basic knowledge necessary for intelligent simulation and interpretation of simulations of transients in nuclear power plants. Effective: Fall 2007
Prerequisite:

NUC E 490 (AERSP 490, E E 471) Introduction to Plasmas (3) Plasma oscillations; collisional phenomena; transport properties; orbit theory; typical electric discharge phenomena. Effective: Spring 2008
Prerequisite:

NUC E 494H Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.
Effective: Spring 2007
Prerequisite:

NUC E 496 Independent studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

NUC E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

NUC E 497A Fundamentals of Nuclear Engineering (3) An intensive course providing introduction to Nuclear Engineering to undergraduate co-op students, non-NucE graduate, and returning students.
Effective: Summer 2014 Ending: Summer 2014

NUC E 497K (M E 497K) Thermal-Hydraulics of Two-Phase Flow in Energy Systems (3) This course provides students with fundamental knowledge necessary for thermal-hydraulic analysis of single-phase and two-phase flow systems. The power reactor will be employed as a generic example of the thermal-hydraulic energy systems. In single-phase flow analysis, the one-dimensional thermal-hydraulic system analysis method, which is often employed by the industry’s systems analysis code, will be introduced for normal and off-normal plant operating conditions.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

NUC E 501 Reactor Engineering (3) Thermal hydraulic fundamentals applied to power reactors, thermal analysis of fuel elements and two-phase heat transfer in heated channels.
Effective: Spring 1992
Prerequisite:

NUC E 502 Reactor Core Thermal-Hydraulics (3) In-depth analysis of the reactor core thermal hydraulics; computational methods and practical applications.
Effective: Fall 2010
Prerequisite:

NUC E 505 Reactor Instrumentation and Control (3) Reactor control principles; classical control methods; operational control problems; control simulation using modern mainframe and microcomputer software packages; reactor instrumentation.
Effective: Spring 1992
Prerequisite:

NUC E 506 Nuclear Chemistry (3) Energetics, kinematics, and models of nuclear reactions; nuclear processes as chemical probes, mossbauer effect and perturbed angular correlation spectroscopy.
Effective: Summer 1991

NUC E 511 Nuclear Reactor Kinetics and Dynamics (3) Analytical kinetics and dynamics modeling for reactivity-induced transients; reactor accident kinetics methods for simple and complex geometries; experimental methods.
Effective: Spring 2011
Prerequisite:

NUC E 512 Nuclear Fuel Management (3) Nuclear fuel inventory determination and economic value through the fuel cycle. Emphasis on calculational techniques in reactor, optimization, and design.
Effective: Fall 1983
Prerequisite:

NUC E 521 Neutron Transport Theory (3) Derivation of Boltzmann equation for neutron transport; techniques of approximate and exact solution for the monoenergetic and spectrum regenerating cases.
Effective: Fall 1986
Prerequisite:

NUC E 523 (MATSE 523) Environmental Degradation of Materials in Nuclear Power Plants (3) Degradation of materials performance when exposed to the combination of high temperature, neutron irradiation, and aggressive electrochemistry.
found in nuclear reactors.

**NUC E 525 Monte Carlo Methods** (3) Fundamentals of the probability theory and statistics, analog and non-analog Monte Carlo methods and their applications, random processes, and numbers.

Effective: Spring 2011
Prerequisite:

**NUC E 530 Parallel/Vector Algorithms for Scientific Applications** (3) Development/analysis of parallel/vector algorithms (finite-differencing of PDEs and Monte Carlo methods) for engineering/scientific applications for shared and distributed memory architectures.

Effective: Spring 2008
Prerequisite:

**NUC E 540 (AERP 540) Theory of Plasma Waves** (3) Solutions of the Boltzmann equation; waves in bounded and unbounded plasmas; radiation and scattering from plasmas.

Effective: Spring 2012
Prerequisite:

**NUC E 541 Plasma Theory** (3) Advanced topics in kinetic theory, fluctuation theory, microinstability, and turbulence.

Effective: Spring 2012
Prerequisite:

**NUC E 590 Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 1991

**NUC E 596 Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1997

**NUC E 597 Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

**NUC E 597A Detector and Source Technologies for Nuclear Security** (3) Theory behind radiation detection systems, sensors, and source technologies; radiation detection instrumentation and measurement techniques with a specific focus on nuclear engineering and radiological materials.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

**NUC E 597F Nuclear Fusion** (3) Production of energy from controlled thermonuclear fusion. Nuclear fusion reactions, plasma physics, magnetic and inertial confinement and fusion reactor technology.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

**NUC E 597G Nuclear Fuel Cycle Primer with Emphasis on Safety, Safeguards and Security** (3) Nuclear fuel cycle, safety, security and safeguards and 3S approach; IAEA international safeguards; economic and political dimensions of the nuclear fuel cycle.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

**NUC E 597I (M E 597I) Uncertainty Quantification in Scientific Computing** (3) Advances in scientific computing have made modeling and simulation an important part of engineering and science. Scientific computing applications have to be supplemented by a comprehensive framework for estimating the predictive uncertainty. This course provides students with understanding and knowledge of comprehensive and systematic development of concepts, principles and procedures for verification, validation and uncertainty quantification of models and simulations. The two types of uncertainty (aleatory and epistemic) will be discussed along with approaches for propagating both types of uncertainties through the model to the system response quantities of interest. The methods discussed in class will be applied to wide range of technical fields of engineering (including nuclear and mechanical engineering) and technology.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

**NUC E 600 Thesis Research** (1-15) No description.

Effective: Fall 1983

**NUC E 601 Ph.D. Dissertation Full-Time** (0) No description.

Effective: Fall 1983

**NUC E 602 Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Graduate assistants receive credit for teaching lower level courses while under the direct supervision of a graduate faculty member.

Effective: Fall 1983
Prerequisite:

**NUC E 610 Thesis Research Off Campus** (1-15) No description.
NUC E 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Nursing (NURS)

NURS 401 (IL) Concepts of Health (3) Exploration of current and ancient concepts of health and their respective modes of intervention.  
Effective: Fall 2008  
Prerequisite:  

NURS 402 (US;IL) Holistic Health (3) Examination of emerging conceptualizations of health and therapy based on a holistic view of human beings.  
Effective: Fall 2008  
Prerequisite:  

NURS 403 School Health and Emergency Care of Children and Adolescents (3) Techniques for higher-level care for school health and emergency situations and application-based education.  
Effective: Spring 2010  
Prerequisite:  

NURS 404 Cardiac Dysrhythmias: Interpretation, Treatment, and Nursing Management (1) An introductory course with a focus on dysrhythmia recognition and interpretation of abnormal 12-lead electrocardiograms (EKG, ECG).  
Effective: Fall 2008  
Prerequisite:  

NURS 405A Nursing Care of the Adult Client with Complex Health Problems: Part A (4) In-depth study of care of patients with acute and complex health problems, utilizing evidence based practice.  
Effective: Fall 2012  
Prerequisite:  

NURS 405B Nursing Care of the Adult Client with Complex Health Problems: Part B (4) In-depth study of care of patients with acute and complex health problems, utilizing evidence based practice.  
Effective: Fall 2012  
Prerequisite:  

NURS 407 Drugs of Abuse and Mental Health Issues (3) Examines the health care needs across the lifespan of clients who have an alcohol or other drug disorder.  
Effective: Fall 2008  
Prerequisite:  

NURS 408 Clinical Application of Pharmacological Concepts (1) Study of the application of pharmacological concepts to the clinical setting.  
Effective: Spring 2011  
Prerequisite:  

NURS 409 Introduction to Forensic Nursing (3) Provides an introduction to the forensic health sciences, forensic nursing, and the nursing role in the scientific investigation of violence.  
Effective: Spring 2011  
Prerequisite:  

NURS 410 Forensic Evidence Collection and Preservation (3) Examines forensic nurse's role recognizing injuries/patterns of injury. Evidence collection procedures are examined from collection to courtroom presentation.  
Effective: Spring 2013  
Prerequisite:  

NURS 411 Seminar in Forensic Nursing (3) Seminar to discuss current topics, trends and research related to forensic nursing.  
Effective: Spring 2013  
Prerequisite:  

NURS 415 (US;IL) Community and Family Health Nursing (4) Therapeutic nursing care and health promotion concepts to families, groups and populations in the community.  
Effective: Fall 2012  
Prerequisite:  

NURS 417 (US;IL) Family and Community Health Concepts (4) Study of the concepts of family and community based nursing care emphasizing multicultural influences on health practices.  
Effective: Fall 2008  
Prerequisite:  

NURS 420 Mental Health Nursing (4) Emphasizes clinical application of mental health theory in nursing care of patients with acute and chronic mental health problems.  
Effective: Fall 2012  
Prerequisite:  

NURS 430 Organization and Administration for the Nurse Manager (3) Introduction to organizational theory and principles of practice in the administration of nursing services and patient care.  
Effective: Spring 2013  
Prerequisite:  

NURS 431 Data Management for Nurse Managers (3) Analysis of information systems to manage nursing service
organizations; includes financial management, the budgeting processes, and productivity measurement.

Effective: Spring 2013
Prerequisite:

NURS 432 Nursing Management of Human Resources (3) Human resource management and related factors in nursing service organizations.
Effective: Spring 2013
Prerequisite:

NURS 433 Seminar for Nurse Managers (3) Course focuses on the application of management principles in the role of the nurse manager.
Effective: Spring 2013
Prerequisite:

NURS 440 Trauma/Critical Care Nursing (3) Focuses on the impact of and the nursing care of persons experiencing acute trauma and/or critical illness.
Effective: Spring 2011
Prerequisite:

NURS 450A Professional Role Development III: Leadership and Management (2) Study of leadership roles and various styles of nursing management and their implications for the professional nurse.
Effective: Fall 2012
Prerequisite:

NURS 450B Professional Role Development III: Clinical Capstone (3) Senior level clinical capstone course that emphasizes the integration and application of theory and evidence based practice.
Effective: Fall 2012
Prerequisite:

NURS 452 (US) (BB H 452, WMNST 452) Women's Health Issues (3) Exploration of major health issues concerning women today, with an emphasis on social, cultural, and medical influences.
Effective: Fall 2013
Prerequisite:

NURS 458 Ethical Challenges in Healthcare Informatics (3) A case based collaboratory designed for the exploration and analysis of the ethical dilemmas facing healthcare informatics practitioners.
Effective: Spring 2011

NURS 459 Legal and Professional Issues in School Nursing (3) Legal and professional issues of school nurses and delivery impact of health care in school environment.
Effective: Spring 2010
Prerequisite:

NURS 460 Advanced Concepts in Clinical Nursing Informatics (3) An exploration of clinical informatics tools to support informatics practice.
Effective: Summer 2012
Prerequisite: Concurrent: NURS 458

NURS 461 Perioperative Nursing (4) Comprehensive introduction regarding fundamental principles and practices of the Operating Room Nurse when managing the care of the surgical patient.
Effective: Summer 2011
Prerequisite:

NURS 462 Psychotropic Drugs and Children/Adolescents (1) Study of psychotropic medications used to treat children and adolescents, including indications, actions, adverse reactions and implications for school nurses.
Effective: Summer 2011
Prerequisite:

NURS 463 Compassionate Counseling for Children/Adolescents Dealing with Dying, Death, Other Life Crises (3) Explores issues involving dying, death and life crises which occur in today’s world and affect school communities.
Effective: Spring 2013
Prerequisite:

NURS 464 (US;IL) Dying and Death (3) Explores attitudes toward death and dying; concept of grief; responsibilities to the dying person and the family.
Effective: Fall 2008
Prerequisite:

NURS 465 Health Concepts for Adults with Complex Health Care Needs (3) In-depth study and application of the theoretical principles and roles of adult clients and families with complex healthcare needs.
Effective: Spring 2011
Prerequisite:

NURS 467 Medication Update and Health Teaching Interventions for School Nurses (1) Study of current pharmacologic concepts, including health teaching, prescribed for acute and chronic conditions commonly encountered in school nursing.
Effective: Summer 2011
Prerequisite:

NURS 468 Client Education Strategies for Nurses and Other Health Care Providers (3) Explores current and emerging
roles of client education in the knowledge era.
Effective: Summer 2011
Prerequisite:

NURS 470 Autism Spectrum Disorders: Care Overview (1) Overview of autism spectrum disorders including resources related to children with autism spectrum disorders.
Effective: Spring 2013
Prerequisite:

NURS 471 Issues in Bullying for Health Professionals (1) Explores the impact of bullying on individuals, schools, teachers, families, of the target and the bully.
Effective: Summer 2012
Prerequisite:

NURS 472 Relational Aggression in the Healthcare Setting (3) An exploration of research and interventions for relational aggression in the healthcare setting.
Effective: Summer 2013
Prerequisite:

NURS 475 Integrated Concepts in Nursing Practice (3) Project-based capstone course for application of nursing concepts to health promotion/disease prevention in populations.
Effective: Spring 2011
Prerequisite:

NURS 492 Emergency Care and Safety (3) A comprehensive first aid course designed to provide knowledge of prehospital emergency care at the First Responder level.
Effective: Fall 2008
Prerequisite:

NURS 494H Honors Thesis (1-6 per semester/maximum of 6) Independent honors research project related to student’s interests directed by faculty supervisor and culminating in production of thesis.
Effective: Summer 2010
Prerequisite:

NURS 495 Nursing Study in Specialized Setting (1-12) Designed to provide student with in-depth study and practice in clinical specialty area of choice.
Effective: Fall 2008
Prerequisite:

NURS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2008

NURS 496A Graduate Nurse Residency 1 (1) This course is designed to support newly graduated nurses in their development as professional nurses and members of the health care team. This course covers a portion of the content from the UHC/ANCC Nurse Residency program through monthly seminars on: critical thinking skills, leadership development, communication strategies and patient safety. Sessions will be 2.5 hours in length.
Effective: Summer 2014 Ending: Summer 2014
Prerequisite:

NURS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2008

NURS 497A Business of Nursing (3) Teaches students basic business principles as they apply to nursing and health related entrepreneur.
Effective: Summer 2014 Ending: Summer 2014

NURS 497B Complexity Science, Health, and Education (3) Provides an introduction to Complexity Science; its interdisciplinary presence in basic science, social science, education, management, and healthcare professions; and its specific relevance for transformation in nursing.
Effective: Summer 2014 Ending: Summer 2014

NURS 497C Human Diversity Among School-Aged Youth (2) Overview of human diversity among school-aged youth: including strategies for improving the health and well-being of young people through comprehensive school health programs.
Effective: Summer 2014 Ending: Summer 2014
Prerequisite:

NURS 497D Development of Personality Disorder Traits: School Youth Through Young Adult (1) Overview of development of personality disorder traits and psychosocial problems of school-aged youth; includes prevention and treatment strategies.
Effective: Summer 2014 Ending: Summer 2014
Prerequisite:

NURS 497E Neurological Assessment Skills for the School Nurse (1) This course offers a basic review of the neurological system. Additionally, the course offers specific information on seizures and concussion injuries related to the

The Pennsylvania State University
school age child. Students will examine various neurological assessment scales. Resources for families, staff, and community will be offered. Strategies and interventions for the prevention of head injuries will also be explored.

Effective: Summer 2014 Ending: Summer 2014

Prerequisite:

NURS 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2008

NURS 499 (IL) **Foreign Study--Nursing** (1-9) Study of nursing issues in a foreign country.

Effective: Fall 2008

NURS 501 **Issues in Nursing and Health Care** (3) Analysis and evaluation of the health care system with emphasis on health policy and economic issues affecting nursing practice.

Effective: Fall 2008

NURS 502 **Advanced Health Assessment of Adult Populations** (3) Advanced nursing assessment and diagnosis of physical, psychosocial and developmental health for adults and families across the adult age spectrum.

Effective: Spring 2012

NURS 502A **Advanced Health Assessment of Pediatric Populations** (1) Advanced nursing assessment and diagnosis of physical, psychosocial and development health for individuals and families across the pediatric age spectrum.

Effective: Fall 2011

Concurrent: NURS 502

NURS 503 **Pathophysiology** (3) Integration of advanced physiology, genetics, and pathophysiology as related to specific disease entities and alterations in functioning.

Effective: Fall 2008

NURS 504 **Pharmacologic Therapy** (3) Use of pharmacologic therapies in advanced practice nursing.

Effective: Fall 2008 Ending: Summer 2014

NURS 508 **Perspectives in Population-Based Health** (3) Theories and strategies for promoting health in community aggregates with emphasis on vulnerable and underserved populations of diverse backgrounds.

Effective: Fall 2008

NURS 510 **Theoretical and Scientific Foundations of Advanced Nursing Practice** (3) Examines the relationship of nursing theories to the development of nursing science, as well as current scientific advances that guide nursing practice and research.

Effective: Spring 2014

NURS 512 **Nursing Research** (3) A nursing research course with emphasis on research design, data collection methods, and evaluation of research studies.

Effective: Fall 2013

NURS 522 **Comprehensive Assessment of the Older Adult** (3) Advanced nursing assessment of biological, physical, clinical, functional, cognitive, psychological, and social changes associated with aging.

Effective: Summer 2009 Ending: Summer 2014

Prerequisite:

NURS 522 **Comprehensive Assessment of the Older Adult** (3) In-depth assessment of biological, physical, clinical, functional, cognitive, psychological, and social changes associated with aging.

Effective: Fall 2014 Future: Fall 2014

NURS 523 **Interventions for Common Health Problems in Older Adults** (3) Discussion of common acute and chronic health problems experienced by older adults and development of evidence-based interventions for management.

Effective: Fall 2011 Ending: Summer 2014

Prerequisite:

NURS 523 **Interventions for Common Health Issues in Older Adults** (3) Discussion of common acute and chronic health issues experienced by older adults and development of evidence-based interventions/personal approaches for management.

Effective: Fall 2014 Future: Fall 2014

Prerequisite:

NURS 527 **Promoting Healthy Lifestyles in the School-Age Population** (3) This course will focus on promoting health lifestyles for the school age population.

Effective: Summer 2011

NURS 580 **Epistemology of Nursing Science** (3) Examines the development and organization of nursing knowledge;
nursing theories are critically analyzed in relationship to the substantive structure of nursing science.

Effective: Fall 2008

Prerequisite:

NURS 581 Developing Theoretical Constructs Relevant to Nursing (3) This course provides experience in concept analysis as one mechanism facilitating the development of nursing knowledge.

Effective: Fall 2008

Prerequisite:

NURS 582 Scientific Basis for Nursing Practice (3) Critical appraisal of the scientific basis of selected areas of nursing practice.

Effective: Fall 2008

Prerequisite:

NURS 583 Advanced Seminar in Nursing Science (3) Intense interactive seminar for synthesizing prior content into the design of dissertation research.

Effective: Fall 2008

Prerequisite:

NURS 585 Qualitative Methods in Health Research (3) Provides an overview of advanced qualitative research methodologies useful in the conduct of social and behavioral health research.

Effective: Spring 2012

NURS 586 Quantitative Methods in Health Research (3) An overview of methodological considerations specific to quantitative health research.

Effective: Spring 2012

Prerequisite:

NURS 587 Ethics in Nursing Research (1) Provides the theoretical and practical knowledge needed to design and conduct ethically responsible social and behavioral health research.

Effective: Fall 2008

Prerequisite:

NURS 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Fall 2008

NURS 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2008

NURS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2008

NURS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2008

NURS 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Fall 2008

NURS 600 Thesis Research (1-15) No description.

Effective: Fall 2008

NURS 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Fall 2008

NURS 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Provides an opportunity for supervised and graded teaching experience in undergraduate nursing courses.

Effective: Fall 2008

Effective: Fall 2008

NURS 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Fall 2008

NURS 802 Physical Assessment Through The Lifespan (3) Nursing assessment and diagnosis of physical, psychosocial,
and developmental health across the lifespan.
Effective: Summer 2014

NURS 804 Pharmacologic Therapy (3) Pharmacologic therapies in advanced nursing practice.
Effective: Fall 2014 Future: Fall 2014

Effective: Spring 2012 Ending: Summer 2014
Prerequisite:
Effective: Fall 2014 Future: Fall 2014
Prerequisite:
NURS 819 Clinical Nurse Specialist II: Analysis and Application (4) Analysis and application of nursing interventions for individuals, families, and aggregate groups in varied health care delivery settings.
Effective: Summer 2012
Prerequisite:
NURS 821 Nurse Practicum: Clinical Nurse Specialist (4-8 per semester/maximum of 8) Integration and synthesis of specialty knowledge and theories into the CNS role.
Effective: Summer 2012
Prerequisite:
NURS 823 Interventions for Common Health Problems in the Adult/Older Adult (4) Discussion of common health problems experienced by adults/older adults and development of evidence-based interventions for management.
Effective: Fall 2011 Ending: Summer 2014
Prerequisite:
NURS 823 Interventions for Common Health Problems in the Adult/Older Adult (4) Discussion of common health problems experienced by adults/older adults and development of evidence-based interventions for management.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:
NURS 830 Evidence-Based Practice I: Theory and Research Methods (3) Foundations in evidence-based research for nursing practice.
Effective: Spring 2014

NURS 831 Evidence-Based Practice II: Translation of Research (3) Evaluation and translation of evidence-based research into nursing practice.
Effective: Spring 2014
Prerequisite:
NURS 832 Doctor of Nursing Practice: Leadership I (3) Foundations of Doctor of Nursing Practice transformational leadership in complex health care settings.
Effective: Summer 2014
Prerequisite:
NURS 833 Doctor of Nursing Practice: Leadership II (3) Doctor of Nursing Practice transformational leadership to improve healthcare delivery and quality outcomes.
Effective: Summer 2014
Prerequisite:
NURS 834 Doctor of Nursing Practice Clinical Practicum (1-4 per semester/maximum of 8) The focus of the clinical practicum is planning, implementing, and evaluating evidence-based interventions to address a healthcare problem.
Effective: Summer 2014

NURS 835 Doctor of Nursing Practice Capstone Project (2-3 per semester/maximum of 10) The Doctor of Nursing Practice capstone project demonstrates clinical scholarship in an area of practice.
Effective: Summer 2014
Prerequisite:
NURS 840 Nursing Education Theories and Strategies (3) Theoretical foundation and evidence-based strategies for nursing education.
Effective: Summer 2012

NURS 841 Assessment and Evaluation in Nursing Education (3) Methods for assessment, measurement, and evaluation of student learning in academic and clinical settings.
Effective: Summer 2012
Prerequisite:
NURS 842 Curriculum and Program Development in Nursing Education (3) Curriculum design and evaluation, educational program development, and accreditation.
Effective: Summer 2012

The Pennsylvania State University
Prerequisite:

NURS 843 Synthesis and Application of the Nurse Educator Role (4) Practicum in the application of the nurse educator role in academic and healthcare settings.
Effective: Summer 2012
Prerequisite:

Effective: Fall 2012

Effective: Summer 2012

Effective: Summer 2012 Ending: Fall 2014
Prerequisite:

Effective: Spring 2015 Future: Spring 2015
Concurrent: NURS 846

NURS 848 Synthesis and Application of the Nurse Administrator Role (4) Practicum in the application of the nurse administrator role in healthcare settings.
Effective: Summer 2012 Ending: Fall 2014
Prerequisite:

NURS 848 Synthesis and Application of the Nurse Administrator Role (4) Practicum in the application of the nurse administrator role in healthcare settings.
Effective: Spring 2015 Future: Spring 2015
Prerequisite:

NURS 860 Adult Gerontology Acute Care Nurse Practitioner Role I (3) Acute Care Nurse Practitioner role across the continuum of care with adults and older adults with complex acute, critical, and chronic health conditions to restore or maximize health.
Effective: Summer 2012 Ending: Summer 2014
Prerequisite: Concurrent: NURS 862

NURS 860 Adult Gerontology Acute Care Nurse Practitioner Role I (3) Acute Care Nurse Practitioner role across the continuum of care with adults and older adults with complex acute, critical, and chronic health conditions to restore or maximize health.
Effective: Fall 2014 Future: Fall 2014
Prerequisite: Concurrent: NURS 862

NURS 861 Adult Gerontology Acute Care Nurse Practitioner Role II (3) Continuation of Acute Care Nurse Practitioner role across the continuum of care with adults and older adults with complex acute, critical, and chronic health conditions to restore or maximize health.
Effective: Summer 2012
Prerequisite: Concurrent: NURS 863

NURS 862 Adult Gerontology Acute Care Nurse Practitioner Practicum I (4) Adult Gerontology Acute Care Nurse Practitioner practicum with patients across the continuum of care with adults and older adults with complex acute, critical, and chronic health conditions.
Effective: Summer 2012 Ending: Summer 2014
Prerequisite: Concurrent: NURS 860

NURS 862 Adult Gerontology Acute Care Nurse Practitioner Practicum I (4) Adult Gerontology Acute Care Nurse Practitioner practicum with patients across the continuum of care with adults and older adults with complex acute, critical, and chronic health conditions.
Effective: Fall 2014 Future: Fall 2014
Prerequisite: Concurrent: NURS 860

NURS 863 Adult Gerontology Acute Care Nurse Practitioner Practicum II (4) Adult Gerontology Acute Care Nurse Practitioner practicum across the continuum of care with adults and older adults with complex acute, critical, and chronic health conditions.
Effective: Summer 2012
Prerequisite: Concurrent: NURS 861

NURS 864 Adult Gerontology Acute Care Nurse Practitioner Integrative Practicum (2-6 per semester/maximum of 6) Adult Gerontology Acute Care Nurse Practitioner integrative practicum across the continuum of care with adults and older adults with complex acute, critical, and chronic health conditions.
Effective: Fall 2013
Prerequisite:

NURS 865 Pharmacology for Acute Care Nurse Practitioners (1) Principles of clinical pharmacology as applied to management of complex acute, critical, and chronically ill adult and older adult patients.
NURS 866 Health Assessment of the Adult Gerontology Population in Acute Care (1) Physical assessment and diagnostics for physical and psychosocial health of adult and older adult individuals and families with acute and critical illness.

Effective: Summer 2012
Concurrent: NURS 502

NURS 870 Nurse Practitioner Role with Healthy Individuals and Families (3) Nurse Practitioner role to promote health, prevent illness, and manage common acute/episodic health problems across the adult-older adult age spectrum.

Effective: Spring 2012 Ending: Summer 2014
Prerequisite: Concurrent: NURS 872 or NURS 872A

NURS 870 Nurse Practitioner Role with Healthy Individuals and Families (3) Nurse Practitioner role to promote health, prevent illness, and manage common acute/episodic health problems across the adult-older adult age spectrum.

Effective: Fall 2014 Future: Fall 2014
Prerequisite: Concurrent: NURS 872 or NURS 872A

NURS 871 Nurse Practitioner Role with Individuals and Families with Complex and/or Chronic Health Problems (3) Nurse Practitioner role with individuals and families to maximize health and manage complex and/or chronic health problems.

Effective: Spring 2012
Prerequisite: Concurrent: NURS 873 or NURS 873A

NURS 872 Family Nurse Practitioner Practicum I (3) Family Nurse Practitioner practicum with individuals and families across the life span experiencing common acute/episodic health problems.

Effective: Spring 2012 Ending: Summer 2014
Prerequisite: Concurrent: NURS 870 NURS 875

NURS 872 Family Nurse Practitioner Practicum I (3) Family Nurse Practitioner practicum with individuals and families across the life span experiencing common acute/episodic health problems.

Effective: Fall 2014 Future: Fall 2014
Prerequisite: Concurrent: NURS 870 NURS 875

NURS 872A Adult Gerontology Primary Care Nurse Practitioner Practicum I (4) Adult Gerontology Primary Care Nurse Practitioner practicum with individuals and families across the adult/older adult age spectrum experiencing common acute/episodic health problems.

Effective: Fall 2011 Ending: Summer 2014
Prerequisite: Concurrent: NURS 870

NURS 872A Adult Gerontology Primary Care Nurse Practitioner Practicum I (4) Adult Gerontology Primary Care Nurse Practitioner practicum with individuals and families across the adult/older adult age spectrum experiencing common acute/episodic health problems.

Effective: Fall 2014 Future: Fall 2014
Prerequisite: Concurrent: NURS 870

NURS 873 Family Nurse Practitioner Practicum II (4) Family Nurse Practitioner practicum with individuals and families across the life span experiencing complex and/or chronic health problems.

Effective: Spring 2012
Prerequisite: Concurrent: NURS 871

NURS 873A Adult Gerontology Primary Care Nurse Practitioner Practicum II (4) Adult Gerontology Primary Care Nurse Practitioner practicum with individuals and families across the adult/older adult age spectrum experiencing complex and/or chronic health problems.

