INTST 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effect: Fall 2007

INTST 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written or oral critique of activity required.
Effect: Spring 2008
Prerequisite: Approval by International Studies or Global Studies Advisor

INTST 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effect: Fall 1994

INTST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effect: Fall 1994

Last Import from UCM: June 16, 2011 3:00 AM
Internship (INTSP)

INTSP 295A Internship in Arts and Humanities (1-6) Supervised off-campus, non-group instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2004
Prerequisite: minimum 30 credit hours; minimum 2.0 GPA; prior approval of proposed assignment(s) by instructor

INTSP 295B Internship in Business & Engineering (1-6) Supervised off-campus, non-group instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2004
Prerequisite: minimum 30 credit hours; minimum 2.0 GPA; prior approval of proposed assignment(s) by instructor

INTSP 295C Internship in Education, Human Development, & Social Sciences (1-6) Supervised off-campus, non-group instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2004
Prerequisite: minimum 30 credit hours; minimum 2.0 GPA; prior approval of proposed assignment(s) by instructor

INTSP 295D Internship in Mathematics & Natural Sciences (1-6) Supervised off-campus, non-group instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2004
Prerequisite: minimum 30 credit hours; minimum 2.0 GPA; prior approval of proposed assignment(s) by instructor

INTSP 370 Internship Preparation (1) Planning and preparation for upper-level or capstone internship experience, suited to students' individual academic and career interests.
Effective: Summer 2004
Prerequisite: formal acceptance into a College major; junior standing; minimum 2.0 GPA; completion of core research/skills course(s) for student's degree program

INTSP 495A Internship in Business for non-Business Students (1-6) Supervised off-campus, non-group instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2011
Prerequisite: senior standing; minimum 2.0 GPA; ENGL 015, MATH 021, ECON 102 or ECON 104, MGMT 301, MKTG 301, INTSP 370, ACCTG 211 or substitute approved by the instructor; prior approval of proposed assignment(s) by instructor

Last import from UCM: June 16, 2011 3:00 AM
Italian (IT)

IT 001 **Elementary Italian I** (4) For beginners. Grammar, with reading and writing of simple Italian; oral and aural work stressed.
Effective: Spring 1988

IT 002 **Elementary Italian II** (4) Grammar and reading continued; oral and aural phrases progressively increased; composition.
Effective: Spring 1988
Prerequisite: IT 001

IT 002H **Elementary Italian II** (4) Grammar and reading continued; oral and aural phrases progressively increased; composition.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: IT 001

IT 002H **Elementary Italian II** (4) Grammar and reading continued; oral and aural phrases progressively increased; composition.
Prerequisite: IT 001

IT 003 **Intermediate Italian** (4) Advanced grammar; oral and written composition; reading of modern authors; Italian life and culture.
Effective: Winter 1978
Prerequisite: IT 002

IT 003H **Intermediate Italian** (4) Advanced grammar; oral and written composition; reading of modern authors; Italian life and culture.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: IT 002

IT 003H **Intermediate Italian** (4) Advanced grammar; oral and written composition; reading of modern authors; Italian life and culture.
Prerequisite: IT 002

IT 010 **Intensive Elementary Italian** (6) Intensive Italian basic reading, writing, listening, and speaking skills stressed.
Lab. Equivalent to IT 001 and half of IT 002.
Effective: Spring 2005

IT 020 **Intensive Intermediate Italian** (6) Continuation of Intensive Elementary Italian, building on grammar and communication skills (reading, writing, listening, and speaking).
Effective: Summer 2004
Prerequisite: IT 010

IT 050 **Italian Conversation Tutorial** (1-3) Roundtable conversation practicum for students concurrently enrolled in IT 001, 002, 003, 010, or 020. May be repeated up to 3 times for credit.
Effective: Summer 2004
Prerequisite: Concurrent enrollment in IT 001, IT 002, IT 003, IT 010 or IT 020

IT 051 **Elementary Intensive Italian for Graduate Students I** (3) Intensive introduction to Italian: first half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: graduate standing

IT 052 **Elementary Intensive Italian for Graduate Students II** (3) Intensive introduction to Italian: second half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: IT 051 or equivalent and graduate standing

IT 053 **Intermediate Intensive Italian for Graduate Students** (3) Continued intensive study of Italian at the intermediate level: reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: IT 052 or equivalent and graduate standing

IT 083S (GH;IL) **First-Year Seminar in Italian Literature, Film, and Culture** (3) Introduction to the study of Italian literature, film, and culture.
Effective: Summer 2005

IT 083T (GH;IL) **First-Year Seminar in Italian Literature, Film, and Culture** (3) Introduction to the study of Italian literature, film, and culture.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
IT 099 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

IT 110 **Topics in Italian Conversation** (3) Focus on intensive oral communication practice, especially aimed at preparation for study or work abroad and tourism.
Effective: Spring 2005
Prerequisite: IT 003 or IT 020

IT 130 (GH;IL) **Italian Culture and Civilization** (3) Italian life from antiquity to the present; literature, film, the arts, and contemporary problems in historical perspective.
Effective: Summer 2005

IT 131 (GH;US) **Italian American Culture and Civilization** (3) Italian-American experience from the late 19th century to present. Socio-political issues seen through cinema and through literary and other readings.
Effective: Summer 2005

IT 197 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1995

IT 199 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

IT 230 (GH) **Masterpieces of Italian Literature in English Translation** (3) Emphasis on works and authors of international importance. Lectures, readings, and written work in English.
Effective: Summer 1995

IT 294 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

IT 296 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1998

IT 297 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1985

IT 299 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

IT 301 **Pathways to Fluency** (3) For majors, minors, and others with adequate preparation; deepening of grammatical skills, integrated conversation, composition, and reading.
Effective: Fall 2005
Prerequisite: IT 003

IT 320 **Introduction to Italian Culture; Food, Fashion, Family** (3) Focus on the social, historical, and socio-political issues of Italy in the last two centuries.
Effective: Summer 2004
Prerequisite: IT 003

IT 325 **Introduction to Italy's Genius** (3) Focus on the art, literature, and philosophy of Italy from the Renaissance to present. In Italian.
Effective: Spring 2005
Prerequisite: IT 003

IT 330W **Greatest Books of Italian Literature** (3) A survey of the greatest books of Italian literature (prose, poetry, drama). Time period varies each semester. In Italian.
Effective: Summer 2006
Prerequisite: IT 003, IT 020 or permission of program

IT 395 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor

IT 399 (IL) **Foreign Study--Italian** (1-12) Advanced training in Italian language skills.
Effective: Summer 2005
Prerequisite: IT 003
IT 412 **Theory and Practice of Translation** (3) Advanced practicum in Italian explores the technical, artistic, and practical applications of translation between Italian and American cultures.
Effective: Summer 2004
Prerequisite: any 300-level course in Italian

IT 415 **Dante** (3) Readings in the Divina Commedia and the related lesser works of Dante Alighieri.
Effective: Summer 2011

IT 422 **Topics in the Italian Renaissance** (3) Topics vary by year and may include "Theories of Love," "Magic, Witchcraft, Alchemy, and the Emergence of Modern Science," etc.
Effective: Fall 2005
Prerequisite: any Italian course at the 300-level

IT 450 **Nineteenth-Century Italian Literature** (3) Italian romanticism, Verismo and neoclassicism, their origin and development in the novel, poetry, and drama.
Effective: Winter 1978
Prerequisite: IT 351

IT 460 **Twentieth-Century Italian Literature** (3) Modern and contemporary Italian prose, drama, and poetry.
Effective: Winter 1978
Prerequisite: IT 351

IT 475 **Modern Italian Literature and Cinema** (3) Focus on silent films, fascism, WWII, Resistance, Neorealism, and reactions against Neorealism.
Effective: Spring 2003

IT 480 **Italian Women Writers Through the Centuries** (3) Analysis of the works of women authors in their historical and literary contexts.
Effective: Spring 2005
Prerequisite: any 300-level Italian course

IT 485 **Italian-American Cultural Studies** (3) In-depth exploration of Italian-American cultural contributions.
Effective: Spring 2005
Prerequisite: any 300-level Italian course

IT 490 **Dante in Translation** (3) The reading of Dante’s Divine Comedy and selected minor works.
Effective: Fall 1983
Prerequisite: junior standing or permission of instructor

IT 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

IT 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

IT 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

IT 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM
Japanese (JAPNS)

JAPNS 001 Level One Japanese A (4) Introduction to modern Japanese; development of audio-lingual facility and ability to read and write Japanese without aid of romanization.
Effective: Spring 2011

JAPNS 002 Level One Japanese B (4) Continuation of elementary Japanese, with emphasis on improving audio-lingual facility and strengthening reading and writing skills in modern Japanese.
Effective: Spring 2011
Prerequisite: JAPNS 001

JAPNS 003 Level Two Japanese A (4) Continued study of modern Japanese at elementary level; extensive audio-lingual practice for conversational fluency; reading/writing original scripts.
Effective: Spring 2011
Prerequisite: JAPNS 002

JAPNS 051 Elementary Intensive Japanese for Graduate Students I (3) Intensive introduction to Japanese: first half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Spring 2010
Prerequisite: graduate standing

JAPNS 052 Elementary Intensive Japanese for Graduate Students II (3) Continued intensive study of Japanese at the intermediate level: reading, writing, speaking, listening, cultural contexts.
Effective: Spring 2010
Prerequisite: JAPNS 051 or equivalent and graduate standing

JAPNS 053 Intermediate Intensive Japanese for Graduate Students (3) Continued intensive study of Japanese at the intermediate level: reading, writing, speaking, listening, cultural contexts.
Effective: Spring 2010
Prerequisite: JAPNS 052 or equivalent and graduate standing

JAPNS 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2010

JAPNS 099 (IL) Foreign Study (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2010

JAPNS 110 (IL) Level Two Japanese B (4) Intermediate Japanese - Continued study of modern Japanese at intermediate level; extensive audio-lingual practice for conversational fluency; reading/writing original scripts.
Effective: Spring 2011
Prerequisite: JAPNS 003

Effective: Spring 2010

JAPNS 121 (GH;IL) Japanese Film and New Media (3) Survey of Japanese film and new media in the twentieth century and beyond, with attention to changing cultural settings. Taught in English.
Effective: Spring 2010

JAPNS 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2010

JAPNS 199 (IL) Foreign Study--Basic Japanese (1-8) Small group instruction in spoken and written modern Japanese at the introductory level.
Effective: Spring 2010

JAPNS 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2010

JAPNS 295 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2010
Prerequisite: prior approval of proposed assignment by instructor

JAPNS 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an
individual basis and which fall outside the scope of formal courses.

Effective: Spring 2010

JAPNS 297 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2010

JAPNS 299 (IL) **Foreign Study--Intermediate Japanese** (1-12) Small group instruction in spoken and written modern Japanese at the intermediate level.

Effective: Spring 2010

Prerequisite: JAPNS 002

JAPNS 395 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2010

Prerequisite: prior approval of proposed assignment by instructor

JAPNS 397 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2010

JAPNS 399 (IL) **Foreign Study** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Spring 2010

JAPNS 401 (IL) **Level Three Japanese A** (4) Further acquisition of the four language skills in Japanese--reading, writing, speaking and listening comprehension.

Effective: Spring 2011

Prerequisite: JAPNS 110

JAPNS 402 (IL) **Level Three Japanese B** (4) Exclusively for study abroad returnees. To further develop Japanese proficiency in speaking, listening, reading, and writing.

Effective: Spring 2011

Prerequisite: JAPNS 401

JAPNS 403Y (IL) **Practical Written Communication: Japanese for Professional and Academic Purposes I** (3) Discussions, presentations, readings, and compositions emphasizing written styles used in newspapers, magazines, business reports, academic writing, and other texts.

Effective: Spring 2010

Prerequisite: JAPNS 402

JAPNS 404 (IL) **Practical Written Communication: Japanese for Professional and Academic Purposes II** (3) Continuation of emphasis on written styles used in newspapers, magazines, business reports, academic writing, and other texts; aspects of translation.

Effective: Spring 2010

Prerequisite: JAPNS 403Y

JAPNS 422 (IL) **War and the Warrior in Japan** (3) Survey of the role of warfare and the warrior in Japan, with attention to changing cultural settings. Taught in English.

Effective: Summer 2011

Prerequisite: JAPNS 120 or JAPNS 121 or HIST 172

JAPNS 423 (IL) **Men, Women, and Animals** (3) Japanese history and culture through the lens of relations between men and women and between humans and animals.

Effective: Summer 2011

Prerequisite: HIST 172, JAPNS 120 or JAPNS 121

JAPNS 425 **Beyond Anime** (3) Selected works from the history of illustrated narrative from scrolls to chapbook, through film and anime; topics may vary. This seminar-style study of Japanese visual culture will help students see Japanese visual arts in terms that are local to Japanese aesthetics and through those that transcend local cultures.

Effective: Spring 2011

Prerequisite: HIST 172, JAPNS 120 or JAPNS 121

JAPNS 452 (IL) **Contemporary Japan: Cultures, Lifestyles, Trends** (3 per semester/maximum of 6) Survey of aspects of modern Japanese society; includes readings from Japanese newspapers, magazines, and fiction; topics may vary each semester.

Effective: Spring 2010

Prerequisite: JAPNS 401

JAPNS 453 (IL) **Japanese Film** (3 per semester/maximum of 6) Selected films and directors representing various aspects of Japanese culture and cinema; topics may vary each semester.

Effective: Spring 2010

Prerequisite: JAPNS 401

JAPNS 454 (IL) **Japanese Literature** (3 per semester/maximum of 6) Selected works from important Japanese texts representing genres such as autobiography, poetry, fiction, and drama; topics may vary each semester.

Effective: Spring 2010

Prerequisite: JAPNS 401
JAPNS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2010

JAPNS 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2010

JAPNS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2010

JAPNS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1995

JAPNS 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2010

Effective: Spring 2010
Prerequisite: JAPNS 110 or JAPNS 299

Last Import from UCM: June 16, 2011 3:00 AM

J ST 416 (HIST 416) Zionist History 1890-1948 (3) History of Zionist thought and politics to the foundation of Israel 1948.
Effective: Summer 1997

J ST 420 (ANTH 420) Archaeology of the Near East (3) Culture of the Near East and India from Paleolithic times through
the Bronze Age.
Effective: Spring 1999
Prerequisite: ANTH 008, ANTH 009, ANTH 011 or ANTH 012

J ST 424H (HIST 424H, PHIL 434H, RL ST 424H) Monotheism and the Birth of the West (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.
Effective: Spring 2002
Prerequisite: J ST 004, J ST 102, J ST 110 or J ST 120

J ST 426 (US) (ADM J 426, HIST 426) Jewish/American Organized Crime in New York City (3) History of Jewish/American organized crime in New York City from 1890 through the Great Depression.
Effective: Spring 2006

J ST 427 (ENGL 427) Topics in Jewish American Literature (3) An in-depth examination of important themes, writers, and/or historical developments in Jewish Literature of the United States.
Effective: Spring 2009
Prerequisite: ENGL 015 or ENGL 030; J ST 132 or CMLIT 110

J ST 433 Introduction to Jewish Music and Art (3) Introduction to the study of Jewish music and art from antiquity to the present.
Effective: Summer 2011
Prerequisite: 5th semester standing and one of the following: a previous course in art music or literature or else J ST 010

J ST 434 Media and the American Jewish Experience (3) Study of United States Jewish history through film and accompanying written text.
Effective: Summer 2011
Prerequisite: 5th semester standing and one of the following: a previous course in art music or literature or else J ST 115

J ST 457 (US; IL) (ANTH 457, SOC 457) Jewish Communities: Identity, Survival, and Transformation in Unexpected Places (3) Examines the global array of smaller Jewish communities that have flourished outside the main urban centers of Jewish settlement.
Effective: Summer 2006
Prerequisite: ANTH 001 or ANTH 045, HEBR 010, J ST 010, SOC 001, SOC 005, SOC 007, SOC 015

J ST 468 (PHIL 468) Modern Jewish Philosophy (3) Explores the major figures in modern Jewish philosophy and their influences on contemporary philosophy.
Effective: Summer 2004
Prerequisite: one course in Philosophy and/or Jewish Studies

J ST 478 (PHIL 478, RL ST 478) Ethics After the Holocaust (3) Explores the philosophical effects of the Holocaust for thinking about the primary question: Is ethics possible?
Effective: Spring 2005
Prerequisite: one course in Jewish Studies or Philosophy

J ST 480 (CAMS 480) Greeks and Persians (3) Development and achievements of the Achaemenid kingdom; relationships between Persians and Greeks.
Effective: Spring 2001
Prerequisite: CAMS 010, CAMS 025 or CAMS 100

J ST 494 Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1998

J ST 494H Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

J ST 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 1998
Prerequisite: prior approval of proposed assignment by instructor

J ST 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 1994

J ST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1994

J ST 497A The Israeli Kibbutz (3) This course will explore the ideologies, goals, and history of the kibbutzim.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

J ST 497B (HIST 497B, RL ST 497B) German Antisemitism from the Middel Ages to the Holocaust (3) German and Jewish history are interpreted in an integrated approach which examines the fundamental problem of continuity through the lens
J ST 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998

J ST 499 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM
Kinesiology (KINES)

PROFESSIONAL COURSES

The following courses are designed for the major in Kinesiology and related disciplines as designated in the various curricular programs. They are pedagogically oriented and do not fulfill the Health Sciences and Physical Education (GPE) component of General Education.

KINES 001 (GHA) Introduction to Outdoor Pursuits (1.5-3 per semester, maximum of 12) Introduction to selected outdoor pursuit activities, such as, but not limited to, rock climbing, cross country skiing, backpacking, hiking, orienteering.
Effective: Fall 2008

KINES 003 Drugs in Sports (1) Nature of drug use, misuse, and abuse in the athletic setting with implications for counseling and controls.
Effective: Spring 2005

KINES 004 (GHA) Principles of Fly Tying and Fly Fishing for Trout (1.5) A course designed to enhance student's knowledge, skill, and performance in fly tying and the sport of fly fishing for trout.
Effective: Fall 2001

KINES 006 (GHA) Cycling (1.5) A course designed to give students an understanding of and the ability to establish an exercise program involving riding.
Effective: Summer 2003

KINES 008 (GHA) Competition Casting (1.5) A course designed to enhance student's knowledge, skills, and performance in all forms of casting for sport fishing.
Effective: Fall 2001

KINES 010 (GHA) Indoor Rock Climbing (1.5) A course designed to provide students with the basic skills, safety, and knowledge of rock climbing.
Effective: Summer 2003

KINES 010A (GHA) Lead Rock Climbing (1.5) A course designed to provide students with skills, safety, and knowledge of lead rock climbing in a top rope environment.
Effective: Summer 2003
Prerequisite: KINES 010 or with permission of program

KINES 011 (GHA) Basic Downhill Skiing (1) Students will gain a comprehensive understanding and basic level of proficiency in Downhill Skiing.
Effective: Summer 2004

KINES 011A (GHA) Intermediate Downhill Skiing (1) Students will gain a comprehensive understanding and intermediate to advanced level of proficiency in Downhill Skiing.
Effective: Summer 2004

KINES 012 (GHA) Snowboarding (1) Students will gain a comprehensive understanding and basic level of proficiency in Snowboarding.
Effective: Summer 2004

KINES 013 (GHA) First Aid, Personal Safety, and CPR (1) A course designed to provide students with the opportunity for Red Cross certification in Community First Aid, Safety, and CPR.
Effective: Fall 2003

KINES 015 Lifestyles for Health (1) Concepts of health, life-style, and risk factors; development and implementation of personal action plans.
Effective: Spring 2005

KINES 017 (GHA) Ballroom Dance (1.5) A course designed to provide students with basic dance skills and an understanding and appreciation of ballroom dance.
Effective: Summer 2003

KINES 017S (GHA) Ballroom Dance (1.5) A course designed to provide students with basic dance skills and an understanding and appreciation of ballroom dance.
Effective: Fall 2007

The Pennsylvania State University
KINES 019 (GHA) Jazz Dance (1.5) A course designed to teach the basic skills of jazz dance and develop a further appreciation of jazz dance.
Effective: Summer 2003

KINES 020 (GHA) Modern Dance (1.5) A course designed to teach the basic skills of modern dance and to develop a further appreciation of modern dance.
Effective: Summer 2002

KINES 024 (GHA) Introduction to Lifetime Sports (1.5) Students participate in lifetime sports such as archery, bowling, golf, and at least one racquet and/or winter sport.
Effective: Summer 2002

KINES 025 (GHA) Introduction to Court Sports (1.5) A course designed to introduce students to various court sports such as tennis, racquetball, handball, squash, and/or badminton.
Effective: Summer 1999

KINES 026 (GHA) Archery/Indoor & Outdoor (1.5) Course designed to introduce students to Archery/Bowhunting.
Effective: Summer 2003

KINES 027 (GHA) Badminton 1 (1.5) The course promotes health, fitness, and enjoyment of the game of badminton.
Effective: Summer 2002

KINES 028 (GHA) Fencing I (1.5) Kinesiology 028 is designed to give students knowledge of the rules, strategies and skills of the sport of Fencing.
Effective: Summer 2004

KINES 029 (GHA) Golf I (1-1.5) A course designed to give students an understanding of and a proficiency in golf skills, rules, and etiquette.
Effective: Summer 1999

KINES 029A (GHA) Golf II (1.5) A course designed to provide a further understanding of and a more advanced proficiency in golf skills, rules and etiquette.
Effective: Summer 2004
Prerequisite: KINES 029 or equivalent

KINES 041 (GHA) Handball (1.5) A course designed to introduce students to a basic instructional course in the fundamentals of 4-wall handball.
Effective: Spring 2001

KINES 042 (GHA) Ice Skating--Beginning (1.5) A course of instruction focused on the physical development and knowledge of basic ice skating skills.
Effective: Summer 2002

KINES 042A (GHA) Ice Skating--Advanced Beginning (1.5) A course of instruction focused on the physical development and knowledge of basic ice skating skills.
Effective: Summer 2002
Prerequisite: KINES 042 or some experience with the activity

KINES 042B (GHA) Ice Skating--Intermediate/Advanced (1.5) A course of instruction in basic figure skating: field moves, freestyle, choreography, pairs skating, and ice dance.
Effective: Summer 2002
Prerequisite: KINES 042 and/or KINES 042A or equivalent skating experience

KINES 043 (GHA) Power Skating (1.5) A course of instruction in basic power skating specifically designed for ice hockey, applicable to other ice sports.
Effective: Summer 2002
Prerequisite: KINES 042 or KINES 042A or equivalent skating experience

KINES 044 (GHA) Racquetball I (1-1.5) The course promotes health, fitness, and enjoyment of the game of racquetball.
Effective: Spring 2001

KINES 045 (GHA) NAUI Basic Scuba (1.5) A course to introduce students to the fundamentals of Scuba diving.
Effective: Summer 2002
Prerequisite: meet NAUI standards and/or by permission of the instructor

KINES 046 (GHA) Squash I (1-1.5) A course designed to give students an appreciation of and proficiency in the skills, rules, and regulations of squash.
Effective: Spring 2001
KINES 047 (GHA) **Beginning Swimming** (1.5) A course designed to give students skills and knowledge necessary to be safe in shallow and deep water.
Effective: Summer 2002

KINES 047A (GHA) **Advanced Beginner Swimming** (1.5) A course designed to give students skills and knowledge necessary to be safe in shallow and deep water.
Effective: Summer 2002
Prerequisite: students should be comfortable in shallow and deep water and be moderately proficient in front crawl, elementary backstroke, sidestroke, and breaststroke.

KINES 047B (GHA) **Intermediate Swimming** (1.5) A course designed to teach students a variety of swimming strokes and increase their knowledge of fitness using aquatic activities.
Effective: Summer 2002
Prerequisite: KINES 047A or equivalent skills; students should be safe in deep water and have proficiency in the front crawl, elementary backstroke, sidestroke, and breaststroke.

KINES 048 (GHA) **Tennis I** (1.5) A course designed to give students an appreciation of and proficiency in the skills, rules, and regulations of tennis.
Effective: Spring 2001

KINES 048A (GHA) **Tennis II** (1.5) A course designed to give students an appreciation of and proficiency in the skills, rules, and regulations of tennis.
Effective: Summer 2004
Prerequisite: KINES 048 or for students who demonstrate reasonable consistency in depth and placement of ground strokes, and serve and who have not had instruction at Penn State.

KINES 054 (GHA) **Aikido** (1.5) Students will gain a comprehensive understanding and basic level of proficiency in the Japanese Traditional martial art of Aikido.
Effective: Summer 2003

KINES 055 **Dance Forms** (1.5) Basic skills and methods of teaching and assessing creative movement and folk, square, social, and modern dance.
Effective: Summer 1996

KINES 056 (GHA) **Introduction to Martial Arts** (1.5) A course designed to give students an introduction to martial arts, and the use of martial arts for lifelong fitness.
Effective: Summer 2002

KINES 057 (GHA) **Personal Defense** (1.5) A course designed to give students an understanding of and a proficiency in martial arts and self-defense.
Effective: Summer 2004

KINES 058 (GHA) **Judo I** (1.5) Kinesiology 058 will help students develop stamina, confidence and discipline, and promote general fitness through the introduction to basic Judo.
Effective: Summer 2003

KINES 059 (GHA) **Introduction to Karate** (1.5) A course designed to give students an understanding of and a proficiency in Karate.
Effective: Summer 2003

KINES 060 **Principles and Practices of Healthful Living** (3) Facts and principles as related and applied to the science of living serve as a basis for health instruction and student guidance.
Effective: Spring 2005

KINES 061 (GHA) **Fitness Theory and Practice** (3) Students will learn about the science of fitness/wellness; evaluate their present fitness levels and create a personal fitness plan.
Effective: Spring 2001

KINES 061S (GHA) **Fitness Theory and Practice** (3) Students will learn about the science of fitness/wellness; evaluate their present fitness levels and create a personal fitness plan.
Effective: Summer 2005

KINES 062 (GHA) **Introduction to Cardiovascular Activities** (1.5) A course designed to give students an introduction to various types of cardiovascular training.
Effective: Summer 2002

KINES 063 (GHA) **Aerobic Dance** (1.5) A course designed to involve students in daily aerobic activity while teaching the fundamentals of overall health and well-being.
Effective: Summer 2002
KINES 065 (GHA) Jogging (1.5) A course designed to give students an understanding of and the ability to establish an exercise program involving jogging. Effective: Summer 2003

KINES 067 (GHA) Physical Conditioning (1.5) A course designed to give students an experience with an understanding of vigorous physical training. Effective: Spring 2001

KINES 068 (GHA) Strength Training (1.5) Designed to improve students' muscular strength/endurance, teaches students how to develop an effective personal strength/endurance training program for lifelong fitness. Effective: Summer 2002

KINES 070 (GHA) Swim Conditioning (1.5) A course designed to provide students an understanding of and proficiency in swimming conditioning. Effective: Summer 2002
Prerequisite: KINES 047A

KINES 071 (GHA) Triathlete Training (1.5) A course designed to give students a foundation for skills in cross-training: swimming, cycling, and running. Effective: Summer 2003

KINES 072 (GHA) Fitness Walking (1-1.5) A course designed to give students an understanding of and a proficiency in fitness walking. Effective: Spring 2001

KINES 076 (GHA) Introduction to Tai Chi Ch’uan (1.5) A course designed to introduce students to Tai Chi Ch’uan, a traditional Chinese system of personal cultivation and self-defense. Effective: Summer 2004

KINES 077 (GHA) Yoga 1 (1.5) A course designed to give students an understanding of and proficiency in yoga. Effective: Summer 2002

KINES 077A (GHA) Advanced Yoga (1.5) A course designed to expand on a student’s fundamental understanding of and proficiency in yoga. Effective: Summer 2003
Prerequisite: KINES 077

KINES 081 (GHA) Wellness Theory (3) Focused on preparing and engaging students in the attitudes and behaviors that enhance quality of life and maximize personal potential. Effective: Summer 2002

KINES 082 (GHA) Action Methods for Stress Management (3) Achieving wellness by studying the effects of stressors on systems of the body and effectiveness of activity to relieve stress. Effective: Summer 2002

KINES 083 (GHA) Exercise for Stress Management (1.5) A course designed to identify the factors that contribute to student stress and develop strategies that will manage these factors. Students who receive credit for KINES 083 will not receive credit for KINES 082. Effective: Summer 2002

KINES 084 (GHA) Fitness for Life (1.5-2) A course designed to give students an understanding of the fundamental principles of physical fitness. Students who receive credit for KINES 084 shall not receive credit for either KINES 061 or 081. Effective: Summer 1999

KINES 088 (GHA) Varsity Sport Experience (2) A course designed to promote an active and healthful lifestyle through participation in a varsity sport sanctioned by Penn State. Effective: Summer 2004

KINES 089 (GHA) Student Wilderness Experience (3) Incoming student wilderness experience. Backpacking and one additional adventure: rock climbing, high ropes course/canoeing. One-day of community service. Effective: Summer 2003

KINES 090 (GHA) Introduction to Team Sports/Indoor (1-1.5) A course designed to introduce students to indoor team sports. Effective: Spring 2001

The Pennsylvania State University
KINES 090A (GHA) Introduction to Team Sports/Indoor - Volleyball (1.5 per semester/maximum of 99) A course designed to introduce students to the team sport of volleyball. Effective: Spring 2004

KINES 090B (GHA) Introduction to Team Sports/Indoor - Basketball (1.5 per semester/maximum of 99) A course designed to introduce students to the team sport of basketball. Effective: Spring 2004

KINES 090C (GHA) Introduction to Team Sports/Indoor - Team Handball (1.5 per semester/maximum of 99) A course designed to introduce students to the sport of team handball. Effective: Spring 2004

KINES 091A (GHA) Introduction to Team Sports/Outdoor - Soccer (1.5 per semester) A course designed to introduce students to the outdoor team sport of Soccer. Effective: Summer 2004

KINES 091C (GHA) Introduction to Team Sports/Outdoor - Rugby (1.5 per semester) A course designed to introduce students to the outdoor team sport of Rugby. Effective: Summer 2004

KINES 091D (GHA) Introduction to Team Sports/Outdoor-Ultimate Frisbee (1.5 per semester) A course designed to introduce students to the outdoor team sport of Ultimate Frisbee. Effective: Summer 2004

KINES 092 (GHA) Adaptive Physical Education (1.5) A course designed to give students with medically defined disabilities an opportunity to maximize their physical potential through individualized programs. Effective: Summer 2003

KINES 093 (GHA) Masters Activity (Sport) (1.5 per semester/maximum of 12) A course that introduces students to movement subcultures by providing the knowledge, habits, and skills for activity across the lifespan. Effective: Spring 2003 Prerequisite: successful completion of relevant activity course or permission of the instructor

KINES 096 (GHA) Independent Study in Physical Activity (.5-3 per semester) This course is designed to meet the needs of students to expand Kinesiology experiences beyond the designed course curriculum. Effective: Spring 2006

KINES 096B (GHA) Independent Study in Physical Activity (0.5) This course is designed for students to work independently with the guidance of a Kinesiology faculty member. Effective: Summer 2011 Ending: Summer 2011

KINES 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 1997

KINES 097A Certified Lifeguarding (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 126 The Health Program for the Elementary School Child (1.5) Introduction to the Coordinated School Health Program. Overview of contemporary school-based health education theory, content, methods, and practice. Effective: Fall 2006 Prerequisite: EDPSY 014

KINES 127 The Physical Education Program for the Elementary School Child (1.5) Theoretical and practical overview of developmentally appropriate physical education for children. Effective: Fall 2006

KINES 135 Introduction to Athletic Training (3) Foundation of injury recognition and prevention; ethical, legal, and professional issues for the athletic trainer. A laboratory based course. Effective: Fall 2006

KINES 141 (US;IL) Physical Activity: Historical and Cultural (3) Evolution of cultural values in physical activity from antiquity to the present. Effective: Spring 2006
KINES 165 **Health Education Concepts** (3) Principles of healthy living which are the basis for health instruction in schools and health care settings.  
Effective: Summer 1999

KINES 180 **Introduction to Kinesiology** (3) The foundation course of the Kinesiology degree, providing an interdisciplinary approach to the study of movement through problem based learning.  
Effective: Summer 2003

KINES 197 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.  
Effective: Spring 1997

KINES 197A **Biophysical Basis of Kinesiology - sub for KINES 180** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.  
Effective: Summer 2011 Ending: Summer 2011

KINES 197A **Biophysical Basis of Kinesiology** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.  
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 197A **Biophysical Basis of Kinesiology** (1-18) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.  

KINES 199 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.  
Effective: Spring 2011

KINES 200 **Muscle Training: Physiology, Programs, Techniques** (3) Physiological basis of strength training emphasizing mechanisms of muscle contraction and growth, program and facility design, and individual exercise technique.  
Effective: Spring 2000  
Prerequisite: BIOL 141

KINES 201 **Cardiorespiratory Training for Health and Performance** (3) Exploration of the principles and practical applications of cardiorespiratory training for health and performance enhancement.  
Effective: Spring 2006

KINES 202 **Functional Human Anatomy** (4) In-depth examination of the, musculoskeletal, nervous, cardiovascular, and respiratory systems, and their relationship to human movement.  
Effective: Spring 2004

KINES 203 **Medical Terminology for Allied Health Professionals** (3) Comprehensive review of terms related to functions, disorders, diagnosis, and treatment of body systems related to physical activity and movement.  
Effective: Summer 2010

KINES 220 **Inner Sports: Strategies for Maximizing Performance** (1) Theory and research in competitive anxiety. Identification of athletic goals with training in cognitive skills and strategies to maximize performance.  
Effective: Summer 1996  
Prerequisite: active participation in competitive sports

KINES 231 **Athletic Training Clinical Practice I** (3) Preparation in basic psychomotor skills required in the clinical practice of athletic training. This is a laboratory fee based course.  
Effective: Fall 2006  
Prerequisite: Athletic Training Application Completed  Concurrent: KINES 135 KINES 202 KINES 233

KINES 232 **Athletic Training Clinical Practice II** (3) Preparation in advanced psychomotor skills required in the clinical practice of athletic training. This is a laboratory fee based course.  
Effective: Fall 2006  
Prerequisite: admitted to the Athletic Training Option  Concurrent: KINES 334

KINES 233 **Emergency Care in Athletic Training** (3) Introduction into emergency medical care with emphasis on management of common emergency situations occurring during athletic participation. This is a laboratory fee based course.  
Effective: Fall 2006  
Prerequisite: Athletic Training Option Application Completed  Concurrent: KINES 135 KINES 231 KINES 202

KINES 260 **Research Skills in Kinesiology** (3) Development of research skills employed in kinesiology, including experimental design, statistical testing and information technology, through experiential learning.  
Effective: Spring 2006  
Prerequisite: KINES 180

The Pennsylvania State University
KINES 261 Educational Gymnastics (1) This course provides an introduction to developmentally appropriate gymnastics for K-12 students.
Effective: Spring 2010
Prerequisite: Official acceptance into the Physical and Health Education Teacher Education (PHETE) option in Kinesiology

KINES 262 Educational Dance (1) This course provides an introduction to a variety of dance forms typically taught as part of K-12 physical education curricula.
Effective: Spring 2010
Prerequisite: Official acceptance into the Physical and Health Education Teacher Education (PHETE) option in Kinesiology

KINES 264 Health-Related Physical Fitness (1) Basic skills and methods of teaching, assessing, and prescribing health-related fitness and strength training activities.
Effective: Spring 2010
Prerequisite: Official acceptance into the Physical and Health Education Teacher Education (PHETE) option in Kinesiology

KINES 266 Adventure/Outdoor Recreational Activities (1) Introduction to adventure/outdoor recreational activities teaching and assessment strategies for K-12 and community groups.
Effective: Spring 2010
Prerequisite: Official acceptance into the Physical and Health Education Teacher Education (PHETE) option in Kinesiology

KINES 268 Technology Applications in Health and Physical Education (1) Integration of technology into health and physical education curriculum.
Effective: Spring 2010
Prerequisite: Official acceptance into the Physical and Health Education Teacher Education (PHETE) option in Kinesiology

KINES 295A Observation of Health and Physical Education in the Public Schools (1) Introduction to the career of teaching including guided observation of HPE in K-12 public schools.
Effective: Fall 2006

KINES 295B Careers/Observations in Kinesiology (1) Introduction to career information and observational experiences in the Kinesiology field.
Effective: Spring 2000
Prerequisite: third-semester standing

KINES 295C Professional Development - Field Experience (1-2 per semester/maximum of 8) Develops the necessary professional skills needed to maximize the benefits obtained from a professional conference.
Effective: Summer 2010
Prerequisite: completion of three credits in Kinesiology

KINES 296 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 1996

KINES 296A Independent Study Athletic Training (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 296B Independent Study Biomechanics (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 296C Independent Study Exercise Physiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 296D Independent Study History and Philosophy (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 296D Independent Study History and Philosophy of Sport (1-18) Creative projects, including research and
design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 296E Independent Study Motor Control (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 296E Independent Study Motor Control (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 296F Independent Study Psychology of Movement and Sport (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 296F Independent Study Psychology of Movement and Sport (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 296G Independent Study Teaching/Coaching (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 296G Independent Study Teaching and Coaching (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 296K Independent Study Applied Kinesiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 296K Independent Study Applied Kinesiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

KINES 298 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

KINES 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2011

KINES 303 (GHA) Emergency Care - First Aid/Safety/AED (3) Develop skills for First Responder Certification in CPR/AED, First Aid and Safety by American Red Cross or National Safety Council.
Effective: Fall 2003

KINES 304 First Aid: Instructors (1) Competencies leading to certification for teaching American Red Cross Advanced First Aid and Emergency Care and American Heart Association Cardiopulmonary Resuscitation. Laboratory.
Effective: Spring 1998
Prerequisite: KINES 303

KINES 310 Physical Growth and Motor Development (3) Study of biologically programmed growth processes and environmental influences leading to attained adult form and biomechanical function.
Effective: Spring 2004
Prerequisite: KINES 180

KINES 321 Psychology of Movement Behavior (3) Basic concepts and application of psychological knowledge for organized sport, physical activity, and athletic training.
Effective: Spring 2004
Prerequisite: KINES 180

KINES 334 Mechanisms and Evaluation of Lower Body Athletic Injuries (3) Etiology of athletic injuries with scientific and practical rationales for evaluation of injuries to the lower extremity and lumbosacral spine.
Effective: Fall 2006

The Pennsylvania State University
KINES 335 **Mechanisms and Evaluation of Upper Body Athletic Injuries** (3) Etiology of athletic injuries with scientific and practical rationales for evaluation of injuries to upper extremity, neck, head, and trunk. Effective: Fall 2006
Prerequisite: KINES 334 Concurrent: KINES 395F KINES 434

KINES 336 **Medical Aspects of Athletic Training** (3) Pathology, assessment, and treatment (including pharmacology) of general medical conditions commonly seen in physically active populations. Effective: Fall 2006
Prerequisite: KINES 335 Concurrent: KINES 395G KINES 435 KINES 436

KINES 345 **Meaning, Ethics, and Movement** (3) Development of philosophic reasoning skills to better understand the values of physical activity and ethics in a variety of performance settings. Effective: Summer 1996
Prerequisite: KINES 141

KINES 350 **Exercise Physiology** (3) Structure and function of the human body as applied to health, wellness, exercise, and sports. Effective: Summer 2007 Ending: Fall 2011
Prerequisite: KINES 180; KINES 202; BIOL 141; and CHEM 001, CHEM 003, CHEM 110 or CHEM 202; or permission by instructor for non-kinesiology majors

KINES 350 **Exercise Physiology** (3) Structure and function of the human body as applied to health, wellness, exercise, and sports. Effective: Spring 2012 Future: Spring 2012
Prerequisite: KINES 180; KINES 202; BIOL 141; and CHEM 101 or CHEM 110; or permission by instructor for non-kinesiology majors

KINES 356 **Activity and Disease** (3) Examination of hypokinetic disease on human wellness involving identification, assessment, research, and exercise design of human activity for disease prevention. Effective: Spring 2000
Prerequisite: BIOL 141

KINES 358 **Ergogenic Aids** (1) Skills development including research identification and evaluation of work-enhancing methods and devices as related to human performance and wellness. Effective: Spring 2000
Prerequisite: BIOL 141, NUTR 251

KINES 360 **The Neurobiology of Motor Control and Development** (3) The neurobiological foundations of human movement, with an emphasis on applications in rehabilitation and athletics. Effective: Fall 2006
Prerequisite: KINES 180, KINES 202; BIOL 141

KINES 362 **Teaching Individual Activities** (1.5) This course introduces teacher candidates to the spectrum of individual activities being taught in the K-12 school setting. Effective: Spring 2010
Prerequisite: KINES 261, KINES 262, KINES 264, KINES 266 and KINES 268

KINES 364 **Teaching Group Activities** (1.5) This course introduces teacher candidates to the spectrum of group activities being taught in the K-12 school setting. Effective: Spring 2010
Prerequisite: KINES 261, KINES 262, KINES 264, KINES 266 and KINES 268

KINES 366 **The Process of Teaching Physical Education** (3) Analysis of pedagogical skills and methods applied to K-12 physical education. Effective: Spring 2010
Prerequisite: KINES 261, KINES 262, KINES 264, KINES 266 and KINES 268

KINES 384 **Biomechanics** (3) Basic mechanical knowledge required to understand human movement. Effective: Fall 2006
Prerequisite: KINES 180, KINES 202, MATH 022

KINES 395A **Leadership Practicum for Teachers** (1) Supervised experiences in guiding individuals and in leading groups in the motor skill learning process. Effective: Fall 2006
Prerequisite: KINES 362, KINES 364, KINES 366

KINES 395B **Leadership Practicum**: KINES (1) Supervised experience in leading/assisting in tasks associated with fitness testing/prescription in a variety of settings. Effective: Summer 1996
Prerequisite: KINES 295B fifth-semester standing

KINES 395F **Practicum in Athletic Training** (3) Practical experience in the athletic training room and with selected sports activities under direct supervision of the medical staff. Effective: Fall 2006
Prerequisite: KINES 232 Concurrent: KINES 335 KINES 434

KINES 395G **Practicum in Athletic Training** (3) Practical experience in the athletic training room and with selected sports activities under direct supervision of the medical staff. Effective: Fall 2006

The Pennsylvania State University
KINES 395F Practicum in Athletic Training (3) Practical experience in the athletic training room and with selected sports activities under direct supervision of the medical staff. Effective: Fall 2006

KINES 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 1997

KINES 398 Special Topics Course (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Summer 1996

KINES 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Spring 2011

KINES 400 Adapted Physical Education (3) Basic concepts of planning and conducting physical education programs for children with physical, sensory, and/or intellectual impairments. Effective: Fall 2001

KINES 403 Emergency Medical Technology (4) Theoretical and practical aspects of emergency medical techniques as applied in the pre-hospital environment. Effective: Spring 1998

KINES 404 Emergency Medical Technology Instructor (2) Educational concepts and skills necessary to present instruction in emergency care; lesson planning, methods of instruction, and evaluation techniques. Effective: Summer 1997

KINES 411 Introduction to Musculoskeletal Injury and Rehabilitation (3) This course is designed to provide an overview of common musculoskeletal injuries and rehabilitation for pre-allied health and fitness professionals. Effective: Summer 2011

KINES 420 Psychosocial Dimensions of Physical Activity (3) Discussion of theoretical and empirical findings, structuring a frame of reference for exploring man's involvement in physical activity. Effective: Spring 2001

KINES 421 Exercise Psychology (3) Psychological antecedents and consequences of physical activity behaviors. Effective: Spring 2008

KINES 424 (US) (WMNST 424) Women and Sport (3) An interdisciplinary approach to contemporary issues related to women and sport from historical, physiological, psychological, and sociological perspectives. Effective: Spring 2007

KINES 427 (HD FS 427) Developmental Sport & Exercise Psychology (3) Developmental changes in the antecedents and consequences of physical activity across the lifespan. Effective: Spring 2008

KINES 428 Motivation and Emotion in Movement (3) Theories of motivational and emotional processes and their applications in movement settings. Effective: Spring 2008

KINES 434 Rehabilitation of Injuries to the Lower Extremities (3) Theoretical foundation and laboratory experience in manual therapy techniques and therapeutic exercises for the lower extremities.

The Pennsylvania State University
Effective: Fall 2006  
Prerequisite: KINES 334  Concurrent: KINES 335 KINES 395F

KINES 435 Rehabilitation of Injuries to the Trunk and Upper Extremities (3) Theoretical foundation and laboratory experience in manual therapy techniques and therapeutic exercises for the trunk and upper extremities.  
Effective: Fall 2006  
Prerequisite: KINES 434  Concurrent: KINES 336 KINES 435 KINES 395G

KINES 436 Therapeutic Modalities in Athletic Training (4) Lecture and laboratory course exploring physiological principles and clinical evidence to the use of therapeutic modalities in athletic training.  
Effective: Fall 2006  
Prerequisite: KINES 434  Concurrent: KINES 336 KINES 435 ; KINES 395G

KINES 438W Administration and Issues in Athletic Training (3) Theoretical and practical aspects for management of an Athletic Training professional practice and identifying contemporary issues related to the profession.  
Effective: Fall 2006  
Prerequisite: KINES 436  Concurrent: KINES 395I

KINES 439W Ethics in Sport and Sport Management (3) Analysis of moral dilemmas in sport and sport management utilizing the tools of ethics.  
Effective: Spring 2001  
Prerequisite: KINES 345 or 3 credits in humanities

KINES 440 Philosophy and Sport (3) An examination of human nature from the perspective of our participation in sport.  
Effective: Spring 2001  
Prerequisite: KINES 345 or 3 credits in philosophy

KINES 441 (US) (AM ST 441) History of Sport in American Society (3) Background, establishment, and growth of sport in America from colonial times to the present.  
Effective: Fall 2007  
Prerequisite: KINES 141 or 3 credits of United States history

KINES 442 (IL) (CAMS 442) Sport in Ancient Greece and Rome (3) An examination of the continuity of sport in ancient Greek and Roman societies.  
Effective: Spring 2008  
Prerequisite: CAMS 025, CAMS 033, CAMS 140, CAMS 150, CAMS 100, CAMS 101 or KINES 141

KINES 443 (IL) The Modern Olympic Games (3) An analysis of the modern Olympic Games from their inception through the current festival.  
Effective: Spring 2006  
Prerequisite: KINES 141 or 3 credits of history or philosophy

KINES 444 (US) History of Athletics in Higher Education (3) Origin and development of athletics in American higher education from colonial times to the present.  
Effective: Spring 2006  
Prerequisite: KINES 141 or 3 credits of American history

KINES 445 Alcohol and Drug Education (3) Principles of integration and coordination of alcohol and drug education programs for health education and other health related professions.  
Effective: Spring 1998  
Prerequisite: 9 credits of health science and/or psychology

KINES 446 (IL) History of Sport in the Modern World (3) History of sport in modern world, ca. A.D. 1500 to present; concentrates on role of sport in societies outside United States.  
Effective: Summer 2005  
Prerequisite: KINES 141 or 3 credits of non-United States history

KINES 448 Coping with Life After Sport (1) Psychosocial concerns affecting student-athletes as they enter the transition period following sport disengagement, focusing on coping interventions.  
Effective: Summer 2002  
Prerequisite: seventh-semester standing or higher; major or minor in Kinesiology or intercollegiate sport participation

KINES 450 Physiological Limits in Exercise (3) This course examines physiological function during the stress of maximal or prolonged exercise in conjunction with environmental stress.  
Effective: Summer 2000  
Prerequisite: KINES 350

KINES 452 Applied Cardiovascular Physiology (3) In-depth study of cardiovascular regulation during postural, environmental, and exercise stress.  
Effective: Spring 2010  
Prerequisite: KINES 350

KINES 454 Women's Health and Exercise Across the Lifespan (3) In-depth study of the physiological role of exercise in modulating the health of girls and women during different phases of the lifespan.  
Effective: Summer 2010  
Prerequisite: KINES 350

KINES 456 Physical Fitness Appraisal (4) The basic components of physical fitness, how it can be measured, and how it can be developed.  
Effective: Summer 1996  
Prerequisite: or concurrent: KINES 350 3 credits in statistics
KINES 457 Exercise Prescription and Case Studies (3) Principles of exercise prescription; application of fitness appraisal based on current practices using evaluation and discussion of case studies. Effective: Spring 2002
Prerequisite: KINES 350, KINES 456

KINES 459 Laboratory Experience in Physical Fitness Assessment (3) A hands-on experience in a fitness assessment laboratory. Prepares students for certification and employment in the fitness industry. Effective: Spring 2005
Prerequisite: KINES 456

KINES 460 Movement Disorders (3) Major peripheral and central movement disorders and methods of their treatment. Effective: Summer 1999
Prerequisite: KINES 360, KINES 384

KINES 461W Preparation for Research Project (2) Planning and preparation for research project. Effective: Fall 2006
Prerequisite: KINES 180, KINES 260, STAT 200, KINES 321, KINES 345, KINES 350, KINES 360, KINES 384

KINES 462W Research Project (2) Completion of research topic. Effective: Fall 2006
Prerequisite: KINES 461W

KINES 463 Acquisition of Motor Skills (3) Examination of principles of motor learning; the application of strategic factors such as: practice types, schedules, augmented information, and motivation. Effective: Summer 2000
Prerequisite: KINES 360

KINES 464 Children's Physical Education Curriculum and Practicum (3) Curriculum for elementary school physical education emphasizing the skill theme approach. Effective: Fall 2006
Prerequisite: KINES 362, KINES 364, KINES 366

KINES 465 Neurobiology of Sensorimotor Stroke Rehabilitation (3) This course is designed to expose students to the recent topics in motor stroke rehabilitation research through literature. Effective: Spring 2011
Prerequisite: KINES 360, KINES 384

KINES 466 Assessment and Evaluation in Physical Education and Health Education (2) Explores measurement as an important and distinct component in a variety of physical education and health education contexts. Effective: Spring 2006
Prerequisite: KINES 362, KINES 364, KINES 366

KINES 468 Health Instruction in the School--Content and Method (3) Methods, materials, and units of instruction. Effective: Fall 2006
Prerequisite: KINES 362, KINES 364 and KINES 366

KINES 469W Curriculum Development in Health and Physical Education (3) The content and process of K-12 school health and physical education curriculum development for public school students. Effective: Fall 2006
Prerequisite: KINES 362, KINES 364, KINES 366

KINES 481W Scientific Basis of Exercise for Older Adults (3) Study of age-associated physical changes and the effects of exercise on the aging process. Effective: Spring 2001
Prerequisite: KINES 350

KINES 483 Motor Patterns of Children (3) Development of motor patterns. Fundamentals of movement, basic motor skills, and adaptation of the body to external forces. Effective: Summer 1996
Prerequisite: KINES 202

KINES 484 Advanced Biomechanics (3) The use of advanced biomechanics to provide an in-depth understanding of the principles which underpin human movement. Effective: Spring 1999
Prerequisite: KINES 384

KINES 485 Science of Training Athletes (3) Application of scientific data knowledge to analyze sport training. Effective: Fall 1996
Prerequisite: KINES 350, KINES 384

Prerequisite: seventh-semester standing

KINES 488 Mechanics of Locomotion (3) This course examines the forces and motions characteristic of locomotion, with emphasis on walking, the most common human activity. Effective: Summer 2002
Prerequisite: KINES 384 or previous coursework in biomechanics (or mechanics) and musculoskeletal anatomy

KINES 492W Programming for Business and Agencies (3) Fundamentals of program development applied to corporate and private physical fitness businesses.
Effective: Fall 2006  
Prerequisite: KINES 395B

KINES 493 Principles and Ethics of Coaching (3) Integration of the practical and theoretical knowledge necessary for effective coaching through classroom and field experiences.  
Effective: Fall 2006  
Prerequisite: KINES 180 or KINES 366

KINES 494H Senior Honors Thesis (1-6) Independent study directed by a faculty supervisor that culminates in the production of a thesis.  
Effective: Summer 2008  
Prerequisite: Approval of honors thesis advisor

KINES 495A Practicum in Student Teaching (12) Supervised teaching of health and physical education in K-12 public schools with seminars focused on transition from student to professional.  
Effective: Fall 2006  
Prerequisite: A grade of C or higher in all required courses in the Teacher Preparation Option

KINES 495B Field and/or Research Practicum in Kinesiology (6) Participation under supervision in a field or research practicum.  
Effective: Fall 2006  
Prerequisite: KINES 395B seventh-semester standing 9 credits of 400-level KINES courses 2.00 cumulative GPA

KINES 495C Exercise Science Practicum (3 per semester/maximum of 6) Participation under supervision in a health and fitness setting.  
Effective: Fall 2006  
Prerequisite: KINES 141, KINES 180, KINES 200, KINES 202 and fifth semester standing

KINES 495D Expanded Field and/or Research Practicum in Kinesiology (1-6) Additional participation under supervision in a field or research practicum.  
Effective: Spring 2006  
Concurrent: KINES 495B

KINES 495F Field Practicum in Athletic Training (3) Participation under supervision in a field practicum.  
Effective: Summer 1996  
Prerequisite: KINES 395I

KINES 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Summer 1996

KINES 496A Independent Study Athletic Training (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Summer 2011 Ending: Summer 2011

KINES 496A Independent Study Athletic Training (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 496B Independent Study Biomechanics (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Summer 2011 Ending: Summer 2011

KINES 496B Independent Study Biomechanics (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 496C Independent Study Exercise Physiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Summer 2011 Ending: Summer 2011

KINES 496C Independent Study Exercise Physiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 496D Independent Study History and Philosophy (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Summer 2011 Ending: Summer 2011

KINES 496D Independent Study History and Philosophy of Sport (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
KINES 496E Independent Study Motor Control (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Summer 2011 Ending: Summer 2011

KINES 496E Independent Study Motor Control (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 496F Independent Study Psychology of Movement (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Summer 2011 Ending: Summer 2011

KINES 496F Independent Study Psychology of Movement and Sport (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 496G Independent Study Teaching/Coaching (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Summer 2011 Ending: Summer 2011

KINES 496G Independent Study Teaching and Coaching (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 496K Independent Study Applied Kinesiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Summer 2011 Ending: Summer 2011

KINES 496K Independent Study Applied Kinesiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Summer 1996

KINES 497A Cadaver Anatomy: A Musculoskeletal Dissection (3) Provide students with the basic concepts and applications of human cadaver dissection. Effective: Summer 2011 Ending: Summer 2011 Prerequisite: KINES 202 or equivalent

KINES 497A Genetics and Human Performance (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 497B Environmental Physiology (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011 Prerequisite: KINES 350

KINES 497B Exercise as Medicine (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012 Prerequisite: KINES 350

KINES 497C Physical Activity in Diverse Populations (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 497C Special Topics in Kinesiology (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012 Prerequisite: KINES 180 or permission of program

KINES 497D Ergogenic Aids (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011 Prerequisite: KINES 345 and KINES 350, BIOL 141, CHEM 110 and CHEM 111
KINES 497E Musculoskeletal Systunction for Allied Health and Fitness Professionals (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: KINES 202

KINES 497F Physical Activity and Public Health (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011
Prerequisite: KINES 321

KINES 497G Reel Sports: Physical Culture, Cultural Studies (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011
Prerequisite: KINES 321

KINES 497K Marathon (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011

KINES 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

KINES 498A EMS Assistant Instructor (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011

KINES 498B EMS Teaching Practicum (1-2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011

KINES 498C Introduction to Ambulance Operations (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011

KINES 498D EVOC (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011

KINES 498E EMS Field Practicum (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011

KINES 498F ALS Assistant Technology (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011

KINES 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2011

Last Import from UCM: June 16, 2011 3:00 AM
Korean (KOR)

KOR 001 Level One Korean A (4) Listening, speaking, reading, writing Korean: an introduction for beginners; basic structures and vocabulary; cultural elements.
Effective: Spring 2011

KOR 002 Level One Korean B (4) Listening, speaking, reading, writing Korean: structures and vocabulary; cultural elements.
Effective: Spring 2011
Prerequisite: KOR 001

KOR 003 Level Two Korean A (4) Further development of listening, speaking, reading, writing skills in Korean; cultural elements.
Effective: Spring 2011
Prerequisite: KOR 002

KOR 051 Elementary Intensive Korean for Graduate Students I (3) Intensive introduction to Korean: first half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Spring 2010
Prerequisite: graduate standing

KOR 052 Elementary Intensive Korean for Graduate Students II (3) Intensive introduction to Korean: second half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Spring 2010
Prerequisite: KOR 051 or equivalent and graduate standing

KOR 053 Intermediate Intensive Korean for Graduate Students (3) Continued intensive study of Korean at the intermediate level: reading, writing, speaking, listening, cultural contexts.
Effective: Spring 2010
Prerequisite: KOR 052 or equivalent and graduate standing

KOR 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2010

KOR 099 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2010

KOR 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2010

KOR 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2010

KOR 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2010

KOR 295 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2010
Prerequisite: prior approval of proposed assignment by instructor

KOR 296 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2010

KOR 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2010

KOR 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2010

KOR 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2010
Prerequisite: prior approval of proposed assignment by instructor

KOR 397 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2010

KOR 399 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2010

KOR 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2010

KOR 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2010

KOR 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2010

KOR 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2010

KOR 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2010

Last Import from UCM: June 16, 2011 3:00 AM
Labor Studies and Employment Relations (LER)

LER 083S (GS) First-Year Seminar in Labor Studies and Employment Relations (3) Critical approaches to the dimensions and direction in Labor and Employment Relations.
Effective: Spring 2008

LER 100 (GS) Employment Relations (3) Introductory analysis of the employment relationship and of the interrelated interests of managements, workers, unions, and the public.
Effective: Spring 2008

LER 136 (US) (WMNST 136) Race, Gender, and Employment (3) Employment relations and legislative and policy responses to labor force issues of racial and gender inequality.
Effective: Spring 2008

LER 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2008

LER 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2008

LER 201 (GS) Employment Relationship: Law and Policy (3) An examination of basic legal principles underlying the employment relationship and their social, political, and economic bases.
Effective: Spring 2008

LER 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

LER 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2008

LER 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2008

LER 299 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2008

LER 312 Research Methods in Labor Studies and Employment Relations (4) Provides an understanding of social science research as employed in the field of Human Resources and Employment Relations.
Effective: Spring 2008

LER 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008
Prerequisite: prior approval of proposed assignment by instructor

LER 399 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2008

LER 400 (IL) Comparative Employment Relations Systems (3) Analysis of structure and elements of employment relations systems in developed and developing areas.
Effective: Spring 2008
Prerequisite: 3 credits in Labor and Employment Relations

LER 401 The Law of Labor-Management Relations (3) Development of Anglo-American law regulating collective bargaining, with emphasis on American labor-management relations under Wagner, Taft-Hartley, and other acts.
Effective: Spring 2008
Prerequisite: 3 credits in Labor and Employment Relations or Political Science

LER 414W Labor and Employment Relations Theory (3) Content and implications of major and minor theories of Labor and Employment Relations.
Effective: Spring 2008

The Pennsylvania State University
LER 424 Employment Compensation (3) Development and management of employee compensation systems.
Effective: Spring 2008
Prerequisite: LER 201 and sixth-semester standing

LER 425 Employee Benefits (3) The examination of employee benefits programs used by employers to meet the welfare needs of employees and their families.
Effective: Spring 2008
Prerequisite: LER 201 and 6th semester standing

LER 426 Staffing and Training Strategies in Organizations (3) This course focuses on the theory and practice of human resource staffing and training in organizations.
Effective: Spring 2011
Prerequisite: 3 credits in Labor and Employment Relations (LER) or Human Resources and Employment Relations (HRER)

LER 434 Collective Bargaining and Contract Administration (3) Theory, practice, and economic impact of collective bargaining, including administration of the collective bargaining agreement.
Effective: Spring 2008
Prerequisite: LER 100

LER 435 Labor Relations in the Public Sector (3) Analysis of labor relations problems within different areas of public employment.
Effective: Spring 2008
Prerequisite: 3 credits in Labor and Employment Relations

LER 437 Workplace Dispute Resolution (3) Dispute resolution practices and procedures used in the workplace and employment law settings.
Effective: Spring 2008
Prerequisite: LER 100

LER 437W Work Dispute Resolution (3) Dispute resolution practices and procedures used in the workplace and employment law settings.
Effective: Spring 2008
Prerequisite: LER 100

LER 444 Occupational Health: Policy and Practice (3) The role of employees, unions, employers, and government in dealing with work-related health issues.
Effective: Spring 2008
Prerequisite: LER 100 or sixth-semester standing

LER 445Y (US) (PL SC 445Y, AAA S 445Y) Politics of Affirmative Action (3) Examines history, politics, and economics of the use of special programs to advance racial interests in the U.S.
Effective: Spring 2008
Prerequisite: AAA S 100 level course and PL SC 001 or PL SC 007

LER 458Y (US) (HIST 458Y) History of Work in America (3) A study of selected problems in the history of work in the United States, especially since 1877.
Effective: Spring 2008
Prerequisite: HIST 021, HIST 156 or LER 100

LER 460 Human Resources Ethics (3) Ethics of human resources management.
Effective: Spring 2011
Prerequisite: Take one of the following courses: ARMY 402, H P A 460, HRIM 466, MGMT 341, MGMT 441, NAVSC 402, NURS 432, PSYCH 281 3 credits in Labor and Employment Relations (LER) or Human Resources and Employment Relations (HRER)

LER 464 Communication Skills for Leaders in Groups and Organizations (3) Theory-and research-based communication skills for leaders dealing with work-related problems in contemporary groups and organizations.
Effective: Spring 2008

LER 465 Collective Decision Making (3) Application of theories of decision making to work-related issues in groups and organizations requiring collective resolution and action.
Effective: Spring 2008

LER 470 Employee Involvement (3) Historical, theoretical, legal, and industrial relations aspects of employee involvement in the United States and other countries.
Effective: Spring 2008
Prerequisite: LER 100

LER 472 (WMNST 472) Work-Life Practices and Policies (3) Explore the causes and consequences of conflicts between work, family, and other life commitments, and how these may be resolved.
Effective: Spring 2008
Prerequisite: 3 credits of LER

LER 475H (GEOG 475H) Labor in the Global Economy: U.S. and South African Perspectives (3) This course focuses on how the nature of work is changing in the global economy, and the implications for economic opportunity and inequality in both.
Effective: Spring 2008

The Pennsylvania State University
Prerequisite: A minimum of 12 GEOG or LER credits before taking the course (or the permission of the program).

LER 480 **Current Issues in Human Resources** (3) Examines current issues in the field of human resource management, including innovative work schedules, telecommuting, non-traditional office environments, etc.
Effective: Spring 2008
Prerequisite: 3 credits of LER

LER 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

LER 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

LER 495 **Labor Studies Internship** (1-12) Supervised practicum in labor relations setting with union, management, or government agency.
Effective: Spring 2008
Prerequisite: prior approval by department

LER 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2008

LER 497A **Collective Bargaining in Pro Sports** (3) This course examines collective bargaining in the four major pro sports in North America—NFL, NBA, MLB, and NHL.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

LER 497B **Seminar in American Unions** (3) This course will examine the current state of American unions.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

LER 499 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2008

Last Import from UCM: June 16, 2011 3:00 AM
Landscape Architecture (LARCH)

LARCH 060 (GA;US;IL) **History of Design on the Land** (3) A survey of the historical development of outdoor space in relationship to allied arts from early beginnings to this century. Students may take only one course for General Education credit from LARCH 003 GA or 060 GA. Effective: Fall 2010

LARCH 065 (GA;US;IL) **Built Environment and Culture** (3) Investigates the relationship between socio-cultural practices and the development and organization of contemporary built environments. Effective: Summer 2005

LARCH 097 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 2007

LARCH 112 **Introductory Design Studio** (3) Provides students with an interdisciplinary introduction to studio work in landscape design. Effective: Summer 2008 Ending: Summer 2011 Prerequisite: admission into the Department of Landscape Architecture LARCH 121S, LARCH 151, LARCH 060

LARCH 121S **Landscape Architecture Orientation Seminar** (1) Introductory seminar involving readings on significant issues in landscape architecture. LARCH majors only. Effective: Spring 2007 Ending: Summer 2011

LARCH 151 **Introduction to Design Visualization** (3) Provides students with an introduction to visualization techniques for landscape architectural design and planning. Effective: Summer 2008 Prerequisite: admission into the Department of Landscape Architecture Concurrent: LARCH 121S

LARCH 197 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 2007

LARCH 199 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2006

LARCH 212 **Design and Theory II: Introduction to Issues of Place** (4) Studio design addressing issues of nature and culture; application of theories, processes, and presentation methods learned in course and concurrent courses. LARCH majors only. Effective: Spring 2007 Ending: Summer 2011 Prerequisite: LARCH 211, LARCH 221, LARCH 231, LARCH 251 Concurrent: LARCH 222

The Pennsylvania State University
LARCH 222 Design Theory Seminar (1) Inquiry-based reading and discussion of design theory literature relevant to the focus and content of LARCH 212.
Effective: Spring 2007 Ending: Summer 2011
Prerequisite: LARCH 211 Concurrent: LARCH 212

LARCH 222 Design Theory Seminar (1) Inquiry-based reading and discussion of design theory literature relevant to the focus and content of LARCH 212.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: LARCH 211, LARCH 221 Concurrent: LARCH 212

LARCH 231 Introduction to Design Implementation (3) Introduction of basic principles and tools supporting landform data, site systems, grading, visualization representation and site circulation.
Effective: Spring 2009
Prerequisite: LARCH 251

LARCH 232 Landscape Architectural Design Implementation I (3) Principles of landform design and grading, including the use of landform as a design element, visualization and representation of landforms, methods for integrating site and structure, standards for grading and drainage, and the development of detailed grading plans. LARCH majors only.
Effective: Spring 2007 Ending: Fall 2011
Prerequisite: LARCH 212, LARCH 222, MATH 026 or higher

LARCH 241 Ecological Principles for Landscape Design (3) The development of basic ecological knowledge that becomes the basis for sensitive ecological design.
Effective: Fall 2010
Prerequisite: LARCH majors only or permission of the program.

LARCH 241 Design Visualization and Graphics I (3) Advanced visualization principles and techniques; computer-aided design, image processing, color theory and application; visual thinking and problem solving. For Landscape Architecture majors only.
Effective: Fall 2008
Prerequisite: LARCH 151

LARCH 272 Landscape Architecture Field Trip (1) A week-long class trip to visit recent projects, offices, and outstanding historical developments.
Effective: Spring 2007
Prerequisite: LARCH 241

LARCH 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

LARCH 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

LARCH 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2006

LARCH 311 Design and Theory III: Site Planning and Design (4) An introduction to site planning, management, and design.
Effective: Spring 2007 Ending: Summer 2011
Prerequisite: LARCH 241, LARCH 212, LARCH 222 Concurrent: LARCH 321

LARCH 311 Design and Theory III: Regional Planning and Landscape Systems (4) An introduction to site planning, management, and design.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: LARCH 241, LARCH 212, LARCH 222 Concurrent: LARCH 321

LARCH 312 Design and Theory IV: Site and Regional Planning (4) An introduction to large site and regional planning. For landscape architecture majors only.
Effective: Spring 2007 Ending: Summer 2011
Prerequisite: LARCH 311, LARCH 321 Concurrent: LARCH 322

LARCH 312 Design and Theory IV: Site and Community Design (4) An introduction to master planning and community design. For landscape architecture majors only.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: LARCH 311, LARCH 321 Concurrent: LARCH 322

LARCH 321 Design Theory Seminar (1) Inquiry-based reading and discussion of design theory literature relevant to the focus and content of LARCH 311.
Effective: Spring 2007
Prerequisite: LARCH 241, LARCH 212, LARCH 222 Concurrent: LARCH 311

LARCH 322 Design Theory Seminar (1) Inquiry-based reading and discussion of design theory literature relevant to the focus and content of LARCH 312.
Effective: Spring 2007
Prerequisite: LARCH 311, LARCH 321 Concurrent: LARCH 312
LARCH 331 (IL) Landscape Architectural Design Implementation III (3) Introduction to landscape construction materials and their use in design; includes principles and techniques for detailed design of site elements. For Landscape Architecture majors only.
Effective: Spring 2007 Ending: Fall 2011
Prerequisite: LARCH 232

LARCH 331 (IL) Landscape Architectural Design Implementation I (3) Introduction to landscape construction materials and their use in design; includes principles and techniques for detailed design of site elements. For Landscape Architecture majors only.
Prerequisite: LARCH 231

LARCH 332 Landscape Architectural Design Implementation II (3) Introduces the principles and techniques of road alignment, including horizontal curves, vertical curves, and superelevation; principles and techniques of site scale layout and dimensioning. For Landscape Architecture majors only.
Effective: Spring 2007 Ending: Summer 2011
Prerequisite: LARCH 331

LARCH 332 Landscape Architectural Design Implementation II (3) Introduces the principles and techniques of planting design, including instruction in proper construction documentation. For Landscape Architecture majors only.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: LARCH 331, LARCH 341

LARCH 341 Plants, People and Place: Plants in Landscape Architectural Design (3) The ecological, historic, and aesthetic values of native and ornamental herbaceous and woody plants and their use in landscape design.
Effective: Summer 2006
Prerequisite: LARCH 241

LARCH 361W Historic Issues in Landscape Architecture (3) A review of design history (precedent studies), an introduction to historic method, history as an informant to design, reading the historic landscape, and issues of preservation and restoration. Landscape Architecture majors only.
Effective: Spring 2007 Ending: Summer 2011
Prerequisite: LARCH 060 Concurrent: LARCH 445 LARCH 445A

LARCH 361W Historic Issues in Landscape Architecture (3) A review of design history (precedent studies), an introduction to historic method, history as an informant to design, reading the historic landscape, and issues of preservation and restoration. Landscape Architecture majors only.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: LARCH 311 Concurrent: LARCH 445 LARCH 445A

LARCH 361W Historic Issues in Landscape Architecture (3) A review of design history (precedent studies), an introduction to historic method, history as an informant to design, reading the historic landscape, and issues of preservation and restoration. Landscape Architecture majors only.
Prerequisite: LARCH 311

LARCH 382 Professional Practice (3) An investigation of current professional and business practices in the field of landscape architecture. For Landscape Architecture majors only.
Effective: Spring 2007
Prerequisite: LARCH 311

LARCH 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2007

LARCH 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2006

LARCH 400 Introduction to Design and Theory (IUG) (5) Introductory landscape architectural design and applied theory for IUG students.
Effective: Summer 1998
Prerequisite: admission to the IUG program Concurrent: LARCH 400A

LARCH 400A Introduction to Design Theory Seminar (IUG) (1) Introductory landscape architectural design theory seminar for IUG students.
Effective: Spring 2001
Prerequisite: admission to the IUG program Concurrent: LARCH 400

LARCH 414 Design and Theory V: Advanced Landscape Architectural Design (5 per semester/maximum of 15) Review of landscape architectural theories and issues; supports development of comprehensive design study and/or independent honors (Thesis-Based) design projects. LARCH Majors only.
Effective: Spring 2007
Prerequisite: LARCH 312, LARCH 322
LARCH 424 Design Theory Seminar (1-3 per semester/maximum of 3) Inquiry-based reading and discussion of design theory literature relevant to the focus and content of the associated design studio course, LARCH 414.
Effective: Spring 2007 Ending: Fall 2011
Prerequisite: LARCH 312, LARCH 322

LARCH 424 Design Theory Seminar (3 per semester/maximum of 9) Inquiry-based reading and discussion of design theory literature relevant to contemporary landscape architecture issues. Topics vary each semester.
Prerequisite: LARCH 312, LARCH 322

LARCH 431 Landscape Architectural Design Implementation III (3) Introduces the principles and techniques of stormwater management and drainage design, including instruction in proper construction documentation, calculations and estimations. For Landscape Architecture majors only.
Prerequisite: LARCH 312, LARCH 312

LARCH 450 Interactive Digital Design: Information Technology for Designers (3) A student centered paperless interactive digital design studio.
Effective: Spring 2007

LARCH 495 Internship (1-13) Supervised off-campus, non-group instruction including individual field experiences, practicums or internships. Written and oral critique of activity required.
Effective: Fall 1981
Prerequisite: prior approval of proposed assignment by instructor

LARCH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

LARCH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

LARCH 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

LARCH 499A (IL) Design Theory Seminar (1) Inquiry-based reading and discussion of design theory literature relevant to the focus and content of the associated design studio course, LARCH 499B. LARCH majors only.
Effective: Spring 2007
Prerequisite: LARCH 361W  Concurrent: LARCH 499B LARCH 499C LARCH 499D

LARCH 499B (IL) Design and Theory VI: Contemporary/International Landscape Architectural Design Issues (4) Study of and design for sites, programs, and social groups associated with ongoing contemporary landscape architectural concerns. LARCH majors only.
Effective: Spring 2007 Ending: Fall 2011
Prerequisite: LARCH 361W  Concurrent: LARCH 499A LARCH 499C LARCH 499D

LARCH 499B (IL) Design and Theory VI: Contemporary/International Landscape Architectural Design Issues (5) Study of and design for sites, programs, and social groups associated with ongoing contemporary landscape architectural concerns. LARCH majors only.
Prerequisite: LARCH 312, LARCH 361W  Concurrent: LARCH 499A LARCH 499C LARCH 499D

LARCH 499D (IL) Contemporary/International Special Topics (4) Special topics related to, and study in conjunction with, LARCH 499A, 499B, and 499C. Landscape Architecture majors only.
Effective: Spring 2007 Ending: Fall 2011
Prerequisite: LARCH 361W  Concurrent: LARCH 499A LARCH 499B LARCH 499C

LARCH 499D (IL) Contemporary/International Special Topics (3) Special topics related to, and study in conjunction with 499B. Landscape Architecture majors only.
Prerequisite: LARCH 361W  Concurrent: LARCH 499B

LARCH 499E (IL) Seminar: People and Protected Areas (3) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2011 Ending: Summer 2011

LARCH 499F (IL) Studio: Community Design in the Vicinity of Udzungwa Mountains National Park (5) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2011 Ending: Summer 2011

LARCH 499G (IL) Colloquium: The Contribution of Service-Learning to Students and Community (1) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2011 Ending: Summer 2011

The Pennsylvania State University
Language and Literacy Education (LL ED)

LL ED 005 **College Reading Improvement I** (3) Improvement of basic reading skills: vocabulary development; literal and interpretive comprehension; application of these skills more efficiently into college work. Effective: Spring 1992
Prerequisite: limited to students whose academic profile sheets indicate help in reading is needed

LL ED 010 **College Reading Improvement II** (3) Development of higher level comprehension, vocabulary, and study skills incorporated into content area reading. Effective: Spring 1992
Prerequisite: LL ED 005

LL ED 296 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 1992

LL ED 297 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 1992

LL ED 297A **Language and Composition** (1) Develop proficiency in researching, writing, reading and rhetoric through the exploration of current issues and policies in the field of education. Effective: Summer 2011 Ending: Summer 2011

LL ED 298 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 1992

LL ED 400 **Teaching Reading in the Elementary School** (3) Introduction to the reading program; acquaintance with materials and techniques; observations of reading instruction; correlation with human growth and development. Effective: Spring 2007
Prerequisite: C I 295 for EK ED majors; EDPSY 014, PSYCH 212; EDTHP 115 or EDTHP selection. Concurrent: LL ED 401 LL ED 402 for EK ED majors

LL ED 401 **Teaching Language arts in Elementary School** (3) Principles, problems, materials, and techniques involved in teaching speaking, listening, writing, and reading in the elementary school. Effective: Spring 2007
Prerequisite: C I 295 for EK ED majors; EDPSY 014, PSYCH 212; EDTHP 115 or EDTHP selection. Concurrent: LL ED 402 for EK ED majors LL ED 400

LL ED 402 **Teaching Children's Literature** (3) Survey of children's literature with an emphasis on the importance of literature in the development of the elementary school curriculum. Effective: Spring 2007
Prerequisite: C I 295 for EK ED majors; EDPSY 014, PSYCH 212; EDTHP 115 or EDTHP selection. Concurrent: LL ED 401 for EK ED majors. LL ED 400

LL ED 411 **Teaching Language Arts in Secondary Schools I** (3) Exploration of language, literacy, and culture and development of curricular designs for teaching language arts in secondary schools. Effective: Spring 1994
Prerequisite: ENGL 200 or 200-level literature course ENGL 444. Concurrent: LL ED 420

LL ED 412W **Teaching Language Arts in Secondary Schools II** (3) Exploration of language, literacy, and culture and development of curricular designs for teaching language arts in secondary schools. Effective: Summer 2010
Prerequisite: LL ED 411. Concurrent: C I 412W

LL ED 420 **Adolescent Literature and Literacy** (3) Exploration of adolescent literacy and curricular designs for using the diversity of cultural voices in adolescent literature in secondary schools. Effective: Spring 1992
Concurrent: LL ED 411

LL ED 445 **Teaching English in Bilingual/Dialectal Education** (3) Theories, techniques, materials for teaching English speaking, reading, and writing to bilingual and nonnative speakers in elementary and secondary schools. Effective: Summer 2011

LL ED 450 **Content Area Reading** (3) Study of reading skills and materials for specific content areas; diagnostic and instructional procedures for classroom teachers. Effective: Spring 2007
Prerequisite: EDPSY 014 or PSYCH 212 or teaching experience

LL ED 482 **The Art of the Picturebook** (3) An in-depth study of picturebooks as art objects providing aesthetic experiences and contributing to our aesthetic development in literacy education.

The Pennsylvania State University
Effective: Summer 2009
Prerequisite: ENGL 015 and 5th semester standing or higher

LL ED 465 Fantasy Literature for Children (3) A study of fantasy literature for children looking at a variety of fantasy stories and examining them from different perspectives.
Effective: Summer 2010
Prerequisite: ENGL 015 and 5th semester standing or higher

LL ED 480 Media Literacy in the Classroom (3) Exploration of media languages and literacy in classrooms, learning in an electronic age; issues, ideas, and teaching strategies.
Effective: Spring 2005
  Concurrent: LL ED 411 LL ED 420

LL ED 495 School Practicum in Reading (1-18) Supervised practicum providing field experiences at any grade level, with opportunities to assume various teaching roles.
Effective: Spring 1992
Prerequisite: LL ED 400

LL ED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1992

LL ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1992

LL ED 497A Art and Literacy Block (15) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

LL ED 497A Elementary Education Literacy Block (15) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2012

LL ED 497A Elementary Education Literacy Block (15) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

LL ED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

LL ED 498A AP English Literature (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

LL ED 498B AP Spanish (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

LL ED 498C Summer Invitational Writing Institute (3-6) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

Last Import from UCM: June 16, 2011 3:00 AM
Languages (LANG)

LANG 051 Elementary Intensive Less Commonly Taught Language for Graduate Students I (3) Intensive introduction to a less commonly taught language: first half of elementary sequence in reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: graduate standing

LANG 052 Elementary Intensive Less Commonly Taught Language for Graduate Students II (3) Intensive introduction to a less commonly taught language: second half of elementary sequence in reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: LANG 051 and graduate standing

LANG 053 Intermediate Intensive Less Commonly Taught Language for Graduate Students (3) Continued intensive study of a less commonly taught language at the intermediate level: reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: LANG 052 or equivalent and graduate standing

LANG 099 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

LANG 196 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2007

LANG 196A Elementary Intensive Turkish I (4) Intensive introduction to Turkish: first half of elementary sequence in reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2011 Ending: Summer 2011

LANG 196B Elementary Intensive Turkish II (4) Intensive introduction to Turkish: second half of elementary sequence in reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2011 Ending: Summer 2011
Prerequisite: LANG 196A or equivalent

LANG 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2007

LANG 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

LANG 296 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2007

LANG 296A Intermediate Intensive Turkish (4) Continued intensive study of Turkish at the intermediate level: reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2011 Ending: Summer 2011
Prerequisite: LANG 196B or equivalent

LANG 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2007

LANG 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

LANG 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

LANG 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2007

LANG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject...
LANG 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

Last Import from UCM: June 16, 2011 3:00 AM
Latin (LATIN)

Knowledge of Greek or Latin not required. See also CLASSICS AND ANCIENT MEDITERRANEAN STUDIES and GREEK.

LATIN 001 Elementary Latin (4) Pronunciation; inflections; simple rules of syntax.
Effective: Winter 1978

LATIN 002 Elementary Latin (4) Advanced syntax and sentence structure.
Effective: Winter 1978
Prerequisite: LATIN 001

LATIN 003 Intermediate Latin (4) Selected readings from representative authors.
Effective: Winter 1978
Prerequisite: LATIN 002

LATIN 051 Elementary Intensive Latin for Graduate Students I (3) Intensive introduction to Latin: first half of graduate intensive sequence in elementary reading, writing, syntax, and cultural contexts.
Effective: Summer 2008
Prerequisite: graduate standing

LATIN 052 Elementary Intensive Latin for Graduate Students II (3) Intensive introduction to Latin: second half of graduate intensive sequence in elementary reading, writing, syntax, and cultural contexts.
Effective: Summer 2008
Prerequisite: LATIN 051 and graduate standing

LATIN 053 Intermediate Intensive Latin for Graduate Students (3) Continued intensive study of Latin at the intermediate level: reading, writing, syntax, and cultural contexts.
Effective: Summer 2008
Prerequisite: LATIN 052 or equivalent and graduate standing

LATIN 099 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

LATIN 101 Introductory Latin (4) Introduction to Latin forms, syntax, and vocabulary.
Effective: Summer 2007

LATIN 102 Advanced Latin (4) Advanced study of Latin grammar, syntax, and vocabulary.
Effective: Summer 2007
Prerequisite: LATIN 101 or evidence of advanced placement through a Latin A.P. exam (minimum grade of 3) or a placement exam set by the instructor

LATIN 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1995

LATIN 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

LATIN 203 Latin Reading and Composition (4) The course reviews Latin grammar, syntax, and vocabulary and introduces students to classical Latin poetry and prose.
Effective: Summer 2008
Prerequisite: LATIN 102

LATIN 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

LATIN 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2001

LATIN 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1983

LATIN 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

LATIN 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

The Pennsylvania State University
LATIN 399 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor

LATIN 402 **Republican Literature** (3-12) Selected works by Plautus, Lucretius, Catullus, Cicero (content varies). Effective: Summer 1995
Prerequisite: LATIN 003

LATIN 403 **Augustan Age Literature** (3-12) Selected works by Virgil, Horace, Propertius, Tibullus, Ovid, Livy (content varies). Effective: Summer 1995
Prerequisite: LATIN 003

LATIN 404 **Silver Age Literature** (3-12) Selected works by Petronius, Seneca, Tacitus, Juvenal, Martial, Pliny the Younger (content varies). Effective: Summer 1995
Prerequisite: LATIN 003

Prerequisite: LATIN 003

LATIN 450W **History of Latin** (3) History of the Latin language and its speakers, from their origins to the 2nd century C.E. Effective: Summer 1994
Prerequisite: LING 102; LATIN 401, LATIN 402 or LATIN 403

LATIN 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 1994

LATIN 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007

LATIN 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

LATIN 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

LATIN 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM
Latin American Studies (LATAM)

LATAM 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor

Last Import from UCM: June 16, 2011 3:00 AM
Latina and Latino Studies (LTNST)

LTNST 100 (GH;US) **Introduction to Latina/o Studies** (3) This course provides an interdisciplinary introduction to the study of Latinas/os in the U.S.
Effective: Summer 2006

LTNST 127 (US) (HIST 127) **Introduction to U.S. Latina/o History** (3) This course introduces students to the history of U.S. Latina/os, including Puerto Ricans, Dominicans, Chicanos, Cubans, and Central Americans.
Effective: Spring 2008

LTNST 197 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2006

LTNST 226 (GH;US;IL) (ENGL 226) **Latina and Latino Border Theories** (3) English 226 will constitute a wide-ranging examination of contemporary texts (1960-present) central to the construction of contemporary Latino/a culture.
Effective: Spring 2007

LTNST 296 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2006

LTNST 297 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2006

LTNST 300 (US) (WMNST 300) **Latina Feminisms** (3) This course examines the historical development, theoretical premises, and political, social, and artistic contributions of Latina feminisms in the United States.
Effective: Summer 2006
Prerequisite: LTNST 100

LTNST 315 (GH;US) (SPAN 315) **Spanish and Spanish-speakers in the U.S.** (3) In this course, we investigate various aspects of the language(s) and language behaviors of U.S. Latinos.
Effective: Summer 2006

LTNST 397 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2006

LTNST 403 (US) (CMLIT 403) **Latina/o Literature and Culture** (3) Literary and other forms of cultural expression (film, music, art, and theater) are compared across different Latina/o communities.
Effective: Spring 2011
Prerequisite: 3 credits in the humanities or in any LTNST course or 4th-semester proficiency in Spanish

LTNST 426 (US) (ENGL 426) **Chicana and Chicano Cultural Production: Literature, Film, Music** (3) An in-depth study of Chicana/Chicano literature, film, and music from the inception of the Chicano Movement (1965-1975) to the present.
Effective: Spring 2007
Prerequisite: 3 credits in English

LTNST 467 (US;IL) (HIST 467) **Latin America and the United States** (3) Historical development of policies of the United States with regard to Latin- American affairs from colonial times to the present.
Effective: Fall 2008

LTNST 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2006

LTNST 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2006

LTNST 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2006
Liberal Arts (L A)

L A 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1994

L A 098 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1994

L A 101H (GWS) Honors Rhetoric and Civic Life (4) Within a liberal arts framework and with attention to public discourse--speaking, writing, online communication, and visual presentation--this course instructs students in the arts, practices, and principles of rhetoric.
Effective: Fall 2009

L A 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1994

L A 198 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1994

L A 199 (IL) Foreign Study--Liberal Arts (1-9) Study in selected foreign countries of the cultural, institutional, and/or social development of the host country.
Effective: Summer 2005

L A 200 Business and the Liberal Arts (1) Introduction to business careers and concepts for students enrolling in the Business and the Liberal Arts minor.
Effective: Summer 2007

L A 294 Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis. (No course under L A 294:494 may be offered without approval of the associate dean of liberal arts. All courses must have a specific title and letter suffix.)
Effective: Spring 1994

L A 295 Undergraduate Field Experience or Practicum (1-18) Approved experience, related to student career objectives, in agencies external to the University.
Effective: Fall 1983

L A 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

L A 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

L A 298 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1994

L A 299 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

L A 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor

L A 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2003

The Pennsylvania State University
L A 398 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1994

L A 399 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

L A 401 Professional Development for the Liberal Arts Student (1) Provides Liberal Arts students with the techniques and information necessary to specify and implement postgraduation educational and career plans.
Effective: Fall 1983

L A 494 Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis. (No course under L A 294/494 may be offered without approval of the associate dean of liberal arts. All courses must have a specific title and letter suffix.)
Effective: Spring 1994

L A 494H Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis. (No course under L A 294/494 may be offered without approval of the associate dean of liberal arts. All courses must have a specific title and letter suffix.)
Effective: Fall 2007

L A 495 Undergraduate Field Experience or Practicum (1-12) Approved experience, related to student career objectives, in agencies external to University.
Effective: Fall 1981

L A 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

L A 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

L A 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1994

L A 498H Honors Leadership Mentor (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

L A 499 (IL) Foreign Study--Liberal Arts (1-9) Study in selected foreign countries of the cultural, institutional, and/or social development of the host country.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM
Library Studies (L ST)

L ST 083S The Twenty-First Century Researcher (1) Students learn to use technology and Libraries resources to access and cite relevant information into academic research projects.
Effective: Fall 2009

L ST 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

L ST 098 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2001

L ST 100 Information Search Strategy (1) Concepts and methodology for determining informational needs and planning efficient strategies to locate information in a library.
Effective: Spring 1985
Prerequisite: or concurrent: ENGL 015 or ENGL 030

L ST 100H Information Search Strategy (1) Concepts and methodology for determining informational needs and planning efficient strategies to locate information in a library.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: or concurrent: ENGL 015 or ENGL 030

L ST 110 Information Organization and Retrieval (3) Information structure and resource related to search and problem-solving procedures to identify, organize, and locate print and nonprint materials.
Effective: Fall 1983
Prerequisite: ENGL 015 or ENGL 030

L ST 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

L ST 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

L ST 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

L ST 301H Information Research Methods and Systems (1) Survey of information theories, structures and resources as related to library research methods for social, behavioral sciences and the humanities.
Effective: Fall 1983

L ST 370 Research Methods for Law and Government Information Resources (3) Evaluating, retrieving and integrating Federal and Legal Information Resources into scholarly research.
Effective: Spring 2005
Prerequisite: 3 credits in Administration of Justice Political Science Communication History or Sociology

L ST 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

L ST 490 (HIST 490) Archival Management (1-3) Introduction to the principles and procedures in the management of archives and historical manuscripts.
Effective: Fall 1978

L ST 495 Internship (1-9) Directed internship in library studies, archival administration, rare books curation and/or preservation.
Effective: Summer 1995
Prerequisite: L ST 490 or L ST 496

L ST 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Students may not register for these courses without prior written approval of a faculty member in the department in which the courses are listed.
Effective: Fall 1983
L ST 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM
Linguistics (LING)

LING 001 (GS;US;IL) The Study of Language (3) A non-technical introduction to the study of human language, and its role in human interaction. Students who have successfully completed LING 100 may not enroll in LING 001.
Effective: Summer 2005

LING 083S (GS;US;IL) 1st Year Seminar in Linguistics (3) Non-technical exploration of aspects of human language.
Effective: Summer 2005

LING 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1992

LING 098 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1992

LING 100 (GS) Foundations of Linguistics (3) Systematic study of linguistic structures in a variety of the world's languages; an overview of language, and its organization.
Effective: Spring 2011

LING 102 (GH) Introduction to Historical Linguistics (3) How languages change and evolve over time; language families; effects of borrowing and language contact.
Effective: Spring 2002
Prerequisite: LING 010 or LING 100

LING 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1992

LING 198 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1992

LING 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

LING 294 Research Project A1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

LING 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1983

LING 298 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1992

LING 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

LING 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Prerequisite: prior approval of proposed assignment by instructor

LING 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1992

LING 398 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1992

The Pennsylvania State University
LING 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

LING 402 Syntax I (3) Principles of grammatical analysis in the generative framework; an overview of syntactic structures across languages.
Effective: Fall 2001

LING 404 Phonology I (3) The analysis of the sound systems of human languages; focus on common phonological processes across languages and on phonetics-phonology interface.
Effective: Fall 2001

LING 429 (PSYCH 426) Language and Thought (3) Relations between language and cognition; cognitive implications of normal and impaired language development; cognition and bilingualism.
Effective: Spring 2007
Prerequisite: PSYCH 100, LING 001 or LING 100

LING 446 (PSYCH 427) L1 Acquisition (3) How children learn their first language; psycholinguistic aspects of lexical, syntactic, semantic, and phonological development.
Effective: Spring 2010
Prerequisite: LING 100 or PSYCH 002 or permission of program

LING 447 Bilingualism (3) Explores the social and psychological aspects of bilingualism; topics include languages in contact, transference, maintenance, and loss.
Effective: Fall 2001

LING 448 Sociolinguistics (3) Issues in the study of language in its sociocultural context; analysis of social dialects and speech styles.
Effective: Fall 2001

LING 449 Semantics I (3) The study of meaning in human language; methods of analysis; study of sense, reference, compositionality, quantification, presupposition, and sentence-level meaning.
Effective: Fall 2001

LING 493 Field Methods (3) Primary linguistic investigation of a language different from English; field work with a native speaker; data gathering; linguistic analysis.
Effective: Fall 2001

LING 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

LING 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

LING 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

LING 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1983

LING 497B Language Islands and Contact Linguistics (3) The course explores the phenomenon of language contact, with a particular focus on language "islands," i.e., communities who speak a moribund or endangered language under constant pressure from another dominant language.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

LING 497C Psychology of Language (3) Overview of psychological research and theory on language processes, including speech perception, word recognition, meaning representation, comprehension, and language acquisition.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

LING 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1992
LING 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM
Management (MGMT)

MGMT 001S Business Leadership (3) The aim of this course is to introduce fundamental concepts of business management and leadership.  
Effective: Spring 2000

MGMT 100 Survey of Management (3) Introduction to organizational factors relevant to management processes, including leadership, motivation, job design, technology, organizational design and environments, systems, change. May not be used to satisfy Penn State Business baccalaureate degree requirements. Not available to students who have taken B A 304 or MGMT 301.  
Effective: Fall 1989

MGMT 100W Survey of Management (3) Introduction to organizational factors relevant to management processes, including leadership, motivation, job design, technology, organizational design and environments, systems, change. May not be used to satisfy Penn State Business baccalaureate degree requirements. Not available to students who have taken B A 304 or MGMT 301.  
Effective: Summer 1993

MGMT 150 Supervisory Management (3) Preparation for supervisory positions in formal organizations. Emphasis placed on the motivational aspects of the supervisor's job.  
Effective: Summer 1990  
Prerequisite: MGMT 100

MGMT 197 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Spring 2008

MGMT 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.  
Effective: Summer 2007

MGMT 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small group basis.  
Effective: Spring 2008

MGMT 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Fall 1989

MGMT 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Fall 1989

MGMT 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.  
Effective: Summer 2007

MGMT 301 Basic Management Concepts (3) Study of fundamental principles and processes available to the understanding of management. Not available to students who have taken B A 304.  
Effective: Spring 2011  
Prerequisite: ENGL 015 or ENGL 030; ECON 102 or ECON 104; MATH 021 or higher or satisfactory score on the mathematics FTCAIP examination

MGMT 301H Basic Management Concepts (3) Study of fundamental principles and processes available to the understanding of management. Not available to students who have taken B A 304.  
Prerequisite: ENGL 015 or ENGL 030; ECON 102 or ECON 104; MATH 021 or higher or satisfactory score on the mathematics FTCAIP examination

MGMT 301W Basic Management Concepts (3) Examination of fundamental principles and processes applicable to the study of management. Not available to students who have taken B A 304.  
Effective: Spring 2001  
Prerequisite: ENGL 015 or ENGL 030; ECON 102 or ECON 104; MATH 021 or higher or satisfactory score on the mathematics FTCAIP examination

MGMT 321 Leadership and Motivation (3) Applies organizational behavior theories, concepts, and skills to leading and motivating individuals and groups.  
Effective: Spring 2001  
Prerequisite: B A 304; MGMT 301 or 3 credits of psychology sociology or cultural anthropology
MGMT 326 Organizational Behavior and Design (3) Concepts, theories, and methods of managing people and designing organizations.
Effective: Spring 2008
Prerequisite: B A 304 or MGMT 301

MGMT 331 Management and Organization (3) Designing organizations to effectively manage new technologies, structures, and people in changing global contexts.
Effective: Spring 2001
Prerequisite: B A 304, MGMT 100 or MGMT 301; or 3 credits of psychology sociology or cultural anthropology

MGMT 341 Human Resource Management (3) Introduction to the strategic planning and implementation of human resource management, including staffing, development, appraisal, and rewards.
Effective: Spring 2001
Prerequisite: B A 304 or MGMT 301

MGMT 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2000
Prerequisite: prior approval of proposed assignment by instructor

MGMT 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2003

MGMT 398 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2003

MGMT 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

MGMT 400 Organization Development (3) A study of organizational change and methodologies related with change and improvement. Examination of planned change on processes, strategies, people and culture in organizations.
Effective: Spring 2008
Prerequisite: MGMT 301

MGMT 401 Contemporary Issues in Management (3) Advanced treatment of topics of current managerial significance. Issues examined will differ by instructor, section, and semester. Consult departmental office.
Effective: Spring 2008
Prerequisite: MGMT 321, MGMT 331; or MGMT 326

MGMT 402 Experiences in Organizational Relations (3) An experiential approach to study of behavior in organizations, applying concepts and theories of management to interpersonal situations.
Effective: Spring 2008
Prerequisite: MGMT 301

MGMT 409 Project Management for Engineers (3) The course provides a real-time experience to students in engineering and engineering technology in project management with a focus on leadership behavior and decision making.
Effective: Spring 2008
Prerequisite: 7th semester standing

MGMT 410 Project Management (3) A problem-based, interdisciplinary course in project management skills and techniques needed to manage projects in a modern business environment.
Effective: Spring 2008
Prerequisite: MGMT 301, SCM 310

MGMT 420 Negotiation and Conflict Management (3) An exploration of the sources of interpersonal conflict and strategies of resolution in the managerial context.
Effective: Fall 2010
Prerequisite: MGMT 301 or B A 304

MGMT 424 Interpersonal Relationships in Organizations (3) Developing individual skills in interpersonal and group settings and experience-based and conceptual training in relating effectively to other people.
Effective: Spring 2008
Prerequisite: MGMT 321 or MGMT 326

MGMT 425 (IST 425, ENGR 425) New Venture Creation (3) Via problem-based learning, teams define new business ventures to meet current market needs, develop business plans, and present to investors.
Effective: Spring 2011
Prerequisite: ECON 102 or ECON 104 or ECON 014; CAS 100

MGMT 426 (ENGR 426, IST 426) Invention Commercialization (3) Working with Penn State inventions selected by the Intellectual Property Office, student teams define an optimum commercialization path each technology.
Effective: Spring 2011
Prerequisite: ECON 102 or ECON 104 or ECON 014; CAS 100

MGMT 427 Managing an Entrepreneurial Start-Up Company (3) Exploration of the tensions and experiences of starting and growing a new company.

The Pennsylvania State University
Effective: Spring 2011
Prerequisite: ECON 102 or ECON 104 or ECON 014; CAS 100; 5th semester standing

MGMT 431 Entrepreneurship and Small Business Management (3) Entrepreneurship, new ventures, and management of small firms.
Effective: Spring 2008
Prerequisite: ACCTG 211, MGMT 301, MKTG 301

MGMT 432 Small Business Field Study (3) Supervised field study with a small firm.
Effective: Spring 2008
Prerequisite: MGMT 431

MGMT 433 Leadership and Team Building (3) Team-based learning approach to developing conceptual knowledge, skills sets, and personal competencies needed for leading and managing organizations.
Effective: Spring 2008
Prerequisite: MGMT 301

MGMT 440 Advanced Human Resource Management (3) In depth study of human resource management and personnel administration functions and processes.
Effective: Spring 2008
Prerequisite: MGMT 341

MGMT 441 Organizational Staffing and Development (3) This course focuses on the skills and methods managers need to manage staffing and development activities in organizations.
Effective: Spring 2011
Prerequisite: MGMT 341

MGMT 443 Performance Management (3) This course focuses on skills and methods managers need to enhance the contribution of employees to organizational performance and effectiveness.
Effective: Spring 2011
Prerequisite: MGMT 341

MGMT 445 (US) Managing Differences in Organizations (3) This course focuses on developing knowledge and skills for dealing with demographic, functional, occupational and identity-based differences within and among organizations.
Effective: Spring 2008
Prerequisite: B A 304 or MGMT 301; MGMT 341

MGMT 450 Labor Management Relations (3) Study of the key concepts and processes involved in current American labor/management relations.
Effective: Spring 2008
Prerequisite: MGMT 301

MGMT 451W Business, Ethics, and Society (3) Advanced examination of social, ethical, legal, economic, equity, environmental, public policy, and political influences on managerial decisions and strategies.
Effective: Spring 2004
Prerequisite: B A 241 and B A 242 or B A 243

MGMT 453 Creativity and Innovation (3) Analysis of the process of innovation in organizations and of how creativity and other variables influence the process.
Effective: Summer 2007
Prerequisite: MGMT 301

MGMT 461 (IL) International Management (3) Examines issues of nations and cultures including motivation, communication, negotiation, leadership, ethics and social responsibility, and women in management.
Effective: Spring 2008
Prerequisite: B A 304 or MGMT 301

MGMT 466 Organizational Learning and Knowledge Management (3) Examination of the social processes through which organizations continuously develop, acquire, interpret, and apply information and knowledge for performance enhancement and continuous improvement.
Effective: Spring 2008
Prerequisite: MGMT 301

MGMT 471 Strategic Management (3) Issues that influence the competitive performance of the firm are identified and examined.
Effective: Spring 2004
Prerequisite: MGMT 326, B A 411 or taken concurrently

MGMT 471W Strategic Management and Business Policy (3) Study of strategic management and business policy formulation and implementation processes.
Effective: Spring 2008
Prerequisite: MGMT 301, MKTG 301, FIN 301, SCM 301

MGMT 475W Strategic Product Development (3) Study of an organization, industry, and evaluation of the introduction to a new product. Preparation of proposal for industry product.
Effective: Summer 2008
Prerequisite: 7th semester standing; MGMT 300; FIN 301; SCM 310; MKTG 301; M E 300 or MET 330; MCH T 213 or MCH 213; EET 101 or E E 211

MGMT 476 Product Realization Capstone (3) Study of an organization, industry, and evaluation of the introduction of a new product. Preparation of proposal for industry product.
Effective: Summer 2008
Prerequisite: MGMT 475W ; 8th semester standing

MGMT 483 **Compliance and Fairness in Organizations** (3) Compliance with employment laws with respect to managing human resources and fair treatment in employer-employee relationships.
Effective: Summer 2007
Prerequisite: MGMT 341

MGMT 489 **Seminar in Management** (3) A capstone course in management for students of high academic achievement. Emphasis on in-depth research of current interest.
Effective: Spring 2008
Prerequisite: MGMT 301 and at least senior status

MGMT 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2003

MGMT 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

MGMT 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008
Prerequisite: prior approval of proposed assignment by instructor

MGMT 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1989

MGMT 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1989

MGMT 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2003

MGMT 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

Last Import from UCM: June 16, 2011 3:00 AM
Mangt Info Systems (MIS)

MIS 103 Microcomputer Applications in Business (3) Introduction to current business uses of the microcomputer, including spreadsheets, database management, word processing, and decision-making models.
Effective: Spring 2007

MIS 120 Microcomputer Operating Systems and User Interfaces (3) Management of microcomputer hardware and software, including systems software, user interfaces, file management, security features, and applications software installation.
Effective: Spring 2007
Prerequisite: MIS 103

MIS 130 Advanced Database Management Systems for Microcomputers (3) Advanced relational database design, data integrity, data security, operational procedures, business applications using microcomputer database software.
Effective: Spring 2007
Prerequisite: MIS 103

MIS 190 Microcomputer Accounting and Transaction Processing (3) Use of accounting software to manage small to medium sized businesses, transaction processing, general ledger, payables, receivables, inventory management, payroll.
Effective: Spring 2007
Prerequisite: CMPSC 203 or MIS 103. Prerequisite or concurrent: 2 credits in Financial Accounting

MIS 197 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2007

MIS 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

MIS 204 Introduction to Business Information Systems (3) Introduction to the use of information systems in business organizations.
Effective: Summer 2007

MIS 204H Honors Introduction to Management Information Systems (3) Introduction to the use of information systems in business organizations.
Effective: Spring 2009

MIS 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Spring 2007

MIS 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2007

MIS 297 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2007

MIS 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

MIS 301 Introduction to Business Applications Development (3) Event-driven programming in a visual environment in which students will learn how to build business applications using current, state of the art technology.
Effective: Spring 2007
Prerequisite: MIS 204 and SCM 200 Concurrent: SCM 302

MIS 307 Algorithmic Concepts (3) Using state-of-art programming language; concepts, program structure and design, documentation, file handling, and elementary data structures are introduced.
Effective: Spring 2008
Prerequisite: CMPSC 102 or CMPSC 101 or CMPSC 121

MIS 336 Database Management Systems (3) Theory and utilization of database management systems in organizations, including data modeling and applications development.
Effective: Summer 2011
Prerequisite: MIS 204 or MIS 110 or CMPSC 121 or CMPSC 102

MIS 387 Website Design and Administration (3) Applied, hands-on, interdisciplinary website design/administration.
course. Acquired concepts, techniques and tools are exercised in individual and team projects.

MIS 390 Information Systems Management and Applications (3) Specification, design and implementation of information systems directed at aiding decision making in organizations.

Effective: Spring 2008

Prerequisite: MIS 204

MIS 391 E-Commerce Strategies (3) Introduction to the fundamental Principles of Electronic Commerce (E-Commerce) technologies, applications, and management of E-Commerce in modern organizations.

Effective: Spring 2007

Prerequisite: MIS 390

MIS 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2007

MIS 398 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2007

MIS 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2007

Effective: Summer 2010

Prerequisite: MIS 204 or 1st Level Programming Course or with the permission of the program

MIS 405 Supply Chain Information Systems with Oracle (3) Strategic design and implementation of Oracle supply chain management information systems in an ERP environment.

Effective: Summer 2010

Prerequisite: SCM 301, MIS 204

MIS 406 Customer Information Systems with Oracle (3) A technology-based exploration of the various Oracle Order Management and Customer Relationship Management tools.

Effective: Summer 2010

Prerequisite: MIS 405

MIS 407 Enterprise Integration with Oracle (3) This is a technology course focusing on software development in an Oracle eBusiness ERP Environment.

Effective: Summer 2010

Prerequisite: MIS 336 and MIS 405

MIS 413 Interface design for Information Systems Applications (3) The study of interface design emphasizing application and user requirements, development and testing techniques, and information processing issues.

Effective: Spring 2007

Prerequisite: MIS 307, MIS 465

MIS 430 Systems Analysis (3) Information analysis and the logical specification of the system.

Effective: Spring 2007

Prerequisite: Prerequisite or concurrent: MIS 336

MIS 431 Business Data Management (3) The architecture of business information processing systems and technical aspects of database management.

Effective: Spring 2007

Prerequisite: MIS 204 Concurrent: SCM 301

MIS 432 Business Information System Analysis (3) The analysis of business information systems and the requirements specifications of redesigned systems.

Effective: Spring 2007

Prerequisite: MIS 431 Concurrent: MIS 432

MIS 434 Internet Technologies (3) Technical foundations of the eBusiness environment and web applications development to support internet-based commerce.

Effective: Spring 2007

Prerequisite: MIS 431 Concurrent: MIS 432

MIS 435 Systems Design and Implementation (3) Logical and physical design of information systems and implementation.

Effective: Spring 2010

Prerequisite: MIS 430 and a second-level programming course

MIS 436 Business Data Communications (3) Introduction to the principles and techniques of business data communication encompassing transmission concepts, network analysis, design, implementation, and administration.

Effective: Spring 2007

Prerequisite: MIS 431
MIS 442 Business Information Systems Design (3) Object-oriented concepts such as: object, instance, class, inheritance, polymorphism; application of these methodologies and design patterns to business system analysis. Effective: Summer 2007
Prerequisite: MIS 432

MIS 445 Management Reporting Systems (4) Develops insights and skills required to analyze current management reporting systems, propose improvements, and develop reports using a report generator. Effective: Fall 2009 Ending: Fall 2011
Prerequisite: MIS 336

MIS 445 Business Intelligence (4) Develops insights and skills related to Business Intelligence, Data Warehousing, Data Mining, Analytics, OLAP, and report generators. Effective: Spring 2012 Future: Spring 2012
Prerequisite: MIS 336

MIS 446 Information Technology and Business Strategy (3) Strategic use and management of information technology in digital global economy. Effective: Spring 2008
Prerequisite: MIS 390

Prerequisite: MIS 390

MIS 450 System Design Project (3) A project in the design, specification, and programming of a system in an application area. Effective: Spring 2009
Prerequisite: MIS 307, MIS 465; MIS 448; 3 additional credits of MIS at the 300- or 400-level; seventh or eighth semester standing

Prerequisite: MIS 307 and MIS 465

MIS 465 DataBase Management (3) Provides a comparison of techniques, methodology of systems, limitatins, and applications of various data base management systems. Effective: Spring 2008
Prerequisite: CMPSC 102 or CMPSC 101 or CMPSC 121 and MIS 390

MIS 466 Business Programming for the WEB (3) Advanced programming for WEB-based applications. Effective: Spring 2007
Prerequisite: MIS 307

MIS 470 Advanced Applications Development (4) Focus on concepts and practice of advanced tools and techniques such as application generators, object-oriented methods, and client/server development. Effective: Fall 2009
Prerequisite: MIS 435 or CMPSC 122 or CMPSC 302

Prerequisite: MIS 390 or MIS 431

Prerequisite: MIS 390 or MIS 431

MIS 489 Seminar in Information Systems (3) Covers new trends and concepts in information/processing technology and their applications and impact on computer information systems. Effective: Spring 2007
Prerequisite: MIS 307 and MIS 465

MIS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 2007

MIS 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Spring 2008

MIS 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Spring 2007
Prerequisite: prior approval of proposed assignment by instructor

The Pennsylvania State University
individual basis and which fall outside the scope of formal courses.
Effective: Spring 2007

MIS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2007

MIS 497B **System Design Lab** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MIS 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2007

MIS 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

Last Import from UCM: June 16, 2011 3:00 AM
Marketing (MKTG)

MKTG 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

MKTG 220 Introduction to Selling Techniques (3) Principles underlying the sales process and practical application of these principles to selling situations. Studies role of selling in total marketing process.
Effective: Spring 2008
Prerequisite: third-semester standing

MKTG 221 Contemporary American Marketing (3) Social and economic aspects, movement of goods and services from producers to consumers; analysis of marketing functions, systems, and institutions. May not be used to satisfy Penn State Business baccalaureate degree requirements. Not available to students who have taken B A 303 or MKTG 301.
Effective: Spring 1996
Prerequisite: 3 credits in economics

MKTG 221W Contemporary American Marketing (3) Social and economic aspects; movement of goods and services from producers to consumers; analysis of marketing functions, systems, and institutions. May not be used to satisfy Penn State Business baccalaureate degree requirements. Not available to students who have taken B A 303 or MKTG 301.
Effective: Spring 1993
Prerequisite: 3 credits in economics

MKTG 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

MKTG 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

MKTG 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

MKTG 301 Principles of Marketing (3) Focuses on customer behavior, product, channels of distribution, promotion, and pricing with emphasis on a culturally diverse environment. Not available to students who have taken B A 303.
Effective: Spring 2011
Prerequisite: ENGL 015 or ENGL 030; ECON 102 or ECON 104; MATH 021 or higher or satisfactory score on the mathematics FCAP examination

MKTG 301H Principles of Marketing (3) Focuses on customer behavior, product, channels of distribution, promotion, and pricing with emphasis on a culturally diverse environment. Not available to students who have taken B A 303.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: ENGL 015 or ENGL 030; ECON 002 or ECON 004; MATH 021 or higher or satisfactory score on the mathematics FCAP examination

MKTG 301W Principles of Marketing (3) Focuses on customer behavior, product, channels of distribution, promotion, and pricing with emphasis on a culturally diverse environment. Not available to students who have taken BA 303.
Effective: Spring 2011
Prerequisite: ENGL 015 or ENGL 030; ECON 102 or ECON 104; MATH 021 or higher or satisfactory score on the mathematics FCAP examination

MKTG 302 Marketing Techniques for Electronic Commerce (3) Explores methods to implement/adapt marketing methods to the Internet; builds upon introductory marketing classes to examine what does/doesn’t work.
Effective: Spring 2008
Prerequisite: B A 303 or MKTG 301

MKTG 310 Public Relations and Marketing (3) Examination of the role of public relations in a company’s efforts to manufacture and market its products and services.
Effective: Spring 2008
Prerequisite: B A 303 or MKTG 301

MKTG 327 Retailing (3) Management of marketing institutions in distribution channels from producers to consumers. Emphasis on retail institutions: location, personnel, merchandising, control, promotion.
Effective: Spring 2008
Prerequisite: B A 303 or MKTG 301

MKTG 330 Consumer Behavior (3) Application of behavioral science concepts to the understanding of buyer behavior as a basis for marketing management decision making.
Effective: Spring 2008
Prerequisite: B A 303 or MKTG 301

MKTG 342 Marketing Research (3) Research approaches, methods, and applications studied as a formal approach to problem solving for marketing decisions.
MKTG 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2003

MKTG 398 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2003

MKTG 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

MKTG 410 Personal Selling (3) Principles underlying the selling process and practical application of these principles to selling situations.
Effective: Spring 2008
Prerequisite: MKTG 301

MKTG 420 Direct Marketing (3) Applies principles of marketing management to the direct marketing of products by mail, telephone, print, and broadcast media.
Effective: Spring 2002
Prerequisite: MKTG 330, MKTG 342

MKTG 422 Advertising and Sales Promotion Management (3) Perspectives and models of the key decisions involved in managing advertising and sales promotion campaigns.
Effective: Spring 2008
Prerequisite: MKTG 330 or MKTG 342

MKTG 426 Business Marketing (3) Developing marketing strategies and programs. The course emphasizes the special nature of the business and organizational markets.
Effective: Spring 2002
Prerequisite: MKTG 330, MKTG 342

MKTG 428 Advanced Sales Management (3) Approaches to planning, organizing, staffing, training, directing, and controlling the sales force in support of marketing objectives.
Effective: Spring 2008
Prerequisite: MKTG 330, MKTG 342

MKTG 435 Marketing and Society (3) Analysis of marketing's impact on and obligation to social and environmental issues, marketing and ethics, and the regulation of marketing.
Effective: Spring 2002
Prerequisite: MKTG 330, MKTG 342

MKTG 437 Advanced Retailing and Merchandise Management (3) Analyzing planning and controlling the retail merchandising effort, including procurement, resource selection, vendor relations, product presentation, inventory control.
Effective: Spring 2002
Prerequisite: MKTG 330, MKTG 342

MKTG 440 Services Marketing (3) Marketing theory and methods applied to profit and nonprofit service industries such as health care, finance, transportation, tourism, arts and consulting.
Effective: Spring 2002
Prerequisite: MKTG 330, MKTG 342

MKTG 443 Sports Marketing (3) This course will focus on how companies develop, execute and measure marketing strategies and tactics to use sports teams, families, leagues and other organizations to market their products and services domestically and internationally to consumers and business partners. The course will examine the marketing strategies employed by sports teams and leagues.
Effective: Summer 2010
Prerequisite: B A 303 or MKTG 301

MKTG 445 (IL) Global Marketing (3) Role of international marketing in the global environment; political, economic, geographic, historical, cultural conditions; developing and implementing international marketing strategies.
Effective: Spring 2008
Prerequisite: B A 303 or MKTG 301

MKTG 450W Marketing Strategy (3) Market-oriented problems of the firm; identification and selection of market opportunities; formulation of competitive strategies; marketing policies and programs.
Effective: Spring 2008
Prerequisite: MKTG 330, MKTG 342

MKTG 475 Innovation and Product Management (3) This course is an application-oriented interdisciplinary course on new product development concepts, and innovation management.
Effective: Spring 2011
Prerequisite: MKTG 301

MKTG 476 Sales Management (3) Application of modern management principles to field sales force planning,
MKTG 478 Services Marketing Management (3) Conceptual understanding of services and the analytical tools that are used in solving strategic services marketing problems.
Effective: Spring 2008
Prerequisite: MKTG 301 and MGMT 301

MKTG 485 Business-to-Business Marketing (3) Application of marketing principles to commercial enterprises, industrial firms, government, and other non-profit institutions.
Effective: Spring 2008
Prerequisite: MKTG 301

MKTG 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2003

MKTG 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2008

MKTG 495 Internship (1-18) Supervised off campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008
Prerequisite: B A 303 ORMKTG 301

MKTG 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

MKTG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

MKTG 497A Non-Profit and Public Marketing (3) To apply marketing principles to services and programs offered in public and non-profit settings. To understand the dynamics of social marketing campaigns to achieve public sector initiatives. To explore how businesses can work with non-profits in an effective manner to achieve mutual goals.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MKTG 497A Retail Institutions (3) Management of marketing institutions in distribution channels from producters to consumers. Emphasis on retail institutions: location, personnel, merchandising, control and promotion.
Prerequisite: MKTG 330 or MKTG 342

MKTG 497B Sustainability for Consumers, Firms, and Societies (3) This course will introduce the audience to the role of sustainability in business, such as innovation.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MKTG 497B Sports Business (3) This course explores how the sports business operates. The class teaches students the business operations of teams, leagues, agencies and media companies including cable, wireless and digital. Both traditional and new marketing and revenues will be studied including products, promotion, pricing, distribution, and single revenue and revenue-sharing models. Sports business activities are included through instructor presentations, dialogue, student study of media coverage and reading a sports business trade journal. Student presentations will be created based on current sports business topics.

MKTG 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2003

MKTG 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007
Materials Engineering Technology (MAE T)

MAE T 201 Introduction to Materials Engineering Technology (3) An introduction to Materials Engineering Technology emphasizing relationships between structure and properties of engineering materials.
Effective: Summer 2007
Prerequisite: CHEM 110, MATH 082

MAE T 202 Materials Testing (3) A review of industrial methods and testing standards used for mechanical property testing and evaluation of engineering materials.
Effective: Spring 2005
Prerequisite: MATH 082, PHYS 150

MAE T 203 Introduction to Powder Metallurgy (3) A comprehensive study of powdered metal technology including production, characterization, compaction, sintering, and finishing operations.
Effective: Summer 2007
Prerequisite: CHEM 110, MATH 082

MAE T 204W Structure Characterization Laboratory (3) A hands-on experience course with emphasis on equipment and lab techniques used for microstructural evaluation of metals.
Effective: Summer 2007
Prerequisite: MAE T 201, CHEM 111, PHYS 150

MAE T 205 Powder Metallurgy Laboratory (4) A capstone course emphasizing hands-on laboratory experience in powder metallurgy and semester project; field trips to nearby P/M industries.
Effective: Summer 2007
Prerequisite: MAE T 201, MAE T 202, MAE T 203, CHEM 111, MATH 083

MAE T 294 Research Topics (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Summer 2009
Prerequisite: third semester standing

MAE T 296 Independent Study (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2009
Prerequisite: prior written approval of MAE T faculty member

MAE T 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2005

Last Import from UCM: June 16, 2011 3:00 AM
Materials Science and Engineering (MATSE)

MATSE 081 (GN;IL) Materials in Today's World (3) A survey of the properties, manufacture, and uses of polymers, ceramics and metals in today's world with emphasis on modern developments and new materials. Effective: Summer 2005

MATSE 090H High-Tech Materials (1) A series of introductory seminars concerning the most important aspects of modern materials technology; some laboratory visits will be included. Effective: Summer 1994

MATSE 091 (GN) Polymers, Life and Society (3) An exploration of the science and use of polymer materials and their impact on society using a case study approach. Effective: Summer 2005

MATSE 101A (GN;IL) (EGEE 101A) Energy and the Environment (3) Energy utilization and technological development, energy resources, conversion and consequences on the local and global environment, and future energy alternatives. Effective: Fall 2007

MATSE 112 (GN) Applied Materials Chemistry for Engineers (3) Chemistry of materials with emphasis on intermolecular forces between atoms, molecules, ions, and dense materials and inorganic and organic physical chemistry. In most majors, this course is not a substitute for CHEM 013 or CHEM 112. Effective: Spring 2009
Prerequisite: CHEM 110

MATSE 201 Introduction to Materials Science (3) Concepts of relationships between structure and thermal, optical, magnetic, electrical, and mechanical properties of metals, ceramics, glasses, and polymers. Effective: Summer 2007
Prerequisite: CHEM 112; MATH 231

MATSE 259 Properties and Processing of Engineering Materials (3) Relationship of structure and processing variables to the properties and service behavior of metals, polymers, and ceramics. Effective: Spring 2008
Prerequisite: E MCH 213 or E MCH 210

MATSE 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 1994

MATSE 400 Crystal Chemistry (3) Principles of crystal chemistry applied to structures, structural defects and properties of organic, inorganic, intermetallic, and metallic crystals. Effective: Summer 2007
Prerequisite: CHEM 112, CHEM 113, MATH 231, MATH 251, PHYS 214

MATSE 401 Thermodynamics of Materials (3) Review of equilibrium thermodynamics and applications to metallurgical and material systems. Effective: Summer 2007
Prerequisite: CHEM 112, PHYS 214

MATSE 402 Materials Process Kinetics (3) A treatment of process kinetics including chemical reaction kinetics and momentum, energy and mass transport. Effective: Spring 2001
Prerequisite: MATH 251, PHYS 214

MATSE 403 (BIOE 443) Biomedical Materials (3) Describe properties of materials and composites and their in vivo interactions. Effective: Spring 2007
Prerequisite: MATSE 201

MATSE 404 (IL) (BIOE 444) Surfaces and the Biological Response to Materials (3) Focus is on the special properties of surfaces as an important causative and mediating agent in the biological response to materials. Effective: Summer 2007
Prerequisite: CHEM 111, CHEM 113
MATSE 409 (NUC E 409) **Nuclear Materials** (3) Nuclear reactor materials: relationship between changes in material properties and microstructural evolution of nuclear cladding and fuel under irradiation.
Effective: Summer 2002
Prerequisite: PHYS 214

MATSE 410 **Phase Relations in Materials Systems** (3) Phase rule; construction and interpretations of equilibrium diagrams; importance of nonequilibrium in materials.
Effective: Fall 2006
Prerequisite: MATSE 201, MATSE 401  Concurrent: MATSE 201 MATSE 400 MATSE 430

MATSE 411 **Processing of Ceramics** (3) Principles of ceramic processing, including powder preparation and characterization, forming operations, and the basic phenomena underlying these operations.
Effective: Fall 2005
Prerequisite: MATSE 400, MATSE 402

MATSE 412 **Thermal Properties of Materials** (3) Generation of high temperatures, measurement of temperature, heat transfer and furnace design, thermal stability of ceramic materials, applied thermodynamics.
Effective: Fall 2005
Prerequisite: MATSE 259 or MATSE 201  Concurrent: MATSE 401

MATSE 413 **Solid-State Materials** (3) Structures of metallic, ionic, and covalent solids, amorphous materials, and surfaces; electronic structure; electronic properties of solids and their manipulation.
Effective: Spring 2001
Prerequisite: or concurrent: MATSE 201

MATSE 415 **Introduction to Glass Science** (3) Composition, melting, fabrication, properties, and uses of glass; combinations of glass with metals and other materials.
Effective: Summer 2002
Prerequisite: MATSE 400, MATSE 401, MATSE 402, MATSE 462

MATSE 417 (E SC 417) **Electrical and Magnetic Properties** (3) Electrical conductivity, dielectric properties, piezoelectric and ferroelectric phenomena; magnetic properties of ceramics.
Effective: Spring 2007
Prerequisite: MATSE 400, MATSE 402, PHYS 214

MATSE 421 **Corrosion Engineering** (3) Industrial forms of corrosion and preventive methods, and their description in terms of basic thermodynamic and kinetic considerations.
Effective: Summer 2007
Prerequisite: CHEM 112, PHYS 212

MATSE 422 **Thermochemical Processing** (3) Physico-chemical aspects of high temperature extraction and processing of metals and alloys. Design and evaluation of processes and process options.
Effective: Summer 2002
Prerequisite: MATSE 401, MATSE 402

MATSE 424 **Materials Selection and Design** (1) Introduction to the selection and design of materials for structural applications.
Effective: Summer 2002
Prerequisite: MATSE 201 or MATSE 259

MATSE 425 **Processing of Metals** (3) Modern methods of shaping metals in liquid and solid states: casting, joining, powder and deformation processing. Design of new technology.
Effective: Fall 2006
Prerequisite: MATSE 402, MATSE 410

MATSE 426 (MN PR 426) **Aqueous Processing** (3) A study of the chemical and engineering principles pertinent to metal processing in aqueous systems: hydrometallurgical extraction, plating, materials preparation.
Effective: Fall 2009
Prerequisite: EME 301 or MATSE 401

MATSE 430 **Materials Characterization** (3) Elements of crystallography and the characterization of crystalline and non-crystalline materials using x-ray diffraction, electron microscopic, and other instrumental techniques.
Effective: Spring 2001
Prerequisite: PHYS 214

Effective: Spring 1996
Prerequisite: MATSE 400

MATSE 436 **Mechanical Properties of Materials** (3) Fundamental relationships between structure and mechanical behavior of materials.
Effective: Summer 2002
Prerequisite: MATH 231, MATH 250 or MATH 251, PHYS 214, MATSE 201 or MATSE 259 or E SC 314

MATSE 440 (E MCH 440) **Nondestructive Evaluation of Flaws** (3) Methods and limitations of nondestructive evaluation of mechanical flaws; optical, acoustical, electromagnetic, x-ray, radiography, thermography, and dye techniques.
Effective: Spring 2008
Prerequisite: E MCH 213 or MCH 210 or E MCH 210
MATSE 441 Polymeric Materials I (3) Manufacture of industrially significant polymers together with discussion of their major chemical, physical, and mechanical properties. 
Effective: Summer 2007 
Prerequisite: CHEM 210, MATH 231, PHYS 214

MATSE 443 Introduction to the Materials Science of Polymers (3) Introduction to the nature and structure of high polymers. Characteristics of polymers and polymer systems. 
Effective: Summer 2007 
Prerequisite: CHEM 210, MATH 231, PHYS 214

Effective: Spring 2003 
Prerequisite: MATSE 443

MATSE 445 Thermodynamics, Microstructure, and Characterization of Polymers (3) The properties of individual polymer chains. Theoretical and experimental techniques pertaining to the characterization of polymeric microstructure. 
Effective: Fall 2002 
Prerequisite: MATSE 443

MATSE 446 Mechanical and Electrical Properties of Polymers and Composites (3) The mechanical (viscoelastic) and electric properties of polymers and poly-based composites. 
Effective: Spring 2003 
Prerequisite: MATSE 443

MATSE 447 Rheology and Processing of Polymers (3) This course deals with the fluid mechanics, rheology, and processing of polymeric materials. 
Effective: Fall 2002 
Prerequisite: MATSE 443

MATSE 448 (CH E 442) Polymer Processing Technology (3) Basic principles of polymer melt processing are reviewed and subsequently applied to the most important industrial processing operations. 
Effective: Spring 2006 
Prerequisite: MATSE 447 or CH E 302A

MATSE 450 (E SC 450) Synthesis and Processing of Electronic and Photonic Materials (3) The materials science of applying thin film coatings, etching, and bulk crystal growth; includes materials transport, accumulation, epitaxy, and defects. 
Effective: Fall 2005 
Prerequisite: MATSE 201 or E SC 414H sixth semester standing

MATSE 455 Properties and Characterization of Electronic and Photonic Materials (3) Materials characterization in general; electrical properties of crystals, contacts, films; optical properties of single phase materials, waveguide, and multilayer stacks. 
Effective: Fall 2005 
Prerequisite: MATSE 201 or E SC 414M, E SC 314

MATSE 460 Introductory Laboratory in Materials (1) An introduction to comparative physical properties and characteristics of various materials including mechanical, electrical thermal, and structure/morphology. 
Effective: Spring 2001 
Prerequisite: or concurrent: MATSE 201

MATSE 462 General Properties Laboratory in Materials (1) An introduction to comparative physical properties of various materials including mechanical, thermal electrical properties and the measurement of said properties. 
Effective: Spring 2005 
Prerequisite: MATSE 460

MATSE 463 Characterization and Processing of Electronic and Photonic Materials Laboratory (1) Provides experience with key processing methods for EPM materials and advanced characterization methods for EPM materials and simple device structures. 
Effective: Spring 2009 
Prerequisite: MATSE 400, MATSE 430, MATSE 450, MATSE 455, MATSE 460 Concurrent: MATSE 450 MATSE 455

MATSE 468 Ceramics Laboratory III (1) Ceramics processing and powder characteristics. 
Effective: Spring 2009 
Prerequisite: MATSE 462

MATSE 471 Metallurgy Laboratory I (1) A laboratory integrating experimental aspects of material contained in MATSE 402, 413, and 410, e.g. phase diagram determination, solidification micro-structures, etc. 
Effective: Fall 2005 
Prerequisite: MATSE 430

MATSE 472 Metallurgy Laboratory II (1) Application of principles of mechanical metallurgy, pyroprocessing, corrosion and metal processing. 
Effective: Fall 2006 
Prerequisite: MATSE 410, MATSE 471

MATSE 473 Polymeric Materials Laboratory--Synthesis (1) Principles and practices of polymerization, including condensation, free radical (bulk, solution, suspension, emulsion), ionic, and Zeigler-Natta procedures. 
Effective: Spring 2003 
Prerequisite: MATSE 443

The Pennsylvania State University
MATSE 474 Polymeric Materials Laboratory--Characterization (1) Principles and practices involved in determination of properties, structure and morphology, employing thermal, mechanical, spectroscopic, viscometric and computer techniques.
Effective: Spring 2003
Prerequisite: MATSE 443

MATSE 475 (E SC 475) Particulate Materials Processing (3) Fundamentals of processing particulate materials including production, characterization, handling, compaction, and sintering of metal, carbide, intermetallic, and composite powders.
Effective: Spring 2008
Prerequisite: E MCH 315, E SC 414 or MATSE 259

MATSE 483 (E SC 483) Simulation and Design of Nanostructures (3) Introduction to computer simulation techniques and their applications at the physical/life sciences interface.
Effective: Fall 2007
Prerequisite: PHYS 214 or E SC 312, MATH 230

MATSE 484W (IL) International Internship in Materials: Research Definition and Methodology (3) A course focused on international research, specific design and methodology, facilitated through the International Internship in Materials and Program.
Effective: Summer 2006
Prerequisite: Sixth-semester standing in Materials Science and Engineering; MATSE 201, MATSE 460, MATSE 492W; satisfactory completion of cultural class from Office of Education Abroad

MATSE 485W (IL) International Internship in Materials: Experimentation and Documentation (3) A course focused on international research, specifically experimentation and documentation, facilitated through the International Internship in Materials Program.
Effective: Summer 2006
Prerequisite: Seventh-semester standing in Materials Science and Engineering; MATSE 484W; satisfactory completion of cultural class from Office of Education Abroad

MATSE 492W Materials Engineering Methodology and Design (3) Designed to familiarize students with the literature and technology developments in the use of, and design with, materials in industrial applications.
Effective: Fall 2005
Prerequisite: sixth semester standing in Materials Science and Engineering

MATSE 494M Research and Design Senior Project (1-3) Continuation of a research problem in materials culminating in a bound thesis describing the work.
Effective: Fall 2007

MATSE 494W Research and Design Senior Project (1-3) Continuation of a research problem in materials culminating in a bound thesis describing the work.
Effective: Spring 2006

MATSE 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1994

MATSE 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1994

MATSE 497B Materials Sustainability and the Environment (3) The goal of this course is to educate students about the process of LCA, used as a problem solving tool, in the context of the history of environmental movements and legislation and the availability of resources to create materials and useful products in a sustainable manner.

MATSE 497C Research and Design Senior Group Project (3) The objective of the course is to provide "real-world" industry project experience.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: MATSE 492W

MATSE 497C Research and Design Senior Group Project (3) The objective of the course is to provide "real-world" industry project experience.
Prerequisite: MATSE 492W
Mathematics (MATH)

MATH 001 Developmental Mathematics (6) Arithmetic operations, ratios, proportions, percents; measurement; polynomial and rational expressions; exponents, radicals; equations, inequalities, systems of equations; graphing; applications. Students who have passed MATH 003 may not schedule this course for credit. This course may not be used to satisfy the basic minimum requirements for graduation in any baccalaureate degree program.
Effective: Spring 1994

MATH 002 Elementary Geometry With Problem Solving (4) Geometric congruence, similarity, area, surface area, volume, introductory trigonometry; emphasis on logical reasoning skills and the solution of applied problems. This course may not be used to satisfy the basic minimum requirements for graduation in any baccalaureate degree program.
Prerequisite: MATH 001 2 units of high school algebra or satisfactory performance on the mathematics FTCAP examination
Effective: Summer 2009

MATH 003 Basic Skills (3) Natural numbers; integers; rational numbers; decimals; ratio, proportion; percent; graphs; applications. Students who have passed MATH 001 may not schedule this course for credit. This course may not be used to satisfy the basic minimum requirements for graduation in any baccalaureate degree program.
Effective: Spring 1992

MATH 004, 021 GQ, AND 022 GQ form a three-semester sequence in intermediate algebra, college algebra, and analytic geometry. MATH 026 GQ is a one-semester course in plane trigonometry. Students are placed in the appropriate course depending on the results of the mathematics FTCAP examinations.

MATH 004 Intermediate Algebra (3) Algebraic expressions; linear, absolute value equations and inequalities; lines; systems of linear equations; integral exponents; polynomials; factoring. This course may not be used to satisfy the basic minimum requirements for graduation in any baccalaureate degree program.
Prerequisite: basic arithmetic skills or satisfactory performance on the mathematics FTCAP examination
Effective: Summer 2009

MATH 017 (GQ) Finite Mathematics (3) Introduction to logic, sets, probability.
Prerequisite: 2 units of high school mathematics
Effective: Summer 1988

MATH 018 (GQ) Elementary Linear Algebra (3) Linear functions; systems of equations; matrices; linear programming.
Prerequisite: 2 units of high school mathematics
Effective: Fall 1999

MATH 021 (GQ) College Algebra I (3) Quadratic equations; equations in quadratic form; word problems; graphing; algebraic fractions; negative and rational exponents; radicals.
Prerequisite: basic arithmetic skills or satisfactory performance on the mathematics FTCAP examination
Effective: Summer 2009

MATH 022 (GQ) College Algebra II and Analytic Geometry (3) Relations, functions, graphs; polynomial, rational functions, graphs; word problems; nonlinear inequalities; inverse functions; exponential, logarithmic functions; conic sections; simultaneous equations.
Effective: Summer 2009

MATH 026 (GQ) Plane Trigonometry (3) Trigonometric functions; solutions of triangles; trigonometric equations; identities.
Prerequisite: MATH 021 or satisfactory performance on the mathematics FTCAP examination; 1 unit of geometry
Effective: Summer 2009

MATH 030 (GQ) Problem Solving (3) Concepts in problem solving; reducing new problems to old ones; techniques for attacking problems; building mathematical models.
Effective: Spring 1994

MATH 034 (GQ) The Mathematics of Money (3) Simple interest, simple discount, compound interest, annuities, investments, retirement plans, taxes, credit cards, and mortgages.
Prerequisite: one unit of algebra orMATH 004
Effective: Summer 2009

MATH 035 (GQ) General View of Mathematics (3) Survey of mathematical thought in logic, geometry, combinatorics, and chance.
Effective: Summer 1992

MATH 036 (GQ) Insights Into Mathematics (3) Examples of mathematical applications in many areas including voting theory, fair division, apportionment, and Euler and Hamilton circuits.
Effective: Fall 2008

MATH 040 GQ covers all the topics in MATH 004, 021 GQ, 022 GQ, and 026 GQ in one semester, MATH 041 GQ covers the
same topics in trigonometry and analytic geometry as MATH 040 GQ. These courses are designed to prepare students for MATH 140 GQ. Students are placed in the appropriate course depending upon the results of the mathematics FTCAP examinations.

