### Suggested Academic Plan

**Brandywine Campus**

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

* Course requires a grade of C or better for the major
‡ Course requires a grade of C or better for General Education
# Course is an Entrance to Major requirement
† Course satisfies General Education and degree requirement

**University Requirements and General Education Notes:**

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

**Bachelor of Arts Requirements:**

Bachelor of Arts students must take 9 credits in Bachelor of Arts (B.A.) Fields (Humanities; Social and Behavioral Sciences; Arts; World Languages [2nd language or beyond the 12th credit level of proficiency in the 1st]; Natural Sciences; Quantification). The B.A. Fields courses may not be taken in the area of the student’s primary major. See your adviser and the Degree Requirements section (p. 2615) of this Bulletin.

Bachelor of Arts students must take 3 credits in Other Cultures. See your adviser and the full list of courses approved as Other Cultures courses (p. 2668).

**DuBois Campus**

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

**University Requirements and General Education Notes:**

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of 'C' or better.
Bachelor of Arts Requirements:

Bachelor of Arts students must take 9 credits in Bachelor of Arts (B.A.) Fields (Humanities; Social and Behavioral Sciences; Arts; World Languages [2nd language or beyond the 12th credit level of proficiency in the 1st]; Natural Sciences; Quantification). The B.A. Fields courses may not be taken in the area of the student’s primary major. See your adviser and the Degree Requirements section (p. 2615) of this Bulletin.

Bachelor of Arts students must take 3 credits in Other Cultures. See your adviser and the full list of courses approved as Other Cultures courses (p. 2668).

* Course requires a grade of C or better for the major
‡ Course requires a grade of C or better for General Education
# Course is an Entrance to Major requirement
† Course satisfies General Education and degree requirement

Program Notes:

- As long as two Arts (GA), two Humanities (GH), two Social and Behavioral Sciences (GS), and three Natural Sciences (GN) courses are taken across the eight semesters, the particular order in which these courses are taken is not relevant.
- The courses series listed above is only one of many possible ways to move through the LAS curriculum. A student’s career/graduate school plans should be considered in developing an individual academic plan. Be sure to consult an adviser in the LAS department when scheduling courses.
- LAS majors must take 3 credits in each of the following areas: Research Methods/Projects, Communication Skills, Theory/Application, Critical Analysis. See adviser for course recommendations.
- At least three (3) different disciplinary areas must be included in the 24 credit option area. Fifteen (15) credits must be at the 400 level including the 400-level capstone course. In addition, at least 9 credits must be from the humanities and/or social & behavioral sciences. See adviser for course recommendations.
- After completing the 4th semester, students intending to major in LAS must write a proposal outlining the selection of courses they plan to take, demonstrating how those courses work together to prepare them for their intended career choice. This proposal must be approved by LAS Program Coordinator at the Campus.

Mont Alto Campus

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). # Course is an Entrance to Major requirement
† Course satisfies General Education and degree requirement

University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of 'C' or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

Bachelor of Arts Requirements:

Bachelor of Arts students must take 9 credits in Bachelor of Arts (B.A.) Fields (Humanities; Social and Behavioral Sciences; Arts; World Languages [2nd language or beyond the 12th credit level of proficiency in the 1st]; Natural Sciences; Quantification). The B.A. Fields courses may not be taken in the area of the student’s primary major. See your adviser and the Degree Requirements section (p. 2615) of this Bulletin.

Bachelor of Arts students must take 3 credits in Other Cultures. See your adviser and the full list of courses approved as Other Cultures courses (p. 2668).

Advising Notes:

- Students must work with the LAS program coordinator to develop an academic plan for this degree. Entrance to this major requires an approved proposal, a cumGPA of 2.0 or higher, and a minimum of 27.5 credits. Students who have completed 91 credits may not enter this major. The five 400-level courses required for this major must be in a minimum of three different disciplines. Nine of the credits for the major must be from the humanities and social sciences.
- A student enrolled in an associate degree should contact the LAS program coordinator to develop and submit the academic plan before completing the associate degree. LASUC_BA can serve as a complement to the associate degree or as bridge from the associate degree to graduate studies (in physical therapy, occupational therapy, physician assistant, and more).
- With careful planning, students can complete a minor (examples: BIOL, BUS, CRIMJ, HDFS, HPA, and PSYCH). Minors require 6 credits unique from the courses required by the major, increasing the total degree credits from 120 to 126. Read more about planning a minor at https://handbook.psu.edu/content/minors.

Scranton Campus

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

**University Requirements and General Education Notes:**

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

**Bachelor of Arts Requirements:**

Bachelor of Arts students must take 9 credits in Bachelor of Arts (B.A.) Fields (Humanities; Social and Behavioral Sciences; Arts; World Languages [2nd language or beyond the 12th credit level of proficiency in the 1st]; Natural Sciences; Quantification). The B.A. Fields courses may...
not be taken in the area of the student’s primary major. See your adviser and the Degree Requirements section (p. 2615) of this Bulletin.

Bachelor of Arts students must take 3 credits in Other Cultures. See your adviser and the full list of courses approved as Other Cultures courses (p. 2668).

Advising Notes:

- LAS majors must take 3 credits in each of the following areas: Research Methods/Projects, Communication Skills, Theory/Application, Critical Analysis. See adviser for course recommendations.
- At least 3 different disciplinary areas must be included in the 24 credit option area. Fifteen (15) credits must be at the 400-level including the 400-level capstone course. In addition, at least 9 credits must be from the humanities and/or social and behavioral sciences. See adviser for course recommendations.
- After completing the 4th semester, students intending to major in LAS must write a proposal outlining the selection of courses they plan to take, demonstrating how those courses work together to prepare them for their intended career choice. This proposal must be approved by LAS Program Coordinator at Scranton.
- At least 3 credits must be taken in US cultures; at least 3 credits must be taken in IL cultures; at least 3 credits must be taken in Other Cultures.
- At least one lab course is required in General Education Natural Sciences (GN).
- At least 3 credits must be taken in Writing Across the Curriculum ("W" suffix course).
- A total of 123 credits is required for graduation.

Shenango Campus

Total Credits 124

* Course requires a grade of C or better for the major
‡ Course requires a grade of C or better for General Education
# Course is an Entrance to Major requirement
† Course satisfies General Education and degree requirement

University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

Bachelor of Arts Requirements:
Manufacturing Engineering Technology I, Certificate

Bachelor of Arts students must take 9 credits in Bachelor of Arts (B.A.) Fields (Humanities; Social and Behavioral Sciences; Arts; World Languages [2nd language or beyond the 12th credit level of proficiency in the 1st]; Natural Sciences; Quantification). The B.A. Fields courses may not be taken in the area of the student’s primary major. See your adviser and the Degree Requirements section (p. 2615) of this Bulletin.

Bachelor of Arts students must take 3 credits in Other Cultures. See your adviser and the full list of courses approved as Other Cultures courses (p. 2668).

Manufacturing Engineering Technology I, Certificate

Requirements for an undergraduate certificate may be completed at any campus location offering the specified courses for the certificate.
Program Description
This series of engineering courses is designed for the working adult who would like to augment their knowledge in the workplace with practical engineering courses. This certificate is designed to teach critical skills and knowledge needed to function effectively in today's manufacturing workplace.

What is Manufacturing Engineering Technology?
Manufacturing engineering is a field that covers the many processes involved in the production of a particular object.

You Might Like This Program If...
- You enjoy working with processes and materials.
- You want to add this knowledge and skills to your engineering portfolio.

Program Requirements
To earn an undergraduate certificate in Manufacturing Engineering Technology I, a minimum of 15 credits is required.

It is recommended that participants take the following classes in order.

<table>

Academic Advising
The objectives of the university's academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee's unit of enrollment will provide each advisee with a primary academic adviser, the information need to plan the chosen program of study, and referrals to other specialized resources.

Medical Laboratory Technology, A.S.
Begin Campus: Hazleton, Schuylkill
End Campus: Hazleton

Program Description
This two-calendar-year Medical Laboratory Technology major (four semesters, two summer sessions) is designed to provide the necessary general and technical training for hospital personnel between the level of the medical laboratory technician (certificate program) and the medical technologist (baccalaureate program). The course of study includes one year of intensive clinical experience at an affiliated hospital and the theoretical background necessary for the clinical procedures performed by the certified medical laboratory technician (associate degree program). Upon completion of program requirements, the student receives the associate degree and is eligible to sit for examinations leading to certification and registry as a medical laboratory technican.

The Medical Laboratory Technology Program at Penn State Hazleton is fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences

NAACLS,
5600 N. River Rd, Suite 720,
Rosemont, IL 60018-5119,
Phone 773-714-8880
Website: http://www.nacls.org

Graduates of this accredited MLT program are eligible to take national certification examinations such as the American Society of Clinical
Pathology (ASCP) Board of Certification exam, to become certified as an MLT (ASCP).

**What is Medical Laboratory Technology?**

A Medical Laboratory Technician (MLT) works with a team of pathologists, technologists, and technicians to analyze patient samples to provide information to the patient’s physician to detect illness, enable treatment, and ensure that the treatment will benefit the patient. The MLT works in all areas of the medical laboratory such as microbiology, chemistry, hematology, and transfusion services. MLTs are qualified to perform routine tests as well as more complex procedures including analyzing blood for chemical components, typing blood to ensure safe transfusion, and identifying bacteria and other microorganisms. MLTs also prepare specimens for examination, count cells, and look for abnormal cells in blood and body fluids. They use microscopes, cell counters, and automated equipment and computerized instruments to test specimens. After testing and verifying the results, they relay the results to patients.

MORE INFORMATION (http://hazleton.psu.edu/associate-science-medical-laboratory-technology)

**You Might Like This Program If...**

You might like this major if you are interested in science and enjoy working in a laboratory setting. MLTs are problem solvers and are accurate and reliable. They want to help patients in a medical setting but prefer not to have direct patient contact. They enjoy working with their hands and using technical instruments. Their work is interesting, challenging, and requires a love of life-long learning.

MORE INFORMATION (https://www.ascp.org/content/careers)

**Entrance to Major**

Students must have a minimum 2.0 GPA to change to this Associate degree after admission to the University.

**Additional Information**

Before beginning the clinical experience rotations at hospitals, students must meet the requirements listed at http://hazleton.psu.edu/program-clinical-prerequisites

**Degree Requirements**

For the Associate in Science degree in Medical Laboratory Technology, a minimum of 72 credits is required:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Education</td>
<td>21</td>
</tr>
<tr>
<td>Requirements for the Major</td>
<td>63-65</td>
</tr>
</tbody>
</table>

Scheduling of courses in summer session depends on campus location.

**General Education**

Connecting career and curiosity, the General Education curriculum provides the opportunity for students to acquire transferable skills necessary to be successful in the future and to thrive while living in interconnected contexts. General Education aids students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. These are requirements for all baccalaureate students and are often partially incorporated into the requirements of a program. For additional information, see the General Education Requirements (p. 2641) section of the Bulletin and consult your academic adviser.

**Foundations (grade of C or better is required.)**

- Quantification (GQ): 3 credits
- Writing and Speaking (GWS): 3 credits

**Knowledge Domains**

- Arts (GA): 3 credits
- Humanities (GH): 3 credits
- Social and Behavioral Sciences (GS): 3 credits
- Natural Sciences (GN): 3 credits

**Foundations or Knowledge Domains**

- A General Education course selected from GWS, GQ, GN, GA, GH, or GS, and may include Integrative Studies (Inter-domain or Linked) courses: 3 credits

The keystone symbol appears next to the title of any course that is designated as a General Education course. Program requirements may also satisfy General Education requirements and vary for each program.

12 of the 21 credits are included in the Requirements for the Major.

**University Degree Requirements**

**Cultures Requirement**

3 credits of United States (US) or International (IL) cultures coursework are required and may satisfy other requirements

**Writing Across the Curriculum**

3 credits required from the college of graduation and likely prescribed as part of major requirements.

**Total Minimum Credits**

A minimum of 60 degree credits must be earned for a associates degree. The requirements for some programs may exceed 60 credits. Students should consult with their college or department adviser for information on specific credit requirements.

**Quality of Work**

Candidates must complete the degree requirements for their major and earn at least a 2.00 grade-point average for all courses completed within their degree program.

**Limitations on Source and Time for Credit Acquisition**

Credit used toward degree programs may need to be earned from a particular source or within time constraints (see Senate Policy 83-80 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#83-80)). For more information, check the Suggested Academic Plan for your intended program.

**Requirements for the Major**

This includes 12 credits of General Education courses: 3 credits of GWS courses; 6 credits of GN courses; 3 credits of GQ courses.

To graduate, a student enrolled in the major must earn a grade of C or better in each course designated by the major as a C-required course, as specified by Senate Policy 82-44 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#82-44).

Suggested Academic Plan

Hazleton Campus

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

* Course requires a grade of C or better for the major
‡ Course requires a grade of C or better for General Education
# Course is an Entrance to Major requirement
† Course satisfies General Education and degree requirement
University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GN, GA, GH, and GS). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses can be completed for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

1. Choose one course from approved list: MATH 21, MATH 22, MATH 26, MATH 40 MATH 81, MATH 110, MATH 140, STAT 200, STAT 250
2. MICRB 150, and MICRB 151 practicum courses include experience at affiliated medical laboratory (total of 540 hours). Require admission into MLT Program.
3. These courses should be taken in summer session 1.
4. These courses should be taken in summer session 2.

Program Notes:

A minimum of 72 credits is required for graduation.

Career Paths

The two-year MLT program includes a two-semester clinical practicum experience in affiliated hospital laboratories. The MLT learns the most current laboratory techniques in a real laboratory setting.

Careers

You can find a career in a hospital laboratory, food processing industry, veterinary lab, state police or federal forensics lab, public health lab, cancer clinic, chemical company, pharmaceutical company, and more. You can choose to work in a medical lab or non-medical setting.

Opportunities for Graduate Studies

If an MLT graduate chooses to continue his/her education, the first year’s courses will transfer to a major in Microbiology, Medical Laboratory Science, Biology or related disciplines. Once an MLT graduate passes a national certification exam and is certified as MLT, earns a BS or BA in any major, and works in a hospital laboratory for at least two years, they can qualify to take a Medical Laboratory Scientist (MLS) certification exam. Bachelor’s degrees earned prior to MLT certification count toward the MLS qualification. This opens the door to careers as an educator, laboratory manager and specialist positions.

Medical Sciences, Certificate

Requirements for an undergraduate certificate may be completed at any campus location offering the specified courses for the certificate.

Program Description

The medical sciences certificate program is a one-year program designed for a select group of academically talented, highly motivated college graduates who do not have a science background. Courses are offered in a fixed-sequence, and students progress through as a part of a cohort. Students will work in a blended learning environment the majority of coursework will be completed through the Internet and self-study and come to the Penn State Delaware County campus approximately twice a month for laboratory work and exams. Upon completion, students will have the required science coursework to apply for admission to medical, dental, optometry, veterinary science, podiatry, physical therapy, physician.

Program Requirements

To earn an undergraduate certificate in Medical Sciences, a minimum of 39 credits is required.

Mining Technology, A.S.

Begin Campus: Fayette
End Campus: Fayette

PROGRAM CURRENTLY ON HOLD; NOT ACCEPTING NEW STUDENTS
Begin Date of Enrollment Hold: February 9, 2018

Program Description

The Associate of Science degree in Mining Technology blends basic sciences, mathematics, principles and practices of management, and applied courses in Mining Technology to prepare students for supervisory roles in the Mining industry. This major helps prepare students for either a production-oriented or a maintenance-oriented position in the mining industry. Graduates of this major, after serving the required apprenticeship, should be qualified to become certified managers in their field. All students complete a common core of classes, but must also choose to enroll in one of two emphases, Maintenance or Production.

Maintenance Emphasis

The maintenance emphasis prepares students to become maintenance supervisors. Initially, graduates may work as apprentice electricians or mechanics to gain experience in repairs and planned maintenance. After certification is obtained, they may become involved with maintenance planning, working as or with the chief mine mechanic or chief mine electrician.

Production Emphasis

The production emphasis helps prepare students to become mine supervisors or engineering aides. Initially, some of the duties are to run transit and act as survey party chief, keep mine maps up to date and make projections, take samples and run analyses, make time studies, and assist with materials handling layouts.

What is Mining Technology?

The Mining Technology program prepares students for either a production-oriented or a maintenance-oriented position in the mining industry. Graduates of the major, after serving the required apprenticeship, can be qualified to become certified managers in their field.

You Might Like This Major If...

• You have a strong interest in science, especially geology.
• You like to study mathematics and solve problems.
• You are hardworking and enjoy collaboration with others.
• Hands-on coursework is of interest to you.
• You are interested in the mining industry.
• You care about the environment.
• You are interested in employee safety and the laws and regulations that impact safety.

Entrance to Major

Students must have a minimum 2.0 GPA to change to this Associate degree after admission to the University.

Degree Requirements

For the Associate of Science degree in Mining Technology, a minimum of 67 credits is required:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Education</td>
<td>21</td>
</tr>
<tr>
<td>Requirements for the Major</td>
<td>58-59</td>
</tr>
</tbody>
</table>

General Education

Connecting career and curiosity, the General Education curriculum provides the opportunity for students to acquire transferable skills
necessary to be successful in the future and to thrive while living in interconnected contexts. General Education aids students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. These are requirements for all baccalaureate students and are often partially incorporated into the requirements of a program. For additional information, see the General Education Requirements (p. 2641) section of the Bulletin and consult your academic adviser.

### Foundations (grade of C or better is required.)
- **Quantification (GQ):** 3 credits
- **Writing and Speaking (GWS):** 3 credits

### Knowledge Domains
- **Arts (GA):** 3 credits
- **Humanities (GH):** 3 credits
- **Social and Behavioral Sciences (GS):** 3 credits
- **Natural Sciences (GN):** 3 credits

### Foundations or Knowledge Domains
- A General Education course selected from GWS, GQ, GN, GA, GH, or GS, and may include Integrative Studies (Inter-domain or Linked) courses: 3 credits

The keystone symbol appears next to the title of any course that is designated as a General Education course. Program requirements may also satisfy General Education requirements and vary for each program.

12 of these 21 credits are included in the Requirements for the Major.

### University Degree Requirements

#### Cultures Requirement
3 credits of United States (US) or International (IL) cultures coursework are required and may satisfy other requirements

#### Writing Across the Curriculum
3 credits required from the college of graduation and likely prescribed as part of major requirements.

### Total Minimum Credits
A minimum of 60 degree credits must be earned for a associates degree. The requirements for some programs may exceed 60 credits. Students should consult with their college or department adviser for information on specific credit requirements.

#### Quality of Work
Candidates must complete the degree requirements for their major and earn at least a 2.00 grade-point average for all courses completed within their degree program.

#### Limitations on Source and Time for Credit Acquisition
Credit used toward degree programs may need to be earned from a particular source or within time constraints (see Senate Policy 83-80 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#83-80)). For more information, check the Suggested Academic Plan for your intended program.

### Requirements for the Major
This includes 12 credits of General Education courses: 6 credits of GWS courses; 3 credits of GN courses; 3 credits of GQ courses.

To graduate, a student enrolled in the major must earn a grade of C or better in each course designated by the major as a C-required course, as specified by Senate Policy 82-44 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#82-44).

- MNGT 208 Mine Power Distribution
- MNGT 209 Mine Machinery Control Methods

#### Production Emphasis:
- MNGT 202 Mining Ventilation
- MNGT 213 Strata Control Methods
- MNGT 215 Mining Management II

### Academic Advising

The objectives of the university’s academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee’s unit of enrollment will provide each advisee with a primary academic adviser, the information need to plan the chosen program of study, and referrals to other specialized resources.

READ SENATE POLICY 32-00: ADVISING POLICY (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/32-00-advising-policy)
**Program Requirements**

To earn an undergraduate certificate in Mining Technology, a minimum of 18 credits is required.

**Natural Resources, Minor**

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.
Program Description

The Natural Resources minor can complement majors in the earth sciences and life sciences, and provides an introduction to field techniques and technical writing. Areas of specialized study can include, but are not limited to, environmental assessment, forest and wetland evaluation and management, and wildlife management. Professional opportunities include work in environmental monitoring, such as endangered species and wetland delineation, restoration of disturbed land, and management of forested lands and wildlife areas.

What is Natural Resources?

The Natural Resources minor is designed for students studying Earth Sciences and includes topics related to wildlife and forest technology.

You Might Like This Major If...

• You are interested in forests and wildlife topics.
• You enjoy watching Planet Earth.
• You prefer to be outside.
• You care about the environment and desire to preserve it.
• You want to complement your program of study with a unique focus.

Career Paths

The Natural Resources minor, added to your major of Earth Sciences will help to prepare you for a career or graduate study.

Careers

There are a variety of career options available to individuals interested in natural resources, including resource planning, restoration of disturbed lands, management of forested lands and wildlife areas, conservation and education within the field of natural resources.

Opportunities for Graduate Studies

You have many opportunities for graduate study including Natural Resource Management, Environmental Studies, Forest Ecology or Wildlife Science.