Effective: Fall 2011
Prerequisite: Concurrent: NURS 871

NURS 874 Family Nurse Practitioner Integrative Practicum (2-6 per semester/maximum of 6) Family Nurse Practitioner integrative practicum with communities and individuals/families across the life span experiencing health and illness.

Effective: Fall 2013
Prerequisite:

NURS 874A Adult Gerontology Primary Care Nurse Practitioner Integrative Practicum (2-6 per semester/maximum of 6) Adult Gerontology Primary Care Nurse Practitioner integrative practicum with communities and individuals/families experiencing health and illness.

Effective: Fall 2013
Prerequisite:

NURS 875 Nurse Practitioner Role with Children and Families (2) Nurse Practitioner role with children and their families to promote health, prevent illness, and manage acute or chronic health problems.

Effective: Spring 2012 Ending: Summer 2014
Prerequisite: Concurrent: NURS 576

NURS 875 Nurse Practitioner Role with Children and Families (2) Nurse Practitioner role with children and their families to promote health, prevent illness, and manage acute or chronic health problems.

Effective: Fall 2014 Future: Fall 2014
Prerequisite: Concurrent: NURS 576

NURS 876 Family Nurse Practitioner Practicum with Pediatric Populations (2) Family Nurse Practitioner practicum with pediatric populations/families during health or experiencing acute and chronic health problems.
NURS 876 Family Nurse Practitioner Practicum with Pediatric Populations (2) Family Nurse Practitioner practicum with pediatric populations/families during health or experiencing acute and chronic health problems.

Effective: Fall 2014 Future: Fall 2014
Prerequisite: Concurrent: NURS 870 NURS 872

Last Import from UCM: May 24, 2014 3:00 AM
Nutrition (NUTR)

NUTR 400 Introduction to Nutrition Counseling (1) No description.
Effective: Fall 1998
Prerequisite:

NUTR 401 Nutrition Clinic Practicum (1-3) To provide qualified nutrition students with the opportunity to practically apply nutrition counseling skills in a supervised environment.
Effective: Spring 2002
Prerequisite:

NUTR 407 Nutrition for Exercise and Sports (3) Interactions between nutrition, food selection, and timing of eating as they apply to exercise training and recreational physical activity.
Effective: Summer 2012
Prerequisite:

NUTR 421 (US;IL) Food Culture and Health Trends (3) Social-political, historic, and geographic roots of food patterns, featuring specific cuisine areas and nutritional disease patterns; includes foods laboratory.
Effective: Summer 2005
Prerequisite:

NUTR 425 (IL) Global Nutrition Problems: Health, Science, and Ethics (3) Examines causes of malnutrition and health problems in low-income countries; explores international cultures and ethical issues related to hunger.
Effective: Spring 2013
Prerequisite:

NUTR 445 Nutrient Metabolism I (3) Nutrients, their sources, metabolism, interrelationships and requirements with focus on carbohydrates, lipids, and proteins.
Effective: Spring 2001
Prerequisite:

NUTR 446 Nutrient Metabolism II (3) Continuation of NUTR 445; nutrients, their sources, metabolism, interrelationships and requirements with focus on vitamins and minerals.
Effective: Summer 1994
Prerequisite:

NUTR 451 Nutrition throughout the Life Cycle (3) Application of basic principles of nutrition to nutritional and physiological needs throughout the life cycle from prenatal to aging.
Effective: Spring 2001
Prerequisite:

NUTR 452 Nutritional Aspects of Disease (3) Disturbances in metabolism related to human disease processes; principles of nutrition in therapy.
Effective: Spring 1995
Prerequisite:

NUTR 453 Diet in Disease (3) Nutrient and energy controlled diet programs. Implications for nutrition counseling and education.
Effective: Spring 1995
Prerequisite:

NUTR 456 (US) Community Nutrition (3) Programs and policies of nutrition-related activities of community agencies; factors pertinent to nutrition education; relationship of cultural and social identity to foods and nutrition.
Effective: Fall 2012
Prerequisite:

NUTR 490W Nutrition Seminar (3) Use of selected materials from the scientific literature to prepare a term paper and an oral report.
Effective: Spring 1995
Prerequisite:

NUTR 494H Senior Honors Thesis (1-6) Independent study related to a student's interests directed by a faculty supervisor and culminating in the production of a thesis.
Effective: Summer 2006
Prerequisite:

NUTR 495 Advanced Field Experience in Nutrition (1-6) Supervised off-campus, non-group instruction including individual field experiences, practicums or internships. Written and oral critique of activity is required.
Effective: Spring 2001
Prerequisite:

NUTR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an
individual basis and which fall outside the scope of formal courses.
Effective: Spring 1992

NUTR 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1992

NUTR 497A **Eating and Weight Disorders** (3) This course will discuss theories and controversies in the literature on eating and weight disorders. Part of the course will be lecture based and will provide background on the diagnosis, causes, consequences, and treatment of eating and weight-related disorders. Part of the course will be reading and discussion-based where you will be required to read classic, historical, and scientific research papers and participate in critical discussions about these papers in class. Eating and weight disorders that will be covered include both classic disorders (e.g. anorexia nervosa and bulimia nervosa) as well as more recently identified disorders (e.g. binge eating disorder, night eating syndrome). We will also discuss obesity and its relationship to disordered eating. Students will be evaluated by exams, quizzes, assignments, and class participation. The assessments will include a critical interview with an individual who has struggled with eating and weight-related disorders.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

NUTR 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

NUTR 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

NUTR 501 **Regulation of Nutrient Metabolism I** (4) Integration of nutritional, biomedical, biochemical, physiological, and hormonal processes involved in carbohydrate, lipid, and protein metabolism.
Effective: Fall 2012
Prerequisite:

NUTR 502 **Regulation of Nutrient Metabolism II** (3) Complementary to NUTR 501 with an emphasis on metabolic roles of vitamin and mineral elements.
Effective: Fall 2012
Prerequisite:

NUTR 506 (AN SC 506) **Ruminology** (3) Physiological, biochemical, and microbiological activities occurring within the rumen and the relation of rumen function to animal response.
Effective: Fall 2012
Prerequisite:

NUTR 508 (PHSIO 508) **Critical Readings in Molecular Nutrition** (1.5 per semester/maximum of 6) Understanding of approaches, methods and current concepts in molecular biology and nutrition through critical readings of current primary literature.
Effective: Summer 2013
Concurrent: NUTR 445 or NUTR 446

NUTR 511 **Maternal and Child Nutrition** (3) Role of nutrition in female fertility, during pregnancy and lactation, as well as during infancy and early childhood.
Effective: Spring 2014

NUTR 513 **Atherosclerosis and Nutrition** (2) The etiology and pathophysiology of atherosclerotic cardiovascular disease, with emphasis on nutritionally-related aspects.
Effective: Fall 2012
Prerequisite:

NUTR 514 (VB SC 514) **Prostaglandins and Leukotrienes** (3) Biochemical, physiological, and nutritional aspects of arachidonic acid and related essential fatty acid metabolism. Structure-activity relationships of prostaglandins, prostacyclins, thromboxanes, and leukotrienes.
Effective: Fall 2012
Prerequisite:

NUTR 515 **Mathematical Modeling in Nutrition** (2) Study of the theory and application of mathematical modeling of the tracer and tracee kinetics of nutrients and their metabolites in animals and man.
Effective: Fall 2012
Prerequisite:

NUTR 520 **Readings in Nutrition** (1 per semester/maximum of 2) Readings and reports of selected topics in nutrition.
Effective: Spring 2013

NUTR 532 (HD FS 532) **Childhood Obesity** (3) This course addresses how genetic predispositions, behavioral and environmental factors affect children's obesity risk and examines strategies for obesity prevention.
Effective: Spring 2012
NUTR 533 (HD FS 533) Adult Obesity (3) Important current and emerging topics in obesity research relevant to government policy and general public education; emphasis on adult obesity.
Effective: Spring 2012

NUTR 534 (FD SC 534) Readings in Ingestive Behavior (1 per semester/maximum of 6) Students lead discussions of original research in the field of ingestive behavior; focus on food intake in particular.
Effective: Summer 2014

NUTR 551 Seminar in Nutrition (1-6) Selected topics and recent advances in nutrition.
Effective: Fall 2012

NUTR 583 Nutritional Epidemiology (3) Epidemiological principles and methodology to study nutritional determinants of disease.
Effective: Fall 2012
Prerequisite:

NUTR 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2012

NUTR 595A Application of Community Nutrition -- Internship (3) Application and integration of community nutrition theories in a practicum environment under the supervision of preceptors in community agencies.
Effective: Fall 2012
Prerequisite:

NUTR 595B Application of Food Service Management -- Internship (3) Application and integration of food service management principles and motivation theories in a practicum environment under the supervision of preceptor.
Effective: Fall 2012

NUTR 595C Dietetic Enrichment Experience - Dietetic Internship (1) The enrichment experience is designed for interns to plan and implement a rotation of interest in the nutrition field.
Effective: Fall 2012
Prerequisite:

NUTR 595D Application Clinical Nutrition -- Internship (6) Application and integration of clinical nutrition theories in a practicum environment under the supervision of preceptor who is a registered dietitian.
Effective: Fall 2012

NUTR 595E Introduction to Nutrition Research -- Internship (1) Introduction of nutrition research to assist in the understanding of planning and conducting research studies in a variety of nutrition research laboratories.
Effective: Fall 2012

NUTR 595F Professional Portfolio Internship (1) Designing and completing a professional portfolio to assist in the employment process in the field of dietetics.
Effective: Fall 2012

NUTR 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2012

NUTR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2012

NUTR 597G (FD SC 597G) Readings in Ingestive Behavior (1) Students lead discussions of original research in the field of ingestive behavior with a focus on food intake in particular.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

NUTR 600 Thesis Research (1-15) No description.
Effective: Fall 2012

NUTR 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 2012

NUTR 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Provides an opportunity for a supervised and graded experience for graduate students in teaching undergraduate courses in nutrition.
Effective: Summer 2012

The Pennsylvania State University
Effective: Fall 2012

NUTR 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 2012

Last Import from UCM: May 24, 2014 3:00 AM
**Obstet/Gynecology-Hy (OBGYN)**

**OBGYN 700 Obstetrics and Gynecology** (10) Required clerkship providing supervised clinical experience in obstetrics and gynecology.

*Effective: Winter 1978*

*Prerequisite:*

**OBGYN 701 OBGYN Externship/Subinternship** (5) An elective to provide advanced clinical experience involving community hospital OB/GYN, ambulatory OB/GYN, or selected subspecialties.

*Effective: Summer 1985*

*Prerequisite:*

**OBGYN 710 Clinical Gynecologic Oncology** (5) Active participation in evaluation and management of patients with gynecologic malignancies.

*Effective: Summer 1988*

*Prerequisite:*

**OBGYN 720 Ambulatory and Adolescent Gynecology Elective** (5) This course involves active participation in a community outpatient obstetric and gynecology practice.

*Effective: Spring 2009*

*Prerequisite:*

**OBGYN 720A Reproductive Endocrinology & Infertility Elective** (2.5) This course provides exposure to basic concepts of diagnosis and management of infertility, and of reproductive endocrinologic disorders of women including hyperandrogenicity and anovulation.

*Effective: Summer 2006*

*Prerequisite:*

**OBGYN 721 Clinical Endocrinology/Infertility** (5) Active participation in evaluation and management of outpatient/endocrinology/ infertility problems.

*Effective: Spring 1989*

*Prerequisite:*

**OBGYN 722 Clinical Perinatal Medicine Elective** (5) Management of women with pregnancies complicated by maternal and/or fetal disease will be learned in a high-risk pregnancy environment.

*Effective: Spring 1990*

*Prerequisite:*

**OBGYN 722A Perinatology Elective** (2.5) This course provides exposure to basic concepts of management of high risk pregnancies and medical complications of pregnancy.

*Effective: Summer 2006*

*Prerequisite:*

**OBGYN 796 OB/GYN Individual Studies** (5) A forum for collaborative research on an individual basis in areas of obstetrics and gynecology, including reproductive biology and endocrinology.

*Effective: Spring 2009*

*Prerequisite:*

**OBGYN 796A OB/GYN Individual Studies for 3rd Year** (2.5) OBGYN individual studies for 3rd year.

*Effective: Spring 2009*

**OBGYN 797 OB/GYN Special Topics** (5) Formal courses given on a topical or special interest subject which may be offered infrequently.

*Effective: Spring 2009*

*Prerequisite:*

Last Import from UCM: May 24, 2014 3:00 AM
Operations Management (OPMGT)

OPMGT 510 Operations Management (3) Integration and application of decision making to operational and policy problems within the business firm.
Effective: Fall 1993

OPMGT 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1992

OPMGT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

OPMGT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 1992

OPMGT 599 (IL) Foreign Study--Operations Management (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite:

OPMGT 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) No description.
Effective: Fall 1992

Last Import from UCM: May 24, 2014 3:00 AM
Operations Mgmt-Bd (OPMAN)

OPMAN 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

OPMAN 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1987

Last Import from UCM: May 24, 2014 3:00 AM
Operations Research (O R)

O R 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

Last Import from UCM: May 24, 2014 3:00 AM
Ophthalmology (OPHTH)

OPHTH 760 Ophthalmology Elective (5) This course is designed to provide a broad experience in ophthalmology for any students, regardless of their future career goals.
Effective: Fall 2008
Prerequisite:

OPHTH 796 Ophthalmology Individual Studies (5) Ophthalmology Individual Studies
Effective: Spring 2010
Prerequisite:

OPHTH 796A Ophthalmology Individual Studies 3rd Year (2.5) Ophthalmology Individual Studies for Year 3 Medical Students.
Effective: Spring 2010
Prerequisite:

OPHTH 797 Ophthalmology Special Topics (5) Ophthalmology Special Topics
Effective: Spring 2010
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Orthopaedics (ORTHO)

ORTHO 710 Adult Orthopaedics for Third Year Students (5-15) An in-depth experience in general adult orthopaedics that can be tailored for students interested in orthopaedics or in primary care.
Effective: Summer 2002
Prerequisite:

ORTHO 711 Pediatric Orthopaedics for Third Year Students (5) An in-depth experience in pediatric orthopaedics that can be tailored for students interested in orthopaedics or in primary care.
Effective: Summer 2002
Prerequisite:

ORTHO 730 Adult Orthopaedics Acting Internship (5) An in-depth experience in general adult orthopaedics that can be tailored for students interested in orthopaedics or in primary care.
Effective: Spring 2009
Prerequisite:

ORTHO 731 Pediatric Orthopaedics Acting Internship (5) An in-depth experience in pediatric orthopaedics that can be tailored for students interested in orthopaedics or in primary care.
Effective: Spring 2009
Prerequisite:

ORTHO 740 Rehabilitation Medicine Elective (5) An in-depth experience in rehabilitation medicine providing clinical experience in both the outpatient clinics and the inpatient unit.
Effective: Summer 2009
Prerequisite:

ORTHO 741 York-Orthopedic Sports Medicine Elective 3rd or 4th Year Elective (5) Course provides 4 week exposures to basic concepts for diagnosis and management of sports related injuries and conditions.
Effective: Fall 2010
Prerequisite:

ORTHO 741A York-Orthopedic Sports Medicine Elective (3rd Year) (2.5) Course provides 2 week exposure to basic concepts for diagnosis and management of sports related injuries and conditions
Effective: Fall 2010
Prerequisite:

ORTHO 796 Orthopaedics Individual Studies Elective (5) Creative projects including non-thesis research supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2002
Prerequisite:

ORTHO 796A Orthopaedics Individual Studies for 3rd Year (2.5) Orthopaedics individual studies for 3rd year students.
Effective: Spring 2009

ORTHO 797 Orthopaedics Special Topics Elective (5) Formal courses given on a topical or special interest subject which may be offered infrequently and/or offered off-campus.
Effective: Summer 2002
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
P-Based Learn Fac-Hy (PBL)

PBL 720 Case Development in Medical Education (5) This course will teach the major steps in creating a clinical case scenario. Effective: Spring 2009
Prerequisite:

PBL 743 Problem-based Learning Facilitation (5) Development of skills in facilitation of small group learning (PBL) and introductory understanding of educational theory supporting PBL. Effective: Fall 2008
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Pathology-Hy (PATH)

PATH 520 Biology of Neoplasia (5) Detailed examination of the initiation and pathogenesis of animal neoplasms with emphasis on the relationship to human neoplasia.
Effective: Spring 2004
Prerequisite:

PATH 590 Colloquium (1) Continuing seminars which consist of a series of individual lectures by faculty, students or outside speakers.
Effective: Spring 2006

PATH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

PATH 770 Anatomic Pathology (1-15) Study of tissues received daily by the surgical pathology laboratory. Students will assist in and then perform autopsies under supervision.
Effective: Fall 2008

PATH 796 Pathology Individual Studies (5) Creative projects including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2009
Prerequisite:

PATH 796A Pathology Individual Studies for 3rd Year (2.5) Pathology individual studies for 3rd year students.
Effective: Spring 2009

PATH 797 Pathology Special Topics (5) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2009
Prerequisite:

PATH 801 (AGBIO 801) Veterinary Infectious Disease Diagnostic and Surveillance Systems (3) This course provides knowledge of diagnostic and surveillance systems used to detect infectious diseases and protect against animal agricultural biological attack.
Effective: Summer 2010
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Pediatrics-Hy (PED)

PED 700 Pediatric Clinical Clerkship (10) Clinical experience in the management of the newborn, of the normal infant, and children with acute and chronic illness.
Effective: Winter 1978
Prerequisite:

Effective: Spring 2009
Prerequisite:

PED 710A Pediatric Hematology/Oncology Elective (3rd year) (2.5) This course provides exposure to the pediatric cancer patient and the field of Pediatric Oncology by closely following several patients through their full range of illness experiences.
Effective: Summer 2006
Prerequisite:

PED 715 Infectious Disease (5-10) Principles of host defense mechanisms, parasite interactions, manifestations of infections in children, systematic approach to the problem-solving, rational use of antibiotics.
Effective: Winter 1978
Prerequisite:

PED 720 Pediatric Endocrinology (5) Clinical applications of basic endocrine concepts, gland functions, and effects upon growth; evaluation of endocrine tests in disease states.
Effective: Winter 1978
Prerequisite:

PED 726 Clinical Genetics (5-10) Mendelian and molecular principles of human genetics; genetic bases of human disease, quantitative human genetics, prenatal diagnosis, genetic counseling.
Effective: Summer 1991

PED 727 Neonatology Acting Internship (5) Acting Internship emphasizing physiology of the newborn infant; concepts, practice, and procedures of intensive perinatal life support.
Effective: Spring 2009
Prerequisite:

PED 728 Pediatrics--Milton Hershey School Elective (5) This is an outpatient exposure to primary care medical problems of children in grades K-4 through 12.
Effective: Spring 1990
Prerequisite:

PED 739 Pediatric Cardiology Elective with Global Health Experience (5) This course provides exposure to basic concepts for diagnosis and management of children with cardiovascular diseases and cardiac abnormalities with a global health experience.
Effective: Spring 2012
Prerequisite:

PED 740 Pediatric Cardiology Elective (4th year) (5) This course provides exposure to basic concepts for diagnosis and management of children with cardiovascular diseases and cardiac abnormalities.
Effective: Spring 2012
Prerequisite:

PED 741 Pediatric Pulmonary and Sleep Medicine Elective (5) This course provides experience in basic concepts of the pathophysiology and clinical management of children with respiratory conditions and sleep neurobehavioral abnormalities.
Effective: Spring 2012
Prerequisite:

PED 742 Pediatric Developmental & Behavioral Elective (5) This course provides exposure to basic concepts for diagnosis and management of children with behavior problems and developmental delays.
Effective: Fall 2012
Prerequisite:

PED 745 (SURG 745) Pediatric Cardiothoracic Surgery Elective (5) This fourth-year elective provides an introduction to the operative repair and peri-operative management of simple and complex congenital heart disease.
Effective: Summer 2009
Prerequisite:

PED 747 (MED 747) Pediatric Allergy, Asthma and Immunology Elective (5) This course provides exposure to basic concepts for diagnosis and management of children and adults with allergic and immunologic diseases and respiratory and cutaneous abnormalities.
Effective: Fall 2012
Prerequisite:

PED 750 Pediatric Nephrology/Diabetes (5-10) Outpatient and inpatient clinical concepts/diagnosis and management of
children with acute and chronic renal disease or renal electrolyte abnormalities.
Effective: Summer 1990
Prerequisite:
PED 750A **Pediatric Nephrology Elective (3rd year)** (2.5) This course provides exposure to basic concepts for diagnosis
management of children with kidney disease or fluid/electrolyte abnormalities.
Effective: Summer 2006
Prerequisite:
PED 751 **Pediatrics, Child Abuse Pediatrics Elective** (5) This course provides the student with an exposure to the
assessment and management of children alleged to be abused or neglected, the manifestations of child abuse and
neglect, and the interface between medicine and other agencies (Child Protection, law enforcement, and legal
professionals).
Effective: Fall 2012
Prerequisite:
PED 755 **Pediatric Adolescent/Young Adult Medicine Elective (4th year)** (5) Students participate in the evaluation and
treatment of a full range of primary care services to adolescents and young adults.
Effective: Fall 2013
Prerequisite:
PED 765 **Pediatric Neurology** (5-10) Rounds, conferences, and clinics and experience in electroencephalography,
electromyography, neuroradiology, neuro-ophthalmology, psychometric testing, and otolaryngology, as clinically
appropriate.
Effective: Fall 2008
Prerequisite:
PED 770 **Pediatric Critical Care Medicine Acting Internship** (5) Experience in pediatric critical care medicine.
Effective: Spring 2009
Prerequisite:
PED 780 **Pediatrics Acting Internship** (5) Reinforces and expands the principles of inpatient pediatric care for fourth-year
medical students motivated to perform as acting interns.
Effective: Spring 2009
Prerequisite:
PED 796 **Pediatric Individual Studies** (5) Individually supervised creative projects, including basic or clinical pediatric
research.
Effective: Spring 2009
Prerequisite:
PED 796A **Pediatric Individual Studies for 3rd Year Medical Students** (2.5) Pediatrics Individual Studies for 3rd Year
Medical Students.
Effective: Spring 2010
Prerequisite:
PED 797 **Pediatrics Special Topics** (5) Basic or clinical electives in pediatrics at non-affiliated institutions.
Effective: Spring 2009
Prerequisite:
Perspectives (PERSP)

PERSP 949 Higher Education Law (3) This course examines the legal issues applicable to American colleges and universities. Topics include academic freedom and tenure, affirmative action in admissions decisions, intercollegiate athletics, issues of student privacy, sexual harassment, and intellectual property.
Effective: Summer 2007

PERSP 951 The Rise of the Administrative State (3) This course will provide a survey of selected topics in the twentieth-century history of American law, with a focus on the rise of the modern administrative state. Among the topics expected to be covered: legal formalism and its progressive and legal-realist critiques; the rise of corporations; the labor and liability explosion; the New Deal and the rise of banking and securities regulation; and deregulation in the 1980s.
Effective: Summer 2013

PERSP 952 Energy Law & Policy - National and International (3) This course is the introductory course in the regulation of energy in the United States.
Effective: Spring 2014

PERSP 953 National Security Law (3) This course examines the domestic and international legal framework governing the use of national security powers by the U.S. government.
Effective: Spring 2014

PERSP 954 Representing the Professional Athlete (3) This course will address the legal relationships and responsibilities of representing the professional athlete.
Effective: Fall 2014 Future: Fall 2014

PERSP 972 Sports and Public Policy (3) The course introduces students to fundamental concepts of law, economics, and business strategy necessary to understand and evaluate legal doctrine and public regulatory policy with regard to professional and major intercollegiate sports.
Effective: Spring 2011
Prerequisite:
PERSP 973 Biotechnology Law (3) This course will provide students a comprehensive understanding of the legal issues posed by developments in genetic technologies. The course will provide an overview of the history and technical foundations of the field and examine the legal dimensions of biotechnology. Generally, the course will examine how the law reacts to legal problems that arise from new technologies and examine whether the law is capable of anticipating such problems and acting prospectively.
Effective: Spring 2003

PERSP 978 Native American Law (3) This course has several segments covering such matters as federal and state power over Native American affairs; personal rights and liberties under tribal law; and the history of treaties with and legislation concerning Native Americans.
Effective: Spring 2003

PERSP 979 Animal Law (3) In this course we will address how legal systems and administrative agencies make decisions that affect nonhuman animals. The course will focus on the origins, background, and evolution of animal law and address specific substantive areas involving animals such as the concept of animals as property; contract and tort issues related to animals, animal protection laws; constitutional law issues; animal exploitation and the government regulation of animals.
Effective: Summer 2011

PERSP 982 Economic Analysis of Law (3) This course will introduce students to the economic analysis of law and legal issues. No prior training in economics is assumed, though students with such training are welcome to enroll. Students will be instructed in the nature of economic reasoning and will learn to use fundamental principles of economics to explain legal doctrines and solve legal problems. The course will focus primarily on a positive analysis, investigating whether legal doctrines can best be explained as attempts to promote efficiency, and only secondarily on the normative question of whether law ought to promote efficiency. After a brief survey of microeconomics, the course will address the major common law areas of property, contracts, torts, and criminal law as well as the legal process.
Effective: Summer 2011

PERSP 994 The Right To (1) This minicourse will consider the notion of right in the context of personal choice. It will examine costs to individuation, both necessary and excessive, that are exacted in the process of establishing and perpetuating the uniformity and stability of legal and political regimes. Topics that will be considered include relative definitions of normalcy and privacy, physical characteristics and their exploitation, religious activities, prostitution, obscenity/pornography and personal expression, racial identity and discrimination, gambling, controlled substances, the use of force, and terrorism.
Effective: Fall 1998

The Pennsylvania State University
PERSP 995 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2007

PERSP 996 **Independent Study** (1-4) In this course the student, under the supervision of a full-time member of the faculty, will be permitted to do research and write a paper of a substantial nature on a significant subject.
Effective: Summer 2011

PERSP 997 **Special Topics** (1-9) Special topics.
Effective: Spring 2011

PERSP 997A **Disability Law** (3) This course will address legal issues and concepts for people living with disabilities. It will cover issues surrounding civil rights discrimination, and public benefits ranging from employment, housing, income supplements, health, and education. Students will review legislation, case law, and rules, and will focus on the practical, and social concerns of individuals living with disabilities.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PERSP 999 **Sports Law** (3) This course explores how various areas of the law impact the sports industry. The "law" that is used by most sports lawyers is principally the application of settled principles of other legal fields to the sports industry: contract law, labor law, tax law, products liability law, intellectual property law, etc. The Sports Law course, then focuses on important areas that provide the foundational principles that drive the outcome of most legal disputes arising in the sports industry. The course also examines on certain areas of the law such as antitrust, labor, and constitutional law, that have specific and unique applications to sports.
Effective: Summer 2011

Last Import from UCM: May 24, 2014 3:00 AM
Petrol & Min Enginer (P M E)

P M E 590 Colloquium (1) Courses teaches students how to engineer their technical presentations. Effective: Spring 2006

Last Import from UCM: May 24, 2014 3:00 AM
Petroleum and Natural Gas Engineering (P N G)

P N G 405 Rock and Fluid Properties (3) Reservoir rock properties, rock and fluid properties (interaction between rock and fluids), flow behavior in reservoir, and fluid properties.
Effective: Spring 2002
Prerequisite:

P N G 406 Rock and Fluid Laboratory (1) Systematic study of oil reservoir rocks and fluids; their interrelation applied to petroleum engineering.
Effective: Spring 2001
Prerequisite: Concurrent: P N G 405

Effective: Spring 2001
Prerequisite:

P N G 411 Introduction to Petroleum and Natural Gas Extraction (1) Introduction to the design and implementation of the systems used in the extraction of oil and gas. Not intended for petroleum and natural gas engineering majors.
Effective: Spring 2001
Prerequisite:

P N G 420 Applied Reservoir Analysis and Secondary Recovery (4) Application of material balance equations/transient flow solutions to water influx problems; displacement theory as it applies to design/behavior of flooding.
Effective: Spring 2008
Prerequisite:

Effective: Spring 1999
Prerequisite:

P N G 430 Reservoir Modeling (3) The numerical simulation of petroleum reservoir processes by the use of models; scaling criteria and network flow.
Effective: Spring 2008
Prerequisite:

P N G 440W Formation Evaluation (3) Study of those methods used to evaluate the engineering properties of oil and gas bearing reservoir formations.
Effective: Spring 1999
Prerequisite:

P N G 450 Drilling Design and Production Engineering (3) Design and analysis of oil-field drilling operations and equipment.
Effective: Spring 2001
Prerequisite:

P N G 451 Drilling Laboratory (1) Practice in well-control procedures. Measurement of drilling fluid properties.
Effective: Spring 2014
Prerequisite: Concurrent: P N G 450

P N G 475 Petroleum Engineering Design (3) Design and selection of mechanical components used in the production of fluids from subsurface reservoirs.
Effective: Spring 2001
Prerequisite:

P N G 480 Production Process Engineering (3) Analysis and evaluation of surface production processes, fluid separation, storage, measurement, treating, custody transfer, transmission, disposal, corrosion, and other operations.
Effective: Spring 2014
Prerequisite:

P N G 482 Production Engineering Laboratory (1) Measurement and analyses of the physical and chemical properties of hydrocarbon fluid systems in a production environment.
Effective: Spring 2014
Prerequisite: Concurrent: P N G 480

P N G 489 Engineering Evaluation of Oil and Gas Properties (3) Application of present worth and rate-of-return analysis; reserve calculations; decline curve analysis; uncertainty and risk analysis to engineering project design and evaluation.
Effective: Spring 2011
Prerequisite:

P N G 490 Introduction to Petroleum Engineering Design (1) Introduction to the concepts of engineering design as applied to petroleum and natural gas projects.
Effective: Spring 2014
Prerequisite:

P N G 491 Reservoir Engineering Design (1) Application of the concepts of reservoir and drilling engineering to
petroleum engineering design projects.
Effective: Spring 2011
Prerequisite:

P N G 492 Petroleum Engineering Capstone Design (1) Integration of petroleum and natural gas engineering concepts to project design.
Effective: Fall 2001
Prerequisite:

P N G 494 Thesis (1-6) A problem in petroleum engineering involving review of the literature and experimental data obtained in the field or laboratory.
Effective: Spring 1999

P N G 494H Thesis (1-6) A problem in petroleum engineering involving review of the literature and experimental data obtained in the field or laboratory.
Effective: Fall 2007

P N G 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2007

P N G 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1999

P N G 497A Wild Well Control (1) Students are taught the theory of well control in the first session, and in the second and third session make use of the simulator to mimic operating conditions.
Effective: Summer 2014 Ending: Summer 2014

P N G 497A SPE Petrobowl Preparation (1) To learn the general knowledge and history of the petroleum engineering, geosciences, and petroleum industry; to get familiar with the SPE petrobowl competition format.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

P N G 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1999

Effective: Spring 1999

Effective: Spring 1999
Prerequisite:

Effective: Spring 1999

P N G 512 Numerical Reservoir Simulation (3) Mathematical analysis of complex reservoir behavior and combination drives; numerical methods for the solution of behavior equations; recent developments.
Effective: Spring 1999

P N G 518 Design of Miscible Recovery Projects (3) Theory and design of miscible methods of oil recovery, current field applications, including hydrocarbon, CO2, micellar/polymer, alkaline, and inert gas.
Effective: Spring 1999

P N G 520 Phase Relations in Reservoir Engineering (3) Phase relations as applied to condensate and retrograde condensate reservoirs and to other problems in petroleum production.
Effective: Spring 1999

P N G 526 Well Stimulation (3) Causes and identification of oil and gas wells with low productivity and or recovery; design and evaluation of well stimulation methods.
Effective: Spring 2014

P N G 530 Natural Gas Engineering (1-3) Flow in producing or storage reservoirs; gas well testing; transmission systems; storage cycle; current developments.
Effective: Spring 1999
Prerequisite:

P N G 550 **Reactive Transport in the Subsurface** (3) This course teaches principles of flow, transport, and reaction processes in the natural subsurface.