MATH 040 (GQ) Algebra, Trigonometry, and Analytic Geometry (5) Concepts of algebra; equations; inequalities; functions; graphs; polynomial and rational functions; exponential and logarithmic functions; trigonometry; analytic geometry; complex numbers.
Effective: Summer 2009
Prerequisite: satisfactory performance on the mathematics FTCAP examination

MATH 041 (GQ) Trigonometry and Analytic Geometry (3-4) Straight lines; circles; functions and graphs; graphs of polynomial and rational functions; exponential and logarithmic functions; trigonometry; conic sections.
Effective: Spring 2011
Prerequisite: MATH 021 or satisfactory performance on the mathematics FTCAP examination

MATH 081 (GQ) Technical Mathematics I (3) Algebraic expressions, equations, systems of equations, trigonometric functions, graphs, solution of triangles, vectors.
Effective: Summer 2009
Prerequisite: MATH 004 or satisfactory performance on the mathematics FTCAP examination

MATH 082 (GQ) Technical Mathematics II (3) Exponents, radicals, complex numbers, theory of equations, inequalities, half angle and double angle formulas, inverse trigonometric functions, exponential, logarithm, conic sections.
Effective: Summer 1995
Prerequisite: MATH 081

MATH 083 (GQ) Technical Calculus (4) Limits, derivatives of algebraic functions, implicit differentiation, related rates, applied extrema problems, curve sketching, integration, numerical integration, applications of integration, integration techniques, differential equations.
Effective: Summer 1995
Prerequisite: MATH 082

MATH 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

MATH 097C Introduction Algebra Problem Solving (4) Problem solving: Math 021 (3) Math 097C is a college level introduction to algebra combined with individualized review of basic algebra.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 110 GQ and MATH 140 GQ, 141 GQ are two sequences that discuss differential and integral calculus. They differ in the areas where calculus is applied. The MATH 110 GQ, 111 GQ sequence includes applications from business: the engineering sciences. A student who wants to change from one sequence to another should consult with the chair of the mathematics department.

MATH 110 (GQ) Techniques of Calculus I (4) Functions, graphs, derivatives, integrals, techniques of differentiation and integration, exponentials, improper integrals, applications. Students may take only one course for credit from MATH 110, 140, 140A, and 140B.
Effective: Summer 2009
Prerequisite: MATH 022 or satisfactory performance on the mathematics FTCAP examination

MATH 111 (GQ) Techniques of Calculus II (2) Analytic geometry, partial differentiation, maxima and minima, differential equations.
Effective: Summer 1988
Prerequisite: MATH 110

MATH 140 (GQ) Calculus With Analytic Geometry I (4) Functions, limits; analytic geometry; derivatives, differentials, applications; integrals, applications. Students may only take one course for credit from MATH 110, 140, 140A, 140B, and 140H.
Effective: Summer 2009
Prerequisite: MATH 022, MATH 026; or MATH 040 or MATH 041 or satisfactory performance on the mathematics FTCAP examination

MATH 140A (GQ) Calculus, Analytic Geometry, Algebra, and Trigonometry (6) Review of algebra and trigonometry; analytic geometry; functions; limits; derivatives, differentials, applications; integrals, applications. Students may take only one course for credit from MATH 110, 140, 140A, and 140B.
Effective: Summer 2009
Prerequisite: satisfactory performance on the mathematics FTCAP examination

MATH 140B (GQ) Calculus and Biology I (4) Functions, limits, analytic geometry; derivatives, differentials, applications from biology; integrals, applications from biology. Students may take only one course for credit from MATH 110, 140, 140A, and 140B.
Effective: Summer 2009
Prerequisite: MATH 022, MATH 026; or MATH 040 or MATH 041 or satisfactory performance on mathematics FTCAP examination

MATH 140E (GQ) Calculus with Engineering Applications I (4) Functions; limits; analytic geometry; derivatives; differentials, applications; integrals, applications.
Effective: Summer 2009

The Pennsylvania State University
Prerequisite: MATH 022, MATH 026; or MATH 040 or MATH 041 or satisfactory performance in the mathematics FTCAP examination.

MATH 140G (GQ) Calculus with Earth and Mineral Sciences Applications I (4) Functions, limits, analytic geometry; derivatives, differentials, applications from the earth and mineral sciences; integrals, applications from the earth and mineral sciences. Students may only take one course for credit from MATH 110, 140, 140A, 140B, 140E, and 140G. Effective: Summer 2009

Prerequisite: MATH 022, MATH 026; or MATH 040 or MATH 041 or satisfactory performance on the mathematics FTCAP examination.

MATH 140H (GQ) Honors Calculus with Analytic Geometry I (4) Honors course in functions, limits; analytic geometry; derivatives, differentials, applications; integrals, applications. Students may only take one course for credit from MATH 110, 140, 140A, 140B, and 140H. Effective: Summer 2009

Prerequisite: MATH 022, MATH 026; or MATH 040 or MATH 041 or satisfactory performance on the mathematics FTCAP examination.

MATH 141 (GQ) Calculus with Analytic Geometry II (4) Derivatives, integrals, applications; sequences and series; analytic geometry; polar coordinates. Students may take only one course for credit from MATH 141, 141B, and 141H. Effective: Spring 1996

Prerequisite: MATH 140, MATH 140A, MATH 140B or MATH 140H.

MATH 141B (GQ) Calculus and Biology II (4) Derivatives, integrals, applications from biology; sequences and series; analytic geometry; polar coordinates. Students may take only one course for credit from MATH 141 and 141B. Effective: Spring 1996

Prerequisite: MATH 140B.

MATH 141E (GQ) Calculus with Engineering Applications II (4) Integration, applications; sequences and series; parametric equations, application. Effective: Fall 2001

Prerequisite: MATH 140, MATH 140A, MATH 140B or MATH 140E.

MATH 141G (GQ) Calculus with Earth and Mineral Sciences Applications II (4) Derivatives, integrals, applications from the earth and mineral sciences; sequences and series; analytic geometry; polar coordinates. Students may take only one course for credit from MATH 141, 141B, 141E, and 141G. Effective: Summer 2005

Prerequisite: MATH 140, MATH 140A, MATH 140B, MATH 140E or MATH 140G.

MATH 141H (GQ) Honors Calculus with Analytic Geometry II (4) Honors course in derivatives, integrals, applications; sequences and series; analytic geometry; polar coordinates. Students may take only one course for credit from MATH 141, 141B, and 141H. Effective: Summer 2006

Prerequisite: MATH 140, MATH 140A, MATH 140B or MATH 140H.

MATH 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

MATH 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

MATH 200 (GQ) Problem Solving in Mathematics (3) Fundamental concepts of arithmetic and geometry, including problem solving, number systems, and elementary number theory. For elementary and special education teacher certification candidates only. A student who has passed EDMTH 444 may not take MATH 200 for credit. Effective: Summer 2009

MATH 210 Calculus with Engineering Technology Applications (3) Topics in calculus with an emphasis on applications in engineering technology. Effective: Spring 2007

Prerequisite: trigonometry and an introductory course in calculus.

Prerequisite: MATH 210.

MATH 220 (GQ) Matrices (2-3) Systems of linear equations; matrix algebra; eigenvalues and eigenvectors; linear systems of differential equations. Effective: Spring 2009

Prerequisite: MATH 210.

MATH 220H (GQ) Honors Matrices (2-3) Honors course in systems of linear equations; matrix algebra; eigenvalues and eigenvectors; linear systems of differential equations. Effective: Spring 2009

Prerequisite: MATH 210.

MATH 230 Calculus and Vector Analysis (4) Three-dimensional analytic geometry; vectors in space; partial differentiation; double and triple integrals; integral vector calculus. Students who have passed either Math 231 or 232
may not schedule Math 230 or 230H for credit.
Effective: Spring 1996
Prerequisite: MATH 141 or MATH 141H

MATH 230H Honors Calculus and Vector Analysis (4) Honors course in three-dimensional analytic geometry; vectors in space; partial differentiation; double and triple integrals; integral vector calculus. Students who have passed either MATH 231 or 232 may not schedule MATH 230 or 230H for credit.
Effective: Spring 2006
Prerequisite: MATH 141 or MATH 141H

MATH 231 Calculus of Several Variables (2) Analytic geometry in space; partial differentiation and applications. Students who have passed MATH 230 or MATH 230H may not schedule this course.
Effective: Spring 1996
Prerequisite: MATH 141 or MATH 141H

MATH 231H Honors Calculus of Several Variables (2) Honors course in analytic geometry in space; partial differentiation and applications. Students who have passed MATH 230 or MATH 230H may not schedule this course.
Effective: Summer 2006
Prerequisite: MATH 141 or MATH 141H

MATH 232 Integral Vector Calculus (2) Multidimensional analytic geometry, double and triple integrals; potential fields; flux; Green's, divergence and Stokes' theorems. Students who have passed MATH 230 may not schedule this course for credit.
Effective: Spring 1996
Prerequisite: MATH 231

MATH 250 Ordinary Differential Equations (3) First- and second-order equations; special functions; Laplace transform solutions; higher order equations. Students who have passed MATH 251 may not schedule this course for credit.
Effective: Fall 1988
Prerequisite: MATH 141

MATH 251 Ordinary and Partial Differential Equations (4) First- and second-order equations; special functions; Laplace transform solutions; higher order equations; Fourier series; partial differential equations.
Effective: Fall 1988
Prerequisite: MATH 141 or MATH 141H

MATH 251H Honors Ordinary and Partial Differential Equations (4) Honors course in first- and second-order equations; special functions; Laplace transform solutions; higher order equations; Fourier series; partial differential equations.
Effective: Summer 2006
Prerequisite: MATH 141 or MATH 141H

MATH 277 An Introduction to Mathematical Modeling (3) In-depth treatment of case studies in application of mathematics to real world problems. Emphasis is on developing modeling skills.
Effective: Summer 2005
Prerequisite: MATH 141, MATH 220 Concurrent: MATH 250 MATH 251

MATH 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1995

MATH 296 Independent Studies (1-18) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

MATH 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

MATH 310 Elementary Combinatorics (3) Fundamental techniques of enumeration and construction of combinatorial structures, permutations, recurrences, inclusion-exclusion, permanents, 0, 1- matrices, Latin squares, combinatorial designs.
Effective: Spring 1985
Prerequisite: MATH 220

MATH 311M Honors Concepts of Discrete Mathematics (3) Basic methods of mathematical thinking and fundamental mathematical structures, primarily in the context of numbers, groups, and symmetries.
Effective: Spring 2006
Prerequisite: MATH 141

MATH 311W Concepts of Discrete Mathematics (3-4) Introduction to mathematical proofs; elementary number theory and group theory. Students who have passed CMPSC 360 may not schedule this course for credit.
Effective: Spring 2007
Prerequisite: MATH 141

MATH 312 Concepts of Real Analysis (3) An introduction to rigorous analytic proofs involving properties of real numbers, continuity, differentiation, integration, and infinite sequences and series.
Effective: Spring 1994
Prerequisite: MATH 141

MATH 312H Honors Concepts of Real Analysis (3) Basic methods of mathematical thinking and fundamental structures, primarily in the context of infinite sets, real numbers, and metric spaces.
Effective: Summer 2006
Prerequisite: MATH 141

MATH 312R Honors Concepts of Real Analysis - Recitation (1) A recitation component to MATH 312H, practice in problem solving.
Effective: Summer 2011
Prerequisite: MATH 140H, MATH 311M Concurrent: MATH 312H MATH 313R MATH 313H MATH 314H MATH 315H

MATH 313H Concepts of Geometry (3) Development thorough understanding and technical mastery of foundations of modern geometry.
Effective: Summer 2011
Prerequisite: MATH 140H, MATH 311M Concurrent: MATH 312H MATH 313R MATH 313H MATH 314H MATH 315H

Effective: Summer 2011
Prerequisite: MATH 140H, MATH 311M Concurrent: MATH 312H MATH 313R MATH 313H MATH 314H MATH 315H

MATH 314H PMASS Problem Solving Seminar (1) Group work on challenging problems, discussions and project presentations.
Effective: Summer 2011
Prerequisite: MATH 140H, MATH 311M Concurrent: MATH 312H MATH 313R MATH 313H MATH 314H MATH 315H

MATH 315 Foundations of Mathematics (3) A consideration of selected topics in the foundations of mathematics, with emphasis on development of basic meaning and concepts.
Effective: Spring 2007
Prerequisite: MATH 141

MATH 315H PMASS Colloquium (1) Bi-weekly lecture series with multiple invite speakers.
Effective: Summer 2011
Prerequisite: MATH 140H, MATH 311M Concurrent: MATH 312H MATH 313R MATH 313H MATH 314H MATH 315H

MATH 318 (STAT 318) Elementary Probability (3) Combinatorial analysis, axioms of probability, conditional probability and independence, discrete and continuous random variables, expectation, limit theorems, additional topics. Students who have passed either MATH(STAT) 414 or 418 may not schedule this course for credit.
Effective: Spring 1989
Prerequisite: MATH 141

MATH 319 (STAT 319) Applied Statistics in Science (3) Statistical inference: principles and methods, estimation and testing hypotheses, regression and correlation analysis, analysis of variance, computer analysis. Students who have passed MATH(STAT) 415 may not schedule this course for credit.
Effective: Spring 1989
Prerequisite: MATH 318 or knowledge of basic probability

MATH 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

MATH 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

MATH 401 Introduction to Analysis I (3) Review of calculus, properties of real numbers, infinite series, uniform convergence, power series. Students who have passed Math. 403 may not schedule this course.
Effective: Fall 1983
Prerequisite: MATH 230 or MATH 231

MATH 403 Classical Analysis I (3) Topology of Rn, compactness, continuity of functions, uniform convergence, Arzela-Ascoli theorem in the plane, Stone-Wierstrass theorem.
Effective: Spring 1996
Prerequisite: MATH 312

MATH 403H Honors Classical Analysis I (3) Development of a thorough understanding and technical mastery of foundations of classical analysis in the framework of metric spaces.
Effective: Spring 2010
Prerequisite: MATH 311M, MATH 312H

MATH 404 Classical Analysis II (3) Differentiation of functions from Rn to Rm, implicit function theorem, Riemann integration, Fubini's theorem, Fourier analysis.
Effective: Fall 1985
Prerequisite: MATH 403

MATH 405 Advanced Calculus for Engineers and Scientists I (3) Vector calculus, linear algebra, ordinary and partial differential equations. Students who have passed MATH 411 or 412 may not take this course for credit.
Effective: Spring 1994
Prerequisite: MATH 231; MATH 250 or MATH 251
MATH 406 Advanced Calculus for Engineers and Scientists II (3) Complex analytic functions, sequences and series, residues, Fourier and Laplace transforms. Students who have passed MATH 421 may not take this course for credit.
Effective: Spring 1994
Prerequisite: MATH 405

MATH 408 Advanced Calculus (3) Differential and integral calculus of functions of several variables, line and surface integrals, infinite series, series of functions, power series.
Effective: Spring 2007
Prerequisite: MATH 141

MATH 411 Ordinary Differential Equations (3) Linear ordinary differential equations; existence and uniqueness questions; series solutions; special functions; eigenvalue problems; Laplace transforms; additional topics and applications.
Effective: Fall 1983
Prerequisite: MATH 230 or MATH 231; MATH 250 or MATH 251

MATH 412 Fourier Series and Partial Differential Equations (3) Orthogonal systems and Fourier series; derivation and classification of partial differential equations; eigenvalue function method and its applications; additional topics.
Effective: Spring 2009
Prerequisite: MATH 230; MATH 250 or MATH 251

MATH 414 (STAT 414) Introduction to Probability Theory (3) Probability spaces, discrete and continuous random variables, transformations, expectations, generating functions, conditional distributions, law of large numbers, central limit theorems. Students may take only one course from MATH(STAT) 414 and 418 for credit.
Effective: Fall 2001
Prerequisite: MATH 230 or MATH 231

MATH 415 (STAT 415) Introduction to Mathematical Statistics (3) A theoretical treatment of statistical inference, including sufficiency, estimation, testing, regression, analysis of variance, and chi-square tests.
Effective: Fall 1989
Prerequisite: MATH 414

Effective: Spring 1984
Prerequisite: MATH 318 or MATH 414; MATH 230

Effective: Spring 2009
Prerequisite: MATH 220; MATH 250 or MATH 251

MATH 418 (STAT 418) Probability (3) Fundamentals and axioms, combinatorial probability, conditional probability and independence, probability laws, random variables, expectation; Chebyshev's inequality. Students may take only one course from MATH(STAT) 414 and 418 for credit.
Effective: Fall 2001 Ending: Summer 2011
Prerequisite: MATH 230 or MATH 231

MATH 418 (STAT 418) Introduction to Probability and Stochastic Processes for Engineering (3) Introduction to probability axioms, combinatorics, random variables, limit laws, and stochastic processes.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: MATH 230 or MATH 231

MATH 419 (PHYS 419) Theoretical Mechanics (3) Principles of Newtonian, Lagrangian, and Hamiltonian mechanics of particles with applications to vibrations, rotations, orbital motion, and collisions.
Effective: Fall 2000
Prerequisite: MATH 230 or MATH 231; MATH 250 or MATH 251; PHYS 212, PHYS 213 and PHYS 214

MATH 421 Complex Analysis (3) Infinite sequences and series; algebra and geometry of complex numbers; analytic functions; integration; power series; residue calculus; conformal mapping, applications.
Effective: Summer 1993
Prerequisite: MATH 230, MATH 232 or MATH 405; MATH 401 or MATH 403

MATH 422 Wavelets and Fourier Analysis: Theory and Applications (3) Fundamental mathematical issues of the theory of wavelets for senior undergraduate and graduate students in mathematics, engineering, physics, and computer science.
Effective: Summer 2000
Prerequisite: complete one of the following: MATH 312, MATH 401, MATH 403, MATH 405 or MATH 412

MATH 425 Introduction to Operations Research (3) Nature of operations research, problem formulation, model construction, deriving solution from models, allocation problems, general linear allocation problem, inventory problems.
Effective: Spring 2007 Ending: Fall 2011
Prerequisite: MATH 141

MATH 425 Introduction to Operations Research (3) Nature of operations research, problem formulation, model construction, deriving solution from models, allocation problems, general linear allocation problem, inventory problems.
Prerequisite: MATH 141 and MATH 220

MATH 426 Introduction to Modern Geometry (3) Plane and space curves; space surfaces; curvature; intrinsic geometry of surfaces; Gauss-Bonnet theorem; covariant differentiation; tensor analysis.
Effective: Spring 1994
Prerequisite: MATH 401 or MATH 403

MATH 427 Foundations of Geometry (3) Euclidean and various non-Euclidean geometries and their development from postulate systems. Students who have passed MATH 427 may not schedule MATH 471.
Effective: Spring 1994
Prerequisite: MATH 230 or MATH 231

MATH 428 Geometry for Teachers (1) Research in mathematics education using ideas from Euclidean and non-Euclidean geometry. Students who have passed MATH 471 may not schedule MTHBD 478.
Effective: Spring 2007
Prerequisite: MATH 311W. Prerequisite or concurrent: MATH 427

Effective: Spring 1994
Prerequisite: MATH 311W

MATH 430 Linear Algebra and Discrete Models I (3) Vector spaces, linear transformations, matrices, determinants, characteristic values and vectors, systems of linear equations, applications to discrete models.
Effective: Spring 2010
Prerequisite: MATH 220

MATH 431 Linear Algebra and Discrete Models II (3) Vector spaces and linear transformations, matrices, determinants, characteristics values and vectors, systems of linear equations, applications to discrete models.
Effective: Spring 2007
Prerequisite: MATH 430

MATH 435 Basic Abstract Algebra (3) Elementary theory of groups, rings, and fields. Students who have passed MATH 435 may not schedule MATH 470.
Effective: Fall 1983
Prerequisite: MATH 311W

MATH 435 Basic Abstract Algebra (3) Elementary theory of groups, rings, and fields. Students who have passed MATH 435 may not schedule MATH 470.
Effective: Spring 2010
Prerequisite: MATH 311W or MATH 315

MATH 436 Linear Algebra (3) Vector spaces and linear transformations, canonical forms of matrices, elementary divisors, invariant factors, applications. Students who have passed MATH 436 may not schedule MATH 441.
Effective: Fall 1983
Prerequisite: MATH 311W

MATH 437 Algebraic Geometry (3) Study of curves in the plane defined by polynomial equations p(x,y) = 0. Projective equivalence, singular points, classification of cubics.
Effective: Spring 2009
Prerequisite: MATH 230 or MATH 231; MATH 311W

MATH 441 Matrix Algebra (3) Determinants, matrices, linear equations, characteristic roots, quadratic forms, vector spaces. Students who have passed Math 436 may not schedule this course.
Effective: Fall 1985
Prerequisite: MATH 220

MATH 444 Mathematical Statistics and Applications I (3) Distributions of random variables, special distributions, limiting distributions, sampling, statistical inference, point and interval estimation, orthogonal polynomials, and least squares.
Effective: Spring 2007
Prerequisite: MATH 141

MATH 445 Mathematical Statistics and Applications II (3) Further topics in point estimation, statistical hypotheses, other statistical tests, nonparametric methods.
Effective: Spring 2007
Prerequisite: MATH 444

MATH 446 Introduction to Applied Statistics I (3) Descriptive statistics, probability theory, discrete and continuous probability distributions, statistical inferences for means and proportions.
Effective: Spring 2007
Prerequisite: MATH 022 or MATH 040

MATH 447 Introduction to Applied Statistics II (3) Regression, correlation, analysis of variance, contingency tables, nonparametric methods, time series, index numbers.
Effective: Spring 2007

MATH 448 Sampling Methods and Practice and Experimental Design (3) An introduction to the procedures and techniques of statistical sampling methods and experimental design.
Effective: Spring 2007
Prerequisite: MATH 444, MATH 445

MATH 449 Applied Ordinary Differential Equations (3) Differential and difference equations and their application to biology, chemistry, and physics; techniques in dynamical systems theory.
Effective: Spring 2007
MATH 450 Mathematical Modeling (3) Constructing mathematical models of physical phenomena; topics include pendulum motion, polymer fluids, chemical reactions, waves, flight, and chaos.
Effective: Spring 2007
Prerequisite: MATH 315 and MATH 430 or MATH 405 or MATH 412

MATH 451 (CMPSC 451) Numerical Computations (3) Algorithms for interpolation, approximation, integration, nonlinear equations, linear systems, fast FOURIER transform, and differential equations emphasizing computational properties and implementation. Students may take only one course for credit from MATH 451 and 455.
Effective: Spring 2008
Prerequisite: 3 credits of programming; MATH 230 or MATH 231

MATH 455 (CMPSC 455) Introduction to Numerical Analysis I (3) Floating point computation, numerical rootfinding, interpolation, numerical quadrature, direct methods for linear systems. Students may take only one course for credit from MATH 451 and MATH 455.
Effective: Spring 2008
Prerequisite: CMPSC 201, CMPSC 202 or CMPSC 121; MATH 220; MATH 230 or MATH 231

MATH 456 (CMPSC 456) Introduction to Numerical Analysis II (3) Polynomial and piecewise polynomial approximation, matrix least squares problems, numerical solution of eigenvalue problems, numerical solution of ordinary differential equations.
Effective: Spring 2008
Prerequisite: MATH 455

MATH 457 Introduction to Mathematical Logic (3) Propositional logic, first-order predicate logic, axioms and rules of inference, structures, models, definability, completeness, compactness.
Effective: Summer 2011
Prerequisite: MATH 311W; 3 additional credits in philosophy

Effective: Fall 1986
Prerequisite: MATH 419

MATH 465 Number Theory (3) Elements, divisibility of numbers, congruences, residues, and forms.
Effective: Spring 2009
Prerequisite: MATH 311W

MATH 467 (CMPSC 467) Factorization and Primality Testing (3) Prime sieves, factoring, computer numeration systems, congruences, multiplicative functions, primitive roots, cryptography, quadratic residues. Students who have passed MATH 465 may not schedule this course.
Effective: Spring 1995
Prerequisite: MATH 311W

MATH 468 Mathematical Coding Theory (3) Shannon’s theorem, block codes, linear codes, Hamming codes, Hadamard codes, Golay codes, Reed-Muller codes, bounds on codes, cyclic codes.
Effective: Fall 1983
Prerequisite: MATH 311W; advanced calculus

MATH 470 Algebra for Teachers (3) An introduction to algebraic structures and to the axiomatic approach, including the elements of linear algebra. Designed for teachers and prospective teachers. Students who have passed Math 435 may not schedule this course.
Effective: Fall 1988
Prerequisite: MATH 311W

MATH 471 Geometry for Teachers (4) Problem solving oriented introduction to Euclidean and non-Euclidean geometries; construction problems and geometrical transformations via “Geometer’s Sketchpad” software. Intended primarily for those seeking teacher certification in secondary mathematics. Students who have passed MATH 427 may not schedule this course.
Effective: Spring 1996
Prerequisite: MATH 311W

MATH 475 (US; IL) Introduction to the History of Mathematics (3) A global survey of the history of mathematics as viewed as a human response to cultural, political, economic, and societal pressures.
Effective: Spring 2010
Prerequisite: CMATH 221 or MATH 141

MATH 475W (US; IL) History of Mathematics (3) A global survey of the history of mathematics as viewed as a human response to cultural, political, economic, and societal pressures.
Effective: Spring 2010 Ending: Fall 2011
Prerequisite: MATH 141

MATH 475W (US; IL) History of Mathematics (3) A global survey of the history of mathematics as viewed as a human response to cultural, political, economic, and societal pressures.
Prerequisite: MATH 315 or MATH 311W

MATH 479 (PHYS 479) Special and General Relativity (3) Mathematical description, physical concepts, and experimental tests of special and general relativity.
Effective: Spring 2007
Prerequisite: PHYS 237, PHYS 400, PHYS 419; MATH 250 or MATH 251; MATH 230 or MATH 231

MATH 482 Mathematical Methods of Operations Research (3) Survey of linear and nonlinear programming; mathematics of optimization; queues; simulation.
Effective: Spring 2007
Prerequisite: MATH 220, MATH 230, STAT 301

MATH 484 Linear Programs and Related Problems (3) Introduction to theory and applications of linear programming; the simplex algorithm and newer methods of solution; duality theory.
Effective: Spring 1987
Prerequisite: MATH 220; MATH 230 or MATH 231

MATH 485 Graph Theory (3) Introduction to the theory and applications of graphs and directed graphs. Emphasis on the fundamental theorems and their proofs.
Effective: Spring 1987
Prerequisite: MATH 311W

MATH 486 Mathematical Theory of Games (3) Basic theorems, concepts, and methods in the mathematical study of games of strategy; determination of optimal play when possible.
Effective: Spring 2006
Prerequisite: MATH 220

MATH 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1995

MATH 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

MATH 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2007
Prerequisite: prior approval of proposed assignment by instructor

MATH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

MATH 496A Sheffer Sequences (1-6) Investigating the Sheffer Sequences.
Effective: Summer 2011 Ending: Summer 2011

MATH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

MATH 497A Introduction to Ramsey Theory (4) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 497B Spaces: From Analysis to Geometry and Back (4) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 497C From Euclid to Alexandrov; A Guided Tour (4) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 497D MASS Interdisciplinary Seminar (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 497E MASS Colloquium (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992
MATH 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

NOTE: Courses in computer science and statistics are listed separately.

Last Import from UCM: June 16, 2011 3:00 AM
Mathematics Education (MTHED)

MTHED 298 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

MTHED 411 Teaching Secondary Mathematics I (3) Conditions for learning mathematics; problem solving; subject matter types; curriculum; learning goals; nature and history of mathematics at secondary level Effective: Spring 2007
Prerequisite: acceptance into Secondary Education/Mathematics Option certification program; C I 295; a grade of C or better in CMPSC 101, MATH 140, MATH 141, MATH 220, MATH 230, MATH 311W Concurrent: MTHED 427

MTHED 412 Teaching Secondary Mathematics II (3) Assessing learning and instruction; methods of evaluation and grading; long-term planning; accommodating needs of diverse learners; connecting theory and practice. Effective: Summer 2010
Prerequisite: a grade of C or better in MTHED 411 Concurrent: C I 412W C I 495C

MTHED 420 Teaching Mathematics in the Elementary Schools (3) Strategies for teaching mathematics at the elementary school level; analysis of the philosophy and content of contemporary programs of instruction. Effective: Spring 2007
Prerequisite: LL ED 400, LL ED 401, LL ED 402; a grade of C or better required in MATH 200, PSYCH 212 Concurrent: C I 495B; C I 495A or SS ED 430W SCIED 458

MTHED 424 Contemporary School Mathematics Programs (3) In-depth analysis of school mathematics programs and the factors and forces influencing them; contemporary curriculum developments. Effective: Summer 2010
Prerequisite: MTHED 412W or MTHED 420

Prerequisite: acceptance into Secondary Education/Mathematics Option certification program; C I 295; a grade of C or better in CMPSC 101, MATH 140, MATH 141, MATH 220, MATH 230, MATH 311W Concurrent: MTHED 411

MTHED 430 Students' Mathematical Thinking (3 per semester, maximum of 6) Develop abilities in planning, conducting, and interpreting mathematics interviews to gain an understanding of students' thinking processes and current knowledge. Effective: Summer 1994
Prerequisite: C I 495D, C I 495E or experience teaching mathematics

MTHED 431 Data Analysis in Secondary School Mathematics (3) Intense development of foundations of data analysis for secondary mathematics as a process using statistical concepts for predictions and inferences. Effective: Summer 2006
Prerequisite: CMPSC 101 or equivalent; at least 18 credits of mathematics at or above the calculus level; acceptance into secondary mathematics certification program or permission of program

MTHED 432 Mathematical Modeling in Secondary School Mathematics (3) Students work from teaching and curricular perspective to explore and apply school and undergraduate mathematics to model real-world phenomena. Effective: Summer 2006
Prerequisite: CMPSC 101 or equivalent; at least 18 credits of mathematics at or above the calculus level; acceptance into secondary mathematics certification program or permission of program

MTHED 433 Function Concept in Secondary School Mathematics (3) This course develops the concept of function as an essential topic that underlies and connects school and collegiate mathematics. Effective: Summer 2006
Prerequisite: CMPSC 101 or equivalent; at least 18 credits of mathematics at or above the calculus level; acceptance into secondary mathematics certification program or permission of program

MTHED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

MTHED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

MTHED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992
MTHED 498A AP Statistics (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

MTHED 498B AP Calculus AB (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

Last Import from UCM: June 16, 2011 3:00 AM
Mechanical Engineering (M E)

M E 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1998

M E 097S First-Year Seminar (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

M E 097S First Year Seminar (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

M E 101S Toy Fundamentals: First-Year Seminar (1) First-Year Seminar focusing on toy design and manufacture.
Effective: Fall 1999

M E 102S Smart Lego Robots & Design (1) First-Year Seminar focusing on the development of technology exploration kits for middle-school-aged children.
Effective: Fall 2004

M E 104S Environmentally Conscious Engineering: First-Year Seminar (1) A First-Year Seminar focusing on environmental issues as they pertain to the engineering profession.
Effective: Fall 1999

M E 105S Product Dissection A: Bicycles--First-Year Seminar (1) A First-Year Seminar in which students analyze and disassemble a multi-speed bicycle.
Effective: Fall 1999

M E 106S Product Dissection B: Household Appliances--First-Year Seminar (1) A First-Year Seminar in which students analyze and disassemble household appliances.
Effective: Fall 1999

M E 107S Product Dissection C: The Enigmatic Engine--First-Year Seminar (1) A First-Year Seminar in which students analyze and disassemble a single-cylinder lawnmower engine.
Effective: Fall 1999

M E 190S Special Topics in Mechanical Engineering: First-Year Seminar (1) A First-Year Seminar focusing on issues related to Mechanical Engineering.
Effective: Fall 1999

M E 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2008

M E 201 Introduction to Thermal Science (3) Application of the basic concepts of thermodynamics, fluid dynamics, and heat transfer to the solution of engineering problems.
Effective: Fall 2007
Prerequisite: CHEM 110

M E 240 Product Dissection (3) Dissection of products and processes; reverse engineering, examination of materials usage, manufacturing processes, design, invention, and consumer issues.
Effective: Fall 2007
Prerequisite: EDSGN 100, PHYS 211

M E 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1995

M E 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2008

M E 300 Engineering Thermodynamics I (3) Basic thermodynamics concepts, properties of pure substances, first and second law analysis of systems and control volumes.
Effective: Fall 2007

</thead>
<tbody>
<tr>
<td>M E 302</td>
<td>Engineering Thermodynamics</td>
<td>4</td>
<td>Engineering thermodynamics and heat transfer, with pertinent applications to devices important in mechanical engineering. For students in engineering science.</td>
<td>Fall 2007</td>
<td>CHEM 110, MATH 141</td>
</tr>
<tr>
<td>M E 308</td>
<td>Fluid Flow and Heat Transfer Laboratory</td>
<td>1</td>
<td>Experimental work to enhance understanding of thermodynamics, fluid dynamics, and heat transfer.</td>
<td>Fall 2007</td>
<td>M E 320. Prerequisite or concurrent: M E 410</td>
</tr>
<tr>
<td>M E 315</td>
<td>Heat Transfer Laboratory</td>
<td>1</td>
<td>Application of the fundamental concepts associated with conduction, convection, and radiation to the actual measurements of heat transfer.</td>
<td>Fall 2007</td>
<td>M E 320. Prerequisite or concurrent: M E 345, M E 410</td>
</tr>
<tr>
<td>M E 320</td>
<td>Fluid Flow</td>
<td>3</td>
<td>Thermodynamic and dynamic principles applied to fluid behavior; ideal, viscous, and compressible fluids under internal and external flow conditions.</td>
<td>Spring 2008</td>
<td>E MCH 212, MATH 251; M E 201 or M E 300; MATH 230 or MATH 231</td>
</tr>
<tr>
<td>M E 325</td>
<td>Fluids Laboratory</td>
<td>1</td>
<td>Laboratory experience with fluid mechanics measurement techniques: flow visualization, pressure measurement, hot-wire anemometry, laser Doppler anemometry, computer data acquisition.</td>
<td>Fall 2007</td>
<td>M E 320, M E 345</td>
</tr>
<tr>
<td>M E 340</td>
<td>Mechanical Engineering Design Methodology</td>
<td>3</td>
<td>The design process; problem definition, conceptual design, system design, detail design, evaluation and test, implementation, documentation and communication.</td>
<td>Fall 2007</td>
<td>E DSGN 100, M E 320. Prerequisite or concurrent: M E 360</td>
</tr>
<tr>
<td>M E 345</td>
<td>Instrumentation, Measurements, and Statistics</td>
<td>4</td>
<td>Fundamentals of statistics, sensors, instrumentation, and measurement of mechanical phenomena such as temperature, flow, pressure, force, stress, displacement, and acceleration.</td>
<td>Spring 2008</td>
<td>Prerequisite or concurrent: E 212 or E 211 or equivalent</td>
</tr>
<tr>
<td>M E 345W</td>
<td>Instrumentation, Measurements, and Statistics</td>
<td>4</td>
<td>Measurement concepts, probability and statistics, error analysis; electro-mechanical transducers, applied electrical and mechanical measurements, electrical and electronics instruments, data acquisition and instrumentation systems.</td>
<td>Spring 2008</td>
<td>Prerequisite or concurrent: E 212 or E 211 or equivalent</td>
</tr>
<tr>
<td>M E 347</td>
<td>Computer-Aided Engineering</td>
<td>3</td>
<td>Introduction to the tools and techniques of computer-aided design, including CAD, spreadsheets, numerical methods, and finite element analysis.</td>
<td>Spring 2008</td>
<td>CMPSC 201 or CMPSC 202; E DSGN 100 or E DSGN 100S. Prerequisite or concurrent: E MCH 213, MATH 220, MATH 251</td>
</tr>
<tr>
<td>M E 349</td>
<td>Intermediate Mechanics of Materials</td>
<td>3</td>
<td>Intermediate topics in mechanics of materials with computer applications.</td>
<td>Summer 2011</td>
<td>E MCH 213, E DSGN 100S. Prerequisite or concurrent: CMPSC 200, MATH 220</td>
</tr>
<tr>
<td>M E 355</td>
<td>Dynamic Systems Laboratory</td>
<td>1</td>
<td>Experimental investigation of simple position, velocity, and temperature control systems with analog and digital controllers.</td>
<td>Fall 2011</td>
<td>M E 345; Prerequisite or concurrent: M E 450</td>
</tr>
<tr>
<td>M E 357</td>
<td>System Dynamics</td>
<td>3</td>
<td>Mathematical modeling and analysis of linear dynamic systems; performance and design of simple controllers.</td>
<td>Spring 2009 Ending; Summer 2011</td>
<td>CMPSC 201 or CMPSC 202; E E 211 or E 212; MATH 251</td>
</tr>
<tr>
<td>M E 357</td>
<td>System Dynamics</td>
<td>3</td>
<td>Mathematical modeling and analysis of linear dynamic systems; performance and design of simple controllers.</td>
<td>Fall 2011 Future; Fall 2011</td>
<td>CMPSC 200, E E 211 or E 212, MATH 251</td>
</tr>
<tr>
<td>M E 360</td>
<td>Mechanical Design</td>
<td>3</td>
<td>Specification of components such as shafts, bearings, and power transformers; optimal designs for operational, environmental, and manufacturing requirements.</td>
<td>Spring 2011</td>
<td>E MCH 315; CMPSC 200</td>
</tr>
<tr>
<td>M E 365</td>
<td>Materials Testing Laboratory</td>
<td>1</td>
<td>Laboratory for materials testing, property identification and modification, failure analysis, and metallurgical testing.</td>
<td>Summer 2008 Ending; Summer 2011</td>
<td>Concurrent: MATSE 259</td>
</tr>
</tbody>
</table>
failure analysis, and metallurgical testing.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: Prerequisite or concurrent: MATSE 259 Concurrent: MATSE 259

Effective: Spring 2009 Ending: Summer 2011
Prerequisite: M E 347 Concurrent: MATSE 259

Effective: Fall 2011 Future: Fall 2011
Prerequisite: M E 349 Prerequisite or concurrent: MATSE 259 Concurrent: MATSE 259

M E 368 Materials Properties and Characterization (4) Properties and characteristics of materials.
Effective: Spring 2008
Prerequisite: CHEM 110, E MCH 213

M E 370 Vibration of Mechanical Systems (3) Modeling and analysis of vibration characteristics of mechanical systems with single degree and multiple degrees of freedom. Vibration control by isolation, absorption and balancing.
Effective: Spring 2011
Prerequisite: E MCH 212, CMPSC 200, MATH 220, MATH 251

M E 375 Vibrations Laboratory (1) Experimental measurement and analysis of mechanical system dynamics.
Effective: Fall 2007
Prerequisite: or concurrent: M E 370, M E 345

M E 380 Machine Dynamics (3) Kinematic analysis of mechanisms such as linkages, flywheels, cams and gears. Dynamic forces and vibrations of mechanisms.
Effective: Spring 2009
Prerequisite: E MCH 212, MATH 251

M E 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Fall 2007
Prerequisite: prior approval of proposed assignment by instructor

M E 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2008

M E 400 Thermodynamics of Propulsion and Power Systems (3) Analysis and modeling of propulsion and power systems, including combustion, compressible flow through nozzles, chemical equilibrium, and moist air systems.
Effective: Fall 2007
Prerequisite: M E 300 and M E 320; Prerequisite or concurrent: M E 410

M E 401 Refrigeration and Air Conditioning (3) Theoretical principles, design, performance, and selection of various refrigeration and air-conditioning systems; building heat and cooling loads; solar heating.
Effective: Fall 2007
Prerequisite: M E 410

M E 402 Power Plants (3) A study of fossil-fuel steam generation and utility plants, including cogeneration, gas turbine, and combined cycles.
Effective: Fall 2007
Prerequisite: M E 410

M E 403 Polymer Electrolyte Fuel Cell Engines (3) Introduction to Fundamentals of Polymer Electrolyte Fuel Cells (PEFCs). Includes fundamentals of electrochemistry, thermodynamics, fluid mechanics, heat transfer materials, and manufacturing issues of PEFCs. A brief survey of other fuel cell types is also included.
Effective: Spring 2011
Prerequisite: M E 300 Prerequisite or concurrent: M E 320 Concurrent: M E 410 or equivalent

M E 404 Gas Turbines (3) Thermodynamic cycles relating to gas turbines; analysis and performance of compressors, combustion chambers, single- and multi-stage turbines; recent developments.
Effective: Fall 2007
Prerequisite: M E 320 or M E 302

M E 405 Indoor Air Quality Engineering (3) Prediction of the motion of contaminants (both gaseous particulate) in gas streams; analysis of ventilation systems and air pollution control systems; comparison of experimental sampling techniques.
Effective: Fall 2007
Prerequisite: M E 320 or equivalent

M E 406 (NUC E 406) Introduction to Statistical Thermodynamics (3) Statistical description of systems composed of large numbers of particles in the context of classical and quantum mechanics; basic concepts of probability theory and thermodynamics as they relate to statistical mechanics.
Effective: Fall 2007
Prerequisite: M E 300 or M E 201 or M E 302 or CH E 303; MATH 230 or MATH 231

M E 408 Energy Systems (3) Theory, analysis, design, selection, and application of energy conversion systems.
Effective: Fall 2007 Ending: Summer 2011
Prerequisite: ME 320, ME 410, ME 347

M E 408 Energy Systems (3) Theory, analysis, design, selection, and application of energy conversion systems.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: ME 320, ME 410

M E 410 Heat Transfer (3) Thermal energy transfer mechanisms: conduction (steady, transient), convection (internal, external), radiation; lumped parameter method; heat exchangers; introduction to numerical methods.
Effective: Spring 2011
Prerequisite: AERSP 308, AERSP 311, CE 360 or ME 320; CMPSC 200 or CMPSC 202; MATH 220 or NUC E 309; MATH 251

M E 411 Heat-Exchanger Design (3) Thermal design and application of different heat-exchanger types, including surface selection and design optimization.
Effective: Fall 2007
Prerequisite: ME 410

M E 420 Compressible Flow I (3) Introductory compressible flow (gas dynamics), mathematical background, and physical concepts of isentropic flow, shock waves, expansion waves, and applications.
Effective: Fall 2007
Prerequisite: ME 320

M E 421 Viscous Flow Analysis and Computation (3) Apply analytical and computational methods to solve the differential equations describing fluid flow. Incompressible external flows past objects and internal flows in pipes and ducts are some problems considered.
Effective: Spring 2011
Prerequisite: ME 201, ME 320, AERSP 308, AERSP 311 or CE 361; CMPSC 200 or CMPSC 201 or CMPSC 202; MATH 220; MATH 250 or MATH 251

M E 422 Principles of Turbomachinery (3) Application of Newton's laws of motion and basic laws of thermodynamics to analysis of fluid flow in turbomachinery.
Effective: Fall 2007
Prerequisite: ME 320

M E 427 Incompressible Aerodynamics (3) Analysis of lift and drag using potential flow theory, effects of viscosity on potential flow calculations, wind tunnel testing.
Effective: Fall 2007
Prerequisite: ME 320

M E 428 Applied Computational Fluid Dynamics (3) Introduction to theory and application of computational techniques for solving fluid flow and heat transfer.
Effective: Fall 2007 Ending: Summer 2011
Prerequisite: ME 320, ME 410, ME 347

M E 440W Mechanical Systems Design Project (3) Design and analysis of mechanical components and systems. Application of fundamental design and analysis methods to open ended engineering problems.
Effective: Fall 2007
Prerequisite: ENGL 202C, IE 312, ME 360, ME 370, ME 340

M E 441W Thermal Systems Design Project (3) Design of thermal systems through component design and/or selection, system simulation and optimization. Assessment of system economics and energy efficiency.
Effective: Fall 2007
Prerequisite: ENGL 202C, ME 340, ME 410

M E 442W Advanced Vehicle Design I (2) Part one of a two course sequence; applications of design and analysis methods to open-ended advanced transportation vehicles. Two semester course; satisfies Senior Design or ME Technical Elective requirements (when combined with M E 443W).
Effective: Summer 2010
Prerequisite: ENGL 202C, I E 312, M E 340, M E 360, M E 370 Concurrent: M E 410

M E 443W Advanced Vehicle Design II (1) Part two of a two course sequence; applications of design and analysis methods to open-ended advanced transportation vehicles. Two semester course; satisfies Senior Design or ME Technical Elective requirements (when combined with M E 442W).
Effective: Summer 2010
Prerequisite: M E 442W

M E 444 Engineering Optimization (3) Problem formulation, algorithms and computer solution of various engineering optimization problems.
Effective: Spring 2010
Prerequisite: MATH 220, MATH 230 or MATH 231, CMPSC 201 or CMPSC 202 or CMPSC 200

M E 445 Microcomputer Interfacing for Mechanical Engineers (4) Interfacing of electro-mechanical systems to microcomputers for data acquisition, data analysis and digital control.
Effective: Fall 2007
Prerequisite: M E 345 and seventh-semester standing

Effective: Spring 2011
Prerequisite: MATH 250 or MATH 251; M E 345 or NUC E 309

M E 448 Engineering Design Concepts (3) Engineering design and modelling, engineering economic analysis techniques, technical communication skills, project planning and design.
Effective: Spring 2009 Ending: Summer 2011
Prerequisite: M E 380 seventh-semester standing Concurrent: M E 367 M E 410

M E 448 Engineering Design Concepts (3) Engineering design and modelling, engineering economic analysis techniques, technical communication skills, project planning and design.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: M E 380 seventh-semester standing. Prerequisite or concurrent: M E 367, M E 410 Concurrent: M E 367 M E 410

M E 449 Mechanical Design Projects (3) Group or individual design projects in the areas of mechanical engineering.
Effective: Fall 2007
Prerequisite: M E 448, eighth-semester standing

Effective: Fall 2007
Prerequisite: M E 370, M E 345

M E 452 Vehicle Road Dynamics (3) Investigations of three-dimensional dynamics and design into the study of vehicle dynamics including tire forces, suspension, and stability.
Effective: Fall 2007
Prerequisite: M E 370

M E 455 Automatic Control Systems (3) Dynamic analysis of systems involving automatic control of position, speed, power, flow, pressure, temperature, and other physical quantities.
Effective: Fall 2007
Prerequisite: M E 320, M E 450

M E 456 (I E 456) Industrial Robot Applications (3) Introduction to robotics, with emphasis on robot selection, programming, and economic justification for manufacturing applications.
Effective: Spring 2011
Prerequisite: MATH 220; MATH 250 or MATH 251; I E 305 or M E 360; CMPSC 200 or CMPSC 201

M E 460 Advanced Machine Design Problems (3) Special machine design problems in unusual types of springs; gear problems and involutometry; cam design and application; multiple diameter shaft deflections and ball bearings.
Effective: Fall 2007
Prerequisite: M E 360, M E 370

M E 461 (E MCH 461) Finite Elements in Engineering (3) Computer modeling and fundamental analysis of solid, fluid, and heat flow problems using existing computer codes.
Effective: Spring 2011
Prerequisite: E MCH 213, E MCH 210H or E MCH 210; CMPSC 200, CMPSC 201 or CMPSC 202

M E 462 Lubrication in Machine Design (3) Lubricants and lubrication with applications to design aspects of machines and mechanisms including bearings, gears, cams, and automotive engines.
Effective: Fall 2007
Prerequisite: MATH 251, M E 360

M E 465 Introduction to Manufacturing Laboratory (1) A laboratory-based introduction to manufacturing processes including material removal, forming, casting and joining for metals and non-metals.
Effective: Summer 2008 Ending: Summer 2011
Concurrent: M E 468

M E 465 Introduction to Manufacturing Laboratory (1) A laboratory-based introduction to manufacturing processes
including material removal, forming, casting and joining for metals and non-metals.

Effective: Fall 2011 Future: Fall 2011
Prerequisite: Prerequisite or concurrent: M E 468 Concurrent: M E 468

M E 467 Applied Finite Element Analysis (3) Review of matrix algebra; discretization; finite element formulation; application of finite element computer codes.
Effective: Fall 2007 Ending: Summer 2011
Prerequisite: M E 410, M E 347

M E 467 Applied Finite Element Analysis (3) Review of matrix algebra; discretization; finite element formulation; application of finite element computer codes.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: M E 410 and M E 349

M E 468 Engineering for Manufacturing (3) Manufacturability, the selection of the most effective materials and processes, and quality assurance.
Effective: Spring 2009
Prerequisite: MATSE 259

M E 469 Metallic Manufacturing Processes (3) Principles of metal working and introduction to current theories; analysis of deformation, joining, and metal removal processes.
Effective: Summer 2008 Ending: Summer 2011
Prerequisite: Prerequisite or concurrent: M E 468

M E 469 Metallic Manufacturing Processes (3) Principles of metal working and introduction to current theories; analysis of deformation, joining, and metal removal processes.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: M E 349. Prerequisite or concurrent: M E 468

M E 470 (E MCH 470) Analysis and Design in Vibration Engineering (3) Application of Lagrange's equations to mechanical system modeling, multiple-degree-of-freedom systems, experimental and computer methods; some emphasis on design applications.
Effective: Spring 2008
Prerequisite: E MCH 212 or E MCH 212H; M E 370 or E SC 407H

Effective: Fall 2007
Prerequisite: M E 320, M E 370

M E 480 Mechanism Design and Analysis (3) Design and analysis of mechanical linkages including kinematic synthesis and dynamic analysis. Linkages for a variety of applications are considered.
Effective: Spring 2011
Prerequisite: E MCH 212. Prerequisite or Concurrent: CMPSC 200

M E 481 Introduction to Computer-Aided Analysis of Machine Dynamics (3) Techniques and formulations for computer based kinematic and dynamic analyses of machines.
Effective: Spring 2011
Prerequisite: E MCH 212; Prerequisite or concurrent: CMPSC 200

M E 491 Bioengineering Applications of Mechanical Engineering (3) Application of mechanical engineering knowledge in the context of life sciences.
Effective: Summer 2008 Ending: Summer 2011
Prerequisite: E E 211, M E 320, M E 357, E MCH 213 or permission of program

M E 491 Bioengineering Applications of Mechanical Engineering (3) Application of mechanical engineering knowledge in the context of life sciences.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: E E 211, M E 320, M E 357, E MCH 213, M E 349 or permission of program

M E 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

M E 494H Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.
Effective: Spring 2007
Prerequisite: Junior or senior status in the University Scholars Program

M E 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Fall 2007
Prerequisite: prior approval of proposed assignment by instructor

M E 496 Independent Studies (1-18) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

M E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
M E 497C (NUC E 497C) **Dynamic Modeling of Energy Systems** (3) To provide engineers with information about energy supplies, their future prospects, and how each can be used most effectively.
Effective: Summer 2011 Ending: Summer 2011

M E 497C (NUC E 497C) **Dynamic Modeling of Energy Systems** (3) To provide engineers with information about energy supplies, their future prospects, and how each can be used most effectively.

M E 497D **Automotive Engineering** (3) Introduces students to the analysis and design of automotive components and systems.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: M E 367, M E 357, M E 380

M E 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2008

Last Import from UCM: June 16, 2011 3:00 AM
**Mechanical Engineering Technology (MET)**

MET 097  **Special Topics**  (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
**Effective:** Spring 2007

MET 105  **Mechanical Systems**  (3) Mechanical Systems with Laboratory is an introductory course for Engineering Technology major students to broadly introduce Mechanical Engineering Technology.
**Effective:** Spring 2008

MET 107  **Computer Applications for Technologists**  (3) Programming spreadsheets, data bases and presentation software for solutions of technical problems; introduction to languages allowing creation of program macros.
**Effective:** Spring 2010
**Prerequisite:** MATH 081 or MATH 022 or MATH 026  **Concurrent:** MATH 026 MATH 081 or MATH 022 or

MET 197  **Special Topics**  (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
**Effective:** Spring 2007

MET 206  **Dynamics**  (3) Kinematics (particles and rigid bodies), kinetics, work-energy, impulse- momentum; select mechanisms associated with local industries.
**Effective:** Fall 2008
**Prerequisite:** MCH T 111  **Concurrent:** MATH 140 MATH 083 or

MET 210W  **Machine Design**  (3) Design machine elements including bearings, springs, levers, shafts, gears, belts, and small mechanical devices; writing skills and computer applications.
**Effective:** Spring 2008
**Prerequisite:** MET 206 or E MCH 212; MCH T 213 or E MCH 213 or ET 322 or EMET 322

MET 281  **Elementary Thermo- and Fluid Dynamics**  (4) Basic problems in compressible fluid flow. Laws of dynamics and thermodynamics, mechanical properties of fluids, elementary heat transfer.
**Effective:** Spring 2007
**Prerequisite:** or concurrent: MATH 083, PHYS 150 or PHYS 250

MET 296  **Independent Studies**  (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
**Effective:** Spring 2007

MET 297  **Special Topics**  (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
**Effective:** Spring 2007

MET 303  **Computer-Aided Design**  (3) Study of the fundamentals of computer-aided design and manufacturing systems; hands-on exercises utilizing a microcomputer-based CAD/CAM system.
**Effective:** Spring 2007
**Prerequisite:** junior standing

MET 306  **Computer-Aided Design**  (3) Computer-aided drafting and design; computer software solutions to mechanical engineering technology design problems.
**Effective:** Spring 2010
**Prerequisite:** MET 107; EG T 121 or EG T 201 and EG T 205

MET 308  **Computer Aided Solid Modeling and Analysis**  (3) Basic techniques necessary to perform Computer Aided Design and Analysis in three dimensions for machine components.
**Effective:** Spring 2007

MET 320  **Strength of Materials**  (3) Principles of stress and strain in 3D, indeterminate structures, failure theory, fatigue and fracture mechanics.
**Effective:** Spring 2008
**Prerequisite:** E MCH 213 or MCH T 213; MCH T 214

MET 321  **Analytical Techniques**  (2) A study of engineering methods of problem formulation and solution; includes differential methods, dimensional analysis, and graphical analysis.
**Effective:** Spring 2008
**Prerequisite:** E MCH 212 or ET 321, MATH 140  **Concurrent:** integral calculus

MET 330  **Thermodynamics**  (3) Introduction for technologists to the basic concepts and applications of thermodynamics.
**Effective:** Fall 2010  **Ending:** Summer 2011
**Prerequisite:** PHYS 250, PHYS 211 or PHYS 150 . Prerequisite or concurrent: CHEM 110, CHEM 111; MATH 141 or MATH 210

MET 330  **Thermodynamics**  (3) Introduction for technologists to the basic concepts and applications of thermodynamics.

The Pennsylvania State University
Effective: Fall 2011 Future: Fall 2011
Prerequisite: PHYS 250 or PHYS 211 or PHYS 150. Prerequisite or concurrent: CHEM 110; MATH 083 or MATH 140

MET 331W Heat Transfer  (4) Introduction for technologists to the basic concepts and applications of heat transfer. Includes a thermodynamics and heat transfer laboratory.
Effective: Fall 2007
Prerequisite: M E 300 or MET 330. Prerequisite or concurrent: CHEM 110; MATH 111, MATH 140

MET 332 Thermal Engineering A  (3) Basic thermodynamic units, concepts, properties of ideal gases and vapors, first and second laws, gaseous mixtures, one-dimensional compressible flow.
Effective: Summer 2007
Prerequisite: CHEM 110, CHEM 111, MATH 140

MET 333 Engineering Thermodynamics and Heat Transfer  (3) Basic thermodynamic concepts and definitions, first and second laws; properties of pure substances; cycle analysis; power generation; heat transfer.
Effective: Summer 2007
Prerequisite: CHEM 110, CHEM 111, MATH 140

MET 336 Engineering Fluid Mechanics  (3) Thermal and dynamic principles applied to fluid behavior, ideal, viscous, and compressible fluids under internal and external flow conditions.
Effective: Spring 2008
Prerequisite: E MCH 211 Concurrent: Chemistry Physics Calculus

Effective: Spring 2010 Ending: Fall 2011
Prerequisite: MCH T 214; EET 105 or EET 100 or E 211; PHYS 151, PHYS 212 or PHYS 251 Concurrent: PHYS 251 PHYS 151 PHYS 212

Prerequisite: EET 105 or EET 100 or E 211 or EET 320 and PHYS 151, PHYS 211 or PHYS 250 Concurrent: PHYS 212 or PHYS 251 PHYS 151

MET 342 Instrumentation  (2) Measuring system responses of first and second order instruments; fundamentals of mechanical measurements, including pressure, temperature, fluid flow, etc.
Effective: Spring 2007

MET 358 Process Design Engineering  (3) Introduction to process design for production applications from job shop to world-class manufacturing environments.
Effective: Spring 2010
Prerequisite: IET 321 or IET 215 and IET 216

MET 365 Design of Machine Elements  (3) Design of structural and mechanical elements with emphasis on theories of fatigue failure.
Effective: Fall 2008
Prerequisite: E MCH 213 or IET 322

MET 397 Special Topics  (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2007

MET 403 Advanced Mechanical Design  (3) Continuation of strength of materials and machine design, with emphasis on advanced methods of design and analysis of machine elements.
Effective: Spring 2007
Prerequisite: MET 365

MET 415 Finite Element Analysis Applications I  (3) Solutions of advanced engineering design problems using finite elements. Intended for engineering technologists.
Effective: Spring 2007
Prerequisite: MET 320; Concurrent: MET 306

MET 417 Finite Element Analysis  (3) Formulation and computer implementation of finite element models for solving problems in heat transfer, fluid flow, and solid mechanics.
Effective: Spring 2007
Prerequisite: MET 365

MET 418 Finite Element Analysis for Plastics Design  (3) Solutions of advanced engineering problems using finite element and finite difference techniques; advanced topics in computer-aided manufacturing; problems in optimization and design.
Effective: Spring 2007
Prerequisite: MCH T 213, PL ET 232, PL ET 235. Prerequisite or concurrent: PL ET 350

MET 425 Finite Element Analysis Applications II  (3) Solutions of advanced engineering design problems using finite element methods.
Effective: Spring 2007
Prerequisite: MET 415

The Pennsylvania State University
MET 431 Heat Transfer (3) Basic principles of conduction, convection, and radiation with applications.
Effective: Spring 2007
Prerequisite: MET 332

MET 432 Fluid Power (3) Principles of fluid flow, hydraulic components, and hydraulic circuits having application to industry.
Effective: Fall 2007
Prerequisite: M E 300 or MET 330; MET 331W

MET 435 Building Energy Systems (3) Analysis and design of components and systems for building heating and cooling; emphasis on applying the thermal sciences.
Effective: Spring 2007
Prerequisite: MET 332, MET 336

MET 438 Thermal Engineering B (3) Applied thermodynamics of power cycles; refrigeration and air conditioning cycles; combustion; psychometrics; and gas mixtures.
Effective: Spring 2007
Prerequisite: MET 332

MET 440 Vibrations for Technologists (3:) Principles of basic vibration theory, vibration measurement, data acquisition and analysis, and the effective presentation of vibration data.
Effective: Spring 2008 Ending: Summer 2011
Prerequisite: E MCH 212; MATH 231 and MATH 250 or MATH 211; MET 341; MET 415

MET 441 Vibration Analysis (4) Analysis of motion arising from lateral and torsional vibrations of systems; free and forced vibrations; damping; isolation; balancing.
Effective: Spring 2008
Prerequisite: E MCH 212, MET 321

MET 448 Mechanical Engineering Technology Laboratory B (2) Laboratory exercises in the areas of instrumentation, strength of materials, fluid flow, vibrations, thermodynamics, etc.
Effective: Spring 2007
Prerequisite: MET 336, MET 342, ENGL 202C and senior standing

MET 450 Manufacturing Engineering (3) Design, analysis and operational issues related to improved productivity and efficiency in modern manufacturing systems.
Effective: Spring 2007
Prerequisite: MET 358

MET 452 Rapid Prototyping (3) Introduction to the production of prototypes directly from computer models.
Effective: Fall 2007
Prerequisite: IET 216, MET 306

MET 454 Automatic Controls (3) An introduction to basic automatic control theory, practical applications of automatic controls to typical industrial machinery, HVAC equipment, etc.
Effective: Spring 2008 Ending: Fall 2011
Prerequisite: E MCH 212, MET 321

MET 461 Advanced Machine Design (3) Stress analysis, material selection, design of machine elements, design of connections, and computer-aided design.
Effective: Spring 2007
Prerequisite: MET 210W, MET 415

MET 462 Internal Combustion Engine Design (3) The effect of operation requirements on design and construction of internal combustion engines; study of support systems and emissions control.
Effective: Spring 2007
Prerequisite: MET 332

MET 470 Materials Engineering (3) Study of material selection, material properties, material test methods, and special topics.
Effective: Summer 2007 Ending: Summer 2011
Prerequisite: CHEM 110, CHEM 111, MET 320
MET 470 **Materials Engineering** (3) Study of material selection, material properties, material test methods, and special topics.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: CHEM 110, CHEM 111 . Prerequisite or concurrent:MET 415

MET 480 **Senior Capstone** (1) Career and professional topics; development of year-long senior project with industry.
Effective: Fall 2007 Ending: Summer 2011
Prerequisite: M E 300 or MET 330;MET 415

MET 480 **Senior Capstone** (1) Career and professional topics; development of year-long senior project with industry.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: M E 300 or MET 330 . Prerequisite or concurrent:MET 415

MET 481 **Project Design** (1) Design of system or machine, including decision making, engineering analysis, layout, detail drawings, specifications, construction.
Effective: Spring 2007
Prerequisite: MET 365, MET 431 and senior standing

MET 485 **Senior Industrial Project** (3) Individual or group design projects in mechanical design or materials.
Effective: Spring 2007 Ending: Summer 2011
Prerequisite: MET 425, MET 470, MET 480

MET 485 **Senior Industrial Project** (3) Individual or group design projects in mechanical design or materials.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: MET 331W, MET 470, MET 480 . Prerequisite or concurrent:MET 425

MET 486 **Project Design** (3) Design of system or machine, including decision making, engineering analysis, layout, detail drawings, specifications, construction.
Effective: Spring 2007
Prerequisite: MET 365, MET 431, MET 481 and senior standing

MET 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica or internships. Written and oral critique of activity required.
Effective: Spring 2007
Prerequisite: prior approval of proposed assignment by instructor

MET 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2007

MET 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2007

MET 497B **Energy Conservation Systems** (3) Analyze processes and systems for energy conversion, including power, refrigeration and air conditioning cycles, thermoelectric, and fuel cells.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: MET 330

Last Import from UCM: June 16, 2011 3:00 AM
Mechanical Technology (MCH T)

MCH T 111 Mechanics for Technology: Statics (3) Forces; moments; resultants; two- and three-dimensional equilibrium of force systems; friction; centroids and moments of inertial of areas.
Effective: Fall 2008
Prerequisite: MATH 026 or MATH 081

MCH T 112 Statics Laboratory (1) Laboratory experimentation associated with basic engineering mechanics principles and concepts including forces, moments, equilibrium, trusses, frames, friction, and centroids.
Effective: Spring 2008
Prerequisite: MATH 026 or MATH 081
Concurrent: MCH T 111

MCH T 212 Introduction to Dynamics (3) Absolute and relative motion related to particles and simple linkages. Force-mass-acceleration, work-energy, and impulse-momentum solution techniques.
Effective: Spring 1996
Prerequisite: MCH T 111. Prerequisite or concurrent: MATH 083

MCH T 213 Strength and Properties of Materials (3) Axial stress and strain; shear; torsion; beam stresses and deflections; combined axial and bending stresses; columns, ductility, resilience, and toughness.
Effective: Fall 2008
Prerequisite: MCH T 111, MATH 026 or MATH 081

MCH T 214 Strength and Properties of Materials Laboratory (1) Measurement of mechanical properties of materials; structural testing, data acquisition and analysis; technical laboratory report writing.
Effective: Spring 2010
Prerequisite: MCH T 213 Concurrent: MCH T 213

MCH T 296 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 1997
Medieval Studies (MEDVL)

MEDVL 107 (GH;IL) (HIST 107) Medieval Europe (3) Rise and development of the civilization of medieval Europe from the decline of Rome to 1500. Effective: Spring 2006

MEDVL 108 (GH;IL) Medieval Civilization (3) An interdisciplinary introduction to literature, art, and thought of the Middle Ages. Effective: Spring 2006

MEDVL 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 1995

MEDVL 199 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

MEDVL 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 1994

MEDVL 299 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

MEDVL 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Summer 1996 Prerequisite: prior approval of proposed assignment by instructor

MEDVL 399 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

MEDVL 411 (IL) (HIST 411) Medieval Britain (3) Political, cultural, and economic history of Britain from circa 400 to 1485 with an emphasis on the kingdom of England. Effective: Spring 2006 Prerequisite: 6 credits in European history or medieval studies

MEDVL 413 (IL) (HIST 413) Medieval Celtic Studies (3) Celtic civilization from antiquity to the end of the middle ages. Effective: Spring 2006 Prerequisite: 3 credits in medieval studies or in language literature or European history of the medieval period

MEDVL 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 1994

MEDVL 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Fall 2007

MEDVL 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Summer 2002 Prerequisite: prior approval of proposed assignments by instructor

MEDVL 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Spring 1995

MEDVL 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 1995

MEDVL 499 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005
Meteorology (METEO)

METEO 002 (GN) Our Changing Atmosphere: Personal and Societal Consequences (3) A survey of meteorology emphasizing how the nature of our lives, individually/societally, depends upon atmospheric structure, quality, and processes.
Effective: Spring 2003

METEO 003 (GN) Introductory Meteorology (3) Nontechnical treatment of fundamentals of modern meteorology and the effects of weather and climate. A student who took METEO 002 may take the laboratory part of this course for 1 credit only.
Effective: Spring 2003

METEO 004 (GN) Weather and Risk (3) Non-technical introduction to the science and historical development of meteorology, and the role of weather forecasting as a tool for risk management by individuals, businesses, and societies.
Effective: Summer 2007

METEO 005 (GN) Severe and Unusual Weather (3) Non-technical introduction to the physical processes important in the formation of various severe and unusual weather phenomena.
Effective: Summer 2011

METEO 022 The Oceans (2) A survey of oceanic properties and processes, with emphasis on the mechanisms of tides, waves, and ocean currents.
Effective: Fall 1983

METEO 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2010

METEO 101 (GN) Understanding Weather Forecasting (3) Fundamental principles of synoptic and physical meteorology, satellite and radar imagery, and data analysis in the setting of mid-latitude weather forecasting.
Effective: Fall 2001

METEO 122 (GN) (AGECO 122) Atmospheric Environment: Growing in the Wind (3) Students will learn about the effect of weather on plants, animals, and humans.
Effective: Summer 2006

METEO 200A Introduction to Weather Analysis I (1.5) Introduction to the collection, display, and application of weather observations used by the operational meteorologist. Students who have passed METEO 201 may not schedule this course for credit.
Effective: Fall 1998

METEO 200B Introduction to Weather Analysis II (1.5) Introduction to the collection, display, and application of numerical weather forecasts used by the operational meteorologist. Students who have passed METEO 201 may not schedule this course for credit.
Effective: Fall 1998
Prerequisite: METEO 200A

METEO 201 Introduction to Weather Analysis (3) Introduction to the collection, display, and application of weather observations and numerical forecasts used by the operational meteorologists. Students who have passed both METEO 200A and 200B may not schedule this course for credit.
Effective: Spring 1999

METEO 215 Weather Forecast Preparation Laboratory (0.5 per semester/maximum of 4) Forecast methods/data discussed prior to nightly weather forecast entry. Satisfactory performance will be determined by attendance and forecast accuracy.
Effective: Spring 2011
Concurrent: METEO 101 METEO 200A and METEO 200B or METEO 201

METEO 241 Fundamentals of Tropical Forecasting (3) Applying atmospheric principles to the tropics, with an emphasis on the development, structure, prediction and destructive impact of hurricanes.
Effective: Spring 2004
Prerequisite: METEO 101

METEO 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

The Pennsylvania State University
METEO 297 Special Topics (1-6) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1989

METEO 300 Fundamentals of Atmospheric Science (4) An introduction to the fundamentals of atmospheric dynamics, physics, and chemistry.
Effective: Fall 2009
Prerequisite: CHEM 110, PHYS 211  Concurrent: MATH 230 or MATH 231

METEO 361 Fundamentals of Mesoscale Weather Forecasting (3) Applying atmospheric principles to small-scale weather systems, with an emphasis on the conceptual modeling and short-range prediction of severe thunderstorms.
Effective: Spring 2004
Prerequisite: METEO 101

METEO 395A Internship in Meteorological Communication (3 per semester/maximum of 6) Meteorology internship focusing on communication of weather forecasts or other atmospheric information.
Effective: Summer 2010
Prerequisite: METEO 101 or METEO 200A and METEO 200B or METEO 201 and METEO 300

METEO 395B Private Sector Meteorology Internship (3 per semester/maximum of 6) Private sector internship focusing on atmospheric problems and applications.
Effective: Summer 2010
Prerequisite: METEO 300

METEO 395C Internship in Meteorological Operations (3 per semester/maximum of 6) Internship focusing on time-sensitive operational meteorological applications such as weather or climate forecasts.
Effective: Summer 2010
Prerequisite: METEO 101 or METEO 200A and METEO 200B or METEO 201 and METEO 300

METEO 395D International Meteorological Internship (3 per semester/maximum of 6) An internship in an international setting that focuses on applying meteorological knowledge.
Effective: Summer 2010
Prerequisite: METEO 101 or METEO 200A and METEO 200B or METEO 201 and METEO 300

METEO 395E Off-Campus Meteorological Research Internship (3 per semester/maximum of 6) Meteorological internship focusing on an off-campus research project.
Effective: Summer 2010
Prerequisite: METEO 101, METEO 241, METEO 361

METEO 410 Advanced Topics in Weather Forecasting (3) Exploring highly specialized topics and techniques in weather forecasting that span from mesoscale to planetary spatial scales and short-term to long-range time scales.
Effective: Spring 2004
Prerequisite: METEO 101, METEO 241, METEO 361

METEO 411 Synoptic Meteorology Laboratory (4) Techniques of analyzing synoptic scale weather situations; introduction to weather forecasting.
Effective: Spring 2004
Prerequisite: METEO 101 or METEO 200A and METEO 200B or METEO 201; MATH 230 or MATH 231 Prerequisite or concurrent: METEO 421 and METEO 431

METEO 413 Map Analysis (3) Analysis of actual surface weather observations, with emphasis on the Norwegian cyclone model, missing or bad data, and mesoscale phenomena.
Effective: Fall 2002
Prerequisite: METEO 411

METEO 414 Mesoscale Meteorology (4) A survey of conceptual models and analysis techniques for mesoscale atmospheric features.
Effective: Summer 1996
Prerequisite: METEO 411

METEO 415 Forecasting Practicum (3) Modern techniques in weather analysis and forecasting.
Effective: Spring 2011
Prerequisite: METEO 411

METEO 416 Advanced Forecasting (3) Competitive, simulated, operational, real-time forecasting is covered.
Effective: Spring 1998
Prerequisite: METEO 414, METEO 415

METEO 418W Topics in Mesoscale Meteorology (3) Topics in mesoscale meteorology will be investigated in an independent study environment through computer-based modules, papers, and semester project.
Effective: Fall 1995
Prerequisite: METEO 414

METEO 419 Air Quality Forecasting (3) Issues relating to the prediction and dispersion of air pollutants as discussed.
Effective: Summer 2010
Prerequisite: CHEM 110 and METEO 003 or METEO 101 or METEO 200A and METEO 201B or METEO 201

METEO 421 Atmospheric Dynamics (4) Balanced and unbalanced flows, vorticity, circulation and potential vorticity, an introduction to wave dynamics and stability analysis, and a quantitative discussion of the general circulation.
METEO 422 Advanced Atmospheric Dynamics (3) Survey of advanced dynamical topics including instabilities, numerical modeling, and others of current interest.
Effective: Fall 2009
Prerequisite: METEO 421

METEO 431 Atmospheric Thermodynamics (3) Classical thermodynamics applied to both the dry and the moist atmosphere.
Effective: Spring 2001
Prerequisite: PHYS 212

METEO 434 Radar Meteorology (3) Fundamental operating principles of radars, with application to observation of meteorological phenomena.
Effective: Fall 2001
Prerequisite: METEO 437 Concurrent: METEO 414

METEO 436 Radiation and Climate (3) Elements of earth-sun geometry, radiative transfer, photochemistry, remote sensing of the atmosphere, physical climatology, climate forcing.
Effective: Fall 2009 Concurrent: METEO 431

METEO 437 Atmospheric Chemistry and Cloud Physics (3) Properties of aerosols and clouds, cloud nucleation and precipitation processes, atmospheric electricity, cloud and precipitation chemistry, biogeochemical cycles.
Effective: Fall 2009
Prerequisite: METEO 431

METEO 440W Principles of Atmospheric Measurements (3) Theory and practices used in measurement and analysis of meteorological variables.
Effective: Fall 2010
Prerequisite: METEO 300, METEO 431, STAT 301 orSTAT 401 orE B F 472

METEO 445 Laboratory in Atmospheric Physics I (1) Measurement practices, data analysis and management, radiometry lidars and radars, trace gas measurements.
Effective: Spring 1991
Prerequisite: or concurrent:METEO 436

METEO 446 Laboratory in Atmospheric Physics II (1) Experimental practices in cloud and aerosol physics, atmospheric electricity, atmospheric chemistry, radar meteorology.
Effective: Spring 1991
Prerequisite: or concurrent:METEO 437

METEO 448 Stormwater Hydrology (3) Relationship between surface runoff, rainfall and water chemistry during rainfall events for the purpose of assessing urbanization, non-point source contamination.
Effective: Spring 2002

METEO 451 Introduction to Physical Oceanography (3) Air-sea interaction, wind-driven and thermohaline circulations, upwelling, El Nino, waves, and tides.
Effective: Spring 2007
Prerequisite: METEO 421

METEO 452 Tropical Meteorology (3) Atmospheric processes in the tropics; mass, heat, energy, momentum, and water vapor budgets, cumulus convection, hurricanes and other disturbances.
Effective: Fall 1983
Prerequisite: METEO 411, METEO 421

METEO 454 Introduction to Micrometeorology (3) Physical processes and their measurement in the lowest layers of the atmosphere; application to hydrology, plant systems, and air pollution.
Effective: Fall 2009
Prerequisite: METEO 421 andMETEO 431 orEME 301

METEO 455 Atmospheric Dispersion (3) The basic principles of atmospheric flow, introduction to the modeling of turbulent diffusion, and the use of EPA dispersion models.
Effective: Fall 2009
Prerequisite: EME 301, C E 360, M E 320, METEO 454, METEO 456 orEGEE 470

METEO 460 Weather Risk and Financial Markets (3) This course will introduce the role that weather plays as a source of financial and operational risk for businesses, market and other institutions.
Effective: Fall 2010 Ending: Fall 2011
Prerequisite: METEO 411;E B F 472;E B F 301 orEM SC 473

METEO 460 Weather Risk and Financial Markets (3) This course will introduce the role that weather plays as a source of financial and operational risk for businesses, market and other institutions.
Prerequisite: METEO 411;E B F 472 orSTAT 301 orSTAT 401;E B F 301 orE B F 473

METEO 465 Middle Atmosphere Meteorology (3) A topical survey of physical, chemical, and dynamical processes at work in the stratosphere and mesosphere (middle atmosphere).
Effective: Spring 1988

The Pennsylvania State University
Prerequisite: METEO 421, METEO 431

METEO 466 Planetary Atmospheres (3) A survey of planetary atmospheres and the chemical and physical processes by which they form and evolve.
Effective: Spring 2001
Prerequisite: MATH 141, PHYS 211

METEO 469 From Meteorology to Mitigation: Understanding Global Warming (3) Introduction to global warming and climate change: the basic, science, projected impacts, and approaches to mitigation.
Effective: Summer 2010
Prerequisite: MATH 110

METEO 470 Climate Dynamics (3) The fundamental principles that govern Earth's climate and their relevance to past and future climate change.
Effective: Spring 2002
Prerequisite: METEO 300, METEO 421, METEO 431 Concurrent: METEO 436

METEO 471W Observing Meteorological Phenomena (3) Teaching the observational and interpretative skills needed to read the sky.
Effective: Spring 1999
Prerequisite: METEO 421. Prerequisite or concurrent: METEO 436

METEO 473 Application of Computers to Meteorology (3) Application of statistical and numerical methods to practical problems in meteorology.
Effective: Spring 2008
Prerequisite: CMPSC 101, CMPSC 201 or CMPSC 202

METEO 474 Computer Methods of Meteorological Analysis and Forecasting (3) Distribution of scalars and vectors; sampling; regression and correlation in two and three dimensions; time series, statistical forecasting; forecast verification.
Effective: Summer 2010
Prerequisite: STAT 301 or STAT 401 or E B F 472

METEO 477 (E E 477) Fundamentals of Remote Sensing Systems (3) The review of fundamental physical properties leads into discussions of various techniques, including imaging, spectroscopy, radiometry, and active sensing.
Effective: Spring 2008
Prerequisite: E E 330 or METEO 436

METEO 480M Undergraduate Research (3) A research thesis will be prepared. A written and oral presentation required.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: junior or senior standing as a Meteorology Major

METEO 480W Undergraduate Research (3) A research thesis will be prepared. A written and oral presentation required.
Prerequisite: junior or senior standing as a Meteorology Major

METEO 484 Weather Communications Apprenticeship (3) Mentor-led course that focuses on a specific issue of problem in weather communications related to broadcasting, climate or industry.
Effective: Summer 2003
Prerequisite: METEO 481, METEO 482 and METEO 483

METEO 486 Pennsylvania Climate Studies (1-2 per semester/maximum of 3) An overview of the Pennsylvania State Climate Office and an introduction to various aspects of its operations.
Effective: Spring 2011
Prerequisite: METEO 101 or METEO 200A and METEO 200B or METEO 201

METEO 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
METEO 495A Meteorology Communications Internship (3 per semester/maximum of 6) Internship focusing on communication of weather forecasts or other meteorological information. Effective: Summer 2010 Prerequisite: METEO 411

METEO 495B Meteorology Private Sector Internship (3 per semester/maximum of 6) Internship focusing on meteorological problems and applications pursued by private sector companies. Effective: Summer 2010 Prerequisite: METEO 411

METEO 495C Meteorological Operations Internship (3 per semester/maximum of 6) Internship focusing on time-sensitive meteorological applications such as weather or climate forecasts that are produced. Effective: Summer 2010 Prerequisite: METEO 411

METEO 495D Meteorological International Internship (3 per semester/maximum of 6) Meteorological internship in an international setting. Effective: Summer 2010 Prerequisite: 6 credits of 400-level Meteorology coursework

METEO 495E Meteorological Off-Campus Research Internship (3 per semester/maximum of 6) Off-campus meteorological internship focusing on a research project. Effective: Summer 2010 Prerequisite: 9 credits of 400-level Meteorology coursework

METEO 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

METEO 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

METEO 497A Television Meteorology (1) The main objective of this 7-week course will be to hone presentation skills while applying meteorological knowledge. Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

METEO 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

Last Import from UCM: June 16, 2011 3:00 AM
Microbiology (MICRB)

MICRB 106 (GN) Elementary Microbiology (3) Importance of microorganisms in health and disease, agriculture, and industry; descriptive course for students not planning advanced study in microbiology. The combination of MICRB 106 GN and 107 GN must be taken to receive General Education credit in biology. Students must take a combination of MICRB 106 GN and 107 GN to receive General Education credit in biology. Effective: Spring 2002

Prerequisite: or concurrent: MICRB 106

MICRB 107 (GN) Elementary Microbiology Laboratory (1) Selected techniques used to observe, identify and count bacteria; effects of chemical and physical agents on microorganisms. The combination of MICRB 106 GN and 107 GN must be taken to receive General Education credit in biology. Students must take a combination of MICRB 106 GN and 107 GN to receive General Education credit in biology. Effective: Spring 2002

Prerequisite: admission to 2-MLT program

MICRB 150 Introductory Medical Laboratory Technology (4) Introduction to basic principles and procedures of clinical laboratory work. Practicum emphasizes proper collection, handling, and preparation of biological samples. Effective: Spring 2000

Prerequisite: admission to 2-MLT program

MICRB 151A Seminar and Practicum for Medical Laboratory Technicians--Clinical Chemistry (7) Basic principles and procedures for measuring chemical components of blood and other body fluids. Effective: Summer 2007

Prerequisite: BIOL 141, CHEM 202, MICRB 150, MICRB 201, MICRB 202

MICRB 151C Seminar and Practicum for Medical Laboratory Technicians--Hematology (6) Red and white blood cell identification and enumeration. Related procedures for diagnosing normal or disease states. Effective: Summer 2007

Prerequisite: BIOL 141, CHEM 202, MICRB 150, MICRB 201, MICRB 202

MICRB 151D Seminar and Practicum for Medical Laboratory Technicians--Immunohematology (4) Immunologic considerations necessary for the transfusion of blood and blood products. Effective: Summer 2007

Prerequisite: BIOL 141, CHEM 202, MICRB 150, MICRB 201, MICRB 202

MICRB 151E Seminar and Practicum for Medical Laboratory Technicians--Urinalysis (2) Identification of cellular and crystalline urinary sediments. Qualitative chemical analysis of urine. Effective: Summer 2007

Prerequisite: BIOL 141, CHEM 202, MICRB 150, MICRB 201, MICRB 202

MICRB 151F Seminar and Practicum for Medical Laboratory Technicians--Immunology/ Serology (2) Antigen-antibody interactions of diagnostic importance; methods used to identify and quantify antigen-antibody complexes. Effective: Summer 2007

Prerequisite: BIOL 141, CHEM 202, MICRB 150, MICRB 201, MICRB 202

MICRB 151W Seminar and Practicum for Medical Laboratory Technicians--Clinical Microbiology (6) Properties of normal and abnormal human microbial flora and procedures for their identification. Effective: Summer 2007

Prerequisite: BIOL 141, CHEM 202, MICRB 150, MICRB 201, MICRB 202

MICRB 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

MICRB 201 Introductory Microbiology (3) Elementary principles of microbial and viral structure, reproduction, genetics and physiology; relationship to food, water, soil, industrial and disease processes. Effective: Summer 2007

Prerequisite: CHEM 110

MICRB 201H Introductory Microbiology (3) Elementary principles of microbial and viral structure, reproduction, genetics and physiology; relationship to food, water, soil, industrial and disease processes. Effective: Summer 2007

Prerequisite: CHEM 110

MICRB 202 Introductory Microbiology Laboratory (2) Qualitative and quantitative techniques with regard to recognition of bacteria and their processes on a microscopic, colonial, and physiological basis. Effective: Summer 2007

Prerequisite: CHEM 110. Prerequisite or concurrent: MICRB 201

MICRB 251 (BM B 251) Molecular and Cell Biology I (3) Biomolecules, genetic mechanisms, organization of cells and their organelles, DNA replication, protein synthesis, membranes, the cell nucleus, energy conversion. Effective: Summer 2007

Prerequisite: CHEM 112

MICRB 252 (BM B 252) Molecular and Cell Biology II (3) Continuation of BIOCH/B M B/MICRB 251: cytoskeleton, cell...
growth, division, adhesion, signalling, germ cells, differentiation, immune system, nervous system, plant cells.

Effective: Spring 1995
Prerequisite: MICRB 251

MICRB 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

MICRB 398 Special Topics (1-9) Formal courses give infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2009

MICRB 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

MICRB 401 Microbial Physiology and Structure (3) Physiology and structure of bacteria important in microbiological research. Designed for science majors.
Effective: Summer 2007
Prerequisite: CHEM 202 or CHEM 210; MICRB 201, MICRB 202

MICRB 405A Seminar and Practicum in Medical Technology (8) Chemistry. Fundamental principles and the quantitative measurement of chemical components in the blood and other body fluids.
Effective: Fall 1987

MICRB 405B Seminar and Practicum in Medical Technology (1) Urinalysis. Identification of cellular and noncellular urinary sediments. Qualitative chemical analysis of urine.
Effective: Fall 1988

MICRB 405C Seminar and Practicum in Medical Technology (6) Hematology. Principles of red and white blood cell development. Identification of normal and pathological conditions.
Effective: Fall 1988

MICRB 405D Seminar and Practicum in Medical Technology (5) Immunohematology. Immunologic and genetic principles governing the transfusion of blood and blood products.
Effective: Fall 1987

MICRB 405E Seminar and Practicum in Medical Technology (7) Microbiology. Identification of normal and abnormal microbial flora from various locations on and within the human body.
Effective: Fall 1987

MICRB 405F Seminar and Practicum in Medical Technology (3) Serology-Immunology. Immunological principles and their application in the identification of present or past disease states of the human.
Effective: Fall 1987

MICRB 408 Laboratory Instructional Practice (1-2) Participation in the instruction of undergraduate laboratory courses, including classroom preparation; discussion of principles and objectives of each exercise.
Effective: Spring 1994
Prerequisite: 8 credits in microbiology and permission of department head

MICRB 410 Principles of Immunology (3) Theories of immunity; focuses on the basis for the acquired immune response at the organ, cell, and molecular levels.
Effective: Summer 1998
Prerequisite: B M B 251, MICRB 201 or MICRB 251

MICRB 411 Survey of Microbiology Literature (1 per semester) An introduction to readings and oral presentations in microbiology.
Effective: Spring 1994
Prerequisite: 8 credits in microbiology courses

MICRB 412 Medical Microbiology (3) Characteristics, methods of identification, and pathogenesis of bacteria that cause human disease; principles of disease dynamics and control.
Effective: Fall 1993
Prerequisite: MICRB 201

MICRB 413 Microbial Diversity (2) survey of microorganisms having special adaptive mechanisms for life in common and unique environments; topics include ecology, evolution, and bioremediation.
Effective: Spring 1997
Prerequisite: MICRB 201, MICRB 202

MICRB 415 General Virology: Bacterial and Animal Viruses (3) The interaction of different types of viruses with bacterial and animal cells, including mechanisms of infection and viral synthesis.
Effective: Summer 2000

The Pennsylvania State University
Undergraduate Bulletin Archive - June, 2011  

Prerequisite: B M B 251, B M B 252 or BIOL 110, BIOL 230W, MICRB 201

MICRB 416 (BIOTC 416) **Microbial Biotechnology** (2) Fundamentals of applied biotechnology; the use of microorganisms in the synthesis of biologically-important and industrially-useful products.  
Effective: Spring 2009  
Prerequisite: MICRB 201, MICRB 202, B M B 442 or MICRB 442

MICRB 421W **Laboratory of General and Applied Microbiology** (3) Laboratory exercises demonstrating fundamental techniques and principles of experimentation of general and applied microbiology.  
Effective: Spring 2001  
Prerequisite: MICRB 201, MICRB 202

MICRB 422 **Medical Microbiology Laboratory** (2) Laboratory exercises demonstrating properties and classification of medically important microorganisms and techniques used in their identification.  
Effective: Fall 1993  
Prerequisite: MICRB 202 Concurrent: MICRB 412

MICRB 432 (B M B 432, VB SC 432) **Advanced Immunology: Signaling in the Immune System** (3) The study of signaling pathways that regulate the immune response.  
Effective: Fall 2007  
Prerequisite: B M B 400, MICRB 410

MICRB 435 (B M B 435, VB SC 435) **Viral Pathogenesis** (2) A study of the molecular, immunological and pathological aspects of viral diseases as well as laboratory methods of diagnosis.  
Effective: Fall 2007  
Prerequisite: MICRB 201, B M B 251 and B M B 252 or BIOL 110 and BIOL 230W

MICRB 442 (B M B 442) **Laboratory in Proteins, Nucleic Acids, and Molecular Cloning** (3) Laboratory in enzyme purifications and assay techniques; nucleic acid isolation and characterization, including plasmid preparation.  
Effective: Spring 2009  
Prerequisite: B M B 251, BIOL 230W or MICRB 201; CHEM 202 or CHEM 210. Prerequisite or concurrent: B M B 211 or B M B 401

MICRB 447 **Laboratory in Molecular Immunology** (1) Laboratory in molecular techniques to assay antigens, antibodies, and receptor sites.  
Effective: Fall 1995  
Prerequisite: MICRB 410

MICRB 450 (B M B 450) **Microbial/Molecular Genetics** (2) Genetic phenomena, with emphasis on molecular mechanisms: gene transfer, recombination, gene conversion, gene fusion, suppression, transposons.  
Effective: Fall 2010  
Prerequisite: BIOL 222 or BIOL 322, MICRB 201

MICRB 460 (B M B 460) **Cell Growth and Differentiation** (3) Mechanisms and regulation of protein trafficking, organelle biosynthesis, cell development, signaling and cell cycle control. Emphasizes experimental design and analysis.  
Effective: Spring 2006  
Prerequisite: B M B 252

MICRB 480 (B M B 480) **Tumor Viruses and Oncogenes** (3) Oncogenes, DNA and RNA tumor viruses, and relevant experimental techniques with emphasis on molecular basis of carcinogenesis and gene regulation.  
Effective: Spring 2001  
Prerequisite: or concurrent: MICRB 415, MICRB 435 or MICRB 460

MICRB 496 **Independent Studies** (1-18) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Fall 1983

MICRB 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Fall 1995

MICRB 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.  
Effective: Fall 1995

MICRB 498A (B M B 498A) **Antibiotics: Development and Resistance** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.  

MICRB 498A (B M B 498A) **Antibiotics: Development and Resistance** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.  

MICRB 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.  
Effective: Summer 2005

The Pennsylvania State University
Mineral Engineering (MIN E)

MIN E 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1999

MIN E 415 Management in the Mineral Industries for Environmental, Legal, and Health and Safety Problems (3)
Mineral industries management and labor structure analyzed, with emphasis on environmental, health and safety, and legal aspects.
Effective: Spring 1999
Prerequisite: sixth-semester standing

MIN E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

MIN E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1999

Last Import from UCM: June 16, 2011 3:00 AM
Mineral Processing (MN PR)

MN PR 301 Elements of Mineral Processing (3) Introduction to mineral process engineering. Sampling, sizing, comminution, physical and chemical processes, applications to industrial practice. Pollution control.
Effective: Summer 2007
Prerequisite: CHEM 110 or CHEM 106; MATH 141

MN PR 401 Mineral Process Engineering (3) Unit operations for processing particulate materials: comminution, screening, classification, slurry pumping, thickening, filtration, etc.; application to mineral processing plant design.
Effective: Spring 2001
Prerequisite: MN PR 301, MATH 250 or MATH 251

MN PR 413 Mineral Processing Laboratory (1) A laboratory study of the chemical and physical principles involved in practical mineral processing operations.
Effective: Spring 1999
Prerequisite: or concurrent: MN PR 301

MN PR 424 Coal Preparation (3) Unit operations, flowsheets, and testing methods used in preparation of coal.
Effective: Spring 1999
Prerequisite: MN PR 301

MN PR 425 Interfacial Phenomena and Flotation (3) Surface and interfacial phenomena related to flotation agglomeration, flocculation, and dispersion of particles. Application to mineral separation and related processes.
Effective: Fall 2009
Prerequisite: EME 301; MATH 250 or MATH 251; MN PR 301

MN PR 426 (MATSE 426) Aqueous Processing (3) A study of the chemical and engineering principles pertinent to metal processing in aqueous systems: hydrometallurgical extraction, plating, materials preparation.
Effective: Fall 2009
Prerequisite: EME 301 or MATSE 401

MN PR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

MN PR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1999

Last Import from UCM: June 16, 2011 3:00 AM
Mining (MNG)

MNG 023 Mineral Land and Mine Surveying (2) Surveying theory and practice applied to mineral lands and mines, traversing, leveling, mapping, underground surveying, microcomputer drafting and graphics.
Effective: Fall 2006
Prerequisite: EDG 100, EG T 101 or G 010; 1/2 unit of secondary school trigonometry

MNG 030 Introduction to Mining Engineering (3) Examination, development, and exploitation of mineral deposits; mining methods; unit operations; mining equipment; fundamentals of explosives.
Effective: Spring 2011

MNG 041 Introduction to Mining Operations (1) An introduction to underground and surface mining methods; selection of extraction equipment; relevant auxiliary operations. Not intended for Mining Engineering majors.
Effective: Spring 2008
Prerequisite: E MCH 211

MNG 042 Mine Materials Handling Systems (2) Analysis and design of materials-handling systems in mining, such as belt conveyors, locomotives, and hoisting.
Effective: Spring 1999
Prerequisite: MNG 402

MNG 410 Underground Coal Extraction (2) Underground coal-mine design; extraction techniques; description of the various auxiliary operations as they relate to the mining methods.
Effective: Spring 1999
Prerequisite: MNG 404, MNG 422, MNG 431

MNG 411 Mine Systems Engineering (2) Applied operations research and systems methods for decision making in mine operations; time and systems studies to improve productivity.
Effective: Spring 1999
Prerequisite: MNG 404

MNG 412 Mineral Property Evaluation (3) Ore reserve estimation using statistics and geostatistics, mine cost estimation, engineering economy concepts applied to mineral deposits.
Effective: Spring 1999
Prerequisite: MNG 030

MNG 422 Mining Ventilation and Air Conditioning (3) Quality, quantity, and temperature-humidity control of the mine atmosphere; general mine environmental control.
Effective: Spring 1999
Prerequisite: C E 360, MNG 030. Prerequisite or concurrent: M E 300

MNG 431 Rock Mechanics (3) Ground stresses, laboratory rock properties, laboratory and field instrumentation, rock mass characteristics, subsidence, slope stability, design of mine workings.
Effective: Fall 2003
Prerequisite: E MCH 210

MNG 441 Surface Mining Systems and Design (3) Design of surface mining for noncoal and coal minerals; emphasis on quarry and strip mining planning parameters: unit operations, systems, haulroads, draglines, spoil stability, reclamation, legal requirements, and health and safety.
Effective: Spring 1999
Prerequisite: MN PR 301, MNG 030

MNG 451W Mining Engineering Project (1-5) Independent and integrative design and report of specific mine evaluation, layout, equipment selection, environmental control, permitting, and financial analysis.
Effective: Spring 1999
Prerequisite: seventh-semester standing in mining engineering plus six months of mining work experience

MNG 460 Mine Maintenance Engineering (3) Mine maintenance system design; maintenance planning and management; safety and cost analysis of maintenance programs.
Effective: Spring 1999

MNG 470 Mining and Geologic Structures (3) Study of geologic structures and their impacts on mining operations.
Effective: Summer 2009
Prerequisite: GEOSC 001, GEOSC 201

MNG 497 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2008
Mining Technology (MNG T)

MNG T 030 Introduction to Mining Technology (2) Examination, development, exploitation of mineral deposits; history of mining, common mining methods, operation methods, equipment types, explosives fundamentals.
Effective: Spring 2006

MNG T 100 Mining Technology Orientation (1) Introduction to the underground mining industry including history, terminology, current mining equipment and methods, regulations, organization.
Effective: Spring 2006

MNG T 110 Mining Administration and Law (3) Introduction to mine organization and management structure, and government regulations regarding permitting, reporting and recordkeeping.
Effective: Spring 2006

MNG T 202 Mining Ventilation (3) Introduction to mine ventilation systems at mine face, mine gases and use of gas detection equipment, state and federal regulations.
Effective: Summer 2007
Prerequisite: CHEM 101, PHYS 150, MNG T 030

MNG T 203 Introduction to Strata Control (1) Review basic concepts of geology and impact of geologic features on mining conditions; introduce strata control theory and methods. (Nominal first 5 weeks of spring semester)
Effective: Spring 2006
Prerequisite: MNG T 030

MNG T 204 Mine Plant Technology (3) Electrical, transportation, ventilation, and other systems required to operate underground coal mine, and to transport and process coal.
Effective: Spring 2006
Prerequisite: PHYS 150

MNG T 205W Mining Systems Technology (3) Comparison of mining methods with focus on preventative maintenance, coal transport, and estimating production and manpower needs.
Effective: Summer 2006
Prerequisite: MNG T 030

MNG T 207 Electric Mine Machine Circuits (3) Application of electric power and safety issues related to the installation and maintenance of circuits and various power control devices.
Effective: Spring 2006
Prerequisite: MNG T 204

MNG T 208 Mine Power Distribution (3) Topics of high voltage circuits, underground transmission, power stations, power conversion, safety regulations and power devices.
Effective: Spring 2006
Prerequisite: MNG T 204

MNG T 209 Mine Machinery Control Methods (2) Basic principles and applications of solid state, variable frequency, PLC, electro hydraulic and networked controls in mine machinery.
Effective: Spring 2006
Prerequisite: PHYS 150, MNG T 030, MATH 082

MNG T 210 Mine Machine Dynamics (3) Operation and interaction of mechanized equipment used at the coal face including common electrical, hydraulic and mechanical systems.
Effective: Spring 2006
Prerequisite: PHYS 150

MNG T 211 Practicum in Mining Technology (3) Field and shop techniques in procedures of electrical, mechanical and ventilation phases of mine maintenance
Effective: Spring 2006
Prerequisite: MNG T 204

MNG T 213 Strata Control Methods (3) Introduce pillar-design parameters, roof control planning, roof bolting, standing supports, rib stability, floor condition problems, and longwall strata control.
Effective: Spring 2011
Prerequisite: GEOSC 020

MNG T 214 Mining Management I (3) Leadership skill development for supervisors, managing change, tools to plan, organize, control, communicate and monitor effectively.
Effective: Spring 2006

MNG T 215 Mining Management II (3) Financial management, effective meeting management, critical thinking, project management and cost and risk control.
Effective: Spring 2006
Prerequisite: MNG T 214
MNG T 216 Mine Regulations and Laws (3) State and federal mining regulations and application to underground coal mines. Relationship with company policies and consequences of non-compliance.
Effective: Spring 2006
Prerequisite: MNG T 110
Music (MUSIC)

Individual instruction in technique, literature, and pedagogy is offered in six categories covering eighteen instruments:

- **BRASS:** Trumpet, French horn, trombone, euphonium, tuba
- **KEYBOARD:** Piano, organ
- **STRINGS:** Violin, viola, violoncello, doublebass
- **WOODWINDS:** Flute, oboe, clarinet, bassoon, saxophone
- **PERCUSSION**
- **VOICE**

For each instrument individual instruction in offered to different types of students at different levels:

- **Primary instrument:** Student in B.A. (Music) and B.S. (Music Ed) Levels I-VII
- **Performance instrument:** Students in B.Mus. Level I-VII
- **Secondary instrument:** Nonmajor students or others using this as secondary instrument.

The courses are designated according to a particular pattern for identification on the student’s transcript and in the *Schedule of Classes*. Applied music fees are required for individualized instruction: $175 for a 1-credit course; $250 for a 2-credit course; $250 for a 3-credit course. Examples of listings:

</table>

MUSIC 004 (GA) **Film Music** (3) An introductory examination of music’s role in Hollywood narrative film from the classic era (1930s and 1940s) to the present. Effective: Summer 2009

MUSIC 005 (GA) **An Introduction to Western Music** (3) A general survey of art music in western society, highlighting important composers and stylistic developments. Effective: Spring 2004

MUSIC 005S (GA) **An Introduction to Western Music** (3) A general survey of art music in western society, highlighting important composers and stylistic developments. Effective: Summer 2006
MUSIC 007 (GA;US) **Evolution of Jazz** (3) Study of the origins and development of jazz as an art form.  
Effective: Summer 2005

MUSIC 008 (GA) **Rudiments of Music** (3) Introduction to the elements of music: notation, scales, meter, rhythm, intervals; basic chord structure.  
Effective: Fall 2004

MUSIC 009 (GA;IL) **Introduction to World Musics** (3) An overview of the music of India, China, Japan, Indonesia, Africa, and the Middle East.  
Effective: Summer 2005

MUSIC 040S **First-Year Seminar in Music Education** (1) Introduction to the University, the School of Music, the music education degree program, and the music teaching profession.  
Effective: Fall 2006

MUSIC 050 (GA) **Beginning Piano: Non-Music Major** (1) Introduction to the keyboard, notation, chord progressions, transposition, improvisation, and simple accompanying techniques for the non-music major. An additional fee is required for this course.  
Effective: Fall 2004

MUSIC 051 (GA) **Intermediate Class Piano: Non-Music Major** (1) Instruction in harmonizing melodies, accompanying techniques, improvisation, and repertoire.  
Effective: Fall 2004  
Prerequisite: MUSIC 050 or placement audition

MUSIC 052 (GA) **Voice Class: Non-Music Major** (1) Group study emphasizing development of rudimentary skills and their recreational use in a range of popular and art music.  
Effective: Fall 2004

MUSIC 053 (GA) **Class Voice Practicum** (1) Voice study in group and individual formats, supervised by in-class lessons and discussions, enhanced by additional individual instruction with pedagogy students.  
Effective: Fall 2004  
Prerequisite: audition

MUSIC 054 (GA) **Beginning Class Guitar: Non-Music Major** (1) Class instruction in guitar for non-music majors.  
Effective: Fall 2004

MUSIC 076 **Chamber Orchestra** (1 per semester, maximum of 8) Chamber orchestra rehearsal and performance.  
Effective: Spring 2001  
Prerequisite: audition

MUSIC 077 (GA) **Philharmonic Orchestra** (1 per semester/maximum of 8) Orchestra rehearsal and performance.  
Effective: Fall 2004  
Prerequisite: audition

MUSIC 078 (GA) **Symphonic Wind Ensemble** (1 per semester/maximum of 8) Rehearsal and performance of wind repertoire and concert band literature.  
Effective: Fall 2004  
Prerequisite: audition

MUSIC 079 **Pep Band** (1 per semester/maximum of 4) A band to perform at selected athletic events.  
Effective: Spring 2001  
Prerequisite: audition

MUSIC 080 (GA) **Symphonic Band** (1 per semester/maximum of 8) Rehearsal and performance of symphonic band literature. A select group using standard instrumentation.  
Effective: Fall 2004  
Prerequisite: audition

MUSIC 081 (GA) **Marching Blue Band** (1 per semester/maximum of 4) Rehearsal and performance of appropriate music and maneuvers for football games and related events.  
Effective: Fall 2004  
Prerequisite: audition

MUSIC 082 (GA) **Concert Band** (1 per semester/maximum of 8) Rehearsal and performance of concert band literature.  
Effective: Fall 2004  
Prerequisite: audition

MUSIC 083 (GA) **Campus Band** (1 per semester/maximum of 8) Rehearsal and performance of concert band literature.  
Effective: Spring 2002  
Prerequisite: audition

MUSIC 084 (GA) **Jazz Ensemble** (1 per semester/maximum of 8) Survey and performance of historic and contemporary big
band styles.
Effective: Fall 2004
Prerequisite: audition

MUSIC 086 (GA) Percussion Ensemble (1 per semester/maximum of 8) Study and performance of percussion chamber music in various instrumental combinations, focusing on the classical and contemporary repertoire.
Effective: Spring 2004
Prerequisite: audition

MUSIC 087 Mallet Ensemble (1) Study and performance of music for keyboard percussion instruments.
Effective: Spring 2001
Prerequisite: audition

MUSIC 088 (GA) Campus Choir (1 per semester/maximum of 8) Building skills needed for successful choral singing including vocal production, sight singing, ear training, and music fundamentals.
Effective: Fall 2001

MUSIC 089 (GA) University Choir (1 per semester/maximum of 8) Rehearsal and performance of choral repertoire appropriate to mixed-voice ensemble of 100-150 voices.
Effective: Spring 2004
Prerequisite: audition

MUSIC 090 (GA) Glee Club (1 per semester/maximum of 8) Rehearsal and performance of music composed for male voices from the sixteenth to the twentieth centuries, including sacred and secular compositions.
Effective: Spring 2004
Prerequisite: audition

MUSIC 091 (GA) Oriana Singers (1 per semester/maximum of 8) Rehearsal and performance of choral repertoire for treble voices from the sixteenth to twentieth centuries, including sacred and secular compositions.
Effective: Spring 2004
Prerequisite: audition

MUSIC 092 (GA) Chamber Music for Voices (1 per semester/maximum of 8) Select groups of singers performing choral chamber music.
Effective: Spring 2004
Prerequisite: audition

MUSIC 093 (GA;US;IL) Essence of Joy (1 per semester, maximum of 8) Rehearsal and performance of choral repertoire from the African/American tradition.
Effective: Spring 2006
Prerequisite: audition

MUSIC 094 (GA) Women’s Chorale (1 per semester, maximum of 8) Rehearsal and performance of treble choral literature.
Effective: Spring 2004
Prerequisite: audition

MUSIC 100 (GA) Campus Orchestra (1-10 per semester/maximum of 10) Rehearsal and performance orchestral literature.
Effective: Spring 2011
Prerequisite: audition

MUSIC 101 Music Common Hour (1) Student and faculty recitals, master classes, lectures by faculty and guests, and Common Hour attendance.
Effective: Fall 1985

MUSIC 103 (GA) Concert Choir (1 per semester/maximum of 8) Rehearsal and performance of choral repertoire appropriate to mixed-voice ensemble of approximately sixty voices.
Effective: Spring 2004
Prerequisite: audition

MUSIC 104 (GA) Chamber Singers (1 per semester/maximum of 8) Rehearsal and performance of choral repertoire appropriate to mixed-voice ensemble of approximately twenty-four voices.
Effective: Spring 2004
Prerequisite: audition

MUSIC 106 (GA) Early Music Ensemble (1 per semester/maximum of 8) Ensemble for the performance and study of Baroque or early music on instruments of the era.
Effective: Spring 2004
Prerequisite: audition

MUSIC 110 Keyboard Skills I: Music Major (1) Introduction to the keyboard, chord progressions, transposition, improvisation, and simple accompanying techniques.
Effective: Fall 1985

MUSIC 112 Class Guitar (0.5-1) Functional guitar techniques and materials.
Effective: Fall 1993

The Pennsylvania State University
MUSIC 113 Music Theatre--Class Voice I (1) Group study emphasizing development of sound vocal and musicianship skills fundamental for music theatre.
Effective: Spring 2001
Prerequisite: admission into the School of Theatre with intent to major in Music Theatre

MUSIC 114 Music Theatre--Class Voice II (1) Group study emphasizing development of sound vocal and musicianship skills fundamental for music theatre.
Effective: Spring 2001
Prerequisite: MUSIC 113

MUSIC 115 Voice Class (1) Class study of voice, with emphasis on pedagogical experiences and techniques useful in public school music classrooms.
Effective: Spring 1995 Ending: Summer 2011

MUSIC 115 Beginning Voice Class (1) Class voice emphasizing the fundamentals of healthy singing technique. For Music Majors only.
Effective: Fall 2011 Future: Fall 2011

MUSIC 116 Intermediate Voice Class: Music Major (1) Class study of voice, with emphasis on pedagogical experiences and techniques useful in public school music classrooms. For Music Majors only.
Effective: Summer 1994 Ending: Summer 2011
Prerequisite: MUSIC 115

MUSIC 116 Intermediate Voice Class (1 per semester/maximum of 4) Class voice, emphasizing pedagogical experiences and techniques for public school music classrooms. For Music Majors only.
Effective: Fall 2011 Future: Fall 2011

MUSIC 119S First-Year Music Seminar (2) Individual applied instruction and group activities; orientation, area recitals, and studio classes as required by instructor.
Effective: Summer 1999
Prerequisite: permission of instructor

MUSIC 121 Basic Musicianship I (1) Elementary sight singing and dictation.
Effective: Fall 1989
Prerequisite: ability to reproduce simple rhythm and tonal patterns Concurrent: MUSIC 131

MUSIC 122 Basic Musicianship II (1) Continuation of Music 121.
Effective: Fall 1989
Prerequisite: MUSIC 121 Concurrent: MUSIC 132

MUSIC 129S First-Year Performance Seminar (3) Individual applied instruction and group activities; orientation, area recitals, and studio classes as required by instructor.
Effective: Summer 1999
Prerequisite: permission of instructor

MUSIC 131 Music Theory I (2) Review of rudiments; introduction to the fundamental linear and vertical features of tonal music, integration of written and aural skills.
Effective: Fall 1989
Prerequisite: ability to read musical notation; knowledge of musical rudiments. Concurrent: MUSIC 121

MUSIC 132 Music Theory II (2) Continuation of Music 131.
Effective: Fall 1989
Prerequisite: MUSIC 131 Concurrent: MUSIC 122

MUSIC 151 Brass Techniques I (1) Introduction to basic performance techniques on brass instruments; teaching strategies and materials for use in a heterogeneous instrument setting.
Effective: Fall 2007

MUSIC 152 Percussion Techniques I (1) Introduction to basic performance techniques on percussion instruments; teaching strategies and materials for use in a heterogeneous instrument setting.
Effective: Fall 2007

MUSIC 153 String Techniques I (1) Performance techniques on stringed instruments for music education majors.
Effective: Fall 2007

MUSIC 154 Woodwind Techniques I (1) Performance and teaching techniques for woodwind instruments.
Effective: Fall 2007

MUSIC 162 (IL) Introduction to Music History (2) An introduction to Western music history and world music of selected cultures through the study of representative works.
Effective: Spring 2006
Concurrent: MUSIC 132

MUSIC 170 Keyboard Skills II: Music Major (1) Instruction in secondary chord progressions, transposition, improvisation,
accompanying techniques, simple score reading.

Effective: Fall 1985
Prerequisite: MUSIC 050, MUSIC 110 or placement audition

MUSIC 173S First-Year Composition Seminar (2) Individual composition instruction for freshman composition majors (Fall semester) and group activities.
Effective: Summer 1999
Prerequisite: admission to the BM degree in Composition

MUSIC 174 Composition II (2) Composition instruction for first-year composition majors.
Effective: Summer 2011

MUSIC 181 Jazz Improvisation I (2) A study of the fundamentals of jazz theory, harmonic functions, and their applications to jazz improvisation.
Effective: Fall 1991
Prerequisite: MUSIC 132

MUSIC 182 Jazz Improvisation II (2) A study of advanced harmonic concepts and their application to jazz improvisation.
Effective: Summer 1986
Prerequisite: MUSIC 181

MUSIC 190 (GA) Chamber Music for Strings (1 per semester/maximum of 8) Preparation for performance of advanced chamber music literature involving primarily string instruments--string quartets, piano trios, clarinet quintets.
Effective: Spring 2004
Prerequisite: permission of instructor

MUSIC 191 (GA) Chamber Music for Woodwinds (1 per semester/maximum of 8) Preparation for performance of advanced chamber music literature involving primarily woodwind instruments--woodwind quintets and quartets.
Effective: Spring 2004
Prerequisite: permission of instructor

MUSIC 192 (GA) Chamber Music for Brass (1 per semester/maximum of 8) Preparation for performance of advanced chamber music literature involving primarily brass instruments--brass quartets and quintets.
Effective: Spring 2004
Prerequisite: permission of instructor

MUSIC 193 Sonata Duos (1 per semester/maximum of 8) Preparation for performance of advanced sonata literature for various individual instruments with keyboard.
Effective: Fall 1983
Prerequisite: permission of instructor

MUSIC 194 Studio and Recital Accompanying (1 per semester/maximum of 8) Keyboard accompaniment of student soloists in the studio and in public performance under faculty supervision.
Effective: Fall 1983
Prerequisite: KEYBD 120J or KEYBD 130J or consent of supervising faculty member

MUSIC 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

MUSIC 210 Keyboard Skills III: Music Major (1) Playing accompaniments from chord symbols and full notation, transposition, improvisation, modulation, score-reading, and standard literature.
Effective: Fall 1985
Prerequisite: MUSIC 170 or placement audition

MUSIC 212 Guitar Techniques II (1) Intermediate performance and teaching techniques for guitar.
Effective: Summer 2006
Prerequisite: MUSIC 112

MUSIC 216 Care and Nature of Young Singing Voices (0.5) The nature of singing voices in children from birth through adolescence; strategies for helping all children become successful singers.
Effective: Summer 2006

MUSIC 221 Basic Musicianship III (1) Intermediate sight singing and dictation.
Effective: Fall 1991
Prerequisite: MUSIC 122 Prerequisite or concurrent: MUSIC 231

MUSIC 222 Basic Musicianship IV (1) Continuation of Music 221.
Effective: Spring 1997
Prerequisite: MUSIC 221. Prerequisite or concurrent:

MUSIC 231 Music Theory III (2) Intermediate concepts of tonal theory.
Effective: Fall 1989
Prerequisite: MUSIC 132

MUSIC 241 Music for Classroom Teachers (3) Development of competencies for guiding musical experiences of children in the elementary classroom.
Effective: Spring 2001
Prerequisite: for students in the K-6 Teacher Certification Program only
MUSIC 251A  **Brass Techniques II: Trumpet** (0.5) A class setting in which trumpet performance techniques, teaching/diagnostic strategies, instructional materials, and literature are taught, practiced, and developed. Effective: Summer 2006  
Prerequisite: MUSIC 151

MUSIC 251B  **Brass Techniques II: Horn** (0.5) A class setting in which horn performance techniques, teaching/diagnostic strategies, instructional materials, and literature are taught, practiced, and developed. Effective: Summer 2006  
Prerequisite: MUSIC 151

MUSIC 251C  **Brass Techniques II: Trombone** (0.5) A class setting in which trombone performance techniques, teaching/diagnostic strategies, instructional materials, and literature are taught, practiced, and developed. Effective: Summer 2006  
Prerequisite: MUSIC 151

MUSIC 251D  **Brass Techniques II: Euphonium/Tuba** (0.5) A class setting in which euphonium and tuba performance techniques, teaching/diagnostic strategies, instructional materials, and literature are taught, practiced, and developed. Effective: Summer 2006  
Prerequisite: MUSIC 151

MUSIC 253A  **String Techniques II: Violin** (0.5) Performance techniques on violin for music education majors. Effective: Summer 2006  
Prerequisite: MUSIC 153

MUSIC 253B  **String Techniques II: Viola** (0.5) Performance techniques on viola for music education majors. Effective: Summer 2006  
Prerequisite: MUSIC 153

MUSIC 253C  **String Techniques II: Cello** (0.5) Performance techniques on cello for music education majors. Effective: Summer 2006  
Prerequisite: MUSIC 153

MUSIC 253D  **String Techniques II: Double Bass** (0.5) Performance techniques on double bass for music education majors. Effective: Summer 2006  
Prerequisite: MUSIC 153

MUSIC 254A  **Woodwind Techniques II: Flute** (0.5) Performance and teaching techniques and materials selection for flute. Effective: Summer 2006  
Prerequisite: MUSIC 154

MUSIC 254B  **Woodwind Techniques II: Oboe** (0.5) Performance and teaching techniques and materials selection for oboe. Effective: Summer 2006  
Prerequisite: MUSIC 154

MUSIC 254C  **Woodwind Techniques II: Clarinet** (0.5) Performance and teaching techniques and materials selection for clarinet. Effective: Summer 2006  
Prerequisite: MUSIC 154

MUSIC 254D  **Woodwind Techniques II: Saxophone** (0.5) Performance and teaching techniques and materials selection for saxophone. Effective: Summer 2006  
Prerequisite: MUSIC 154

MUSIC 254E  **Woodwind Techniques II: Bassoon** (0.5) Performance and teaching techniques and materials selection for bassoon. Effective: Summer 2006  
Prerequisite: MUSIC 154

MUSIC 261 (IL)  **Survey of Music History I** (3) A survey of music history to 1750, with readings, listening, and lecture. Effective: Spring 2006 Ending: Fall 2011  
Prerequisite: MUSIC 131, MUSIC 162

MUSIC 261 (GA;IL)  **Survey of Music History I** (3) A survey of music history to 1750, with readings, listening, and lecture. Effective: Spring 2012 Future: Spring 2012  
Prerequisite: MUSIC 131, MUSIC 162

MUSIC 262 (IL)  **Survey of Music History II** (3) A survey of music history from 1750 to the present, with readings, listening, and lecture. Effective: Spring 2006 Ending: Fall 2011  
Prerequisite: MUSIC 132, MUSIC 162

MUSIC 262 (GA;IL)  **Survey of Music History II** (3) A survey of music history from 1750 to the present, with readings, listening, and lecture. Effective: Spring 2012 Future: Spring 2012  
Prerequisite: MUSIC 132, MUSIC 162

MUSIC 266  **Basic Conducting** (1) Basic instruction and practicum in conducting, both choral and instrumental. Effective: Fall 1993  
Prerequisite: MUSIC 221, MUSIC 231
MUSIC 267 Techniques of Composition (2) Basic instruction in the techniques of composition in all idioms.
Effective: Fall 1993
Prerequisite: or concurrent: MUSIC 231

MUSIC 270 Keyboard Skills IV: Music Major (1) Instruction in secondary chord progressions, transposition, improvisation, accompanying techniques, score reading.
Effective: Summer 1987
Prerequisite: MUSIC 210 or placement audition

MUSIC 273 Composition III (2) Composition instruction for second-year composition majors.
Effective: Spring 1998
Prerequisite: MUSIC 174

MUSIC 274 Composition IV (2) Composition instruction for second-year composition majors.
Effective: Spring 1998
Prerequisite: MUSIC 273

MUSIC 295A Early Field Experience in Music Education (1) Observation of music learning and teaching processes, development of basic teaching skills and reflective behaviors.
Effective: Spring 2008
Prerequisite: fourth semester standing MUSIC 115, MUSIC 210

MUSIC 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

MUSIC 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

MUSIC 297A Choral Conducting Practicum (1) For students who create their own choirs from the membership of Penn State ensembles.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 297A Choral Conducting Practicum (1) For undergraduates who create their own choirs from the membership of Penn State Ensembles.

MUSIC 297B Choral Conducting Project (1) For undergraduate students who serve as assistants and interns with non-Penn State ensembles.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 297B Choral Conducting Project (1) For undergraduates who serve as assistants and interns with non-Penn State ensembles.

MUSIC 297C Sinfonietta (1) String training ensemble for those who wish to improve their orchestral reading skills and repertoire.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 297D Fall Athletic Pep Band (1) For students not in Blue Band to participate in special athletic events.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 297E Song Writing (3) This course will take the student through the process of composing and producing a recorded song. Topics covered in addition to music composition will include form, lyric writing, arranging, audio recording and sequencing. Familiarity with basic audio sequencing software and music theory concepts is important.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: permission of program required

MUSIC 297H Film Music (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 298 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

MUSIC 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

The Pennsylvania State University
MUSIC 312 Performance of Diverse Musical Styles (1) Exploration of world instruments and singing through performance and study. Effective: Summer 2006

MUSIC 331 Tonal Analysis (2) Introduction to standard procedures of tonal analysis, including concepts of form and structure. Effective: Spring 1997 Prerequisite: MUSIC 221, MUSIC 231

MUSIC 332 Analysis of Twentieth Century Music (2) Application of analytical techniques and compositional theories to music of the twentieth century. Effective: Summer 1996 Prerequisite: MUSIC 331

MUSIC 336 Orchestration (2) Scoring for the orchestra. Effective: Spring 1988 Prerequisite: MUSIC 222, MUSIC 232

MUSIC 340 Music Learning and Development (2) Application of psychological principles to teaching of music, including curriculum design and contemporary practices in music education. Effective: Fall 2008 Prerequisite: acceptance into Teacher Education Degree Program in Music Concurrent: MUSIC 341 MUSIC 395A

MUSIC 341 Instructional Materials in Music (2) Exploration of instructional materials and repertoire for use in K-12 music settings. Limited to Music Education majors who have been accepted into the Teacher Education Degree Program in Music. Effective: Summer 2006 Concurrent: MUSIC 340 MUSIC 395A

MUSIC 345 Instructional Practices in Music (2) For music education students to learn about instructional techniques and practices for music performance and general music classes. Effective: Summer 2006 Prerequisite: MUSIC 340, MUSIC 341, MUSIC 395A piano and voice proficiencies passed Concurrent: MUSIC 395B

MUSIC 366 Intermediate Conducting (1) Intermediate instruction in conducting; conducting techniques specific to instrumental or choral music; introduction to rehearsal technique. Effective: Fall 2008 Prerequisite: MUSIC 266, MUSIC 270, MUSIC 331

MUSIC 373 Composition V (3) Composition instruction for third-year position majors. Effective: Spring 1998 Prerequisite: MUSIC 274

MUSIC 374 Composition VI (3) Composition instruction for third-year composition majors. Effective: Spring 1998 Prerequisite: MUSIC 373

MUSIC 387 Language Diction for Singers: Italian and English (1) Intensive drill in the pronunciation, phonetic transcription, and singing of Italian and English. Effective: Summer 1991 Prerequisite: VOICE 170J or VOICE 180J or 2 semesters of VOICE 100J or VOICE 110J

MUSIC 388 Language Diction for Singers: French (1) Intensive drill in the pronunciation, phonetic transcription, and singing of French. Effective: Spring 1987 Prerequisite: VOICE 170J or VOICE 180J or two semesters of VOICE 100J or VOICE 110J

MUSIC 389 Language Diction for Singers: German (1) Intensive drill in the pronunciation, phonetic transcription, and singing of German. Effective: Spring 1987 Prerequisite: VOICE 170J or VOICE 180J or two semesters of VOICE 100J or VOICE 110J

MUSIC 395A Cohort Practicum I (1) Observation and pre-service experience in the schools. Limited to Music Education Majors. Effective: Fall 2008 Prerequisite: Acceptance into Teacher Education Degree Program in Music Concurrent: MUSIC 340 MUSIC 341

MUSIC 395B Cohort Practicum II (1) Observation and teaching experiences in a variety of musical instruction settings. Effective: Spring 2009 Prerequisite: MUSIC 341, MUSIC 395A piano proficiency passed Concurrent: MUSIC 345

MUSIC 399 IL Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Spring 2007

MUSIC 400 Solo Recital (1) Required recital for Performer's Certificate. Effective: Spring 1994 Prerequisite: permission of the director of the school of music

MUSIC 412 Jazz Pedagogy (2) The development of advanced skills in pedagogy for teaching jazz bands.
MUSIC 414 String Pedagogy (1-2) The development of skills in pedagogy for teaching strings.
Effective: Spring 1992
Prerequisite: completion of 300-level strings course

MUSIC 415 Woodwind Pedagogy (1-2) The development of skills in pedagogy for teaching woodwinds.
Effective: Spring 1992
Prerequisite: completion of 300-level woodwind course

MUSIC 416 Brass Pedagogy (1-2) The development of skills in pedagogy for teaching brass.
Effective: Spring 1992
Prerequisite: completion of 300-level brass course

MUSIC 417 Percussion Pedagogy (1-2) The development of advanced skills in pedagogy for teaching percussion.
Effective: Summer 1992
Prerequisite: MUSIC 152; PERCN 320J or PERCN 330J or permission of instructor

MUSIC 418 Voice Pedagogy (2) Analysis of techniques of teaching voice and studies of related music literature and pedagogical writings.
Effective: Spring 2004
Prerequisite: VOICE 270J or VOICE 280J; or four semesters of VOICE 100J or VOICE 110J

MUSIC 419 Piano Pedagogy I (2) Analysis of beginning teaching methods and teaching strategies for children.
Effective: Spring 1997
Prerequisite: KEYBD 270 or KEYBD 280; MUSIC 331

MUSIC 420 Song Writing and Recording (3) Song composition, arranging and recording in a variety of style genres.
Effective: Spring 2011
Prerequisite: INART 258, MUSIC 232

MUSIC 421 Jazz Combo Class (1) Study and performance of small group jazz.
Effective: Summer 1994
Prerequisite: MUSIC 181

MUSIC 422 Jazz Harmony and Arranging (3) Analysis and composition of jazz tunes and chord progressions; instrumental and vocal arranging in the jazz idiom.
Effective: Fall 1983
Prerequisite: MUSIC 222, MUSIC 232

MUSIC 424 Piano Pedagogy II (2) Analysis of techniques of teaching intermediate-early advanced level piano and studies of music literature and pedagogical writings.
Effective: Spring 1997
Prerequisite: KEYBD 270 or KEYBD 280; MUSIC 331

MUSIC 425 Advanced Voice Pedagogy (2) Analysis of techniques of teaching voice, supervised teaching, studies of studio materials and related topics.
Effective: Spring 2004
Prerequisite: MUSIC 418

MUSIC 427 Masters of Music (3) An intensive investigation of the works of a major composer in Western music history. (May be repeated for credit.)
Effective: Spring 2007

MUSIC 428 Graduate Review of Tonal Analysis (2) Application of analytical techniques to music from Bach to Brahms.
Effective: Spring 1997
Prerequisite: undergraduate core in music theory and literature at an accredited university or elementary analysis; MUSIC 429 and 430 if indicated on entering competency exam

MUSIC 429 Aural Review for Graduate Students (1) An intensive review of the aural skills required for a theoretical understanding of 18th- and 19th-century music.
Effective: Summer 1994
Prerequisite: MUSIC 221 or undergraduate core in music theory at an accredited university

MUSIC 431 ADVANCED TONAL ANALYSIS (2-3) Advanced techniques of musical analysis.
Effective: Fall 1996
Prerequisite: MUSIC 331

MUSIC 432 Graduate Review of Twentieth-Century Analysis (2-3) The theory and analysis of style in music of the twentieth century.
Effective: Fall 1997
Prerequisite: MUSIC 262, MUSIC 331

MUSIC 433 Advanced Analysis of Twentieth Century Music (2-3) In-depth studies of selected twentieth-century repertoires and/or analytical models.
Effective: Summer 1996
Prerequisite: MUSIC 262, MUSIC 332

MUSIC 435 Score Reading (1) Introduction in score reading at the keyboard.
Effective: Spring 1991
Prerequisite: MUSC 345, MUSC 395B

MUSIC 442W Capstone Experience in Middle School General and Choral Music (3) Capstone experience to teaching in general and choral middle school settings. Effective: Fall 2007
Prerequisite: Limited to Music Education Majors.MUSC 345, MUSC 395B

MUSIC 444W Emphasis in Elementary and Intermediate Band (3) Examination and application of teaching strategies and materials for students planning to teach band in the elementary and middle schools. Effective: Spring 2011
Prerequisite: MUSC 345, MUSC 395A, MUSC 366 piano proficiency passes

MUSIC 445W Emphasis in High School Band (3) Examination and application of teaching strategies and materials for students planning to teach high school bands. Effective: Spring 2011
Prerequisite: MUSC 345, MUSC 395B

MUSIC 446W Emphasis in Strings and Orchestra (3) Development of teaching techniques for instructing elementary and secondary string/orchestra student musicians for music education majors. Effective: Spring 2011
Prerequisite: MUSC 345, MUSC 395B

MUSIC 450 Teaching Marching Band (2) Traditional and contemporary drill design principles, show development strategies, instructional techniques, and organizational procedures involved in teaching marching band. Effective: Fall 2007
Prerequisite: MUSC 345 or three years collegiate marching band experience or permission of program

MUSIC 451 Computer Programming for Musicians (3 per semester/maximum of 12) In-depth study of music programming techniques. Effective: Spring 2011
Prerequisite: INART 258A, MUSC 455 or permission of program

MUSIC 455 Technology in Music (1-3:1.5:1.5) Survey of how musical information is stored and processed in computer systems. Effective: Spring 2008
Prerequisite: CMPSC 100, CMPSC 101, CMPSC 121 or MUSC 231

MUSIC 458 Electronic Music Composition (3) An introduction to the art of composition in the electronic audio medium. Effective: Spring 2011
Prerequisite: INART 258A

MUSIC 460 Teaching Musical Cultures (2) Exploration of the world's musical cultures and the implication of and procedures for teaching multicultural music. Limited to upper division music majors or permission of program. Effective: Summer 2006
Prerequisite: MUSC 262 or permission of program

MUSIC 461W Studies in Music History: Antiquity to 1600 (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from antiquity to 1600, with emphasis on writing and research. Effective: Fall 2010
Prerequisite: MUSC 261, MUSC 331

MUSIC 462W Studies in Music History: 1550-1750 (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from 1550-1750, with emphasis on writing and research. Effective: Fall 2010
Prerequisite: MUSC 261, MUSC 331

MUSIC 463W Studies in Music History: 1700-1900 (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from 1700-1900, with emphasis on writing and research. Effective: Fall 2010
Prerequisite: MUSC 262, MUSC 331

MUSIC 464W Studies in Music History: 1850-Present (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from 1850 to the present, with emphasis on writing and research. Effective: Fall 2010
Prerequisite: MUSC 262, MUSC 332

MUSIC 465 Advanced Conducting I (3) Advanced instruction in conducting; conducting techniques specific to instrumental or choral music; emphasis on score study and rehearsal technique. Effective: Summer 1994
Prerequisite: MUSC 366

MUSIC 466 Advanced Conducting II (2 per semester/maximum of 8) Standard scores of symphonies, tone poems, operas, oratorios, and shorter vocal and instrumental works studied from the viewpoint of the conductor. Effective: Spring 1995
Prerequisite: MUSC 465

The Pennsylvania State University
MUSIC 467 Opera Workshop (1-3 per semester/maximum of 6) History, analysis, and production of operas from sixteenth century to present.
Effective: Spring 2001
Prerequisite: audition

MUSIC 468 Acting for Singers (2 per semester/maximum of 4) To help students develop authentic and specific characters/portrayals on stage through physical and emotional awareness.
Effective: Fall 2008
Prerequisite: Must be currently enrolled for voice jury track at the level of V220J or higher or register with permission of the program

MUSIC 471 Structural and Sixteenth-Century Counterpoint (2) Advanced species counterpoint and its application to the sixteenth-century style.
Effective: Fall 1983
Prerequisite: MUSIC 222, MUSIC 232

MUSIC 472 Eighteenth-Century Counterpoint (2) Imitative and nonimitative counterpoint in the style of Bach.
Effective: Fall 1983
Prerequisite: MUSIC 222, MUSIC 232

MUSIC 473 Composition VII (3) Composition instruction for fourth-year composition majors.
Effective: Spring 1998
Prerequisite: MUSIC 374

MUSIC 474 Composition VIII (3) Composition instruction for fourth-year composition majors.
Effective: Spring 1998
Prerequisite: MUSIC 473

MUSIC 476W B.A. Senior Project (3) A semester project appropriate to student's option in B.A. program (e.g., research paper, performance with program notes, or related paper).
Effective: Spring 1992
Prerequisite: seventh-semester standing

MUSIC 478 Vocal Literature (3) Introduction to the literature for solo voice in opera, oratorio, cantata, art song, and chamber music from the baroque to the present.
Effective: Spring 1997
Prerequisite: MUSIC 262, MUSIC 331

MUSIC 480 Opera Literature (3) Studies in the development of the opera from 1600 to the present, treating both libretto and music.
Effective: Spring 1997
Prerequisite: MUSIC 262, MUSIC 331

MUSIC 481 Keyboard Literature (3) Studies in the development of keyboard music and instruments; a survey of all eras using listening, analysis, and performance.
Effective: Spring 1997
Prerequisite: MUSIC 262, MUSIC 331

MUSIC 483 Seminar in Voice Pedagogy (2) Survey of literature relevant to the teaching of voice from historical sources through recent pedagogical scholarship.
Effective: Spring 2004
Prerequisite: MUSIC 418

MUSIC 485 Chamber Music Literature (3) Survey of chamber music for strings, winds, and brass instruments from the mid-16th century to the present day.
Effective: Spring 1997
Prerequisite: MUSIC 262, MUSIC 331

MUSIC 487 Orchestral Literature (3) Survey of orchestral literature.
Effective: Spring 1997
Prerequisite: MUSIC 262, MUSIC 331

MUSIC 488 Studies in the Major Performance Area (1-2) Selected studies in music literature specific to the student's major performance area. Will include research, analysis and performance.
Effective: Spring 2011

MUSIC 489 Studio and Recital Accompaniment (1 per semester/maximum of 4) Advanced keyboard accompaniment of student soloists in the studio and in public performance under faculty supervision.
Effective: Fall 1983
Prerequisite: MUSIC 194 or permission of instructor

MUSIC 493 Sonata Duos (1 per semester/maximum of 4) Preparation for performance of advanced sonata literature for various individual instruments with keyboard.
Effective: Fall 1983
Prerequisite: MUSIC 193 or equivalent; permission of instructor

MUSIC 494 Research Topics (1-3) Supervised research leading to senior thesis or project.
Effective: Fall 1983
MUSIC 494H Research Topics (1-3) Supervised research leading to senior thesis or project. Effective: Fall 2007

MUSIC 495A Student Teaching: General Music (5-7) Observation and teaching under supervision. Effective: Fall 2001
Prerequisite: completion of all courses in the major with a grade of "C" or better Concurrent: MUSIC 442

MUSIC 495B Student Teaching: Choral Music (5-7) Observation and teaching under supervision. Effective: Fall 2001
Prerequisite: completion of all courses in the major with a grade of "C" or better Concurrent: MUSIC 443

MUSIC 495C Student Teaching: Instrumental Music (5-7) Observation and teaching under supervision. Effective: Fall 2001
Prerequisite: completion of all courses in the major with a grade of "C" or better Concurrent: MUSIC 444

MUSIC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

MUSIC 496H Independent Studies - Honors (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 2011

MUSIC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

MUSIC 497A Survey Music History (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 497B Oriana Singers (1) Performs music written for treble voices. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 497C Women's Chorale (1) Performs selected treble repertoire from the past five centuries. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 497D University Choir (1) Presents both major large-scale choral works and appropriate shorter work. 18th, 19th, and 20th century major works. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 497D Business of Music (1) Survey of topics related to a career in music performance - including auditions, competitions, finances, work abroad, etc. Guest lecturers included. Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MUSIC 497E Song Writing (3) This course will take the student through the process of composing and producing a recorded song. Topics covered in addition to music composition will include form, lyric writing, arranging, audio recording and sequencing. Familiarity with basic audio sequencing software and music theory concepts is important. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: permission of program required

MUSIC 497G Glee Club (1) Male voices singing music from the renaissance through the twentieth-century. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

The Pennsylvania State University
MUSIC 497I Hi-Lo's (1) Select Group Performing Choral Chamber Music.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 497J Mallet Ensemble (1) Study and performance of music for keyboard percussion instruments.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 497K Viola Orchestral Excerpts (1) An introduction to excerpts from the viola parts of standard orchestral literature required for professional orchestral auditions.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

MUSIC 498A Review of Harmony/Analysis (2) Devoted to in-depth study of tonal harmony and analysis, beginning with a review of diatonic progressions and continuing with chromatic harmony.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 498A The Music of the Beatles (2-3) This course will examine the music of the Beatles by tracing the development of John Lennon, Paul McCartney, and George Harrison as songwriters.