Occupational Therapy, A.S. (University College)

Begin Campus: DuBois, Mont Alto, Shenango

End Campus: DuBois, Mont Alto, Shenango

Program Description

This major helps graduates prepare to be occupational therapy assistants who are qualified to be employed by agencies that provide occupational therapy and related services. The goal of occupational therapy is to enable the client to be as independent as possible in the daily performance of self-care, productive, and leisure occupations. General education, basic science, and occupational therapy courses are followed by supervised field experience. Upon successful graduation from the program, students must sit for and successfully pass the National Board for Certification in Occupational Therapy (NBCOT) national certification examination to practice. Most states also require licensure as a condition for employment. A felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination and obtain licensure. NBCOT may be contacted at:

NBCOT
One Bank Street #300
Gaithersburg, MD 20878
Degree Requirements

For the Associate in Science degree in Occupational Therapy, a minimum of 69 credits is required:

**Total Credits 69**

1 GQ - Recommended GQ = MATH 17, MATH 21, STAT 100 or STAT 200.

**Advising Notes:**

As per ACOTE Standard A.3.5 Advance Notice to Students related to Criteria for Successful Completion and ACOTE Standard A.4.13 Progression, Retention, and Graduation from the OTA Program is as follows:

Successful completion of each segment of the OTA Program requires:

- Student earn a C or better in all OT courses (except OT 100S), BIOL 129, BIOL 141 & BIOL 142.
- OT courses must be taken in the semester designated on this Suggested Academic Plan for OTA.
- Student pass BIOL 129, BIOL 141, and BIOL 142 prior to taking OT 105W, OT 107 & OT 109 in the 3rd semester.
- Student pass ENGL 15, PSYCH 100, and HDFS 129 prior to entering the 3rd semester.
- When a student fails an OT course (except OT100S); they may not progress to next semester. Student will need to meet with advisor to discuss options of progression in the program.
- Courses meeting the GQ, GH, or GA requirements may be taken during any semester; however, it is recommended they are completed prior to the 4th semester (recommendations for GQ are as follows: MATH 17, MATH 21, STAT 100, or STAT 200).
- Student maintain 2.0GPA, in order to engage in OT 195A or OT195B Fieldwork Level I.
• All didactic degree requirements be completed with a 2.0 GPA or better prior to enrolling in OT 295A/B.
• OT 195A, OT 195B, OT 295A, and OT 295B dates & place of experience will be scheduled by the AFW Coordinator.

In order to graduate with an Associate in Science in Occupational Therapy degree:

• Student must maintain a 2.0 GPA per Academic Progress Policy 54-00, “To graduate, a degree candidate must complete the requirements for the candidate's major and earn at least a C (2.00) average for all courses taken at this University as stated in 82-40, subject to the conditions of 51-00.”
• Student must complete OT 295A/B within 18 months of completing the didactic requirements.

Total OTA program credits = 69

University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GN, GA, GH, and GS). Foundations courses (GWS and GQ) require a grade of 'C' or better.

Integrative Studies courses can be completed for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

Shenango Campus

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

* Course requires a grade of C or better for the major
‡ Course requires a grade of C or better for General Education
# Course is an Entrance to Major requirement
† Course satisfies General Education and degree requirement

University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GN, GA, GH, and GS). Foundations courses (GWS and GQ) require a grade of 'C' or better.

Integrative Studies courses can be completed for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

Program Notes

Students must complete a 3-credit course in "United States Cultures (US)" or a 3-credit course in "International Cultures (IL)."

Career Paths

Certified Occupational Therapy Assistants (COTA's) work in numerous practice settings. Across the lifespan, individuals engage in meaningful occupations. Learning, playing, working, resting, and caring for self and others are among the occupations of life. A physical or psychological challenge may hinder an individual, group, and/or community from participating fully in meaningful occupations. Occupational therapy makes it possible for people to maintain or reclaim independence. Following graduation from the nationally accredited program, students are eligible to take the National Board for Certification in Occupational Therapy (NBCOT) exam.

Careers

A Certified Occupational Therapy Assistant (COTA) supports individuals of all ages develop, recover, improve, or maintain the skills necessary for daily living, leisure, play, and work. COTA's work in public and private schools, early intervention programs, general, psychiatric, and pediatric hospitals, day treatment centers, hospices and home health agencies, rehabilitation hospitals and centers, skilled and intermediate care facilities, community living programs, community wellness centers, and/or hand therapy clinics.
Opportunities for Graduate Studies

Once you have completed the associate in science in occupational therapy and become a Certified Occupational Therapy Assistant, you can further your studies by obtaining a baccalaureate degree in psychology, occupational science, biobehavioral health, health and human development or another related degree. From this point, students can apply to an entry-level master's or doctoral program in occupational therapy.

Professional Resources

- American Occupational Therapy Association, Inc. (AOTA) (http://www.aota.org)
- Accreditation Council for Occupational Therapy Education (ACOTE) (http://www.acoteonline.org)
- National Board for the Certification of Occupational Therapy, Inc. (NBCOT) (http://www.nbcot.org)

Accreditation

The Penn State Occupational Therapy Assistant programs are fully accredited by ACOTE, which can be reached at:

Accreditation Council for Occupational Therapy Education
4720 Montgomery Lane
Suite 200
Bethesda, MD 20814-3449
ACOTE's telephone number, c/o AOTA, is 301-652-6611 @ extension 2042
www.acoteonline.org (http://www.acoteonline.org)

ACOTE is recognized as the accrediting agency for occupational therapy education by the United States Department of Education (USDE) and the Council on Higher Education Accreditation (CHEA).

Peace and Conflict Studies, Minor

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

Program Description

This minor may be pursued by students in any major. It is designed to help students take a coherent set of courses organized around the study of the sources of international conflict, peace movements, and peace building. The minor requires 18 credits, of which at least nine must be upper division, including six credits at the 400 level. Students will be required to take two prescribed courses, one introductory and one capstone. They also will take three credits of additional courses with an international focus and nine credits from a list of supporting courses, which includes the study of conflict in race relations, family, community, and the development of personal peace as a precursor to peace building. The full requirements with the lists of additional and supporting courses are available in the Peace and Conflict Studies program office. Substitutions for requirements require the permission of the Peace and Conflict Studies minor adviser at Penn State Brandywine.

See this minor list for Brandywine at http://ww.brandywine.psu.edu/Academics for additional information.

What is Peace and Conflict Studies?

Conflicts can range from interpersonal to a global level. Peace and Conflict Studies is an interdisciplinary program designed to give students in any program of study the skills and knowledge to understand and resolve conflicts peacefully. It may include the study of philosophy, political science, geography, economics, psychology, sociology, international relations, history, anthropology, religious studies, and gender studies, as well as a variety of others.
You Might Like This Program If...
- You enjoy studying and thinking about human behavior.
- You are interested in history and especially periods of conflict.
- You are a problem solver.
- You enjoy reading about issues from different perspectives.
- You want to add a unique skill set to your program of study.

Additional Courses
Additional Courses: Require a grade of C or better
- INTU 200 (both cannot be taken for credit) 3
- or PLSC 14 International Relations

Supporting Courses and Related Areas
Supporting Courses and Related Areas: Require a grade of C or better
- Select 3 credits from the additional course list in the Peace and Conflict Studies program office 3
- Select 6 credits from the supporting course list in the Peace and Conflict Studies program office 6

Academic Advising
The objectives of the university’s academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee’s unit of enrollment will provide each advisee with a primary academic adviser, the information need to plan the chosen program of study, and referrals to other specialized resources.

Career Paths
Through peace studies you can learn strategies to build trust and peacefully resolve conflict. These skills may be applied to all settings including families, organizations, communities and nations.

Careers
You might apply peace and conflict management skills if your goal includes a career in human service agencies, corporate negotiation, government, public relations, non-profit management or education.

Opportunities for Graduate Studies
You might find these skills helpful in graduate study in many areas, in addition to research or law school.

Physical Therapist Assistant, A.S.

Begin Campus: DuBois, Fayette, Hazleton, Mont Alto, Shenango
End Campus: DuBois, Fayette, Hazleton, Mont Alto, Shenango

Program Description
This major helps prepare individuals to provide physical therapy services under the direction of a physical therapist in an ethical, safe and effective manner. Students develop knowledge and skills in data collection and the appropriate use of equipment and exercise associated with various physical therapy treatment modalities. In order to accomplish these tasks, the major utilizes a combination of basic science and non-science course work coupled with courses specifically designed for the physical therapist assistant student. Students must progress through the program as prescribed by the recommended academic plan for their campus of admission. The program culminates with full-time clinical experiences.

The size of each entering class is limited so that optimal clinical experiences and practical application situations can be maintained. Clinical affiliations are maintained over a wide geographical area, and students may be required to make special housing and transportation arrangements for the clinical phase. Prior to the beginning of the clinical practicum, PTA students are required to complete clinical requirements that may include, but are not limited to: health examination, immunizations, FBI fingerprint check, child abuse clearance, state background check and drug screening. Students will be responsible for completion and purchase of the necessary checks/clearances through a University approved vendor and providing results to the clinical sites.

In addition to a PTA certification/licensure, many state licensing boards and clinical facilities require a criminal background check, child abuse clearance, and a drug screening. Students with criminal records should contact the physical therapy licensing board in the state they plan to practice prior to applying for admission to the PTA Program to inquire about potential restrictions for licensure.
What is a Physical Therapist Assistant?

Physical Therapist Assistants (PTAs) work as part of a team providing physical therapy services under the direction and supervision of a licensed physical therapist. PTAs implement interventions outlined in the physical therapist’s plan of care, collect data related to interventions, and modify selected interventions to progress patients to meet their individual goals. Individual treatment goals are designed to reduce pain, restore function, improve mobility and prevent disability. An Associate in Science Degree in Physical Therapist Assistant requires 5-semesters of study, including three full-time clinical practicums. The PTA Program prepares graduates to take a national examination for certification/licensure as a PTA.

You Might Like This Major If...

You might like this major if you are interested in working with people of all ages who have medical problems or other health-related conditions that limit their ability to move and perform functional activities in their daily lives. PTAs work under the direction and supervision of a licensed physical therapist to provide meaningful interventions, such as exercise, training for walking and other activities, and the use of physical agents and electrotherapy.

Entrance to Major

Students must request a Dean’s review to change to this Associate degree after admission to the University.

Additional Information

In addition to a PTA certification/licensure, many state licensing boards and clinical facilities require a criminal background check, child abuse clearance, and a drug screening. PTA students are required to complete clinical requirements that may include FBI fingerprint check, child abuse clearance, state background check and drug screening prior to the beginning of the clinical practicum. Students will be responsible for completion and purchase of the necessary checks/clearances through a University approved vendor and providing results to the clinical sites. Students with criminal records should contact the physical therapy licensing board in the state they plan to practice prior to applying for admission to the PTA Program to inquire about potential restrictions for licensure.

Degree Requirements

For the Associate in Science degree in Physical Therapist Assistant, a minimum of 70 credits is required:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Education</td>
<td>21</td>
</tr>
<tr>
<td>Requirements for the Major</td>
<td>61</td>
</tr>
</tbody>
</table>

General Education

Connecting career and curiosity, the General Education curriculum provides the opportunity for students to acquire transferable skills necessary to be successful in the future and to thrive while living in interconnected contexts. General Education aids students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. These are requirements for all baccalaureate students and are often partially incorporated into the requirements of a program. For additional information, see the General Education Requirements (p. 2641) section of the Bulletin and consult your academic adviser.

Foundations (grade of C or better is required.)

- Quantification (GQ): 3 credits
- Writing and Speaking (GWS): 3 credits

Knowledge Domains

- Arts (GA): 3 credits
- Humanities (GH): 3 credits
- Social and Behavioral Sciences(GS): 3 credits
- Natural Sciences (GN): 3 credits

Foundations or Knowledge Domains

- A General Education course selected from GWS, GQ, GN, GA, GH, or GS, and may include Integrative Studies (Inter-domain or Linked) courses: 3 credits

The keystone symbol appears next to the title of any course that is designated as a General Education course. Program requirements may also satisfy General Education requirements and vary for each program. 9-12 of these 21 credits are included in the Requirements for the Major.

University Degree Requirements

Cultures Requirement

3 credits of United States (US) or International (IL) cultures coursework are required and may satisfy other requirements

Writing Across the Curriculum

3 credits required from the college of graduation and likely prescribed as part of major requirements.

Total Minimum Credits

A minimum of 60 degree credits must be earned for a associates degree. The requirements for some programs may exceed 60 credits. Students should consult with their college or department adviser for information on specific credit requirements.

Quality of Work

Candidates must complete the degree requirements for their major and earn at least a 2.00 grade-point average for all courses completed within their degree program.

Limitations on Source and Time for Credit Acquisition

Credit used toward degree programs may need to be earned from a particular source or within time constraints (see Senate Policy 83-80 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#83-80)). For more information, check the Suggested Academic Plan for your intended program.

Requirements for the Major

This includes 9-12 credits of General Education courses: 3-6 credits of GWS courses; 3 credits of GN courses; 3-6 credits of GS courses.

To graduate, a student enrolled in the major must earn a grade of C or better in each course designated by the major as a C-required course, as specified by Senate Policy 82-44 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#82-44).

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GN, GA, GH, and GS). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses can be completed for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.
Academic Advising Notes:
A student’s career/graduate school plans should be considered in developing an individual academic plan. Be sure to consult an adviser in this department when scheduling courses.

Hazleton Campus
The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

University Requirements and General Education Notes:

GWS, GQ, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GN, GA, GH, and GS). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses can be completed for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

1 This course satisfies the University United States/International Cultures requirement.
2 This course satisfies the University Writing Across the Curriculum requirement. The clinical practicum component of this course is a three week full-time experience in a physical therapy practice setting.
3 This is a six week clinical practicum that is a full-time experience in a physical therapy practice setting.

Additional Notes:
Program Notes
Students are required to take a total of 3 credits in ARTS and 3 credits in HUM during the first 2 semesters.

Students are allowed to attend graduation ceremonies, but officially do not receive diploma until August, upon successful completion of their summer practicums.

A student’s career/graduate school plans should be considered in developing an individual academic plan. Be sure to consult an adviser in this department when scheduling courses.

Mont Alto Campus
The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Total Credits 70

1 PT 100 - Students are required to complete eight observation hours at two different clinical facilities in preparation for this course. See http://www.ma.psu.edu/Academics/Degrees/31395.htm for more information.

2 PT 271 - This course satisfies the University Writing Across the Curriculum requirement. The clinical practicum component of this course is a three week full-time experience in a physical therapy practice setting.

3 All students are required to be currently certified in CPR for participation in PT 395E, PT 395F, and PT 395G. Students may attain the certification through KINES 13, which can be taken any semester.

4 ENGL 202C, PSYCH 212, HDFS 229, PSYCH 270 - Students will select one of the following: ENGL 202C - Technical Writing (requires 4th semester standing), Psychology 212 Introduction to Developmental Psychology, HDFS 229 - Infant and Child Development, or PSYCH 270 - Introduction to Abnormal Psychology. Not all of these courses are offered each semester at the Mont Alto campus.

5 PT 395F - This is a six week clinical practicum that is a full-time experience in a physical therapy practice setting.

6 PT 395G - This is a six week clinical practicum that is a full-time experience in a physical therapy practice setting.

Advising Notes:

- A student’s career/graduate school plans should be considered in developing an individual academic plan. Be sure to consult with an adviser in this department when scheduling courses.

- Humanities or Arts: It is highly recommended the Arts, Humanities, and General Quantification courses be taken in the first two semesters of the PTA Program curriculum. The sequence in which these courses are taken is per student selection.

- Quantification: Choose any Quantification (GQ) course that is available at Mont Alto of the World Campus. Typically students elect to take one of the following: MATH 17 Finite Math, MATH 21 College Algebra, MATH 34 Math of Money, STAT 100 Statistical Concepts and Reasoning, STAT 200 Elementary Statistics (4 credits), PHIL 12 Symbolic Logic. Note that not all Quantification courses are available every semester at the Mont Alto campus. Other General Quantification courses may be available that will satisfy this General Education requirement of Associate Degree programs. It is highly recommended that the Arts, Humanities, and General Quantification courses be taken in the first two semesters of the PTA Program curriculum. The sequence in which these courses are taken is per student selection.

- US/IL requirement is recommended to completed through the GH/GA credits.

Opportunities for Graduate Studies

Many students choose to continue their education at Penn State and
complete bachelor's degrees in a variety of disciplines, including:
Rehabilitation and Human Services; Letters, Arts and Sciences; Human
Development and Family Studies; or other related field of study. Advisers
assist interested students in completing bachelor's degrees and meeting
prerequisite qualifications to apply for doctoral degrees in physical
therapy (DPT) or other field of graduate study.

Professional Resources

• American Physical Therapy Association (http://www.apta.org)
• Pennsylvania Physical Therapy Association (http://www.ppta.org)
• Federation of State Boards of Physical Therapy (http://
www.fsbpt.org)

Accreditation

The Associate of Science degree in Physical Therapist Assistant at Penn
State is accredited by the:

Commission on Accreditation in Physical Therapy Education (CAPTE)
1111 North Fairfax Street
Alexandria, Virginia 22314
Telephone: 703-706-3245
Email: accreditation@apta.org
Website: http://www.capteonline.org

Graduation from a physical therapist assistant education program
accredited by CAPTE is necessary for eligibility to sit for the licensure
examination, which is required in all states.

Accreditation by Campus

Penn State DuBois
The Physical Therapist Assistant Program at Penn State DuBois is
accredited by the Commission on Accreditation in Physical Therapy
Education (CAPTE), 1111 North Fairfax Street, Alexandria, VA 22314,
703-706-3245, accreditation@apta.org.

Penn State Fayette
The Physical Therapist Assistant Program at Penn State Fayette, The
Eberly Campus is accredited by the Commission on Accreditation in
Physical Therapy Education (CAPTE), 1111 North Fairfax Street,
Alexandria, VA 22314, 703-706-3245, accreditation@apta.org.

Penn State Hazleton
The Physical Therapist Assistant Program at Penn State Hazleton is
accredited by the Commission on Accreditation in Physical Therapy
Education (CAPTE), 1111 North Fairfax Street, Alexandria, VA 22314,
703-706-3245, accreditation@apta.org.

Penn State Mont Alto
The Physical Therapist Assistant Program at the Penn State Mont Alto
is accredited by the Commission on Accreditation in Physical Therapy
Education (CAPTE), 1111 North Fairfax Street, Alexandria, VA 22314,
703-706-3245, accreditation@apta.org. (accreditation@apta.org)

Penn State Shenango
The Physical Therapist Assistant Program at Penn State Shenango is
accredited by the Commission on Accreditation in Physical Therapy
Education (CAPTE), 1111 North Fairfax Street, Alexandria, VA 22314,
703-706-3245, accreditation@apta.org.

Dubois
1 College Place
DuBois, PA 15801
814-375-4773
Project and Supply Chain Management, B.S. (University College)

Begin Campus: Any Penn State Campus

End Campus: Beaver, Fayette, Greater Allegheny, Hazleton, Lehigh Valley, Mont Alto, New Kensington, Shenango, Schuylkill, Wilkes-Barre, Scranton, York

Program Description

The Project and Supply Chain Management major concentrates on developing knowledge, skills, and abilities in both project and supply chain management, dynamic and important disciplines in modern corporations. Project management skills include the development of new projects, and coordinating procurement and project delivery systems. Supply chain management emphasizes the integration of manufacturing and service operations, logistics, purchasing, and distribution that enable organizations to develop value-creating supply chain networks. The major provides students with an opportunity to develop the quantitative and people skills necessary to design and operate today's complex management systems. Students learn how to manage critical components in organizational supply chains, and apply business analytic methods for organizing and fully integrating supply chain practices throughout the organization.

Graduates are uniquely well-prepared for careers in some of the highest in-demand professions in the modern business and government environments, managing the supply chain and project initiatives in world-class business firms, public sector organizations, construction, IT organizations, third-party logistics providers, and goods and services distribution operations.

What is Project and Supply Chain Management?

It has been estimated that well over half of all activities in modern corporations are project-based. From developing a new product to constructing a new building, the list of efforts that organizations must plan, manage, and deliver (ideally on time and under budget) is nearly endless. At the same time, globalization creates a growing need for professionals who can effectively manage complex supply chains. The study of project and supply chain management emphasizes the integration of manufacturing and service operations, logistics, purchasing, and distribution—the functions that enable organizations to cultivate value-creating supply chain networks.

You Might Like This Major If...

• You’re not intimidated by large projects, or ones that have many moving parts.
• You are detail oriented.
• You are looking for a versatile, in-demand business degree.
• You are interested in pursuing a concurrent certificate in Enterprise Resource Planning (ERP) with SAP (available at Erie, the Behrend College and University College campuses, Beaver, Fayette, Greater Allegheny, Lehigh Valley, New Kensington, Schuylkill, Shenango, Wilkes-Barre and Scranton).

