COMPUTER SCIENCE AND ENGINEERING

Graduate Program Head: Chita Das
Program Code: CSE
Campus(es): University Park (Ph.D., M.S., M.Eng.)

Degrees Conferred
- Doctor of Philosophy (Ph.D.)
- Master of Science (M.S.)
- Master of Engineering (M.Eng.)
- Dual-Title Ph.D., M.S., and M.Eng. in Computer Science and Engineering

The Graduate Faculty
- View (https://secure.gradsch.psu.edu/gpms/?searchType=fac&progs=CSE)

The department offers courses and is prepared to direct research in a variety of subfields of computer science and engineering, including VLSI, computer architecture, parallel/distributed processors and processing, multiprocessors, interconnection networks, pattern recognition and image processing, performance evaluation, reliability, fault tolerance, theory of computation, computer systems, numerical analysis and optimization, programming methodology, and analysis of algorithms. Research and instruction are supported by extensive computing facilities within the University's Information Technology Services and by the computer laboratories operated by the department.

Admission Requirements

Applicants apply for admission to the program via the Graduate School application for admission (https://gradschool.psu.edu/graduate-admissions/how-to-apply/). Requirements listed here are in addition to Graduate Council policies listed under GCAC-300 Admissions Policies (https://gradschool.psu.edu/graduate-education-policies/).

All applicants must provide a statement of purpose, resume/CV, 3 letters of recommendation as well as original copies of transcripts, degree/study certificates and/or diplomas, as appropriate. The Graduate Record Examinations (GRE) Aptitude Test (verbal, quantitative, and analytical) is required for all M.S. and M.Eng. applications. GRE scores are no longer required for doctoral applicants. Please review the CSE Graduate Admissions (https://www.eecs.psu.edu/students/graduate/EECS-How-to-apply-CSE.aspx) website for additional details.

The language of instruction at Penn State is English. English proficiency test scores (TOEFL/IELTS) may be required for international applicants. See GCAC-305 Admission Requirements for International Students (https://gradschool.psu.edu/graduate-education-policies/gcac-gcac-305/gcac-305-admission-requirements-international-students/) for more information.

For score reporting for TOEFL, the institution code is 2660.

International students seeking a Teaching Assistantship in Computer Science and Engineering will be required pass their AECOPT (https://aplngh.la.psu.edu/programs/about-the-aecopt/) exam before being appointed as a Teaching Assistant.

Degree Requirements

Master of Engineering (M.Eng.)
Requirements listed here are in addition to Graduate Council policies listed under GCAC-700 Professional Degree Policies (https://gradschool.psu.edu/graduate-education-policies/).

A minimum of 30 credits at the 400, 500, or 800 level is required, with a minimum of 18 credits at the 500 or 800 level, and at least 6 credits at the 500 level.

</tbody>
</table>

Spring Semester

12 credits of the following:
- CSE 500 - CSE 589
- CSE 597 Special Topics

Summer Semester

- CSE 820 Software & Hardware Project Management
- CSE 594 Research Topics
- 3

Total Credits: 30

The culminating experience for the program is a master's paper completed while the student is enrolled in CSE 594.

Master of Science (M.S.)
Requirements listed here are in addition to Graduate Council policies listed under GCAC-600 Research Degree Policies (https://gradschool.psu.edu/graduate-education-policies/).

A minimum of 31 credits at the 400, 500, 600, or 800 level is required, with at least 18 credits at the 500 and 600 level, combined. Students may choose to complete a thesis or a scholarly paper. Students choosing to complete a thesis must complete at least 6 credits in thesis research (600 or 610). Students choosing to complete a scholarly paper must complete at least 18 credits in 500-level courses.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

A student must pass the Ph.D. qualifying examination by the third regular semester after entering the program. After completion of most of the course work and meeting the English competency requirement, students must pass the Ph.D. comprehensive examination.

A dissertation must be completed under the direction of the Ph.D. committee and the results must be successfully defended in the final oral examination. To earn the Ph.D. degree, doctoral candidates must write a dissertation that is accepted by the Ph.D. committee, the head of the graduate program, and the Graduate School.