Effective: Spring 2014
Prerequisite:

P N G 590 (EME 590, F SC 590, MNG 590) **Colloquium** (1-3) Continuing seminars which consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.

Effective: Spring 2009

P N G 595 **Internship** (1-15) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Summer 2004
Prerequisite:

P N G 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1999

P N G 597 **Special Topics** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1999

P N G 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Spring 1999

Effective: Spring 1999

P N G 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Spring 1999

Effective: Spring 1999

P N G 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Spring 1999

NOTE: Courses in the use of X-ray diffraction, electron microscopy, and spectroscopy in petroleum and natural gas studies are listed under MATERIALS SCIENCE and GEOLOGICAL SCIENCES.

Last Import from UCM: May 24, 2014 3:00 AM
Pharmacology-Hy (PHARM)

PHARM 504 Molecular Pharmacology II (4) Continuation of PHARM 503.
Effective: Spring 2011

PHARM 520 Principles of Drug Action (2) Detailed analysis of basic parameters governing drug actions.
Effective: Winter 1978

PHARM 550 Neuropharmacology (3) An in-depth discussion on the mechanism and pharmacokinetics of various neuroactive drugs.
Effective: Fall 2011

PHARM 551 Anti-infective Therapeutics (1) This course covers general principles related to pharmacology of major classes of antimicrobial agents.
Effective: Summer 2011
Prerequisite:

PHARM 552 Integrated System Pharmacology (1) This course covers principles related to pharmacology of major classes of drugs affecting the autonomic nervous, cardiovascular, pulmonary, and renal systems.
Effective: Summer 2011
Prerequisite:

PHARM 553 Gastrointestinal and Immunomodulatory Therapeutics (1) This course focuses on pharmacology of drugs affecting gastrointestinal disorders, drugs used in therapy of inflammatory diseases, and immunomodulatory drugs for organ transplantation therapy.
Effective: Summer 2011
Prerequisite:

PHARM 554 Anticancer Therapeutics (1) This course provides an understanding of general principles of the induction, prevention and treatment of cancer.
Effective: Summer 2011
Prerequisite:

PHARM 561 Neuropharmacology (2) This course introduces basic principles of human neuropharmacology, with primary emphasis on drugs active in the central nervous system.
Effective: Summer 2011
Prerequisite:

PHARM 562 Endocrine Pharmacology (2) This course presents basic principles of human endocrine pharmacology, emphasizing drugs active in the endocrine and reproductive systems.
Effective: Summer 2011
Prerequisite:

PHARM 581 (PSIO 581) Maintaining Homeostasis A: Heart and Vasculature (1) Physiology of the cardiovascular system.
Effective: Fall 2007
Prerequisite:

PHARM 583 (PSIO 583) Maintaining Homeostasis C: Kidney (1) Renal physiology and pharmacology.
Effective: Fall 2007
Prerequisite:

PHARM 584 (ANAT 584) Human Anatomy and Development A: Gross Human Anatomy (1) Explore gross human anatomy providing orientation to organs and the overall relationship of organs and structures within the human body.
Effective: Fall 2007

PHARM 585 (ANAT 585) Human Anatomy and Development B: Human Development (1) Explores human embryology and organogenesis beginning at the third week of gestation through parturition.
Effective: Fall 2007

PHARM 586 (ANAT 586) Human Anatomy and Development C: Stem Cell Biology and Regenerative Medicine (1) Exploration of stem cell biology and the role of stem cells in regenerative medicine.
Effective: Fall 2007

PHARM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

PHARM 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987
PHARM 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 1987

PHARM 600 **Thesis Research** (1-15) No description. Effective: Fall 1983

PHARM 601 **Ph.D. Dissertation Full-Time** (0) No description. Effective: Fall 1983

PHARM 610 **Thesis Research Off Campus** (1-15) No description. Effective: Fall 1983

PHARM 611 **Ph.D. Dissertation Part-Time** (0) No description. Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Philosophy (PHIL)

PHIL 401 (AM ST 421) American Philosophy (3) Survey of key figures and movements in American thought including the Transcendentalists, the Pragmatists, and contemporary developments.
Effective: Fall 2007
Prerequisite:

PHIL 402 European Philosophy (3 per semester, maximum of 6) Survey of key figures and movements of Europe, including phenomenology, existentialism, structuralism and post-structuralism, and critical theory.
Effective: Fall 2007
Prerequisite:

PHIL 403 Environmental Ethics (3) Examines ethical theories, justice, rights, community, and human values revolving around such issues as preservation, conservation, pollution, sustainability, and population.
Effective: Fall 2007
Prerequisite:

PHIL 403H Environmental Ethics (3) Examines ethical theories, justice, rights, community, and human values revolving around such issues as preservation, conservation, pollution, sustainability, and population.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

PHIL 405 Philosophy of Law (3) Examines philosophical views of the nature of law, legal ethics, law and society through questions regarding definition, interpretation, and institutions.
Effective: Fall 2007
Prerequisite:

PHIL 406 Business Ethics (3) Examines the moral justification of business practices and economic systems through critical analyses of case studies and applied ethical theories.
Effective: Summer 1998
Prerequisite:

PHIL 407 (S T S 407) Technology and Human Values (3) Interrelationships of twentieth-century technological change and human values. Emphasis on the social and ethical aspects of technological progress.
Effective: Spring 1999
Prerequisite:

PHIL 408W Social and Political Philosophy (3) Historical and philosophical foundations of political organization, authority, and justice, and contemporary issues of rights, community, and culture.
Effective: Fall 1998
Prerequisite:

PHIL 409 Aesthetics (3) Studies concepts of beauty, truth, value, representation, production and reproduction, and reality through philosophical theory and works of art.
Effective: Fall 2007
Prerequisite:

PHIL 410 Philosophy of Science (3) Historical and contemporary foundational and methodological issues such as causality, relativity and epistemological relativism, teleology, and the nature of reality.
Effective: Fall 1998
Prerequisite:

PHIL 413 Philosophy of Literature (3) Discusses truth, belief, illusion, imagination and creativity through philosophical literature, as well as problems of philosophical writing.
Effective: Fall 1998
Prerequisite:

PHIL 416 Philosophy of Social Science (3) Examines the philosophical nature and foundations of methodology, structures and objects, value-neutrality and objectivity in the social sciences.
Effective: Summer 2013
Prerequisite:

PHIL 418 Ethics (3) Examines ethical theories, justice, rights, community, and human values revolving around such issues as preservation, conservation, pollution, sustainability, and population.
Effective: Fall 2007
Prerequisite:

PHIL 418W Ethics (3) Examines ethical theories, justice, rights, community, and human values revolving around such issues as preservation, conservation, pollution, sustainability, and population.
Effective: Summer 1998
Prerequisite:

PHIL 424 Philosophy of Religion (3) Examines the relation between faith and reason, the nature of religious experience, the problem of evil, the existence of God.
Effective: Fall 2007
Prerequisite:

PHIL 425W Epistemology (3) The nature of cognition and perception, the conditions of experience, and the justification
and truth of belief.
Effective: Summer 1998
Prerequisite:

PHIL 426W Metaphysics (3) Examines the nature of reality, the existence of freedom, and the nature of matter, mind, and values.
Effective: Summer 1998
Prerequisite:

PHIL 427 Philosophy of Mind (3) Investigates problems of mind from the standpoint of traditional metaphysical views, modern scientific psychology, neuroscience, and artificial intelligence.
Effective: Spring 1999
Prerequisite:

PHIL 427 (S T S 432) Medical and Health Care Ethics (3) Examines ethical, political, and social issues in the research, implementation, and practice of medicine, medical technologies, and healthcare.
Effective: Fall 1998
Prerequisite:

PHIL 432 (S T S 433) Ethics in Science and Engineering (3) Ethical issues arising in the practice of science and engineering and their philosophical analysis.
Effective: Fall 1995

PHIL 435 (S T S 435) The Interrelation of Science, Philosophy, and Religion (3) The historical and transformative interactions between science and Western philosophical and religious views of nature, humanity, and God.
Effective: Spring 1996

PHIL 437 (IL) World Philosophies and Cultures (3) Philosophical traditions, problems, and authors in African, Asian, Middle- Eastern, Native American, or other non-Western cultures and intellectual traditions.
Effective: Fall 2007
Prerequisite:

PHIL 438 (WMNST 438) Feminist Philosophy (3) Examines the central currents of feminist philosophy, selected problems and concepts regarding difference, gender and sex, identity, and political culture.
Effective: Fall 2007
Prerequisite:

PHIL 439 (IL) Asian Philosophies and Issues (3) Exploration of the traditions, problems, and authors of one or more of the philosophical systems of Buddhism, Hinduism, Taoism, and Confucianism.
Effective: Fall 2007
Prerequisite:

PHIL 441 Capstone Course in Philosophy (3) This course is intended as the Capstone Course for Philosophy majors and is to be taken during their senior year or during the last semester of their junior year.
Effective: Spring 2011
Prerequisite:

PHIL 453 Topics in Ancient Philosophy (3 per semester, maximum of 6) Examines the philosophy of central figures in ancient philosophy from the pre-Socratics to the post-Aristotelians and Neoplatonists.
Effective: Fall 1998
Prerequisite:

PHIL 455 Topics in Modern Philosophy (3 per semester, maximum of 6) Descartes to Kant, including mind and reality, space and time, God and nature, morality and autonomy.
Effective: Summer 1998
Prerequisite:

PHIL 456 Topics in Nineteenth Century Philosophy (3 per semester, maximum of 6) Hegel to Nietzsche, including nature and spirit, history and human nature, ideology and morality.
Effective: Summer 1998
Prerequisite:

PHIL 457 Topics in Twentieth Century Philosophy (3 per semester, maximum of 6) Topics in the philosophy of figures such as Husserl, James, Russell, Wittgenstein, Heidegger, Merleau-Ponty, and Dewey.
Effective: Fall 2007
Prerequisite:

PHIL 458 Topics in Contemporary Philosophy (3 per semester, maximum of 6) Topics in the philosophy of contemporary figures such as Foucault, Habermas, Rorty, Derrida, Rawls, Davidson, and MacIntyre.
Effective: Summer 1998
Prerequisite:

PHIL 460 (US;IL) (AF AM 460) African American Philosophy (3) Major works by African American Philosophers, on topics of race, freedom, citizenship, nationhood, law and society.
Effective: Spring 2013
Prerequisite:

PHIL 461 Plato (3 per semester, maximum of 6) Examines the metaphysics, epistemology, politics, aesthetics, and moral theory of this central figure in the history of philosophy.
Effective: Spring 1999
Prerequisite:

PHIL 473 German Idealism (3 per semester, maximum of 6) Critically examines the philosophy of central German idealists, including Kant, Fichte, Schelling, and Hegel, and its impact on later philosophy.
Effective: Summer 1998
Prerequisite:

PHIL 474 Kant (3 per semester, maximum of 6) Critical examination of the metaphysics, epistemology, aesthetics, legal and moral philosophy, and influence of Immanuel Kant.
Effective: Fall 1998
Prerequisite:

PHIL 476 Hegel (3 per semester, maximum of 6) Critical examination of the metaphysics, moral theory, epistemology, and philosophy of history of this central figure of 19th-century philosophy.
Effective: Fall 1998
Prerequisite:

PHIL 479 Critical Theory (3 per semester, maximum of 6) Examines the ontology, political and social thought of the Frankfurt School from Horkheimer and Adorno to Marcuse and Habermas.
Effective: Summer 1998
Prerequisite:

PHIL 485 Heidegger (3 per semester, maximum of 6) Studies Heidegger's metaphysical thought from his early to later works regarding being, history, subjectivity, aesthetics, language, and his influence.
Effective: Fall 1998
Prerequisite:

PHIL 486 Wittgenstein (3 per semester, maximum of 6) Examines Wittgenstein's early and late work, including logical atomism, meaning, language games, forms of life, and the private-language argument.
Effective: Fall 1998
Prerequisite:

PHIL 487 Analytic Philosophy (3 per semester, maximum of 6) Analytic philosophy's founding by Frege, Russell, Moore, Wittgenstein; and its contemporary development by Quine, Kripke, Dummett, and Davidson.
Effective: Fall 1998
Prerequisite:

PHIL 490 Dewey (3 per semester, maximum of 6) Critically examines the metaphysics, epistemology, ethics, logic, aesthetics, education theory, and social and political philosophy of this major American pragmatist.
Effective: Summer 1998
Prerequisite:

PHIL 491 Merleau-Ponty (3 per semester, maximum of 6) Merleau-Ponty's phenomenological anti-dualism through his studies on the body and the flesh, aesthetics, political philosophy, and late ontology.
Effective: Summer 1998
Prerequisite:

PHIL 493 Phenomenology and Hermeneutics (3 per semester, maximum of 6) Studies major figures and issues in phenomenology and hermeneutics, focusing on the work of Husserl, Gadamer, Heidegger, Merleau-Ponty, and Levinas.
Effective: Summer 1998
Prerequisite:

PHIL 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

PHIL 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

PHIL 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PHIL 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PHIL 498 Special topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2001

PHIL 499 (IL) Foreign Study--Philosophy (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005
PHIL 501 American Philosophy Seminar (3 per semester/maximum of 6) Critically examines central figures in American philosophy including Emerson, Thoreau, Pierce, James, Royce, Dewey, Santayana, Mead, Quine, Davidson, and Rorty. Effective: Spring 2000

PHIL 502 European Philosophy Seminar (3 per semester/maximum of 6) Critically examines central European philosophers including Husserl, Heidegger, Sartre, Merleau-Ponty, Gadamer, Levinas, Foucault, and Derrida; course content varies with instructor. Effective: Summer 2000

PHIL 503 Ethics Seminar (3 per semester/maximum of 6) Critical investigation of philosophical problems in ethics, and viability of historical and contemporary ethical positions; course content varies with instructor. Effective: Summer 2000

PHIL 504 Social and Political Philosophy Seminar (3 per semester, maximum of 6) Critical examination of social and political philosophies, their historical context and relation to philosophic method; course content varies with instructor. Effective: Summer 2000

PHIL 505 Seminar in Logic (3) This course covers topics in first-order symbolic logic with identity and advanced special topics in metatheory. Effective: Summer 2009

PHIL 506 Aesthetic Seminar (3 per semester, maximum of 6) Critical examination of problems in philosophy of art including beauty, taste, value, politics, culture, interpretation; course content varies with instructor. Effective: Summer 2000

PHIL 507 Epistemology Seminar (3 per semester/maximum of 6) Studies problems, figures, and movements in epistemology from the ancient philosophers to contemporary thinkers; course content varies with instructor. Effective: Spring 2000

PHIL 508 Feminist Philosophy Seminar (3) Critically examines feminist approaches to ethics, epistemology, philosophy of science, metaphysics, social/political philosophy, and the history of philosophy. Effective: Summer 2005

PHIL 509 Critical Philosophy of Race (3 per semester/maximum of 6) The study of philosophical issues raised by racism and by the concept of race and other related concepts. Effective: Summer 2012

PHIL 510 Ancient Philosophy Seminar (3 per semester/maximum of 6) Analyzes specific concerns and texts of ancient philosophy including those of Plato and Aristotle; course content varies with instructor. Effective: Summer 2000

PHIL 511 Medieval Philosophy Seminar (3 per semester/maximum of 6) Critical examination of medieval texts and philosophers, including Augustine, Anselm, Aquinas, Duns Scotus, and Ockham; course content varies with instructor. Effective: Summer 2000

PHIL 512 Modern Philosophy Seminar (3 per semester/maximum of 6) Examines rationalism, empiricism, and other philosophical movements from Bacon and Descartes to Kant and Mill; course content varies with instructor. Effective: Summer 2000

PHIL 513 19th-Century Philosophy Seminar (3 per semester, maximum of 6) Examination of philosophy from Hegel to Nietzsche on history, dialectic, ideology, existence, science, and art; course content varies with instructor. Effective: Summer 2000

PHIL 514 20th Century Philosophy Seminar (3 per semester, maximum of 6) Central problems in works of twentieth-century philosophers including Russell, Dewey, Wittgenstein, Heidegger, Foucault, Levinas; course content varies with instructor. Effective: Spring 2000

PHIL 515 Contemporary Philosophy Seminar (3 per semester, maximum of 6) Critically investigates diverse recent figures and problems of continental, pragmatic, and analytic philosophy; course content varies with instructor. Effective: Summer 2000

PHIL 516 Major Figures in Ancient Philosophy (3 per semester/maximum of 12) Close study of a major figure in ancient philosophy (6th BCE to 4th CE) through one central or several important texts. Effective: Fall 2011
PHIL 562 **Major Figures in Modern Philosophy** (3 per semester/maximum of 12) Close study of a major figure in modern philosophy through one central or several important texts. Effective: Fall 2011

PHIL 563 **Major Figures in Nineteenth-Century Philosophy** (3 per semester/maximum of 12) Close study of a major figure in nineteenth-century philosophy through one central text or several important texts. Effective: Summer 2012

PHIL 564 **Major Figures in Twentieth-Century Philosophy** (3 per semester/maximum of 12) Close study of a major figure in twentieth-century philosophy by means of one central text or several important texts. Effective: Summer 2012

PHIL 565 **Perspectives and Methods in Bioethics** (3) This course explores a variety of theories and methods in bioethics and applies them to a selection of current topics. Effective: Spring 2012

PHIL 566 **Perspectives in Macro-Bioethics** (3) This course explores systemic and structural issues in bioethics, and the theories and methodologies required to address them. Effective: Spring 2012

PHIL 567 **Ethics and the Responsible Conduct of Biomedical Research** (3) Provides an understanding of ethical issues arising in the responsible conduct of biomedical research and frameworks for critically analyzing them. Effective: Spring 2012

PHIL 568 **Phenomenology** (3 per semester/maximum of 6) A critical study of one or more thinkers, ideas, or movements in modern phenomenology. Effective: Fall 1983

PHIL 569 **Philosophical Translation Seminar** (2) Studies philosophical works in their original (non-English) languages; course content varies with instructor. Effective: Spring 2001

PHIL 570 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

PHIL 571 **Research Technique** (1) A course utilizing research sources and techniques relevant to philosophical studies. Taken in the first semester of graduate study. Effective: Spring 1987

PHIL 572 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

PHIL 573 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 1987

PHIL 600 **Thesis Research** (1-15) No description. Effective: Fall 1983

PHIL 601 **Ph.D. Dissertation Full-Time** (0) No description. Effective: Fall 1983

PHIL 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Students will teach introductory logic course--i.e., Phil 1--and other introductory level courses as required by staffing. Effective: Fall 1983

PHIL 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university. Effective: Spring 2000

PHIL 610 **Thesis Research Off Campus** (1-15) No description.

The Pennsylvania State University
PHIL 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

PHIL 803 (HLS 803) **Homeland Security: Social and Ethical Issues** (3) This course will examine the social, political, legal, and ethical issues that arise in the context of homeland security.
Effective: Summer 2010

Last Import from UCM: May 24, 2014 3:00 AM
Phys Med&Rehabilitat (PMR)

PMR 730 Physical Medicine and Rehabilitation Elective (3rd and 4th year) (5) This elective is for 3rd and 4th year medical students interested in gaining experience in the field of Adult and Pediatric Physical Medicine and Rehabilitation, improving diagnostic skills related to the complications of disability, and improving neurologic and musculoskeletal examination skills.
Effective: Summer 2011
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Physician Asst Stdis (PAS)

PAS 701 Applied Human Structure and Function I (2) Course will discuss the clinically relevant anatomy and structural information necessary for clinical practice emphasizing surface anatomy and surface markings.
Effective: Summer 2014
Prerequisite: Concurrent: PAS 704 PAS 707 PAS 710 PAS 713 PAS 716 PAS 720

PAS 704 Clinical Medicine I (5) This is the cornerstone of all the medically relevant courses. Various disease processes will be described, along with the incidence, prevalence, pathophysiology, treatment plans, and expected outcomes.
Effective: Summer 2014
Prerequisite: Concurrent: PAS 701 PAS 707 PAS 710 PAS 713 PAS 716 PAS 720

PAS 707 Pathophysiology I (2) This class provides a systems approach to basic concepts of disease processes which enables analysis for alterations to body systems.
Effective: Summer 2014
Prerequisite: Concurrent: PAS 701 PAS 704 PAS 702 PAS 710 PAS 721 PAS 714

PAS 710 Pharmacology I (2) This class will review the basic principles of drug action, their indications, contraindications, toxicities, and potential side effects.
Effective: Summer 2014
Prerequisite: Concurrent: PAS 701 PAS 704 PAS 707 PAS 713 PAS 716 PAS 720

PAS 713 Pharmacotherapeutics I (1) This course discusses the mechanism of action, medication classification, the indications, contraindications, and adverse events seen with medication use.
Effective: Summer 2014
Prerequisite: Concurrent: PAS 701 PAS 704 PAS 707 PAS 710 PAS 716 PAS 720

PAS 716 History and Physical Examination I (2) Techniques for eliciting a complete medical history, performance of a complete physical examination, and accurate recording in a patient record.
Effective: Summer 2014
Prerequisite: Concurrent: PAS 701 PAS 704 PAS 707 PAS 710 PAS 713

PAS 720 Pediatric Studies (1) This course will prepare students for their role in the evaluation and management of the pediatric population.
Effective: Summer 2014
Prerequisite: Concurrent: PAS 701 PAS 704 PAS 707 PAS 710 PAS 713 PAS 716

PAS 721 US Health Care System/Legal Medicine (1) This course is intended to introduce the graduate physician assistant to the health care delivery system in the United States with reference to how the physician assistant profession fits into this system for providing accessible, comprehensive, and cost-effective care. This course will also cover the legal aspect involved with medical practice.
Effective: Summer 2014
Prerequisite: Concurrent: PAS 701 PAS 704 PAS 707 PAS 710 PAS 713 PAS 716

PAS 722 Women’s Studies (1) This course is intended to prepare the graduate physician assistant student to assess and manage the female population in the area of prenatal care, labor and delivery, and routine and complicated gynecologic care.
Effective: Summer 2014
Prerequisite: Concurrent: PAS 701 PAS 704 PAS 707 PAS 710 PAS 713 PAS 716

Last Import from UCM: May 24, 2014 3:00 AM
Physics (PHYS)

PHYS 400 Intermediate Electricity and Magnetism I (3-4) Electrostatics and magnetostatics in vacuum; electrical and magnetic properties of matter; electrodynamics, Maxwell’s equations, conservation laws, electromagnetic waves and radiation.
Effective: Fall 2012 Ending: Summer 2014
Prerequisite: Concurrent: MATH 230 OR MATH 231; PHYS 204

PHYS 400 Intermediate Electricity and Magnetism (3-4) Electrostatics and magnetostatics in vacuum; electrical and magnetic properties of matter; electrodynamics, Maxwell’s equations, conservation laws, electromagnetic waves and radiation.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:

PHYS 402 Electronics for Scientists (4) Circuit and network theory; active devices; amplifiers; introduction to digital electronics; noise theory.
Effective: Spring 2007
Prerequisite:

PHYS 406 Subatomic Physics (3) Introductory treatment of elementary particles, fundamental strong and electroweak interactions, nuclear structure, accelerators, particle detection, nuclear astrophysics.
Effective: Spring 1995
Prerequisite:

PHYS 410 Introduction to Quantum Mechanics I (3-4) Basic postulates; Schrodinger wave equation; stationary states; variational method; scattering in one dimension; orbital angular momentum; hydrogen atom; numerical methods.
Effective: Spring 2007
Prerequisite:

PHYS 411 Introduction to Quantum Mechanics II (3) General theory of angular momentum; approximation methods; scattering theory; radiation theory; applications to atomic, molecular, condensed matter, nuclear and particle physics.
Effective: Spring 1994
Prerequisite:

PHYS 412 Solid State Physics I (3) Crystal symmetry, x-ray structure analysis, lattice vibrations, thermal properties, free electron transport theory, elementary one-electron quantum theory of solids.
Effective: Fall 1986
Prerequisite: Concurrent: PHYS 410

PHYS 413 Solid State Physics II (3) Quantum theory of electronic and optical properties of solids, semiconductors, dielectrics, magnetic properties, crystal imperfections, low-temperature effects, and superconductivity.
Effective: Fall 1986
Prerequisite:

PHYS 414 Solid State Physics (3) Crystal structure; reciprocal lattice; X-ray diffraction; lattice vibrations; thermal properties; free electron gas model; energy bands; semiconductors; magnetism.
Effective: Spring 2007
Prerequisite:

PHYS 419 (MATH 419) Theoretical Mechanics (3) Principles of Newtonian, Lagrangian, and Hamiltonian mechanics of particles with applications to vibrations, rotations, orbital motion, and collisions.
Effective: Spring 2007
Prerequisite:

PHYS 420 Thermal Physics (3) Basic postulates of statistical mechanics and thermodynamics, microscopic quantum states and macroscopic parameters; partition functions; Maxwell- Boltzmann and quantum statistics.
Effective: Spring 2007
Prerequisite:

PHYS 421W Research Methods in Physics (3) Methodology focusing on the theory of measurement and experiment design.
Effective: Spring 2007
Prerequisite:

PHYS 443 Intermediate Acoustics (3) Vibration and simple vibrating systems, sound wave propagation, acoustic instruments, recent developments.
Effective: Fall 1999
Prerequisite:

PHYS 444 Topics in Contemporary Physics (2) Modern research topics and career opportunities in physics; employment, graduate education, and tailoring the physics curriculum to meet career goals.
Effective: Spring 2007
Prerequisite:

PHYS 446 The Year in Physics: A Seminar on the Latest Research (1) Discussion recent research in physics.
Effective: Spring 2007
Prerequisite:
PHYS 457 Experimental Physics (1-3) Selected experiments in various fields of physics. 
Effective: Spring 2007
Prerequisite:

PHYS 457W Experimental Physics (3) Selected experiments in various fields in physics. 
Effective: Spring 2007
Prerequisite:

Effective: Spring 2007
Prerequisite:

Effective: Fall 1986
Prerequisite:

PHYS 462 Applications of Physics in Medicine (3) Applications of physics in human physiology and in instrumentation for medical diagnosis and treatment. 
Effective: Summer 2002
Prerequisite:

PHYS 472 Elements of Nuclear Physics and its Applications to Medical Imaging and Treatments (3) Introduction to the theory of nuclei, interactions with fast particles, and applications to medical imaging and radiation oncology. 
Effective: Spring 2012
Prerequisite:

PHYS 479 (MATH 479) Special and General Relativity (3) Mathematical description, physical concepts, and experimental tests of special and general relativity. 
Effective: Spring 2007
Prerequisite:

PHYS 494 Physics Research Project (1-12) Investigation of an original research problem, including a literature search. Preparation of a formal thesis is optional. 
Effective: Spring 2007

PHYS 494H Physics Research Project (1-12) Investigation of an original research problem, including a literature search. Preparation of a formal thesis is optional. 
Effective: Fall 2007

PHYS 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. 
Effective: Spring 2007
Prerequisite:

PHYS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Fall 1983

PHYS 496H Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Spring 2012

PHYS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. 
Effective: Fall 1983

PHYS 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. 
Effective: Summer 2005

PHYS 510 General Relativity I (3) Foundations of general relativity, elements of differential geometry, Einstein's equation, Newtonian limit, gravity waves, Friedmann cosmologies and Schwarzschild solution. 
Effective: Spring 1996
Prerequisite:

PHYS 511 Topics in General Relativity (3) Selected topics from: Cauchy problem, Hamiltonian formulation, positive energy theorems, asymptotics, gravitational radiation, singularity theorems, black-holes, cosmology, observational tests. 
Effective: Spring 1996
Prerequisite:

PHYS 512 Quantum Theory of Solids I (3) Electrons in periodic potentials; single electron approximations; lattice dynamics; electrical, optical, and magnetic properties of solids; transport theory. 
Effective: Spring 1996
Prerequisite: Concurrent: PHYS 517
PHYS 513 Quantum Theory of Solids II (3) Electron-phonon interaction, BCS theory; Landau Fermi-liquid theory; disorder and localized states; spin-wave theory; many-body theory.
Effective: Spring 1996
Prerequisite:

PHYS 514 Physics of Surfaces, Interfaces, and Thin Films (3) This course focuses on interfacial and surface phenomena; structural, electronic, vibrational and thermodynamic properties; physisorption and chemisorption; phase transitions and ultrathin film nucleation; and growth phenomena.
Effective: Summer 1995
Prerequisite:

PHYS 517 Statistical Mechanics (3) Thermodynamics, classical and quantum statistics; Bose and Fermi gases; Boltzmann transport equation; phase transitions, critical phenomena; Ising model.
Effective: Spring 1996
Prerequisite:

PHYS 518 Critical Phenomena and Field Theory (3) Critical phenomena using field theoretical and renormalization group techniques; solvable statistical models and conformal field study; fluctuations and random processes.
Effective: Spring 2011
Prerequisite:

PHYS 524 Physics of Semiconductors and Devices (3) Electronic structure, optical and transport properties of crystalline and amorphous semiconductors, quantum wells, superlattices; quantum devices; quantum Hall effect.
Effective: Spring 1996
Prerequisite:

PHYS 525 Methods of Theoretical Physics I (3) Complex variables, Hilbert spaces, linear operators, calculus of variations, Fourier analysis, Green's functions, distributions, differential equations, and special functions.
Effective: Spring 1996

PHYS 526 Methods of Theoretical Physics II (3) Finite and Lie groups, representations and application to condensed matter and particle physics; selected topics from differential geometry.
Effective: Spring 1996
Prerequisite:

PHYS 527 (ASTRO 527) Computational Physics and Astrophysics (3) Introduction to numerical methods for modeling physical phenomena in condensed matter, atomic and high energy physics, gravitation, cosmology and astrophysics.
Effective: Fall 2008

PHYS 530 Theoretical Mechanics (3) Newtonian mechanics, noninertial coordinate system, Lagrangian mechanics, small oscillations, Hamiltonian formulation, canonical transformations, Hamilton-Jacobi theory, dynamical systems.
Effective: Spring 1996
Prerequisite:

PHYS 533 Theoretical Acoustics (3) Wave propagation in complex systems and materials: viscoelastic fluids, superfluids, elastic solids, periodic and random media, nonlinear media.
Effective: Spring 1996

PHYS 541 Elementary Particle Phenomenology (3) Baryons and mesons; leptons and quarks; electromagnetic and weak interactions and their unification; quantum chromodynamics; experimental techniques.
Effective: Spring 1996
Prerequisite:

PHYS 542 Standard Model of Elementary Particles Physics (3) Weinberg-Salam model of electroweak interactions, spontaneous symmetry breaking, quantum chromodynamics; selected topics from grand unified theories and superstring theory.
Effective: Summer 1995
Prerequisite:

PHYS 545 (ASTRO 545) Cosmology (3) Modern cosmology of the early universe, including inflation, the cosmic microwave background, nucleosynthesis, dark matter and energy.
Effective: Spring 2009

PHYS 555 (MATSE 555) Polymer Physics I (3) Introduction to the fundamental concepts needed to understand the physics applicable to polymer melts, solutions and gels.
Effective: Spring 2006

PHYS 557 Electrodynamics (3) Special relativity, electromagnetic fields, Maxwell's equations, conservation laws, electrostatics and magnetostatics.
Effective: Spring 2011
Prerequisite:

PHYS 559 Graduate Laboratory (2) Study and applications of techniques and instrumentation used in modern physics laboratories.
Effective: Spring 1996
PHYS 561 Quantum Mechanics I (3) Postulates of quantum mechanics, Hilbert space methods, one dimensional potentials, spin systems, Harmonic oscillator, angular momentum, Hydrogen atom.
Effective: Spring 1996
Prerequisite:

PHYS 562 Quantum Mechanics II (3) Addition of angular momenta, perturbation theory, variational principle, scattering theory, density matrices, identical particles, interpretations of quantum mechanics, Dirac theory.
Effective: Spring 1996
Prerequisite:

PHYS 563 Quantum Field Theory I (3) Canonical and functional integral quantization of relativistic and non-relativistic field theories; Feynman diagrams; spontaneous symmetry breaking; renormalization group.
Effective: Spring 1996
Prerequisite:

PHYS 564 Quantum Field Theory II (3) Abelian and non-Abelian gauge theories; renormalization group and operator product expansions; BRST quantization; scattering theory, other related topics.
Effective: Spring 1996
Prerequisite:

PHYS 565 Interface of General Relativity and Quantum Physics (3) Limitations of perturbative methods, conceptual problems; selected topics from black hole thermodynamics, canonical quantum gravity, loop space methods and string-theory.
Effective: Summer 1995
Prerequisite:

PHYS 571 Modern Atomic Physics (3) Light-atom interactions, atomic structure, laser cooling and trapping, interferometry, and Bose-Einstein condensation.
Effective: Spring 2011
Prerequisite:

PHYS 572 Laser Physics and Quantum Optics (3) Theory of modern lasers, non-linear and quantum optics, photon statistics, laser spectroscopies, pulsed lasers.
Effective: Spring 2011
Prerequisite:

PHYS 580 Elements of Network Science and Its Applications (3) Introduction to elements of network theory used to describe and model complex networks; applications in social, biological, and technological networks.
Effective: Spring 2011
Prerequisite:

PHYS 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1997

PHYS 596 Individual Studies (1-9) Creative projects, including non-thesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

PHYS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

PHYS 600 Thesis Research (1-15) No description.
Effective: Fall 1983

PHYS 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

PHYS 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

PHYS 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

PHYS 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2007

PHYS 897A Hands-On Particle Astrophysics (2) Following a brief overview of modern particle physics, you will learn why and how particle astrophysicists are building detectors at the South Pole, on the Argentine Pampas, and on balloons high.
**Physiology (PHSIO)**

**PHSIO 508 (NUTR 508) Critical Readings in Molecular Nutrition** (1.5 per semester/maximum of 6) Understanding of approaches, methods and current concepts in molecular biology and nutrition through critical readings of current primary literature.
- Effective: Summer 2013
- Concurrent: NUTR 445 or NUTR 446

**PHSIO 510 Physiological Adaptations to Stress** (3) Students will learn how to address problems in physiological adaptations to stress through parallel molecular, cellular, and systemic approaches.
- Effective: Spring 1998
- Prerequisite:

**PHSIO 567 (KINES 567) Advanced Exercise Physiology** (3) Physiological changes during exercise with emphasis on the effects of physical conditioning and training.
- Effective: Fall 1987
- Prerequisite:

**PHSIO 571 (BIOL 571) Animal Physiology** (3) Mammalian cardiovascular, respiratory, renal, and gastrointestinal systems.
- Effective: Summer 1985
- Prerequisite:

**PHSIO 572 (BIOL 572) Animal Physiology** (3) Mammalian nervous, endocrine, metabolic, and reproductive systems.
- Effective: Summer 1985
- Prerequisite:

**PHSIO 577 (KINES 577) Cardiovascular Physiology** (3) In-depth study of the heart and circulatory system with emphasis on the effects of exercise on cardiovascular function.
- Effective: Fall 1997
- Prerequisite:

**PHSIO 578 (KINES 578) Physiology and Mechanical Behavior of Skeletal Tissues** (3) In-depth examination of the structure, composition, and material behavior of the basic skeletal tissues, including bone, cartilage, tendon, and ligament.
- Effective: Spring 1999
- Prerequisite:

**PHSIO 590 Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students or outside speakers.
- Effective: Spring 1987

**PHSIO 595 (EXSCI 595) Internship in Exercise Physiology and Cardiac Rehabilitation** (1-15) Clinical and related research aspects of exercise physiology and exercise prescription with respect to cardiac and cardiovascular rehabilitation.
- Effective: Spring 1988
- Prerequisite:

**PHSIO 596 Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
- Effective: Spring 1987

**PHSIO 597 Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
- Effective: Spring 1987

**PHSIO 600 Thesis Research** (1-15) No description.
- Effective: Fall 1983

**PHSIO 601 Ph.D. Dissertation Full-Time** (0) No description.
- Effective: Fall 1983

**PHSIO 610 Thesis Research Off Campus** (1-15) No description.
- Effective: Fall 1983

**PHSIO 611 Ph.D. Dissertation Part-Time** (0) No description.
- Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Physiology-Hy (PSIO)

PSIO 501 Scientific Analysis and Presentation (1) Journal club format used to develop critical analytical and presentation skills for understanding and clearly presenting current scientific data.
Effective: Summer 1998

PSIO 503 Cellular Physiology (1) PSIO 503 is a physiology course that focuses on cellular aspects of physiology.
Effective: Summer 2000

PSIO 504 Cellular and Integrative Physiology (3) PSIO 504 is a physiology course that integrates cellular and organ-based physiology concepts.
Effective: Summer 2000

PSIO 505 Cellular and Integrative Physiology II (3) This is a physiology course that integrates cellular and organ-based physiology concepts.
Effective: Spring 2002
Prerequisite:

PSIO 522 Physiological Adaptations to Stress (3) Students will learn how to address problems in physiological adaptations to stress through parallel molecular, cellular, and systemic approaches.
Effective: Spring 2012

PSIO 581 (PHARM 581) Maintaining Homeostasis A: Heart and Vasculature (1) Physiology of the cardiovascular system.
Effective: Fall 2007
Prerequisite:

PSIO 583 (PHARM 583) Maintaining Homeostasis C: Kidney (1) Renal physiology and pharmacology.
Effective: Fall 2007
Prerequisite:

PSIO 584 Practical Bioinformatics A: Analysis of Biological Databases (1) Understanding and using protein, nucleotide, structure and human disease databases.
Effective: Fall 2007
Prerequisite:

PSIO 585 Practical Bioinformatics B: Protein and Structural Biology (1) Understanding and using protein structure databases; advanced topics include basic biological switches, protein:protein interactions and molecular modeling.
Effective: Spring 2008
Prerequisite:

PSIO 586 Practical Bioinformatics C: Gene and Protein Expression (1) Understanding modern techniques to address gene and protein expression; using database searching or data collection to obtain such information.
Effective: Fall 2007
Prerequisite:

PSIO 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students or outside speakers.
Effective: Spring 1987

PSIO 596 Individual Studies (1-9) Creative projects including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

PSIO 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

PSIO 600 Thesis Research (1-15) No description.
Effective: Summer 1983

PSIO 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 1983

PSIO 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 1983

PSIO 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 1983
Plant Biology (PLBIO)

PLBIO 512 **Plant Resource Acquisition and Utilization** (4) Advanced study of plant resource acquisition and utilization considering molecular, physiological, and whole plant perspectives through lectures and problem solving. Effective: Fall 2006

PLBIO 513 **Integrative Plant Communication and Growth** (4) Advanced study of plant communication, growth, and development considering molecular, physiological, and whole plant perspectives through lectures and problem solving. Effective: Fall 2006

PLBIO 514 (HORT 514) **Modern Techniques and Concepts in Plant Ecophysiology** (2) An intensive introduction to concepts of plant ecophysiology and modern techniques used in this field. Effective: Fall 2006
Prerequisite:

PLBIO 515 **Modern Techniques and Concepts in Plant Cell Biology** (2) An intensive introduction to concepts of plant cell biology and modern techniques used in this field. Effective: Spring 2012
Prerequisite:

PLBIO 516 **Modern Techniques and Concepts in Plant Molecular Biology** (2) An intensive introduction to contemporary molecular biology methods as applied to the study of plants. Effective: Spring 2012
Prerequisite:

PLBIO 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Fall 2006

PLBIO 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 2006

PLBIO 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently. Effective: Fall 2006

PLBIO 600 **Thesis Research** (1-15) No description. Effective: Fall 2006

PLBIO 601 **Ph.D. Dissertation Full-Time** (0) No description. Effective: Fall 2006

PLBIO 610 **Thesis Research Off Campus** (1-15) No description. Effective: Fall 2006

PLBIO 611 **Ph.D. Dissertation Part-Time** (0) No description. Effective: Fall 2006

Last Import from UCM: May 24, 2014 3:00 AM
Plant Pathology (PPATH)

PPATH 502 Plant Disease Diagnosis (3) Field and laboratory techniques used in diagnosing plant diseases caused by various types of pathogens with emphasis on fungi. Effective: Summer 2013
Prerequisite:

PPATH 505 Fundamentals of Phytopathology (2) An in-depth tutorial of the fundamental theories and concepts of plant pathology. Effective: Spring 2014

PPATH 522 Professional Development & Ethics in Plant Pathology (1) Graduate students will develop key professional skills and ethics through a combination of lectures, discussions, and assignments. Effective: Summer 2013

PPATH 553 Molecular Genetics of Plant-Pathogen Interactions (3) In depth discussion/review of the primary literature on the mechanisms of plant-pathogen interactions at the molecular and cellular levels. Effective: Spring 2014
Prerequisite:

PPATH 540 Plant Disease Control (3) Principles of plant disease control, including theoretical considerations involved in control by chemical and nonchemical means. Effective: Summer 2013

PPATH 542 Epidemiology of Plant Diseases (3) Disease development in populations of plants, with emphasis on the impact of environment and control practices on rate of development. Effective: Summer 2013
Prerequisite:

Prerequisite:

PPATH 544 Fungal Genetics (4) Fungal breeding systems, mating types, asexual restrictions and recombination, tetrad analysis, gene conversion and extra genetic elements. Effective: Summer 2013
Prerequisite:

PPATH 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Summer 2013

PPATH 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2013

PPATH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Summer 2013

PPATH 601 Ph.D. Dissertation Full-Time (0) No description. Effective: Summer 2013

PPATH 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised preparation and presentation of materials in lectures and laboratories, preparation and supervision of exams and student consultation and evaluation. Effective: Summer 2013

PPATH 611 Ph.D. Dissertation Part-Time (0) No description. Effective: Summer 2013
PPATH 802 (AGBIO 802) **Plant Protection: Responding to Introductions of Threatening Pests and Pathogens** (3) This course provides knowledge of plant biosecurity, plant disease, regulations, and technologies using case study examples. Effective: Summer 2013
Prerequisite:

PPATH 853 (TURF 853) **Interpreting Turfgrass Science Literature** (3) Introduction to turfgrass research publications, interpretation of the data, and discussion of the significance of the results. Effective: Summer 2013

Last Import from UCM: May 24, 2014 3:00 AM
Political Science (PL SC)

PL SC 403 The Legislative Process (3) Analysis of the policy process within the legislative system; the effects of environmental factors on policy alternatives and legislative decision making.
Effective: Spring 2001
Prerequisite:

PL SC 405 The American Presidency (3) An examination of the selection methods for, and powers of, the American presidency, as well as other chief executives.
Effective: Fall 1983
Prerequisite:

PL SC 409 (CAS 409) Democratic Deliberation (3) Explores the theory and practice of democratic deliberation in elections, town meetings, juries, legislatures, and other public institutions.
Effective: Spring 2014
Prerequisite:

PL SC 410 Strategy and Politics (3) This course examines political behavior using social choice theory and game theory.
Effective: Spring 2013
Prerequisite:

PL SC 411W Principles of International Cooperation (3) An exploration of the forces that make conflict, or cooperation, more likely in international relations.
Effective: Summer 2006
Prerequisite:

Effective: Spring 2011
Prerequisite:

PL SC 413 The Rise and Fall of the Soviet Union (3) Background, organization, and operation of the Communist Party and the government of the Soviet Union.
Effective: Spring 2001
Prerequisite:

PL SC 414 Dictators and Their Demise (3) Dictators and Their Demise examines the political economy of authoritarian rule.
Effective: Summer 2011
Prerequisite:

Effective: Spring 2003
Prerequisite:

PL SC 417 American Local Government and Administration (3) Organization, powers, functions, and problems of American cities and metropolitan areas; modern trends and developments.
Effective: Winter 1978
Prerequisite:

PL SC 418 International Relations Theory (3) A survey of traditional and contemporary conceptual frameworks and theoretical approaches for the analysis of international relations.
Effective: Winter 1978
Prerequisite:

PL SC 418W International Relations Theory (3) A survey of traditional and contemporary conceptual frameworks and theoretical approaches for the analysis of international relations.
Effective: Spring 1999
Prerequisite:

PL SC 419 The Bureaucratic State (3) Overview of structural, technological, decision-making, behavioral, and political subsystems of bureaucracy; emphasis on bureaucratic dynamics within larger environmental, interorganizational contexts.
Effective: Fall 2007
Prerequisite:

PL SC 420 State Making (3) Students learn about how national states arise, expand the territory and population they control, and persist or fail.
Effective: Summer 2013
Prerequisite:

PL SC 422 Comparative Urban Politics (3) Relationships between structure and evolution of city systems and patterns of political behavior.
Effective: Spring 2001
Prerequisite:

PL SC 423 Post-Soviet Politics (3) Aspects of political transition and institutions of the fifteen Soviet successor republics; emphasis on Russia and republican confederation.
Effective: Fall 2007
Prerequisite:

PL SC 424 Topics in Comparative Government and Institutions (3) Topics in the comparative analysis of representative contemporary Western and non-Western governmental institutions.
Effective: Fall 2007
Prerequisite:

PL SC 425 Government and Politics of the American States (3) Comparative analysis of political processes; executive, legislative, and judicial decision making and behavior; examination of systems functioning; selected public policies.
Effective: Winter 1978
Prerequisite:

PL SC 426 Political Parties and Interest Groups (3) Interest group basis of American politics, analysis of party and group behavior in electoral politics and the policy process.
Effective: Fall 1983
Prerequisite:

PL SC 427 Political Opinion (3) Nature and development of mass attitudes and opinions; political socialization; voting behavior; relation between opinions and public policy.
Effective: Spring 2001
Prerequisite:

PL SC 428 (US;IL) (WMNST 428) Gender and Politics (3) Gender in politics in the United States and around the world; major areas of women and politics research.
Effective: Fall 2007
Prerequisite:

PL SC 429 Analysis of Electoral Politics (3) The new politics, its technology, and the strategic perspectives that underlie it.
Effective: Spring 2007
Prerequisite:

PL SC 430 Selected Works in the History of Political Theory (3) Detailed examination and analysis of a selected major work, thinker, or tradition in the history of political theory.
Effective: Spring 1998
Prerequisite:

PL SC 430W Selected Works in the History of Political Theory (3) Detailed examination and analysis of a selected major work, thinker, or tradition in the history of political theory.
Effective: Spring 2006
Prerequisite:

PL SC 431 Ancient, Medieval, and Renaissance Political Theories (3) Political theories of Plato and Aristotle; selected Greek, Roman, medieval, and Renaissance theorists through Machiavelli.
Effective: Spring 2003
Prerequisite:

PL SC 432 Modern and Contemporary Political Theories (3) Political theories of the seventeenth through the twentieth centuries, including Hobbes, Locke, Rousseau, Marx, Mill, Mosca, Weber, and selected theorists.
Effective: Spring 2003
Prerequisite:

PL SC 433 Political Foundations of the Early American Republic (3) The course introduces students to the major political and philosophical movements that influenced the founders of the early American republic.
Effective: Summer 2008
Prerequisite:

PL SC 434 (IL) (AFR 434) War and Development in Africa (3) This course will examine the relationship between war and development in sub-Saharan Africa in the post colonial era.
Effective: Fall 2012
Prerequisite:

PL SC 435 Foundations of American Political Theory (3) Political theories of colonial, revolutionary, and constitutional periods presented through works of selected thinkers and analysis of particular political problems.
Effective: Spring 2001
Prerequisite:

PL SC 435W Foundations of American Political Theory (3) Political theories of the revolutionary and constitutional periods presented through works of selected political thinkers and political issues.
Effective: Spring 2001
Prerequisite:

PL SC 436 Civil Wars (3) This course examines factors influencing the onset, duration, severity, termination, recurrence, and consequences of civil wars around the world.
Effective: Spring 2012
Prerequisite:

PL SC 437 War in World Politics (3) Causes, resolution, and consequences of crises and wars; testing theories of conflict using both case and statistical studies.
Effective: Summer 1997
Prerequisite:

PL SC 438 National Security Policies (3) Impact of national security on U.S. government and foreign policy; roles and interaction of President, Congress, government agencies, interest groups.
Effective: Spring 2001
Prerequisite:

PL SC 439 (CRIMJ 439) The Politics of Terrorism (3) Analysis of political terrorism as a violent alternative for peaceful change and traditional warfare in the nuclear age.
Effective: Spring 2008
Prerequisite:

PL SC 440 (US;IL) (AFR 440, I B 440) Globalization and Its Implications (3) This course explores the socioeconomic implications of globalization.
Effective: Spring 2013
Prerequisite:

PL SC 441 Transnational Corporations and Other Organizations in International Relations (3) Analysis of the effects of transnational actor behavior on international relations.
Effective: Fall 2007
Prerequisite:

PL SC 442 American Foreign Policy (3) Principles of American foreign policy; processes of policy formulation; roles of the President, Congress, the State Department, and other government agencies.
Effective: Spring 2001
Prerequisite:

PL SC 443 (IL) (AFR 443) Ethnic Conflict in Africa (3) This course explores the various causes and impacts of ethnic conflicts in the African context.
Effective: Spring 2013
Prerequisite:

PL SC 444 Government and the Economy (3) Interactions of governmental and economic activity in American life. Survey of governmental (national, state, local) promotional, regulatory, and ownership policies.
Effective: Winter 1978
Prerequisite:

PL SC 445Y (US) (AF AM 445Y, LER 445Y) Politics of Affirmative Action (3) Examines history, politics, and economics of the use of special programs to advance racial interests in the U.S.
Effective: Fall 2012
Prerequisite:

PL SC 450H Genocide and Tyranny (3) This course focuses on the conceptualization and socio-political determinants of genocide and tyrannical regimes, with an emphasis on the Holocaust.
Effective: Spring 2013 Ending: Fall 2014
Prerequisite:

PL SC 450H (J ST 450H) Genocide and Tyranny (3) This course focuses on the conceptualization and socio-political determinants of genocide and tyrannical regimes, with an emphasis on the Holocaust.
Effective: Spring 2015 Future: Spring 2015
Prerequisite:

PL SC 452 Government and Politics of Central Europe (3) Politics and society in the Communist Era, the revolutions of 1989, and problems of adjustment to democracy and market.
Effective: Fall 2007
Prerequisite:

PL SC 453 (IL) Political Processes in Underdeveloped Systems (3) Comparative analysis of the political, social, and economic problems characteristic of underdeveloped systems.
Effective: Fall 2007
Prerequisite:

Effective: Fall 2012
Prerequisite:

PL SC 455 Governments and Politics of Western Europe (3) Comparative analysis of political and governmental structures of major West European nations; main functions and processes of such structures.
Effective: Spring 2001
Prerequisite:

PL SC 456 Politics and Institutions of Latin-American Nations (3) Social forces and processes, governmental institutions, foreign policies of major states of Latin America.
Effective: Spring 2001
Prerequisite:

PL SC 457 International Politics of Latin America (3-6) Relationships among the nations of Latin America and the social forces which determine and shape their direction.
Effective: Spring 2001
Prerequisite:
PL SC 458 Government and Politics of East Asia (3-6) Examination of political institutions, democratic and communist revolution, political leadership, political processes of major states of East Asia. Effective: Summer 1996
Prerequisite:

PL SC 459 (IL) (AFR 459) Culture and World Politics (3) Role of culture in world politics. Effective: Spring 2013

PL SC 460 (S T S 460) Science, Technology, and Public Policy (3) The all-pervasive importance of science and technology policy in modern societies and mechanisms and processes by which it is made. Effective: Spring 1995
Prerequisite:

PL SC 461 (IL) Politics of the European Union (3) This course introduces students to the history, institutions and politics of the European Union. Effective: Spring 2011
Prerequisite:

PL SC 462 Marxist and Socialist Political Theory (3) Analysis of major problems and key works in the Marxist and Socialist tradition; dialectical materialism, alienation, class warfare, etc. Effective: Spring 2001
Prerequisite:

PL SC 464 (IL) (AFR 464) Globalization, Extractive Industries, and Conflict in Africa (3) Socioeconomic and environmental impacts of extractive industries in Africa. Effective: Fall 2012
Prerequisite:

PL SC 466 Political Psychology (3) An interdisciplinary investigation of the major topics and debates characterizing the subfield of political psychology. Effective: Spring 2014
Prerequisite:

PL SC 467 International Relations of the Middle East (3) The international relations of the Middle East, stressing national security policies of regional and outside actors, and major contemporary conflicts. Effective: Spring 1985
Prerequisite:

PL SC 469 (IL) (ASIA 469) Government and Politics of South Asia (3) This course offers an overview of the politics of modern South Asia with specific focus on Afghanistan, India and Pakistan. Effective: Summer 2014
Prerequisite:

Prerequisite:

PL SC 471 American Constitutional Law (3) The origins of judicial review, landmark decisions of the Supreme Court, and their impact on the American form of government. Effective: Fall 2007
Prerequisite:

PL SC 472 The American Legal Process (3) Analysis of the roles, procedures, and policies characterizing the American legal system. Effective: Spring 2001
Prerequisite:

PL SC 473 American Judicial Behavior (3) Analyzes behavior of judges and other participants in the legal process; examines how and why courts function as policymaking bodies. Effective: Fall 2007
Prerequisite:

PL SC 474 Civil Liberties and Due Process (3) Fundamental problems relating to civil liberties and due process. Effective: Fall 2007
Prerequisite:

PL SC 480W Congress and the Presidency (3) Basic characteristics and processes of the national legislature and executive; roles and interaction of these institutions in the policy process. Effective: Fall 2007
Prerequisite:

PL SC 481 Global Political Economy (3) This course examines states, markets, power, production, and the relations between the various transnational agents who act in these areas. Students may not receive credit for PL SC 481 and PL SC 412. Effective: Spring 2007
Prerequisite:

PL SC 482 American State and Urban Politics (3) Explores basic characteristics and processes of American state and urban politics; nature of intergovernmental relations involving these governmental levels.
PL SC 484W The Foreign Policy of Soviet Successor States (3) Relations between Russia and The Newly Independent States (NIS); Russia's relations with selected foreign states and political Institutions; regional impact of the NIS in Baltic, Asian, and Central Asian areas.
Effective: Fall 2007
Prerequisite:

PL SC 486 (IL) (HIST 489, ASIA 489) International Culture in East Asia (3) Study of the role of culture in East Asian regional and East-West international relations.
Effective: Summer 2013
Prerequisite:

PL SC 487 International Law and Organizations (3) Major topics and issues of international law with special attention to institutional arrangements (international organizations) through which that law operates.
Effective: Fall 2007
Prerequisite:

PL SC 488 Comparative Public Policy (3) Comparative methodology and public policy implementation in postindustrial societies; selected case studies of policy output.
Effective: Fall 2007
Prerequisite:

PL SC 489 Public Administration (3) A survey of the major approaches to the management of most governmental agencies.
Effective: Fall 2007
Prerequisite:

Effective: Fall 2007
Prerequisite:

PL SC 491 Peace and Conflict Studies Seminar (3) Advanced study of major contemporary issues of peace and conflict; includes anthropological, technological, psychological, and economic perspectives.
Effective: Spring 2013
Prerequisite:

PL SC 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

PL SC 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

PL SC 495 Political Science Internship (1-6) Combining experience in government offices, related agencies, or law firms, with appropriate readings and a research paper/report.
Effective: Fall 2007
Prerequisite:

PL SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PL SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PL SC 497A Democracy and Its Impacts (3) Does democracy matter? Do democratic countries grow faster than dictatorships, or provide more public benefits to their people? Do they invest more in health and education? Are incomes more equal in democratic states? Are democracies less corrupt? This course focuses on differences in government policies and performance across different regime types, to determine whether democratic regimes outpace autocracies. Given the amounts of international aid devoted to democracy promotion around the globe, the topic should be relevant for anyone interested in foreign aid, international development, or the impacts of transitions from dictatorship to democracy.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PL SC 497B The Psychology of Terrorism (3) This class introduces students to the study of terrorism from a psychological perspective. That is, the study of the thoughts and the behaviors of those individuals who use fear to attain their goals, and those individuals who are victims of fear-driven compliance. We will explore the psychological processes that create a terrorist, the motivation for individual terrorists, terrorist organizations and their leaders, which may greatly differ. Students will learn about recruitment and indoctrination and gain an understanding of the socio-political conditions that propagate terrorist organizations and serve as recruitment tools for terrorists. Students will learn to "think" like a terrorist, in order to better understand their motives, their objectives, the methods used to achieve their
PL SC 497C Religion and War in World Politics (3) This course examines the relationship between religion and war in world politics in the modern era. Religion has become increasingly important in the relations within and between states; however, it has been an under-studied topic in world politics. This class focuses on the salience of religion in world politics; specifically, it examines the role of religion in warfare (primarily, but not exclusively international warfare). In this course, we will evaluate the extent to which religious motivation(s) of leaders (and followers), religious characteristics of states, and religious justifications generate armed conflicts; and also attempt to determine the extent to which presumable “religious wars” are different from “non-religious” (or “secular”) wars. Although the class will examine the topic broadly, particular attention will be paid to more systematic studies and findings regarding these issues.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PL SC 497D Politics and the Media (3) This course is designed to introduce students to the interactive dynamics of the news media and the political system. We focus primarily on the news media as it is the dominant medium for political communication. Theoretical concerns include the type of information systems necessary for a healthy and vibrant democratic culture. We also examine the relationship between the historical development of mass media and its impact on democratic communication. Other topics addressed include media bias, framing journalistic norms and routines, and government regulation. Finally, we are in the midst of a profound transformation of the news media - largely influenced by the Internet - and understanding the implications of the changing nature of the news provide insight for the future of American democracy.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PL SC 497E Government and Politics of South Asia (3) This course will present an overview of the politics of modern South Asia focusing on Afghanistan, India, and Pakistan. We will then begin our exploration of South Asian politics by studying the impact of the British colonial experience, the rise of nationalism and the emergence of independent nation states in South Asia. In order to develop a broad understanding of the political and economic experience of the region we will spend time analyzing the 3 countries individually. Additionally, we will explore in detail three important themes in Political Science. First, the state of economic development in these countries. Second, the relationship between identity politics and violence. Third, international relations of these countries focusing on terrorism and nuclear policy.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PL SC 497F Democratization in Asia (3) This seminar addresses the literature on democracy and democratization and then applies it in Asia. Since 1974, over thirty countries around the world started a transition toward democracy. As a result of these democratic events, comparative scholars have studied these, and earlier transition cases, to understand why some countries become democratic while others do not, and why some new democracies show signs of considering while others collapse. This seminar, then, addresses the recent work in the field of democratization. First, we will review works that define and measure key concepts, such as authoritarianism, democracy, and democratic consolidation. Then, we will consider a range of factors to explain the installation, consolidation, or failure of democracy in specific Asian countries. The goal of this seminar are three-fold.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PL SC 497G Working with & Communicating Information in Data Instructor (3) This course will give honors students the skills needed to find data, prepare it for analysis, engage in simple forms of data analysis that illustrate relationships, and interpret substantively the results of their analyses. No statistical background is assumed. Particular attention will be given to developing data visualization skills that allow students to effectively communicate the results of their analyses to others. Data used in the course will cover a variety of substantive fields in political science including such topics as the causes of war, death penalty, elections in the US and cross nationally, campaign speeches. Additional topics will come from other fields such as global health, economics, and the geography. These skills will develop student facility to work with data in a variety of courses, senior honors project and upon graduation in the workforce.

PL SC 499 (IL) Foreign Study--Government (1-12) Study, in selected foreign countries, of political institutions.
Effective: Summer 2005
Prerequisite:

PL SC 501 Methods of Political Analysis (3) Survey of important methods and approaches to the study of politics; introduction to research design.
Effective: Fall 1995

PL SC 502 Statistical Methods for Political Research (3) Basic concepts of statistics and their use in political research; data analysis, casual inference, regression analysis, computer applications.
Effective: Spring 1995

PL SC 503 Multivariate Analysis for Political Research (3) Analysis of selected issues in quantitative political analysis; introduction to advanced multivariate analysis techniques.
Effective: Spring 2003
Prerequisite:

PL SC 506 Game Theory for Political Science I (3) This course offers foundational information regarding the use of non-cooperative game theory in political science.
Effective: Summer 2014
Prerequisite:

PL SC 511 Professional Norms in Political Science (1.5) An introduction to professional norms, the fundamentals of good research, and the basic skills necessary for good teaching.
Effective: Spring 2007

PL SC 513 Writing and Professional Development in Political Science (1.5) Professional development focusing on publishing research, writing dissertations, and professional issues of advanced graduate students.
Effective: Fall 2007
Prerequisite:

Effective: Fall 2007

PL SC 519 (SOC 519) Survey Methods II: Analysis of Survey Data (3) Intermediate course on the statistical analysis of survey data: topics include weighting, complex surveys, missing data, and contextual analysis.
Effective: Spring 2008
Prerequisite:

PL SC 534 (AFR 534) Political Economy of Energy and Extractive Industries in Africa (Oil and Mining) (3) Students will examine how the expansion of petroleum and mining industries has impacted Africa's political economics and external relations.
Effective: Spring 2013

PL SC 540 American Government and Politics (3) Survey of basic literature in major fields of U.S. government: public opinion, parties, voting, interest groups, presidency, congress, judiciary.
Effective: Fall 1995

PL SC 541 American Political Institutions (3-9) Research on a selected topic in United States political institutions such as the presidency, the courts, congress, bureaucracy, state governments.
Effective: Spring 1995

PL SC 542 American Political Behavior (3 per semester/maximum of 9) Research on a selected topic in United States political behavior such as public opinion, voting, parties, socialization, judicial behavior.
Effective: Spring 1995

PL SC 550 Comparative Politics: Theory and Methodology (3) Survey of basic literature and major research efforts in comparative political analysis.
Effective: Fall 1995

PL SC 551 Comparative Political Institutions (3 per semester/maximum of 9) Comparative study of the institutional structures of different political systems: the state, party systems, administrative structures.
Effective: Spring 1995

PL SC 552 Comparative Political Behavior (3 per semester, maximum of 9) Research on aspects of comparative political behavior, such as political culture, political change and development, interest groups, public opinion.
Effective: Spring 2003

PL SC 553 Studies in Regional Politics (3 per semester/maximum of 9) Research on political systems in selected regions of the world, such as Europe, Latin America, East and South Asia.
Effective: Spring 1995

PL SC 554 The Politics of Development (3) The course explores the origins of modernity, its proliferation globally, and problems associated with initiating and sustaining development.
Effective: Summer 2005

PL SC 555 Comparative Regimes (3 per semester/maximum of 9) This course provides an overview of comparative analyses of regimes as they relate to the field of political science.
Effective: Summer 2013

PL SC 556 Civil Conflict (3) This class addresses civil conflict, in terms of general theory regarding cooperation and conflict and also cross-regional cases of civil conflict.
Effective: Spring 2013

PL SC 560 International Relations: Theory and Methodology (3) Survey of major traditional and contemporary theory-building efforts and contemporary research techniques and orientations in international relations.
Effective: Summer 1995
PL SC 561 American Foreign Policy (3 per semester/maximum of 9) Research on the institutions, dynamics, and major themes of United States foreign policy. Effective: Spring 2003

PL SC 563 International Political Economy (3 per semester, maximum of 9) Research on international political economy with a focus on theory building; analysis of political causes and consequences of economic behavior. Effective: Spring 2003

PL SC 564 International Organization (3 per semester/maximum of 6) Research on international governmental and non-governmental organizations in the international system, emphasizing the United Nations and collective security. Effective: Spring 1995
Prerequisite:

Prerequisite:

PL SC 566 Conflict Management, Termination, and Bargaining (3) Research on termination and resolution of international conflicts, focusing on theory building and empirical assessment of theories of conflict resolution. Effective: Fall 2008
Prerequisite:

PL SC 580 Modern Democratic Political Theory (3) Survey of major themes and problems in modern theories of democratic politics. Effective: Spring 2003

PL SC 581 History of Political Theory (3 per semester/maximum of 9) Research on selected political theorists or historical traditions of political thought. Effective: Spring 2003

PL SC 583 Modern Political and Social Theory (3 per semester/maximum of 9) Research on major developments and issues in modern political and social theory, such as critical theory, modernism, and postmodernism. Effective: Spring 2003

PL SC 586 Theory of Bureaucratic and Administrative Politics (3 per semester/maximum of 6) The role of the executive in government and politics; theories of administrative organization, organization behavior, and decision-making processes. Effective: Spring 1998

PL SC 594 Research in Political Science (1-6) Supervised student activities on research projects identified on an individual or small group basis. Effective: Summer 1988

PL SC 595 Internship in Political Science (1-9) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Summer 1987
Prerequisite:

PL SC 595A (SOC 595A) Survey Research Practicum (1-6 per semester/maximum of 6) Practicum in Survey Research data collection or management. Effective: Summer 2011
Prerequisite:

PL SC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. A specific title may used in each instance and will be entered on the student's transcript. Effective: Spring 1987

PL SC 596A Independent Study in American Politics (1-18) Independent study with faculty in specific area of research. This way the student can get credit in the area to count in that specific area, count for major/minor field. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PL SC 596A Independent Study in American Politics (1-18) Independent study with faculty in specific area of research. This way the student can get credit in the specific area to count for major/minor field credit. The title will also show on the transcript. Effective: Spring 2015 Ending: Spring 2015 Future: Spring 2015

PL SC 596B Independent Study in Comparative Politics (1-18) Independent study with faculty in specific area of
PL SC 596B Independent Study in Comparative Politics (1-18) Independent study with faculty in specific area of research. This way the student can get credit in the specific area to count for major/minor field credit. The title will also show on the transcript.

PL SC 596C Independent Study in International Relations (1-18) Independent study with faculty in specific area of research. This way the student can get credit in the specific area to count for major/minor field credit. The title will also show on the transcript.

PL SC 596D Independent Study in Political Methodology (1-18) Independent study with faculty in specific area of research. This way the student can get credit in the specific area to count for major/minor field credit. The title will also show on the transcript.

PL SC 596E ICPSR Summer Program in Qualitative Methods of Research (1-3) Program for the summer training in social science research methodologies and technologies.
Effective: Summer 2014 Ending: Summer 2014

PL SC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

PL SC 597A Mathematics for Political Science (1.5) This course provides a foundation in the basic mathematical principles needed to complete required coursework in statistical methods in the political science Ph.D. curriculum, and to undertake quantitative research and formal analysis in political science. Students will gain exposure to the mathematical language used in social science research and analysis, and develop the skills necessary to critically read and evaluate articles in political science and make informed choices about analytical approaches for their own research. Topics to be covered include basic principles of mathematics (including principles of arithmetic; mathematical notation and terminology; functions and equations; logarithms and exponents; Greek alphabet; and analytical geometry); calculus and linear algebra; multivariate calculus and optimization; and proof strategies.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PL SC 597B Measurement Theory (3) Political scientists are often interested in explaining concepts that are either difficult if not impossible to observe. Examples of unobservable concepts include political ideology, inequality in developing countries, democracy, or respect for human rights. A key challenge for political scientists and social scientists generally, is creating models that can explain these concepts while also capturing the uncertainty associated with their measurement. This course will provide an introduction to measurement models generally with specific focus on Bayesian measurement models and relational data. The course will also emphasize the use of construct validity to assess new and existing measures.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PL SC 597C Political Geography (3) Students of various social sciences disciplines such as economics, sociology, and political science have long been interested in understanding the role of geography in shaping processes as diverse as economic development, civil conflict, and social movement. Theoretically, studying the impacts of geography implies the introduction of a new dimension to the study of political and economic processes. Many new questions need to be answered, for instance, what is the relationship between geography and collective action? Whether and how geography affects changes of ethnic conflicts? This course will lay out some conceptual and methodological foundations drawn from existing studies and political geography. We will focus on the origins of geographical patterns of development and economic growth.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PL SC 597D Multivariate Analysis for Political Research II (3) This course introduces a range of statistical models widely used in empirical political science that generalize from linear-normal regression. It is the third foundational course in statistical methods in the political science Ph.D. curriculum; students are expected to have completed the prior courses on their equivalents. The primary focus of the course is on models where the traditional assumptions of ordinary least-squares regression are violated because the dependent variable is non-continuous. Emphasis is given to maximum
likelihood estimation of models of various kinds of limited-dependent and qualitative response variables including binary, multinomial, and ordered logit and probit, as well as Poisson and other models for event counts.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PL SC 597E Game Theory, Part 1 (3) Game theory is a mathematical tool used to study strategic interaction between two or more decision makers that have an effect on each others’ outcomes. Political scientists are increasingly using game theory to analyze strategic interactions across many different political settings. For example, international relations scholars often use game theory to explain when wars are more likely to occur. To study electoral competition, political scientists employ the tools of game theory to analyze how policy platforms selected strategically by political candidates influence electoral outcomes. This course aims to give students an entry-level understanding of the basic concepts of game theory, and how these concepts have been applied to the study of political phenomena.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PL SC 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Spring 1995

PL SC 599 (IL) Foreign Studies (1-12 per semester/maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.

Effective: Summer 2005

Effective: Fall 1983

PL SC 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Fall 1983

PL SC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) No description.

Effective: Spring 1995

PL SC 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.

Effective: Spring 2000

Effective: Fall 1983

PL SC 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Fall 1983

PL SC 836 Root Causes of Terrorism (3) Investigates the role economic, political and social factors play in determining patterns of international and domestic terrorism and terrorist activity.

Effective: Spring 2013

Last Import from UCM: May 24, 2014 3:00 AM
Portuguese (PORT)

PORT 405 Advanced Composition and Conversation (3) Intended to strengthen the advanced student's ability to speak, read, and write in modern Brazilian Portuguese.
Effective: Summer 1981
Prerequisite:

PORT 476 Brazilian Literature, The Modern Era (1880 to the Present) (3) A survey of the major texts of Brazilian literature from romanticism to the present.
Effective: Summer 1991
Prerequisite:

PORT 480 The Brazilian Novel (3) A survey of the Brazilian novel from its origins to the present.
Effective: Spring 1993
Prerequisite:

PORT 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

PORT 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

PORT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PORT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PORT 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

PORT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

PORT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1988

PORT 600 Thesis Research (1-15) No description.
Effective: Fall 1983

PORT 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Poultry Science (PTYSC)

NOTE: Also see courses listed under ANIMAL SCIENCE, DAIRY and ANIMAL SCIENCE, and FOOD SCIENCE.

PTYSC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

PTYSC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

PTYSC 600 Thesis Research (1-15) No description.
Effective: Fall 1983

PTYSC 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Primary Care Medicine (PCMED)

PCMED 700 Primary Care Preceptorship (1) Participation in primary care settings of family medicine, general internal medicine, and general pediatrics. 
Effective: Spring 1994 
Prerequisite: Concurrent: MED 701 MED 702

PCMED 731 Primary Care Clerkship (5) This course provides an opportunity for students to learn the principles of primary health care in rural, small town, and/or medically underserved communities. 
Effective: Summer 1996 
Prerequisite: 

PCMED 741 Primary Care Elective - Medical Director-Practice Management Fishburn Family Medicine (5) This module was developed for those students interested in gaining experience working with a medical director in primary care to learn about managing a practice and with family physicians, nurse practitioners and physician assistants in primary care. 
Effective: Summer 2009 
Prerequisite: 

PCMED 742 Primary Care Longitudinal Advanced Elective (5) Longitudinal outpatient experience caring for patients over time (once/week over six months) emphasizing continuity of care. 
Effective: Summer 2011 
Prerequisite: 

PCMED 743 Primary Care in PA (5) Four-week clinical experience with selected primary care physicians in PA. 
Effective: Summer 2003 
Prerequisite: 

PCMED 744 Primary Care, Continental U.S. Sites (5) Four-week Primary Care related experience in an outpatient clinic within the continental U.S. that meets the student's individual needs. 
Effective: Summer 2003 
Prerequisite: 

PCMED 745 Primary Care, Indian Health Service (5) Four-week clinical experience with primary care physicians located at Indian Health Service sites. 
Effective: Summer 2003 
Prerequisite: 

PCMED 746 Primary Care, International (5) Four-week clinical experience with primary care physicians located at International sites. 
Effective: Summer 2003 
Prerequisite: 

PCMED 747 Primary Care Elective - Leadership in Community Module (5) This module was developed for those who have both the interest and potential to become leaders in the health care of hi-risk children and their families, and to meet the challenges and opportunities of community-oriented primary care. 
Effective: Summer 2009 
Prerequisite: 

PCMED 748 Primary Care Elective - Penn State Orthopaedics and Sports Medicine (5) This module was developed for those students interested in gaining experience working in the areas of primary care sports medicine. 
Effective: Summer 2009 
Prerequisite: 

PCMED 749 Primary Care Sports Medicine, Hershey (4th year) (5) This course provides exposure to concepts utilized in the evaluation and initial treatment of common sports medicine conditions. 
Effective: Fall 2009 
Prerequisite: 

Last Import from UCM: May 24, 2014 3:00 AM
Profession Of Medici (POM)

POM 711 Profession of Medicine (1-2) A prologue to the student's medical school experience and an introduction to the medical profession.
Effective: Summer 2013

Last Import from UCM: May 24, 2014 3:00 AM
Psychiatry-Hy (PSCHT)

PSCHT 700 Psychiatry Clinical Clerkship (5) Clinical experience in the management of patients with psychiatric disorders.
Effective: Winter 1978
Prerequisite:

PSCHT 771 Adult Psychiatry Inpatient Acting Internship (5) Students are assigned selected adult inpatients and receive close individual supervision in diagnosis and treatment, including psychotherapy and drug therapy.
Effective: Spring 2009
Prerequisite:

PSCHT 773 Child Psychiatry Inpatient Acting Internship (5) Students are involved, under faculty supervision, in diagnostic evaluation and treatment planning and implementation of selected child and adolescent outpatients.
Effective: Spring 2009
Prerequisite:

PSCHT 774 Child Psychiatry Outpatient Elective (5-15) Students are involved, under faculty supervision, in diagnostic evaluation and treatment planning and implementation of selected child and adolescent inpatients.
Effective: Fall 2003
Prerequisite:

PSCHT 775 Consultation/Liaison Psychiatry Elective (5-15) Students evaluate medical/surgical patients where psychiatric consultation is requested and receive supervision in diagnosis and short-term psychiatric treatment.
Effective: Summer 1985
Prerequisite:

PSCHT 783 Research in Physiology and Pathology of Sleep (5-15) Participation in experimental and clinical studies of normal and disordered sleep and the evaluation, diagnosis and treatment of sleep disorders.
Effective: Winter 1978
Prerequisite:

PSCHT 796 Psychiatry Individual Studies (5) Creative projects including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2009
Prerequisite:

PSCHT 796A Psychiatry Individual Studies for 3rd Year Students (2.5) Psychiatry Individual Studies for 3rd Year Students.
Effective: Spring 2010
Prerequisite:

PSCHT 797 Psychiatry Special Topics (5) Psychiatry Special Topics.
Effective: Spring 2010
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Psychology (PSY)

PSY 501 Seminar in General Psychology (1) Orientation course for first-year graduate students in Psychology.
Effective: Spring 1999
Prerequisite:

PSY 502 (BB H 502) Health: Biobehavioral Perspectives (3) Introduction to the role of psychology in maintaining health and in treating nonpsychiatric disorders.
Effective: Summer 1992

PSY 507 Analysis of Psychological Data I (3) Overview of analysis techniques for psychological data.
Effective: Summer 2000
Prerequisite:

PSY 508 Analysis of Psychological Data II (3) Overview of advanced analytic techniques for psychological data.
Effective: Summer 2004
Prerequisite:

PSY 511 Seminar in Contemporary Psychology (1-3 per semester/maximum of 12) Critical review of readings on a topic of current interest, either in content or methodology, within psychology.
Effective: Fall 2006
Prerequisite:

PSY 517 Advanced Social Psychology (3) Problems of theory and of research methods with emphasis on persisting issues relevant to contemporary developments in social psychology.
Effective: Spring 2007
Prerequisite:

PSY 520 (LING 520) Seminar in Psycholinguistics (3 per semester/maximum of 9) Considerations of theoretical and research issues relevant to psychological aspects of language sounds, syntax and semantics, and other cognitive support.
Effective: Spring 2004

PSY 521 Cognitive Studies (3) Survey of theories, methods, and issues in cognitive science.
Effective: Spring 2007
Prerequisite:

Effective: Spring 2007
Prerequisite:

PSY 523 Social-Organization Psychology in Industry (3) Analysis of the role of social and organizational variables as they affect employee performance and employee attitudes.
Effective: Spring 2007
Prerequisite:

PSY 524 Proseminar in Cognitive Psychology (3) An historical introduction to theories and critical findings in the field of cognitive psychology.
Effective: Summer 1997
Prerequisite:

PSY 525 COG PSY SEM (3 per semester/maximum of 12) An advanced seminar in a topical or research area in the field of cognitive psychology.
Effective: Spring 1998
Prerequisite:

Effective: Spring 2007
Prerequisite:

PSY 528 (HD FS 528) Observational Methodologies for Development (3) Design and application of observational methods in developmental research.
Effective: Spring 1994
Prerequisite:

PSY 529 (HD FS 529) Seminar in Child Development (1-6) Readings and reports on recent findings in child development.
Effective: Spring 1999
Prerequisite:

PSY 534 Practicum in Industrial/Organizational Psychology (1-3) Supervised application of psychological principles in industrial and governmental settings.
Effective: Spring 2007
Prerequisite:

PSY 536 (HD FS 536) Research Methods in Developmental Processes (3) Methodological issues in research on varying
stages of development across the individual life-span.
Effective: Summer 1990
Prerequisite:

PSY 538 Psychology of Personnel Development (3) Industrial training in relation to psychological learning theory and experimental findings.
Effective: Spring 2007
Prerequisite:

PSY 539 Foundations of Behavior, Motivation, and Attitudes at Work (3) Students will examine the psychological and social processes underlying behavior, motivation, and attitudes in work settings.
Effective: Summer 2014

PSY 540 Seminar in Clinical Problems (1-9) Contemporary psychological theory, research, and methodology in relation to clinical psychology.
Effective: Winter 1978
Prerequisite:

PSY 541 Personality Theory (3-4) Contemporary theories of personality; relevant research.
Effective: Spring 2007
Prerequisite:

PSY 542 Psychopathology (3-4) Theories of pathological behavior with reference to clinical and experimental data.
Effective: Spring 2007
Prerequisite:

PSY 543 Research Design in Clinical Psychology (3) Experimental and quasi-experimental designs, methodological problems, and techniques of experimental control in clinical psychology research.
Effective: Winter 1978
Prerequisite:

PSY 547 Fundamentals of Social Development (3) An introduction to theories, current issues, and critical psychological research findings relating to social and emotional development.
Effective: Summer 2005

PSY 549 (HD FS 549) Developmental Theory (3) Conceptual frameworks and major contributions to the study of individual development across the life-span.
Effective: Summer 1990
Prerequisite:

PSY 554 Clinical Assessment (3) Development of psychological measures; evaluation of reliability and validity. Predictive utility of tests in clinical settings emphasized.
Effective: Summer 1990
Prerequisite:

PSY 555 Theory and Practicum in Clinical Assessment (3-9) Theoretical issues and research in clinical assessment with special reference to administration and interpretation of testing procedures and clinical interviewing.
Effective: Winter 1978
Prerequisite:

Effective: Spring 2007
Prerequisite:

PSY 557 Introduction to Psychopharmacology and Survey of Biological Therapies (3) An introduction to the principles of psychopharmacology and to the medications used to treat psychopathologies.
Effective: Summer 1998
Prerequisite:

PSY 558 (PHP 558, HLS 558) Disaster Psychology (3) Explores psychological impact of disasters and terrorist attacks on victims, families, rescuers, and society and methods of reducing negative effects.
Effective: Spring 2011
Prerequisite:

PSY 560 Practicum in Clinical Methods (1-6) Supervised practice in the Psychology Clinic, including assessment, therapy, report writing, and staff participation.
Effective: Fall 1987
Prerequisite:

PSY 561 Clinical Practicum with Children (1-6) Diagnosis and counseling of child-parent problems of learning and adjustment.
Effective: Spring 2007
Prerequisite:

PSY 563 Behavior Modification I (3) Conceptual foundations of principles, assessment methods, and research strategies.
Effective: Winter 1978
PSY 564 Behavior Modification II (3) Survey and empirical evaluation of treatment strategies. Effective: Winter 1978
Prerequisite:

PSY 565 Seminar in Community Psychology (3) Application of social psychological research methods and principles to prevention and alleviation of behavior disorders in family and community settings. Effective: Winter 1978

PSY 566 Cultural Psychology (3) Experimental and descriptive research on culture and behavior in both Western and non-Western settings. Effective: Spring 2007
Prerequisite:

PSY 569 Advanced Theory and Practicum in Counseling and Psychotherapy (3-9) Theoretical issues, research, and practicum experience in psychotherapy. Effective: Winter 1978

PSY 571 Seminar in Social Psychology (3-12 per semester/maximum of 12) Historical development of theory and methods; determinants and principles of complex social or interactional behavior; contemporary problems and research. Effective: Spring 2006

PSY 572 Psychology of Gender (3) Theory and research on the psychology of gender, emphasizing gender in social interaction, and in individual identity. Effective: Spring 2012
Prerequisite:

PSY 575 Clinical Child Psychopathology (3) Overview of developmental clinical child psychopathology; emphasis on social-emotional development, with review of abnormal development and social-emotional maladjustment. Effective: Summer 1988
Prerequisite:

PSY 576 Clinical Child Interventions (3) Clinical-child therapeutic techniques from a developmental-clinical perspective with emphasis on theoretical basis and empirical evaluation of various techniques. Effective: Summer 1988
Prerequisite:

PSY 577 Clinical Child Assessment (3) Overview of major methods used in clinical assessment of infants, pre-school children, and grade-school children with emphasis on social-emotional functioning. Effective: Summer 1988
Prerequisite:

PSY 583 Designing Research in Social Psychology (3) Designs and procedures useful in social psychology and cognate disciplines: quasiexperimental designs and analysis, field experimentation, validity of inferences. Effective: Fall 1983
Prerequisite:

PSY 584 (SOC 584) Attitude Formation and Change (3) Theory and method in research on attitude formation and change with emphasis on critical analysis. Effective: Spring 2007
Prerequisite:

PSY 585 Interaction Processes Within and Between Groups (3) Interactions in personal, group, and intergroup relations; theory and observational methods. Effective: Spring 2012
Prerequisite:

PSY 589 Social Cognition and Social Perception (3) Overview of how social behavior and social perception (e.g., impression formation, attitudes, the self, stereotyping) are influenced by cognitive processes. Effective: Summer 1997

PSY 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1998

PSY 591 Seminar on Teaching Psychology (1-3) Objectives and content of psychology; organization and presentation of material; teaching aids and techniques. Effective: Winter 1978

PSY 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

PSY 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

The Pennsylvania State University
PSY 597A Leadership in Organizations (3) Leadership influences much of organizational life and may be witnessed in a wide variety of domains, including political, military, industrial, and social justice arenas. The decisions that leaders make have the potential to substantially impact those around them - in both positive and negative ways. Thus, the aim of the course is to provide a comprehensive and realistic view of how leaders impact, and are impacted by, those around them. The course will provide students with a core background in leadership theory. The theoretical frameworks explored will include not only those that emphasize the leader, but also those that consider the subordinate, context, and other organizational stakeholders. In addition, we will take a process perspective where we focus on the processes, as opposed to inherent traits, involved in leadership.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PSY 597B Advanced Analytical Methods in Applied Psychology (3) The seminar will cover three main topics. First, it will cover tests of moderated and mediated regression models, which serve as the key analytical tools for testing the vast majority of (if not all) theories in applied psychology and organizational sciences. Second, we will discuss factor analytical techniques that integrate measurement and structural properties of theory testing, including exploratory and confirmatory factor analyses and structural equation modeling. Finally, realizing that organizational phenomena occur in multilevel, open systems, we will discuss multilevel analytical methods and techniques. Collectively, this course will provide students with a broad overview of empirically testing theoretical models of organizational phenomena using quantitative methods. Readings will consist of journal articles, book chapters, and software user guide.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PSY 597C Multilevel Theory, Measurement, and Analysis (3) Many areas of psychology (and the social sciences more broadly) involve testing theories that span multiple "levels." For example, organizational psychologists study individuals (level 1) nested in teams (level 2) nested in organizations (level 3); or clinical psychologists may study individuals (level 1) nested within couples or families (level 2); or developmental psychologists may sample repeated observations (level 1) nested within individuals (level 2) to examine patterns of growth and change. This class is designed to provide doctoral students with an introductory treatment of multilevel theory building and testing.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PSY 600 Thesis Research (1-15) No description.
Effective: Fall 1983

PSY 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

PSY 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised training in lecture content and presentation, examination construction, and individual instruction.
Effective: Fall 1983

PSY 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

PSY 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

PSY 811 Global and Cross-Cultural Leadership (3) Students will examine the relation of cultural variations in psychological and social factors affecting the effective leadership of individuals and groups in work organizations. Effective: Summer 2014
Prerequisite:

PSY 812 Group Leadership and Effective Decision Making (3) Students will examine the influence of leadership on the psychological and social processes related to effective decision making in work groups. Effective: Summer 2014
Prerequisite:

PSY 813 Leadership for Creativity and Innovation (3) Students will examine the influence of leadership on the psychological and social processes related to developing creative ideas and implementing them within work groups and organizations. Effective: Summer 2014
Prerequisite:

PSY 814 Psychology of Leading Work Groups and Teams (3) Students will examine the psychological and social processes related to leading work groups and teams. Effective: Summer 2014
Prerequisite:

PSY 815 Psychology of Servant and Authentic Leadership (3) Students will examine the importance of developing followers and leader-follower relationships, by investigating servant and authentic leadership. Effective: Summer 2014
Prerequisite:

The Pennsylvania State University
PSY 816 **Dysfunctional Leadership** (3) Students will explore the impact of negative and destructive leader behaviors including toxic leadership, abusive supervision and leader error.
Effective: Summer 2014
Prerequisite:

PSY 817 **Psychology of Shared and Collective Leadership** (3) Students will examine the topic of shared and collective leadership, which includes the psychological processes surrounding collective, team-based, and dyadic leadership in organizations.
Effective: Summer 2014
Prerequisite:

PSY 894 **Capstone Experience** (3) Supervised, professionally oriented student activities that constitute the culminating experience for the program.
Effective: Summer 2014
Psychology-Cl (PSYC)

PSYC 500 Ethics and Professional Practice in Psychology and Counseling (3) This course will familiarize students with the standards of ethical conduct related to research and practice in psychology and counseling.
Effective: Fall 2005
Prerequisite:

PSYC 501 Cultural Competency in Psychology (3) This course will familiarize students with the need for sensitivity to individual and group differences associated with culture and ethnicity.
Effective: Spring 2001
Prerequisite:

PSYC 502 Applied Social Psychology (3) An examination of social psychological applications to areas such as health, law, interpersonal relations, environment, politics, and other social issues.
Effective: Spring 1998

PSYC 510 Human Development and Growth (3) The course covers human development across the life span.
Effective: Spring 2005
Prerequisite:

PSYC 514 Preventive Psychology (3) This course focuses on the theoretical, conceptual, programmatic, and empirical issues currently in preventive psychology.
Effective: Fall 1999
Prerequisite:

PSYC 515 Clinical Health Psychology (3) This course examines wellness maintenance, early detection, and the impact of health care on individuals and the community.
Effective: Spring 1997
Prerequisite:

PSYC 516 Child Health Psychology (3) This course will familiarize students with health issues in the context of child development and family systems.
Effective: Spring 2001
Prerequisite:

PSYC 517 Psychopathology (3) A broad spectrum view of psychopathology including biological, social, cognitive, psychological, and neuropsychological approaches, is emphasized, with an applied focus.
Effective: Fall 2001
Prerequisite:

PSYC 518 Interviewing and Counseling (3) This course covers basic clinical interviewing and counseling techniques from both the didactic and experiential perspectives.
Effective: Spring 2005
Prerequisite:

PSYC 519 Theories and Models of Psychotherapy (3) An advanced level of psychotherapies and applications in diverse settings.
Effective: Summer 2005
Prerequisite:

PSYC 520 Research Methods (4) The course will review experimental, quasi-experimental designs, program evaluation, between subject designs, and within subject or intra-subject designs.
Effective: Fall 1999
Prerequisite:

PSYC 521 Statistics (4) The nature, computation, computer analysis, interpretation, and APA-style write-up will be discussed for a number of statistical tests.
Effective: Spring 2000
Prerequisite:

PSYC 524 Biological Basis of Behavior (3) This course focuses on biological determinants of behavior, including evolution, hormones, sensory systems, internal states, reproduction, emotions, learning, and memory.
Effective: Spring 2001
Prerequisite:

PSYC 525 Forensic Psychology (3) This course will explore social, cognitive, civil and criminal issues related to forensic psychology.
Effective: Spring 2001
Prerequisite:

PSYC 526 Behavioral Systems in Criminal Justice (3) The impact of crime on the offender, the victim, and society will be studied from the psychological perspective.
Effective: Spring 2001
Prerequisite:

PSYC 530 Research Paper (3) Supervised research in psychology for degree candidates.
Effective: Spring 2001
Prerequisite:

PSYC 535 Behavioral Management (3) Analysis of determinants of behavior and behavioral ecology. Emphasis on data collection and data evaluation techniques.
Effective: Fall 1997

PSYC 540 Group Interventions (3) This course covers applications of psychotherapeutic techniques to a group setting.
Effective: Fall 2005
Prerequisite:

PSYC 571 Tests and Measurements (3) Administration, analysis, and interpretation of psychological evaluation methods will be reviewed.
Effective: Spring 2005
Prerequisite:

PSYC 572 Neuropsychological Assessment (3) This course will review the biological bases of behavior, emphasizing brain-behavioral relationships and assessment of these relationships.
Effective: Fall 2001
Prerequisite:

PSYC 592 Current Topics in Applied Psychology (3 per semester/maximum of 99) Advanced topics in applied psychology will be taught through readings, research, and practice.
Effective: Spring 1999
Prerequisite:

PSYC 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Summer 2003

PSYC 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 1995

PSYC 595A Clinical Practicum (1-18) Provides practicum experience component for interviewing and counseling course.
Effective: Fall 2005
Prerequisite:

PSYC 595B Clinical Internship (1-18) Supervised clinical experience in a community setting. This course is repeatable.
Effective: Spring 2005
Prerequisite:

PSYC 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1996

PSYC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1995

Last Import from UCM: May 24, 2014 3:00 AM
Public Administration (P ADM)

P ADM 401 Introduction to Homeland Security (3) This course provides foundational knowledge about homeland security, including policy, organization, and legal issues in the American context.
Effective: Summer 2008

P ADM 404 Homeland Security and Defense in Practice (3) This course analyzes, evaluates, and critiques homeland security plans in practice.
Effective: Summer 2008
Prerequisite:

P ADM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1993

P ADM 500 Public Organization and Management (3) Development of basic concepts and issues in public administration; administrative theory and public policy processes.
Effective: Spring 2003

P ADM 502 Governmental Fiscal Decision Making (3) Nature, function, and technique of governmental budgeting viewed as mechanism for allocating resources among alternative public uses.
Effective: Fall 2012

P ADM 503 (H ADM 503) Research Methods (1-3) Examination of research methodologies relevant to administration, planning, and public policy.
Effective: Fall 2012
Prerequisite:

P ADM 505 Human Resources in the Public and Nonprofit Sectors (3) Concepts and approaches contributing to effective use of human resources in public and non-profit organizations; legal issues and requirements.
Effective: Fall 2012

P ADM 506 (H ADM 506) Management Information Systems for Public and Health Administration (3) The design, implementation, and purpose of computerized management information systems in public and non-profit organizations.
Effective: Spring 2003

P ADM 507 Introduction to Public Policy Analysis (3) Introduction to the analysis of public policy within its organizational and political contexts, including an emphasis on an economic perspective.
Effective: Fall 2013

P ADM 510 (H ADM 510) Organizational Behavior (3) Examination of concepts of human behavior in formal organizations, systems analysis, conceptual models, and decision processes.
Effective: Spring 2003

P ADM 511 Organizational Change and Development (3) Theory of organizational change and development; case analysis of applications in actual situations.
Effective: Spring 2003
Prerequisite:

P ADM 512 Issues in Human Resources (3) A survey of major human resource issues such as job stress, burnout, and the many forms of discrimination in organizations.
Effective: Fall 2013
Prerequisite:

P ADM 514 Public Organization and Managerial Consultation (3) This course will review the theories, approaches, methods, and expected outcomes of organization and management consultation.
Effective: Fall 2013
Prerequisite:

P ADM 515 (MNGMT 515) Labor Management Relations (3) Labor relations issues; collective bargaining agreement, negotiations, and administration; legal framework of collective bargaining; labor relations in larger social context.
Effective: Fall 2011
Prerequisite:

P ADM 516 Strategic Planning (3) A survey of strategic planning purposes, approaches and methods, and expected outcomes in small and large organizations.
Effective: Fall 2013

P ADM 517 Nonprofit Organizations: History and Evolution (3) A study of the history, development and current role of
nonprofit organizations as a distinguishing feature of American society.
Effective: Fall 2013

P ADM 518 Nonprofit Organizations: Management and Leadership (3) A study of the theoretical and practical issues involved in management and leadership of nonprofit organizations.
Effective: Fall 2013

P ADM 519 Nonprofit Organizations: Resource Development and Management (3) Process by which nonprofit organizations assure that resources are obtained and used effectively and efficiently toward the achievement of objectives.
Effective: Summer 2003

P ADM 521 Performance Measurement and Management (3) This course is designed to enhance students' ability to develop and use performance measurement systems in the public sector.
Effective: Spring 2014
Prerequisite:

P ADM 522 Government Financial Management (3) Theories and techniques of financial planning and control, with emphasis on their application in government and nonprofit agencies.
Effective: Spring 2003
Prerequisite:

P ADM 523 Governmental and Nonprofit Accounting (3) Accounting, reporting, and auditing principles and procedures for public sector agencies and nonprofit organizations.
Effective: Summer 1998
Prerequisite:

P ADM 524 Administrative Law (3) Statutory and judicial controls upon administrative discretion. Administration of rule making, rate setting, licensing, adjudication. Judicial review and citizen advocacy.
Effective: Fall 2013

P ADM 532 Urban Government (3) Administrative processes and policy problems associated with managing urban communities; political, intergovernmental, fiscal, structural, and analytical concepts in urban government.
Effective: Winter 1978

P ADM 533 Local Planning Law and Administration (3) Structure and function of local and regional government from perspective of local planning law and its administration.
Effective: Fall 2013

P ADM 534 Managing Economic Development (3) Theoretical and operational aspects of economic development emphasizing the role of local and regional government.
Effective: Fall 2013

P ADM 535 Policy Analysis and Planning (3) The course will cover the theoretical issues in and basic methods of policy analysis and planning (prospective policy analysis).
Effective: Summer 2004
Prerequisite:

P ADM 550 Policy and Program Evaluation (3) The course will cover the theoretical issues in and basic methods of policy and program evaluation (retrospective policy analysis).
Effective: Spring 2005
Prerequisite:

P ADM 556 State Government Administration (3) Study of structures, systems, processes, problems, and issues affecting state government administration; case studies, field observations, and research.
Effective: Fall 2013

P ADM 557 Federalism and Intergovernmental Relations (3) Study of the impact of a federal system of government on the administration of public functions. National-state-local dimensions.
Effective: Fall 2013

P ADM 558 Legislative Processes (3) Legislatures in American government, emphasizing comparative state legislatures: constitutional patterns; organization, administration; interaction with bureaucracy, constituencies, and organized interests.
Effective: Fall 2013

P ADM 570 Scope and Methods of Public Administration (3) Examination of theoretical approaches to public administration and the role of theory in the field.
Effective: Fall 2012
Prerequisite:
P ADM 571 Seminar in Organizational Theory (3) Selected theories of organizations and their applications to the study of public organizations. Effective: Fall 2012
Prerequisite:

P ADM 573 Research and Theory in Public Policy and Governance (3) An introduction to policy analysis, the stages of the policy process, and key theoretical issues. Applications to real world problems. Effective: Spring 2005
Prerequisite:

P ADM 574 Research and Theory in Public Management (3) Theoretical and empirical bases for selected functions of public managers. Effective: Spring 1988
Prerequisite:

P ADM 575 Advanced Research Design (3) Experimental, quasi-experimental, survey, aggregate, and other research designs applied to organizational, managerial, and policy analysis research problems. Effective: Fall 2012
Prerequisite:

P ADM 576 Multivariate Statistical Methods (3) Multivariate statistical methods, with special emphasis on their use in organizational, managerial, and policy analysis research settings. Effective: Spring 1988
Prerequisite:

P ADM 579 Public Leadership and Ethics (3) Examination of theory and research in leadership and public ethics, and their application to the field of Public Management. Effective: Fall 2012
Prerequisite:

P ADM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers. Effective: Spring 1987

P ADM 591 Readings in Public Administration (3) Directed readings in selected areas of public administration. Effective: Spring 1999
Prerequisite:

P ADM 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual basis. Effective: Fall 2012
Prerequisite:

P ADM 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Fall 2013
Prerequisite:

P ADM 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1987

P ADM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term. Effective: Spring 1987

P ADM 597A Homeland Security - An Update in Research and Trends (3) To provide an up-to-date cross-disciplinary research-based overview of current evolution of the homeland security enterprise, its mission space, and related methods of civil security research for practical use; to provide information and education update to alumni of the iMPS-HLS program and workforce of the homeland security enterprise; to attract prospective students for the program, including international students; to foster an informed community of interest. Effective: Summer 2014 Ending: Summer 2014

P ADM 597A Comparative Homeland Security and Related Methods (3) Since U.S. Homeland Security has evolved from the attacks of 9/11 that were not rooted nationally, but internationally, and its mission space includes addressing of transnational threats as well as working with international partners, a focus on comparative aspects is essential. The course will address how select topics of civil security - such as critical infrastructure protection, cybersecurity, use of armies in homeland security, public-private partnerships, security governance, etc. - are addressed in different countries. An emphasis is on US-EU comparisons. The course will further address comparative analysis of emergent threats and challenges by focusing on risk cultures and security cultures in different countries, and by addressing transnational missions to deliver security to citizens. This includes citizens’ perceptions of homeland security and use of security technology for surveillance and other purposes. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

P ADM 597B Comparative Homeland Security and Related Methods (3) Since U.S. Homeland Security has evolved from the attacks of 9/11 that were not rooted nationally, but internationally, and its mission space includes addressing of

The Pennsylvania State University
transnational threats as well as working with international partners, a focus on comparative aspects is essential. The course will address how select topics of civil security—such as critical infrastructure protection, cybersecurity, use of armies in homeland security, public-private partnerships, security governance, etc. are addressed in different countries. An emphasis is on US-EU comparisons. The course will further address comparative analysis of emergent threats and challenges by focusing on risk cultures and security cultures in different countries, and by addressing transnational missions to deliver security to citizens. This includes citizens’ perceptions of homeland security and use of security technology for surveillance and other purposes.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

P ADM 597C Compensation Analysis & Benefits Planning (3) Compensation is at the center of the relationship between employer and employee. From the employee’s perspective, compensation represents food, shelter, security, self-worth, maturity, experience and several other descriptives both material and emotional. For the employer, compensation is a tool. It is used for competitiveness externally as well as motivation internally, but compensation is also a cost that must be contained. For the public and non-profit employer, compensation represents more than productivity, it is a reflection of the values of civil service and the public charter it supports. This course is intended to rationalize these changes by providing students with a thorough understanding of benefit and compensation analysis, specifically what factors to consider when designing and analyzing compensation and benefit plans that are internally equitable and externally competitive.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Effective: Spring 1990

P ADM 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 2000

P ADM 801 (HLS 801) Homeland Security Administration: Policies and Programs (3) Foundation for understanding homeland security history, the development of homeland security policies and organizations, and current management approaches.
Effective: Summer 2010

P ADM 802 Multifaceted Approaches to Homeland Security (3) Examination of the roles of the public and private sectors and the military in preparing, mitigating, and responding to disasters.
Effective: Fall 2008
Prerequisite:

P ADM 803 Strategic Planning and Organizational Imperatives in Homeland Defense and Security (3) The Homeland Security framework depends on strategic planning and organization. This course examines the key issues associated with these.
Effective: Fall 2008
Prerequisite:

P ADM 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2007

P ADM 897A Critical Infrastructure Protection (3) This course provides knowledge about protection of critical infrastructure as an aspect of homeland security.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Public Health Preparedness (PHP)

PHP 410 (HLS 410) Public Health Preparedness for Disaster and Terrorist Emergencies I (3) Analyzes the history of terrorism and explores the preparation and response to specific terrorist threats, natural disasters, and conventional catastrophes.
Effective: Fall 2010
Prerequisite:

PHP 510 Public Health Preparedness for Disaster and Terrorist Emergencies II (3) A public health perspective on the preparation necessary to develop a coordinated response to a disaster or terrorist emergency.
Effective: Spring 2012
Prerequisite:

PHP 527 Public Health Evaluation of Disasters and Bioterrorism (3) Introduces students to the design of exposure assessment and health effect studies applicable to disasters and terrorism.
Effective: Spring 2012
Prerequisite:

PHP 530 (HLS 530) Critical Infrastructure Protection of Health Care Delivery Systems (3) Investigates the impact that terrorist incidents may have on healthcare facilities or their ability to deliver healthcare services.
Effective: Spring 2012
Prerequisite:

PHP 553 (CAS 553) Disaster Communication (3) This seminar provides students with a comprehensive understanding of the multifaceted nature of disaster communication across phases of a disaster.
Effective: Spring 2012

PHP 558 (PSY 558, HLS 558) Disaster Psychology (3) Explores psychological impact of disasters and terrorist attacks on victims, families, rescuers, and society and methods of reducing negative effects.
Effective: Spring 2012
Prerequisite:

PHP 594 (HLS 594) Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2012
Prerequisite:

PHP 596 Individual Studies (1-9 per semester/maximum of 9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2013

PHP 597 Special Topics (1-3 per semester/maximum of 9) Formal courses given on a topical or special interest subject which may be offered infrequently, several topics may be taught in one year or term.
Effective: Summer 2013

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PHP 597B Fundamentals of Biorisk Management (3) Fundamentals of Biorisk Management Fundamenatls of Biological Risk Management (Biosafety and Biosecurity and Bioethics) History; Risk Assessment; Documentation and Reporting; Traning, Incident Response and Training.
Effective: Summer 2014 Ending: Summer 2014

Last Import from UCM: May 24, 2014 3:00 AM
Public Health Sciences (PHS)

PHS 500 Research Ethics for Clinical Investigators (1) This course is designed for graduate students preparing for a career that will include clinical investigations.
Effective: Spring 2009

PHS 501 Principles of Public Health (3) This course is designed to provide students with a foundation in public health principles.
Effective: Summer 2012

PHS 504 Behavioral Health Intervention Strategies (3) Evaluation of intervention strategies from a biobehavioral health context; theories of change processes in health.
Effective: Spring 2011

PHS 505 Public Health Program Planning and Evaluation (3) Foundations in public health program planning and evaluation.
Effective: Summer 2012
Prerequisite:

PHS 506 Behavioral Health Intervention Strategies II (3) This course provides instruction on how to design theory-driven public health interventions.
Effective: Spring 2014
Prerequisite:

PHS 510 Clinical Research Methods (3) Introduction to the design, implementation, analysis, and interpretation of health research, including observational and controlled trials.
Effective: Spring 2009

PHS 511 Methods Used in Translational Research (1) This course is designed to familiarize clinicians with state-of-the-art laboratory techniques as they apply to translational research studies.
Effective: Spring 2009

PHS 516 Statistical Genetics (3) Basic theory and methods for statistical analysis, introduction to bioinformatics, principles and methods of statistical genetics, case-control association studies.
Effective: Spring 2009

PHS 518 Scientific Communication (2) A survey of the formats in which medical science is presented, with exercises in the preparation of abstracts, manuscripts, and grant applications, including illustrations.
Effective: Fall 2011

PHS 519 Patient Oriented Research (2) This course provides an overview of clinical research and an introduction to methods used to conduct clinical research.
Effective: Fall 2011 Ending: Summer 2014
Prerequisite:

PHS 519 Patient Centered Research (3) A survey course designed to provide foundational information regarding 15 core clinical research topics presented in theory and with application.
Effective: Fall 2014 Future: Fall 2014

PHS 520 Principles of Biostatistics (3) Introduction to the application of techniques and interpretation of results that are commonly used to plan, analyze, and report clinical and health services research.
Effective: Spring 2009

PHS 521 Applied Biostatistics (3) An intermediate course that provides more in-depth development of analytical topics covered in the Intro Biostats course, such as analysis of variance and regression techniques. Students will perform analyses, summarize, and interpret results.
Effective: Spring 2009
Prerequisite:

PHS 522 Multivariate Biostatistics (3) This course focuses on advanced topics in biostatistics involving multivariate responses in biomedical research.
Effective: Spring 2009 Ending: Summer 2014
Prerequisite:

PHS 522 Multivariate Biostatistics (3) This course focuses on advanced topics in biostatistics involving multivariate responses in biomedical research.
Effective: Fall 2014 Future: Fall 2014
Prerequisite:
PHS 523 Multivariate Analysis (3) This course focuses on the theoretical and applied aspects of multivariate analyses that are relevant to biomedical research.
Effective: Spring 2012
Prerequisite:

PHS 524 Longitudinal Data Analysis (3) This course focuses on the theoretical and applied aspects of longitudinal data analyses that are relevant to biomedical research.
Effective: Spring 2012
Prerequisite:

PHS 525 Biostatistics for Lab Scientists (3) Basic theory and methods for statistical analysis, data presentation and experimental design, with a focus on biomedical applications.
Effective: Summer 2010
Prerequisite:

PHS 526 Categorical Data Analysis (3) This course focuses on statistical theory and methods for analyzing categorical data.
Effective: Spring 2012
Prerequisite:

PHS 527 Survival Analysis (3) This course focuses on the analysis of time-to-event data with a focus on biomedical research.
Effective: Spring 2012
Prerequisite:

PHS 528 Bayesian Methods (3) Approaches to Bayesian modeling and computation with application to medicine and biomedical research.
Effective: Spring 2012
Prerequisite:

PHS 535 Quality of Care Measurement (3) Emphasizes the concept and measurement issues involved in assessing and improving the quality of health care.
Effective: Spring 2012
Prerequisite:

PHS 536 Health Survey Research Methods (3) This course provides instruction on how to design health research survey questionnaires and how to conduct survey studies.
Effective: Spring 2009
Prerequisite:

PHS 537 Health Policy and Law (3) This course reviews processes related to health policy formulation, implementation, and advocacy.
Effective: Spring 2013
Prerequisite:

PHS 540 Decision Analysis I (1) This course provides an introduction to the methods and applications of decision analysis in clinical decision making.
Effective: Spring 2012
Prerequisite:

PHS 541 Decision Analysis II (1) This course provides an introduction to the methods and applications of decision analysis in clinical decision making.
Effective: Spring 2012
Prerequisite:

PHS 550 Principles of Epidemiology (3) Topics include measurements, surveillance, outbreak investigation, bias, and study design.
Effective: Spring 2009
Prerequisite:

PHS 551 Advanced Epidemiological Methods (3) Advanced methodological course providing in-depth discussions on applications of advanced methods to design, execution, data analysis, and epidemiological studies reporting.
Effective: Spring 2009
Prerequisite:

PHS 552 Molecular Epidemiology of Chronic Disease (3) This course provides instruction on molecular epidemiologic study design and methods in the study of chronic disease.
Effective: Spring 2009
Prerequisite:

PHS 553 Infectious Disease Epidemiology (3) Principles of infectious disease epidemiology and the use of epidemiologic methods to address infectious diseases of national and international importance.
Effective: Summer 2012
Prerequisite:

PHS 570 Health Economics and Economic Evaluation (3) An introductory course on applied economic evaluation, with
emphasis on micro-economic theory, cost-effectiveness and economic modeling.

Effective: Spring 2009

Prerequisite:

PHS 571 Health Services Organization and Delivery (3) Examination of health systems, organization, financing, and evaluation; trends, problems, and issues.

Effective: Fall 2010

PHS 580 Clinical Trials: Design and Analysis (3) This course stresses the concepts of statistical design and analysis in biomedical research, with special emphasis on the clinical trial.

Effective: Spring 2009

Prerequisite:

PHS 581 Clinical Trials: Case Studies (1) This course emphasizes case studies in clinical trials design, conduct, and analysis.

Effective: Spring 2009

PHS 594 Research Topics (1-9) A closely monitored, clinical or population based research project that is conducted during the second year of the PHS MS curriculum.

Effective: Spring 2009

PHS 595 Public Health Practice Internship (1-6 per semester/maximum of 6) This course provides Master of Public Health degree students with hands-on, "real-world" experience in the practice of public health.

Effective: Summer 2011

PHS 596 Individual Studies (1-9) Creative projects including non-thesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2009

PHS 596A Individual Study - Methods in Translational Research (1) The goal of this course is to familiarize the student with state-of-the-art laboratory techniques as they apply to translational research studies. Each session will consist of lecture-based case studies of a clinical/ translational research project that involves the technique of interest. The second portion of each session will include a laboratory visit from demonstration of the technique of interest and a discussion of data output and analysis.

Effective: Summer 2014 Ending: Summer 2014

PHS 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be of topical or of special interest.

Effective: Spring 2009

PHS 597B Special Topics: The Affordable Care Act: Obamacare: An In-Depth and Up-to-Date Analysis (1) What's really in this omnibus piece of legislation that remains so little understood by the general public four years after passage? How was it constructed? What was the President's role? How did the experience of Hillarycare shape the policy process? How did Pharma, the Insurance lobby, Hospital industry and Provider groups contribute to its passage? Why were there stumbles in its early implementation? Was it really what the country needed? What has been repealed already from the original bill? How and why was it eliminated? What is the state of health of the Affordable Care Act almost 5 years after its passage?