Entrance to Major

Entry to the Management major requires the completion of 5 entry-to-major courses: ACCTG 211, ECON 102, ENGL 15 or ENGL 30, MATH 110 or MATH 140, STAT 200 or SCM 200 and a 2.00 or higher cumulative grade-point average.

Degree Requirements

For the Bachelor of Science degree in Project and Supply Chain Management, a minimum of 120 credits is required:

<table>

General Education

Connecting career and curiosity, the General Education curriculum provides the opportunity for students to acquire transferable skills necessary to be successful in the future and to thrive while living in interconnected contexts. General Education aids students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. These are requirements for all baccalaureate students and are often partially incorporated into the requirements of a program. For additional information, see the General Education
Requirements (p. 2642) section of the Bulletin and consult your academic adviser.

The keystone symbol appears next to the title of any course that is designated as a General Education course. Program requirements may also satisfy General Education requirements and vary for each program.

**Foundations (grade of C or better is required.)**
- Quantification (GQ): 6 credits
- Writing and Speaking (GWS): 9 credits

**Knowledge Domains**
- Arts (GA): 6 credits
- Health and Wellness (GHW): 3 credits
- Humanities (GH): 6 credits
- Social and Behavioral Sciences (GS): 6 credits
- Natural Sciences (GN): 9 credits

**Integrative Studies (may also complete a Knowledge Domain requirement)**
- Inter-Domain or Approved Linked Courses: 6 credits

15 of these 45 credits are included in the Requirements for the Major.

**University Degree Requirements**

**First Year Engagement**
All students enrolled in a college or the Division of Undergraduate Studies at University Park, and the World Campus are required to take 1 to 3 credits of the First-Year Seminar, as specified by their college First-Year Engagement Plan.

Other Penn State colleges and campuses may require the First-Year Seminar; colleges and campuses that do not require a First-Year Seminar provide students with a first-year engagement experience.

First-year baccalaureate students entering Penn State should consult their academic adviser for these requirements.

**Cultures Requirement**
6 credits are required and may satisfy other requirements
- United States Cultures: 3 credits
- International Cultures: 3 credits

**Writing Across the Curriculum**
3 credits required from the college of graduation and likely prescribed as part of major requirements.

**Total Minimum Credits**
A minimum of 120 degree credits must be earned for a baccalaureate degree. The requirements for some programs may exceed 120 credits. Students should consult with their college or department adviser for information on specific credit requirements.

**Quality of Work**
Candidates must complete the degree requirements for their major and earn at least a 2.00 grade-point average for all courses completed within their degree program.

**Limitations on Source and Time for Credit Acquisition**
The college dean or campus chancellor and program faculty may require up to 24 credits of course work in the major to be taken at the location or in the college or program where the degree is earned. Credit used toward degree programs may need to be earned from a particular source or within time constraints (see Senate Policy 83-80 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#83-80)). For more information, check the Suggested Academic Plan for your intended program.

**Requirements for the Major**
This includes 15 credits of General Education courses: 6 credits of GQ courses; 6 credits of GS courses; 3 credits of GWS courses.

Each student must earn at least a grade of C in each 300- and 400-level course in the major field.

To graduate, a student enrolled in the major must earn a grade of C or better in each course designated by the major as a C-required course, as specified by Senate Policy 82-44 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#82-44).

The School of Business Administration offers a limited number of academically superior Bachelor of Science in Project and Supply Chain Management candidates the opportunity to enroll in an integrated, continuous program of study leading to both the Bachelor of Science in Project and Supply Chain Management and the Master of Business Administration. The ability to coordinate as well as concurrently pursue the two degree programs enables the students to earn both degrees in five years. Specifically, as many as twelve of the credits required for the master’s degree may be applied to both undergraduate and graduate degree programs. The Integrated Undergraduate-Graduate Program reduces the total number of credits needed to earn both degrees from 150 to 138.

Students in the IUG program must satisfy the requirements for both the Bachelor of Science in Project and Supply Chain Management and Master of Business Administration degrees. The total course load is reduced due to courses that can count towards both degrees. The first two years of the IUG program are identical to the first two years of the Bachelor of Science program. Students in the IUG program take three additional credits in their third year, and three fewer credits in their fourth year. The courses that count toward the Master of Business Administration degree requirements are included in the fourth year.

Student performance will be monitored on an ongoing basis. In addition, a formal evaluation of student academic performance will be performed when the students have completed 100 to 105 credits, which is at the end of the first semester of the senior year for typical students in the program. Students who have not maintained a 3.0 GPA in their graduate courses will be put on probationary status with respect to the IUG program. They will receive a warning letter regarding probationary status. Their ability to continue in the IUG program will be based on their academic performance in the last semester of their senior year.

Students have the choice of receiving the B.S. in Project and Supply Chain Management degree at the end of the fourth year or waiting until the end of the fifth year to receive both degrees. Students who elect to receive the B.S. degree at the end of the fourth year will pay graduate tuition for courses taken in the fifth year; students opting to receive both degrees at the end of the fifth year will pay undergraduate tuition for all five years.

If for any reason students admitted to the IUG program are unable to complete the requirements for the Master of Business Administration degree, the students will be permitted to receive the Bachelor of Science in Project and Supply Chain Management degree assuming all the undergraduate degree requirements have been satisfactorily completed. If the students successfully complete courses listed in the recommended schedule, they will satisfy the requirements for the Bachelor of Science degree by the end of their fourth year.

ADMISSION REQUIREMENTS

To initiate the application process, students must submit a resume, a personal statement including career goals and how MBA will enhance their career goals, transcripts of courses taken outside Penn State, two letters of recommendation, with at least one from the School of Business Administration faculty, and a plan of study that integrates both undergraduate and graduate requirements. A graduate faculty adviser in collaboration with the Director of MBA Program will help undergraduate candidates determine a sequence of courses that will prepare them for acceptance into the Integrated Undergraduate-Graduate (IUG) degree program.

The number of openings in the IUG program is limited. Applicants to the IUG program must have completed a minimum of 60 credits. Typical students would apply after completing between 60 and 90 credits, that is, after the fifth semester and before the end of the seventh semester. In addition, the applicants must earn a minimum of cumulative grade point average of 3.5 and complete the following Entry to Major courses or equivalent: ACCTG 211, ECON 102, ENGL 15 or ENGL 30, FIN 301, MATH 110 or MATH 140, MGMT 301, MKTG 301 and STAT 200 or SCM 200.

To formally apply, students must submit a completed graduate school application. The students should mention in the notes section that the application is for the IUG program in Business Administration. The Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) is not required for admission into the program; however, if students are interested in applying for a graduate assistantship, GMAT or GRE scores must be submitted by the end of the eighth semester.

Student applications will be evaluated based on their overall portfolio, in addition to the above requirements. In all cases, admission to the
program will be at the discretion of the Graduate Admissions Committee in Business Administration.

**DEGREE REQUIREMENTS**

Students in the IUG program must satisfy the degree requirements for both Bachelor of Science in Project and Supply Chain Management and Master of Business Administration degrees. The total course load is reduced due to the maximum of 12 credits that can count towards both degrees. All courses counted for both degrees must be at the 500- or 800-level.

**Academic Advising**

The objectives of the university’s academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee’s unit of enrollment will provide each advisee with a primary academic adviser, the information need to plan the chosen program of study, and referrals to other specialized resources.

University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).
W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

Fayette Campus

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

| MIS 404\† | 3 | Business Supporting or Approved Elective Course\* |
|           | 2 | Elective |
| Total Credits 121 |

* Course requires a grade of C or better for the major
‡ Course requires a grade of C or better for General Education
# Course is an Entrance to Major requirement
† Course satisfies General Education and degree requirement

1 BA 321 and BA 322 qualify for 6 credits towards the Business Supporting Area for the degree. MIS 404 also fulfills the requirements for the Business Supporting Courses or Approved Electives and students take this course for the ERP certificate with SAP. Students will need 9 more credits of Approved Elective Courses (consult with an adviser); any course at the 300-400- level requires a grade of C or higher.

**University Requirements and General Education Notes:**

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

### Program Notes:
- A minimum of 120 credits is required for graduation. Three P SCM courses (MIS 404, SCM 445, SCM 460) also satisfy requirements to earn the ERP with SAP Certificate.
- STAT 200: Students must not delay taking STAT 200 past semester 4, as it is a prerequisite for FIN 301 and SCM 301. It is also part of the criteria for entrance into the P SCM major.
- BA 321 and BA 322 count as this degree’s 6 credits in a business-supporting area. This degree’s 12 credits of supporting courses/related areas (sometimes called P SCM electives) reside in MIS 404 (3 credits), BA 495A (6 credits), and one other course (3 credits) of the student's choosing in consultation with an adviser.
- A student's career/graduate school plans should be considered in developing an individualized academic plan. Be sure to consult an adviser in this department and your Degree Audit when scheduling courses. The Degree Audit in LionPATH is your official check of graduation requirements.

### University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures). W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of 'C' or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

### Schuylkill Campus

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

### Program Notes:

- **STAT 200:** Students must not delay taking STAT 200 past semester 4, as it is a prerequisite for FIN 301 and SCM 301. It is also part of the criteria for entrance into the PSCM major.
- **BA 321** and **BA 322** count as this degree's 6 credits in a business-supporting area. This degree's 12 credits of supporting courses/related areas (sometimes called PSCM electives) reside in MIS 404 (3 credits), BA 495A (6 credits), and one other course (3 credits) of the student's choosing in coordination with adviser.
- A student's career/graduate school plans should be considered in developing an individualized academic plan. Be sure to consult an adviser in this department and your Degree Audit when scheduling courses. The Degree Audit in LionPATH is your official check of graduation requirements.

### Scranton Campus

### Career Paths

The B.S. in Project and Supply Chain Management is one of only a handful of undergraduate degree programs in this field. Graduates are uniquely prepared to work in project-intensive industries such as construction, insurance, information services and information technology, manufacturing, utilities, pharmaceuticals, third-party logistics, and goods and services distribution operations.

### Careers

Employers of recent B.S. in Project and Supply Chain Management graduates include Frito Lay, Fairpoint Communications, Pitney Bowes, Spyne, General Electric, Webtec Railway Electronics, Business Resource Group, Modern Industries, Eddie Bauer, Ferguson Enterprises, Unisys, Eastman Kodak, Tyco Electronics, and IBM.

### Opportunities for Graduate Studies

The B.S. in Project and Supply Chain Management can be a starting point for master's- and doctoral-level study of business administration, law, organizational behavior, corporate strategy, enterprise architecture, information technology, or another specialized discipline.

### Professional Resources

- Project Management Institute (https://www.pmi.org)

### Accreditation

The B.S. in Project and Supply Chain Management offered by the Black School of Business at Penn State Erie, The Behrend College, is accredited by AACSB International—The Association to Advance Collegiate Schools of Business. As the world's largest business education alliance, AACSB connects educators, students, and business to achieve a common goal: to create the next generation of great leaders. Synonymous with the highest standards of excellence since 1916, AACSB provides quality assurance, business education intelligence, and professional development services to over 1,500 member organizations and more than 785 accredited business schools worldwide. AACSB's mission is to foster engagement, accelerate innovation, and amplify impact in business education. For more information, visit: http://aacsb.edu.

**Psychology, B.A. (University College)**

**Begin Campus:** Any Penn State Campus

**End Campus:** Beaver, Brandywine, Fayette, Greater Allegheny, Hazleton, Lehigh Valley, Mont Alto, New Kensington, Schuylkill, Scranton, York

---

**Program Description**

The Psychology major will combine the knowledge, skills, and values of psychology with a liberal arts foundation. Students should:

- develop a knowledge base consisting of concepts, theory, empirical findings, and trends within psychology;
- understand and apply basic research methods in psychology;
- use critical thinking and the scientific approach to solve problems related to behavior and mental processes;
- apply psychological principles to personal and social issues;
- and be able to understand the gender, sexual orientation, race, ethnicity, culture, and class issues in psychological theory, research, and practice.

Students should also develop information and computer competence, communication skills, and develop realistic ideas about how to implement their psychology education in occupational pursuits in a variety of settings. The major may lead to either a Bachelor of Arts or a Bachelor of Science degree. The B.A. degree incorporates a broad exposure to the many facets of the field of psychology, in addition to the B.A. requirements. The B.S. degree provides the same exposure to the field of psychology and adds options in Science and Business to prepare students for more specific career directions. Students in both degree programs may also prepare for graduate school; research experience with faculty members is encouraged for such students.

**What is Psychology?**

Psychology is the scientific study of thought, behavior, and experience. Many people associate psychology with psychological therapy and the practice of clinical psychology. There are also many other important areas of scientific psychology, such as cognitive, developmental, industrial/organizational, and social psychology. What these subfields of psychology have in common is the use of the scientific method to understand human behavior and apply that understanding to the development of theory and practice. Psychologists are increasingly making use of neuroscience methods and theories to understand psychological phenomena. As a profession, psychology is related to fields such as health, education, marketing, human resources, social work, and more. The principles of psychology are relevant to almost all areas of human endeavor, and the career paths of psychology students reflect this wealth of possibilities.

**You Might Like This Program If...**

You are interested in people and in learning to use science to better understand them. As a major, you'll have opportunities to do research with faculty and to work in career-relevant settings.

MORE INFORMATION [here](http://altoona.psu.edu/academics/bachelors-degrees/psychology)

**Entrance to Major**

In order to be eligible for entrance to this major, a student must:

1. attain at least a C (2.00) cumulative grade-point average for all courses taken at the University; and
2. have third-semester classification [here](http://www.registrar.psu.edu/registration/semester_classification.cfm).
Degree Requirements

For the Bachelor of Arts degree in Psychology, a minimum of 124 credits is required:

General Education

Connecting career and curiosity, the General Education curriculum provides the opportunity for students to acquire transferable skills necessary to be successful in the future and to thrive while living in interconnected contexts. General Education aids students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. These are requirements for all baccalaureate students and are often partially incorporated into the requirements of a program. For additional information, see the General Education Requirements (p. 2642) section of the Bulletin and consult your academic adviser.

The keystone symbol appears next to the title of any course that is designated as a General Education course. Program requirements may also satisfy General Education requirements and vary for each program.

Foundations (grade of C or better is required.)

- Quantification (GQ): 6 credits
- Writing and Speaking (GWS): 9 credits

Knowledge Domains

- Arts (GA): 6 credits
- Health and Wellness (GHW): 3 credits
- Humanities (GH): 6 credits
- Social and Behavioral Sciences (GS): 6 credits
- Natural Sciences (GN): 9 credits

Integrative Studies (may also complete a Knowledge Domain requirement)

- Inter-Domain or Approved Linked Courses: 6 credits

0-4 of these 45 credits are included in the Requirements for the Major.

University Degree Requirements

First Year Engagement

All students enrolled in a college or the Division of Undergraduate Studies at University Park, and the World Campus are required to take 1 to 3 credits of the First-Year Seminar, as specified by their college First-Year Engagement Plan.

Other Penn State colleges and campuses may require the First-Year Seminar; colleges and campuses that do not require a First-Year Seminar provide students with a first-year engagement experience.

First-year baccalaureate students entering Penn State should consult their academic adviser for these requirements.

Cultures Requirement

6 credits are required and may satisfy other requirements

- United States Cultures: 3 credits
- International Cultures: 3 credits

Writing Across the Curriculum

3 credits required from the college of graduation and likely prescribed as part of major requirements.

Total Minimum Credits

A minimum of 120 degree credits must be earned for a baccalaureate degree. The requirements for some programs may exceed 120 credits. Students should consult with their college or department adviser for information on specific credit requirements.

Quality of Work

Candidates must complete the degree requirements for their major and earn at least a 2.00 grade-point average for all courses completed within their degree program.

Limitations on Source and Time for Credit Acquisition

The college dean or campus chancellor and program faculty may require up to 24 credits of course work in the major to be taken at the location or in the college or program where the degree is earned. Credit used toward degree programs may need to be earned from a particular source or within time constraints (see Senate Policy 83-80 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#83-80)). For more information, check the Suggested Academic Plan for your intended program.

B.A. Degree Requirements

Foreign Language (0-12 credits): Student must attain 12th credit level of proficiency in one foreign language. See the Placement Policy for Penn State Foreign Language Courses (p. 2636).

B.A. Fields (9 credits): Humanities, Social and Behavioral Sciences, Arts, Foreign Languages, Natural Sciences, Quantification (may not be taken in the area of the student’s primary major; foreign language credits in this category must be in a second foreign language or beyond the 12th credit level of proficiency in the first language)

Other Cultures (0-3 credits): Select 3 credits from approved list. Students may count courses in this category in order to meet other major, minor, elective, or General Education requirements, except for the General Education US/IL requirement.

3 of these 24 credits are included in the Requirements for the Major, General Education, or Electives and 0-12 credits are included in Electives if foreign language proficiency is demonstrated by examination.

Requirements for the Major

This includes 0-4 credits of General Education GQ courses.

A grade of C or better is required for all courses in the major. To graduate, a student enrolled in the major must earn at least a C grade in each course designated by the major as a C-required course, as specified by Senate Policy 82-44 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#82-44).

PSYCH 100  Introductory Psychology  3
PSYCH 301  Basic Research Methods in Psychology  4

Additional Courses
Additional Courses: Require a grade of C or better
PSYCH 200  Elementary Statistics in Psychology  4
or STAT 200  Elementary Statistics
Select 18 credits of the following, with a minimum of 3 credits from each of the following six categories:  18
Learning and Cognition
PSYCH 256  Introduction to Cognitive Psychology
PSYCH 261  Introduction to Psychology of Learning
PSYCH 268  Animal Minds
PSYCH 426  Language and Thought
PSYCH 427  L1 Acquisition
PSYCH 452  Learning and Memory
PSYCH 456  Advanced Cognitive Psychology
PSYCH 457  Psychology of Language
PSYCH 458  Visual Cognition
PSYCH 459  Attention and Information Processing
PSYCH 461  Advanced Conditioning and Learning
Social and Personality Psychology
PSYCH 221  Introduction to Social Psychology
PSYCH 231  Introduction to the Psychology of Gender
PSYCH 232  Cross-Cultural Psychology
PSYCH 238  Introduction to Personality Psychology
PSYCH 419  Psychology and a Sustainable World
PSYCH 420  Advanced Social Psychology
PSYCH 421  Self and Social Judgment
PSYCH 423  Social Psychology of Interpersonal/Intergroup Relationships
PSYCH 424  Applied Social Psychology
PSYCH 432  Multicultural Psychology in America
PSYCH 438  Personality Theory
PSYCH 479  The Psychology of Gender
Biological Bases of Behavior
PSYCH 253  Introduction to Psychology of Perception
PSYCH 260  Neurological Bases of Human Behavior
PSYCH 269  Evolutionary Psychology
PSYCH 441  Health Psychology
PSYCH 460  Comparative Psychology
PSYCH 462  Physiological Psychology
PSYCH 464  Behavior Genetics
PSYCH 475  Psychology of Fear and Stress
PSYCH 478  Clinical Neuropsychology
Developmental Psychology

PSYCH 281  Introduction to Industrial-Organizational Psychology
PSYCH 370  Psychology of the Differently-Abled
PSYCH 404  Principles of Measurement
PSYCH 408  Program Evaluation
PSYCH 443  Treatment and Education in Developmental Disabilities
PSYCH 444  Engineering Psychology
PSYCH 445  Forensic Psychology
PSYCH 470  Abnormal Psychology
PSYCH 471  Psychology of Adjustment and Social Relationships
PSYCH 473  Behavior Modification
PSYCH 476  Child Psychopathology
PSYCH 477  Mental Health Practicum with Children
PSYCH 481  Introduction to Clinical Psychology
PSYCH 482  Selection and Assessment in Organizations
PSYCH 484  Work Attitudes and Motivation
PSYCH 485  Leadership in Work Settings
Capstone Experience
PSYCH 439  History and Systems of Psychology
PSYCH 490  Senior Seminar in Psychology
PSYCH 493  Senior Thesis
PSYCH 494  Research Projects
PSYCH 495  Internship
PSYCH 496  Independent Studies
Select 12 credits of additional Psychology courses from any offered for a total of 30 credits of Psychology courses beyond PSYCH 100 and PSYCH 301  12

1 At least 15 of these 30 Additional Courses credits must be at the 400-level.

Program Learning Objectives
Beaver, Brandywine, greater allegheny, hazleton, and Scranton Campuses
Content Knowledge:
1. Students will demonstrate knowledge of major psychological concepts, theories, and empirical findings
2. Students will demonstrate the ability to apply psychological concepts and theories to empirical and real life situations.

Thinking Skills:
1. Students will use critical and creative thinking, skeptical inquiry, and the scientific approach to solve problems related to behavior and mental processes.
2. Students will demonstrate critical thinking in the analysis and evaluation of information to distinguish the scientific from the nonscientific.

Communication Skills:
1. Students will communicate effectively (in writing and/or orally) the results of a project or internship.
2. Students will demonstrate the ability to effectively extract central points and summarize psychological research literature and to write in the format of psychological research.