**Dual-Titles**

**Dual-Title M.Eng., M.S., and Ph.D. in Computer Science and Engineering and Operations Research**

Requirements listed here in addition to requirements listed in GCAC-208 Dual-Title Graduate Degree Programs (https://gradschool.psu.edu/graduate-education-policies/gcac-208-dual-titles/).

**Admissions Requirements**

Students must apply and be admitted to the graduate program in Computer Science and Engineering and The Graduate School before they can apply for admission to the dual-title degree program. After admission to their primary program, students must apply for admission to and meet the admissions requirements of the Operations Research dual-title program. Refer to the Admission Requirements section of the Operations Research Bulletin page. (http://bulletins.psu.edu/graduate/programs/majors/operations-research/) Doctoral students must be admitted into the dual-title degree program in Operations Research prior to taking the qualifying examination in their primary graduate program.

**Degree Requirements**

To qualify for the dual-title degree, students must satisfy the degree requirements for the degree they are enrolled in Computer Science and Engineering, listed on the Degree Requirements tab. In addition, students must complete the degree requirements for the dual-title in Operations Research, listed on the Operations Research Bulletin page (http://bulletins.psu.edu/graduate/programs/majors/operations-research/).

The qualifying examination committee for the dual-title Ph.D. degree will be composed of Graduate Faculty from Computer Science and Engineering and must include at least one Graduate Faculty member from the Operations Research program. Faculty members who hold appointments in both programs’ Graduate Faculty may serve in a combined role. There will be a single qualifying examination, containing elements of both Computer Science and Engineering and Operations Research. Dual-title graduate degree students may require an additional semester to fulfill requirements for both areas of study and, therefore, the qualifying examination may be delayed one semester beyond the normal period allowable.

In addition to the general Graduate Council requirements for Ph.D. committees (http://gradschool.psu.edu/graduate-education-policies/
Graduate courses carry numbers from 500 to 699 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Computer Science and Engineering (CSE) Course List (https://bulletins.psu.edu/university-course-descriptions/graduate/cse/)

**Learning Outcomes**

**Master of Engineering (M.Eng.)**

1. Graduates will be able to demonstrate understanding of advanced core principles and methods from selected sub-fields of Computer Science and Engineering at a depth consistent with their course of study.
2. Graduates will be able to apply their knowledge of selected sub-fields of Computer Science and Engineering to formulate and solve engineering problems.
3. Graduates will be able to analyze and synthesize knowledge within the field of Computer Science and Engineering to address a complex problem of practical relevance.
4. Graduates will be able to demonstrate proficiency in written communication appropriate to their discipline.
5. Graduates will be able to demonstrate an understanding of and a commitment to, academic integrity and the standards for professional practice within Computer Science and Engineering.

**Master of Science (M.S.)**

1. Graduates will be able to demonstrate understanding of advanced core principles and methods from selected sub-fields of Computer Science and Engineering at a depth consistent with their course of study.
2. Graduates will be able to apply their knowledge of selected sub-fields of Computer Science and Engineering to formulate and solve engineering problems.
3. Graduates will be able to analyze and synthesize knowledge within the field of Computer Science and Engineering to extend existing knowledge through a research experience or a course-based culminating experience.
4. Graduates will be able to demonstrate proficiency in oral and written communication appropriate to their discipline.
5. Graduates will be able to demonstrate an understanding of, and a commitment to, the standards of scholarship and research integrity within Computer Science and Engineering.

**Doctor of Philosophy (Ph.D.)**

1. Graduates will be able to demonstrate an understanding of advanced core principles and methods as well as modern research findings from selected sub-fields of Computer Science and Engineering (CSE) at a depth appropriate for a Ph.D. candidate.
2. Graduates will be able to apply their knowledge of selected sub-fields of Computer Science and Engineering in formulating and executing a research plan.
3. Graduates will be able to demonstrate the ability to analyze and synthesize appropriate literature to critically review their work in the context of the literature, and to formulate and defend conclusions based on their research that represent new scholarly contributions.
4. Graduates will be able to demonstrate high levels of proficiency in oral and written communication.
5. Graduates will be able to demonstrate an understanding of and a commitment to, the standards for scholarship and research integrity.
