

# ECOSYSTEM MEASUREMENTS AND DATA ANALYSIS GRADUATE CREDIT CERTIFICATE

---

<b>Person-in-Charge</b>	Marc McDill
<b>Program Code</b>	ECMSDT
<b>Campus(es)</b>	World Campus

The Graduate Certificate in Ecosystem Measurements and Data Analysis (EMDA Certificate) requires 9 credits, consisting of three 3-credit courses. The program is intended for people who are working as natural resources managers in higher-level management and leadership positions or for those who wish to move into such positions. The certificate program provides ecosystem managers with basic skills for designing and managing ecosystem data collection programs and for using data to support decision-making.

**Effective Semester:** Fall 2018

**Ending Semester:** Fall 2023