MUSIC 498B Early Childhood Practicum (1) Students will plan and delivery weekly music classes for preschool children at the Bennett Center. Will complete a case study on one child they observe throughout the semester.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 498C Bass Orchestral Excerpts (1) This course is designed to study in depth a series of double bass excerpts from the standard orchestral and opera repertoire. We will look at how to prepare a mock audition behind a screen at the end of the semester.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 498D iEnsemble (1) Theoretical, compositional, and application of i technology.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

Last Import from UCM: June 16, 2011 3:00 AM
Music - Brass (BRASS)

BRASS 100J (GA) Trumpet: Secondary (1 per semester, maximum of 8) Individual instruction in trumpet one-half hour per week.
Effective: Fall 2004
Prerequisite: permission of instructor

BRASS 101J (GA) French Horn: Secondary (1 per semester, maximum of 8) Individual instruction in French horn one-half hour per week. For students who qualify.
Effective: Fall 2004
Prerequisite: permission of instructor

BRASS 102J (GA) Trombone: Secondary (1 per semester, maximum of 8) Individual instruction in trombone one-half hour per week.
Effective: Fall 2004
Prerequisite: permission of instructor

BRASS 103J (GA) Euphonium: Secondary (1 per semester, maximum of 8) Individual instruction in euphonium/baritone one-half hour per week.
Effective: Fall 2004
Prerequisite: permission of instructor

BRASS 104J (GA) Tuba: Secondary (1 per semester, maximum of 8) Individual instruction in tuba one-half hour per week.
Effective: Fall 2004
Prerequisite: permission of instructor

BRASS 110J (GA) Trumpet: Secondary (2 per semester, maximum of 16) Individual instruction in trumpet one hour per week.
Effective: Fall 2004
Prerequisite: permission of instructor

BRASS 111J (GA) French Horn: Secondary (2 per semester, maximum of 16) Individual instruction in French horn one hour per week. For students who qualify.
Effective: Fall 2004
Prerequisite: permission of instructor

BRASS 112J (GA) Trombone: Secondary (2 per semester, maximum of 16) Individual instruction in trombone one hour per week.
Effective: Fall 2004
Prerequisite: permission of instructor

BRASS 113J (GA) Euphonium: Secondary (2 per semester, maximum of 16) Individual instruction in euphonium/baritone one hour per week.
Effective: Fall 2004
Prerequisite: permission of instructor

BRASS 114J (GA) Tuba: Secondary (2 per semester, maximum of 16) Individual instruction in tuba one hour per week.
Effective: Fall 2004
Prerequisite: permission of instructor

BRASS 120J Trumpet: Primary I (2) Individual instruction in trumpet one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: acceptance into program by faculty jury

BRASS 121J French Horn: Primary I (2) Individual instruction in French horn one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: acceptance into program by faculty jury

BRASS 122J Trombone: Primary I (2) Individual instruction in trombone one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: acceptance into program by faculty jury

BRASS 123J Euphonium: Primary I (2) Individual instruction in euphonium/baritone one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: acceptance into program by faculty jury

BRASS 124J Tuba: Primary I (2) Individual instruction in tuba one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: acceptance into program by faculty jury

BRASS 130J Trumpet: Performance I (3) Individual instruction in trumpet one hour per week. For B.Mus. trumpet performance majors.
Effective: Fall 1983
Prerequisite: acceptance into program by faculty jury

BRASS 131J French Horn: Performance I (3) Individual instruction in French horn one hour per week. For B.Mus. French horn performance majors.
Effective: Fall 1983
Prerequisite: acceptance into program by faculty jury

BRASS 132J Trombone: Performance I (3) Individual instruction in trombone one hour per week. For B.Mus. trombone majors.
Effective: Fall 1983
Prerequisite: acceptance into program by faculty jury

BRASS 133J Euphonium: Performance I (3) Individual instruction in euphonium/baritone one hour per week. For B.Mus. euphonium/baritone majors.
Effective: Fall 1983
Prerequisite: acceptance into program by faculty jury

BRASS 134J Tuba: Performance I (3) Individual instruction in tuba one hour per week. For B.Mus. tuba majors.
Effective: Fall 1983
Prerequisite: acceptance into program by faculty jury

BRASS 170J Trumpet: Primary II (2) Individual instruction in trumpet one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: BRASS 120J and permission of faculty jury

BRASS 171J French Horn: Primary II (2) Individual instruction in French horn one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: BRASS 121J and permission of faculty jury

BRASS 172J Trombone: Primary II (2) Individual instruction in trombone one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: BRASS 122J and permission of jury

BRASS 173J Euphonium: Primary II (2) Individual instruction in euphonium/baritone one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: BRASS 123J and permission of faculty jury

BRASS 174J Tuba: Primary II (2) Individual instruction in tuba one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: BRASS 124J and permission of faculty jury

BRASS 180J Trumpet: Performance II (3) Individual instruction in trumpet one hour per week. For B.Mus. trumpet performance majors.
Effective: Fall 1983
Prerequisite: BRASS 130J and permission of faculty jury

BRASS 181J French Horn: Performance II (3) Individual instruction in French horn one hour per week. For B.Mus. French horn performance majors.
Effective: Fall 1983
Prerequisite: BRASS 131J and permission of faculty jury

BRASS 182J Trombone: Performance II (3) Individual instruction in trombone one hour per week. For B.Mus. trombone majors.
Effective: Fall 1983
Prerequisite: BRASS 132J and permission of faculty jury

BRASS 183J Euphonium: Performance II (3) Individual instruction in euphonium/baritone one hour per week. For B.Mus. euphonium/baritone majors.
Effective: Fall 1983
Prerequisite: BRASS 133J and permission of faculty jury

BRASS 184J Tuba: Performance II (3) Individual instruction in tuba one hour per week. For B.Mus. tuba majors.
Effective: Fall 1983
Prerequisite: BRASS 134J and permission of faculty jury

BRASS 220J Trumpet: Primary III (2) Individual instruction in trumpet one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: BRASS 170J and permission of faculty jury

BRASS 221J French Horn: Primary III (2) Individual instruction in French horn one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: BRASS 171J and permission of faculty jury
BRASS 222J Trombone: Primary III (2) Individual instruction in trombone one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: BRASS 172J and permission of faculty jury

BRASS 223J Euphonium: Primary III (2) Individual instruction in euphonium/baritone one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: BRASS 173J and permission of faculty jury

BRASS 224J Tuba: Primary III (2) Individual instruction in tuba one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: BRASS 174J and permission of faculty jury

BRASS 230J Trumpet: Performance III (3) Individual instruction in trumpet one hour per week. For B.Mus. trumpet performance majors.
Effective: Fall 1983
Prerequisite: BRASS 180J and permission of faculty jury

BRASS 231J French Horn: Performance III (3) Individual instruction in French horn one hour per week. For B.Mus. French horn performance majors.
Effective: Fall 1983
Prerequisite: BRASS 181J and permission of faculty jury

BRASS 232J Trombone: Performance III (3) Individual instruction in trombone one hour per week. For B.Mus. trombone majors.
Effective: Fall 1983
Prerequisite: BRASS 182J and permission of faculty jury

BRASS 233J Euphonium: Performance III (3) Individual instruction in euphonium/baritone one hour per week. For B.Mus. euphonium/baritone majors.
Effective: Fall 1983
Prerequisite: BRASS 183J and permission of faculty jury

BRASS 234J Tuba: Performance III (3) Individual instruction in tuba one hour per week. For B.Mus. tuba majors.
Effective: Fall 1983
Prerequisite: BRASS 184J and permission of faculty jury

BRASS 270J Trumpet: Primary IV (2) Individual instruction in trumpet one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: BRASS 220J and permission of faculty jury

BRASS 271J French Horn: Primary IV (2) Individual instruction in French horn one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: BRASS 221J and permission of faculty jury

BRASS 272J Trombone: Primary IV (2) Individual instruction in trombone one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: BRASS 222J and permission of faculty jury

BRASS 273J Euphonium: Primary IV (2) Individual instruction in euphonium/baritone one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983

Music - Percussion (PERCN)

PERCN 100J (GA) **Percussion: Secondary** (1 per semester, maximum of 8) Individual instruction in percussion one-half hour per week. For both music and non-music majors.
Effective: Spring 2004
Prerequisite: permission of instructor

PERCN 110J (GA) **Percussion: Secondary** (2 per semester, maximum of 16) Individual instruction in percussion one hour per week. For both music and non-music majors.
Effective: Spring 2004
Prerequisite: permission of instructor

PERCN 120J **Percussion: Primary I** (2) Individual instruction in percussion one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: Acceptance into program by faculty jury

PERCN 130J **Percussion: Performance I** (3) Individual instruction in percussion one hour per week. For B.Mus percussion majors.
Effective: Fall 1983
Prerequisite: Acceptance into program by faculty jury

PERCN 170J **Percussion: Primary II** (2) Individual instruction in percussion one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: PERCN 120J and permission of faculty jury

PERCN 180J **Percussion: Performance II** (3) Individual instruction in percussion one hour per week. For B.Mus percussion majors.
Effective: Fall 1983
Prerequisite: PERCN 130J and permission of faculty jury

PERCN 220J **Percussion: Primary III** (2) Individual instruction in percussion one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: PERCN 170J and permission of faculty jury

PERCN 230J **Percussion: Performance III** (3) Individual instruction in percussion one hour per week. For B.Mus percussion majors.
Effective: Fall 1983
Prerequisite: PERCN 180J and permission of faculty jury

PERCN 270J **Percussion: Primary IV** (2) Individual instruction in percussion one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: PERCN 220J and permission of faculty jury

PERCN 280J **Percussion: Performance IV** (3) Individual instruction in percussion one hour per week. For B.Mus percussion majors.
Effective: Fall 1983
Prerequisite: PERCN 230J and permission of faculty jury

PERCN 320J **Percussion: Primary V** (2) Individual instruction in percussion one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: PERCN 270J and permission of faculty jury

PERCN 330J **Percussion: Performance V** (3) Individual instruction in percussion one hour per week. For B.Mus percussion majors.
Effective: Fall 1983
Prerequisite: PERCN 280J and permission of faculty jury

PERCN 370J **Percussion: Primary VI** (2) Individual instruction in percussion one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: PERCN 320J and permission of faculty jury

PERCN 380J **Percussion: Performance VI** (3) Individual instruction in percussion one hour per week. For B.Mus percussion majors.
Effective: Fall 1983
Prerequisite: PERCN 330J and permission of faculty jury

PERCN 420J **Percussion: Primary VII** (2) Individual instruction in percussion one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: PERCN 370J and permission of faculty jury

---

The Pennsylvania State University
PERCN 430J **Percussion: Performance VII** (3) Individual instruction in percussion one hour per week. For B.Mus. percussion majors.
Effective: Fall 1983
Prerequisite: PERCN 380J and permission of faculty jury

PERCN 470J **Percussion: Primary VIII** (2) Individual instruction in percussion one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: PERCN 420J and permission of faculty jury

PERCN 480J **Percussion: Performance VIII** (3) Individual instruction in percussion one hour per week. For B.Mus. percussion majors.
Effective: Fall 1983
Prerequisite: PERCN 430J and permission of faculty jury
### Music - String (STRNG)

**STRNG 100J (GA) Violin: Secondary**  
(1 per semester, maximum of 8) Individual instruction in violin one-half hour per week.  
Effective: Spring 2004  
Prerequisite: permission of instructor

**STRNG 101J (GA) Viola: Secondary**  
(1 per semester, maximum of 8) Individual instruction in viola one-half hour per week.  
Effective: Spring 2004  
Prerequisite: permission of instructor

**STRNG 102J (GA) Violoncello: Secondary**  
(1 per semester, maximum of 8) Individual instruction in violoncello one-half hour per week.  
Effective: Spring 2004  
Prerequisite: permission of instructor

**STRNG 103J (GA) Double Bass: Secondary**  
(1 per semester, maximum of 8) Individual instruction in double bass one-half hour per week.  
Effective: Spring 2004  
Prerequisite: permission of instructor

**STRNG 110J (GA) Violin: Secondary**  
(2 per semester, maximum of 16) Individual instruction in violin one hour per week.  
Effective: Spring 2004  
Prerequisite: permission of instructor

**STRNG 111J (GA) Viola: Secondary**  
(2 per semester, maximum of 16) Individual instruction in viola one hour per week.  
Effective: Spring 2004  
Prerequisite: permission of instructor

**STRNG 112J (GA) Violoncello: Secondary**  
(2 per semester, maximum of 16) Individual instruction in violoncello one hour per week.  
Effective: Spring 2004  
Prerequisite: permission of instructor

**STRNG 113J (GA) Double Bass: Secondary**  
(2 per semester, maximum of 16) Individual instruction in double bass one hour per week.  
Effective: Spring 2004  
Prerequisite: permission of instructor

**STRNG 120J Violin: Primary I**  
(2) Individual instruction in violin one hour per week. For School of Music B.A. and B.S. majors; other qualified students.  
Effective: Fall 1983  
Prerequisite: acceptance into program by faculty jury

**STRNG 121J Viola: Primary I**  
(2) Individual instruction in viola one hour per week. For School of Music B.A. and B.S. majors; other qualified students.  
Effective: Fall 1983  
Prerequisite: permission of instructor

**STRNG 122J Violoncello: Primary I**  
(2) Individualized instruction in violoncello one hour per week. For School of Music B.A. and B.S. majors; other qualified students.  
Effective: Fall 1983  
Prerequisite: acceptance into program by faculty jury

**STRNG 123J Double Bass: Primary I**  
(2) Individual instruction in double bass one hour per week. For School of Music B.A. and B.S. majors; other qualified students.  
Effective: Fall 1983  
Prerequisite: acceptance into program by faculty jury

**STRNG 130J Violin: Performance I**  
(3) Individual instruction in violin one hour per week. For B.Mus. violin performance majors.  
Effective: Fall 1983  
Prerequisite: acceptance into program by faculty jury

**STRNG 131J Viola: Performance I**  
(3) Individual instruction in viola one hour per week. For B.Mus. guitar performance majors.  
Effective: Fall 1983  
Prerequisite: acceptance into program by faculty jury

**STRNG 132J Violoncello: Performance I**  
(3) Individual instruction in violoncello one hour per week. For B.Mus. violoncello performance majors.  
Effective: Fall 1983  
Prerequisite: acceptance into program by faculty jury

**STRNG 133J Double Bass: Performance I**  
(3) Individual instruction in double bass one hour per week. For B.Mus. double bass performance majors.  
Effective: Fall 1983
STRNG 170J Violin: Primary II (2) Individual instruction in violin one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: STRNG 120J and permission of faculty jury

STRNG 171J Viola: Primary II (2) Individual instruction in viola one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: STRNG 121J and permission of faculty jury

STRNG 172J Violoncello: Primary II (2) Individual instruction in violoncello one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: STRNG 122J and permission of faculty jury

STRNG 173J Double Bass: Primary II (2) Individual instruction in double bass one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: STRNG 123J and permission of faculty jury

STRNG 180J Violin: Performance II (3) Individual instruction in violin one hour per week. For B.Mus. violin performance major.
Effective: Fall 1983
Prerequisite: STRNG 130J and permission of faculty jury

STRNG 181J Viola: Performance II (3) Individual instruction in viola one hour per week. For B.Mus. viola performance majors.
Effective: Fall 1983
Prerequisite: STRNG 131J and permission of faculty jury

STRNG 182J Violoncello: Performance II (3) Individual instruction in violoncello one hour per week. For B.Mus. violoncello performance majors.
Effective: Fall 1983
Prerequisite: STRNG 132J and permission of faculty jury

STRNG 183J Double Bass: Performance II (3) Individual instruction in double bass one hour per week. For B.Mus. double bass performance majors.
Effective: Fall 1983
Prerequisite: STRNG 133J and permission of faculty jury

STRNG 220J Violin: Primary III (2) Individual instruction in violin one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: STRNG 170J and permission of faculty jury

STRNG 221J Viola: Primary III (2) Individual instruction in viola one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: STRNG 171J and permission of faculty jury

STRNG 222J Violoncello: Primary III (2) Individual instruction in violoncello one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: STRNG 172J and permission of faculty jury

STRNG 223J Double Bass: Primary III (2) Individual instruction in double bass one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: STRNG 173J and permission of faculty jury

STRNG 230J Violin: Performance III (3) Individual instruction in violin one hour per week. For B.Mus. violin performance majors.
Effective: Fall 1983
Prerequisite: STRNG 180J and permission of faculty jury

STRNG 231J Viola: Performance III (3) Individual instruction in viola one hour per week. For B.Mus. viola performance majors.
Effective: Fall 1983
Prerequisite: STRNG 181J and permission of faculty jury

STRNG 232J Violoncello: Performance III (3) Individual instruction in violoncello one hour per week. For B.Mus. violoncello performance majors.
Effective: Fall 1983
Prerequisite: STRNG 182J and permission of faculty jury

STRNG 233J Double Bass: Performance III (3) Individual instruction in double bass one hour per week. For B.Mus. double bass majors.
Effective: Fall 1983
Prerequisite: STRNG 183J and permission of faculty jury

The Pennsylvania State University
STRNG 270J Violin: Primary IV (2) Individual instruction in violin one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: STRNG 220J and permission of faculty jury

STRNG 271J Viola: Primary IV (2) Individual instruction in viola one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: STRNG 221J and permission of faculty jury

STRNG 272J Violoncello: Primary IV (2) Individual instruction in violoncello one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: STRNG 222J and permission of faculty jury

STRNG 273J Double Bass: Primary IV (2) Individual instruction in double bass one hour per week. For School of Music B.A. and B.S. majors; other qualified students.
Effective: Fall 1983
Prerequisite: STRNG 223J and permission of faculty jury

STRNG 280J Violin: Performance IV (3) Individual instruction in violin one hour per week. For B.Mus. violin performance majors.
Effective: Fall 1983
Prerequisite: STRNG 230J and permission of faculty jury

STRNG 281J Viola: Performance IV (3) Individual instruction in viola one hour per week. For B.Mus. viola performance majors.
Effective: Fall 1983
Prerequisite: STRNG 231J and permission of faculty jury

STRNG 282J Violoncello: Performance IV (3) Individual instruction in violoncello one hour per week. For B.Mus. violoncello performance majors.
Effective: Fall 1983
Prerequisite: STRNG 232J and permission of faculty jury

STRNG 283J Double Bass: Performance IV (3) Individual instruction in double bass one hour per week. For B.Mus. double bass performance majors.
Effective: Fall 1983
Prerequisite: STRNG 233J and permission of faculty jury

WWNDS 124J Saxophone Primary I (2) Individual instruction in saxophone one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: acceptance into program by faculty jury
WWNDS 130J Flute: Performance I (3) Individual instruction in flute one hour per week. For B.Mus. flute performance majors.
Effective: Fall 1983
Prerequisite: acceptance into program by faculty jury

WWNDS 131J Oboe: Performance I (3) Individual instruction in oboe one hour per week. For B.Mus. oboe majors.
Effective: Fall 1983
Prerequisite: permission of faculty jury

WWNDS 132J Clarinet: Performance I (3) Individual instruction in clarinet one hour per week. For B.Mus. clarinet majors.
Effective: Fall 1983
Prerequisite: permission of faculty jury

WWNDS 133J Bassoon: Performance I (3) Individual instruction in bassoon one hour per week. For B.Mus. bassoon performance majors.
Effective: Fall 1983
Prerequisite: acceptance into program by faculty jury

WWNDS 134J Saxophone: Performance I (3) Individual instruction in saxophone one hour per week. For B.Mus. saxophone performance majors.
Effective: Fall 1983
Prerequisite: acceptance into program by faculty jury

WWNDS 170J Flute: Primary II (2) Individual instruction in flute one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 120J and permission of faculty jury

WWNDS 171J Oboe: Primary II (2) Individual instruction in oboe one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 121J and permission of faculty jury

WWNDS 172J Clarinet: Primary II (2) Individual instruction in clarinet one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 122J and permission of faculty jury

WWNDS 173J Bassoon: Primary II (2) Individual instruction in bassoon one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 123J and permission of faculty jury

WWNDS 174J Saxophone: Primary II (2) Individual instruction in saxophone one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 124J and permission of faculty jury

WWNDS 180J Flute: Performance II (3) Individual instruction in flute one hour per week. For B.Mus. flute performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 130J and permission of faculty jury

WWNDS 181J Oboe: Performance II (3) Individual instruction in oboe one hour per week. For B.Mus. oboe majors.
Effective: Fall 1983
Prerequisite: WWNDS 131J and permission of faculty jury

WWNDS 182J Clarinet: Performance II (3) Individual instruction in clarinet one hour per week. For B.Mus. clarinet majors.
Effective: Fall 1983
Prerequisite: WWNDS 132J and permission of faculty jury

WWNDS 183J Bassoon: Performance II (3) Individual instruction in bassoon one hour per week. For B.Mus. bassoon performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 133J and permission of faculty jury

WWNDS 184J Saxophone: Performance II (3) Individual instruction in saxophone one hour per week. For B.Mus. saxophone performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 134J and permission of faculty jury

WWNDS 220J Flute: Primary III (2) Individual instruction in flute one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 170J and permission of faculty jury

WWNDS 221J Oboe: Primary III (2) Individual instruction in oboe one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 171J and permission of faculty jury
WWNDS 222J Clarinet: Primary III (2) Individual instruction in clarinet one hour per week. For School of Music B.A. and B.S. majors. Effective: Fall 1983
Prerequisite: WWNDS 172J and permission of faculty jury

WWNDS 223J Bassoon: Primary III (2) Individual instruction in bassoon one hour per week. For School of Music B.A. and B.S. majors. Effective: Fall 1983
Prerequisite: WWNDS 173J and permission of faculty jury

WWNDS 224J Saxophone: Primary III (2) Individual instruction in saxophone one hour per week. For School of Music B.A. and B.S. majors. Effective: Fall 1983
Prerequisite: WWNDS 174J and permission of faculty jury

WWNDS 230J Flute: Performance III (3) Individual instruction in flute one hour per week. For B.Mus. flute performance majors. Effective: Fall 1983
Prerequisite: WWNDS 180J and permission of faculty jury

WWNDS 231J Oboe: Performance III (3) Individual instruction in oboe one hour per week. For B.Mus. oboe majors. Effective: Fall 1983
Prerequisite: WWNDS 181J and permission of faculty jury

WWNDS 232J Clarinet: Performance III (3) Individual instruction in clarinet one hour per week. For B.Mus. clarinet majors. Effective: Fall 1983
Prerequisite: WWNDS 182J and permission of faculty jury

WWNDS 233J Bassoon: Performance III (3) Individual instruction in bassoon one hour per week. For B.Mus. bassoon performance majors. Effective: Fall 1983
Prerequisite: WWNDS 183J and permission of faculty jury

WWNDS 234J Saxophone: Performance III (3) Individual instruction in saxophone one hour per week. For B.Mus. saxophone performance majors. Effective: Fall 1983
Prerequisite: WWNDS 184J and permission of faculty jury

WWNDS 270J Flute: Primary IV (2) Individual instruction in flute one hour per week. For School of Music B.A. and B.S. majors. Effective: Fall 1983
Prerequisite: WWNDS 220J and permission of faculty jury

WWNDS 271J Oboe: Primary IV (2) Individual instruction in oboe one hour per week. For School of Music B.A. and B.S. majors. Effective: Fall 1983
Prerequisite: WWNDS 221J and permission of faculty jury

WWNDS 272J Clarinet: Primary IV (2) Individual instruction in clarinet one hour per week. For School of Music B.A. and B.S. majors. Effective: Fall 1983
Prerequisite: WWNDS 222J and permission of faculty jury

WWNDS 273J Bassoon: Primary IV (2) Individual instruction in bassoon one hour per week. For School of Music B.A. and B.S. majors. Effective: Fall 1983
Prerequisite: WWNDS 223J and permission of faculty jury

WWNDS 274J Saxophone: Primary IV (2) Individual instruction in saxophone one hour per week. For School of Music B.A. and B.S. majors. Effective: Fall 1983
Prerequisite: WWNDS 224J and permission of faculty jury

WWNDS 280J Flute: Performance IV (3) Individual instruction in flute one hour per week. For B.Mus. flute performance majors. Effective: Fall 1983
Prerequisite: WWNDS 230J and permission of faculty jury

WWNDS 281J Oboe: Performance IV (3) Individual instruction in oboe one hour per week. For B.Mus. oboe majors. Effective: Fall 1983
Prerequisite: WWNDS 231J and permission of faculty jury

WWNDS 282J Clarinet: Performance IV (3) Individual instruction in clarinet one hour per week. For B.Mus. clarinet majors. Effective: Fall 1983
Prerequisite: WWNDS 232J and permission of faculty jury

WWNDS 283J Bassoon: Performance IV (3) Individual instruction in bassoon one hour per week. For B.Mus. bassoon performance majors. Effective: Fall 1983
Prerequisite: WWNDS 233J and permission of faculty jury
WWNDS 284J Saxophone: Performance IV (3) Individual instruction in saxophone one hour per week. For B.Mus. saxophone performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 234J and permission of faculty jury

WWNDS 320J Flute: Primary V (2) Individual instruction in flute one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 270J and permission of faculty jury

WWNDS 321J Oboe: Primary V (2) Individual instruction in oboe one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 271J and permission of faculty jury

WWNDS 322J Clarinet: Primary V (2) Individual instruction in clarinet one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 272J and permission of faculty jury

WWNDS 323J Bassoon: Primary V (2) Individual instruction in bassoon one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 273J and permission of faculty jury

WWNDS 324J Saxophone: Primary V (2) Individual instruction in saxophone one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 274J and permission of faculty jury

WWNDS 330J Flute: Performance V (3) Individual instruction in flute one hour per week. For B.Mus. flute performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 280J and permission of faculty jury

WWNDS 331J Oboe: Performance V (3) Individual instruction in oboe one hour per week. For B.Mus. oboe majors.
Effective: Fall 1983
Prerequisite: WWNDS 281J and permission of faculty jury

WWNDS 332J Clarinet: Performance V (3) Individual instruction in clarinet one hour per week. For B.Mus. clarinet majors.
Effective: Fall 1983
Prerequisite: WWNDS 282J and permission of faculty jury

WWNDS 333J Bassoon: Performance V (3) Individual instruction in bassoon one hour per week. For B.Mus. bassoon performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 283J and permission of faculty jury

WWNDS 334J Saxophone: Performance V (3) Individual instruction in saxophone one hour per week. For B.Mus. saxophone performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 284J and permission of faculty jury

WWNDS 370J Flute: Primary VI (2) Individual instruction in flute one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 320J and permission of faculty jury

WWNDS 371J Oboe: Primary VI (2) Individual instruction in oboe one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 321J and permission of faculty jury

WWNDS 372J Clarinet: Primary VI (2) Individual instruction in clarinet one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 322J and permission of faculty jury

WWNDS 373J Bassoon: Primary VI (2) Individual instruction in bassoon one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 323J and permission of faculty jury

WWNDS 374J Saxophone: Primary VI (2) Individual instruction in saxophone one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 324J and permission of faculty jury

WWNDS 380J Flute: Performance VI (3) Individual instruction in flute one hour per week. For B.Mus. flute performance majors.
Effective: Fall 1983

The Pennsylvania State University
Prerequisite: WWNDS 330J and permission of faculty jury

WWNDS 381J **Oboe: Performance VI** (3) Individual instruction in oboe one hour per week. For B.Mus. oboe majors.
Effective: Fall 1983
Prerequisite: WWNDS 331J and permission of faculty jury

WWNDS 382J **Clarinet: Performance VI** (3) Individual instruction in clarinet one hour per week. For B.Mus. clarinet majors.
Effective: Fall 1983
Prerequisite: WWNDS 332J and permission of faculty jury

WWNDS 383J **Bassoon: Performance VI** (3) Individual instruction in bassoon one hour per week. For B.Mus. bassoon performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 333J and permission of faculty jury

WWNDS 384J **Saxophone: Performance VI** (3) Individual instruction in saxophone one hour per week. For B.Mus. saxophone performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 334J and permission of faculty jury

WWNDS 420J **Flute: Primary VII** (2) Individual instruction in flute one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 370J and permission of faculty jury

WWNDS 421J **Oboe: Primary VII** (2) Individual instruction in oboe one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 371J and permission of faculty jury

WWNDS 422J **Clarinet: Primary VII** (2) Individual instruction in clarinet one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 372J and permission of faculty jury

WWNDS 423J **Bassoon: Primary VII** (2) Individual instruction in bassoon one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 373J and permission of faculty jury

WWNDS 424J **Saxophone: Primary VII** (2) Individual instruction in saxophone one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 374J and permission of faculty jury

WWNDS 430J **Flute: Performance VII** (3) Individual instruction in flute one hour per week. For B.Mus. flute performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 380J and permission of faculty jury

WWNDS 431J **Oboe: Performance VII** (3) Individual instruction in oboe one hour per week. For B.Mus. oboe majors.
Effective: Fall 1983
Prerequisite: WWNDS 381J and permission of faculty jury

WWNDS 432J **Clarinet: Performance VII** (3) Individual instruction in clarinet one hour per week. For B.Mus. clarinet majors.
Effective: Fall 1983
Prerequisite: WWNDS 382J and permission of faculty jury

WWNDS 433J **Bassoon: Performance VII** (3) Individual instruction in bassoon one hour per week. For B.Mus. bassoon performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 383J and permission of faculty jury

WWNDS 434J **Saxophone: Performance VII** (3) Individual instruction in saxophone one hour per week. For B.Mus. saxophone performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 384J and permission of faculty jury

WWNDS 470J **Flute: Primary VIII** (2) Individual instruction in flute one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 420J and permission of faculty jury

WWNDS 471J **Oboe: Primary VIII** (2) Individual instruction in oboe one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 421J and permission of faculty jury

WWNDS 472J **Clarinet: Primary VIII** (2) Individual instruction in clarinet one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 422J and permission of faculty jury

**WWNDS 473J Bassoon: Primary VIII** (2) Individual instruction in bassoon one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 423J and permission of faculty jury

**WWNDS 474J Saxophone: Primary VIII** (2) Individual instruction in saxophone one hour per week. For School of Music B.A. and B.S. majors.
Effective: Fall 1983
Prerequisite: WWNDS 424J and permission of faculty jury

**WWNDS 480J Flute: Performance VIII** (3) Individual instruction in flute one hour per week. For B.Mus. flute performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 430J and permission of faculty jury

**WWNDS 481J Oboe: Performance VIII** (3) Individual instruction in oboe one hour per week. For B.Mus. oboe majors.
Effective: Fall 1983
Prerequisite: WWNDS 431J and permission of faculty jury

**WWNDS 482J Clarinet: Performance VIII** (3) Individual instruction in clarinet one hour per week. For B.Mus. clarinet majors.
Effective: Fall 1983
Prerequisite: WWNDS 432J and permission of faculty jury

**WWNDS 483J Bassoon: Performance VIII** (3) Individual instruction in bassoon one hour per week. For B.Mus. bassoon performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 433J and permission of faculty jury

**WWNDS 484J Saxophone: Performance VIII** (3) Individual instruction in saxophone one hour per week. For B.Mus. saxophone performance majors.
Effective: Fall 1983
Prerequisite: WWNDS 434J and permission of faculty jury

Last Import from UCM: June 16, 2011 3:00 AM
**Music Education (MU ED)**

MU ED 440 *Music Learning and Development* (2) Psychological principles related to music learning processes and applications of those to teaching music.

Effective: Spring 2010

Prerequisite: permission of program

Last Import from UCM: June 16, 2011 3:00 AM
Nanofabrication Manufacturing Technology (NMT)

NMT 210W Introduction to Nanofabrication Manufacturing Technology (3) This course provides an overview of basic Nanofabrication Manufacturing Technology for Engineering and Technology students. The course will give the student an overview of atomic physics and the use of atoms to build devices and machines.
Effective: Fall 2003
Prerequisite: E E T 101  Concurrent: STAT 200 CHEM 012

NMT 250 Introduction to Nanotechnology Quality Control and Quality Assurance (1) Overview of basic quality control and quality assurance methods used by the Nanotechnology industry.
Effective: Spring 2005
Prerequisite: STAT 200, NMT 210W

Last Import from UCM: June 16, 2011 3:00 AM
Navy (NAVSC)

NAVSC 101 **Introduction to Naval Science** (2) Introduction to naval organization, customs, military law, ships, aircraft, and Marine Corps and Navy career paths.
Effective: Fall 1983

NAVSC 102 **Sea Power and Maritime Affairs** (3) Historical evolution of sea power and its effects on world history; current U.S. maritime strategy for employment of naval forces.
Effective: Spring 1994

NAVSC 204 **Leadership and Management I** (2) Managerial thought and behavioral theories, with emphasis on how they apply to the naval organization.
Effective: Spring 1993

NAVSC 205 **Navigation** (3) Theory and principles of all types of piloting and navigation, including a practicum emphasizing correct documentation and plotting.
Effective: Spring 2006

NAVSC 311 **Evolution of Warfare** (2) Survey of development of military strategy, tactics, principles of war, and weaponry through the ages and recent U.S. applications.
Effective: Fall 1992

NAVSC 313 **Marine Corps Leadership Theory and Techniques** (2) Introduction to Marine Corps leadership theory and techniques and their application to military-related practical skills and subject matter.
Effective: Fall 1992

NAVSC 322 **Naval Ships Systems I--Naval Engineering** (3.5) Principles and applications of engineering concepts to ship construction, stability, and propulsion and auxiliary systems.
Effective: Fall 1992

NAVSC 323 **Naval Ships Systems II--Weapons** (3) An analysis of electromagnetic wave theory, principles of underwater sound propagation, electro-optic theory, and weapons control systems.
Prerequisite: NAVSC 322

NAVSC 401 **Naval Operations and Seamanship** (3) Introduction to naval operations; the theory and principles of the rules of the road; use of the maneuvering board.
Effective: Fall 2006
Prerequisite: NAVSC 205

NAVSC 402 **Leadership and Management II** (2) The Navy's Resource Management Program (personnel management), counseling techniques, military justice, prevention of substance abuse, and naval correspondence and publications.
Effective: Fall 1983
Prerequisite: NAVSC 401

NAVSC 411 **Amphibious Warfare** (2) A historical survey and evaluation of twentieth-century amphibious warfare operations.
Effective: Fall 1992
Prerequisite: 6 credits of Navy ROTC courses

NOTE: Candidates for regular commission in the Navy will gain practicum work during two afloat summer cruises.

Candidates for Regular commission in the Marine Corps will gain practicum work during one afloat summer cruise and one Marine Corps cruise at a Marine Corps base.

Additionally, the summer between the sophomore and junior years includes career orientation and training on vocational specialties in the Navy and Marine Corps.

Candidates for Reserve commissions in the navy and the Marine Corps will gain practicum work during one afloat summer cruise or one cruise at a Marine Corps base, respectively.

Last Import from UCM: June 16, 2011 3:00 AM
Nuclear Engineering (NUC E)

NUC E 001S Atomic Adventures: First-Year Seminar (1) First-year seminar exploring the interesting and exciting world of nuclear science and its applications.
Effective: Fall 1999

NUC E 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1998

NUC E 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2008

NUC E 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

NUC E 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

NUC E 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2008

NUC E 301 Fundamentals of Reactor Physics (4) Nuclear reactions and interactions relevant to nuclear engineering including fission, cross-sections, reaction rate calculations, energy depositions rates, and radioactive decay.
Effective: Spring 2001
Prerequisite: MATH 230, MATH 251, PHYS 214

NUC E 302 Introduction to Reactor Design (4) Static and dynamic reactor theory applied to basic reactor design problems.
Effective: Spring 2001
Prerequisite: NUC E 301, NUC E 309

NUC E 309 Analytical Techniques for Nuclear Concept (3) This course is an introduction to many of the analytical techniques used in the nuclear engineering discipline.
Effective: Summer 1993
Prerequisite: MATH 230, MATH 251

NUC E 310W Issues in Nuclear Engineering (2) Societal and technical issues facing nuclear engineers, including safety, operations, waste, regulation, public acceptance, economics, ethics, and radiation.
Effective: Fall 2001
Prerequisite: fifth-semester standing

NUC E 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

NUC E 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2008

NUC E 401 Introduction to Nuclear Engineering (3) Fundamental concepts of nuclear engineering, including fission, reactor theory, shielding, and radioisotopes; intended for other than nuclear engineering students.
Effective: Fall 2001
Prerequisite: MATH 250 or MATH 251

NUC E 403 Advanced Reactor Design (3) Physical principles and computational methods for reactor analysis and design. Multigroup diffusion theory; determination of fast and thermal group constants; cell calculations for heterogeneous core lattices.
Effective: Fall 1983
Prerequisite: NUC E 302

NUC E 405 (CHEM 406) Nuclear and Radiochemistry (3) Theory of radioactive decay processes, nuclear properties and structure, nuclear reactions, interactions of radiation with matter, biological effects of radiation.
Effective: Spring 2007
Prerequisite: CHEM 452 or PHYS 237 or NUC E 301

NUC E 406 (M E 406) Introduction to Statistical Thermodynamics (3) Statistical description of systems composed of large numbers of particles in the context of classical and quantum mechanics; basic concepts of probability theory and
thermodynamics as they relate to statistical mechanics.

Effective: Fall 2007
Prerequisite: M E 300 or M E 201 or M E 202 or CH E 303; MATH 230 or MATH 231

NUC E 408 Radiation Shielding (3) Radiation sources in reactor systems; attenuation of gamma rays and neutrons; point kernel methods; deep penetration theories; Monte Carlo methods.
Effective: Spring 1985
Prerequisite: NUC E 301

NUC E 409 (MATSE 409) Nuclear Materials (3) Nuclear reactor materials: relationship between changes in material properties and microstructural evolution of nuclear cladding and fuel under irradiation.
Effective: Spring 2003
Prerequisite: PHYS 214

NUC E 420 Radiological Safety (3) Ionizing radiation, biological effects, radiation measurement, dose computational techniques, local and federal regulations, exposure control.
Effective: Spring 1997
Prerequisite: NUC E 301 or NUC E 405

Effective: Spring 1997
Prerequisite: NUC E 301 or NUC E 405

NUC E 430 Design Principles of Reactor Systems (3) Nuclear power cycles; heat removal problems; kinetic behavior of nuclear systems; material and structural design problems.
Effective: Fall 2007
Prerequisite: M E 410; NUC E 301 or NUC E 401

NUC E 431W Nuclear Reactor Core Design Synthesis (4) Technical and economic optimization of nuclear systems.
Effective: Spring 1994
Prerequisite: ENGL 202C; NUC E 403, NUC E 430

NUC E 444 Nuclear Reactor Operations Laboratory (1) Correlation of reactor physics and reactor theory with practical reactor situations that will be controlled by the student.
Effective: Fall 1983
Prerequisite: or concurrent: NUC E 302

NUC E 445 Nuclear Digital Instrumentation (3) Interfacing nuclear instruments to microprocessors and computers.
Effective: Spring 2008
Prerequisite: EE 212

Effective: Spring 2011
Prerequisite: MATH 250 or MATH 251; M E 345 or NUC E 309

NUC E 450 Radiation Detection and Measurement (3) Theory and laboratory applications of radiation detectors, including proton, neutron, charged particle detectors, NIM devices, and pulse-height analysis.
Effective: Spring 2001
Prerequisite: NUC E 301 or NUC E 405; NUC E 309

NUC E 451 Experiments in Reactor Physics (3) Acquisition and processing of nuclear and atomic data; application to nucleonic phenomena of importance in nuclear engineering.
Effective: Spring 2008
Prerequisite: E E 212, NUC E 450

NUC E 470 Power Plant Simulation (3) Basic knowledge necessary for intelligent simulation and interpretation of simulations of transients in nuclear power plants.
Effective: Fall 2007
Prerequisite: M E 320, MATH 251, NUC E 302

NUC E 490 (AERSP 490, E E 471) Introduction to Plasmas (3) Plasma oscillations; collisional phenomena; transport properties; orbit theory; typical electric discharge phenomena.
Effective: Spring 2008
Prerequisite: E E 361 or PHYS 467

NUC E 494H Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.
Effective: Spring 2007
Prerequisite: Junior or senior status in the University Scholars Program

NUC E 496 Independent studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

NUC E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983
NUC E 497A Fundamentals of Nuclear Engineering (3) An intensive course providing introduction to Nuclear Engineering to undergraduate co-op students, non-NucE graduate, and returning students. Effective: Summer 2011 Ending: Summer 2011

NUC E 497A Fundamentals of Nuclear Engineering (3) An intensive course providing introduction to NucE to undergraduate co-op students, non-NucE graduate, and returning students. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

NUC E 497C Dynamic Modeling of Energy Systems (3) To provide engineers with information about energy supplies, their future prospects, and how each can be used most effectively. Effective: Summer 2011 Ending: Summer 2011

NUC E 497C (M E 497C) Dynamic Modeling of Energy Systems (3) To provide engineers with information about energy supplies, their future prospects, and how each can be used most effectively. Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

NUC E 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2008

Last Import from UCM: June 16, 2011 3:00 AM
Nursing (NURS)

NURS 044 Introduction to Death Education (1) Educational and consumer aspects of dying and death from a health education perspective. 
Effective: Fall 2008

NURS 111S (US;IL) Nursing Roles (4) Introduction to nursing roles/process with emphasis on societal norms and multicultural influences on health care needs. 
Effective: Spring 2011 
Prerequisite: admission to 2NURS major

NURS 112 Health Patterns/Nursing Interventions (4) Emphasis on individual health patterns and selected nursing interventions. 
Effective: Spring 2011 
Prerequisite: NURS 111S

NURS 113 Nursing Care During Childbearing Years (3) Emphasis on childbearing family through prenatal, intrapartal, postpartal and neonatal periods. 
Effective: Spring 2011 
Prerequisite: NURS 112

NURS 114 Nursing Care During Childrearing Years (3) Emphasis on infancy through young adulthood with common and well-defined health problems, with integrated nursing content. 
Effective: Spring 2011 
Prerequisite: NURS 112

NURS 115 Medications and the Elderly Client (1) Nursing implications of medication therapy with the elderly client. 
Effective: Fall 2008

NURS 116 Clinical Immersion I: Introduction to Concepts of Illness (2) Clinical immersion course that utilizes clinical experiences and seminars to develop clinical competency. 
Effective: Summer 2010 
Prerequisite: NURS 112

NURS 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. 
Effective: Fall 2008

NURS 200W Understanding and Applying Nursing Research (3) Introduction to methods and philosophy of empirical inquiry as applied to research in nursing and application to practice. 
Effective: Spring 2011 
Prerequisite: STAT 200 orSTAT 250, NURS 225 ; orSTAT 250 andNURS 390 for NURN major

NURS 203 (GHA) First Aid and CPR (3) An introductory first aid course designed to provide the basic knowledge and skills to provide assistance to someone injured/ill. 
Effective: Fall 2008

NURS 211 Pathophysiology I - Nursing Interventions (5) Caring for middle-aged adult with acute/chronic alterations in resp/cardio and musculoskeletal dysfunction. 
Effective: Spring 2011 
Prerequisite: NURS 116

NURS 212 Pathophysiology II - Nursing Interventions (4) Caring for middle-aged adults with acute/chronic alterations in metabolism, reproduction, oncology and immunology. 
Effective: Spring 2011 
Prerequisite: NURS 116

NURS 213 Pathophysiology III - Nursing Interventions (5) Care for adults with complex physical and dysfunctional health patterns. 
Effective: Spring 2011 
Prerequisite: NURS 212

NURS 214W Nursing Care of Clients with Psychiatric/Mental Health Disorders (3) Emphasis on care of adults with emotional or dysfunctional mental health patterns. 
Effective: Summer 2011 
Prerequisite: NURS 212, PSYCH 100

NURS 216 Clinical Immersion II: Introduction to Concepts of Leadership (2) Clinical immersion course focusing on patient care and clinical seminars to develop leadership and clinical competencies. 
Effective: Summer 2010 
Prerequisite: NURS 212

NURS 225 Pathophysiology (3) Designed to explore the illness component of health with emphasis on the
pathophysiological and psychosocial aspects.
Effective: Spring 2011
Prerequisite: NURS 250, NURS 251, BIOL 129, BIOL 141

NURS 230 Introduction to the Fundamentals of Nursing (4) Introduction to the nursing process, clinical competencies and psychosocial skills.
Effective: Spring 2011
Prerequisite: NURS 250, NURS 251

NURS 245 (GS) Violence and the Impact on Society (3) Interdisciplinary discussion of violence, its perpetrators, victims and its impact on society as well as possible solutions for violence reduction.
Effective: Spring 2010

NURS 250 (US) Professional Role Dev I: Intro to Professional Issues in Nursing Practice and Nursing Informatics (2) Introduction to professional nursing practice and health-related issues emphasizing application of nursing informatics.
Effective: Spring 2011
Prerequisite: BIOL 129, BIOL 141

NURS 251 Health Assessment (3) Designed to broaden the student's knowledge and skills in health assessment and physical examination across the lifespan.
Effective: Spring 2011
Prerequisite: BIOL 129, BIOL 141 ; orNURS 111S andNURS 112 for Associate Degree Majors; or eligibility for NURN major for RNs.

NURS 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2008

NURS 296A Clinical Judgment-NCLEX Preparation (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

NURS 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2008

NURS 297A Learning and Testing Strategies for Nursing Students (1) Assisting nursing students to evaluate personal current study habits, learning styles, time allocation for class preparation/test taking effectiveness.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: 2NURS major

NURS 298 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2008

NURS 300H Honors Seminar in Nursing (3-12) Seminar activities on selected topics in nursing.
Effective: Spring 2011
Prerequisite: NURS 250, NURS 225, NURS 230, NURS 251 admission to the Honors Program

NURS 301 Nursing Care of the Adult Client Requiring Medical-Surgical Intervention (4) Therapeutic nursing care of the adult client in a variety of primarily medical-surgical settings.
Effective: Spring 2011
Prerequisite: NURS 225, NURS 230

NURS 303 Clinical Application of Laboratory Tests (1) A study of the background, meaning, and nursing implications of laboratory test results.
Effective: Spring 2011
Prerequisite: NURS 250, NURS 225, NURS 230, NURS 251

NURS 305 Introduction to Pharmacological Concepts (3) Study of basic concepts of pharmacology and relevant nursing implications.
Effective: Spring 2011
Prerequisite: NURS 225, NURS 230 ; or approval of program Concurrent: NURS 301 NURS 310

NURS 306 Nursing Care of Children and Adolescents (3) Common health problems and nursing intervention for children and adolescents.
Effective: Spring 2011
Prerequisite: NURS 225, NURS 230, NURS 305

NURS 310 Therapeutic Nursing Care of the Older Adult Client in a Variety of Settings (3) Nursing concerns and intervention in promoting the health of the older adult.
Effective: Spring 2011
Prerequisite: NURS 225, NURS 230

NURS 320 Nursing Care of the Childbearing Family and Gynecological Client (3) Therapeutic nursing care of the childbearing family and gynecological client.
Effective: Spring 2011
Prerequisite: NURS 225, NURS 230, NURS 305

NURS 350 Professional Role Development II: Ethics, Legal and Genetic Issues (2) The study of the interaction of ethical, legal, and genetic concepts as they apply to current health care practice.
Effective: Summer 2010
Prerequisite: NURS 305

NURS 357 Introduction to Nursing Informatics (3) An introduction to nursing informatics focusing on technology applications to the nursing profession.
Effective: Spring 2011
Prerequisite: NURS 301, NURS 306, NURS 310, NURS 320 ; or eligibility for NURN major

NURS 390 (US) Transition and the Professional Nursing Role (3) Transition to baccalaureate education and professional nursing practice, emphasizing leadership, management, and issues influencing nursing education and practice.
Effective: Fall 2008
Prerequisite: eligibility for NURN major

NURS 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2008

NURS 398 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2008

NURS 401 (IL) Concepts of Health (3) Exploration of current and ancient concepts of health and their respective modes of intervention.
Effective: Fall 2008
Prerequisite: PSYCH 100 or SOC 001

NURS 402 (US, IL) Holistic Health (3) Examination of emerging conceptualizations of health and therapy based on a holistic view of human beings.
Effective: Fall 2008
Prerequisite: NURS 401

NURS 403 School Health and Emergency Care of Children and Adolescents (3) Techniques for higher-level care for school health and emergency situations and application-based education.
Effective: Spring 2011
Prerequisite: BIOL 129, BIOL 141, HD FS 129

NURS 404 Cardiac Dysrhythmias: Interpretation, Treatment, and Nursing Management (1) An introductory course with a focus on dysrhythmia recognition and interpretation of abnormal 12-lead electrocardiograms (EKG, ECG).
Effective: Fall 2008
Prerequisite: BIOL 141, BIOL 129 or equivalent or approval of program

NURS 405A Nursing Care of the Adult Client with Complex Health Problems: Part A (4) In-depth study of care of patients with acute and complex health problems, utilizing evidence based practice.
Effective: Spring 2011
Prerequisite: NURS 350

NURS 405B Nursing Care of the Adult Client with Complex Health Problems: Part B (4) In-depth study of care of patients with acute and complex health problems, utilizing evidence based practice.
Effective: Summer 2010
Prerequisite: NURS 350

NURS 407 Drugs of Abuse and Mental Health Issues (3) Examines the health care needs across the lifespan of clients who have an alcohol or other drug disorder.
Effective: Fall 2008
Prerequisite: BB H 143 or PSYCH 100 or approval of program

NURS 408 Clinical Application of Pharmacological Concepts (1) Study of the application of pharmacological concepts to the clinical setting.
Effective: Spring 2011
Prerequisite: NURS 305, NURS 301, NURS 310, NURS 320

NURS 409 Introduction to Forensic Nursing (3) Provides an introduction to the forensic health sciences, forensic nursing, and the nursing role in the scientific investigation of violence.
Effective: Spring 2011
Prerequisite: NURS 250, NURS 225, NURS 230

NURS 415 (US, IL) Community and Family Health Nursing (4) Therapeutic nursing care and health promotion concepts to families, groups and populations in the community.
Effective: Spring 2011
Prerequisite: NURS 350

NURS 417 (US, IL) Family and Community Health Concepts (4) Study of the concepts of family and community based nursing care emphasizing multicultural influences on health practices.
Effective: Fall 2008

The Pennsylvania State University
Prerequisite: NURS 390 and current and valid RN license; Prerequisite or concurrent: NURS 357

NURS 420 Mental Health Nursing (4) Emphasizes clinical application of mental health theory in nursing care of patients with acute and chronic mental health problems.
Effective: Spring 2011
Prerequisite: NURS 350

NURS 430 Organization and Administration for the Nurse Manager (3) Introduction to organizational theory and principles of practice in the administration of nursing services and patient care.
Effective: Spring 2011
Prerequisite: NURS 301, NURS 310, NURS 320; or current and valid RN license for RN to BS majors

NURS 431 Data Management for Nurse Managers (3) Analysis of information systems to manage nursing service organizations; includes financial management, the budgeting processes, and productivity measurement.
Effective: Spring 2011
Prerequisite: NURS 301, NURS 310, NURS 320; or current and valid RN license for RN to BS majors

NURS 432 Nursing Management of Human Resources (3) Human resource management and related factors in nursing service organizations.
Effective: Spring 2011
Prerequisite: NURS 301, NURS 310, NURS 320; or current and valid RN license for RN to BS majors

NURS 433 Seminar for Nurse Managers (3) Course focuses on the application of management principles in the role of the nurse manager.
Effective: Spring 2011
Prerequisite: NURS 301, NURS 310, NURS 320; or current and valid RN license for RN to BS majors

NURS 440 Trauma/Critical Care Nursing (3) Focuses on the impact of and the nursing care of persons experiencing acute trauma and/or critical illness.
Effective: Spring 2011
Prerequisite: NURS 301, NURS 310, NURS 320 or approval of nursing program

NURS 450A Professional Role Development III: Leadership and Management (2) Study of leadership roles and various styles of nursing management and their implications for the professional nurse.
Effective: Spring 2011
Prerequisite: NURS 350

NURS 450B Professional Role Development III: Clinical Capstone (3) Senior level clinical capstone course that emphasizes the integration and application of theory and evidence based practice.
Effective: Summer 2010
Prerequisite: NURS 450A

NURS 452 (US; IL) BB H 452, WMNST 452) Women's Health Issues (3) Exploration of major health issues concerning women today, with an emphasis on social, cultural, and medical influences.
Effective: Fall 2008
Prerequisite: BIOL 141 or PSYCH 100

NURS 458 Ethical Challenges in Healthcare Informatics (3) A case based collaboratory designed for the exploration and analysis of the ethical dilemmas facing healthcare informatics practitioners.
Effective: Spring 2011

NURS 459 Legal and Professional Issues in School Nursing (3) Legal and professional issues of school nurses and delivery impact of health care in school environment.
Effective: Spring 2010
Prerequisite: PSYCH 100 or SOC 001 or HD FS 129

NURS 461 Perioperative Nursing (4) Comprehensive introduction regarding fundamental principles and practices of the Operating Room Nurse when managing the care of the surgical patient.
Effective: Summer 2011
Prerequisite: RN license required

NURS 462 Psychotropic Drugs and Children/Adolescents (1) Study of psychotropic medications used to treat children and adolescents, including indications, actions, adverse reactions and implications for school nurses.
Effective: Summer 2011
Prerequisite: RN license or permission of program

NURS 463 Compassionate Counseling for Children/Adolescents Dealing with Dying, Death, Other Life Crises (3) Compassionate Counseling for Children and Adolescents Dealing with Dying, Death, and Other Life Crises.
Effective: Spring 2010
Prerequisite: PSYCH 100 or SOC 001 or HD FS 129

NURS 464 (US; IL) Dying and Death (3) Explores attitudes toward death and dying; concept of grief; responsibilities to the dying person and the family.
Effective: Fall 2008
Prerequisite: PSYCH 100 or SOC 001

NURS 465 Health Concepts for Adults with Complex Health Care Needs (3) In-depth study and application of the theoretical principles and roles of adult clients and families with complex healthcare needs.
Effective: Spring 2011
Prerequisite: NURS 390 and current and valid RN license; Prerequisite or concurrent: NURS 357
NURS 467 Medication Update and Health Teaching Interventions for School Nurses (1) Study of current pharmacologic concepts, including health teaching, prescribed for acute and chronic conditions commonly encountered in school nursing.

Effective: Summer 2011
Prerequisite: RN license or permission of program

NURS 468 Client Education Strategies for Nurses and Other Health Care Providers (3) Explores current and emerging roles of client education in the knowledge era.

Effective: Summer 2011
Prerequisite: PSYCH 100 or SOC 001 or HD FS 129 300-level standing or approval of program

NURS 475 Integrated Concepts in Nursing Practice (3) Project-based capstone course for application of nursing concepts to health promotion/disease prevention in populations.

Effective: Spring 2011
Prerequisite: NURS 417; and current and valid RN license

NURS 492 Emergency Care and Safety (3) A comprehensive first aid course designed to provide knowledge of prehospital emergency care at the First Responder level.

Effective: Fall 2008
Prerequisite: BIOL 141, BIOL 129 or equivalent or approval of program

NURS 494H Honors Thesis (1-6 per semester/maximum of 6) Independent honors research project related to student's interests directed by faculty supervisor and culminating in production of thesis.

Effective: Summer 2010
Prerequisite: approval of honors thesis adviser

NURS 495 Nursing study in Specialized Setting (1-12) Designed to provide student with in-depth study and practice in clinical specialty area of choice.

Effective: Fall 2008
Prerequisite: seventh-semester standing

NURS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2008

NURS 496A Severe Sepsis Protocol Compliance-Impact on Patient Outcome (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2011 Ending: Summer 2011
Prerequisite: PSYCH 100 or SOC 001 or HD FS 129 or program approval

NURS 496D Progressive Care Certification (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

NURS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2008

NURS 497A Autism Spectrum Disorders: Care Overview (1) An overview of autism spectrum disorders.

Effective: Summer 2011 Ending: Summer 2011
Prerequisite: PSYCH 100 or SOC 001 or HD FS 129 or program approval

NURS 497A Relational Aggression in the Healthcare Setting (3) Explores issue of relational aggression in healthcare workforce with specific focus on nursing profession. Examine research/impact of this problem.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: PSYCH 100; NURN NURS or 2NURS majors only

NURS 497B Bullying: Identification and Intervention (1) Explores the impact of bullying on individuals, schools, teachers, families of the target and the bully.

Effective: Summer 2011 Ending: Summer 2011
Prerequisite: PSYCH 100 or SOC 001 or HD FS 129 or program approval

NURS 497C Mental Health Movies & Madness (3) Clinical application of mental health theory in nursing care of patients with acute/chronic mental health problems and use of film technology.

Effective: Summer 2011 Ending: Summer 2011
Prerequisite: PSYCH 100 and eligibility for the NURN major

NURS 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2008

NURS 499 (IL) Foreign Study--Nursing (1-9) Study of nursing issues in a foreign country.

Effective: Fall 2008
Nutrition (NUTR)

NUTR 100 (GHA) Contemporary Nutrition Concerns (1.5) Interpretation of nutrition principles in relation to contemporary problems in selecting a diet to promote a healthy lifestyle. Students who have received credit for NUTR 151 or NUTR 251 may not schedule this course.
Effective: Spring 2004

NUTR 115 Theory of Exercise and Nutrition for Weight Control (1) Nutrition application for responsible weight control.
Effective: Spring 2005
   Concurrent: ESACT 115

NUTR 119 Elementary Foods (3) Basic principles and fundamental processes underlying food preparation. For non-nutrition majors only.
Effective: Spring 1992

NUTR 120 Food Preparation (3) Scientific principles of basic food preparation, with an emphasis on the physical and chemical aspects.
Effective: Summer 2007
   Prerequisite: CHEM 202

NUTR 170 Careers in Nutrition (1) Nutrition professionals describe career paths and opportunities for graduates in applied and science options; strategies for making effective career decisions.
Effective: Summer 1996

NUTR 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

NUTR 230 (HIST 230, S T S 230) American Food System: History, Technology and Culture (3) A cultural analysis of the evolution of U.S. agricultural production and food consumption patterns, the food industry and food marketing.
Effective: Spring 1992

NUTR 251 (GHA) Introductory Principles of Nutrition (3) The nutrients: food sources and physiological functions as related to human growth and well-being throughout life; current nutrition issues. Students who have passed NUTR 151 may not schedule this course.
Effective: Spring 2004

NUTR 252 Diet Therapy and Nutrition Care in Disease (4) Principles of nutrition care to meet therapeutic needs, inpatient care, and rehabilitation.
Effective: Summer 2011
   Prerequisite: NUTR 251

NUTR 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1992

NUTR 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1992

NUTR 298 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

NUTR 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

NUTR 358 Assessment of Nutritional Status (2) Introduction to purpose, methods, and scientific basis for assessment of nutritional status in total health care for individuals and groups.
Effective: Fall 2002
   Prerequisite: NUTR 251

NUTR 359 Nutrition Assessment Theory and Practice (2) Introduction to purpose, methods, and scientific basis for assessment of nutritional status and use of tools in a practice setting.
Effective: Summer 1993
   Prerequisite: NUTR 151 or NUTR 251

NUTR 360 Disseminating Nutrition Information (3) Theory and practice of providing nutrition information across the
lifespan. Open only to Health and Human Development majors.
Effective: Fall 2002
Prerequisite: NUTR 251

NUTR 370 Profession of Dietetics (1) Introduction to the profession of dietetics including laws, regulations and standards affecting practice, and preparation for post-baccalaureate degree training.
Effective: Spring 1992
Prerequisite: senior standing in Nutrition or Hotel Restaurant and Institutional Management

NUTR 375 Nutrition Peer Education Training (2) To train students accepted into the HealthWorks Peer Education Program, to provide reliable nutrition information to their peers.
Effective: Spring 2000
Prerequisite: NUTR 251 . Prerequisite or concurrent:NUTR 360

NUTR 380 Leadership Principles in Nutrition Services (3) Issues impacting delivery of nutrition services in health care environments, including, health care systems, management theories, decisions making, and leadership.
Effective: Summer 2005
Prerequisite: NUTR 100 orNUTR 251

NUTR 386 Managing Quality in Food and Nutrition Services (3) Application and integration of management theory to quality attainment in food and nutrition services.
Effective: Spring 2010
Prerequisite: HRIM 329   Concurrent: HRIM 330

NUTR 395 Nutrition Field Experience (1-6) Supervised off-campus, non-group instruction including individual field experiences, practicums or internships. Written and oral critique of activity is required.
Effective: Spring 1992
Prerequisite: NUTR 251 ; fourth-semester standing

NUTR 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

NUTR 400 Introduction to Nutrition Counseling (1) No description.
Effective: Fall 1998
Prerequisite: NUTR 358 . Prerequisite or concurrent:NUTR 446

NUTR 401 Nutrition Clinic Practicum (1-3) To provide qualified nutrition students with the opportunity to practically apply nutrition counseling skills in a supervised environment.
Effective: Spring 2002
Prerequisite: NUTR 400

NUTR 421 (US;IL) Food Culture and Health Trends (3) Social-political, historic, and geographic roots of food patterns, featuring specific cuisine areas and nutritional disease patterns; includes foods laboratory.
Effective: Summer 2005
Prerequisite: NUTR 119 orNUTR 120;NUTR 151 orNUTR 251

NUTR 430 (IL) (S T S 430) Global Food Strategies: Problems and Prospects for Reducing World Hunger (3)
Technological, social, and political solutions to providing basic food needs; food resources, population, and the environment; current issues.
Effective: Summer 2005

NUTR 445 Nutrient Metabolism I (3) Nutrients, their sources, metabolism, interrelationships and requirements with focus on carbohydrates, lipids, and proteins.
Effective: Spring 2001
Prerequisite: B M B 211, BIOL 141, NUTR 251

NUTR 446 Nutrient Metabolism II (3) Continuation of NUTR 445; nutrients, their sources, metabolism, inter-relationships and requirements with focus on vitamins and minerals.
Effective: Summer 1994
Prerequisite: NUTR 445

NUTR 451 Nutrition throughout the Life Cycle (3) Application of basic principles of nutrition to nutritional and physiological needs throughout the life cycle from prenatal to aging.
Effective: Spring 2001
Prerequisite: NUTR 358, NUTR 445 . Prerequisite or concurrent:NUTR 446

NUTR 452 Nutritional Aspects of Disease (3) Disturbances in metabolism related to human disease processes; principles of nutrition in therapy.
Effective: Spring 1995
Prerequisite: NUTR 446

NUTR 453 Diet in Disease (3) Nutrient and energy controlled diet programs. Implications for nutrition counseling and education.
Effective: Spring 1995
Prerequisite: or concurrent:NUTR 452

NUTR 456 Community Nutrition (2) Programs and policies of nutrition-related activities of community agencies; factors pertinent to nutrition education.
Effective: Spring 1992
Prerequisite: NUTR 251

NUTR 490W Nutrition Seminar (3) Use of selected materials from the scientific literature to prepare a term paper and an oral report.
Effective: Spring 1995
Prerequisite: or concurrent:NUTR 452

NUTR 494H Senior Honors Thesis (1-6) Independent study related to a student's interests directed by a faculty supervisor and culminating in the production of a thesis.
Effective: Summer 2006
Prerequisite: approval of honors thesis advisor

NUTR 495 Advanced Field Experience in Nutrition (1-6) Supervised off-campus, non-group instruction including individual field experiences, practicums or internships. Written and oral critique of activity is required.
Effective: Spring 2001
Prerequisite: NUTR 456

NUTR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1992

NUTR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1992

NUTR 497B Nutrition and Physical Activity and Exercise and Health (3) To understand the role that nutrients play in supporting optimal physical performance in both recreational exercisers and competitive athletes.

NUTR 497C Topics in International Nutrition (3) Examines nutrition-related health problems facing developing country populations, particularly women and children, and interventions meant to alleviate these problems.

NUTR 497G (S T S 497G) Community Food Security (3) Through active learning, students explore how communities can reshape food systems, increasing access to wholesome food while increasing economic opportunities.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

NUTR 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

NUTR 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM
Occupational Therapy (O T)

O T 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2000

O T 098 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2000

O T 100S Structural Foundations of Occupational Therapy (1) An overview of the structural foundations of the occupational therapy profession.
Effective: Spring 2011

Effective: Spring 2011
Prerequisite: O T 100S or current

O T 103 (US) Occupational Performance Across the Life Span (3) Analysis of occupations from birth to death including descriptions of occupational performance and factors which influence performance.
Effective: Spring 2011
Prerequisite: O T 100S, O T 101

O T 105W Activity Analysis: Group Interaction Skills (3) Group interaction observed and analyzed. Activities to facilitate and enhance interactions practiced.
Effective: Spring 2007
Prerequisite: O T 101, PSYCH 100

O T 107 Activity Analysis: Assistive Technologies and Methods of Adaptation (3) Assistive technologies and methods of adaptation analyzed; selection criteria, methodologies, proper use, and precautions presented.
Effective: Spring 2000
Prerequisite: O T 101

O T 107H Activity Analysis: Assistive Technologies and Methods of Adaptation (3) Assistive technologies and methods of adaptation analyzed; selection criteria, methodologies, proper use, and precautions presented.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: O T 101

O T 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2000

O T 198 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2000

O T 201 Documentation Skills for OTA Students (3) Instruction and practice in documentation of occupational therapy intervention utilizing selected formats.
Effective: Spring 2011
Prerequisite: O T 100S, O T 101 or consent of program

Effective: Spring 2000
Prerequisite: HD FS 129, O T 103, O T 105, O T 107

O T 204 Occupational Therapy for Psychosocial Dysfunctions (3) Occupational therapy evaluation, intervention, documentation, methods for psychosocial dysfunctions. Observation of therapists in treatment settings.
Effective: Spring 2000
Prerequisite: HD FS 129, O T 103, O T 105

O T 206 Occupational Therapy for Physical Disabilities (3) Occupational therapy evaluation, intervention, documentation methods for physical disabilities, observation of therapists in treatment settings.
Effective: Spring 2000
Prerequisite: BIOL 129, BIOL 141, BIOL 142, O T 103, O T 107

O T 295A Field Experience in Occupational Therapy I (6) Part I of supervised experience in select occupational therapy settings in the role of an occupational therapy assistant; seminars included.
Effective: Fall 2008
Prerequisite: satisfactory completion of all didactic course work
O T 295B Field Experience in Occupational Therapy II (6) Part II of supervised experience in select occupational therapy settings in the role of an occupational therapy assistant; seminars included.
Effective: Spring 2010
Prerequisite: successful completion of all didactic course work and successful completion of OT 295A
O T 296 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2000

O T 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2000

O T 298 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2000

O T 401 Conceptual Foundations of Occupational Therapy and Occupational Adaptations (2) Analysis of philosophies and frames of reference for occupational therapy practice, emphasizing occupational functioning, the adaptation process, and occupational environments. Occupational Therapy majors only.
Effective: Spring 2000

O T 410 Environmental and Technological Influences on Occupational Adaptation and Performance (3) Impact of occupational environments on functioning and technological adaptation for mastery over the environment.
Effective: Summer 2011

O T 411 Occupational Therapy Management and Professional Ethics (3) Ethical, managerial, fiscal, and legal responsibilities of program administration, supervision, practice, delivery, and professional development.
Effective: Spring 2000
Prerequisite: O T 401

O T 412W Introduction to Research (3) Introduction to quantitative and qualitative research process relative to occupational therapy.
Effective: Summer 2011
Prerequisite: STAT 200 or STAT 250

O T 495A Level I Fieldwork Experience (1 per semester, maximum of 3) Practicum in 3 of 5 areas: occupational therapy evaluation procedures; environmental and technological adaptation; program design; management issues; selected topics.
Effective: Spring 2000
Prerequisite: concurrent with occupational therapy didactic course work

O T 495B Fieldwork Level II Part 1 (6) Three month practical educational experience facilitating clinical reasoning and application of professional knowledge, behaviors, values, and skills.
Effective: Spring 2000
Prerequisite: completion of O T 495A and all didactic course work

O T 495C Fieldwork Level II Part 2 (6) Three month practical educational experience facilitating clinical reasoning and application of professional knowledge, behaviors, values, and skills.
Effective: Spring 2000
Prerequisite: successful completing of O T 495B

O T 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2000

O T 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2000
Penn State First-Year Seminar (PSU)

PSU 001 First-Year Seminar Abington (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Spring 1999

PSU 002 First-Year Seminar Agricultural Science (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Spring 1999

PSU 003 First-Year Seminar Altoona (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Spring 1999

PSU 005 First-Year Seminar Berks (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Spring 1999

PSU 006 First-Year Seminar Business (1-3) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Fall 2004

PSU 006T First-Year Seminar Business (1-3) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Fall 2007

PSU 007 First-Year Seminar Behrend (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Spring 1999

PSU 008 First-Year Seminar University College (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Spring 1999

PSU 008S First-Year Seminar University College (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Spring 2000

PSU 008T First-Year Seminar University College (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Fall 1999

PSU 009 First-Year Seminar Communications (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Spring 1999

PSU 009T First-Year Seminar Communications (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Spring 2006

PSU 010 First-Year Seminar Earth and Mineral Sciences (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Spring 1999

PSU 011 First-Year Seminar Education (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Spring 1999

PSU 012 First-Year Seminar Engineering (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life. Effective: Spring 1999
PSU 014 First-Year Seminar Health and Human Development (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life.
   Effective: Spring 1999

PSU 015 First-Year Seminar Liberal Arts (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life.
   Effective: Spring 1999

PSU 016 First-Year Seminar Science (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life.
   Effective: Spring 1999

PSU 017 First-Year Seminar College of Information Sciences and Technology (1) Facilitate student's adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life.
   Effective: Fall 2007

Last Import from UCM: June 16, 2011 3:00 AM
Petroleum and Natural Gas Engineering (P N G)

P N G 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1999

P N G 398 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1999

P N G 405 Rock and Fluid Properties (3) Reservoir rock properties, rock and fluid properties (interaction between rock and fluids), flow behavior in reservoir, and fluid properties.
Effective: Spring 2002
Prerequisite: PHYS 211

P N G 406 Rock and Fluid Laboratory (1) Systematic study of oil reservoir rocks and fluids; their interrelation applied to petroleum engineering.
Effective: Spring 2001
Prerequisite: PHYS 211 Concurrent: P N G 405

Effective: Spring 2001
Prerequisite: P N G 405, P N G 406, PHYS 211

P N G 411 Introduction to Petroleum and Natural Gas Extraction (1) Introduction to the design and implementation of the systems used in the extraction of oil and gas. Not intended for petroleum and natural gas engineering majors.
Effective: Spring 2001
Prerequisite: PHYS 211

P N G 420 Applied Reservoir Analysis and Secondary Recovery (4) Application of material balance equations/transient flow solutions to water influx problems; displacement theory as it applies to design/behavior of flooding.
Effective: Spring 2008
Prerequisite: P N G 410;CMPSC 201 orCMPSC 202

Effective: Spring 1999
Prerequisite: MATH 251, P N G 420

P N G 430 Reservoir Modeling (3) The numerical simulation of petroleum reservoir processes by the use of models; scaling criteria and network flow.
Effective: Spring 2008
Prerequisite: MATH 251, P N G 410;CMPSC 201 orCMPSC 202

P N G 440W Formation Evaluation (3) Study of those methods used to evaluate the engineering properties of oil and gas bearing reservoir formations.
Effective: Spring 1999
Prerequisite: P N G 405, P N G 406

P N G 450 Drilling Design and Production Engineering (3) Design and analysis of oil-field drilling operations and equipment.
Effective: Spring 2001
Prerequisite: C E 360, E MCH 210

P N G 451 Oil Well Drilling Laboratory (1) Practice in well-control procedures. Measurement of drilling fluid properties.
Effective: Spring 2001
Prerequisite: C E 360, E MCH 210 Concurrent: P N G 450

P N G 475 Petroleum Engineering Design (3) Design and selection of mechanical components used in the production of fluids from subsurface reservoirs.
Effective: Spring 2001
Prerequisite: E MCH 210

P N G 480 Production Process Engineering (3) Analysis and evaluation of surface production processes, fluid separation, storage, measurement, treating, custody transfer, transmission, disposal, corrosion, and other operations.
Effective: Fall 2007
Prerequisite: C E 360;M E 201 orM E 300

P N G 482 Production Engineering Laboratory (1) Measurement and analyses of the physical and chemical properties of hydrocarbon fluid systems in a production environment.
Effective: Fall 2007
Prerequisite: C E 360;M E 201 orM E 300 Concurrent: P N G 480

P N G 489 Engineering Evaluation of Oil and Gas Properties (3) Application of present worth and rate-of-return
analysis; reserve calculations; decline curve analysis; uncertainty and risk analysis to engineering project design and evaluation.

Effective: Spring 2011
Prerequisite: ECON 102

P N G 490 Introduction to Petroleum Engineering Design (1) Introduction to the concepts of engineering design as applied to petroleum and natural gas projects.
Effective: Spring 2011
Prerequisite: ECON 102, P N G 405, P N G 489

P N G 491 Reservoir Engineering Design (1) Application of the concepts of reservoir and drilling engineering to petroleum engineering design projects.
Effective: Spring 2011
Prerequisite: ECON 102, P N G 410, P N G 450, P N G 490

P N G 492 Petroleum Engineering Capstone Design (1) Integration of petroleum and natural gas engineering concepts to project design.
Effective: Fall 2001
Prerequisite: P N G 491

P N G 494 Thesis (1-6) A problem in petroleum engineering involving review of the literature and experimental data obtained in the field or laboratory.
Effective: Spring 1999

P N G 494H Thesis (1-6) A problem in petroleum engineering involving review of the literature and experimental data obtained in the field or laboratory.
Effective: Fall 2007

P N G 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2007

P N G 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1999

P N G 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1999

NOTE: Courses in the use of X-ray diffraction, electron microscopy, and spectroscopy in petroleum and natural gas studies are listed under MATERIALS SCIENCE and GEOLOGICAL SCIENCES.

Last Import from UCM: June 16, 2011 3:00 AM
Philosophy (PHIL)

PHIL 001 (GH) Basic Problems of Philosophy (3) Introduction to central philosophical themes, including the mind/body problem, the existence of God, ethical problems, the nature of reality. Students may take only one course for General Education credit from PHIL 001 GH or 004 GH. Effective: Spring 2000

PHIL 001H (GH) Basic Problems of Philosophy (3) Introduction to central philosophical themes, including the mind/body problem, the existence of God, ethical problems, the nature of reality. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PHIL 002 (GH) Philosophy, Politics, and Social Theory (3) Examines relations between political and social organizations, the justification and limits of the state, and issues concerning individuality and community. Effective: Fall 2003

PHIL 003 (GH) Persons, Moral Values and the Good Life (3) Major ethical positions and assumptions regarding questions of freedom, choice, obligation, and conflicts in contemporary moral conduct, values, and reasoning. Effective: Fall 2004

PHIL 005 (GH) Philosophy, Art, and Film (3) Explores relations between images and reality, representation and culture, and beauty and politics through film, artworks, and aesthetic theories. Effective: Spring 2002

PHIL 006 (GH:IL) (CMLIT 006) Philosophy and Literature in Western Culture (3) Explores fundamental issues of human existence through the traditions of western literature and philosophy. Effective: Spring 2006

PHIL 007 (GH:IL) Asian Philosophy (3) Introduction to philosophical, moral, and aesthetic teachings of Asian traditions such as Hinduism, Buddhism (including Zen), Taoism, Confucianism, and Shintoism. Effective: Summer 2005

PHIL 008 (GH) (WMNST 008) Philosophy and Feminism (3) Explores diverse feminist philosophies of culture and knowledge, and examines gender’s role in accounts of reality, truth, morality, and justice. Effective: Spring 2006

PHIL 009 (GH;US) Philosophy, Race, and Diversity (3) Critically examines the significance of race and cultural diversity for, and in, understandings of reality, knowledge, truth, morality, and justice. Effective: Summer 2005

PHIL 010 (GH) Critical Thinking (3) Discussion of the validity, soundness, and fallacies of everyday language use and reasoning; informal logic; and manipulative arguments and propaganda. Effective: Fall 2003

PHIL 010S (GH) Critical Thinking (3) Discussion of the validity, soundness, and fallacies of everyday language use and reasoning; informal logic; and manipulative arguments and propaganda. Effective: Spring 2005

PHIL 011 (GH) Philosophy, Science, and Truth (3) Examines the philosophical foundations of natural scientific inquiry, knowledge, objectivity, and the relation of scientific truth to common sense. Effective: Fall 2003

PHIL 012 (GQ) Symbolic Logic (3) Formal logical structures of propositions and arguments; mechanical tests and proof techniques for logically necessary truth and deductive validity. Effective: Fall 1998

PHIL 014 (GH;US) Philosophy of Love and Sex (3) Explores Western theories and attitudes concerning intimacy and examines various ethical issues involving love and sex. Effective: Summer 2005
PHIL 083S (GH) **First-Year Seminar in Philosophy** (3) Critical introduction to philosophical issues in ethics, social and political theory, religion, art, metaphysics, and epistemology.
Effective: Summer 1999

PHIL 098 **Special topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2001

PHIL 100 (GH) **The Meaning of Human Existence** (3) Explores differing views of the significance of human life, the meaning of freedom, and the way to a meaningful life.
Effective: Fall 2003

PHIL 100H (GH) **The Meaning of Human Existence** (3) Explores differing views of the significance of human life, the meaning of freedom, and the way to a meaningful life.

PHIL 101 (GH) **Pragmatism and American Philosophy** (3) An introduction to American thought and its relation to American culture, with a focus on the development of pragmatism.
Effective: Fall 2003

PHIL 102 (GH) **Existentialism and European Philosophy** (3) Introduction to European philosophy and issues of life, death, meaning, and absurdity, with a focus on existentialism and its development.
Effective: Fall 2003

PHIL 103 (GH) **Introduction to Ethics** (3) Ethical theory about virtue, duty, autonomy, and life quality applied to moral problems, including character, violence, oppression, abortion, and suicide.
Effective: Fall 2003

PHIL 103W (GH) **Introduction to Ethics** (3) Ethical theory about virtue, duty, autonomy, and life quality applied to moral problems, including character, violence, oppression, abortion, and suicide.
Effective: Fall 1998
Prerequisite: ENGL 015 or ENGL 030

PHIL 105 (GH) **Introduction to Philosophy of Law and Legal Ethics** (3) Historical and contemporary philosophies of law; concepts of responsibility, property, rights, and justice; and ethical issues in legal practice.
Effective: Fall 2003

PHIL 106 (GH) **Introduction to Business Ethics** (3) Studies ethical foundations of business and ethical problems in business practices such as advertising, international trade, labor relations, and marketing.
Effective: Fall 2003

PHIL 107 (GH) (S T S 107) **Introduction to Philosophy of Technology** (3) The character of technology; its relation to human values; philosophical assumptions in its development; and how it transforms the world.
Effective: Spring 2004

PHIL 108 (GH) **Introduction to Social and Political Philosophy** (3) Critical introduction to political authority, rights, justice, community, inequality, power, pluralism, and other contemporary, social, and political issues.
Effective: Fall 2003

PHIL 108W (GH) **Introduction to Social and Political Philosophy** (3) Critical introduction to political authority, rights, justice, community, inequality, power, pluralism, and other contemporary, social, and political issues.
Effective: Summer 1998
Prerequisite: ENGL 015 or ENGL 030

PHIL 109 (GH) **Introduction to Aesthetics** (3) Examines the nature of art and aesthetic experience, art's relation to beauty and truth, and the nature of creativity.
Effective: Fall 2003

PHIL 110 (GH) **Introduction to Philosophy of Science** (3) Examines science's assumptions about knowledge and reality, the relation between science and culture, and the nature of scientific progress.
Effective: Fall 2003

PHIL 113 (GH) **Introduction to Philosophy of Literature** (3) Examines philosophical ideas in literature, literary forms in philosophies, style and genre, and relation of philosophy, literature, writing, and culture.
Effective: Fall 2003

PHIL 113H (GH) **Introduction to Philosophy of Literature** (3) Examines philosophical ideas in literature, literary forms in
PHIL 115 (GH) **Introduction to Philosophy and Education** (3) Examines the nature and goals of education, the philosophical foundations of educational theories, and their economic, political, and cultural implications. Effective: Fall 2003

PHIL 116 (GH) **Introduction to Philosophy of Social Science** (3) Examines the philosophical foundations of the social sciences, focusing on issues of methodology, quantification, objectivity, and value-neutrality. Effective: Fall 2003

PHIL 118 (GH) **Introduction to Environmental Philosophy** (3) Considers the moral status of the environment and applies ethical theory to issues such as preservation, hunger, pollution, and sustainability. Effective: Fall 2003

PHIL 119 (GH) **Ethical Leadership** (3) Introduction to philosophical theories of ethics and leadership. Uses literary and biographical texts in developing skills of application. Effective: Summer 2007

PHIL 122 (GH) **Introduction to Philosophy of History** (3) Examines methodological foundations and interpretations of history, the objectivity of history, and the issue of history as design or chance. Effective: Fall 2003

PHIL 123 (GH) **Introduction to Ethics in Media and Journalism** (3) Studies ethical problems, human values, and politics in differing media forms and the ways media shape such problems and values. Effective: Fall 2003

PHIL 124 (GH) **Introduction to Philosophy of Religion** (3) Explores the meaning of religious belief and experience, the existence of God, ideas of spirituality, and the question of immortality. Effective: Fall 2003
Prerequisite: third-semester standing

PHIL 125 (GH) **Introduction to Theories of Knowledge** (3) Historical and contemporary views on the foundations and conditions of knowledge, belief, justification, and truth, conception, perception, and interpretation. Effective: Fall 2003

PHIL 125W (GH) **Introduction to Theories of Knowledge** (3) Historical and contemporary views on the foundations and conditions of knowledge, belief, justification, and truth, conception, perception, and interpretation. Effective: Summer 1998
Prerequisite: ENGL 015 or ENGL 030

PHIL 126 (GH) **Introduction to Metaphysics** (3) Explores the nature of being and reality, the problem of free will and the mind/body problem, identity, and causality. Effective: Fall 2003

PHIL 126H (GH) **Introduction to Metaphysics** (3) Explores the nature of being and reality, the problem of free will and the mind/body problem, identity, and causality. Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

PHIL 126W (GH) **Introduction to Metaphysics** (3) Explores the nature of being and reality, the problem of free will and the mind/body problem, identity, and causality. Effective: Summer 1998
Prerequisite: ENGL 015 or ENGL 030

PHIL 127 (GH) **Introduction to Philosophy of Mind** (3) Problems and concepts of mind and consciousness including mind-brain identification, the nature of subjectivity, identity, and artificial intelligence. Effective: Fall 2003

PHIL 129 (GH) **Introduction to Philosophy of Language** (3) Studies the nature of meaning in language, how we acquire language, communication, signs, and language as descriptive of reality. Effective: Fall 2003

PHIL 132 (GH) (RL ST 131) **Introduction to Bioethics** (3) Studies questions of ethics in relation to biotechnology research and implementation, genetic engineering, medicine, animal and human rights. Effective: Fall 2003

PHIL 197 **Special topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
PHIL 198 Special topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1995

PHIL 199 (IL) Foreign Study--Philosophy (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Fall 2001

PHIL 200 (GH) (CAM 200) Ancient Philosophy (3) Examines the thought and influence of major Western thinkers from the pre-Socratics to the neo-Platonists, emphasizing Plato and Aristotle.
Effective: Fall 2003

PHIL 201 (GH) Medieval Philosophy (3) Examines the thought and influence of major Western thinkers from the fourth to the fifteenth centuries, emphasizing Augustine and Aquinas.
Effective: Fall 2003

PHIL 202 (GH) Modern Philosophy (3) Examines the thought and influence of major Western thinkers from Descartes to Kant, emphasizing rationalism and empiricism, and critical philosophy.
Effective: Fall 2003

PHIL 203 (GH) Nineteenth Century Philosophy (3) Examines the thought and influence of major Western thinkers from Hegel to Nietzsche, including Marx, Kierkegaard, and Schopenhauer.
Effective: Fall 2003

PHIL 204 (GH) Twentieth Century Philosophy (3) Examines the thought and influence of major Western thinkers of the century, including pragmatists, phenomenologists, existentialists, critical theorists, and feminists.
Effective: Fall 2003

PHIL 208 (GH) Contemporary Philosophy (3) Recent trends in philosophical thought and culture, hybrid philosophies, and the philosophical landscape of the future.
Effective: Fall 2003

PHIL 211 (GH) Philosophy of Science (3) An inquiry into the form and function of concepts, laws, theories, and into the character of scientific explanation and prediction.
Effective: Fall 2003

PHIL 233 (GH) (S T S 233) Ethics and the Design of Technology (3) Ethics and individual and group decision-making in the design of technology including design projects and specific attention to institutional ethics.
Effective: Spring 2004

PHIL 280H (GH) (FD SC 280H) Food, Values, and Health (3) The perceived relationship between food and health, emphasizing the conceptual nature of both; and how values contribute to the relationship.
Effective: Spring 2007

PHIL 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

PHIL 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PHIL 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PHIL 297A Beatles Music & Philosophy (3) This course will introduce students to concepts from philosophy through an examination of the music of the Beatles. In some instances this involves a philosophical examination of Beatles songs. In other instances, the course will consider how the Beatles themselves consciously advanced their own philosophical ideas.
Effective: Summer 2011 Ending: Summer 2011

PHIL 298 Special topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2001

The Pennsylvania State University
PHIL 299 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

PHIL 395 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor

PHIL 398 **Special topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2001

PHIL 399 (IL) **Foreign Study--Philosophy** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

PHIL 401 (AM ST 421) **American Philosophy** (3) Survey of key figures and movements in American thought including the Transcendentalists, the Pragmatists, and contemporary developments.
Effective: Fall 2007
Prerequisite: 9 credits of philosophy or 6 credits of philosophy at the 200-level or 5th semester standing

PHIL 402 **European Philosophy** (3 per semester, maximum of 6) Survey of key figures and movements of Europe, including phenomenology, existentialism, structuralism and post-structuralism, and critical theory.
Effective: Fall 2007
Prerequisite: PHIL 102 6 credits of philosophy at the 200 level or 5th semester standing

PHIL 403 **Environmental Ethics** (3) Examines ethical theories, justice, rights, community, and human values revolving around such issues as preservation, conservation, pollution, sustainability, and population.
Effective: Fall 2007
Prerequisite: 9 credits of philosophy including PHIL 103 or 6 credits of philosophy at the 200 level or 5th semester standing

PHIL 405 **Philosophy of Law** (3) Examines philosophical views of the nature of law, legal ethics, law and society through questions regarding definition, interpretation, and institutions.
Effective: Fall 2007
Prerequisite: 9 credits of philosophy including PHIL 105 or 6 credits of philosophy at the 200 level or 5th semester standing

PHIL 406 **Business Ethics** (3) Examines the moral justification of business practices and economic systems through critical analyses of case studies and applied ethical theories.
Effective: Fall 2007
Prerequisite: fifth-semester standing

PHIL 407 (S T S 407) **Technology and Human Values** (3) Interrelationships of twentieth-century technological change and human values. Emphasis on the social and ethical aspects of technological progress.
Effective: Spring 1999
Prerequisite: 9 credits of philosophy including PHIL 107 or 6 credits of philosophy at the 200 level

PHIL 408W **Social and Political Philosophy** (3) Historical and philosophical foundations of political organization, authority, and justice, and contemporary issues of rights, community, and culture.
Effective: Fall 1998
Prerequisite: 9 credits in philosophy including PHIL 108 or 6 credits at the 200 level

PHIL 409 **Aesthetics** (3) Studies concepts of beauty, truth, value, representation, production and reproduction, and reality through philosophical theory and works of art.
Effective: Fall 2007
Prerequisite: 9 credits of philosophy including PHIL 109 or 6 credits of philosophy at the 200 level or 3 credits of art or 5th semester standing

PHIL 410 **Philosophy of Science** (3) Historical and contemporary foundational and methodological issues such as causality, relativity and epistemological relativism, teleology, and the nature of reality.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy including PHIL 110 or 6 credits of philosophy at the 200 level

PHIL 413 **Philosophy of Literature** (3) Discusses truth, belief, illusion, imagination and creativity through philosophical literature, as well as problems of philosophical writing.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy including PHIL 113 or 6 credits of philosophy at the 200 level

PHIL 416 **Philosophy of Social Science** (3) Examines the philosophical nature and foundations of methodology, structures and objects, value-neutrality and objectivity in the social sciences.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including PHIL 116 or 6 credits of philosophy at the 200 level

PHIL 418 **Ethics** (3) Examines ethical theories, justice, rights, community, and human values revolving around such issues as preservation, conservation, pollution, sustainability, and population.
Effective: Fall 2007
Prerequisite: 9 credits of philosophy including PHIL 103 or 6 credits of philosophy at the 200 level or 5th semester standing

PHIL 418W Ethics (3) Examines ethical theories, justice, rights, community, and human values revolving around such issues as preservation, conservation, pollution, sustainability, and population.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including PHIL 103 or 6 credits of philosophy at the 200 level

PHIL 422 Philosophy of History (3) Philosophical investigation of history as content and knowledge, objectivity and relativism in historical analysis, historical laws, interpretation, explanation and narrativity.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including PHIL 122 or 6 credits of philosophy at the 200 level

PHIL 424 Philosophy of Religion (3) Examines the relation between faith and reason, the nature of religious experience, the problem of evil, the existence of God.
Effective: Fall 2007
Prerequisite: 9 credits of philosophy including PHIL 124 or 6 credits of philosophy at the 200 level or 5th semester standing

PHIL 425W Epistemology (3) The nature of cognition and perception, the conditions of experience, and the justification and truth of belief.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including PHIL 125 or 6 credits of philosophy at the 200 level; in addition to ENGL 015 or ENGL 030

PHIL 426W Metaphysics (3) Examines the nature of reality, the existence of freedom, and the nature of matter, mind, and values.
Effective: Summer 1998
Prerequisite: 9 credits in philosophy including PHIL 126 or 6 credits of philosophy at the 200 level

PHIL 427 Philosophy of Mind (3) Investigates problems of mind from the standpoint of traditional metaphysical views, modern scientific psychology, neuroscience, and artificial intelligence.
Effective: Spring 1999
Prerequisite: 9 credits of philosophy including PHIL 127 or 6 credits of philosophy at the 200 level

PHIL 427H Philosophy of Mind (3) Investigates problems of mind from the standpoint of traditional metaphysical views, modern scientific psychology, neuroscience, and artificial intelligence.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: 9 credits of philosophy including PHIL 127 or 6 credits of philosophy at the 200 level

PHIL 432 (S T S 432) Medical and Health Care Ethics (3) Examines ethical, political, and social issues in the research, implementation, and practice of medicine, medical technologies, and healthcare.
Effective: Fall 1998
Prerequisite: fifth-semester standing

PHIL 433 (S T S 433) Ethics in Science and Engineering (3) Ethical issues arising in the practice of science and engineering and their philosophical analysis.
Effective: Fall 1995

PHIL 434H (HIST 424H, J ST 424H, RL ST 424H) Monotheism and the Birth of the West (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.
Effective: Spring 2002
Prerequisite: CAMS 004, CAMS 110, CAMS 120 or HIST 102

PHIL 435 (S T S 435) The Interrelation of Science, Philosophy, and Religion (3) The historical and transformative interactions between science and Western philosophical and religious views of nature, humanity, and God.
Effective: Spring 1996

PHIL 437 (IL) World Philosophies and Cultures (3) Philosophical traditions, problems, and authors in African, Asian, Middle- Eastern, Native American, or other non-Western cultures and intellectual traditions.
Effective: Fall 2007
Prerequisite: 9 credits of philosophy including 6 credits of philosophy at the 200 level or 5th semester standing

PHIL 438 (WMNST 438) Feminist Philosophy (3) Examines the central currents of feminist philosophy, selected problems and concepts regarding difference, gender and sex, identity, and political culture.
Effective: Fall 2007
Prerequisite: 9 credits of philosophy including 6 credits of philosophy at the 200-level or 5th semester standing

PHIL 439 (IL) Asian Philosophies and Issues (3) Exploration of the traditions, problems, and authors of one or more of the philosophical systems of Buddhism, Hinduism, Taoism, and Confucianism.
Effective: Fall 2007
Prerequisite: PHIL 007 9 credits in philosophy including PHIL 007 or 5th semester standing

PHIL 441 Capstone Course in Philosophy (3) This course is intended as the Capstone Course for Philosophy majors and is to be taken during their senior year or during the last semester of their junior year.
Effective: Spring 2011
Prerequisite: 6th semester standing and up

PHIL 453 Topics in Ancient Philosophy (3 per semester, maximum of 6) Examines the philosophy of central figures in
ancient philosophy from the pre-Socratics to the post-Aristotelians and Neoplatonists.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy including PHIL 200 or 6 credits of philosophy at the 200 level

PHIL 455 Topics in Modern Philosophy (3 per semester, maximum of 6) Descartes to Kant, including mind and reality, space and time, God and nature, morality and autonomy.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including PHIL 202 or 6 credits of philosophy at the 200 level

PHIL 456 Topics in Nineteenth Century Philosophy (3 per semester, maximum of 6) Hegel to Nietzsche, including nature and spirit, history and human nature, ideology and morality.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including PHIL 203 or 6 credits of philosophy at the 200 level

PHIL 457 Topics in Twentieth Century Philosophy (3 per semester, maximum of 6) Topics in the philosophy of figures such as Husserl, James, Russell, Wittgenstein, Heidegger, Merleau-Ponty, and Dewey.
Effective: Fall 2007
Prerequisite: 9 credits of philosophy including PHIL 204 or 6 credits of philosophy at the 200 level or 5th semester standing

PHIL 458 Topics in Contemporary Philosophy (3 per semester, maximum of 6) Topics in the philosophy of contemporary figures such as Foucault, Habermas, Rorty, Derrida, Rawls, Davidson, and MacIntyre.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including PHIL 208 or 6 credits of philosophy at the 200 level

PHIL 460 (US;IL) (AAA S 460) African American Philosophy (3) Major works by African American Philosophers, on topics of race, freedom, citizenship, nationhood, law and society.
Effective: Fall 2009
Prerequisite: AAA S 100 or PHIL 009 and 5th semester standing

PHIL 461 Plato (3 per semester, maximum of 6) Examines the metaphysics, epistemology, politics, aesthetics, and moral theory of this central figure in the history of philosophy.
Effective: Spring 1999
Prerequisite: 9 credits of philosophy including PHIL 200 or 6 credits of philosophy at the 200 level

PHIL 462 Aristotle (3 per semester, maximum of 6) Epistemology, metaphysics, natural science, moral and political theory of this central figure in the history of philosophy.
Effective: Spring 1999
Prerequisite: 9 credits of philosophy including PHIL 202 or 6 credits of philosophy at the 200 level

PHIL 468 (J ST 468) Modern Jewish Philosophy (3) Explores the major figures in modern Jewish philosophy and their influences on contemporary philosophy.
Effective: Summer 2004
Prerequisite: one course in Philosophy and/or Jewish Studies

PHIL 470 Rationalism (3 per semester, maximum of 6) Examines the epistemological emphasis on reason over experience in rationalist philosophers such as Descartes, Leibniz, and Spinoza.
Effective: Fall 1998
Prerequisite: 9 credits in philosophy including PHIL 202 and 3 other credits of philosophy at the 200 level

PHIL 471 Empiricism (3 per semester, maximum of 6) Examines the epistemological emphasis on experience over reason in empiricist philosophers such as Locke, Hume, Berkeley, and contemporary empiricists.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including PHIL 202 or 6 credits of philosophy at the 200 level

PHIL 472 Enlightenment (3 per semester, maximum of 6) Examines Enlightenment views on reason, history, individuals, belief, and science through study of Locke, Voltaire, Diderot, Kant, and their critics.
Effective: Fall 1998
Prerequisite: 9 credits in philosophy including PHIL 202 or 6 credits of philosophy at the 200 level

PHIL 473 German Idealism (3 per semester, maximum of 6) Critically examines the philosophy of central German idealists, including Kant, Fichte, Schelling, and Hegel, and its impact on later philosophy.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including either PHIL 202 or PHIL 203 or 6 credits of philosophy at the 200 level

PHIL 474 Kant (3 per semester, maximum of 6) Critical examination of the metaphysics, epistemology, aesthetics, legal and moral philosophy, and influence of Immanuel Kant.
Effective: Fall 1998
Prerequisite: 9 credits in philosophy including PHIL 202 or 6 credits of philosophy at the 200 level

PHIL 475 Fichte and Schelling (3 per semester, maximum of 6) The transformation of post-Kantian idealism before Hegel through Fichte's and Schelling's works on nature, history, reason, morality, and spirit.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy including PHIL 202 or 6 credits of philosophy at the 200 level

PHIL 476 Hegel (3 per semester, maximum of 6) Critical examination of the metaphysics, moral theory, epistemology, and philosophy of history of this central figure of 19th-century philosophy.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy including PHIL 203 or 6 credits of philosophy at the 200 level

PHIL 477 Kierkegaard (3 per semester, maximum of 6) Studies this 19th-century thinker's ideas on ethical and aesthetic
values, despair and selfhood, institutions and individuals, reality, and faith.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including either PHIL 203 or 6 credits of philosophy at the 200 level

PHIL 478 (J ST 478, RL ST 478) Ethics After the Holocaust (3) Explores the philosophical effects of the Holocaust for thinking about the primary question: Is ethics possible?
Effective: Spring 2005
Prerequisite: one course in Jewish Studies or Philosophy

PHIL 479 Critical Theory (3 per semester, maximum of 6) Examines the ontology, political and social thought of the Frankfurt School from Horkheimer and Adorno to Marcuse and Habermas.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including either PHIL 203 or 6 credits of philosophy at the 200 level

PHIL 481 Nietzsche (3 per semester, maximum of 6) Friedrich Nietzsche's basic ideas, including master and slave morality, the will to power, eternal recurrence, genealogical inquiry, and naturalism.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy including PHIL 203 or 6 credits of philosophy at the 200 level

PHIL 483 James (3 per semester, maximum of 6) James' psychology, pluralistic metaphysics, theories of truth and meaning, radical empiricism, and idea of religious experience.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including PHIL 401 or 6 credits of philosophy at the 200 level

PHIL 485 Heidegger (3 per semester, maximum of 6) Studies Heidegger's metaphysical thought from his early to later works regarding being, history, subjectivity, aesthetics, language, and his influence.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy including PHIL 402 or 6 credits of philosophy at the 200 level

PHIL 486 Wittgenstein (3 per semester, maximum of 6) Examines Wittgenstein's early and late work, including logical atomism, meaning, language games, forms of life, and the private-language argument.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy including PHIL 204 or 6 credits of philosophy at the 200 level

PHIL 487 Analytic Philosophy (3 per semester, maximum of 6) Analytic philosophy's founding by Frege, Russell, Moore, Wittgenstein; and its contemporary development by Quine, Kripke, Dummett, and Davidson.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy including PHIL 202 or PHIL 204 along with 3 credits of philosophy at the 200 level

PHIL 490 Dewey (3 per semester, maximum of 6) Critically examines the metaphysics, epistemology, ethics, logic, aesthetics, education theory, and social and political philosophy of this major American pragmatist.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including PHIL 401 or 6 credits of philosophy at the 200 level

PHIL 491 Merleau-Ponty (3 per semester, maximum of 6) Merleau-Ponty's phenomenological anti-dualism through his studies on the body and the flesh, aesthetics, political philosophy, and late ontology.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including PHIL 401 or 6 credits of philosophy at the 200-level

PHIL 493 Phenomenology and Hermeneutics (3 per semester, maximum of 6) Studies major figures and issues in phenomenology and hermeneutics, focussing on the work of Husserl, Gadamer, Heidegger, Merleau-Ponty, and Levinas.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including PHIL 202 and PHIL 204

PHIL 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

PHIL 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

PHIL 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PHIL 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PHIL 497A The History of the Idea of Nature (3) This course will examine the origins of the idea of nature in Western philosophy. Special focus will be given to the emergence of this idea in ancient Greek thought.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PHIL 498 Special topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

The Pennsylvania State University
PHIL 499 (IL) **Foreign Study--Philosophy** (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005
Photography (PHOTO)

PHOTO 100 (GA) **Introduction to Photography** (3) An introduction to the aesthetics, history, and science of photography including practical and critical approaches to the art of photography. Effective: Spring 2006

PHOTO 200 **Photo Studio I** (3) A beginning level course that explores the fundamentals of photography. Effective: Spring 2006
Prerequisite: PHOTO 100

PHOTO 201 (ART H 250) **A Chronological Survey of Photography** (3) A survey of photography's place and influence in a social, cultural, and historical context. Effective: Spring 2006

PHOTO 210 **Introduction to Architectural Photography** (2) Exploration of approaches to photographing architectural interiors, exteriors, and architectural models. Effective: Summer 2007
Prerequisite: Students in Architecture or by permission of the program.

PHOTO 295 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Summer 2006

PHOTO 296 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Summer 2006

PHOTO 297 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Summer 2006

PHOTO 300 **Photo Studio II** (4) An intermediate course that explores advanced processes and applications in digital photography, digital image processing, and photographic inkjet printing. Effective: Spring 2006
Prerequisite: PHOTO 200

PHOTO 307 **New Materials and Methods in Applied Digital Imaging** (4 per semester) Advanced course where student teams use digital photography, video, and scanning to present story ideas using World Wide Web and gallery exhibition. Effective: Fall 2006
Prerequisite: PHOTO 200

PHOTO 309 **Photographic Narratives** (4 per semester/maximum of 8) The development of a photographic project that leads to the creation of a handmade book. Effective: Fall 2006
Prerequisite: PHOTO 200

PHOTO 310 **Photo Assemblage** (4) Collage making through collecting and assembling found materials, including photography: origins of photographic manipulation and contemporary uses. Effective: Fall 2006

PHOTO 397 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Summer 2006

PHOTO 400 **Digital Photography in the Studio** (4) Concepts and technology of the digital photography studio; large format digital cameras, electronic studio lighting and digital printing. Effective: Fall 2006
Prerequisite: PHOTO 200

PHOTO 401 **New Materials and Methods in Applied Digital Imaging** (4 per semester) Advanced course where student teams use digital photography, video, and scanning to present story ideas using World Wide Web and gallery exhibition. Effective: Fall 2006
Prerequisite: PHOTO 200

PHOTO 402 **Photographic Narratives** (4 per semester/maximum of 8) The development of a photographic project that leads to the creation of a handmade book. Effective: Fall 2006
Prerequisite: PHOTO 200

PHOTO 403 **Photo Assemblage** (4) Collage making through collecting and assembling found materials, including photography: origins of photographic manipulation and contemporary uses. Effective: Fall 2006

PHOTO 405 **Creative Projects in Photography** (4 per semester/maximum of 8) Special individual problems related to photographic vision. Effective: Fall 2006
Prerequisite: PHOTO 201, PHOTO 300

PHOTO 406 **Product Photography** (2) This advanced level course will explore the practices of photographing products for print and product advertising. Effective: Summer 2011
Prerequisite: PHOTO 200

PHOTO 407 **Portrait Photography** (2) This advanced level course investigates contemporary portrait photography and...
traditional and modern styles of photographic lighting.
Effective: Summer 2011
Prerequisite: PHOTO 200

PHOTO 410 Photographing Motion and Athletic Events (2) A practicum course in photographing sports and athletic events.
Effective: Summer 2007
Prerequisite: PHOTO 200

PHOTO 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2006

PHOTO 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2006

PHOTO 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2006

PHOTO 497A Portrait Photography (2) This advanced level course will investigate what portrait photography is, and styles of photographic lighting will be explored as well. Seven week course 8/23/2011 - 10/6/2011.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PHOTO 497B Product Photography (2) This advanced level course will introduce the practice of photography products for print and/or web catalog and for product advertising. Seven week course 10/11/2011 - 12/9/2011.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Last Import from UCM: June 16, 2011 3:00 AM
Physical Science (PH SC)

PH SC 410 Quantum Mechanics of Atoms, Molecules, and Solids (3) The physical concepts underlying the properties of materials are covered. Quantum mechanics is applied to problems in atomic, molecular, and solid-state physics.
Effective: Summer 2003
Prerequisite: PHYS 237

PH SC 440 Applied Solid State and Optical Processes (3) This course covers the solid state physics and material science prerequisite to understand today microelectronic and optoelectronic devices.
Effective: Summer 2003
Prerequisite: PHYS 237, PH SC 410 or PHYS 410

Last Import from UCM: June 16, 2011 3:00 AM
Physical Therapy (P T)

P T 100 Physical Therapist Assistant--Introduction (3) Orientation to the field of physical therapy, historical background of the profession, professional ethics, medical terminology, and patient care techniques.
Effective: Fall 2004
Prerequisite: a grade of C or better in BIOL 129

P T 101 Introduction to Computer Skills for the PTA (1) Introduction to basic computer skills for the physical therapist assistant.
Effective: Summer 2003 Ending: Summer 2011

P T 101S Introduction to Computer Skills for the PTA (1) Introduction to basic computer skills for the physical therapist assistant.
Effective: Fall 2011 Future: Fall 2011

P T 150 Physical Therapist Assistant Procedures I (2) General considerations for basic physical therapy modalities including their indications, contraindications, skill development and practical application.
Effective: Fall 2004
Prerequisite: a grade of C or better in P T 100, BIOL 141, BIOL 142, P T 384

P T 160 Therapeutic Exercise I (3) Introduction to the principles of exercise in the treatment of disease and injury.
Effective: Fall 2004
Prerequisite: a grade of C or better in BIOL 129, BIOL 141, BIOL 142, P T 100, P T 384

P T 201 Licensure Preparation for the PTA (1) Preparation for the national PTA licensure examination.
Effective: Fall 2004
Prerequisite: a grade of C or better in P T 100 and P T 384

P T 201S Licensure Preparation for the PTA (1) Preparation for the national PTA licensure examination.
Effective: Fall 2011

P T 202 Pediatric PT (1) A study of physical therapy as it applies to pediatric patients.
Effective: Summer 2003
Prerequisite: P T 100, P T 384

P T 203 The Rehabilitation of the Lower Extremity Amputee (1) Students will be introduced to the rehabilitation process involved with a patient who has a lower extremity amputation.
Effective: Summer 2003
Prerequisite: P T 100, P T 384

P T 204 Seminar in Physical Therapy (1) Specialized physical therapy topics investigated in the framework of clinic visitations and presentations by clinical experts.
Effective: Fall 2004
Prerequisite: a grade of C or better in P T 100 and P T 384

P T 205 Human Musculature (1-2) Comprehensive review of Human Musculature.
Effective: Fall 2004
Prerequisite: a grade of C or better in P T 100, P T 384 and BIOL 129

P T 250 Physical Therapist Assistant--Procedures II (4) General considerations for advanced physical therapy modalities including their indications, contraindications, skill development and practical application.
Effective: Fall 2004
Prerequisite: a grade of C or better in P T 150, P T 160, P T 270, P T 384, P T 395E, P T 395W

Effective: Fall 2004
Prerequisite: a grade of C or better in BIOL 141, BIOL 142, P T 150, P T 160, P T 270, P T 384, P T 395E, P T 395W

P T 270 Pathophysiology (3) Introduction to medical and post-operative conditions and/or disease states most frequently treated by physical therapy modalities.
Effective: Fall 2004
Prerequisite: a grade of C or better in BIOL 141, BIOL 142, P T 100, P T 384

P T 270A (IL) Pathophysiology (3) Introduction to medical and post-operative conditions and/or disease states most frequently treated by physical therapy modalities.
Effective: Fall 2005
Prerequisite: a grade of C or better in BIOL 141, BIOL 142, P T 100, P T 384

P T 270W Pathophysiology (3) Introduction to the study of disease and those conditions most often treated by physical therapy methods; basic signs, symptoms, and causes of disease and conditions will be covered.
Effective: Fall 2004
Prerequisite: a grade of C or better in BIOL 141, BIOL 142, P T 100, P T 384

P T 280 Rehabilitation (4) Examination of techniques and laboratory experiences in rehabilitation techniques for the physically challenged.
Effective: Fall 2004
Prerequisite: a grade of C or better in BIOL 141, BIOL 142, P T 150, P T 160, P T 270, P T 384

P T 280W Rehabilitation (4) Examination of techniques and laboratory experiences in rehabilitation techniques for the
PT 296 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2000

PT 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2000

PT 384 Applied Kinesiology (4) Study of anatomical structure, body movement. Characteristic muscle action and motion will be analyzed in relation to physical therapy context.
Effective: Fall 2004
Prerequisite: a grade of C or better in BIOL 129, BIOL 141, BIOL 142, PT 100

PT 395E Physical Therapist Assistant--Practicum I (4) The practice of physical therapist assistant skills in a clinical setting under the direct supervision of a physical therapist.
Effective: Fall 2004
Prerequisite: a grade of C or better in PT 150, PT 160, PT 250, PT 260, PT 270 or PT 270W, PT 384

PT 395F Physical Therapist Assistant--Practicum II (4) The practice of physical therapist assistant skills in a clinical setting under the direct supervision of a registered physical therapist.
Effective: Fall 2004
Prerequisite: a grade of C or better in PT 250, PT 260, PT 280, PT 280W, PT 395E or PT 395W

PT 395G Physical Therapist Assistant--Practicum III (4) The practice of physical therapist assistant skills in a clinical setting under the direct supervision of a registered physical therapist.
Effective: Fall 2004
Prerequisite: a grade of C or better in PT 250, PT 260, PT 280, PT 280W, PT 395E or PT 395W

PT 395W Physical Therapist Assistant--Practicum I (4) The practice of physical therapist assistant skills in a clinical setting under the direct supervision of a physical therapist.
Effective: Fall 2004
Prerequisite: a grade of C or better in BIOL 141, BIOL 142, PT 384

Last Import from UCM: June 16, 2011 3:00 AM
Physics (PHYS)

PHYS 001 (GN) The Science of Physics (3) Historical development and significance of major concepts, with emphasis on the nature of physics and its role in modern life. (For students in non-mathematical fields.)
Effective: Fall 2004

PHYS 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1994

PHYS 150 (GN) Technical Physics I (3) Elementary treatment of topics in mechanics, heat, wave motion, and sound leading toward an understanding of technical applications.
Effective: Spring 2007
Prerequisite: 1 1/2 units of algebra. Prerequisite or concurrent: MATH 021 or MATH 081

PHYS 150L (GN) Technical Physics I (3) Elementary treatment of topics in mechanics, heat, wave motion, and sound leading toward an understanding of technical applications.
Effective: Summer 1994

PHYS 150P (GN) Technical Physics I (3) Elementary treatment of topics in mechanics, heat, wave motion, and sound leading toward an understanding of technical applications.
Effective: Summer 1994

PHYS 151 (GN) Technical Physics II (3) Elementary treatment of topics in electricity, light, and modern physics leading toward an understanding of technical applications.
Effective: Fall 2001
Prerequisite: PHYS 150

PHYS 151L (GN) Technical Physics II (3) Elementary treatment of topics in electricity, light, and modern physics leading toward an understanding of technical applications.
Effective: Fall 2001
Prerequisite: PHYS 150

PHYS 151P Technical Physics II (3) Elementary treatment of topics in electricity, light, and modern physics leading toward an understanding of technical applications.
Effective: Fall 2001
Prerequisite: PHYS 150

PHYS 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2007

PHYS 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

PHYS 211 (GN) General Physics: Mechanics (4) Calculus-based study of the basic concepts of mechanics: motion, force, Newton's laws, energy, collisions, and rotation.
Effective: Fall 1999
Concurrent: MATH 140

PHYS 211H (GN) General Physics: Mechanics (4) Calculus-based study of the basic concepts of mechanics: motion, force, Newton's laws, energy, collisions, and rotation.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Concurrent: MATH 140

PHYS 211L (GN) General Physics: Mechanics (0-4) Calculus-based study of the basic concepts of mechanics: motion, force, Newton's laws, energy, collisions, and rotation. NOTE: UP offers for 0 credits; Altoona offers for 4 credits.
Effective: Fall 2000
Concurrent: MATH 140

PHYS 211P General Physics: Mechanics (0) Calculus-based study of the basic concepts of mechanics: motion, force, Newton's laws, energy, collisions, and rotation.
Effective: Spring 1999
Concurrent: MATH 140

PHYS 211R (GN) General Physics: Mechanics (4) Calculus-based study of the basic concepts of mechanics: motion, force, Newton's laws, energy, collisions, and rotation.
Effective: Spring 1999
Concurrent: MATH 140

PHYS 212 (GN) General Physics: Electricity and Magnetism (4) Calculus-based study of the basic concepts of electricity
and magnetism.
Effective: Fall 1999
Prerequisite: MATH 140, PHYS 211  Concurrent: MATH 141

PHYS 212H (GN) General Physics: Electricity and Magnetism (4) Calculus-based study of the basic concepts of electricity and magnetism.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: MATH 140, PHYS 211  Concurrent: MATH 141

PHYS 212H (GN) General Physics: Electricity and Magnetism (4) Calculus-based study of the basic concepts of electricity and magnetism.
Prerequisite: MATH 140, PHYS 211  Concurrent: MATH 141

PHYS 212L (GN) General Physics: Electricity and Magnetism (0-4) Calculus-based study of the basic concepts of electricity and magnetism. NOTE: UP offers for 0 credits; Altoona offers for 4 credits.
Effective: Fall 2000
Prerequisite: MATH 140, PHYS 211  Concurrent: MATH 141

PHYS 212P General Physics: Electricity and Magnetism (0) Calculus-based study of the basic concepts of electricity and magnetism.
Effective: Spring 1999
Prerequisite: MATH 140, PHYS 211  Concurrent: MATH 141

PHYS 212R (GN) General Physics: Electricity and Magnetism (4) Calculus-based study of the basic concepts of electricity and magnetism.
Effective: Spring 2000
Prerequisite: MATH 140, PHYS 211  Concurrent: MATH 141

PHYS 213 (GN) General Physics: Fluids and Thermal Physics (2) Calculus-based study of the basic concepts of fluids and sound, heat, kinetic theory, and entropy.
Effective: Fall 1999
Prerequisite: MATH 140, PHYS 211  Concurrent: MATH 141

PHYS 213L (GN) General Physics: Fluids and Thermal Physics (0) Calculus-based study of the basic concepts of fluids and sound, heat, kinetic theory, and entropy.
Effective: Fall 1999
Prerequisite: MATH 140, PHYS 211  Concurrent: MATH 141

PHYS 213R (GN) General Physics: Fluids and Thermal Physics (2) Calculus-based study of the basic concepts of fluids and sound, heat, kinetic theory, and entropy.
Effective: Fall 1999
Prerequisite: MATH 140, PHYS 211  Concurrent: MATH 141

PHYS 214 (GN) General Physics: Wave Motion and Quantum Physics (2) Calculus-based study of the basic concepts of wave motion, geometrical optics, interference phenomena, photons, wave mechanics, and the structure of matter. Effective: Spring 2004
Prerequisite: MATH 141, PHYS 211 andPHYS 212

PHYS 214L (GN) General Physics: Wave Motion and Quantum Physics (0) Calculus-based study of the basic concepts of wave motion, geometrical optics, interference phenomena, photons, wave mechanics, and the structure of matter. Effective: Spring 2004
Prerequisite: MATH 141, PHYS 211 andPHYS 212

PHYS 214R (GN) General Physics: Wave Motion and Quantum Physics (2) Calculus-based study of the basic concepts of wave motion, geometrical optics, interference phenomena, photons, wave mechanics, and the structure of matter. Effective: Spring 2004
Prerequisite: MATH 141, PHYS 211 andPHYS 212

PHYS 230 Introduction to Relativity (3) Introduction to special and general relativity including space-time diagrams and relativistic kinematics, length contraction, time dilation, equivalence principles, curved space and cosmology. Effective: Summer 2006
Prerequisite: PHYS 212, MATH 141 . Prerequisite or concurrent:MATH 220, MATH 230 orMATH 231

PHYS 237 Introduction to Modern Physics (3) Relativity and quantum theory applied to selected topics in atomic, molecular, solid state, and nuclear physics. Effective: Spring 2007
Prerequisite: PHYS 212  Concurrent: PHYS 214

Prerequisite: PHYS 212  Concurrent: PHYS 214

PHYS 237L Introduction to Modern Physics (3) Relativity and quantum theory applied to selected topics in atomic, molecular, solid state, and nuclear physics. Effective: Spring 2007
Prerequisite: PHYS 212  Concurrent: PHYS 214

PHYS 237R Introduction to Modern Physics Relativity and quantum theory applied to selected topics in atomic, molecular, solid state, and nuclear physics.
PHYS 250 (GN) **Introductory Physics I** (4) Selected topics in mechanics, heat, and sound. 
Effective: Fall 2002 
Prerequisite: MATH 022, MATH 026 or MATH 040 or MATH 041 or satisfactory performance on the mathematics proficiency examination

PHYS 250L (GN) **Introductory Physics I** (0-4) Selected topics in mechanics, heat, and sound. 
Effective: Spring 2010 
Prerequisite: MATH 022, MATH 026 or MATH 040 or MATH 041 or satisfactory performance on the mathematics proficiency examination

PHYS 250P (GN) **Introductory Physics I** (0) Selected topics in mechanics, heat, and sound. 
Effective: Fall 2002 
Prerequisite: MATH 022, MATH 026 or MATH 040 or MATH 041 or satisfactory performance on the mathematics proficiency examination

PHYS 250R (GN) **Introductory Physics I** (4) Selected topics in mechanics, heat, and sound. 
Effective: Fall 2002 
Prerequisite: MATH 022, MATH 026 or MATH 040 or MATH 041 or satisfactory performance on the mathematics proficiency examination

PHYS 251 (GN) **Introductory Physics II** (4) Selected topics in light, electricity, and magnetism. 
Effective: Fall 2002 
Prerequisite: PHYS 250

PHYS 251L (GN) **Introductory Physics II** (0-4) Selected topics in light, electricity, and magnetism. 
Effective: Fall 2010 
Prerequisite: PHYS 250

PHYS 251P (GN) **Introductory Physics II** (0) Selected topics in light, electricity, and magnetism. 
Effective: Fall 2002 
Prerequisite: PHYS 250

PHYS 251R (GN) **Introductory Physics II** (4) Selected topics in light, electricity, and magnetism. 
Effective: Fall 2002 
Prerequisite: PHYS 250

PHYS 296 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Fall 1983

PHYS 297 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. 
Effective: Fall 1983

PHYS 397 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. 
Effective: Spring 2007

PHYS 399 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction. 
Effective: Summer 2005

PHYS 400 **Intermediate Electricity and Magnetism I** (3) Electrostatics, steady-state magnetic field; electrical and magnetic properties of matter; Maxwell's equations, boundary-value problems, and wave propagation. 
Effective: Spring 2007 
Prerequisite: MATH 250 or MATH 251; MATH 230 or MATH 231; PHYS 212, PHYS 213 and PHYS 214 Concurrent: MATH 231; PHYS 204 MATH 230 OR

PHYS 402 **Electronics for Scientists** (4) Circuit and network theory; active devices; amplifiers; introduction to digital electronics; noise theory. 
Effective: Spring 2007 
Prerequisite: MATH 250 or MATH 251; PHYS 212, PHYS 213 and PHYS 214

PHYS 406 **Subatomic Physics** (3) Introductory treatment of elementary particles, fundamental strong and electroweak interactions, nuclear structure, accelerators, particle detection, nuclear astrophysics. 
Effective: Spring 1995 
Prerequisite: PHYS 410

PHYS 410 **Introduction to Quantum Mechanics I** (3-4) Basic postulates; Schrodinger wave equation; stationary states; variational method; scattering in one dimension; orbital angular momentum; hydrogen atom; numerical methods. 
Effective: Spring 2007 
Prerequisite: MATH 250 or MATH 251; MATH 230 or MATH 231; PHYS 237

PHYS 411 **Introduction to Quantum Mechanics II** (3) General theory of angular momentum; approximation methods; scattering theory; radiation theory; applications to atomic, molecular, condensed matter, nuclear and particle physics.
PHYS 412 **Solid State Physics I** (3) Crystal symmetry, x-ray structure analysis, lattice vibrations, thermal properties, free electron transport theory, elementary one-electron quantum theory of solids.

**Effective: Fall 1986**
**Prerequisite:** PHYS 410

PHYS 413 **Solid State Physics II** (3) Quantum theory of electronic and optical properties of solids, semiconductors, dielectrics, magnetic properties, crystal imperfections, low-temperature effects, and superconductivity.

**Effective: Fall 1986**
**Prerequisite:** PHYS 412

PHYS 414 **Solid State Physics** (3) Crystal structure; reciprocal lattice; X-ray diffraction; lattice vibrations; thermal properties; free electron gas model; energy bands; semiconductors; magnetism.

**Effective: Spring 2007**
**Prerequisite:** MATH 230, PHYS 237

PHYS 419 (MATH 419) **Theoretical Mechanics** (3) Principles of Newtonian, Lagrangian, and Hamiltonian mechanics of particles with applications to vibrations, rotations, orbital motion, and collisions.

**Effective: Spring 2007**
**Prerequisite:** MATH 230 or MATH 231; MATH 250 or MATH 251; PHYS 212, PHYS 213 and PHYS 214

PHYS 420 **Thermal Physics** (3) Basic postulates of statistical mechanics and thermodynamics, microscopic quantum states and macroscopic parameters; partition functions; Maxwell-Boltzmann and quantum statistics.

**Effective: Spring 2007**
**Prerequisite:** MATH 230 or MATH 231; MATH 250 or MATH 251; PHYS 237

PHYS 421W **Research Methods in Physics** (3) Methodology focusing on the theory of measurement and experiment design.

**Effective: Spring 2007**
**Prerequisite:** PHYS 237

PHYS 433 **Intermediate Acoustics** (3) Vibration and simple vibrating systems, sound wave propagation, acoustic instruments, recent developments.

**Effective: Fall 1999**
**Prerequisite:** MATH 251, PHYS 212, PHYS 213 and PHYS 214; or PHYS 203 or PHYS 204

PHYS 444 **Topics in Contemporary Physics** (2) Modern research topics and career opportunities in physics; employment, graduate education, and tailoring the physics curriculum to meet career goals.

**Effective: Spring 2007**
**Prerequisite:** PHYS 237 and 3 credits of physics at the 400 level

PHYS 445 **Nanoscience Seminar** (1) Advanced nanoscience seminar required of Behrend College students for completion of the nanoscience minor.

**Effective: Summer 2002**
**Prerequisite:** CHEM 112, E SC 211, E SC 212, E SC 213, E SC 214, E SC 215, E SC 216, MATH 140, PHYS 211 or PHYS 250

PHYS 446 **The Year in Physics: A Seminar on the Latest Research** (1) Discussion recent research in physics.

**Effective: Spring 2007**
**Prerequisite:** PHYS 211

PHYS 457 **Experimental Physics** (1-3) Selected experiments in various fields of physics.

**Effective: Spring 2007**
**Prerequisite:** PHYS 212 and PHYS 237

PHYS 457W **Experimental Physics** (3) Selected experiments in various fields in physics.

**Effective: Spring 2007**
**Prerequisite:** PHYS 212, PHYS 213, PHYS 214 and PHYS 237

PHYS 458 **Intermediate Optics** (4) Geometrical and physical optics: theory of lens systems, aberrations, apertures, interference, diffraction, polarization.

**Effective: Spring 2007**
**Prerequisite:** PHYS 212, PHYS 213, PHYS 214; MATH 250 or MATH 251; MATH 230 or MATH 231

**Effective: Fall 1986**
**Prerequisite:** MATH 419

PHYS 462 **Applications of Physics in Medicine** (3) Applications of physics in human physiology and in instrumentation for medical diagnosis and treatment.

**Effective: Summer 2002**
**Prerequisite:** PHYS 211, PHYS 212, PHYS 213 and PHYS 214; or PHYS 250, PHYS 251

PHYS 479 (MATH 479) **Special and General Relativity** (3) Mathematical description, physical concepts, and experimental tests of special and general relativity.

**Effective: Spring 2007**
**Prerequisite:** PHYS 237, PHYS 400, PHYS 419; MATH 250 or MATH 251; MATH 230 or MATH 231

PHYS 494 **Physics Research Project** (1-12) Investigation of an original research problem, including a literature search.

---

The Pennsylvania State University
Preparation of a formal thesis is optional.
Effective: Spring 2007

PHYS 494H Physics Research Project (1-12) Investigation of an original research problem, including a literature search.
Preparation of a formal thesis is optional.
Effective: Fall 2007

PHYS 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2007
Prerequisite: prior approval of proposed assignment by instructor

PHYS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PHYS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PHYS 497A Applications of Modern Physics in Medicine (3) This course is an overview of the applications of nuclear physics in medicine. Methods of diagnostics using X-rays, radioisotopes and nuclear resonance are reviewed. Various radiation therapy applications are reviewed and compared. (This course is appropriate for students interested in nuclear and medical physics as well as for premed student).

PHYS 497B Systems Biology & Networks (3) Introduce elements of network theory used to describe and model complex networks; focus on biological networks and systems biology.

PHYS 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM
Plant Pathology (PPATH)

PPATH 120 (GN) The Fungal Jungle: A Mycological Safari From Truffles to Slime Molds (3) Students will learn about the world of fungi and the many ways it impacts their lives.
Effective: Spring 2007

PPATH 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PPATH 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PPATH 300 (GN) Horticultural Crop Diseases (3) Diseases of horticultural crops are examined stressing their cause, diagnosis, control and national and international importance.
Effective: Spring 2008
Prerequisite: 3 credits in a biological science

PPATH 301 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2005

Effective: Spring 2002
Prerequisite: fifth-semester or graduate standing in a biological sciences major with six credits completed in the major

Effective: Summer 2007
Prerequisite: BIOL 110 orBIOL 011 andBIOL 012;CHEM 112, CHEM 113 ; course can also be taken with approval of the department

PPATH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983
PPATH 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983
Plastics Engineering Technology (PL ET)

PL ET 050 Computer Applications for Plastics Engineering Technology (2) Programming, spreadsheets for the solution of technical problems, internet access for background and support information, formatting professional reports, creating presentations. Effective: Spring 2006

PL ET 097 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

PL ET 098 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

PL ET 197 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

PL ET 198 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

PL ET 205 Introduction to Plastics (3) Introduction to the plastics industry including fundamental aspects of plastic materials and processing; introduces the chemical influence on mechanical and flow properties of plastic materials. Effective: Summer 2005
Prerequisite: MATH 040, MATH 082, MATH 140 . Prerequisite or concurrent:CHEM 110

PL ET 206W Plastic Materials and Properties (3) Coverage of the most common commercial plastics including their additives, fillers, and fibers; includes common physical tests used to determine material characteristics; writing intensive. Effective: Spring 2011
Prerequisite: PL ET 205

PL ET 222 Introduction to Plastics Processing (4) Introduction to plastic processing methods, materials, tooling, design, and equipment. Safe operation and practices are emphasized. Effective: Summer 2005

PL ET 225 Instrumentation, Control, & Automation for Plastics (2) Instrumentation, control and automation basics & strategies for plastics processing. Effective: Summer 2005
Prerequisite: MATH 081 ; Prerequisite or concurrent:PL ET 222

PL ET 227 Plastics Processing & Statistical Methods (4) Study of advanced issues in plastics processing, such as design of experiments and SPC/SQC will be covered. Effective: Summer 2005
Prerequisite: PL ET 205, PL ET 222 ; Prerequisite or concurrent:PL ET 225

PL ET 232 Introduction to Part and Tool Design (3) CAD techniques for designing plastic products and related tooling. Effective: Spring 2007
Prerequisite: EG T 121 Prerequisite or concurrent:PL ET 222

PL ET 235 Tool Design & Machining (2) Study of the methods used to create the tooling used in plastics fabrication and the methods of maintaining tooling. Effective: Summer 2005
Prerequisite: PL ET 222 ; Prerequisite or concurrent:PL ET 232

PL ET 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1992

PL ET 297 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 1992

Prerequisite: PL ET 206W
PL ET 323 **Packaging Processes** (3) In-depth studies and laboratory experiments will be conducted on processes such as blow molding, thermoforming, extrusion and other packaging processes.

Effective: Summer 2005
Prerequisite: PL ET 225, PL ET 227, PL ET 304

PL ET 330 **Advanced Tooling & Rheology** (4) Tooling design strategies are developed considering a material's physical and rheological influences on processing and part formation.

Effective: Summer 2005
Prerequisite: PL ET 206W, PL ET 227, PL ET 232, PL ET 235, PHYS 250

PL ET 340 **Mold Design and Process Strategies** (3) Overview of mold design and the development of strategies and techniques integrating CAD and CAE technologies for optimizing part quality, moldability, and productivity.

Effective: Summer 2011
Prerequisite: EG T 121

PL ET 345 **Heat Transfer** (2) Fundamentals of heat transfer including conduction, convection, and radiation.

Effective: Spring 2010
Prerequisite: PL ET 366

PL ET 350 **Design of Plastic Parts** (4) Designing plastic parts utilizing CAD, FEA, and CAE technologies for the design and for structural, dimensional, and process evaluation and optimization.

Effective: Spring 2006
Prerequisite: MCH T 213, PL ET 232, PL ET 304, PL ET 330 . Prerequisite or concurrent:MET 418

PL ET 366 **Fluid and Thermal Sciences** (3) Fundamentals of thermodynamic principles, fluid statics, and fluid dynamics.

Effective: Spring 2006
Prerequisite: MATH 083, PHYS 250, PL ET 222, PL ET 227 . Prerequisite or concurrent:PL ET 330

PL ET 370 **Advanced Processing** (3) In-depth studies and laboratory experiments will be conducted on processes such as blow molding, rotational molding, thermoforming, compression molding, calendaring, and various assembly operations.

Effective: Spring 2007 Ending: Fall 2011

PL ET 380 **Introduction to Plastic Medical Devices** (1) Introduction to plastic medical devices and their manufacture. Also covers the regulatory requirements of plastic medical devices.

Effective: Summer 2011
Prerequisite: PL ET 205, PL ET 222

PL ET 397 **Special Topics** (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1992

PL ET 400 **Plastics Management Issues** (3) Study of business management topics as they relate to the plastics industry.

Effective: Summer 1996 Ending: Fall 2011
Prerequisite: PL ET 350, PL ET 370

PL ET 400 **Plastics Management Issues** (3) Study of business management topics as they relate to the plastics industry.

Prerequisite: PL ET 350

PL ET 429 **Plastics Packaging** (3) Introduction to plastics packaging including production methods, economic concerns, aesthetics, color and transparency, environmental concerns, and package lifetimes.

Effective: Summer 1996
Prerequisite: PL ET 350

PL ET 430 **Packaging Design & Materials** (2) Study of design and materials for plastic packaging including blow molded, thermoformed and extruded products.

Effective: Summer 2005
Prerequisite: Prerequisite or concurrent:PL ET 304, PL ET 330

PL ET 440 **Advanced Mold Design Technologies** (4) This is the second course in mold design; focuses on mechanical aspects of designing and building a mold; includes CAD, CAM, and CAE technologies.

Effective: Spring 2007
Prerequisite: MCH T 213, MET 306, METBD 366, PL ET 340

PL ET 460 **Advanced Computer Applications in Plastics Design** (3) Advanced applications of computer-aided design, computer-aided manufacturing, computer-aided engineering, and finite element analysis to plastic product development.

Effective: Summer 1996
Prerequisite: PL ET 350 . Prerequisite or concurrent:PL ET 440

PL ET 462 **Advanced Injection Molding** (3) New and advanced injection molding technologies, implementing statistical methods such as design of experiments.

Effective: Summer 2005
Prerequisite: PL ET 225, PL ET 227, PL ET 330

Effective: Summer 2005
Prerequisite: PL ET 304

PL ET 465 **Advanced CAE for Plastics II** (3) Advanced Computer-Aided Engineering techniques for plastic part design.
PL ET 467 Secondary Operations (3) Fundamentals of decoration and assembly methods used in the plastics industry. Effective: Summer 2005 
Prerequisite: Seventh semester standing

PL ET 468 Rapid Commercialization (3) Techniques to help get plastic products to market quicker and to build solids and surface modeling skills. Effective: Summer 2005 
Prerequisite: PL ET 350

PL ET 481 Plastic Product Development (3) This course provides students with an in-depth overview of the integrated new product development process. Effective: Summer 2011 
Prerequisite: PL ET 350

PL ET 482 Medical Product Development (1) This course provides students with medical device development requirements and processes. The course is to be taken in conjunction with PL ET 481 as both courses will utilize a semester project to invent and design a new product. Over the course of the semester students will review the FDA classifications, filing requirements, and recommended practices for medical device development. This knowledge will be applied and practiced through the semester projects. Students will learn techniques for Failure Modes and Effects Analysis and how to properly document and manage product change through the development process. Effective: Summer 2011 
Prerequisite: PL ET 380, PL ET 350  Concurrent: PL ET 481

PL ET 483 Plastics in Medical Applications (3) This course focuses on plastics materials and properties and how they meet the unique medical application and device requirements. Effective: Summer 2011 
Prerequisite: PL ET 304, PL ET 380

PL ET 484 Medical Manufacturing Methods (3) This course provides instruction in the methods and practices used in the manufacturing of plastic devices in the medical industry. Effective: Summer 2011 
Prerequisite: PL ET 380

PL ET 494A Plastics Projects (1-12) Supervised student activities on research and/or design projects identified on an individual or small group basis. A specific title may be used in each instance and will be entered on the student's transcript. Effective: Spring 2007 Ending: Fall 2011 
Prerequisite: or concurrent:MET 418, PL ET 350, PL ET 370

PL ET 494A Plastics Projects (1-12) Supervised student activities on research and/or design projects identified on an individual or small group basis. A specific title may be used in each instance and will be entered on the student's transcript. Effective: Spring 2012 Future: Spring 2012 
Prerequisite: or concurrent:MET 418, PL ET 350, PL ET 323

PL ET 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica or internships. Written and oral critique of activity required. Effective: Summer 1992 
Prerequisite: prior approval of proposed assignment by instructor

PL ET 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1992

PL ET 497 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 1992

PL ET 497C Plastic Product Development (3) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011 
Prerequisite: PL ET 350

PL ET 497D Medical Product Development (1) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011 
Prerequisite: PL ET 380, PL ET 481

PL ET 497E Plastics in Medical Applications (3) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011 
Prerequisite: PL ET 304, PL ET 380

PL ET 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2010
Polish (POL)

POL 051 Elementary Intensive Polish for Graduate Students I (3) Intensive introduction to Polish: first half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts. Effective: Summer 2008
Prerequisite: graduate standing

POL 052 Elementary Intensive Polish for Graduate Students II (3) Intensive introduction to Polish: second half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts. Effective: Summer 2008
Prerequisite: POL 051 and graduate standing

POL 053 Intermediate Intensive Polish for Graduate Students (3) Continued intensive study of Polish at the intermediate level: reading, writing, speaking, listening, cultural contexts. Effective: Summer 2008
Prerequisite: POL 052 or equivalent and graduate standing

POL 197 Special topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 1995

POL 199 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

POL 299 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

POL 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor

POL 399 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

POL 499 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM
Political Science (PL SC)

PL SC 001 (GS) Introduction to American National Government (3) Introduction to development and nature of American political culture, constitutional/structural arrangements, electoral/policy processes; sources of conflict and consensus. Effective: Spring 2002

PL SC 002 American Public Policy (3) Examination of selected areas of public policy in America. Analysis of policy content, alternatives, and impact. Effective: Fall 1983
Prerequisite: PL SC 001

PL SC 003 (GS;IL) Introduction to Comparative Politics (3) Introduction to study of comparative government and politics: normative/empirical theories; government functions in modern societies; representative structures and processes. Effective: Fall 2007

PL SC 003U (GS;IL) Introduction to Comparative Politics (3) Introduction to study of comparative government and politics: normative/empirical theories; government functions in modern societies; representative structures and processes. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 007 (GS) Contemporary Political Ideologies (3) Critical analysis of contemporary political ideologies such as liberalism, conservatism, socialism, anarchism, fascism, feminism, and environmentalism. Effective: Fall 2004

PL SC 014 (GS;IL) International Relations (3) Characteristics of modern nation-states and forces governing their international relations; nationalism; imperialism; diplomacy; current problems of war and peace. Credit will not be given for both this course and INT U 200. Effective: Fall 2007

PL SC 014U (GS;IL) International Relations (3) Characteristics of modern nation-states and forces governing their international relations; nationalism; imperialism; diplomacy; current problems of war and peace. Credit will not be given for both this course and INT U 200. Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

PL SC 017 (GS) Introduction to Political Theory (3) Introduction to basic issues in political theory through analysis of selected major political thinkers. Effective: Spring 2003

PL SC 017W (GS) Introduction to Political Theory (3) Introduction to basic issues in political theory through analysis of selected major political thinkers. Effective: Spring 2001

PL SC 020 (GS;IL) Comparative Politics--Western Europe (3) Comparative analysis of political cultures, interest groups, parties, and decision-making processes in principal Western European political systems. Effective: Fall 2007

PL SC 022 (GS;IL) Politics of the Developing Areas (3) The impact of colonialism, nationalism, and development policy on the political culture, structure, and transformation of post-colonial regimes. Effective: Spring 2010

The Pennsylvania State University
PL SC 060 (GS;IL) (ANTH 060, J ST 060, SOC 060) **Society and Cultures in Modern Israel** (3) An introduction to the society and cultures of the State of Israel from 1948 to the present.