Research Skills:
1. Students will differentiate among the research methods used in psychology and apply the designs in evaluation or development of a research study.
2. Students will demonstrate the ability to analyze and interpret quantitative psychological data using the statistics and graphs.
3. Students will demonstrate understanding of qualitative research approaches in psychology.

Diversity and Ethical Considerations:
1. Students will show evidence of knowledge and appreciation for cultural diversity and relativity in human experience and for the complexity of human behavior and interactions.
2. Students will demonstrate knowledge, and the application of, basic principles of scientific and professional ethics.
3. Students will demonstrate sensitivity to ethical concerns and professionalism (including cultural considerations) in settings where applications of psychology and/or psychological research occur.

Career-Related Skills:
1. Students will demonstrate knowledge of professional options and required training for careers in the major subfields of psychology.
2. Students will demonstrate the ability to identify personally-relevant career options to implement their psychological knowledge, skills, and values in occupational pursuits in a variety of settings.

Alumni Success:
1. Students will demonstrate the ability to secure a job in their desired area and/or enter a graduate program in psychology or a related field.

Intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee's unit of enrollment will provide each advisee with a primary academic adviser, the information need to plan the chosen program of study, and referrals to other specialized resources.

* Course requires a grade of C or better for the major
‡ Course requires a grade of C or better for General Education
# Course is an Entrance to Major requirement
† Course satisfies General Education and degree requirement

University Requirements and General Education Notes:
US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).
W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.
GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.
Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

Bachelor of Arts Requirements:
Bachelor of Arts students must take 9 credits in Bachelor of Arts (B.A.) Fields (Humanities; Social and Behavioral Sciences; Arts; World Languages [2nd language or beyond the 12th credit level of proficiency in the 1st]; Natural Sciences; Quantification). The B.A. Fields courses may
not be taken in the area of the student’s primary major. See your adviser and the Degree Requirements section (p. 2615) of this Bulletin.

Bachelor of Arts students must take credits in Other Cultures. See your adviser and the full list of courses approved as Other Cultures courses (p. 2668).

**Total Credits 126**

* Course requires a grade of C or better for the major
‡ Course requires a grade of C or better for General Education
# Course is an Entrance to Major requirement
† Course satisfies General Education and degree requirement

**University Requirements and General Education Notes:**

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.
General Education Course

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

Bachelor of Arts Requirements:

Bachelor of Arts students must take 9 credits in Bachelor of Arts (B.A.) Fields (Humanities; Social and Behavioral Sciences; Arts; World Languages [2nd language or beyond the 12th credit level of proficiency in the 1st]; Natural Sciences; Quantification). The B.A. Fields courses may not be taken in the area of the student’s primary major. See your adviser and the Degree Requirements section (p. 2615) of this Bulletin.

Bachelor of Arts students must take 3 credits in Other Cultures. See your adviser and the full list of courses approved as Other Cultures courses (p. 2668).

Lehigh Valley Campus

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures). W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.
GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of 'C' or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

### Bachelor of Arts Requirements:

Bachelor of Arts students must take 9 credits in Bachelor of Arts (B.A.) Fields (Humanities; Social and Behavioral Sciences; Arts; World Languages [2nd language or beyond the 12th credit level of proficiency in the 1st]; Natural Sciences; Quantification). The B.A. Fields courses may not be taken in the area of the student's primary major. See your adviser and the Degree Requirements section (p. 2615) of this Bulletin.

Bachelor of Arts students must take 3 credits in Other Cultures. See your adviser and the full list of courses approved as Other Cultures courses (p. 2668).

1. Students must take 30 credits in PSYCH beyond PSYCH 100 and PSYCH 301W. Among these, students must take at least 15 credits at the 400-level and at least 3 credits in each of six categories: Learning and Cognition; Social and Personality Psychology; Biological Bases of Behavior; Developmental Psychology; Applied and Clinical Psychology; Capstone Experience. Consult the Psychology Program Coordinator for specific course options.

2. For BA fields courses, see department list or consult adviser. BA students must take 9 credits in "BA fields" courses (Humanities, Social and Behavioral Sciences [except psychology], Arts, Foreign Languages [ 2nd language or beyond the 12th credit level of proficiency in the first], Natural Sciences, Quantification). See your adviser.

3. Students must demonstrate or complete the third level of proficiency in one foreign language.

Total Credits 126

1. Students must take 30 credits in PSYCH beyond PSYCH 100 and PSYCH 301W. Among these, students must take at least 15 credits at the 400-level and at least 3 credits in each of six categories: Learning and Cognition; Social and Personality Psychology; Biological Bases of Behavior; Developmental Psychology; Applied and Clinical Psychology; Capstone Experience. Consult the Psychology Program Coordinator for specific course options.

2. For BA fields courses, see department list or consult adviser. BA students must take 9 credits in "BA fields" courses (Humanities, Social and Behavioral Sciences [except psychology], Arts, World Languages [ 2nd language or beyond the 12th credit level of proficiency in the first], Natural Sciences, Quantification). See your adviser.

3. Students must demonstrate or complete the third level of proficiency in one world language.

4. BA students must take 3 credits in other cultures courses. See your adviser.

5. During the fourth year, students must choose one capstone course from 5 options: PSYCH 490 Senior Seminar, PSYCH 493 Senior Thesis, PSYCH 494 Research Project, PSYCH 495 Psychology Practicum (internship), or PSYCH 496 Independent Studies.

Students must consult the Psychology Program Coordinator about prerequisites and requirements for these courses before registering. PSYCH 495 Psychology Practicum requires planning one semester in advance of starting the internship.
The course series listed below provides only one of the many possible ways to move through this curriculum. Bachelor of Arts Requirements:

Bachelor of Arts students must take 9 credits in Other Cultures. See your adviser and the full list of courses approved as Other Cultures courses (p. 2668).

University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

Bachelor of Arts Requirements:

Bachelor of Arts students must take 9 credits in Other Cultures. See your adviser and the full list of courses approved as Other Cultures courses (p. 2668).

Integrative Studies (either Inter-domain or Linked Courses)

Integrative Studies may be completed within the 30 Knowledge Domain credits and must be completed with either Inter-domain or Linked courses, not a combination of both. For Inter-domain courses, credit may apply to both Knowledge Domain designations but does not reduce the total number of credits within the Knowledge Domains and at least 3 credits of single-domain coursework are required in each of the 5 Knowledge Domains. Linked courses used for the Integrative Studies requirement must represent two different Knowledge Domains.
in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Total Credits 125-128

* Course requires a grade of C or better for the major
‡ Course requires a grade of C or better for General Education
# Course is an Entrance to Major requirement
† Course satisfies General Education and degree requirement

**University Requirements and General Education Notes:**

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of "C" or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

**Bachelor of Arts Requirements:**

Bachelor of Arts students must take 9 credits in Bachelor of Arts (B.A.) Fields (Humanities; Social and Behavioral Sciences; Arts; World Languages [2nd language or beyond the 12th credit level of proficiency in the 1st]; Natural Sciences; Quantification). The B.A. Fields courses may not be taken in the area of the student’s primary major. See your adviser and the Degree Requirements section (p. 2615) of this Bulletin.

Bachelor of Arts students must take 3 credits in Other Cultures. See your adviser and the full list of courses approved as Other Cultures courses (p. 2668).

1 Students must demonstrate or complete the third level of proficiency in one world language. Scheduling of world language course work follows the World Language Policy: http://www.psu.edu/dus/handbook/lang.html#policy
Students must take 30 credits in PSYCH beyond PSYCH 100 and PSYCH 301W. Among these, students must take at least 15 credits at the 400-level and at least 3 credits in each of six categories: Learning and Cognition; Social and Personality Psychology; Biological Bases of Behavior; Developmental Psychology; Applied and Clinical Psychology; Clapstone Experience. Consult the Psychology Program Coordinator for specific course options.

BA students must take 9 credits in "BA requirement courses (Humanities, Social and Behavior Sciences [except psychology], Arts, World Languages, [2nd language or beyond the 12th credit level of proficiency in the first], Natural Sciences, Quantification). See your adviser.

BA students must take 3 credits in other cultures courses. See your adviser.

During the fourth year, students must choose one capstone course from 5 options: PSYCH 490 Senior Seminar, PSYCH 493 Senior Thesis, PSYCH 494 Research project, PSYCH 495 Psychology Practicum (internship), or PSYCH 496 Independent Studies. Students must consult the Psychology Program Coordinator about prerequisites and requirements for these courses before registering. PSYCH 495 Psychology Practicum requires planning one semester in advance of starting the internship.

Career Paths

Graduates of our program enter the workforce or pursue additional education in a variety of programs, including both Master's and PhD programs in experimental, counseling, school, and clinical psychology.

Psychology, B.S. (University College)

Begin Campus: Any Penn State Campus

End Campus: Beaver, Brandywine, Fayette, Greater Allegheny, Hazleton, Lehigh Valley, Mont Alto, New Kensington, Schuylkill, Scranton, York

Program Description

The Psychology major will combine the knowledge, skills, and values of psychology with a liberal arts foundation. Students should:
• develop a knowledge base consisting of concepts, theory, empirical findings, and trends within psychology;
• understand and apply basic research methods in psychology;
• use critical thinking and the scientific approach to solve problems related to behavior and mental processes;
• apply psychological principles to personal and social issues;
• and be able to understand the gender, sexual orientation, race, ethnicity, culture, and class issues in psychological theory, research, and practice.

Students should also develop information and computer competence, communication skills, and develop realistic ideas about how to implement their psychology education in occupational pursuits in a variety of settings. The major may lead to either a Bachelor of Arts or a Bachelor of Science degree. The B.A. degree incorporates a broad exposure to the many facets of the field of psychology, in addition to the B.A. requirements. The B.S. degree provides the same exposure to the field of psychology and adds options in Science and Business to prepare students for more specific career directions. Students in both degree programs may also prepare for graduate school; research experience with faculty members is encouraged for such students.

What is Psychology?
Psychology is the scientific study of thought, behavior, and experience. Many people associate psychology with psychological therapy and the practice of clinical psychology. There are also many other important areas of scientific psychology, such as cognitive, developmental, industrial/organizational, and social psychology. What these subfields of psychology have in common is the use of the scientific method to understand human behavior and apply that understanding to the development of theory and practice. Psychologists are increasingly making use of neuroscience methods and theories to understand psychological phenomena. As a profession, psychology is related to fields such as health, education, marketing, human resources, social work, and more. The principles of psychology are relevant to almost all areas of human endeavor, and the career paths of psychology students reflect this wealth of possibilities.

You Might Like This Program If...
You are interested in people and in learning to use science to better understand them. As a major, you'll have opportunities to do research with faculty and to work in career-relevant settings.

MORE INFORMATION (http://altoona.psu.edu/academics/bachelors-degrees/psychology)

Entrance to Major
In order to be eligible for entrance to this major, a student must:
1. attain at least a C (2.00) cumulative grade-point average for all courses taken at the University; and
2. have third-semester classification (http://www.registrar.psu.edu/registration/semester_classification.cfm).

READ SENATE POLICY 37-30: ENTRANCE TO AND CHANGES IN MAJOR PROGRAMS OF STUDY (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/37-00-entrance-to-a-college-or-major)

Degree Requirements
For the Bachelor of Science degree in Psychology, a minimum of 124 credits is required:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Education</td>
<td>45</td>
</tr>
<tr>
<td>Electives</td>
<td>14-18</td>
</tr>
<tr>
<td>Requirements for the Major</td>
<td>65</td>
</tr>
</tbody>
</table>

General Education
Connecting career and curiosity, the General Education curriculum provides the opportunity for students to acquire transferable skills necessary to be successful in the future and to thrive while living in interconnected contexts. General Education aids students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. These are requirements for all baccalaureate students and are often partially incorporated into the requirements of a program. For additional information, see the General Education Requirements (p. 2642) section of the Bulletin and consult your academic adviser.

The keystone symbol appears next to the title of any course that is designated as a General Education course. Program requirements may also satisfy General Education requirements and vary for each program.

Foundations (grade of C or better is required.)
• Quantification (GQ): 6 credits
• Writing and Speaking (GWS): 9 credits

Knowledge Domains
• Arts (GA): 6 credits
• Health and Wellness (GHW): 3 credits
• Humanities (GH): 6 credits
• Social and Behavioral Sciences(GS): 6 credits
• Natural Sciences (GN): 9 credits

Integrative Studies (may also complete a Knowledge Domain requirement)
• Inter-Domain or Approved Linked Courses: 6 credits

0-4 of these 45 credits are included in the Requirements for the Major.

University Degree Requirements
First Year Engagement
All students enrolled in a college or the Division of Undergraduate Studies at University Park, and the World Campus are required to take 1 to 3 credits of the First-Year Seminar, as specified by their college First-Year Engagement Plan.

Other Penn State colleges and campuses may require the First-Year Seminar; colleges and campuses that do not require a First-Year Seminar provide students with a first-year engagement experience.

First-year baccalaureate students entering Penn State should consult their academic adviser for these requirements.

Cultures Requirement
6 credits are required and may satisfy other requirements
• United States Cultures: 3 credits
• International Cultures: 3 credits
Writing Across the Curriculum
3 credits required from the college of graduation and likely prescribed as part of major requirements.

Total Minimum Credits
A minimum of 120 degree credits must be earned for a baccalaureate degree. The requirements for some programs may exceed 120 credits. Students should consult with their college or department adviser for information on specific credit requirements.

Quality of Work
Candidates must complete the degree requirements for their major and earn at least a 2.00 grade-point average for all courses completed within their degree program.

Limitations on Source and Time for Credit Acquisition
The college dean or campus chancellor and program faculty may require up to 24 credits of course work in the major to be taken at the location or in the college or program where the degree is earned. Credit used toward degree programs may need to be earned from a particular source or within time constraints (see Senate Policy 83-80). For more information, check the Suggested Academic Plan for your intended program.

Requirements for the Major
This includes 0-4 credits of General Education GQ courses.

A grade of C or better is required for all courses in the major. To graduate, a student enrolled in the major must earn at least a C grade in each course designated by the major as a C-required course, as specified by Senate Policy 82-44.

Select 3 credits in social and behavioral sciences from department list 3

1 MATH 22 or MATH 110 recommended.

Program Learning Objectives
Beaver, Brandywine, Greater Allegheny, Hazleton, and Scranton Campuses

Content Knowledge:
1. Students will demonstrate knowledge of major psychological concepts, theories, and empirical findings
2. Students will demonstrate the ability to apply psychological concepts and theories to empirical and real life situations.

Thinking Skills:
1. Students will use critical and creative thinking, skeptical inquiry, and the scientific approach to solve problems related to behavior and mental processes.
2. Students will demonstrate critical thinking in the analysis and evaluation of information to distinguish the scientific from the nonscientific.

Communication Skills:
1. Students will communicate effectively (in writing and/or orally) the results of a project or internship.
2. Students will demonstrate the ability to effectively extract central points and summarize psychological research literature and to write in the format of psychological research.

Research Skills:
1. Students will differentiate among the research methods used in psychology and apply the designs in evaluation or development of a research study.
2. Students will demonstrate the ability to analyze and interpret quantitative psychological data using the statistics and graphs.
3. Students will demonstrate understanding of qualitative research approaches in psychology.

Diversity and Ethical Considerations:
1. Students will show evidence of knowledge and appreciation for cultural diversity and relativity in human experience and for the complexity of human behavior and interactions.
2. Students will demonstrate knowledge, and the application of, basic principles of scientific and professional ethics.
3. Students will demonstrate sensitivity to ethical concerns and professionalism (including cultural considerations) in settings where applications of psychology and/or psychological research occur.

Career-Related Skills:
1. Students will demonstrate knowledge of professional options and required training for careers in the major subfields of psychology.
2. Students will demonstrate the ability to identify personally-relevant career options to implement their psychological knowledge, skills, and values in occupational pursuits in a variety of settings.

Alumni Success:
1. Students will demonstrate the ability to secure a job in their desired area and/or enter a graduate program in psychology or a related field

York Campus
1. Knowledge and Application: Demonstrate knowledge and application of major concepts and theories.
2. Critical Thinking: Use critical thinking to solve problems & distinguish scientific from non-scientific.
3. Effective Communication: Demonstrate competence in comprehending, reading, writing, and orally communicating research.
4. Research Competence: Differentiate among the research methods.
5. Data Analysis and Problem-Solving: Demonstrate the ability to analyze and interpret quantitative and qualitative data.
6. Ethical Awareness: Demonstrate knowledge and the application of professional ethics.

Academic Advising
The objectives of the university’s academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee’s unit of enrollment will provide each advisee with a primary academic adviser, the information need to plan the chosen program of study, and referrals to other specialized resources.

* Course requires a grade of C or better for the major
† Course requires a grade of C or better for General Education
‡ Course is an Entrance to Major requirement
# Course is an Entrance to Major requirement
†† Course satisfies General Education and degree requirement

**University Requirements and General Education Notes:**

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of 'C' or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

### Science Option

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). * Course requires a grade of C or better for the major
† Course requires a grade of C or better for General Education
# Course is an Entrance to Major requirement
† Course satisfies General Education and degree requirement

### University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

### Brandywine Campus

#### Business Option

The course series listed below provides **only one** of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

* Course requires a grade of C or better for the major
† Course requires a grade of C or better for General Education
# Course is an Entrance to Major requirement
‡ Course satisfies General Education and degree requirement

University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, GS, and Integrative Studies. Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

1 Students must take 30 credits in PSYCH. Among these, students must take at least 15 credits at the 400-level and at least 3 credits in each of six categories: Learning and Cognition; Social and Personality Psychology; Biological Bases of Behavior; Developmental Psychology; Applied and Clinical Psychology; Capstone Experience.

Consult the Psychology Program Coordinator for specific course options.

2 BS Business Option students must take 24 credits in business option courses. Consult Psychology Program Coordinator for a list of course selections.

3 During the fourth year, students must choose one capstone course from 5 options: PSYCH 490 Senior Seminar, PSYCH 493 Senior Thesis, PSYCH 494 Research Project, PSYCH 495 Psychology Practicum (internship), or PSYCH 496 Independent Studies.

Consult the Psychology Program Coordinator about prerequisites and requirements for these courses before registering.

PSYCH 495 Psychology Practicum requires planning one semester in advance of starting the internship.

4 PSYCH 301 satisfies the Writing Across the Curriculum requirement

Science Option

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GH, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GH, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

1 Students must take 30 credits in PSYCH beyond PSYCH 100 and PSYCH 301W. Among these, students must take at least 15 credits at the 400-level and at least 3 credits in each of six categories: Learning and Cognition; Individual Differences, Personality, and Social Processes; Biological Bases of Behavior and Mental Processes; Development Changes in Behavior and Mental Processes Across the Life Span; History of Psychology, Socio-cultural Contexts, and Diversity Issues; Capstone Experience. Consult the psychology Program Coordinator for specific course selection.

2 BS Science Option students must take 24 credits of option-specific courses. Consult Psychology Program Coordinator for a list of course selections.

Mont Alto Campus

Business Option

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

### University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures). W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement. GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better. Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course. Integrative Studies (either Inter-domain or Linked Courses)

Integrative Studies may be completed within the 30 Knowledge Domain credits and must be completed with either Inter-domain or Linked courses, not a combination of both. For Inter-domain courses, credit may apply to both Knowledge Domain designations but does not reduce the total number of credits within the Knowledge Domains and at least 3 credits of single-domain coursework are required in each of the 5 Knowledge Domains. Linked courses used for the Integrative Studies requirement must represent two different Knowledge Domains.

### Science Option

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. **University Requirements and General Education Notes:**

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).
W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

Integrative Studies (either Inter-domain or Linked Courses)

Integrative Studies may be completed within the 30 Knowledge Domain credits and must be completed with either Inter-domain or Linked courses, not a combination of both. For Inter-domain courses, credit may apply to both Knowledge Domain designations but does not reduce the total number of credits within the Knowledge Domains and at least 3 credits of single-domain coursework are required in each of the 5 Knowledge Domains. Linked courses used for the Integrative Studies requirement must represent two different Knowledge Domains.

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.
GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

1. Students must take 30 credits in PSYCH beyond PSYCH 100 and PSYCH 301W. Among these, students must take at least 15 credits at the 400-level and at least 3 credits in each of six categories: Learning and Cognition; Individual Differences; Personality, and Social Processes; Biological Bases of Behavior and Mental Processes; Development Changes in Behavior and Mental Processes Across the Life Span; History of Psychology, Socio-cultural Contexts, and Diversity Issues; Capstone Experience. Consult the Psychology Program Coordinator for specific course options.

2. BS Business Option students must take 24 credits of option-specific courses. Consult Psychology Program Coordinator for a list of course selections.