Effective: Summer 2014 Ending: Summer 2014

PHS 597B Special Topics: Biostatistical Computing for Public Health (1) Provides experience in intermediate and advanced biostatistical computer programming for public health data analyses.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PHS 597C Special Topics: Principles of Health Services Research (1) An introductory course on principles of health services and methods used to conduct health services research studies.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

PHS 597D Special Topics: Advanced Biostatistical Methods in Clinical Trials (3) A special topics course on advanced biostatistical methods in clinical trials.

Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Prerequisite:

PHS 598 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2009

PHS 598A Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2009
PHS 600 Thesis Research (1-9 per semester/maximum of 9) Research training provided to enable the student to advance his or her knowledge about a selected topic in public health sciences. 
Effective: Summer 2014

PHS 601 PhD Dissertation PHS 601 is available to full-time PhD candidates who have passed the comprehensive exam and met the two-semester residence requirement. 
Effective: Spring 2014

PHS 801 Data Management (1) Development and implementation of plans for managing clinical research data, collection and processing data, and ensuring data quality. 
Effective: Summer 2010

PHS 802 Practice of Public Health (2) Provides knowledge and skills in methods and procedures used for the practice of public health. 
Effective: Spring 2014 
Prerequisite:

PHS 807 Public Health Education Methods (3) Provides the knowledge and skills associated with the methods used to deliver successful public health education programs. 
Effective: Spring 2013 
Prerequisite:

PHS 894 Capstone Experience (3) A culminating experience in which students create and present a scholarly project based on the competencies gained in previous courses. 
Effective: Spring 2014 
Prerequisite:

PHS 895A Master of Public Health Internship (3 per semester/maximum of 6) Provides Master of Public Health (MPH) degree students with hands-on, real-world experience in the practice of public health. 
Effective: Summer 2012

PHS 897 Special Topics (1-9 per semester/maximum of 9) Formal courses offered infrequently on a comparatively narrow subject that may be topical or of special interest. 
Effective: Summer 2012

PHS 897B Special Topics: The Affordable Care Act: An In-Depth and Up-To-Date Analysis (1) What’s really in the omnibus piece of legislation that remains so little understood by the general public four years after passage? How was it constructed? What was the President’s role? How did Pharma, the Insurance lobby, Hospital industry and Provider groups contribute to its passage? Why were there stumbles in its early implementation? Was it really what the country needed? What has been repealed already from the original bill? How and why was it eliminated? What is the state of health of the Affordable Care Act almost 5 years after its passage? 
Effective: Summer 2014 Ending: Summer 2014

Pulmonary Medicine-Hy (PLM)

PLM 726 Pulmonary Medicine (3) Some of the areas studied will be: Symptoms and Signs of Respiratory Disease; Use of Common Diagnostic Tools to Evaluate Patients; Pathophysiology; COPD; Bronchial Asthma; Hypertension; Thromboembolism; Pediatric Pulmonary Disease; Infections; Diffuse Infiltrative Pulmonary Diseases; Acute and Chronic Respiratory Failure; Acute Respiratory Distress Syndrome; Lung Cancer: Pathology and Clinical Aspects; Environmental and Occupational Lung Disease.

Effective: Spring 2009
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Quality and Manufacturing Management (QMM)

QMM 491 Introduction to Business Concepts for Manufacturing (3) Introduction to business, topics in marketing, accounting, and finance for nonbusiness students in manufacturing management.
Effective: Fall 2001
Prerequisite:

QMM 492 Introduction to Engineering Design Principles (3) Engineering principles including different engineering fields, graphics, design, solid modeling and failure analysis.
Effective: Fall 2001
Prerequisite:

QMM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2008

QMM 552 Applied Statistical Process Control and Experimental Design (3) Concepts and techniques of statistical process control and the design of experiments.
Effective: Fall 2008
Prerequisite:

QMM 561 Manufacturing Systems Planning and Control I (3) Systems, components and configurations, flow of material and information in a manufacturing system.
Effective: Spring 1996
Prerequisite:

QMM 562 Manufacturing Systems Planning and Control II (3) Flow of material and information in a manufacturing system; emphasis on systems integration.
Effective: Spring 1996
Prerequisite:

QMM 581 Manufacturing Processes of Materials (3) Characteristics of materials with respect to their properties and associated choices of processing to create a range of products.
Effective: Spring 1996
Prerequisite:

QMM 582 Manufacturing and Supply Chain Strategy (3) Strategic decision context of manufacturing and its supply chains with linkage to corporate and business strategy.
Effective: Fall 2001
Prerequisite:

QMM 593 Field Experience in Manufacturing (1-2) Experiential learning through the firsthand study of manufacturing plants and by interacting with manufacturing leaders.
Effective: Spring 2001
Prerequisite:

QMM 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1997

QMM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1997

QMM 581 Quality Management (3) Concepts of design, assessment, and improvement of quality systems; customer needs analysis, identification of opportunities for application of measurement techniques.
Effective: Fall 2008
Prerequisite:

QMM 871 Design Practice for Manufacturing I (3) Contemporary concepts in design and design practice with emphasis on engineering, business, and human strategic issues.
Effective: Fall 2008
Prerequisite:

QMM 872 Design Practice for Manufacturing II (3) Contemporary concepts in design and design practice with emphasis on logistics, risk, design and manufacturing readiness, and production.
Effective: Spring 2009
Prerequisite:

QMM 891 Communication and Leadership Skills for Manufacturing Managers (1-3) Applied principles of managerial, visual, and written communication that support the needs of manufacturing leaders.
Effective: Fall 2008
Prerequisite:

QMM 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered
infrequently; several different topics may be taught in one year or semester. Effective: Fall 2007

Last Import from UCM: May 24, 2014 3:00 AM
Quantitative Analys (QANLY)

QANLY 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

QANLY 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1986

Last Import from UCM: May 24, 2014 3:00 AM
Radiology (RAD)

RAD 700 **Pediatric Radiology** (5) Tutorial course emphasizing interpretation, clinical correlation, indications, and limitations of imaging studies used in the evaluation of infants and children.
Effective: Spring 2009
Prerequisite:

RAD 771 **General Radiology--Clinical Elective** (5) Clinical elective including experience in diagnostic radiology, film interpretation, nuclear medicine, and radiation therapy.
Effective: Spring 2009
Prerequisite:

RAD 772 **Radiology Advanced Elective** (5) Clinical experience in interpreting radiographs and imaging studies, fluoroscopy, dictating and signing radiologic reports, and providing consultative services.
Effective: Summer 2011
Prerequisite:

RAD 774 **Radiation Oncology Elective (3rd or 4th year)** (5) This course provides exposure to the scope of clinical Radiation Oncology.
Effective: Fall 2010
Prerequisite:

RAD 774A **Radiation Oncology Elective (3rd year)** (2.5) This course provides 2 week exposure to the scope of clinical Radiation Oncology.
Effective: Fall 2010
Prerequisite:

RAD 796 **Radiology Individual Studies** (5) Creative projects including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2009

RAD 796A **Radiology Individual Studies for 3rd year Medical Students** (2.5) Radiology Individual Studies for 3rd Year Medical Students.
Effective: Spring 2010
Prerequisite:

RAD 797 **Radiology Special Topics** (5) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2009

Last Import from UCM: May 24, 2014 3:00 AM
Real Estate (R EST)

R EST 515 (I B 515) Property Rights in a Global Economy (2) Analysis of economic, financial, legal, and political factors affecting international real estate decision making.
Effective: Summer 2011

R EST 560 Real Estate Financial Analysis (2) This course provides a modern framework for the valuation and analysis of real property using both theoretical and empirical approaches.
Effective: Summer 2011
Prerequisite:

R EST 570 Institutional Real Estate Investment (2) A survey of the latest developments of real estate as an institutional investment.
Effective: Summer 2011
Prerequisite:

R EST 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

R EST 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2011

R EST 599 (IL) Foreign Study--Real Estate (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2011
Prerequisite:

R EST 600 Thesis Research (1-15) No description.
Effective: Summer 2011

R EST 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 2011

R EST 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) No description.
Effective: Summer 2011

R EST 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 2011

Last Import from UCM: May 24, 2014 3:00 AM
Real Prop/Envrml Law (RP&EL)

RP&EL 960 Environmental Law (3) This course introduces some of the most important concepts, issues, and statutes in environmental law. After discussing the economic and ethical bases for environmental law and reviewing the relevant principles of constitutional and common law, students examine a representative selection of federal statutes, including the National Environmental Policy Act, the Endangered species Act, “Superfund,” and the Clean Air Act.
Effective: Summer 1999

RP&EL 962 Environmental Litigation (2) This course explores the various aspects of litigation, client counseling, and regulatory work that arise in the day to day practice of environmental law. Emphasis is on the practical aspects of the practice of law, with active class participation using problems designed to duplicate situations faced by environmental attorneys in their practices. Among other things, students will cross-examine scientific experts, prepare a plant manager for a deposition, and negotiate a civil penalty for environmental violations. Although environmental law is used as a basis for the mock exercises, prior environmental classes are not a prerequisite, and the skills taught in this course will translate well to other types of litigation.
Effective: Spring 2013

RP&EL 964 Real Estate Negotiation and Drafting (3) Students will learn to negotiate and draft multiple standard documents used in commercial real estate transactions.
Effective: Spring 2011

RP&EL 965 Oil and Gas Law (3) This course will address the basic concepts in oil and gas law within the United States as well as the specific legal issues associated with the development of the Marcellus Shale formation. This specific topics to be covered include the ownership of oil and gas, oil and gas leasing, oil and gas conservation laws, oil and gas interests, and government regulation of development.
Effective: Summer 2012

RP&EL 973 Land Use Controls (3) The public regulation of private property raises some of the more interesting and difficult questions in property law. On one side of the debate is the government, which seeks to regulate land use in ways that it believes promote the public interest. On the other side are private property owners who often object to restrictions placed on their ability to use their property as they deem best. In studying this tension between public goals and private rights, the course will explore the constitutional limitations placed on governments in the area of land use regulations as well as topics such as variances, special use permits, subdivision controls, exactions, and impact fees, exclusionary zoning, the rebuilding of urban cores, and the managing of growth in suburban areas.
Effective: Summer 2011

RP&EL 980 Construction Law (2-3) This course examines the peculiar legal problems encountered on construction projects. It covers contract, tort and statutory law as adapted specifically to the construction industry. It analyzes the perspectives of an owner, developer, architect/engineer, contractor, subcontractor and bonding company, both in the context of private and public construction projects, commercial and residential. The principal areas of inquiry are contract structure, public bidding, theories of liability, payment and security mechanisms, claims related to time, disruption and extra work, and claims arising from construction defects. This course is designed to enable you to become familiar with construction law and the construction industry so that, whether you work in the public sector or private practice, you will be able to offer practical legal advice to construction professionals.
Effective: Summer 2011 Ending: Summer 2014

RP&EL 980 Construction Law (2) This course examines the peculiar legal problems encountered on construction projects. It covers contract, tort and statutory law as adapted specifically to the construction industry. It analyzes the perspectives of an owner, developer, architect/engineer, contractor, subcontractor and bonding company, both in the context of private and public construction projects, commercial and residential. The principal areas of inquiry are contract structure, public bidding, theories of liability, payment and security mechanisms, claims related to time, disruption and extra work, and claims arising from construction defects. This course is designed to enable you to become familiar with construction law and the construction industry so that, whether you work in the public sector or private practice, you will be able to offer practical legal advice to construction professionals.
Effective: Fall 2014 Future: Fall 2014

RP&EL 988 Natural Resources Law (3) This course provides a basic overview of federal and state regulations and the common law affecting title to and exploitation of such resources as water, coal, oil, gas, and public lands. Common mineral leasing provisions are given particular emphasis.
Effective: Summer 1999

RP&EL 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 2005

The Pennsylvania State University
Recreation, Park and Tourism Management (RPTM)

RPTM 410 Marketing of Recreation Services (3) Theoretical/practical application of marketing/advertising strategies in the development/delivery of recreation services.
Effect: Spring 2005
Prerequisite:

RPTM 415 Commercial Recreation Management (3) Planning, developing, and managing profit-oriented recreation opportunities.
Effect: Spring 2005
Prerequisite:

RPTM 425 Principles of Interpretive Materials (3) Principles, practices, application of non-personal interpretive activities common to natural/cultural history, including exhibits, audio-visual and illustrative materials.
Effect: Spring 2005
Prerequisite:

RPTM 430 Environmental Education Methods and Materials (3) Methods and materials for developing, implementing, and evaluating environmental education programs within formal and non-formal educational settings.
Effect: Spring 2005
Prerequisite:

RPTM 433W Program Evaluation and Research in Recreation Services (3) Systematic, structured problem-solving process for decision making in recreation and parks. Research techniques/evaluation procedures; quantitative, qualitative methodologies; deductive, inductive reasoning.
Effect: Spring 2005
Prerequisite:

RPTM 435 Recreation Facilities Planning and Management (3) Planning and management of selected facilities with emphasis upon maintenance, activity, and support provisions.
Effect: Spring 2005
Prerequisite:

RPTM 440 Adventure-based Programming and Administration (3) Utilization of wilderness/backcountry environments and participant challenge; history, models, theories; survey of organizations; program design, administration; and issues.
Effect: Spring 2005
Prerequisite:

RPTM 460 Political and Legal Aspects of Recreation Services (3) Role of local, state, federal government in provision of recreation services. Legislative and judicial systems.
Effect: Spring 2005
Prerequisite:

RPTM 470 Recreation and Park Management (3) Management of recreation and park services in public/non-profit settings; planning, budgeting fiscal development, resources allocation, decision-making, computer applications.
Effect: Spring 2005
Prerequisite:

RPTM 480 Senior Management Seminar (1) Current management issues will be examined relative to professional management strategies, ethics, and leadership in leisure services.
Effect: Spring 2005
Prerequisite:

RPTM 494H Senior Honors Thesis (1-6 per semester/maximum of 6) Senior Honors Thesis
Effect: Summer 2011

RPTM 495A Internship in Recreation Services (12) Meet educational objectives through participation in organized practical experience; direct observation and professional supervision in full-time work experience.
Effect: Spring 2005
Prerequisite:

RPTM 495B Internship in Golf Management (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings.
Effect: Spring 2005
Prerequisite:

RPTM 495C Internship in Golf Management (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings.
Effect: Spring 2005
Prerequisite:

RPTM 495D Internship in Golf Management (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings.
Effect: Spring 2005
Prerequisite:

RPTM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an
individual basis and which fall outside the scope of formal courses.
Effective: Spring 2005

RPTM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2005

RPTM 497I Canoeing Leadership (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

RPTM 497J Peer Mentoring (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014
Prerequisite:

RPTM 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2006

RPTM 498D Backpacking Leadership (2) This course will introduce students to backpacking leadership skills, including pre-trip planning; selection, use, and care of equipment; and backcountry travel techniques. Participants will also learn the value of leadership, teamwork, and communication; human impacts on the environment; and development of a personal connection to the environment. Students will have an opportunity to practice leadership skills and to plan and lead to a two-day backpacking trip.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

RPTM 498F Rock Climbing Leadership (3) This course will help students develop a working knowledge of the history and philosophies of rock climbing; the foundations of physically and mentally preparing for the sport of climbing; the basic equipment needs for climbing in an indoor setting; ways to manage the inherent risks of the sport; how and when to use and teach many basic climbing techniques; AMGA standard practice for climbing in a gym setting; and the current trends in climbing as a sport. Students will earn an American Mountain Guiding Association (AMGA) Climbing Wall Instructor Certification.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

RPTM 498G Player Development/Tournament Golf (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

RPTM 499 (IL) Foreign Studies (1-12 per semester/maximum of 12) Foreign Studies in RPTM.
Effective: Summer 2012
Prerequisite:

RPTM 501 Leisure Studies Foundations (3) This course provides general background knowledge about the literature and research methods central to the field of leisure studies.
Effective: Spring 2008

RPTM 510 Tourism Behavior: An interdisciplinary Approach (3) An exploration of the various approaches that have been taken in the social sciences to understand tourism behavior.
Effective: Spring 2008
Prerequisite:

RPTM 525 Behavioral Patterns of the Outdoor Recreationist (3) Patterns of time and space use; user characteristics; meaning of participation; facilitation of environment-use enhancement.
Effective: Spring 2008

RPTM 527 Social Psychology of Leisure (3) Application of the methods, constructs, and theory of social psychology to the study of leisure, outdoor recreation, and therapeutic recreation.
Effective: Spring 2008
Prerequisite:

RPTM 530 Research Methods in Leisure Studies (3) Research techniques, including methods, research design, techniques for data collection, as applied to relevant problems in the leisure studies field.
Effective: Spring 2008

RPTM 533 Leisure Studies, Surveys, and Appraisals (3) Advanced procedures related to leisure, recreation, and park research.
Effective: Spring 2008
Prerequisite:

RPTM 540 Public and Private Recreation Lands and Waters (3) Public and private roles and interactions, allocation of
resources, use policies, open space concepts, private enterprise developments, legal controls.
Effective: Spring 2008

RPTM 545 Philosophical and Social Bases of Leisure (3) Philosophical and social bases of leisure; analysis of critical issues of leisure for philosophical and social implications.
Effective: Spring 2008

RPTM 560 Administrative Problems of Leisure Service Organizations (3) Special problems of recreation and park departments; legal powers and liability; departmental organization, financing, personnel policies, and staff development.
Effective: Spring 2008

RPTM 570 Conceptual Bases for Therapeutic Recreation (3) Issues in the application of concepts in therapeutic recreation from a multidisciplinary perspective; evaluation and research.
Effective: Spring 2008
Prerequisite:

RPTM 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2008

RPTM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2008

RPTM 597A Scholarly Writing (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

RPTM 597F Qualitative Research Methods (3) Graduate students will be introduced to and have the opportunity to apply many techniques employed by qualitative social science researchers. Of particular emphasis will be fieldwork-based research methods, including participant observation and on-site interviewing. Students will participate in discussion of assigned reading material as well as shared experiences associated with the preparation of course materials. Assignments will involve both small projects conducted locally using various methods as well a more elaborate proposal for research involving qualitative methods. The course will be of particular value to students preparing for future thesis or dissertation research utilizing qualitative methods. Though qualitative research is often associated with an interpretivist or humanistic research paradigm, participants espousing a scientific/positivist paradigm are also encouraged to enroll, as are students from outside of RPTM.

RPTM 600 Thesis Research (1-15) No description.
Effective: Spring 2008

RPTM 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 2008

RPTM 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Spring 2010

RPTM 610 Thesis Research Off Campus (1-15) No description.
Effective: Spring 2008

RPTM 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 2008

Last Import from UCM: May 24, 2014 3:00 AM
Religious Studies (RL ST)

RL ST 400 Theories of Religion (3) Comparative and interdisciplinary study of two or more systematic theories of religion: anthropological, psychological, sociological, philosophical/theological.
Effective: Fall 1983
Prerequisite:

RL ST 405 (IL) (J ST 405) Ancient Jewish Traditions and Modern Food Movements (3) Jewish laws, customs and attitudes with regard to food production, agricultural policy and eating from biblical to modern times.
Effective: Spring 2012

RL ST 407Y (IL) (HIST 409Y, J ST 409Y) European Anti-Semitism from Antiquity to the Present (3) Surveys the history of anti-Semitism in Europe from antiquity through the Middle Ages to the present.
Effective: Summer 2005

RL ST 408 (US;IL) Hindu Studies (3) Special topics in Hindu studies.
Effective: Summer 2005
Prerequisite:

RL ST 409 (US;IL) Buddhist Studies (3) Special topics in Buddhist studies.
Effective: Spring 2006
Prerequisite:

RL ST 410 (US;IL) (HIST 410, J ST 410) Jews in the Medieval World (3) Trends in medieval Jewish society under Islam and Western Christendom.
Effective: Spring 2006

RL ST 411 (US;IL) (J ST 411) Jewish Studies (3) Study of the life and thought of a particular period or movement in the history of Judaism.
Effective: Spring 2006
Prerequisite:

RL ST 412 (J ST 412) American Judaism (3) The development of Jewish religion and culture in America from the colonial era to the present.
Effective: Summer 1999
Prerequisite:

RL ST 420 Major Christian Thinkers (3) Systematic inquiry into the religious thought of one or more Christian thinkers, such as Paul, Augustine, Luther, Calvin, Kierkegaard, or Tillich.
Effective: Fall 1983
Prerequisite:

RL ST 422 (AM ST 422) Religion and American Culture (3 per semester/maximum of 6) Selected topics, problems, or historical movements in American religion. Relation between religion and American culture.
Effective: Summer 1996

RL ST 424H (HIST 424H, J ST 424H) Monotheism and the Birth of the West (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.
Effective: Fall 2012
Prerequisite:

RL ST 440Y (US;IL) The Orthodox Christian Tradition (3) History, culture, and beliefs of the Eastern Orthodox religious tradition with special reference to Russia.
Effective: Summer 2011
Prerequisite:

RL ST 461 (US;IL) (SOC 461) Sociology of Religion (3) Contemporary religion in the global perspectives: beliefs, structure, and function of major religious traditions, denominations, and cults.
Effective: Fall 2013
Prerequisite:

RL ST 471Y (IL) (HIST 471Y) Classical Islamic Civilization, 600-1258 (3) Pre-Islamic Arabia; Muhammad; Arab conquest; Islamic beliefs and institutions; literary, artistic, and scientific achievements; relations with Europe; breakdown of unity.
Effective: Spring 2006

RL ST 478 (J ST 478) Ethics After the Holocaust (3) Explores the philosophical effects of the Holocaust for thinking about the primary question: Is ethics possible?
Effective: Summer 2012
Prerequisite:

RL ST 483 (IL) Zen Buddhism (3) The development and current state of Zen Buddhist thought and practice.
Effective: Spring 2006
Prerequisite:
RL ST 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

RL ST 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

RL ST 495 Internship (1-18) Supervised off-campus, non-group instruction, including field experience, practica, or internships.
Effective: Summer 2004
Prerequisite:

RL ST 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

RL ST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

RL ST 499 (IL) Foreign Study--Religious Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

RL ST 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

RL ST 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

RL ST 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

RL ST 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2002

RL ST 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: May 24, 2014 3:00 AM
Renal Medicine-Hy (REN)

REN 713 Renal Medicine (3) Course provides exposure to basic concepts in histology/pathology, biochemistry, physiology and clinical medicine related to fluid, electrolyte and acid/base homeostasis.
Effective: Summer 2014
Prerequisite:

REN 728 Hematology (3) Some of the areas studied will be: Renal Pathology and Congenital Disorders; Renal Physiology; Renal Function Testing; Glomerular Disease I and II; Urinary Tract Pathophysiology/Urinary Tract Infection; Urinalysis; Acid-Base; Pathology of the Prostate; Testicular/Penile Neoplasm; Salt and Water; Diuretics; Acute Renal Failure; Potassium; Calcium/Phosphorous; Chronic Renal Failure; and Inflammatory Disease of the Male Genital Tract.
Effective: Fall 2001
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Reproductive Medcn-Hy (REP)

REP 723 Reproductive Medicine (2) Course provides exposure to basic concepts in histology/pathology, biochemistry, physiology, pharmacology and clinical medicine related to reproductive medicine.
Effective: Summer 2014

REP 730 Reproductive Medicine (4) Some of the areas studied will be: Menstrual Cycle; Sexually Transmitted Diseases; Hormonal Contraception; Non-hormonal Contraception; Amenorrhea and Galactorrhea; Pathology of Cervix, Vulva, and Vagina; Cytology; Ectopic Pregnancy; Normal Pregnancy; Cancer of the Cervix; Pathology of the Breast; Perinatal Pathology; Prenatal Genetics Screen; Pathology of the Ovary and Fallopian Tube; Menopause; High Risk Pregnancy; Trophoblastic Tumors; Carcinoma of the Breast; Pathology of the Uterus; and Ovarian Cancer.
Effective: Fall 2001
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Respiratory Medicine (RESP)

RESP 723 Respiratory Medicine (1-2) Introduction to normal and abnormal structure and processes of the respiratory system, principles of therapeutics and factors affecting disease treatment and prevention.
Effective: Summer 2014
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Rural Sociology (R SOC)

R SOC 417 (CED 417) Power, Conflict, and Community Decision Making (3) Impact of institutions on human interdependence and behavior, the structure of power, and community decision making and public policy.
Effective: Summer 2013 Ending: Summer 2014
Prerequisite:

R SOC 420 (US;IL) (CED 420, WMNST 420) Women in Developing Countries (3) Analysis of women’s work, experiences, and development policies and practices in Africa, Asia, and Latin America.
Effective: Summer 2013 Ending: Summer 2014

R SOC 452 Rural Organization (3) Social organization and change in rural communities; use of sociological principles in analysis of rural problems and rural development.
Effective: Summer 2013 Ending: Fall 2014
Prerequisite:

R SOC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2013

R SOC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2013

R SOC 499 (IL) Foreign Study--Rural Sociology (1-12) Study in selected countries of rural social institutions and current rural sociological problems.
Effective: Summer 2013

R SOC 502 Use of Theory in Rural Sociology (3) Examine and evaluate metasociology of alternative theoretical systems applicable to rural society, with emphasis on American society.
Effective: Summer 2013
Prerequisite:

R SOC 505 (CEDEV 505, AEE 505) Leadership Development (3) Exploration, understanding, and application of leadership roles, strategies, and principles in group and community settings.
Effective: Summer 2013

R SOC 508 Sociology of Agriculture (3) Sociological analysis of changes in the organization of agriculture and food systems in the United States and developing countries.
Effective: Summer 2013

R SOC 513 Research Methods in Rural Social Sciences (3) Scientific method in planning and conducting research.
Effective: Summer 2013

R SOC 514 Qualitative Research Methods (3) Learn core approaches for collecting, interpreting and analyzing qualitative data within rural sociology.
Effective: Spring 2014
Prerequisite:

R SOC 516 (CEDEV 516) Change in Rural Society (3) Social change in rural society, emphasizing prediction and control of the change process. Even years.
Effective: Summer 2013

R SOC 517 (CEDEV 517) International Rural Social Change (3) Implications of planned change for international rural societies, considering basic structural constraints, known institutional linkages, and potential synergetic consequences.
Effective: Summer 2013

R SOC 522 Data Analysis in Rural Sociology (1) Analysis of research data in rural sociology using computer library programs.
Effective: Summer 2013
Prerequisite:

R SOC 525 Fertility, Population Change, and Development (3) Fertility and population growth in less-developed countries; theories of fertility change, agricultural development, and population policies.
Effective: Summer 1987
Prerequisite:

R SOC 530 Sociology and Demography of Poverty in the United States (3) An in-depth treatment of sociological and demographic dimensions of poverty in rural and urban areas of the United States.