Effective: Summer 2006

PL SC 083S (GS) **First-Year Seminar in Political Science** (3) Exploration of current topics of interest in political science, international relations, and/or political theory.

Effective: Summer 1999

PL SC 083T (GS) (J ST 083T) **First-Year Seminar in Political Science** (3) Exploration of current topics of interest in political science, international relations, and/or political theory.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 110 (GS;US) **Rights in America** (3) This course explores the historical and contemporary struggles of particular groups within American society to expand their rights.

Effective: Summer 2006

PL SC 123 (GS;US;IL) **Ethnic and Racial Politics** (3) Political movements among United States ethnic and racial groups; government policies on race and ethnicity; comparison to other culturally diverse countries.

Effective: Fall 2007

Prerequisite: PL SC 001 or PL SC 003

PL SC 125 **Pennsylvania Government and Politics** (3) Pennsylvania political processes; executive, legislative, judicial decision-making, and electoral behavior; selected public policies.

Effective: Fall 1984

PL SC 130 (GS;US) **American Political Campaigns and Elections** (3) Methods and strategies of American political campaigns: polls, political consultants, parties, and the media.

Effective: Fall 2007

PL SC 132 (GS;IL) **The Politics of International Intolerance** (3) Introductory course emphasizing psychological, historical, and political aspects of global intolerance towards minorities.

Effective: Fall 2007

PL SC 135 (GS) (S T S 135) **The Politics of the Ecological Crisis** (3) The political implications of the increasing scarcity of many of the world's resources.

Effective: Spring 2001

PL SC 137 **United States Intelligence and Policy Making** (3) The policy making process in the United States foreign intelligence and security policy; emphasis on the period following World War II.

Effective: Spring 2001

PL SC 140 (GS) **Contemporary Controversies in International Relations** (3) Contemporary issues of international security presented rigorously using analytical tools of international relations and political science.

Effective: Summer 2009

PL SC 155 **Understanding Tyranny** (3) Exploration of the rationales, methods, and consequences of highly repressive political regimes through novels, films, and memoirs.

Effective: Summer 1996

PL SC 177 (GS) **Politics and Government in Washington DC** (1-3) The course centers on a Spring Break trip to Washington DC, with students meeting on campus before and after the trip.

Effective: Fall 2007

PL SC 197 **Special topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 1995

PL SC 199 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

PL SC 294 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

PL SC 296 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
PL SC 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PL SC 297A Racism in World Politics (3) This course examines the role of racism in world politics through an analysis of its impact on the two major paradigms, realism and idealism/liberalism.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 299 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

PL SC 300H Introduction to Independent Thesis Research (3) Introduction to research design, principles of social science research, and development on honors theses research proposal.
Effective: Fall 2008

PL SC 306H Senior Thesis Writing Workshop (1 per semester, maximum of 3) This seminar supports the writing and editing of senior honors theses.
Effective: Fall 2005

PL SC 308 Introduction to Political Research (3) Introduction to conceptualization, research design, and measurement in political research.
Effective: Fall 2009
Prerequisite: any 3 credits in Political Science

PL SC 309 Quantitative Political Analysis (3) Data analysis and statistical applications in political research, including data processing; inferential statistics; contingency analysis; correlation and regression; multivariate analysis.
Effective: Fall 2009
Prerequisite: any 3 credits in political science

PL SC 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor

PL SC 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2007

PL SC 397H Research in Comparative Politics (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 399 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

PL SC 403 The Legislative Process (3) Analysis of the policy process within the legislative system; the effects of environmental factors on policy alternatives and legislative decision making.
Effective: Spring 2001
Prerequisite: PL SC 001 or PL SC 003

PL SC 405 The American Presidency (3) An examination of the selection methods for, and powers of, the American presidency, as well as other chief executives.
Effective: Fall 1983
Prerequisite: PL SC 001

PL SC 410 Game Theory in International Relations (3) Game theoretic approaches to the study of international relations.
Effective: Spring 2005
Prerequisite: PL SC 014

PL SC 411W Principles of International Cooperation (3) An exploration of the forces that make conflict, or cooperation, more likely in international relations.
Effective: Summer 2006
Prerequisite: PL SC 014

Effective: Spring 2011
Prerequisite: ECON 102, ECON 104, ECON 014, IB 303 or BUS 364

PL SC 413 The Rise and Fall of the Soviet Union (3) Background, organization, and operation of the Communist Party
and the government of the Soviet Union.

Effective: Spring 2001
Prerequisite: 3 credits from: PL SC 003, PL SC 014, PL SC 155 or RUS 100

PL SC 414 Dictators and Their Demise (3) Dictators and Their Demise examines the political economy of authoritarian rule.
Effective: Summer 2011
Prerequisite: PL SC 003

Effective: Spring 2003
Prerequisite: PL SC 014

PL SC 416 International Negotiations (3) The study of international negotiations from a strategic perspective.
Effective: Summer 2005
Prerequisite: PL SC 014

PL SC 417 American Local Government and Administration (3) Organization, powers, functions, and problems of American cities and metropolitan areas; modern trends and developments.
Effective: Winter 1978
Prerequisite: PL SC 001

PL SC 418 International Relations Theory (3) A survey of traditional and contemporary conceptual frameworks and theoretical approaches for the analysis of international relations.
Effective: Winter 1978
Prerequisite: PL SC 014

PL SC 418W International Relations Theory (3) A survey of traditional and contemporary conceptual frameworks and theoretical approaches for the analysis of international relations.
Effective: Spring 1999
Prerequisite: PL SC 014

PL SC 419 The Bureaucratic State (3) Overview of structural, technological, decision-making, behavioral, and political subsystems of bureaucracy; emphasis on bureaucratic dynamics within larger environmental, interorganizational contexts.
Effective: Fall 2007
Prerequisite: PL SC 001, PL SC 002 or PUBPL 304W

PL SC 422 Comparative Urban Politics (3) Relationships between structure and evolution of city systems and patterns of political behavior.
Effective: Spring 2001
Prerequisite: PL SC 003, PL SC 020, PL SC 022 or PL SC 417

PL SC 423 Post-Soviet Politics (3) Aspects of political transition and institutions of the fifteen Soviet successor republics; emphasis on Russia and republican confederation.
Effective: Fall 2007
Prerequisite: PL SC 003, PL SC 155 or RUS 100

PL SC 424 Topics in Comparative Government and Institutions (3) Topics in the comparative analysis of representative contemporary Western and non-Western governmental institutions.
Effective: Fall 2007
Prerequisite: 3 credits from PL SC 003, PL SC 020, PL SC 022

PL SC 425 Government and Politics of the American States (3) Comparative analysis of political processes; executive, legislative, and judicial decision making and behavior; examination of systems functioning; selected public policies.
Effective: Winter 1978
Prerequisite: PL SC 001

PL SC 426 Political Parties and Interest Groups (3) Interest group basis of American politics, analysis of party and group behavior in electoral politics and the policy process.
Effective: Fall 1983
Prerequisite: PL SC 001

PL SC 427 Political Opinion (3) Nature and development of mass attitudes and opinions; political socialization; voting behavior; relation between opinions and public policy.
Effective: Spring 2001
Prerequisite: PL SC 001

PL SC 428 (US;IL) (WMNST 428) Gender and Politics (3) Gender in politics in the United States and around the world; major areas of women and politics research.
Effective: Fall 2007
Prerequisite: 3 credits in political science or women’s studies

PL SC 429 Analysis of Electoral Politics (3) The new politics, its technology, and the strategic perspectives that underlie it.
Effective: Spring 2007
Prerequisite: PL SC 001

PL SC 430 Selected Works in the History of Political Theory (3) Detailed examination and analysis of a selected major work, thinker, or tradition in the history of political theory.
Effective: Spring 1998
PL SC 430W **Selected Works in the History of Political Theory** (3) Detailed examination and analysis of a selected major work, thinker, or tradition in the history of political theory.
Effective: Spring 2008
Prerequisite: PL SC 017 or PL SC 007

PL SC 431 **Ancient, Medieval, and Renaissance Political Theories** (3) Political theories of Plato and Aristotle; selected Greek, Roman, medieval, and Renaissance theorists through Machiavelli.
Effective: Spring 2003
Prerequisite: PL SC 017 or PL SC 007

PL SC 432 **Modern and Contemporary Political Theories** (3) Political theories of the seventeenth through the twentieth centuries, including Hobbes, Locke, Rousseau, Marx, Mill, Mosca, Weber, and selected theorists.
Effective: Spring 2003
Prerequisite: PL SC 017 or PL SC 007

PL SC 433 **Political Foundations of the Early American Republic** (3) The course introduces students to the major political and philosophical movements that influenced the founders of the early American republic.
Effective: Summer 2008
Prerequisite: PL SC 001 or HIST 020 or PL SC 017

PL SC 434 (IL) (AAA S 434) **War and Development in Africa** (3) This course will examine the relationship between war and development in sub-Saharan Africa in the post colonial era.
Effective: Spring 2008
Prerequisite: PL SC 114, PL SC 003, AAA S 110

PL SC 435 **Foundations of American Political Theory** (3) Political theories of colonial, revolutionary, and constitutional periods presented through works of selected thinkers and analysis of particular political problems.
Effective: Spring 2001
Prerequisite: PL SC 001, PL SC 017 or PL SC 007

PL SC 435W **Foundations of American Political Theory** (3) Political theories of the revolutionary and constitutional periods presented through works of selected political thinkers and political issues.
Effective: Spring 2001
Prerequisite: PL SC 001, PL SC 017 or PL SC 007

PL SC 437 **War in World Politics** (3) Causes, resolution, and consequences of crises and wars; testing theories of conflict using both case and statistical studies.
Effective: Summer 1997
Prerequisite: PL SC 014

PL SC 438 **National Security Policies** (3) Impact of national security on U.S. government and foreign policy; roles and interaction of President, Congress, government agencies, interest groups.
Effective: Spring 2001
Prerequisite: PL SC 001 or PL SC 014

PL SC 439 (CRIMJ 439) **The Politics of Terrorism** (3) Analysis of political terrorism as a violent alternative for peaceful change and traditional warfare in the nuclear age.
Effective: Spring 2008
Prerequisite: CRIMJ 100 or PL SC 014 or permission of program

PL SC 440 (US; IL) (AAA S 440, I B 440) **Globalization and Its Implications** (3) This course explores the socioeconomic implications of globalization.
Effective: Spring 2008
Prerequisite: AAA S 100 or AAA S 110 or PL SC 003 or PL SC 014 or PL SC 020 or PL SC 022

PL SC 441 **Transnational Corporations and Other Organizations in International Relations** (3) Analysis of the effects of transnational actor behavior on international relations.
Effective: Fall 2007
Prerequisite: ECON 333, I B 303, PL SC 014 or BUS 364

PL SC 442 **American Foreign Policy** (3) Principles of American foreign policy; processes of policy formulation; roles of the President, Congress, the State Department, and other government agencies.
Effective: Spring 2001
Prerequisite: PL SC 014

PL SC 443 (IL) (AAA S 443) **Ethnic Conflict in Africa** (3) This course explores the various causes and impacts of ethnic conflicts in the African context.
Effective: Spring 2008
Prerequisite: AAA S 100, AAA S 110, PL SC 001, PL SC 003, PL SC 007, PL SC 014, PL SC 017, PL SC 020 or AFRAS 301

PL SC 444 **Government and the Economy** (3) Interactions of governmental and economic activity in American life. Survey of governmental (national, state, local) promotional, regulatory, and ownership policies.
Effective: Winter 1978
Prerequisite: 3 credits in political science or economics

PL SC 445Y (US) (AAA S 445Y, LER 445Y) **Politics of Affirmative Action** (3) Examines history, politics, and economics of the use of special programs to advance racial interests in the U.S.
Effective: Spring 2008
Prerequisite: AAA S 100 level course and PL SC 001 or PL SC 007
PL SC 452 Government and Politics of Central Europe (3) Politics and society in the Communist Era, the revolutions of 1989, and problems of adjustment to democracy and market.
Effective: Fall 2007
Prerequisite: PL SC 003, PL SC 020, PL SC 022 or PL SC 155

PL SC 453 (IL) Political Processes in Underdeveloped Systems (3) Comparative analysis of the political, social, and economic problems characteristic of underdeveloped systems.
Effective: Fall 2007
Prerequisite: PL SC 003, PL SC 020 or PL SC 022

Effective: Summer 2005
Prerequisite: 3 credits from AAA S 110, PL SC 003, PL SC 020 or PL SC 022

PL SC 455 Governments and Politics of Western Europe (3) Comparative analysis of political and governmental structures of major West European nations; main functions and processes of such structures.
Effective: Spring 2001
Prerequisite: PL SC 003 or PL SC 020

PL SC 456 Politics and Institutions of Latin-American Nations (3) Social forces and processes, governmental institutions, foreign policies of major states of Latin America.
Effective: Spring 2001
Prerequisite: HIST 179, PL SC 003, PL SC 020 or PL SC 022

PL SC 457 International Politics of Latin America (3-6) Relationships among the nations of Latin America and the social forces which determine and shape their direction.
Effective: Spring 2001
Prerequisite: HIST 179, PL SC 003, PL SC 014, PL SC 020 or PL SC 022

PL SC 458 Government and Politics of East Asia (3-6) Examination of political institutions, democratic and communist revolution, political leadership, political processes of major states of East Asia.
Effective: Summer 1996
Prerequisite: 3 credits from PL SC 003, PL SC 020, PL SC 022

PL SC 459 (IL) (AAA S 459) Culture and World Politics (3) Role of culture in world politics.
Effective: Summer 2006

PL SC 460 (S T S 460) Science, Technology, and Public Policy (3) The all-pervasive importance of science and technology policy in modern societies and mechanisms and processes by which it is made.
Effective: Spring 1995
Prerequisite: 3 credits in natural sciences or engineering 3 credits in social and behavioral sciences

PL SC 461 (IL) Politics of the European Union (3) This course introduces students to the history, institutions and politics of the European Union.
Effective: Spring 2011
Prerequisite: PL SC 003 or PL SC 020

PL SC 462 Marxist and Socialist Political Theory (3) Analysis of major problems and key works in the Marxist and Socialist tradition; dialectical materialism, alienation, class warfare, etc.
Effective: Spring 2001
Prerequisite: PL SC 017, PL SC 007, PL SC 413 or PL SC 452

Effective: Summer 2008
Prerequisite: AAA S 110 or at least one of the following: PL SC 003 or PL SC 014 or PL SC 022

PL SC 467 International Relations of the Middle East (3) The international relations of the Middle East, stressing national security policies of regional and outside actors, and major contemporary conflicts.
Effective: Spring 1985
Prerequisite: PL SC 014 or HIST 181

PL SC 470W Legal Brief Writing (3) Writing of legal briefs as practiced in American courts.
Effective: Spring 1998
Prerequisite: PL SC 001

PL SC 471 American Constitutional Law (3) The origins of judicial review, landmark decisions of the Supreme Court, and their impact on the American form of government.
Effective: Fall 2007
Prerequisite: PL SC 001

PL SC 472 The American Legal Process (3) Analysis of the roles, procedures, and policies characterizing the American legal system.
Effective: Spring 2001
Prerequisite: PL SC 001

PL SC 473 American Judicial Behavior (3) Analyzes behavior of judges and other participants in the legal process; examines how and why courts function as policymaking bodies.
PL SC 474 Civil Liberties and Due Process (3) Fundamental problems relating to civil liberties and due process.
Effective: Fall 2007
Prerequisite: PL SC 001

PL SC 480W Congress and the Presidency (3) Basic characteristics and processes of the national legislature and executive; roles and interaction of these institutions in the policy process.
Effective: Fall 2007
Prerequisite: PL SC 001

PL SC 481 Global Political Economy (3) This course examines states, markets, power, production, and the relations between the various transnational agents who act in these areas. Students may not receive credit for PL SC 481 and PL SC 412.
Effective: Spring 2007
Prerequisite: PL SC 014 or INTST 100

PL SC 482 American State and Urban Politics (3) Explores basic characteristics and processes of American state and urban politics; nature of intergovernmental relations involving these governmental levels.
Effective: Fall 2007
Prerequisite: PL SC 001

PL SC 484W The Foreign Policy of Soviet Successor States (3) Relations between Russia and The Newly Independent States (NIS); Russia's relations with selected foreign states and political Institutions; regional impact of the NIS in Baltic, Asian, and Central Asian areas.
Effective: Fall 2007
Prerequisite: PL SC 003

PL SC 487 International Law and Organizations (3) Major topics and issues of international law with special attention to institutional arrangements (international organizations) through which that law operates.
Effective: Fall 2007
Prerequisite: PL SC 003 or PL SC 014

PL SC 488 Comparative Public Policy (3) Comparative methodology and public policy implementation in postindustrial societies; selected case studies of policy output.
Effective: Fall 2007
Prerequisite: PL SC 003

PL SC 489 Public Administration (3) A survey of the major approaches to the management of most governmental agencies.
Effective: Fall 2007
Prerequisite: PL SC 001

Effective: Fall 2007
Prerequisite: PL SC 001, PL SC 002 or PUBPL 304W

PL SC 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

PL SC 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

PL SC 495 Political Science Internship (1-6) Combining experience in government offices, related agencies, or law firms, with appropriate readings and a research paper/report.
Effective: Fall 2007
Prerequisite: prior consent of supervisor adviser or department head; applicable departmental internship requirements such as satisfactory completion of required 300- or 400-level courses appropriate for the internship program selected

PL SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PL SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PL SC 497A Political Representation (3) This course explores critical thinking about the representation of citizens' interests and the responsiveness of government to citizen preferences.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497A Civil Rights and US Foreign Policy (3) This course examines the relationship between US foreign policy and
the modern Civil Rights Movement in the U.S.

PL SC 497B Democratization in Asia (3) This seminar addresses the literature on democracy and democratization and then applies it in Asia.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497B Religion and War in World Politics (3) The course will examine the relationship between religion and war in world politics in the modern era.

PL SC 497C Civil Wars (3) In this course we examine recent research about the factors that lead to the onset, duration, and termination of civil wars.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497C Political Violence (3) This course examines what causes people in a country to try to use violence, such as riots, coups, or civil wars, to change their political process.

PL SC 497D Racism in World Politics (3) Examines the role of racism in world politics and of its impact on the two major paradigms, realism and idealism/liberalism.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497D Dictators and Their Demise (3) This course examines the political economy of authoritarian rule.

PL SC 497E Comparative Politics of Business-Government Relations (3) In this class we will study what drives the structure and behavior of business relations with governments in various kinds of political systems.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497E Foreign Policy and Dictators (3) This course examines how foreign policy tools such as foreign aid, economic sanctions, human rights shaming, and foreign military intervention affect political stability in authoritarian countries.

PL SC 497F Political Economy of China (3) This class will provide a framework for understanding the politics of economic policy in China, focusing especially on post-1978 economic reforms.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497F Voting Rights and the Electoral Process (3) This course is intended to give students a basic understanding of the themes in the legal regulation of elections and politics.

PL SC 497G Agenda Setting in American Politics (3) The objective of this course is to think critically about agenda setting in politics that is, how social and political problems are identified and defined.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497l Politics of the American South (3) Course about the government and policies of the American South during the 20th & 21st centuries.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497K Diplomacy: Institutions and Practice (3) We will learn about diplomacy in the abstract, and learn how diplomacy actually takes place, how institutions regulate it, and how diplomats conduct themselves.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 499 (IL) Foreign Study--Government (1-12) Study, in selected foreign countries, of political institutions.
Effective: Summer 2005
Prerequisite: PL SC 003 3 credits in economics history political science or sociology

Last Import from UCM: June 16, 2011 3:00 AM
Portuguese (PORT)

PORT 001 Elementary Portuguese I (4) For beginners. Grammar, with reading and writing of simple Portuguese; oral and aural work stressed.
Effective: Spring 1987

PORT 002 Elementary Portuguese II (4) Grammar, reading, and conversation continued; special emphasis on the language, literature, and life of Brazil.
Effective: Spring 1988
Prerequisite: PORT 001

PORT 003 Intermediate Portuguese (4) Grammar, reading, composition, and conversation.
Effective: Winter 1978
Prerequisite: PORT 002

PORT 051 Elementary Intensive Portuguese for Graduate Students I (3) Intensive introduction to Portuguese: first half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: graduate standing

PORT 052 Elementary Intensive Portuguese for Graduate Students II (3) Intensive introduction to Portuguese: second half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: PORT 051 and graduate standing

PORT 053 Intermediate Intensive Portuguese for Graduate Students (3) Continued intensive study of Portuguese at the intermediate level: reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: PORT 052 or equivalent and graduate standing

Last Import from UCM: June 16, 2011 3:00 AM
Psychology (PSYCH)

PSYCH 083S (GS) First-Year Seminar in Psychology (3) Scientific, societal, and individual implications of contemporary psychological theory.
Effective: Spring 2007

PSYCH 083T (GS) First-Year Honors Seminar in Psychology (3) Scientific, societal, and individual implications of contemporary psychological theory.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PSYCH 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

PSYCH 100 (GS) Introductory Psychology (3) Introduction to general psychology; principles of human behavior and their applications.
Effective: Spring 2007

PSYCH 100H (GS) Introductory Psychology (3) Introduction to general psychology; principles of human behavior and their applications.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PSYCH 100H (GS) Introductory Psychology (3) Introduction to general psychology; principles of human behavior and their applications.

PSYCH 100S (GS) Introductory Psychology (3) Introduction to general psychology; principles of human behavior and their applications.
Effective: Spring 2007

PSYCH 105 Psychology as a Science and Profession (3) Overview of history and methods of psychology as a science and profession; applications and ethical issues in psychology.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

PSYCH 199 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

PSYCH 200 (GQ) Elementary Statistics in Psychology (4) Frequency distributions and graphs; measures of central tendency and variability; normal probability curve; elementary sampling and reliability; correlations; simple regression equations.
Effective: Spring 2011
Prerequisite: PSYCH 100; MATH 021

PSYCH 212 (GS) Introduction to Developmental Psychology (3) Developmental principles; physical growth; linguistic, intellectual, emotional, and social development from infancy to maturity.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 212H (GS) Introduction to Developmental Psychology (3) Developmental principles; physical growth; linguistic, intellectual, emotional, and social development from infancy to maturity.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: PSYCH 100

PSYCH 212H (GS) Introduction to Developmental Psychology (3) Developmental principles; physical growth; linguistic, intellectual, emotional, and social development from infancy to maturity.
Prerequisite: PSYCH 100

PSYCH 221 (GS) Introduction to Social Psychology (3) Research and theory on topics including interpersonal attraction, aggression, helping, attitudes, attribution, cooperation, competition, and groups, from a psychological perspective.
Effective: Spring 2007
Prerequisite: PSYCH 100
PSYCH 230 (GS) (RL ST 236) **Introduction to Psychologies of Religion** (3) Introduction to major Western psychologies of religion (James, Freud, Jung) and to subsequent extensions of and departures from them.
Effective: Spring 2007

PSYCH 231 (GS;US) **Introduction to the Psychology of Gender** (3) Psychological study of gender in historical and contemporary perspective. Role of gender in development, self-concept, social relations, and mental health.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 232 (GS;US;IL) **Cross-Cultural Psychology** (3) This course examines how ethnic and cultural background influences patterns of human thought and behavior.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 238 (GS) **Introduction to Personality Psychology** (3) Past and recent conceptualizations of key issues and root ideas of personality psychology.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 243 (GS) **Introduction to Well-being and Positive Psychology** (3) Applying psychological knowledge to develop and maintain effective personal adjustment and well-being and positive social relations.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 244 (GS) **Introduction to the Psychology of Human Factors Engineering** (3) Introductory course in engineering/human factors psychology, emphasizing the application of core psychological principles and research to designing products and systems.
Effective: Spring 2009
Prerequisite: PSYCH 100 or 3 credits of GS

PSYCH 253 (GS) **Introduction to Psychology of Perception** (3) Survey of human perception and processing of perceptual information, with some reference to animal literature. Emphasizes vision and audition.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 256 (GS) **Introduction to Cognitive Psychology** (3) Introduction to study of such higher mental processes as thinking and reasoning, imagery, concept formation, problem solving, and skilled performance.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 260 (BB H 203) **Neurological Bases of Human Behavior** (3) An introduction to biopsychology, emphasizing the structure and function of the human brain.
Effective: Spring 2007

PSYCH 260A (GS) **Neurological Bases of Human Behavior** (3) An introduction to biopsychology, emphasizing the structure and function of the human brain. Students may take only one course for credit from PSY 203 and PSY 203A.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 261 (GS) **Introduction to Psychology of Learning** (3) A general survey of the learning area, including animal and human experiments, with the applicability of learning principles being discussed.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 268 **Animal Minds** (3) This course considers the cognitive and communicative abilities of animals, especially primates, as compared with humans.
Effective: Spring 2007

PSYCH 269 **Evolutionary Psychology** (3) Survey of evolutionary perspectives in current psychological research.
Effective: Spring 2008
Prerequisite: PSYCH 100; ANTH 021, BI SC 002, BIOL 133 or BIOL 222

PSYCH 270 **Introduction to Abnormal Psychology** (3) Overview of assessment, causes, and treatments of psychological disorders.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 281 (GS) **Introduction to Industrial-Organizational Psychology** (3) Personnel selection, training, accident prevention, morale, and organizational behavior.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 294 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2007

PSYCH 295 **Internship** (1-18) Supervised off-campus nongroup instruction including field experiences, practica, or...
PSYCH 296 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1985

PSYCH 297 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2007

PSYCH 297A **Mindfulness Based Stress Reduction** (3) Introduction to Mindfulness-Based Stress Reduction as a self regulatory approach to increase self awareness and decrease the physical and psychological symptoms of stress.

PSYCH 299 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

PSYCH 300H **Honors Course in Psychology** (1-6) Individual study and seminar in selected phases of psychology.
Effective: Spring 2007
Prerequisite: invitation of Program Honors Committee

PSYCH 301W **Basic Research Methods in Psychology** (4) Introduction to methods of psychological research, with special attention to hypothesis formation and testing, threats to validity, and data presentation.
Effective: Spring 2007
Prerequisite: PSYCH 100; PSYCH 200 or STAT 200

PSYCH 302W **Critical Thinking and Writing in Psychology** (4) This course aims to teach psychology majors to think critically and to write clearly using APA writing style.
Effective: Spring 2007
Prerequisite: Psychology major a grade of C or better in ENGL 202A

PSYCH 370 (US) **Psychology of the Differently-Abled** (3) This course familiarizes students with the needs and abilities of people with varying physical challenges through academic and experimental exercises.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 395 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2007
Prerequisite: prior approval of proposed assignment by instructor

PSYCH 397 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

PSYCH 400 **Intermediate Experimental Design** (3) Design and analysis of experiments on human and animal behavior, including application of the t, F, chi-square, and binomial distributions.
Effective: Spring 2007
Prerequisite: PSYCH 200 or STAT 200

PSYCH 404 (EDPSY 450) **Principles of Measurement** (3) Scale transformation, norms, standardization, validation procedures, estimation of reliability.
Effective: Spring 2007
Prerequisite: EDPSY 400, PSYCH 100 or PSYCH 200; STAT 200

PSYCH 405 **Mathematical Psychology** (3) Formalized psychological theories including models of social, biological, cognitive, and learning phenomena.
Effective: Spring 2007
Prerequisite: MATH 040 or equivalent PSYCH 200 or STAT 200

PSYCH 406W **Advanced Research Projects in Psychology** (4) Advanced methodology focusing on the logic and practice of research culminating in the completion of a student designed research project.
Effective: Spring 2007
Prerequisite: PSYCH 301W

PSYCH 407 **Advanced Research Methods in Psychology** (3) Advanced methodology focusing on the logic and practice of research in a selected content area of psychology.
Effective: Spring 2007
Prerequisite: PSYCH 100; PSYCH 200 or STAT 200; PSYCH 301W
PSYCH 408 Program Evaluation (3) Examination of the theories and practice of program evaluation; emphasis on applied work utilizing a wide range of evaluation approaches.
Effective: Spring 2007
Prerequisite: PSYCH 100 or SOC 001; PSYCH 200 or STAT 200; PSYCH 301W

PSYCH 410 Child Development (3) Study of the psychology of the growing person from conception through adolescence, focusing more on periods up to middle childhood.
Effective: Spring 2007
Prerequisite: PSYCH 100 or additional credits of PSYCH

PSYCH 412 Adolescence (3) Physical, cognitive, and personality development during adolescence.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 413 Cognitive Development (3) Development of reasoning and related cognitive skills, such as perception and language.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 212

PSYCH 414 Social and Personality Development (3) Development of social and personality attributes.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 212

PSYCH 415 Topics in Developmental Psychology (3) Special topics in developmental psychology.
Effective: Spring 2007
Prerequisite: PSYCH 413 or PSYCH 414

PSYCH 416 (HD FS 445) Development Throughout Adulthood (3) Processes of development and change of behavior from early adulthood through old age, emphasizing theory, method, and empirical research.
Effective: Spring 2007
Prerequisite: HD FS 249 or PSYCH 100; HD FS 312W or PSYCH 301W; PSYCH 200, STAT 200 or 3 credits of statistics; 6 credits in HD FS PSYCH or SOC.

PSYCH 419 Psychology and a Sustainable World (3) Students study relationships between humans and the natural world and psychological factors contributing to environmental problems and sustainable solutions.
Effective: Summer 2011
Prerequisite: PSYCH 100, PSYCH 221

PSYCH 420 Advanced Social Psychology (3) In depth study of selected research areas in human social behavior.
Effective: Spring 2007
Prerequisite: PSYCH 100 or additional credits of PSYCH

PSYCH 421 Self and Social Judgment (3) Individual's perceptions, evaluations, and decision-making strategies about themselves, others, and social situations or issues.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 221

PSYCH 422 Human Sexuality (3) Psychological influences on human sexual behavior such as love, sexual orientation, gender, intercourse, contraception, sexually transmitted diseases, dysfunctions, and paraphilias.
Effective: Spring 2007
Prerequisite: PSYCH 100 or additional credits of PSYCH

PSYCH 423 Social Psychology of Interpersonal/Intergroup Relationships (3) In-depth study of relationships among individuals (e.g., intimate relationships) or groups (e.g., prejudice, cooperation, competition, aggression, and negotiation).
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 221

PSYCH 424 Applied Social Psychology (3) Application of social psychological theories and research methods to field settings and to the study of social issues.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 221

PSYCH 425 Psychology of Human Emotion (3) Reviews, critiques, and applies major historical and contemporary psychological theories of emotion experience, understanding, and expression.
Effective: Spring 2007
Prerequisite: PSYCH 100 or additional credits of PSYCH

PSYCH 426 (LING 429) Language and Thought (3) Relations between language and cognition; cognitive implications of normal and impaired language development; cognition and bilingualism.
Effective: Spring 2007
Prerequisite: PSYCH 100 or LING 001 or LING 100

PSYCH 427 (LING 446) L1 Acquisition (3) How children learn their first language; psycholinguistic aspects of lexical, syntactic, semantic, and phonological development.
Effective: Spring 2010
Prerequisite: LING 100 or PSYCH 002 or permission of program

PSYCH 432 (US) Multicultural Psychology in America (3) This course focuses on the central role of culture, race, and ethnicity in the human condition.
Effective: Spring 2007
Prerequisite: PSYCH 100 or additional credits of PSYCH
PSYCH 436 (RL ST 414) Humanistic, Existential, and Religious Approaches to Psychology (3) Existential, humanistic, and religious approaches to the psychology of experience, consciousness and will. Effective: Spring 2007
Prerequisite: PSYCH 100 or RL ST 001

PSYCH 438 Personality Theory (3) Personality theories and their application to social and personality development and personality dynamics. Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits PSYCH

PSYCH 439 History and Systems of Psychology (3) Historical antecedents to scientific psychology; development of contemporary psychological theories and research areas from the formal establishment of psychology. Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 441 Health Psychology (3) Overview of the field with an emphasis on how psychological research contributes to an understanding of health and behavior. Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 443 Treatment and Education in Developmental Disabilities (3) Covers etiology, classification, intervention (treatment and education), ethical and legal issues related to individuals with developmental disabilities. Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 444 Engineering Psychology (3) Methods and results of experimental psychology pertinent to problems which involve man-machine relationships. Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of GQ or PSYCH

PSYCH 445 Forensic Psychology (3) Relations between psychological theory and research and the law, legal processes, and social policy. Effective: Spring 2007
Prerequisite: PSYCH 100; PSYCH 238, PSYCH 243 or PSYCH 270

PSYCH 447 Psychology of Discipline (3) Provides theory and practice for effective discipline of children in a variety of situations. Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits PSYCH

PSYCH 450 Psychology of Consciousness (3) Introduction to psychological and physiological aspects of consciousness as related to brain function and clinical psychology. Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

Prerequisite: PSYCH 100, PSYCH 256

PSYCH 452 Learning and Memory (3) General survey of learning and memory processes as revealed in experimental work with animals and humans. Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 256

PSYCH 456 Advanced Cognitive Psychology (3) In depth study of complex mental processes: thinking, problem-solving, imagery, symbolic behavior, information-processing, attention, artificial intelligence, and language. Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 457 Psychology of Language (3) Overview of psychological research and theory on language processes, including speech perception, word recognition, meaning representation, comprehension, and language acquisition. Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 458 Visual Cognition (3) Overview of concepts and methods in cognitive visual-spatial processing. Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 459 Attention and Information Processing (3) An examination of attentional processes. Contemporary informational processing approaches will be emphasized. Effective: Spring 2007
Prerequisite: PSYCH 100; PSYCH 200 or STAT 200; 3 credits 400-level PSYCH

PSYCH 460 Comparative Psychology (3) Behavior from standpoint of phylogenetic growth and development; biological implications; comparison of different types of animals, including man. Effective: Spring 2007
Prerequisite: PSYCH 100; PSYCH 260

PSYCH 461 Advanced Conditioning and Learning (3) An examination of basic learning processes that have been
determined within the context of classical, instrumental, and operant learning situations.

**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100 6 additional credits of PSYCH  

**PSYCH 462 Physiological Psychology** (3) Study of the biological bases of behavior and experience, including the anatomy and physiology of the brain and nervous system.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100; PSYCH 260 or 3 credits of BIOL  

**PSYCH 463 Developmental Biopsychology** (3) Developmental neuroanatomy and neurophysiology of vertebrates as they relate to behavior; emphasis on early postnatal development of birds and mammals.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 260  

**PSYCH 464 Behavior Genetics** (3) Survey of gene mechanisms and gene-environment interactions in the determination of behavior; emphasis on deviant human behavior.  
**Effective:** Spring 2008  
**Prerequisite:** PSYCH 100; ANTH 021, BI SC 002, BIOL 133 or BIOL 222  

**PSYCH 470 Abnormal Psychology** (3) Causes, dynamics, symptoms, and treatment of neuroses, psychoses, personality disorders, and other psychological disorders of adulthood.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100; PSYCH 238, PSYCH 243 or PSYCH 270  

**PSYCH 471 Psychology of Adjustment and Social Relationships** (3) Theory and application of psychological principles to problems in personal and social adjustment.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100 6 additional credits of PSYCH  

**PSYCH 473 Behavior Modification** (3) Principles of advanced behavior modification techniques.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100 6 additional credits of PSYCH  

**PSYCH 474 Psychological Intervention in Childhood** (3) Psychology of personal relationships in school situations.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100; PSYCH 212, PSYCH 238, PSYCH 243 or PSYCH 270  

**PSYCH 475 Psychology of Fear and Stress** (3) Description and evaluation of major trends in research on stress and fear in humans and other animals.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100 3 credits of BIOL or statistics PSYCH 200 or STAT 200  

**PSYCH 476 Child Psychopathology** (3) Etiology, diagnosis, and facilitation of adjustment of the mentally retarded, gifted, physically handicapped, and emotionally disturbed child.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100; PSYCH 212, PSYCH 238, PSYCH 243 or PSYCH 270  

**PSYCH 477 Mental Health Practicum with Children** (3) Overview of interventions for children at risk for mental health disorders; emphasis on intervention strategies, program evaluation, and applied skills.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100 permission of program  

**PSYCH 478 Clinical Neuropsychology** (3) Overview of functional human neuroanatomy and clinical neuropsychology, with emphasis on origin, assessment, and treatment of human brain damage.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100, PSYCH 260  

**PSYCH 479 (US) (WMNST 471) The Psychology of Gender** (3) Theories and research on gender differences and gender roles. Emphasis on women’s and men’s current positions in society.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100, PSYCH 221  

**PSYCH 481 Introduction to Clinical Psychology** (3) Diagnostic procedures, treatment approaches, occupational settings, and ethical considerations relevant to the profession of the clinical psychologist.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100; PSYCH 238, PSYCH 243 or PSYCH 270  

**PSYCH 482 Selection and Assessment in Organizations** (3) Background in personnel testing, performance measurement, selection strategies, with emphasis on validity and measurement reliability.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100, PSYCH 200 or STAT 200, PSYCH 281  

**PSYCH 484 Work Attitudes and Motivation** (3) Survey of theory and research with respect to attitudes, morale, and motivation of employees and management.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100; PSYCH 200 or STAT 200 or 6 credits of GQ  

**PSYCH 485 Leadership in Work Settings** (3) Review of research and application of behavior principles in the areas of management and supervision.  
**Effective:** Spring 2007  
**Prerequisite:** PSYCH 100; PSYCH 281 or 3 credits MGMT
PSYCH 490 **Senior Seminar in Psychology** (3) Capstone experience for senior psychology majors; review of current research literature; topics vary.  
**Effective**: Spring 2007  
**Prerequisite**: PSYCH 301W 6 credits 400-level PSY senior Psychology major

PSYCH 491H **Honors Thesis** (3) An opportunity to pursue an advanced research thesis or project to integrate studies within psychology.  
**Effective**: Spring 2007  
**Prerequisite**: HONOR 301H senior standing and permission of the program

PSYCH 492 **Current Topics in Psychology** (3) Current topics addressing significant contemporary developments in psychology.  
**Effective**: Spring 2007  
**Prerequisite**: PSYCH 100

PSYCH 493 **Senior Thesis** (3-6) Supervised senior thesis research in psychology.  
**Effective**: Spring 2007  
**Prerequisite**: approval of a thesis adviser in the department seventh-semester standing

PSYCH 494 **Research Projects** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.  
**Effective**: Spring 2007

PSYCH 494H **Research Projects** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.  
**Effective**: Fall 2007

PSYCH 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.  
**Effective**: Summer 1998  
**Prerequisite**: prior approval of proposed assignment by instructor

PSYCH 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
**Effective**: Summer 1985

PSYCH 496A **MCE/Wise Coordinator/Counselor** (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
**Effective**: Summer 2011  
**Ending**: Summer 2011  
**Future**: Fall 2011

PSYCH 496A **Intervention of Risky Behavior** (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
**Effective**: Fall 2011  
**Ending**: Fall 2011  
**Future**: Fall 2011

PSYCH 496B **Family Factors and Adolescent Adjustment** (6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
**Effective**: Fall 2011  
**Ending**: Fall 2011  
**Future**: Fall 2011

PSYCH 496C **Teaching Assistant PSYCH 100H** (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
**Effective**: Fall 2011  
**Ending**: Fall 2011  
**Future**: Fall 2011

PSYCH 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.  
**Effective**: Summer 1991

PSYCH 497A (S PSY 497A) **Child Development, Health and Education in Nepal** (3) This course will educate students about the impact of demographic factors, economic indicators, educational access, social expectations on child health, academic and socio-emotional competencies.  
**Effective**: Fall 2011  
**Ending**: Fall 2011  
**Future**: Fall 2011

PSYCH 499 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.  
**Effective**: Spring 2007
Public Administration (P ADM)

P ADM 401 Introduction to Homeland Security (3) This course provides foundational knowledge about homeland security, including policy, organization, and legal issues in the American context.
Effective: Summer 2008

P ADM 404 Homeland Security and Defense in Practice (3) This course analyzes, evaluates, and critiques homeland security plans in practice.
Effective: Summer 2008
Prerequisite: P ADM 401

P ADM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1993

Last Import from UCM: June 16, 2011 3:00 AM
Public Health Preparedness (PHP)

PHP 410 (HLS 410) Public Health Preparedness for Disaster and Terrorist Emergencies I (3) Analyzes the history of terrorism and explores the preparation and response to specific terrorist threats, natural disasters, and conventional catastrophes.
Effective: Fall 2010
Prerequisite: Undergraduate Students BIOL 011 and BIOL 012 or CHEM 110 and CHEM 111 or MICRB 106 and MICRB 107; Graduate Students - Enrollment in the MHS program the Post- Baccalaureate Credit Certificate in Homeland Security or permission from the instructor.

Last Import from UCM: June 16, 2011 3:00 AM
Public Policy (PUBPL)

PUBPL 201 Introduction to Homeland Security (3) An introduction to homeland security, and defense, with a focus on policy, legal issues, organization, and administration.
Effective: Summer 2011

PUBPL 241 (CRIMJ 241) Computer Applications in Public Affairs/Criminal Justice (3) Introduction to computer applications for criminal justice and public affairs agencies.
Effective: Spring 2004

PUBPL 304W Public Policy Analysis (3) The use of analytic models for describing and explaining the forces shaping policy and the consequence of policy decisions.
Effective: Spring 2004

PUBPL 305 Leadership Studies (3) Exposure to a wide range of leadership issues that will bring students to a new understanding of leadership as responsibility.
Effective: Spring 1999
Prerequisite: fourth-semester standing

PUBPL 306 Introduction to Crisis and Emergency Management (3) An introduction to emergency management in mitigating, preparing for, responding to and recovering from hazards.
Effective: Summer 2011

PUBPL 325 (AMSTD 325) American Political Culture (3) Study of political culture in the United States.
Effective: Spring 2003
Prerequisite: 3 credits American Studies Political Science Public Policy or Sociology

PUBPL 415 (CRIMJ 415) Drug Control Policy in Comparative Perspective (3) Examines the history of drug control policy in the United States; comparisons and contrasts with other countries' experiences.
Effective: Summer 2004
Prerequisite: CRIMJ 200 orPL SC 001 orPL SC 014 orSOC 001

PUBPL 419 Western Constitutional Traditions (3) This course reviews the major political, economic and social movements that shaped the development of the US Constitution.
Effective: Summer 2011
Prerequisite: HIST 001, HIST 002, I HUM 311, PL SC 001, PUBPL 420 orPUBPL 421

PUBPL 475 Critical Infrastructure Protection (3) This course provides knowledge about protection of critical infrastructure as an aspect of homeland security.
Effective: Summer 2011
Prerequisite: 5th semester standing

PUBPL 480 Seminar in Urban Policy (3) Work in this course will focus upon governmental institutions and public policy problems in metropolitan areas.
Effective: Fall 1998
Prerequisite: seventh-semester standing

PUBPL 481 Seminar in Environmental Policy (3) Fundamentals of evolution; impacts on natural resources; interaction of environmental issues, current decision-making process policy, enforcement mechanisms; future actions.
Effective: Fall 1983
Prerequisite: seventh-semester standing

PUBPL 482 Seminar in Health Policy (3) Introduction to policy analysis of issues of current interest and importance to public administrators in the health industry.
Effective: Fall 1983
Prerequisite: seventh-semester standing

PUBPL 483 Seminar in National Security Policy (3) Course will examine the inter-relationship of foreign, military and economic policy.
Effective: Fall 1983
Prerequisite: seventh-semester standing

PUBPL 485 Seminar in Welfare Policy (3) Course examines the origins, development, and impact of welfare programs.
Effective: Fall 1998
Prerequisite: seventh-semester standing

PUBPL 490 Seminar in Public Policy (3) A survey of the major policy issues, actors and institutions involved in the policy-making system of contemporary society. (May be repeated for credit.)
Effective: Fall 1983
Prerequisite: seventh-semester standing

PUBPL 495 Internship (3-12) Experience in a public service agency related to knowledge gained through academic course work, reading, and discussion.

The Pennsylvania State University
Effective: Fall 1983
Prerequisite: seventh-semester standing

**PUBPL 496 Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 1983

**PUBPL 497 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2010

Last Import from UCM: June 16, 2011 3:00 AM
Quality Control (Q C)

Q C 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

Q C 098 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

Q C 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

Q C 198 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

Q C 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

Q C 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

Q C 450 Quality Control and Quality Improvement (3) Review of quality control and improvement methods including SPC applications, acceptance sampling, regression analysis, and design of experiments.
Effective: Spring 2007
Prerequisite: MATH 141 or MATH 210

Q C 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

Last Import from UCM: June 16, 2011 3:00 AM
Quality and Manufacturing Management (QMM)

QMM 491 Introduction to Business Concepts for Manufacturing (3) Introduction to business, topics in marketing, accounting, and finance for nonbusiness students in manufacturing management.
Effective: Fall 2001
Prerequisite: students taking this course CAN NOT be a Business major and must be in their senior year

QMM 492 Introduction to Engineering Design Principles (3) Engineering principles including different engineering fields, graphics, design, solid modeling and failure analysis.
Effective: Fall 2001
Prerequisite: students taking this course CAN NOT be an Engineering major and must be in their senior year

QMM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2008

Last Import from UCM: June 16, 2011 3:00 AM
Quantification (QUANT)

QUANT 310 Mathematical Methods in the Social and Managerial Sciences (3) Functions (linear and nonlinear), systems of linear equations, matrix algebra, introductory differential calculus, applications in business and economics.
Effective: Fall 1983
Prerequisite: college algebra

Last Import from UCM: June 16, 2011 3:00 AM
Radiological Sciences (RADSC)

RADSC 101 Radiographic Introduction and Procedures/Lab I (4) Radiology history, basic radiation protection principles, medical terminology, introduction to radiography and radiographic procedures/lab.
Effective: Fall 2002

RADSC 102 Radiographic Procedures/Lab II (4) Continuation of Radiographic Procedures/Lab I to include appendicular skeleton and introduction to head work.
Effective: Fall 2002
Prerequisite: RADSC 101, RADSC 110

RADSC 103 Radiographic Procedures/Lab III (3) Continuation of Radiographic Procedures/Lab II to include digestive, urinary, and biliary systems and facial bone work.
Effective: Fall 2002
Prerequisite: RADSC 102

RADSC 110 Patient Care in Radiologic Sciences (3) Basic concepts of routine and emergency patient care procedures addressed from the radiographer's perspective.
Effective: Spring 2002

RADSC 204 Radiographic Exposure I (3) Fundamental knowledge base of factors that govern and influence the production and recording of radiologic images.
Effective: Fall 2002
Prerequisite: RADSC 103

RADSC 205 Radiographic Exposure II (3) Continuation of exposure factors concerning radiographic imaging; film, electronic imaging, processing, quality assurance and related areas will be emphasized.
Effective: Fall 2002
Prerequisite: RADSC 204

RADSC 206 Advanced Radiographic Procedures (3) Emphasis on specialized positioning and advanced radiographic procedures; includes introduction to cross-sectional anatomy.
Effective: Fall 2002
Prerequisite: BIOL 141, RADSC 205

RADSC 207 Registry Review (4) Registry Review includes material from all radiological science courses, with emphasis on National Certification Examination, and career planning.
Effective: Fall 2002
Prerequisite: RADSC 206

RADSC 210W Radiographic Pathology (3) Writing intensive study of theories of disease causation and the pathophysiologic disorders compromising health systems with emphasis on radiographic presentation.
Effective: Fall 2002
Prerequisite: BIOL 129, BIOL 141

RADSC 220 Radiation Biology and Protection (3) Study the principles of interaction of radiation with living systems, effects on cells and tissues, biological response, and radiation protection.
Effective: Spring 2002

RADSC 230 Radiographic Physics (3) Basic knowledge of atomic structure, characteristics of radiation, x-ray production, photon interactions, circuitry, imaging equipment and quality control.
Effective: Spring 2002

RADSC 240 Pharmacology and Drug Administration (2) Basic concepts of pharmacology, the basic techniques of venipuncture, and the administration of diagnostic contrast agents and/or intravenous medications.
Effective: Spring 2002
Prerequisite: BIOL 141, RADSC 110

RADSC 295 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2002
Prerequisite: prior approval of proposed assignment by instructor

Last Import from UCM: June 16, 2011 3:00 AM
Railr Transp Enginer (RTE)

RTE 195 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2011

RTE 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2011

RTE 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2011

RTE 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2011

RTE 295 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2011

RTE 296 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2011

RTE 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2011

RTE 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2011

RTE 301 Railroad Industry Overview and Economic Regulation (3) This course explores the relationship between railroads and customers, competitors, and the political, regulatory, and economic environment.
Effective: Spring 2011
Prerequisite: ECON 102 Concurrent: RTE 303

RTE 302 Railroad Track Location, Construction and Maintenance (3) Principles of railroad track location, alignment, elements and safety regulations.
Effective: Spring 2011
Prerequisite: C E 310, C E 336 Concurrent: C E 335 C E 360

RTE 303 Railroad Operation and Safety (3) Basics of rail operations, including the role of terminals and safety principles.
Effective: Spring 2011
Concurrent: RTE 301

RTE 305 Railroad Communications and Signals (3) Principles of the separation of trains, including signals, interlocking, and communications.
Effective: Spring 2011
Prerequisite: PHYS 212, CMPSC 201 or CMPSC 202 Concurrent: RTE 303

RTE 402 Railroad Operations Practicum (3) Practicum (lectures, supervised field work, laboratories) exploring practical problems in rail operations and safety.
Effective: Spring 2011
Prerequisite: RTE 303, RTE 305

RTE 403 Railroad Track Practicum (3) Practicum (lectures, labs, supervised field experiences) exploring the construction and repair of track.
Effective: Spring 2011
Prerequisite: RTE 302, C E 310 Concurrent: C E 333W C E 335

RTE 404 Railroad Mechanical Practicum (3) Practicum (lectures, labs, supervised field experiences) examining the repair of locomotives and cars.
Effective: Spring 2011
Prerequisite: RTE 303, PHYS 211, PHYS 212, E MCH 213

RTE 406 Railroad Capstone Project (4) Capstone project to integrate course knowledge in a team-based project.
Effective: Spring 2011
Prerequisite: C E 333W, RTE 305, RTE 402, RTE 403, RTE 404, C E 332 7th semester standing
RTE 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.  
Effective: Spring 2011

RTE 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.  
Effective: Spring 2011

RTE 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Spring 2011

RTE 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.  
Effective: Spring 2011

RTE 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.  
Effective: Spring 2011

Last Import from UCM: June 16, 2011 3:00 AM
Real Estate (R EST)

R EST 100 Real Estate Practice (3) Study of real estate to enable individuals to make successful transactions and decisions. May not be used to satisfy Smeal College baccalaureate degree requirements.
Effective: Spring 2001 Ending: Fall 2011
Prerequisite: not available to students who have taken R EST 301

R EST 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983 Ending: Fall 2011

R EST 301 Real Estate Fundamentals (3) Introduction to urban real estate; economic forces affecting property rights; real estate markets and finance; land-use analysis; government policies.
Effective: Fall 1986 Ending: Fall 2011

R EST 395 Internship in Real Estate (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1989 Ending: Fall 2011

R EST 420 Analysis of Real Estate Markets (3) Historical performance, land use issues, market valuation, real estate development, public policy issues.
Effective: Summer 2005 Ending: Fall 2011
Prerequisite: R EST 301 or R EST 460 or R EST 470

R EST 424 (B LAW 424) Real Estate Law (3) Analysis of contemporary law applicable to various types of ownership interests and rights, methods of transferring ownership, and use of real property.
Effective: Spring 2005 Ending: Summer 2011
Prerequisite: B LAW 346

R EST 424 (B LAW 424) Real Estate Law (3) Analysis of contemporary law applicable to various types of ownership interests and rights, methods of transferring ownership, and use of real property.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: B LAW 441

R EST 425 (B LAW 425) Environmental Law, Property, and Commerce (3) Examines the impacts of major federal environmental laws on business relations and property interests.
Effective: Summer 1995 Ending: Fall 2011
Prerequisite: B A 243, B LAW 243 or E R M 151

R EST 450 Urban Property Rights and Land Use Issues (3) International perspectives on real estate as property, evaluation of land use regulations, and differences in real estate markets across countries.
Effective: Spring 2011 Ending: Fall 2011
Prerequisite: B A 301 or FIN 301

R EST 460 (FIN 460) Real Estate Financial Analysis (3) Debt and equity financing capital structure, "creative financing," risk analysis, corporate asset management.
Effective: Summer 2005 Ending: Fall 2011
Prerequisite: FIN 305W

R EST 470 (FIN 470) Real Estate and Capital Markets (3) Analysis of publicly-traded real estate of both the equity, (REITs) and debt (MBSs) sides. The course also provides international perspectives.
Effective: Summer 2005 Ending: Fall 2011
Prerequisite: FIN 305W

R EST 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007 Ending: Fall 2011

R EST 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983 Ending: Fall 2011

R EST 497A Real Estate Case Competitions (2) This course provides skills and expertise in analyzing actual real estate cases in preparation for national case competitions.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Last Import from UCM: June 16, 2011 3:00 AM
Recreation, Park and Tourism Management (RPTM)

RPTM 101 Introduction to Recreation Services (2) Introduction to discipline and exploration of professional career models/paths, historical development of profession, expectations and opportunities in recreation services. Effective: Spring 2005

RPTM 120 (GS;US;IL) Leisure and Human Behavior (3) Leisure from historical and contemporary perspectives, including forces shaping leisure behavior, and relationships among leisure, the environment, and social institutions. Effective: Spring 2010

RPTM 210 Introduction to Commercial Recreation and Tourism (2) Historical and contemporary perspectives of the field of commercial recreation and tourism. Effective: Spring 2005

RPTM 230 Teambuilding Facilitation (3) Learn leadership and teambuilding skills to facilitate group dynamics and adventure, team activities. Effective: Summer 2004

RPTM 236 Leadership and Group Dynamics in Recreation Services (3) Supervision in recreation services, including theories, strategies, group dynamics, applied leadership and decision-making skills. Effective: Spring 2005

RPTM 277 (US) Recreation for Persons with Disabilities (3) Encouragement of appreciation for cultural experiences, disability-related characteristics, and recreation pursuits among persons with disabilities. Effective: Summer 2005

RPTM 295A Introduction to Golf Management (1-4) Introduction to various phases of golf operations in public, private, municipal, or military settings. Effective: Spring 2005
Prerequisite: 2.00 cumulative grade point average

RPTM 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Spring 2005

RPTM 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 2005

RPTM 297A Outdoor School Counselor (2) Outdoor School is a field experience class and you must be accepted as a counselor before being registered. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: Contact Ellen Will for application information

RPTM 297A Outdoor School Counselor (1-3) Outdoor School is a field experience class and you must be accepted as a counselor before being registered. Application available at http://www.outreach.psu.edu/shaverscreek/files/index-ods-counselor.asp Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite: Contact Ellen Will for application information eeb11@outreach.psu.edu

RPTM 297B Interpreting Halloween to Children (1-2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 297B Interpreting Halloween to Children (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 297C Urban Service Experience (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 297C **Urban Service Experience** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012

RPTM 297D **Outdoor School Instructor** (1-3) Students who have been Outdoor School counselors at least twice are eligible to apply for a Learning Group Leader position. Please contact Ellen Will for an application.
EEB11@outreach.psu.edu
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: Contact Ellen Will for application information

RPTM 297D **Outdoor School Instructor** (1-3) Outdoor School is a field experience class and you must be accepted as a instructor before being registered. Application available at:
http://www.outreach.psu.edu/shaverscreek/files/index-ods-counselor-returning.asp
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 297E (EDTHP 297A) **Essentials of Environmental Education** (3) Essentials of Environmental Education covers the history, philosophy, and aims of environmental education. You will gain knowledge about the roles of EE professionals, become familiar with different teaching methods for EE delivery, and learn to assess EE programs. The course uses a participatory approach to issue investigation and civic engagement.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 297F **Mental Training FO** (1) This course is designed to systematically teach golfers mental strategies and mental focusing techniques associated with performance excellence in golf. Drawing from sport psychology literature, specific areas that will be dressed include the psychology of personal excellence and peak performance states, motivation and philosophical reasons for playing golf, mental preparation, strategies for playing great golf, self-regulation skills, concentration techniques, and performing with confidence.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 297G **Wilderness First Aid** (1) Located at Shaver's Creek. November 5 & 6 9:00AM-5:00PM CPR-November 5 6:00PM-10:00PM Lab Fee $75.00 CPR Fee $35.00 Certifications - SOLO WFA & AHA CPR/AED.
Effective: Fall 2011 Ending: Fall 2011

RPTM 297G **Wilderness First Aid (WFA)** (1) Located at Shaver's Creek. Lab Fee $75.00 CPR Fee $35.00 Certifications-SOLO WFA & AHA CPR/AED

RPTM 297G **Wilderness First Aid (WFA)** (1) Located at Shaver's Creek. Lab Fee $75.00 CPR fee $35.00 Certifications-SOLO WFA & AHA CPR/AED
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 297I **First Year Seminar** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 297I **Interpreting Maple Sugaring to Families** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

RPTM 297K **Special Topics Professional Golf Management** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

RPTM 297S **First Year Seminar - Golf Management** (2) This course provides an introduction to the University, RPTM major/PGM option, and the related professional organizations.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 297S **First Year Seminar** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 300Y (IL) **Tourism and Leisure Behavior** (3) Examination of the impact of recreational sociocultural, governmental, economic, and physical environment on the leisure traveler within the tourism industry.
Effective: Summer 2005

RPTM 320 **Recreation Resource Planning and Management** (3) Relationship between leisure behavior and natural environment. Exploration of natural resources which enhance leisure.
Effective: Spring 2005
RPTM 325 Principles of Environmental Interpretation (3) Introduction, history, practice, and principles of contemporary interpretive activities common to natural and cultural history program sites.
Effective: Spring 2005

RPTM 326 Natural History Interpretation (3) Methods, techniques, resources to acquire knowledge of natural history.
Field identification, projects of an applied nature, and seasonal application.
Effective: Spring 2005
Prerequisite: RPTM 325

RPTM 327 Cultural History Interpretation (3) Methods, skills, and techniques necessary for the programming of historical sites and areas.
Effective: Spring 2005
Prerequisite: RPTM 325

RPTM 330 Adventure-Based Program Leadership (3) Both theoretical and experiential components are included as the role of the leader in outdoor adventure programs is examined.
Effective: Spring 2005

RPTM 334 Non-profit Recreation Agency Operations (3) Recreation agencies in voluntary and semiprivate sectors will be investigated through membership strategies, fund raising, volunteer management, etc. case studies.
Effective: Spring 2005
Prerequisite: or concurrent: RPTM 356

RPTM 356 Programming in Recreation Services (3) Translating agency philosophy and policy into understanding of organization, management, implementation, and evaluation of programming in recreation services.
Effective: Spring 2005
Prerequisite: or concurrent: RPTM 101, RPTM 236; fifth-semester standing

RPTM 360 Golf Operations Management (3) The course will focus on business planning, budgeting, inventory management, and financial controls within golf operations.
Effective: Spring 2005
Prerequisite: MGMT 100

RPTM 386 Therapeutic Recreation Service Delivery (3) Skills and knowledge to deliver therapeutic recreation services based upon a sound philosophy.
Effective: Spring 2005
Prerequisite: or concurrent: RPTM 277

RPTM 394 Orientation to Internship (1) Plan and prepare for internship in Recreation Services. Analyze career opportunities, internship process, and associated requirements. For RPTM majors only.
Effective: Spring 2005
Prerequisite: fifth-semester standing

RPTM 395B Participation in Golf Management (1-4) Practical individual involvement in selected golf operations in public, private, municipal, or military settings.
Effective: Spring 2005
Prerequisite: RPTM 295A; 2.00 cumulative grade point average

RPTM 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2005

RPTM 397K Administration Golf Operation II (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 397S First Year Seminar (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011

RPTM 410 Marketing of Recreation Services (3) Theoretical/practical application of marketing/advertising strategies in the development/delivery of recreation services.
Effective: Spring 2005
Prerequisite: fifth-semester standing or above

RPTM 415 Commercial Recreation Management (3) Planning, developing, and managing profit-oriented recreation opportunities.
Effective: Spring 2005
Prerequisite: RPTM 210 and RPTM 410

RPTM 425 Principles of Interpretive Materials (3) Principles, practices, application of non-personal interpretive activities common to natural/cultural history, including exhibits, audio-visual and illustrative materials.
Effective: Spring 2005
Prerequisite: RPTM 325

The Pennsylvania State University
RPTM 430 Environmental Education Methods and Materials (3) Methods and materials for developing, implementing, and evaluating environmental education programs within formal and non-formal educational settings.
Effective: Summer 2011
Prerequisite: AEE 100 or RPTM 325

RPTM 433W Program Evaluation and Research in Recreation Services (3) Systematic, structured problem-solving process for decision making in recreation and parks. Research techniques/evaluation procedures; quantitative, qualitative methodologies; deductive, inductive reasoning.
Effective: Spring 2005
Prerequisite: RPTM 356 3 credits in statistics

RPTM 435 Recreation Facilities Planning and Management (3) Planning and management of selected facilities with emphasis upon maintenance, activity, and support provisions.
Effective: Spring 2005
Prerequisite: fifth-semester standing or above

RPTM 440 Adventure-based Programming and Administration (3) Utilization of wilderness/backcountry environments and participant challenge; history, models, theories; survey of organizations; program design, administration; and issues.
Effective: Spring 2005
Prerequisite: or concurrent: RPTM 330 or RPTM 356

RPTM 460 Political and Legal Aspects of Recreation Services (3) Role of local, state, federal government in provision of recreation services. Legislative and judicial systems.
Effective: Spring 2005
Prerequisite: RPTM 101

RPTM 470 Recreation and Park Management (3) Management of recreation and park services in public/non-profit settings; planning, budgeting fiscal development, resources allocation, decision-, making, computer applications.
Effective: Spring 2005
Prerequisite: RPTM 320

RPTM 476 Leisure Education in Therapeutic Recreation (3) Theoretical and practical application of leisure education in the therapeutic recreation process.
Effective: Spring 2005
Prerequisite: RPTM 277 and RPTM 386

RPTM 480 Senior Management Seminar (1) Current management issues will be examined relative to professional management strategies, ethics, and leadership in leisure services.
Effective: Spring 2005
Prerequisite: sixth-semester standing in RPTM

RPTM 486 Facilitation Techniques in Therapeutic Recreation (3) Intervention strategies, therapeutic approaches, and group facilitation techniques in therapeutic recreation.
Effective: Summer 2011
Prerequisite: RPTM 386

RPTM 490 Management and Issues in Therapeutic Recreation Services (3) Topics related to management and professional issues in therapeutic recreation services in both clinical and community settings.
Effective: Summer 2011
Prerequisite: RPTM 386

RPTM 494H Senior Honors Thesis (1-6 per semester/maximum of 6) Senior Honors Thesis
Effective: Summer 2011

RPTM 495A Internship in Recreation Services (12) Meet educational objectives through participation in organized practical experience; direct observation and professional supervision in full-time work experience.
Effective: Spring 2005
Prerequisite: RPTM 394 ; seventh-semester standing; 300 hours practical experience; and a 2.0 grade-point average; current and valid certification in advanced first aid and cardiopulmonary resuscitation

RPTM 495B Internship in Golf Management (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings.
Effective: Spring 2005
Prerequisite: RPTM 395B ; 2.00 cumulative grade point average; current and valid certification in advanced first aid and cardiopulmonary resuscitation

RPTM 495C Internship in Golf Management (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings.
Effective: Spring 2005
Prerequisite: RPTM 495B ; 2.00 cumulative grade point average

RPTM 495D Internship in Golf Management (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings.
Effective: Spring 2005
Prerequisite: RPTM 495C ; 2.00 cumulative grade point average

RPTM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2005
RPTM 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2005

RPTM 497A **Sport Tourism** (3) The primary objective of this course is to provide students with an overview of the continuously expanding niche market of sport tourism with a focus on the historical influences, economic aspects, and sport-specific starting points. This course explores marine tourism, winter sport tourism, golf tourism, sport event tourism, and spa tourism; Sport related travel such as health/medical and adventure are also investigated. Supplemental objectives of this course are to (a) synthesize the social and economic impacts of a mass sporting event and (b) explore the impact of the internet on the sport tourism industry with regard to both spectators and participants who travel for sport.
Effective: Summer 2011 Ending: Summer 2011

RPTM 497B **Introduction to Arena Management** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

RPTM 497C **Outdoor Consortium** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

RPTM 497D **Ecological Investigations** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 497E **Event Planning** (3) The course covers a broad overview of the processes involved in planning and implementing meetings, special events, and conferences by focusing on the basic procedures of developing, planning, coordinating, implementing and evaluating. Throughout the course, we will identify the skill set of the successful Meeting and Event Professional, as well as how meetings and events fit in the grand scheme of modern business.
Effective: Summer 2011 Ending: Summer 2011

RPTM 497E **Outdoor and Experiential Education** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 497F **National Curricula Workshop** (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 497F **National Curricular Workshops** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

RPTM 497F **National Curricula Workshop** (1-2 per semester/maximum of 2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 497I **Canoeing Leadership** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 497I **Canoeing Leadership** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

RPTM 497I **Canoeing Leadership** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 497K **Administrative Golf Operation III** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

The Pennsylvania State University
RPTM 497K **Discovery Trip** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

RPTM 497S **Economics of Sport Tourism** (3) Students in this course will examine the principles of tourism, the growth of the industry, and the importance of tourism to local, state and national economics. Students will explore the impact of television and the internet on the Tourism industry, and take an in-depth look at the consumers who travel for sport and recreational opportunities.
Effective: Summer 2011 Ending: Summer 2011

RPTM 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2006

RPTM 498B **Wilderness First Responder** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

RPTM 498C **National Association of Interpretation Certification Class** (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

RPTM 498D **Backpacking Leadership** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 498D **Back Packing Leadership** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

RPTM 498D **Backpacking Leadership** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 498F **Rock Climbing Leadership** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 498F **Rock Climbing Leadership** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

RPTM 498F **Rock Climbing Leadership** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

Last Import from UCM: June 16, 2011 3:00 AM
Rehabilitation (REHAB)

REHAB 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2003

Last Import from UCM: June 16, 2011 3:00 AM
Rehabilitation and Human Services (RHS)

RHS 096 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2008

RHS 097 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2008

RHS 100 (GS) Introduction to Disability Culture (3) Social and cultural contexts of disability on both a micro and macro levels will be examined.
Effective: Summer 2008 Ending: Summer 2011

RHS 100 (GS;US;IL) Introduction to Disability Culture (3) Social and cultural contexts of disability on both a micro and macro levels will be examined.
Effective: Fall 2011 Future: Fall 2011

RHS 196 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2008

RHS 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2008

RHS 197A Introduction to Substance Dependence (3) An overview of drugs and alcohol use in society from biological, sociological, and psychological perspectives.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RHS 296 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2008

RHS 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2008

RHS 300 Introduction to Rehabilitation and Human Services (3) Disability, public and private rehabilitation agencies, case management; resources for training; observations in rehabilitation settings.
Effective: Spring 2009
Prerequisite: 6 credits in psychology sociology human development and family studies and/or crime law and justice

RHS 301 Introduction to Counseling as a Profession (3) Overview of the counseling theories that are often used in human service and rehabilitation practices.
Effective: Spring 2009

RHS 302 Client Assessment in Rehabilitation and Human Services (3) Provides a practical understanding and skills to utilize assessment in the helping process.
Effective: Spring 2009
Prerequisite: 3 credits in statistics Concurrent: 3 credits in statistics

RHS 303 Group Work in Rehabilitation Practice and Human Services (3) An overview of essential elements and dynamics for conducting groups and various team-related activities will be the major focus.
Effective: Summer 2008
Prerequisite: 6 credits in psychology sociology or human development

RHS 396 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2008

RHS 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2008
RHS 400W Case Management and Communication Skills (3) Principles and practices of obtaining, recording, evaluating, and utilizing case data in rehabilitation planning; implementation of rehabilitation plans. 
Effective: Spring 2009
Prerequisite: RHS 300

RHS 401 Community Mental Health Practice and Services (3) Community mental health roles, historical points, current trends, and ethical standards; funding and impact on service provision.
Effective: Spring 2009
Prerequisite: RHS 301

RHS 402 Children and Families in Rehabilitation Settings and Human Services (3) Contemporary family issues, child development, legal considerations, cultural and familial factors within rehabilitation and human services practice will be addressed.
Effective: Summer 2008
Prerequisite: 6 credits in psychology and/or sociology

RHS 403 Medical Aspects of Disability (3) Common disabling illnesses, injuries, and congenital defects; their symptomatology, prognosis, and treatment; implications for personal, social, and vocational adjustment.
Effective: Spring 2009
Prerequisite: 6 credits in psychology and/or sociology

RHS 495A Rehabilitation and Human Services Internship (15) Full-time practicum in rehabilitation and related human services agencies and institutions providing psychosocial, vocational, educational, and/or residential services to people with disabilities.
Effective: Spring 2009
Prerequisite: students must have successfully completed all other required coursework for the major (grade of "C" or higher) as well as fulfilled general education requirements.

RHS 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2008

RHS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical of special interest.
Effective: Summer 2008

RHS 497A Rehabilitation in Corrections (3) An overview of rehabilitation in different correctional settings focusing on the history, classification, risk assessment, intervention strategies and community reentry.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RHS 497B Introduction to Substance Dependence (3) An overview of drugs and alcohol use in society from biological, sociological, and psychological perspectives.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Last Import from UCM: June 16, 2011 3:00 AM
Religious Studies (RL ST)

RL ST 001 (GH;US;IL) Introduction to World Religions (3) An historical and comparative survey of the principal beliefs and practices of the world’s major religions.
Effective: Summer 2005

RL ST 003 (GH;US;IL) Introduction to the Religions of the East (3) Religious experience, thought, patterns of worship, morals, and institutions in relation to culture in Eastern religions.
Effective: Summer 2005

RL ST 004 (GH;US;IL) (CAMS 004, J ST 004) Jewish and Christian Foundations (3) Introduction to the perspectives, patterns of worship, morality, historical roots, and institutions of the Judaeo-Christian traditions; their relationships to culture.
Effective: Summer 2005

RL ST 007 Inner Lives in Religious Biography (3) Reading and discussion of selected autobiographical and biographical statements to discover and compare different forms of spirituality.
Effective: Fall 1983

RL ST 012 (GH;IL) (CAMS 012, J ST 012) Lands of the Bible (3) Textual and archaeological evidence for the lands, cities, and peoples associated with the Hebrew Bible and Christian scriptures.
Effective: Summer 2005

RL ST 012U (GH;IL) (CAMS 012U, J ST 012U) Lands of the Bible (3) Textual and archaeological evidence for the lands, cities, and peoples associated with the Hebrew Bible and Christian scriptures.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RL ST 044 (GH;IL) (CAMS 044) Ancient Near Eastern and Egyptian Mythology (3) Survey of major ancient Mediterranean myths, gods, and goddesses in their cultural contexts; influence on later cultures.
Effective: Summer 2005

RL ST 070 (GH;IL) (CAMS 070, J ST 070) Prophecy: The Near East Then and Now (3) Prophecy in the ancient Near East, the ancient Jewish and Christian traditions, and today.
Effective: Summer 2007

Effective: Summer 1999

RL ST 090 (GH;IL) (CAMS 090, J ST 090) Archaeology of Jerusalem: Past and Present (3) Archaeology and history of Jerusalem from earliest times (c. 3000 BCE) to the present.
Effective: Summer 2005

RL ST 101 (GH;IL) Comparative Religion (3) Comparative or historical analysis of religious factors--worship, theology, ethics, scriptures, etc., in two or more religious traditions.
Effective: Summer 2005

RL ST 102 (GH;IL) (CAMS 102, HIST 102, J ST 102) Canaan and Israel in Antiquity (3) Political, social, and intellectual history of the land of Canaan/Israel in the Biblical era: Late Bronze and Iron Ages.
Effective: Summer 2005

RL ST 103 (GH;US;IL) Introduction to Hinduism (3) Historical development of Hinduism to the present.
Effective: Summer 2005

RL ST 104 (GH;US;IL) Introduction to Buddhism (3) A general survey of the basic doctrine, practice, and historical development of Hinayana and Mahayana Buddhism.
Effective: Summer 2005

RL ST 105 (GH;US;IL) Buddhism in the Western World (3) A general survey of the development of Buddhism as a religious tradition in the West, focusing especially on America.
Effective: Summer 2005

The Pennsylvania State University
RL ST 106 (GH;IL) **Mysticism** (3) A survey of the history, philosophy, and cultural impact of various mystical traditions in relation to world religions.  
Effective: Spring 2006

RL ST 107 (GH;US;IL) **Introduction to Islam** (3) Community and message of the early movement; development of authoritative structures and traditions; proliferation of sects; theology and creeds; mysticism.  
Effective: Spring 2006

RL ST 108 (GH;IL) **Muhammad and the Qur’an** (3) History of the Qur’an and its interpretation by the early Muslim community; life of Muhammad and his role within Islam.  
Effective: Fall 2010

RL ST 108U (GH;IL) **Muhammad and the Qur’an** (3) History of the Qur’an and its interpretation by the early Muslim community; life of Muhammad and his role within Islam.  
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RL ST 110 (GH;US;IL) (CAMS 110, J ST 110) **Hebrew Bible: Old Testament** (3) Introduction to the history, literature, and religion of ancient Israel.  
Effective: Summer 2005

RL ST 111 (GH;IL) (CAMS 111, J ST 111) **Early Judaism** (3) Religious thought, practices, and parties in the Second Temple period; the emergence of rabbinic Judaism.  
Effective: Summer 2005

RL ST 114 (GH;US;IL) (J ST 114) **Modern Judaism** (3) Trends in Jewish life and thought since the French revolution; Judaism’s responses to the challenge of modernity.  
Effective: Summer 2005

RL ST 115 (GH;US) (HIST 115, J ST 115) **American Jewish History and Culture** (3) Examination of the history, culture, social tensions, and contributions of Jews and Judaism in America.  
Effective: Summer 2006

RL ST 116 (GH;IL) **Muslims in America** (3) This course is a study of Muslims from multiple racial, cultural, and national perspectives; it explores what it means to be a Muslim in America.  
Effective: Summer 2010

RL ST 120 (GH) (CAMS 120, J ST 120) **New Testament** (3) Introduction to the history, literature, and religion of early Christianity in its Jewish-Hellenistic setting.  
Effective: Spring 2004

RL ST 121 **Jesus of Nazareth** (3) An historical critical examination of the life and message of Jesus of Nazareth.  
Effective: Spring 1995

RL ST 124 (GH;US;IL) (CAMS 124, J ST 124) **Early and Medieval Christianity** (3) Analysis in cultural context of selected thinkers, ideas, and movements in Christianity from the second through the fifteenth century.  
Effective: Summer 2005

RL ST 125W (GH) **Modern Christianity** (3) Analysis in cultural context of selected thinkers, ideas, and movements in Christianity from the sixteenth century to the present.  
Effective: Summer 1995

RL ST 130 (GH) **The Ethics of Western Religion** (3) History of theological-social ethics of the Judaeo-Christian tradition.  
Effective: Summer 1995

RL ST 131 (GH) (PHIL 132) **Introduction to Bioethics** (3) Studies questions of ethics in relation to biotechnology research and implementation, genetic engineering, medicine, animal and human rights.  
Effective: Spring 2003

RL ST 132W **Sects and Cults** (3) The origins, beliefs, and practices of new or dissenting religious groups and their relationship to the dominant religious culture.  
Effective: Spring 1994

RL ST 133 (GH) (CAMS 133, J ST 133) **Archaeology of the Levant and Ancient Israel** (3) Archaeology of the Levant and Ancient Israel to c. 1000 B.C.E.; relationship between archaeological and textual evidence.  
Effective: Spring 2004
Effective: Summer 2005

RL ST 137 (GH:US:IL) (WMNST 137) Women and Religion (3) Jewish and Christian religious views on womanhood; thought and lives of important religious women; and feminist understandings of these.
Effective: Spring 2006
Prerequisite: third-semester standing

Effective: Summer 2005

Effective: Summer 2005

RL ST 146 (GH:US) (AAA S 146) The Life and Thought of Martin Luther King, Jr. (3) A survey of the civil rights leader including his religious beliefs, intellectual development, and philosophy for social change.
Effective: Summer 2005

Effective: Summer 2005

RL ST 165 (IL) (ARAB 165, HIST 165) Introduction to Islamic Civilization (3) Islamic history, culture, religious life c.600-1500 C.E.
Effective: Spring 2006

RL ST 181 (IL) Introduction to the Religions of China and Japan (3) A survey of the history, philosophy, and cultural impact of the major Far Eastern religions: Confucianism, Taoism, Buddhism, and Shinto.
Effective: Spring 2006

Prerequisite: first-semester standing and enrollment in the College of the Liberal Arts

RL ST 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1995

Effective: Spring 2006

RL ST 236 (GS) (PSYCH 230) Introduction to Psychologies of Religion (3) Introduction to major Western psychologies of religion (James, Freud, Jung) and to subsequent extensions of and departures from them.
Effective: Spring 2007

RL ST 280 (GH:IL) (WMNST 280, J ST 280) WOMEN AND JUDAISM (3) Explores the Jewish views of women that have influenced the roles of women within both the religion and Western culture.
Effective: Spring 2006

RL ST 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

RL ST 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

RL ST 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor
RL ST 400 **Theories of Religion** (3) Comparative and interdisciplinary study of two or more systematic theories of religion: anthropological, psychological, sociological, philosophical/theological.
Effective: Fall 1983
Prerequisite: 6 credits in religious studies or seventh-semester standing

RL ST 407Y (IL) (HIST 409Y, J ST 409Y) **European Anti-Semitism from Antiquity to the Present** (3) Surveys the history of anti-Semitism in Europe from antiquity through the Middle Ages to the present.
Effective: Summer 2005

RL ST 408 (US;IL) **Hindu Studies** (3) Special topics in Hindu studies.
Effective: Summer 2005
Prerequisite: 3 credits in religious studies

RL ST 409 (US;IL) **Buddhist Studies** (3) Special topics in Buddhist studies.
Effective: Spring 2006
Prerequisite: 3 credits in religious studies

RL ST 410 (US;IL) (HIST 410, J ST 410) **Jews in the Medieval World** (3) Trends in medieval Jewish society under Islam and Western Christendom.
Effective: Spring 2006

RL ST 411 (US;IL) (J ST 411) **Jewish Studies** (3) Study of the life and thought of a particular period or movement in the history of Judaism.
Effective: Spring 2006
Prerequisite: 3 credits in religious studies

RL ST 412 (J ST 412) **American Judaism** (3) The development of Jewish religion and culture in America from the colonial era to the present.
Effective: Summer 1999
Prerequisite: HEBR 010 or RL ST 010

RL ST 414 (PSYCH 436) **Humanistic, Existential, and Religious Approaches to Psychology** (3) Existential, humanistic, and religious approaches to the psychology of experience, consciousness, and will.
Effective: Spring 2007
Prerequisite: PSYCH 100 or RL ST 001

RL ST 420 **Major Christian Thinkers** (3) Systematic inquiry into the religious thought of one or more Christian thinkers, such as Paul, Augustine, Luther, Calvin, Kierkegaard, or Tillich.
Effective: Fall 1983
Prerequisite: 3 credits in religious studies

RL ST 422 (AM ST 422) **Religion and American Culture** (3 per semester/maximum of 6) Selected topics, problems, or historical movements in American religion. Relation between religion and American culture.
Effective: Summer 1996

RL ST 424H (HIST 424H, J ST 424H, PHIL 434H) **Monotheism and the Birth of the West** (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.
Effective: Spring 2002
Prerequisite: RL ST 004, RL ST 102, RL ST 110 or RL ST 120

RL ST 440Y (US;IL) **The Orthodox Christian Tradition** (3) History, culture, and beliefs of the Eastern Orthodox religious tradition with special reference to Russia.
Effective: Spring 2011
Prerequisite: RL ST 004, RL ST 124, RL ST 125, RUS 100 or RUS 110

RL ST 461 (US;IL) (SOC 461) **Sociology of Religion** (3) Contemporary religion in the United States: beliefs, structure, and function of major denominations and religious cults.
Effective: Spring 2006
Prerequisite: 3 credits of sociology or religious studies

RL ST 471Y (IL) (HIST 471Y) **Classical Islamic Civilization, 600-1258** (3) Pre-Islamic Arabia; Muhammad; Arab conquest; Islamic beliefs and institutions; literary, artistic, and scientific achievements; relations with Europe; breakdown of unity.
Effective: Spring 2006

RL ST 478 (J ST 478, PHIL 478) **Ethics After the Holocaust** (3) Explores the philosophical effects of the Holocaust for thinking about the primary question: Is ethics possible?
Effective: Spring 2005
Prerequisite: one course in Jewish Studies or Philosophy

RL ST 483 (IL) **Zen Buddhism** (3) The development and current state of Zen Buddhist thought and practice.
Effective: Spring 2006
Prerequisite: HIST 172, HIST 173, HIST 174, HIST 175, PHIL 111, RL ST 003, RL ST 104 or RL ST 181

RL ST 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994
RL ST 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

RL ST 495 Internship (1-18) Supervised off-campus, non-group instruction, including field experience, practica, or internships.
Effective: Summer 2004
Prerequisite: prior approval of proposed assignment by instructor

RL ST 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

RL ST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

RL ST 497B (HIST 497B, J ST 497B) German Antisemitism from the Middle Ages to the Holocaust (3) German and Jewish history are interpreted in an integrated approach which examines the fundamental problem of continuity through the lens of antisemitism.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RL ST 499 (IL) Foreign Study--Religious Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

RL ST 499C (IL) (HIST 499C, CAMS 499C, ANTH 499C) Excavation, Survey and GIS for Archaeologists (6) Entails excavation, intensive survey, and an introduction to GIS for archaeologists.
Effective: Summer 2011 Ending: Summer 2011

RL ST 499D (IL) (HIST 499D, ANTH 499D, CAMS 499D) Israel Dig: Excavation, Conservation, and Public Archaeology (6) Entails excavation, conservation, and public archaeology involved with the preservation and interpretation of Israel's archaeological sites.
Effective: Summer 2011 Ending: Summer 2011

Last Import from UCM: June 16, 2011 3:00 AM
Risk Management (R M)

R M 100 Real Estate Practice (3) Study of real estate to enable individuals to make successful transactions and decisions. May not be used to satisfy Smeal College baccalaureate degree requirements.
Prerequisite: not available to students who have taken R M 303

R M 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

R M 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

R M 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

R M 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

R M 301 Risk and Decisions (3) Introduction to decision-making under uncertainty. Mathematical probability and statistics, decision theory and game theory will be studied.
Effective: Summer 2011
Prerequisite: B A 301 or FIN 301; MATH 110 or MATH 140; STAT 200 or SCM 200

R M 302 Risk and Insurance (3) Introduction to the principles and methods of handling business and personal risks; emphasis on insurance techniques.
Prerequisite: fourth-semester standing

R M 303 Real Estate Fundamentals (3) Introduction to urban real estate; economic forces affecting property rights; real estate markets and finance; land-use analysis; government policies.
Prerequisite: 4th semester standing

R M 320W Risk Management and Insurance (3) Goals and methods of risk management. Commercial insurance and alternative risk transfer (ART) methods in addition to the characteristics of insurance markets and intermediaries used by risk managers.
Effective: Summer 2011
Prerequisite: R M 301

R M 330W Real Estate Risk Analysis (3) Risk and value associated with real estate decision making, which includes purchasing, leasing renovation, financing, and investing.
Effective: Summer 2011
Prerequisite: R M 301

R M 395 Internship (1-3) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Prerequisite: prior approval of proposed assignment by instructor

R M 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

R M 401 Fundamentals of Private Pensions (3) Analysis of pension regulation, funding, vesting, retirement annuities under insured and self-insured plans, actuarial cost analysis, plan termination insurance.
Prerequisite: R M 302 or R M 320W

R M 405 Corporate Risk Management (3) Risk management for firms and organizations; loss control, risk transfer, and loss financing alternatives; Corporate employee benefit program design and financing.
Prerequisite: R M 302 or R M 320W

R M 410 Compound Interest and Annuities (3) Compound interest and annuity functions; equations of value; determination of yield rates; construction of tables.
Prerequisite: Prerequisite or concurrent: R M 301; MATH 414 or STAT 414

R M 411 Actuarial Mathematics I (3) A study of the mathematical theory of life contingencies; single-life functions and their applications.
Prerequisite: R M 410; STAT 414 or MATH 414

R M 412 **Actuarial Mathematics II** (3) Joint-life and survivor-life functions, population life tables, and multiple decrement theory, with applications to disability and retirement problems.
Prerequisite: R M 411

R M 415 **Modeling for Actuarial Science** (3) Modeling for Actuarial Science, including models of interest rates, used to price liabilities, and models of stock prices and options used to price Employee Options and Cash Balance Accounts.
Effective: Summer 2011
Prerequisite: R M 410

R M 420 **Property and Casualty Insurance** (3) Actuarial methods and concepts used to develop manual rates for property and casualty insurance.
Prerequisite: R M 320W or R M 330W

R M 424 (B LAW 424) **Real Estate Law** (3) Analysis of contemporary law applicable to various types of ownership interests and rights, methods of transferring ownership, and use of real property.
Prerequisite: B LAW 341 or R LAW 243

R M 425 (B LAW 425) **Business and Environmental Regulation** (3) Examines the interplay between environmental regulation and commercial activities, including property interests.
Prerequisite: B LAW 341 or R LAW 243

R M 430 **Life and Health Insurance** (3) Industrial organization of the US life-health insurance industry; economic issues related to organizational structure, operational functions, and the supply and demand for life-health products.
Prerequisite: R M 302 or R M 330W

R M 450 **Contemporary Issues in Real Estate Markets** (3) Historical performance, land use issues, market valuation, real estate development, public policy issues.
Prerequisite: R M 303 or R M 330W

R M 460 (FIN 460) **Real Estate Financial Analysis** (3) Debt and equity financing capital structure, "creative financing," risk analysis, corporate asset management.
Prerequisite: FIN 305W or R M 303 or R M 330W

R M 470 (FIN 470) **Real Estate and Capital Markets** (3) Analysis of publicly-traded real estate of both the equity, (REITs) and debt (MBSs) sides. The course also provides international perspectives.
Prerequisite: FIN 305W or R M 303 or R M 330W

R M 480 **International Real Estate Markets** (3) International perspectives on real estate as property, evaluation of land use regulations, and differences in real estate markets across countries.
Prerequisite: R M 303 or R M 330W

R M 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

R M 494H **Honors Research Project** (1-6) Supervised honor student research projects identified on an individual or small-group basis.

R M 496 **Independent Studies** (1-18) Creative Projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

R M 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

R M 497A **Real Estate Case Competition** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

R M 497B **Housing Markets and Housing Policy** (3) This course will review the economics of housing markets, at both the local and national levels and past and current housing policies. The financial, environmental, and societal contexts of housing will be emphasized, along with housing's role in the 2007-9 crash, and policy going forward.

The Pennsylvania State University
R M 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Spring 2012 Future: Spring 2012

Last Import from UCM: June 16, 2011 3:00 AM
Romanian (ROM)

ROM 296 Independent Studies (1-18) Creative projects, includes research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 1998

ROM 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998

Last Import from UCM: June 16, 2011 3:00 AM
Rural Sociology (R SOC)

R SOC 011 (GS;US) Introductory Rural Sociology (3) Basic sociological concepts applied to rural societal institutions and rural communities; causes and consequences of rural social change. Students may take only one course for General Education credit from R SOC 011 GS or SOC 001 GS. Effective: Spring 2006

R SOC 296 Independent Studies (1-18) Creative projects, including research and design which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

R SOC 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

R SOC 327 (S T S 327) Society and Natural Resources (3) Analysis of the relationships between societal development and enhancement and natural resources. Effective: Summer 1998 Ending: Summer 2011

R SOC 327 (S T S 327) Natural Resources, Science, Ethics, and Society (3) The purpose of this course is to enable students to become competent critical thinkers about the state of natural resources through greater understanding of scientific, discourse formation, and the ethical dimensions of natural resources issues. Effective: Fall 2011 Future: Fall 2011

R SOC 417 (CED 417) Power, Conflict, and Community Decision Making (3) Impact of institutions on human interdependence and behavior, the structure of power, and community decision making and public policy. Effective: Spring 2010 Prerequisite: R SOC 011 or SOC 001

R SOC 420 (US;IL) (WMNST 420, CED 420) Women in Developing Countries (3) Analysis of women's work, experiences, and development policies and practices in Africa, Asia, and Latin America. Effective: Fall 2009

R SOC 452 (CEDEV 452) Rural Organization (3) Social organization and change in rural communities; use of sociological principles in analysis of rural problems and rural development. Effective: Fall 2000 Prerequisite: 6 credits in rural sociology sociology or psychology

R SOC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Fall 1983

R SOC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1983

R SOC 499 (IL) Foreign Study--Rural Sociology (1-12) Study in selected countries of rural social institutions and current rural sociological problems. Effective: Summer 2005
Russian (RUS)

RUS 001 **Elementary Russian I** (4) Audio-lingual approach to basic Russian; writing. Students who have received high school credit for two or more years of Russian may not schedule this course for credit, without the permission of the department.
Effective: Fall 1985

RUS 002 **Elementary Russian II** (4) Audio-lingual approach to basic Russian continued; writing. Students who have received high school credit for four years of Russian may not schedule this course for credit, without the permission of the department.
Effective: Fall 1985
Prerequisite: RUS 001

RUS 003 **Intermediate Russian** (4) Emphasis on reading unsimplified texts; composition; grammatical analysis.
Effective: Fall 1985
Prerequisite: RUS 002

RUS 051 **Elementary Intensive Russian for Graduate Students I** (3) Intensive introduction to Russian: first half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: graduate standing

RUS 052 **Elementary Intensive Russian for Graduate Students II** (3) Intensive introduction to Russian: second half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: RUS 051 and graduate standing

RUS 053 **Intermediate Intensive Russian for Graduate Students** (3) Continued intensive study of Russian at the intermediate level: reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: RUS 052 or equivalent and graduate standing

RUS 083S (GH;US;IL) **First-Year Seminar in Russian** (3) Russia's cultural past and present.
Effective: Summer 2005

RUS 083T (GH;US;IL) **First-Year Seminar in Russian** (3) Russia's cultural past and present.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RUS 099 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

RUS 100 (GH;IL) **Russian Culture and Civilization** (3) The Russian people from the tenth century to present times; their literature, arts, music, science, and philosophy. In English.
Effective: Summer 2005

RUS 110 (GH;IL) **Russian Folklore** (3) Study of byliny, lyrical and historical songs, folktales, drama, ceremonial poetry, chants, charms, proverbs, and mythology of Russia. In English.
Effective: Summer 2005

RUS 120 (GH;IL) **Theatrical Arts of Russia** (3) Survey of Russian dramatic literature, including plays, operas, ballets, and cinema. In English.
Effective: Summer 2005

RUS 130 (IL) **Women in Russian Literature** (3) Survey of Russian and Soviet women characters and writers from the Medieval Period to the present (in English).
Effective: Summer 2011

RUS 141Y (IL) **Russian Literature in English Translation: 1800-1870** (3) Pushkin, Lermontov, Gogol, the critics, Turgenev, Dostoevsky, Tolstoy. Writing assignments will serve as a major way of exploring subject matter.
Effective: Spring 2006

RUS 142Y (IL) **Russian Literature in English Translation: 1870 to Present** (3) Dostoevsky, Tolstoy, Chekhov, Gorky, symbolists, selected Soviet authors. Writing assignments will serve as a major way of exploring subject matter.
Effective: Spring 2006

RUS 143 (GH;IL) (GER 143) **The Culture of Stalinism and Nazism** (3) The culture of Stalinist Russia and Nazi Germany in comparative perspective.
RUS 196 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2004

RUS 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1995

RUS 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

RUS 204 (IL) Intermediate Russian II (4) Intensive practice of Russian reading, writing, listening and speaking; review of Russian grammar.
Effective: Summer 2011
Prerequisite: RUS 003

RUS 214 (IL) Intermediate Russian III (4) Intensive practice of Russian reading, writing, listening and speaking; review of Russian grammar.
Effective: Summer 2011
Prerequisite: RUS 003

RUS 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

RUS 296 Independent Studies (1-18) Creative projects, including research design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1986

RUS 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1986

RUS 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

RUS 304 (IL) Readings in Russian III (3) Extensive reading of contemporary Russian texts, including articles from Soviet press and short fiction.
Effective: Spring 2006
Prerequisite: 6 credits of Russian at the 200 level

RUS 305 (IL) Advanced Russian Conversation (3) Discussion and role-playing based on real-life situations and current events; supervised by a native speaker.
Effective: Spring 2006
Prerequisite: RUS 204, RUS 214

RUS 360 (IL) Advanced Russian Grammar (3) Russian morphology and syntax on an advanced level.
Effective: Spring 2006
Prerequisite: 6 credits of Russian at the 200 level

RUS 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor

RUS 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

RUS 400 (IL) Senior Seminar in Russian Culture (3) Senior seminar devoted to topics in Russian culture; conducted in Russian.
Effective: Spring 2006
Prerequisite: RUS 204, RUS 214, RUS 304

RUS 412 (IL) Russian Translation (3 per semester/maximum of 6) Translation from Russian into English of complex texts from the humanities, social sciences, and technical fields.
Effective: Spring 2006
Prerequisite: 9 credits of Russian at the 200 level or higher

RUS 426 (IL) Dostoevsky (3) Study of representative works by Dostoevsky in the original Russian.
Effective: Spring 2006
Prerequisite: 9 credits of Russian at the 200 level or higher

RUS 427 (IL) Tolstoy (3) Study of representative works by Tolstoy in the original Russian.
Effective: Spring 2006
Prerequisite: 9 credits of Russian at the 200 level or higher

RUS 460 (IL) Linguistic Analysis of Contemporary Russian (3) Detailed study of the phonology, morphology, and syntax of Modern Standard Russian and the major dialects.
Effective: Spring 2006
Prerequisite: 9 credits of Russian at the 200 level or higher

RUS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

RUS 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

RUS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

RUS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

RUS 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM
School Psychology (S PSY)

S PSY 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1990

S PSY 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1990

S PSY 497A (PSYCH 497A) **Child Development, Health and Education in Nepal** (3) This course will educate students about the impact of demographic factors, economic indicators, educational access, social expectations on child health, academic and social-emotional competencies.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

S PSY 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

Last Import from UCM: June 16, 2011 3:00 AM
School of Science, Engineering, and Technology (SSET)

SSET 295 Internship (1-18) Supervised off-campus, individual training including practical field experiences or internships where written and oral critique of the activity is required.
Effective: Summer 2003
Prerequisite: prior approval of the proposed assignment by the program

SSET 395 Internship (1-18) Supervised off-campus, individual training including practical field experiences or internships where written and oral critique of the activity is required.
Effective: Summer 2003
Prerequisite: prior approval of the proposed assignment by the program

SSET 495 Internship (1-18) Supervised off-campus, individual training including practical field experiences of internships where written and oral critique of the activity is required.
Effective: Summer 2003
Prerequisite: prior approval of the proposed assignment by the program

Last Import from UCM: June 16, 2011 3:00 AM
Science (SC)

SC 100 Introduction to Research (1) Introduces essential elements of laboratory safety, laboratory techniques, research ethics, and scientific communication skills. Especially for undergraduate research students. 
Effective: Summer 2004

SC 101 (AG 100) Job Placement Skills and Strategies (1) Strategies and skills designed to identify career/life goals and implement career decisions. 
Effective: Fall 2010

SC 200 (GN) Science in Our World: Certainty and Controversy (3) A science appreciation course, aimed at making non-scientists more informed consumers of science. 
Effective: Summer 2010

SC 201 Medical Professions (1) Learn about the different medical professions and related subjects. 
Effective: Summer 2008

SC 210 Sophomore Science Seminar (2) Covers topics related to success in upper level courses including critical thinking, library resources, reading primary literature, and communication skills. 
Effective: Summer 2004

SC 285 Science Co-Op Preparation (1) Course helps students maximize value from Science Co-Op work experience; includes discussions of corporate culture and issues of business/technology. Offered for SA/UN grade. 
Effective: Summer 1999
Prerequisite: third-semester standing

SC 294 Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis. 
Effective: Spring 1994

SC 295 Science Co-op Work Experience I (1-3) A supervised work experience where the student is employed in a scientific position. To be offered for SA/UN grading. 
Effective: Spring 2007
Prerequisite: acceptance into the Eberly College of Science co-op program

SC 296 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. 
Effective: Spring 2005

SC 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. 
Effective: Spring 1991

SC 395 Science Co-op Work Experience II (1-3) A supervised work experience where the student is employed in a scientific position. To be offered for SA/UN grading. 
Effective: Spring 2007
Prerequisite: SC 295

SC 400 Consequences of Science (1) A series of lecture/discussions in which science faculty members show the social implications of their research specialty. 
Effective: Winter 1978

SC 401 Basic Science and Disease (1) Clinical aspects of various disease and how basic scientific information contributes towards understanding and treating disease. 
Effective: Summer 2008
Prerequisite: 4th semester standing or higher standing plus 3 credits in biology and 3 credits in chemistry

SC 402 Science-Related Employment: Corporate Organization, Opportunities, and Expectations (1-3 per semester/maximum of 3) Present undergraduate and graduate students with information and skills necessary for success in science-related job positions available in industry. 
Effective: Spring 2011
Prerequisite: 5th semester standing or permission of program

SC 476 Human Dimensions of Health Care (3) Field experience in five or more medical settings; complementary exposure to the scientific literature; weekly discussions. 
Effective: Spring 2011
Prerequisite: 5th semester standing; BIOL 230W and BIOL 240W or equivalent; approval of health sciences committee or coordinator
SC 494 Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1994

SC 494H Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

SC 495 Science Co-op Work Experience III (1-3) A supervised work experience where the student is employed in a scientific position. To be offered for SA/UN grading.
Effective: Spring 2007
Prerequisite: SC 395

SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1996

Last Import from UCM: June 16, 2011 3:00 AM
Science Education (SCIED)

SCIED 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1996

SCIED 297A Outdoor School Counselor (2) Outdoor School is a field experience class and you must be accepted as a counselor before being registered.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: Contact Ellen Will for application information.

SCIED 297A Outdoor School Counselor (1-3) Outdoor School is a field experience class and you must be accepted as a counselor before being registered. Application available at: http://www.outreach.psu.edu/shaverscreek/files/index-ods-counselor.asp
Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012
Prerequisite: Contact Ellen Will for application information eeb11@outreach.psu.edu

SCIED 297B (EARTH 297B) Fundamentals of Climate Science (3) Address the meaning, variability and change of climate over time as a result of natural and man-made processes. Course is geared toward elementary ed majors, but could also be appropriate for EMS students interested in reform-based science education.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SCIED 297D SCIED Seminar for TESLA Students (1) A continuing touch point for reflection about TESLA members’ growing understandings of science and science teaching.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SCIED 298 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

SCIED 410 Using Technology to Enhance Science Teaching (3) This course explores contemporary practice and research associated with applications of technology to enhance science learning and teaching.
Effective: Summer 2000
Prerequisite: admission to one of the science teaching options in SECED

SCIED 411 Teaching Secondary Science I (3) Introduction to teaching secondary school science, including curriculum, learning theories, media, evaluation as they relate to student progress.
Effective: Spring 1994
Prerequisite: C I 295 ; appropriate courses for certification option and approval of department

SCIED 412 Teaching Secondary Science II (3) Implementation of science instruction using a variety of modern approaches.
Effective: Spring 2001
Prerequisite: SCIED 410, SCIED 411 Concurrent: C I 412W

SCIED 455 Field Natural History for Teachers (3) Ecologically oriented field study course to provide teachers with basic knowledge of natural science resources in school environments.
Effective: Winter 1978
Prerequisite: 3 credits in biological science

SCIED 457 Environmental Science Education (3) Philosophy, techniques, and skills for teaching environmental science, including curriculum development, fieldwork, and the use of appropriate technologies.
Effective: Fall 2003
Prerequisite: 3 credits of calculus 9 credits of sciences 400-level teaching methods course

SCIED 458 Teaching Science in the Elementary School (3) Interpreting children's science experiences and guiding development of their scientific concepts; a briefing of science content material and its use.
Effective: Spring 2007
Prerequisite: LL ED 400, LL ED 401, LL ED 402, PSYCH 212 three credits each in biological earth and physical sciences Concurrent: MTHED 420 C I 495B ; C I 495A OR SS ED 430W

SCIED 470 Selected Studies in Science Education (1-6) Intensive work on particular issues, trends, or developments in science education for elementary and secondary school teachers.
Effective: Winter 1978
Prerequisite: Instructional I certification and teaching experience

SCIED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

SCIED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
SCIED 497A Inquiry Into The Environmental Sciences (3) This course for educators will provide instruction into creating effective hands-on lessons promoting higher order thinking skills in contrast to conventional laboratory methods.
Effective: Summer 2011 Ending: Summer 2011

SCIED 497B Introduction to Sustainability for Teachers (1) An introduction to the concepts of sustainability as it applies to agriculture, energy, and the impact of the environment and economy.
Effective: Summer 2011 Ending: Summer 2011

SCIED 497C (ENGR 497C) Exploring the Science & Engineering of Robotics (3) Explores topics in engineering design and physics as they apply to robotics. Design and programming of robots will be undertaken to reinforce concepts. Primarily geared to elem ed majors, also appropriate for Engineering students with interest in reform-based science education.
Effective: Summer 2011 Ending: Summer 2011

SCIED 497D Natural Gas - 'Gold Rush' of the 21st Century (1) An introduction to the concepts of sustainability as it applies to agriculture, energy, and the impact on the environment and economy.
Effective: Summer 2011 Ending: Summer 2011

SCIED 497F (ENGR 497F) Fundamentals of Science, Technology and Engineering (3) A course focusing on physics content, engineering design principles, and elementary science education pedagogy.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SCIED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

SCIED 498A Developing Natural Gas in the Classroom (1) This course provides background knowledge and resources for educators to develop a natural gas curriculum in the classroom.
Effective: Summer 2011 Ending: Summer 2011

Last Import from UCM: June 16, 2011 3:00 AM
Science, Engineering, and Technology (SE&T)

SE&T 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 1992

Last Import from UCM: June 16, 2011 3:00 AM
Science, Technology, and Society (S T S)

S T S 005 (US) (WMNST 005) Introduction to Women in Science, Technology, and Engineering (3) The role of women and gender in science, technology, and engineering.
Effective: Summer 2005 Ending: Summer 2011

S T S 047 (SOC 047) Wilderness, Technology, and Society (3) Impact of developments in science, literature, and art on changing attitudes toward nature; consequences for conservation, preservation, environmental ethics.
Effective: Spring 1991

S T S 055 (GN) (AERSP 055) Space Science and Technology (3) The science and technology of space exploration and exploitation; physical principles; research and development; history, space policy, and social implications.
Effective: Spring 1994

S T S 090 Introduction to Peace and Conflict Studies (3) Introduction to theory and practice concerning major contemporary issues of peace and conflict; includes anthropological, technological, psychological, and economic perspectives.
Effective: Fall 1994

S T S 100 (GH) Science, Technology, and Culture (3) A survey of the development and culture of science, technology, and medicine in world history.
Effective: Spring 2011

S T S 100H (GH) Science, Technology, and Culture (3) A survey of the development and culture of science, technology, and medicine in world history.

S T S 101 (GH) Modern Science, Technology, and Human values (3) Relationships of science and technology to human aspirations, values, and arts.
Effective: Spring 1996

S T S 101H (GH) Modern Science, Technology, and Human values (3) Relationships of science and technology to human aspirations, values, and arts.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

S T S 102 (GS) Science, Technology and Public Policy (3) This course will survey the main issues that relate science and technology to public policy.
Effective: Summer 2010

S T S 105 (GHA) (FD SC 105) Food Facts and Fads (3) Impact on society and the individual of modern food technology, food laws, additives, etc.; historical, current, and futuristic aspects.
Effective: Spring 2004

S T S 107 (GH) (PHIL 107) Introduction to Philosophy of Technology (3) The character of technology; its relation to human values; philosophical assumptions in its development; and how it transforms the world.
Effective: Spring 2004

S T S 122 (GH) (HIST 122) History of Science I (3) A history of science and culture from Stonehenge to the scientific revolution.
Effective: Spring 2005

S T S 123 (GH) (HIST 123) History of Science II (3) A history of science and culture from the scientific revolution to the present.
Effective: Spring 2004

S T S 124 (GH;US;IL) (HIST 124) History of Western Medicine (3) This course explores the history of health, illness, and medicine in western society.
Effective: Summer 2008

S T S 130 World Food Problems (1-3) Critical examination of data sources, issues, and perspectives concerning contributions of science, technology, and society in resolving world food problems.
Effective: Spring 1991
S T S 130H World Food Problems (1-3) Critical examination of data sources, issues, and perspectives concerning contributions of science, technology, and society in resolving world food problems.
   Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

S T S 135 (GS) (PL SC 135) The Politics of the Ecological Crisis (3) The political implications of the increasing scarcity of many of the world's resources.
   Effective: Spring 2001

S T S 150 (GN:IL) (EM SC 150) Out of the Fiery Furnace (3) A history of materials, energy, and humans, with emphasis on their interrelationships. For nontechnical students.
   Effective: Spring 2006

S T S 151 (GS:US) (HIST 151) Technology and Society in American History (3) Development of technology in America from colonial times; its reception and its influence on social, economic, and political life.
   Effective: Spring 2006

S T S 151S (GS:US) (HIST 151S) Technology and Society in American History (3) Development of technology in America from colonial times; its reception and its influence on social, economic, and political life.
   Effective: Spring 2006

S T S 157 (US) (WMNST 157) Science, Technology, and Gender (3) The role of women and gender in science, technology, and engineering.
   Effective: Fall 2011 Future: Fall 2011

S T S 197 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.
   Effective: Fall 1992

   Effective: Spring 1995

   Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

   Effective: Summer 1999

S T S 201 (GN) Climate Change, Energy, and Biodiversity (3) Studies of global warming, energy options, and biodiversity; their interrelations as sciences and as societal issues.
   Effective: Summer 1994

S T S 201H (GN) Climate Change, Energy, and Biodiversity (3) Studies of global warming, energy options, and biodiversity; their interrelations as sciences and as societal issues.
   Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

S T S 202 (GHI:IL) Introduction to Disability Studies in the Humanities (3) Provides a humanities-based interdisciplinary introduction to Disability Studies.
   Effective: Summer 2008

S T S 230 (HIST 230, NUTR 230) American Food System: History, Technology, and Culture (3) A cultural analysis of the evolution of U.S. agricultural production and food consumption patterns, the food industry and food marketing.
   Effective: Spring 1991

S T S 233 (GH) (PHIL 233) Ethics and the Design of Technology (3) Ethics and individual and group decision-making in the design of technology including design projects and specific attention to institutional ethics.
   Effective: Spring 2004

S T S 235 (GH) Science and Religion (3) This course investigates the relationship between science and religion in multiple cultures.
   Effective: Spring 2009
   Prerequisite: completion of a basic composition course or the equivalent S T S 100 or S T S 101 or completion of 30 credits of coursework
STS 245 (GS:IL) Globalization, Technology, and Ethics (3) An investigation of technology and ethics in the globalized world from contemporary, socio-cultural, and historical perspectives.
Effective: Summer 2008

STS 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1992

STS 297 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1991

STS 297A Structure and Society (3) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest. Taught by Harry West.

STS 297B New Media Culture and Ethics (3) This course will examine ethical issues in managing online identity, privacy, ownership/piracy of content, authorship, copyright.

STS 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

STS 327 (R SOC 327) Society and Natural Resources (3) Analysis of the relationships between societal development and enhancement and natural resources.
Effective: Summer 1998 Ending: Summer 2011

STS 327 (R SOC 327) Natural Resources, Science, Ethics, and Society (3) The purpose of this course is to enable students to become competent critical thinkers about the state of natural resources through greater understanding of scientific, discourse formation, and the ethical dimensions of natural resources issues.
Effective: Fall 2011 Future: Fall 2011

Effective: Spring 1999
Prerequisite: 9 credits in philosophy including PHIL 107 or 6 credits of philosophy at the 200 level

STS 408 (COMM 408) Cultural Foundations of Communications (3) Examination of oral, scribal, print, industrial and electronic cultures; analysis of impact of technology on communications and social structure.
Effective: Spring 2009
Prerequisite: select 3 credits from COMM 100, COMM 110, COMM 118, COMM 150, COMM 180, COMM 251, COMM 260W, COMM 320, COMM 370 ; or 3 credits of S T S

STS 408H Cultural Foundations of Communications (3) Examination of oral, scribal, print, industrial and electronic cultures; analysis of impact of technology on communications and social structure.
Prerequisite: select 3 credits from COMM 100, COMM 110, COMM 118, COMM 150, COMM 180, COMM 251, COMM 260W, COMM 320, COMM 370 ; or 3 credits of S T S

STS 416 (US;IL) (AAA S 416, WMNST 416) Race, Gender and Science (3) The class will focus on race and gender as products of science, and how societal values shape scientific activity.
Effective: Summer 2008
Prerequisite: 6 credits in S T S WMNST or AAA S

STS 420 (EM SC 420, SOC 420) Energy and Modern Society (3) Technology and economics of energy resources, production, and consumption; environmental factors, exhaustion, new technology.
Effective: Spring 1991

STS 427W (CED 427W, SOC 427W) Society and Natural Resources (3) Analysis of the relationship between societal development and enhancement and natural resources.
Effective: Summer 2008
Prerequisite: R SOC 011 or SOC 001

STS 428 (IL) (HIST 428) The Darwinian Revolution (3) The origins and implications of evolutionary theory.
Effective: Spring 2006
Prerequisite: An introductory Science course and a history course.

STS 430 (IL) (NUTR 430) Global Food Strategies: Problems and Prospects for Reducing World Hunger (3) Technological, social, and political solutions to providing basic food needs; food resources, population, and the environment; current issues.
Effective: Summer 2005
S T S 432 (PHIL 432) Medical and Health Care Ethics (3) Examines ethical, political, and social issues in the research, implementation, and practice of medicine, medical technologies, and healthcare.
Effective: Fall 1998
Prerequisite: fifth-semester standing

S T S 433 (PHIL 433) Ethics in Science and Engineering (3) Ethical issues arising in the practice of science and engineering and their philosophical analysis.
Effective: Fall 1995

S T S 435 (PHIL 435) The Interrelation of Science, Philosophy, and Religion (3) The historical and transformative interactions between science and Western philosophical and religious views of nature, humanity, and God.
Effective: Spring 1996

S T S 457 (US;IL) (HIST 457, WMNST 457) The History of Women in Science (3) Critical analysis of the role women, gender, and minorities have played in the natural sciences.
Effective: Spring 2006 Ending: Summer 2011
Prerequisite: HIST 116, HIST 117, WMNST 001, WMNST 003 or WMNST 005

S T S 457 (US;IL) (WMNST 457, HIST 457) The History of Women in Science (3) Critical analysis of the role women, gender, and minorities have played in the natural sciences.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: HIST 116, HIST 117, WMNST 001, WMNST 003 or WMNST 157

S T S 460 (PL SC 460) Science, Technology, and Public Policy (3) The all-pervasive importance of science and technology policy in modern societies and mechanisms and processes by which it is made.
Effective: Spring 1995
Prerequisite: three credits in Natural Sciences or Engineering three credits in Social and Behavioral Sciences

S T S 470 Technology Assessment and Transfer (3) Nature of technology assessment and technology transfer in product design and development process from federal and university labs, and internationally.
Effective: Summer 1996

S T S 476 Technology and War (3) A survey and analysis of the interaction of technology, ethics, and warfare in the past and present society.
Effective: Summer 2007

S T S 490 Peace and Conflict Studies Seminar (3) Advanced study of major contemporary issues of peace and conflict; includes anthropological, technological, psychological, and economic perspectives.
Effective: Fall 1994
Prerequisite: PL SC 014, S T S 090

S T S 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1992

S T S 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

S T S 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1991

S T S 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1991

S T S 497A (ENGL 497B) Beng Humans (3) This course will examine conceptualizations of the human and the processes by which "the human" is defined.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

S T S 497G (NUTR 497G) Community Food Security (3) Through active learning, students explore how communities can reshape food systems, increasing access to wholesome food while increasing economic opportunities.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

S T S 498 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

The Pennsylvania State University
S T S 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM
Security & Risk Analy (SRA)

SRA 001S First-Year Seminar in Security and Risk Analysis (1) Provides introduction to the field of Security and Risk Analysis and assessments of key skills.
Effective: Summer 2006

SRA 111 (GS) Introduction to Security and Risk Analysis (3) This introductory course spans areas of security, risk, and analysis covering contexts in government agencies and business organizations.
Effective: Spring 2008

SRA 111H (GS) Introduction to Security and Risk Analysis (3) This introductory course spans areas of security, risk, and analysis covering contexts in government agencies and business organizations.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SRA 111H (GS) Introduction to Security and Risk Analysis (3) This introductory course spans areas of security, risk, and analysis covering contexts in government agencies and business organizations.

SRA 211 Threat of Terrorism and Crime (3) Provides overview of nature, scope, and seriousness of threats to security as a result of terrorism and crime.
Effective: Summer 2006
Prerequisite: SRA 111

SRA 221 Overview of Information Security (3) Provides an understanding of the overview of information security including security architecture, access control, and internet secure applications.
Effective: Summer 2006
Prerequisite: SRA 111, IST 110, CMPSC 101

SRA 231 Decision Theory and Analysis (3) Provides an overview of decision theoretical and analytical concepts and tools in the security risk analysis field.
Effective: Summer 2006
Prerequisite: SRA 211, STAT 200

SRA 311 Risk Management: Assessment and Mitigation (3) Assessment and mitigation of security vulnerabilities for people, organizations, industry sectors, and the nation.
Effective: Summer 2006
Prerequisite: SRA 231

SRA 321 The Role of Information and Intelligence (3) The Role of information and intelligence introduces students to the architecture and policies of the U.S. Intelligence Community (IC) and examines how U.S. intelligence policies and practices relate to overall U.S. foreign policy objectives and are influenced by today’s global environment and emerging technologies. The course examines the users and processes of IC, participants of Competitive Intelligence, and comparative intelligence communities.
Effective: Summer 2011
Prerequisite: SRA 111, SRA 211, SRA 231

SRA 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Future: Fall 2011

SRA 397A Crisis Informatics (3) We will examine how technologies have played a role in saving lives specifically technologies used toward emergency and disaster response.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SRA 433 Deception and Counterdeception (3) Deception tactics, technologies and procedures and approaches to counterdeception analysis.
Effective: Summer 2011
Prerequisite: SRA 211, SRA 221, SRA 231, SRA 311

SRA 468 Visual Analytics for Security Intelligence (3) Introduce visual analytic techniques for security informatics and intelligence. It covers analytical techniques on visualizing threats, risk, and vulnerability.
Effective: Spring 2008
Prerequisite: IST 110, SRA 111

SRA 471 Informatics, Risk, and the Post-Modern World (3) Provides in-depth study of how security informatics is influenced by the risk and post-modern culture.
Effective: Spring 2008
Prerequisite: IST 110, SRA 231

SRA 472 Integration of Privacy and Security (3) Exploration of technological, operational, organizational and regulatory issues related to maintenance of individual privacy, confidentiality of organizations, and information protection.
SRA 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2007

SRA 497A Statistical Analysis for Information Sciences (3) Intermediate-level statistics course emphasizing understanding hypothesis testing and experimental design, a broad array of statistical techniques applied to data analysis, and computer tools to support testing and analysis; specifically applied to information sciences and technology applications.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SRA 497A Statistical Analysis for Information Sciences (3) Intermediate-level statistics course emphasizing understanding hypothesis testing and experimental design, a broad array of statistical techniques applied to data analysis, and computer tools to support testing and analysis; specifically applied to information sciences and technology applications.

Slavic (SLAV)

SLAV 051 Elementary Intensive Slavic for Graduate Students I (3) Intensive introduction to a Slavic language: first half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural context.
Effective: Summer 2008
Prerequisite: graduate standing

SLAV 052 Elementary Intensive Slavic for Graduate Students II (3) Intensive introduction to a Slavic language: second half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural context.
Effective: Summer 2008
Prerequisite: SLAV 051 or equivalent and graduate standing

SLAV 053 Intermediate Intensive Slavic Language for Graduate Students (3) Continued intensive study of a Slavic language at the intermediate level: reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: SLAV 052 or equivalent and graduate standing

SLAV 099 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

SLAV 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1995

SLAV 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

SLAV 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

SLAV 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1983

SLAV 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1990

SLAV 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

SLAV 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor

SLAV 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

SLAV 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

SLAV 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

SLAV 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998

SLAV 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005
Social Science (SO SC)

SO SC 001 (GS) Urbanization (3) An overview of the social sciences, including an interdisciplinary analysis of the urban process.
Effective: Summer 1995

SO SC 297 Special Topics (1-9) Formal courses given infrequently to explore in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

SO SC 480W Quantitative Methods in the Social Sciences (4) Students will learn to conduct, analyze and write up quantitative social scientific research according to appropriate professional standards.
Effective: Spring 2008
Prerequisite: permission of program

SO SC 481 Qualitative Research Methods in the Social Sciences (4) Students will learn how to conduct, analyze and write up qualitative social research according to appropriate professional standards.
Effective: Spring 2008
Prerequisite: permission of program

SO SC 492 Current Topics in the Social Sciences (3) This course allows for various current topics to be offered as suitable to the needs of the program.
Effective: Spring 2008
Prerequisite: permission of program

SO SC 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2008

SO SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2008

Last Import from UCM: June 16, 2011 3:00 AM
Social Studies Education (SS ED)

SS ED 298 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

SS ED 298A American Heritage (3) Essentials of American Heritage with a focus on America's Founding for interpretative education applications.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SS ED 411 Teaching Secondary Social Studies I (3) Teaching social studies, including individual differences, curricular overview, application of learning theories, identification and measurement of learning outcomes.
Effective: Spring 1996 Ending: Summer 2011
Prerequisite: ANTH 045, C I 295, HIST 020, HIST 021, PL SC 001 ; 12 credits from history and/or geography and/or sociology and/or economics

SS ED 411 Teaching Secondary Social Studies I (3) Methods for teaching social studies in secondary grades; nature of social studies, content and learning outcomes, instructional strategies and planning.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: C I 295, ECON 104, GEOG 010, HIST 020, HIST 021, PL SC 001 ; plus 6 credits of other Option Requirements (Prescribed Courses Additions Courses Supporting Courses and Related Areas Concentration)

SS ED 412W Teaching Secondary Social Studies II (3) Writing-intensive course focusing on study of the social studies teacher's role in planning instruction; strategies for teaching.
Effective: Summer 2010
Prerequisite: SS ED 411 Concurrent: C I 412W

SS ED 430W Teaching Social Studies in the Elementary Grades (3) Principles underlying use of social studies in the elementary school; practical demonstration of desirable methods.
Effective: Spring 2007
Prerequisite: LL ED 400, LL ED 401, LL ED 402, PSYCH 212 nine credits in history and the social sciences Concurrent: C I 495A OR C I 495B ; MTHED 420 SCIED 458

SS ED 470 Issues in Social Studies Education (1-6) Concentration on particular issues, trends, and developments in the social studies.
Effective: Winter 1978
Prerequisite: Instructional I certificate and teaching experience

SS ED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

SS ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

SS ED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

SS ED 498A AP World History (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

SS ED 498B AP US History (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

SS ED 498C AP US Government and Politics (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

The Pennsylvania State University
Sociology (SOC)

SOC 001 (GS) Introductory Sociology (3) The nature and characteristics of human societies and social life. Students may take only one course for General Education credit from SOC 001 GS or R SOC 011 GS. Effective: Spring 2003

SOC 001S (GS) Introductory Sociology (3) The nature and characteristics of human societies and social life. Effective: Spring 2006

SOC 001W (GS) Introductory Sociology (3) The nature and characteristics of human societies and social life. Effective: Fall 1998

SOC 003 (GS) Introductory Social Psychology (3) The impact of the social environment on perception, attitudes, and behavior. Effective: Spring 2003

SOC 003H (GS) Honors Introduction to Social Psychology (3) This is an honors course that enables students to learn, apply, and evaluate basic social psychology concepts, theories, and research. Effective: Summer 2011

SOC 005 (GS) Social Problems (3) Current social problems such as economic, racial, and gender inequalities; social deviance and crime; population, environmental, energy, and health problems. Effective: Spring 2003

SOC 007 Introduction to Social Research (3) Fundamental concepts and problems in social science research; design, measurement, sampling, causation, validity, interpretation. Effective: Spring 2001

SOC 012 (GS) (CRIMJ 012, CRIM 012) Criminology (3) Explanations and measurement of crime; criminal law; characteristics of criminals and victims; violent, property, white-collar, organized, and sexual crimes. Effective: Spring 2008

SOC 012H (GS) (CRIM 012H) Criminology (3) Explanations and measurement of crime; criminal law; characteristics of criminals and victims; violent, property, white-collar, organized, and sexual crimes. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SOC 013 (GS) (CRIMJ 013) Juvenile Delinquency (3) Juvenile conduct, causes of delinquency, current methods of treatment; organization and function of agencies concerned with delinquency. Effective: Spring 2008

SOC 015 (GS) Urban Sociology (3) City growth and decline; impact of city life on individuals, families, neighborhoods, and government; urban life-styles. Effective: Summer 1995

SOC 023 (GS) Population and Policy Issues (3) Local, national, and international population trends; basic techniques of demographic analysis; population problems; implications for public planning and policy. Effective: Fall 2004

SOC 030 (GS) Sociology of the Family (3) Family structure and interaction; functions of the family as an institution; cross-cultural comparisons. Students may take only one course for General Education credit from SOC 030 or HD FS 129 GS. Effective: Spring 2003

The Pennsylvania State University
SOC 035 Sociology of Aging (3) Introduction to the sociological study of aging.
Effective: Spring 2000

SOC 047 (S T S 047) Wilderness, Technology, and Society (3) Impact of developments in science, literature, and art on changing attitudes toward nature; consequences for conservation, preservation, environmental ethics.
Effective: Fall 1983

SOC 055 (GS) Work in Modern Society (3) The nature of work in varied occupational and organizational settings; current trends and work life in the future.
Effective: Summer 1995

SOC 060 (GS;IL) (ANTH 060, J ST 060, PL SC 060) Society and Cultures in Modern Israel (3) An introduction to the society and cultures of the State of Israel from 1948 to the present.
Effective: Summer 2006

SOC 083S (GS) First-Year Seminar in Sociology (3) Critical approaches to issues in the structure of society.
Effective: Summer 1999

SOC 083T (GS) First-Year Seminar in Sociology (3) Critical approaches to issues in the structure of society.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SOC 103 (US) (AAA S 103, WMNST 103) Racism and Sexism (3) Critical analysis of the structure of race and gender inequality in the contemporary United States.
Effective: Summer 2005

SOC 109 Sociological Perspectives (3) Intensive and critical analysis of the bases of the social order, change, values, knowledge, and conflict.
Effective: Spring 2001

SOC 110 (GS;US) (WMNST 110) Sociology of Gender (3) Changing sex role expectations and behavior for men and women in contemporary society.
Effective: Summer 2005

SOC 119 (GS;US) Race and Ethnic Relations (4) Historical patterns and current status of racial and ethnic groups; inequality, competition, and conflict; social movements; government policy.
Effective: Summer 2005

SOC 174 Psychological and Sociological Aspects of Death (3) An introductory, interdisciplinary approach to the psychology and sociology of death, stressing the significance of, and attitudes toward, mortality.
Effective: Spring 2001

SOC 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1995

SOC 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2010

SOC 207 Research Methods in Sociology (3) Experiential-based course covering the four main social research methods: available data, survey research, experiments, and field research.
Effective: Spring 2001
Prerequisite: 3 credits in Sociology

SOC 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

SOC 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which will fall outside the scope of formal courses.
Effective: Fall 1983

SOC 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983
SOC 298 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Spring 1995

SOC 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

SOC 300 Preceptorship in Sociology (1-8, maximum of 4 per semester) Supervised experience as a teaching assistant under the supervision of an approved faculty member.
Effective: Spring 2003
Prerequisite: 3 credits in course work related to the subject of the course

SOC 309 Sociology of Health (3) Sociological concepts and principles operative in public and private areas of health and illness, including cultural, ethnic, and ecological factors.
Effective: Spring 2001
Prerequisite: 3 credits in Sociology

SOC 381H Junior Honors Seminar in Sociology (1) Supervised experience in planning the honors thesis and a sociological career.
Effective: Spring 1999
Prerequisite: sociology major junior standing and admission to the Schreyer Honors College

SOC 395 Internship (1-6) Supervised off-campus, non-group instruction including individual field experiences, practicums or internships. Written and oral critique of activity required.
Effective: Fall 1981
Prerequisite: prior approval of proposed assignment by instructor

SOC 400W Senior Research Seminar (3) Major concepts and principles of sociology through reading, data analysis, and writing. Capstone course for senior Sociology majors.
Effective: Fall 2001
Prerequisite: SOC 470

SOC 403 Advanced Social Psychology (3) Analysis of the major theoretical approaches and research findings of contemporary social psychology.
Effective: Fall 1983
Prerequisite: SOC 003

SOC 404 Social Influence and Small Groups (3) The study of social influence, leadership and status, and social cohesion and commitment processes in small groups.
Effective: Spring 2007
Prerequisite: SOC 003 or PSYCH 420

SOC 405 Sociological Theory (3) Overview of the development of sociological theory; current issues and controversies.
Effective: Spring 2001
Prerequisite: 3 credits in the Sociology

SOC 406 (CRIMJ 406, CRIM 406) Sociology of Deviance (3) Theory and research concerning deviant behaviors and lifestyles viewed as significant departures from a group's normative expectations.
Effective: Spring 2008
Prerequisite: SOC 012, SOC 013 or SOC 005 or permission of program

SOC 408 Urban Ecology (3) Spatial and temporal aspects of urban structure; urban growth, neighborhoods, racial and ethnic groups, mental illness; cross-cultural perspectives.
Effective: Fall 1983
Prerequisite: 3 credits in sociology

SOC 409 (US) (AAA S 409) Racial and Ethnic Inequality in America (3) The impact of inequality and discrimination on individual and group identity among various racial and ethnic groups.
Effective: Summer 2005
Prerequisite: 3 credits in Sociology

SOC 411 (US) (HD FS 416) Racial and Ethnic Diversity and the American Family (3) This course will explore the nature and determinants of racial and ethnic variation in family processes in the United States.
Effective: Spring 2005
Prerequisite: 3 credits in sociology

SOC 412 (CRIMJ 412, CRIM 412) Crime, Social Control, and the Legal System (3) Legal and extralegal control; public opinion on crime; criminal justice and correctional processes; legal sanctions; control strategies. Field trip.
Effective: Spring 2008
Prerequisite: SOC 012, SOC 013 or SOC 005

SOC 413 (CRIM 413, CRIMJ 413) Advanced Criminological Theory (3) This course provides an in-depth look at theories of crime and examines influential empirical studies designed to these theories.
Effective: Spring 2008
Prerequisite: SOC 012, CRIMJ 250W

SOC 414 (CRIMJ 414, CRIM 414) Criminal Careers and the Organization of Crime (3) Research on and theory of criminal
careers and crime organizations, emphasizing recruitment and disengagement; offender characteristics and life- styles; policy implications.  
Effect: Spring 2008  
Prerequisite: SOC 012, SOC 013 or SOC 005

SOC 416 (US)  
Sociology of Education (3)  
The theoretical, conceptual, and descriptive contributions of sociology to education.  
Effect: Spring 2006  
Prerequisite: 3 credits in Sociology

SOC 419 (US)  
Race and Public Policy (3)  
Seminar format course in which sociological theory and research are applied to current race policy issues.  
Effect: Spring 2006  
Prerequisite: 3 credits in Sociology

SOC 420 (EM SC 420, S T S 420)  
Energy and Modern Society (3)  
Technology and economics of energy resources, production, and consumption; environmental factors, exhaustion, new technology.  
Effect: Spring 2001  
Prerequisite: 3 credits in Sociology

SOC 422  
World Population Diversity (3)  
Survey of world diversity in national population growth/composition; the impacts of demographic change on the economic/social life of nations/people.  
Effect: Spring 2001  
Prerequisite: 3 credits in Sociology

SOC 423  
Social Demography (3)  
Social demographic perspectives on fertility, mortality, morbidity, migration, population density, demographic transitions, social mobility, family, the aged, and minorities.  
Effect: Spring 2001  
Prerequisite: SOC 023 or SOC 422

SOC 424  
Social Change (3)  
Critical review of classical and recent theories of social change, emphasizing the transformations occurring in the modern world.  
Effective: Fall 1983  
Prerequisite: 3 credits in sociology

SOC 425  
Social Conflict (3)  
An analysis of the variables affecting intergroup and international conflict and cooperation.  
Effect: Fall 2007  
Prerequisite: general behavioral science general psychology or general sociology

SOC 427W (CED 427W, S T S 427W)  
Society and Natural Resources (3)  
Analysis of the relationships between societal development and enhancement and natural resources.  
Effective: Summer 2008  
Prerequisite: R SOC 011 or SOC 001

SOC 428  
Homelessness in America (3)  
Survey of social science research on homelessness in the contemporary United States.  
Effective: Spring 2001  
Prerequisite: 3 credits in Sociology

SOC 428H  
Homelessness in America (3)  
Survey of social science research on homelessness in the contemporary United States.  
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011  
Prerequisite: 3 credits in Sociology

SOC 429  
Social Stratification (3)  
Structure and dynamics of class, caste, and status systems; class differentials and social mobility; current theoretical and methodological issues.  
Effective: Winter 1978  
Prerequisite: 3 credits in sociology

SOC 430  
Family in Cross-Cultural Perspective (3)  
Sociological analysis of family systems in various cultures and subcultures.  
Effective: Spring 2001  
Prerequisite: 3 credits in Sociology

SOC 431 (HD FS 431)  
Family Disorganization: Stress Points in the Contemporary Family (3)  
Focuses on divorce, remarriage, incest, family violence as well as problems associated with family formation and parent-child relations.  
Effective: Spring 1994  
Prerequisite: 6 credits of human development and family studies psychology or sociology

SOC 432  
Social Movements (3)  
Why and how people mobilize to promote or retard social change. Factors predicting success or failure of social movements.  
Effective: Fall 1983  
Prerequisite: 3 credits in sociology

SOC 435 (HD FS 434)  
Perspectives on Aging (3)  
An analysis of the demographic, social, and cultural factors affecting the aged population in American society.  
Effective: Fall 2007  
Prerequisite: 3 credits in Sociology

SOC 440 (HD FS 440)  
Family Policy (3)  
An in-depth examination of family policy.  
Effective: Spring 2007

The Pennsylvania State University
Prerequisite: 3 credits of SOC or HD FS

SOC 440H Family Policy (3) An in-depth examination of family policy.
Prerequisite: 3 credits of SOC or HD FS

SOC 446 Political Sociology (3) Sociological analysis of types of political organization and their relations with other elements of social life.
Effective: Winter 1978
Prerequisite: 3 credits in sociology

SOC 448 Environmental Sociology (3) Examination of the relationship between the physical environment and society.
Effective: Fall 2007
Prerequisite: 60 credits at least 9 of which are in the social sciences graduate status or permission of the program

SOC 449 Environmental Movements (3) Comparative exploration of environmental movements within the context of classical and new social movement theory.
Effective: Fall 2007
Prerequisite: 90 credits at least 9 of which are in the social sciences or which include SOCIO/CMPSY 470 graduate status or permission of the program

SOC 450 Justice and the Environment (3) Considers notions of justice in relation to environmental philosophy, environmental movements, and general environmental concerns.
Effective: Fall 2007
Prerequisite: 90 credits graduate status or permission of the program

SOC 454 (US) The City in Postindustrial Society (3) Postindustrial social organization in the United States and Europe; consequences for metropolitan social stratification, community power, and environmental quality.
Effective: Spring 2006
Prerequisite: 3 credits in Sociology

SOC 455 Work and Occupations (3) Work and occupational life in modern society; work in the past, present, and future.
Effective: Fall 1983
Prerequisite: 3 credits in sociology

SOC 456 (WMNST 456) Gender, Occupations, and Professions (3) The role of gender in shaping contemporary North American patterns of employment, occupational roles, and statuses.
Effective: Spring 2001
Prerequisite: WMNST 001 or 3 credits in Sociology

SOC 457 (US;IL) (ANTH 457, J ST 457) Jewish Communities: Identity, Survival, and Transformation in Unexpected Places (3) Examines the global array of smaller Jewish communities that have flourished outside the main urban centers of Jewish settlement.
Effective: Summer 2006
Prerequisite: ANTH 001 or ANTH 045, HEBR 010, J ST 010, SOC 001, SOC 005, SOC 007, SOC 015

SOC 461 (US;IL) (RL ST 461) Sociology of Religion (3) Contemporary religion in the United States: beliefs, structure, and function of major denominations and religious cults.
Effective: Spring 2006
Prerequisite: 3 credits in sociology or religious studies

SOC 467 (CRIM 467, CRIMJ 467) Law and Society (3) Law and society studies the social origins of law and legal systems; occupational careers, and decision-making of legal officials.
Effective: Spring 2008
Prerequisite: CRIMJ 100 or CRIMJ 113 or permission of program

SOC 468 Mood-Altering Substances in Society (3) Perspectives of cultures throughout the world toward mood-altering substances are reviewed in light of public policy, benefits, and problems.
Effective: Fall 2007

SOC 469 Techniques in Small Group Facilitation (1-4 per semester/maximum of 12) This course is the training course for students working as facilitators with the Race Relations Project.
Effective: Summer 2010
Prerequisite: SOC 119 and SOC 300

SOC 470 Intermediate Social Statistics (4) Descriptive and inferential statistics in social research: central tendency and variation, normal distribution, measures of association, confidence intervals, hypothesis testing.
Effective: Fall 2001
Prerequisite: SOC 207

SOC 471 Qualitative Research Methods in Sociology (3) Theory, methods, and practice of qualitative data collection, including observation, participant observation, interviewing; supervised projects in natural settings.
Effective: Spring 2001
Prerequisite: 3 credits in Sociology

SOC 481H Senior Honors Seminar in Sociology (1) Supervised experience in planning and writing the honors thesis.
Effective: Spring 1999
Prerequisite: sociology major senior standing and admission to the Schreyer Honors College

SOC 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or

The Pennsylvania State University
SOC 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.  
Effective: Summer 1994

SOC 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.  
Effective: Spring 2000  
Prerequisite: prior approval of proposed assignment by instructor

SOC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.  
Effective: Fall 1983

SOC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.  
Effective: Fall 1983

SOC 499 (IL) Foreign Study--Sociology (2-6) Study, in selected foreign countries, of groups, institutions, and social problems.  
Effective: Summer 2005  
Prerequisite: 3 credits in Sociology

Last Import from UCM: June 16, 2011 3:00 AM
Sociology-CI (SOCIO)

SOCIO 476 Sociology of Science and Technology (3) Examines the constitutive relationship between society, science and technology and ethical concerns arising from these relationships. Effective: Spring 2003
Prerequisite: 60 credits at least 6 of which are in the social sciences or graduate status or permission of the program

Last Import from UCM: June 16, 2011 3:00 AM
Software Engineering (SWENG)

SWENG 295 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Spring 2008 Prerequisite: prior approval of proposed assignment by instructor

SWENG 311 Object-Oriented Software Design and Construction (3) Design, documentation, testing, and construction of software using software engineering strategies embodied in object-oriented programming languages. Effective: Spring 2008 Prerequisite: CMPSC 122

SWENG 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Effective: Spring 2008 Prerequisite: prior approval of proposed assignment by instructor

SWENG 396 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Summer 2010 Prerequisite: prior approval of proposed assignment by instructor

SWENG 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Summer 2010

SWENG 397A Technical Game Development (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SWENG 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2010

SWENG 400 Introduction to Software Engineering Studio (3) Provides an introduction to the principles of software engineering and includes complementary instruction in one programming language. Effective: Summer 1999 Prerequisite: senior standing or above

SWENG 411 Software Engineering (3) Software engineering principles including life cycle, dependability, process modeling, project management, requires specification, design analysis, implementation, testing, and maintenance. Effective: Spring 2008 Prerequisite: CMPSC 122 Concurrent: SWENG 311

SWENG 421 Software Architecture (3) The analysis and design of software systems using canonical design patterns. Effective: Summer 2008 Prerequisite: SWENG 411

SWENG 431 Software Verification, Validation, and Testing (3) Introduction to methods of software verification, validation, and testing; mathematical foundations of testing, reliability models; statistical testing. Effective: Spring 2008 Prerequisite: SWENG 411; STAT 301

SWENG 452W Embedded Real Time Systems (3) The design and implementation of real time systems. Effective: Summer 2008 Prerequisite: CMPSC 472 or CMPSC 473 or CMPEN 441

SWENG 465 Web Services (3) This course introduces the students to a contemporary computing paradigm called "service-oriented computing." Effective: Spring 2011 Prerequisite: SWENG 311 or CMPSC 221

SWENG 480 Software Engineering Design (3) Concepts of engineering ethics, economy, and project management, senior capstone project selection, and technical communication skills. Effective: Spring 2009 Prerequisite: SWENG 431

SWENG 481 Software Engineering Project (3) Capstone group design projects in software engineering. Effective: Spring 2008 Prerequisite: SWENG 480

SWENG 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis. Effective: Summer 2010
SWENG 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008
Prerequisite: prior approval of proposed assignment by instructor

SWENG 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2010

SWENG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1999

SWENG 497A Software Integration (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

SWENG 497B Software Documentation (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

SWENG 497C Human Computer Interface (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

SWENG 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2010

Last Import from UCM: June 16, 2011 3:00 AM
Soil Science (SOILS)

SOILS 071 (GN:IL) Environmental Sustainability (3) An introduction to environmental science, exploring sustainable human-environment interactions with examples from environmental soil science.
Effective: Spring 2007

SOILS 100 Soil Judging (1 per semester/maximum of 3) Techniques of describing soil properties, classifying soils taxonomically, land use interpretations based on soil characteristics. Extensive field examination of soils.
Effective: Summer 1990 Ending: Fall 2011

SOILS 101 (GN) Introductory Soil Science (3) A study of soil properties and processes and relationships to land use, plant growth, environmental quality, and society.
Effective: Spring 2011

SOILS 102 Introductory Soil Science Laboratory (1) Laboratory exercise and field trips designed to develop student competency in soil description, analysis, and assessment.
Effective: Summer 2010
Prerequisite: SOILS 101 Concurrent: SOILS 101

SOILS 190 Professional Development in Environmental Soil Science (1) Development of learning goals and an introduction to faculty and alumni contacts, student portfolios, the senior thesis, and internship opportunities.
Effective: Summer 1999

SOILS 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2006

SOILS 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2006

SOILS 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2007

SOILS 397A Chemistry in the Environment: Soil, Water, and Air (3) A global perspective to the chemical principles, composition and processes that operate within and between soil, water, and air environments.