3. During the fourth year, students must choose one capstone course from 5 options: PSYCH 490 Senior Seminar, PSYCH 493 Senior Thesis, PSYCH 494 Research project, PSYCH 495 Psychology Practicum (internship), or PSYCH 496 Independent Studies. Students must consult the Psychology Program Coordinator about prerequisites and requirements for these courses before registering. PSYCH 495 Psychology Practicum requires planning one semester in advance of starting the internship. During the fourth year, students must choose one capstone course from 5 options: PSYCH 490 Senior Seminar, PSYCH 493 Senior Thesis, PSYCH 494 Research project, PSYCH 495 Psychology Practicum (internship), or PSYCH 496 Independent Studies. Students must consult the Psychology Program Coordinator about prerequisites and requirements for these courses before registering. PSYCH 495 Psychology Practicum requires planning one semester in advance of starting the internship.

Career Paths
Graduates of our program enter the workforce or pursue additional education in a variety of programs, including both Master’s and PhD programs in experimental, counseling, school, and clinical psychology.

Radiological Sciences, A.S.

Begin Campus: New Kensington, Schuylkill

End Campus: New Kensington, Schuylkill

Program Description
For students interested in pursuing an education in the paramedical field of radiography (radiologic technology), the radiological sciences major meets the educational and clinical requirements for the graduate to function as an entry-level radiographer. Required course work is divided into three interrelated areas including general education, radiography specific, and clinical education components. During the clinical education component, students perform radiographic exams under the directed supervision of certified radiographers at multiple area clinical education settings. The clinical component emphasizes the concepts of team practice and patient-centered care. Both the radiography-specific course work and the clinical component are structured sequentially over six or seven consecutive semesters, commencing each fall semester. Upon successful completion of the 72-credit associate degree, the graduate will be eligible to attempt the American Registry of Radiologic Technologists (ARRT) examination for certification.

What is Radiological Sciences?
Radiography is a science combining medical imaging technology with human compassion. Radiologic technologists, often referred to as radiographers, apply their knowledge of physics, human anatomy and physiology to create permanent radiographic images that assist in the examination, diagnosis, and treatment of medical conditions in the body. These imaging professionals provide a wide range of services using technology founded on theoretical knowledge and scientific concepts. As a part of the healthcare team, the radiographers provide patient care using safe radiation practices; operate sophisticated technical equipment; exercise independent judgment; and make informed decisions daily. All program graduates are prepared, both academically and clinically, to join a healthcare team.

You Might Like This Program If...
• You have a desire to help people and a passion for patient care.
• You want to pursue a career that includes math and sciences.
• You want to be a part of diagnosis and treatment of patients.
• You want to pursue a career in the health field.
• You thrive in a field where technology is ever evolving.
• You have a passion for lifelong learning.

Entrance to Major
Students must have a minimum 2.0 GPA to change to this Associate degree after admission to the University.

Additional Information
Radiologic Science students are required to submit criminal background records, must have a complete physical, including documentation of required immunizations, Hepatitis B vaccine, current Tuberculosis (TB) screening test, routine drug testing and other medical tests as required by clinical facilities. Students are required to purchase liability insurance.

Degree Requirements
For the Associate in Science degree in Radiological Sciences, a minimum of 72 credits is required:

<table>
<thead>

<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Education</td>
<td>21</td>
</tr>
<tr>
<td>Requirements for the Major</td>
<td>66</td>
</tr>
</tbody>
</table>

General Education
Connecting career and curiosity, the General Education curriculum provides the opportunity for students to acquire transferable skills necessary to be successful in the future and to thrive while living in interconnected contexts. General Education aids students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. These are requirements for all baccalaureate students and are often partially incorporated into the requirements of a program. For additional information, see the General Education Requirements (p. 2641) section of the Bulletin and consult your academic adviser.

Foundations (grade of C or better is required.)
• Quantification (GQ): 3 credits
  • Writing and Speaking (GWS): 3 credits

Knowledge Domains
• Arts (GA): 3 credits
• Humanities (GH): 3 credits
• Social and Behavioral Sciences (GS): 3 credits
• Natural Sciences (GN): 3 credits

Foundations or Knowledge Domains
• A General Education course selected from GWS, GQ, GN, GA, GH, or GS, and may include Integrative Studies (Inter-domain or Linked) courses: 3 credits

The keystone symbol appears next to the title of any course that is designated as a General Education course. Program requirements may also satisfy General Education requirements and vary for each program.

15 of these 21 credits are included in the Requirements for the Major.

University Degree Requirements

Cultures Requirement
3 credits of United States (US) or International (IL) cultures coursework are required and may satisfy other requirements

Writing Across the Curriculum
3 credits required from the college of graduation and likely prescribed as part of major requirements.
Total Minimum Credits
A minimum of 60 degree credits must be earned for a associates degree. The requirements for some programs may exceed 60 credits. Students should consult with their college or department adviser for information on specific credit requirements.

Quality of Work
Candidates must complete the degree requirements for their major and earn at least a 2.00 grade-point average for all courses completed within their degree program.

Limitations on Source and Time for Credit Acquisition
Credit used toward degree programs may need to be earned from a particular source or within time constraints (see Senate Policy 83-80 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#83-80)). For more information, check the Suggested Academic Plan for your intended program.

Requirements for the Major
This includes 15 credits of General Education courses: 3 credits of GH courses; 3 credits of GN courses; 3 credits of GQ courses; 3 credits of GS; 3 credits of GWS courses.

To graduate, a student enrolled in the major must earn a grade of C or better in each course designated by the major as a C-required course, as specified by Senate Policy 82-44 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#82-44).

Program Learning Objectives
New Kensington Campus
Practice as Entry Level Technologists
1. The student will provide proper radiation protection.
2. The student will demonstrate proper positioning skills.
3. The student will evaluate diagnostic images.

Effectively Communicate in the Healthcare Environment
1. The student will demonstrate effective written communication skills.
2. The student will provide effective oral communication skills.
3. The student will treat patients with compassion.

Think Critically and Apply Problem Solving Skills in the Healthcare Environment
1. The student will manipulate technical factors to produce diagnostic images.
2. The student will modify procedures to meet patient needs.

Understand and Promote the Importance of Professional Growth and Development
1. The student will demonstrate professional behavior and participate in professional organizations.
2. The student will develop a career portfolio and plan for compliance within the profession.

Academic Advising
The objectives of the university’s academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee’s unit of enrollment will provide each advisee with a primary academic adviser, the information need to plan the chosen program of study, and referrals to other specialized resources.

READ SENATE POLICY 32-00: ADVISING POLICY (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/32-00-advising-policy)

Rehabilitation and Human Services, B.S. (University College)

Begin Campus: Any Penn State Campus

End Campus: Lehigh Valley, Hazleton, Wilkes-Barre

Program Description

This major helps prepare students for entry-level positions in a variety of human service settings, particularly settings that provide services to persons with physical, emotional, or mental disabilities. Graduates pursue employment in a variety of settings including rehabilitation centers, drug and alcohol programs, senior citizens centers, community mental health programs, programs for people with intellectual disabilities, corrections systems, and hospitals.

Increasing opportunities are available in private for-profit insurance programs for the industrially injured, and in employee assistance programs within business and industry. Well-planned use of electives and internships allows for specialization. The full-semester (15-credit) internship is provided under the supervision of professionals in human service agencies. These intensive "hands-on" experiences are frequently avenues for employment since the internship is completed during the senior year. Students may not go on internship until they have successfully completed all other course work. Students are encouraged to participate in volunteer experiences that provide opportunities to work with people with disabilities. Students are encouraged to declare a minor in a related area and should be discussed with the student’s adviser. The major also helps prepare students for graduate study in many human service professional disciplines such as rehabilitation counseling, school counseling, occupational therapy, physical therapy and social work.

You Might Like This Program If...

You enjoy learning about human development, diversity, health and disability, treatment interventions, advocating and working directly with people, and solving individual problems using applied interpersonal skills.
Entrance to Major
Baccalaureate degree candidates must have a minimum 2.0 GPA to be admitted to the Rehabilitation and Human Services (RHS) major; thereafter, students must earn a C or better in all RHS required courses.

Degree Requirements
For the Bachelor of Science degree in Rehabilitation and Human Services, a minimum of 120 credits is required:

General Education
Connecting career and curiosity, the General Education curriculum provides the opportunity for students to acquire transferable skills necessary to be successful in the future and to thrive while living in interconnected contexts. General Education aids students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. These are requirements for all baccalaureate students and are often partially incorporated into the requirements of a program. For additional information, see the General Education Requirements (p. 2642) section of the Bulletin and consult your academic adviser.

The keystone symbol appears next to the title of any course that is designated as a General Education course. Program requirements may also satisfy General Education requirements and vary for each program.

Foundations (grade of C or better is required.)
- Quantification (GQ): 6 credits
- Writing and Speaking (GWS): 9 credits

Knowledge Domains
- Arts (GA): 6 credits
- Health and Wellness (GHW): 3 credits
- Humanities (GH): 6 credits
- Social and Behavioral Sciences (GS): 6 credits
- Natural Sciences (GN): 9 credits

Integrative Studies (may also complete a Knowledge Domain requirement)
- Inter-Domain or Approved Linked Courses: 6 credits

12-14 of these 45 credits are included in the Requirements for the Major.

University Degree Requirements
First Year Engagement
All students enrolled in a college or the Division of Undergraduate Studies at University Park, and the World Campus are required to take 1 to 3 credits of the First-Year Seminar, as specified by their college First-Year Engagement Plan.

Other Penn State colleges and campuses may require the First-Year Seminar; colleges and campuses that do not require a First-Year Seminar provide students with a first-year engagement experience.

First-year baccalaureate students entering Penn State should consult their academic adviser for these requirements.

Cultures Requirement
6 credits are required and may satisfy other requirements
- United States Cultures: 3 credits
- International Cultures: 3 credits

Writing Across the Curriculum
3 credits required from the college of graduation and likely prescribed as part of major requirements.

Total Minimum Credits
A minimum of 120 degree credits must be earned for a baccalaureate degree. The requirements for some programs may exceed 120 credits. Students should consult with their college or department adviser for information on specific credit requirements.

Quality of Work
Candidates must complete the degree requirements for their major and earn at least a 2.00 grade-point average for all courses completed within their degree program.

Limitations on Source and Time for Credit Acquisition
The college dean or campus chancellor and program faculty may require up to 24 credits of course work in the major to be taken at the location or in the college or program where the degree is earned. Credit used toward degree programs may need to be earned from a particular source or within time constraints (see Senate Policy 83-80 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#83-80)). For more information, check the Suggested Academic Plan for your intended program.

Requirements for the Major
This includes 12-14 credits of General Education courses: 6 credits of GS courses; 3-4 credits of GQ courses; 3-4 credits of GN courses.

To graduate, a student enrolled in the major must earn a grade of C or better in each course designated by the major as a C-required course, as specified by Senate Policy 82-44 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#82-44).

Prescribed Courses: Require a grade of C or better

RHS 300  Introduction to Rehabilitation and Human Services 3
RHS 301  Introduction to Counseling as a Profession 3
RHS 302  Client Assessment in Rehabilitation and Human Services 3
RHS 303  Group Work in Rehabilitation Practice and Human Services 3
RHS 400  Case Management and Communication Skills 3
RHS 401  Community Mental Health Practice and Services 3
RHS 402  Children and Families in Rehabilitation Settings and Human Services 3
1. Accomplish mastery in theoretical models of disability, definitions of disability, barriers present to people with disabilities, systemic challenges and economic disadvantages caused by disability, effects on employment on disabled individuals and the effects of trauma.

2. Demonstrate working knowledge of vocational rehabilitation systems, centers for independent living, transition programs, substance abuse and addiction treatment programs, mental health programs, and other community-based support programs.

3. Apply the appropriate principles for community inclusion and integration including, but not limited to, rehabilitation philosophy, client exploration on resources, and collaboration with agencies and related professionals.

4. Produce lucid documents, deliver effective presentations, communicate effectively in a professional manner and possess effective group facilitation skills.

5. Build and use effective teamwork skills and understand culture diversity within professional ranks.

6. Understand the professional, ethical and social responsibilities of their professional actions, and produce evidence of valuing diversity.

7. Demonstrate knowledge of discrimination against individuals with disabilities, legislative efforts to curtail such discrimination and an understanding of advocacy techniques and resources.

8. Demonstrate a working knowledge of ethical codes, malpractice, and the appropriate federal and state regulations.

9. Possess the adequate field experience and provide evidence of professional growth during this experience.

10. Have a respect for diversity and knowledge of contemporary, professional, societal and global issues.

11. Appreciate the value and necessity for sustained learning within and beyond their discipline.

12. Possess knowledge of the various aspects of counseling, including background information on the diverse theoretical orientations, interventions used, populations served, and research in which it is grounded.

13. Demonstrate an understanding of essential elements and dynamics for conducting groups and various team-related activities. Apply a foundational understanding of group work and experiences within RHS settings.

14. Develop knowledge of both professional and popular theories regarding mental illness and abnormal behavior. Explore and possess knowledge concerning abnormal behavior theories from the medical/biological, behavioral, cognitive, humanistic, existential, psychoanalytic, and social models of mental health disorders.

### Lehigh Valley Campus

#### Disciplinary Knowledge and Application

1. Demonstrate knowledge of theoretical models of disability, definitions of disability, barriers that exist for people with disabilities (inc. employment barriers), systemic challenges and economic disadvantages caused by disability.

2. Demonstrate working knowledge and locate appropriate resources for individuals and families with a variety of needs (e.g., vocational rehabilitation systems, centers for independent living, transition programs substance abuse and addiction treatment programs and other community-based support programs to address client needs).

3. Appropriately, systematically, and accurately assess clients for a range of strengths and needs and make recommendations for services to address those needs and increase client self-sufficiency and empowerment.

4. Develop and monitor treatment plans by applying principles for community inclusion and integration including, but not limited to, rehabilitation and recovery philosophy, client exploration of resources, and collaboration with agencies and related professionals.

5. Demonstrate knowledge of discrimination against individuals with disabilities, legislative efforts to curtail such discrimination and advocacy resources.

#### Professional Communication

1. Communicate effectively in a professional manner by producing articulate and well-researched documents and delivering effective presentations.

2. Interact productively and professionally with a team of stakeholders as both a leader and a member.

3. Develop a facilitative relationship with clients and their families through individual and group sessions.

#### Professional Ethics

1. Practice professional, ethical, and social behaviors, which demonstrate non-discrimination, empathy and respect for diversity and knowledge of contemporary professional and societal issues.

2. Demonstrate knowledge of ethical codes and professional conduct, and the applicable federal and state regulations.

### Academic Advising

The objectives of the university’s academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of
both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee's unit of enrollment will provide each advisee with a primary academic adviser, the information need to plan the chosen program of study, and referrals to other specialized resources.

University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

Career Paths

The RHS major provides excellent preparation specifically for graduate programs leading to professions such as occupational therapy, counseling, social work, and physical therapy. Advising of courses outside the major for electives are provided in order to enhance competitiveness of graduate school applications.

MORE INFORMATION (https://ed.psu.edu/epcse/rhs/resources/rhsinterestareas)

Careers

RHS allows students to pursue a variety of employment options as case workers and direct service providers in alcohol and other drug treatment centers, correctional facilities, mental health agencies, private non-profit rehabilitation centers, private-for-profit rehabilitation agencies, human resources, programs for children and youth, programs for older adults, public welfare agencies, rehabilitation hospitals, schools, social service agencies, and vocational rehabilitation programs.

MORE INFORMATION (https://ed.psu.edu/epcse/rhs/resources/careers-in-rehabilitation)

Opportunities for Graduate Studies

To prepare students for graduate studies, students can work with faculty on independent studies and can petition to take graduate courses within the department. For qualified students, we also offer the Schreyer Honors Program (https://www.shc.psu.edu).

MORE INFORMATION (https://ed.psu.edu/epcse/rhs/resources/careers-in-rehabilitation)

Accreditation

The College of Education educator preparation program is currently NCATE accredited and is seeking accreditation by the Council for the Accreditation of Education Preparation (CAEP) in Spring 2019. CAEP advances excellence in educator preparation through evidence-based accreditation that assures quality and supports continuous improvement to strengthen P-12 student learning.

Science, B.S. (University College)

Begin Campus: Any Penn State Campus

End Campus: York, Scranton
Program Description

Not all options are available at every campus. Contact the campus you are interested in attending to determine which options are offered.

The Science major is an interdisciplinary degree that aims to provide a broad, general education in science. The Bachelor of science (B.S.) curriculum is designed specifically for students who have education goals relating to scientific theory and practice and who require a high degree of flexibility to obtain their educational objectives. After completing foundation courses in calculus, chemistry, physics, and the life sciences, students will select additional science courses from designated areas. A large number of supporting credits permit students to readily include significant breadth or specialization into their undergraduate curriculum. Some examples include minors in business, computer and information science, education, kinesiology, or other fields. The degree allows students throughout the Commonwealth to become familiar with both the theory and the practice of science. It can help prepare students for various careers in pharmaceutical, biotechnical, chemical, medical, and agricultural industries. The degree can also be tailored to meet the specific requirements of professional programs such as medical, dental, or pharmacy schools. The General Science option of the B.S. Science degree allows for the most flexibility. Achievement in a more specialized set of goals can be met by selecting one of the other B.S. options offered:

- Biological Sciences and Health Professions Option
- Legal Studies, Government Service, Public Policy Option
- Life Sciences Option
- Mathematical Sciences Option
- Physical Sciences Option

Not all of these options are available at all locations, and there are minor distinctions of the core curriculum at some locations, so see the Science program director at your College for further details.

Two-Year Preprofessional Preparation

The first two years of the Science major (62 credits) can meet the preprofessional needs of those interested in admission to some schools of pharmacy, physical therapy, optometry, nursing, and physician assistant training. Successful students can then transfer after two years of undergraduate study to the professional school to which they are admitted. Note, however, that no Penn State degree can be awarded after only two years (62 credits) of study in the Science major. Also, note that the abbreviated two-year curriculum alone does not prepare students for admission to professional schools of general medicine, veterinary medicine, or dental medicine. Consult with your college's health sciences professional adviser for additional information.

What is Science?

The Science major provides a broad and interdisciplinary foundation in the natural sciences. The Science BS program uses the principles of chemistry, physics, and life sciences to understand how these integrate over general areas including biological sciences and health professions, public policy, and science research and development.

You Might Like This Program If...

- You like learning by doing hands-on experiments.
- You are curious about the natural world and how science disciplines come together to explore and understand it.
- You are intrigued by science and desire a career in current and emerging interdisciplinary science disciplines, health professions, or melding science with law, policy or business.

In order to be eligible for entrance to the Science major, a student at any location must have:

1. attained at least a 2.00 cumulative grade-point average;
2. completed MATH 140 with a grade of C or better;
3. completed at least two of the following courses, BIOL 110; CHEM 110; PHYS 211 or PHYS 250, with a grade of C or better.

Degree Requirements

For the Bachelor of Science degree in Science, a minimum of 124 credits is required, with at least 15 credits at the 400 level:

General Education

Connecting career and curiosity, the General Education curriculum provides the opportunity for students to acquire transferable skills necessary to be successful in the future and to thrive while living in interconnected contexts. General Education aids students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. These are requirements for all baccalaureate students and are often partially incorporated into the requirements of a program. For additional information, see the General Education Requirements (p. 2642) section of the Bulletin and consult your academic adviser.

The keystone symbol appears next to the title of any course that is designated as a General Education course. Program requirements may also satisfy General Education requirements and vary for each program.

Foundations (grade of C or better is required.)

- Quantification (GQ): 6 credits
- Writing and Speaking (GWS): 9 credits

Knowledge Domains

- Arts (GA): 6 credits
- Health and Wellness (GHW): 3 credits
- Humanities (GH): 6 credits
- Social and Behavioral Sciences (GS): 6 credits
- Natural Sciences (GN): 9 credits

Integrative Studies (may also complete a Knowledge Domain requirement)

- Inter-Domain or Approved Linked Courses: 6 credits

15 of these 45 credits are included in the Requirements for the Major.

University Degree Requirements

First Year Engagement

All students enrolled in a college or the Division of Undergraduate Studies at University Park, and the World Campus are required to take 1 to 3 credits of the First-Year Seminar, as specified by their college First-Year Engagement Plan.
Other Penn State colleges and campuses may require the First-Year Seminar; colleges and campuses that do not require a First-Year Seminar provide students with a first-year engagement experience.

First-year baccalaureate students entering Penn State should consult their academic adviser for these requirements.

**Cultures Requirement**

6 credits are required and may satisfy other requirements

- United States Cultures: 3 credits
- International Cultures: 3 credits

**Writing Across the Curriculum**

3 credits required from the college of graduation and likely prescribed as part of major requirements.

**Total Minimum Credits**

A minimum of 120 degree credits must be earned for a baccalaureate degree. The requirements for some programs may exceed 120 credits. Students should consult with their college or department adviser for information on specific credit requirements.

**Quality of Work**

Candidates must complete the degree requirements for their major and earn at least a 2.00 grade-point average for all courses completed within their degree program.

**Limitations on Source and Time for Credit Acquisition**

The college dean or campus chancellor and program faculty may require up to 24 credits of course work in the major to be taken at the location or in the college or program where the degree is earned. Credit used toward degree programs may need to be earned from a particular source or within time constraints (see Senate Policy 83-80). For more information, check the Suggested Academic Plan for your intended program.