The Pennsylvania State University
R SOC 552 Theoretical Frameworks for Rural Community Research (3) Application of community theories to the study of communities in rural areas.
Effective: Summer 2013
Prerequisite:
R SOC 555 Human Dimensions of Natural Resources (3) Identification of the interrelationships and influence of human behavior and natural resources.
Effective: Summer 2013

R SOC 573 Methods of Survey Data Analysis (3) Use of multivariate procedures in the analysis of survey data in the rural social sciences.
Effective: Summer 2013
Prerequisite:
R SOC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2013

R SOC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2013

R SOC 597A Population and Environment (3) This course examines how the human population - its size, growth rate, age composition, geographic distribution, and consumption patterns - is associated with problems of resources, environment, and development.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

R SOC 597D Contemporary Social Theory (3) Engages contentious debates regarding the definitions and possibility of development and progress.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

R SOC 600 Thesis Research (1-15) No description.
Effective: Summer 2013

R SOC 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 2013

R SOC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Provides advanced standing graduate students from a research oriented curriculum the opportunity to receive experience/supervision in resident instruction in higher education.
Effective: Summer 2013

R SOC 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 2013

R SOC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 2013

Last Import from UCM: May 24, 2014 3:00 AM
Russian (RUS)

RUS 400 (IL) Senior Seminar in Russian Culture (3) Senior seminar devoted to topics in Russian culture; conducted in Russian.
Effective: Spring 2006
Prerequisite:

RUS 401 Advanced Russian A (3) Advanced Russian grammar, conversation, and composition.
Effective: Summer 2012
Prerequisite:

RUS 402 Advanced Russian B (3) Advanced Russian grammar, conversation, and composition.
Effective: Summer 2012
Prerequisite:

RUS 403 Advanced Russian Conversation and Composition (3) A conversation and composition course that includes situational topics as well as complex academic discourse.
Effective: Summer 2013
Prerequisite: Concurrent: RUS 400 RUS 401 RUS 402 RUS 405 RUS 412

RUS 404 Advanced Reading and Composition (3) Advanced Russian Reading and Composition.
Effective: Summer 2012
Prerequisite:

RUS 405 (IL) Seminar in Russian Literature (3-6 per semester/maximum of 6) Readings in classical Russian literature; Topics vary.
Effective: Summer 2012
Prerequisite:

RUS 406 (IL) Russian Film (3) Conversation and Composition based on classical Russian films.
Effective: Summer 2012
Prerequisite:

RUS 410 (IL) Heritage Russian 1 (3) Introductory course for heritage speakers of limited linguistic proficiency aiming at teaching basic reading, writing, and grammar skills in Russian.
Effective: Summer 2014
Prerequisite:

RUS 412 (IL) Russian Translation (3 per semester/maximum of 6) Translation from Russian into English of complex texts from the humanities, social sciences, and technical fields.
Effective: Spring 2006
Prerequisite:

RUS 426 (IL) Dostoevsky (3) Study of representative works by Dostoevsky in the original Russian.
Effective: Spring 2006
Prerequisite:

RUS 427 (IL) Tolstoy (3) Study of representative works by Tolstoy in the original Russian.
Effective: Spring 2006
Prerequisite:

RUS 460 (IL) Linguistic Analysis of Contemporary Russian (3) Detailed study of the phonology, morphology, and syntax of Modern Standard Russian and the major dialects.
Effective: Spring 2006
Prerequisite:

RUS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

RUS 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

RUS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

RUS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

RUS 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

The Pennsylvania State University
RUS 501 **Readings in Russian Literature** (3-6) No description.
Effective: Spring 1987
Prerequisite:

RUS 525 **Pushkin** (3) Pushkin’s significance in Russian literature; his relation to other European literatures; Eugene Onegin and selected shorter works.
Effective: Winter 1978

RUS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2001

RUS 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

RUS 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching RUS 001, 002, or 003 under the supervision of a full-time faculty member.
Effective: Fall 1983

RUS 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

School Psychology (S PSY)

S PSY 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

S PSY 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011

S PSY 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2011

S PSY 500 Professional Issues in School Psychology (1-3) Orientation to the field through study of unique problems, current issues, ethical and legal matters, unique cases, and research projects.
Effective: Summer 2011

S PSY 503 Development Across the Life Span (3) This is a graduate level survey course on the scientific discipline of human development across the life span.
Effective: Summer 2011
Prerequisite:

S PSY 510 Supervision of Pupil Service Personnel (1-10) Program supervision and professional leadership in university clinics and school systems.
Effective: Summer 2011
Prerequisite:

S PSY 517 Social Aspects of Behavior in Education (3) A critical and detailed examination of social behavior in canons of classic and contemporary theoretical and empirical work.
Effective: Fall 2013

S PSY 530 Psychoeducational Interventions (3) Development of empirically validated psychoeducational interventions for academic and behavioral problems experienced in school by children and adolescents.
Effective: Summer 2011

S PSY 535 School-Based Psychological Interventions for Children and Youth (3) Development of empirically supported psychological and psychoeducational interventions for behavioral and emotional concerns among school-aged children.
Effective: Summer 2011
Prerequisite:

S PSY 554 Psychological and Educational Evaluation of Exceptional Children (3) Administration and interpretation of individual tests other than the Stanford-Binet, WISC, WAIS.
Effective: Summer 2011
Prerequisite:

S PSY 556 Psychological Assessment of Preschool and School-Aged Children (2) Study of cognitive/affective tests; use of systems--analytic, multivariate statistical, actuarial methods of data combination in decision-making processes.
Effective: Summer 2011
Prerequisite:

S PSY 559 The Individual Psychological Examination (3) Demonstrations and practice in widely used ability and aptitude tests; psychological report writing.
Effective: Spring 2012
Prerequisite:

S PSY 561 Consultation in Educational Settings (3) Prepares students to consult with teachers, administrators, parents, and other professionals about academic, behavioral, social-emotional, and programmatic issues.
Effective: Summer 2011
Prerequisite:

S PSY 575 Child and Adolescent Psychopathology (3) This course will familiarize students with specific psychiatric disorders of childhood and adolescence encountered by mental health professionals in schools.
Effective: Fall 2013

S PSY 594 Research Topics (1-3 per semester/maximum of 6) Graduate seminar examining current research in the field of School Psychology.
Effective: Spring 2014
Prerequisite:

S PSY 595A Practicum in School Psychology (1-6) Clinical experience with children under supervision in a variety of The Pennsylvania State University
settings requiring service, including practice in synthesizing data and observations.
Effective: Summer 2011
Prerequisite:
S PSY 595B Internship in School Psychology (1-10) Long-term placement in settings providing work for school psychologists with children, parents, teachers, administrators, and service agencies, under supervision.
Effective: Summer 2011
Prerequisite:
S PSY 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011
S PSY 597 Special Topics (1-9) Formal courses given on a topical or special interest subject that may be offered infrequently; several different topics may be taught in one year or semester. A specific title may be used in each instance and will be entered on the student’s transcript. Multiple offerings may be accommodated by the use of suffixes, A, B, etc.
Effective: Summer 2011
S PSY 600 Thesis Research (1-15) No description.
Effective: Summer 2011
S PSY 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 2011
Effective: Summer 2011
S PSY 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Summer 2011
S PSY 843 (CN ED 843) Prevention Strategies and Programming (3) Addresses prevention program development, implementation, and evaluation, along with theoretical and empirical underpinnings, ethical, and multicultural issues related to prevention.
Effective: Summer 2011

Last Import from UCM: May 24, 2014 3:00 AM
SC 400 Consequences of Science (1) A series of lecture/discussions in which science faculty members show the social implications of their research specialty.
Effective: Winter 1978

SC 401 Basic Science and Disease (1) Clinical aspects of various disease and how basic scientific information contributes towards understanding and treating disease.
Effective: Summer 2008
Prerequisite:

SC 402 Science-Related Employment: Corporate Organization, Opportunities, and Expectations (1-3 per semester/maximum of 3) Present undergraduate and graduate students with information and skills necessary for success in science-related job positions available in industry.
Effective: Spring 2011
Prerequisite:

SC 476 Human Dimensions of Health Care (3) Field experience in five or more medical settings; complementary exposure to the scientific literature; weekly discussions.
Effective: Spring 2011
Prerequisite:

SC 494 Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1994

SC 494H Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

SC 495 Science Co-op Work Experience III (1-3) A supervised work experience where the student is employed in a scientific position. To be offered for SA/UN grading.
Effective: Spring 2007
Prerequisite:

SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1996

SC 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 1997

SC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1996

Science Education (SCIED)

SCIED 410 Using Technology to Enhance Science Teaching (3) This course explores contemporary practice and research associated with applications of technology to enhance science learning and teaching.
Effective: Summer 2000
Prerequisite:

SCIED 411 Teaching Secondary Science I (3) Introduction to teaching secondary school science, including curriculum, learning theory, media, evaluation as they relate to student progress.
Effective: Spring 1994
Prerequisite:

SCIED 412 Teaching Secondary Science II (3) Implementation of science instruction using a variety of modern approaches.
Effective: Spring 2001
Prerequisite: Concurrent: C I 412W

SCIED 455 Field Natural History for Teachers (3) Ecologically oriented field study course to provide teachers with basic knowledge of natural science resources in school environments.
Effective: Winter 1978
Prerequisite:

SCIED 457 Environmental Science Education (3) Philosophy, techniques, and skills for teaching environmental science, including curriculum development, fieldwork, and the use of appropriate technologies.
Effective: Fall 2003
Prerequisite:

SCIED 458 Teaching Science in the Elementary School (3) Interpreting children's science experiences and guiding development of their scientific concepts; a briefing of science content material and its use.
Effective: Spring 2014
Prerequisite: Concurrent: C I 495A OR C I 495B ; MTHED 420 SS ED 430W

SCIED 470 Selected Studies in Science Education (1-6) Intensive work on particular issues, trends, or developments in science education for elementary and secondary school teachers.
Effective: Winter 1978
Prerequisite:

SCIED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

SCIED 496A Teaching Science to Children in Informal Settings (1.5) Independent Study for TESLA students.
Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

SCIED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

SCIED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

SCIED 550 Science Education Curriculum (3) History, analysis, and evaluation of precollege science curricula.
Effective: Spring 2014

SCIED 551 History, Philosophy, & Sociology of Science and Science Teaching (3) Examination of the implications of history, philosophy, and sociology of science for science teaching.
Effective: Summer 2006
Prerequisite:

SCIED 552 Science Teaching and Learning (3) Exploration of the theoretical and empirical foundations of the teaching and learning of science.
Effective: Summer 2009

SCIED 556 The Supervision of Science Curriculum (3) Supervision of elementary and secondary science teachers as they develop K-12 programs in the public schools.
Effective: Winter 1978
Prerequisite:

SCIED 558 Research Problems in Science Teaching (3) Problems and research dealing with curriculum, materials, evaluation, and supervision of science teaching and learning.
Effective: Fall 1983

The Pennsylvania State University
Prerequisite:

SCIED 559 **Analysis of Instruction in Elementary Science Education** (3) Analysis of the history, issues, trends, and research in elementary science education.
Effective: Winter 1978

Prerequisite:

SCIED 590 **Colloquium** (1-3) continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1992

SCIED 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

SCIED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

Science, Technology, and Society (S T S)

Effective: Spring 1999
Prerequisite:

S T S 408 (COMM 408) Cultural Foundations of Communications (3) Examination of oral, scribal, print, industrial and electronic cultures; analysis of impact of technology on communications and social structure.
Effective: Spring 2009
Prerequisite:

S T S 416 (US;IL) (WMNST 416, AF AM 416) Race, Gender and Science (3) The class will focus on race and gender as products of science, and how societal values shape scientific activity.
Effective: Spring 2013
Prerequisite:

S T S 420 (EM SC 420, SOC 420) Energy and Modern Society (3) Technology and economics of energy resources, production, and consumption; environmental factors, exhaustion, new technology.
Effective: Spring 1991

S T S 427W (CED 427W) Society and Natural Resources (3) Analysis of the relationship between societal development and enhancement and natural resources.
Effective: Fall 2013
Prerequisite:

S T S 428 (IL) (HIST 428) The Darwinian Revolution (3) The origins and implications of evolutionary theory.
Effective: Spring 2006
Prerequisite:

S T S 430 (IL) (NUTR 430) Global Food Strategies: Problems and Prospects for Reducing World Hunger (3) Technological, social, and political solutions to providing basic food needs; food resources, population, and the environment; current issues.
Effective: Summer 2005

S T S 432 (PHIL 432) Medical and Health Care Ethics (3) Examines ethical, political, and social issues in the research, implementation, and practice of medicine, medical technologies, and healthcare.
Effective: Fall 1998
Prerequisite:

S T S 433 (PHIL 433) Ethics in Science and Engineering (3) Ethical issues arising in the practice of science and engineering and their philosophical analysis.
Effective: Fall 1995

S T S 435 (PHIL 435) The Interrelation of Science, Philosophy, and Religion (3) The historical and transformative interactions between science and Western philosophical and religious views of nature, humanity, and God.
Effective: Spring 1996

S T S 457 (US;IL) (WMNST 457, HIST 457) The History of Women in Science (3) Critical analysis of the role women, gender, and minorities have played in the natural sciences.
Effective: Spring 2013
Prerequisite:

S T S 460 (PL SC 460) Science, Technology, and Public Policy (3) The all-pervasive importance of science and technology policy in modern societies and mechanisms and processes by which it is made.
Effective: Spring 1995
Prerequisite:

S T S 470 Technology Assessment and Transfer (3) Nature of technology assessment and technology transfer in product design and development process from federal and university labs, and internationally.
Effective: Summer 1996

S T S 500 Integrating Science and Technology Into Society (3) Interdisciplinary analysis of critical issues for science, technology, and society.
Effective: Spring 1991
Prerequisite:

S T S 589 Ethics and Values in Science and Technology (3) Study interrelationships of 20th century technological change and human values with emphasis on social and ethical aspects of technological progress.
Effective: Summer 1994

The Pennsylvania State University
Scient Princ Medicin (SPM)

SPM 711 Scientific Principles of Medicine (15) This course provides an introduction to the basic science principles that form a foundation for the study of clinical medicine.
Effective: Summer 2013
Prerequisite:

Last Import from UCM: May 24, 2014 3:00 AM
Seminar - Dickinson (SEM)

SEM 900 **Advanced Corporate Tax Seminar** (2-3) This seminar will cover two main topics: Taxation of Executive Compensation and Corporate Mergers & Acquisitions.
Effective: Spring 2007

SEM 901 **Advanced Evidence Seminar** (2) An advanced investigation of topics in the law of evidence.
Effective: Spring 2007
Prerequisite:

SEM 903 **History of International Law: Seminar** (2) The general historical introduction and seminar presentations and projects are designed to accentuate problems and issues which enable students to better understand the foundations of the law of nations and encourage independent research skills.
Effective: Summer 2007

SEM 905 **EU and International Trade Law Seminar** (3) This seminar seeks to examine selected aspects of the Commercial Law of the European Union. It provides an introduction to the distinct methodology of EU law and the European Court of Justice, examines the principles of the internal market, and focuses on aspects which are particularly important for US lawyers from a practical or theoretical perspective. It covers, among others, the following topics: Introduction to the fundamentals of the EU Legal Order; the internal market; free movement of goods, customs duties, discriminatory companies; financial services; aspects of competition law; anti-competitive agreements and monopolies; enforcement of competition law; selected comparisons with WTO and NAFTA.
Effective: Summer 2011

SEM 907 **The Supreme Court in Comparative Perspective** (3) This course examines the contribution of the judiciary to political governance in comparative perspective. It focuses on the Supreme Court and the European Court of Justice, which is the highest court of the European Union. It also takes into account selectively judgements of other constitutional courts. It seeks to explore the function of judicial review in modern democracy through a study of judicial decisions in selected areas. It examines the relationship between the judiciary and the other organs of government and the role of courts in protecting the citizen. It focuses on the following areas: federalism, the protection of human rights, the principles of democracy, non-discrimination, equality, proportionality, legitimate expectations, and fair hearing; Locus standi, remedies for the protection of constitutional rights, and the liability of public bodies and state agencies.
Effective: Fall 2011

SEM 908 **Comparative Law in Globalized World Seminar** (3) This seminar gives students experience in researching, drafting and orally presenting an in-depth comparative scholarly work product. Early in the seminar, in consultation with the professor, students identify and select a timely and important topic which will serve as the subject of their Seminar research paper. Each student's research and written drafts are subject to ongoing review and critique by the professor and student colleagues throughout the Semester. When completed, each research paper is presented orally to the Seminar at the end of the course. The comparative research and drafting exercises sensitize students to the civil law tradition and contemporary national and supranational legal system in Europe and around the world that have grown out of or have been substantially influenced by the civil law tradition. Students also develop client counseling skills.
Effective: Spring 2013

SEM 909 **Dispute System Design Seminar** (2) This seminar is for students who: have closely examined at least one dispute resolution system (e.g., civil or criminal litigation, administrative adjudication, investment treaty arbitration, contractual tiered systems for the provision of negotiation, mediation and arbitration); seek to gain an empirically-grounded understanding of the lifecycle and dynamics of conflict, conflict resolution and the pursuit of justice; and will use such understanding to propose the creation or reform of a public, private or hybrid dispute resolution system. Students will conduct original legal and (if possible) empirical research, using the principles, theories, research and dispute system law and procedure studied in the seminar.
Effective: Spring 2014
Prerequisite:

SEM 910 **Cross-Border Legal Practice Seminar** (2) This seminar will focus on two different themes. It will explore what it means to be a lawyer in the United States in comparison with what it means to be a lawyer in other countries. Among other things, participants will discuss the lawyer's role in society and the type of conduct that is regulated. This course will also examine the cross-border practice regulation that has emerged in response to the increasingly common circumstance of lawyers who handle a matter in a country other than their own.
Effective: Fall 2007
Prerequisite:

SEM 911 **Education Law Seminar** (2) This course covers the basic premises of compulsory education; issues concerning exclusion of students; school control of student behavior and curriculum; teacher employment problems; and issues of funding, minority rights, and school liability.
Effective: Spring 2007

SEM 912 **Elder Law Seminar** (2) This course presents students with opportunities for advanced research and writing in elder law, allowing them to draw on their experiences in other classes, including the Elder Law Clinic and the Elder Law Workshop. Students are required to write a paper and to make a presentation in class.

The Pennsylvania State University
SEM 913 European Union Law Seminar (3) This seminar examines the main elements of European Union (EU) law. It covers the institutional structure of the EU and its law-making process and compares it with US government and federalism. It explores the judicial architecture of the EU and the role of the European Court of Justice. It looks at the legal framework covering EU inter-state trade, corporate mobility, and free movement of persons within the EU. It also examines trade between the EU and third states, in particular of persons the US, and foreign relations law of the EU. Effective: Spring 2007

SEM 914 Federal Regulatory and Legislative Practice Seminar (2) A seminar devoted to exploring the details of federal regulatory and legislative practice in Washington, D.C. Effective: Spring 2007

SEM 916 Class Actions Seminar (2) This seminar explores the class action device, tracing its historical origins from the earliest forms of aggregate litigation through various amendments to Rule 23 and passage of the Class Action Fairness Act. Although other non-class aggregation techniques are discussed, they are addressed only for comparative purposes. The unique nature of representative litigation and the special issues that arise during the course of a class action are the subject of discussion and student presentations during seminar sessions. Considerable discussion is devoted to the roles of the various "players" in a class action: the qualifications of the class representative, the qualifications and interest of class counsel, and the fiduciary role of the district judge. Effective: Fall 2013 Prerequisite:

SEM 917 Gender and the Law Seminar (2) The role of gender in the development of modern law is considered in a variety of contexts. Among the topics are discrimination in pay and conditions of employment, psychological and sociological criminal defenses, pornography, spousal abuse, reproductive rights, and issues of child custody, support, and property division. Effective: Spring 2007

SEM 922 International Protection of Human Rights Seminar (3) This seminar provides an introduction to international human rights law and procedures. It examines what are "human rights" and explores the law of treaty interpretation, how human rights law is incorporated into domestic legal systems, and the role of international governmental organizations, international and regional courts, and non-governmental organizations in protecting human rights. Students also learn how to research international law and how to write legal analysis based on international law. Effective: Spring 2007

SEM 923 International Refugee Law Seminar (2) This course is intended to provide an introduction to the basic framework of international refugee law. It begins by laying out the historical political and philosophical background to the development of the concept of "refugee" in the twentieth century. It examines this legal framework within the context of the broader human rights system. The cardinal provisions of the principal international instruments establishing this framework—in particular the 1951 UN Convention Relating to the Status of Refugees and the 1967 Protocol thereto—are examined against the domestic legal regime establishing the substantive, procedural and evidentiary requirements for making a claim for asylum under U.S. law. Effective: Spring 2008

SEM 925 Jurisprudence Seminar (2) This seminar investigate basic themes in jurisprudence, political philosophy, and constitutionalism. Using the Federalist Papers as our base text, we will also read selections from other important works of classical and modern legal and political thought. We will address several seminal topics, including separation of powers, the notion of an independent judiciary, the role of the executive branch, a republican form of government, democracy and federalism. This seminar will emphasize theoretical and historical dimensions of these topics, and also consider some of their contemporary implications. Effective: Spring 2014

SEM 926 Law and Individuals with Disabilities Seminar (2) Major issues and concepts in law and social policy regarding individuals with handicaps are introduced. Topics include: income maintenance programs, special education, federal and state anti-discrimination laws, accessibility, special health issues, institutionalization and deinstitutionalization. Effective: Spring 2007

SEM 927 Law of Artistic Persons and Properties Seminar (2) The objectives of this course include an examination of the interface between law and the arts with an eye to both theoretical and practical implications and a striving to identify creative and serviceable solutions to the problems that have frustrated the growth and harvest of the creative effort. The investigation will be directed toward subject areas that reflect functional divisions within the arts: i.e., the visual arts, drama, music, the literary arts, and areas such as television and film. The course includes a mandatory field trip to New York City at the student's expense. Effective: Spring 2007

SEM 928 Law and Semiotics Seminar (3) Legal semiotics is the study of law focusing signs and symbols as well as the construction of meaning in law in legal discourse. Law's communicative structures are essential in this context. Moreover, recent large-scale economic, political and social developments in the Western hemisphere have increased the need to expand our knowledge about law, and semiotic studies sustain that need.

The Pennsylvania State University
SEM 929 Law and Aging Policy Seminar (3) Examination of laws and public policies affecting older adults and families, including health and long-term care. This seminar will analyze demographic trends of aging world populations, including alternative public benefit and private retirement strategies affected by laws. Medicare, Medicaid, Social Security, protection of older adults, long-term care planning, and consumer protection laws will be introduced, with opportunities for students to select individual topics for in-depth research, writing and presentation in class. The seminar will also examine roles for specialists in elder law, whether in private practice or as public advocates.
Effective: Summer 2011

SEM 930 Law, Science, and Policy Seminar (2) This course will identify diverse areas in which advances in technology have posed challenges to society and law and will study select topics within those areas in order to ground the participants in the relevant legal, scientific, and ethical principles and jurisprudential and social theories. Subjects addressed include issues in biotechnology, such as cloning, transgenics, xenotransplantation, and pharmaceutical development; the ownership of biotechnological products; experimentation with humans and animals; human and animal rights concerns; environmental bioremediation; and non-lethal defense technologies.
Effective: Spring 2007

SEM 931 Lawyering and Ethics for the Business Attorney Seminar (2) This seminar provides students with an opportunity to analyze and discuss ethical and legal issues relating to representation of business entities. Issues covered include (1) who is the client for the lawyer who represents a business entity; (2) what special rules govern confidentiality and information sharing in the representation of a business entity; (3) how should a lawyer respond to evidence of client fraud or other illegal activities; (4) what are the potential liabilities for furnishing legal advice or providing legal opinions for business transactions that are later found to have been fraudulent or illegal; (5) when is a business entity required or permitted to reimburse employees for legal expenses relating to their employment activities; and (6) what special obligations and responsibilities are imposed on "in-house" attorneys who are full-time employees of a business entity.
Effective: Summer 2011
Prerequisite:

SEM 933 Protection of Individual Rights Under State Constitutions Seminar (2) With the perception that the federal judiciary is increasingly hostile to constitutional claims, individuals have turned to state constitutions as an independent source of rights in civil and criminal litigation. This course will explore the unique procedures and methods of state constitutional rights interpretation. In lieu of an examination, persons enrolled in the course will brief questions of state constitutional law in an arena where the United States Constitution fails to afford protection.
Effective: Summer 2011

SEM 934 Race, Racism, and American Law Seminar (2) The purpose of this seminar is to facilitate discussion and understanding of the role law has played in both the subordination and promotion of the rights of people of color in America. Subjects for discussion will include race and the American criminal justice system, hate speech and the First Amendment, affirmative action policies, and the quest for effective schools.
Effective: Summer 2011

SEM 936 Law and Sexuality Seminar (2) This seminar explores the different ways in which the law regulates and accounts for sexuality in general and sexual orientation in particular. Topics to be covered will include rights to privacy and their impact on the ability of the state to regulate sexual conduct; rights to equal protection by lesbians and gay men; the military's "don't ask, don't tell" policy; rights to free speech and associations of lesbians and gay men (and of those who do not want to associate with them): same-sex marriage and adoption by lesbians and gay men; employment discrimination; and legal issues involving transgendered individuals.
Effective: Summer 2011

SEM 937 Forensic Genetics Seminar (2) An examination of the history of and current issues in using genetic identification in the criminal law.
Effective: Fall 2013
Prerequisite:

SEM 938 The Supreme Court Seminar (2) The Supreme Court, including procedure and practice, principles of adjudication, and history, as well as the topics of the current term are studied. Students are required to present analyses of current cases as well as an analytical paper on approved topics of constitutional law.
Effective: Fall 2008

SEM 939 Tax Policy Seminar (2) This course examines the fundamental issues in tax policy, focusing on trends and on current legislative proposals. Specific subjects include the underpinnings of the various tax systems, the tax legislative process, the use of tax structure and incentives to implement social and economic objectives, the legal methodology of controlling tax abuse, and similar subjects.
Effective: Spring 2007

SEM 941 The United Nations and International Law Seminar (2) The inexorable paces of globalization and interdependence have made the need for international cooperation more acute. The role of the United Nations in these processes has become both more relevant and controversial. Notwithstanding the critical vocies that have questioned the relevance or usefulness of the world body from certain national perspectives and points of view, the United Nations, through its activities and programmes, continues to have a considerable impact on countries and societies around the

The Pennsylvania State University
world, in such areas as conflict prevention and resolution, control of population displacements, humanitarian action, and social and economic development. These considerations, among others, make a study of the United Nations and International law more important today than it has ever been.

Effective: Summer 2011

SEM 943 International Justice Seminar (2) The seminar will address international trial investigative techniques, tribunal jurisdiction and procedure, and areas of international civil and criminal law that are most relevant to legal practice before international tribunals.

Effective: Fall 2010

SEM 945 Congressional Investigations Seminar (2) This seminar will examine the laws and procedures governing congressional investigations through a series of historically based case studies and student analytical presentations on approved areas of congressional investigations law and procedure.

Effective: Spring 2014

SEM 946 Policy Issues in Corporate Crime Seminar (2) This seminar focuses on the theoretical and policy justifications underlying the prosecution of white collar crime.

Effective: Spring 2011

SEM 947 International Financial Law Seminar (3) This seminar examines selected aspects of international financial, securities, and banking law. It will cover elements of financial law, including legal aspects of banking, securities, and money; the objectives of regulations and supervision; an overview of US regulation; and the public and private law of international monetary obligations. It examines aspects of international financial and securities regulation, including an examination of the financial crisis of 2008 and the regulatory reforms resulting from it; selected comparative aspects of regulation in the US and the EU through a detailed discussion of legislation and case law. The course also includes discussion on the economic and monetary union in the EU and the eurozone crisis and it will provide an overview of the law of the IMF and the international financial architecture.

Effective: Fall 2012

SEM 948 International Financial Law (3) This seminar examines selected aspects of international financial, securities, and banking law. It covers broadly four areas: First, it provides elements of financial law. Secondly, it examines aspects of international financial and securities regulation. Thirdly, it discusses economic and monetary union in the EU and the eurozone crisis. Finally, it provides an overview of the law of the IMF and the international financial architecture.

Effective: Summer 2013

SEM 949 Comparative Constitutional Law Seminar (3) This seminar explores constitutional law differences in the US, Canada, Australia, and South Africa.

Effective: Fall 2014 Future: Fall 2014

SEM 967 Labor Law Seminar (2) This is an advanced seminar that assumes students will already have studied the National Labor Relations Act. It provides an opportunity for students to deepen their knowledge of labor law while also developing research, writing, analytical, and trial strategy skills.

Effective: Fall 2009
Prerequisite:

Effective: Spring 2011

SEM 969 Electronic Evidence Seminar (3) This seminar cover the case law, procedural rules, evidence rules, and rules of professional conduct implicated by the unique attributes of information created and/or stored electronically, as well as the filing and courtroom presentation of documents in electronic format. There are three components to the course. The first part concerns the discovery of ESI, and covers the nature, sources, and terminology of ESI; the different formats of ESI and the implications for preservation and production of ESI attributable to the different formats; the evolution of the rules and case law regarding discovery of ESI; and the obligations of counsel with respect of the preservation of ESI.

Effective: Summer 2011

SEM 970 Russian Law Seminar (2) This 2-credit seminar is concerned with the development of the law, legal system, and legal institutions of what is popularly known as Russia but also correctly and officially known as the Russian Federation within the boundaries presently occupied and, historically, within the boundaries of the Russian Empire. By "law" we mean formal legislation, customary rules, relevant international legal rules, legal doctrine, and anything else regarded by the Russian State or by Russian jurists as comprising part of the "law." For our purposes "legal institutions" encompasses all law enforcement agencies or any other agencies of the State or empowered by the state which are concerned with the law in any manner whatsoever, including educational institutions.

Effective: Spring 2012

SEM 997 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 2010
SEM 997A Comparative Constitutional Law Seminar (3) This seminar, taught via AV with students at the University of Montreal, explores constitutional law differences in the US, Canada, Australia, and South Africa. The focus is on differences in history, legal and political institution, and current values that may explain different doctrinal paths. Effective: Fall 2014 Ending: Fall 2014 Future: Fall 2014

Last Import from UCM: May 24, 2014 3:00 AM