SOILS 401 Soil Composition and Physical Properties (3) Advanced study of mineralogical and physical properties of soils which affect soil-plant-water relationships.
Effective: Spring 2001
Prerequisite: SOILS 101

SOILS 402 Soil Nutrient Behavior and Management (3) Chemical and biological behavior of soil nutrients; management for plant availability and fate in the environment. Laboratory emphasizes soil testing and soil-plant relationships.
Effective: Spring 2009
Prerequisite: CHEM 112, SOILS 101

SOILS 403 Soil Morphology Practicum (2 per semester/maximum of 4) Students develop field skills to describe soil morphology, classify soils, and make land use interpretations.
Effective: Spring 2011
Prerequisite: SOILS 101 or equivalent

SOILS 404 Urban Soils (3) This course introduces the student to natural and human-influenced soils.
Effective: Summer 2010
Prerequisite: SOILS 101

SOILS 405 (GEOC 405) Hydropedology (3) Soil and water interactions across scales, integrated studies of landscape-soil-water relationships, fundamental processes of water flow and chemical transport.
Effective: Spring 2008
Prerequisite: SOILS 101

SOILS 412W Soil Ecology (3) Introduction to soil organisms; includes interactions between organisms, their processes, and metabolism with a major focus on microorganisms.
Effective: Spring 2008
Prerequisite: BIOL 011, BIOL 127 or BIOL 110

SOILS 416 Soil Genesis and Classification (3) Pedological evolution, classification, and world distribution of soils.
SOILS 416 Soil Genesis, Classification, and Mapping (4) Lecture and laboratory course on the genesis of soils, their classification, mapping, and interpretation for land use.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: SOILS 101

Effective: Summer 2003

SOILS 419 (GEOSC 418) Soil Environmental Chemistry (3) Introduction to chemical constituents and processes occurring in soils. Topics include mineral weathering, soil solution chemistry and adsorption of solutes.
Effective: Summer 2007
Prerequisite: CHEM 112

SOILS 420 Remediation of Contaminated Soils (3) Basic principles and technical aspects of remediation of contaminated soils.
Effective: Summer 2007
Prerequisite: CHEM 112

SOILS 422 Natural Resources Conservation and Community Sustainability (3) Conservation, land-use, and community (soil, water, air, plants, animals, and humans) impacting quality of life and sense of place.
Effective: Spring 2006
Prerequisite: SOILS 101

SOILS 450 Environmental Geographic Information Systems (3) Use of geographic information systems (GIS) and digital spatial databases to characterize landscapes for environmental assessment and management.
Effective: Summer 1999
Prerequisite: SOILS 101

SOILS 489 Supervised Experience in College Teaching (1-3) Participate with instructors in teaching an undergraduate soil science course: assist with teaching and evaluation and with development of instructional materials.
Effective: Summer 1993
Prerequisite: SOILS 101 approval of instructor

SOILS 490 (AGRO 490) Colloquium (1) Continuing written and oral presentations developed by students in consultation with the course instructor.
Effective: Fall 1993
Prerequisite: seventh-semester standing

SOILS 494 Senior Thesis (1-6) Supervised data collection and analysis on a topic of interest to the student culminating in a formal thesis.
Effective: Spring 2000
Prerequisite: permission of the course coordinator

SOILS 494H Senior Thesis (1-6) Supervised data collection and analysis on a topic of interest to the student culminating in a formal thesis.
Effective: Fall 2007
Prerequisite: permission of the course coordinator

SOILS 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1990
Prerequisite: prior approval of proposed assignment by instructor

SOILS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1990

SOILS 497 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1990

Last Import from UCM: June 16, 2011 3:00 AM
Spanish (SPAN)

SPAN 001 Elementary Spanish I (4) Audio-lingual approach to basic Spanish; writing. Students who have received high school credit for two or more years of Spanish may not schedule this course for credit, without the permission of the department.
Effective: Fall 1985

SPAN 001H Elementary Spanish I (4) Audio-lingual approach to basic Spanish; writing. Students who have received high school credit for two or more years of Spanish may not schedule this course for credit, without the permission of the department.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SPAN 002 Elementary Spanish II (4) Audio-lingual approach to basic Spanish continued; writing. Students who have received high school credit for four years of Spanish may not schedule this course for credit, without the permission of the department.
Effective: Fall 1985
Prerequisite: SPAN 001

SPAN 002H Elementary Spanish II (4) Audio-lingual approach to basic Spanish continued; writing. Students who have received high school credit for four years of Spanish may not schedule this course for credit, without the permission of the department.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: SPAN 001

SPAN 003 Intermediate Spanish (4) Audio-lingual review of structure; writing; reading.
Effective: Fall 1985
Prerequisite: SPAN 002

SPAN 010 Intensive Spanish (6) Basic Spanish grammar, oral, aural, and writing skills (essentially equivalent to SPAN 001 and first half of SPAN 002).
Effective: Fall 1988

SPAN 020 Intensive Spanish (6) Basic and intermediate Spanish grammar, oral, aural, and writing skills (essentially equivalent to second half of SPAN 002 and all of SPAN 003).
Effective: Fall 1988
Prerequisite: SPAN 010

SPAN 051 Elementary Intensive Spanish for Graduate Students I (3) Intensive introduction to Spanish: first half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: graduate standing

SPAN 052 Elementary Intensive Spanish for Graduate Students II (3) Intensive introduction to Spanish: second half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: SPAN 051 or equivalent and graduate standing

SPAN 053 Intermediate Intensive Spanish for Graduate Students (3) Continued intensive study of Spanish at the intermediate level: reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: SPAN 052 or equivalent and graduate standing

SPAN 083S (GH;IL) First-Year Seminar in Hispanic Literatures and Cultures (3) Introduction to the study of Hispanic literatures and cultures.
Effective: Summer 2005

SPAN 083T (GH;IL) First-Year Seminar in Hispanic Literatures and Cultures (3) Introduction to the study of Hispanic literatures and cultures.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SPAN 099 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

SPAN 100 Intermediate Grammar and Composition (3) An intermediate level grammar review that also incorporates directed and original composition exercises.
Effective: Summer 1996
Prerequisite: SPAN 003 or placement

SPAN 100A Intermediate Grammar and Composition for Spanish Bilinguals (3) A review of grammar and practice with composition focusing on needs and problems specific to Spanish-speaking bilinguals.
Effective: Spring 1996
Prerequisite: placement

SPAN 105 **Spanish for Students in the field of Agricultural Sciences** (4) Develop communication skills and cultural awareness to assist and work with Hispanics whose first and sometimes only language is Spanish.
Effective: Spring 2004

SPAN 106 **Spanish for the Agricultural Industries** (4) Further development of the communication skills and the cultural awareness needed to assist and work with Spanish speaking employees in the agricultural industries.
Effective: Summer 2008
Prerequisite: SPAN 105

SPAN 110 **Intermediate Conversation** (3) Practice in oral expression in Spanish, with emphasis on aural comprehension, idiomatic usage, and fluency. Use of journalistic materials.
Effective: Winter 1978
Prerequisite: SPAN 003 or placement

SPAN 120 **Intermediate Reading** (3) Emphasis on rapid reading comprehension. Selected readings from contemporary Hispanic literature, social sciences, current events, etc.
Effective: Winter 1978
Prerequisite: SPAN 003 or placement

SPAN 130 (GH;IL) **Iberian Civilization** (3) Spanish and Portuguese life from the medieval period to the present; literature, the arts, and contemporary problems in historical perspective.
Effective: Spring 2006

SPAN 131 (GH;US;IL) **Ibero-American Civilization** (3) Spanish American and Brazilian life from the Conquest to the present; literature, art, the indigenous heritage, and contemporary problems.
Effective: Summer 2005

SPAN 131Y (GH;US;IL) **Ibero-American Civilization** (3) Spanish American and Brazilian life from the Conquest to the present; literature, art, the indigenous heritage, and contemporary problems.
Effective: Summer 2005

Effective: Summer 2005

SPAN 197 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1995

SPAN 199 (IL) **Foreign Study--Beginning Conversational Spanish** (3) Grammar review and practice in oral expression and aural comprehension.
Effective: Summer 2005

SPAN 200 **Intensive Grammar and Composition** (3) Intensive grammar review; composition. Designed primarily for majors and prospective majors.
Effective: Spring 2001
Prerequisite: SPAN 100 or by placement

SPAN 210 **Readings in Iberian Civilization** (3) Intermediate level Spanish readings dealing with Iberian life from pre-historic times to the present.
Effective: Spring 1993
Prerequisite: SPAN 200

SPAN 215 **Introduction to Spanish Linguistics** (3) Introduction to the fundamental components of linguistics using data from the Spanish language.
Effective: Summer 2006
Prerequisite: SPAN 100

SPAN 220 **Readings in Ibero-American Civilization** (3) Intermediate level Spanish readings dealing with Ibero-American life from the pre-conquest to the present.
Effective: Spring 1992
Prerequisite: SPAN 200

SPAN 230 (GH) **Masterpieces of Spanish Literature in English Translation** (3) Study of works and authors of international importance; lectures, readings, and written works in English.
Effective: Spring 2003

SPAN 231 (GH;IL) **Masterpieces of Spanish American Literature in English Translation** (3) Emphasis on works and authors of international importance. Lectures, readings, and written work in English.
Effective: Summer 2005
SPAN 253W Introduction to Hispanic Literature (3) Introduction to generic distinctions, critical methods, and approaches to Hispanic literature.
Effective: Spring 2008
Prerequisite: SPAN 100 and SPAN 110

SPAN 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

SPAN 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

SPAN 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

SPAN 297A Entre Mundos: Experiencias "latinas" en/de Estados Unidos (3) This course examines U.S. Latino culture from the 19th through the 21st centuries. We will study narratives, music and films which reflect the immigrant experience of Latinos in the United States.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SPAN 297B Contemporary Latin American Cinema (3) This course explores Latin American cultures through the study of films of the past quarter of a century. SPAN 297A is a fourth-semester language course for students who have completed the equivalent of three semesters of Spanish at the University level.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SPAN 299 (IL) Foreign Study--Intermediate Conversational Spanish (3) Grammar review and practice in oral expression and aural comprehension.
Effective: Summer 2005

SPAN 300 Advanced Grammar and Composition Through Reading (3) Development of advanced grammar and composition skills through reading texts by native speakers and adapting their techniques for original compositions.
Effective: Spring 2008
Prerequisite: SPAN 100 and SPAN 110

SPAN 301 Advanced Writing and Stylistics in Spanish for Spanish Speakers (3) This course will enhance writing proficiency in Spanish of Spanish speaking students by targeting common problems characteristic of Spanish speakers.
Effective: Spring 2008
Prerequisite: SPAN 100A

SPAN 305 Spanish for Social Services (3) Practical Spanish for social workers, medical personnel, law enforcement officers, etc.; emphasis on Puerto Rican vocabulary, idiom, and pronunciation.
Effective: Spring 2001
Prerequisite: SPAN 200

SPAN 315 (GH; US) (LNST 315) Spanish and Spanish-speakers in the U.S. (3) In this course, we investigate various aspects of the language(s) and language behaviors of U.S. Latinos.
Effective: Summer 2006

SPAN 326 (GH; US) Reading the Border/Lands (3) This course examines representations of the U.S.-Mexico border in relation to the actual geographic space.
Effective: Summer 2011

SPAN 353 Survey of Spanish Literature before 1700 (3) Selected major works of prose, poetry, and drama from the Middle Ages to the end of the seventeenth century.
Effective: Spring 2008
Prerequisite: SPAN 253W

SPAN 354 Survey of Spanish Literature Since 1700 (3) Selected major works of prose, poetry, and drama from the eighteenth century to the present.
Effective: Spring 2008
Prerequisite: SPAN 253W

SPAN 355 Survey of Spanish American Literature through "Modernismo" (3) Selected major works of prose, poetry, and drama from the discovery through "modernismo".
Effective: Spring 2008
Prerequisite: SPAN 253W

SPAN 356 Survey of Spanish American Literature after "Modernismo" (3) Historical survey of the major figures and periods in Spanish American literature after "modernismo".
Effective: Spring 2008

The Pennsylvania State University
Prerequisite: SPAN 253W
SPAN 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor

SPAN 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1999

SPAN 399 (IL) Foreign Study--Spanish (1-12) Advanced training in Spanish language skills.
Effective: Summer 2005
Prerequisite: SPAN 003

SPAN 410 Advanced Oral Expression and Communication (3) Emphasis on achieving practical command of spoken Spanish and the comprehension of native speech. Use of journalistic materials.
Effective: Fall 1995
Prerequisite: SPAN 200

SPAN 412 Translation (3) Techniques of oral and written translation from Spanish to English and vice versa, particularly for business, literature, and social work.
Effective: Spring 2008
Prerequisite: SPAN 300

SPAN 414 Spanish Phonology (3) Spanish phonetics and phonemics; systematic means of correcting pronunciation defects; other audio-lingual applications.
Effective: Spring 2001
Prerequisite: SPAN 200

SPAN 415 Spanish Morphology and Syntax (3) The Spanish grammatical system; analysis of morphemic units and their organization into syntactic structures.
Effective: Spring 2001
Prerequisite: SPAN 200

SPAN 418 The Evolution of Spanish (3) The emergence and development of the sounds and forms of Spanish.
Effective: Spring 1995
Prerequisite: SPAN 414

SPAN 420 Spanish for Business and International Trade (3) Introduction to the Spanish of international business and to the social and cultural norms of negotiation in Spanish-speaking countries.
Effective: Spring 2008
Prerequisite: SPAN 300

SPAN 439 Don Quijote (3) Thorough study of the masterpiece, including its sources, genesis, language, style, success, and influence.
Effective: Spring 2008
Prerequisite: SPAN 300

SPAN 440 Teaching of Romance Languages (3) Theories of second language acquisition. Current classroom practices in the teaching of Romance languages.
Effective: Spring 2001
Prerequisite: SPAN 200

SPAN 472 The Contemporary Spanish American Novel (3) The regionalist and social novel since 1910, together with the social background.
Effective: Spring 2008
Prerequisite: SPAN 300, SPAN 354

SPAN 476 Masterpieces of Spanish American Literature (3) Reading, analysis, and discussion of selected major works representative of Spanish American prose and poetry.
Effective: Spring 2006
Prerequisite: SPAN 253W, SPAN 300

SPAN 490 Masterpieces of Spanish Prose (3) Reading, analysis, and discussion of selected masterpieces of Spanish novels, short stories, etc.
Effective: Spring 2008
Prerequisite: SPAN 253W, SPAN 300

SPAN 491 Masterpieces of Spanish Drama and Poetry (3) Reading, analysis, and discussion of selected masterpieces of Spanish drama and poetry.
Effective: Spring 2008
Prerequisite: SPAN 253W, SPAN 300

SPAN 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

SPAN 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or
SPAN 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

SPAN 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

SPAN 499 (IL) Foreign Study--Spanish (1-12) Contemporary Spanish life and civilization. Emphasis on post-Civil War period: literature, arts, and sociopolitical problems.
Effective: Summer 2005
Prerequisite: SPAN 100, SPAN 110 or SPAN 120

Last Import from UCM: June 16, 2011 3:00 AM
Special Education (SPLED)

SPLED 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1990

SPLED 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1990

SPLED 298 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

SPLED 395W Observing in Exceptional Settings (3) Observations of exceptional persons and techniques used by their teachers in a variety of settings, e.g., school, day care, vocational.
Effective: Summer 1997
Prerequisite: EDPSY 101 . PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check. (Forms: 228 Chambers) Concurrent: SPLED 425

SPLED 400 Inclusive Special Ed Foundations: Legal, Characteristics, Collaboration, Assessment, and Management (4)
Legal issues, learner characteristics, collaboration skills, assessment, and behavior management related to educating students with disability in inclusive settings.
Effective: Spring 2010
Prerequisite: EDPSY 014 and EDPSY 010 or relevant child development course (e.g. HD FS 229 HD FS 239). Fifth semester standing or higher

SPLED 400H Inclusive Special Ed Foundations: Legal, Characteristics, Collaboration, Assessment, and Management (4)
Legal issues, learner characteristics, collaboration skills, assessment, and behavior management related to educating students with disability in inclusive settings.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: EDPSY 014 and EDPSY 010 or relevant child development course (e.g. HD FS 229 HD FS 239). Fifth semester standing or higher

SPLED 401 Motivating Exceptional Learners (4) Group and individual techniques to promote student task engagement and prosocial behavior.
Effective: Spring 2001
Prerequisite: or concurrent: a grade of C or better required in SPLED 395W

SPLED 402 Human Rights: Historical and Current Issues in Special Education (3) Litigation, legislation, regulation, and advocacy issues impacting on educational and related services for individuals with academic and/or physical disabilities.
Effective: Fall 2001
Prerequisite: or concurrent: SPLED 400 or SPLED 425

SPLED 403A Evidence-Based Instruction for Elementary Students with Disabilities in Reading, Math, and Writing (3)
Evidence-based methods for design, delivery, and adaption of instruction for elementary students with disabilities in reading, mathematics, and writing.
Effective: Summer 2009
Prerequisite: SPLED 400

SPLED 403B Evidence-Based Methods for Teaching Secondary Students with Disabilities in Inclusive Settings (3)
Evidence-based methods for designing, delivering, and adapting instruction for students with disabilities in inclusive secondary education settings.
Effective: Summer 2009
Prerequisite: SPLED 400

SPLED 404 Working with Families and Professionals in Special Education (3) Strategies for productive interactions between special educators and others such as colleagues, employers, parents, service providers, professionals, and students.
Effective: Spring 1997
Prerequisite: or concurrent: a grade of C or better required in SPLED 425

SPLED 408 (EDPSY 408) Meeting Instructional Needs of English Language Learners with Special Needs (3) The course content and activities focus on instruction and assessment for English Language Learners with special needs.
Effective: Spring 2011
Prerequisite: EDPSY 010, EDPSY 014 Prerequisite or concurrent: SPLED 395W, SPLED 425

SPLED 409A Fundamental Literacy Skills for Students with Special Needs (3) Effective reading curriculum and teaching methods to teach students with special needs.
Effective: Summer 2006
Prerequisite: A grade of C or better required in SPLED 425, SPLED 395W, SPLED 401, SPLED 412, SPLED 454, SPLED 495E Concurrent: SPLED 495G

SPLED 409B Writing and Content Literacy for Students with Special Needs (3) Effective curriculum and materials for

The Pennsylvania State University
teaching writing and content literacy to students with special needs.
Effective: Summer 2006
Prerequisite: a grade of C or better required in SPLED 425, SPLED 395W, SPLED 401, SPLED 409A, SPLED 412, SPLED 454, SPLED 495E Concurrent: SPLED 495G

SPLED 409C Mathematics Instruction for Students with Special Needs (3) Research-based practices for teaching mathematics skills to students with special needs.
Effective: Summer 2006
Prerequisite: a grade of C or better required in SPLED 425, SPLED 395W, SPLED 401, SPLED 409A, SPLED 412, SPLED 454, SPLED 495E Concurrent: SPLED 495G

SPLED 411 Intervention for Students with Severe Disabilities (3) Assessment, teaching strategies, curricula, materials, and assistive techniques for use with individuals having severe disabilities (mental and physical).
Effective: Spring 1997
Prerequisite: a grade of C or better required in SPLED 395W, SPLED 401, SPLED 425 Concurrent: a grade of C or better in SPLED 495E

SPLED 412 Instruction for Students with Mild Disabilities (4) Appropriate teaching strategies, curriculum sequences, and materials selection and evaluation for children with mild special needs.
Effective: Spring 2007
Prerequisite: a grade of C or better required in SPLED 395W, SPLED 401, SPLED 425, SPLED 454 Concurrent: a grade of C or better required in SPLED 454

SPLED 415 Early Special Education (3-4) Includes early identification methods, assessment, curricula, parent involvement, and program evaluation for exceptional preschoolers in mainstreamed or segregated settings.
Effective: Summer 2011
Prerequisite: a grade of C or better required in the following courses SPLED 454; a course in child development

SPLED 418 Technologies for Persons with Disabilities (2) Sensory aids, communication systems, computer systems, expert systems, simulations, and other technologies for students who are academically or physically challenged.
Effective: Spring 2001
Prerequisite: SPLED 400 or SPLED 425

SPLED 425 Orientation to Human Variation and Special Education Services (3) An intensive overview of exceptional individuals being served in special education programs across their life-spans, from infancy through adulthood.
Effective: Spring 2007 Ending: Summer 2011
Prerequisite: declaration of major or minor in Special Education

SPLED 425 Foundations of Special Education, Etologies, Law, and Implications for Practice (4) An introduction to exceptional individuals being served in special education programs across the life span.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: admission into the SPLED Undergraduate or Graduate Program.

SPLED 430 Foundational Skills for Working with Students with Special Education Needs in General Education Classrooms (1) Introduction to working with students with special education needs in the general education classroom, including history and legal foundation.
Effective: Spring 2009
Prerequisite: teacher certification or permission of instructor

SPLED 431 Evidence-Based Methods for Monitoring Student Progress and Making Instructional Decisions (2) Evidence-based methods for assessing student progress and making data-based instructional decisions.
Effective: Spring 2009
Prerequisite: SPLED 430

SPLED 432 Evidence-Based Practices for Inclusive Behavior Management (2) Managing and motivating learners with special needs in general education settings based upon principles of Applied Behavior Analysis.
Effective: Spring 2009
Prerequisite: SPLED 430, SPLED 431

SPLED 433 Effective and Explicit Instruction for Students with Learning Difficulties (2) Evidence-based methods for designing, delivering, and adapting academic instruction for students with mild, moderate, and severe learning difficulties.
Effective: Spring 2009
Prerequisite: SPLED 430

SPLED 434A Evidence-Based Practices for Inclusive Elementary Classrooms (2) Evidence-based methods to effectively serve special needs students in elementary general education settings, including reading, writing, and mathematics instruction.
Effective: Spring 2009
Prerequisite: SPLED 430, SPLED 431, SPLED 432, SPLED 433

SPLED 434B Evidence-Based Practices for Inclusive Secondary Classrooms (2) Evidence-based methods to effectively serve special needs students in secondary general education settings.
Effective: Spring 2009
Prerequisite: SPLED 430, SPLED 431, SPLED 432, SPLED 433

SPLED 444 Inclusive Education and Assessment (6) Knowledge and skills needed to educate students with special needs in urban schools.
Effective: Summer 1994
Prerequisite: ELED 400 Concurrent: URBED 395W

The Pennsylvania State University
SPLED 454 Assessment for Instruction (4) Orientation to evaluation of special students with emphasis on the creation, use, and interpretation of teacher-made assessment procedures. Effective: Spring 2007.
Prerequisite: a grade of C or better required in EDPSY 101 Concurrent: a grade of C or better in SPLED 412

SPLED 460A Fundamentals of Reading Instruction in Special Education (3) Topics include the interactive nature of reading, recent findings of the National Reading Panel, explicit instruction principles and reading assessments. Effective: Summer 2006

SPLED 460B Teaching and Assessing Reading Skills of Students with Special Needs (3) Topics include methods for assessing and teaching reading skills including fluency, word level decoding and comprehension. Effective: Summer 2006
Prerequisite: SPLED 460A

SPLED 460C Specialized Reading Applications in Special Education (3) Topics include methods for assessing and teaching reading skills in vocational competence, functional reading, reading for students with sensory impairment. Effective: Summer 2006
Prerequisite: SPLED 460A and SPLED 460B

SPLED 461 Autism: Issues and Concerns (1) Overview of issues, characteristics, and evidenced-based assessment strategies, and approaches for individuals with autism/PDD. Effective: Summer 2006

SPLED 462 Autism and Applied Behavior Analysis (4) Basic principles of applied behavior analysis (ABA) and empiricism. Emphasis will be given to ABA principles in educational settings. Effective: Summer 2006
Prerequisite: SPLED 461

SPLED 463 Communication and Social Competence (3) Overview of deficits and strategies in speech, language, and communication across the Autism Spectrum Disorder. Effective: Summer 2006
Prerequisite: SPLED 461

SPLED 464 Assessment and Curriculum (3) Overview of screening, diagnosis, and identification of skills in developmental domains and curricula for individuals with autism. Effective: Summer 2006
Prerequisite: SPLED 461

SPLED 465 Asperger Syndrome (1) Characteristics, assessment, intervention, and curricula for individuals with Asperger syndrome. Emphasis will be given to social skill development. Effective: Summer 2006

SPLED 495E Experience with Exceptional Children (3) Supervised activities with exceptional children in a variety of possible settings, e.g., schools, institutions, day care centers, vocational settings. Effective: Spring 2001
Prerequisite: a grade of C or better required in SPLED 395W, SPLED 401, SPLED 425, SPLED 454. PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check. (Forms: 228 Chambers) Concurrent: a grade of C or better in SPLED 411 SPLED 412

SPLED 495F Practicum in Special Education (15) Teaching experience with mildly/moderately disabled children in age appropriate settings, e.g., infant/preschools, schools, vocational/job sites. Effective: Summer 1997
Prerequisite: a grade of C or better required in SPLED 495G. PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check. (Forms: 228 Chambers)

SPLED 495G Experience with an Integrated Inclusion Classroom (4) Supervised teaching in integrated general classrooms with activities in assessment, diagnosis, and direct intervention with students in need or with disabilities. Effective: Spring 2004
Prerequisite: a grade of C or better required in SPLED 425, SPLED 395W, SPLED 401, SPLED 412, SPLED 454, SPLED 495E. PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check (Forms: 228 Chambers). Concurrent: a grade of C or better required in SPLED 409

SPLED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1990

SPLED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 1990

SPLED 497A Content Literacy (3) Elementary and secondary students with special learning needs are often included in content classes such as science and social studies. This course will address evidence-based reading and writing to learn instruction for these students in inclusive content class settings. Effective: Summer 2011 Ending: Summer 2011

The Pennsylvania State University
SPLED 497B *Introduction to Assistive Technology for General Education Teachers* (2) This class will focus on the role of the general education teacher in supporting the effective use of assistive technology by students with disabilities. Effective: Summer 2011 Ending: Summer 2011

SPLED 498 *Special Topics* (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 1992

SPLED 498A *Introduction to Autism Spectrum Disorders* (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2011 Ending: Summer 2011

SPLED 498A *Autism and Applied Behavior Analysis* (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SPLED 498B *Practicum in Applied Behavior Analysis* (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2011 Ending: Summer 2011

SPLED 498B *Practicum in Applied Behavior Analysis* (4) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SPLED 498C *Special Topics in Autism* (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2011 Ending: Summer 2011

SPLED 498C *Orton-Gillingham Multisensory Instruction 1* (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SPLED 498C *Orton-Gillingham Multisensory Instruction 2* (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

SPLED 498D *A Focus on Improving Student Achievement Through Effective Practices* (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2011 Ending: Summer 2011

SPLED 498D *A Focus on Improving Student Achievement Through Effective Practices* (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

SPLED 498E *The Development of Concepts and Social Emotional Behavior* (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2011 Ending: Summer 2011

SPLED 498E *Current Issues in the Education of Students with Deaf-Blindness or Other Severe and Sensory Impairment.* (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Last Import from UCM: June 16, 2011 3:00 AM
Statistics (STAT)

STAT 100 (GQ) **Statistical Concepts and Reasoning** (3) Introduction to the art and science of decision making in the presence of uncertainty.  
Effective: Summer 1988

STAT 199 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.  
Effective: Summer 2005

STAT 200 (GQ) **Elementary Statistics** (4) Descriptive statistics, frequency distributions, probability, binomial and normal distributions, statistical inference, linear regression, and correlation.  
Effective: Summer 1988  
Prerequisite: 2 units in algebra

STAT 220 **Basic Statistics for Quantitative Students** (3) Descriptive statistics, probability, binomial and normal distributions, one and two sample models, introduction to regression, ANOVA and contingency tables. Students may only take one course from STAT 200, 220, and 250 for credit.  
Effective: Summer 1994  
Prerequisite: MATH 140

STAT 240 (GQ) **Introduction to Biometry** (3) Statistical analysis, sampling, and experimentation in the agricultural sciences; data collection, descriptive statistics, statistical inference, regression, one factor AOV, probability. Students may take only one course from STAT 200, 220, 240, 250 for credit.  
Effective: Spring 2005  
Prerequisite: 3 credits in mathematics

STAT 250 (GQ) **Introduction to Biostatistics** (3) Statistical analysis and interpretation of data in the biological sciences; probability; distributions; statistical inference for one- and two-sample problems.  
Effective: Spring 2001  
Prerequisite: 3 credits in mathematics

STAT 296 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.  
Effective: Fall 2007

STAT 297 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.  
Effective: Spring 1994

STAT 301 (GQ) **Statistical Analysis I** (3) Probability concepts; nature of statistical methods; elementary distribution and sampling theory; fundamental ideas relative to estimation and testing hypotheses.  
Effective: Summer 1988  
Prerequisite: 3 credits of calculus

STAT 318 (MATH 318) **Elementary Probability** (3) Combinatorial analysis, axioms of probability, conditional probability and independence, discrete and continuous random variables, expectation, limit theorems, additional topics. Students who have passed either STAT(MATH) 414 or 418 may not schedule this course for credit.  
Effective: Spring 1989  
Prerequisite: MATH 141

STAT 319 (MATH 319) **Applied Statistics in Science** (3) Statistical inference: principles and methods, estimation and testing hypotheses, regression and correlation analysis, analysis of variance, computer analysis. Students who have passed STAT (MATH) 415 may not schedule this course for credit.  
Effective: Spring 1989  
Prerequisite: STAT 318 or knowledge of basic probability

STAT 399 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.  
Effective: Summer 2005

STAT 401 **Experimental Methods** (3) Random variables; probability density functions; estimation; statistical tests, t-tests; correlation; simple linear regression; one-way analysis of variance; randomized blocks.  
Effective: Spring 1988  
Prerequisite: MATH 111 or MATH 141

STAT 402 **Statistical Analysis II** (3) Two-sample problems, single and multifactor ANOVA, simple and multiple regression, categorical data.  
Effective: Fall 2007  
Prerequisite: STAT 301. 400 level needed for honors program

STAT 414 (MATH 414) **Introduction to Probability Theory** (3) Probability spaces, discrete and continuous random variables, transformations, expectations, generating functions, conditional distributions, law of large numbers, central limit theorems. Students may only one course from STAT(MATH) 414 and 418.
STAT 415 (MATH 415) Introduction to Mathematical Statistics (3) A theoretical treatment of statistical inference, including sufficiency, estimation, testing, regression, analysis of variance, and chi-square tests.
Effective: Fall 1989
Prerequisite: MATH 414

Effective: Spring 1984
Prerequisite: STAT 318 or STAT 414; MATH 230

STAT 418 (MATH 418) Probability (3) Fundamentals and axioms, combinatorial probability, conditional probability and independence, probability laws, random variables, expectation; Chebyshev's inequality. Students may take only one course from STAT (MATH) 414 and 418 for credit.
Effective: Fall 2001 Ending: Summer 2011
Prerequisite: MATH 230 or MATH 231

STAT 418 (MATH 418) Introduction to Probability and Stochastic Processes for Engineering (3) Introduction to probability axioms, combinatorics, random variables, limit laws, and stochastic processes.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: MATH 230 or MATH 231

STAT 440 Computational Statistics (3) Topics related to computing in statistics, including numerical linear algebra, optimization, simulation, numerical integration, and bootstrapping.
Effective: Spring 2006
Prerequisite: STAT 200 or equivalent; STAT 415, MATH 220

STAT 460 Intermediate Applied Statistics (3) Review of hypothesis testing, goodness-of-fit tests, regression, correlation analysis, completely randomized designs, randomized complete block designs, latin squares.
Effective: Fall 2006
Prerequisite: STAT 200, STAT 220, STAT 240, STAT 250, STAT 301 or STAT 401

STAT 461 Analysis of Variance (3) Analysis of variance for single and multifactor designs; response surface methodology.
Effective: Fall 2007
Prerequisite: STAT 200, STAT 220, STAT 240, STAT 250, STAT 301 or STAT 401

STAT 462 Applied Regression Analysis (3) Introduction to linear and multiple regression; correlation; choice of models, stepwise regression, nonlinear regression.
Effective: Fall 2006
Prerequisite: STAT 200, STAT 220, STAT 240, STAT 250, STAT 301 or STAT 401

STAT 463 Applied Time Series Analysis (3) Identification of models for empirical data collected over time; use of models in forecasting.
Effective: Spring 2006
Prerequisite: STAT 462

STAT 466 Survey Sampling (3) Introduction to design and analysis of sample surveys, including questionnaire design, data collection, sampling methods, and ratio and regression estimation.
Effective: Spring 2006
Prerequisite: STAT 200, STAT 220, STAT 240, STAT 250, STAT 301 or STAT 401

STAT 470W Problem Solving and Communication in Applied Statistics (3) Provide problem solving and communication skills through development of writing ability, interaction with peers and the SCC, and oral presentations.
Effective: Spring 2000
Prerequisite: STAT 460, STAT 462, STAT 480

STAT 480 Introduction to SAS (1) Introduction to SAS with emphasis on reading, manipulating and summarizing data.
Effective: Spring 2008
Prerequisite: 3 credits in statistics

STAT 481 Intermediate SAS for Data Management (1) Intermediate SAS for data management.
Effective: Summer 2007
Prerequisite: STAT 480

STAT 482 Advanced Topics in SAS (1) Advanced statistical procedures in SAS, including ANOVA, GLM, CORR, REG, MANOVA, FACTOR, DISCRIM, LOGISTIC, MIXED, GRAPH, EXPORT, and SQL. Credit can not be received for both STAT 482 and STAT 480/481/483.
Effective: Summer 2009
Prerequisite: STAT 480 and STAT 481

STAT 483 Statistical Analysis System Programming (3) Introduction, intermediate, and advanced topics in SAS. Credit can not be received for both STAT 483 and STAT 480/481/482.
Effective: Summer 2009

The Pennsylvania State University
Prerequisite: 3 credits in statistics

STAT 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2007
Prerequisite: 6 credits in statistics

STAT 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2007
Prerequisite: 6 CREDITS IN STATISTICS

STAT 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships.
Effective: Fall 2007
Prerequisite: 6 credits in statistics

STAT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

STAT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

STAT 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM
Supply Chain Mgmt (SCM)

SCM 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2007

SCM 200 (GQ) Introduction to Statistics for Business (4) Topics include descriptive statistics, probability distributions, statistical inference, regression and correlation, and forecasting. Effective: Spring 2011
Prerequisite: MATH 021 or higher or satisfactory score on the mathematics FTCAP examination

SCM 200H (GQ) Honors Introduction to Statistics for Business (4) Topics include descriptive statistics, probability distributions, statistical inference, regression and correlation, and forecasting. Effective: Spring 2011
Prerequisite: MATH 021 or higher or satisfactory score on the mathematics FTCAP examination

SCM 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2007

SCM 301 Supply Chain Management (3) Supply chain management concepts, principles, and methodologies. Effective: Spring 2011
Prerequisite: ACCTG 211, ECON 102, SCM 200 or STAT 200; limited to students in baccalaureate status

Prerequisite: ACCTG 211, ECON 102, SCM 200 or STAT 200; limited to students in baccalaureate status

SCM 310 Introduction to Operations Management (3) An introduction to the strategic importance and the analytic tools of operations management. Not available to baccalaureate business students in Smeal. Effective: Spring 2007
Prerequisite: SCM 200 or STAT 200 or permission of the program; fifth semester standing

Prerequisite: SCM 301 or MKTG 301

SCM 397 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 2007

SCM 398 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Spring 2007

SCM 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2007

Prerequisite: B A 302 and SCM 404

SCM 404 Demand Fulfillment (3) Analysis of demand fulfillment and the role of distribution operations management in the supply chain. Effective: Spring 2011
Prerequisite: B A 302 or SCM 301

SCM 405 Manufacturing and Services Strategies (3) Investigates manufacturing and services strategies in supply chain networks. Effective: Spring 2011
Prerequisite: SCM 301 or B A 302

SCM 406 Strategic Procurement (3) Analysis of strategic procurement in the supply chain. Effective: Summer 2011
Prerequisite: B A 302 or SCM 301

SCM 416 Warehousing and Terminal Management (3) Administration of warehouse and terminal functions in logistics systems, with analysis of customer service, forecasting, inventory, investment, design, and operation. Not available to baccalaureate business students in Smeal. Effective: Spring 2007
Prerequisite: SCM 301

SCM 418 Logistics Analysis (3) Design, develop, and use computer decision models for analysis of logistics problems; computer intensive coursework emphasizing spreadsheet applications. Not available to baccalaureate business students in

The Pennsylvania State University
Smeal.
Effective: Spring 2007
Prerequisite: SCM 301, SCM 320 and CMPSC 203

SCM 421 Supply Chain Analytics (3) Models and Methodologies for supply chain analysis.
Effective: Spring 2011
Prerequisite: SCM 404 or SCM 405 or SCM 406

SCM 423 Information Technology in Supply Chains (3) Appropriate and effective use of information technology in supply chain.
Effective: Summer 2011
Prerequisite: SCM 404 or SCM 405 or SCM 406

SCM 432 Service Supply Chains (3) Supply chain management in the services sector.
Effective: Spring 2007
Prerequisite: B A 302

Effective: Spring 2007
Prerequisite: SCM 301 and SCM 320

SCM 445 Operations Planning and Control (3) Aggregate production planning procedures, disaggregation methods in hierarchical production planning, master production scheduling, material requirements planning, lot-sizing, and capacity planning. Not available to baccalaureate business students in Smeal.
Effective: Spring 2007
Prerequisite: SCM 310

SCM 450 Strategic Design and Management of Supply Chains (3) Strategic design and management of supply chains.
Effective: Spring 2007 Ending: Summer 2011
Prerequisite: SCM 421

SCM 450W Strategic Design and Management of Supply Chains (3) Strategic design and management of supply chains.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: SCM 421

SCM 455 Logistics Systems Analysis and Design (3) Customer service, inventory management, transportation, warehousing, purchasing, international logistics, site location planning and analysis, and total cost analysis.
Effective: Spring 2007
Prerequisite: SCM 301 or SCM 310

SCM 456 Supply Chain Risk Analysis (3) Business processes are modeled as a network of queues using discrete-event simulation and analyzed model outcomes using statistical methods.
Effective: Spring 2007
Prerequisite: SCM 200 and B A 302

SCM 460 Purchasing and Materials Management (3) Purchasing policies, procedures, order specifications and agreements, supplier selection, and the role of purchasing in production planning and inventory management. Not available to baccalaureate business students in Smeal.
Effective: Spring 2007
Prerequisite: SCM 301 or SCM 310

SCM 465 Electronic Business Management (3) A problem-based exploration of the various electronic business tools and technologies required to efficiently manage a supply chain. Not available to baccalaureate business students in Smeal.
Effective: Spring 2007
Prerequisite: SCM 301 or SCM 310

SCM 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2007

SCM 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

SCM 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2007

SCM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2007

SCM 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2007

The Pennsylvania State University
SCM 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
*Effective: Summer 2007*

Last Import from UCM: June 16, 2011 3:00 AM
Surveying (SUR)

SUR 111 **Plane Surveying** (3) Plane surveying principles; basic measurement statistics; use and care of equipment; traversing, area, and coordinate computations; differential leveling.
Effective: Spring 1998 Ending: Fall 2011
Prerequisite: MATH 026 Concurrent: MATH 081

SUR 111 **Plane Surveying** (3) Plane surveying principles; basic measurement statistics; use and care of equipment; traversing, area, and coordinate computations; differential leveling; RTK-GPS measurements.
Prerequisite: or concurrent: MATH 026 or MATH 040 or MATH 140 Concurrent: MATH 081

SUR 162 **Methods in Large Scale Mapping** (3) CAD applications related to mapping sciences; data collection using traditional and satellite techniques; development of DTMs, contours, and map compilation.
Effective: Spring 2001 Ending: Fall 2011
Prerequisite: SUR 111, ED&G 100 or EG T 102

SUR 162 **Methods in Large Scale Mapping** (3) CAD applications in mapping; data collection using traditional and satellite techniques; map compilation; COGO.
Prerequisite: SUR 111, EDSGN 100

SUR 211 **Construction Surveying Applications** (2) Application of surveying principles in the field of construction: building layout, pipe/culvert, street, quantity, and as-built surveys.
Effective: Fall 1993 Ending: Fall 2011
Prerequisite: SUR 112, SUR 162

SUR 212 **Route and Construction Surveying** (4) Circular, compound, spiral horizontal curves; equal, unequal tangent vertical curves; alignments, earthwork; control, building, pipe, street, and as-built construction surveys.
Effective: Summer 2011
Prerequisite: SUR 162

SUR 222 **Photogrammetry** (3) Basic principles of metric photogrammetry with single and stereopair photos; coordinate transformations; map production with stereo imagery; flight planning. Lab.
Effective: Spring 2001
Prerequisite: SUR 162

SUR 241 **Surveying Measurement Analysis** (3) Statistical error analysis of surveying measurements; propagation of random errors; confidence intervals and statistical testing. Lab.
Effective: Spring 2001
Prerequisite: SUR 111 Concurrent: MATH 083 or MATH 140

SUR 262 **Coordinate Systems in Map Projections** (2) Introduction to coordinate systems used in the Lambert, Mercator, Transverse Mercator, and UTM map projections; reduction of surveying observations.
Effective: Summer 2000
Prerequisite: SUR 162

SUR 272 **Cadastral Surveying** (3) Evolution of land records systems; PLS: property ownership and conveyancing; common and statute law; rules of construction; boundary location procedures.
Effective: Fall 1993
Prerequisite: SUR 111

SUR 296 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 1997

SUR 297 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2007

SUR 313 **Practical Field Problems** (3) Geodetic, topographic, astronomic, construction surveying; equipment adjustment; precise leveling; land subdivision; map construction; uses of GIS.
Effective: Spring 2001 Ending: Fall 2011
Prerequisite: SUR 162, SUR 251

SUR 313 **Integrated Surveying** (3) Control, boundary, mapping and construction surveys; survey planning, coordinating; report and record map preparation.
Prerequisite: SUR 162 Concurrent: SUR 272 SUR 212

SUR 325 **Advanced Photogrammetry** (3) Advanced topics in metric photogrammetry; analytical techniques in photogrammetry; applications in close-range photogrammetry; introduction to digital photogrammetry.
Effective: Summer 1994 Ending: Fall 2011
Prerequisite: MATH 220 or MATH 230; SUR 222, SUR 341
SUR 341 Adjustment Computations (3) Matrix methods in least squares; random error propagation; observation equation model; conditions between parameters; basic post-adjustment statistical analysis.
Effective: Spring 2001
Prerequisite: CMPSC 201C, STAT 401, SUR 241

SUR 351 Geodetic Models (3) Three dimensional geodesy; computations on the ellipsoid; map projections; reduction of observations and elements of physical geodesy.
Effective: Summer 1993
Prerequisite: SUR 241

SUR 362 Multipurpose Land Information Systems (3) Basic concepts in geographic information systems; spatial reference frameworks; map and text data; digital environments; software and hardware platforms.
Effective: Summer 1993 Ending: Fall 2011
Prerequisite: SUR 222, SUR 241, SUR 272

SUR 362 Introduction to Geospatial Information Engineering (3) Basic concepts in geographic information engineering; spatial reference frameworks; map and text data; digital environments; software and hardware platforms.
Prerequisite: SUR 162, SUR 272 Concurrent: SUR 222 MATH 110 or MATH 140

SUR 372W Legal Aspects of Land Surveying (3) Legal research; rules of evidence including classification and evaluation; unwritten rights; land description composition; easements.
Effective: Spring 1994
Prerequisite: SUR 272

SUR 381 Stormwater Hydraulics and Hydrology (4) Hydraulics: statics, continuity, energy, friction; hydrology: rainfall, abstractions, travel time, runoff; stormwater design: sewers, culverts, basins, erosion; municipal regulations.
Effective: Summer 2011
Prerequisite: MATH 141 6th semester standing Concurrent: PHYS 213

SUR 422 Digital Photogrammetry (3) Mathematical methods for processing digital imagery, creating digital elevation models and ortho-photographs, and applications in spatial data infrastructure.
Effective: Summer 2011
Prerequisite: MATH 220, SUR 362

SUR 441 Data Analysis and Project Design (3) Post least squares adjustment analysis of control networks, statistical testing, blunder detection, network design considerations, and computer optimization techniques.
Effective: Summer 1994
Prerequisite: STAT 401 or STAT 451, SUR 341

SUR 455 Precise Positioning Systems (3) Stellar coordinate systems; geodetic reference coordinate systems; satellite orbital theory; global positioning systems; pseudo-ranging; GPS vector adjustments.
Effective: Summer 1994
Prerequisite: SUR 351. Prerequisite or concurrent: SUR 441

SUR 462 Parcel-Based Geospatial Information Systems (3) Acquisition processing of land parcel data; development of land information system and applications in geospatial information technology.
Effective: Summer 2011
Prerequisite: SUR 362, SUR 372W

SUR 465 Multipurpose Land Information Systems Applications (3) Using a GIS as a decision tool; spatial modeling; data structure and management issues; legal issues; case studies; application projects.
Effective: Spring 2001 Ending: Fall 2011
Prerequisite: SUR 362

SUR 471 Professional Aspects of Land Surveying (3) Ethical issues and legal limits of practice; surveyor as an expert witness; surveyor-client relationship; responsibilities to the profession.
Effective: Summer 1994
Prerequisite: SUR 372W

SUR 482 Land Development Design (3) The land development process; geometric, environmental, aesthetic aspects of development; local regulatory requirements; preparation of final plat and report.
Effective: Summer 1994 Ending: Fall 2011
Prerequisite: SUR 313, SUR 471

SUR 482 Land Development Design (3) The land development process; geometric, environmental, aesthetic aspects of development; local regulatory requirements; preparation of final plat and report.
Prerequisite: SUR 381, SUR 471

SUR 490 Seminar in Surveying (1) Individual or group work in surveying.
Effective: Summer 1994
Prerequisite: senior standing

SUR 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 1993

SUR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

The Pennsylvania State University
SUR 497A Land Development Surveys (1) Land development surveys: project proposal; cost estimate; deed search; control, topographic and planimetric surveys; digital drawings, client report.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: SUR 162, SUR 272  Concurrent: SUR 313

Last Import from UCM: June 16, 2011 3:00 AM
Sustainability (SUST)

SUST 200 (GS) Foundations of Leadership in Sustainability (3) Science, ethics, and leadership in social, environmental, and economic sustainability. Effective: Summer 2011

Last Import from UCM: June 16, 2011 3:00 AM
Swahili (SWA)

SWA 001 *Elementary Swahili I* (4) Listening, speaking, reading, writing Swahili: an introduction for beginners; basic structures and vocabulary; cultural elements.
Effective: Spring 1995

SWA 002 *Elementary Swahili II* (4) Listening, speaking, reading, and writing Swahili; structures and vocabulary; cultural elements.
Effective: Spring 1995
Prerequisite: SWA 001

SWA 003 *Intermediate Swahili* (4) Further development of listening, speaking, reading, and writing skills in Swahili: structures and vocabulary; cultural elements.
Effective: Spring 1995
Prerequisite: SWA 002

SWA 051 *Elementary Intensive Swahili for Graduate Students I* (3) Intensive introduction to Swahili: first half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: graduate standing

SWA 052 *Elementary Intensive Swahili for Graduate Students II* (3) Intensive introduction to Swahili: second half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: SWA 051 and graduate standing

SWA 053 *Intermediate Intensive Swahili for Graduate Students* (3) Continued intensive study of Swahili at the intermediate level: reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: SWA 052 or equivalent and graduate standing

SWA 097 *Special Topics* (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

SWA 099 (IL) *Foreign Studies* (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

SWA 197 *Special Topics* (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

SWA 199 (IL) *Foreign Studies* (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

SWA 294 *Research Project* (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

SWA 295 *Internship* (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 1995
Prerequisite: prior approval of proposed assignment by instructor

SWA 296 *Independent Studies* (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 1995

SWA 297 *Special Topics* (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

SWA 299 (IL) *Foreign Studies* (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

SWA 395 *Internship* (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor

SWA 397 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

SWA 399 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

SWA 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

SWA 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

SWA 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 1995

SWA 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

SWA 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM
Systems Engineering (SYSEN)

SYSEN 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1999

SYSEN 497A Wireless Positioning (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

Last Import from UCM: June 16, 2011 3:00 AM
Telecommunications (TELCM)

TELCM 140 Introduction to Telecommunications Systems (2) Elements of telecommunications systems, including telephones, transmission lines, switching, digital data, and transmission by microwave, satellite, and fiber optics. Effective: Fall 1992

TELCM 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 1992

TELCM 241 Voice and Data Communications (3) Noise in communications systems, types of modulation, transmission codes, interfaces, the telephone set, and the subscriber loop. Effective: Fall 2005 Prerequisite: TELCM 140

TELCM 242 Introduction to Telecommunications Laboratory (1) Techniques used for measurements of basic telecommunications circuits and equipment. Effective: Fall 1992 Prerequisite: or concurrent: TELCM 241

TELCM 243 Protocols and Networks (3) Transmission codes, network protocols, local area networks, the Internet and emerging technologies, fiber optics, wireless communications, satellite communications. Effective: Fall 2005 Prerequisite: TELCM 140

TELCM 244 Advanced Telecommunications Laboratory (1) Testing and measurement of advanced telecommunication transmission and switching equipment, including practical alignment and testing of operational systems. Effective: Fall 1992 Prerequisite: or concurrent: TELCM 243

TELCM 296 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Summer 1997

TELCM 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 1992

TELCM 298 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Fall 1992
Theatre (THEA)

THEA 001S First-Year Seminar: Theatre Production Practices (1) An orientation to the School of Theatre production practices, resources, faculty, and practicum. Effective: Spring 2006 Prerequisite: admission into Theatre Program

THEA 080 (GA) Pit Orchestra (1-3 per semester/maximum of 3) Rehearsal and performance of contemporary and historical musical theatre styles, including operetta and light opera. Effective: Summer 2008 Prerequisite: audition

THEA 100 (GA;US;IL) The Art of the Theatre (3) An experiential survey of all aspects of the living theatre, as presented by a resident company of theatre artists. Effective: Spring 2006

THEA 102 (GA) Fundamentals of Acting (3) Introduction to the art and craft of acting for non-theatre majors. Effective: Fall 2003

THEA 103 Fundamentals of Directing (3) Training and experience in basic skills of directing. Designed for non-theatre majors. Effective: Fall 1983

THEA 104 Fundamentals of Theatre Production (3) Training and experience in basic skills of technical theatre. Designed for non-theatre majors. Effective: Fall 1983

THEA 105 (GA) Introduction to Theatre (3) An introduction and overview of the history, craft, and art of the theatre to foster an informed appreciation of theatrical events. This course is an alternate to THEA 100. Effective: Spring 2003

THEA 105H (GA) Introduction to Theatre (3) An introduction and overview of the history, craft, and art of the theatre to foster an informed appreciation of theatrical events. This course is an alternate to THEA 100. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

THEA 107 (GA) Introduction to Dramatic Structure (3) An introduction to structural analysis in dramatic literature. Effective: Summer 2011

THEA 110 Playscript Analysis (3) Theory and method of playscript analysis for the general theatre student. Effective: Fall 1983

THEA 113 Musical Theatre Theory I (3) Studies in the fundamentals of music notation and sight-singing. Effective: Summer 2000 Prerequisite: admission into Musical Theatre Option

THEA 114 Music Theatre: Form and Analysis (3) A survey of music theatre as an art form. Effective: Summer 1993 Prerequisite: admission into Musical Theatre Option

THEA 115 B.F.A. Acting Foundations (2) Fundamental aspects of training the actor’s body, voice, mental focus, and imagination. Effective: Summer 2005 Prerequisite: admission to B.F.A. in Musical Theatre

THEA 120 Acting I (3) Fundamental skills and training in acting. Emphasis on physical/vocal awareness and the nature of dramatic communication. Theatre majors only. Effective: Spring 2008 Prerequisite: THEA 100 or THEA 105

THEA 130 Introduction to Theatre Scenic and Costume Technology (3) Introduction to the methods, materials, equipment, concepts and processes involved in the construction of scenery and costumes for the theatre. Effective: Summer 2005

The Pennsylvania State University
THEA 131 Introduction to Theatre Sound and Lighting Technology (3) Introduction to the methods, materials, equipment, facilities, concepts and processes used to create theatre lighting and sound.
Effective: Summer 2005

THEA 146 Basic Theatrical Makeup (2) Both straight and corrective makeup, with character and styling techniques for stage, film, and television.
Effective: Summer 1989

THEA 150 Fundamentals of Design for the Theatre (3) Exploration of the philosophy and technique of scenic, costume, and lighting design.
Effective: Spring 2008

THEA 160 Introduction to Costume Crafts (3) Process of costuming combined with laboratory projects. Crew experience on major productions.
Effective: Fall 1998
Prerequisite: THEA 150

THEA 170 Introduction to Stage Lighting Production Techniques (3) Introduction to theatre lighting facilities, equipment, and practice. Practical experience with major productions.
Effective: Fall 1998
Prerequisite: THEA 150

THEA 180 Introduction to Stagecraft (3) Introduction to methods, materials, equipment, facilities, and concepts used in scenery construction for the Theatre. Practical experience with departmental productions.
Effective: Fall 1998
Prerequisite: THEA 150

THEA 189 (GA) Theatre Production Practicum (1 per semester/maximum of 6)* Supervised experience in theatre by crew participation in University theatre productions. For non-theatre students only.
Effective: Spring 2004

THEA 198 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1994

THEA 199 (IL) Foreign Studies--Theatre Arts (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005
Prerequisite: approval by department

THEA 200 Script Analysis (2) An introduction to script analysis for theatre majors, which focus on full text analysis as a foundation for area specific analysis. Two styles of analysis (contextual and structural) are studied.
Effective: Spring 2008
Prerequisite: THEA 100 or THEA 105

THEA 207 (GA;US) Gender and Theatre (3) A study of theatre and drama literature as formed by issues of gender, race, and ethnic background.
Effective: Summer 2005

THEA 208 (GA;US;IL) (AAA S 208) Workshop: Theatre in Diverse Cultures (3) A performance-oriented class which explores the historic and contemporary theatrical works of various culturally diverse peoples.
Effective: Summer 2005

THEA 208S (GA;US;IL) Workshop: Theatre in Diverse Cultures (3) A performance-oriented class, which explores the historic and contemporary theatrical works of various culturally diverse peoples.
Effective: Summer 2005

THEA 212 Musical Theatre Theory II (3) Intermediate studies in diatonic harmony, analysis, sight-singing and dictation.
Effective: Summer 2000
Prerequisite: THEA 113, THEA 114 and admission into Musical Theatre Option

THEA 214 Musical Theatre Theory III (3) Advanced studies in the technique and practice of chromatic harmonic analysis and sight-singing.
Effective: Summer 2000
Prerequisite: THEA 113, THEA 114, THEA 212

THEA 220 Acting II (3) Principles of acting through improvisation, exercises, and character analysis, with emphasis on basic skills of voice and movement. For theatre majors only.
Effective: Spring 2001
Prerequisite: THEA 120
THEA 221 Acting III (3) A continuation of Thea. 220. For Theatre majors only.
Effective: Spring 2008
Prerequisite: THEA 130 or THEA 131 and School of Theatre approval

THEA 222 (THEA 530) Acting Laboratory (2) Laboratory experience in student-directed scenes and/or one-act plays.
Effective: Summer 1994
Prerequisite: THEA 120

THEA 223 Musical Theatre Performance I (2) Studio training in the unique performance skills, repertoire and business of professional music theatre.
Effective: Spring 2006
Prerequisite: THEA 114, THEA 115, THEA 116, THEA 212 admission into Musical Theatre option

THEA 224 Musical Theatre Performance II (2) Studio training in the unique performance skills, repertoire and business of professional music theatre.
Effective: Spring 2006
Prerequisite: THEA 223 admission into Musical Theatre Option

THEA 225A B.F.A. Acting Studio I (2) Exercises to develop truthful listening and responding as a foundation for acting studio scene study.
Effective: Summer 2005
Prerequisite: THEA 115 and admission to B.F.A. in Musical Theatre Concurrent: THEA 225B and THEA 225C

THEA 225B B.F.A. Movement Studio I (2) Introduction to techniques to condition the actor and improve physical awareness and self-use.
Effective: Summer 2005
Prerequisite: THEA 115 Concurrent: THEA 225C THEA 225A and

THEA 225C B.F.A. Voice/Speech Studio I (2) Introduction to actor voice and speech training.
Effective: Summer 2005
Prerequisite: THEA 115 Concurrent: THEA 225A and THEA 225B

THEA 250 Introduction to Scene Design (3) Introduction to the history, processes, materials, and concepts involved in designing scenery for the theatre.
Effective: Summer 2005
Prerequisite: THEA 130, THEA 131 prerequisite or concurrent:THEA 251

THEA 251 Theatre Drafting Techniques (2) Introduction to drafting of floor plans, section drawings, construction graphics, and mechanical perspective for the theatre.
Effective: Spring 2001

THEA 252 Design Presentation Techniques (1) Media and materials exploration; sketching, rendering, and modeling methods.
Effective: Fall 1983

THEA 253 Scene Painting (1) Introduction to painting scenery for the theatre; methods and materials.
Effective: Fall 1983

THEA 260 Introduction to Costume Design (3) Introduction to costume design process through character analysis and the use of color, line, and texture.
Effective: Spring 2006

THEA 261 Introduction to Costume Construction Techniques (3) Intermediate study of the methods, materials, equipment, concepts and processes involved in the construction of costumes for the theatre.
Effective: Summer 2005
Prerequisite: THEA 130

THEA 270 Introduction to Lighting Design (3 per semester/maximum of 99) This course will focus on helping each student to develop a design process that takes them from script to stage.
Effective: Spring 2006

THEA 280 Introduction to Technical Direction for the Theatre (3) Introduction to the methods, materials, equipment, facilities, concepts and processes associated with Technical Direction for the Theatre.
Effective: Summer 2005
Prerequisite: THEA 130, THEA 131

THEA 282 (GA) Production Practicum (3--may repeat once for a total of 6) Introduction to all aspects of theatre production--analysis, design, construction, production, performance--for non-theatre majors.
Effective: Spring 2000

THEA 285 Introduction to Sound Design (3) An introduction to sound design for the theatre.
Effective: Spring 2011
Prerequisite: INART 258A or THEA 150

THEA 289 Theatre Production Practicum (1 per semester/maximum of 3) Supervised experience in production
THEA 296 Independent Studies (1-18) Creative projects, including research and design, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

THEA 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a subject which may be topical or of special interest.
Effective: Fall 1983

THEA 297A Design for Stage (3) Introduction to scenic design and theatrical scenic painting, sketching, rendering, scale modeling, methods, materials and practical work for theatre.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

THEA 297B Acting the Scene (3) Students will practice in playing scenes based on the techniques of Uta Hagen, Lee Strasberg, Stella Adler and Sanford Meisner, based on the Stanislavsky tradition. Students may take this course after earning a C or above in THEA 102, with permission of instructor.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

THEA 298 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1994

THEA 320 Scene Study I (3 per semester/maximum of 9) Advanced monologue and scene study techniques. Principal focus on realism.
Effective: Spring 2008
Prerequisite: THEA 221 AND APPROVAL BY THE DEPARTMENT

THEA 321 Scene Study II (3) A continuation of THEA 320.
Effective: Fall 1995
Prerequisite: THEA 320 and approval by department

THEA 322 Voice and Speech I (2) Vocal techniques for the actor: articulation, voice control, support, and projection.
Effective: Spring 1990
Prerequisite: THEA 120

THEA 324 Movement for Actors I (2) Techniques and skills in physical expression, awareness, control, and stage movement.
Effective: Spring 1990
Prerequisite: THEA 120

THEA 325 Movement for Actors II (2) Continuation of THEA 324.
Effective: Spring 1990
Prerequisite: THEA 324

THEA 326 Music Theatre Performance Workshop (1 per semester/maximum of 3) Performance studies in cabaret, revue, and club environments.
Effective: Spring 2008
Prerequisite: DANCE 234, THEA 224 audition enrollment in Musical Theatre Option

THEA 327 Musical Theatre Auditions (2) Research and preparation of auditions for work in professional musical theatre venues.
Effective: Summer 2004
Prerequisite: THEA 224

THEA 350 Scene Design I (3) Demonstrations, lectures, and practical work in the design of scenery for the theatre.
Effective: Fall 1983
Prerequisite: THEA 150, THEA 251, THEA 252

THEA 381 Technical Production II (3) Comprehensive survey of scenic construction and theatrical rigging. Continuation of THEA 380.
Effective: Summer 2011

THEA 398 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1994

THEA 400 Advanced Theatre Projects (1-6 per semester) Individual and group-directed study of in-depth projects involving reading, discussion, performance, and critical analysis by faculty.
Effective: Spring 1991
Prerequisite: seventh-semester standing or 12 credits in theatre or related areas
THEA 401Y (IL) Theatre History I: Ancient to 1700 (3) Survey of drama and theatre from primitive rites through the Renaissance. Effective: Spring 2008
Prerequisite: THEA 100 or THEA 105

THEA 402 Theatre History II: From 1700 to Present (3) Survey of European drama and theatre from the eighteenth century through the modern period. Effective: Spring 2012 Future: Spring 2012
Prerequisite: THEA 401Y

THEA 402W Theatre History II: From 1700 to Present (3) Survey of European drama and theatre from the eighteenth century through the modern period. Effective: Spring 2008 Ending: Fall 2011
Prerequisite: THEA 100 or THEA 105

THEA 405 (US) Theatre History: American Theatre (3) Survey of American drama and theatre from the colonial period to the present. Effective: Spring 2008
Prerequisite: THEA 100 or THEA 105

Prerequisite: THEA 100 or THEA 105

Prerequisite: THEA 100 or THEA 105

THEA 410 Play Analysis (3) Advanced skills in textual analysis of plays and screenplays. Effective: Spring 2008
Prerequisite: THEA 100 or THEA 105

Prerequisite: THEA 100 or THEA 105

THEA 423 Musical Theatre Performance III (2) Studio training in the unique performance skills, repertoire and business of professional musical theatre. Effective: Spring 2006
Prerequisite: THEA 224 seventh-semester standing in the Musical Theatre Option

THEA 424 Musical Theatre Performance IV (2) Studio training in the unique performance skills, repertoire and business of professional musical theatre. Effective: Spring 2006
Prerequisite: THEA 423

THEA 425A B.F.A. Acting Studio II (2) Scene Study Effective: Summer 2005
Prerequisite: THEA 115, THEA 225A  Concurrent: THEA 425C

Prerequisite: THEA 225C  Concurrent: THEA 425A

THEA 426 Children’s Theatre (3) Theories and practice of theatre for children. Effective: Spring 2001
Prerequisite: THEA 150, THEA 220

THEA 427A B.F.A. Acting Studio III (2) Continuation of THEA 425A Effective: Summer 2005
Prerequisite: THEA 425A  Concurrent: THEA 427C

THEA 427C B.F.A. Voice/Speech Studio III (2) Stage Dialect Studies Effective: Summer 2005
Prerequisite: THEA 425C  Concurrent: THEA 427A

THEA 429 Theatre Performance Practicum (1-3 per semester) Supervised experience in rehearsal and performance of significant roles. Effective: Fall 1983
Prerequisite: admission by audition only

THEA 434 Introduction to Directing (3) Introduction to principles and procedures of play direction. Effective: Spring 2001
Prerequisite: THEA 114 or THEA 410; THEA 160, THEA 170 or THEA 180

THEA 436 Directorial Processes (3) Preparing a play for production including the scoring of the script, developing ground plan, casting, and staging projects in American realism. Effective: Spring 1991

The Pennsylvania State University
THEA 437 Artistic Staff for Production (1-6) To provide students with experience in choreography, dramaturgy, combat, staging, voice/speech, musical direction, assisting in direction, for major productions. Effective: Summer 1989
Prerequisite: approval of the proposed assignment by the instructor prior to registration

THEA 439 Projects in Directing (1) Projects in directing for analysis and critique. Effective: Spring 1991
Prerequisite: THEA 436 and approval of proposed project by instructor prior to registration

THEA 440 Principles of Playwriting (3) Structure, dramatic effect, characterization, and dialogue; the writing, reading, and criticism of original one-act plays. Effective: Spring 2008
Prerequisite: THEA 100 or THEA 105

THEA 447 Make-Up Design for Production (1-6) Materials, research, preparation, design, execution of make-up for major University Theatre productions. Effective: Summer 1989
Prerequisite: approval of proposed assignment by the instructor prior to registration

THEA 450 Advanced Topics in Scene Design (3 per semester/maximum of 6) Design emphasis on a variety of production techniques, genre, and styles. Effective: Spring 2006
Prerequisite: THEA 250 or portfolio review

THEA 451 Drafting, Drawing, and Painting for the Theatre (1) Drafting, freehand drawing including perspective methods and property development, rendering techniques, and painters' elevations. Effective: Summer 1993
Prerequisite: THEA 251, THEA 252 and prior approval of instructor; first-year MFA theatre candidacy

THEA 453 Advanced Scene Painting (1 per semester, maximum of 12) Practicum study in painting techniques currently in professional use. Exploration of tools, available paints, and texturing materials. Effective: Spring 1991
Prerequisite: THEA 253

THEA 454 Period Research for the Theatre (3) History of decor, styles, and movements in art and architecture. Effective: Summer 1993
Prerequisite: BFA theatre arts candidacy or permission of instructor

THEA 456 Scenic Projects for Production (1 per semester, maximum of 6) Special projects for production; painting, properties, design assistance. Effective: Summer 1993
Prerequisite: approval of proposed projects by instructor prior to registration

THEA 457 Scene Design for Production (1 per semester/maximum of 6) Design and execution of production projects. Effective: Fall 1983
Prerequisite: approval of proposed project by instructor prior to registration

THEA 458 Digital Imaging for the Theatre (1) Introduction to imaging software and its application in theatrical design and production. Effective: Summer 2005
Prerequisite: Design or Visual Arts major or permission of program

Prerequisite: B.F.A. Theatre candidacy

THEA 460 Advanced Topics in Costume Design (3 per semester/maximum of 6) Developing and executing a design concept in a variety of the performing arts. Effective: Spring 2006
Prerequisite: THEA 260, THEA 464

THEA 461 Advanced Topics in Costume Construction and Technology (3 per semester/maximum of 6) A specialized course in advanced costume construction techniques and theatrical costume technologies. Effective: Spring 2006
Prerequisite: THEA 261

THEA 464 History of Fashion (3) Survey of dress from Egyptian period to contemporary fashion. Effective: Spring 2008
Prerequisite: THEA 100 or THEA 105

THEA 465 History of Fashion II (3) Survey of dress from 1800 to contemporary fashion. Effective: Summer 2004
Prerequisite: THEA 100 or THEA 105

THEA 466 Costume Construction for Production (1 per semester/maximum of 6) Execution of production projects in construction and shop management. Effective: Fall 1983
Prerequisite: approval of proposed project by instructor prior to registration
THEA 467 Costume Design for Production (1 per semester/maximum of 6) Design and execution of production design projects. 
Effectiive: Fall 1983 
Prerequisite: approval of proposed project by instructor prior to registration

THEA 470 Advanced Topics in Lighting Design (3 per semester/maximum of 6) Advanced Topics in Lighting Design will rotate through opera, dance, non-traditional spaces, architecture, advanced technology, and color theory. 
Effective: Spring 2006 
Prerequisite: THEA 270

THEA 471 Stagelighting Design II (3) Advanced training through lectures and laboratory experience with color, shape, and form as it relates to the specifics of illumination. 
Effective: Summer 1993 
Prerequisite: THEA 470

THEA 472 Lighting Technology (3) An introduction to the basics of electricity, dimmer protocols, lightboard programming, lighting paperwork, and master electrician & assistant lighting design practices. 
Effective: Summer 2005 
Prerequisite: THEA 270 or equivalent

THEA 477 Lighting Design for Production (1 per semester/maximum of 6) Design and execution of design projects. 
Effective: Fall 1983 
Prerequisite: approval of proposed project by instructor prior to registration

Effective: Summer 2005 
Prerequisite: THEA 280

THEA 480B Technical Production IV (3) Discussion of problems of the technical director: personnel management, time management, scheduling, budgeting, purchasing, and the technical drawing of production. 
Effective: Spring 1995 
Prerequisite: THEA 381

THEA 481 Stage and Production Management (3) Production planning, scheduling, assignment of personnel, rehearsal procedures, and budgeting. 
Effective: Fall 1983 
Prerequisite: THEA 170, THEA 180

THEA 484 Sound Recording Techniques (3) Multi-track audio recording and post production techniques. 
Effective: Spring 2011 
Prerequisite: INART 258A or THEA 285

THEA 485 Sound for Theatre Production (3) Aesthetics of live and recorded sound; recording and editing techniques for the stage. 
Effective: Spring 2001 
Prerequisite: THEA 100, THEA 150

THEA 486 Stage Management for Production (1-9) Stage manager for University Theatre production. 
Effective: Summer 1996 
Prerequisite: approval of proposed assignment by instructor prior to registration

THEA 487 Technical Projects for Production (1 per semester/maximum of 6) Execution of practical production projects. 
Effective: Fall 1983 
Prerequisite: approval of proposed project by instructor prior to registration

THEA 489 Theatre Production Practicum (1 per semester) Supervised experience in production techniques. For theatre majors only. 
Effective: Spring 2001 
Prerequisite: THEA 160, THEA 170 or THEA 180

THEA 495 Internship Practicum (1-6 per semester/maximum of 12) Professional field experience in theatre performance, production, and management assignments. 
Effective: Fall 1983 
Prerequisite: approval of internship by instructor prior to registration

THEA 496 Independent Studies (1-18) Creative projects, including research and design, supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Fall 1983

THEA 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. 
Effective: Fall 1983

THEA 497A Properties Design and Construction (3) Design and Construction of properties for the theatre. 
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

THEA 497B Professional Preparation (3) Preparation for professional theatre.
Prerequisite: permission of program

Prerequisite: permission of the program

THEA 497D **Writer's Room** (3) Writing group for the School of Theatre podcast. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

THEA 497F **Comedy Writing** (3) Comedy writing workshop. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: admission to the BFA Musical Theatre Program

THEA 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Effective: Summer 1994

THEA 499 (IL) **Foreign Studies--Theatre Arts** (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005
Prerequisite: approval by department

Last Import from UCM: June 16, 2011 3:00 AM
Training and Development (TRDEV)

TRDEV 418 Instructional Methods in Training and Development (3) Emphasis on teaching techniques and learning principles used by trainers and supervisors in business, health care, and government.
Effective: Spring 1986

TRDEV 421 Presentation Skills for New Trainers (3) The effective use of platform skills for training, including the use of voice, audio-visual aids, group facilitation, and personal presence.
Effective: Summer 1993
Prerequisite: admission to M.ED. program in Training and Development

TRDEV 431 Basic Technology Skills in Training (3) Introduces basic training technology skills: electronic communications, word processing, spreadsheets, databases; provides skills to create and maintain electronic presentations and programs.
Effective: Spring 1999
Prerequisite: admission to the Training and Development Program Training and Development Certificate Program or permission of the Program

TRDEV 432 Video Production in Training (3) Introduces learners to the equipment, design, and production of video instruction for the workplace.
Effective: Spring 2002
Prerequisite: TRDEV 418, TRDEV 431 or permission of program

TRDEV 460 Foundations in Training and Development (3) Roles in training and development, relationships between training and development and other organizational structures, and the principles of training design.
Effective: Spring 1986

TRDEV 465 Performance Analysis (3) This course involves the systematic analysis of employee performance in organizations to identify performance problems, diagnose causes, and specify solutions.
Effective: Spring 2005
Prerequisite: TRDEV 460, TRDEV 418 or permission of the program

TRDEV 470 Human Resource Development Tools and Techniques (3) Examination of contemporary strategies, tools, and techniques for designing human resource functions to promote employee learning and performance within organizations.
Effective: Spring 2005
Prerequisite: TRDEV 460, TRDEV 418 or permission of the program

TRDEV 475 Career and Succession Management (3) This course involves the study of a systematic approach for integrating career planning and succession planning programs in organizations.
Effective: Spring 2005
Prerequisite: TRDEV 460, TRDEV 418 or permission of the program

TRDEV 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1986

Last Import from UCM: June 16, 2011 3:00 AM
Turfgrass (TURF)

TURF 100 Introduction to Turfgrass Management (3) Introduction to turfgrass species, establishment, maintenance, and pest control of turfgrass species used for sports, lawn/utility turf, and golf courses.
Effective: Fall 2001

TURF 230 Turfgrass Pesticides (1) Course covers chemical toxicity, formulations, environmental fate, labels, MSDS, calibration, IPM, safety, handling, storage, and Pennsylvania certification and regulations.
Effective: Spring 1999

TURF 235 The Turfgrass (3) Characterization of the primary plant species used for sports, lawn and utility turf; includes turfgrass morphology, environmental adaptation, and cultural requirements.
Effective: Summer 1992

TURF 238 (HORT 238) Turf and Ornamental Weed Control (3) Students will be introduced to the development of integrated weed management strategies utilizing a variety of cultural and chemical methods.
Effective: Summer 2007
Prerequisite: CHEM 110

TURF 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

TURF 425 Turfgrass Cultural Systems (3) A study of turfgrass maintenance practices and how their interrelationships can be utilized to develop management systems.
Effective: Fall 2001
Prerequisite: SOILS 101, TURF 235

TURF 434 Turfgrass Edaphology (3) Characterization of soil physical properties for the establishment and maintenance of sports turf; includes root-zone construction.
Effective: Fall 2007
Prerequisite: SOILS 101, TURF 235

TURF 435 Turfgrass Nutrition (4) Study of turfgrass nutrition and growth; emphasizing constructed and mineral soil fertility, nutrient uptake and function, and fertilizer use efficiency.
Effective: Spring 2004
Prerequisite: SOILS 101, TURF 235

TURF 436W Turfgrass Management Systems (3) Case study and discussion considering integrated management of selected turfgrass sites; emphasis on problem analysis, principle application, and decision making.
Effective: Fall 1995 Ending: Fall 2011
Prerequisite: TURF 235, TURF 236, TURF 425

TURF 436W Case Studies in Turfgrass Management (3) Case study and discussion considering integrated management of selected turfgrass sites; emphasis on problem analysis, principle application, and decision making.
Prerequisite: TURF 238, TURF 425, PPATH 412

TURF 489 Supervised Experience in College Teaching (1-3) Participate with instructors in teaching and undergraduate turfgrass course. Assist with teaching an evaluation and with development of instructional materials.
Effective: Spring 1998
Prerequisite: TURF 235

TURF 490 Colloquium (1) Oral presentations developed by students in consultation with the course instructor.
Effective: Summer 1997
Prerequisite: seventh semester standing

TURF 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1992
Prerequisite: prior approval of proposed assignment by instructor

TURF 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2000

Last Import from UCM: June 16, 2011 3:00 AM
Ukrainian (UKR)

UKR 001 Elementary Ukrainian I (4) Reading, writing, and speaking Ukrainian.
Effective: Summer 1991

UKR 002 Elementary Ukrainian II (4) Reading, writing, and speaking Ukrainian.
Effective: Summer 1991
Prerequisite: UKR 001

UKR 003 Intermediate Ukrainian (4) Reading, writing, and speaking Ukrainian.
Effective: Summer 1991
Prerequisite: UKR 002

UKR 051 Elementary Intensive Ukrainian I for Graduate Students (3) Intensive introduction to Ukrainian: first half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: graduate standing

UKR 052 Elementary Intensive Ukrainian II for Graduate Students (3) Intensive introduction to Ukrainian: second half of graduate intensive sequence in elementary reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: UKR 051 and graduate standing

UKR 053 Intermediate Intensive Ukrainian for Graduate Students (3) Continued intensive study of Ukrainian at the intermediate level: reading, writing, speaking, listening, cultural contexts.
Effective: Summer 2008
Prerequisite: UKR 052 or equivalent and graduate standing

UKR 099 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

UKR 100 (GH;IL) Ukrainian Culture and Civilization (3) Survey of Ukrainian culture and civilization from the Middle Ages to the present.
Effective: Summer 2005

UKR 196 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2004

UKR 197 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1995

UKR 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

UKR 204 Readings in Ukrainian (3) Readings in Ukrainian literature and journalism.
Effective: Summer 1991
Prerequisite: UKR 003

UKR 294 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

UKR 299 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

UKR 395 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor

UKR 399 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

UKR 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Summer 1994

The Pennsylvania State University
UKR 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small group basis. Effective: Fall 2007

UKR 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction. Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM
Veterinary Science (V SC)

V SC 489 (BIOTC 489) Animal Cell Culture Methods (3) AN OVERVIEW OF ANIMAL CELL CULTURE METHODOLOGY, AND ITS PRACTICAL APPLICATION IN BIOPROCESS TECHNOLOGY.
Effective: Spring 1996
Prerequisite: MICRB 201, MICRB 202; BIOL 230W ORB M B 251

Last Import from UCM: June 16, 2011 3:00 AM
Veterinary and Biomedical Sciences (VB SC)

VB SC 050S **Mechanisms of Disease** (3) Introduction to the study of disease pathogenesis and careers in Animal Health Research and Service.
Effective: Fall 2007

VB SC 097 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2007

VB SC 101 **Careers in Veterinary Medicine and the Allied Professions** (1) Exploring career pathways in veterinary medicine and the allied health industry.
Effective: Summer 2011

VB SC 211 (GN) **The Immune System and Disease** (3) Introduction to the immune system that emphasizes the immune response to infection and consequences of a defective immune response.
Effective: Fall 2007

VB SC 231 **Introduction to Cancer Research and Medicine** (3) An understanding of the terminology, basic concepts, techniques, multidisciplinary approaches and challenges in cancer research and medicine.
Effective: Spring 2011
Prerequisite: BIOL 110

VB SC 280 **Current Issues in Veterinary Medicine** (2) Discussion of the social, ethical and economic aspects of current and emerging issues related to animal ownership and veterinary medicine.
Effective: Fall 2010

VB SC 297 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2007

VB SC 303 **Principles of Animal Disease** (3) Principles involved in the causes of animal diseases; control measures, including sanitation and hygiene.
Effective: Fall 2007
Prerequisite: MICRB 106 or MICRB 201 . Prerequisite or concurrent: AN SC 301

VB SC 330 **Introduction to Molecular Pharmacology** (3) An introduction to the basic principles of pharmacology, drug development and use.
Effective: Summer 2007
Prerequisite: CHEM 201, CHEM 202, BIOL 110, B M B 211;BIOL 230 or B M B 251

VB SC 395 **Internship** (1-10) Independent study and supervised field experience related to the student's professional interest. Limited to students in animal agriculture majors.
Effective: Fall 2007
Prerequisite: fifth-semester standing in an animal agriculture major; approval by department of proposed plan before registration

VB SC 402W (ENT 402) **Biology of Animal Parasites** (3) An introduction to animal parasitology. Emphasis placed on host/parasite interactions, parasites of zoonotic importance, control programs and taxonomy.
Effective: Spring 2010
Prerequisite: BIOL 110

VB SC 405 **Laboratory Animal Science** (3) Principles involved in maintaining laboratory animals. Emphasis is on management, preventive medicine, and surgical considerations used in laboratory animal colonies.
Effective: Spring 2009
Prerequisite: AN SC 201, AN SC 301, BIOL 110

VB SC 407 **Dairy Herd Health Programs** (2) A discussion of health programs for dairy herds to assist in the control of infectious and metabolic diseases of dairy animals.
Effective: Fall 2007
Prerequisite: AN SC 301, AN SC 310, AN SC 427, AN SC 431W

VB SC 418 **Bacterial Pathogenesis** (2) Study of molecular interactions between bacterial pathogens and their hosts.
Effective: Fall 2007
Prerequisite: MICRB 201, MICRB 410

VB SC 420 **General Animal Pathology** (3) Nature and mechanisms of the disease process including degenerations, growth disturbances, inflammation, host-parasite relationships and neoplasia.
Effective: Fall 2007
Prerequisite: AN SC 423 or BIOL 472, MICRB 201, AN SC 301
VB SC 421 (BIOL 421) Comparative Anatomy of Vertebrates (4) The comparative anatomy of representative vertebrate animals, discussed from a descriptive and an evolutionary viewpoint. 
Effective: Spring 2008
Prerequisite: BIOL 240W

VB SC 423W Pathology of Nutritional and Metabolic Diseases (3) Overview of nutritional and metabolic diseases of animals integrating concepts from biochemical and physiologic aberrations to clinical applications. 
Effective: Spring 2008
Prerequisite: B M B 211 or B M B 401, AN SC 301 or equivalent nutrition course

VB SC 425 (AN SC 425) Principles of Avian Diseases (3) Principles of pathogenesis and control of diseases in poultry and other avian populations. Case material used where appropriate. 
Effective: Spring 2009
Prerequisite: AN SC 201, BIOL 110, MICRB 201

VB SC 430 Principles of Toxicology (3) Introduction to the biomedical aspects of toxicology with emphasis on the mechanisms and fate of chemical interaction with biological systems. 
Effective: Spring 2011
Prerequisite: BIOL 110, BIOL 240W; B M B 211 or B M B 401

VB SC 431 (ERM 431) Environmental Toxicology (3) Effects of pollutants on animal health at the chemical, physical, and cellular level. 
Effective: Spring 2011
Prerequisite: BIOL 110, CHEM 110, CHEM 112

VB SC 432 (B M B 432, MICRB 432) Advanced Immunology: Signaling in the Immune System (3) The study of signaling pathways that regulate the immune response. 
Effective: Fall 2007
Prerequisite: B M B 400, MICRB 410

VB SC 433 (B M B 433) Molecular and Cellular Toxicology (3) In-depth coverage of processes by which drugs/chemicals interact with biological systems and the experimental approaches used to study these interactions. 
Effective: Fall 2007
Prerequisite: B M B 401

VB SC 435 (B M B 435, MICRB 435) Viral Pathogenesis (2) A study of the molecular, immunological, and pathological aspects of viral diseases as well as laboratory methods of diagnosis. 
Effective: Fall 2007
Prerequisite: MICRB 201; B M B 251 and B M B 252 or BIOL 110 and BIOL 230W

VB SC 444 Epidemiology of Infectious Diseases (3) An introduction to epidemiology of infectious diseases with emphasis on understanding epidemiologic concepts for identifying, preventing and controlling infectious diseases. 
Effective: Fall 2007
Prerequisite: BIOL 220, STAT 200 or STAT 250

VB SC 445 Molecular Epidemiology of Infectious Diseases (3) A discussion and practicum of the molecular laboratory techniques used to study molecular epidemiology of infectious diseases. 
Effective: Fall 2007
Prerequisite: BIOL 220, STAT 200 or STAT 250 and VB SC 444

VB SC 448W Current Topics in Immunology (3) Study of current approaches and questions driving research in immunology and infectious diseases. 
Effective: Fall 2007
Prerequisite: MICRB 410, B M B 400

VB SC 451 Immunotoxicology of Drugs and Chemicals (3) An in depth discussion of the effect of xenobiotics and drugs on host immune mechanisms. 
Effective: Spring 2008
Prerequisite: VB SC 433 and MICRB 410

VB SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. 
Effective: Fall 2007

VB SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. 
Effective: Fall 2007
Wildlife (WILDL)

(These courses are offered only at the DuBois Campus as part of the two-year Wildlife Technology major.)

**WILDL 101 Introduction to Wildlife Management** (3) Basic principles of wildlife management. Introduction to general ecology and wildlife population dynamics.
Effective: Fall 1985

**WILDL 103 Animal Identification** (3) Identification of mammals, birds, reptiles, and amphibians; introduction to their life histories.
Effective: Fall 1985

**WILDL 106 Wildlife Management Techniques** (4) Overview of laboratory and field techniques for natural resource research and management; scientific writing and computer applications emphasized.
Effective: Spring 1990
Prerequisite: WILDL 101

**WILDL 204 Wildlife Mensuration** (4) Estimation and analysis of animal populations and their habitats, including sampling considerations and basic biometry.
Effective: Spring 1988
Prerequisite: 3 credits in mathematics

**WILDL 207 Outdoor Recreation** (3) Sociology, history, and economics of recreational demand; recreational areas and management procedures.
Effective: Fall 1985

**WILDL 208M Terrestrial Wildlife Management** (3) Ecological characteristics and manipulation of terrestrial habitats; control of wildlife populations.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: FORT 150, FORT 160, WILDL 101, WILDL 103, WILDL 106, WILDL 204

**WILDL 208W Terrestrial Wildlife Management** (3) Ecological characteristics and manipulation of terrestrial habitats; control of wildlife populations.
Effective: Spring 2000
Prerequisite: FORT 150, FORT 160, WILDL 101, WILDL 103, WILDL 106, WILDL 204

**WILDL 209 Animal Handling and Care** (4) Techniques in capturing, marking, and maintaining wild animals in captivity. Wildlife physiology, parasitology, and necropsy procedures are covered.
Effective: Spring 1988
Prerequisite: WILDL 101

**WILDL 211 Aerial Photo Interpretation** (4) Techniques of photo interpretation; type mapping of wildlife environments; photo censusing of wild animals.
Effective: Fall 1985

**WILDL 213 Wetlands and Fisheries Management** (3) Introduction to basic limnology. Ecology and management of swamp, marsh, pond, and stream habitats and their animal populations.
Effective: Summer 1990
Prerequisite: WILDL 101, WILDL 103, WILDL 106, WILDL 204

**WILDL 213H Wetlands and Fisheries Management** (3) Introduction to basic limnology. Ecology and management of swamp, marsh, pond, and stream habitats and their animal populations.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: WILDL 101, WILDL 103, WILDL 106, WILDL 204

**WILDL 295 Internship in Wildlife Technology** (1-6) Supervised off-campus field experience related to student’s major.
Effective: Fall 1983
Prerequisite: prior approval of proposed assignment by instructor.

**WILDL 296 Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

**WILDL 297 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983
Wildlife and Fisheries Science (W F S)

W F S 209 (GN) Wildlife and Fisheries Conservation (3) Survey of current and historical issues in wildlife and fisheries conservation; emphasis on vertebrate biodiversity, habitat management and protection, and populations. Effective: Summer 2002
Prerequisite: BIOL 110 or BIOL 240W

W F S 296 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. Effective: Summer 1994

W F S 300 The Vertebrates (2) Overview of the evolution, systematics, ecology, and behavior of the subphylum vertebrata. Effective: Fall 2001
Prerequisite: BIOL 110

W F S 301 Vertebrate Laboratory (2) Overview of the anatomy, identification, collection, and preservation of the vertebrates. Effective: Fall 2001
Prerequisite: or concurrent: W F S 209; W F S 300

W F S 310 Wildlife and Fisheries Measurements (3) Introduction to field and laboratory approaches for collecting, analyzing, and communicating data regarding wildlife and fish populations and their habitats. Effective: Fall 2001
Prerequisite: or concurrent: W F S 209, STAT 240

W F S 406 Ornithology Laboratory (1) Laboratory and field identification of Pennsylvania birds, avian ecology and behavior, field survey techniques. Effective: Fall 2006
Prerequisite: or concurrent: W F S 209, W F S 407

W F S 407 Ornithology (3) Introduction to the biology, ecology, adaptations, and conservation of birds. Effective: Fall 1996
Prerequisite: BIOL 110, W F S 209

W F S 408 Mammalogy (3) Identification, systematics, characteristics, adaptations, ecology, behavior, natural history and conservation, and socio-economic aspects of mammals. Effective: Spring 1995
Prerequisite: BIOL 110

W F S 409 Mammalogy Laboratory (1) Laboratory and field identification of mammals, ecology and behavior of mammals, field survey techniques. Effective: Fall 2006
Prerequisite: or concurrent: W F S 209, W F S 408

W F S 410 General Fishery Science (3) Introduction to the study, management, and uses of fish populations; methods of investigation, culture, and harvest of fishes. Effective: Fall 2001
Prerequisite: BIOL 210 or W F S 209

W F S 422 Ecology of Fishes (3) Role of fishes in aquatic communities and general ecosystems. Environmental factors influencing fish as individuals, populations, and communities. Effective: Spring 1995
Prerequisite: BIOL 220W or W F S 209

W F S 430 (FOR 430) Conservation Biology (3) The application of biological principles to issues in the conservation of biodiversity. Effective: Spring 1995
Prerequisite: BIOL 220W or FOR 308

Prerequisite: BIOL 110, BIOL 220W, CHEM 110

W F S 436 (E R M 436) Limnological Methods (3) Application of current methodologies to evaluate the biological, chemical, and physical characteristics of aquatic ecosystems. Effective: Spring 2010
Prerequisite: BIOL 110 and CHEM 110

W F S 440 Natural Resources Public Relations (3) The course prepares students to integrate public relations concepts with principles of natural resources management at the community level. Effective: Fall 2003
Prerequisite: CAS 100 seventh-semester standing and 6 credits of W F S FOR or R P M

The Pennsylvania State University
W F S 447W Wildlife Management (3) Management of renewable wildlife resources by applying ecological concepts, habitat evaluation, and decision-making; writing and editing reports are emphasized.
Effective: Fall 2001
Prerequisite: W F S 209 or W F S 309

W F S 450 (E R M 450) Wetland Conservation (3) Wetland types, classification, functions and values; hydrology, soils, and plants; introduction to wetland identification and delineation; wetland regulations.
Effective: Fall 2001
Prerequisite: E R M 300 or W F S 209

W F S 452 Ichthyology (2) Study of the structure, taxonomy, systematics, and natural history of freshwater and marine fishes.
Effective: Spring 1995
Prerequisite: BIOL 110, BIOL 240W

W F S 453 Ichthyology Laboratory (2) Identification of fishes, major fish families, use of keys.
Effective: Spring 2001
Prerequisite: BIOL 110, BIOL 240W. Prerequisite or concurrent: W F S 452

W F S 460 Wildlife Behavior (3) Scholarly discussion and critique of history, concepts, and application of wildlife behavioral concepts to conservation issues.
Effective: Spring 2007
Prerequisite: at least 6 credits in general wildlife or biology

W F S 462 Amphibians and Reptiles (3) Critique of global evolution and conservation of amphibians and reptiles, focusing on Northeastern U.S. natural history and ecology.
Effective: Spring 2009
Prerequisite: 5th semester standing or higher and 6 credits of general biology

W F S 463W Fishery Management (3) Management of sport and commercial fisheries, including biological, political, social, and economic factors; regulations and other management techniques.
Effective: Spring 2001
Prerequisite: W F S 209, W F S 300, W F S 301, W F S 310

W F S 495 Wildlife/Fisheries Internship (1-6) Supervised field experience related to the student's major.
Effective: Spring 1994
Prerequisite: approval of proposed assignment by instructor prior to registration

W F S 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1989

W F S 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1989

W F S 497A Animal Welfare (3) An in-depth review of welfare in wild, farmed, and captive animals used in research or reared for conservation projects.
Prerequisite: BIOL 110, W F S 209

W F S 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM
Women's Studies (WMNST)

WMNST 001 (GS;US;IL) Introduction to Women's Studies (3) Interdisciplinary consideration of the scholarly theories and research pertaining to women's experiences and women's status in contemporary American society.
Effective: Summer 2005

WMNST 001S (GS;US;IL) Introduction to Women's Studies (3) Interdisciplinary consideration of the scholarly theories and research pertaining to women's experiences and women's status in contemporary American society.
Effective: Fall 2009

WMNST 001U (GS;US;IL) Introduction to Women's Studies (3) Interdisciplinary consideration of the scholarly theories and research pertaining to women's experiences and women's status in contemporary American society.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

WMNST 001U (GS;US;IL) Introduction to Women's Studies (3) Interdisciplinary consideration of the scholarly theories and research pertaining to women's experiences and women's status in contemporary American society.

WMNST 003 (GH;US;IL) Introduction to Women, the Humanities, and the Arts (3) Interdisciplinary consideration of primary works and scholarship pertaining to women in the humanities and the arts.
Effective: Summer 2005

WMNST 005 (US) (S T S 005) Introduction to Women in Science, Technology, and Engineering (3) The role of women and gender in science, technology, and engineering.
Effective: Summer 2005 Ending: Summer 2011

WMNST 005S (US) Introduction to Women in Science, Technology, and Engineering (3) The role of women and gender in science, technology, and engineering.
Effective: Summer 2006

WMNST 008 (GH) (PHIL 008) Philosophy and Feminism (3) Explores diverse feminist philosophies of culture and knowledge, and examines gender's role in accounts of reality, truth, morality, and justice.
Effective: Spring 2006

WMNST 083S (GH;US;IL) First-Year Seminar in Women's Studies (3) Critical approaches to the dimensions and directions in Women's Studies.
Effective: Summer 2005

WMNST 083T (GH;US;IL) First-Year Seminar in Women's Studies (3) Critical approaches to the dimensions and directions in Women's Studies.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

WMNST 101 (GH;US) (AAA S 101) The African American Woman (3) The sociological, historical and political experiences of African American women, their roles and contributions to society.
Effective: Summer 2005

WMNST 102 (GH;IL) (AAA S 102) Women of Color: Cross-Cultural Perspective (3) Global examination of value systems of women of color; attention to minority ethnic groups in the United States and developing countries.
Effective: Summer 2005

WMNST 103 (US) (AAA S 103, SOC 103) Racism and Sexism (3) Critical analysis of the structure of race and gender inequality in the contemporary United States.
Effective: Summer 2005

WMNST 104 (GH;US) (AM ST 104) Women and the American Experience (3) Selected aspects of the role of women in United States history and culture from colonial to modern times.
Effective: Summer 2005

WMNST 110 (GS;US) (SOC 110) Sociology of Gender (3) Changing sex role expectations and behavior for men and women in contemporary society.
Effective: Summer 2005
WMNST 116 (GS;US;IL) (HIST 116) **Family and Sex Roles in Modern History** (3) Historical perspectives on the Western family since 1500: gender roles, marriage, sexuality, child rearing, and old age; emphasis on United States.
Effective: Spring 2006

WMNST 117 (GH;US;IL) (HIST 117) **Women in Modern History** (3) Modernization and women: changing images and roles since mid-eighteenth century in the family, workshop, politics, society. Cross-cultural comparisons.
Effective: Summer 2005

WMNST 117M (GH;US;IL) (HIST 117M) **Women in Modern History** (3) Modernization and women: changing images and roles since mid-eighteenth century in the family, workshop, politics, society. Cross-cultural comparisons.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

WMNST 136 (US) (LER 136) **Race, Gender, and Employment** (3) Employment relations and legislative and policy responses to labor force issues of racial and gender inequality.
Effective: Spring 2008

WMNST 137 (GH;US;IL) (RL ST 137) **Women and Religion** (3) Jewish and Christian religious views on womanhood; thought and lives of important religious women; and feminist understandings of these.
Effective: Spring 2006
Prerequisite: third-semester standing

WMNST 157 (US) (S T S 157) **Science, Technology, and Gender** (3) The role of women and gender in science, technology, and engineering.
Effective: Fall 2011 Future: Fall 2011

WMNST 194 (GH;US;IL) (ENGL 194) **Women Writers** (3) Short stories, novels, poetry, drama, and essays by British, American, and other English-speaking women writers.
Effective: Summer 2005

WMNST 197 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1995

WMNST 199 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

WMNST 202 (GS;IL) (AAA S 202) **Gender Dynamics in Africa** (3) Critical analysis of multidisciplinary research on relations between men and women in Africa and critique of Western feminist theories.
Effective: Summer 2005

WMNST 205 (US) (COMM 205) **Women, Minorities, and the Media** (3) Analysis of historical, economic, legal, political, and social implications of the relationship between women, minorities, and the mass media.
Effective: Summer 2005

WMNST 225 (GA;GH) (ENGL 225, ART H 225) **Sexuality and Modern Visual Culture** (3) An examination of the visual expression of gender and sexual identities in English-speaking cultures since the late nineteenth century.
Effective: Summer 2009

WMNST 250 (US) (HD FS 250) **Sexual Identity Over the Lifespan** (3) Concepts of affectional and sexual orientation over lifespan, with emphasis on lesbian and gay male personal, family, and community adaptation.
Effective: Summer 2005
Prerequisite: 3 credits in Hd FS or 3 credits in behavioral sciences

WMNST 270 (FR 270) **Race and Gender in Literature Translated from French** (3) A critical presentation, taught in English, of changing ideas and values on race and gender in French and Francophone literatures.
Effective: Spring 2005
Prerequisite: FR 351

WMNST 280 (GH;IL) (J ST 280, RL ST 280) **Women and Judaism** (3) Explores the Jewish views of women that have influenced the roles of women within both the religion and Western culture.
Effective: Fall 2006

WMNST 294 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

WMNST 296 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

The Pennsylvania State University
WMNST 297 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1984

WMNST 299 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

WMNST 300 (US) (LTNST 300) **Latina Feminisms** (3) This course examines the historical development, theoretical premises, and political, social, and artistic contributions of Latina feminisms in the United States.
Effective: Summer 2006
Prerequisite: LTNST 100

WMNST 301 **Introduction to Feminist Thought** (3) An interdisciplinary survey of historical and contemporary feminist theories in both the United States and international contexts.
Effective: Summer 1996
Prerequisite: WMNST 001 or WMNST 003

WMNST 364 (GS;US) (AAA S 364) **Black & White Sexuality** (3) This course explains how narrow ways of thinking limit our understanding of the diverse expressions of human sexuality.
Effective: Spring 2007

WMNST 395 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1996

WMNST 399 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

WMNST 400 (US;IL) **Feminist Theory** (3) Consideration of feminist theories of women's experience in transforming understanding, reconceptualizing old problems, raising new ones, and expanding traditional disciplines.
Effective: Summer 2005
Prerequisite: WMNST 301

WMNST 401 **Feminist Perspectives on Research and Teaching** (3) Feminist approaches to methodological issues in research and teaching in the social sciences and the humanities.
Effective: Fall 2009
Prerequisite: WMNST 001 or WMNST 003 or WMNST 301

WMNST 407 (US) (THEA 407) **Women and Theatre** (3) A study of theatre practice and dramatic literature as informed by issues of gender, race, and ethnic background.
Effective: Summer 2005
Prerequisite: THEA 100

WMNST 412 (EDTHP 412) **Education and the Status of Women** (3) An examination of the relationship of education to the status of women in American society.
Effective: Spring 2005

WMNST 416 (US;IL) (AAA S 416, S T S 416) **Race, Gender and Science** (3) The class will focus on race and gender as products of science, and how societal values shape scientific activity.
Effective: Summer 2008
Prerequisite: 6 credits in S T S WMNST or AAA S

WMNST 420 (US;IL) (CED 420, R SOC 420) **Women in Developing Countries** (3) Analysis of women's work, experiences, and development policies and practices in Africa, Asia, and Latin America.
Effective: Fall 2009

WMNST 421 (IL) (HIST 421) **The History of European Women** (3) European women's lives from the Middle Ages to the present.
Effective: Spring 2006
Prerequisite: WMNST 001, WMNST 003, WMNST 116 or WMNST 117

WMNST 423 (US) (CRIMJ 423, CRIM 423) **Sexual and Domestic Violence** (3) Legal, sociological, and psychological perspectives of sexual and domestic violence.
Effective: Spring 2008
Prerequisite: CRIM 100

WMNST 424 (US) (KINES 424) **Women and Sport** (3) An interdisciplinary approach to contemporary issues related to women and sport from historical, physiological, psychological, and sociological perspectives.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 231, PSYCH 479, SOC 001 or WMNST 001
WMNST 426Y (US;IL) (GEOG 426Y) Gender and Geography (3) Description and explanation of the links between gender relations and spatial structures; gender and work, social services, and neighborhood activism. Effective: Summer 2011 Prerequisite: GEOG 020, GEOG 126, GEOG 120, WMNST 001

WMNST 428 (US;IL) (PL SC 428) Gender and Politics (3) Gender in politics in the United States and around the world; major areas of women and politics research. Effective: Fall 2007 Prerequisite: 3 credits in political science or women's studies

WMNST 430 (US) (AM ST 430) Women in American Society (3) A historical study of women's roles and experiences in the United States. Effective: Spring 2008 Prerequisite: 6 credits of American Studies Sociology or Women's Studies

WMNST 432 (US) Women in Politics in the U.S. (3) Course examines the U.S. women's movements, the participation of women in politics, and selected areas of public policy. Effective: Spring 2008 Prerequisite: 3 credits in political science or women's studies

WMNST 438 (PHIL 438) Feminist Philosophy (3) Examines the central currents of feminist philosophy, selected problems and concepts regarding difference, gender and sex, identity, and political culture. Effective: Fall 2007 Prerequisite: 9 credits of philosophy including 6 credits of philosophy of the 200-level or 5th semester standing

WMNST 452 (US) (BB H 452, NURS 452) Women's Health Issues (3) Exploration of major health issues concerning women today, with an emphasis on social, cultural, and medical influences. Effective: Spring 2007 Prerequisite: BIOL 141 or PSYCH 100

WMNST 453 (US) (CRIMJ 453, CRIM 453) Women and the Criminal Justice System (3) This course focuses on the experiences of women as offenders, victims, and professionals in the criminal justice system. Effective: Spring 2008 Prerequisite: CRIMJ 100 or WMNST 001

WMNST 455 (US) (CAS 455) Gender Roles in Communication (3) Explores the literature on gender research in the discipline of human communication. Effective: Summer 2005 Prerequisite: CAS 202

WMNST 456 (SOC 456) Gender, Occupations, and Professions (3) The role of gender in shaping contemporary North American patterns of employment, occupational roles, and statuses. Effective: Spring 1991 Prerequisite: WMNST 001 or 3 credits in Sociology

WMNST 457 (US;IL) (HIST 457, STS 457) The History of Women in Science (3) Critical analysis of the roles women, gender, and minorities have played in the natural sciences. Effective: Spring 2006 Ending: Summer 2011 Prerequisite: WMNST 001, WMNST 003, WMNST 005, WMNST 116 or WMNST 117

WMNST 458 (BB H 458) Critical Issues in Reproduction (3) Examination and analysis of the new reproductive technologies from the standpoint of medical ethics, feminism, and sociocultural influences. Effective: Spring 2007 Prerequisite: BIOL 141 or PSYCH 100

WMNST 462 (US) (ENGL 462) Reading Black, Reading Feminist (3) Female identity and its construction in textual representations of gender, class, color, and cultural difference in English-language literatures. Effective: Summer 2005 Prerequisite: ENGL 015 or ENGL 030

WMNST 464 (US) (BE SC 464) Feminine/Masculine (3) Study of sex role learning; investigating feminine/masculine labeling; implications for contemporary society. Effective: Spring 2008 Prerequisite: general psychology or general sociology

WMNST 466 (US;IL) (HIST 466) Lesbian and Gay History (3) Critical exploration of the history of sexuality, focusing especially on the emergence of modern lesbian and gay identities. Effective: Summer 2005 Prerequisite: WMNST 001, WMNST 117

WMNST 471 (US) (PSYCH 479) The Psychology of Gender (3) Theories and research on gender differences and gender roles. Emphasis on women's and men's current positions in society. Effective: Spring 2007 Prerequisite: PSYCH 100, PSYCH 221

WMNST 472 (LER 472) Work-Life Practices and Policies (3) Explore the causes and consequences of conflicts between

The Pennsylvania State University
work, family, and other life commitments, and how these may be resolved.
Effective: Spring 2008
Prerequisite: 3 credits of LER

WMNST 489 (ENGL 489) **British Women Writers** (3) A study of selected British women writers.
Effective: Spring 2008
Prerequisite: 6 credits of ENGL

WMNST 490 (US;IL) (ENGL 490) **Women Writers and Their Worlds** (3) American and British literature written from the perspective of women.
Effective: Summer 2005
Prerequisite: ENGL 015 or ENGL 030

WMNST 491 (AM ST 476, ENGL 492) **American Women Writers** (3) A study of selected American women writers.
Effective: Spring 2008
Prerequisite: 6 credits of ENGL

WMNST 492W **Current Feminist Issues** (3) Critical analysis of major contemporary feminist research and writing in the arts, humanities, social and natural sciences.
Effective: Spring 2002
Prerequisite: WMNST 301, WMNST 302

WMNST 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

WMNST 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

WMNST 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 1998
Prerequisite: prior approval of proposed assignment by instructor

WMNST 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside scope of formal courses.
Effective: Fall 1983

WMNST 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1984

WMNST 497A **Latin American and Caribbean Cultures** (3) This course examines historical and cultural constructions of race and gender in Latin America and the Caribbean.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

WMNST 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM
Wood Products (W P)

W P 200W (FOR 200W) Professional Careers in Forest Resources (3) Introduction to managing forests for products and services to meet human needs; developing career goals and an academic plan.
Effective: Spring 1996
Concurrent: W P 203

W P 203 Anatomical Properties of Wood (1) Provide information on tree form/growth, cell wall formation/composition, structure of wood/bark cells; macroscopic/microscopic identification of hardwood/softwood cells.
Effective: Spring 2001

W P 296 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1993

W P 297 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1993

W P 337 Wood Technology (2) An introduction to forest tree structure, function, and growth and the identification of important commercial hardwoods and softwoods.
Effective: Summer 1997
Prerequisite: W P 203

W P 400 Properties of Wood (2) Chemical Structure and Mechanical Properties of Wood Composites.
Effective: Summer 2003
Prerequisite: W P 200W

W P 411 Wood-Environmental Relationships (4) Material composition and structure; basic and derived physical properties; moisture movement in wood; methods and techniques of drying wood.
Effective: Spring 2001
Prerequisite: or concurrent: W P 200W, W P 203

W P 412 Wood in Structures (3) Behavior and design of solid, laminated, and plywood wood beams, trusses, columns, and foundations. Wood construction details.
Effective: Summer 1997
Prerequisite: W P 200W, W P 203

W P 413 The Chemistry of Wood (3) Chemical composition, reactions, and properties in relation to products and the uses of wood.
Effective: Summer 1997
Prerequisite: W P 200W, W P 203

W P 416 Wood Industries Management Development (3) Managerial concepts and issues important to forest products organizations will help prepare students to assume management-level positions.
Effective: Spring 2004
Prerequisite: W P 200W

W P 417 Wood Products Manufacturing Systems and Processes (4) Description of systems and processes used in the manufacture of wood products.
Effective: Summer 1997
Prerequisite: W P 200W, W P 203 and sixth-semester standing

W P 418 Chemical Processing of Wood (4) Principles and practices of basic operations in converting wood and wood waste into useful chemicals and modified cellulose products.
Effective: Summer 1997
Prerequisite: W P 200W, W P 203

W P 423 Deterioration and Protection of Wood Products (2) Timber and wood deterioration from fungi, insects, fire; treatment of wood products for protection.
Effective: Fall 1996
Prerequisite: W P 203

W P 435 Wood Products Production and Sales Management (3) Wood products production management with emphasis on investment decision-making, personal selling, and sales management.
Effective: Fall 1996
Prerequisite: W P 200W

W P 437W Wood Industries Marketing Management (4) Examination of major international wood products market segments in terms of products, distribution, industry structure, and strategic management issues.
Effective: Summer 1997
Prerequisite: W P 200W, W P 203

W P 438 Business Concepts for Wood Manufacturing (4) The course will cover manufacturing strategies and related

The Pennsylvania State University
financial measures in a wood production environment.
Effective: Summer 2003
Prerequisite: W P 200W

W P 460 Wood Products Industrial Environmental Control (3) Wood products industrial environmental control technologies and strategies for pollution abatement.
Effective: Summer 1995
Prerequisite: fifth semester standing

W P 490 Wood Products Colloquium (1) Presentations and discussions of solutions to problems within the forest products industry.
Effective: Spring 1993
Prerequisite: seventh-semester standing

W P 495 Wood Products Internship (1-6) Supervised field experience related to the student's major.
Effective: Spring 1993
Prerequisite: approval of proposed assignment by instructor prior to registration.

W P 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1993

W P 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1993

W P 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Workforce Education and Development (WF ED)

WF ED 001 **Education for Work: Trends and Issues** (3) Overview of the history and philosophies of education for employment, current issues, and school to work transition system.
Effective: Summer 1996

WF ED 100 **Orientation to Teaching Vocational Industrial Education/Health Occupations Education Subjects** (2) Basic elements of preparing to teach vocational trade and industrial/health occupations education subjects in the schools of Pennsylvania.
Effective: Summer 1996

WF ED 101 **Early Field Experience in Teaching Vocational Industrial Education/Health Occupations Education Subjects** (1) Discussion and observation of in-school practices to aid the student in making vocational industrial education/health occupations education career decisions.
Effective: Summer 1996

WF ED 105 **Integrated Curriculum Implementation** (3) Occupational analysis for instructional planning; emphasis on instructional methods to deliver a competency based program in an integrated learning environment.
Effective: Summer 1996
Prerequisite: EDPSY 014

WF ED 106 **Program and Facilities Management** (3) Organization and management of learning laboratory to facilitate the delivery of a competency based program in a safe environment.
Effective: Fall 2001

WF ED 197 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1996

WF ED 198 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1996

WF ED 207W **Assessment Techniques** (3) Assessment, recording, and reporting of learning in an integrated competency based vocational education system.
Effective: Summer 1996
Prerequisite: WF ED 105

WF ED 270 **Introduction to Industrial Training** (3) Overview of training profession. Introduction to economic and psychological foundations. Examination of relationship of industrial training to education.
Effective: Spring 2003

WF ED 296 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1996

WF ED 297 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1996

WF ED 298 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1996

WF ED 310 **Leadership Competencies for Supervisors** (3) Designed to teach contemporary supervisory leadership competencies for mid- career learners with front-line supervisory responsibilities in the workplace.
Effective: Summer 2011
Prerequisite: two years of work experience or fourth-semester standing or prior approval by instructor

WF ED 323 **Vocational Student Organizations** (3) Methods in originating, managing, and advising vocational student organizations.
Effective: Summer 1996

WF ED 395A **Trade and Industrial Occupational Experience** (1-8 per semester/maximum of 24) Individual work experience in manufacturing environment or skilled craft area to develop professional competence in specific occupation.
Effective: Summer 1996

The Pennsylvania State University
WF ED 395B **Occupational Home Economics Work Experience** (1-8 per semester, maximum of 24) Individual work experience in service occupations such as food service, textile production, or child care. Effective: Summer 1996
Prerequisite: completion of an occupational learning period in the field of certification or field of specialization

WF ED 395C **Health Occupations Work Experience** (1-8 per semester, maximum of 24) Individual work experience in an allied or professional healthcare setting. Effective: Summer 1996
Prerequisite: completion of a two-year formal learning period in the field of specialization

WF ED 395D **Occupational Work Experience** (1-8 per semester, maximum of 24) Individual work experience in the manufacturing, health, service, or financial arena. Effective: Summer 1996

WF ED 397 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 1996

WF ED 398 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 1996

WF ED 402 **Supervision of Vocational Education** (3) For administrators, supervisors, and teachers responsible for improvement of instruction through supervision or for students preparing for supervisory work. Effective: Fall 2001

WF ED 405 **Project Management for Professionals** (3) Covers the essential concepts and skills needed to make effective contributions on projects, on time and within budget. Effective: Summer 2011
Prerequisite: two years of work experience or fourth-semester standing or prior approval by instructor

WF ED 410 **Leadership Competencies for Professionals** (3) Designed to teach contemporary professional leadership competencies for workforce professionals who do not currently have supervisory responsibilities. Effective: Summer 2011
Prerequisite: two years of work experience or fourth-semester standing or prior approval by instructor

WF ED 413 **Vocational Education for Special-Needs Learners** (3) Introduction to program modifications, supplementary services, and resources required for special-needs learners in vocational and practical arts education programs. Effective: Fall 2001

WF ED 422 **Integrating Communication Skills into the Vocational Classroom** (3) Students completing this course will demonstrate their ability to integrate oral, written, visual communication skills into their occupational classroom. Effective: Summer 1996

WF ED 441 **Conceptual and Legal Bases for Cooperative Vocational Education** (2) History, conceptual and legal bases for a cooperative vocational education program. Effective: Summer 1996
Prerequisite: WF ED 445

WF ED 442 **Operating Cooperative Vocational Education Programs** (2) Student and training station selection, training plan and related subject development, records and reporting systems, school-industry coordination. Effective: Summer 1996
Prerequisite: WF ED 441

WF ED 445 **Vocational Guidance** (3) Problems and possibilities of vocational guidance; the field of guidance and guidance literature; methods of field work; school guidance techniques. Effective: Summer 1996
Prerequisite: WF ED 105 ; fourth-semester standing

WF ED 450 (US;IL) **Cultural Diversity in the Workplace** (3) Provides opportunities for students to explore different cultures and mores that are changing the dynamics of the workplace. Effective: Fall 2006

WF ED 471 **Training in Industry and Business** (3) Appraisal of training functions and development of competencies in work analysis, design, development, delivery, and evaluation of training. Effective: Spring 2001
Prerequisite: seventh-semester standing or higher

WF ED 495 **Internship** (1-6) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships. Written and oral critique of activity required. Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor

The Pennsylvania State University
WF ED 495A **Cooperative Education Practicum** (2) Validation of competencies learned in prerequisite courses during interaction with professional staff while functioning under the supervision of a certified cooperative coordinator. Effective: Summer 1996 Prerequisite: WF ED 445

WF ED 495C **Student Teaching** (10) Supervised observation and practice teaching in approved vocational industrial schools/health occupations education settings. Effective: Spring 1997 Prerequisite: successful completion of occupational competency evaluation. PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check. (Forms: 228 Chambers)

WF ED 495D **Instructional Internship in Industrial Training** (5) Supervised internship in industrial training. Interns will be expected to perform instructional duties in industrial environments. Effective: Summer 1996 Prerequisite: WF ED 105, WF ED 106, WF ED 207W, WF ED 270, WF ED 471; successful completion of occupational competency examination

WF ED 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Effective: Summer 1996

WF ED 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 1996

WF ED 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 1996

WF ED 498A **Leadership Competencies for Supervisors** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2011 Ending: Summer 2011

WF ED 498A **Leadership Competencies for Professionals** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

WF ED 498B **The PA Family and Consumer Sciences Academic Standards: Teaching Students in the Digital Age** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Summer 2011 Ending: Summer 2011

WF ED 498B **Project Management for Professionals** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

WF ED 498C (CN ED 498A) **Facilitating Career Development** (3) Facilitating Career Development - Students acquire 12 career development facilitation competencies. Upon successful completion, students may apply for the GCDF certification. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

WF ED 498D **Lean-Sigma for Professionals** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest. Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Last Import from UCM: June 16, 2011 3:00 AM
World Languages Education (WL ED)

WL ED 295A Early Field Experience for World Languages Teacher Preparation (3) Selected observation of schooling situations in Pre-K-1st grade settings focusing on language acquisition/language teaching. Effective: Summer 2004
Prerequisite: Third-semester standing; PA Act 34 and Act 151 Clearances required; FBI background information check; and Professional Liability Insurance. Concurrent: WL ED 300

WL ED 300 Foundations of Second Language Teaching (3) Critical understanding of basic concepts and principles in second language acquisition and teaching. Effective: Summer 2004
Concurrent: WL ED 295A

WL ED 400 Foundations of Language in Second Language Teaching (3) Critical understanding of basic concepts and principles in second language acquisition and teaching. Effective: Summer 2004
Prerequisite: PA Instructional I or II teaching certificate

WL ED 411 Methods of Teaching World Languages in Grades 1-5 (3) Exploration of the complexity of teaching World Languages and development of curricular designs for teaching in grades 1-5 schools. Effective: Summer 2004
Prerequisite: EDPSY 014, EDTHP 115, WL ED 295A, WL ED 300 Concurrent: WL ED 495B

WL ED 412W Methods of Teaching World Languages in Grades 6-12 (3) Exploring the complexity of teaching World Languages and development of curricular designs for teaching World Languages in grades 6-12. Effective: Spring 2010
Prerequisite: WL ED 411, WL ED 495B Concurrent: WL ED 495C

WL ED 444 (CI ED 444) Language, Culture and the Classroom: Issues for Practitioners (3) Critical understanding of cultural linguistic diversity to facilitate the inclusion of English Language Learners in a globalized classroom. Effective: Fall 2007
Prerequisite: WL ED 300 or WL ED 400

WL ED 483 Evaluating Schools Performances and Programs with English Language Learners (ELLs) (3) Using/adapting multiple techniques to assess English Language Learners (ELLs) language and other school subjects. Effective: Summer 2004
Prerequisite: WL ED 300 or WL ED 400

WL ED 495B Field Experience for World Languages Teacher Preparation in Grades 1-5 (3) Practicum. Prospective World Language teachers demonstrate knowledge on second language learning/teaching and educational theories (Grades 1-5). Effective: Spring 2009
Prerequisite: EDPSY 014, EDTHP 115, WL ED 295A, WL ED 300 PA Act 34 and Act 151 Clearances required; FBI background information check; and Professional Liability insurance. Concurrent: WL ED 411

WL ED 495C Field Experience for World Languages Teacher Preparation in Grades 6-12 (3) Practicum. Prospective World Language teachers demonstrate knowledge on second language learning/teaching and educational theories (Grades 6-12). Effective: Spring 2009
Prerequisite: WL ED 411; WL ED 495B PA Act 34 and Act 151 Clearances required; FBI background information check; and Professional Liability insurance. Concurrent: WL ED 412

Last Import from UCM: June 16, 2011 3:00 AM
University Course Descriptions

COURSE-NUMBERING SYSTEM

These course descriptions are arranged alphabetically. If any course cannot be located readily, refer to the index. Multiple offerings may be accommodated by the use of suffixes A, B, etc. Courses are numbered as follows:

UNDERGRADUATE COURSES (1 to 399): General courses accepted in fulfillment of requirements for the bachelor's degrees.

ADVANCED UNDERGRADUATE COURSES (400 to 499): Courses open to graduate students and to juniors and seniors and, with the special written permission of the head of the department or the chair of the program sponsoring the course, to qualified students in earlier semesters.

GRADUATE COURSES (500 to 699; 800 to 899): Courses restricted to students registered in the Graduate School, seniors with an average of at least 3.50, and other students who have been granted permission to enroll by the dean of the Graduate School. These courses are described in the Penn State Graduate Degree Programs Bulletin.

MEDICAL COURSES (700-799): Courses restricted to students registered in the College of Medicine.

LAW COURSES (900-999): Courses restricted to students registered in The Dickinson School of Law.

COMMON COURSE NUMBERS

The following course numbers for which students may register have been set up for common use by major programs, with University Senate approval, to encourage innovation and provide flexibility in designing programs, but in no case may a course be scheduled for 0 credits. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

097, 197, 297, 397, 497; 098, 198, 298, 398, 498. SPECIAL TOPICS (1-9) (Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.) Several different topics may be taught in one year or semester. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

099, 199, 299, 399, 499. (GI) FOREIGN STUDIES (1-12) (Courses offered in foreign countries by individual or group instruction.) A specific title may be used in each instance and will be entered on the student’s transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

187 FIRST-YEAR SEMINAR Listed under some liberal art-related academic headings, this course has prerequisites of first-semester standing and enrollment in the College of the Liberal Arts. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

294, 494. RESEARCH PROJECT COURSES (1-12) (Supervised student activities on research projects identified on an individual or small-group basis.) A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

295, 395, 495. INTERNSHIP (1-18) (Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.) A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc. Prerequisite: prior approval of proposed assignment by instructor.

296, 496. INDEPENDENT STUDIES (1-18) (Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.) A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc. Students may not register for these courses without prior written approval of a faculty member in the department in which the courses are listed.

GENERAL EDUCATION COURSE DESIGNATIONS

Courses that appear in this bulletin with the following designations have been approved for General Education. See http://bulletins.psu.edu/bulletins/bluebook/general_education.cfm for further information.

- Skills Courses
  - Writing/Speaking — GWS
  - Quantification — GQ

- Knowledge Domains Courses
  - Health and Physical Activity — GHA (formerly Health Sciences--GHS and Physical Education--GPE)
  - Natural Sciences — GN
  - Arts — GA
  - Humanities—GH
  - Social and Behavioral Sciences — GS

DESIGNATIONS FOR ADDITIONAL REQUIREMENTS

In addition to the General Education degree requirements, every baccalaureate degree student will also complete the United State Cultures (US) and International Cultures (IL), Writing Across the Curriculum (M, W, Y, and X), and First-Year Seminar (S, T, X, or PSU designation) requirements.
Courses that appear in this bulletin with an H, M, or T suffix following the course number are identified as honors courses. University Scholars Program students may participate in honors courses. In addition, any University Senate approved course may be offered with the honors suffix identification with the approval of the University Scholars Program. The honors identification will be entered on the student's transcript.

CREDITS AND HOURS

Credits are awarded on the semester-hour basis. According to Senate Policy 42-23, a total of at least forty hours of work planned and arranged by the University faculty is required for the average student to gain 1 credit. While the distribution of time varies from course to course, generally one-third of the time is devoted to formal instruction, such as lecture, recitation, laboratory, field trips, etc., and two-thirds of the time to outside preparation.

Credits, classroom work, and practicum work

The number of credits for each course is indicated in parentheses and can be earned with classroom, practicum, or laboratory work as designated in the Schedule of Courses, accessible through the Registrar's home page at www.psu.edu/registrar.

A typical period is fifty minutes.

A department may schedule an entire section in an undergraduate course for fewer credits than the maximum authorized. In 400-level courses, a department may schedule an individual student for fewer credits than the maximum authorized. In no case, however, may the course be scheduled for 0 credit, or may the total credits scheduled for any student exceed the maximum number authorized for the course.

Courses that may be repeated and variable credit courses

If a course may be repeated, the words "per semester" follow the number of credits--for example (3 credits per semester). These courses may be repeated indefinitely unless the credits are followed by the maximum number of credits allowed, such as (3 per semester, maximum of 12).

Courses may have variable credits, such as (1-3), (2-6), or (3-10). Here, the larger number signifies the total credits that can be accumulated for the course over an indefinite number of semesters, unless otherwise specified. For example, a course listed with (1-6) could be taken six semesters for 1 credit each semester, or two semesters for 3 credits each semester, or once for 6 credits, etc.

In some courses with variable credits, students may be permitted to accumulate more than the larger number shown. Such courses will be listed as, for example, (1-3 per semester, maximum of 12).

Any special departmental limitations are indicated by footnotes.

PREREQUISITE AND CONCURRENT COURSES

Prerequisites are approximations of the necessary prior specific or general academic knowledge, background, or semester standing required in order to succeed academically in a specific course. Concurrent courses are to be taken in the same semester. The course instructor has the right to limit the students in the course to those who have the stated prerequisites. If this limitation is exercised, it must occur before the end of the course add period.
Accounting (ACCTG)

**ACCTG 151 Introductory Financial Accounting I (3)** Basic concepts, principles, and practices for the recording, summarizing, and interpreting of accounting data.

**Introductory Financial Accounting I (3)**

General Education: None  
Diversity: None  
Bachelor of Arts: None  
Effective: Summer 1995

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Accounting (ACCTG)

ACCTG 152 Introductory Financial Accounting II (3) Accounting for partnerships, corporations, cash flows, certain liabilities and assets, and the analysis of financial statements.

Introductory Financial Accounting II (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 1995
Prerequisite: ACCTG 151

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Accounting (ACCTG)

ACCTG 160 Cost Accounting (3) Use of standard cost accounting procedures to present cost and budget statements as a means of providing managerial control. Students may not receive credit for both ACCTG 160 and ACCTG 404.

Cost Accounting (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2008
Prerequisite: ACCTG 151, ACCTG 152

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Accounting (ACCTG)

**ACCTG 197 Special Topics (1-9)** Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.

**Special Topics (1-9)**

General Education: None  
Diversity: None  
Bachelor of Arts: None  
Effective: Spring 2008

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Accounting (ACCTG)

ACCTG 186 Federal Tax Accounting (3) Tax planning and compliance with federal income tax rules and regulations, especially those affecting individuals.

Federal Tax Accounting (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2008
Prerequisite: ACCTG 151, ACCTG 152

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Accounting (ACCTG)

ACCTG 199 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Foreign Studies (1-12)

General Education: None
Diversity: IL
Bachelor of Arts: None
Effective: Summer 2007

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Accounting (ACCTG)

ACCTG 201 Introductory Financial Accounting (3)
This course is designed as an introductory course providing the first steps to an understanding of the basic principles of accounting from a financial perspective. Because business administration students need to understand the basic principles of financial accounting as fundamental to their field, they need to be grounded in the knowledge of basic concepts, principles, and practices for the recording, summarizing, and interpreting of accounting data. Specifically, acknowledge of accounting for partnerships, corporations, cash flows, certain liabilities and assets, and the analysis of financial statements are presented. Some financial accounting methods, theory and concepts as well as problem analysis in applying concepts to financial statements is also introduced.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2004

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Accounting (ACCTG)

ACCTG 202 Introductory Managerial Accounting (3) Actual and standard cost system, managerial use of cost, data, budgeting and performance evaluation.

ACCTG 202 Introductory Managerial Accounting (3)
This course is designed as an introductory course providing the first steps to an understanding of the basic principles of accounting from a managerial perspective. Because business administration students need to understand the basic principles of managerial accounting as fundamental to their field, they need to be grounded in the knowledge of actual and standard cost systems, the use of cost data, and budgeting and performance evaluation. More specifically, students will be introduced to:
1) principles of manufacturing cost
2) cost determination
3) cost behavior
4) cost-benefit analysis
5) standard cost budgeting and variance analysis in performance evaluation
6) capital investment decisions
7) product pricing decisions
In the course students will also be introduced to the elements of investor decision making.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2004
Prerequisite: ACCTG 201

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Accounting (ACCTG)

ACCTG 211H Financial and Managerial Accounting for Decision Making (4) Introduction to the role of accounting numbers in the process of managing a business and in investor decision making.

ACCTG 211H Financial and Managerial Accounting for Decision Making (4)

The objective of this course is to introduce students to the discipline of accounting through an introduction to two of accounting's sub-disciplines, financial and managerial accounting. The more specific purpose is to provide students a basic understanding of the role of financial and managerial accounting information in the decisions of capital market participants external to a business enterprise (e.g., stockholders, banks, financial analysts, prospective stockholders), and in the decisions of those who manage business enterprises. Accounting information has an important role in the resource allocation process in our socio-economic system as a whole, as well as in each individual business enterprise. This course provides students an understanding of (1) the nature of the accounting function, and (2) how the information in accounting reports are used by various decision makers in their resource allocation decisions.

In this course students will develop an understanding of (a) the five activity dimensions of accounting (the collection, recording, analysis, interpretation and reporting of information to decision makers for (mainly) their investment decisions), (b) the issues surrounding the five activity dimensions, (c) the environment in which accounting is practiced, and (d) what information is used in a number of specific decision situations, and how such information is used in such decision situations. The analysis, interpretation and decision-making orientation of this course includes a study of the procedural (mechanical and processing) aspects of the recording activity dimension which is an important means to the end --where the end is the analysis and interpretation of the information, and the reports produced by the recording/processing part of accounting. Through this focus on the recording activity dimension, students will obtain an understanding of (a) the nature and quality (strengths and weaknesses) of accounting information, (b) how to proceed in analyzing and interpreting accounting information, and (c) numerous other aspects of financial and managerial accounting.

This course is an important background course for all business majors, as well as for numerous non-business majors. For accounting majors it is a prerequisite for ACCTG 306, 404, and 471.

The course format consists of lectures, outside reading, class discussion, projects and homework assignments.

The semester grade for this course will be determined by a weighted average of performance on mainly exams, quizzes, projects and participation.

Accounting (ACCTG)

ACCTG 211 Financial and Managerial Accounting for Decision Making (4) Introduction to the role of accounting numbers in the process of managing a business and in investor decision making.

The objective of this course is to introduce students to the discipline of accounting through an introduction to two of accounting's sub-disciplines, financial and managerial accounting. The more specific purpose is to provide students a basic understanding of the role of financial and managerial accounting information in the decisions of capital market participants external to a business enterprise (e.g., stockholders, banks, financial analysts, prospective stockholders), and in the decisions of those who manage business enterprises. Accounting information has an important role in the resource allocation process in our socio-economic system as a whole, as well as in each individual business enterprise. This course provides students an understanding of (1) the nature of the accounting function, and (2) how the information in accounting reports are used by various decision makers in their resource allocation decisions.

In this course students will develop an understanding of (a) the five activity dimensions of accounting (the collection, recording, analysis, interpretation and reporting of information to decision makers for (mainly) their investment decisions), (b) the issues surrounding the five activity dimensions, (c) the environment in which accounting is practiced, and (d) what information is used in a number of specific decision situations, and how such information is used in such decision situations. The analysis, interpretation and decision-making orientation of this course includes a study of the procedural (mechanical and processing) aspects of the recording activity dimension which is an important means to the end --where the end is the analysis and interpretation of the information, and the reports produced by the recording/processing part of accounting. Through this focus on the recording activity dimension, students will obtain an understanding of (a) the nature and quality (strengths and weaknesses) of accounting information, (b) how to proceed in analyzing and interpreting accounting information, and (c) numerous other aspects of financial and managerial accounting.

This course is an important background course for all business majors, as well as for numerous non-business majors.

Accounting (ACCTG)

ACCTG 305 Financial Statements and Management Decisions (4) Impact of management's financing, investing, and operating decisions on GAAP-based financial statements. Students who have passed ACNTG 310 or 311 may not take this course for credit.

ACCTG 305 Financial Statements and Managerial Decisions (4)

This course is a one-semester alternative to the traditional two-semester intermediate accounting sequence (ACCTG 371 and 472) intended for the non-accounting major. Students who have passed ACCTG 371 or 472 may not take this course for credit. It is a required course for the Finance major. It will also substitute for ACCTG 371 in meeting the requirements for an Accounting minor, and serve as a business supporting course for students in other School of Business majors. Students will gain a fundamental understanding of the information conveyed in the financial statements and, as a result, develop an appreciation for its usefulness and limitations in decision making. They will also develop the prerequisite knowledge base necessary to conduct financial statement analysis as required in Level I of the Chartered Financial Analyst (CFA) exam. A financial statement user decision-making perspective, rather than the accountant/preparer approach found in the traditional intermediate accounting course, is emphasized. Student success in meeting the learning objectives will be assessed through a combination of exams, homework problems, and assignments. The comprehensive final exam will test the student's comprehension of the relevant material.

Accounting (ACCTG)

ACCTG 311 Accounting Systems and Control (3) Introduction to accounting procedures to gather, to aggregate, and to report accounting data to managers and to external readers.

ACCTG 311 Accounting Information Systems (3)
This course pertains to the study of accounting information systems as an important part of a firm's total information systems. The accounting cycle, as the key process providing financial information to management, is thoroughly reviewed and documented. Emphasis is given to the importance of computer-based accounting information systems in supporting internal controls and improving financial reporting, asset security and efficiency and effectiveness of performance. Course objectives: 1.) to understand the accounting model and specifically, the accounting cycle within a business entity; 2.) to process business and accounting transactions and complete the accounting cycle within a computer-based accounting information system; 3.) to analyze accounting information and related internal controls within a computer-based accounting information system; 4.) to examine relevant ethical issues; 5.) to gain an appreciation for evolving technology advancements, such as ERP's and e-commerce, and their impact on the accounting cycle and internal controls. This is a prescribed course for majors in Accounting and it serves as a foundation and prerequisite for most 300-level and 400-level accounting courses. Students will be evaluated based on performance on exams, computer-based accounting system project, and periodic homework assignments. Typically, 50% or more of student's grade is based on performance on exams. Course will be taught in either a technology classroom with computers for all students or periodic sessions in the computer lab. [Students will require consistent access to a computer to complete computer-based accounting system project].