**Requirements for the Major**

This includes 15 credits of General Education courses: 9 credits of GN courses; 6 credits of GQ courses.

To graduate, a student enrolled in the major must earn a grade of C or better in each course designated by the major as a C-required course, as specified by Senate Policy 82-44. For more information, check the Suggested Academic Plan for your intended program.

PHYS 211 General Physics: Mechanics and General Physics: Electricity and Magnetism and General Physics: Fluids and Thermal Physics and General Physics: Wave Motion and Quantum Physics

PHYS 250 Introductory Physics I and Introductory Physics II

Supporting Courses and Related Areas

Select 20-22 credits from program list (Students may apply 6 credits of ROTC)

Select 6 credits of 400-level courses

Select 3 credits in Global, Social, and Personal Awareness

Select 3 credits in Teamwork and Interpersonal Communication

Supporting Courses and Related Areas: Require a grade of C or better

Select 9 credits of 400-level ASTRO, CHEM, or PHYS courses

1 PHYS 211 and PHYS 250 require a grade of C or better.

Physical Science Option (74 credits)

A maximum of 12 credits of Independent Study [296, 496] may be applied toward credits for graduation.

Code Title Credits

Prescribed Courses

ASTRO 291 Astronomical Methods and the Solar System 3

PHYS 212 General Physics: Electricity and Magnetism 4

PHYS 213 General Physics: Fluids and Thermal Physics 2

PHYS 214 General Physics: Wave Motion and Quantum Physics 2

Prescribed Courses: Require a grade of C or better

PHYS 211 General Physics: Mechanics 4

Additional Courses

Select 3 credits of the following:

BMB 211 Elementary Biochemistry

BMB 251 Molecular and Cell Biology I

MICRB 201 Introductory Microbiology

Select 6-8 credits of the following:

CHEM 202 Fundamentals of Organic Chemistry I

& CHEM 203 and Fundamentals of Organic Chemistry II

CHEM 210 Organic Chemistry I

& CHEM 212 and Organic Chemistry II

& CHEM 213 and Laboratory in Organic Chemistry

MATH 230 Calculus and Vector Analysis

or MATH 251 Ordinary and Partial Differential Equations 4

Select 3 credits of the following:

ASTRO 292 Astronomy of the Distant Universe

EMCH 211 Statics

ME 300 Engineering Thermodynamics I

PHYS 237 Introduction to Modern Physics

Supporting Courses and Related Areas

Select 20-22 credits from program list (Students may apply 6 credits of ROTC)

Select 6 credits of 400-level courses

Select 3 credits in Global, Social, and Personal Awareness

Select 3 credits in Teamwork and Interpersonal Communication

Supporting Courses and Related Areas: Require a grade of C or better

Select 9 credits of 400-level ASTRO, CHEM, or PHYS courses

Accelerated Science B.S./M.B.A. Program (SCBUS_BS)

Students must begin and complete the Accelerated Science B.S./M.B.A. Program at the University Park campus.

Students admitted to this special cooperative program between the Eberly College of Science and The Smeal College of Business will be able to combine a Bachelor of Science degree in the Science major, with a Master of Business Administration degree. Highly motivated students, who enter the University with a sufficient number and proper distribution
What is the Accelerated Science B.S./M.B.A. Program?
The Accelerated Science B.S./M.B.A. Program is designed to educate the leaders in scientific industry, by providing students with a rigorous science background and undergraduate degree along with a graduate degree in business administration.

You Might Like This Program If...
- You love studying science, but don't necessarily want a career in a laboratory.
- You enjoy coursework in multiple science disciplines and in business.
- You aspire to leadership roles.
- You enjoy working with others on a daily basis.
- You want the opportunity to move into a leadership role early in your career.

Program Requirements
The B.S. degree in the Science major General Science option, will be conferred upon satisfactory completion of:

1. The first semester of course work in The Smeal College of Business M.B.A. program (i.e., a minimum of 12 graduate credits).
2. A minimum of 112 acceptable undergraduate credits, which must include:

Career Paths
Graduates with a B.S. in Science and a Master's degree in Business Administration have successfully established careers in the science and business industries. Graduates of this unique integrated undergraduate-graduate program (IUG) are equipped to step into leadership roles instead of the more common entry-level positions of their peers. This accelerates the careers of our graduates, which leads to greater impact and higher earning potential over a lifetime.

Careers
Graduates of the B.S./M.B.A. program have pursued careers in a number of industries including, but not limited to the following:
- Consulting
- Finance
- Healthcare
- Manufacturing
- Marketing
- Medical Devices
- Pharmaceuticals
- Technology

Opportunities for Graduate Studies
For more information on the M.B.A curriculum, please visit the Smeal College of Business website (https://mba.smeal.psu.edu).
Program Learning Objectives

After completing this degree, students should be able to:

1. Use the scientific method to formulate and test hypotheses
2. Effectively communicate scientific findings to an interdisciplinary audience in written and oral formats.
3. Understand the interdisciplinary nature of science.
4. Use quantitative reasoning.
5. Understand the relationship between science and society.

Academic Advising

The objectives of the university's academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee's unit of enrollment will provide each advisee with a primary academic adviser, the information need to plan the chosen program of study, and referrals to other specialized resources.

* Course requires a grade of C or better for the major
‡ Course requires a grade of C or better for General Education
# Course is an Entrance to Major requirement
† Course satisfies General Education and degree requirement

**University Requirements and General Education Notes:**

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

**Program Notes**

BIOL 230W is offered alternating spring semesters

BIOL 240W is offered alternating spring semesters

Students may take PHYS 211, General Physics: Electricity and Magnetism (PHYS 212), General Physics: Fluids and Thermal Physics (PHYS 213), & General Physics: Wave Motion and Quantum Physics (PHYS 214) in place of PHYS 250 & PHYS 251

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

**Career Paths**

Penn State students with a BS in Science are prepared for a broad range of careers and graduate programs. The solid foundation of science and math prepares students to think critically and scientifically in a range of industries and professions.

**Careers**

This program often leads to careers in all healthcare professions, including physicians and physician assistants, dentists, optometrists, and podiatrists; laboratory research associates; scientific product representatives and science-based consulting.

**Opportunities for Graduate Studies**

Many graduates of the Science B.S. program choose to pursue graduate studies (MS and PhD) in the natural sciences. Most often, students gravitate to medically-related fields and life science sub-disciplines for focused graduate training. Students in the legal studies and public policy options may choose law school or master’s in public policy programs.

Spatial Analysis and Engineering Design Principles, Certificate
Requirements for an undergraduate certificate may be completed at any campus location offering the specified courses for the certificate.

Program Description
This certificate provides innovative instruction about the application of new design methods and processes in a variety of engineering disciplines. The certificate emphasizes how to use CAD software to create concise drawings to develop an effective design system to provide solutions for specific products, systems, components, or services. Contact Diana Ricotta at Penn State DuBois, 814-375-4718 or dricotta@psu.edu.

What is Spatial Analysis and Engineering Design Principles?
Spatial analysis and design combines technical and design skills to solve engineering problems.

You Might Like This Program If...
You are good with technology and systems and enjoy complex challenges.

Program Requirements
To earn an undergraduate certificate in Spatial Analysis and Engineering Design Principles, a minimum of 7 credits is required.
Sports Administration, Certificate

Requirements for an undergraduate certificate may be completed at any campus location offering the specified courses for the certificate.

Program Description

This 15-credit interdisciplinary program offers students an introduction to different aspects of sports administration careers, broadly defined. Students who complete this certificate will enhance their portfolios and career opportunities to include working in the fields of sports management, business/retail, media, sporting teams, and recreational programs.

What is Sports Administration?

Sport management is the broad field of business associated with athletics, sports teams and recreation.

You Might Like This Program If...

• You enjoy sports and recreation.
• You desire to add this knowledge to your major program of study.

Admission Requirements

Students should be aware of possible course prerequisites for some of the listed courses.

Program Requirements

To earn an undergraduate certificate in Sports Administration, a minimum of 15 credits is required.

Students are required to complete:

• 3 credits of internship (from list A) with a sports administration-related organization;
• 6 credits from two different discipline codes of 100- and/or 200-level courses from list B;
• and 6 credits from two different discipline codes of 300- and/or 400-level courses from list C.

List A

Select 3 credits of the following:

- BA 495A Business Internship
- CAS 495 Internship
- COMM 495 Internship
- PSYCH 495 Internship

List B

Select 6 credits from two different discipline codes of the following:

- ACCTG 211 Financial and Managerial Accounting for Decision Making
- CAS 252 Business and Professional Communication
- CAS 203 Interpersonal Communication
- COMM 100 The Mass Media and Society
- COMM 170 Introduction to the Sports Industry
- ECON 102 Introductory Microeconomic Analysis and Policy
- FIN 100 Introduction to Finance
Academic Advising

The objectives of the university's academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee's unit of enrollment will provide each advisee with a primary academic adviser, the information need to plan the chosen program of study, and referrals to other specialized resources.

Supply Chain Management, Certificate

Requirements for an undergraduate certificate may be completed at any campus location offering the specified courses for the certificate.

Program Description

The certificate program in logistics and supply chain management introduces you to key concepts in the field, such as systems analysis, trade-off analysis, transport systems, procurement, inventory management, and supply chain integration and strategy. The program provides an overview of logistics and supply chain management and addresses the needs of manufacturers, wholesalers, retailers, merchandisers, transportation and warehousing firms, and government agencies. The implications of e-commerce in relation to supply chain management are also explored.

What is Supply Chain Management?

Supply chain management pertains to the flow of goods and services. It includes the movement and storage of raw materials, work-in-process inventory, and finished goods from point of origin to point of consumption.

You Might Like This Program If...

• You enjoy thinking about process and organization within business.
• You want an introduction to supply chain management that you can earn in a short time.
• You want to add supply chain skills to your major program of study.

Program Requirements

To earn an undergraduate certificate in Supply Chain Management, a minimum of 12 credits is required.

Youth Development and Social Justice, Certificate

Requirements for an undergraduate certificate may be completed at any campus location offering the specified courses for the certificate.

Program Description

The 18-credit certificate program was designed to help understand the unique challenges facing adolescents and young adults. Intended for counselors, educators, family therapists, social workers and other professionals dedicated to serving the developmental needs of youth in contemporary society, the program provides an overview of the major issues that impact youth development from a social justice perspective.

What is Youth Development and Social Justice?

The 18-credit certificate program helps students understand the unique challenges facing youth in our rapidly changing world. Intended for counselors, educators, family therapists, social workers and other professionals dedicated to serving the developmental needs of youth in contemporary society, the program provides an overview of the major issues that impact youth development from a social justice perspective. Students enter our program with the desire to nurture the youth of their community; they graduate with the skills and knowledge to do so effectively. In our collaborative, student-centered learning environment, students learn about the factors that contribute to positive youth development, and how they may be fostered within peer groups, families, communities, and social institutions, thereby reducing risk for poor developmental outcomes. Courses focus on normative and maladaptive patterns of adolescent development and the social ecology of positive youth development.

You Might Like This Program If...

- You want to become more informed citizens and community leaders.
- You're interested in professional work in various social justice related occupations (e.g. an educational setting for young adults who identity within the LGBTQ community, a human rights advocacy group, youth programming in urban areas, a non-governmental organization dedicated to community development).

Admission Requirements

To register for the certificate program, participants are required to have previously earned at least 60 credits.
Program Requirements
To earn an undergraduate certificate in Youth Development and Social Justice, a minimum of 18 credits is required.

Prerequisites Required.

Academic Advising
The objectives of the university’s academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee’s unit of enrollment will provide each advisee with a primary academic adviser, the information need to plan the chosen program of study, and referrals to other specialized resources.

GENERAL INFORMATION

Using this Bulletin
The six General Information sections in the Undergraduate Bulletin are designed to help you understand Penn State academic requirements and policies, as well as how to discover opportunities, as you pursue your academic goals. Information about the University structure and leadership, as well as tuition and financial aid information, will assist you in making informed decisions during your time at Penn State.

Click on topics of interest below or the tabs to the right to explore different information areas. In addition, General Information sections can be accessed from any page in the Bulletin from the navigation bar.

Using this Bulletin (p. 2515)
Academic Information (p. 2615)
General Education (p. 2640)
About Penn State (p. 2719)
Admissions (p. 2723)
Tuition and Financial Aid (p. 2726)

Using this Bulletin
Introduction
The Undergraduate Bulletin is Penn State’s comprehensive source for undergraduate academic information and program requirements.

Use this section and navigation tools throughout the site to become familiar with general Bulletin information and discover new ways to explore academic opportunities across Pennsylvania and the world.

Students should follow the edition of the Bulletin that is active on their first day of class at the University. Past versions can be found on the Archive (p. 15) page.

New Features
Program Page Layout
• Consistent layout of program information organized within the following tabs:
  • Overview
  • How to Get In
  • Program Requirements (University Degree, Bachelor of Arts Degree, General Education, and Major requirements)
  • Integrated Undergrad-Grad Program
  • Learning Outcomes
  • Academic Advising
  • Suggested Academic Plan
  • Career Paths
  • Contact

Begin and End Campus
At the top each program page, you will find a box that indicates where you can begin and end a program. Programs may have different begin and end campuses, so it is important to use this information to determine program availability at each campus.

How to Get In
This section describes requirements on how to enter your major. Common examples include, but are not limited to, minimum GPA and/or successful completion of a skills test, coursework, or preparation programs.

Suggested Academic Plan
The course series provided in the Suggested Academic Plan provides only one of many possible ways to move through the curriculum. To create a personalized academic plan, begin by taking the following steps:
  • Consult with a Penn State academic adviser on a regular basis to develop and refine your academic plan.
  • Use the Suggested Academic Plan in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report).
  • Familiarize yourself with information available in this Bulletin to learn about academic opportunities.
  • Explore resources available on your college and campus websites.

Please note that the University may make changes in policies, procedures, educational offerings, and requirements.

Changes Page
• Real-time amendments to information in the Bulletin will be tracked on the Changes (p. 2520) page.
• Currently or previously enrolled students should consult the Bulletin Archive (p. 15), their adviser, and degree audit reports for specific requirements.

Course Bubble
When a course link is clicked, a course bubble will appear with important course information including, but not limited to:
  • course title, description, and credits;
  • prerequisites;
  • course attributes and General Education learning objectives;
  • if the course is repeatable;
  • if the course is cross-listed;
  • if the course can be counted towards General Education requirements.

Statement of Nondiscrimination
The University is committed to equal access to programs, facilities, admission, and employment for all persons. It is the policy of the University to maintain an environment free of harassment and free of discrimination against any person because of age, race, color, ancestry, national origin, religion, creed, service in the uniformed services (as defined in state and federal law), veteran status, sex, sexual orientation, marital or family status, pregnancy, pregnancy-related conditions, physical or mental disability, gender, perceived gender, gender identity, genetic information, or political ideas. Discriminatory conduct and harassment, as well as sexual misconduct and relationship violence, violates the dignity of individuals, impedes the realization of the University’s educational mission, and will not be tolerated. Direct all inquiries regarding the nondiscrimination policy to the Affirmative Action Office, The Pennsylvania State University, 328 Boucke Building, University Park, PA 16802-5901; Email: kfl2@psu.edu; Tel 814-863-0471.

Penn State encourages qualified persons with disabilities to participate in its programs and activities. If you anticipate needing any type of
The University, therefore, reserves the right to change the requirements and regulations contained in this Bulletin and to determine whether a student has satisfactorily met its requirements for admission or graduation, and to reject any applicant for any reason the University determines to be material to the applicant’s qualifications to pursue higher education.

MORE INFORMATION ABOUT ACADEMIC AUTHORITY (http://undergrad.psu.edu/aappm/P-8-program-descriptions-catalog.html)

Definitions and Abbreviations
Described below are definitions referring to degrees, majors, options, minors, concurrent or sequential majors programs, and integrated undergraduate-graduate degree programs:

**Associate Degree**
Two-year majors that, with few exceptions, provide concentrated instruction to prepare graduates for specialized occupational assignments.

**Baccalaureate Degree**
Baccalaureate programs of study consist of no less than 120 credits and typically take four years to complete.

**Minor**
An academic program of at least 18 credits that supplements a major. A minor program may consist of course work in a single area or from several disciplines.

**Undergraduate Certificate**
Undergraduate certificates can reflect emerging academic areas, necessary professional development requirements, or groups of courses that do not constitute a degree program.

Learn more in the Definitions and Abbreviations (p. 2516) section.

**Campus**
Penn State has over 20 campuses across Pennsylvania. Visit the Campus (p. 16) page to see the full listing and a brief description of each campus.

**Interest**
Search broad topics to discover programs associated with your interests. From helping people, to science, or business, select an area to help narrow down your academic choices.

**College**
Academic colleges at Penn State grant degrees and are generally organized around a subject matter. All Penn State majors are divided among academic colleges, which are the units from which students receive their degrees. Visit the College (p. 19) page to see the full listing.

**Academic Authority**
The University Faculty Senate has responsibility for, and authority over, all academic information contained in the Undergraduate Bulletin.

Each step of the educational process, from admission through graduation, requires continual review and approval by University officials. The University, therefore, reserves the right to change the requirements and regulations contained in this Bulletin and to determine whether a student has satisfactorily met its requirements for admission or graduation, and to reject any applicant for any reason the University determines to be material to the applicant’s qualifications to pursue higher education.

MORE INFORMATION ABOUT ACADEMIC AUTHORITY (http://undergrad.psu.edu/aappm/P-8-program-descriptions-catalog.html)

Definitions and Abbreviations
Described below are definitions referring to degrees, majors, options, minors, concurrent or sequential majors programs, and integrated undergraduate-graduate degree programs:

**Associate Degree**
Two-year majors that, with few exceptions, provide concentrated instruction to prepare graduates for specialized occupational assignments.

**Baccalaureate Degree**
Penn State offers more than 160 majors with four-year baccalaureate degrees. A baccalaureate program of study shall consist of no less than 120 credits. Students may elect to take courses beyond the minimum requirements of a degree program. Particular types of baccalaureate degrees identify educational programs having common objectives and requirements. Degree programs may provide academic, pre-professional, or professional experiences and preparation. Majors lead to a baccalaureate degree. Each student must select a major within a baccalaureate degree type. If options are offered within a major, a student selects one. The student may also elect to enroll in a minor to supplement the major. Alternatively, the student may seek to enroll in multiple majors within the same type of baccalaureate degree or to enroll in a simultaneous degree program.

Undergraduate majors offered at Penn State lead to one or more of the following baccalaureate degrees: Bachelor of Arts, Bachelor of Science, Bachelor of Architectural Engineering (five-year program), Bachelor of Architecture (five-year program), Bachelor of Design, Bachelor of Fine Arts, Bachelor of Humanities, Bachelor of Landscape Architecture (five-year program), Bachelor of Music, Bachelor of Musical Arts, and Bachelor of Philosophy.

Not all degrees are offered at every location. Baccalaureate degrees offered at Penn State include both those that are designed to provide an academic (including pre-professional) experience and those that are specifically designed to provide professional preparation.

To ensure excellence, all professionally oriented degree majors provide a strong academic base. The Bachelor of Arts degree (with a given major) is an academic degree; the Bachelor of Science degree (with a given major) and the bachelor's degree in any subject area (e.g., Bachelor of Architecture) are professional degrees. The Bachelor of Philosophy degree, described in the Intercollege Undergraduate Programs section of this Bulletin, is planned individually and may be designed to serve either academic or professional purposes.

**Major**
A major is a plan of study in a field of concentration within a type of baccalaureate degree. Colleges and other degree-granting units may have common requirements for all of their majors. Each major may have requirements identified in prescribed, additional, and supporting courses.
and related areas categories. Elective credits are not considered part of the major.

MORE INFORMATION ABOUT MAJORS (http://senate.psu.edu/curriculum/guide-to-curricular-procedures/baccalaureate-degree-curriculum)

Option
An option is a specialization within a major that should involve at least one-third of the course work credits required for the major, but need not be more than 18 credits. All options within a major must have in common at least one-fourth of the required course work credits in the major. A student can only be enrolled in an option within their own major.

Minor
A minor is defined as an academic program of at least 18 credits that supplements a major. A minor program may consist of course work in a single area or from several disciplines, with at least 6 but ordinarily not more than half of the credits at the 400-course level. Total requirements are to be specified and generally limited to 18 to 21 credits. Entrance to some minors may require the completion of a number of prerequisites, including courses, portfolios, auditions, or other forms of documentation that are not included in the total requirements for the minor. All courses for a minor require a grade of C or above.

Concurrent and Sequential Majors Programs
At the baccalaureate or associate degree level, students may be approved for admission to more than one major under the Concurrent Majors Program. A Concurrent Majors Program is one in which students take courses to concurrently meet the requirements of at least two majors, with graduation for all majors in the program occurring during the same semester. Concurrent majors must all be at the baccalaureate or associate degree level. Under the Sequential Majors Program, upon graduation from an associate or baccalaureate degree program, a student may apply for re-enrollment in another undergraduate degree program.

Integrated Undergraduate-Graduate (IUG) Degree Program
An Integrated Undergraduate-Graduate (IUG) degree program combines a Penn State baccalaureate degree with a master’s degree as a continuous program of study. An IUG program allows qualifying students to:

- create a cohesive plan for baccalaureate and master’s degree studies, with advising informed by requirements for both degree programs;
- complete the combined degree program in less time than it would take to complete each program separately;
- become familiar with the expectations of graduate studies in their programs;
- access the resources of the Graduate School;
- learn from current graduate students who share academic interests.

Abbreviations, Acronyms, and Codes
Described below are common codes, abbreviations, acronyms, and other types of academic shorthand used at Penn State, along with a brief explanation of each.

Course Changes: Effective Fall 2018

ANTH 2: Introduction to Archaeology (3 Credits) (BA) (GS)
Old Listing Effective Through Summer 2018:

Survey of basic approaches used by archaeologists to interpret basic prehistoric human cultural patterns. ANTH 002 Introduction to Archaeology (3) (GS)(BA) This course meets the Bachelor of Arts degree requirement. Introduction to Archaeology is designed to introduce the basic theories, methods, and data archaeologists use to study ancient peoples, past cultures, and their natural environments. A problem-oriented approach to learning about archaeology combines two one-hour lectures with a one-hour, hands-on lab session each week. The theories and methods introduced in lectures are applied to archaeological data in the computer lab in order to answer questions about life in the past. Hands-on involvement is emphasized through the use state-of-the-art computers, archaeological software, and (where possible) the handling of archaeological collections. Grades for this course are based on two to three exams and the lab exercises. The course may vary from this standard on other campuses depending upon the availability of computer labs and archaeological collections. However, the weekly lab exercises are available to all campuses from the Department of Anthropology. Students on all campuses will be expected to interact with each other and with the instructor in weekly discussions and exercises. They engage in data gathering, synthesis, and analysis, using exercises that make use of information on the internet as well as data provided...
by PSU archaeologists. The exercises emphasize human cultural diversity over time and space. There is also an emphasis on the ethics of archaeological research and the ways in which scientific choices and ethical choices interact in professional archaeology. The logical and ethical principles learned are applicable to a broad range of problems that students are likely to encounter in anthropology, in other disciplines, and later in their lives. This course is one of three core courses required of majors in the Anthropology department and is also required for the minor. ANTH 002 serves as a stepping stone to more advanced and specialized courses in anthropology. This course can be used to fulfill three credits of General Education in the Social/Behavioral Sciences for the Bachelor of Arts requirement.

ANTH 45: Cultural Anthropology (3 Credits) (US) (IL) (BA) (GS)
Old Listing Effective Through Summer 2018:

Beginnings of human culture; economic life, society, government, religion, and art among traditional peoples. ANTH 045 Cultural Anthropology (3)(GS;US;IL)(BA) This course meets the Bachelor of Arts degree requirements. “Cultural Anthropology” is designed to introduce the student to the cultural diversity of our planet. “Culture” can be defined as that set of rules, standards, conventions, and beliefs shared by members of a given human society. These rules are transmitted by social learning. Culture defines what counts as “normal” thought and behavior by the members of a given society. The course will provide the student with an understanding of the basic methods, data and, theories that cultural anthropologists use to study the varieties of human thought, behavior, and social life in their associated physical and social environments. These projects involve individual and group research based upon library and computer-based resources and further foster interactive learning. Teamwork is an essential aspect of both research and presentation. Oral presentations and written papers are stressed. Grades are based on three examinations. This class is one of three core courses required of majors and minors in the Department of Anthropology. The course can be used to fulfill three credits of General Education in the Social/Behavioral Sciences for the Bachelor of Arts requirement. Students can expect to acquire a general introduction to the University as an open community of researchers and scholars who attempt to describe accurately, and hence understand, “The Human Condition.” Students in this class will therefore have the opportunity to explore their responsibilities as members of such an intellectual community of free inquiry. In addition, students will develop first-hand knowledge of the learning tools and resources available to them at Penn State including the ever-expanding Web-based Internet. This course offers the student the opportunity to develop intellectual relationships with faculty and fellow classmates who share similar academic interests in cultural anthropology and related fields of inquiry. “Cultural Anthropology” is offered every semester, including the summer session.

ANTH 216: Sex and Evolution (3 Credits) (GN) (GS)
Old Listing Effective Through Summer 2018:

Introduction to evolutionary theory and its application to understanding human sexuality and sex differences. ANTH 216 Sex and Evolution (3)(GN;GS) This course introduces students to evolutionary theory and explores its relevance to the anthropological study of human sexuality. After honing their evolutionary skills by investigating non-human reproduction, students will apply evolutionary principles to understanding human sexuality. Why do we prefer certain characteristics in a mate? How do these preferences differ between and within the sexes, and why? How do mating behaviors vary across cultures, and why are some more culturally variable than others? Other topics covered include sexual conflict and rape, and parental care and abuse. In understanding the evolutionary basis for a trait, it is helpful to understand its development. Thus, this course also covers the basics of sexual differentiation and investigates how variation in these processes might lead to variation in sexual orientation and gender identity. Students should take away not only a better understanding of human sexuality but also a way of thinking that helps them understand all living things.

Changes Effective Fall 2018:

CHEM 423: Chemical Spectroscopy (4 Credits) (WF)
Old Listing Effective Through Summer 2018:

Modern methods and instruments of spectroscopy and their applications to problems of chemical structure and analysis. CHEM 423W Chemical Spectroscopy (4) This course reviews modern methods and instruments of spectroscopy and their applications to problems of chemical structure and analysis. Topics include electronics, optics, and atomic and molecular spectroscopy (UV-VIS, Fluorescence, FTIR, Raman, liquid- and solid-state NMR). The course thoroughly integrates lecture and laboratory activities. The laboratory component incorporates skill-building exercises with open-ended guided-inquiry laboratory exercises and a semester-long laboratory- and literature-based research project. Students work in small groups (2-3 students) to complete each assignment. Students are required to write research papers during the semester. The reports are linked to the core course topics and the fifth is associated with the semester-long research project. All reports require students to search for and read the relevant published literature. The course is designed to be rigorous and comprehensive in scope. The writing component for this course includes: maintaining a proper laboratory notebook; reports; and an oral poster presentation. All writing elements are reviewed and graded by the instructor and teaching assistants.

Changes Effective Fall 2018:

• Number to 423W
• Prerequisite/Corequisite/Concurrent Courses

CHEM 425: Chromatography and Electrochemistry (4 Credits) (WF)
Old Listing Effective Through Summer 2018:

Gas, liquid, and other forms of chromatography; important techniques of electrochemistry.

Changes Effective Fall 2018:

• Number to 425W

CHEM 431: Organic and Inorganic Preparations (4 Credits) (WF)
Old Listing Effective Through Summer 2018:

Preparation, purification, and characterization of both organic and inorganic compounds by modern methods. CHEM 431W CHEM 431W Organic and Inorganic Preparations (3) CHEM 431W is a one-semester, writing-intensive advanced laboratory course that focuses on the preparation, isolation, purification, and characterization of organic, organometallic, and inorganic compounds. Students are expected to use the techniques learned in the introductory organic chemistry laboratory and will learn more advanced techniques such as the use of air-free and anhydrous reaction conditions, glove bags, vacuum manifolds, vacuum distillations, flash chromatography, solvent stills, and gas-tight syringes. Molecular modeling techniques are also introduced. Students are given hands-on access to instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as IR, NMR, UV/V is spectroscopy, mass spectrometry, polarimetry, HPLC, GC and GC-MS. Students are expected to search the chemical literature using databases and online journals and to write formal lab reports in ACS style. The lab assignments include syntheses, separating an unknown mixture, and a team project, which includes a written proposal, synthetic work, a final report, and a poster presentation.

Changes Effective Fall 2018:

• Number to 431W

CHEM 459: Advanced Experimental Physical Chemistry (4 Credits) (WF)
Old Listing Effective Through Summer 2018:

Laboratory experiments and projects for students interested in advanced study in physical chemistry. CHEM 459W Advanced Experimental Physical Chemistry (4) CHEM 459W Advanced Experimental Physical Chemistry is a project-based course designed as a follow-up to CHEM 457. CHEM 459W provides students with further experience in laboratory techniques used for quantitative experimentation and with the processing and interpretation of quantitative data. Experiments and short research projects are designed to complement the theoretical knowledge acquired in lecture courses so as to enhance students’ competence in problem solving in a research environment. Particular attention will be devoted to written communication of experimental results in an effective and concise manner according to American Chemical Society journal standards.

Changes Effective Fall 2018:

• Number to 459W

CMLIT 191: Introduction to Video Game Culture (3 Credits) (US) (IL) (GH)
Old Listing Effective Through Summer 2018:

A comparative, international look at the nature and history of video games as cultural artifacts, from Pong to online role-playing. CMLIT 191 (GAME 160) Introduction to Video Game Culture (3) This course is a comparative introduction to the nature and history of video games as cultural artifacts, from Pong to online role-playing. It introduces students to academic discussion on and creative work in new digital forms including hypertexts, video games, cell phone novels, machinima, and more. Students will survey major debates over the meaning and value of video games, and study some of the major theoretical terms and perspectives developed to elaborate the cultural and sociological value of video games. The course extends students’ skills in literary interpretation to a variety of new objects, and makes them aware of the role medium plays in aesthetic development and production. Students will leave with a far sharper understanding of how the interpretive tools used in the humanities can be extended to include new media, and with a sense of the historical role video games have played and will continue to play in global cultural production. Because the course is historically focused, it will spend significant time looking at the differential development of video games in three major regions: the United States, Europe, and East Asia (especially Japan).

COMM 150: The Art of the Cinema (3 credits) (GA)(BA)

Old Listing Effective Through Summer 2018:

COMM 150 The Art of the Cinema (3) (GA)(BA) This course meets the Bachelor of Arts degree requirements. Communications 150 is an introduction to cinema studies. The course assumes, as film historian John Belton puts it, that films can reveal, both directly and indirectly, something about cultural identity and memory, and that movies "can be analyzed—even psychoanalyzed—to reveal something about the cultural conditions that produced them and attracted audiences to them." The course seeks both to familiarize students with works they probably haven’t seen and to "defamiliarize," through critical and historical analysis, works they very well may have seen. Movies are examined as formal constructs, market commodities, and cultural artifacts—as reflections, however distorted, of life in the twentieth century. Topics include the emergence of the cinema as an institution; the global dominance of classical Hollywood cinema; American film industry organization (production, distribution, exhibition, vertical integration, the studio system, the star system); analysis of film styles (national cinemas, historical movements); analysis of film genres (e.g., silent film melodrama, film noir, comedy, the war film, the western); consideration of film audiences (reception, spectatorship, criticism); introduction to film aesthetics (film art and appreciation); and alternative cinemas (independent, documentary and experimental cinemas). COMM 150 emphasizes media literacy and seeks to help students develop critical thinking, reading and viewing skills. All sections integrate lectures and readings with viewing feature films during the weekly practicum period. Many sections also incorporate slides and film or video clips during the lecture periods to allow students to exercise their critical viewing skills regarding certain teaching points. Students prepare for film screenings by reading, listening to lectures, and analyzing examples of relevant works. Introductory lectures seek to provide a critical and historical context for each week's screening; follow-up lectures offer critical analysis and examinations reward close viewing. The core purpose of the course, therefore, is to make film viewing a conscious, critical and analytic activity. COMM 150 serves as a prerequisite for most upper-level film studies courses. It is required for Media Studies majors who have chosen the Film/Television option, and is among three courses (along with COMM 100 and COMM 180) from which all Media Studies majors are required to choose. It has no prerequisite and assumes no prior exposure to film studies, and so is directed primarily to students outside the field.

Changes Effective Fall 2018:

- Change Number to 150N
- Add General Education Designation GS
- Add General Education Designation Inter-Domain
- Description

EMSC 240: Energy and Sustainability in Contemporary Culture (3 Credits: Maximum of 3 Credits) (BA)

Old Listing Effective Through Summer 2018:

Critical evaluation of selected media (e.g., books, film) in contemporary culture on topics related to energy and sustainability. Course guides students through an engaging exploration and critical evaluation of selected media (e.g., books, film) in contemporary culture on topics related to energy and sustainability. Three selections are used each term, typically two books and one film. Students consider the subject matter in light of humanistic values, where the science, ideas and history presented in the selected media are critically evaluated relative to the viability of our planet’s ability to support life. Opening lessons cover the foundational science of energy and sustainability, with a global perspective and consideration of the human dimension. The science is presented without technical jargon or advanced mathematics, to promote a genuine and
sound understanding of these essential concepts for college-level students of all academic backgrounds. Learning units are devoted to each media selection, with all content, activities and assessments within the unit contributing to this concentrated focus. Activities and assessments engage students in qualitative and quantitative methods, which may include small group discussions, journaling, surveys, interviews, polling, research, presentation of ideas and opinions, and other peer-to-peer interactions. After completing this course, students will possess the foundational science knowledge necessary to evaluate contemporary topics related to energy and sustainability, from the perspective of universal humanity on a planet of finite resources. be prepared to develop observations, questions and opinions on topics related to energy and sustainability and to self-express them, in both written and oral presentations, to others with different backgrounds and points of view – be skilled critical readers of energy and sustainability subject matter, knowing how to raise (and answer) questions related to scientific clarity and soundness and how to test assumptions and scope of arguments, especially as related to inclusion of humanistic values and planetary limits – be willing and able to avoid entrenched ideology-based positions on issues related to energy and sustainability and to develop, instead, a personal position based in science and data with a humanistic perspective – know of credible resources and organizations for ongoing research related to energy and sustainability – be prepared to participate in public dialogue on some of the most challenging and complicated issues of our time, including activities such as letters to the editor, online commenting, political engagement, and public advocacy.

**ENGL 225: Sexuality and Modern Visual Culture (3 Credits) (GA) (GH) (INTER-DOMAIN)**

**Old Listing Effective Through Summer 2018:***

An examination of the visual expression of gender and sexual identities in English-speaking cultures since the late nineteenth century. ENGL (ART H/WMNST) 225 Sexuality and Modern Visual Culture (3) (GA;GH) The terms "feminist" and "homosexual" were invented by the Victorians and reflect profound shifts in conceptions of identity. Another invention of the nineteenth century was the idea of the literary and artistic "avant-garde," a minority contingent with politically and/or aesthetically advanced views. These ideas of minority culture were deeply enmeshed with one another, and have exerted profound influence ever since. This course explores that history with the objective of developing a more sophisticated understanding of how the history of ideas affects our sense of who we are and how we read both texts and images. The course will be relevant to students of American and English studies, art, art history, and women's and sexuality studies.

**FR 138: French Culture Through Film (3 Credits) (BA) (GH)**

**Old Listing Effective Through Summer 2018:**

Introduction to French culture through film by French and francophone directors examining gender, ethnicity, and global issues. Taught in English. FR 138 French Culture Through Film (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course, taught entirely in English with no assumption of prior knowledge of French, will entail the study and analysis of a number of recent and not-so-recent French films that present, in one way or another, problems or themes characteristic of French history and society. We will not, however, be concerned primarily with watching these films as "illustrations" of various aspects of French culture; on the contrary, we will study them as films. We will be concerned with the filmic devices used, and with the intellectual and ideological orientations of the people who made them. For this reason we will discuss techniques used in the presentation of various events shown in the films, which may or may not involve war, the Occupation, city life, growing up, gender relations, the lives or immigrants, etc. From our study of these films, we will inevitably learn quite a bit about French society and its values, particularly in the period from the Occupation (World War II) to the present.French 138 will satisfy a General Education humanities requirement for students in all majors except French. Students will be evaluated with quizzes (given after the screening of each film ... before class discussion about film) for 20% of final grade; group presentations/participation for 30% and essays (five short papers) for 50%. This course will be offered once a year with a limit of 75.

**GLIS 101: Globalization (3 Credits) (GS) (IL) (BA)**

**Old Listing Effective Through Summer 2018:**

This course provides a broad introduction to the topic of global studies. GLIS 101 Globalization (3) (GS;IL) (BA) This course meets the Bachelor of Arts degree requirements. This interdisciplinary course explores how people and nations confront the phenomenon of globalization, presenting different perspectives for studying and making sense of the world. Students are exposed to a variety of analytical approaches from the arts, humanities and social sciences to allow them to see how different perspectives portray the world, interpret events, and often shape human actions. The course begins from a humanities perspective, exploring the concept of social identity, in particular understanding how people in different cultures develop a sense of their identity and how this is perpetuated over time through a society’s products, practices, and perspectives (e.g. artifacts, value systems, traditions). The focus then shifts to organizations in society, comparing how they operate with either national or global identities. This leads to an exploration of how information and communication technologies are tools to create both global connectivity, yet can also be a source of division. Globalization is then considered in terms of its impact on the natural environment, populations, and health. Challenges arising in each of these areas are the concern of all global citizens, and are explored in terms of how interdependencies are increasing their impact. The focus of the course progresses to gender, poverty, and human rights, exploring these in tandem with their literary representations, presented in both global and comparative contexts. Economic development models are also used
to uncover trends in gender and poverty. The final focus is on global peace and conflict, highlighting how globalization, in bringing people and nations closer together, can also give rise to conflict and division. This course is one of two 100-level courses that are required for the GLIS major. While this course focuses on a general introduction to global studies as a field of study, GLIS 102 complements the topics raised here, exploring many from a range of different perspectives to prepare students for choosing their options through the major.

GLIS 102: Global Pathways (3 Credits) (GH) (IL)
Old Listing Effective Through Summer 2018:

Five pathways to thinking globally: Health & Environment, Culture & Identity, Human Rights, Wealth & Inequality, and Global Conflict.

GLIS 102 Global Pathways (3) (GH;IL) (BA) This course meets the Bachelor of Arts degree requirements. This course introduces students to five pathways to thinking about global issues today: Global Conflict, Health & Environment, Culture & Identity, Wealth & Inequality, and Human Rights. We will spend three weeks focusing on each problem. Students will complete the course with a stronger sense of many of the major global issues of our time, as well as a sense of how those issues can be approached and studied from a variety of humanistic and social scientific perspectives. Students will also learn how aspects of identity, like race, sexuality, or gender, affect and are affected by global forces. Combined with GLIS 101, this course will help prepare students for lives and careers in which they will interact with these large-scale global issues on a daily basis; it will allow students to understand how various local or national issues are affected by global ones, and to see ways of intervening in the world to address global problems. Global Conflict. Why do people fight? Is violence inherent to human society? How is it possible to dream of an end to war, as creative writers of many cultures have done? Health & Environment. How does climate affect human history? How have societies and individuals interacted with their environments, and how have the relations between human beings and the natural world been represented in literature and the arts? How are health issues depicted in narratives and other media, and how do health crises challenge political or cultural norms? Culture & Identity. How do we come to be who we are? How are we shaped by the circumstances we grow up in? What is culture, and how do we “read” cultures other than our own? What happens when people move or change cultures, or when cultures move or change people? Wealth & Inequality. Why are some nations, and some people, rich, and others poor? What structural factors help explain those differences? How does the distribution of wealth factor into what counts as a good society? Human Rights. What are the most fundamental properties of being human? What kinds of responsibilities have societies imagined that they have to their citizens and non-citizens? Does everyone in a society have the same rights? If rights are everywhere violated and ignored, does that mean they cannot, or should not, exist?

HORT 150: Plants in the Human Context (3 credits) (GN)
Old Listing Effective Through Summer 2018:

An introduction to the many fascinating and vital relationships between plants and human society. HORT 150 Plants and Human Context (3) (GN) The objective of this course is to expose students to the pervasiveness and essentiality of plants in the human experience. Major topics include 1) human civilization as influenced by plants, 2) a history of food from plants, 3) chemicals from plants, 4) non-food plant uses, 5) current issues in plant production, and 6) current botanical issues of global concern. Specific topics range from botanical pharmaceuticals to global warming/ use of biofuels, and from culture-specific rotten foods to genetically-modified plants. Students will be exposed to many basic concepts of plant ecology, ecosystem science, emerging technologies, and the criteria used to evaluate sources of scientific information as a natural consequence of studying the range of topics included in the course. Students completing the course will therefore be in an excellent position to intelligently select from the many botanically- and ecologically-oriented majors, minors and options available to them at Penn State. The format of the course consists primarily of lecture/discussions, and includes one team assignment (making a poster) and three individual projects (one page arguments) in addition to a midterm and a final exam. Student evaluations are based on individual exam scores (50%) and on team (20%) and individual (30%) projects

Changes Effective Fall 2018:

- Description
- Add General Education designation GS
- Add General Education designation Inter-Domain

HUM 100: Foundations in the Humanities: Understanding the Human Experience (3 Credits) (GH)
Old Listing Effective Through Summer 2018:

Introductory, interdisciplinary study of significant works in the humanities, stressing basic interpretive skills.