Effective: Spring 1995
Prerequisite: ACCTG 211

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Accounting (ACCTG)

ACCTG 310 Federal Taxation I (3) Study of income determination concepts for individuals and corporations, impact of taxation on decisions, elementary research techniques, and ethical standards.

ACCTG 310

ACCTG 310 Principles of Taxation (3)

This course is directed to the study of concepts relative to: (a) the determination of taxable income and tax liability, (b) the influence of tax considerations on the decisions of taxpayers, and (c) elementary tax research techniques. Primary emphasis is given to concepts that are fundamental to the federal taxation of income with respect to business entities. Also, basic aspects of the taxation of individuals are introduced.

The objectives of this course are to enable students to do the following:
1) apply basic tax rules and regulations to compute the taxable income and federal income tax liability for corporate and individual taxpayers,
2) incorporate tax costs and tax benefits into calculations of the net present value of cash inflows and outflows from taxable activities,
3) recognize tax planning opportunities or problems inherent in common transactions, and
4) appreciate the impact of the basis of accounting on both tax and financial reporting.

Typical topics include sources of authority, structure of an income tax, property transactions, choice of entity, distribution of income, selection of jurisdiction, means of financing, and taxation of individuals. Students should be familiar with basic accounting concepts, should understand the nature of financial instruments, and should be able to apply the concept of present value and future value in estimating cash inflows and outflows.

This is a required course for accounting majors and, for many of them, the only tax course that they take. Other students who meet the prerequisite requirements may take this course as an elective. Also, this principles course in taxation is a prerequisite requirement for an advanced course in taxation.

Evaluation is based primarily on periodic examinations. No special facilities are required. However, students have on-line access to tax laws and regulations, tax cases, and administrative guidance. This course is generally offered every semester with enrollments of twenty to thirty students per section.

Accounting (ACCTG)

ACCTG 405 Principles of Taxation I (3) Elements of tax policy and tax-planning concepts for personal and business decision making; with emphasis on taxation of individuals.

ACCTG 405 Principles of Taxation (3)

Introduction to Taxation, is the first course that undergraduate accounting majors take that is devoted entirely to taxation. Although the course is intended for accounting majors, the content is relevant to finance majors seeking elective courses. The objective of the course is to provide students with a basic understanding of the concepts, terminology, and decision-making skills specific to the discipline of taxation that are germane to the professional development of those preparing for a career in accounting. Although the course surveys the many forms of taxation that are found in industrialized societies, and the comparisons thereof, the main focus is on the federal income taxation of individuals. However, coverage is provided regarding the manner in which the taxation of individuals relates to corporate and partnership entities. ACCTG 405 is related to other accounting courses through its coverage of income concepts, and micro-economic principles. The former compares differences in the measurement of financial accounting income with the manner in which income is determined according to the tax laws. The latter emphasizes business decision-making principles that are important in the managerial portion of the accounting program. The course covers topics that illustrate fundamental tax strategies and how such enable taxpayers to achieve business and personal economic objectives. The assessment process in ACCTG 405 incorporates examinations, homework assignments, and individual and group projects. The exams are combinations of objective questions and open-ended problems. Exams are often given in the evening. Course learning aids include a text book, on-line tax research services, spreadsheet software, and a packet of handouts prepared by instructors to keep the classes updated on the many changes in the tax laws that occur each year.

Accounting (ACCTG)

ACCTG 404 Managerial Accounting: Economic Perspective (3) Accounting techniques as planning, control, and motivating devices in business and other organizations; accounting data for decision making and performance evaluation.

ACCTG 404 Managerial Accounting (3)

This course emphasizes the use of accounting information for internal purposes as opposed to the external disclosure focus of the financial accounting course. The cost covers the vocabulary and mechanics of cost accounting and the design of management accounting systems for planning and controlling operations, and for motivating personnel. The course integrates accounting with ideas from data analysis, decision analysis, finance, microeconomics, and operations management. The themes stressed throughout the course will be the notion that information is costly; the circumstances that necessitate cost allocation, the idea that different costs and different allocation schemes apply for different purposes; and fundamentals of incentive and compensation plans. Among the topics covered are cost behavior, cost-volume analysis, relevant costs, and the use of cost information for decision making. The course will rely on lectures and discussion of case studies.

ACCTG 426 Financial Statement Analysis (3) The exploration of conventional and advanced methods of analyzing financial statements, including the assessment of earnings quality.

ACCTG 426 Financial Statement Analysis (3)
The objective of this course is to explore conventional and advanced analytical methods of analyzing financial statements. Expanding on the material covered in the principles of accounting and principles of finance courses and using actual financial statements, students:

- review and apply the traditional methods for analyzing financial statements, such as ratio analysis, trend analysis, and common-size analysis,
- apply advanced tools for analyzing financial statements, such as financial distress prediction models and earning manipulation prediction models, and
- evaluate accounting policies and disclosures and their impact on the financial statements through the assessment of earnings quality.
Accounting (ACCTG)

ACCTG 422 Accounting Systems (3) Understanding flow and documentation of accounting information and internal controls in the context of accounting cycles.

ACCTG 422 Accounting Systems (3)
This course primarily investigates accounting transactions cycles-processes and procedures by which an organization's financial information is recorded, processed, reported, and disposed of. The processes covered in this course range from manual to fully automated and Web-enabled systems. The documentation and analysis of the accounting cycles for the revenue, expenditure, conversion, and managerial reporting areas are explored via flowcharts and narrative descriptions. The concepts of files, transaction updates, editing, and reporting in the automated accounting systems are explored. The course also covers internal controls in the manual and automated systems. Additional topics may include fraud examination, applicable laws and regulations, and computerized auditing.

Accounting (ACCTG)

ACCTG 432 Accounting Information Systems (3) Systems analysis tools and techniques; internal control concepts; development of computer control procedures.

ACCTG 432 Accounting Information Systems (3)

Accounting data are utilized as information in making decisions and as a control mechanism. The focus of this course, however, will be upon the actual production of accounting data.

The purpose of the course is to learn how accountants collect relevant data and transform them into reports appropriate for managers and external readers. Procedural details will focus first on the traditional accounting cycle and the journal entries for business transactions and events. Then we shall examine in detail the principle accounting cycles: sales cycle, cash receipts cycle, purchases cycle, cash disbursements cycle, payroll cycle, facilities cycle, general ledger cycle, production cycle.

For each cycle, you should be able to explain the relation of the accounting process to the business enterprise, the basic journal entries, the basic internal control features, and the document flow.

Accounting (ACCTG)

ACCTG 481 Financial Statement Analysis (3)

The proposed course in financial statement analysis is structured to improve the student's ability to extract and interpret information from actual financial statements and to expose the student to how financial statement information is integrated into equity valuation and credit analysis. The course would not only rely upon textbook-based and lecture-based learning, but also emphasize case-based learning.

The course will consist of two main sections. The first will deal with accounting and business analysis. This part will explore the types of financial information data typically available for publicly traded companies and introduce a model of the economic drivers of company performance. It would incorporate some technical accounting as well as some standards business economics/strategy concepts. Students will be forced to recast financial statements that they believe do not reflect the underlying economic state of the company. Financial reporting issues relating to revenue and expense recognition, leases and consolidations will be discussed.

The other section of the course will deal with firm valuation. Students would be exposed to some standard approaches to equity valuation and the analysis activities underlying these approaches. Aspects of valuation that would be covered in this section of the course are financial ratio analysis, forecasting, pro-forma statements, cost of capital and valuation methods.

The course will rely on lectures and extensive use of case studies.

Accounting (ACCTG)

ACCTG 483 Forensic Accounting (3) Study of investigative accounting, consulting and litigation support activities undertaken in forensic accounting engagements.

ACCTG 483 Forensic Accounting (3)

ACCTG 483 is the exploration of the broad discipline known as “forensic accounting,” which includes a variety of investigative accounting, valuation, damage assessment and litigation support services. Forensic accounting is an evolving discipline which is distinguished from assurance services in that it does not involve reporting on the fairness of financial statements. It generally involves the investigation and analysis of financial data for some specific purpose – obtaining an in-depth understanding of information that enables the forensic accountant to prove, disprove or at least confidently speculate about allegations related to the information and to report those findings objectively.

Forensic accountants are involved in presenting analyses that might be valuable for such things as settling legal disputes, calculating economic damages, valuing intellectual property, determining the extent of damage or loss due to fraud, or tracing elusive assets or revenue sources. A forensic accountant might also participate in pro-active engagements such as the development of systems and procedures to prevent fraud.

The first part of the course deals with the technical and ethical framework of forensic accounting and focuses on the understanding of forensic and investigative accounting including investigation methodology, the nature of fraud, fraud risk factors, financial statement fraud, litigation support and dispute resolution services and development of the skills needed in those professional activities. These skills include the ability to integrate knowledge of accounting, finance, economics, business law and other business disciplines in gathering, analyzing and evaluating evidence and drawing conclusions. The second part of the course focuses on forensic accounting investigation and analysis of financial information in connection with litigation, dispute resolution, estimation of economic damages, or other specific objectives, and the preparation of comprehensive, objective reports of findings and conclusions.

Adult Education (ADTED)

ADTED 100 Adult Learners in the University (3) Opportunity to develop effective learning strategies while exploring critical issues related to adults entering or returning to higher education.

ADTED 100 Adult Learners in the University (3)

This course is designed for the adult learner who is entering the university for the first time, or who is returning after an absence from studies. In this course we will help you: develop or renew effective study skills, learning strategies, and time management tools that will help you succeed as a Penn State student; identify useful university resources; learn effective writing skills and hone critical reading abilities to meet the requirements of academic coursework. Practice your public speaking skills so you will feel more confident and articulate.

Adult Education (ADTED)

ADTED 456 Introduction to Family Literacy (3) Explores comprehensive family literacy models, focusing upon families, services, outcomes, and roles and responsibilities of individuals, organizations, and communities.

ADTED 456 Introduction to Family Literacy (3)

Introduction to Family Literacy is one of the five 3-credit courses in the 15-credit Certificate in Family Literacy developed by the Goodling Institute for Research in Family Literacy in the College of Education in partnership with the National Center for Family Literacy (Louisville, KY). It is offered both summer and fall semesters to about 20 students per class. The course is 15 weeks in length, entirely online, and cohort-based. Study materials are both web- and print-based. Students work in teams for most of their assignments although they are also expected to produce a portfolio of individual application activities. An Associate’s Degree or 60 baccalaureate credits at an accredited institution are required to enter the course. Technological requirements, registration, and other support are provided.

This course provides opportunities for students to discover and analyze comprehensive family literacy within a model centered on how services evolved out of a need to break the cycle of intergenerational poverty and under-education.

Course objectives include to: (1) Identify the qualifying and distinguishing characteristics of families for whom comprehensive family literacy services are designed. (2) Describe ways in which comprehensive family literacy programs are designed to meet individual family needs. (3) Analyze the influence unique family and community characteristics have on family literacy programs and student learning. (4) Identify key characteristics and quality standards for Adult Education, Children’s Education, Parent-Child Interactive Literacy, and Parenting Education. (5) Communicate an awareness of the characteristics of comprehensive family literacy as described in the federal definition. (6) Communicate an understanding of component integration and its importance. (7) Communicate an understanding of how to network with external agencies for program participant referral and services. (8) Describe key roles and responsibilities of family literacy staff. (9) Communicate an understanding of program tools for assessment, evaluation and reporting. (10) Analyze a family literacy site and develop plans intended to impact quality within that program that help family participants identify and meet their individual goals.

Based on criteria provided in rubrics, students are evaluated on weekly individual activities, collaborative team assignments, and various components of an individual final project. In addition to evaluation of these student assignments, each student is assessed on participation in team and whole-class discussion groups, and contributions to team effectiveness for completing assignments. Feedback is provided for each submitted assignment, using a rubric with instructor comments added.

Adult Education (ADTED)

ADTED 458 Early Literacy Development and Parental Involvement (3) Focuses on young children’s language and literacy development, including parental and staff support, grounded in scientifically based reading research.

ADTED 458 Early Literacy Development and Parental Involvement (3)

Early Literacy Development and Parental Involvement is one of the five 3-credit courses in the 15-credit Certificate in Family Literacy developed by the Goodling Institute for Research in Family Literacy in the College of Education in partnership with the National Center for Family Literacy (Louisville, KY). It is offered during the summer and fall semesters to about 20 students per class. The course is 15 weeks in length, entirely online, and cohort-based. Study materials are both web- and print-based. Students work in teams for most of their assignments although they are also expected to produce a portfolio of individual application activities. An Associate's Degree or 60 baccalaureate credits at an accredited institution are required to enter the course. Technological requirements, registration, and other support are provided.

This course focuses on young children's language and literacy development, including ways that parents and staff support this development, research related to children's learning, and ways in which family literacy supports early literacy development.

Course objectives include to: (1) Identify personal theories regarding children's reading, writing, and language and literacy development, reading and writing. (2) Know what research indicates regarding children's reading, writing, and language and literacy development. (3) Apply research to practice. (4) Know areas of language and literacy development and ways that adults support it. (5) Plan ways teachers can support language and literacy development, including within the realms of goal setting, the teaching/learning cycle, the learning environment, routines, and interactions. (6) Plan ways to inform and support parents. (7) Modify and adapt in order to serve students of all abilities. (8) Understand integration and demonstrate the integration of language and literacy learning across components. (9) Demonstrate ways language and literacy development informs interactive learning between parents and children and parenting education.

Based on criteria provided in rubrics, students are evaluated on weekly individual activities, collaborative team assignments, and various components of an individual final project. In addition to evaluation of these student assignments, each student is assessed on participation in team and whole-class discussion groups, and contributions to team effectiveness for completing assignments. Feedback is provided for each submitted assignment, using a rubric with instructor comments added.

Adult Education (ADTED)

**ADTED 459 Interactive Literacy: Parents and Children (3)**
Focuses on literacy and language interactions between parents and their young children (including English language learners), implementing intentional/planned learning.

**ADTED 459 Interactive Literacy: Parents and Children (3)**
Interactive Literacy: Parents and Children is one of five 3-credit courses in the 15-credit Certificate in Family Literacy developed by the Goodling Institute for Research in Family Literacy in the College of Education in partnership with the National Center for Family Literacy (Louisville, KY). It is offered during the summer and fall semesters to about 20 students per class. The course is 15 weeks in length, entirely online, and cohort-based. Study materials are both web- and print-based. Students work in teams for most of their assignments although they are also expected to produce a portfolio of individual application activities. An Associate’s Degree or 60 baccalaureate credits at an accredited institution are required to enter the course. Technological requirements, registration, and other support are provided. The courses focuses on the component of family literacy in which the low-literate parents engage in language and literacy development activities with their young children (birth to age 8). During interactive literacy the teachers both model and supervise the literacy interactions. Students learn to use planned and intentional activities that are developmentally appropriate for the children. They also learn how to teach the parent the necessary interaction skills as well as how to debrief the parents afterwards. They also learn how to assess the literacy interactions between parents and their children.

Adult Education (ADTED)

**ADTED 457 Adult Literacy (3)** Surveys adult basic and literacy education programs and best practices; applies recent research on adult and family literacy.

**ADTED 457 Adult Literacy (3)**

Adult Literacy is one of the five 3-credit courses in the 15-credit Certificate in Family Literacy developed by the Goodling Institute for Research in Family Literacy in the College of Education in partnership with the National Center for Family Literacy (Louisville, KY). It is offered during the summer and fall semesters to about 20 students per class. The course is 15 weeks in length, entirely online, and cohort-based. Study materials are both web- and print-based. Students work in teams for most of their assignments although they are also expected to produce a portfolio of individual application activities. An Associate’s Degree or 60 baccalaureate credits at an accredited institution are required to enter the course. Technological requirements, registration, and other support are provided.

The overarching course objectives are to equip students with the knowledge and skills to:

a) develop meaningful instruction for adult literacy learners.

b) Deliver basic skills instruction, using methods that enhance the learning of individual adult learners.

c) Encourage and guide adult learners in developing skills that promote lifelong learning.

Students set their own learning goals within the parameters of the course objectives. This allows students to focus their learning in a direction that best addresses their own adult literacy interests. Student goals, in turn provide the basis for the course project, which is a learning portfolio. Students define the purpose of their portfolio and develop the criteria that will be used to evaluate their learning outcomes. The course portfolio provides students with a means to learn about integrating assessment into teaching/learning. It also puts into practice many aspects of adult learning theory. Portfolios include course assignments that involve student research and require student-developed lesson plans. In addition, students are required to create their own portfolio work to demonstrate their learning as it relates to their portfolio goals.

Students are also required to participate in group discussions and two team tasks. Group discussions are designed to enhance learning through the sharing of information and perspectives on a variety of adult literacy topics. Team tasks serve two purposes: (1) students are given a topic to research and present to the class and (2) students experience a powerful teaching method and are required to evaluate their group process.

Aerospace Engineering (AERSP)

**AERSP 001S** Aerospace Explorer--First-Year Seminar (1)

First-Year Seminar explores aerodynamics, structural mechanics, flight mechanics, rotorcraft systems, high performance computers, air/space propulsion, and space systems.

**AERSP 001S** Aerospace Explorer--First-Year Seminar (1) (FYS)

Aerospace Engineering deals with vehicles that fly -- airplanes, sailplanes, jets, helicopters, rockets, satellites, the space shuttle, space stations, etc. Students with an interest in these subjects can learn more about the variety of challenges and opportunities in the aerospace field through the small-class environment of the Aerospace Explorer First-Year Seminar.

An introduction to both the academic major and career paths in Aerospace Engineering, this seminar deals with the design, analysis and operation of aircraft and space vehicles. Students will learn about aerodynamics, structural mechanics, flight mechanics, rotorcraft systems, high performance computers, air-breathing propulsion, space propulsion, and space systems. The classes will include presentations by the Aerospace Engineering faculty, tours of the Aerospace Engineering laboratories, and presentations by student officers in the Penn State chapters of the American Institute of Aeronautics and Astronautics (AIAA) and the American Helicopter Society (AHS), as well as introductions to the use of scientific plotting, graphing, and analysis software.

Aerospace Engineering (AERSP)

AERSP 305W Aerospace Technology Laboratory (3) Experiments in measurement systems, aerodynamics, aerospace structures, dynamics and control, and propulsion, technical report writing and presentations.

AERSP 305W Aerospace Technology Laboratory (3)

AERSP 305W is a junior-level experimental laboratory course in Aerospace Engineering. The purpose of this course is to expose students to the key principles and methods of experimentation as related to the field of aerospace engineering. Students learn the fundamentals of measurement techniques to determine quantities such as temperature, force, pressure, displacement, velocity, acceleration and strain in various laboratory situations. The course employs weekly "set-up" experiments that provide an opportunity for students to familiarize themselves with modern measurement techniques and gain valuable experience regarding the calibration and use of aerospace engineering research equipment. Students are expected to apply their knowledge of mathematics, science, and engineering in order to complete successfully the experiments encountered in the laboratory. The subsequent interpretation and analysis of the laboratory data requires the use of standard engineering tools and practices. Students work in lab groups to process data and then identify, formulate, and solve engineering questions associated with the experimental results.

Throughout the semester, students communicate their knowledge and understanding of the course material through a series of class assignments, written technical reports, and one final exam. Because writing and revising laboratory reports significantly enhances the understanding and interpretation of the research data, this course is "writing-intensive." As such, students are expected to improve their writing skills as they gain experience writing abstracts, informal reports and formal reports. Peer review of reports helps students to recognize good writing, and to learn how to provide constructive criticism. The course instructor provides written feedback for revised formal reports, and the quality of writing is a factor in determining final grades.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007
Prerequisite: Prerequisite or concurrent:AERSP 301, AERSP 311, ENGL 202C

Aerospace Engineering (AERSP)

**AERSP 301 Aerospace Structures (3)** Aerospace structural design concepts, flight safety. Stiffness, strength, stability of thin-walled structures under combined loads. Energy methods, finite element analysis.

**AERSP 301 Aerospace Structures (3)**

AERSP 301 covers essential topics in aerospace structures. The objectives of the course are to help students: 1) appreciate the roles that structures and structural materials play in aerospace vehicles; 2) understand general design concepts for aerospace structures: vehicles, components, and materials; 3) develop the analysis tools and skills needed to analyze the performance of aerospace structures; and 4) gain experience identifying, formulating, and solving aerospace structural engineering problems.

AERSP 301 builds on structural mechanics topics covered in PHYS 211, E MCH 011 & 013 (or 210), and E MCH 215 & 216. It prepares students for study of advanced topics such as plates and shells, composites, structural stability, finite element analysis, structural dynamics, and aeroelasticity. It also provides students with the basic background needed to contribute effectively to multidisciplinary trade studies in vehicle design activities.

AERSP 301 begins with an overview of the general features of flight vehicle structures, with emphasis on thin-walled members and advanced materials. Then, the implications of assured safety of flight for structural design are explored, leading to coverage of: load cases, flight envelopes, load factors, factors of safety, kinds of structural failures, and margins of safety. Topics in structural analysis proceed from an initial review of topics in elasticity, structural materials, and beam bending. Then, the deflection and stress responses of thin-walled beams under transverse shear and torsional loading are addressed. More than a third of the course is devoted to energy principles and the development of the finite element method of structural analysis. The course finishes with a treatment of the structural stability of beams and panels, a key topic with respect to the behavior of thin-walled aerospace structures.

Aerospace Engineering (AERSP)

AERSP 309 Astronautics (3) Introduction to space and space flight; laws of particle mechanics; orbits and trajectories; space vehicles and propulsion.

AERSP 309 Astronautics (3)

This course, required for aerospace engineering majors, focuses primarily on the dynamics of spaceflight, including both orbital and attitude (orientation) motion of spacecraft. Topics include: three-dimensional rotational kinematics (direction cosine matrices, vector components in different coordinate systems, Euler angles, the angular velocity vector, and velocity and acceleration in different reference frames), three-dimensional particle dynamics (Newton’s laws of particle motion, energy, angular momentum, and systems of particles), two-body orbital mechanics (Newton’s law of universal gravitation, the orbit equation, conic sections and orbit terminology, Kepler’s equation, classical orbital elements, and representations of satellite position and velocity), orbital maneuvers and transfers (impulsive maneuvers, Hohmann transfers, simple inclination changes, and relative motion between spacecraft), rigid-body dynamics (angular momentum and energy, the inertia matrix, principal-axis system, Euler’s equations of rigid-body motion, torque-free motion, and effects of external torques), rocket performance (the rocket equation, specific impulse, estimating propellant requirements for a mission, and a survey of propulsion technology), and the space environment (standard atmosphere, simple radiative heat-transfer analysis, the Van Allen radiation belts, meteors and debris hazards).

The course relies upon a sound understanding of mechanics, matrix algebra and vector calculus. Assignments include analytical and numerical problems, some of which require computer programming.

General Education: None
Diversity: None
Bachelor of Arts: None
Prerequisite: E MCH 212, MATH 250; CMPSC 201 or CMPSC 202

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 309 Astronautics (3) Introduction to space and space flight; laws of particle mechanics; orbits and trajectories; space vehicles and propulsion.

AERSP 309 Astronautics (3)

This course, required for aerospace engineering majors, focuses primarily on the dynamics of spaceflight, including both orbital and attitude (orientation) motion of spacecraft. Topics include: three-dimensional rotational kinematics (direction cosine matrices, vector components in different coordinate systems, Euler angles, the angular velocity vector, and velocity and acceleration in different reference frames), three-dimensional particle dynamics (Newton’s laws of particle motion, energy, angular momentum, and systems of particles), two-body orbital mechanics (Newton’s law of universal gravitation, the orbit equation, conic sections and orbit terminology, Kepler’s equation, classical orbital elements, and representations of satellite position and velocity), orbital maneuvers and transfers (impulsive maneuvers, Hohmann transfers, simple inclination changes, and relative motion between spacecraft), rigid-body dynamics (angular momentum and energy, the inertia matrix, principal-axis system, Euler’s equations of rigid-body motion, torque-free motion, and effects of external torques), rocket performance (the rocket equation, specific impulse, estimating propellant requirements for a mission, and a survey of propulsion technology), and the space environment (standard atmosphere, simple radiative heat-transfer analysis, the Van Allen radiation belts, meteors and debris hazards).

The course relies upon a sound understanding of mechanics, matrix algebra and vector calculus. Assignments include analytical and numerical problems, some of which require computer programming.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2008 Ending: Fall 2011
Prerequisite: E MCH 212, MATH 251; CMPSC 201 or CMPSC 202

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 308H Mechanics of Fluids (3) Kinetics and dynamics of fluids; perfect fluid theory using complex variables; introduction to viscous flow theory; fundamentals of compressible flow.

Mechanics of Fluids (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Prerequisite: E MCH 212 or E MCH 212H; MATH 251

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 312 Aerodynamics II (3) Fluid mechanics of viscous and compressible flows, laminar boundary layers, turbulent flows, isentropic flows, shock waves, supersonic life and drag.

AERSP 312 Aerodynamics II (3)

Exact solutions of the Navier-Stokes equations for unsteady flow. Boundary layers solved by the methods of Blasius, Falkner-Skan and Thwaites. Boundary layer stability and transition to turbulence. Turbulent flow and solution methods. Fluid flow measurement techniques and numerical methods. Derivation of the governing equations for the conservation of mass, momentum and energy for compressible flow. Steady one-dimensional isentropic flow. Normal, traveling and oblique shock waves. Compressible flow with area change and converging-diverging nozzle flows. Prandtl-Meyer expansions and supersonic life and drag. One-dimensional flow with friction or heat transfer. Unsteady and linearized compressible flow. Introduction to the method of characteristics. This is the second of a two course sequence in aerodynamics and is a prerequisite for senior level courses in propulsion and design. Evaluation of student performance will be by two midterm exams worth approximately 25% each, a final exam worth approximately 35% and weekly homework assignments worth approximately 15%.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2007
Prerequisite: AERSP 311, AERSP 313, M E 201

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 311 Aerodynamics I (3) Fluid statics and kinematics; fluid dynamics of inviscid and viscous flows; Navier-Stokes equations; introduction to boundary layers.

AERSP 311 Aerodynamics I (3)

This is a first course in incompressible inviscid and viscous flows. It includes an introduction to fluids, fluid statics and hydrostatics. Fluid kinematics, including Eulerian versus Lagrangian viewpoint, steady versus unsteady flows, volume and mass flow rates, vorticity and circulation, and streamlines are described. Derivation of the governing equations for the conservation of mass, momentum and energy is presented. Dimensional analysis is covered. Potential flow with and without the effects of viscosity is analyzed. A derivation and exact solutions of the Navier-Stokes equations are given and boundary layers are introduced. This is the first of a two course sequence in aerodynamics, where both courses are required for senior-year propulsion and design courses. Evaluation of student performance will be by two midterm exams worth approximately 25% each, a final exam worth approximately 35% and weekly homework assignments worth approximately 15%.

Aerospace Engineering (AERSP)

AERSP 313 Aerospace Analysis (3) Mathematical methods applied to aerospace engineering: Fourier series, ordinary and partial differential equations, complex variables, numerical methods, data analysis.

AERSP 313 Aerospace Analysis (3)
This course is designed to reinforce the mathematical concepts learned in the prerequisite mathematics and computer science courses and to present new mathematical material that is necessary for aeronautics, astronautics, dynamics and control, and fluid dynamics analysis. In practice, analytical and numerical approaches to problems solving are complementary, hence, this course will emphasize a combined analytical and numerical treatment.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2008
Prerequisite: MATH 220, MATH 230, MATH 250; CMPSC 201 or CMPSC 202

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 401A Spacecraft Design--Preliminary (3) Conceptual and preliminary design of a spacecraft, its constituent subsystems, and related systems, to satisfy a given set of specifications.

AERSP 401A Spacecraft Design - Preliminary (3)

AERSP 401A is the first of a two-semester sequence of senior capstone design courses. In this course, students will begin to learn the design process, complete a conceptual design, and to begin a preliminary design of a spacecraft, working in teams. This process is inherently multidisciplinary, requiring the use of engineering practices in such subjects as structures, dynamics, electrical and thermal systems, propulsion, controls, and information systems. In addition to the technical design content, this course seeks to enhance students' skills in verbal and written communications, ethical thinking, and the team approach to design, which is widely used in industry and government. Classes (115 minutes each, twice weekly) include lecture and time for team meetings. Students are evaluated on the technical merit of the designs (presented in written and oral reports), as well as their ability to function on a team.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007
Prerequisite: AERSP 309 . Prerequisite or concurrent:AERSP 450

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 401B Spacecraft Design--Detailed (2) Detailed design of the constituent subsystems and related support systems for a spacecraft.

AERSP 401B Spacecraft Design -- Detailed (2)

AERSP 401B is the second of a two-semester sequence of senior capstone design courses. In this course, students work in teams, continuing the design process begun in AERSP 401A. This process is inherently multidisciplinary, requiring the use of engineering practices in such subjects as structures, dynamics, electrical and thermal systems, propulsion, controls, and information systems. In addition to the technical design content, this course seeks to enhance students' skills in verbal and written communications, and the team approach to design, which is widely used in industry and government. Classes (115 minutes each, twice weekly) include lecture and time for team meetings.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 402A Aircraft Design--Preliminary (3) Conceptual and preliminary design of an aircraft, its constituent subsystems, and related systems, to satisfy a given set of specifications.

AERSP 402A Aircraft Design -- Preliminary (3)

AERSP 402A is the first of a two-semester sequence of senior capstone design courses. In this course, students will complete the preliminary design for an aircraft such that it satisfies the assigned specifications. Students completing this course will have the ability to design a system, component, or process to meet desired needs in aircraft systems; they will have the ability to function on multi-disciplinary teams; and they will have the ability to identify, formulate, and solve engineering problems. In addition, students will have the background to help determine what the ethical responsibilities are to themselves, to employers, and to society. Classes (115 minutes each, twice weekly) include lecture and time for team meetings.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007
Prerequisite: AERSP 306 . Prerequisite or concurrent:AERSP 413

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

**AERSP 404H** Flight Vehicle Design and Fabrication II (3 per semester/maximum of 12) Project management, design, fabrication, aerodynamic and structural testing, and flight evaluation of an advanced composite flight vehicle.

**Flight Vehicle Design and Fabrication II (3 per semester/maximum of 12)**

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2000
Prerequisite: AERSP 204H

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 402B Aircraft Design--Detailed (2) Detailed design of the constituent subsystems and related support systems for an aircraft.

AERSP 402B Aircraft Design - Detailed (2)
AERSP 402B is the second of a two-semester sequence of senior capstone design courses. In this course, students will complete the detailed design for an aircraft, and all of its constituent and related support systems, such that it satisfies the assigned specifications. Students completing this course will have the ability to design a system, component, or process to meet desired needs in aircraft systems; they will have the ability to function on multi-disciplinary teams; and they will have the ability to identify, formulate, and solve the associated engineering problems. Classes (115 minutes each, twice weekly) include lecture and time for team meetings.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 406W Structures and Dynamics Laboratory (2) Experiments in static deformations and stresses, vibrations, and control of aerospace structures.

Structures and Dynamics Laboratory (2)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007
Prerequisite: or concurrent: ENGL 202C

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

Aerospace Propulsion (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1983
Prerequisite: AERSP 312

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 407 Aerodynamics of V/STOL Aircraft (3) Rotary wing aircraft; VTOL and STOL performance; propeller-wing combinations; jet flap; high lift devices.

Aerodynamics of V/STOL Aircraft (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1984
Prerequisite: AERSP 312

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 413 Stability and Control of Aircraft (3) Static and dynamic stability and control of aircraft; open and closed loop systems.

Stability and Control of Aircraft (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1989
Prerequisite: AERSP 304, AERSP 306

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 420 Principles of Flight Testing (3) In-flight and analytical studies of airplane performance, stability, and control; reduction of data; instrumentation; flight test techniques.

Principles of Flight Testing (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1983
Prerequisite: AERSP 306

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 412 Turbulent Flow (3) Homogeneous turbulence: spectral transfer of energy, viscous dissipation; turbulent shear flow: mixing-length theory, eddy viscosity, scaling laws, energy budget.

Turbulent Flow (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Winter 1978
Prerequisite: one course in fluid mechanics

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 424 Advanced Computer Programming (3) Engineering and scientific programming topics: object oriented programming, parallel programming, and various modern languages (e.g. C++, Java, and Ada).

AERSP 424 Advanced Computer Programming (3)

This course presents an advanced view of computer programming, mainly using Java, C++, and Ada95. The use of current operating systems (e.g. Linus and Unix) and compilers (e.g. gcc) will also be presented. Object Oriented Programming will also be discussed in detail. Object Oriented Programming is quite different than functional or procedural programming, and it is difficult to learn on your own. The differences and similarities between Java and C++ and Ada95 will also be discussed. Hands-on programming will be a key part of the course. This course is one of the Core Courses for the Graduate Minor in High Performance Computing, and will also be a technical elective in Aerospace Engineering.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2008
Prerequisite: CMPSC 201 or CMPSC 202; MATH 220

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 423 Introduction to Numerical Methods in Fluid Dynamics (3) Finite difference methods applied to solving viscous/inviscid fluid dynamics problems, error control, numerical stability.

Introduction to Numerical Methods in Fluid Dynamics (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2008
Prerequisite: AERSP 312 or M E 320; MATH 250 or MATH 251; CMPSC 201 or CMPSC 202

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 425 Theory of Flight (3) Advanced wing and airfoil theory, conformal mapping, slender body theory.

Theory of Flight (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2001
Prerequisite: AERSP 306

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 430 Space Propulsion and Power Systems (3) Analysis and performance of chemical and nuclear rockets, electric propulsion systems. Introduction to solar, chemical, thermoelectric, and nuclear power sources.

Space Propulsion and Power Systems (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2007
Prerequisite: AERSP 410 or M E 432

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 460 Aerospace Control Systems (3) Design and analysis of feedback control systems for aerospace applications; stability, root locus, time- and frequency-domain, state-space methods.

AERSP 460 Aerospace Control Systems (3)
This course is an introduction to the design and analysis of feedback control systems as applied to aerospace systems. The course covers control theory that is commonly used in the aerospace industry and presents practical applications of this theory to aerospace systems. The course does not emphasize rigorous mathematical derivation, but instead emphasizes the application of control theory. It provides a comprehensive overview of classical control theory and single-input/single-output (SISO) design methods. The course also presents an introduction to modern control theory and multi-input/multi-output (MIMO) design methods. Aerospace examples and applications are emphasized throughout the course.

The course builds upon a required junior-level course in system dynamics and controls (AERSP 304), which provides students with basic dynamic system theory and a brief introduction to feedback control. The course also supplements required senior-level courses in either aircraft or spacecraft dynamics (AERSP 413 and 450) which provides background on vehicle dynamics. AERSP 460 provides an additional level of depth in dynamics and control theory, and prepares students for entry-level work or graduate studies involving the design of automatic control systems for aircraft and spacecraft.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2006
Prerequisite: AERSP 304

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 450 Orbit and Attitude Control of Spacecraft (3) Principles of mechanics and vector analysis applied to basic concepts of satellite motion and control, rocket ballistics, and gyroscopic instruments.

Orbit and Attitude Control of Spacecraft (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1987
Prerequisite: AERSP 304, AERSP 309

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 440 Introduction to Software Engineering for Aerospace Engineers (3) Software engineering for safety- and mission-critical systems, including requirements, management, processes, designs, programming, validation/ verification, and other aspects of software development.

AERSP 440 Introduction to Software Engineering for Aerospace Engineers (3)

This course is an introduction to software engineering. Software engineering includes all aspects of professional software production, and is especially important for safety-critical and mission-critical software. It includes documentation, management, processes, requirements, design models, computer programs, validation, verification, and other aspects of the development process.

Aerospace systems, including aircraft, spacecraft, onboard avionics, ground-based systems, flight simulators, and air transportation systems, rely heavily on software. Software is a major cost of all aerospace systems. For example, the Boeing 777 has more than 1000 onboard processors and more than 4 million lines of software which is primarily written in Ada. The F/A-22 fighter has more than 2 million lines of software onboard, and much of this is Ada also.

Aerospace systems also demand a level of reliability far beyond that of most other systems, which means the software must be designed using rigorous mission-critical and safety-critical procedures, which makes the software quite unique compared to most other software. The FAA and DOD are both involved in certifying aircraft software, for example, through the DO-178B and DOD-2168 standards.

This course is required option in Aerospace Engineering (take one of AERSP 440, E E 305, or E E 210). If not taken to satisfy that requirement, it can be used as a technical elective.

This course is a required option in Aerospace Engineering (take one of AERSP 440, E E 305, or E E 210). If not taken to satisfy that requirement, it can be used as a technical elective.

General Education: None
Diversity: None
Effective: Spring 2008

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

**AERSP 470 Advanced Aerospace Structures (3)** Design and analysis of aerospace structures. Plates and sandwich panels; composite materials; structural dynamics; aeroelasticity; damage tolerance.

**AERSP 470 Advanced Aerospace Structures (3)**

AERSP 470 covers important topics in aerospace structures beyond basic stress and deflection analysis of thin-walled beams. The objectives of the course are to help students: 1) appreciate the roles that structures and structural materials play in aerospace vehicles; 2) understand general design concepts for aerospace structures: vehicles, components, and materials; 3) develop the analysis tools and skills needed to analyze the static and dynamic performance of aerospace structures; and 4) gain experience identifying, formulating, and solving aerospace structural engineering problems.

AERSP 470 builds on structural, dynamics, and aerodynamics topics covered in PHYS 211, E MCH 011 & 013 (or 210), E MCH 215 & 216, AERSP 301, AERSP 306, and AERSP 304. It prepares students for entry-level work or graduate study in the analysis and design of aerospace structures. It also provides students with the strong background needed to contribute effectively to multidisciplinary trade studies in vehicle design activities.

AERSP 417 begins with a review of the general features of flight vehicle structures and aerospace structural design concepts. Then, the deflection and stress responses of flat plates and sandwich panels under lateral and in-plane loading are addressed. About a third of the course is devoted to the behavior of advanced composite panels, and another third to structural dynamics and aeroelasticity. The course finishes with treatments of joining and damage tolerance, both key topics with respect to the design of aerospace structures.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2008
Prerequisite: AERSP 301. Prerequisite or concurrent: AERSP 304, E MCH 315

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 473 (E MCH 473) Composites Processing (3) An introduction to the principles of mechanics governing manufacturing, computer-aided design, and testing of composite materials and structures.

Composites Processing (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 1988
Prerequisite: E MCH 471

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 492 (E E 472) Space Astronomy and Introduction to Space Science (3) The physical nature of the objects in the solar system; the earth’s atmosphere, ionosphere, radiation belts, magnetosphere, and orbital mechanics.

Space Astronomy and Introduction to Space Science (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2008
Prerequisite: E E 330 or PHYS 400

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Aerospace Engineering (AERSP)

AERSP 494 Aerospace Undergraduate Thesis (1-3 per semester/maximum of 6) Individual problem investigations reported in written thesis and seminar lectures. Cooperative research with faculty guidance on topics of current interest.

Aerospace Undergraduate Thesis (1-3 per semester/maximum of 6)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1992

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
African and African American Studies (AAA S)

AAA S 083S First-Year Seminar in African and African American Studies (3) (GH;FYS;US;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

In addition to the academic topic and issues of this course, students can expect to gain a general introduction to the University as an academic community and have the opportunity to explore their responsibilities as members of that community. Students will develop an understanding of the learning tools and resources available to them including the opportunity to develop relationships with faculty and other students who share their academic interests.

Evaluation will be based on one research paper (10-12 pages in length with a bibliography and footnotes, representing 40% of the final grade); a book review (4-5 pages in length, representing 20% of the final grade); 6 weekly summaries based on the assigned readings, lecture notes, and films, representing 30% of the final grade); and participation in class discussion, representing 10% of the final grade.

This course is designed to support students wishing to study politics and history, as well as those interested in pursuing a major or minor in African and African American Studies. This course fulfills both the first-year seminar and a general education or Bachelor of Arts humanities requirement.

African and African American Studies (AAA S)

AAA S 101 (GH;US) (WMNST 101) The African American Woman (3) The sociological, historical, and political experiences of African American women, their roles and contributions to society.

AAA S (WMNST) 101 African American Women (3) (GH;US)

(BA) This course meets the Bachelor of Arts degree requirements.

The African American Woman is a survey course that examines how the historic milieu has shaped the African American woman's experiences. This course is designed to cover the cultural, political, and economical experiences of African American women such as Sojourner Truth, Ida B. Wells to Bell Hooks. It also examines issues and experiences from the plantation to contemporary times. Students will be required to do written assignments, collaborate on group projects and will engage in discussion. The course is designed to encourage students to develop the capacity to pursue research for a paper and for oral reports. The course will require each student to conduct research for a group project and to give written and oral reports on the class reading assignments. These requirements will enhance the students' public speaking skills.

African and African American Studies (AAA S)

AAA S 100 Evolving Status of Blacks in the 20th Century: Interdisciplinary Perspectives (3) (GS;US)

(BA) This course meets the Bachelor of Arts degree requirements.

This course examines the African American conditions, community institutions and consciousness in the United States during the twentieth century. It is a chronological survey of the shifts in the social, economic, and political realities faced by African Americans. Also examined are changes in, and the creation of, African American cultural, and intellectual traditions. Major social movements will be analyzed as will key debates over gender, class, ethnicity, community, and public policy. Issues of national and international identity will be addressed as will major changes in international relations and the response of African Americans to them. Topics will be explored using original documents, recent interpretations, class discussions, group presentations, film, music, etc. Although the core periods and themes will be covered in each class, depending upon the instructor, different emphases will be placed on the core topics.

Students will be introduced to key events, processes, movements, and leaders which have shaped African American life in the twentieth century. In addition to refining general research skills, there will be a focus on developing systematic approaches to the study of African Americans and U.S. history through the examination and uses of methods derived from the social sciences and the humanities. Students will also be expected to become familiar with central historiographical debates in the study of African Americans. They will be required to both critique and use these approaches in their research papers. Social sciences methods will be discussed and used to understand economic, social and political conditions and change. Finally, they will be asked to study and apply methods derived from the critical cultural studies in literature in order to examine cultural practices and movements. The students’ grasp of history and methodology will be evaluated in two short papers and a final fifteen to twenty page research paper. Short tests, group projects, individual presentations, and class discussions are also central features of the evaluation process.

This course should also be considered directly related to all courses in the social sciences and the humanities that address the United States in the twentieth century. It is required of all African and African American Studies majors and minors. The course will be offered at least three times a year with an enrollment limit of 40 students per class. The three active learning elements covered in the course are active use of writing, speaking, and other forms of self-expression, application of intercultural and international competence, and dialogue pertaining to social behavior, community, and scholarly conduct.

African and African American Studies (AAA S)

AAA S 105 (GN;IL) (EARTH 105) Environments of Africa: Geology and Climate Change (3) Significant natural features of Africa as related to human endeavor; case studies include the Nile, climate change, natural resources.

AAA S 105 Environments of Africa: Geology and Climate History (3) (GN;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

"Environments of Africa: Geology and Climate History" investigates the interrelationships between geology, hydrology, land use and human development in several areas of Africa. We focus primarily on regions north of the equator, although there is a brief segment on South African mining. Specific topics include the Nile River (sources of the Nile, agricultural practices, effects of damming the Nile, hydropolitics), the Sahara and Sahel (salt mines, climate change, drought, water resources), and natural resources and their role in politics (gold, diamonds, oil and gas). The theme of climate change cuts across the entire semester. The quantitative and analytical components of the course working through a course of map exercises and data manipulations (flood stage, groundwater age, and temperature records). Writing exercises are conducted both individually (essays, analysis of readings) and in collaborative teams (climate change analysis). Readings for the course come from the popular scientific literature; current refereed research journals, and transcribed oral histories of African people. Faculty lectures will comprise -30% of the course, and student presentations -20%, with the remainder of the time devoted to in-class collaborative exercises.

The goals of the course are to (1) introduce the scientific study of Africa; (2) develop quantitative and scientific reasoning skills; (3) explore the relationship between human society and the natural world. The topics that we explore (e.g., global climate change, allocation of limited water resources) are important political issues that affect peoples in developed and developing countries throughout the world. It is crucial that the next generation of citizens be informed as to how scientific data are obtained, presented, and interpreted by scientists as well as politicians. Students will work individually and (more commonly) in teams to analyze real data from natural African systems, and will then report their findings to the class both orally and in writing. Examples of the data sets include 100-year records of monthly rainfall and temperature from stations throughout the continent, fossil suites from ancient lake cores in the modern Sahara, and historical writings of Nile flood levels from pre-Biblical times. Through these exercises students will gain an appreciation of the scope of geological time and change, and will be able to incorporate this new long-term perspective into identification and resolution of modern questions.

African and African American Studies (AAA S)

AAA S 103 (US) (SOC 103. WMNST 103) Racism and Sexism (3) Critical analysis of the structure of race and gender in the contemporary United States.

AAA S (SOC/WMNST) 103 Racism and Sexism (3) (US)

(BA) This course meets the Bachelor of Arts degree requirements.

This course focuses on racism and sexism through a critical analysis of race and gender equality/inequality. A primary objective of this course is to provide students with information and conceptual tools necessary for understanding the structure and composition of race and gender inequality in the United States today. The focus on both racism and sexism provides a perspective that is quite different from those of courses that deal with race or sex alone. Racism and sexism have much in common that suggests their combined study. The course examines the way in which these processes are socially constructed and defined and how these constructions and definitions are experienced in daily life at an individual level and societal level. The course also examines how social control dependent on power, privilege, and advantage continues to perpetuate sexism and racism. This understanding is fundamental to considering the ways in which society and its individual members may motivate social change that enhances equality. Other objectives include developing an appreciation of the commonalities and differences among women and among men and women of diverse ethnic groups in terms of their real-life experiences with these processes; expanding the ability to read and/or view critically information/misinformation encountered in everyday life; enhancing the capacity to express knowledge and perspectives both orally and in writing. In addition, each student comes to the class with personal objectives that the instructor attempts to ascertain and incorporate. A common foundation of knowledge is established through consideration of current statistical data and academic research studies, as well as essays and novels based on subjective thought and experience. Also included are historical documents that have influenced the social and legal status of women and of men and women of color throughout our country's history. Videos and the media are supplementary sources. Students are encouraged to be alert to relevant current events and be prepared to discuss them from a critical perspective. The format of the class is informal, emphasizing group participation and responsibility. Grades are based on the evaluation of short papers on the readings, relevant events, and contemporary culture; class participation; a book report; and a final project or take-home exam. AAA S/WMNST/SOC 103 is a supporting course for both the women's studies and sociology majors and minors and the African and African American Studies major. It is an additional course for the African and African American Studies minor. The course also meets the requirement for 3 credits on the topic of women of color for the women's studies major and the minor.

AAA S 102 (GH;IL) (WMNST 102) Women of Color: Cross-Cultural Perspective (3) Global examination of value systems of women of color; attention to minority ethnic groups in the United States and developing countries.

AAA S (WMNST) 102 Women of Color: Cross-Cultural Perspectives (3) (GH;IL)

Women of Color: Cross Cultural Perspectives is a survey course that examines the similarities and differences of various cultures and the influences that mainstream America has on these cultures. Stereotypes, perceptions, the media, and male influences are also examined. Students will be encouraged to identify contributions made to mainstream America by women representing these cultures. Students will also be required to submit written assignments, participate in group discussions and attend on-campus events relevant to the course. The course is designed to enhance students critical thinking, writing, and speaking skills. This course can be used to fulfill supporting courses and related areas in the Women's Studies and African and African American Studies majors and minors. Non majors may use this course to fulfill a general education humanities requirement.

AAA S 110 (GS;IL) Introduction to Contemporary Africa (3) Consideration of influences and forces shaping modern African society; analysis of current local and global problems and issues facing Africa.

AAA S 110 Introduction to Contemporary Africa (3) (GS;IL)

This course meets the Bachelor of Arts degree requirements.

This course will introduce students to the realities of contemporary Africa. Students need to study the history in order for them to understand the complexities of modern Africa. The first part of the course will deal with the history of the first encounters between Africa and Europe. The legacies of the Atlantic Slave Trade and colonialism on contemporary Africa will be analyzed.

Colonialism will be examined in its multifaceted experience. The difference between the settler states and the indirect rule states, the uniquely nationalist flavor of the various colonial powers -- England, France, Portugal, Italy, Germany, and Belgium and the resulting preparations for independence will be studied. Mau Mau and Algeria, the indigenous guerrilla wars of Africa, will be presented. The important African independence ideologies will be studied in detail, with special reference to Pan-Africanism, Mkrumah's neo-colonialism, Nyere's African socialism and Cabral's African Marxism.

We will look at the U.N. failures in Africa and the tragedy of Lubumba and the Congo. The creation of the Organization for African Unity and its effectiveness will be discussed.

Questions concerning leadership in Africa will be raised by studying several countries such as Kenya, Nigeria, Ivory Coast, and Zimbabwe. Zambia Civil wars have been a serious problem in post-colonial Africa. We will examine four of the civil wars of the last decade -- Congo, Rwanda, Liberia, and Sudan. Additionally, the politics of the Horn of Africa, particularly the revolutions in Ethiopia, the wars of liberation in Eritrea, and the civil war in Somalia, will be analyzed in some detail.

We will look at the entire history of South Africa, from the arrival of the Dutch to the Boer War, from Apartheid to Nelson Mandela. Development and economic problems plague contemporary Africa. The last part of this course will be devoted to the study of development in Africa. We will look at the different theories from Walter Rodney's How Europe Underdeveloped Africa to World Bank theories. Students will be required to analyze a particular development problem in an African country and find a solution as their final project.

African and African American Studies (AAA S)

AAA S (SPAN) 132 Afro-Hispanic Civilization (3) (IL)

(BA) This course meets the Bachelor of Arts degree requirements.

The nations and peoples of Latin America have a unique, interesting history and cultural heritage that are rooted in the traditions, beliefs, experiences, values, and struggles of Native American, European, African and other populations. This course focuses on the presence and participation of African peoples and their descendants in the formation and development of societies and cultures in representative areas of the Caribbean, South America, and Central America and on the evolution, diversity, and richness of the African heritage therein. Course content includes the African background, the experience and impact of slavery, the social, cultural, and economic heritage of slavery, the role of race in Latin America, and Afro-Hispanic intellectual, literary, and artistic developments (e.g., aspects of folklore, music). The course aims to provide students with a general introduction to human and cultural elements of African origin within the Spanish- and Portuguese-speaking nations of the Americas so that they may be more knowledgeable of the meaning, significance and widespread influence of the African diaspora. It proposes to provide the student with a better understanding of Africa's contribution to Latin American identity, diversity, culture, and development; to promote appreciation for the values and practices of other cultures, and greater awareness of the relations between the nations of the region and the United States. Classes usually combine lecture and discussion of reading assignments, with an expectation of high student participation. Films, videos, and recordings will enhance and illustrate readings. One required examination (covering approximately one half the lessons presented), an occasional quiz, a library research exercise, an oral presentation, a written research project, and participation and attendance will be the basis of the evaluation of student learning and grades. This course will fulfill the Intercultural/International Competence or Diversity Requirements. The course does not count toward credits in the major or minor in Spanish because it is taught in English. Nevertheless, it will complement the department's offerings by providing students with a greater appreciation of Latin America's cultural origins, socioeconomic development, and everyday realities. AAA S 132 is an option that fulfills the Intercultural/International Competence requirement for African and African American Studies majors. The African and African American Studies Department has a minor with a diaspora concentration and this course is an elective to that minor.

AAA S 145 (GH;US;IL) (RL ST 145) African American Religion (3) History and significance of the religious dimension of the Black American struggle for equality from enslavement to the contemporary period.

AAA S (RL ST) 145 African American Religion (3) (GH;US;IL) (BA) This course meets the Bachelor of Arts degree requirements.

This course is an introduction to African American religion in the U.S. We will investigate the history and significance of the religious dimension of African American life and culture. We will also examine the demographics of race and religious experience. African Americans (the term Black American is also used) have many different religious backgrounds including Protestant, Catholic, Moslem, and others, which are examined in this course. However, since well over 90% of Blacks who have a religious experience and organization are Christian, the history of the Black Christian church and Blacks in the Christian churches in the United States will occupy most of our study. This course will also examine the theological backgrounds of the Black church from the basic Christian documents in the New Testament, to the most widely known Black theologians and the development of "black liberation theology," one of Christian theologies most important contributions. The theology of Martin Luther King, Jr., will be of particular concern. We will also watch videos on the subjects of interest and have a number of guest speakers, including local church pastors and Penn State faculty, talk about the meaning of religion in the Black experience.

AAA S 147 (GH;US) (RL ST 147) The Life and Thought of Malcolm X (3) The life of Malcolm X/El Hajj Malik El Shabazz (1925-1965) and his social, political, economic, and moral thought.

AAA S (RL ST) 147 The Life and Thought of Malcolm X (3) (GH;US)

(BA) This course meets the Bachelor of Arts degree requirements.

This course will examine in-depth the life, speeches, and thoughts of Malcolm X/El Hajj Malik El Shabazz. While the "Autobiography" will be a major source, we will also use other sources to develop an understanding of the philosophy and thought of Malcolm X. We will explore the social, economic, political, cultural, religious, moral, and spiritual context of America in general and of African Americans in particular. We will examine Malcolm X's influence on the period in which he lived and since his assassination. We will compare and contrast his view on issues of race, culture, politics, education, crime, human rights, civil rights, morality, and economics with those of other African American leaders and with the prevailing views of most Americans on those subjects. We will devote a large portion of the course to the examination of the social movements that impacted on Malcolm and those that he influenced. The speeches of Malcolm X and the writings about Malcolm X are instructive and will be utilized along with other documents. Videotapes and audiotapes will also be employed as instructional materials. Students are expected to be ACTIVE participants in the learning/teaching experience. Students are required to participate in class discussions centered on the readings and related topics. There will be a written mid-term examination and a written final examination. Students are expected to complete an individual research project related to the course and write a paper on that research as well as to participate in a collaborative group project of their choosing on a subject related to the class. This course will count in the supporting courses category of the major and minors in African/African American studies. It also will fulfill credits in the Religious Studies Program. It may also be used to fill GH and US requirements.

AAA S 191 (GH;IL) (HIST 191) Early African History (3) Explores important economic and cultural transformations in the making of early African empires from 1 MBC to 1750.

AAA S (HIST) 191 Early African History (3) (GH;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

The course is an introduction to the history of Africa south of the Sahara from the origins of humankind to roughly 1750. Since it is not possible to undertake a systematic survey of the period -- the continent is too vast and our data too sparse -- we will focus on a number of common themes in the cultural and historical development of African societies. We will start with an introduction to African cultures and the problems in studying them, move on to examine the evidence for the early origins of humans on the African continent, the agricultural revolution, and ancient African kingdoms, empires and civilizations (including Egypt). We will then explore three interrelated themes in the history of Africa from the 16th-18th centuries: trade, state formation, and the spread of Islam. Finally, we will turn to an examination of the slave trade and its impact on Africa and the Americas. This is also a course in historical reconstruction and analysis. There are few documentary sources for this period and much of the data we have is fragmentary. The resulting history consists largely of long-term social changes rather than detailed narrative. We must thus learn to reconstruct history from what evidence is available, using general principles of African social, economic, and political organization that we will develop in class. Typically, students will be evaluated on the basis of a map quiz, short papers, exams that have both an identification and essay component, and participation in class discussions and debates. AAA S/HIST 191 provides an excellent foundation for both AAA S/HIST 192 (Modern African History) and History 479 (imperialism and Nationalism in Africa). In addition to satisfying the GI requirement, AAA S/HIST 192 satisfies general credit requirements for the history major or minor, including the "non-western" component of the major. Non-majors may use this course to satisfy requirements for the African and African-American Studies major and the African Studies minor.

General Education: GH
Diversity: IL
Bachelor of Arts: Other Cultures and Humanities
Effective: Summer 2005

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
African and African American Studies (AAA S)

AAA S 192 (GH;IL) (HIST 192) Modern African History (3) Impact of the slave trade, expansion of Islam, colonial conquest, social and cultural transformations, resistance, nationalism, and independence.

AAA S (HIST) 192 Modern African History (3) (GH;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

This course examines the colonial period in Africa from roughly 1750 to the present. Given the vast geographical breadth of the African continent, its diverse peoples and cultures, and the divergent trajectories of colonial rule, this course cannot provide a comprehensive overview of the modern era in Africa. Rather, it considers some of the most significant transformations in modern African history, including the impact of the Atlantic slave trade and the transition to 'legitimate commerce'; the causes and consequences of European imperial conquest from the 1870's; the dynamics of the colonial encounter; the struggles of African peoples for independence in the 1950's and 1960's; and the enduring impact of the colonial experience on contemporary African social, political, and economic realities. The course is designed to familiarize students with the major events and chronology of modern sub-Saharan African history, and to provide an overview of the key themes and theoretical debates which animate contemporary African historiography. Emphasis throughout the course will be on the understanding and application of historical arguments and theories to available information. The course is intended to help students develop analytical skills vital to the discipline of history, which include the ability to collect and analyze evidence and to construct arguments in both oral and written presentations. To this end, students will have the opportunity to practice both identifying and building arguments by writing several focused short papers that deal with the material covered in a week of class lectures and readings. In these papers, as well as in the two essay exams, students will be asked to generate thesis-driven responses to particular historical problems encountered in the course material. The short papers are intended to promote active engagement with the course material and will be used as the basis for in-class discussions and debates. Typically, students are evaluated on a map quiz, several short papers, participating in class discussions of assigned readings, and exams which have both an identification and essay component. The course content of AAA S/HIST 192 is designed to chronologically follow that of AAA S/HIST 191 (Early African History), and provides an excellent foundation for History 479 (Imperialism and Nationalism in Africa), for which it is a prerequisite. In addition to satisfying the GI requirement, AAA S/HIST 192 satisfies general credit requirements for the history major or minor, including the "non-western" component of the major. Non-majors may use this course to satisfy a general education humanities selection. The course also may be used to fulfill requirements for the African and African-American Studies major and the African Studies minor.

AAA S 202 (GS;IL) (WMNST 202) Gender Dynamics in Africa (3) Critical analysis of multidisciplinary research on relations between men and women in Africa and critique of Western feminist theories.

AAA S (WMNST) 202 Gender Dynamics in Africa (3)
(GS;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

In terms of gender studies, western academics have dominated the field. The course will offer a very different, more African-centered, analysis of the gender relations of African. Important African women writers will be read and their works analyzed. The role of African gender dynamics on the African Diaspora (North American, South America, the Caribbean, and the Middle East) will also be studied in this course.

Feminism is one of the latest Western theoretical fashions to be applied to African societies. Following the one-size-fits all (or better still the Western-size fits all) approach to intellectual theorizing, it has taken its place in a long series of Western paradigms.

African scholars, in particular African women scholars and others, are challenging the very conceptualizations of gender that are used to define, describe or categorize women and men. This class will examine the historical relationships between men and women in Africa and examine the new approaches to the study of gender dynamics in Africa. The course will challenge your perceptions of gender. The ability to critically think and an open mind are requirements for this class. You will also be expected to participate in all class discussions.

This course represents a logical sequel to an existing course, AAA S/WMNST 102, Women in a Cross Cultural perspective; and three courses, AAA S/HIST 191, Early African History, AAA S/HIST 192, Modern African History, and WMNST 4, Global Perspectives on Feminism, which have already been approved by the Senate. This course can be used in both the African and African American Studies major and minors. Grades: map exam 10%, oral history 15%, mid term 30%, and final 45%.

African and African American Studies (AAA S)

AAA S 208 (GA;US;IL) (THEA 208) Theatre Workshop in Diverse Cultures (3) A performance-oriented class which explores the historic and contemporary theatrical works of various culturally diverse peoples.

AAA S (THEA) 208 Theatre Workshop in Diverse Cultures (3) (GA;US;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

Theatre Workshop in Diverse Cultures is a performance-oriented class that aims to introduce students to the broad cultural diversity that exists in artistic expression. The class will focus on several plays throughout the semester that will represent cultural, ethnic, and gender diversity as well as different literary styles. Students will be exposed to various cultures by working on plays created by artists from those cultures. The course will concentrate on a specific playwright, culture, or region, such as plays from the Caribbean. Students will be required to read, study, analyze, and perform plays from the genre. For example, the class may focus on the works, life, and philosophy of August Wilson and read Joe Turner's Come and Gone, Seven Guitars, Piano Lesson, and Fences. The class may explore Asian styles such as Noh Theatre and Asian American works by D. H. Hwang or work by Nigerian playwright and Nobel Prize winner Wole Soyinka. The presentation of these plays will be a principle part of the class, but the reading and discussion of the material will be as important. Students will participate in some capacity with the production of these plays in areas such as stage management, dramaturgy, sets and props, lights, sound, costumes, house management, publicity, and acting. These pieces will be performed in class, in workshop, and occasionally for the general public. Students will work as an ensemble and become acquainted with basic acting and theatre techniques. The course objectives are: 1) to develop and enhance students' appreciation for the discipline and commitment required for multicultural theatrical presentations, 2) to help to sensitize all students to the broad cultural diversity in artistic expression, and 3) to provide students with an introductory engagement with drama. AAA S/THEA 208 serves as a primary selection for students pursuing the Theatre minor.

AAA S 212 (US) Black History to the Twentieth Century (3) An examination of Black political, economic, social, and cultural life in America from the era of colonization to 1905.

AAA S 212 Black History to the Twentieth Century (3) (US)

BLACK HISTORY TO THE 20TH CENTURY. A study of political, economic, social and cultural aspects of the African-American experience in the United States from the African roots to the beginning of the 20th century. Students will learn about the contributions made by African-Americans to America social and cultural life. The course will include discussions on the relationships between African-Americans and other population groups such as European-Americans and Native Americans. Students also learn about the varied perspectives on major events in American history such as the Civil War and Reconstruction Periods.

AAA S 210 (GH;US) (HIST 210) Between Accommodation and Alienation: African Americans in a Jim Crow Nation, 1896-1932 (3) The course will explore the context and events that shaped African American life over the period 1896-1932.

AAA S (HIST) 210 Between Accommodation and Alienation: African Americans in a Jim Crow Nation, 1896-1932 (3) (GH;US)

(BA) This course meets the Bachelor of Arts degree requirements.

This course is designed for students wishing to develop an understanding of race in American society and politics over the course of the 20th century. It will focus in considerable detail upon the influence of the Plessy vs. Ferguson decision (1896) in the shaping of America over the four decades that followed. Of central concern is an exploration of the ways in which African Americans and their leaders responded to the institutionalization of segregation within American life, and the divergent strategies advocated for dealing with ‘Jim Crow’ as an impediment to the development of African Americans. The course will also explore the impact of the migration of African Americans out of the South into the cities of the North and the impact of that migration upon both the opportunities for African Americans and the American political system.

Students will be evaluated on the basis of a book review (4-5 pages), a short research paper (5-6 pages), a long research paper (10-12 pages), and their participation in class discussion. The written assignments are designed to improve student research and writing skills, and students are encouraged to be active participants in class discussion.

AAA S 250 (GH;IL) (HIST 250) Introduction to the Modern Caribbean (3) A survey course which, explores the historical evolution and emergency of the modern Caribbean.

AAA S (HIST) 250 Introduction to the Modern Caribbean (3) (GH;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

This course will explore the evolution of the Caribbean region from the eve of the arrival of Columbus to the 20th century. It will explore the emergence, migration, and evolution of Amerindian societies in the Caribbean islands prior to the arrival of Columbus. It will then explore the European-Amerindian interactions that lead to the disappearance of these indigenous peoples from the region and the consolidation of European colonial empires. The course will then explore the various forms of coercive labor systems that emerged in the region including indentureship, enslavement, transportation of European prisoners and other social outcasts, African slavery, and the establishment of the plantation system that defined the region until the 20th century using both free and unfree labor to maintain its dominance in these island societies until the late 20th century. The course will also cover the issue of slave resistance, the Haitian revolution, the formation of maroon communities, and the role of abolitionist politics as a factor in bringing an end to slavery. It will also look at the re-emergence of indentureship of Asians as a response to the crisis of labor and the growth of peasant agriculture in the 19th century Caribbean. The course will also explore the emergence of nationalist sentiment in the region, especially the way in which the decay of Spanish colonial authority and the rise of American imperial ambitions helped to set the stage for the nationalist awakening that defined the course of the 20th century in the region. This is the course that will complement and expand upon issues raised in AAA S/HIST 211 - The Emergence and Evolution of the Black Diaspora in the Atlantic World. It will also serve as an introduction to the 400-level course on the Caribbean in the 20th century that will be proposed simultaneously. The course will be required for students interested in pursuing the African Diaspora minor. It may be used to fulfill general education and diversity requirements. It can also be used as a course to meet non-Western history requirements in the History major.

AAA S (ENGL) 235 African-American Oral Folk Tradition (3) (US)

(US) This course meets the Bachelor of Arts degree requirements.

By its concentration on ethnic and racial difference, AAA S/ENGL 235 fulfills the requirements of the University for the designation of an Intercultural/International Competence (GI) course. This lower division course provides an opportunity for undergraduate students to examine the origins, forms, and function of the oral folk tradition of Americans of African descent, especially the speech and music, from signifying to rap. Beginning with the issues of African or European origins, students will explore questions concerning the definitions, source, transmission, variation, meaning, and function of African-American folklore as the basis for a better understanding and appreciation of the distinctiveness of African-American culture and character. Assessment of student performance will include two oral reports, a folklore collection project, two (outside of class) essays of 5-10 pages typed, and a final examination consisting of essay questions and short answers. Students will also be evaluated upon their participation in class discussions. AAA S/ENGL 235 will be a basic core course for students emphasizing African-American literature within the English major. It will also be important in the offerings of African and African American Studies. AAA S/ENGL 235 will satisfy one of the five 200-level courses required for the major in English. It can also satisfy one of the six courses required for a minor in English. It will also be important in the offerings of African and African American Studies. This course can be used to fulfill a major requirement for African and African American Studies. It also will fulfill the University’s cultural diversity requirement.

AAA S 302 (US) (BB H 302) Diversity and Health (3) Exam the relationship of diverse personal and sociocultural factors to health, like socioeconomic class, race-ethnicity, gender, age, and sexual orientation.

AAA S (BB H) 302 Diversity and Health (3)(US)
AAA S 302 is an introduction to an interdisciplinary study of the impact of diversity on health in America and across nations. The course is designed to provide an understanding of the complex interaction between concepts of diversity including but not limited to race, ethnicity, culture, gender, age, socioeconomic status, and sexual orientation. The course will also consider and critique the methods used in the study of these concepts and issues related to the measurement of health among diverse groups. The ultimate goal of this examination is to assist students in developing an appreciation of the current diversity and the impact diversity has on assessments and study of health, health status, and health promotion in America and other nations. The course is also designed to integrate different sources of information about diversity by utilizing critical thinking skills for the consumption of health information.

The educational objectives will be to enable students to: 1) Consider the implications of race, ethnicity, gender, age, socioeconomic status and sexual orientation on health/social policies in light of research findings, 2) Understand the legacies and historical events that have impacted our view, the status, and treatment of diverse populations, 3) Appreciate the importance of understanding the origins of different health behaviors that impact biological processes, as well as the impact of biological processes in the context of social, environmental, and cultural influences when examining health issues.

To achieve these objectives, the course will involve open class discussions, small break-out group discussions, written assignments, and a presentation (e.g., poster or other media presentation) requiring the acquisition and utilization of information/research from library and internet resources.

AAA S 409 (US) (SOC 409) Racial and Ethnic Inequality in America (3) The impact of inequality and discrimination on individual and group identity among various racial and ethnic groups.

AAA S (SOC) 409 Racial and Ethnic Inequality in America (3) (US)

(US) This course meets the Bachelor of Arts degree requirements.

This course explores the impact of inequality and discrimination on individual and group identity for a wide range of social groups with special focus on racial and ethnic majorities and minorities. Using an extensive list of readings, writing assignments, small group activities, and journals (for personal reflection and scholarly critique) the students join the instructor in exploring the effects of inequality and discrimination. While emphasis is given to the inequality and discrimination experienced by local and national populations, a significant portion of the class will address issues rooted in international structures and institutions. Students are evaluated on quizzes, reaction papers, and analysis journals. AAA S/SOC 409 is not a required course in Sociology; it is, however, an optional 400-level course for all majors and minors that fulfills one of their upper-level course requirements. AAA S/SOC 409 is not required for the major or minor, but it is one of several optional courses from which they can choose to fulfill major and minor requirements.

AAA S 412 (US;IL) (THEA 412) African American Theatre (3) Exploration of the development of African American theatre from its roots in Africa through the Diaspora to the present time.

AAA S (THEA) 412 African American Theatre (3)
(US;IL)
In this course, we will explore the development of African American theatre from its roots in Africa and Europe, through the diaspora, to the present time. We will learn something of the rich diversity of African American people and their contribution to the world's creative mainstream. We will become acquainted with both historical and contemporary artists who created and continue to create this unique American art form. The goals of the course are: 1) to develop familiarity with African American theatre and the socio-historic context in which it was created, 2) to develop an understanding of the relationship of African American theatre to mainstream American theatre, 3) to acquire an appreciation of the schools, styles, and techniques of African American theatre. We will do this by reading and engaging plays in the context of the period in which they were created, viewing films of plays, and attending relevant productions where possible.

General Education: None

AAA S 416 (US;IL) (S T S 416, WMNST 416) Race, Gender and Science (3) The class will focus on race and gender as products of science, and how societal values shape scientific activity.

AAA S (S T S/WMNST) 416 Race, Gender and Science (3) (US;IL)

The course’s objective is to provide a seminar for students to integrate feminist theory, social theory, and science studies through class discussions, essays and research. The role of science in defining, producing, applying and policing of gender and race in society will be explored through the work of feminists and traditional scholars working in a variety of disciplines from cultural studies to science studies. Students will be encouraged to develop a critical analysis of race and gender in science in order to understand the impact of gender and race on the production of scientific knowledge. This course is designed for students in the humanities, social sciences, science and technical fields. Readings will be taken from past and contemporary social theory (i.e. students will be reading original works not textbooks). Students will be expected to read, understand and synthesize 75-100 pages of reading per class and to discuss them in a seminar fashion in order to analyze, critique and evaluate various theories to develop their own understanding of the interrelationship of science, race and gender. In addition they will do two professional-style book reviews during the semester. At the end of the semester students will integrate theory with social, cultural and historical data that they collect through library research (with a minimum of 50 sources). Students will present the paper to the class in a conference style presentation that will conclude with a Q&A session.

African and African American Studies (AAA S)

AAA S 431 (US;IL) (HIST 431) Black Liberation and American Foreign Policy (3) This course deals with American foreign policy and Black liberation in Africa since 1945.

AAA S 431 Black Liberation and American Foreign Policy (3) (US;IL)

Black Liberation and American Foreign Policy in Africa since 1945 presents an interdisciplinary approach to the study of American foreign policy in Africa. Course readings will consist of both secondary and primary sources to explore the evolution of American policy toward the continent over the last half-century, and the meaning of the American engagement with American politics and society.

The course will also examine the reasons that Africa has served as a focus of concern among African Americans both prior to and over the period 1945 to the present. Of particular concern will be the ways in which American policy has reflected pressures from African Americans as a constituency in foreign policy.

The focus of the course will be student-centered written research and discussion. Students will be required to select topics from the course outline for presentation in class with the instructor serving as the moderator of discussion and guide to relevant research materials. Students will be encouraged to use both primary and secondary sources for their research. They will be expected to prepare two individual written presentations which will serve as the basis for class discussion (30% of the grade), a book review (10% of the grade), and a research paper of 15 pages (40% of the grade) on a topic drawn from the areas identified in the course outline. The final 20% of the grade will be awarded for participation in class discussion.

African and African American Studies (AAA S)

AAA S 422 (US) (CAS 422) Contemporary African American Communication (3) A focused study on the continuities between African and African American culture and communication.

AAA S (CAS) 422 Contemporary African American Communication (3)
(US)
(BA) This course meets the Bachelor of Arts degree requirements.

At least once a year, this multidisciplinary course is designed to serve both Speech Communication and African and African American Studies. It is concerned with the relationship between a people’s culture and world view and their systems of rhetoric/communication. It also provides a focus on the continuities between African and African American culture and communication. Specifically, it offers an approach to ascertaining the salient features of African and African American communication for community development. Special emphasis is given to the development and rhetoric of the Civil Rights Movement. The course utilizes videos, guest lectures, tapes of speeches, etc. to clarify objectives and stimulate classroom discussion.

Students will be evaluated on two exams, one oral report, a final paper and class participation. Even though students need 400 level courses for their major and minor, this course is not required for Speech Communication majors. However, it does meet the Intercultural and International Competency requirement because it focuses on the communication of African Americans and how that communication has affected all Americans. The course will accommodate ten students in Speech Communication and ten students in African and African American Studies to ensure active discussion of issues.

General Education: None

African and African American Studies (AAA S)

AAA S 434 (IL) (PL SC 434) War and Development in Africa (3) This course will examine the relationship between war and development in sub-Saharan Africa in the post colonial era.

AAA S (PL SC) 434 War and Development in Africa (3) (IL)

This course will examine the relationship between development and war in sub-Saharan Africa in the modern era. Specifically, it will analyze the extent to which the processes of state building, nation building, and international intervention have contributed to the incidence of both civil war and international conflict in Africa. We will begin with a review of several theoretical arguments on the causes of warfare in Africa and then turn to a discussion of theses on African political development. This course complements present offerings in international relations and comparative politics in the PL SC department and can serve as an advanced undergraduate offering in the African Studies concentration in AAAS. The course directly complements our present offerings in international conflict given that we don’t have a regularly offered course that focuses on conflict in a specific region. In addition, it will augment our comparative politics offerings with an examination of prominent issues in comparative politics such as political development, democracy, and modernization. The course will fulfill the IL requirement and encourage students understanding of the historical background as well as the political, economic, and cultural factors that influence African politics. African conflicts are often viewed as “ethnic conflicts” and in this class students have an opportunity to assess the extent to which ethnic, linguistic, or religious factors influence the likelihood of conflict and contribute to development in African states. Students will also be required to write essays evaluating the contribution of a range of theoretical arguments on Africa’s conflicts in order to assess the degree to which cultural more than political or economic factors contribute to their onset. Students will then have the opportunity to conduct more extensive research on a specific African case to develop their analyses further. These exercises will often require that students reevaluate their beliefs about social identities such as race (e.g. in Rwanda the difference between Tutsi and Hutu is often viewed as a “racial” difference between black Africans, which is at odds with most Western conceptions of race). They also require students to challenge stereotypes regarding the subordination of African values in conflicts to a simple concern with “tribe”. Students will gain a broader knowledge and appreciation of the different values, traditions, and cultures evident in Africa and understand how these can both exacerbate and mitigate conflict.

AAA S 432 (IL) (HIST 432) Between Nation and Empire: The Caribbean in the 20th Century (3) An exploration of the political evolution of the Caribbean Region over the course of the 20th Century.

AAA S (HIST) 432 Between Nation and Empire: The Caribbean in the 20th Century (3) (IL)

(BA) This course meets the Bachelor of Arts degree requirements.

This course will explore the political evolution of the Caribbean Region over the course of the 20th century. Its focus will be the ways in which imperial rule and the search for national identity have been the parameters that have shaped Caribbean political history over that period. Students will explore, in written assignments and class presentations, the ways in which the region which has historically been a theatre of confrontation among the major powers in the international system continued to serve that role over the course of the 20th century. The costs that have been borne by the people of the region from these conflicts have been enormous and crippling for several societies, especially Haiti, Cuba, Jamaica, and the Dominican Republic. Among those costs have also been the continued dependence of these societies upon human migration, limited economic strategies of transformation, increasing levels of poverty, and the emergence of a wide variety of political systems that reflect different historical experiences, demographic diversity, varying levels of political autonomy, and a remarkable level of cultural similarities. Evaluation will be based upon two class presentations: one research paper and class participation. The course will be required for students pursuing the African Diaspora minor and for those seeking to broaden their diversity requirements. It can be used to meet non-Western history requirements in the History major.

African and African American Studies (AAA S)

AAA S 440 (US;IL) (PL SC 440, I B 440) Globalization and Its Implications (3) This course explores the socioeconomic implications of globalization.

AAA S (I B/PL SC) 440 Globalization and Its Implications (3) (US;IL) (BA) This course meets the Bachelor of Arts degree requirements.

This course explores the socioeconomic implications of globalization and some fundamental changes that have taken place in the global socioeconomic system. The bipolar configuration of global power has been radically altered, market-state relations have been reformulated, and global systems of production and finance have been reorganized. Given these recent changes in the world's structure, globalization as a socioeconomic force is examined with a special emphasis on its implications on social issues, capital-labor relations, the roles of unions and trans-nationalals, unemployment issues, poverty and inequality, gender and ethnicity issues, race relations, and democratization around the world. This course also allows students to explore how different countries, communities, social classes, business firms and even institutions are affected differently by globalization. The implications of globalization on Africana communities is given special attention.

The course is organized into three parts: A) The first part of the course attempts to define globalization and identify its essential characteristics in light of social and economic change. This part attempts to answer questions such as what constitutes globalization, how do we know if globalization is taking place, and what aspects of it are new. B) The second part of the course attempts to assess the implications of the different aspects of globalization (identified in the first part) on many critical social issues, including capital-labor relations, the roles of unions and transnational corporations, problems of unemployment, poverty and inequality, gender, ethnic, and race relations, and democratization. C) The third part of the course examines the implications of globalization to African communities.

This course exposes students to the economic, social, political, and cultural implications of the unfolding global order. It allows them to explore how different countries, communities, social classes, business firms and even institutions are affected differently by globalization. Evaluation will be based on daily attendance, along with a class presentation of a design of a research paper; an actual research paper, a mid-term exam and a final exam.

African and African American Studies (AAA S)

AAA S 443 (IL) (PL SC 443) Ethnic Conflict in Africa (3) This course explores the various causes and impacts of ethnic conflicts in the African context.

AAA S (PL SC) 443 Ethnic Conflict in Africa (3) (IL)

(BA) This course meets the Bachelor of Arts degree requirements.

Ethnic conflict is presently a pervasive worldwide phenomenon. Ethnic groups in various regions of the world contest the terms of their incorporation into the 'nation' state and the world order. Such contests have often erupted into violent conflicts crossing national borders. The objectives of this course are to examine the problems of state building, the evolving nature of the state, and ethnic conflicts in the African context. The course explores the factors that contribute to violent ethnic conflicts and the factors that mitigate such conflicts. The course largely evolves around the following two general questions. What are the most important internal and external factors that cause ethnic conflicts? The second is what political systems and arrangements tend to mitigate or resolve ethnic conflicts? In an effort to deal with these two general questions the course examines a number of case studies from different parts of Africa. The course is organized into three parts. The first part surveys general theories on the causes of ethnic conflicts and how democratization relates to ethnic conflict. The second part examines several case studies from Africa and attempt to construct a general hypothesis on the major causes of ethnic conflicts and how democratization or lack of it impacts the conflicts. The third part examines measures that may contribute in the resolution of ethnic conflicts and enhance the process of state building in Africa. Students in groups of two or three will choose a case and give a class presentation on the most important issues involved in a given conflict.

This course compliments other courses that deal with African politics, politics of developing areas, and social movements. It also supplements courses in African and African American Studies, Sociology, and Political Science that deal with issues of ethnic and race relations, as well as issues of nation building (state building).

This course exposes students to the various internal and external factors that precipitate ethnic conflicts in Africa and the economic, social, and political implications of these conflicts. It allows students to explore how different states attempt to address the problem.

AAA S 445Y (US) (LER 445Y, PL SC 445Y) Politics of Affirmative Action (3) Examines history, politics, and economics of the use of special programs to advance racial interests in the U.S.

AAA S (LER/PL SC) 445Y Politics of Affirmative Action (3)
(US)

(BA) This course meets the Bachelor of Arts degree requirements.

The objectives of this course are to introduce students to the relationship between affirmative action and other policies purportedly designed to end racial inequality in the U.S. This course approaches the study of affirmative action in the context of the historic racial discrimination and inequality that Black Americans have faced since the founding of the Nation. The purpose of this course is to help students think about how contemporary and historic affirmative action policies relate to race, concepts racial inequality, the historic and continuing causes for racial inequality, public opinion, American politics and economic thought. The course materials will lead students through scholarly and popular articles, books and video presentations on the topic. It is hoped that students will become familiar with the history of affirmative action from its conception. Students will gain an intimate understanding of affirmative action economic and social outcomes on various racial groups. No prior knowledge is assumed, however a knowledge of civil rights history, quantitative methods, and constitutional law will be useful. The Politics of Affirmative Action satisfies the requirements for major and minor electives for the African American Studies, and major and minor electives for Political Science, and Labor Studies and Industrial Relations. Students are evaluated on the basis of an examination, term paper, class participation and class presentations of papers.

African and African American Studies (AAA S)

AAA S 460 (US;IL) (PHIL 460) African American Philosophy (3) Major works by African American Philosophers, on topics of race, freedom, citizenship, nationhood, law and society.

AAA S (PHIL) 460 African American Philosophy (3)
(US;IL)

African American philosophers and social activists have produced important texts that both take their place in the philosophical canon and revise the canon and indeed how we understand the practice of philosophy. This course surveys twentieth century African American philosophy, from Du Bois's Souls of Black Folk and Dusk of Dawn, to King's Why We Can't Wait, to Davis's Women, Race and Class, to Boxill's Blacks and Social Justice. The books refer back to both liberal democratic and socialist philosophical treatises, as well as theological and jurisprudential writings, in order to construct new conceptions of race, citizenship, freedom, the rule of law. Moreover, they are all grounded in the concrete, problematic situation of African Americans in twentieth century America, so that they raise with special urgency the question of how philosophical reflection can address social change. In classroom debate, students will rediscover and critically examine how the history of racial strife and reconciliation affects local, national and international civic life. One constant feature of this course is that white students and students of color become aware of differing perspectives that are hard to reconcile; this helps them to re-examine their own social identities and those of their classmates. When the course is team-taught (with one white faculty member and one faculty member of color) the same dynamic occurs between the instructor: watching them reconcile their views in discussion and pedagogy helps the students as well. It is hoped that this course will often or always be team-taught.

AAA S 459 (IL) (PL SC 459) Culture and World Politics (3) Role of culture in world politics.

AAA S (PL SC) 459 Culture and World Politics (3)
(IL)

This course examines the role of culture in world politics through an analysis of the varying dimensions of culture and their respective impact on the likelihood of cooperation and conflict among the state and non-state actors in the global system. Specifically, we examine the impact of culture in terms of social boundaries, political associations and the likelihood of an emergent global culture defined largely in terms of customs and practices related to international trade and economic production. We also examine the role of culture as a mechanism for the dissemination and maintenance of patterns of hierarchy. Integrating these different conceptions of culture, we examine the relationship between culture and foreign policy in the US.

The cultural approach to studying politics complements the institutional and rational choice perspectives that are featured in most of our current offerings in the area of international politics. As a consequence, this course will provide students with an opportunity for a course of study that is representative of the diverse traditions in the discipline.

AAA S 459 satisfies the international relations requirement for the Political Science major and the Supporting Courses requirement for the revised International Politics major. Evaluation is based on examinations, class participation, and frequent essays.

AAA S (PL SC) 464 Globalization, Extractive Industries, and Conflicts in Africa (3) (IL)

Globalization has brought increased investments in extractive industries in many African countries. Investments in extractive industries are also likely to continue to increase rather rapidly, given the rising intensity in the competition for African resources, brought about by growing involvement of countries, such as China and India. The terms African countries obtain from corporations for mineral rights have been generally unfavorable. The unfolding competition for African resources brought about by investments from China and India may, however, help African governments to renegotiate the terms of mining concessions corporations to obtain better deals for their resources. Despite the rather poor terms African governments currently have, investments in extractive industries have stimulated economic growth in several countries. Some African countries, including Equatorial Guinea, Botswana, Gabon, Angola, Cameroon, and the Sudan, are experiencing what might be regarded as resource-based economic boom.

Such growth has, however, intensified compulsory acquisition of communal lands by African governments for concessions to extractive industries exposing large numbers of rural communities to evictions from the land they traditionally owned. The expropriations, which purportedly take place for public and development purposes, have led to serious socioeconomic problems, including unemployment and poverty of those evicted from their land, disintegration of traditional institutions of governance, civil wars, communal conflicts, human rights violations, high levels of corruption, and alarming rates of environmental degradation. The conflicts have ravaged many African counties and are likely to continue to occur until mechanisms that allow rural communities to become partners of the transformation are developed. This course examines the socioeconomic and environmental problems associated with land expropriations and extractive industries.

AAA S 469 (US) (ENGL 469) Slavery and the Literary Imagination (3) The impact of slavery on the petitions, poetry, slave narratives, autobiographies, and novels of African Americans.

AAA S (ENGL) 469 Slavery and the Literary Imagination (3) (US)

(US) This course meets the Bachelor of Arts degree requirements.

ENGL/AAA S 469 provides an opportunity for undergraduate students to examine African American petitions, poetry, slave narratives, autobiographies, and novels as literary reconstructions of the economics, politics, ethics, and poetics of slavery. Authors under consideration will vary from class to class, but may include writers such as Paul Laurence Dunbar, Phillis Wheatley, F. Harper, James Weldon Johnson, Langston Hughes, Claude McKay, Sterling Brown, Booker T. Washington, Harriet Jacobs, W. W. Brown, Harriet Wilson, Margaret Walker, Arna Bontemps, D. Bradley, S. A. Williams, Toni Morrison, Ishmael Reed, and Charles Johnson. The course will focus on the complex relationship of slavery to the literary imagination of Americans of African descent as they increasingly discovered the limitations and possibilities of reading and writing themselves into freedom, literacy, and wholeness as human beings and American citizens. Topics covered will vary, but will include issues of the legacy of slavery in the west; the political aims and rhetorical conventions of African-American autobiography; the myths and realities of slavery; economic, political, ethical, and aesthetic issues of the representation of slavery; understandings of black consciousness and black culture on the road from slavery to freedom; the rise of African American realism as a response to the legacy of slavery; Black Feminism and issues of slavery; the role of history and memory in the construction of slavery; post-modern configurations of slavery; and the like. This class will prepare students for advanced courses in African American literature, as well as other academic courses that engage in the verbal and written analysis of complex written forms. Students will be evaluated by class participation, a group oral presentation, small group problem solving exercises, three out-of-class essays (of 5-8 pages each), and an in-class final examination consisting of essays and short answers. AAA S/ENGL 469 will satisfy one of the six 300H-400 level courses required for the major in English and the required 400 level course for the emphasis in African American literature within the major. It can also satisfy one of the six courses required for a minor in English. The course may be used as English Major elective credit or as credit towards the English minor. It will also be important in the offerings of African and African American Studies, American Studies, and American History. This course can be used to fulfill major requirements on the African and African American Studies major.

Agricultural Communications (AGCOM)

AGCOM 462W Advanced Agricultural Writing (3) Practice in journalistic writing strategies to report scientific and technical information in the agricultural/environmental sciences to general audiences.

AGCOM 462W Advanced Agricultural Writing (3)
Advanced Agricultural Writing focuses on scientific and technical topics in the agricultural/environmental sciences and public policy issues related to such subjects for the print media. Instructional objectives include:

- To learn and practice diverse forms of writing for general audiences, including brief news articles and feature formats, such as process, human interest, policy, and news reporting in the agricultural/environmental sciences.
- To recognize and use standard journalistic conventions, including grammar, mechanics, usage, and style.
- To develop an understanding of a writer’s responsibilities and obligations within the context of journalistic ethical standards.
- To analyze and evaluate situations that require writing in order to respond appropriately to the needs and interests of general as well as specialized audiences.
- To develop feature writing skills through extensive writing and revising exercises.

Student evaluation is based on writing assignments and class participation, particularly contributions to the peer review process. Every writing assignment (with the exception of short in-class exercises) is critiqued in peer response groups in class. Before the first draft of a feature article or query letter is due, the class develops a criteria sheet that is specific to the diverse forms of writing students are doing. The day the first draft is due, the class divides into peer response groups and, using the criteria sheet, provide feedback for each writer. The instructor also offers feedback on drafts of each article. Only final drafts are evaluated and graded by the instructor.

Agribusiness Management (AG BM)

AG BM 106 Agribusiness Problem Solving (3) Development of quantitative problem solving skills applied to specific examples of agribusiness management problems, using EXCEL spreadsheets.

AG BM 106 Agribusiness Problem Solving (3)
The goal of this course is to develop agribusiness problem solving skills. These skills include optimization, marginal analysis, time discounting, and measuring efficiency. Examples will be implemented using Microsoft EXCEL spreadsheets rather than algebra, calculus and abstract mathematics. This course, then, plays an important role by building skills for use in later agribusiness management courses as well as teaching important problem solving skills to non-majors who want to learn quantitative economics problem-solving skills in the context of agribusiness management.

Material will be organized according to the course topics areas: optimization, marginal analysis, time discounting, and efficiently measurement. Each topic area presentation will rely on specific examples of agribusiness management problems. The first lecture of each week will be a standard lecture emphasizing concepts, presented in a passive learning format. The second lecture of each week will be presented in a technology classroom with spreadsheet examples being worked out by the professor in front of the class, who will guide the students. The third lecture of each week will be taught in a computer laboratory, with students solving the problems actively, but with supervision. Problem solving skills will be reinforced by assigning problem sets for students to do on their own after the computer laboratory experience. It is permitted for students to submit identical labs but problem sets should not be identical.

**Agribusiness Management (AG BM)**

**AG BM 200 Introduction to Agricultural Business Management (3)** Application of management principles and processes to agricultural business firms in their planning and operating in domestic and international markets.

**AG BM 200 Introduction to Agricultural Business Management (3)**

AG BM 200 is the course for people who wish to combine a technical major with an interest in the business management of agricultural and food based businesses. This is the combination of skills that employers most desire when they look for potential employees.

Examples from a variety of industries in agribusiness are used to present the principles of business management. In addition, emphasis is also given to exploring the institutions, and issues such as food safety and biotechnology that are unique to managers in the agribusiness sector. The presentation of the material in an agricultural and food context enhances your chances for learning so you can become more “employer ready.” Regardless of your major, most people will find themselves as business managers some time during their careers because they will have to manage time, money and people. The material you will learn in this class focuses on the principles of agribusiness management. Principles endure and are always applicable regardless of when and where you apply them. When you have completed AG BM 200 successfully you will have a firm grasp of the critical agribusiness management skills you will need to successfully handle just about any management situation you might face.

NO PRIOR BUSINESS EXPERIENCE IS REQUIRED OR EXPECTED OF THOSE TAKING THIS COURSE.

AG BM 200 deals primarily with the principles of agribusiness management. I will not be teaching you the material in the book. Classroom time will be spent discussing and applying the reading material and decision cases that were assigned for that day. This approach will allow us to cover more material in greater depth. It should enhance your learning because it will engage your higher level thinking skills.

Agribusiness Management (AG BM)

AG BM 220 Agribusiness Sales and Marketing (3) Principles underlying the sales process and practical application for selling situations in agribusiness. Role of selling in the total marketing process.

AG BM 220 Agribusiness Sales and Marketing (3)
Students take an applied approach in this course, to fulfill the course objective of learning skills in sales and marketing. The topics presented in the course are organized as they would appear in a corporate sales training program. Class activities include discussing and solving selected case situations that illustrate or amplify assigned text readings. Lectures and audio-visual presentations cover specific aspects of the selling process, from prospective new customers to the servicing of customers after the sale. A major focus is on role-playing exercises, trying to convince another student acting as a buyer to undertake a particular course of action. Each student is expected to take an active part in the role-playing exercises. During the course students participate in as both buyer and seller. A student peer evaluation comprises a portion of the grade on each role-playing exercise which is videotaped for purposes of critique.

AG BM 308W Strategic Decision Making in Agribusiness (3) Utilize case studies to investigate strategic decision making among agribusiness firms, highlighting how information and market power shape strategies.

AG BM 308W Strategic Decision Making in Agribusiness (3)

This course is designed to analyze strategic decision making among agribusiness firms and other economic agents in a market environment characterized by imperfect information and market power. The course draws upon game theory and other strategic decision tools to analyze four broad types of strategic decisions, each of which corresponds with the four main parts of the course: 1) Strategic Decisions Between Rival Firms: Focusing on firm decisions made between rivals with full information, part one includes the following topics and strategies: limit pricing, entry deterrence, predatory pricing, excess capacity, wars of attrition, strategic commitment, tit-for-tat pricing, and retaliation. 2) Strategic Firm Decisions in an Uncertain World: Focusing on firm decisions made with incomplete information, part two, includes topics on probabilities, expected value and expected utility, learning curves, investment decisions, flexibility, and option value. 3) Strategic Decisions Between Unequal Partners: Focusing on firm decisions made between unequal partners with asymmetric information, part three includes topics on vertical coordination, incentive compensation, franchising, and auctions. 4) Cooperation and Strategic Alliances: Part four investigates how firms can overcome informational problems described above through the use of strategic partnerships. This writing, intensive course will rely on both class lectures and a substantial amount of class discussion. The course content will feature eight to ten industry applications and case studies of individual companies to reinforce economic theory.

Learning Objectives - Students will:

- Classify practical agribusiness problems by the type of available information - full, incomplete, or imperfect and by the nature of market power in an industry.
- Construct and analyze game trees and other representative models of strategic decisions facing businesses and employees.
- Solve strategic business problems using economic models based on game theory and other economic principles.
- Write business-style memos and reports that summarize a business decision, plan, or solution that is supported by economic analysis.

AG BM 320 Markets and Prices: Analysis and Forecasting (3) Understand how prices are determined; develop the skill to analyze and forecast how prices change as the underlying conditions change.

AG BM 320 Markets and Prices: Analysis and Forecasting (3)

In AG BM 320, Markets and Prices: Analysis and Forecasting, students learn how prices are determined and learn how to analyze and forecast how prices change as the underlying conditions change. This involves learning those tools that are used to analyze and understand how commodity markets work and how prices are determined. The class mixes theory with practical knowledge and examples, and aims to create a balanced representation of the tools used in market analysis. The students learn how to find data, manipulate it and analyze and apply these skills to test the validity of simple economic models, to forecast commodity prices, to understand market trends and learn the use of derivative instruments to manage price risk.

One objective of this class is to improve the understanding of economic modeling and to increase the familiarity of students when applying statistical functions and regression analysis to solve applied problems. These core competencies rely on previous knowledge of basic statistic tools and data manipulation. In the process, students will learn to analyze market fundamentals and better understand those forces that affect prices. This will also help them better understand supply and demand and the ability of market participants to adjust to changing conditions.

Diversity: None  
Bachelor of Arts: None  
Effective: Spring 2004

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Agribusiness Management (AG BM)

AG BM 499 (IL) Foreign Studies - Agribusiness Management (1-12) Study in selected countries of agricultural economic institutions and current agricultural economic problems.

Foreign Studies - Agribusiness Management (1-12)

General Education: None
Diversity: IL
Bachelor of Arts: None
Effective: Spring 2006

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Agricultural Economics (AG EC)

AG EC 430 (CEDEV 430) Principles of Community Economic Development (3) Concepts, strategies and techniques of local economic analysis, planning and development; case studies and decision-making exercises.

AG EC (CEDEV) 430 Principles of Economic Development Planning (3)

This course is designed to introduce the issues giving rise to concern for rural and regional economies, and the theories, concepts and tools of rural and regional economic development. The goal is to integrate theory and practice and apply them to economic development problems. Tools are presented in a “how to” manner. Topics include current issues in rural economies; the economic view of rural development; business retention, expansion and location; entrepreneurship and its role in the economy; understanding the local economic structure and the forces of change; introduction to economic growth theories; export base theory and economic base analysis; the role of labor and capital in development; techniques of market area, central place, shift-share and input-output analysis; policies of local economic development and growth.

General Education: None  
Diversity: None  
Bachelor of Arts: None  
Effective: Spring 2004  
Prerequisite: introductory course in economics

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Agricultural Science (AG SC)

**AG SC 296** Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

**Independent Studies (1-18)**

Agricultural Systems Management (A S M)

A S M 210 Turfgrass and Outdoor Power Equipment Systems Management (2) Management of turfgrass and outdoor power equipment (OPE) systems. Application of mechanical systems in the turfgrass and OPE industry.

A S M 210 Turfgrass and Outdoor Power Equipment Systems Management (2)

A S M 210, Turfgrass and Outdoor Power Equipment Systems Management, is a 2 credit course that explores the technology aspects of turfgrass and outdoor power equipment systems as they relate to equipment management. Topics to be covered include: gasoline and diesel engine operation and troubleshooting, electrical and hydraulic system principles and components, machinery management concepts and systems, equipment and chemical safety, and reel and rotary blade theory and sharpening. Students will use a hands-on approach to reinforce the concepts of these topics. Activities will focus on the concerns of a turfgrass or outdoor power equipment manager.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2005
Prerequisite: MATH 021 or equivalent

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Agricultural Systems Management (A S M)

A S M 101 Mechanization Principles for Production Agriculture (3) Applying engineering and mechanization principles for selection and application of agricultural equipment, structural environmental control, and soil and water conservation.

Mechanization Principles for Production Agriculture (3)

General Education: None

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Agricultural Systems Management (A S M)

A S M 217 Landscape Soil and Water Management (3) Landscape soil and water management and practices including irrigation, hydrology, erosion, open channel, drainage, and impoundments.

A S M 217 Landscape Soil and Water Management (3)

A S M 217 is a service course developed entirely to meet the needs of the Landscape Contractors and Landscape Architecture programs. This course is also elected by a few students in Turf and Soil Science and Horticulture. The first six weeks of this course are devoted to the design, layout and management of landscape irrigation systems. Proper selection of sprinklers, irrigation system management and scheduling, control systems and pressure considerations are covered at a level appropriate for the Landscape Contractors and Landscape Architecture juniors and seniors. The second portion of the course focuses on understanding the rainfall-runoff relationships and their influence on soil erosion and sedimentation on landscape sites, especially during construction activities. Students learn how to develop erosion and sedimentation control plans including channels, sedimentation basins and sediment traps. Students also learn to predict soil erosion and understand the impacts of adding wet (continuously water-filled) basins to landscapes.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2001

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Agricultural Systems Management (A S M)

A S M 307 Golf Course Irrigation and Drainage (3) Golf course irrigation systems; including sprinkler selection; piping; control systems; scheduling. Surface and subsurface drainage topics. Note: Students may not take both A S M 217 and A S M 307 for credit.

A S M 307 Golf Course Irrigation and Drainage (3)

A S M 307 is a course developed to instruct students, interested in working in the golf course management profession, about water management. The primary clientele is expected to be Turfgrass Science students. The two large topic areas are irrigation and drainage. About 70 percent of the course is devoted to irrigation topics with a strong concentration on golf course irrigation applications. The discussion starts with sprinkler characteristics and selection and continues to where sprinklers should be placed to be most efficient and effective. Once sprinklers have been properly located, a management scheme is developed that leads to an efficient piping and control system. The management scheme must take into account the highly variable turfgrass evapotranspiration and soil characteristics, plus the personal desires of the turf manager. This is followed with how to most effectively layout and size the piping system so all sprinklers will receive water at their recommended pressure. This is followed by a discussion about pumps, their characteristics and limitations. Students are asked to compute the two primary pump selection parameters. The irrigation section is concluded with the introduction of several additional topics such as thrust blocking, venting, draining the irrigation system for winter storage, etc. All students are required to develop or analyze an irrigation system for a 9-hole golf course. This is a semester-long project that constitutes a major portion of their grade. Following the irrigation, we spend two to three weeks discussing golf course drainage. We discuss classical surface and subsurface drainage and then introduce the details of how classical drainage is applied to recreation areas and golf courses. Drainage is about 30% of the course. In addition to the project, students are evaluated using two exams and weekly homework.

Agricultural Systems Management (A S M)

A S M 310 Power Transmission in Agriculture (3) Selection and maintenance of mechanical, hydraulic, and pneumatic power transmission components and systems. Electric motor principles and controls.

A S M 310 Power Transmission in Agriculture (3)

After successful completion of A S M 310, students will apply the physical principles of mechanical power transmission system components such as shafts, belts and sheaves, chains and sprockets, gears, torque limiters, clutches, and universal joints by selecting suitable mechanical drives and specifying proper maintenance procedures. Students will be able to read hydraulic and pneumatic schematics, size fluid power components such as pumps, lines, valves, cylinders, and troubleshoot hydraulic and pneumatic systems. Students will also be able to explain the electrical and physical principles of AC and DC electric motor operation. They will be able to identify torque, speed, voltage, and current operating characteristics and will be able to select controls and circuit protection devices necessary to achieve proper performance. As a required course in the Agricultural Systems Management major, A S M 310 is a prerequisite for other courses.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2004
Prerequisite: or concurrent: A S M 221

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Agricultural Systems Management (A S M)

A S M 309 (E R M 309) Measurement & Monitoring of Hydrologic Systems (3) Introduction to measurement and monitoring equipment/techniques commonly used in analyses and design of hydrologic systems.

A S M (E R M) 309 Measurement & Monitoring of Hydrologic Systems (3)

This course will provide students the opportunity to learn and apply basic measurement techniques that serve as critical tools in professional practice in water resources. Mapping development and use serves as a critical aspect of water resources engineering and planning, and a major portion of this course will focus on the fundamentals of surveying and translation of surveyed data into useful maps and engineering drawings. Students will learn the theory that underpins basic surveying and then apply this theory in actual survey practice. Autocad serves as a primary software tool used in engineering design and water resources planning, and students will be afforded opportunities to use Autocad to present and process various watershed- and survey-based data. Geographic information system (GIS) techniques will also be investigated as a tool to process, record, analyze, and display various spatial data commonly used in water resources planning and engineering design. Students will learn the basic techniques and processes used to transfer data between GIS and Autocad, both of which are commonly used in practice. The course will also investigate the instrumentation, techniques, and theory involved in common water resources measurements including weather conditions (which serve as the principle driving conditions in water resources), flow monitoring, basic soil properties, water movement in soils, and water quality sampling and analyses. Students will conduct hands-on exercises that will focus on the use of various instruments and techniques commonly employed to conduct such measurements. Data collected will be processed and analyzed within the context of professional practice case studies. The various aspects of the course will coalesce around the concept of the watershed being the basic unit of water resources analyses and design, and students will experience how various measurement techniques and approaches are necessary tools for practicing professionals. This course will be useful to any undergraduates seeking degrees in a major related to water resources planning, engineering, or technology.

Agricultural Systems Management (A S M)

A S M 320 Combustion Engines for Mobile Equipment (3) Operating principles of internal combustion engines; performance, selection, and maintenance aspects of engine systems in mobile equipment.

A S M 320 Combustion Engines for Mobile Equipment (3)

After successful completion of A S M 320, students will explain and evaluate the theoretical and practical aspects of internal combustion engines. Students will evaluate and compare alternative engine thermodynamic cycles, alternative fuels (gasoline, diesel, biodiesel, compressed natural gas), performance enhancing attachments (turbochargers, intercoolers), and supporting systems (fuel injection, lubrication, starting, cooling, emissions cleansing). Students will be able to properly select engines and related systems for mobile applications. Students will employ important maintenance procedures required for economical useful life and proper operation. Students will be able to troubleshoot engine systems.

Agricultural Systems Management (A S M)

A S M 326 Hazard Identification and Control in Production Agriculture and Related Businesses (2) Identification and control of hazards common to farms and agriculturally related rural businesses, including structures, equipment, animals, chemicals, outdoor environment.

A S M 326 Hazard Identification and Control in Production Agriculture and Related Businesses (3)
This course provides an overview of identification and control of hazards common to farms and agriculturally related rural businesses. The focus is on hazards associated with machinery, structures, equipment, animals, chemicals and the outdoor environment. Upon completion of the course you will be able to:
1. Describe the extent and range of occupational injury and disease on farms and in agriculturally related businesses.
2. Describe principles of hazard identification and control.
3. Recognize hazards found on farms and in agriculturally related rural businesses.
4. Develop methods for preventing or controlling hazards found on farms and in related businesses.
5. Evaluate work sites for hazards based on standardized hazard auditing tools.

General Education: None

Agricultural Systems Management (A S M)

A S M 391 (GWS) (B E 391) Contextual Integration of Communication Skills for the Technical Workplace (2) To develop corporate communication skills in technically focused students in a contextual manner.

A S M (A B E) 391 Contextual Integration of Communication Skills for the Technical Workplace (2)

A S M (A B E) 391 is the first half of a two-semester capstone experience in corporate focused leadership and communication skills training. The sequence is formatted into two 2-credit courses (second semester Junior for A B E/A S M 391 and first semester senior for the companion A B E/A S M 392 course). A key facet of this training is the contextual approach taken. All course modules are focused around the needs of industry and corresponding technical course content — a complete contextual approach. To meet the needs of the student, the course will reflect clear understanding of leadership and communication but also appreciate critical aspects of the technical content of student’s work and of the industries within which the students will ultimately work. The primary focus for 391 is communication skills (oral and written) with a secondary focus on leadership and career skills. The course provides the student with interaction with individuals from industry (company visitors, industry trips, and recruiting opportunities). Students will be evaluated through writing and speaking projects, professional presentations, written worksheets in class and out, creation of portfolios and reports, in class group and individual exercises, computer graphics presentation assignments, library assignments, interaction with industry executives (reports), and leadership journals.

Agricultural Systems Management (A S M)

A S M 420 Off-Road Power Units (3) Cabs, traction, power allocation, and electronic systems for tractors and other off-road vehicles; requirements for production agriculture, logging, and construction.

A S M 420 covers the technical aspects of off-road power units such as tractors, self-propelled harvesters, and logging and construction equipment. Upon successful completion, students will understand the many facets of design and management of such vehicles (such as power generation, power allocation, power transmission, traction, operator enclosures, and electrical and electronic systems).

Grades will be based on homework, laboratory exercises, a special project report as well as a mid-term and a final examination. Laboratory exercises will involve full-scale equipment with instrumentation used to measure performance.

While A S M 420 is not a prerequisite for any other course, it complements engineering and technology courses related to machinery. This course serves as a technical selection in the Agricultural and Biological Engineering major and as an agricultural selection in the Agricultural Systems Management major. It complements other courses for anyone interested in the off-road machinery industries. A S M 420 covers several aspects of function and design related to off-road machinery.

General Education: None
Diversity: None
Bachelor of Arts: None

Agricultural Systems Management (A S M)

A S M 424 Selection and Management of Agricultural Machinery (3) Function and operation of field and farmstead machines; energy, quality, and loss considerations; selection and utilization; precision agriculture technology.

A S M 424 Selection and Management of Agricultural Machinery (3)

A S M 424 covers the many aspects of mobile agricultural machinery and fleet management. Integration of economic analysis and functional performance topics are the focus. Optimization, sizing criteria and cycle diagrams, repair and maintenance, reliability of machinery, and precision agriculture technology are major topics covered. Students will give demonstrations of machines as part of the course. Software will be used to select proper sets and sizes of machinery as well as predict impact of machinery selections that may be non-optimal.

Grading will be based on homework, laboratory exercises, a demonstration project as well as mid-term and final examinations. Laboratory exercises will involve full-scale equipment with instrumentation used to measure performance.

While A S M 424 is not a prerequisite for any other course, it complements engineering and technology courses related to machinery. This course serves as a technical selection in the Agricultural and Biological Engineering major or as an agricultural selection in the Agricultural Systems Management major. It complements other courses for anyone interested in the off-road machinery industries. A S M 424 covers several aspects of selection and management of agricultural production and processing machinery.

A S M 426 Management of Safety and Health Issues in Production Agriculture and Related Businesses (3) Management of safe workplaces and workers, hazard identification, employee training, legal responsibilities, and program development for farms and related businesses.

A S M 426 Management of Safety and Health Issues in Production Agriculture and Related Business (3)

A S M 426, Management of Safety and Health Issues in Production Agriculture and Related Businesses, is a 3-credit-hour course that explores the management aspects of farm and agricultural-related business safety and health. Topics to be covered include: orientation to farm and related business safety and health issues, legal and ethical responsibilities, how to approach and organize safety and health management plans, and safety and health education and training. Students will use a case-study approach to devise safety and health management plans for an existing farm or agricultural related business enterprises. Activities focus on the analyses of worksheet hazards, developing a hazard control plan, and employee training. Evaluation will be based on homework and class participation, quizzes, a final exam, and a final paper and class presentation. A S M 426 presents students with a systems approach to developing management strategies to counteract work hazards and methodology for preparing occupational safety and health management plans for production agriculture and related businesses that serve production agriculture. A S M 426 is an upper-level elective for the Industrial Safety and Health program in the Department of Energy & Geo-Environmental Engineering, College of Earth & Mineral Sciences, and would be in the selection list for a supporting/related course in the A S M Off-Road Equipment Minor.

Faculty Members Proposing Course: D. J. Murphy and J. W. Hilton

**Agricultural Systems Management (A S M)**

**A S M 429W Agricultural Systems Analysis and Management (3)** Theory of systems thinking; optimization and quantitative techniques for analysis of agricultural production and processing systems.

**A S M 429W Agricultural Systems Analysis and Management (3)**

ASM 429W is a capstone course for the Agricultural Systems Management major. The course covers systems analysis and optimization techniques including an introduction to systems theory, qualitative and quantitative analysis, linear programming, waiting line models, PERT/CPM, minimal spanning tree, calculus methods, simulation modeling for decision making, inventory, and energy audits. All topics are presented in the form of case studies that require the students to solve problems in realistic agricultural production and processing scenarios. All exercises, exams, and projects are team-based. The course also provides a writing-intensive structure. The course targets ASM students in their last semester because it integrates knowledge and experiences acquired in prior ASM, business, and agricultural science courses. Grades are based on reports, a mid-term exam, and a final project.

Agricultural and Extension Education (AEE)

AEE 201 (GS) Interpersonal Skills for Tomorrow's Leaders (3) Study of concepts of self identity, values and interpersonal relations as related to professional and personal life.

AEE 201 Interpersonal Skills for Tomorrow’s Leaders (3) (GS)

The purpose of the course is to aid students in becoming competent in conducting interpersonal relationships in their daily life, and to help students acquire skills basic to becoming a leader in their personal life. The following topics will be addressed. A framework for interpersonal skill development sets the stage for improving one's interpersonal skill. Understanding individual differences addresses information that is the foundation of effective interpersonal relations. Interpersonal communications deals with skills in sending and receiving messages. Developing teamwork skills sensitizes the student to a vital set of skills in the workplace as well as organizations. Group problem-solving and decision making provides additional skill in collaborative efforts. Cross-cultural relations and diversity develops cross-cultural skills in the classroom, community organizations and the workplace. Resolving conflicts develops skills in finding constructive solutions to differences of opinion and disputes with others. Becoming an effective leader addresses: 1) exercising effective leadership in clubs, organizations and the workplace, 2) motivating and helping others to develop and grow through coaching, counseling and teaching, 3) using power and influence for constructive purposes, and 4) translating ethical behaviors into usable skills. Each class meeting will focus on one or more concepts related to leadership and interpersonal skill development. Students will be required to complete a service learning project applying their leadership and interpersonal skills with individuals in the community who are in need of their help.

**AEE 360 Leadership Development for Small Groups (3)** Students will learn about leadership dynamics in small groups and how to be more influential in work settings.

**AEE 360 Leadership Development for Small Groups (3)**

This course is designed to teach students the dynamics of leadership in small groups. Specifically, students will learn to identify characteristics of leaders and understand their own personal leadership style. In addition, students will participate in team building activities and understand small group and motivational factors.

Evaluation will be via a series of four examinations and two papers reflecting on impact and shadowing exercises. This course will be part of a series on leadership development offered through the Department of Agricultural and Extension Education.

Agricultural and Extension Education (AEE)

AEE 413 Program Planning and Instructional Development (3-4) A course in planning, developing, and organizing school-based curriculum, summer programs, advisory councils, and facilities for environmental/ agricultural education.

AEE 413 Program Planning and Instructional Development (3-4)
Organization and administration of secondary programs of education in and about agricultural/environmental sciences, including Ag In The Classroom (Elementary School Agriculture), marketing, summer programs, and state vocational finances. Topics will include discussion of instructional techniques for secondary educators in agriculture, with emphasis on classroom management, discipline and motivation, and teacher evaluation.

The course is arranged in 10 units (for students who have completed AEE 100 as an undergraduate certification requirement) or 15 units (for returning adult students seeking certification who have already completed an Agricultural/Environmental Science undergraduate degree). Thus, this is a variable credit offering designed to meet the needs of these two groups of students.

In each unit there are objectives that need to be met by the students. The students "click" on the objective to open the lessons. Within the lessons are research materials, articles, textbook references (all copyright permission), additional WWW links, and other supporting resources. At the end of the article is an opportunity for students to enter the Penn State Coursetalk electronic "chat" room to engage in discussions.

AEE 465 Leadership Practices: Power, Influences, and Impact (3) Explores the leader role as it relates to issues of purpose, social responsibility, political influences, and legal constraints.

In this course, students will explore leadership roles as they relate to issues of purpose, social responsibility, political influences and legal constraints. It is designed to help students develop greater sensitivity to the variety of factors and forces impacting leadership processes and to acquire an increased understanding of key elements of successful leadership practices. The overall objective of this course is to help students learn specific leadership competencies that will make them a more effective leader when addressing problems and seeking solutions in public and/or private domains.

Evaluation will be based upon unannounced quizzes, several short written projects, and a final paper in which students will be expected to demonstrate an integrated application of causes, barriers and key ingredients of a leader they consider to be successful. This course will be part of a series on leadership development offered through the Department of Agricultural and Extension Education.

AEE 460 Foundations in Leadership Development (3) This course explores historical and contemporary leadership theories, models and perspectives within social, cross-cultural, and political contexts.

AEE 460 Foundations of Leadership Development (3)
This course is designed to provide students with a philosophical and theoretical framework of leadership by examining historical and contemporary theories, models and leadership styles within a social, political and global context. Students will explore leadership effectiveness and its relationship to issues of power, influence, persuasion, motivation and ethical decision-making. The overall objective of this course is to help students learn specific leadership competencies that will make them a more effective leader when addressing problems and seeking solutions in public and private domains.

Evaluation will be based upon quizzes, written projects, leader interview and a final paper in which students will be expected to demonstrate an integrated application of causes, barriers and key ingredients of successful leadership practices. This course will be part of a series on leadership development offered through the Department of Agricultural and Extension Education.

AG 160 (GH) Introduction into Ethics and Issues in Agriculture (3) The course explores ethical theories, concepts of critical thinking, and major ethical issues related to American agriculture.

AG 160 Introduction into Ethics and Issues in Agriculture (3) (GH)

Ethics and the social contract include substantive ethical theories focusing on rights-based ethical theories (libertarianism and egalitarian theories) and consequentialist theories (utilitarianism and axiology). These theories assist in conceptually defining levels of participation and consent in democracy. This course explores the circumstances in which rational persons and political groups historically agree to be bound in collective decision making. The primary focus by examines four separate ethical themes illustrating why and how individuals accept a variety of terms.

The course highlights philosophical/ethical decisions related to agriculture issues during the history of the United States. Issues range from non-interference rights to opportunity rights dealing with food, fiber, natural resource and environmental issues. Procedural theory emphasizes the formation of legitimate and defensible rules rather than ethics. Policy choices are assumed to be legitimate and defensible as long as individuals follow the rules/procedures for decision making. The content of this course meshes the procedural and the substance theories found throughout historical debates in agriculture communities. The course identifies traditional agrarian problem identification, policy formation, policy adoption and funding, program implementation and program evaluation.

How ethics figures historically in agriculture policy processes is applied in a variety of case studies and debates as well as selected readings. The course includes an examination of the ethics of when, how and where the policy process historically influenced agriculture public policies. The course emphasizes the need to critically think about various points of view expressed by various conflicting authors.

Agroecology (AGECO)

AGECO 122 (GN) (METEO 122) Atmospheric Environment: Growing in the Wind (3) Dynamic effects of weather on ecosystems and habitation of Earth.

AGECO 122 Atmospheric Environment: Growing in the Wind (3) (GN)

Atmospheric Environment: Growing in the Wind is for first-year students who are interested in learning about the dynamic effects of weather on ecosystems and habitation of the Earth. It is about how processes at the ground surface and in the air govern weather conditions on Earth. Growing in the Wind focuses on five major weather elements: energy, temperature, moisture, pressure, and wind and how these factors govern ecosystems and habitation of Earth. Emphasis is also given to human impacts on weather and climate. The lectures (2, one-hour lectures each week) are organized around the central theme that the unequal distribution of incoming solar energy (both spatially and temporally) produces temperature and pressure contrast at the Earth’s surface and in the atmosphere that in turn cause storms and control the weather and climate. Computer lab exercises (1, two-hour lab each week) will reinforce concepts learned in lecture.

Agroecology (AGECO)

AGECO 144 Principles and Practices of Organic Agriculture (3) (GN)

This general education course will teach students about the science of agroecology, with a focus on organic agriculture. We will examine the science, history and development of organic agriculture and its principles and practices. Students will learn about the scientific basis and implementation of fundamental organic farming principles and practices including soil health, diversified cropping systems, organic pest management, and a system perspective. We will also discuss certified organic regulations and policies, organic farming business management and marketing. Learning activities will include: i) reading and discussing agricultural scientific articles, ii) listening to guest speakers and videos, iii) hands-on laboratory and greenhouse activities, iv) attending a field trip, and v) two group projects. The only prerequisite for this course is a high school level biology or ecology course. This course can link with other courses that address the agricultural sciences, food systems, environmental resource management and policy, landscape management and design, and natural resources. Student learning will be evaluated from class participation, questions on reading assignments, short papers and presentations, and a group project and presentation conducted by student teams.

Effective: Spring 2010

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Agroecology (AGECO)

AGECO 134 (GN) (R SOC 134) Sustainable Agriculture Science and Policy (3) The science, socio-economics, and politics of managing food and fiber production systems. Sustainability implications of current practices and future options.

AGECO (R SOC) 134 Sustainable Agriculture Science and Policy (3) (GN)
This general education course will teach students about the soil, plant, animal, and ecological sciences; technologies, and policies of our agroecosystems in an integrated manner. We will examine agricultural resources and options available for sustainable management of resources for food production. Students will have many opportunities to examine and critically analyze scientific knowledge and policies during discussions, writing exercises, and role playing to develop analytical and communication skills. There are no prerequisites for this course. This course can link with other courses that address how research and efforts in agricultural sciences, ecology, policy, economics, philosophy, education, and communication influence sustainable management of natural resources for the present and the future.

General Education: GN

Agroecology (AGECO)

AGECO (AN SC/SOILS) 418 Nutrient Management in Agricultural Systems (3)

Nutrient Management in Agricultural Systems is a senior level course that applies the fundamentals of animal and plant, sciences to the concept of a nation-wide food animal system. The regional concentration and consolidation of animal production enterprises has resulted in important economic savings for consumers. But these changes have also had some detrimental impacts on the environment. For example, some nutrients such as calcium and phosphorus and certain trace elements are mined, while others such as nitrogen and potassium are derived from crop production systems. In all cases, the nutrients are transported to areas of livestock concentration. A small portion of the nutrients leave the farm in the form of animal products, while 60 to 70% of the nutrients are excreted and applied to nearby crop land. The environmental implications of the net influx of these nutrients to livestock producing communities have only recently been recognized. These concepts will provide the background around which regulations are written and sound nutrient management strategies are developed and implemented.

Agroecology (AGECO)

AGECO 438 (AGRO 438) Principles of Weed Management (4) Weedy plant taxonomy, biology and ecology of weedy plant populations, and integration of biological, chemical, cultural and biological controls.

AGECO (AGRO) 438 Principles of Weed Management (4)

The study of weeds and their management is a challenging and demanding task that requires diverse abilities. The term weed is an anthropocentric construct meaning it is a human colored definition. We will study the biology and ecology of weedy plants drawing on examples from a wide range of plant systems; those systems include agricultural fields (agronomic and horticultural crops) and forests. Of course our knowledge of the biology and ecology of weedy plant populations will then be used to underpin and assess control tactics and their integration. The discipline has a history of equating management with herbicidal control and in fact some 80% of the pesticides used in U.S. agriculture are herbicides. However through novel farmer designed management systems, through a research community focused on alternative methods of management and through increased focus on invasive species, exciting breakthroughs are occurring in alternative methods of management and prevention. This course seeks to introduce you to the breadth of management approaches in use and under study. The specific objectives are for students to be familiar with: 1) the local weed flora, 2) fundamental aspects of weed biology and ecology relevant to managed landscapes, 3) the control methods used in managing weed populations, 4) how control measures can be integrated to accomplish acceptable levels of pest suppression, 5) operationalizing a weed management plan, 6) how herbicides enter and move to their site of action in plants, 7) classifying herbicides by their site of action, and 8) the distinction between herbicide concentration in soils and plant available herbicide concentration.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2009
Prerequisite: 6 credits in plant sciences

Agroecology (AGECO)

AGECO 457 (CI ED 457) Principles of Integrated Pest Management (3) Integrated study of pest complexes and their management, emphasizing ecological principles drawing on examples from a range of agricultural, forestry and urban systems. This course is designed for sixth, seventh, and eighth semester students and graduate students.

AGECO (AGRO/ENT/PPATH) 457 Principles of Integrated Pest Management (3)

ENT (AGECO/AGRO/PPATH) is designed to provide junior/senior level undergraduates and graduate students with the knowledge and tools needed to design and implement IPM programs. The course integrates pest management principles and concepts developed specifically for or across the disciplines of weed science, entomology, plant pathology, crops and soil science, horticulture and ecology. Students will also be taught the underlying ecological, historical, sociological and economic principles required for successful development of IPM programs.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2010
Prerequisite: Must take two or more of the following:ENT 313 and/orPPATH 405 and/orPPATH 318 and/orHORT 238

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Agroecology (AGECO)

**AGECO 461 Emerging Issues in Agroecosystem Management (3)** A discussion-based capstone course that elucidates the interdisciplinary issues facing agriculture today.

**AGECO 461 Emerging Issues in Agroecosystem Management (3)**

Emerging Issues in Agroecosystem Management (AGECO 461) is a capstone course designed for the Agroecology degree program, but is also available to students from other majors. This highly participatory course emphasizes many of the interdisciplinary topics facing agriculture today, with a focus on balancing agricultural production with environmental conservation. Topics include: implications and management of soil quality; genetically modified crops; climate change and agriculture; pest and nutrient management alternatives; biofuels; and urbanization. Many of the lectures are given by guests that are experts in the specific topics, which are followed by a student-led discussion with the guidance of the primary instructor. Select readings from the peer reviewed literature are also included. Students will prepare a case study of an actual agricultural production system, emphasizing the sustainability issues covered in the class.

AGRO 410W Crop Science (4) Study of the relation of crop plants to their environment, crop ecology, and the physiology of crop growth.

AGRO 410W Physiology of Agricultural Crops (4)

AGRO 410W is a course in plant physiology that presents fundamental aspects of plant metabolism and demonstrates how they are affected by environmental conditions such as light, water availability, temperature, and mineral nutrition. It describes how plants use photosynthesis to accumulate and partition biomass and how this contributes to crop productivity. The roles of abiotic stress such as drought and temperature extremes on crop productivity also are discussed. The course objectives are to 1) learn how plants 'work' at the molecular, cellular, whole plant and population levels; 2) develop critical thinking skills by planning and conducting experiments related to the course topics and reviewing journal articles; and 3) develop and enhance communication skills through a variety of writing assignments. This course is appropriate for upper level undergraduates or beginning graduate students with interest in plant and agricultural science disciplines including, horticulture, agroecology, plant pathology, ecology, meteorology and entomology; and meshes with courses in these areas. Students will be evaluated by examinations/quizzes, writing assignments and class participation. The course is offered annually and the optimal enrollment is 20 students.

General Education: None

AGRO 460 (BIOTC 460) Advances and Applications of Plant Biotechnology (3) This course provides a comprehensive overview and current status of plant biotech research. The course provides knowledge of plant systems that fall in the category of GMOs.

AGRO (BIOTC) 460 Advances and Applications of Plant Biotechnology (3)
This course will provide a comprehensive overview and status of current plant biotech research. The focus is on providing knowledge of the biology of plant systems. Consequences of development of a transgenic plant either for food (crops) or as a tool to understand molecular, genetic, and inheritance mechanisms of a trait will be discussed in detail. The course will deliver the current literature and understanding of mechanisms involved in herbicide resistance in transgenic plants. Specific topics that will be of interest to students from various disciplines include disease and insect resistance, quality traits, and secondary metabolites. Molecular biology of different pollination systems will be examined so that students will understand the concept of gene flow from transgenic to non-transgenic crops. Examples from recent developments on the beneficial use of transgenic plants as producers of modified compounds, starches, antibodies and their use in phytoremediation of toxic and organic pollutants will be discussed from the perspective of genetic and molecular plant systems. Gene expression of transgenic plant traits and the stability of an engineered crop will be discussed. Specific emphasis will be on different modes of inheritance that a transgenic plant can follow after its development and release into the environment. The course also prepares students for understanding the regulatory processes that are required for testing, moving, and environment release of transgenic crops. The laboratory component of the course will introduce students to the common technique of molecular biology that are used to detect expression in transgenic plants. Transgenic maize plants will be grown in a greenhouse and analyzed for expression of introduced genes.

American Studies (AM ST)

AM ST 050 (GH) The Literature and Lore of Mining (3) Experience and values of mining tradition: survey of the literature and lore, including field research.

AM ST 050 The Literature and Lore of Mining (3)
(GH)

(BA) This course meets the Bachelor of Arts degree requirements.

AM ST 050 is a nontraditional approach to the humanities whose central methodology is a comparative use of literature, lore, and oral history to explore humanistic themes related to the coal mining experience and tradition regionally, nationally, and internationally. Throughout the course, knowledge about the miner and his tradition is derived and synthesized from a variety of sources. During the 15 weeks, students typically read one novel, one play, six short stories, a dozen poems, six essays and articles, and a mining culture and lore anthology. Students also view films and videos, examine historical documents, artifacts, and photos, listen to oral history tapes, and visit a coal heritage site. Central to the course is a three-week segment devoted to preparing students to conduct field research involving an interview of a miner or miner's wife. The other 12 weeks are divided equally to stress poetic, fictional, dramatic, and expository expressions of the mining experience. Students analyze and interpret information collected during the field research and make connections between the contents of the interview and the contents of the national and international literature selections assigned for class. By reading, analyzing, and discussing works of literature, students learn how the mining tradition was an inextricable part of American culture and how it played a vital role in the industrial revolution of America. Issues related to immigration, ethnicity, and the struggle between labor and management are also illuminated. Some universal themes related to the human condition to be explored are: the search for dignity, security, and justice; the struggle against the environment to achieve purpose and meaning in life; the indomitable human spirit versus resignation to fate; and the values of solidarity, brotherhood, and family relationships. Representative authors to be studied who have written about coal mining are D.H. Lawrence (England), George Orwell (England), Franz Kafka (Austria-Czech), Stephen Crane (U.S.) Alexandre Kuprine (Russia), and Emile Zola (France). After reading selections by these authors, students compare and contrast the mining tradition in the U.S. to the mining tradition in other countries, with special emphasis on the coal miner's life style, character, and values. For assessment, students will complete three exams-objective and essay in nature. They will conduct an oral history field research project, prepare three reports, and keep a journal. Class attendance and discussion of the work assigned will also be factors in evaluation. The course will fulfill a general education humanities requirement.

American Studies (AM ST)

AM ST 100 (GH;US) Introduction to American Studies (3) A study of selected attempts to identify and interpret movements and patterns in American culture.

AM ST 100 Introduction to American Studies (3)
(GH)
(BA) This course meets the Bachelor of Arts degree requirements.

American Studies 100 is a broad-ranging introduction to American culture. While specific topics may vary from class to class, the course examines what "America" means and what it means to be "American." These issues will be examined from a variety of perspectives: literature, history, politics, film, race, gender, and geography. The course is often broken down into discussion sections to facilitate student discussion of the material and the lecture. Requirements generally include community service projects, and students will be evaluated on essay tests, papers, journal entries and attendance. American Studies 100 (or American Studies 105) is a requirement for the American Studies major and minor, and offers students valuable experience in critical thinking, analysis, and writing. Non-American Studies majors and minors may use this course to fulfill a general education or Bachelor of Arts-Humanities credits. The course offers students a broad introduction to American culture, also serves as preparation for more advanced courses in American studies, American literature, and American history, in particular.

General Education: GH
Diversity: US
Bachelor of Arts: Humanities
Effective: Spring 2006
Prerequisite: third-semester standing

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

AM ST 083S First-Year Seminar in American Studies (3)
(GH;FYS)

(BA) This course meets the Bachelor of Arts degree requirements.

This course will be an open topic course in American Studies, limited to 20 students, and taught by an experienced professor. The course will be designed to provide a small, interactive learning environment for first-year students. Each section of 083 will address a large theme or number of themes that encourage students to examine a range of assigned texts in the context of broad questions of ethical and social value. Each section of the course will focus on a well-defined body of scholarship that is topical in the discipline, such as 'Civil Disobedience,' "Utopian Communities, and Blacks and Jews: A Multi-Cultural Perspective." In addition to the academic topic and issues of this course, students can expect to gain a general introduction to the University as an academic community and have the opportunity to explore their responsibilities as members of that community. Students will develop an understanding of the learning tools and resources available to them, including the opportunity to develop relationships with faculty and other students who share their academic interests. Each section of the course will require active class participation from all students and a minimum of three substantial written assignments. Each of these written assignments will take one of the following forms: essay, essay exam, or a semester-long reading journal. The course fulfills a General Education humanities requirement or a Bachelor of Arts humanities requirement.

AM ST 105 (GH;US) (ENGL 105) American Popular Culture and Folklife (3) Survey of popular culture, folklife, and ethnicity, synthesizing material from such areas as literature, media, entertainment, print, music, and film.

AM ST (ENGL) 105 American Popular Culture and Folklife (3) (GH;US) (BA)

This course meets the Bachelor of Arts degree requirements.

AM ST/ENGL 105 covers a broad scope of materials, which may range from early to contemporary American folk and popular cultures. While selected topics for reading and discussion often vary from class to class, all courses focus on a critical examination of a variety of popular and fold cultures in order to produce an enriched understanding of America and its inhabitants. To meet this goal, popular and folk cultures will be examined from a variety of perspectives, including literature, history, politics, film, race, gender, class, and geography. Course requirements frequently include: essay exams, papers, journal entries, vigorous class discussion, and course talk participation. Technology is often incorporated into the class well, this course (or AM ST 100) is a requirement for the American Studies major and minor, and offers students valuable experience in critical thinking, analysis, and writing. Non-American Studies majors and minors may use this course to fulfill a general education or Bachelor of Arts/Humanities credit. AM ST/ENGL 105 serves as a broad introduction to American popular and folk cultures as well as interpretive strategies relevant to the study of cultures and individuals. The course, as a result, provides preparation for more advanced courses in American studies, American literature, and American history.

AM ST 196 (GH;US) (ENGL 196, AMSTD 196) Introduction to American Folklore (3) A basic introduction to verbal and non-verbal folklore stressing the basic procedures of collection, classification, and analysis.

AM ST (AMSTD; ENGL) 196 Introduction to American Folklore (3) (GH;US) (BA) This course meets the Bachelor of Arts degree requirements.

English 196 is an introduction to the verbal and nonverbal folk traditions characteristic of several American subcultures, including Native Americans, Hispanic Americans, African Americans, and immigrants. It will cover important genres of folklore, including folk speech, folk narrative, beliefs and religious experiences, use of space, and material culture. Topics under consideration will include ethnicity and cultural identity, the ways in which verbal and material cultures have influenced the literary, political, and economic development of the United States. Students will learn strategies for "reading" and valuing the folklore of subcultures other than their own. This class will prepare students to be able to perform well in future courses that deal with analyzing written, oral, and nonverbal texts and being able to analyze their significance within the subculture that produced them. By the end of the course, students will be able to recognize the cultural, political, and historical implications of such traditions. Additionally, they will have received first-hand practice in compiling a fieldwork project from first-hand interviews and site observations, combined with archival research. Students will be evaluated on the basis of class discussion, oral presentation and group exercises, in-class examinations, and a fieldwork portfolio, based on the fieldnotes, research, and analysis done as part of their project. This course may be used by English majors for English Major elective credit or as credit toward the English Minor, and (as AMST 196) also by American Studies majors in the same way. Non majors may use this course to fulfill a general education or Bachelor of Arts Humanities requirement. English 196 will be offered twice a year with 60 seats per offering.

American Studies (AM ST)

AM ST 307 (GA;US) (ART H 307) American Art (3) History of art in the English colonies and the United States from the seventeenth century to the present.

AM ST (ART H) 307 American Art (3)
(GA;US)

(BA) This course meets the Bachelor of Arts degree requirements.

American art, from the colonial period to the present, is examined through paintings, sculpture, buildings, prints and photographs, as well as exhibitions and national/world fairs. The class places special emphasis upon the predicament of national identity by examining the ways in which the very notion of the “American” has historically been highly contested. Special points of emphasis include: negotiations between indigenous, colonial and European artistic styles, representations of and by displaced populations (colonial subjects, Native Americans, African Americans), myths of the American landscape, the cult of domesticity and the gendering of American citizenry, later transatlantic experiences of expatriate artists, conflicts between urban and rural conceptualizations of the “typical” American experience, the role of the American avant-garde after World War II, and debates over federal funding for the arts. The course is designed to meet two principal goals. The first is to increase students’ powers of visual analysis and help them build a critical vocabulary for discussing an art object’s medium, composition, style, and iconography. The second is to foster an understanding of the deep implication of the visual arts in their social and cultural contexts. The course therefore involves significant material relating to political, economic and religious issues. It investigates problems in patronage, function, reception and censorship. It considers such intra- and cross-cultural issues as representations of gender. Requirements include essay exams and at least one paper. As a general education course in the arts, this course provides an introduction to American art to a student of any major. This course has no prerequisite and presumes no prior exposure to fine art. Students majoring in Art History will learn both the common vocabulary of the field and the outlines of the field that form the foundation for the future study.

Effective: Fall 2007  
Prerequisite: 9 credits of philosophy or 6 credits of philosophy at the 200-level or 5th semester standing

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

AM ST 422 (RL ST 422) Religion and American Culture (3 per semester, maximum of 6) Selected topics, problems, or historical movements in American religion; relation between religion and American culture.

Religion and American Culture (3 per semester, maximum of 6)

General Education: None
Diversity: None
Bachelor of Arts: Humanities
Effective: Summer 1996

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

**Women in American Society (3)**

General Education: None  
Diversity: US  
Bachelor of Arts: None  
Effective: Fall 2007  
Prerequisite: 6 credits of American Studies Sociology or Women's Studies  

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

AM ST 432 Ethnicity and the American Experience (3) Theoretical and conceptual framework of ethnic studies: examination of specific issues related to major American ethnic and racial groups.

Ethnicity and the American Experience (3)

General Education: None
Diversity: None
Bachelor of Arts: Humanities
Effective: Fall 2007

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

AM ST 431 National Character (3) An examination of the characteristics of the American people and other national groups. 

AM ST 431 National Character (3)

An examination of the characteristics of the American people and other national groups. The course reviews techniques that have been used in scholarship to characterize national groups in the United States and cross-culturally, including data gathering in polls, surveys, and censuses; behavioral observations of cultural "personality"; racial and ethnic categorizations; geographical and historical causation. The course analyzes the changes in attitudes toward nationality and "peoplehood" in American history and culture. The course satisfies the "area" requirement in society for undergraduate majors in American Studies, and is open to all majors.

General Education: None  
Diversity: None  
Effective: Fall 2007  
Prerequisite: AM ST 301 or 6 credits in American Studies  

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

AM ST 435 Americans at Work (3) A study of occupational and organizational cultures in America.

AM ST 435 Americans at Work (3)
A study of occupational and organizational cultures in America. The course examines historical and social changes in primary occupations of Americans, including agriculture, crafts and trades, mining and trapping, maritime, manufacturing, corporate, and service and information work. The role of unionism, individualism, and mobility in shaping attitudes toward work will be examined. Students will learn techniques of ethnography and historical analysis to interpret images of work in American society. Evaluation includes application of historical analysis and ethnographic observation of Americans at work in written essays, and two examinations.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2007
Prerequisite: 6 credits in American Studies or Labor and Industrial Relations or Sociology

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

**AM ST 439** American Regional Cultures (3-6) An interdisciplinary study of the culture of a region of the United States, such as the south or the west.

**American Regional Cultures (3-6)**

General Education: None  
Diversity: None  
Bachelor of Arts: Humanities  
Effective: Fall 2007  
Prerequisite: seventh-semester standing

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

AM ST 441 (US) (KINES 441) History of Sport in American Society (3) Background, establishment, and growth of sport in America from colonial times to the present.

AM ST (KINES) 441 History of Sport in American Society (3)

Study of the background, establishment, and growth of sport in America from colonial times to the present, and the role of American sports in American culture and society. The course will examine the ways that sports have operated in the United States as the country has developed into a modern, mass society. Issues of national identity, commercialism, race, ethnicity, class, and gender will be discussed in relation to the popularity of sports. Another set of issues will center on language and media; students will employ methods of analysis such as ethnography and rhetorical criticism that emphasize the multiple layers of meaning inherent in sports culture.

General Education: None
Diversity: US
Bachelor of Arts: None
Effective: Fall 2007
Prerequisite: KINES 141 or 3 credits of United States history

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

**AM ST 448 (ANTH 448) Ethnography of the United States (3)** Ethnographic descriptions of various dimensions of life in the United States.

**AM ST (ANTH) 448 Ethnography of the United States (3)**

Ethnographic descriptions of various dimensions of life in the United States. The course covers uses of ethnography in American Studies toward an understanding of social and cultural communication and performance. The application of ethnography and concepts of cultural anthropology to complex societies such as the United States is discussed. The course teaches students to use ethnographic methods for research of American society and culture. Attention is given to the ethics and issues of ethnographic fieldwork. The course satisfies the "area" requirement in "society" for American Studies majors.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2007
Prerequisite: ANTH 045

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

**AM ST 460** American Art and Architecture of the Seventeenth and Eighteenth Centuries (3) Survey of American painting, sculpture, decorative arts, and architecture of seventeenth and eighteenth centuries with special emphasis on non-British cultures.

**American Art and Architecture of the Seventeenth and Eighteenth Centuries (3)**

- General Education: None
- Diversity: None
- Bachelor of Arts: None
- Effective: Fall 2007

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

American Art and Architecture of the Nineteenth Century (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2007

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

AM ST 472 (ENGL 434) Topics in American Literature (3) Focused study of a particular genre, theme, or problem in American literature. (May be repeated for credit.)

AM ST 472 (ENGL 434) Topics in American Literature (3)
This course will allow faculty and students to focus a semester’s study on a particular genre, theme, or problem in American literature. The flexibility of a topics course will allow faculty a forum in which to share current scholarship or to relate issues in American literature to larger school-wide themes in a classroom environment. Because of the potential variety of topics and faculty members, specific evaluation methods will be determined by the instructor and specified in the syllabus. The course satisfies the "area" requirement in culture for American Studies majors.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2007
Prerequisite: 6 credits of ENGL ENLSH or LIT

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

American Art and Architecture of the 20th Century (3)

General Education: None

Bachelor of Arts: None
Effective: Fall 2007

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

AM ST 475 (US) (ENGL 431) Black American Writers (3 per semester, maximum of 6) A particular genre or historical period in the development of Black American literature.

AM ST 475 (ENGL 431) Black American Writers (3) (US)

A study of a particular genre or historical period in the development of Black American literature. This course will allow faculty and students to focus a semester's study on a particular genre, theme, or problem in African-American literature. The flexibility of the course will allow faculty a forum in which to share current scholarship or to relate issues in African-American literature to larger school-wide themes in a classroom environment. Because of the potential variety of topics and faculty members, specific evaluation methods will be determined by the instructor and specified in the syllabus. The course satisfies the "area" requirement in culture for American Studies majors.

General Education: None
Diversity: US
Bachelor of Arts: None
Effective: Fall 2007
Prerequisite: ENGL 015 or ENGL 030

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

**AM ST 476 (ENGL 492, WMNST 491) American Women Writers (3)**
A study of selected American women writers. This course provides the opportunity to study writing by American women from an historical perspective and to explore the views these women have of themselves as artists. The course will concentrate on a careful reading of works by a variety of authors. It will raise the question of the role that gender—as well as other differences such as race, class, and ethnicity—play in the selection of literary forms and the development of character, theme, symbol, and rhetorical strategy. It will also explore the dimensions American women have brought to the American literary tradition. The course satisfies the area requirement in culture for American Studies majors and is open to all majors meeting the prerequisite requirements.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2008
Prerequisite: 6 credits of ENGL

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

AM ST 481 Historic Preservation (3) A study of preservation practices and programs in America.

AM ST 481 Historic Preservation (3)
A study of historic preservation practices and programs in America. This seminar will examine the historic preservation movement in the United States, including its history, function, and practice. Its role in government, economic development, and community and regional planning will be discussed. The ways that American studies scholarship has influenced historic preservation will be considered.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2007
Prerequisite: 6 credits in American Studies

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

AM ST 480 Museum Studies (3) An introduction to the basic purposes, philosophies, and functions of a museum, with emphasis on the problems of museum administration. (May be repeated for credit.)

AM ST 480 Museum Studies (3)

An introduction to the basic purposes, philosophies, and functions of a museum, with emphasis on the problems of museum administration. The course examines applications of American Studies to mechanics of operation and development of core services including exhibits, structured educational programs, and special events. The course places these functions within the philosophy of the “experience economy,” whereby museums and historical organizations are challenged to meet expectations of an increasingly sophisticated audience.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2007
Prerequisite: 6 credits in American Studies

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
American Studies (AM ST)

AM ST 479 American Expressive Forms (3) Examination in depth of various and distinctive American expressive forms; subtitle expresses specific content. (May be repeated for credit.)

AM ST 479 American Expressive Forms (3)
Examination in depth of various and distinctive American expressive forms. The subtitle expresses specific content. May be repeated for credit. The course satisfies the "area" requirement in culture for undergraduate majors in American Studies, and is open to all majors. The course covers periods or eras in American history that are not covered or emphasized in other courses. Some expressive forms to be studied are American essays, American humor, and American films. In addition to analyzing the traditions and patterns of these forms, students will consider the historical, social, and cultural context of these forms in the American experience.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2007

AN SC 107 Introduction to Equine Science and the Equine Industry (2) Prepare students to proceed into further studies in equine science by providing background to communicate effectively with educators and industry.

AN SC 107 Introduction to Equine Science and the Equine Industry (2)

This course will provide students with basic knowledge about the equine industry to prepare them to be more effective communicators with educators and industry personnel. Topics will include basics of equine evolution, history of use, breeds, colors, disciplines and tack, anatomy and physiology, basics of the equine industry including the organization, components and careers; and will prepare students to proceed into further studies in equine science. The course will feature presentations and interaction with industry professionals and instructors of higher level equine science courses at Penn State. In addition to the academic topics addressed, the course will also introduce students to using the university course management and web conferencing systems, give them experience collaborating in a team and require that they provide a presentation. Academic integrity through use of scientific references and proper citations are also integrated into the course along with the introduction of key faculty in the academic area.

AN SC 100 (GN) Introduction to Animal Industries (3) Students will study the biology, production systems, terminology, and emerging issues of the N. American animal industries.

AN SC 100 Introduction to Animal Industries (3) (GN)
This course will introduce students to the breadth and scope of animal agriculture in North America with emphasis on food producing animals. Additionally, fiber producing animals, pets, pleasure animals, and alternative livestock will also be studied. Students will be exposed to biological concepts and their relationship to contemporary production systems, economics, terminology and industry issues to enhance understanding of and appreciation for various uses of animals in North America. The course would be available in a web-based format with extensive use of video tours of animal housing facilities, expert interviews, and explanations of the biology behind common production practices and will be offered annually during spring and summer semesters. Student performance will be assessed via unit quizzes, popular press article critiques, and a final paper.

**AN SC 110S Contemporary Issues in Animal Biotechnology and Society (1)** An introductory survey of animal biotechnology in society, the role for biotechnology and how it will benefit society.

**AN SC 110S Contemporary Issues in Animal Biotechnology and Society (1)**

This First-Year Seminar is designed to provide an introduction to the field of animal biotechnology. Emphasis will be placed on providing the student a perspective of the history of biotechnological innovation in animal agriculture and an overview of the scientific bases for animal biotechnology. The history, need for and development of food biotechnologies will be discussed. A major component of the course will focus on the regulatory processes in place in the U.S. for approving animal biotechnologies and the benefit/risk evaluation process used to assess safety and efficacy of new animal biotechnologies. Social and economic implications of animal biotechnology will be discussed as well as overview about how to effectively communicate the benefits of the new food biotechnologies to policymakers and the public.

Animal Science (AN SC)

AN SC 117 Equine Marketing (2) Principles of marketing and event planning including marketing systems, advertising, management systems, team building and other aspects of conducting a purebred livestock sale. Students learn through the planning and conducting of the annual Penn State Equine Science Showcase and Registered Quarter Horse Sale.

AN SC 117 Equine Marketing (2)

The Equine Marketing course is designed to allow students the opportunity to learn information related to the marketing of horses. Specific topics will include letters on marketing methods, event planning and management, advertising layout and design, the significance of pre-purchase exams to the marketing process, preparation and presentation of sale animals, and the role of the auctioneer.

In addition to classroom lectures, students will have the opportunity to put the information gathered to use through the planning of Penn State's annual Equine Science Showcase and Registered Quarter Horse Sale. Students will be assigned to committees and will be responsible for all of the planning and implementation of the event. Specific tasks will include development of advertisements, public relations, development of press releases, development of an online and hard copy sale catalog, development of all office paperwork for the sale, interaction with industry leaders to gain industry buy in for the event, working with outside breeders who participate in the event, set up, clean up, and preparation and presentation of the horses being offered for sale.

Through the process students will also learn many skills necessary to be successful in their future careers above and beyond those related to the marketing of horses. Some of these skills include working within a group, team building skills, communication with industry professionals, development of plans of work, and many more.

Animal Science (AN SC)

AN SC 201 Animal Science (4) Scope of animal and poultry science; genetic, physiological, nutritional, and health factors in food production.

AN SC 201 Animal Science (4)
This course examines the scope and diversity of disciplines comprising the animal and poultry sciences. The first portion of AN SC 201 focuses on animal products such as milk, meat, eggs, and wool. Students learn product compositions and their relevance to humans worldwide. Later lectures outline the roles that environmental, housing, nutrition, and health play in current animal production systems. A major focus of the course is digestive physiology. In-depth topics include nutrients, monogastric and ruminant digestion, and feed analysis methods. The final portions of the course focus on reproduction, lactation, behavior, genetics, and biotechnology. These areas are critical to successful animal production systems. Throughout the semester, current issues in animal sciences that are related to the course material are integrated into the lectures. The laboratories support the concepts presented in lecture related to animal products, nutrition, animal health, and reproduction.

AN SC 208 (FD SC 208) Animal Products Technology Laboratory (1) Harvesting and processing of foods from animals; hands-on and demonstration exercises; industry procedures for processing meat, milk, and egg products.

AN SC (FD SC) 208 Animal Products Technology Laboratory (1)

This laboratory, intended to be taken along with or following Animal Products Technology lecture, provides students an opportunity to experience the procedures involved in harvesting and processing foods from animals. Upon completion of this course, students will be able to describe, demonstrate, and explain procedures commonly used in harvesting and processing of muscle food, milk, and egg products. Students will be able to recognize and predict the impact of incorrect procedures for harvesting and processing muscle food, milk, and egg products. The course includes hands-on exercises and demonstrations that allow students to experience the "look and feel" of industry procedures used in harvesting and processing meat, milk, and egg products for human consumption. Focus on issues related to food safety and food quality.

Animal Science (AN SC)

AN SC 215 (GS) Pets in Society (3) Introduction to the varied roles that companion animals play in human society and their impact on human activity and well-being.

AN SC 215 Pets in Society (3)
(GS)

Companion animals have far-reaching influence on many aspects of human society. How humans relate to pets varies from individual to individual and is influenced by many factors. The field of human-animal interactions is quickly evolving and is supported by a variety of disciplines and empirical research.

This course provides a broad introduction to the varied roles and influences of pets on human life and society. Topics of discussion include the historical, social, economic, scientific, legal and political roles of pets in American society. The influence of companion animals on human development and mental health throughout the lifespan and in the case of disability is examined from a social science perspective Genetics, breed, physical, and environmental influences play obvious and important roles in the development of canine and feline behavior and are used as examples of the multiple causes of behavioral development and expression. Learning theory and operant conditioning are discussed as they relate to training. Newly discovered risks and benefits of animal ownership on human health are discussed, including the influence of pet ownership on cardiovascular disease and allergy development. Issues of responsible pet selection and ownership are discussed in relation to animal welfare and societal responsibility.

Because of the emerging nature of human-animal interaction research, an important goal of the course is to instruct students on the scientific method and recognition of research methodologies. Critical evaluation of theoretical models and empirical research in class and small group discussions is used to show how these questions can be addressed scientifically. Throughout the course, students have the opportunity to gather information from various sources and make informed decisions on controversial topics and to understand the impact of individual actions and decisions on broader society.

Animal Science (AN SC)

AN SC 213 Introduction to Animal Biotechnology (3) An introduction to the multidisciplinary area of animal biotechnology: from molecular, genetic, genomics and development issues to their technological applications.

AN SC 213 Introduction to Animal Biotechnology (3)

This course provides an early exposure to the emerging and diverse field of animal biotechnology. Basic principles underlying recombinant DNA technology, genetics, gene transfer technology, genomics and their technological applications will be discussed. This is a fairly intensive course taught from the technological perspective that differs from the perspectives of basic science-or technique-oriented courses. This course will be a pre-requisite for the proposed course in 'Laboratory Methods in Small Animal Research (AN SC 314)'. The course will be offered in the spring semester; classes meet twice a week for 75 minutes each. The information provided in the required text-book, accompanying websites and current literature will be discussed extensively in the form of formal lectures, tutorials and review sessions.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2009
Prerequisite: AN SC 201, BIOL 110, CHEM 110, CHEM 112

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC 211 Introduction to Avian Biology (3) Introduces the biology of birds; lectures, laboratories on anatomy and function, incubation, breeding, disease control, management techniques, and student projects.

Introduction to Avian Biology (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 1999
Prerequisite: or concurrent: BIOL 110 ; or BIOL 011, BIOL 012

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC 225 Introduction to Dairy Judging (1) Training in the visual evaluation of dairy cattle and practice in defending decisions through oral reasons.

AN SC 225 Introduction to Dairy Judging (1)

Students will learn the basic concepts used in dairy cattle judging and evaluation. The Purebred Dairy Cattle Association Unified Scorecard will provide the framework for students to make decisions and enhance observation skills based on industry standards. Students will become familiar with terminology used to describe differences between cattle of the seven major dairy breeds as they judge classes of cows and heifers. They will develop communications skills by defending these evaluation decisions through oral reasons.

General Education: None  
Diversity: None  
Bachelor of Arts: None  
Effective: Spring 2011

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC 217 Introduction to Horse Judging (2) Introductory analysis of halter and performance classes of stock-type horses, with emphasis on conformation, gaits, patterns, and oral reasons.

AN SC 217 Introduction to Horse Judging (2)
AN SC 217 encompasses the introductory information necessary for students to begin their competency in horse evaluation. From external parts and critical evaluation of conformation of halter horses, to rail classes with gaits and transitions, to pattern classes with objective evaluation and scoring methods, to more specialized classes (trail, hunter hack, pleasure driving, etc.), students will expand their depth and breadth of knowledge for evaluating suitability to purpose of stock-type horses. Careful observation, critical thinking, decision-making and oral communication skills of students are repeatedly critiqued and enhanced in this course. Following successful completion of AN SC 217, students who elect to take AN SC 417 will be eligible to compete for a position on the Penn State Intercollegiate Horse Judging Team.

Furthermore, this course serves as an elective for students outside of the Animal Sciences major and students throughout the University who simply have an equine interest; as well as a required course for students enrolled in the Equine Sciences minor offered by the Department of Dairy and Animal Science.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2006

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC 226 Meat Selection and Grading (2) Training in identifying, grading, and judging carcasses and wholesale cuts of meat and in selection and identification of specification cuts.

AN SC 226 Meat Selection and Grading (2)
Students will learn skeletal and musculature anatomy in order to evaluate carcasses and wholesale cuts of beef, lamb, and pork. They will be required to learn quality and yield grading of carcasses of various species and be expected to learn the various parts and evaluative terminology of carcasses and cuts. In addition, students will be trained in the identification and cutting procedures required for the institutional meat specification cuts and retail cuts.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2010
Prerequisite: AN SC 201

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC 291 Externship with Animal Science Business (1-2 per semester/maximum of 4) Students will obtain a one-week on site work experience with an animal-related agribusiness.

AN SC 291 Externship with Animal Science Business (1-2 per semester/maximum of 4)

This course will provide an opportunity for students to acquire on-site skills and knowledge in a potential interest area of an animal-related agribusiness. Externship opportunities are provided during one week of winter break and one week of spring break and 1 credit is earned for each experience. Student responsibilities are to: prepare a cover letter and résumé; participate in the interview process; maintain and submit a typed summary of a daily log of activities; prepare a final report to the instructors (copy sent to the agribusiness sponsor); present an oral presentation of the externship experience to their peers and a group of faculty; and complete a self evaluation of AN SC 291. Limited to Animal Sciences majors.
General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2010

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

Animal Science (AN SC)

**AN SC 301** Principles of Animal Nutrition (3) Nutrients and their metabolism; the nutritional requirements of livestock; the nutritional value of various feeds; principles of ration formulation.

**Principles of Animal Nutrition (3)**

General Education: None  
Diversity: None  
Bachelor of Arts: None  
Effective: Summer 1999  
Prerequisite: 3 credits in biochemistry or organic chemistry

**Note**: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC 305 Companion Animal Nutrition (3) Principles of care and nutrition and contemporary importance of companion animals with emphasis on canine and feline species.

AN SC 305 Companion Animal Nutrition and Management (3)

Students of the animal sciences must be equipped for a variety of career opportunities in the twenty-first century. It is apparent that most students will benefit from a balanced exposure to a variety of animal species. This is especially true for students who pursue a career in the many supportive agricultural industries such as the commercial feed industry, animal health, and research and development.

This course is part of a series of courses related to the nutrition and management of animals. While the other courses will be related to farm animal species, this course will be the only one addressing companion animals. As such it should meet the demand of students without a strong farm background or interest; those planning to attend a veterinary or professional school; as well as a large group of students with a non-professional interest in companion animals. It is felt that the sophomore or junior level of the course is appropriate after students have completed Animal Science 001.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2009
Prerequisite: AN SC 201

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

Integrated Animal Biology (3)

General Education: GN
Diversity: None
Bachelor of Arts: Natural Sciences
Effective: Spring 1998
Prerequisite: BIOL 011 and BIOL 012 or BIOL 110; at least third-semester standing

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC 306 Swine Production and Management (3) Application of the principles of enterprise and facility development, operations management, quality control, public relations, marketing for the efficient operation of a swine production business.

Swine Production and Management (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2009
Prerequisite: AN SC 201

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC 308 Sheep and Goat Production and Management (4) Application of principles of nutrition, breeding, physiology, health, facilities, marketing, and product development, to animal production agriculture.

AN SC 308 Sheep and Goat Production and Management (4)

AN SC 308 - Sheep and Goat Production and Management, offered on alternate (even) years to an anticipated 15-20 students, encompasses the requisite information for students to manage any of the small ruminant livestock species including meat and wool sheep, hair sheep, and meat goats. Students will critically evaluate genetic, reproductive, nutritional, economic, and management criteria that influence profitability and sustainability of small ruminants as viable agricultural animal enterprises in Pennsylvania, the United States and the world.

Student learning objectives are: a. to describe the global importance of sheep and goat products for the welfare of mankind; b. to develop critical skills in formulating integrated breeding, feeding, and marketing plans for sheep and goats that are economically viable and environmentally sustainable; and c. to develop a knowledge of the genetic diversity and versatility of sheep and goats throughout the world.

Critical thinking, decision-making and oral communication skills of students are evaluated and enhanced in this course. This is accomplished by assigning students production scenarios requiring independent evaluations of genetic, nutritional and marketing plans; the results being presented in both written and oral forms. Additionally, hands-on learning is provided via the laboratories held at the Penn State Sheep Barns operated by the Department of Dairy and Animal Science in the College of Agricultural Sciences and in the College’s computer laboratories. Student performance will be evaluated via written exams, laboratory reports, and oral presentations to the class.

Animal Science (AN SC)

AN SC 309 Beef Cattle Production and Management (4) Application of principles of nutrition, breeding, physiology, health, facilities, and marketing to produce and manage beef efficiently.

AN SC 309 Beef Production and Management (4)

Beef Production and Management, offered every spring semester to an anticipated 20-40 students, will provide a comprehensive review of the business-related and production oriented concepts associated with modern beef production. This course will combine traditional disciplines of beef management with business management, operations management, quality control and marketing. Additional topics will include economics and factors affecting cost of production. As the course progresses, and following the exposure of students to the fundamentals of beef production, they will be given the opportunity to evaluate real production scenarios for development of business and management recommendations. In addition to the classroom, the Penn State Beef Center, College computer labs, and selected field trips will comprise the facilities used to teach the course. In addition, students will conduct problem solving exercises on beef enterprises throughout the state. Beef Production and Management will be included in the series of other production courses offered in this department. Having completed the course, students will be able to:

1. Describe the necessary management procedures in a beef enterprise that are vital for efficient and profitable production.
2. Describe and understand the fundamentals of the various segments of the cattle industry.
3. List the important components of a business management plan for a beef operation, including short and long-term capital requirements, and a projected budget.
4. Discuss the trends and important issues facing the beef industry in Pennsylvania, the nation and world.
5. Critically evaluate business and production scenarios to provide an in depth analysis and a recommended course of action for improving a beef enterprise.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2009
Prerequisite: AN SC 201

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC 315 Small Animal Health and Disease (3) Introduction to the principles of small animal health, including the recognition, prevention and control of common small animal diseases.

AN SC 315 Small Animal Health and Disease (3)
Small animals play increasingly important roles in human lives. In addition to their function as pets, they serve the disabled; protect human well-being through the police, military and border inspection services; and act as research subjects for the development of medical and technological advances. Control of disease and promotion of animal health is important in all small animal industries and uses.

This course is designed to provide a basic background in the principles of health in small animal species (primarily dogs and cats). Emphasis will be on the maintenance of a healthy animal system, including the recognition, prevention and control of the most common small animal diseases.

Because of the increasing amount of information available to all people through the internet and media, students will be given tools to understand basic medical terminology and will practice reading and interpreting scientific research. In addition, the importance of animal disease on public health will be addressed.

Diagnosis and treatment of disease will only be covered in a general, illustrative fashion. This course is not intended to train students in the diagnosis and treatment of specific diseases, but rather to recognize the conditions and factors which encourage disease, but rather to recognize the conditions and factors which encourage disease spread and to understand how to control and rectify those situations.

Because of the varied situations in which small animals function, a primary objective will be to be able to apply the principles of animal health and disease prevention to varied facets of the small animal industry (e.g. private ownership, veterinary medicine, shelter work and management, service animal breeding/training, biomedical and nutritional research).

This course is designed for students planning to work in or having a special interest in the small animal industry, including veterinary medicine, the pet food and pet products industry, the working dog industry, live animal sales, pharmaceutical sales, and research.

General Education: None
Diversity: None
Bachelor of Arts: None

**Animal Science (AN SC)**

**AN SC 311 Poultry Production and Management (4)** The application of fundamental concepts and preparation for careers in the economically integrated commercial poultry industry.

**AN SC 311 Poultry Production and Management (3)**

Poultry Production and Management will provide a comprehensive review of the business-related and production oriented concepts associated with modern commercial poultry production. The course will provide the student with an overview of poultry nutrition, physiology, genetics, health, welfare, and products and describe how these disciplines integrate with effective and efficient management, quality control, and marketing of poultry and poultry products. Additional emphasis will be given to the economics of poultry production, as well as current issues and challenges facing the industry. Throughout the course, students will be provided with experiential learning opportunities and will be required to use this knowledge to solve problems and to evaluate “real world” production scenarios in order to develop effective management and production skills.

Having completed this course, students will be able to:

1. Describe and evaluate the key operational and management factors in a commercial broiler, egg-layer, and turkey operation.

2. Describe and understand the important business, environmental, food safety, and welfare issues and challenges facing the poultry meat, and egg industries in Pennsylvania, the nation, and the world.

3. Critically evaluate poultry business and production scenarios to provide a fact based analysis and recommended course of action for solving management or production problems.

AN SC 350 Dairy Problem Solving (2) Students will use dairy records to analyze herd performance in order to identify bottlenecks for higher productivity.

AN SC 350 Dairy Problem Solving (2)
This course will develop case based approaches to problem solving using dairy records. Students will learn to read and interpret dairy herd improvement herd summaries. Herd performance will be benchmarked against parameters from similar herds across the Northeast in order to identify production bottlenecks. Popular dairy herd management software will be used to analyze bottlenecks more completely. Additionally, the use of herd management software to record cow health events and set up management routines will be demonstrated. Classes will include in depth analysis of nutritional, reproductive, culling, genetic and milking management parameters as they relate to the dairy enterprise. In addition, economic and fiscal management will be presented as it relates to various aspects of the dairy industry.

Animal Science (AN SC)

AN SC 405 Advanced Canine Nutrition and Management (3) Application of biological principles to the care and nutrition of dogs; interactive discussions of contemporary nutrition and management issues.

AN SC 405 Advanced Canine Nutrition and Management (3)

Animal Science 405, Advanced Canine Nutrition and Management, is a 3 credit senior-level course emphasizing the application of biological principles to the proper care and nutrition of dogs. Students scheduling this course must first complete a junior level course in companion animal care and nutrition and are expected to schedule AN SC 400, Application of Management Principles, concurrently. Course objectives are to a) develop an appreciation for the role and importance of the dog in contemporary society; b) develop skills in formulating sound management plans for the selection, breeding, feeding, training, and health care of the dog; and c) encourage independent student thought, written communication, and oral communication of topics related to the care and management of canines. AN SC 405 is one of several "capstone" advanced management courses offered by the Department of Dairy and Animal Science for students with intensive interest in various animal species. Special student interests are accommodated via short "lectures" that students will research, prepare, and deliver to the class. In several areas, industry experts will be invited to guest lecture and several field trips to sites of interest are planned.

Animal Science (AN SC)

**AN SC 414 Comprehensive Animal Biotechnology (3)** A comprehensive review of the multidisciplinary area of animal biotechnology examining historical developments, current progress, and future directions.

This course intends to provide an advanced treatment of currently evolving topics of animal biotechnology. Equal emphasis will be placed on basic principles, current progress and potential controversies surrounding biotechnology. The course is designed to provide an insight into how biotechnological enterprises commercially exploit scientific principles. This is designed to be a capstone course in the series of courses to be offered in the Animal Biotechnology curriculum. The course will be offered in the fall semester and limited to 20 students. Students enrolled are expected to have a basic knowledge about molecular biology, genetics and genomics. The course will be based on advanced text books and current literature.

General Education: None  
Diversity: None  
Bachelor of Arts: None  
Effective: Spring 2003  
Prerequisite: 3 credits in molecular biology genomics genetics or biotechnology courses

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC 413 Transgenic Biology (3) The principles and concepts used to generate genetically engineered animals by pronuclear, knockout, and cloning methods; and applied biotechnology applications.

AN SC 413 Transgenic Biology (3)

The Transgenic Biology course is offered each spring semester for those students interested in learning the concepts, principles, and applications of genetic engineering in animals. The mouse is used as a model system, but the discussion encompasses large animals and commercial applications. Techniques covered are pronuclear, embryonic stem, and somatic-nuclear transfer generated animals. Content also includes the use of morpholinos and RNAI use to "knockdown" gene expression. Other systems discussed are Zebrafish and Xenopus as well as gene analysis by mutagenesis and gene trapping. The course objectives are (1) to provide the student with a working knowledge of the processes involved in functional analysis of gene expression using model animal systems and (2) to give the student understanding for the practical aspects of generating transgenic animals including microinjection, screening, breeding, and phenotypic analysis. Students are evaluated using several parameters including exams, presentations of current journal articles, abstracts of current journal articles, and a paper dealing with an aspect of transgenesis in the student's field of interest.

General Education: None
Diversity: None
Bachelor of Arts: None

**Applied Animal Welfare (3)**

General Education: None  
Diversity: None  
Bachelor of Arts: None  
Effective: Spring 2009  
Prerequisite: AN SC 201 or 6 credits of biology

**Note**: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC (AGECO/SOILS) 418 Nutrient Management in Agricultural Systems (3)

Nutrient Management in Agricultural Systems is a senior level course that applies the fundamentals of animal and plant, sciences to the concept of a nation-wide food animal system. The regional concentration and consolidation of animal production enterprises has resulted in important economic savings for consumers. But these changes have also had some detrimental impacts on the environment. For example, some nutrients such as calcium and phosphorus and certain trace elements are mined, while others such as nitrogen and potassium are derived from crop production systems. In all cases, the nutrients are transported to areas of livestock concentration. A small portion of the nutrients leave the farm in the form of animal products, while 60 to 70% of the nutrients are excreted and applied to nearby crop land. The environmental implications of the net influx of these nutrients to livestock producing communities have only recently been recognized. These concepts will provide the background around which regulations are written and sound nutrient management strategies are developed and implemented.

AN SC 427 Milk Secretion (3) Development and physiology of the mammary gland and factors which affect the amount and composition of milk produced.

Milk Secretion (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2009
Prerequisite: AN SC 201 3 additional credits in dairy science

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC 425 (VB SC 425) Principles of Avian Diseases (3) Principles of pathogenesis and control of diseases in poultry and other avian populations. Case material used where appropriate.

AN SC (VB SC) 425 Principles of Avian Diseases (3)

This course discusses the major diseases of domestic poultry, with etiology, prevention, and treatment reviewed on each disease. Since many of these diseases also affect wild birds and pet birds these are also reviewed. Lastly, avian disease with zoonotic (human public health) potential are also discussed in the course. This course is required by those seeking a poultry minor.

Previous coursework in pathogenic microbiology is beneficial.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2009
Prerequisite: AN SC 201, BIOL 110 4 credits in microbiology and 3 credits of anatomy and/or physiology

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

**AN SC 426** Advanced Judging and Selection (2 per semester, maximum of 4) Development of critical thinking and communication skills through evaluation and selection of animals and animal products.

**Advanced Judging and Selection (2 per semester, maximum of 4)**

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 1998
Prerequisite: AN SC 322

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC 431W Physiology of Mammalian Reproduction (4) Physiological processes of reproduction in animals, including the use of current and emerging technologies.

Physiology of Mammalian Reproduction (4)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 1999
Prerequisite: 3 credits in animal physiology

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC 429 Advanced Beef Cattle Production (3) Application of scientific and business principles to practical production and management issues using case studies or selected live settings.

AN SC 429 Advanced Beef Cattle Production (3)

This course was developed to train students to critically evaluate management, facility, and husbandry practices of working beef cattle operations. Students visit owner facilities where they gather necessary information by interacting with the owners and inquiring about the owner’s practices. The students use knowledge gained through previous courses and material covered in class to make recommendations. The students work in teams to present to the owners possible solutions to their problems. Each team will present a 30 minute critical evaluation of each case study with the owners being present. Students interact and answer questions concerning their presentation from the owners, students, and faculty. Students are introduced to the NCBA and Cattle FAX which they can use to stay abreast of beef industry concerns after completion of the class. If available, a field trip to either national or Pennsylvania state agriculture offices will occur.

Diversity: None
Bachelor of Arts: None
Effective: Summer 2010
Prerequisite: AN SC 309

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

**AN SC 432 Techniques in Livestock Reproduction (2)** Demonstration and practice in estrus detection, inseminating techniques, pregnancy detection, embryo recovery and transfer methods.

**AN SC 432 Techniques in Livestock Reproduction (2)**

This course is designed to train students in the areas of artificial insemination and pregnancy detection of livestock. Additionally, students will be familiarized with techniques in semen handling, embryo transfer, heat detection, and estrous synchronization. The primary focus of this course is hands-on instruction of the techniques. However, lectures will also be included to broaden the instruction base and expose students to a multitude of advanced reproductive technologies that are currently available to livestock producers.

General Education: None

Animal Science (AN SC)

AN SC 447 Applied Equine Behavior (3) Theory and application of behavior principles as they apply to horses in free-running and domestic situations.

AN SC 447 Applied Equine Behavior (3)

Applied Equine Behavior is an advanced course in equine science that examines the behavior of horses in free-running and domesticated situations. Outcome-based course objectives are as follows: 1) develop a working repertoire of behavior terminology and principles particularly as they apply to the horse; 2) apply critical thinking skills toward understanding and predicting behavior in horses under intensive management as it is modified from instinctive behavior seen in free running horses; 3) critically analyze and compare various training theories; 4) develop a new expertise in careful observation and analysis of behavior; 5) practice communication skills and increase information literacy, particularly in the study of behavior.

This course presupposes previous coursework in equine science or biology and complements other courses such as horse production and management, animal behavior/sociobiology, physiology, and genetics. Applied Equine Behavior is [will be] a supporting course for the Animal Science Major. Students will be able to make full use of the University horse herd and available data recording and analysis instruments and software.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2009
Prerequisite: AN SC 201, AN SC 327 and fifth-semester standing; or fifth-semester standing and six credits in biology; or permission of the instructor

Animal Science (AN SC)

AN SC 457 Equine Reproduction and Breeding Farm Management (3) Advanced aspects of equine reproduction will be covered, including collection of semen, processing it for shipment, and insemination of mares.

AN SC 457 Equine Reproduction and Breeding Farm Management (3)
Equine Reproduction and Breeding Farm Management is intended to expand on the knowledge of equine reproduction and breeding farm management acquired in other classes. The students will get hands on experience in artificial insemination of mares and semen collection of stallions.

Having completed the course, students will be able to:
A. Collect semen from a stallion.
B. Assess seminal characteristics and process the chilled semen to be sent to another farm.
C. Artificially inseminate a mare.
D. Apply scientific principles to make the decisions necessary to manage an equine breeding facility. The information covered will include but not be limited to reproductive management of the mare and stallion, foaling, and neonatology.

Evaluation will be based on written tests, research and presentation of a selected topic, and laboratory attendance and participation.

AN SC 451 Dairy Systems Analysis (1-2 per semester/maximum of 2) Students will evaluate all systems of a working dairy farm business.

AN SC 451 Dairy Systems Analysis (1-2 per semester/maximum of 2)

This course will provide an overview of all areas of dairy business management. This course is designed to complement the dairy production courses and is meant to train students to organize material in a farm evaluation format. Various instructors (within their areas of expertise) as well as industry experts and dairy producers will be utilized to provide students with current concepts in dairy management. Requirements of the course include working in teams to visit, evaluate and make a presentation about a dairy farm business including an action plan for improving the business.

Animal Science (AN SC)

AN SC 467 Equine Nutrition and Feeding (3) Equine gastrointestinal anatomy and physiology; energy and nutrient requirements for body functions; applied interrelationships between nutrition, health, and performance.

AN SC 467 Equine Nutrition and Feeding (3)
AN SC 467, Equine Nutrition and Feeding, is a 3 credit junior or senior-level course emphasizing the application of biological principles to the proper nutrition of horses. Students scheduling this course must first complete AN SC 301 and AN SC 327. Course objectives are to a) explain and emphasize the importance of form and function to nutrition; b) provide an in depth coverage of energy and nutrient sources and requirements; c) enable students to apply what they have learned so that they understand how to improve equine health and performance through proper nutrition. Students will provide an evaluation of a feeding program from one of ten example farms. As a part of this evaluation, students will also recommend changes that may improve health and performance of the horses on that farm. Students will be evaluated via a series of quizzes, exams, presentations and class participation.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2008 Ending: Fall 2011
Prerequisite: AN SC 301, AN SC 327

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Animal Science (AN SC)

AN SC 467W Equine Nutrition and Feeding (3) Equine gastrointestinal anatomy and physiology; energy and nutrient requirements for body functions; applied interrelationships between nutrition, health, and performance.

AN SC 467W Equine Nutrition and Feeding (3)

AN SC 467W, Equine Nutrition and Feeding, is a 3 credit junior or senior-level course emphasizing the application of biological principles to the proper nutrition of horses. Students scheduling this course must first complete AN SC 301. Course objectives are that upon completion of the course, students should be able to a) Apply an understanding of form and function of the equine gastrointestinal tract to actual feeding management problems associated with athletic performance or health concerns; b) Describe the nutrient and energy requirements of horses in different physiologic states and apply these in diet evaluation and formulation; c) Communicate to clients, customers and peers important information about equine nutrition, enabling them to improve the health and performance of their horse without having to take a course on equine nutrition. Each student will complete a 3000 to 3500 word paper on how some aspect of nutrition might be applied to improve equine health or performance. The writing project will involve an oral presentation, multiple drafts and require students to review and provide feedback on each others’ work. Students will be evaluated via a series of assigned homework, exams, class participation, and the overall writing project.

AN SC 477 Riding Instructor Training (1) Management of equestrian riding lessons, teaching techniques, lesson plans, program planning, time management, and handling of mounted groups.

AN SC 477 Riding Instructor Training (1)

The Equine Riding Instructor Training course relates to teaching, equestrian skills, developing lesson plans, program planning, events coordination, staff management, time management, and handling of mounted groups from beginners to more advanced level riders. There are many opportunities for riding instructors in the equine industry throughout the United States. Career areas include breed associations, cooperative extension, and equine facilities/stables. This course will help give students the tools to be safer and better-prepared equine riding instructors. Successful completion of the course implies students will be able to: Conduct horse riding lessons at all horsemanship skill levels, understand safe horsemanship; manage large mounted equestrian groups; and develop appropriate lesson plans.

Anthropology (ANTH)

ANTH 002 (GS) Introduction to Archaeology (3) Survey of basic approaches used by archaeologists to interpret basic prehistoric human cultural patterns.

ANTH 002 Introduction to Archaeology (3) (GS)

(BA) This course meets the Bachelor of Arts degree requirement.

Introduction to Archaeology is designed to introduce the basic theories, methods, and data archaeologists use to study ancient peoples, past cultures, and their natural environments. A problem-oriented approach to learning about archaeology combines two one-hour lectures with a one-hour, hands-on lab session each week. The theories and methods introduced in lectures are applied to archaeological data in the computer lab in order to answer questions about life in the past. Hands-on involvement is emphasized through the use of state-of-the-art computers, archaeological software, and (where possible) the handling of archaeological collections. Grades for this course are based on two to three exams and the lab exercises.

The course may vary from this standard on other campuses depending upon the availability of computer labs and archaeological collections. However, the weekly lab exercises are available to all campuses from the Department of Anthropology. Students on all campuses will be expected to interact with each other and with the instructor in weekly discussions and exercises. They engage in data gathering, synthesis, and analysis, using exercises that make use of information on the internet as well as data provided by PSU archaeologists. The exercises emphasize human cultural diversity over time and space. There is also an emphasis on the ethics of archaeological research and the ways in which scientific choices and ethical choices interact in professional archaeology. The logical and ethical principles learned are applicable to a broad range of problems that students are likely to encounter in anthropology, in other disciplines, and later in their lives.

This course is one of three core courses required of majors in the Anthropology department and it is also required for the minor. ANTH 002 serves as a stepping stone to more advanced and specialized courses in anthropology. This course can be used to fulfill three credits of General Education in the Social/Behavioral Sciences for the Bachelor of Arts requirement.

General Education: GS
Diversity: None

Anthropology (ANTH)

ANTH 008 (GS;IL) Aztecs, Mayas, and Incas (3) Comparative survey of the development of the pre-Columbian Latin American civilizations.

ANTH 008 Aztecs, Mayas, and Incas (3)
(GS;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

Anthropology 008 is a general survey of three great New World civilizations - the Aztecs and the Maya of Mesoamerica (southern Mexico and northern Central America), and the Inkas of the Central Andes of South America. Both the Aztec and the Inka empires were thriving in the 16th century when Europeans arrived, and are known in almost ethnographic detail from oral and written records. Maya civilization matured much earlier --- between AD 250-900, and is known primarily through archaeological research, but also through the lens of the New World's only sophisticated writing system. Course information emphasizes the nature of these societies, analysis and interpretation of their basic institutions, their religions and world views, and their culture histories. Central to the presentation is the degree to which modern Latin American cultures and populations have deep cultural and biological roots in the Precolumbian past, and many ethnographic models are discussed. Within the context of each segment sociological concepts such as "institution", "household", "stratification", "political economy", "urbanization", and a host of others are used as organizing features. Issues of gender, ethnicity, and class structure are also discussed.

At the end of each semester, time permitting, issues such as the peopling of the Americas, the origins of agriculture, and some of the spectacular pre-Aztec cultures of Mesoamerica are also reviewed.

Specific examples of how archaeologists design and carry out research are included, including several in which members of the Anthropology Department have been involved. In addition to lectures, much visual material will be presented, including telecourse programs recently produced under the direction of Anthropology Department faculty.

Evaluation will consist of 3-6 museum or web-based writing assignments worth 15-30% of the grade. There will be two mid-term examinations and one final examination worth 70-85% of the grade. Although this is a large course, exams are hand-written and graded, and require a mix of objective and subjective responses. Each exam has an essay component.

This course serves as a useful precursor to Anth. 422 (Mesoamerican Ethnography and Archaeology), Anth. 424 (Andean Ethnography and Archaeology), Anth. 456 (Cultural Ecology), and has a companion course on the Old World--Anth. 009--and the two are often taken as a linked pair by students. Anth. 008 also prepares students for courses in other departments where broad-based comparisons of ancient civilizations or archaeological methods are of concern. This course can fulfill elective credits for anthropology majors and minors. Anth 008 also may be used to fulfill three credits of General Education in the Social/Behavioral Sciences for the Bachelor of Arts requirement or three credits of Other Cultures in the Social/Behavioral Sciences for the Bachelor of Arts requirement. It can also serve as three credits toward the university requirement for United States and International Cultures Competence.

Anthropology (ANTH)

ANTH 009 (GS;IL) Rise of Civilization in the Old World (3) Evolution of Old World complex societies, especially the first great civilizations of Mesopotamia, Egypt, China, and the Indus Valley.

ANTH 009 Rise of Civilization in the Old World (3) (GS;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

ANTH 009 is an introductory anthropology course with several major themes and purposes. Most fundamental are the origins and development of the earliest complex human societies - what we conventionally call civilizations - in the Old World, namely those of Mesopotamia, Egypt, the Indus Valley, and China. Course information emphasizes the nature of these societies, analysis and interpretation of their basic institutions, their religions and world views, and their culture histories. Within the context of each segment sociological concepts such as "institution", "household", "stratification", "political economy", "urbanization", and a host of others are used as organizing features. Issues of gender, ethnicity, and class structure are also discussed, and much information is presented in weeks 2 and 3 that is pertinent to an understanding of human biological variation and our cultural attitudes toward it, with obvious implications for issues of race.

The course is much broader, however, in that it attempts to place the emergence of these ancient civilizations into the overall perspective of the larger evolutionary career of the human species in the Old World, including human biological and cultural evolution during the later stages of the Paleolithic, the origins and spread of early agriculture, etc. During the first part of the course there is also a series of introductory lectures designed to inform students about what archaeology is and how prehistoric archaeologists carry out scientific research to reconstruct and explain what happened in the past. A great deal of emphasis is placed on ideas, concepts, and theories used by anthropological archaeologists to design and interpret their research and to explore not only what happened in the past, but to develop ideas about why things happened as well. Also included are lectures about archaeological finds or issues that have been particularly well publicized and about which students often express considerable curiosity. The main objectives are a) to expose students to a series of historically significant non-modern, non-Western societies and cultures using overtly evolutionary, behavioral, and sociological perspectives; b) to enlighten students concerning the kinds of extant information are available for these societies, how research is designed to acquire new data, and how scholars interpret these data, and c) to stress the nature of the agrarian human condition out of which modern societies so recently emerged, and under which people in many developing societies still live. Central to the latter are issues of subsistence agriculture and human demography.

Central to ANTH 009 are comparisons among several great Old World civilizations, comparisons with other world civilizations and cultures, and comparisons with modern society. Also inherent in the course are extensive discussions of geographic and ecological variation and human adaptation to both. The very deep time depth exposes students to societies very different from our own, including social and cultural forms that have no direct analogs in the modern world. A final intent is to make students understand basic concepts such as biological and cultural evolution, as well as a host of more restricted ones, such as "institution", "household", "stratification", "political economy", "urbanization", and a host of others that are all used to organize presentations. Issues of gender, ethnicity, and class structure are also discussed. Evaluation will consist of 3-6 museum or web-based writing assignments worth 15-30% of the grade. There will be two mid-term examinations and one final examination worth 70-85% of the grade. Although this is a large course, exams are hand-written and graded, and require a mix of objective and subjective responses. Each exam has an essay component. This course parallels ANTH 008, its New World counterpart. It serves as a useful precursor to ANTH 456 (Cultural Ecology), and also for courses in other departments where broad-based comparisons of ancient civilizations or archaeological methods are of concern, or where (as in CAMS) more specialized courses in Egyptian archaeology, etc., are offered.

Anthropology (ANTH)

ANTH 021 (GN) Introductory Biological Anthropology (3) The role of human biology and evolution in culture, society, and behavior.

ANTH 021 Introductory Biological Anthropology (3) (GN)

(BA) This course meets the Bachelor of Arts degree requirements.

"Introduction to Biological Anthropology" is designed to present to the student the basic principles and findings of human population biology. To that end, the instructors review data on biological variability among contemporary human populations and among the extensive fossils that document human evolution. Comparison between human and nonhuman animals, particularly, the surviving nonhuman primates, provides an essential "Zoological Perspective" by which we can understand the origins and evolution of humankind on this planet. The single unifying concept in biological anthropology is evolution. In this course, the student will be introduced to the mechanisms underlying evolution and their application to past and present human populations. Evolutionary biology emphasizes the similarity between closely related forms, for example, chimpanzees and humans share more traits in common than do dogs and humans, because they have a more recent common ancestor. It also underscores the diversity among individuals in a population, for example, despite being members of the same species, all humans are biologically unique. The process of evolution accounts for both the similarities and the differences within and between populations. It is therefore the theory of evolution that will organize the diverse content of this course. There are two lectures per week. In addition, there is a weekly practicum class where the student explores material presented in lectures as well as learns new information. Exercises and hands-on demonstrations help the student understand the principles and findings of biological anthropology. Brief written practicum exercises often based on team projects foster interactive learning. Grades are based on three examinations and practicum exercises. This course is one of three core-courses required of majors and minors in the Department of Anthropology. The course can be used to fulfill three credits of General Education in the Natural Sciences. Students can expect to acquire a general introduction to the University as an open community of researchers and scholars who attempt to describe accurately, and hence understand, "The Human Condition." Students in this class will therefore have the opportunity to explore their responsibilities as members of an intellectual community of free inquiry. This course offers the student the opportunity to develop intellectual relationships with faculty, graduate students and fellow classmates who share similar academic interests in biological anthropology and related fields of inquiry.

Anthropology (ANTH)

ANTH 022 (GN) Humans as Primates (3) The biological basis of human behavior within the context of primate biology, behavior, and evolution.

ANTH 022 Humans as Primates (3) (GN)
Humans as Primates is intended to introduce the student to the biological bases of human anatomy and behavior by drawing comparisons to the behavior and biology of our closest living relatives, the non-human primates. The principal goal of the course is to critically evaluate arguments concerning what uniquely makes us human and the role of genetics, environment, and evolutionary history on the development of human behavior and anatomy. The course will draw heavily on studies of living non-human primates as well as evolutionary theory, paleontology, and psychology to addresses issues such as human growth and development, diet, human variation, communication, intelligence, reproduction, aggression, and culture. Humans as Primates is divided into four main thematic units each designed to present a set of related lessons exploring the role of biology in various aspects of human life. The first unit provides the foundation for the course by introducing the place of humans in the natural world. This unit presents a survey of living primates and their relationship to humans as well as an overview of evolutionary processes and human evolution. The other units present topics in human biology, communication, and social behavior focusing specifically on topics of importance to current events and aspects of popular culture and modern life. This course should be of significant interest to students in a diversity of disciplines including the biological and social sciences as well as anyone interested in human behavior. The course will rely on readings from the scientific and popular literature and will present information using a variety of formats including images, movies, and interactive activities. Students will be evaluated with a combination of frequent online quizzes, individual assignments, participation in online discussions. The course can be used to fulfill three credits of General Education in the Natural Sciences. As such this course will help students understand how scientific information from a variety of disciplines can be used to investigate and understand human biology and behavior. The course will introduce the student to methods of data collection and analysis, foster critical thinking skills, and provide a rich background for understanding human diversity, human biology, and behavior. Students will have the opportunity to synthesize information from a broad range of disciplines to develop a fuller understanding of the biological basis of human behavior.

ANTH 045 (GS;US;IL) Cultural Anthropology (3) Beginnings of human culture; economic life, society, government, religion, and art among traditional peoples.

ANTH 045 Cultural Anthropology (3)
(GS;US;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

"Cultural Anthropology" is designed to introduce the student to the cultural diversity of our planet. "Culture" can be defined as that set of rules, standards, conventions, and beliefs shared by members of a given human society. These rules are transmitted by social learning. Culture defines what counts as "normal" thought and behavior by the members of a given society. The course will provide the student with an understanding of the basic methods, data and, theories that cultural anthropologists use to study the varieties of human thought, behavior, and social life in their associated physical and social environments. A weekly recitation section allows the students to discuss material presented in lectures as well as to engage in independent research projects. These projects involve individual and group research based upon library and computer-based resources and further foster interactive learning. Teamwork is an essential aspect of both research and presentation of recitation section work. Oral presentations and written papers are stressed. Recitation discussions in cultural anthropology emphasize inter-cultural understanding. Grades are based on three examinations and recitation exercises.

This class is one of three core-courses required of majors and minors in the Department of Anthropology. The course can be used to fulfill three credits of General Education in the Social/Behavioral Sciences for the Bachelor of Arts requirement. Students can expect to acquire a general introduction to the University as an open community of researchers and scholars who attempt to describe accurately, and hence understand, "The Human Condition." Students in this class will therefore have the opportunity to explore their responsibilities as members of such an intellectual community of free inquiry. In addition, students will develop first-hand knowledge of the learning tools and resources available to them at Penn State including the ever-expanding Web-based Internet. This course offers the student the opportunity to develop intellectual relationships with faculty and fellow classmates who share similar academic interests in cultural anthropology and related fields of inquiry. "Cultural Anthropology" is offered every semester, including the summer session.

Anthropology (ANTH)

ANTH 060 (GS;IL) (J ST 060, PL SC 060, SOC 060) Society and Cultures in Modern Israel (3) An introduction to the society and cultures of the State of Israel from 1948 to the present.

ANTH (J ST/PL SC/SOC) 060 Society and Cultures in Modern Israel (3) (GS;IL)

This course will review the social, cultural, and political systems in the State of Israel as they have developed and changed since its inception in 1948. The role of immigration, ethnicity, and religion on Israeli society and cultures will be explored along with the non-Israeli cultures that have helped to shape conditions there. The course will look into the diverse social and political institutions of contemporary Israel, examine the borders and geographic features of the region, and discuss who lives there, where they reside, and for which portions of this period. It will examine the wars and tensions between Israel and neighboring Arab states; the status of the Arab/Palestinian minority in Israel; and the growth of Palestinian nationalism. Social conditions in the State of Israel are the result of a unique history. Israelis have absorbed large numbers of immigrants from many parts of the world while engaged in ongoing political and military conflicts. Jewish settlers in Israel/Palestine revitalized a language (Hebrew) and developed unusual collectivistic institutions (e.g., the kibbutz). Israeli nationalism is founded both on secular and religious ideologies. It includes notions of a return from Diaspora and the desire for personal and collective redemption. The study of social processes such as these will provide an opportunity to consider the foundations and functions of nation-states and social systems generally. Materials will include selections from primary texts, official documents, novels, films, and ethnographic materials along with scholarly reviews and essays. Students will be exposed to materials produced from a variety of disciplinary and political perspectives. Through writing assignments, projects, and essay examinations, students will integrate, compare, and analyze these materials. The course complements offerings in Jewish Studies, Sociology, Anthropology, Political Science, and Middle East Studies and will satisfy the IL requirement. It enables those in Jewish Studies to examine the roughly 30% of Jews who reside in Israel, builds upon a current course on Zionism, and provides context for the study of modern Hebrew. It offers an additional international alternative for students in Sociology and Political Studies and a topical area in cultural Anthropology. Students in Middle East Studies will find it worthwhile to study a nation with a significant impact on the region.

ANTH 083S (GS) First-Year Seminar in Anthropology (3) This seminar introduces students to anthropology as a scientific discipline with ties to other social and natural sciences.

ANTH 083S First-Year Seminar in Anthropology (3)
(GS;FYS)

(BA) This course meets the Bachelor of Arts degree requirements.

This seminar introduces students to anthropology as a scientific discipline with ties to other social and natural sciences. Through active participation in the seminar, students will be exposed to an aspect of anthropology that corresponds to a faculty member's area of expertise. Because students are introduced to cutting edge research, the course content will vary from one semester to the next. Seminar topics highlight current debates in the discipline and the research process. Research design, analytical methods, and sampling issues are covered by having students read and discuss new and controversial developments in anthropology. Strong emphasis is placed on the broader societal significance of scholarly research related to the seminar's principal focus. Student comprehension of topics raised in class will be assessed by classroom participation, exams, and papers. In addition to the academic topic and issues of this course, students can expect to gain a general introduction to the University as an academic community and have the opportunity to explore their responsibilities as members of that community. Students will develop an understanding of the learning tools and resources available to them, including the opportunity to develop relationships with faculty and other students who share their academic interests. This seminar fulfills both a first-year seminar requirement and a general education sociobehavioral science requirement or Bachelor of Arts sociobehavioral science requirement.

Anthropology (ANTH)

ANTH 216 (GN;GS) Sex and Evolution (3) Introduction to evolutionary theory and its application to understanding human sexuality and sex differences.

ANTH 216 Sex and Evolution (3) (GN;GS)

This course introduces students to evolutionary theory and explores its relevance to the anthropological study of human sexuality. After honing their evolutionary skills by investigating non-human reproduction, students will apply evolutionary principles to understanding human sexuality. Why do we prefer certain characteristics in a mate? How do these preferences differ between and within the sexes, and why? How do mating behaviors vary across cultures, and why are some more culturally variable than others? Other topics covered include sexual conflict and rape, and parental care and abuse. In understanding the evolutionary basis for a trait, it is helpful to understand its development. Thus, this course also covers the basics of sexual differentiation and investigates how variation in these processes might lead to variation in sexual orientation and gender identity. Students should take away not only a better understanding of human sexuality but also a way of thinking that helps them understand all living things.

ANTH 285 (GS;IL) Culture Contact (3) Survey of changes in indigenous societies following contact with colonial powers.

ANTH 285 Cultural Contact (3)
(GS;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

This course treats anthropology as a scientific discipline with ties to other social and natural sciences. Emphasis is placed on how the research process is relevant to information acquisition and the evaluation of controversies that have long interested both scholars and the public. Research design, analytical methods, and sampling issues are covered by having students read and discuss hotly debated issues about how contact with Europeans affected small-scale indigenous societies. Student comprehension of topics will be assessed by classroom participation, exams, and papers. This class fulfills an elective requirement for both the major and minor in anthropology, and the General Education GS and IL requirements.

General Education: GS
Diversity: IL
Bachelor of Arts: Social and Behavioral Science
Effective: Summer 2005
Prerequisite: ANTH 002, ANTH 045

Anthropology (ANTH)

ANTH 241 (IL) Peoples and Cultures of Highland New Guinea (3) History, ecology, social, economic, religious, and political systems of the aboriginal peoples and cultures of highland New Guinea.

ANTH 241 Peoples and Cultures of Highland New Guinea (3)
(ILI)

This course will introduce students to the cultural systems of highland New Guinea, an area that became known to the outside world as recently as the 1930s. When first contacted by Europeans, the million or so people living in the highlands of New Guinea used a stone tool technology, had no knowledge of the wheel, and lived in small, politically and economically autonomous local groups. They provided an example of a major population engaged in a way of life typical of human societies in a technologically simpler past. The study of these cultures affords students an opportunity to explore the processes through which these people have assimilated thousands of years of technological, political and economic innovation in a very brief period, while maintaining and recreating their cultural identity, despite the impact of colonial rule.

The course will complement other courses in Anthropology that deal with non-western cultural systems and with the effects of western colonization and modernization on native peoples and cultures. A prerequisite course in Anthropology 45 or Anthropology 001 will provide students with the general anthropological concepts that will enable them to understand more fully the particular cases explored in this course.

The course can be used to fulfill an Anthropology requirement in both the major and minor in general Anthropology, and will also provide students in other departments with the opportunity to study aspects of diverse, non-western cultures.

ANTH 380 Anthropology Museum Studies (3) Introduction to the history, significance, and operation of anthropology museums.

ANTH 380 Museum Studies (3)
This course introduces students to the operation of anthropology museums and to the growing field of museum studies. The course explores the historical setting within which these institutions evolved and the role of museums in the development of anthropology. Students will learn about the primary functions of museums through individual and group projects. Other topics to be covered include museum organization and administration, collection management, curation and conservation, research and education, public relations and financing, and ethical and legal issues. Students will get hands-on experience with the planning and implementation of a display in the Matson Museum of Anthropology. In addition, students will learn about museum careers, museum developments in other countries, and contemporary controversies, such as repatriation and the shifting role of museums in contemporary society. The course will provide the student with an introduction not only to the behind-the-scenes nuts-and-bolts of daily museum operations but also to the institutional role of museums as the preservers, interpreters, and communicators of humanity's cultural heritage. Students are evaluated based on two papers, work on Matson Museum exhibits, and participation in class discussions. This course fulfills a 3-credit requirement for additional courses for the anthropology major. This course expands on the history of anthropology and professional employment in the field that is presented in introductory courses.

Anthropology (ANTH)

ANTH 408 Anthropological Demography (3) Analysis of demographic studies in traditional and very small populations.

ANTH 408 Anthropological Demography (3)
(BA) This course meets the Bachelor of Arts degree requirements.

This course examines population-related problems from an anthropological perspective. Special emphasis is placed on ecological and economic approaches to the study of population dynamics in small-scale, preindustrial societies. This is an advanced undergraduate course that builds upon introductory anthropology and leads the student into more difficult demographic problems that are linked with economics, politics, religion and other cultural factors that shape population and population change. While the course is designed to introduce any of the basic analytical methods of demography, attention is focused primarily on fundamental theoretical issues concerning population growth, resources, fertility, mortality, age structure, and household demography in traditional societies. Data is drawn from ethnographic studies of living populations, from historical demography, and from paleodemography (the reconstruction of population patterns from skeletal samples). There will be three take-home problem sets. These will be a mixture of short essay questions and simple numerical exercises that can be solved on a pocket calculator or a spreadsheet. This course fulfills a 3 credit 400-level requirement for the Anthropology major and minor.

General Education: None
Diversity: None
Bachelor of Arts: Social and Behavioral Science

Anthropology (ANTH)

ANTH 410 Osteology (4) Introduction to the systematic study of the human skeleton from an evolutionary developmental biological perspective.

ANTH 410 Osteology (4)
This course introduces students to the aspects of the human skeleton and dentition that are of anatomical, archaeological, forensic, and developmental significance. Topics include the identification of skeletal and dental structures; the distinction between normal and pathological bone; the estimation of age, sex, and stature from skeletons; bone metabolism; growth and development; and the functional aspects of musculoskeletal and dental systems. Up to one-half of the course is spent on bone identification and skeletal anatomy. Lectures are supplemented by labs that provide practical experience in the identification of individual bones and anatomical structures, age and sex estimation, and the differentiation of abnormal from normal bony structures. It is absolutely essential for students to attend labs to familiarize themselves with bone specimens and casts. At the close of this course, students are expected to be able to recognize human bones and be familiar with anatomical terms, the bony landmarks that define their shape, and the relation of those bones with various soft-tissue structures. Students will have a basic grasp of bone growth and development, as well as how to identify an individual’s general characteristics from the skeleton, such as age, sex, and prior life-history events including disease and trauma. The course fulfills a 400-level elective for the Anthropology (BA) major and minor, as well as the Archaeological Science and Biological Anthropology (BS) degree programs.

General Education: None

ANTH 411 Skeletal Forensic Anthropology (3) An introduction to anthropological forensic science with an emphasis on what can be learned from human skeletons and archaeological recovery methods.

ANTH 411 Skeletal Forensic Anthropology (3)
This course is a survey of forensic anthropology focusing on human skeletal remains and archaeological recovery methods. Emphasis is placed on field methods used to collect human remains from surface and buried contexts; taphonomic processes; estimating age, sex, stature, and ancestry from human skeletons; recognizing signs of trauma and scavenger damage; and identifying individuals from skeletons. Lectures are accompanied by class discussions and complemented by practical lab sections closely tied to lecture materials. There will be two exams, a midterm and a final, and students are responsible for preparing a poster and presenting a semester-long research project. This course is related to existing ANTH 410, Human Osteology, and proposed course ANTH 413, Molecular Forensic Anthropology. It fulfills a 400-level requirement for the anthropology major or minor, as well as the university's Forensic Science major.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007
Prerequisite: ANTH 021 or ANTH 410 or Forensic Science major

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Anthropology (ANTH)

ANTH 412 Settlement Demography (3) Examination of the demography and ecology of human settlement systems in the preindustrial past.

ANTH 412 Settlement Demography (3)

This seminar will examine the population dynamics of human settlement systems in preindustrial societies, living, historic, and prehistoric. The focus will be on subsistence-level agrarian settlements, but some attention will also be paid to settlement patterns in hunter-gatherers, in market economics, and in complex societies. After reviewing basic assumptions and problems of working with spatial data, the course will examine processes determining settlement size, composition, and location on the micro-level (i.e. that of individual households, farmsteads, hamlets, and villages) and then pass on to regional patterns of transport, migration, and defense. The processes of site colonization, settlement expansion and contraction, site abandonment, and re-colonization will all be considered in detail. Since human settlements are always non-randomly distributed across spatially-heterogeneous landscapes, some basic landscape ecology will be presented in the course. Some fundamentals of geostatistical analysis will also be taught, although the course is not intended to be a survey of quantitative geography or spatial analysis. Rather, it is designed to be a more specialized follow-up to ANTH 408 (Anthropological Demography); the new course builds upon the basic explored in ANTH 408 by extending them into the spatial domain. During the last quarter of the semester, students will split into 2-3 teams, each of which will re-analyze settlement data from a region and time period of its choice for presentation to the rest of the class. The proposed course will provide 3 elective credits toward the undergraduate major and minor, and will be open to graduate students as well. The overall aim is to produce scholars who can think in creative ways about the dynamics of settlement systems in their own reading and research. The course should be of interest to archaeologists, anthropological demographers, ethnologists, and other students interested in human population science, especially as it relates to preindustrial society.

Anthropology (ANTH)

ANTH 413 Molecular Forensic Anthropology (3) An introduction to the field of the application of DNA methods to estimating forensically useful phenotypes.

ANTH 413 Molecular Forensic Anthropology (3)
This course is a survey of forensic anthropology focusing on human genetic methods. Emphasis is placed on laboratory methods for analyzing DNA variation, the genomic and geographical distributions of genetic variation, estimating genetic ancestry, sex, pigmentation, facial features, and other traits. Lectures are accompanied by class discussions and complemented by practical lab sections closely tied to lecture materials. There will be three exams and students are responsible for preparing a poster and presenting a semester-long research project. This course is related to existing ANTH 411, Skeletal Forensic Anthropology. It fulfills a 400-level requirement for the anthropology major or minor, as well as the university’s new Forensic Science major.

Anthropology (ANTH)

ANTH 421 Intro to Geospatial Science in Anthropology and Archaeology (3) This course is a practical, data driven, introduction to applications of Geospatial tools in anthropological and archaeological research.

ANTH 421 Intro to Geospatial Science in Anthropology and Archaeology (3)

As anthropologists, we are interested in humans, how humans interact with each other, and how that interaction is modulated by space and place. The purpose of this course is to introduce students to the basic concepts of spatial theory in anthropology, and the use of GIS (Geographic Information Systems) as a tool in anthropological and archaeological research designs. Students will gain familiarity with geospatial technologies, their use as a tool for data creation, storage and manipulation, and a broad array of data analyses. The course is relevant to anyone documenting or investigating spatial dimensions of human social behavior. Students will gain familiarity with GIS software, its use as a tool for data creation, and a broad array of data analyses.

This class will be offered each Fall semester. It will introduce students to sources and uses of data in addressing anthropological or archaeological research questions. It will prepare the student for more advanced spatial analysis courses such as Advanced Geospatial Science for Anthropologists and Archaeologists. Students will be expected to develop a research project which uses GIS as a tool to address broader anthropological research questions. The class will culminate in the development of a research contract for a future fieldwork project. A list of sample topics is provided. Students will be expected to develop an original and functioning GIS which addresses their research question. The purpose of this exercise is to introduce the student to all stages in the development and operationalization of an anthropological research GIS in the development of an archaeological or anthropological project. There are two components to this class: classroom and labs. The classroom component will consist of lectures and discussions. The laboratory component will enable students to gain experience applying the concepts discussed in class to archaeological data through use of GIS programs in a technology classroom setting. Data used in the laboratory exercises derive from actual anthropological and archaeological fieldwork. Students are expected to complete labs in one of the several computer labs across campus that have GIS software installed. Grades are based upon the completion of 12 lab exercises, a draft of a proposed contract, the final contract and a short presentation of the proposed contract to the class. This course will fulfill three credits of the requirement in both the Minor and Major in Anthropology. This is the first part of a two-part course. The second part of this course is called Advanced Geospatial Science for Anthropologists and Archaeologists.

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Anthropology (ANTH)

ANTH 426W Archaeological Laboratory Analysis (3) Scientific laboratory methods used in the analysis of ceramic and lithic artifacts.

ANTH 426W Archaeological Laboratory Analysis (3)
This course, Archaeological Laboratory Analysis, employs experiential learning to teach students how to ask and answer archaeological questions using real data. While students learn the fundamentals of interpretation in other courses using already processed computer (and internet) assembled data sets, this is not how archaeological data are analyzed. Archaeological data emerge from the ground covered with dirt and the analyst must learn how to identify and measure their important attributes, and interpret what they mean. This class will provide a hands-on learning experience where students learn how to examine and use physical remains to reconstruct and interpret human behavior.

Students in the Anthropology program currently learn this critical step on an ad hoc basis by working with faculty on individual research projects. This approach, while effective, is neither systematic nor comprehensive. This is a course on analytical systematics. It provides students with an introduction to problem formulation, artifact processing, artifact cataloging, attribute identification, artifact classification, analysis, data illustration and photography. At the same time, students will be introduced to two separate and distinct approaches to interpretation: 1) morphological/diacritical analysis, and 2) direct experimentation and replication.

Students will be graded on the completion of nine laboratory exercises. These exercises will require that students identify the research question being addresses, the theoretical assumptions used in the analysis, the data sample, the analytical method(s) employed, and the conclusions reached. The exercises will also request that students identify personal insights and difficulties encountered during the analysis.

This course fills a vital position in training undergraduate majors by providing them with practical training in research design and data analysis. It also provides the logical link between our general courses in prehistory, our courses on archaeological theory, and our method courses on field methods of data recovery. All of these courses intersect in the archaeological laboratory where data interpretations are made and new information about the past takes shape. In addition to contributing to both the BA and BS undergraduate majors and minors, this course will also provide a framework for training graduate students who enter the program with minimal field and laboratory training in archaeology.

General Education: None

Anthropology (ANTH)

ANTH 424 Andean Ethnology and Archaeology (3) Cultures of the Andes from earliest settlements to Inka Empire; includes discussion of life in modern Andean communities.

ANTH 424 Andean Ethnology and Archaeology (3)
(BA) This course meets the Bachelor of Arts degree requirements.

When the Spanish conquistadors arrived in the Andes in 1532, they were astonished by the complexity and grandeur of the Inca Empire, which stretched along western South America incorporating a multitude of different societies that occupied a seemingly inhospitable landscape with coastal deserts, rugged mountain chains, and dense jungles. This course traces out the history and development of Andean cultures from the earliest peopling of the continent to the rise and fall of the Inca Empire. Using archaeological, historical, and ethnographic sources, students will learn about the relationship between Andean societies and their environments and landscapes, as well as the economic, social, and political changes that transformed small egalitarian communities through time into large, stratified states. Through the course, students will not only gain a strong background in pre-Columbian Andean history but will also hone their skills in the use of different lines of evidence to reconstruct the past while learning to critically evaluate existing interpretations. All students are expected to participate actively in discussions. Lectures will be supplemented by illustrations (slides, handouts, videos), and students will learn how societal dynamics are expressed in material culture and in the organization of architecture and settlements. Grades will be based on the results of three exams, a short paper, and participation in discussions. The course complements existing courses at the same (400) level on the archaeology of Mesoamerica (ANTH 422) and North America (ANTH 423). It continues the discussion (at a higher level) of some of the themes covered in ANTH 008 (Incas, Aztecs, Mayas). It fulfills the archaeology credits requirement for the major and is one of the 400-level courses that can be used for the minor. For students outside the major, it may be used to meet the Other Cultures or the Social Sciences requirement in Bachelor of Arts programs.

Anthropology (ANTH)

ANTH 429 Paleoethnobotany (3) Introductory course in paleoethnobotany, the study of the interrelationships between people of the past, natural environment, and plant resources.

ANTH 429 Paleoethnobotany (3)
This course is a survey of the fast-developing field of paleoethnobotany-- also known as "archaeobotany" or "phytoarchaeology"-- that involves the extension of ethnobotany into the past, emphasizing archaeological plant remains and study of the historical dimensions, complex dynamics, and myriad interrelations between people and plant resources. The primary goals of the course are 1) to promote understanding of the vital interplay between the natural environment and human societies, with their diverse systems of belief and resource use, especially those of the past but with relevance to the present; and 2) to foster an appreciation for what modern paleoethnobotany involves as a subdiscipline or specialization in archaeology, related to both anthropology and the plant sciences.

The course begins by considering the history and nature of the field, including parallel developments in plant biology. The first half of the semester entails weekly sessions that focus attention on the plant organism, sources of archaeobotanical data, taphonomic issues, and the major classes of archaeobotanical materials. Fundamental issues involved in fieldwork, and the variety of laboratory concerns and methodologies specific to paleoethnobotany as whole and with regard to individual subareas are addressed. Individual laboratory sessions highlight the different preservation states that affect ancient plant materials, as well as methods of identification and analysis. In the second half of the semester, attention is focused on theory and application, issues central to and/or addressed by paleoethnobotany as a subdiscipline of archaeological anthropology.

The course follows a seminar style, with substantial participation by students, including individual presentations, laboratory study, and analysis. Learning is augmented and enhanced by use of various visual aids, along with modern comparative specimens and actual archaeological plant remains.

ANTH 429 will fulfill 3 credits of the additional courses in the Anthropology minor and majors. Anth 002 is a prerequisite.

Anthropology (ANTH)

ANTH 431 Advanced Geospatial Science for Anthropologists and Archaeologists (3) This course is an intensive, data driven, treatment of the use of geographic information systems in anthropological and archaeological research.

ANTH 431 Advanced Geospatial Science for Anthropologists and Archaeologists (3)

As anthropologists, we investigate how humans evolved, behave, define groups, and interact socially. Examining how these processes are shaped by space and place is central to the anthropological enterprise. The use of geospatial science in anthropological and archaeological research is now commonplace. Geospatial technologies are now intimately involved in anthropological and archaeological research designs. The course objective is to expose students to advanced concepts and techniques of conducting geospatial science research in anthropological and archaeological contexts. The course is a continuation and development of the introductory geospatial science course and it will fulfill three credits of the requirement in both the major and minor in Anthropology. Students will develop an in depth understanding of anthropologically and archaeologically tailored geospatial project design and implementation. Students are expected to complete the work for the course in one of several computer labs across campus that has the appropriate software installed.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2009
Prerequisite: ANTH 421

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Anthropology (ANTH)

ANTH 433 Archaeological Ethics and Law (3) Introductory course that examines prominent ethical and legal issues in archaeology integral to modern applied research and practice.

ANTH 433 Archaeological Ethics and Law (3)
This course explores the ethical, legal, and practical dimensions of modern archaeology through a consideration of the following topics: archaeology as a profession; archaeological ethics; the relationship between archaeology and others (the public, ethnic groups, avocationals, collectors, etc.); international and national approaches to archaeological heritage management; the antiquities market; maritime law, underwater archaeology, and treasure hunting; cultural resource management in the United States; and archaeological outreach and education. Students are introduced to a variety of legal and ethical issues in archaeology that span local to international scales. Through lecture, discussion, and readings, students will consider the archaeology and ethics of ownership and stewardship, including issues centered on intellectual property rights, representation, repatriation, and reburial of cultural properties. They will be able to identify the various stakeholders in contemporary archaeology, and assess their values and interests in issues such as the treatment, ownership, and disposition of human remains, heritage sites, submerged cultural resources, and antiquities. They will consider growing problems with illicit collecting and excavation, illegal trade, and global concerns centered on the international trafficking of antiquities, and will be variously exposed to relevant national and international legislation involving cultural patrimony and management of antiquities, including international treaties such as the 1970 UNESCO Convention on Cultural Property, and related pieces of US federal legislation. The 1990 Native American Graves Protection and Repatriation Act (NAGPRA) and the Archaeological and Historic Preservation Act (ARPA) of 1974 figure prominently in the course. In general, upon completion of the course students will come to have a stronger appreciation of archaeological ethics and "archaeopolitics"; they will have a good understanding of the U.S. Secretary of the Interior's standards (36CFR61) for professional archaeologists and will be able to assess and evaluate contemporary issues of archaeological ethics and law in the context of modern practice.

ANTH 002 is a prerequisite of this course.

Anthropology (ANTH)

ANTH 432 Environmental Archaeology (3) Introductory course in Environmental Archaeology, with emphasis on method and theory in the subfields archaeobotany, pedoarchaeology, and zooarchaeology.

ANTH 432 Environmental Archaeology (3)

This class is a survey of the fast-developing field of environmental archaeology, or archaeobiology, which encompasses archaeology, the earth sciences, plant biology, and zoology. Environmental archaeologists apply techniques and insights obtained from these fields to questions concerning the relationships among humans, cultural systems, and the natural world, as reflected in the archaeological record. The general goal of the course is to promote understanding of the vital interplay between human societies, with their diverse systems of belief and cultural practices, and the natural environment, with emphasis on human interactions with biotic resources. Instruction is by lecture, supplemented by laboratory sessions emphasizing hands-on experience. Weekly topics are explored through selected readings and class discussions, augmented with laboratory assignments (practical exercises) variously focused on specific types or classes of archaeobiological materials.

ANTH 432 will fulfill 3 credits of the additional courses in the Anthropology minor and major, as well as the Archaeological Science major. Anth 002 is a prerequisite.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2010
Prerequisite: ANTH 002

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

ANTH 440 South American Tribal Societies (3) Ethnographic survey of tribal societies in South America. Special emphasis on non-Andean area.

South American Tribal Societies (3)

General Education: None
Diversity: None
Bachelor of Arts: Other Cultures and Social and Behavioral Sciences
Effective: Fall 1986

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Anthropology (ANTH)

ANTH 444 Primitive Warfare (3) Critical overview of the ethnography and theory of primitive warfare.

ANTH 444 Primitive Warfare (3)

Anthropology 444 is concerned with the phenomenon of lethal group violence in tribal societies so called "primitive war". Through lectures, readings, and research projects, this course reviews anthropological approaches to the study of primitive war, focusing both on ethnographic examples and on theoretical approaches. The course covers topics such as explanations, traditional and modern, for the existence of warfare; the primate background to human warfare; and the social causes and individual motives leading to warfare in tribal societies; as well as its consequences for those societies. Students become familiar with both general and particular manifestations of primitive warfare, and are exposed to individual ethnographic cases of primitive warfare as they motivate a variety of theoretical paradigms.

All students are expected to attend all lectures and to complete all weekly readings. At the last class meeting of each week, a rotation of students are assigned to organize and direct the class discussion of the week's readings in the light of the lectures earlier in the week. Performance in this activity constitutes 40% of the student's grade. Another 40% is earned in the research term paper each student must prepare. The final 20% of the grade is based on overall student contribution to class discussion, particularly during those weeks when the student is not a discussion leader. There is no final examination. This course can be used to fulfill major and minor requirements in Anthropology. Because warfare was and often still is a major activity in most tribal societies, this course provides an important complement to area-focused ethnography and archaeology courses such as ANTH 241 (Peoples and Cultures of Highland New Guinea), ANTH 422 (Mesoamerica), ANTH 423 (North America), ANTH 425 (American Southwest), ANTH 440 (Lowland South America), and ANTH 447 (Africa). This course is also relevant to topically focused course such as ANTH 450 (Comparative Social Organization), ANTH 451 (Economic Anthropology), ANTH 454 (Political Anthropology), and ANTH 456 (Cultural Ecology).

On the graduate level, this course addresses central topics covered in ANTH 522-523 (Ecological Theory in Anthropology), ANTH 556 (Social Organization of Traditional Societies), and ANTH 559 (Behavioral Anthropology).

Anthropology (ANTH)

ANTH 441 (IL) From Stone Ax to Uzi: Tradition and Change in the New Guinea Highlands (3) This course explores cultural change and innovation among tribal peoples of Highland New Guinea from stone tool technology to globalization.

ANTH 441 From Stone Ax to Uzi: Tradition and Change in the New Guinea Highlands (3) (IL)

The indigenous peoples of Highland Papua New Guinea were unknown to the outside world until the 1930s and began to be seriously influenced by European contact only after the First World War. At first contact with Europeans, the million or so people living in the Highlands used a stone tool technology, had no knowledge of the wheel, and lived in small, politically and economically independent local groups. They presented a major population engaged in a way of life typical of human society in a technologically simpler past, and have been crucial in anthropology’s discussion of the general characteristics of human culture and institutions. The study of these cultures also provides an opportunity to explore the processes through which these peoples have assimilated thousands of years of technological, political, and economic innovation in a very brief period, while simultaneously maintaining and recreating their cultural identity, despite the impact of colonial rule and global influences. Apart from the specific history of these populations, the course will also give students insight into the processes of globalization and internationalization that necessarily effect changes in traditional cultures, and will require that they consider the advantages and disadvantages that accrue from these processes.

Among the topics this course will cover are traditional and current approaches to dispute settlement, economic changes that entail moving from subsistence agriculture as the basis of the economy to cash cropping for a global market, the ecological effects of extractive industries such as mining and how those effects are translated into social and cultural domains, the reorganization of gender roles, the incorporation of politically independent tribal units into a centralized, powerful state, and the demise of traditional religion with the conversion to Christianity.

Students will be evaluated on contributions to class discussion, essay exams, a term paper and a brief oral presentation based on that paper.

The course will provide support and depth for more general courses dealing with warfare, gender, religion, politics and economics and specific understandings for programs devoted to exploring cultural variation and modernization.

**Anthropology (ANTH)**

**ANTH 446 Mating and Marriage (3)** An examination of human mating mainly from the viewpoint of behavioral ecology, centering on the species-typical institution of marriage.

This course is an examination of human mating and marriage mainly (although not exclusively) from the viewpoint of evolutionary behavioral ecology. Its central concern is the species-typical and uniquely human institution of marriage. Why do all human societies recognize this peculiar institution, whose social and biological functions, apparently obvious, become mysterious on close examination? What, exactly, is marriage? What are its consistent characteristics and attributes—does it have none? How are spouses chosen, and by whom? What does being married imply for the behavior of the spouses, and of their children and other relatives? What are the evolutionary scenarios that might have led to marriage? Although sexual behavior is clearly a key element in answering some of these questions, and receives considerable attention, this is not a course on human sexuality. Nor is it a course on kinship, even though kinship is also crucial to understanding marriage and also receives a good deal of attention. Rather, this course attempts to bring to bear on this central social institution bodies of knowledge from the biological and social sciences that may contribute to understanding how and why marriage arose as a universal feature of human societies, and how and why it is perpetuated in contemporary societies. We begin the semester with the posing of the central problem—what is marriage and why do we have it? For about half the course, we approach this question from an evolutionary, sociobiological point of view: We look into the biological background of human mating—its evolutionary history, its physiology, its behavioral ecology, etc., as we go through a semi-popular book on the subject by a biological anthropologist. Next we turn to more academic readings, old and new, that further elucidate the ecological constraints and fitness consequences of various behaviors relating to mating and mate choice, child rearing, etc., in terms of reproductive success, survivorship, etc. In the second half of the course, we take a more social anthropological point of view. We look at what anthropologists have written about marriage and marriage customs over the years. We try to relate the traditional social anthropology to more modern human behavioral ecology. Finally, in a research project report, each student examines some specifics of marriage as it is manifested in ethnographically known societies. In these reports we are particularly interested in how and by whom mates and spouses are chosen, and who contributes what to the raising of children.

Anthropology (ANTH)

ANTH 445W Ethnographic Film (3) Comparisons of written and visual ethnography; critical assessment of ethnographic film; cross-cultural variation.

ANTH 445W Ethnographic Film (3)

Students will be presented with both written and filmed ethnographic material dealing with a number of cultural subsystems (e.g., kinship and family relations, religion, political systems) and with a number of different world cultures. The aim of the course is three-fold: 1) to convey through visual anthropology the complexity and inter-relations of cultural subsystems, which is often difficult to do in written sources; 2) to develop the skills of critical viewing of ethnographic film; and 3) to provide students with critiques of their written work that will enable them to learn and practice the skills of clear, organized and convincing writing. Towards these ends, students will be expected to read and view weekly assignments for selected topics, to write twelve critical essays that compare the written and filmed sources, and to evaluate the aims, effectiveness, and methods of the films. Essays will be graded for both content and form and will provide a basis for class discussion. Students will also be required to write a term paper focused on a particular ethnographic film of their choice (one not shown in class) supplemented by additional research. As an aid in the writing of the paper, at least one class period will be devoted to learning how to do library research in Anthropology.

This course will complement other courses in Anthropology such as ANTH 045 and ANTH 001. The course can be used to fulfill a requirement in both the major and minor in Anthropology, and will fulfill both a Writing Intensive requirement and a Bachelor of Arts social/behavioral science requirement. It will also provide students in other departments with the opportunity to study aspects of diverse, non-western cultures.

Anthropology (ANTH)

ANTH 455 Global Processes and Local Systems (3) Ethnographic, comparative, historic, evolutionary treatment of global economic, political, and cultural processes and their consequences for local systems.

ANTH 455 Global Processes and Local Systems (3)
(BA) This course meets the Bachelor of Arts degree requirements.

Students will learn about global economic, political, and cultural processes and their consequences for local systems, how anthropologists do ethnography in the modern world of villages and factories; varieties of anthropological approaches and theories and how to assess them and how to critically assess ethnographic work.

Students will write a series of book reviews in which they critically analyze the works they read in the course. Each review will present the main argument of the work; the theoretical assumptions the argument entails; the evidence the author used, the methods the author used to develop the evidence; the relationships among theoretical assumptions, arguments, evidence, and methods; and conclusions. Each review will assess the validity and reliability of the findings and the relationships of findings, arguments, and assumptions to the conclusions. These reviews will direct the student's attention to the salient points of scientific ethnography and anthropological theory with specific examples. Grades for the reviews will be assigned on the basis of how well each component of the review is completed, short in-class writing assignments to test reading comprehension and orient discussion, and a synthetic essay.

General Education: None

Effective: Fall 1986
Prerequisite: ANTH 045

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Anthropology (ANTH)

ANTH 453 Anthropology of Religion (3) Traditional and modern religions and historical and contemporary religious movements from an anthropological perspective.

ANTH 453 Anthropology of Religion (3)
(BA) This course meets the Bachelor of Arts degree requirements.

This course will examine the origin, evolution and social function of religion from a cultural materialist perspective. It will begin with a general discussion of an anthropological approach to the study of religion, using numerous examples from different cultures for purposes of illustration. Following a discussion of several topics relevant to the anthropological study of religion --including magic, rituals, witchcraft and mythology-- the course will focus on the relationship between politics and religion: first discussing the role of religion as a mechanism of social and political control, and then examining the role of religion as a vehicle of sociopolitical change in the form of what anthropologists call revitalization movements. This course links to courses on the sociology, history, and philosophy of religion, to courses on intellectual history, and history of social sciences. Course evaluation will be based on 3 take-home essay examinations. Students will give the instructor 3 questions at indicated times; the instructor will return one question; the student will write an essay on the indicated question. Attendance is mandatory. This course will fulfill a 3 credit 400 level requirement for the Anthropology major and minor.

General Education: None
Diversity: None
Bachelor of Arts: Other Cultures and Social and Behavioral Sciences

Anthropology (ANTH)

ANTH 457 (US;IL) (J ST 457, SOC 457) Jewish Communities: Identity, Survival, and Transformation in Unexpected Places (3) Examines the global array of smaller Jewish communities that have flourished outside the main urban centers of Jewish settlement.

ANTH (J ST/SOC) 457 Jewish Communities: Identity, Survival, and Transformation in Unexpected Places (3) (US;IL)

This course addresses an understudied aspect of Jewish experience. It aims to expand our understanding of Jewish communities by focusing on those that are, alternatively, small, situated in out-of-the-way places, culturally outside the Jewish urban mainstream, or embedded in a larger society with markedly different values and traditions. These communities often constitute the points-of-contact between Jews and non-Jews, and in so doing sometimes transform Jews, non-Jews, and the relationships among them. Other such communities constitute experiments in Jewish lifeways and provide mainstream Jews with pilot projects for potential social and cultural change. This course will explore the significance of small, little-known, idiosyncratic, and anomalous Jewish communities on Jewish history and culture, and draw on them to instruct students on the social and cultural processes of small or unusual communities generally. The communities studied will be located both in the U.S. and elsewhere in which Jews have lived as a minority community during modern times. The course will look at the founding, growth, and decline of such communities and at their social processes and institutions. It will explore how to understand and analyze such communities, which vary from one part of the world to another. The social world of Jewish communities, large and small, is a core interest of Penn State’s Jewish Studies Program. This course will complement the current offerings in Jewish Studies, strengthening the social, cultural, and contemporary perspectives available in the Program. It will provide students with an opportunity to explore individual experience and micro-level processes among Jews, and to study the dynamics of identity and survival. It will complement the current offerings in Sociology and Anthropology by affording an opportunity to focus on community-level social processes and by adding a course on contemporary Jewry. The course will integrate knowledge from a variety of sources and fields, promote intercultural understanding, and meet US and IL requirements. Materials will be interdisciplinary, and will include ethnographies, sociological studies, population studies, histories, and personal narratives. They will include primary texts, creative works, and scholarly analyses. The assignments will be structured to facilitate preliminary experience in independent analysis, library research, or field research. The course will be offered approximately once a year.

Anthropology (ANTH)

ANTH 458 Ethnographic Field Methods (3) Course introduces students to ethnographic field methods, includes student projects and simple analyses that don't require statistical sophistication.

ANTH 458 Ethnographic Field Methods (3)

(BA) This course meets the Bachelor of Arts degree requirements.

This course is designed to introduce you to some (not all) ethnographic field methods. It will include actual projects you will have to carry out and other material that will make you a better ethnographer, such as how to pose questions that can be answered, how to select an appropriate sample for a project, how to take and use field notes. Because the emphasis is on field methods, we will do only simple analyses that don't require any statistical sophistication (e.g., descriptive statistics, chi square tests).

Anthropology (ANTH)

ANTH 459 Applied Anthropology (3) A survey of the development of applied anthropology and the current issues facing anthropologists working in non-academic settings.

ANTH 459 Applied Anthropology (3)

This course surveys the development of applied anthropology and the current issues that face anthropologists as they work in nonacademic settings.

Topics covered for 3 weeks each:
The roots and place of applied research in contemporary anthropology doing applied research Development—defined and evaluated Applied anthropologizing and contemporary problems in North America career. In this class students will learn what it means to be an applied anthropologist and to do anthropology outside of the academic setting. We will learn the historical development of applied anthropology and some of the special tools (and methods) applied anthropologists use in their work. We will also focus on the area of development and the role anthropologists play in their development as facilitators and critics. We will look at how applied anthropologists approach problems in North America from homelessness to drug addiction to AIDS and other diseases. Finally, we will survey the careers of various applied anthropologists to better understand the opportunities that are outside of the academic world. This course will fulfill the requirements for a 400-level course or elective for majors and minors.

Anthropology (ANTH)

ANTH 460 (BIOL 460) Human Genetics (3) The human genome, its variation, origins, and relation to disease and other traits.

ANTH (BIOL) 460 Human Genetics (3)

The course considers many examples derived from the study of the genetics of human disease, and includes most general areas of interest, including simple Mendelian disorders, and complex chronic diseases such as cancer and cardiovascular disease, and variable special topics including immunogenetics and the genetics of imprinting or other processes. The course usually also touches briefly on the nature of forensic genetics and the problem of making inferences from individual genotypes. Finally, the course considers the bioethical and societal issues involving contemporary human genetics. The study of disease genetics is important for students preparing for graduate work in medicine and other health professions as well as for graduate studies in molecular and evolutionary genetics and related areas, including biological anthropology and bioethics. This course is relevant to requirements or appropriate electives for life science majors and graduate students (check with your academic advisor). Over the years, it has proven to be excellent preparation for subsequent graduate and professional work in these areas. The course is offered most years, in the fall semester. Depending on enrollment and other factors, the course may include graded homework or other components, but evaluation is predominantly based on exams during the semester and a comprehensive final. This course is cross listed as ANTH 460 and BIOL 460, but there is only one course, at the same time and place, for all students no matter how they register. In some years, a 4-credit Honors version is offered (ANTH 460H/BIOL 460H), that is identical to 460 but with an additional class period each week involving additional written and presentational assignments and term projects, along with the regular 460 exams, that combine to determine the final grade. Total enrollment is capped at about 100 students.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2007

Anthropology (ANTH)

ANTH 461 Molecular Anthropology (3) Provides framework to understand current issues in biology, genetics, and anthropology as they relate to the evolution of our species.

ANTH 461 Molecular Anthropology (3)
The aim of this course is to provide students with the framework to understand current issues in biology, genetics, and anthropology as they relate to the evolution of our species. Basic methods in molecular biology, structure of the genome, molecular evolution, and human population genetics will be covered in the first part of the course. Once these tools are in place we will examine both classical and contemporary research reports on a number of topics, including the place of humans among the apes; mitochondrial Eve, DNA in forensics; Neandertal DNA and other applications of ancient DNA; reconstructing recent human evolution; the biological meaning of race; disease gene mapping; recent technological advances in genomics; skin, hair, and eye color genes; and the genetic future of our species. There will be three exams that will each count for 25% of the grade. Attendance and participation are mandatory and will count for 25% of the final grade. A portion of this participation grade is earned by presenting 10 min. summaries of particular readings. Each student will be expected to summarize a scientific paper four times during the semester. These summaries are not expected to be exhaustive reports on the material, but should reflect an effort on the part of the student to understand and discuss the material and may require some background work.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2005
Prerequisite: 3 credits in biological anthropology or 3 credits in biology

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Anthropology (ANTH)

ANTH 460H (BIOL 460H) Human Genetics (4) Gene mapping in humans; molecular basis of genetic disease; genomic structure; immunogenetics; and genetic evidence for human evolutionary history.

ANTH (BIOL) 460H Human Genetics (4)
Students will explore interesting normal or pathological variation to understand first its biological nature, then its epidemiological distribution, genes and genetic mechanisms associated with the trait, phylogenetic origins or comparison, and the nature of relevant genotype-phenotype relationships. Alternatively, students may explore methods for identifying and characterizing gene action or structure, or historical subjects related to human variation and evolution. Ethical and societal aspects of these issues will be considered as well. Time will be taken for faculty or students to read and present current important papers appearing in the literature, relevant to the current course topics. As an Honors course, we will have the time, and the students the dedication, to pursue the chosen topic(s) in much greater and more rigorous detail than is possible in the usual lecture or even seminar course format of Human Genetics 460 which, while presenting material at a sophisticated level, will not have time to explore the more subtle, problematic, or challenging aspects. The students who enroll for this course will be given a description of the approach and the intended general topic, on a course web page or by email when the instructor learns they have registered. The nature of the course will be described including semester-specific themes or focus that will apply (if any). Requisite background reading will be identified so students will know what will be expected of them. Some prior reading will be assigned, so that we can begin the semester with a common basis in background. Students will be evaluated on the quality of their project work, including writing ability, presentation ability, and depth of thought. Several written assignments will be given and graded for content and expression quality. Although students will take regular Human Genetics 460 lectures, they may be given separate exams (corresponding to those given in the regular course) that will allow more freedom of expression than multiple-choice exams or homework assignments. Depending on the workload in any semester, there may be a separate written take home synthetic essay final exam. The Honors session each week will be highly interactive rather than passive, and students will be graded on attendance, participation and whether they have done assigned work in advance of the class. Students will be expected to have the stipulated background knowledge of biological anthropology, evolutionary biology, statistics and genetics. This course should count as 4 credits toward additional courses in biological anthropology required for the Anthropology major.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2001
Prerequisite: 3 credits in genetics or ANTH 021 or BIOL 222 or BIOL 230W; and 3 credits in statistics

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Anthropology (ANTH)

ANTH 463 Quantitative Analysis of Morphological Data (3) The application of morphometric methods to anthropological data: phenotypes of organisms, artifacts, and traits.

ANTH 463 Quantitative Analysis of Morphological Data (3)

This course will focus on morphometric data and methods in place of traditional statistical approaches to anthropological data sets. Morphometrics, the fusion of biology and geometry, includes various methods for the statistical analysis of shape and shape change. A large number of specialized methods have been developed. Students need to be informed about these methods so that they can critically evaluate the literature and conduct morphometric studies themselves. The course will introduce students to the field of morphometrics and provide practical training so that they can conduct independent laboratory research on morphology. The format of the course will be lecture, discussion and laboratory work. Students will be required to attend all class meetings, lead discussions and prepare a final project involving the analysis of a data set that they have collected and analyzed. The course will cover problem formulation, data collection and analysis. Problem formulation (week 1) will focus on the types of questions that can and cannot be answered by the application of morphometric methods. Formulation of a research question and determination of the morphological data that bear on the question will be covered in a lecture and discussion format. Data collection will be presented (weeks 2 and 3) and demonstrated. The primary type of data that will be discussed is landmark data and the students will be directed in how to collect landmark data directly from specimens using digitizers and indirectly using digital images of specimens. Measurement error will be presented. The following weeks will focus on specific analytical methods used in morphometrics. These include: D’Arcy Thompson grids, traditional morphometrics, allometry, Procrustes analysis, Fourier analysis, Eigenshape analysis, finite-element scaling analysis, and thin-plate splines. Approximately one week will be spent on each method. Students will fill the remaining sessions with presentations. These presentations will include a report of the analysis of data sets that the students have collected and analyzed using methods studied during the course. This course may be used to fulfill a 400-level 3 credit elective for the Anthropology major or minor.

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Anthropology (ANTH)

ANTH 465H Fifteen Great Biology Papers (3) Reading and discussion of the most influential papers in the history of biology that illustrate exceptional insight and elegant reasoning.

ANTH 465H Fifteen Great Biology Papers (3)

Thousands of papers are published annually in the life sciences, but only a few have lasting impact on their field. These are usually characterized by elegant and thoughtful insight, and creative scientific thinking. For each of the fourteen weeks of the semester we will read and discuss a landmark paper of this type. The 15th paper? That will be the student's term project. The student will read one classic paper in the history of biological thought each week and discuss the paper in class. During the last half of each class in last third of the semester, the students will present the classics they have chosen for their term paper. The major topics covered in this course are: Weeks 1-4: Basic history of thought about origin and nature of variation in living organisms Weeks 5-8: Landmarks in the philosophy of science Weeks 9-12: History and development of ideas in evolutionary biology. Weeks 13-14: Foundations of 20th Century biology The objective of this course is to give students an experience with and appreciation for (1) the history and origins of science, biology in particular, (2) the nature of cogent critical thinking and expression, (3) the basis for fundamental ideas in biology today, (4) a sense of the nature of papers that had great influence on the future of the field, and (5) experience scouting, choosing, evaluating, and writing about papers of this nature. Evaluation will be based on class attendance and participation, critical thinking ability and effort as manifest in class, and a term paper (graded also to include quality of writing and research.) This course is generally related to all life science courses, and relevant to social and other sciences, philosophy, and history. This course can fulfill elective credits for Anthropology majors and minors.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2003
Prerequisite: ANTH 021 or 3 credits in evolutionary biology or genetics and 3 credits in statistics

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Anthropology (ANTH)

ANTH 470H Our Place in Nature (3) An evolutionary and genetic consideration of our understanding of human beings as a part of the natural world.

ANTH 470H Our Place in Nature (3)
The title "Our Place in Nature" takes off from T.H. Huxley's famous book in 1863 that put humans in rather than outside of nature, and the idea of the course is to place humans in the context of organic evolution both specifically and as a kind of general "model" organism (for example, genomic, phylogenetic, and comparative perspectives will be included). We will take a theme (one or more related topics, depending on enrollment, timeliness, etc.), which students will be assigned to work on singly or in groups. We'll first read from the historical, comparative, and evolutionary literature to see how "Our Place in Nature", relative to that theme, was first argued. Then we will follow the literature in evolutionary, developmental and genetic biology to the present to see how our current understanding of the trait evolved. Current research, especially on developmental and genetic aspects of the trait, will be examined in depth. We'll pay special attention to research strategies, comparative and genomic approaches, and latent working assumptions that help or hinder our explanations. The sociocultural context will be considered throughout, including the implications for society of our changing scientific assessment of the trait.

As an Honors course, we will have the time, and the students the dedication, to pursue the chosen topic(s) in much greater and more rigorous detail than is possible in the usual lecture or even seminar course formats. The students who enroll for this course will be given a description of the approach and the intended general topic, on a course web page or by email when I learn they have registered. Requisite background reading will be identified so students will know what will be expected of them. Some prior reading will be assigned, so that we can begin the semester with a common basis in background. The course will assume the level of knowledge such as can be obtained in one of several recent "Evolution" texts, an understanding of modern genetics and genetic methodology, basic statistics, and a general work on the history and philosophy of science and evolutionary thinking (initially, probably J.A. Moore's Science as a Way of Knowing). This substantial background requirement is based on this being an upper-level class; for good students to get what good students deserve at a good university, we need to be able to start at a high level.

Evaluation will stress original synthetic thought and investigation rather than memorized factual recapitulation. Work groups will tackle particular problems, present them, and turn in written products. There will be a written take-home synthetic essay exam. There will be other written assignments summarizing assigned reading or topics to keep students on track. The class will generally be based on oral discussion and/or be run in Socratic Q&A format. Evaluation will include a major component related to attendance and to level and quality of in-class participation, acquired knowledge and quality of thought and communication. This course will build on, and incorporate, knowledge acquired in physical anthropology, evolutionary biology, statistics, and genetics courses and will count as 3 credits toward the additional courses in biological anthropology required for the Anthropology major.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2001
Prerequisite: 3 credits each in genetics evolutionary biology and statistics

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Anthropology (ANTH)

ANTH 466 The Skull (3) Survey of the mammalian skull from many perspectives including evolution, development, anatomy, function, and variability of the skull.

ANTH 466 The Skull (3)
This course will provide a survey of what is known about the mammalian skull from many perspectives including evolution, development, anatomy, function, and variability of the skull. The course will consist of lectures and a laboratory component. Students will learn about the basic skull architecture and be introduced to various specializations of extinct and extant species. The section on evolution will cover the evolution of the skull from the earliest jawless vertebrates through human evolution. During the section on development, we will discuss the nature of the formation of bone embryologically. Other topics include the ways in which bone changes shape and size during prenatal and postnatal growth, how changes in growth can result in evolutionary change in morphology. The section on the function of bone will focus on biomechanical interpretations of the morphology of the skull. The lectures will focus on human anatomy but provide contrasts with other mammals (e.g., horse, dog, mouse). The last section on variability will survey the major groups of mammals highlighting similarities and differences in bony architecture and skull morphology. This portion of the course will be more laboratory-based with students examining specimens, taking measurements and leading discussions on hypotheses regarding why skull architecture is so different among mammals. The objective of this course is to provide the student with a broad survey of information relating to the mammalian skull. Through assigned readings and lectures the student will become familiar with salient anatomical and osteological features, obvious differences in skull architecture and the various biological processes responsible for these differences. During the final laboratory part of the course the students will bring their knowledge to an assigned problem and specimen in order to apply what they have learned to a scientific question. Students will be required to attend all lectures and laboratories. Periodic quizzes will be administered as well as an exam at midterm. A paper that focuses on the student's laboratory experience will be required at the completion of the course.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2003
Prerequisite: ANTH 021

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Anthropology (ANTH)

ANTH 476W Anthropology of Gender (3) Cross-cultural construction of gender and sex roles; theories of gender construction; case studies and practical effects.

ANTH 476W Anthropology of Gender (3)

Students will learn the current theoretical approaches in anthropology to the cultural construction of gender and sex roles. The first 2-3 weeks of the course will concentrate on exploring and understanding these theoretical approaches. The remaining weeks will focus on case studies of non-western gender systems, and on the practical effects of those systems, but students will also be encouraged to relate these systems to their own experience. Each meeting will be based on discussion of the readings assigned for that meeting and students will be expected to participate. During the period devoted to theoretical approaches, discussion will focus on the assumptions, advantages, and disadvantages of each approach. For the part of the course devoted to readings on individual societies, one reading each week will be the basis for a critical essay of approximately five pages. These essays will be expected to include: 1) an identification of the theoretical approach that informs the work, 2) a statement of the author’s arguments or questions, 3) a discussion of the methods used to provide data in support of the arguments or to answer questions, 4) a critique of the adequacy of data, and 5) a statement suggesting which additional elements might make for a better study. These essays will be graded for both content and form and students will have the option of rewriting essays (and improving their grade) after they receive comments. These essays will provide 60% of the course grade, while participation in discussions will provide another 15%.

A short research paper will also be required. The paper must focus on a question or hypothesis concerning gender, and a preliminary proposal that includes the focus of the paper, its relevance to the course, and a beginning bibliography is required. A first draft of the paper will be required two weeks before the end of the semester. The research paper will provide 25% of the course grade.

The course complements other courses in Anthropology that deal with sex differences, but will provide a perspective on gender that is not available elsewhere in the curriculum. The course can be used to fulfill a Behavioral Anthropology requirement in both the major and minor in Anthropology and a writing across the curriculum requirement. It will also provide students in other departments with the opportunity to study aspects of diverse, non-western cultures. The course is currently identified as one that may be taken to fulfill the requirements of the Women’s Studies minor.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2011
Prerequisite: 3 credits in women’s studies or anthropology

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Anthropology (ANTH)

ANTH 471H Biology, Evolution, and Society (3) Exploration of the genetic theory of evolution and development, its history and application within Biology and beyond.

ANTH 471H Biology, Evolution, and Society (3)

This will be a reading, discussion, and exploration course that looks at the way theory about the nature of life and its origins and diversity have developed over time into today’s evolutionary theory. The course will examine the Darwinian theory, and then new elements that recent biological research have revealed about the nature of biological traits themselves and how genes produce them. These points were not part of evolutionary theory itself, but are an important supplement that could not have been made before results from the last 20 years have been available. A theory can be called a cosmology when its assumptions go beyond hypotheses to be tested, to become assumptions that are no longer under test but are used to devise future research and that then set the directions of science. This includes, but isn’t restricted to the kind of cosmology that deals with life space. We have to use theory to order our work and to anticipate what we have not yet found (for example, that newly discovered species will be related to other known species). But in the case of biology, a modern ‘biocosmology’ has developed steadily since Darwin, increasingly centered on molecular genetics and genes as the ultimate units of biological causation. Sometimes that theory has become so unquestioned as to impair research and even to be somewhat misleading. Elements of biological theory, such as natural selection, are powerful and general, and are being borrowed by physicists and astronomers (a reverse of the borrowing that occurred in the last century), to account for aspects of the physical universe in explicit evolutionary terms (including natural selection). For somewhat similar reasons, also having to do with the role of science in society, modern biocosmology has routinely been extended to apply to sociopolitical issues, such as economic and educational policy, science funding decisions, and views about socially delicate issues such as behavior, sexuality, talents and abilities, and much else. This course will discuss how the modern theory of life has arisen historically and the evidence and research methods that have been used to develop that theory. A view of biological theory as a broader cosmology leads to the additional consideration of the nature of biological causation as a statistical rather than purely deterministic phenomenon, and the kinds of research approaches that are used to understand biological problems. The latter include the engineering of organisms, the health sciences, and the nature, evolution, and biological basis of behavior. The objective of this course is to give students a broad understanding of the evolutionary and genetic theory of life and a broader view of the way that theory extends to areas not yet understood, as well as to its origins in and relevance to human society. Everyone is familiar with Darwin’s basic theory that life is historical and evolves via natural selection, and that genes are the basis of it all. But these ideas are often only superficially understood—sometimes even by biologists—and many clearly central aspects of life have been left out of the Darwinian theory. That theory explains how organisms evolve, but not what evolves or how genes make those traits possible. These are topics in gene function and developmental mechanisms. Along with some modifications to Darwin’s ideas, largely involving elements of chance and population structure and ecology, the genetic theory evolution can be augmented by a few simple organizing principles to explain the nature of traits and flesh out a more comprehensive understanding of life. These principles are in daily use in research but it will be helpful for students to have them organized into a synthetic framework placed explicitly within evolutionary theory itself. This course will be generally related to all life science courses, and relevant to social and other sciences, philosophy, and history. But it is not tied to any particular other course, and as a kind of overview of the governing notions of life at the onset of the 21st century, complements the education of anyone in these related fields. This course will be of interest to students who have or will take courses in astrobiology, developmental biology, evolutionary biology and/or population genetics, or anthropological genetics and human evolution. The grade will be based on attendance and participation. Reading and/or research of some kind will be assigned most weeks, with students responsible for oral reporting or writing brief descriptions of what they have found. There will be a term paper or project, but no formal exams.

General Education: None

Anthropology (ANTH)

ANTH 477 (US;IL) Language, Culture, and Society (3) Relationships among language, culture and society, with an anthropological emphasis.

ANTH 477 Language, Culture, and Society (3)
(US;IL)

Anthropologists have long acknowledged the importance of language as a major adaptive tool of the human species and as our principal means of transmitting culture. Indeed, it is often difficult to separate language, culture and society because of their intrinsic interrelatedness; language requires a social environment, while culture requires an efficient and expressive means of communication. This course will explore the relationship of language, culture and society, within an anthropological context that distinguishes it from the standard approach of linguistics courses. Linguistic anthropologists have focused on language as a way to make inferences about larger anthropological issues such as world view, semantic fields, the relationship between speech and socialization and the interaction of linguistic and social communities. The course will include a section on the structure of languages, emphasizing the similarities and differences in human languages and the expression of the general language code in particular languages. It will also deal with the origins of language and briefly explore language change, including contacts between members of different societies and the changes that those contacts entail. The major hypotheses concerning the relationship between language and culture will be assessed. Finally, a major part of the course will be devoted to the study of language and its social context, the ways in which speech is associated with social relations, how speech affects and is affected by social interaction. Students will gain an understanding of the importance of language in human adaptation and the transmission of culture and as a social marker both between and within social groups. Students will be evaluated through written exams, problem sets, contributions to class discussions and presentations. The course will provide 3 credits in the Major and Minor in Anthropology.

General Education: None
Diversity: US;IL
Bachelor of Arts: None
Effective: Spring 2007
Prerequisite: ANTH 045 or ANTH 001

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

Applied Linguistics (APLNG)

APLNG 410 Teaching American English Pronunciation (3) Study and application of principles of North American English phonetics and theories of teaching pronunciation.

APLNG 410 Teaching American English Pronunciation (3)

(BA) This course meets the Bachelor of Arts degree requirements

This course, for teachers who deal with speakers of other languages, integrates research and theory on the acquisition and development of pronunciation, as well as current pedagogy, to enable them to construct their own principled theory of teaching pronunciation. Students are introduced to the characteristics of the consonant and vowels systems of English. In addition, students are introduced to variations in the production of consonants and vowels by speakers of languages other than English. Students are expected to understand and to be able to describe the stress rhythm, and intonation of English as well as the adjustments that are made in connected speech. Students will learn how grammar and orthography influence the pronunciation of phonemes. Students will learn how to diagnose an individual's difficulties in the production of North American English and will learn how to develop appropriate curriculum. By focusing on instructional strategies from fields as diverse as theater arts, psychology, and instructional technology, students will be able to individualize their instruction by providing alternative ways to better respond to second language speakers' learning styles and preferences. Moreover, this course requires students to develop and implement appropriate curriculum for both hypothetical, real tutorial, and whole class instruction.

The objectives of this course are for teachers 1) to develop a satisfactory understanding of the phonetics of North American English, including consonants, vowels, rhythm, stress, intonation and prominence, 2) to develop an understanding of the relationship between listening and pronunciation, as well as orthography and pronunciation, 3) to develop an ability to explain these phonetic concepts appropriate to students with varying learning styles using a variety of techniques such as kinesthetic and tactile reinforcement, 4) to develop an ability to diagnose speakers' particular pronunciation difficulties and to create instructional materials in response, 5) to develop a coherent philosophy of the teaching of pronunciation, and 6) to develop an ability to evaluate pronunciation textbooks and materials and supplement them when necessary.

APLNG 482Y (IL) Introduction to Applied Linguistics (3) Application of theories of language to psycholinguistics, philosophy of language, anthropological linguistics, sociolinguistics, bi/multilingualism, second language acquisition and teaching.

APLNG 482Y Introduction to Applied Linguistics (3) (IL)

This is a survey course concerned with the application of theories of language to issues in the areas of psycholinguistics, philosophy of language, anthropological linguistics, sociolinguistics, bi/multilingualism, second language acquisition, and second language teaching. Specifically, the course focuses on: a) how language influences the way people think and bring meaning to what they do, b) how language users match their utterances to specific functional purposes within specific social contexts, c) how the language practices of a particular culture are closely tied to the beliefs and conceptual principles by which people in the culture live, d) how language is used by speakers of different races, genders, and ethnic backgrounds, and e) how language is acquired, used, and perceived within bi/multilingual societies. Through reading, writing, and discussing the major issues in each of these areas students will come to understand how theories of language have influenced the way we think and bring meaning to what we do, the ways we communicate within different cultures and societies, and the way languages are learned and used.

Applied Linguistics (APLNG)

APLNG 412 Teaching Second Language Writing (3) This course provides opportunities for exploring various perspectives on theory, research, and pedagogical applications in second language writing.

APLNG 412 Teaching Second Language Writing (3)

This course has been designed to provide opportunities to explore various perspectives on theory, research, and pedagogical applications in second language writing. Through readings, writing, class discussion, and development of practical applications, students may develop an understanding of how research and theory can inform their practice, as well as an awareness of how personal and professional factors come together to inform their own theory of second language writing. By engaging in instructional activities, such as evaluating writing, responding to writing, and developing materials, students may begin to develop an understanding of how to implement theory in practice aligned with understanding. The overriding objectives are for students to help develop self-awareness as a writer and a teacher of writing, develop their own philosophy of teaching composition in an additional language context and to develop curriculum that embodies this philosophy. Students will be evaluated on reading journals, tutoring in the Writing Center, literature review, materials development project and developing of materials. APLNG 412 is an elective course in the M.A. TESL program and/or PhD option in Applied Linguistics.

**APLNG 491 Theory: Second Language Acquisition (3)** An investigation into current issues in the theoretical bases of second language acquisition.

**APLNG 491 Theory: Second Language Acquisition (3)**

This course considers the relationship between second language acquisition (SLA) theory and language teaching. An examination of various aspects of first language (L1) and second language (L2) learning/acquisition processes provides a framework for consideration of basic questions in SLA research and interpretation of findings to date. Of particular interest is the relationship of this research to teaching materials and methods. The questions addressed include the following: What is SLA? What are the methods and aims of SLA Research? How are theories of SLA related to major theoretical models of human language and human learning? What have been or could be important interdisciplinary perspectives in SLA?

**APLNG 484 Discourse-Functional Grammar (3)** Develop a working knowledge of the structure of English and apply such knowledge to research and/or classroom situations.

**APLNG 484 Linguistic Structures for English as a Second Language (3)**

This course is designed to enable prospective and practicing ESL/EFL teachers to understand the linguistic structures of the English language. Through the use of transformation grammar, students will interpret and analyze the basic grammatical structures of the English language. Students will apply their developing skills of linguistic analysis to recognize, and analyze, and remediate both oral and written grammatical errors in ESL/EFL instructional contexts. Students will understand the current theoretical issues related to pedagogical grammars and develop an appreciation for the practical and theoretical relevance of linguistics analysis for second language educators.

APLNG 493 (IL) Teaching English as a Second Language (3) Theory, research, and pedagogy that focus on the teaching of English to speakers of other languages in varied contexts.

APLNG 493 Teaching English as a Second Language (3) (IL)

This course focuses on the teaching of English to speakers of other languages. Specifically, the course explores the multidimensional nature of the teacher as a learner of teaching, the context of schools and schooling within which teaching occurs, and the activities and content of second language teaching and learning.

Throughout the semester, students will engage in a range of theoretical, pedagogical, and reflective activities that will enable them to: 1) understand their own beliefs and knowledge about language learning and language teaching and become aware of the impact of such knowledge and beliefs on their classroom practices, 2) recognize the highly situated and interpretative processes involved in language teaching and be able to reflect on, critically analyze, and evaluate their own teaching practices, 3) become sensitive to the complex social, cultural, political, and institutional factors that affect language teaching and students' language learning, 4) come to recognize students' strengths and development as learners and language learners, 5) understand subject matter content from an instructional perspective and learn to anticipate areas that may require additional instructional support, 6) use their knowledge of theory to inform their instructional practices, 7) participate in professional collaborations with other teachers as they learn about language teachers, language teaching, and language learning.

Bachelor of Arts: Second or Beyond 12th Level Foreign Language
Effective: Summer 2010

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Arabic (ARAB)

**ARAB 003 Intermediate Modern Standard Arabic (4)**
More complex grammatical forms; vocabulary building principles; continued development of skills in conversation, reading, writing; culturally-oriented readings and films.

**ARAB 003 Intermediate Modern Standard Arabic (4)**

(BA) This course meets the Bachelor of Arts degree requirements.

This language and culture course, which completes the 12th-credit-level language requirement for B.A. (and some other) degrees, presents the third semester of the study of the Modern Standard Arabic language and an exploration of several aspects of Arab cultures.

ARAB 003 is an intermediate course designed as a continuation of ARAB 002 and a basis for further study of Arabic as a second or foreign language. The course intends to alert students to the wealth and intricacies involved in learning the Arabic language and its many cultures. In addition to being the official language of 22 countries, with great ancient civilizations, complex modern histories, and intense political situations, Arabic is also the language of the Islamic religion; the language of a booming music and film industry, and the language of a significant body of literature. The multiplicity of the Arabic language, as well as the coexistence of colloquial and modern standard Arabic, is addressed in this course. The course emphasizes all four communication skills (reading, speaking, listening and writing). Vocabulary and grammar are expanded. Students become involved in the Arabic language and its cultures through various activities, which may be designed around a serialized and audio-Visually enhanced story set in an Arabic environment, as well as through an oral report presented in class. The course may use popular media such as films, comics, newspaper articles, music, websites, and songs. Themes relating to contemporary experience are treated, such as relationships with family members and friends, the decision to immigrate, daily life within a residence, how a child of an Arab immigrant feels, the cultural importance of hospitality, and the month of Ramadan.

The course is designed for students who have completed ARAB 002 in Penn State's language sequence or have the equivalent level of language proficiency. In turn, ARAB 003 course serves as a prerequisite for ARAB 110. Placement within the Arabic language sequence follows the University's foreign language placement policy; for example, students whose native language is Arabic are not eligible to receive credit in this course.

General Education: None

Bachelor of Arts: Foreign Language and Second or Beyond 12th Level Foreign Language
Effective: Summer 2010
Prerequisite: ARAB 002

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Arabic (ARAB)

ARAB 051 Elementary Intensive Arabic for Graduate Students I (3) Intensive introduction to Modern Standard or Colloquial Arabic: first half of graduate sequence in elementary reading, writing, listening, cultures.

ARAB 051 Elementary Intensive Arabic for Graduate Students I (3)
Students learn the Arabic alphabet. They learn to form the letters in all their different positions, they also learn to read them. Practice through dictation, listening and reading lists of words containing the different sounds and letters. Students learn how to greet one another. They also learn vocabulary words they can use in simple sentences. Lessons are taught in an authentic cultural context.

General Education: None

Bachelor of Arts: None
Effective: Summer 2008
Prerequisite: graduate standing

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Arabic (ARAB)

ARAB 002 Elementary Modern Standard Arabic II (4) Continuation of ARAB 001; development of additional skills in conversation, reading, and writing; grammar and vocabulary building; cultural components.

ARAB 002 Elementary Modern Standard Arabic II (4)

(BA) This course meets the Bachelor of Arts degree requirements.

This language and culture course, which counts towards the language requirement for B.A. (and some other) degrees, presents the second semester of the study of the Modern Standard Arabic language and an exploration of several aspects of Arab cultures.

Arabic 002 is the continuation of Arabic 001, an elementary course designed to introduce learners of Arabic as a second/foreign language to the basic structures of Arabic and to its uses in common situations of everyday communication. Arabic 002 begins with a review of the basics learned in Arabic 001, and, as in some sections of Arabic 001, the course may follow the story of an Arab American family. Arabic 002 expands on vocabulary, goes into more complex grammar structures, and further introduces Arab culture. The "multiplicity" of the Arabic language and the coexistence of spoken (colloquial) and written standard forms of Arabic continue to be addressed in order to prepare the student for the complex reality of the language. This course underscores all four communication skills (reading, speaking, listening and writing) and uses audio and video material to take the learner to native speakers in their natural environment; introducing invaluable listening segments and various cultural aspects of the Arab world. The course may also have recourse to popular media such as films, comics, newspaper headlines, websites, music, and songs. Students are reminded through their oral presentations that Arabic is spoken as an official language in 22 countries with diverse and rich historical, political, economical, religious, artistic, and literary venues, and Arabic is also used in many additional parts of the world. Class activities and projects are designed to enable students to become active, creative participants, and transmitters of new knowledge to their peers.

The course is designed for students who have completed Arabic 001 in Penn State’s language sequence or have the equivalent level of language proficiency. In turn, this course serves as a prerequisite for Arabic 003. Placement within the Arabic language sequence follows the University’s foreign language placement policy; for example, students whose native language is Arabic are not eligible to receive credit in this course.

Academic Program Description:

Arabic (ARAB)

ARAB 110 (GH;IL) Arab Language, Cultures, and Current Topics (3) Fourth-semester Modern Standard Arabic: study of cultures through authentic discourse, texts, film; development of reading, writing, listening, speaking skills.

ARAB 110 Arab Language, Cultures, and Current Topics (3) (GH;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

This course and culture course, which fulfills the Humanities or the International Cultures requirement within General Education or the Other Cultures requirement within the Bachelor of Arts degree, will offer a continuation of the study of the Modern Standard Arabic language and an exploration of several aspects of Arabic cultures, such as the religious and cultural traditions of the month of Ramadan, the differences between American and Arab relationships, preparing for a trip to the Middle East, and an introduction and brief exposition of the Palestinian problem. The course is designed for students who have completed ARAB 003 in our language sequence or have the equivalent level of language proficiency. Students will develop listening, reading, writing, and speaking skills, and will be introduced to a range of Arabic cultures and encouraged to see both commonalities and differences among them. The material is always presented through culturally rich texts. The course offers opportunities for students to increase their knowledge and appreciation of not only the language, in its Modern Standard form, but also the varieties of cultural production in the Arabic-speaking world, in their many facets and diverse manifestations. Along with continuation of language learning, students are exposed to Web sites, film, music, comics, literature etc. Students' assignments use a combination of reading, writing, listening, and researching skills. Students often work in groups, performing oral and written class activities. This course serves as a prerequisite for ARAB 401.

Arabic (ARAB)

ARAB 401 (IL) Advanced Language & Cultures I (3) Fifth-semester Modern Standard Arabic: reading more complex texts, films, further development of conversation, composition skills, Arab cultures, current issues.

ARAB 401 Advanced Language & Cultures I (3) (IL)

( BA) This course meets the Bachelor of Arts degree requirement.

This language and culture course, which fulfills International Cultures requirement or the Other Cultures requirement within the Bachelor of Arts degree, will offer a continuation of the study of the Modern Standard Arabic language and an exploration of several aspects of Arab cultures. Language skills (reading, writing, speaking, listening) are further developed through the exploration of several culturally important themes that illustrate a range of cultural situations and contexts. Among the themes that may be discussed are the following: new opportunities and also persistent problems facing Arab youth; social and economic conditions in which fundamentalist and other groups present their agendas; the condition of women and the pressures often exerted by society’s norms and traditions to keep women out of the public scene; cultural, emotional, and literary reactions to the tragedy of displaced peoples; Islam and other religions among Arab cultures; love and the images and symbolism used to describe it; the writings of one or more well-known authors, including the evolution within the works of the author(s) and the influence of these writings on Arab thought; Arabic cultures in various parts of the world, including the U.S. All themes are presented in the target language and represent a wide range of Arabic culture and current issues. The course may also involve popular media such as comics, newspaper headlines, music and songs, and a visit to the library. Class activities and projects are designed to enable students to become active and creative participants and transmitters of new knowledge to their peers. Students will be asked to conduct research using authentic material, and to write a short paper in Arabic as a wrap up of their final presentation.

General Education: None

ARAB 402 (IL) Advanced Language & Cultures II (3) Sixth-semester Modern Standard Arabic: reading more complex texts, films, further development of conversation, composition skills, Arab cultures, current issues.

ARAB 402 Advanced Language & Cultures II (3)
(IL)

(BA) This course meets the Bachelor of Arts degree requirements.

This language and culture course, which fulfills the Humanities or the International Cultures requirement within General Education or the Other Cultures requirement within the Bachelor of Arts degree, will build upon previous courses in the Arabic curriculum and offer a continuation of the study of the Modern Standard Arabic language, an exploration of several aspects of Arab culture in a range of contexts, and the exploration of current issues and topics of interest in Middle Eastern media. Among the themes that may be discussed are the following: the achievements of Arab Nobel Prize winners, holiday traditions, colloquial Arabic, love, social and economic conditions of the poor and the middle-class, practical and psychological problems arising from belonging to a certain social class, ways in which the state (in different countries) relates to the needs of the people, Arab cultures in various parts of the world including the U.S., and a variety of the most recent social and political newspaper and magazine articles.

All themes are presented in the target language and represent a wide range of Arabic culture and current issues. The course may also involve popular media via the reading of comics, relevant headlines, music and songs, and computer practice for students to learn how to type in Arabic and benefit from available resources to equip students with this useful Arabic tool. Class activities and projects are designed to enable students to become active and creative participants and transmitters of new knowledge to their peers. Themes will often be examined comparatively and will draw on students' personal experience to connect with the material presented.

The course is designed for students who have completed Arabic 401 in our language sequence or have the equivalent level of language proficiency.

At University Park the course will be offered every semester or every other semester, according to enrollment patterns and the availability of staff. At other locations, course-offering patterns will be determined by their needs.

Architectural Engineering (A E)

A E 124S Architectural Engineering Orientation (1) Introduction to architectural engineering; lectures and discussions with special reference to the relation of architectural engineering to the building industry.

A E 124S Architectural Engineering Orientation (1) (FYS)

This course is designed to help students decide whether they do or do not want to major in Architectural Engineering. It has four major goals. The first is to introduce the role of the architectural engineer in the building industry. The second is to introduce the concepts of integrated building systems design and construction management. The third is to familiarize students with the Architectural Engineering curriculum, department facilities, and faculty. The fourth and final goal is to develop an awareness and interest in the periodicals and publications related to buildings.

This course will provide students with access to the regular faculty of the program, a feature that continues throughout the students' 5 year career in Architectural Engineering. Students and faculty will be connected through discussion of topics related to the building industry and the areas that future A E students will be studying. Since this program operates under enrollment control, this course will address entrance to the major, the requirements placed on the freshman year, and the selection process. Additionally, special features of the program will be discussed, including option selection, which takes place after 3 years, the study abroad program at the University of Leeds, and the integrated graduate/undergraduate program.

Depending upon the semester in which the course is taken, students will be provided with either an opportunity to participate in the annual A E Career Fair or the 5th year thesis presentations. Students will take field trips to buildings and construction sites on campus to reinforce the material learned in class. As a result of this class, all students should be better prepared to make a decision as to whether or not the wish to apply for this major at the end of their first year.

Architectural Engineering (A E)

A E 210 Introduction to Architectural Structural Systems (3) Qualitative study of architectural structural systems; historical development of structures; insights of structural analysis and synthesis; comparative structural types. This course is intended for Architecture students.

A E 210 Introduction to Architectural Structural Systems (3)
A E 210 is an introductory course in structural analysis and engineering mechanics (primarily statics) with an emphasis on buildings. This course was created specifically for Penn State architecture students. The course is designed to give students an understanding of the behavior of building structural and related architectural elements under a variety of loading conditions. A E 210 is designed to provide students with an understanding of the interpretation and application of structural aspects of building code requirements, particularly in the area of design loads. In addition, this course provides the necessary prerequisite knowledge for two additional structural design courses that are required for architecture students.

Faculty Member Proposing Course: M. Kevin Parfitt

General Education: None

Architectural Engineering (A E)

A E 202 Introduction to Architectural Engineering Concepts (3) Introduction to profession of architectural engineering, building envelope systems, sustainable design, fire protection systems, and engineering economics.

A E 202 Introduction to Architectural Engineering Concepts (3)

As the first course after students are admitted into the major, A E 202 is designed to expose students to two aspects the profession: the interdisciplinary nature of architectural engineering and the concept of professional practice.

Technical areas of focus chosen for this course are building envelope and fire protection. These disciplines of architectural engineering require students to sufficiently understand the application of a number of disciplines in the creation of successful and integrated solutions. Students will learn to integrate architectural design and detailing, structural analysis and design, the influence of thermal science, construction processes and building codes in the proper execution of the design of specific building systems.

Social and environmental responsibility will be introduced through the discussion of sustainable design. Understanding the Greed design concepts and the LEED certification system provides the practical basis for the students to put idealism to work.

Early exposure to professional practice and engineering economics provides students with a framework of understanding to manage the relationships of the myriad of technical courses. This course is designed to provide students an appreciation that the practice of architectural engineering includes proper executions of business and management practices. Students will also learn to analyze design options based on economic factors.

The course utilizes lectures, practicums, examinations, projects and presentations to deliver and reinforce the technical content. The course offers students opportunity to work in team settings and to present their work orally to their peers. The broad coverage of the technical and social issues and professional skills intentionally involves students early in their education to all the ABET educational outcomes. The projects present opportunities to engage students in discussion and application of social and ethnical responsibilities.

The course is open to architectural engineering students in the second year with an ENGAE standing. Students in other curricula may enroll in this course with prior approval of the program.

Architectural Engineering (A E)

A E 221 Architectural Building Materials (3) The structural and architectural use of building materials; commercial standardization, classification, and description as encountered in the building trades.

A E 221 Architectural Building Materials (3)

The course objective is for students to understand building materials and methods. It is taught using a combination of these methods, 1) job site visits to current construction projects on campus, 2) guest speakers from manufacturers, engineering firms, building code organizations, construction managers and contractors, 3) video series of building construction, and other various DVD’s, 4) visits to local building suppliers and testing facilities, 5) bus trip to several manufacturing, fabrication, milling plants, 6) hands-on mock-ups of construction assemblies, and 7) actual material samples. This course prepares students for further study in the advanced architectural engineering courses. Student evaluation and individual grades are based on a combination of homework, projects, quizzes, attendance and a final cumulative exam. The major part of the final grade is from six (6) quizzes of which the lowest quiz grade is dropped. Special facilities consist of 1) the drafting room, where various drawings and specifications are utilized to understand materials, 2) the computer lab, where students have access to the internet, which provides them with information from manufactures, suppliers and construction trade organizations, 3) the material samples room, where actual material samples and fasteners are examined and understood, 4) the hands-on mock-up room, where true size mock-ups are built by student groups and 5) the structures testing lab, where concrete beams, wood trusses, etc. built by the students are load tested to understand construction methods and failures.

Architectural Engineering (A E)

A E 211 Introduction to Environmental Control Systems (3) Qualitative study of humans in macro- and micro-architectural environmental systems. This course is intended for Architecture students.

A E 211 Introduction to Environmental Control Systems (3)
A E 211 introduces Architectural students to building thermal environmental and building mechanical issues. Thermal environmental issues include: thermal comfort, natural environmental impacts, heat transfer through the building envelop, heating and cooling design, noise and vibration of mechanical systems, and building energy consumption. Building mechanical system issues include: heating, ventilating and air-conditioning systems. Emphasis is placed on building design in response to the technical, environmental and societal challenges, with a focus on sustainable design principles and guidelines applied to mechanical systems.

The course utilizes lectures, practicums, examinations, projects and presentations to deliver and reinforce the technical content. The course offers students opportunity to work in team setting and to present their work orally to their peers. The broad coverage of the technical and social issues and professional skills challenges the architecture students to incorporate technical issues as an integral part of the overall building design.

The course is required for students enrolled in the undergraduate architecture program. The course is not available to architectural engineering students.

A E 222 Working Drawings (3) Materials and methods of construction used in residences, and preparation of working drawings for a small building.

A E 222 Working Drawings (3)
The course objective is for students to understand construction documents, communicate construction information with sketches and to create drawings and specifications. The course is organized around a series of modules related to working drawings. These modules consist of: 1) reading and interpreting construction documents, 2) hand drawn sketches, from existing mock-ups, from existing drawings, from assigned details of existing campus buildings, from only given material and connection parameters, 3) CAD drawings of plans, elevations, wall sections, building sections, details, schedules. The final partial construction documents will be in accordance to CAD standards and various codes, including zoning, International Building Code, ADA, etc. This course prepares students for further study in the advanced architectural engineering courses. Student evaluation and individual grades are based on a combination of homework, projects, in class assignments, exams, quizzes and attendance. In class assignments are generally short and given to demonstrate a concept or as practice. Special facilities consist of: 1) the drafting room, where various drawings and specifications are utilized and where students prepare sketches, 2) the computer lab, where students have access to computer aided design software, presentation software and communication software, 3) the material samples room, where actual material samples and fasteners are examined and understood and 4) the hands-on mock-up room, where true size mock-ups that represent the students drawings are built by student groups.

Architectural Engineering (A E)

A E 308 Introduction to Structural Analysis (4) Algebraic and graphical methods of analysis of determinate members, deflections; introduction to indeterminate analysis methods. Course includes practicums.

A E 308 Introduction to Structural Analysis (4)

In this introductory course, students develop skills to perform analysis of structures, with emphasis on buildings and their structural elements. The objectives of this course are as follows: 1) to determine loads that the buildings/structural elements are likely to be subjected to during the lifetime of the building; 2) to discuss procedures used to determine reactions and internal forces in trusses, beams, and frames; 3) to introduce methods that can be used to calculate deflections. These objectives can be seen as three general steps that define structural analysis. Although the main emphasis in this course is the analysis of planar, statically determinate structures, an introduction to the analysis of indeterminate structures is also given. The course is required to be taken by all architectural engineering undergraduate students in the third year. A knowledge of statics and strength of materials is required and this course serves as prerequisite for steel and concrete design courses in the Architectural Engineering Program.

Architectural Engineering (A E)

A E 297B AIHI Sustainabile Housing Solutions (0-1) Affordable sustainable housing in the applied context of American Indian reservations. Includes a two-week summer experience in Montana. For students of 1st through 4th semester standing.

AIHI Sustainabile Housing Solutions (0-1)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2011 Ending: Summer 2011
Prerequisite: A E 297A

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering (A E)

A E 309 Architectural Acoustics (3) Acoustical design for good hearing conditions and noise control; construction details, materials, acoustical properties of room shapes; sound absorption, transmission. Course includes practicums.

A E 309 Architectural Acoustics (3)

Architectural acoustics encompasses four distinct areas of study: room acoustics, sound isolation, mechanical system noise and vibration and sound reinforcement. The course concentrates on the performance of the building components as they impact on the acoustical environment. The goal of good acoustical design is to provide an environment to afford occupants of a building a high quality listening environment and to minimize intrusion by offending noises. By manipulation of building materials, spatial relationships and geometry, the students learn to improve acoustical performance of a building.

Through lectures, practicums, projects, tours to campus performance venues and examinations, the concepts of acoustical design are delivered and reinforced. The course offers students opportunity to work in team settings and to present their work orally to their peers.

The course is required for all architectural engineering students, typically taken in the 3rd-year. Physics 213 is a prerequisite for this course. This course is a prerequisite for Advance Architectural Acoustics and Noise Control. Students not in the architectural engineering curriculum are encouraged to consult with the instructor prior to enrolling in the course.

General Education: None

Architectural Engineering (A E)

A E 310 Fundamentals of Heating, Ventilating, and Air Conditioning (3) Fundamental principles and engineering procedures for the design of heating, ventilating, and air-conditioning systems, including energy utilization and constraints.

A E 310 Fundamentals of Heating, Ventilating, and Air Conditioning (3)

A E 310 explores the fundamentals of the heating, ventilating and air-conditioning (HVAC) systems that control environmental conditions inside buildings. HVAC systems have common basic components, although they may significantly differ in physical appearance and arrangement. The course considers a variety of HVAC systems and presents methods of analyzing air-conditioning processes.

HVAC systems maintain not only an acceptable level of thermal comfort within conditioned spaces, but also a healthy environment. Hence, the conditions for a comfortable and healthy indoor environment, such as physiological considerations, environmental indices, and control of indoor air quality are defined.

The design of a successful HVAC system requires an accurate estimate of the peak rate at which energy must be added to (heating load) or removed from (cooling load) a space. Therefore, the various types of heat transmission in buildings and methods for estimating them are discussed in order to prepare students to estimate buildings energy consumption and size HVAC systems properly.

The target audience is Architectural Engineering students at a junior level who have taken A E 202 "Introduction to Environmental Systems in Buildings," and M E 023 "Introduction to Thermal Science."

A E 401 Design of Steel and Wood Structures for Buildings (3) Application of principles of engineering mechanics to layout, analysis, design, and detailing of structural elements in steel and wood of simple buildings.

A E 401 Design of Steel and Wood Structures for Buildings (3)

A E 401 is a first course in structural steel and wood design taken by all undergraduate Architectural Engineering students in the 6th or 7th semester. It applies the principles of engineering mechanics to layout, analysis, design, and detailing of structural steel elements. The course covers the principles of structural design, structural safety, structural stability, steel as a material, methods of structural steel design, design of tension members, design of columns, design of beams (flexure, shear, deflection, bearing, web crippling, web yielding), combined stresses (beam columns), fasteners/connections. It also treats wood design, including material characteristics, beam design, column design, and fasteners. After completion of the course students will be able to design simple wood and steel structures.

A E 402 Design of Concrete Structures for Buildings (3) Application of principles of engineering mechanics to layout, analysis, design, and detailing of structural elements in concrete of simple buildings.

A E 402 Design of Concrete Structures for Buildings (3)

This course is designed to provide all Architectural Engineering students with an ability to analyze and design reinforced concrete and an understanding of the theoretical behavior of reinforced concrete members. The primary focus is on the analysis and design of one-way systems comprised of slabs, beams, and columns. Evaluation methods include, but are not limited to, exams and homework assignments. A prerequisite knowledge of structural analysis is necessary. It is a required course in the Architectural Engineering curriculum. Additionally, this course provides the necessary prerequisite knowledge for several upper level concrete courses in both Civil and Architectural Engineering.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2005

Architectural Engineering (A E)

A E 403 Advanced Steel Design for Buildings (3) Continuation of A.E. 401. Advanced analysis, design, and detail of the structural elements in wood and steel.

A E 403 Advanced Steel Design for Buildings (3)
A E 403 is designed for 4th year Architectural Engineering students in the structural option, to build on the design and analysis base developed in the first course in steel design. This course is intended to develop competency in analysis and design of multi-story steel buildings subjected to gravity, wind and earthquake loadings, including study of connections, framing systems, composite design and plastic design of steel members.

The course prerequisites include determinate and indeterminate analysis and structural design of steel members. It will cover such topics as types of construction, the design process, loading and load cases, floor systems, floor vibration, moment rotation characteristics of connections, plastic analysis, multi-story frames, braced and unbraced frames, seismic design, leaning columns, drift, composite design and connections.

General Education: None
Diversity: None
Bachelor of Arts: None

Prerequisite: A E 401, A E 430

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering (A E)

A E 404 Building Structural Systems in Steel and Concrete (3) Basic analysis, design, and detailing of steel and concrete structural elements for buildings, emphasizing systems design and comparisons. A E 404 is not permitted for AE Structural Option students or for Architecture students.

A E 404 Building Structural Systems in Steel and Concrete (3)
The course is designed for architectural engineering students in the Construction, Mechanical Systems and Lighting/Electrical options to gain an ability to design simple building members in steel and concrete using current professional standards, specifications and guidelines. Students will learn to combine these members into simple structural systems and compare the performance and load carrying characteristics of these systems. The course will also address general performance parameters of these materials, construction issues and key systems-integration issues for beams, columns, flooring and roofing systems, and lateral bracing systems constructed in steel and concrete. This course is considered to be the terminal course for non-structural option AE students, and is designed to provide a general understanding of design, construction and integration issues that affect these structural systems. This course may be be taken by AE Structural Option students or Architecture students.

Architectural Engineering (A E)

A E 424 Environmental Control Systems I (3) Fundamental principles and applications of environmental systems in buildings. This course is intended for Architecture students.

A E 424 Environmental Control Systems I (3)

This course is a complement to A E 211. Environmental control systems other than the thermal environmental systems are covered in this course. A E 424 introduces architecture students to building illumination, acoustical, fire protection, electrical and plumbing design issues. Emphasis is placed on building design as a response to the technical, environmental and societal challenges.

The course utilizes lectures, practicums, examinations, projects, presentations and field trips to deliver and reinforce the technical content. The course offers students opportunity to work in team settings and to present their work orally to their peers. The broad coverage of the technical and social issues and professional skills intentionally involves students in discussion and application of social and ethical responsibilities. The course is required for students enrolled in the undergraduate architecture program. A E 211 is a prerequisite for this course. The course is not available to architectural engineering students.

Architectural Engineering (A E)

A E 431 Advanced Concrete Design for Buildings (3)

This is the last course in reinforced concrete design in the Architectural Engineering curriculum, and builds on previously learned skills in reinforced concrete design and analysis of statically determinate and statically indeterminate systems. Successful students will come away with sufficient understanding of the theoretical basis of concrete design to be able to learn any further aspect of concrete design on their own, and a set of specific critical skills needed by any structural designer involved with reinforced concrete structures. These skills include:

- Identification of the assumptions and weakness of the theory of reinforced concrete members.
- Detailed design of reinforced concrete beams and girders.
- Design of reinforced concrete slabs by the direct design method.
- Design of reinforced concrete slabs by the equivalent frame method.
- Analysis of reinforced concrete members subjected to torsion, to determine bending and torsional moments.
- Design of reinforced concrete members subjected to torsion.
- Design of reinforced concrete columns, slender and non-slender.
- Design of reinforced concrete columns in biaxial bending.

This course is taught by a combination of lectures, solution of example problems, and design projects.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2005

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering (A E)

A E 432 Design of Masonry Structures (3) Analysis and design of unreinforced and reinforced masonry: non-bearing walls, bearing walls, shear walls, masonry building systems.

A E 432 Design of Masonry Structures (3)

This course is intended to prepare students in Architectural Engineering and related disciplines such as Civil Engineering and Agricultural and Biological Engineering to design load-bearing and non load-bearing masonry structures. Although the emphasis will be on reinforced masonry, the design of unreinforced masonry will also be covered. The course will begin with a discussion of the materials used in masonry construction: clay units, concrete units, mortars, grout, and reinforcement. Since masonry is designed by allowable stress methods, a discussion of allowable stress design, as compared to load and resistance factor design, is necessary from the outset. The first design applications to be discussed will be non load-bearing walls, reinforced and unreinforced. This will be followed by a brief coverage of the topic of columns. The next topic will be load-bearing walls, reinforced and unreinforced. The discussions of load-bearing walls will describe two methods for their design: the use of a straight-line interaction formula and the construction of interaction diagrams. The analysis of systems of shear walls will be described in detail, followed by shear wall design. The design of particular building systems, both low-rise and mid-rise will either be covered by lectures, or by other exercises.

Architectural Engineering (A E)

A E 457 HVAC Control Systems (3) Theory of automatic control. HVAC control applications. Control system components, control loops, development and documentation of control logic, control commissioning.

A E 457 HVAC Control Systems (3)

The objective of the course is to develop the knowledge and skills necessary to understand, design, document, and diagnose problems in HVAC control systems. The course builds on knowledge of HVAC system function and design obtained in prior courses in the curriculum and prepares students for advanced design courses and the capstone project. The course begins with an introduction to concepts and terminology of automatic control, followed by detailed study of control system components: sensors, controlled devices, and controllers. Understanding of these fundamentals is then applied to the development and documentation of controls for common HVAC systems and the commissioning of control systems. Relevant standard and guideline documents are referenced as necessary.

General Education: None

A E 464 Advanced Architectural Illumination Systems & Design (3) Flux transfer theory; advanced lighting and control systems; emergency lighting; daylighting; visual performance issues; psychological aspects of lighting.

A E 464 Advanced Architectural Illumination Systems & Design (3)

This is the final undergraduate architectural lighting course in the Lighting/Electrical Systems Option. The course focuses on advanced topics related to lighting design such as luminous flux transfer and its application to lighting analysis procedures, advanced issues in photometry, advanced control systems, and advanced topics in lighting design. The light design topics include the psychological aspects of lighting, and design for complex spaces such as museums, stores, and video conferencing.

The course includes a weekly hands-on practicum experience, homework, exams and a design project.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2005
Prerequisite: A E 461

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering (A E)

A E 461 Architectural Illumination Systems & Design (3) Lighting units & photometry; lighting equipment; design criteria, calculation methods; the design process; energy codes.

A E 461 Architectural Illumination Systems & Design (3)
This course will prepare students to design basic lighting systems by providing them with background information and experience to do the following:

1. Develop their knowledge of lamp, luminaire, and control types and evaluate their applicability to a particular design situation.
2. Establish fundamental design criteria for a variety of lighting applications.
3. Conduct appropriate and accurate analyses of lighting systems to assess system performance and evaluate its ability to meet design criteria.
4. Implement a completed design by specifying all of the components of the system and providing an appropriate system layout.

This is the first full-semester lighting course that students receive in the Architectural Engineering Department's Lighting/Electrical Option.

General Education: None
Diversity: None
Bachelor of Arts: None

Architectural Engineering (A E)

A E 466 Computer Aided Lighting Design (3) Design and analysis for outdoor area; floodlighting; and interior applications, including design criteria; economic analysis; modeling algorithms; and visualization.

The goal of this course is to cultivate an understanding of good lighting design practice through a series of design and analysis problems. Course topics include design criteria, design practice, and the application of lighting hardware and analysis procedures for outdoor area lighting, economic analysis of lighting systems, interior lighting design and lighting system visualization.

Commercially available computer software is applied to approximately seven design projects, which students present in either PowerPoint or submit in a short report format. Students, faculty and outside professionals critique the project solutions. The critiques enhance the learning experience for all students through the evaluation of different lighting solutions applied to the same design problem.

Architectural Engineering (A E)

**A E 472 Building Construction Planning and Management (3)**

Construction organization and contracts; preconstruction services; estimating; scheduling; cash flow; site planning and preparation; building construction sequences; construction business presentations; value engineering.

**A E 472 Building Construction Planning and Management (3)**

The objective of A E 472 is to introduce students in the construction management option of the Architectural Engineering program to the process in which building construction contractors acquire building projects, and the range of services typically provided on these projects. Upon completion of this course, students will have a working understanding of the preconstruction process and methods of acquiring negotiated work in building construction. They will be capable of assembling estimates, schedules, cash-flow curves, and site plans for building projects, and will have a working knowledge of competitive presentation strategies and develop professional presentation skills.

The content of the course centers upon the process in which companies plan for and acquire projects as construction managers and general contractors. Specific topics include schematic estimating and scheduling, design coordination of structural, architectural, and mechanical systems, value engineering processes, and site planning. The financial aspects of construction work are also presented, including project financing, cash flow, and accounting. A significant portion of the course is also devoted to the development of strategic and competitive business presentation, including risk assessment, fee structure, team dynamics, and technical presentation skills.

The class relies heavily upon the application of all content by students in the context of a team project. The project involves the distribution of a “Request for Proposal” for which students prepare a competitive proposal for an actual building construction project planned on the Penn State University Campus. Class activities include the presentation of key issues followed by in-class or independent exercises to reinforce themes and strategies to be applied in the project proposal. Students are assessed on their performance on discussion quizzes on ANGEL, independent exercises, class participation, a team presentation, and exams.

For A E students, the prerequisite for the course is the successful completion of A E 372. For non-A E majors, students are admitted at the discretion of the instructor. A E 472 is a prerequisite course for A E 473.

Architectural Engineering (A E)

A E 473 Building Construction Management and Control (3) Building construction project planning; construction cost, schedule, quality and safety control systems; project cost accounting; change management; construction company management.

A E 473 Building Construction Management and Control (3)

The goals of this course are for students to learn how to perform detailed construction planning, identify potential problems during construction, and manage changes throughout a construction project. By completing this course, students will better understand the role of the general contractor/construction manager in analyzing the construction aspects of a building project and designing the construction engineering and management systems to effectively execute the project.

The main course objectives include learning how to perform and implement detailed planning for a construction project together with monitoring the project progress and performance including detailed cost control. Other course objectives emphasize gaining knowledge of the key decisions that construction executives make when managing a construction company and identifying potential projects to pursue. Students will also be introduced to the management of changes which occur throughout a project and how to negotiate changes. Finally, ethical standards for a professional engineer and their impact on decisions within the construction industry are important course learning objectives.

The course is taught via a combination of teaching methods that rely on problem based learning through both in and out of class activities; lectures by faculty and industry experts; project case studies; student presentations; and team and individual assignments. Completion of A E 472 is a prerequisite for this course.

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering (A E)

A E 476 Building Construction Engineering II (3) Construction of mechanical and electrical systems in major buildings; fire protection, sound control, elevating; trade coordination; manufacturers' developments; computer application.

Building Construction Engineering II (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1983
Prerequisite: A E 309, A E 475

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering (A E)

A E 482 Comprehensive Architectural Engineering Senior Project II (4) Continuation of A E 481W. Engineering analysis of building systems; emphasis on analysis and design of building structural, mechanical, lighting/electrical, and construction related systems. Final written report, web-based project portfolio and verbal presentation are required.

A E 482 Comprehensive Architectural Engineering Senior Project II (4)

A E 482 is the second half of the capstone engineering design project for Architectural Engineering students. The course is taken by all undergraduate architectural engineering and serves as a direct follow up to A E 481W. Students perform detailed option specific work in conjunction with individual proposals written in A E 481W. Students are also required to demonstrate work in the breadth areas of architectural engineering. Evaluation methods include but are not limited to written reports, verbal and written assignments, faculty consultations, maintaining their capstone project electronic portfolio, a final comprehensive written report and a verbal presentation to a faculty jury.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2005
Prerequisite: A E 481W

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering (A E)

A E 481W Comprehensive Architectural Engineering Senior Project I (4) Building project selection and preparation of overall plan; preliminary investigation of building design and construction issues; creation of individual Capstone Project Electronic Portfolio (CPEP) and project proposal required.

A E 481W Comprehensive Architectural Engineering Senior Project I (4)

The course sequence of A E 481W and A E 482 comprises the capstone engineering design program for Architectural Engineering students. A E 481W is taken by all undergraduate architectural engineering (A E) students and also serves as the writing intensive course requirement in A E. Based on an actual building project model, students will investigate the building, perform technical analysis, develop project criteria and prepare a written proposal for more detailed work to be accomplished in A E 482. Evaluation methods include but are not limited to written reports, verbal and written presentations, faculty consultations and development of a capstone project electronic portfolio (CPEP).

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2005
Prerequisite: ARCH 441 fifth-year architectural engineering standing in major area of emphasis

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering (A E)

A E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Independent Studies (1-18)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1983

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering (A E)

A E 486 Professional Engineering Practice (3) A study of the influences which affect the practice of architectural engineering, particularly codes, ethics, legal considerations, and contract documents.

Professional Engineering Practice (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1983
Prerequisite: seventh-semester standing

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering (A E)

A E 497F Daylight Analysis of Roman Architecture (3) Analysis of Roman architecture from the perspective of daylight. Topics include: solar geometry; bldg orientation & form; daylight design methods; characterization of interior & exterior lighting conditions. Offered on location in Rome.

Daylight Analysis of Roman Architecture (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2011 Ending: Summer 2011

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering (A E)

A E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Special Topics (1-9)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1983

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering (A E)

A E 497D Daylight Analysis of Roman Architecture (3) Developing models of the time dependent loads on building system on the basis of fundamental conservation of energy and heat transfer relationships; energy utilization modeling skills that allow alternative building system designs to be explored.

Daylight Analysis of Roman Architecture (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2011 Ending: Summer 2011

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.

Special Topics (1-9)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1992

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering (A E)

**A E 498B** AIHI Sustainable Housing Solutions (0-1) Affordable sustainable housing in the applied context of American Indian reservations. Includes a two-week summer experience in Montana. For students of 5th semester standing or higher.

**AIHI Sustainable Housing Solutions (0-1)**

General Education: None  
Diversity: None  
Bachelor of Arts: None  
Effective: Summer 2011 Ending: Summer 2011  
Prerequisite: A E 498A

**Note**: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering (A E)

A E 498D Photovoltaic Systems Design and Construction (3) Design and construction requirements of residential and commercial scale photovoltaic systems.

Photovoltaic Systems Design and Construction (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2011 Ending: Summer 2011

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering Technology (AE T)

AE T 102 Methods of Construction (3) Materials and methods of construction used in buildings, as expressed in drawings.

Methods of Construction (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1992
Prerequisite: AE T 101, EG T 101, EG T 102

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
 Architectural Engineering Technology (AE T)

AE T 101 Building Materials (3) Structural and architectural use of building materials and construction assemblies.

Building Materials (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1992

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering Technology (AE T)

AE T 103 Plumbing and Fire Protection (3) Layout of plumbing and fire protection in buildings to meet code and usage requirements.

Plumbing and Fire Protection (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1992
Prerequisite: or concurrent: AE T 102

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering Technology (AE T)

AE T 113 Site Planning (2) Energy conservation through optimum site utilization, contours, cut and fill calculations, storm drainage, spot grading, and finish grading.

Site Planning (2)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1992

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering Technology (AE T)

AE T 121 Introduction to Building Environmental Systems (2) Introduction to building environmental systems technology terminology, concepts, and the design process.

Introduction to Building Environmental Systems (2)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 1994

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering Technology (AE T)

AE T 204 Heating, Ventilating, and Air Conditioning Layout (3) Fundamental calculations and layout of systems in buildings.

Heating, Ventilating, and Air Conditioning Layout (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1992
Prerequisite: AE T 103 . Prerequisite or concurrent: AE T 102

Architectural Engineering Technology (AE T)

AE T 206 Architectural Presentation (2) Visual communication through architectural presentation drawings. Line, value, color, and composition.

Architectural Presentation (2)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1992
Prerequisite: E G 001 or E G 003

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering Technology (AE T)

AE T 207 Advanced Construction Methods (3) Integration of materials and systems in working drawings.

Advanced Construction Methods (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1992
Prerequisite: fourth-semester standing

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering Technology (AE T)

AE T 210W Architectural Engineering Office Practice Using Writing Skills (3) Concepts, procedures, and writing-intensive activities to properly prepare site observation reports, cost estimates, contractual conditions, and outline and technical specification.

Architectural Engineering Office Practice Using Writing Skills (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 1994
Prerequisite: fourth-semester standing

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering Technology (AE T)

AE T 214 Steel Construction (3) Strength of materials as applied to the design of simple steel structures.

Steel Construction (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1992
Prerequisite: AE T 102, MCH T 111

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering Technology (AE T)

AE T 212 Building Lighting and Electrical Layout (3) Layout of lighting and electrical distribution in buildings.

Building Lighting and Electrical Layout (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1992

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering Technology (AE T)

AE T 228 Air Heating, Cooling, and Ventilating Systems (3) Air systems and distribution components; fans and ductwork; heat exchange coils; dampers and controls; residential fired equipment operation.

Air Heating, Cooling, and Ventilating Systems (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 1994

Concurrent: AE T 227

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering Technology (AE T)

AE T 227 Liquid Heating and Cooling Systems (3) Water, steam, and refrigerant systems and components; pumps and piping; heat exchangers; fluid and component selection; power and controls.

Liquid Heating and Cooling Systems (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007
Prerequisite: AE T 121, MET 281

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering Technology (AE T)

Concrete Construction (3)

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 1992
Prerequisite: AE T 102, MCH T 111

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architectural Engineering Technology (AE T)

AE T 296 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 2001

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architecture (ARCH)

ARCH 100 (GA) Architecture and Ideas (3) General introduction to world architecture, emphasizing the relationship between concepts, philosophies, values and ideologies in shaping the built environment.

ARCH 100 Architecture and Ideas (3) (GA)

(BA) This course meets the Bachelor of Arts degree requirements.

This course introduces architecture and urbanism for a general audience. It presents key concepts that have shaped the built environment, and provides an ongoing framework for evaluations of what makes a good building or city. The material discussed is taken from prehistory to the present, and encompasses both major works of architecture and consideration of common building types and contexts. Although monuments and philosophies from the Western tradition predominate, it brings in issues and examples of global scope as well.

The course is structured around a set of themes. These include: how architecture embodies spiritual beliefs; affects private and community life; evolving definitions of the architect; and how ideas about aesthetics, technology, tradition, and other cultural forces shape buildings and influence diverse, often conflicting notions of what constitutes "good" architecture.

The topics discussed will demonstrate multiple ways of understanding buildings and cities. Lectures and assigned readings explore significant illustrative structures, design theories, and the cultural and intellectual contexts in which they emerge. Through the lectures and readings students will become familiar with an extensive set of architectural works, as well as a wide range of influential architectural concepts, authors, and texts. ARCH 100 will ultimately help students analyze and judge buildings and the arguments about them critically, and better understand buildings and cities as ideologically charged artifacts that influentially structure human experience.

General Education: GA

Bachelor of Arts: None
Effective: Summer 2011

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architecture (ARCH)

ARCH 121 Visual Communications I (2) Development of two and three-dimensional graphic communications skills and techniques required for the practice of architecture.

ARCH 121 Visual Communications I (2)

The course is designed to introduce two and three-dimensional graphic communication skills. Assignments will develop the student's understanding and skills associated with the hand-drawing techniques used in the practice of architecture. Exercises provide exposure to the variety of representational techniques available to architects for the visual communication of design ideas and design documentation.

Visual Communications I is organized as an interactive studio environment which combines lectures and demonstrations with individual instruction. The basic concepts and theories of documenting, representing, and presenting architecture will be introduced through a series of lectures, seminars, and examples. In studio, skills will be developed through project workshops. Instruction includes working sessions, individual desk reviews, technique demonstrations and group discussions.

Students will learn the fundamentals of architectural drawing by hand, introductory-level descriptive geometry, orthographic projection, paraline and perspective drawings. These skills and principles are imparted primarily through studio-based assigned projects.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Fall 2008

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architecture (ARCH)

ARCH 101 Introduction to Architecture Studio (3) Basic concepts/methods of architectural design; introduction/exploration of techniques of architectural communication/representation; structural, functional, and aesthetic dimensions of architecture are examined.

Architecture (ARCH)

ARCH 131S Basic Design Studio I (4) An introduction to the basic concepts, methods, and skills of architectural design in a project-based, active learning, studio environment.

ARCH 131S Basic Design Studio I (4)

This course is an introduction to the basic concepts, methods, and skills of architectural design. As a "studio," it is a project-based, active learning course where the development and evaluation of the work is driven by a critical dialogue with the instructor and one's classmates.

This course is the first in a series of design studios that serve as the central thread throughout the curricula of the Architecture program. In ARCH 131S, students gain knowledge about the discipline of design, develop skills of design and communication, and foster a capacity for judgment - the ability to make appropriate choices and decisions regarding design questions. As a laboratory, the design studio provides the opportunity to apply and explore the knowledge and experience gained in other courses.

ARCH 131S is an intensive course that encourages creativity and industry on the part of the students. Its design projects are open-ended; there are no single "right answers." It demands energy, creativity, the willingness to take risks, and introspection. Each student is expected to be open to a diverse range of ideas, values and solutions. The student is invited to view the studio experience as an opportunity to explore, discover, and invent.

The studio is divided into separate sections, each led by one studio instructor. All sections are assigned a series of common projects and exercises; however, each section instructor will establish particular and unique assignments, and criteria for each project. This introduces students to the rich variety of possibilities in architectural communication and design.

The primary form of evaluation and grading for this class is the "review and critique" during which students present their work to the class and then receive comments and recommendations for improvement.

When assessing the student work, the instructors will consider the students' performance in the following areas:
1. Conceptual Strength: The intentions and ideas that inspire the work.
2. Design Development: The energy, effort, and growth demonstrated throughout the course of the project.
3. Product: The tangible quality of the final product as a demonstration of the student's level of craftsmanship and mastery of the skills introduced in class.
4. Student Preparedness: At desk critiques, pin-ups, and reviews.
5. Student Participation: Students are expected to actively participate and be constructively engaged in class discussions, critiques, and reviews.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2008

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architecture (ARCH)

ARCH 132 Basic Design Studio II (4) Continuation of ARCH 131S which further explores basic concepts, methods, and skills of architectural design with an emphasis on craftsmanship.

ARCH 132 Basic Design Studio II (4)
This course is a continuation of ARCH 131S and shares the same goals, methods, and means of evaluation. However, it builds upon the foundation of fundamental knowledge and skills delivered in the previous course and demands that the students expand their ability to tackle more difficult and complex problems of architectural design. The focus of this course is on "craftsmanship" and the methods and techniques of "making and building." Students are expected to thoroughly consider the implications of materials, construction, and detailing as they relate to their overall design intentions.

ARCH 132 is an intensive course that encourages creativity and industry on the part of the students. Its design projects are open-ended; there are no single "right answers." It demands energy, creativity, the willingness to take risks, and introspection. Each student is expected to be open to a diverse range of ideas, values and solutions. The student is invited to view the studio experience as an opportunity to explore, discover, and invent.

Architecture (ARCH)

ARCH 203 Materials and Building Construction I (3) Instruction in the design and construction of buildings utilizing wood and steel.

ARCH 203 Materials and Building Construction I (3)

This course serves as an introduction to common architectural building materials and associated methods of construction. It is the first part of a two-semester sequence to be followed by ARCH 204 in the spring semester. Lectures, readings, and in-class discussions introduce students to the historical development and conventional use of architectural materials and construction technologies, while select hands-on projects offer students experience in materials application and use. The class covers a wide variety of building methodologies that includes developed and developing cultures, building systems that are technologically sophisticated, as well as traditions considered primitive/vernacular.

The primary objective of the course is to make BARCH students familiar with the materials and methods employed in making architecture, so that the results of that familiarity begin to inform the student’s studio work/production.

In addition to materials and construction methods, the course will also touch on issues related to craft/craftsmanship, sustainable practices and ethical use of resources, and the significant role that evolving technologies play in the process and economy of building-making.

ARCH 204 Materials and Building Construction II (3) This course will continue the presentations of ARCH 203, with a focus on concrete and masonry materials.

ARCH 204 Materials and Building Construction II (3)

The course is the second part of a two-semester sequence, following Arch 203. Architecture 204 is an introductory course in building materials and construction. It is intended for BARCH majors and is designed to prepare students for the professional practice of architecture. The learning objectives for the course can be divided into two categories: 1., developing a sense of materials and construction methods as the media for architecture, and then learning to use these media in creative and appropriate ways; 2. developing basic knowledge of the conventions of current building materials and construction techniques. Particular emphasis is placed on the use of drawings and models to accurately depict construction systems, assemblies and details. The course combines lectures and field trips with design projects, hands-on construction experiences, required readings, drawing and modeling.

Architecture (ARCH)

ARCH 210 (GA) Introduction to Architecture and Planning Theories (3) The course introduces architectural and urban theory by presenting and exploring key concepts through major texts from the Western tradition.

ARCH 210 Introduction to Architecture and Planning Theories (3)
(BA) This course meets the Bachelor of Arts degree requirements.

The course introduces architectural and urban theory by presenting and exploring key concepts through major texts from the Western tradition. ARCH 210 covers a period ranging from ancient Greece and Rome to the present, with greatest emphasis on writings from the nineteenth and twentieth centuries. Recurring themes will include the ways in which architectural theory has defined the architect and the relationships between architectural and urban ideas, aesthetics, and the cultural contexts in which these ideas develop. Major topics will include ancient architectural theory, the role of the "architect" throughout history, architecture aesthetic principles, Judeo-Christian architectural theory, Renaissance classicism, the Baroque city, Neoclassicism and typology, the Beaux-Arts, tectonics and Gothic rationalism, organicism and functionalism, Le Corbusier's new architecture, the International Style, semiotics, and the neo-avant-garde.

Learning Objectives:
Students will acquire a basic familiarity with important ideas, authors, and texts that have shaped Western traditions in architecture and urbanism. These will introduce some of the ways in which theoretical writings have framed architecture's complex and changing relationship to human needs. Students are taught to approach these materials critically and will be required to conduct individual research on and analysis of one major theoretical work.

* Through the course students learn to utilize critical theories of the built environment. Students are taught to transform their personal observations into an analytical tool for criticizing and interpreting buildings.
* Students understand the key developments in architecture and urban theory and criticism from early Classicism to Post-Modernism.
* Students are introduced to architecture as a manifestation of ideology and cultural values.
* The students are introduced to ideas and encouraged to use key terms to discuss architecture and urbanism.
* Students are encouraged to recognize the importance of architecture and architecture writing as a tool for aesthetic interpretation.
* Theoretical concepts in architecture frequently are compared to similar ideas in other art disciplines, including design and the visual arts.

Architecture (ARCH)

ARCH 231 Architectural Design I (6) Design of limited environments within defined constraints.

ARCH 231 Architectural Design I (6)

The second-year design curriculum introduces the student to the complexity of the architectural whole. The curriculum bridges the abstract design principles taught in the first year and the ability to put together a large building, the focus in the third-year. The objectives are to create an understanding of architectural elements and develop a sensitivity and awareness required for valid interpretations as well as to develop a reflective and critical design process with emphasis on the individual ability to articulate ideas. The major means of accomplishing development is through the design of smaller buildings/environments. To introduce the pragmatic and expressive aspects of architectural design and integrate visual communication with the design process. The emphasis is on developing comprehensive architectural thought, on the foundations of skill and knowledge essential for designing more "complex" buildings in later years, and making the students aware of the multiplicity of factors involved in the design process and their civic responsibility in making informed choices. Thus, the pervasive issue of meaning in architecture is given a high priority and is interwoven in all stages of design exploration.

ARCH 311W Architectural and Planning Theories (3) Architectural theory course with a strong focus on the reading and writing of essays about architecture and related fields.

ARCH 311W Architectural and Planning Theories (3)

ARCH 311w is a required course in the BARCH curriculum. The central goal of this course is to foster critical-thinking skills, in conjunction with the ability to develop and articulate theoretical positions related to the design, practice, and historical evolution of architecture, both verbally and in writing. ARCH 311w is a writing intensive seminar course fulfilling the University’s Writing Across the Curriculum (WAC) requirement. Students will be introduced to various topics pertaining to advanced architectural theory. Students will critically read, then discuss significant works with the instructor. Lectures by the instructor will also be presented, discussed and analyzed. Writing assignments are utilized as instruments for learning the subject matter, methods of inquiry, and the types of writing typical of the discipline of architecture. The course format will also involve lectures by the instructor as well as presentations by the students related to past, present, and speculative architectural theories of importance to the field. In addition, students will complete writing assignments that demonstrate the development of a critical stance or idea, proficiency in critical analysis, and the use of established research techniques, citation of sources, and writing formats.

General Education: None

Architecture (ARCH)

ARCH 317 Theory of Modern Japanese Architecture (3) Introduction to the development of modern Japanese architecture from the Meiji Restoration of 1868 to the present day.

ARCH 317 Theory of Modern Japanese Architecture (3)

ARCH 317 outlines a lineage of ideology in Japanese architectural discourse in order to examine reciprocal interactions between Japan and the West in the development of modern Japanese architecture from the Meiji Period (1868-1912), through the Metabolism of the 60's, to the present day. The concept of "tradition" itself is an invention of the Meiji (modern) era. Through this notion, the course will introduce students to crucial moments in the development of Japanese architecture, while making parallel references to the key developments in the West. Inversely, examples of traditional Japanese architecture will be introduced as counterpoint for the modern. Several topics such as the evolution of Japanese symbolic and spatial traditions in art, architecture, and landscape architecture (gardens) will be discussed. While discussing the evolution of Japanese culture, aesthetics and religions, the influences of China and Korea will be introduced, thus increasing students' familiarity to the East. A brief examination of Western architects paralleling the course content will also be presented. The key figures to be discussed during the class include Kenzo Tange, Kisho Kurokawa, Arata Izozaki, Fumihiko Maki, Tadao Ando, Shin Takamatsu, Toyo Ito, Kazuyo Sejima and Shigeru Ban. Key Western architects, including Bruno Taut, Walter Gropius, Frank Lloyd Wright, and Le Corbusier, will also be discussed. In addition, several broad themes such as geography, climate culture, and symbolic and spatial traditions in art will be introduced. Eastern values and ethics very incongruent from those of the West and their impact on architecture will be presented and discussed. Specific globalization, the resultant reciprocal and transformative cross-cultural interactions in the development of modern Japanese architecture, and the unique process of "Japanization", in which ideas from the West are adapted, refined, and absorbed into Japanese architecture through specific buildings and architects.

Students in this course will be expected to become more familiar with Eastern culture; comprehend basic principles behind Japanese architecture and gardens; understand relevant terminology associated with Japanese culture, art, gardens, and architecture; and become more aware of the reciprocal and transformative cross-cultural interactions in architecture.

ARCH 312 Critical Postcolonial and Contemporary Perspectives in South Asian Architecture (3) This course will examine critical postcolonial and contemporary architectural issues in South Asia in the context of cultural globalization today.

This course will examine the evolution of the cultures and architectures of South Asia through their encounters with colonialism and the postcolonial analysis of architectural development in the region. It will provide an introduction to precolonial architecture and urbanism in South Asia using methodologies of cultural studies via an examination of Buddhist, Hindu, Islamic (Mughal), and Western influences. The course will introduce students to the significant variety of South Asia's architectural accomplishments and encourage them to discuss broader theoretical issues in the context of cultural globalization and their implications for contemporary architectural thought and practice. References to indigenous architecture and techniques will be an integral part of the course, as will be examples of colonial architecture, especially the works of Edwin Lutyens. In the context of globalization during the post-colonial period, three important planning and building design projects undertaken by Western architects in South Asia will become the means to segue into contemporary architectural issues and the impact of Modernist thinking on South Asian architecture: Le Corbusier's master plan and building designs for Chandigarh - the Kahn's design for the monumental second capital complex in Dhaka, Bangladesh, and the master plan for Islamabad, the capital of Pakistan, by Constantinos Doxiades. In addition, the works of such South Asian architects such as Charles Correa, Balkrishna Doshi, Raj Rewal, Geoggrey Bawa, Maxharul Islam, and Nyyar Dada, will be included in the lectures and discussions. The overall methodology will not be strictly chronological; rather, broad themes will be addressed during the course of the semester. This approach will enable a clear and substantive illustration of relationships between theory and practice in South Asia. It will also help students recognize the inevitable partiality and incompleteness of such theoretical descriptions - compelling as they may be - with regard to actual historical phenomena.

ARCH 417 The Language of Boundaries in Architecture and the Landscape (3)

This course examines the development and significance of boundaries in the construction of human space and time. Students who have taken other courses from Architecture Visual Arts, Geography, or Philosophy that treat some aspect of spatial perception, conception, construction, or visualiation, or who have completed equivalent study independently, may enroll with the permission of the program.

This course is composed of eight chronologically arranged units of study that examine the major developments in the human use of boundaries in the creation of architecture and landscapes — those actually constructed as well as those created through literature, myth, art, and film.

Human boundary behavior is complex. While we tend to describe space and time as ‘transitive’ (rational), our actual experience of them is intransitive. Because descriptive systems tend to disregard the role of time, they favor a constructed descriptive objectivity over subjective accuracy. Conflicts between representations and experiences reflect psychological and cultural conflicts expressed as symptoms and dysfunctions.

Both the lectures and supplemental films are directed at helping students understand, reflect upon, and critically think about the trans-cultural and ubiquitous quality of boundary behavior.

The thrust of the course is historical and critical rather than professional, and the intent of the course is to provide students with a comprehensive overview of the issues that surround the human use of boundaries. Because boundary issues are the result of humans’ mental apprehension of the world, psychology, philosophy, critical studies, literature, and other humanities are intrinsically involved. But, because boundaries are a part of a way of conceiving the world mathematically, ideas from topology, number theory, and circuit logic are also key.

Each unit of study will be accompanied by exemplary films that illustrate some aspect of boundary behavior. The course includes approximately 12 important films for required study.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Summer 2009
Prerequisite: Students should have taken at least one of the following courses: ARCH 210, ARCH 130A, ARCH 131S, LARCH 060, LARCH 065, GEOG 020 or INART 003 or permission of program

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
ARCH 431A (IL) Architectural Design V--Foreign Study (6) A studio offered in Rome, Italy, which emphasizes urban planning and architectural design in an urban context.

ARCH 431A Architectural Design V--Foreign Study (6) (IL)

This studio course focuses attention on the urban design components of architectural design. Using the city of Rome and its unique position in the history of human development, the design projects are selected for their actuality in the current situation of Rome, Italy. The building sites are actual or expected project sites based on the current planning directives of the city planning offices. Students are asked to produce designs that respond to multifaceted programs that will usually include institutional, residential, and commercial activity in the same building/site.

The project will usually last the full semester with all phases of design included. Beginning with site planning and site design issues, the project runs through design concept and design development phases. The last two weeks are often focused on elevation studies and material details. A complete presentation of site, building, and details design is expected at the final presentation.

Studio course meetings with the instructors are scheduled three times per week. Approximately every three weeks, there are formal presentations often to invited guest critics. A mid-term presentation is made at the design development conclusion phase. The final presentation is organized with guest critics at the end of the term.

Learning Objectives:
To achieve a complete urban architecture project design and presentation.
To understand the implications for architectural design of the city of Rome and its unique history.
To apply an interpretation of history to contemporary design problems.
To apply contemporary needs and requirements for architecture to a traditional city site.
To learn how to adapt design to a non-American culture and tradition of building.

ARCH 431A is the required foreign study architecture design studio taught in Rome, Italy. This course is available to Architecture majors only.

General Education: None
Diversity: IL
Bachelor of Arts: None
Effective: Summer 2008 Ending: Summer 2011
Prerequisite: ARCH 332

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Architecture (ARCH)

ARCH 431 Architectural Design V (6) Continuation of ARCH 331 and 332, with design and research in program option areas.

ARCH 431 Architectural Design V (6)
The fourth-year architecture studio emphasizes the development of skills in research, documentation, analysis and presentation of project-related physical and cultural information. The studio will investigate the implications of a rigorous predesign process in the design of architecture. The studio curriculum seeks to investigate the role of the architect in urban design, especially the design relationship between individual buildings, groups of buildings, exterior spaces, streets and streetscapes. Students will explore the synthesis of individual landmark buildings, building groups, urban landscape and service systems.

The studio explores the difference between the roles and responsibilities of public and private clients. In particular the implications of establishing levels of control within the built environments, such as design guidelines, circulation systems and utility networks.

Emphasis will be placed on the development of the following design skills:
- Cooperation and collaboration in research and design.
- Understanding the implications of existing patterns on subsequent design.
- Understanding attitudes toward contexts: cultural, physical, economic, personal, political, organizational (bureaucratic).
- Integration of scale: Development of logics (orders) for the use of the site and continuity of logic across scales of building.
- Developing culturally meaningful relationships between the ordering of land-use and space throughout related buildings.
- Design of exterior space using architectural relationships between multiple buildings.
- Investigation of the implications of design controls on the single building.

Architecture (ARCH)

ARCH 432 Architectural Design VI (6) A continuation of ARCH 431, this course explores in greater depth urban planning and architectural design in an urban context.

ARCH 432 Architectural Design VI (6)

ARCH 432 is a continuation of ARCH 431 with a focus on architecture in urban environments and urban/community planning issues of greater complexity. The class will collaborate in the research and documentation of the existing conditions of an urban site and the forces that influence it. This will include the study of precedents. The class will prepare a pre-design presentation, individual architecture projects, base models, and a book of the semester's work.

Based on the pre-design information, small student groups will develop a master plan for a large program. This exercise will include the preparation of the plan, supported by concept diagrams and models, land use diagrams, open space diagrams, landscape plans, pedestrian and vehicular circulation/parking/servicing diagrams, written and graphic site and building design guidelines, and a utilities diagram.

The architectural component of the master plan will be selected for development as the studio architectural design project. Each student will prepare an architectural project based on the general logic and concepts of the group plan.

Major topics addressed in the course include working collaboratively in teams, understanding fundamental ordering principles of cities and towns, understanding urban contexts, urban plans, land-use controls, and economic plans, the design of urban spaces, and the design of a single building or complex of buildings in an urban environment.

Architecture (ARCH)

ARCH 442 Architectural Design Analysis (3) Continuation of ARCH 441, with emphasis on functional relationship of space, form, structure, and building groups. Architectural Engineering majors only.

ARCH 442 Architectural Design Analysis (3)
Continuation of ARCH 441, with emphasis on functional relationship of space, form, structure, and building groups.

The objective of this course is to explore various approaches to architectural design and to reinforce the concept that there is no "right" or "wrong" answer to a design problem. "Design" is decision-making in itself -- the key to a successful project lies not only in the final product, but in the process leading up to it as well. In order to be successful, design solutions must respond to both formal ideas as well as human, environmental and technical realities. Thus, the interaction between art and technology becomes imperative.

ARCH 480 Technical Systems Integration (3) Presentations of buildings' analyses from a multiplicity of viewpoints: architectural, spatial, environmental, mechanical, construction assembly.

ARCH 480 Technical Systems Integration (3)

This course is a synthesis of topics previously introduced in the AE sequence—such as structural, mechanical, electrical, and other systems related to a building's technical performance. Students will practice the purposeful integration of all technical aspects of a building's design, providing them with a working knowledge of matters related to energy efficiency, sustainability, lighting, and acoustics.

The focus of the course lies in questioning how technical requirements and design intentions should be integrated during the design process, so as to enhance the aesthetic and performance qualities of an architectural project. This course combines lectures, field trips, and technical assignments, along with analysis and implementation of energy, daylighting, electrical lighting, and acoustical concepts in the student's design efforts.

In addition to the synthesis of building design and technical systems, this course will further develop the student's knowledge of active/passive techniques for sustainable architecture. A focus on the collaborative workings/environment of the architectural practice helps students to translate systems integration strategies into graphic/digital representation, and reinforces the interdisciplinary nature of designing and constructing successful works of architecture.

Architecture (ARCH)

ARCH 499B (IL) Architectural Analysis (3) Comparative study of architectural elements and building types through on-site drawing, recording, measurement, sketching and decomposition activity.

ARCH 499B Architectural Analysis (3) (IL)

Architecture is amplified and embodied in cities. Since most architecture is set in cities and the city is itself an architecture, it becomes necessary for us to evaluate the relationships that affect the making of buildings for cities and the organization of buildings into a meaningful whole. This course will explore the two meanings of the term "the architecture of cities." It will propose questions leading to an analytical de-composition of the situation of cities in general and Rome in particular.

The course is loosely divided into three sections. The first, Historical Overview, presents the evolution of early settlements focusing on the significance of built form. The second, Revolutions and Modernity, demonstrates the qualitative shift in emphasis that settlements undergo from the Enlightenment, through the Industrial Revolution, to the Information Revolution. The third section, the Current Debate, will present some contemporary issues and techniques proposed for the resolution of apparent problems of city architecture.

Since this course is given in a unique setting, it takes full advantage of Rome, its history and its problems, to highlight the universal design elements that are part of an analytical understanding, but also of a synthetic design understanding of cities.

This course is theory based and, as such, will provoke thinking, a taking apart mentally, more than a making of architecture. The studio design problem, also set in this city, is the operative dimension of thoughts generated here. In this class, students are expected to articulate thought and some clear graphic analysis concerning architecture. These thoughts, if manipulated with discipline and commitment, will become a source of illumination for design activity.

Learning Objectives:
* To learn the meaning of cities in Western culture
* To understand the significance of foundation and other rites concerning building the human environment.
* To understand the reasons for the form of streets, buildings and open spaces in Western cities.
* To achieve the analytical skills necessary to take apart the component systems and material elements of architecture.

Architecture (ARCH)

ARCH 499A (IL) Foreign Study--Architectural Design VI (6) Individual or group instruction conducted in a foreign country.

ARCH 499A Foreign Study - Architectural Design VI (6)

The semester abroad design work will focus on the difficult problem of creating new construction in the presence of an historic structure. This is an inevitable problem in the city of Rome where one can hardly avoid confronting historic or monumental buildings. However, as every place is preceded by a history, either natural, political or material, these issues are important outside of this context, the course aims to help students define critical strategies that will serve them beyond their semester abroad.

Fifteen weeks is a short time to experience a place as complex and interesting as Rome, Italy. For many students, it may be a chance of a lifetime to live in and study a place as challenging and full of opportunity as this. Students are expected to approach the semester with even more seriousness than they would a semester at home. A semester in this program is not a mere travel experience but an academic exploration of a foreign and historic environment. Every activity of this studio is designed to these ends. Therefore, we have selected a very direct and limited building program, a site in the historic center, and exercises that require students to spend time in the field as well as in the studio.

Architecture (ARCH)

ARCH 499C (IL) Urban Studies Topics (3) A presentation of the history of Rome through the medium of its maps and walking tours of the city.

ARCH 499C Urban Special Topics (3) (IL)

The course is a presentation of the history of Rome through the medium of its maps. The well documented cartographic history of the city is presented along with the morphological changes that are evident in the city today. The material of Rome's physical development is presented in two distinct ways. The first involves slide presentations of Roman maps and engraving images organized by specific routes (vie consolari and others) into and out of the city. The second is by on-site walks through the same routes with the instructor.

The approximately twelve routes involve a lecture presentation usually given on Tuesdays, followed by an on-site walk usually given on Thursday. Students are then assigned their own route map of the same study area to generate over the weekend. These are graded and discussed in the following sessions.

Framework:
* Introduction: The definition of the Urbs through maps
* 14th-15th century: Limbourg, Taddeo di Bartolo
* 16th century: Bufalini, Duperac
* Renaissance planning and the expanding city
* 17th century: Maggi, Falda
* 18th century: Nolli
* 19th century: Catasto Piano
* 20th century: Lanciani, Sanjust

Themes:
* 14th-15th century: Derivation of the iconic map from Mappaemundi and city images in art
* 16th century: Images of pre-Sistine in-city and extension planning vs. Sixtus V's city outside the city
* 17th century: Illustrating the Baroque point developments: Urban theater
* 18th century: The new orientation and precision measurement of the Age of Reason. Nolli and Piranesi: the contemporary vs. the archaeological city
* 19th century: Stasis and expansion: Nolli retreads and the master Plans for the new Capital city
* 20th century: Recapitulation and expansion: Lanciani's new Forma Urbis and images of the boundless city

Learning Objectives:
* To learn the history of the development of one of the most important cities in the world.
* To learn the importance of mapping and way-finding in the understanding of architecture.
* To learn the reading of traces of the past morphological development of a city.
* To understand how cities are built, change, and grow over time.

Art (ART)

ART 002 (GA) Interactive Learning and Web-Design (3) Introduce students to research on-line, preparing verbal, visual and other elements for presentation of outcomes and posting them to the Internet.

ART 002 Interactive Learning and Web-Design (3) (GA)

(BA) This course meets the Bachelor of Arts degree requirements.

This course is constructed to introduce students to doing research on-line, preparing the verbal, visual and other elements for a presentation of their research and posting them to the Internet with special emphasis placed on the aesthetics of Web design and effective communication.

Both individual and group projects are included. It is intended to provide the skills to work collaboratively using computers and the Internet effectively, efficiently and with an awareness of the aesthetic qualities of that work. This final emphasis is particularly important since the quality of presentation is not included in most classes where Web sites are developed and they are crucial to the effective use of this medium. Aesthetic judgments by the students of their peers work is central to making comprehensive and complete evaluations of it. A central message of the course is that content and presentation cannot be separated and a primary skill to be learned is how to discover, create and refine images for use on the Web in conjunction with clear, well-organized and legible text.

The student’s work will be evaluated on the basis of how well they grasped the problem, worked with others to solve it, when required, and the effectiveness of the final result.

Art (ART)

ART 001 (GA) Introduction to the Visual Arts (3) Introduction to the media, elements, function, making, and meaning of visual arts today and in diverse historical and cultural contexts.

ART 001 Introduction to the Visual Arts (3)

(BA) This course meets the Bachelor of Arts degree requirements.

ART 001 is an introduction to the visual arts and is designed to meet the General Education Arts requirement. The course is offered every semester at University Park, for example, with an enrollment of 330. There are no prerequisites, and students are assumed to have little or no background in studying or making art. As a result of taking the course, students are able to look more closely and find ways to say what they see in the visual arts. They become familiar with a broad range of subject matter, style and medium, with the principles of design that organize works of art, and with changing historical and cultural contexts in which the arts have been made and understood. They also experience the challenge of making art themselves, and develop a more informed critical point of view. Because of the large number of students that may enroll, ART 001 is primarily a lecture course with a text. But students actively participate in individual and collaborative activities during class, including, for example, drawing a hand, pairing to exchange observations on a work of art, and arriving at consensus in groups of five in response to the question “What is art?” and then reporting back to the whole class. With fewer students, the number of art projects and the opportunity for extended discussion and studio critiques increases. Evaluation is based on tests, assignments and inclass activities. Tests measure students' ability to identify keys works and the style and subject matter of unknown related works, to apply their knowledge of media and visual vocabulary by labeling their sketches based on images shown during the test, and to answer multiple choice questions on the principles of design, media, meanings, and historical and cultural contexts in the production and experience of the visual arts. Every class meeting includes question and answer sessions. To encourage collaborative learning, at University Park, the multiple choice portion of the test is given twice during the test period, to allow students the second time to work together with open books to answer the questions. The assignments range from sketching and writing about works during a museum visit, to surveying architecture and sculpture in the community, to making a collage. There will also be opportunities to earn extra credit, for example by making a collage judged to be among the best by a jury of their peers, by attending and writing brief responses to public lectures and exhibitions, and for identifying useful resource links for the course website. Students rely on the course website and email for all information and announcements, including resources specifically prepared to supplement the text, such as summaries of class discussion of what to ask when looking at a work of art, lists of key terms and concepts, sample quizzes, and links related to lecture topics.

Art (ART)

ART 003 (GA) Visual Images on the Web (3) Introduce students to using visual images for communication on the World Wide Web.

ART 003 Visual Images on the Web (3) (GA)

(BA) This course meets the Bachelor of Arts degree requirements.

This course is constructed to introduce students to doing art work on-line, preparing visual, verbal and other media for presentation on the Internet with special emphasis placed on the aesthetics of image making and good Web design. Working both individually and in groups is included. Each student is assigned to a working group, which makes collaboration and communication possible.

All the projects emphasis art making of different kinds - still and animated, bit-map and vector - as well as different formats - HTML, Flash format and Portable Document format. The grasping of the different kinds of images each makes available, aesthetic qualities of each and they can be used in communication at the center of the course.

The student's work will be evaluated on the basis of how well they grasped the problem, worked with others, when required, to solve it and the effectiveness of the final result.

The students may do the work for the course on their personal computers or in the University labs on any of the available platforms - Windows, Mac or UNIX.

The course will be offered in the spring and the fall and have an enrollment of 200 students.

Art (ART)

ART 010 (GA) Introduction to Visual Studies (3) Introduction to visual studies; pictorial space and the principles of visual organization.

ART 010 Introduction to Visual Studies (3)

(GA)

This course meets the Bachelor of Arts degree requirements.

ART 010 is intended as a general survey course for non-majors consisting of images, ideas, and processes used in art making. As a studio offering, emphasis is placed on hands-on activities, which promote literacy and sensitivity to both two-dimensional and three-dimensional conventions in the visual arts. Students will experience the contextual influences of art, the visual languages and organizational systems of art, and the various studio processes of art. As well, slide presentations, studio visits and museum critiques will augment studio exercises to facilitate a greater awareness of the cultural context in which the visual arts function. As a general appreciation offering, emphasis is placed on active learning processes that involve students in basic studio materials and techniques. Students enrolled in this course will be required to participate in the following active learning components:

1. Studio Assignments:
   a) Contextual influences of history and contemporary culture
   b) Visual languages and organizational systems related to the visual arts
   c) Studio processes with materials and techniques

2. Creating a social and historical context for sculpture making through slide presentations, studio visits and museum critiques:
   a) Slide presentations: students will be asked to consider the concepts of their creative projects in relationship to works by historical and contemporary artists in order to understand the ways in which visual arts convey meaning.
   b) Studio visits: Students will visit the personal studios of local artists to learn how professional artists develop best practices as related to the three kinds of studio-based assignments outlined above. Additionally, they will explore and discuss with these artists the concepts and meanings expressed in their creative works.
   c) Museum critiques: Museum visits will enable students to learn how to engage and respond to actual works of art as compared with those that they experience as slide and printed representations. The role of museums and galleries in contemporary art practice will also be discussed.

Grading and evaluation:
Students’ art projects will be evaluated according to the following criteria: 1) the uniqueness of the visual concepts developed in their studio assignments; 2) the strength of their visual compositions—their ability to communicate concepts clearly; 3) the quality of their craftsmanship—an effective use of materials and procedures and commitment to the studio assignments—the effort expended on each project; 4) Their willingness to participate in critique sessions—a thoughtful and informed interpretation of visual ideas in art works produced by them in class as well as those discussed during slide presentations, studio visits, and museum critiques. Since the School of Visual Arts now requires a portfolio review for Visual Arts majors to enroll in studio courses, ART 010 provides an opportunity for non-art majors to do studio work in conjunction with an exploration of art concepts.

General Education: GA
Diversity: None
Bachelor of Arts: Arts
Effective: Fall 2004

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Art (ART)

ART 030 (GA) Introduction to Sculpture (3) Introduction to sculpture for non-art majors consisting of lectures/basic studio work coordinated to cover broad range of processes.

ART 030 Introduction to Sculpture (3) (GA)

This course meets the Bachelor of Arts degree requirements.

ART 030 is intended as a general survey of the art of sculpture for non-majors. As a studio offering, emphasis is placed on hands-on studio activities, which promote visual literacy and sensitivity to the various sculptural conventions. Students are given the opportunity to briefly explore many of the traditional materials of sculpture including those that are used in modeling and replication, subtractive processes, and fabrication. As well, slide presentations, studio visits and museum critiques will augment studio exercises to facilitate a greater awareness of the cultural context in which the art of sculpture functions. Students enrolled in this course will be required to participate in the following active learning components:

1. Studio Assignments:
   a) Modeling and Replication
   b) Subtractive Processes
   c) Fabrication Assignment

2. Creating a social and historical context for sculpture making through slide presentations, studio visits and museum critiques:
   a) Slide presentations: students will be asked to consider the concepts of their creative projects in relationship to the sculptural works of historical and contemporary artists in order to understand the ways in which the three dimensional aspects of sculpture convey meaning.
   b) Studio visits: Students will visit the personal studios of local artists to learn how professional artists develop best practices as related to the three basic approaches to rendering sculptural form outlined above. Additionally, they will explore and discuss with these artists the concepts expressed in their sculptural works.
   c) Museum critiques: Museum visits will enable students to learn how to engage and respond to actual works of art as compared with those that they experience as slide and printed representations. The role of museums and galleries in contemporary art practice will also be discussed.

Grading and evaluation:
Students’ sculptural projects will be evaluated according to the following criteria: 1) the uniqueness of the visual concepts developed in their studio assignments; 2) the strength of their visual compositions-their ability to communicate concepts clearly; 3) the quality of their craftsmanship—an effective use of materials and procedures and commitment to the studio assignments-the effort expended on each project; 4) Their willingness to participate in critique sessions—a thoughtful and informed interpretation of visual ideas in sculptural works produced by them in class as well as those discussed during slide presentations, studio visits, and museum critiques.

Art (ART)

ART 017 (GA) Introduction to Metal Arts (3) Introduction for non-art majors to fundamental jewelry making and small-scale metalsmithing processes including fabrication, surface treatment, and finishing of metalwork.

ART 017 Introduction to Metal Arts (3)
(GA)

(BA) This course meets the Bachelor of Arts degree requirements.

ART 017 is intended as a general survey of metal arts for non-majors. As a studio offering, emphasis is placed on hands-on studio activities, which promote visual literacy and a sensitivity to the various metal arts conventions. Students are given the opportunity to briefly explore many of the traditional materials and processes of metalsmithing including those that are used in cold joining, surface texture, and fabrication. As well, slide presentations, studio visits and museum critiques will augment studio exercises to facilitate a greater awareness of the cultural context in which the metal arts function. As a general appreciation offering, emphasis is placed on active learning processes that involve students in basic studio materials and techniques. Since the School of Visual Arts now requires a portfolio review for visual arts majors to enroll in studio courses, ART 017 provides an opportunity for non-art majors to do studio work in conjunction with an exploration of art concepts.

General Education: GA

**Art (ART)**

**ART 040 (GA)** Introduction to Printmaking (3) Instruction and practice in elementary printmaking and papermaking processes.

**ART 040 Introduction to Printmaking (3)**

*(BA)* This course meets the Bachelor of Arts degree requirements.

ART 040 is intended as a general survey of the art of printmaking for non-majors. As a studio offering, emphasis is placed on hands-on studio activities, which promote visual literacy and sensitivity to the various printmaking conventions. Students are given the opportunity to briefly explore the various approaches to printmaking, which may utilize some or all of the following: screenprinting, relief, intaglio, lithography, and others. As well, slide presentations, studio visits and museum critiques will augment studio exercises to facilitate a greater awareness of the cultural context in which the art of printmaking functions.

Students enrolled in this course will be required to participate in the following active learning components:

1. **Studio Printmaking Assignments:**
   a) Screenprinting
   b) Relief
   c) Intaglio
   d) Lithography
   e) Others (collagraph, monotype, electrostatic, artists books)

2. **Creating a social and historical context for printmaking through slide presentations, studio visits and museum critiques:**
   a) Slide presentations: students will be asked to consider the concepts of their creative projects in relationship to prints of historical and contemporary artists in order to understand the ways in which the two-dimensional aspects and various processes of printmaking convey meaning.
   b) Studio visits: Students will visit the personal studios of local printmakers to learn how professional artists develop best practices as related to the basic approaches to printmaking outlined above. Additionally, they will explore and discuss with these artists the concepts expressed in their printed images.
   c) Museum critiques: Museum visits will enable students to learn how to engage and respond to actual prints as compared with those that they experience as slide and book/journal reproductions. The role of museums and galleries in exhibiting prints will also be discussed

**Grading and evaluation:**
Students' printmaking projects will be evaluated according to the following criteria: 1) the uniqueness of the visual concepts developed in their studio assignments; 2) the strength of their visual compositions-their ability to communicate concepts clearly; 3) the quality of their craftsmanship-an effective use of materials and procedures and commitment to the studio assignments-the effort expended on each project; 4) Their willingness to participate in critique sessions-a thoughtful and informed interpretation of visual ideas in prints produced by them in class as well as those discussed during slide presentations, studio visits, and museum critiques.

Art (ART)

ART 050 (GA) Introduction to Painting (3) Introductory experience in making of art through painting media; designed for non-majors seeking a general overview of studio practice.

ART 050 Introduction to Painting (3) (GA)

This course meets the Bachelor of Arts degree requirements.

ART 050 is intended as a general survey of the art of painting for non-majors. As a studio offering, emphasis is placed on hands-on studio activities, which promote visual literacy and sensitivity to the various conventions used in the discipline of painting. Students are given the opportunity to briefly explore the various approaches to creating visual images by applying various painting materials, techniques, and concepts. As well, slide presentations, studio visits and museum critiques will augment studio exercises to facilitate a greater awareness of the cultural context in which the art of painting functions.

Students enrolled in this course will be required to participate in the following active learning components:

1. Studio Painting Assignments:
   a) Visual concept development: students will be introduced to the various ways that artists create meanings through painting.
   b) Materials development: through a process of exploration and experimentation, students will learn how to apply various painterly media and tools in creating visual images.
   c) Technique development: through a process of exploration, experimentation, and skill development students will learn how to render and model painterly images that range between abstract and realistic representations.

2. Creating a social and historical context for painting through slide presentations, studio visits and museum critiques:
   a) Slide presentations: students will be asked to consider the concepts of their creative projects in relationship to paintings by historical and contemporary artists in order to understand the ways in which the two-dimensional aspects and various processes of painting convey meaning.
   b) Studio visits: Students will visit the personal studios of local painters to learn how professional artists develop best practices as related to the basic approaches to painting outlined above. Additionally, they will explore and discuss with these artists the concepts expressed in their painted images.
   c) Museum critiques: Museum visits will enable students to learn how to engage and respond to actual paintings as compared with those that they experience as slide and book/journal reproductions. The role of museums and galleries in exhibiting paintings will also be discussed.

Grading and evaluation:
Students’ painting projects will be evaluated according to the following criteria: 1) the uniqueness of the visual concepts developed in their studio assignments; 2) the strength of their visual compositions-their ability to communicate concepts clearly; 3) the quality of their craftsmanship-an effective use of materials and procedures and commitment to the studio assignments-the effort expended on each project; 4) Their willingness to participate in critique sessions-a thoughtful and informed interpretation of visual ideas in paintings produced by them in class as well as those discussed during slide presentations, studio visits, and museum critiques.

Art (ART)

ART 100 (GA) Concepts and Creation in the Visual Arts (3) A study of the personal and cultural foundations of artistic creation and practice of creative production in the art studio.

ART 100 Concepts and Creation in the Visual Arts (3)
(GA)

(BA) This course meets the Bachelor of Arts degree requirements.

ART 100 is intended as an introduction to the concepts underpinning artistic creation. Through lectures and studio work, students will explore relationships between artistic processes and in daily life. The objective of the course is to develop in the student both an appreciation and understanding of contemporary art through an examination of art and contemporary social, cultural, and political issues surrounding artistic practice. Students will respond to the ideas presented in the lectures by completing a series of artworks intended to reflect the issues and concepts that have been presented. The intended, though not exclusive, audience for the course is non-art majors. While the focus of the course is a critical examination of both the artworks studied and the artworks created by the students, the critique will be derived from the various backgrounds and academic experiences of the students and not necessarily from their knowledge of art. In this manner, the course can become a relevant complement to all of their studies. In short, the goal of the course is to understand art as a means to critically engage and begin to understand our surroundings and not simply as an end product. Evaluation of student achievement will be done in both the classroom and studio portions of the course. Since it is not expected that students have a background in art, content knowledge assessment will primarily be based on the students' active participation in class discussions as well as objective tests in the form of written responses to the issues and concepts examined. In the studio, their work will be judged on how well students have responded to the concepts and issues explored as well as on their ability to articulate their own ideas in relation to those of other students and other aesthetic and cultural ideas to which they have been exposed. In the studio, this process will primarily be done in the form of individual conversation and group critique. Since the School of Visual Arts now requires a portfolio review for visual arts majors to enroll in studio courses, ART 050 provides an opportunity for non-art majors to do studio work in conjunction with an exploration of art concepts.

**ART 101** (GA) Introduction to Web Design (3) A beginning level course in Web Design, with emphasis on designing with standards to assure accessibility and effective communication.

**ART 101 Introduction to Web Design (3)**

(GA)

This course meets the Bachelor of Arts degree requirements.

ART 101 is a beginning level web design course that is concerned with the designing and creating of web sites using XHTML and recommended government standards. This emphasis is central so that the work the students do will reach the broadest audience, including people with disabilities, through the use of a broad range of software and hardware.

This course will teach students how to meet the present government standards for accessibility by the disabled and the technical and accessibility standards recommended by the World Wide Web Consortium (W3C).

This course will also place an emphasis on the uses of art-images to present information along with the presentation of text and typography for communication and how these elements can make projects on the web more effective.

The course will introduce topics such as: clarity of art and design, ease of use (navigability), and in creating art and graphics for web delivery (optimization).

There will also be discussion on the dynamics of networked communications, along with issues pertaining to the authoring and publishing of content and media on the internet.

Art (ART)

ART 203 The Art of Web Design (3) This course will focus on utilizing graphic formats ideal for web-based work and designing with web standards.

ART 203 ART 203 The Art of Web Design (3)

(BA) This course meets the Bachelor of Arts degree requirements.

ART 203 is a 200-level course for the New Media area of concentration in the School of Visual Arts, and will focus on working with different graphic formats, both bitmap and vector based, which work on the web and on designing with web standards to assure accessibility and effective communication of information in a variety of forms.

This course will teach how to meet the present government standards for accessibility by the disabled and the technical and accessibility standards recommended by the World Wide Web Consortium (W3C). The web as a global communication medium will be discussed, with special consideration given to the presentation of sites using languages other than English.

The course will also emphasize the various uses of images to present information in different ways, in a variety of formats - gif, jpg, png, swf and svg - to learn which is the most effective for the particular information being presented. The use of text and typography for communication and how these can make artwork on the web more effective will also be examined.

Clarity and flexibility of art and design, ease of use and creating web-optimized files that download quickly will be other subjects of concern.

There will also be examples and discussion of artists and designers currently using the web, how communication on the web can work well, how it can work badly and how it can be abused.

**ART 211 (US)** Introduction to Digital Art and Design Criticism (3) An introduction to the language, aesthetics and cultural impacts of digital art and design in contemporary society.

**ART 211 Introduction to Digital Art and Design Criticism (3)**  
**(US)**  
**(BA)** This course meets the Bachelor of Arts degree requirements.

ART 211 examines 1) the conventions, language, practices, and aesthetics used by digital artists and designers and 2) the social and cultural implications that they and their works have for society with regard for the contexts of politics, philosophy, economics, race, gender, and technological development. Critical and creative thinking and expression are given primary emphasis in class activities and assignments. The course meets twice weekly and topics are explored through lectures, discussions, readings, presentations by visiting speakers, and out-of-class trips. Course assignments are writing and project based and require students to respond to ideas and concepts presented in class and to develop critiques of digital works through a variety of formats. Assignments include informal in-class projects, media reviews, a course journal, and a final project. Students build writing skills through analyzing assigned readings and developing research- and reflection-based projects about digital art and design. Speaking and listening skills are developed through discussions and collaborative activities.

Course topics explore the:
- social contexts of digital art/design;
- significance of the computer interface to digital art and design;
- practices used by digital artists and designers and their impact on audiences; and
- professional issues, concerns, and controversies affecting digital art/design, artists/designers, and their audiences

Students are required to have access to the Internet and to their University e-mail account.

ART 211 will enroll 25 students and will be offered spring semester.

ART 217 Metal Art/Technology I (3) Introduction to current and emerging metal art technologies and processes as medium for conceptual, aesthetic, and functional artworks.

ART 217 Metal Art/Technology I (3)

This course will introduce the student to current and emerging metal art technologies and processes as media for conceptual, aesthetic, and functional artworks. Through an introduction to a wide range of metal art technologies, the student will be able to create new artworks not otherwise possible. These artworks will use the presented technologies to address concepts, aesthetics, and functions directly relevant to the visual arts. Assigned projects will involve a wide variety of skills, techniques and processes including application of design principles, refined generation of components, hot and cold joining, surface texture, CNC (Computer Numerically Controlled) machining, and kinetic systems. The resultant artworks will utilize the presented material as means for design and creation not otherwise possible through other processes. This project-based learning will be reinforced through slide lectures, demonstrations, readings, reflective writings, and critiques. This labor-intensive studio relies upon cumulative learning experience through increasingly demanding projects. Competency is expected in numerous new skills and techniques, and creative use and application of these technologies is essential to the success of completed artworks.

ART 250 Beginning Oil Painting (3)

The materials and techniques of painting in oil and their uses in creative painting on panels and canvas.

ART 250 Beginning Oil Painting (3)

This course is designed to teach beginning students the basic fundamentals of painting and introduce them to the visual arts as a vehicle for personal expression. It is divided into technical categories for organizational purposes. The unique process of each discipline structures the course and allows for individual expression from a diversity of students with different skills and interests. The basic skills are introduced and studied through the creative process, from conception of an idea, preliminary sketches, variations, and final painting. Emphasis is placed on understanding the goals for each student and focusing on his or her shortcomings and strengths. While a basic mastery of mimetic painting is aimed at, a diverse range of aesthetic styles is presented. Thus the purpose of this course is to increase the appreciation of the visual arts through studio processes and the development of meaningful critical facility. We hope to educate students who will understand the fundamentals of painting and who will become part of an educated audience for the arts. Hopefully, they will be more imaginative and creative people. The studio emphasis on individual growth allows for flexibility in course structure to accommodate the general education objectives as well as for future painting majors. Creative and visual thinking are innately part of all students and these basic studio courses encourage and nurture them.

Art (ART)

ART 265 Artistic Concepts of Color (3) A studio course that utilizes lecture and various media to investigate color as artistic expression.

ART 265 Artistic Concepts of Color (3)
ART 265 Artistic Concepts of Color is a hands-on studio course supplemented by lecture. It utilizes various media experiences to investigate notions of color in artistic expression. Explorations will include traditional ways of investigating and creating color as well as contemporary approaches. Both 2-D and 3-D studio investigations will be employed. A lecture component will provide a historical and cultural backdrop upon which students may better understand the role of special depiction in artistic expression.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007
Prerequisite: ART 165, ART 166

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Art (ART)

ART 266 Artistic Concepts of Light (3) A studio course that utilizes lecture and varied media experiences to investigate light as artistic expression.

ART 266 Artistic Concepts of Light (3)
ART 266 Artistic Concepts of Light provides students with necessary concepts about light. Both 2-D and 3-D studio investigations will be employed. A lecture component will provide a historical and cultural backdrop upon which students may better understand the role of special depiction in artistic expression.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007
Prerequisite: ART 165, ART 166

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Art (ART)

ART 270 Beginning Graphic Design (3) A beginning graphic design studio/lecture course intended to introduce students to the practice of graphic design.

Beginning Graphic Design (3)

General Education: None
Diversity: None
Bachelor of Arts: Arts
Effective: Spring 2001
Prerequisite: ART 110S, ART 111, ART 120

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Art (ART)

**ART 269 Methods and Materials I (3 per semester/maximum of 9)** A studio course that focuses on specific media or techniques reflecting varied faculty expertise.

**ART 269 Methods and Materials I (3)**

This course provides students with the opportunity to experience particular areas of visual art in which faculty members have gained significant expertise. Topics will vary as faculty members rotate responsibility for offering the course. The course may be about a specific method, material or theme in which a faculty member is involved. The course is introductory in nature, and students may gain a basic understanding of a specific art form. Students are given the opportunity to explore several types of Art made by scheduling this course more than one semester. One of the goals of the course is to provide students with ways of visually communicating concepts and themes/issues.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2007
Prerequisite: ART 165, ART 166

**Note**: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Art (ART)

ART 280 Beginning Ceramics (3) The fundamentals of ceramics, throwing, hand-building, and glazing; acquainting the student with ceramic materials, techniques, and philosophy.

ART 280 Beginning Ceramics (3)
This course is intended to further investigate the art of ceramics for art majors. As a studio offering, emphasis is placed on hands-on studio activities, which promote visual literacy and sensitivity to the various conventions used in ceramics. Students will be given the opportunity to explore many of the traditional materials of ceramics, including functional and nonfunctional applications, stoneware, and high fire glazes. As well, slide presentations, studio visits and museum critiques will augment studio exercises to facilitate a greater awareness of the cultural context in which the field of ceramics functions. This labor-intensive studio relies upon cumulative learning experiences through increasingly demanding projects. Competency is expected in numerous new skills and techniques, and their application in creating visually compelling concepts is essential to the success of completed artworks.

General Education: None
Diversity: None
Bachelor of Arts: Arts
Effective: Spring 2009
Prerequisite: ART 110S, ART 111 and enrollment in the School of Visual Arts or successful completion of an admissions portfolio review

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Art (ART)

**ART 296** Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

**Independent Studies (1-18)**

Bachelor of Arts: Arts
Effective: Fall 1983

**Note:** Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Art (ART)

ART 290 Beginning Photography (3) Fundamental techniques and approaches to the art of photography utilizing digital photographic technologies; digital camera required.

ART 290 Beginning Photography (3) (BA) This course meets the Bachelor of Arts degree requirements.

ART 290 is the first course for students who desire to pursue a concentration in photography. It will focus on the process of making photographs and the development of a critical understanding of photographic images and their evaluation.

In ART, 290 students will develop the habit of taking photographs on a regular basis. Each week, students will be expected to turn in 24 pictures on one of five assignments for review and critique by both instructors and members of the class. Each assignment will be covered over a three-week period.

The topics of the five assignments will vary, but each will focus on important aspects of photography. They may include: portraits, self-portraits, nature photographs, travel photographs, documentary series, experimental images, action assignments, etc. The final assignment will be a self-defined topic that allows the student to explore and work in an area of personal interest. Each topic will be selected to acquaint the student with important aesthetic principals in photography and at the same time advance their technical skill in the process of making photographic images.

As part of the five assignments in ART 290, students will also gain background on the history of photography and the critical evaluation of photographs. For each assignment there will be an accompanying gallery of work by other photographers (professionals, amateurs, and students) on the assigned topic area. Each photograph in the gallery will be accompanied by an "artist's statement" - a written critical statement where the photographer describes his or her work and methods.

Students will be required to complete each of the five assigned topics by submitting a final "gallery" of four photographs with a written "artist's statement" that speaks to the intent, process, and result of their work. Final submissions will help students develop skills in not only making photographs but critically evaluating their own work and articulating their personal means, methods, and objectives as photographers.

Grading will be based on (1) the completion of weekly submissions, (2) the quality of photographs in final submissions for each assignment, (3) attendance, and (4) participation in critiques.

A digital camera is required.

ART 290 will be offered fall and spring semesters.

Faculty member(s) proposing course: Ken Graves, Gerald Lang, and Keith Shapiro

ART 314 Computer 3-D: Modeling, Rendering, and Animation (4 per semester/maximum of 12) A studio course introducing 3-d computer generated artwork and content creation using modeling, rendering, and animation applications on the computer.

This is a studio course introducing 3-D computer generated artwork and content creation using modeling, rendering, and animation applications on the computer. This course will provide students with an in-depth understanding of 3-D techniques and production strategies for the visual and new media artist through technical exercises and creative exploration of the medium. The course will seek to introduce students to a wide range of digitally generated 3-D based creative work and concentrate on producing and integrating 3-D modeled, rendered, and/or animated work into new media and studio art practice.

This course will explore the nature and potential of digitally generated 3-D artworks through lectures, readings, demonstrations, studio practice, and critiques. Assignments will cover a range of applications used in 3-D studio production.

This course will culminate in the creation of a series of original 3-D generated artworks.

ART 315 New Media Art: New Media Studio (4) A studio course concentrating on digital art and new media authoring practices.

ART 315 New Media Art: New Media Studio (4)
(BA) This course meets the Bachelor of Arts degree requirements.

This is a studio art class that focuses on creating, authoring, exhibiting, and critically evaluating interactive multimedia artworks. The course explores experimental uses of new media in the visual arts with emphasis on integrating digital media with current studio practices in two-, three-, and four-dimensional art. In addition to the actual creation of new media artworks, the course will engage students in research methods to advance their skills in new media and help them to develop an understanding of the critical evaluation and assessment of new media artworks.

This course will explore the nature and potential of digital art through lectures, readings, demonstrations, studio practice, and critiques. Assignments will cover a range of digital multimedia applications in sound, image, motion, interactivity, interface design, and media authoring.

The course will culminate in a final multimedia authored project for presentation on the Web, CD-ROM, DVD, or tape.

Art (ART)

ART 317 Metal Art/Technology II (4 per semester/maximum of 8) Further exploration of current and emerging metal art technologies and processes as medium for conceptual, aesthetic, and functional artworks.

ART 317 Metal Art/Technology II (4 per semester/maximum of 8)
This course will further explore metal art technologies at an intermediate level. Students will apply their knowledge and experience with the source material that they learned in ART 217 to explore further the current and emerging metal art technologies through their physical investigation, integration, and fabrication. Through further exploration of a wide range of metal art technologies, the student will be able to create new artworks not otherwise possible. These artworks will use the presented technologies to address concepts, aesthetics, and functions directly relevant to the visual arts. Assigned projects will involve a wide variety of skills, techniques and processes at an intermediate level that will build upon the application of design principles, fabrication skills, use of current and emerging technologies, and kinetic systems. This project-based learning will be reinforced through lectures, demonstrations, readings, reflective writings, and critiques. This labor-intensive studio relies upon cumulative learning through advanced projects. Competency expected in numerous new skills and techniques, and creative innovation in the use and application of these technologies is essential to the success of completed artworks. Projects and assignments will be based upon the further integration of concepts and ideas.

ART (ART)

ART 316 Video Art and Time-Based Media (4 per semester/maximum of 8) A studio course concentrating on video art, new media, and experimental time based work.

ART 316 Video Art and Time-Based Media (4 per semester/maximum of 8)
(BA) This course meets the Bachelor of Arts degree requirements.

ART 316 is a studio art class that focuses on creating, authoring, exhibiting, and critically evaluating video and time-based arts. This new media course explores experimental uses of video by visual artists with an emphasis on integrating digital video into current studio practice (i.e., new media digital arts, mixed media, installation, and performance). The course will engage students in research methods to advance their skills in time-based media and to help them develop an understanding of the critical evaluation and assessment of video and time-based artworks.

This course will explore the nature and potential of digital video art making through lectures, readings, demonstrations, studio practice, and critiques. Assignments will cover a range of digital video authoring applications central to video and time-based arts production.

The course will culminate in a video art screening/exhibition of student work.

**ART 319 Physical Computing (4 per semester/maximum of 8)** A studio course concentrating on interactive physical systems using software/sensors that can sense and respond to the analog world.

**ART 319 Physical Computing (4 per semester/maximum of 8)**

This is a course that looks at alternative techniques for engaging an audience with computer-based art, aside from the familiar monitor-mouse dialog. The course introduces students to haptic systems, interactive environments, dynamic control systems, procedural video/audio and the creation of work that is exploratory and experimental. Through readings, discussions, design of individual and collaborative projects, students are expected to develop an articulate, theoretical basis for conceptualizing and discussing works presented in class as well as their own creative projects. Assignments will cover both a technical introduction to basic electronics, analog circuit design, and microcontrollers as well as design concepts and philosophies for building interactive art objects.

**ART 365 Themes and Issues I (3)** An advanced studio course that emphasizes individual approach to theme oriented problem solving through traditional and non-traditional multi-media explorations.

**ART 365 Themes and Issues I (3)**

ART 365 contains a common course theme wherein students will be asked to build a series of three completed works in diverse materials and techniques. Students will work to build clear concepts that are communicated through objects and images. Beginning with a thorough investigation of how artists of all fields (music, architecture, design, writing, theatre etc.) have interpreted the theme students will be guided through research, brainstorming, and concept development activities. During this they will be asked to keep a journal which documents their process through written descriptions and comments but also image based resources, sketches, diagrams, and in progress photographs. Students will be urged to complete pieces that are conceptually linked so as to begin working in series. At the completion of each piece, students and faculty will conduct group critiques.

Art (ART)

ART 380 Intermediate Throwing (4 per semester, maximum of 12) Intermediate ceramics course with focus on using wheel and throwing skills leading to personal expression in form, glazing, and firing.

ART 380 Intermediate Throwing (4 per semester/maximum of 12)
The purpose of this course is to explore the use of the wheel. Various types of forms will be addressed such as bowls, covered jars, and vases. Technical skills will be learned with the goal to use them to create a personal means of expression via the wheel. Both traditional and nontraditional vessels will be created. Forming, trimming and glazing techniques will be covered. There will be both group and individual critiques along with slide presentations and demonstrations. This labor-intensive studio relies upon cumulative learning experiences through increasingly demanding projects. Competency is expected in numerous new skills and techniques, and their application in creating visually compelling concepts is essential to the success of completed artworks.

General Education: None
Diversity: None
Bachelor of Arts: Arts
Effective: Fall 2006
Prerequisite: ART 280, ART H 111, ART H 112 and enrollment in the ART BA ART BFA Art Education or Integrative Arts degree program

Art (ART)

ART 366 Themes and Issues II (3) An advanced studio course that emphasizes individual approach to theme oriented problem solving through traditional and non-traditional multi-media explorations.

ART 366 Themes and Issues II (3)

ART 366 contains a common course theme wherein students will be asked to build a series of three completed works in diverse materials and techniques. Students will work to build clear concepts that are communicated through objects and images. Beginning with a thorough investigation of how artists of all fields (music, architecture, design, writing, theatre etc.) have interpreted the theme students will be guided through research, brainstorming, and concept development activities. During this they will be asked to keep a journal which documents their process through written descriptions and comments but also image based resources, sketches, diagrams, and in progress photographs. Students will be urged to complete pieces that are conceptually linked so as to begin working in series. At the completion of each piece students and faculty will conduct group critiques and each student will mount a small-scale individual exhibition at one of the many available areas for exhibition on campus.

Art (ART)

ART 381 Intermediate Handbuilding (4 per semester, maximum of 12) An intermediate ceramics course with a focus on handbuilding techniques, leading to personal expression in forming, glazing, and firing.

ART 381 Intermediate Handbuilding (4 per semester/maximum of 12)

The purpose of this course is to explore different means of expression with the techniques of handbuilding. Clay is unlike any other material in that it can be transformed into virtually anything. Some of the forming methods which be addressed are coil, slab, carving, modeling and slump/press molds. The course will have assignments that are technically challenging, but will call on creative and artistic abilities. Slide presentations and group and individual critiques will be part of the curriculum. This labor-intensive studio relies upon cumulative learning experiences through increasingly demanding projects. Competency is expected in numerous new skills and techniques, and their application in creating visually compelling concepts is essential to the success of completed artworks.

Art (ART)

ART 390 Introduction to Photochemical Photography (4) Introduction to the fundamentals of black and white photochemical photography.

ART 390 Introduction to Photochemical Photography (4)

(BA) This course meets the Bachelor of Arts degree requirements.

ART 390 will explore the art and science of 35mm black and white photography. It will introduce students to chemically based photography as a process and continue to advance their skill and background as photographers.

In the course, students will learn about film cameras and their operation, basic film types, film developing and processing, and basic photochemical printing practices. Students will also develop skills through experience in making, developing, printing, and presenting photographs created through photochemical processes. Each student will be required to turn in 20 contact sheets (36 exposures each) during the semester on required weekly assignments and develop a final project containing 25 mounted 8 x 10 black and white prints.

40% of the semester grade will be based on the final project, 40% on weekly assignments, and 20% on quizzes.

A 35mm film camera with adjustable shutter speeds and aperture settings and a light meter (hand-held or built into the camera) is required. In addition, materials (film, photo paper, developing tanks, photo thermometer, etc.) will cost around $300 to $350.

ART 390 will be offered fall and spring semesters.

ART (ART)

ART 402 Portfolio Design and Professional Practices (3) This course emphasizes the development of presentation skills for digital artists in audience/client interactions.

ART 402 Portfolio Design and Professional Practices (3)

ART 402 PORTFOLIO DESIGN AND PROFESSIONAL PRACTICES (3) is the concluding experience for all students enrolled in the Digital Arts Certificate (DAC) program. The course provides opportunities for students to learn about the practical application of professional practices and portfolio development tools specific to careers that require knowledge of digital art and design principles and culminates in the development of a professional-quality creative portfolio. The course prepares the DAC student with the skills, knowledge, and ability to 1) communicate a critical understanding of his/her work through the articulation of goals, critique, and self-assessment; 2) identify, assess, and evaluate tools and information necessary to maintaining current and effective techniques for written and visual self-presentation; and 3) prepare and present online a professional-quality creative portfolio of digital art/design works and appropriate supporting documentation.

The course is taught fully online and comprises coursework supported by online presentations and guest talks, assigned readings, and other resources and reference materials relevant to the professional development of digital artists and designers. Course topics include: 1) the role of the portfolio, 2) selecting portfolio ingredients and how to adapt them for different audiences, 3) selecting/composing supporting documentation for the creative portfolio, 4) developing a professional-level online presentation of the digital portfolio, 5) locating and evaluating resources for the digital arts/design professional and 6) identifying professional practices relevant for individuals working in digital art and design. Students engage in both individual and team-based projects and interactions via activities such as asynchronous group discussions and guest talks delivered by streaming media.

Assessment is based on the quality of the student’s work and participation in individual and team-based projects and activities that include online discussions, peer-reviews, collaborative research, and the development of an online presentation for the creative portfolio. Students receive regular individual and group feedback throughout the course in the form of instructor and peer reviews and critiques. Formal assessment occurs at regular intervals in a manner that evaluates both individual and group components of assigned tasks and activities. Students are expected to positively contribute to the course through active engagement in online discussions, team-based work and activities, and peer reviews. Course assignments include creative and written components and provide multiple ways for students to engage in various forms of professional development, self-evaluation, and critique.

Students are required to have access to the Internet.

ART 409 (ART H 409) Museum Studies (3) An introduction to the professional activities that occur in art museums.

ART (ART H) 409 Museum Studies (3)

(BA) This course meets the Bachelor of Arts degree requirements.

This course introduces students to the broad field of art museum work, specifically museum administration, education, curatorial work, registration, and exhibition design. Readings by authors in each field provide current theoretical and philosophical frameworks for all areas, which are then followed by discussions and practical experiences with professional museum practitioners, including the staff of a museum, for example, the Palmer Museum of Art, and invited guests. Museum Studies is open to students who have complete six credits in art, art education, or art history. This course is especially beneficial for majors in art, art education, and art history who are considering a career in an art museum or who want to become more aware about how an art museum functions. In addition to providing an in-depth introduction to art museum work, the course encourages students to build the critical thinking and response skills that are crucial to success in the real-world environment of a museum. The readings provide a solid foundation for later reference or further study in the student’s chosen field. Offered every spring, this course will have a maximum enrollment of 20 students. Grades are based on class participation, four out-of-class projects, and a final project. Extra credit is offered for an off-campus visit to a museum, among other options.

ART 411 (US) Seminar in Contemporary Art (3 per semester/maximum of 6) Trends in contemporary art investigated within the framework of studio visitations, museum tours, and through other related avenues of encounter.

ART 411 Seminar in Contemporary Art (3)

This seminar on contemporary art exposes students to artistic practices and to the advanced-level critical discourses accompanying them. It is relevant to all students interested in expanding their knowledge of contemporary art and essential to BFA students who are encouraged to take the course more than once. The only prerequisite for this course is ART 122W. The seminar’s intimate format allows for discussions and a convivial examination of the pluralistic expressions of contemporary art while articulating it with theory and criticism.

From an international perspective, this seminar focuses on art since the 1960s. Besides more traditional artistic expressions such as painting, sculpture, photography, installation, performance and video, the course examines networked collaborations before and after the Internet, art and social activism, and a range of new media and new genre artistic practices. The conceptual issues these works raise include among others the dematerialization of the art object, issues of site-specificity and public art, and institutional critique. The course approaches these developments through artists’ writings and essays in contemporary theory and criticism. Works of art are presented through videos, power points, films, performances, gallery visits, field trips, and discussions of related essays. Critical “reading” includes an extensive introduction to the work’s historical contexts, readings from primary source materials, and the exploration of critical methods of analysis. From a cross-disciplinary perspective—including historical, esthetic and philosophical approaches—this course examines principles, assumptions, and tensions inherent in artist’s works as well as in our responses to them.

Student evaluation is based on short written papers such as an exhibition review or an interview, participation in class discussions, and a creative project (ranging from a web site to an installation, artist’s book, or a performance), which must reflect a general understanding of the issues addressed in the course. The course is offered at least once a year with the enrollment of 15 students.

ART 413 Performance Art (3) The development, production, and presentation of performance art works, and the study of performance art theory and history.

ART 413 Performance Art (3)
(BA) This course meets the Bachelor of Arts degree requirements.

This course will consist of lectures, readings, demonstrations, critiques, and studio practices in performance art. The course will begin with introductory exercises aimed toward the use and understanding of objects, images, materials, and actions of the body as performance elements. Performance assignments will range from autobiographical works to those which will address political issues effecting art and the body today such as sexuality, ethnicity, health, ecology, the art market, government intervention, and others. Reading and discussion assignments will cover the theory and history of performance art in the twentieth-century.

Performance Art Paper: One week after the second performance project, students will be required to submit a paper that defines performance art. The paper should be typewritten, double-spaced, and three pages in length. In addition, it should contain a page for references that indicates at least five sources that have been used from the course reading list to support arguments.

ART 419 Advanced New Media: Capstone (4 per semester/maximum of 8) A new media and digital arts capstone course concentrating on the integration of art and technology in advanced thesis projects.

ART 419 Advanced New Media: Capstone (4 per semester/maximum of 8)

This is an advanced senior level capstone experience for new media. The course concentrates on advanced media theory and discourse, the integration of new media technologies into contemporary studio art and design practice, and on the creation and documenting of senior thesis projects. The course will focus on the final preparation of professional portfolios. The course will follow a studio/seminar model.

Student thesis projects may cover a range of digital multimedia applications in sound, image, motion, interactivity, interface design, 2D, 3D, 4D media authoring, etc. in relation to their focus in new media art and design practice.

Art (ART)

ART 417 Metal Art/Technology III (4 per semester/maximum of 12) Advanced exploration of current and emerging metal art technologies and processes as medium for conceptual, aesthetic, and functional artworks.

ART 417 Metal Art/Technology III (4 per semester/maximum of 12)

(BA) This course meets the Bachelor of Arts degree requirements.

This course will continue exploration of metal art technologies at an advanced level. This course will also cover technologies related to professional preparation, such as mass production options, presentation approaches, and interfacing with suppliers. The convergence of metal art technologies as source material (ART 217) and its further integration with emerging technologies (ART 317) will serve as the basis for students’ creative works that intersect art, function, and technology. Through this advanced exploration of a wide range of metal art technologies, the student will be able to create new artworks not otherwise possible. These artworks will use the presented technologies to address concepts, aesthetics, and functions directly relevant to the visual arts.

Assigned projects will involve a wide variety of skills, techniques and processes at an advanced level that include the application of design principles, advanced metal forming techniques, research and construction of mechanical, kinetic, and electronic systems, and independently focused explorations. This project-based learning will be reinforced through slide lectures, demonstrations, readings, reflective writings, and critiques.

This labor-intensive studio relies upon cumulative learning experience through increasingly advanced projects. Competency is expected in numerous new skills and techniques, and creative innovation in the use and application of these technologies is essential to the success of completed artworks. Projects and assignments will be based upon the advanced integration of concepts and ideas.

ART 416 Advanced Web and Net Art: Multimedia Publishing (4 per semester/maximum of 12)

(BA) This course meets the Bachelor of Arts degree requirements.

This is a studio art class that focuses on creating, authoring, exhibiting, and discussion online art practice. "Net Art" has become an important form of new media art creation and exhibition. The course explores experimental uses of new media in the visual arts with emphasis on integrating net art and design practice in cyberspace with current studio practices in two, three, and four (time based) dimensional art. In addition to the actual creation of new media artworks, the course will engage students in research methods to advance their skills in new media art and design and help them to develop an understanding of the critical evaluation and assessment of new media artworks created specifically for the web. The course will also explore various methods and strategies for exhibiting and publishing artworks on the web and creating online portfolios.

The course will examine and explore the potentials of net-based art through lectures, readings, demonstrations, creative practice in studio, critiques, and actual web-published exhibitions. Assignments will cover a range of digital multimedia applications in sound, image, motion, interactivity, interface design, and media authoring.

The course will culminate in an online exhibition and personal portfolio sites published on the web.

ART 481 Ceramic Materials and Glaze Calculation (3)

The purpose of this course is the study of raw materials and their use in formulating clays and glazes. Emphasis will be placed upon proper, safe handling of materials, accurate and effective combinations, and the correlation between chemical interactions and their aesthetic and functional outcomes. All explorations will be integrated into completed ceramic works of art comprising a new portfolio of work. Readings, lectures, movies, and demonstrations will introduce students to the materials and techniques used in the various ceramic materials and glaze calculation processes. Projects will be assigned throughout the semester and group critiques will be scheduled at regular intervals. This labor-intensive studio relies upon cumulative learning experiences through increasingly demanding projects. Competency is expected in numerous new skills and techniques, and their application in creating visually compelling concepts is essential to the success of completed artworks.

Diversity: None
Bachelor of Arts: Arts
Effective: Fall 2006
Prerequisite: ART 280, ART H 111, ART H 112 and enrollment in the ART BA ART BFA Art Education or Integrative Arts degree program.

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Art (ART)

ART 476 (ART H 476) History and Theory of Digital Art (3) History and theories of contemporary digital art emphasizing humanistic approaches to technology.

ART (ART H) 476 History and Theory of Digital Art (3)

(BA) This course meets the Bachelor of Arts degree requirements.

Approaches to Digital Art is a survey class that will offer the web designer, cyberspace architect, MUD traffic controller or enthusiastic surfer an opportunity to examine the humanistic aspects of contemporary digital art. Through readings and direct interaction with digital media and digital artists, the class will develop an appreciation of the ways in which the interface between human beings and technology has been historically constructed and is subject to critical investigation. The goal of the class is to prepare each student so that she or he may engage with digital media in a way that is every more historically and socially self aware.

Students will address the ways in which digital technologies transform artistic practices such as museum display, the writing of art criticism, the definition of works of art, changing role of the artist and the changing space of the art studio. More important, however, by engaging with digital works of art students will learn to think critically about technology and its engagement with culture at large. They will be encouraged to think about the political, economic and social impact of digital technologies. This humanistic approach to technology would make this course particularly useful to students of art history, philosophy, comparative literature, art education, and the visual/plastic arts. A significant portion of the course will be devoted to the ways in which art on the internet and digital art in general challenge the integrity of categories such as race and national identity. For example, students will have an opportunity to engage with African American artists such as Keith Obadike, whose on-line performances include an attempt to put his "blackness" up for sale on ebay.com in August of 2001. Students may also look at the ways in which net.art (Art made to be viewed on the internet) can critique commercial cooptation of global culture: etoy.com, for example, is an international and collaborative artist's group that satirizes global capital by camouflaging itself as a multinational corporation.

This class will depend largely upon written responses and class discussion, rather than upon tests. Thus, students will learn how to approach difficult theoretical sources that have been assigned to them, and they will learn how to ask the kinds of questions that will help them understand such sources. This course will emphasize critical thinking rather than memorization, so students will develop analytical skills that will be useful in many other contexts. Because students will be given weekly writing assignments, they will be able to improve their skills in composition.

Art (ART)

ART 490 View Camera Photography (4) Experience with diverse camera formats and applications; particular emphasis on view camera.

ART 490 View Camera Photography (4)

(BA) This course meets the Bachelor of Arts degree requirements.

ART 490 will provide students with experience in diverse camera formats and application with particular emphasis on view camera and its creative applications.

The course will give students background in the history of large format photography and understanding of its application in specialized fields such as architectural photography, portraiture, and landscape photography. Students will gain experience in view camera operation and the creation of large format photographs in a variety of different applications.

Grading will be based on a minimum of five projects that will account for 80% of the semester grade. The remaining 20% of the semester grade will be based on participation in class critiques. The final course grade will be dropped one full grade for each absence or late submission beginning with the second late submission or absence.

ART 490 will be offered in the fall semester each year.

A ED 201W History and Philosophy of Art Education in Schools and Cultural Institutions (3) Introduction to historical, philosophical, and sociological foundations art education in schools and cultural institutions, museums, and community organizations.

A ED 201W History and Philosophy of Art Education in Schools and Cultural Institutions (3)

Art education is not an isolated phenomenon; art teaching and learning has always occurred in the context of broader cultural changes and a range of social factors, including technological developments and population diversity. This course examines the historical, philosophical, and sociological foundations of art education in the United States. Art education can be found in a variety of formal and informal settings, including schools, community arts organizations and museums. Students will examine questions such as, what was the purpose of teaching art in the past? Was art study a means to improving social status, to attaining technical literacy, or to vocational training? Did education in art promote a democratic way of life? Or did it help reproduce existing divisions of race, gender, class, and ethnicity in American society? This course examines past and present developments in art education, paying special attention to the relation of art teaching and learning in contexts of art worlds, schooling, cultural institutions, and changing demographics. While the course will focus on art education in the United States, art education in a global context will be addressed as appropriate.

A ED 101S Introduction to Art Education (3) This course introduces students to issues, concepts, and ideas in Art Education.

A ED 101S Introduction to Art Education (3)

The objective of the course is to introduce students to basic ideas, areas of inquiry, and experiences in art education. This will be a required course that serves as the first of a sequence of courses in the Art Education major and will provide a beginning point for the rest of the courses in the major. The Art Education Program has two emphases. The first leads to public school teacher certification and the second to an understanding of arts education in settings such as museums and community arts organizations. This introductory course will be broadly based and the content and will be applicable to students in both emphases. This course will be conducted in a seminar format. Evaluation methods for the course will include, for example, critical response papers to readings, observation reports of early field experiences, tests, and portfolio assessment.

Art Education (A ED)

A ED 211 (GA) Interpreting Art Experience: Social and Behavioral Perspectives (3) Examination of psychological, cultural, aesthetic, philosophical and educational perspectives on creation and response to art in children, adolescents and adults.

A ED 211 Interpreting Art Experience: Social and Behavioral Perspectives (3) (GA)

(BA) This course meets the Bachelor of Arts degree requirements.

This course will examine the shared human experience of making and responding to visual images and artifacts from the broadest possible range of perspectives, encouraging students to develop an understanding of the role of art experience in their own lives and in the lives of others. How art is learned within specific cultures and subcultures, how understanding and appreciation of particular images and objects evolves, and how experience and learning interacts with fundamental processes of perception, cognition, and interpretation are central themes. Students will draw upon their own personal and cultural histories and consult accounts written by others to explore the role of visual art in contemporary life. Classic and contemporary studies of artistic development and aesthetic response will be reviewed through well-illustrated lectures and amplified through students' active involvement in small scale, collaborative research studies based upon methods commonly used to study the art experience of children, adolescents, and adults without professional expertise in the visual arts; these activities will include close observation, interviews, and the design of preference and drawing studies. As a final course project, each student will construct a case study of a child, adolescent, or adult which describes in detail one perspective on that individual's experience of art in the home, school, museum, and/or other cultural institutions and settings.

A ED 212 Interpreting Art Experience: Educational Implications (1) In-depth study of the educational implications of the information on art making and response introduced in A ED 211.

A ED 212 Interpreting Art Experience: Educational Implications (1)

A special discussion section attached to A ED 211 and required of students majoring in art education. A ED 212 focuses on the educational implications of the perspectives on art experience presented in A ED 211. This segment of the course will attend specifically to issues related to learners and learning in the visual arts, including characteristics of learners at various stages of development and the ways in which curriculum and instruction can and should be shaped by these considerations.

A ED 225 (GA;US) Diversity, Pedagogy, and Visual Culture (3) Issues of diversity in art, education, visual culture, and pedagogy.

A ED 225 Diversity, Pedagogy, and Visual Culture (3) (GA;US)

This course meets the Bachelor of Arts degree requirements.

This interdisciplinary course will serve to introduce students to critical understandings of issues of diversity, as they arise in contexts such as the art world, cultural institutions (such as museums and community arts organizations), schools, visual culture, and the culture, educational texts (such as curricula), and history, while developing a theoretical base from educational and cultural theory. By the end of the course, students will understand diversity as broadly defined in relation to visual culture and be able to critically explore the complex dynamics of race, gender, sex, and class, and the pedagogical issues posed by diversity.

A ED 322 Visual Culture and Educational Technologies (3) The course provides a foundation for innovative integration of digital technologies in art making, viewing, and teaching.

A ED 322 Visual Culture and Educational Technologies (3)

The purpose of the course is to develop skills, questioning attitudes, and uses for technology in art and art education; and to engage in electronic mediated communication and new media artmaking. This course is for both undergraduate Art Education degree options: (1) Schools, and (2) Museums & Cultural Institutions. The focus is on students’ constructing a critical understanding of technology as a cultural interface in contemporary art, visual culture, and art education. This course addresses issues, practices, and potentials of instructional technology for art education. Course participants explore the pedagogical implications of intertextual Webs, hypertext & hypermedia, blogs, simulations, virtual reality, threaded dialogue, WebQuests, online games, media communities, collaborations, adaptive and assistive technologies, and media-rich “student papers.” This course emphasizes the importance of sharing perspectives in an educational context, and on how e-learning course tools, along with specific teaching strategies, can facilitate shared perspectives.

Art Education (A ED)

A ED 323 Visual Culture and Art Education (3) The study and creation of contemporary art forms as visual culture critiques provide curricular and pedagogical approaches to art education.

A ED 323 Visual Culture and Art Education (3)
This course is for Art Education majors in the Schools option.
Students will:
* Read, critically examine, and discuss postmodern "texts" in relation to the ways in which the works and the critical writing that surrounds them participate in, among other issues, the construction of race and gender, and the creation of power and control.
* Reflect critically on contemporary writings that address the nature of art, visual culture, artmaking, exhibition, and interpretation as pedagogical processes for making meaning through art.
* Create installations, videos, and performances or any combination of the three forms, individually and/or in groups.

The purpose of this course is:
1. To assist students to insightfully interpret and create artworks through both writing and artistic media.
2. To provide students with the bases for understanding, interpreting, and critically analyzing contemporary visual culture, which can provide the content of curriculum outlines and unit and lesson plans that students develop in the course for use during internships, student teaching, and as art educators.
3. To provide students with opportunities to develop connections between artworks and their own lives, the lives of their prospective students, and the societies in which they will live.
4. To encourage students to consider race, class, sexual identity, age, and gender issues in art, art education, cultural production, exhibition venues, and career opportunities.

TEXTS include popular arts, film, television, video/computer games, music, theatre, fashion, museums, contemporary art, and newsmedia.

Art Education (A ED)

A ED 488 Cultural Institutions Practicum (1-3) Supervised field experience in a museum or other cultural institution, including planning, implementation, and evaluation of an educational project.

A ED 488 Cultural Institutions Practicum (1-3)

This course provides 1 to 3 credit hours of field experience for students enrolled in the Museums and Cultural Institutions Option of the BS major in Art Education. The course will provide students with a structured and supervised experience working with an educator in one of a variety of possible educational settings in museums and other cultural institutions in the local community and nearby region, including the Palmer Museum of Art. The field experience will allow students to apply what they have learned in coursework in a practical setting, plan and implement an educational project or program, and prepare for their extended 15-credit internship in A ED 495.

The nature of the field experience will vary depending upon the institutional setting, upon whether the student is working alone or as part of a team, upon the needs of the institution and the nature of the educational project, and upon the number of credit hours earned. In some cases, the course may be extended over two semesters. The course may be taken as an independent study, or structured around a group of students engaged in a joint project. Each student will be supervised by an educator in the setting in which the field experience takes place, as well as by an instructor from the Art Education program at the University.

Each student will become familiar with the role of education in the particular institutional setting and participate in providing educational experiences for the people served by the institution. As his or her primary assignment, each student will carry out an educational project in the setting, either individually or as part of a team. These projects may include, but not be limited to, an educational program, a set of educational materials, a marketing campaign, or educational installation. Each project will include preparing a written plan, conducting formative evaluation to field test the plan, implementing the project, evaluating its effectiveness, and preparing and presenting a final written report.

Note: Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details check the specific course syllabus.
Art Education (A ED)

A ED 440 Cultural Institutions (3) Role of the educator and educational programming in museums and other cultural institutions.

A ED 440 Cultural Institutions (3)

A ED 440 is the final course before an extended internship in the Museums and Cultural Institutions option of the BS in Art Education. It provides students with the opportunity to study the roles of educators and educational programming in various types of cultural institutions and agencies, from art museums and historic houses to community arts centers and arts councils. It enables students to learn about professional and vocational opportunities and to prepare for a career in the arts and cultural education.

Through reading, discussion, and field trips, the course explores the implications of past coursework for educational programming in cultural institutions. By preparing and presenting a case study, students understand and assess the effectiveness of educational programming in one institution. By preparing their own educational materials, program, or installation, they learn how to apply what they have learned to a specific setting.

General Education: None
Diversity: None
Bachelor of Arts: None
Effective: Spring 2003

Art Education (A ED)

A ED 490 Capstone Course in Art Education (3) Synthesis of preservice art education coursework; introduction to professional practices and standards; completion of teaching and learning portfolio.

A ED 490 Capstone Course in Art Education (2)

The capstone course has four major objectives for student learning:

- Each student will synthesize the experiences and understandings developed through prior courses in the undergraduate art education program.
- Students will become aware of emerging trends in art education and reflect on implications of those trends for their future teaching and learning.
- Each student will complete, and publicly present, a teaching and learning portfolio that includes evidence of professional preparation, biographical information, samples of artwork and writings on art/visual culture, and reflective statements explaining the selection and significance of specific items.
- Students will gain understanding of the importance of professional standards and practices in art education.

Student learning will be evaluated through assessment of the preprofessional teaching portfolio, and through a combination of written assignments, individual and small group oral presentations, and active participation in class discussions. Students will collaborate on a final installation, performance or exhibition demonstrating their readiness for the final internship. Since this is the final course in the major prior to student teaching or the internship, attendance is very important and will count toward part of the final grade. Students need access to a computer lab.

The capstone course in the art education major should be taken in the final semester before student teaching or a final internship. Since one goal of the course is helping students synthesize what they have learned in their prior courses, successful completion of all of the required courses in the major is prerequisite to enrollment in the capstone course. Students will have been introduced to the teaching and learning portfolio in their introductory art education course and should have developed pieces for their pre-professional teaching portfolios in most of their earlier art education courses. Much of the work of the capstone course will, therefore, focus on reflection, refinement, and synthesis.

Art Education (A ED)

A ED 495A Art Education Student Teaching Practicum (7) The elementary student teaching practicum fulfills requirements for Pennsylvania certification to teach Art in both elementary and secondary schools.

A ED 495A Art Education Student Teaching Practicum (7)
The Pittsburgh-based elementary or middle-level field experience fulfills the student teaching requirement for Pennsylvania certification to teach art in elementary and secondary schools. It is offered each semester, and student teachers are placed through the School District University. Collaborative in Pittsburgh Public Schools. An on-site Art Education faculty Supervisor supervises students. Assignments, required seminars, and professional development activities meet the teaching prerequisites outlined by NCATE (National Council for Accreditation of Teacher Education) and the Standards for Pre-Service Teachers in Urban Education. Experiences and assignments provide evidence in each of the four domains for teacher preparation: Domain A - Planning and Preparing for Student Learning, Domain B - Teaching, Domain C - Analyzing Student Learning and Inquiring into Teaching, and Domain D - Fulfilling Professional Responsibilities. The work completed in this course (a digital and/or paper-based portfolio, and documented performance-based assessment of teaching as assessed by the university supervisor and mentor teachers/clinical instructors) will demonstrate fulfillment of the teaching/domain standards. The outcome of this work is to produce multiple experiences that support professional and personal development while preparing students for upcoming positions teaching art in multiple public and private contexts at both elementary and secondary levels. At the culmination of the student teaching semester, students will have both practical and theoretical understandings in addition to materials for application within the classroom.

Art Education (A ED)

A ED 495B Art Education Student Teaching Practicum (8) The secondary student teaching practicum fulfills requirements for Pennsylvania certification to teach Art in both elementary and secondary schools.

A ED 495B Art Education Student Teaching Practicum (8)
The Pittsburgh-based middle-level or secondary field experience fulfills the student teaching requirement for Pennsylvania certification to teach art in elementary and secondary schools. It is offered each semester, and student teachers are placed through the School District University Collaborative in Pittsburgh Public Schools. An on-site Art Education faculty Supervisor supervises students. Assignments, required seminars, and professional development activities meet the teaching prerequisites outlined by NCATE (National Council for Accreditation of Teacher Education) and the Standards for Pre-Service Teachers in Urban Education. Experiences and assignments provide evidence in each of the four domains for teacher preparation: Domain A - Planning and Preparation for Student Learning, Domain B - Teaching, Domain C - Analyzing Student Learning and Inquiring into Teaching, and Domain D - Fulfilling Professional Responsibilities. The work complete in this course (a digital and/or paper-based portfolio, and documented performance-based assessment of teaching as assessed by the university supervisor and mentor teachers/clinical instructors) will demonstrate fulfillment of the teaching/domain standards. The outcome of this work is to produce multiple experiences that support professional and personal development while preparing students for upcoming positions teaching art in multiple public and private contexts at both elementary and secondary levels. At the culmination of the student teaching semester, students will have both practical and theoretical understandings in addition to materials for application within the classroom.

Art Education (A ED)

A ED 495E Internship in Museums and Cultural Institutions (15) Twelve week, full time supervised internship in education in museums or other cultural institutions.

A ED 495E Internship in Museums and Cultural Institutions (15)

The internship at a museum or other cultural institution completes the requirements for the Museums and Cultural Institutions option for the BS in Art Education. It is generally scheduled full-time for a period of 12 consecutive weeks during a double summer session, although it may also be taken during the fall or spring semester. The internship enables interns to meet their own educational objectives through participation in a supervised experience that moves them out of the classroom into the workplace. Prospective interns are encouraged to select internship sites that offer educational experiences relevant to their professional goals and desired careers.

The internship incorporates guidelines consistent with the *Standards and Guidelines for Museum Internships* prepared by the New England Museum Association and published by the American Association of Museums (1993, 2000). A formal written internship agreement signed by the intern supervisor at the sponsoring museum or cultural institution, and by the prospective intern and university supervisor outlines the objectives of the internship, the intern's duties and responsibilities, the responsibilities of the museum and university supervisors, and the means by which the intern's work will be evaluated. Interns are integrated into the ongoing work and education programs of the museum and treated as staff members. They assume professional responsibilities and are expected to complete a project or some discrete portion of a major project that is being undertaken by the education department of the museum. Interns become acquainted with functions, programs and departments of the museum in addition to those to which they have been assigned in order to understand the relationship of their educational work to that of the museum, to the community, and to the museum field in general. Interns may participate in any workshops, lectures, professional courses, and staff training seminars that may occur at the museum during period of internship. They are also encouraged to seek professional employment after completion of the internship, and reasonable accommodation is made to allow them time to look for positions, prepare application materials, and attend interviews.

Interns submit a weekly journal of activities and reflections to the university supervisor, as well as a summary report at the end. The museum supervisor submits an evaluation documenting the intern's actual working/learning experiences and critically assessing these experiences. The final evaluation is based on this assessment, on the intern's weekly journal and final report, and on the university supervisors's onsite observations and interviews.

Art History (ART H)

ART H 001S (GA) First-Year Seminar (3) An introduction to the field of art history, through an examination of a selected issue in a seminar setting.

ART H 001S First-Year Seminar (3) (GA)

(BA) This course meets the Bachelor of Arts degree requirements.

This First-Year Seminar is open to all majors and to those who have yet to decide upon a major. It is also a 3-credit General Education in the Arts course (GA). The course will introduce entering university students to the field of art history through a case study on a selected topic. Each semester the topic will be different, potentially covering such diverse subjects as the purpose and function of Ancient Egyptian architecture to the role of sculpture in Renaissance Florence to the development of abstract painting in the early 20th century. Some semesters, the seminar may also focus upon a single exhibition at the Palmer Museum of Art. Such a focus upon a single topic will allow the class to look at a particular issue in the field from many different perspectives. The course will not be a broad survey of the history of art, but it will introduce students to the breadth of methods and approaches of art history. The seminar approach of the course will emphasize how to tackle an issue in art history, how to critically read selected texts, how to discuss in a small group the various dimensions of a problem, how to do art historical research in the library and on the internet, and how to present your own research and perspectives through public speaking and writing.

Art History (ART H)

ART H 100 (GA;IL) Introduction to Art (3) An approach to the understanding of art through a critical analysis of selected works of architecture, painting, and sculpture. Students who have passed ART H 110 may not schedule this course.

ART H 100 Introduction to Art (3) (GA;IL) (BA) This course meets the Bachelor of Arts degree requirements.

Art History 100 provides an introduction to the history of art from prehistory to the present, through selected topics, rather than a comprehensive survey. Areas covered usually include prehistoric art, art of the Near East and Egypt, ancient Greek and Roman art, medieval art culminating with the Gothic, Renaissance art both in Italy and northern Europe, Baroque and Rococo art, and modern developments often highlighting Romanticism, Impressionism, Cubism, Dada, Surrealism, Abstract Expressionism, Pop, Feminist, and contemporary art. The course also introduces selected artistic traditions in Africa, Asia and the Americas. The course is designed to meet two principal goals. The first is to increase students' powers of visual analysis and to help them build a critical vocabulary for discussing an art object's medium, composition, style, and iconography. The second is to foster an understanding of the deep implication of the visual arts in their social and cultural contexts, both historical and contemporary. The course therefore involves significant material relating to political, economic and religious issues. It investigates problems in patronage, function, reception and censorship. It considers such intra- and cross-cultural issues as representations of gender and the incorporation of non-European art forms into the Western tradition. Requirements typically include examinations combining short answer and essay questions, and one paper based library research or intensive examination of an actual work of art. As a general education course in the arts, this course provides an introduction to selected themes in the broad history of art for students in any major. It has no prerequisite and presumes no prior exposure to fine art. This course is not a requirement of Art History major or minors, and is therefore directed essentially to students outside the field.

Art History (ART H)

ART H 111 (GA;IL) Ancient to Medieval Art (3) Survey of Ancient Egyptian, Greek, Roman, Byzantine, Early Medieval, Romanesque, and Gothic art, with an emphasis on sculpture and painting.

This course is an introduction to Western art before the Renaissance, from ca. 25,000 BCE to AD 1423. The topics covered in this course include prehistoric art in Europe; art of the Near East and Egypt; Aegean art; Greek and Roman art; Early Christian, Jewish, Islamic, and Byzantine art; and Medieval art including Romanesque and Gothic developments. The course is designed to meet two principal goals. The first is to increase students' powers of visual analysis and to help them build a critical vocabulary for discussing an art object's medium, composition, style, and iconography. The second is to foster an understanding of the deep implication of the visual arts in their social and cultural contexts. The course therefore involves significant material relating to political, economic and religious issues. It investigates problems in patronage, function, reception and censorship. It considers such intra- and cross-cultural issues as representations of gender and the incorporation of non-European art forms into the Western tradition. Typical requirements include exams and a paper. As a general education course in the arts, this course provides an introduction to Ancient through Medieval art to a student of any major. This course has no prerequisite and presumes no prior exposure to art history. As a course in the Art History major, it teaches students both the common vocabulary of the field and the outlines of the field that form the foundation for future study. Art History 111 serves as a companion course to Art History 112, which deals with art from the Renaissance to Modern Times. Art History 111 also complements Art History 201, "Ancient to Medieval Architecture."

General Education: GA
Diversity: IL
Bachelor of Arts: Arts

Art History (ART H)

ART H 112 (GA;IL) Renaissance to Modern Art (3) Survey of Renaissance, Baroque, Rococo, Romantic, Modern, and Contemporary art, with an emphasis on painting, sculpture, and graphic arts.

ART H 112 Renaissance to Modern Art (3)
(GA;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

Art History 112 provides an introduction to the history of art in the European tradition from the early Renaissance (ca. 1300) to the present. Areas covered include Early and High Renaissance Italian art; Northern Renaissance art; Baroque art of Italy, Spain, France and the Netherlands; and subsequent artistic movements emphasizing the Rococo, Neo-Classicism, Realism, Impressionism and Modernist movements from Fauvism through Abstract Expressionism to Contemporary. The course is designed to meet two principal goals. The first is to increase students' powers of visual analysis and to help them build a critical vocabulary for discussing an art object's medium, composition, style, and iconography. The second is to foster an understanding of the deep implication of the visual arts in their social and cultural contexts, both historical and contemporary. The course therefore involves significant material relating to political, economic and religious issues. It investigates problems in patronage, function, reception and censorship. It considers such intra- and cross-cultural issues as representations of gender and the incorporation of non-European art forms into the Western tradition. Requirements typically include examinations combining short answer and essay questions, and at least one writing assignment. As a general education course in the arts, this course provides an introduction to Renaissance through modern art for a student in any major. It has no prerequisite and presumes no prior exposure to art history. It will teach students majoring in Art History both the common vocabulary of the field and the outlines of the field that form the foundation for future study. Art History 112 serves a companion course to Art History 111, which examines Western art from Antiquity through the Middle Ages. Art History 112 also complements Art History 202, "Renaissance to Modern Architecture."

Art History (ART H)

ART H 120 (GA;IL) Asian Art and Architecture (3) A selective overview of the art and architecture of India, Southeast Asia, China, Korea, and Japan.

ART H 120 Asian Art and Architecture (3)
(GA;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

Art History 120 provides an introduction to the art and architecture of Asia, with an emphasis upon south, southeast, and east Asia. Selected monuments from these regions will be considered within their original cultural and historical context. Particular emphasis will be placed on the art associated with Hinduism and Buddhism. The course begins with India, from the early Indus Valley Civilization up through the Taj Mahal. Angkor Wat and other developments in southeast Asia are examined. Selected themes in Chinese art and architecture are explored from the early Bronze Age up through the Forbidden City in Beijing. The unique contribution of Korean art is included. The course concludes with a discussion of Japanese art and architecture, from early Shinto shrines to Japanese prints, gardens, and the tea ceremony. The course is designed to meet two principal goals. The first is to develop skills of visual analysis and a critical vocabulary for discussing the media, technologies, styles, and iconographies of various Asian artistic traditions. The second is to foster an understanding of art--and visual culture in general--according to social, economic, political, and religious contexts. Key topics include: patronage, issues of reception and aesthetics, the function of visual imagery in religious practices, the ritual use of objects, the organization and use of sacred space, depictions of gender, and relationships between the art of various regions and cultures. Requirements include essay exams and a paper. As a general education course, this class provides an introduction to Asian art for students of any major. The course has no prerequisites, and presumes no prior exposure to art history. Art History majors will learn vocabulary, methodology, and theory that is not only basic to the field, but which will also broaden their knowledge of the discipline as a whole.

ART H 130 (GA;US;IL) African, Oceanic, and Native American Art (3) A selective overview of the history of African, Oceanic, and Native American art.

ART H 130 African, Oceanic, and Native American Art (3) (GA;US;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

Art History 130 provides a selective introduction to major developments and issues in African, Oceanic and Native American art. The beginning of this course will concentrate upon the art and architecture of selected regions of Africa, during the pre-colonial, colonial, and post-colonial periods. This will be followed by a discussion of the traditional arts of Oceania in Polynesia, Micronesia, Melanesia, and Australia. The course will conclude with an introduction to the Pre-Columbian art and architecture of the Americas, and Native American art from the Eastern Woodlands, Great Plains, the Southwest and Pacific Northwest of North America. Art will be examined within its cultural and social contexts. Special attention will be given to the role that art serves in a culture's religion, rituals, ceremonies, political structure, gender roles, and ethnic identity. The impact of the West upon the art of these regions, both in colonial and post-colonial contexts, will be a reoccurring issue in this course. The actual time devoted to each topic and the sequence of topics will vary from instructor to instructor. The objective of the course is to introduce students to diversity in art. In so doing, negative stereotypes associated with traditional notions of the "primitive" will be challenged. Also, the course emphasizes visual analysis and critical thinking. The course requirements will consist of exams and a paper. As a general education course, this class provides an introduction to African, Oceanic and Native American art for students of any major. The course has no prerequisites, and presumes no prior exposure to art history. On the other hand, students majoring in Art History will learn vocabulary, methodology, and theory that is not only basic to the field, but which will also broaden their knowledge of the discipline as a whole.

Art History (ART H)

ART H 201 Ancient to Medieval Architecture (3) (GA;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

This course is an introduction to Western architecture before the Renaissance, roughly before A.D. 1400. Some of the topics covered in this course include prehistoric architecture in Europe and the Mediterranean, architecture of the ancient Near East, Egyptian architecture, Minoan and Mycenaean architecture, the classical architecture of ancient Greece, ancient Roman architecture throughout the empire, the Early Christian architecture of western Europe and Byzantium, early medieval architecture, Middle Byzantine architecture, Islamic architecture, and the Romanesque and Gothic architecture of Western Europe. Selected major individual buildings and architectural complexes will be emphasized and will include types of buildings/complexes such as the sanctuary, temple, tomb, forum, basilica, cathedral, monastery, and castle. Architecture will be analyzed with regard to materials’ construction, engineering and design, and in the contexts of culture, society, and urban or rural setting. Political, economic, religious, ethnic and gender-related issues will be presented as they are part of the dynamics contributing to many of these structures.

The students’ understanding and ability to articulate the conceptual themes of the course will be tested through essay examinations. There will also be a short paper.

This course will provide an introduction to ancient to medieval architecture to students of any major. The course has no prerequisite. This course also serves as an introductory foundation course for students in the arts, particularly architecture and landscape architecture. The companion course to Art History 201 is Art History 202, "Renaissance to Modern Architecture," which examines Western architecture after A.D. 1400. Art History 201 is a required course for the Major in Art History and the Interdisciplinary Minor in Architectural History.

ART H 202 Renaissance to Modern Architecture (3) (GA;US;IL)

This course meets the Bachelor of Arts degree requirements.

This course is an introduction to Western architecture from approximately A.D. 1400 to the present. Some of the topics covered in this course include the Italian Renaissance, the rebuilding of St. Peter’s in Rome, Mannerism, the villas of Palladio, Italian Baroque churches, Spanish Colonial architecture in the Americas, royal French architecture from Francis I to Louis XVI, Late Baroque and Rococo architecture from Bavaria to Russia, Elizabethan to Georgian architecture in England and America, the Industrial Revolution, Neoclassicism from Schinkel to Jefferson, Romanticism and the Gothic Revival, Ecole des Beaux-Arts, Second Empire Paris, Victorian architecture, the Arts & Crafts Movement, Richardsonian Romanesque, the Chicago School, Frank Lloyd Wright, the City Beautiful Movement, Art Nouveau to Futurism, Art Deco skyscrapers, the International Style, the Bauhaus, Le Corbusier, Louis 1. Kahn, PostModernism, Deconstructionism, and contemporary architecture. Selected major architects, theories, buildings, and urban developments will be emphasized. Architecture will be considered within the contexts of religion, politics, philosophy, culture, economics, race, gender, society, engineering, and landscape architecture.

The students' understanding of the basic factual information concerning selected buildings will be tested through quizzes. The students' understanding and ability to articulate the conceptual themes of the course will be tested through essay examinations. There will also be a short paper.

This course will provide an introduction to Renaissance to contemporary architecture to students of any major. The course has no prerequisite. This course also serves as an introductory foundation course for students in the arts, particularly architecture and landscape architecture. The companion course to Art History 202 is Art History 201, "Ancient to Medieval Architecture," which examines Western architecture before A.D. 1400. Art History 202 is a required course for the Major in Art History and the Interdisciplinary Minor in Architectural History.

Art History (ART H)

**ART H 225** (GA;GH) (ENGL 225, WMNST 225) Sexuality and Modern Visual Culture (3) An examination of the visual expression of gender and sexual identities in English-speaking cultures since the late nineteenth century.

**ENGL (ART H/WMNST) 225 Sexuality and Modern Visual Culture (3)** (GA;GH)

The terms "feminist" and "homosexual" were invented by the Victorians and reflect profound shifts in conceptions of identity. Another invention of the nineteenth century was the idea of the literary and artistic "avant-garde," a minority contingent with politically and/or aesthetically advanced views. These ideas of minority culture were deeply enmeshed with one another, and have exerted profound influence ever since. This course explores that history with the objective of developing a more sophisticated understanding of how the history of ideas affects our sense of who we are and how we read both texts and images. The course will be relevant to students of American and English studies, art, art history, and women's and sexuality studies.

Art History (ART H)

ART H 250 (PHOTO 201) A Chronological Survey of Photography (3) A survey of photography's place and influence in a social, cultural, and historical context.

ART H 250 A Chronological Survey of Photography (3)

This course explores the role played by photography over time in providing understanding and insight in a social, cultural, and historical context of the impact of the development of the photographic medium and its effect on social, political, cultural and technological events. Emphasis will be given to understanding the context that surrounds the scientific and aesthetic development of photography. This is a survey of the chronology of events in western culture that transpires from the inception of photography until the year 2000. It includes the influences and outcomes of photographers and those associated with the medium on our culture. Emphasis will be placed on the influence of photography on the world around it, and significant events and individuals in the development of the medium as a vital art form. The structure of the course will consist of research and discussion of events and individuals that characterized years selected for examination. Each week one or two decades of western culture will be highlighted. Although the thrust of research will relate to photographic subject matter, the events studied will span the culture. We will explore the development of art, literature, music, and photography, as well as, historic landmarks, and the events that have shaped present society. Each week a selection of visual material will be presented highlighting selected events, students will read literature from the period of discussion, significant pieces of music will be introduced, and accounts of periodic events will be surveyed.

Each week, a group of students will be assigned to research at least one decade. Each student will gather information about a significant figure or event that occurred in the course of a given period. The student will be expected to prepare a short paper and give a five-minute oral presentation about his/her assigned year, historical figure or event. As each student presents, the chronology of events becomes clear and the multiple threads of history weaves a brilliant tapestry of our culture. For the final presentation the student will prepare a ten-page research paper about a historical figure or event.

Students will be graded on the quality of the weekly oral presentations and the demonstrated level of commitment to research. Another significant part of their grade will be derived from the length of committed scholarship given to the ten-page term paper. Students must exhibit a level of originality, clarity, and insight. The student must demonstrate the capacity for the assimilation of facts and events relative to their subject and demonstrate how their subject relates to other events that occurred around the same time of their event. Toward this end students will be encouraged to work together to illustrate the interconnection of the chronology.

ART H 301 (GA;IL) Egyptian and Mesopotamian Art (3) Art of the Ancient Near East, including Egypt, Mesopotamia, and neighboring civilizations.

ART H 301 Egyptian and Mesopotamian Art (3)
(GA;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

Art history 301 provides an introduction to the arts of the Ancient Near East including those of Egypt and Mesopotamia. The class is dealt with chronologically. Works studied in class include papyri, seals, fabric, codices as well as sculpture, architecture, and painting. Additional readings of primary sources focused on mythology, and religion will form a key element in the structure of the class. The course is designed to meet two principal goals. The first is to increase students’ powers of visual analysis and help them build a critical vocabulary for discussing an art object's medium, composition, style, and iconography. The second is to foster an understanding of the deep implication of the visual arts in their social and cultural contexts. The course therefore involves significant material relating to political, economic and religious issues. It investigates problems in patronage, function, reception and censorship. It considers such intra- and cross-cultural issues as representations of gender. Requirements include essay exams and at least one paper. As a general education course in the arts, this course provides an introduction to Ancient Near Eastern and Egyptian art to a student of any major. This course has no prerequisite, and presumes no prior exposure to fine art. Students majoring in Art History will learn in it both the common vocabulary of the field and the outlines of the field that form the foundation for future study.

ART H 302 (GA;IL) Art of the Early Middle Ages (3) A survey of the art of Western Europe from the Early Christian era through the Ottonian Empire, c.300-1050 A.D.

ART H 302 Art of the Early Middle Ages (3) (GA;IL)
(BA) This course meets the Bachelor of Arts degree requirements.

Art History 302 concentrates on the art of northern Europe between A.D. 600 and 1050, from the years which saw the art and culture of the migration period in Europe meet and merge with the Greco-Roman traditions of the Mediterranean, to the beginnings of Romanesque art. Works studied include architecture, manuscript painting, ivory carving and goldsmithwork, most of which were produced by or for members of the clergy, royalty or the lay aristocracy. The basic structure of the course is chronological. The course is designed to meet two principal goals. The first is to increase students' powers of visual analysis and help them build a critical vocabulary for discussing an art object's medium, composition, style, and iconography. The second is to foster an understanding of the deep implication of the visual arts in their social and cultural contexts. The course therefore involves significant material relating to political, economic and religious issues. It investigates problems in patronage, function, reception and censorship. It considers such intra- and cross-cultural issues as representations of gender. Requirements include essay exams and at least one paper. As a general education course in the arts, this course provides an introduction to early Medieval art to a student of any major. This course has no prerequisite, and presumes no prior exposure to art. Students majoring in Art History will learn in it both the common vocabulary of the field and the outlines of the field that form the foundation for future study.

Art History (ART H)

ART H 303 (GA;IL) Italian Renaissance Art (3) The major arts in Italy from the thirteenth century A.D. through the Renaissance; emphasis on sculpture and painting.

ART H 303 Italian Renaissance Art (3) (GA;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

Art History 303 provides an introduction to the art of the early and "high" Renaissance in Italy, conceived in chronological terms as the period from c. 1300 to c. 1530, and embracing developments from the emergence of the Mendicant orders on the later 13th century to the rise of Mannerism in the 16th century. Monuments form all parts of the Italian peninsula will be considered, with emphasis on the major centers of Florence, Siena, Venice, Rome, Milan, and Naples, as well as Mantua, Ferrara and Urbino. The basic structure of the course is chronological, and is divided into three sections corresponding to the three centuries defined by Giorgio Vasari in his Lives of the Artists. In each section, an attempt will be made to present the careers and major works of the most significant artists in relation to their historical and cultural context. The course is designed to meet two principal goals. The first is to increase students' powers of visual analysis and help them build a critical vocabulary for discussing an art object's medium, composition, style, and iconography. The second is to foster an understanding of the deep implication of the visual arts in their social and cultural contexts. The course therefore involves significant material relating to political, economic and religious issues. It investigates problems in patronage, function, reception and censorship. It considers such intra- and cross-cultural issues as representations of gender. Requirements include essay exams and at least one paper. As a general education course in the arts, this course provides an introduction to Italian Renaissance art to a student of any major. This course has no prerequisite, and presumes no prior exposure to art. Students majoring in Art History will learn in it both the common vocabulary of the field and the outlines of the field that form the foundation for future study.

ART H 305 (GA;IL) European Art from 1780-1860 (3) A survey of painting and sculpture in Europe 1780-1860, from the origins of Neoclassicism through Romanticism and Realism.

ART H 305 European Art from 1780-1860 (3) (GA;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

Art History 305 provides an introduction to the painting, sculpture, and graphic arts of Europe between ca. 1780 and 1860, with an emphasis on selected developments in France, Spain, England, and Germany. The course begins with the origins of Neoclassicism and the revolutionary art of Jacques Louis David. Art is examined within the context of the tumultuous history of this period, such as the decline of the French monarchy, the French Revolution and the rise and fall of Napoleon. The course will examine the rise of Romanticism, as seen in such diverse expressions as Goya's horrific images of inhumanity, Fuseli's dreams, Turner's sublime landscapes, Friedrich's frozen visions of Gothic ruins, Delacroix's colorful battles of beasts. Realism emerges in the biting social commentaries of Daumier, the meticulous detailed paintings of the English Pre-Raphaelites, and the raw reality of Courbet's paintings. The course ends with the extraordinary art of Manet. The course is designed to meet two principal goals. The first is to increase students' powers of visual analysis and help them build a critical vocabulary for discussing an art object's medium, composition, style, and iconography. The second is to foster an understanding of the deep implication of the visual arts in their social and cultural contexts. The course therefore involves significant material relating to political, economic and religious issues. It investigates problems in patronage, function, reception and censorship. Art History (ART H)

ART H 304 (GA;IL) Italian, Spanish, and Spanish Colonial Baroque Art and Architecture (3) A survey of painting, sculpture, and architecture in Italy, Spain, and the Spanish Americas from 1600-1750.

ART H 304 Southern Baroque Painting (3)
(GA;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

Art History 304 concentrates on the art of Italy, Spain, and the Spanish Colonial from 1600-1750. Discussion will concentrate on what constitutes the baroque and its interpretation in each geographic area as well as issues such as patronage, primary sources, iconography, and historical context. The class will begin with the indications of the new Baroque in Italy during the 1580's and proceed to Spain and the Spanish Colonial World. The course is designed to meet two principal goals. The first is to increase students' powers of visual analysis and help them build a critical vocabulary for discussing an art object's medium, composition, style, and iconography. The second is to foster an understanding of the deep implication of the visual arts in their social and cultural contexts. The course therefore involves significant material relating to political, economic and religious issues. It investigates problems in patronage, function, reception and censorship. It considers such intra- and cross-cultural issues as representations of religious vision, court politics, and social status. Requirements include exams and at least one paper. As a general education course in the arts, this course provides an introduction to Baroque Art for a student of any major. This course has no prerequisite, and presumes no prior exposure to fine art. Art History (ART H)

ART H 307 (GA;US) (AM ST 307) American Art (3) History of art in the English colonies and the United States from the seventeenth century to the present.

ART H (AM ST) 307 American Art (3) (GA;US)

(BA) This course meets the Bachelor of Arts degree requirements.

American art, from the colonial period to the present, is examined through paintings, sculpture, buildings, prints and photographs, as well as exhibitions and national/world fairs. The class places special emphasis upon the predicament of national identity by examining the ways in which the very notion of the “American” has historically been highly contested. Special points of emphasis include: negotiations between indigenous, colonial and European artistic styles, representations of and by displaced populations (colonial subjects, Native Americans, African Americans), myths of the American landscape, the cult of domesticity and the gendering of American citizenry, later transatlantic experiences of expatriate artists, conflicts between urban and rural conceptualizations of the “typical” American experience, the role of the American avant-garde after World War II, and debates over federal funding for the arts. The course is designed to meet two principal goals. The first is to increase students’ powers of visual analysis and help them build a critical vocabulary for discussing an art object’s medium, composition, style, and iconography. The second is to foster an understanding of the deep implication of the visual arts in their social and cultural contexts. ART H 313 (GA;IL) Northern Renaissance Art (3) Art in northern Europe in the fifteenth and sixteenth centuries, emphasizing painters such as Van Eyck, Durer, and Bruegel.

ART H 313 Northern Renaissance Art (3) (GA;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

Art History 313 explores the relationship of the visual arts to power structures, political events, and social and religious issues in the Netherlands and Germany, c. 1380-1585. Topics include the forms and functions of religious art, the place of visual representation in the governing strategies of the era’s rulers, the rising status of the artist, the new technology of printing, the complex role of visual culture in bringing about the Protestant Reformation, and the wave of destruction and censorship known as the Great Iconoclasm of 1566. Particular attention is paid to the works and careers of Jan van Eyck, Hieronymus Bosch, Albrecht Diirer and Pieter Bruegel. The course is designed to meet two principal goals. The first is to increase students’ powers of visual analysis and help them build a critical vocabulary for discussing an art object’s medium, composition, style, and iconography. The second is to foster an understanding of the deep implication of the visual arts in their social and cultural contexts. ART H 314 Art in the Age of Rembrandt (3)
(GA;IL)

(BA) This course meets the Bachelor of Arts degree requirements.

Art History 314 explores the relationship of the visual arts to power structures, political events, and social and religious issues in the Netherlands and Flanders, c. 1585-1672. Topics include the function of art in constructing national and urban identities, social distinctions and gender roles, the contrasting needs burgher and court patrons, the effect of the open market on both the production of and the look of artwork, the impact of foreign investment and exploration on visual imagery, and the processes of artistic collaboration and competition. Particular attention is paid to the works and careers of Hendrick Goltzius, Frans Hals, Clara Peeters, Hendrik Terbrugghen, Rembrandt van Rijn, Peter Rubens and Jan Vermeer. The course is designed to meet two principal goals. The first is to increase students' powers of visual analysis and help them build a critical vocabulary for discussing an art object's medium, composition, style, and iconography. The second is to foster an understanding of the deep implication of the visual arts in their social and cultural contexts.