Changes Effective Fall 2018:

- Change number to 100N
- Add General Education Designation GA
• Add General Education Designation Inter-Domain
• Description

HUM 150: World Mythologies in the Arts (3 Credits) (IL) (GH)
Old Listing Effective Through Summer 2018:
Interdisciplinary, cross cultural, historical, and contemporary study of world mythologies as represented in the visual arts, literature, and film.

Changes Effective Fall 2018:
• Change Number to 150N
• Add General Education Designation GA
• Add General Education Designation Inter-Domain
• Description

HUM 200: Explorations in the Humanities: The Quest (3 Credits) (GH)
Old Listing Effective Through Summer 2018:
Interdisciplinary study of significant works in the humanities within the broad theme of the quest, stressing students’ interpretive skills.

Changes Effective Fall 2018:
• Change Number to 200N
• Add General Education Designation GA
• Add General Education Designation Inter-Domain
• Description

HUM 311: The Western Tradition I (3 Credits) (IL) (GH)
Old Listing Effective Through Summer 2018:
From prehistory through the Roman world.

Changes Effective Fall 2018:
• Change Number to 311N
• Add General Education Designation GA
• Add General Education Designation GH
• Add General Education Designation Inter-Domain
• Description

HUM 300W: Interpretations in the Humanities (3 Credits) (WF)
Old Listing Effective Through Summer 2018:
A study of selected themes, topics, or periods that introduces students to interdisciplinary approaches to knowledge, interpretation, and creative expression.

Changes Effective Fall 2018:
• Change Number to 300N
• Add GA Designation
• Add GH Designation
• Add Inter-Domain Designation
• Description
• Prerequisite/Corequisite/Concurrent Courses

HUM 400: Expressions in the Humanities (3 Credits)
Old Listing Effective Through Summer 2018:
Capstone course for School of Humanities majors: students synthesize and apply approaches to a topic in creative expression and knowledge.

Changes Effective Fall 2018:
• Number to 400N
• Description

JAPNS 121: Japanese Film and New Media (3 Credits) (GH) (IL) (BA)
Old Listing Effective Through Summer 2018:
Survey of Japanese film and new media in the twentieth century and beyond, with attention to changing cultural settings. Taught in English. JAPNS 121 Japanese Film and New Media (3) (GH; IL; BA) This course meets the Bachelor of Arts degree requirements. This course is intended to provide an introduction to modern and cutting-edge forms of cultural production in Japan from the twentieth century to the present day. Prior study of Japan is not required and materials will be available in English. Students will learn about major technologies and forms of media, including film, manga, anime, and various forms of “new media” (cellphone novels, blogs, MMOGs, IM, and Web 2.0 for instance). Readings and screenings will cover several artistic modes including formalism, historiography, documentary, period drama, and experimental works. The course, or individual units within the course, will be structured so that students develop an historical perspective, allowing them to understand the cultural contexts that have inspired the creative works under study. By examining Japanese film and new media with attention to changing cultural settings, students will investigate such topics as the relation between social institutions and the individual, the formation and expression of identity, changing gender roles and family structures, the impact of technological and economic trends on social structure, and changing climates of censorship and freedom of expression. In addition, students will learn to think critically about various media’s techniques and aesthetics of representation, and will become more engaged, critical spectators of film and related media. Class work includes some lecture but emphasizes guided discussions, group work, writing exercises, and some student presentations. This participatory approach is intended to deepen students’ appreciation of the works, to help them understand value systems that may differ from those predominant in western cultures, and to assist students in developing both analytical and expressive abilities. Through critical reading, group discussion and interpretive writing, students will hone skills for evaluating modes of cultural production and consumption in modern Japan. The course is designed to be suitable for all students generally interested in Japan, or interested in various fields of humanistic study, whether or not they have previously studied the culture of Japan. This course is required of the Japanese major. It is designed to count as General Education, as a B.A. “Other Cultures” course, and as an IL “International Cultures” course.

MATH 34: The Mathematics of Money (3 Credits) (GQ)
Old Listing Effective Through Summer 2018:
Simple interest, simple discount, compound interest, annuities, investments, retirement plans, taxes, credit cards, and mortgages. MATH 034 The Mathematics of Money (3) (GQ)

This course is intended to be one of several offered by the mathematics department with the goal of helping students from non-technical majors partially satisfy their general education quantification. It is designed to provide a sound introduction to the uses of college level mathematics in personal finance applications. Topics include: simple interest, simple discount, compound interest, annuities, investments, retirement plans, taxes, credit cards, and mortgages.

- Prerequisite/Corequisite/Concurrent Courses

PLSC 7: Contemporary Political Ideologies (3 Credits) (BA) (GS)

Old Listing Effective Through Summer 2018:

Critical analysis of contemporary political ideologies such as liberalism, conservatism, socialism, anarchism, fascism, feminism, and environmentalism. PL SC 007 Contemporary Political Ideologies (3) (GS) (BA) This course meets the Bachelor of Arts degree requirements. Liberalism, conservatism, socialism, anarchism, fascism, feminism, and environmentalism are ideologies which have inspired political movements. Understanding their meaning is an essential aspect of the study of contemporary politics. In this course, we examine the basic principles of these ideologies and assess their power to mobilize people for political action. In the process, we also explore the role of ideology in America today, including the responsibility of democratic citizens to understand how ideology shapes their politics. This course serves as a prerequisite for all 400-level political theory courses. This course fulfills one of the lower division requirements for majors in Political Science. It is taken by nearly all Political Science majors. For non-majors this course will be used to fulfill general education social/behavioral science requirement. Students will take examinations which include short answer and essay questions. They also trace a basic concept, e.g., equality, liberty, democracy, across the political ideologies studied. Their final take-home exam compares contrasting meanings of their chosen concept. Participation and group exercises in discussion sections are also graded. PL SC 117 will be offered twice a year with 90 seats per offering.

PLSC 17W: Introduction to Political Theory (3 Credits) (WF) (BA) (GS)

Old Listing Effective Through Summer 2018:

Introduction to basic issues in political theory through analysis of selected major political thinkers.

Changes Effective Fall 2018:

- Description
- Abbreviated Title
- Add GH Designation
- Add Inter-Domain Designation
- Add BA Designation

WMNST 105: Living in a Diverse World (3 Credits) (GH) (GS) (US)

(BA)

Old Listing Effective Through Summer 2018:

This course uses literature, film and scholarly texts to inspire students to explore how conceptions of social difference, such as those linked to categories of gender, race, sexuality, class, ethnicity, and disability, shape society and everyday interactions historically and today. The course takes an intersectional perspective to explore how and why these categories vary over time and space, the effects of such variations for individuals and communities, and the connections between identity and the exercise of power. Geographically, the course emphasizes the relationship between social difference and power in the U.S. history and society, but takes a transnational perspective when possible by making comparisons to contexts beyond the United States. Furthermore, the course examines how individuals and communities most directly marginalized by these processes contest and re-imagine dominant
categories and assumptions. Materials and discussions in the class trace broad social and historical trends as well as dive into the facets of everyday life. The class is designed to encourage reflection on the ethical challenges that arise when we become aware of how privilege, power and difference are intertwined in our world and daily lives.

Changes Effective Fall 2018:
- Number to 105N

- Add B.A. Humanities Designation

WMNST 106U: Representing Women and Gender in Literature, Art and Popular Cultures (3 Credits) (H) (US) (IL) (BA) (GH)
Old Listing Effective Through Summer 2018:
Interdisciplinary consideration of primary works and scholarship pertaining to women in the humanities and the arts.

Changes Effective Fall 2018:
- Number to 106Q
- Description
- Add General Education Designations GA and Inter-Domain

WMNST 202: Gender Dynamics in Africa (3 Credits) (IL) (BA) (GS)
Old Listing Effective Through Summer 2018:
Critical analysis of multidisciplinary research on relations between men and women in Africa and critique of Western feminist theories. WMNST (AFR) 202 Gender Dynamics in Africa (3) (GS;IL)(BA) This course meets the Bachelor of Arts degree requirements. In terms of gender studies, western academics have dominated the field. The course will offer a very different, more African-centered, analysis of the gender relations of African. Important African women writers will be read and their works analyzed. The role of African gender dynamics on the African Diaspora (North American, South America, the Caribbean, and the Middle East) will also be studied in this course. Feminism is one of the latest Western theoretical fashions to be applied to African societies. Following the one-size-fits all (or better still the Western-size fits all) approach to intellectual theorizing, it has taken its place in a long series of Western paradigms. African scholars, in particular African women scholars and others, are challenging the very conceptualizations of gender that are used to define, describe or categorize women and men. This class will examine the historical relationships between men and women in Africa and examine the new approaches to the study of gender dynamics in Africa. The course will challenge your perceptions of gender. The ability to critically think and an open mind are requirements for this class. You will also be expected to participate in all class discussions. This course represents a logical sequel to an existing course, AAA S/WMNST 102, Women in a Cross Cultural perspective; and three courses, AAA S/HIST 191, Early African History, AAA S/HIST 192, Modern African History, and WMNST 4, Global Perspectives on Feminism, which have already been approved by the Senate. This course can be used in both the African and African American Studies major and minors. Grades: map exam 10%, oral history 15%, mid term 30%, and final 45%.

WMNST 301: Sexualities, Gender and Power: Feminist Thought and Politics (3 Credits) (US) (IL) (GH)
Old Listing Effective Through Summer 2018:
An interdisciplinary survey of historical and contemporary feminist theories in both the United States and international contexts. WMNST 301 Sexualities, Gender and Power: Feminist Thought and Politics (3) (GH;US;IL) This course is an undergraduate survey of key theoretical texts shaping feminist theory both yesterday, and today. While attention is given to critical historical moments in feminist thought, the course will stress theoretical trends and debates in feminism today. Course themes will include: (1) feminist epistemology and standpoint theory, epistemic privilege and epistemologies of ignorance; (2) postcolonial critiques of western feminism, and contemporary efforts to define a transnational and anti-racist feminism, (3) gender identity and the very viability of the category “woman”, (4) the concept of freedom, liberation, and of women’s agency in feminist narratives of liberation, (5) theoretical implications for defining productive labor for women that is not exclusively the labor of childbirth, and the subsequent care of children and family, (6) the ongoing search for new paradigms of embodiment and interdependency that counter male-centered constructions.

Course Changes: Effective Spring 2019
ASIA 3: Introduction to the Religions of the East (3 Credits) (US) (IL) (GH)
Old Listing Effective Through Fall 2018:
Religious experience, thought, patterns of worship, morals, and institutions in relation to culture in Eastern religions. RL ST (ASIA) 003 Introduction to the Religions of the East (3) (GH;US;IL)(BA) This course meets the Bachelor of Arts degree requirements. This course will explore the foundations, development, and diversity of religious traditions in Asia, focusing mostly on Hinduism, Buddhism, Confucianism, Daoism, and Shinto. It is organized according to two sections: Foundations and Developments. The Foundations section provides an introduction to the worldviews and practices of Eastern teachings. We will also discuss the structure of society, the social expectations on individuals based on gender and class, and rituals, which expose us to rich mythologies or intricate ceremonies. The second section, Developments, traces the evolution of religious doctrine and practice through history. Here, we learn to distinguish among large and small-scale movements and schools, and to familiarize ourselves with the geographical scope of each religion in South, Southeast, and East Asia. An abiding emphasis in this course will be on how to read and interpret the varied scriptures and primary texts of these religions.

ASIA 103: Introduction to Hinduism (3 Credits) (GH) (US) (IL) (BA)

Historical development of Hinduism to the present. RL ST (ASIA) 103 Introduction to Hinduism (3) (GH;US;IL)(BA) This course meets the Bachelor of Arts degree requirements. This course provides a historical overview of the development of ideas that provide the foundation of the south Asian religious culture. The course begins with a discussion of the Vedic ritual tradition, tracing the emergence of the idea of civic responsibility or Dharma. It then proceeds to analyze how the Vedic ritual tradition may have given rise to the philosophical concepts like that of Karma or (individual action and its underlying motives), Samsara (the cyclical view of life), and the Atman (nature of the individual) during the Upanishadic/Vedantic era. The first half of the course concludes with selected readings from the Bhagavadgita, and the Mahabharata. The readings will all be in English. Class discussions focus on how the classical Hindu worldview may have emerged from the philosophical foundation of the Upanishads, and later built the groundwork for the Hindu devotional Bhakti tradition. The second half of the course focuses on the various regional or little traditions from the middle ages analyzing how the local religious cultures (both in the Hindi and non-Hindi speaking areas) may have played out against the great classical Brahmanic tradition. The course concludes with a discussion of how Hinduism has been historically influenced by other religious cultures (both indigenous and foreign) like Buddhism, Jainism, Islam, and Christianity.

ASIA 104: Introduction to Buddhism (3 Credits) (GH) (US) (IL) (BA)

Old Listing Effective Through Fall 2018:

A general survey of the basic doctrine, practice, and historical development of Hinayana and Mahayana Buddhism. RL ST (ASIA) 104 Introduction to Buddhism (3) (GH;US;IL)(BA) This course meets the Bachelor of Arts degree requirements. This course is a general survey of the historical development, basic doctrines, and practices of Hinayana, Mahayana, and Vajrayana Buddhism. The course is structured around the “Three Jewels” of Buddhism: Dharma, Dharma, and Sangha. That is to say, we will learn about the Buddhist as a historical figure and spirit; we will come to understand the basic elements of his doctrinal teachings; and we will examine the community of followers who have practiced his teachings. Special attention will be paid to the various “geographies” of Buddhism as expressed through different cultures in ancient India, Southeast Asia, and East Asia. At the conclusion of the course, we will encounter Buddhist as a relatively new cultural force in America. The course revolves around the discussion of key issues in the philosophy, ethics, and theology of various forms of Buddhism.

ASIA 181: Introduction to the Religions of China and Japan (3 Credits) (IL) (BA)

Old Listing Effective Through Fall 2018:

A survey of the history, philosophy, and cultural impact of the major Far Eastern religions: Confucianism, Taoism, Buddhism, and Shinto. ASIA (RL ST) 181 Introduction to the Religions of China and Japan (3)(IL) (BA) This course meets the Bachelor of Arts degree requirements. This is an introductory survey of the historical, philosophical, and cultural dimensions of the major religious traditions in China and Japan. The course delineates and highlights the organic view of the universe and the hierarchical ordering of society in East Asia. It traces the evolution of the major traditions—Confucianism, Daoism, Buddhism in China, as well as Shinto, Buddhism and Confucianism in Japan—by examining their ideas of humanity and nature, morality and society, and metaphysics and ethics. It also reveals the interaction and interrelation between ideology, politics and society, and their impact on the development of the major religious traditions in history. A major focus is the relation between the “little tradition”—the popular and folk practices and beliefs of esoteric Daoism, devotional Buddhism, and fertility-cult Shinto—and the “great tradition”—the elite and literate doctrines and precepts of Confucianism, philosophical Daoism, and monastic Buddhism. The course also devotes some attention to the influence of religion on various facets of culture, such as medicine, science, literature, art and food.

ASIA 200: What Are Asian Languages? (3 Credits) (GH) (IL) (BA)

Old Listing Effective Through Fall 2018:

Introduction to the interrelated notions of language, interaction, and culture centering on regions and languages covered in Asian Studies. ASIA 200 What Are Asian Languages? (3) (GH;IL)(BA) This course meets the Bachelor of Arts degree requirements. The purpose of the course is to introduce the interrelated concepts of language, interaction, communication, and culture. The focus is on Asian languages (Korean, Japanese, Chinese, Persian, Hindi, Punjabi, and Urdu) spanning the regions addressed by the Department of Asian Studies. Students explore which concepts in language and culture are universal (e.g., basic reference, time, space) and which are language-culture specific. The course examines what constitutes human language and how human language differs from other forms of communication, e.g., animal communication, artificial languages, and computer-related languages. At issue is the concept of meaning, gradations of meaning, nuances of meaning, literal meaning, implied and inferred meaning, and so forth. The course provides an overview of the essential branches of linguistics (phonetics, phonology, morphology, semantics, syntax, and pragmatics) initially using English examples to illustrate these areas of linguistic focus. English is also used to illustrate the classical notions of parts of speech. The course provides an overview of the geographic regions in which each of the seven languages are spoken, as well as an overview of writing systems, the notions of standard languages, official languages, government oversight of language purity, and dialects. The course examines pragmatics— including basic theories of politeness.
This is a 200-level course and is open to any Asian Studies major or minor interested in learning about the language-culture interface as it applies to languages offered in Asian Studies (plus Persian). Students of any proficiency level of any of the target languages are welcome, from absolute beginners to heritage and/or native speakers.

Changes Effective Spring 2019:

- Description
- Add B.A. Humanities

ASTRO 120: The Big Bang Universe (3 Credits) (BA) (GN)
Old Listing Effective Through Fall 2018:

Exploration of Cosmology, Birth, and Ultimate Fate of the Universe; Origin of Galaxies, Quasars, and Dark Matter. For non-science majors ASTRO 120 The Big Bang Universe (3) (G)N)BA) This course meets the Bachelor of Arts degree requirements. Astronomical observations made during the last 70 years, combined with mathematical physical theory (Einstein’s General Relativity), has led to a dramatic new view of the history of the Universe. Ten to twenty billion years ago, all the material that is now contained in stars, planets, and galaxies was then compressed into a region, smaller than a pinhead, and so hot that atoms could not survive. This fiery cauldron cooled and expanded, forming hydrogen and helium, and eventually all the materials and structures that we know today. This course will discuss the evidence, theories and controversies of this new scientific cosmology, commonly known as ‘the Big Bang’. This class is designed for the non-science students who, after learning the fundamentals of astronomy in ASTRO 1(GN), ASTRO 5 (GN) or ASTRO 10 (GN), want to pursue further the questions of cosmology. The great success of the Big Bang theory in explaining the expansion of the Universe, the synthesis of the chemical elements, and the relic radiation leftover from the first moments are reviewed. Some of the questions discussed are still debated in the scientific community. For example: Why do some galaxies have stunning spiral structures, while others are relatively featureless ellipticals? What is the “dark matter” that may have emerged from the Big Bang, and seems to make a larger contribution to the mass of the universe than all of the material we are familiar with? What can the most distant and oldest objects we know of, the quasars, tell us about how galaxies formed? In presenting the development of this subject, the empirical and conceptual methods of modern physical science are conveyed. Students are assigned problems that exercise the use of elementary mathematics and physics to address real issues, and will confront discussions of interpretation and meaning in essays. A final project allows them to explore individual interests.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

ASTRO 130: Black Holes in the Universe (3 Credits) (BA) (GN)
Old Listing Effective Through Fall 2018:

The predicted properties of black holes and the astronomical evidence for their existence are investigated in the context of modern ideas about space, time, and gravity. BLACK HOLE ASTRO 130 Black Holes in the Universe (3) (G)N)BA) This course meets the Bachelor of Arts degree requirements. Black Holes in the Universe introduces students to the predicted properties of black holes and the astronomical evidence for their existence. Modern ideas about the nature of space, time, and gravity are also covered. The key topics discussed in the course include Newton’s and Einstein’s theories of gravity, predicted properties of black holes, stars and their fates, how to detect a black hole, gamma-ray bursts, supermassive black holes in galactic nuclei, active galaxies, black hole spin, gravitational waves, Hawking radiation, singularities, and black hole child universes. The course is intended to be an attractive choice for students who are interested in enriching and broadening their understanding of modern physical science. The course is intended for students who have completed and enjoyed the one-semester survey of modern astronomy, ASTRO 001 or 010. It has an interdisciplinary flavor, combining basic physical concepts, astronomical observations, and philosophical ideas to present a complete picture of the current understanding of black holes. Students use mathematics at the level of high school algebra.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

ASTRO 140: Life in the Universe (3 Credits) (BA)
Old Listing Effective Through Fall 2018:

The problem of the existence of life beyond Earth is investigated, drawing from recent research in astronomy and other fields. For non-science majors. ASTRO 140 Life in the Universe (3) (G)N)BA) This course meets the Bachelor of Arts degree requirements. The possibility of life after Earth is one of the great unsolved puzzles of human thought and has been debated for millennia. An answer would fundamentally change the relationship between the human race to the rest of the Universe. Advances in modern physics and astrophysics have dramatically changed and enriched the understanding of our cosmic surroundings, but have not yet produced an unambiguous evidence concerning the extraterrestrial life. Yet, significant progress has been made on certain aspects of the problem. Recent observations of protoplanetary disks around young stars, planets around solar-type stars and a rapidly spinning pulsar (a Penn State discovery), and pervasive organic molecules throughout the Galaxy give tantalizing albeit indirect, hints in favor of the existence of nonterrestrial life. “Life in the Universe” is envisioned to be an attractive choice for students who are interested in enriching and broadening their understanding of modern science. The course is highly interdisciplinary, combining evidence from several fields of science to describe our chances to encounter life beyond Earth and the Solar System. Selecting this course would be a logical choice for students who completed and enjoyed ASTRO 1 (GN), ASTRO 5 (GN), ASTRO 10 (GN). The students are expected to reach the following goals from this course: – learn to appreciate limitations of human experience and a role of the interdisciplinary approach in solving scientific problems – gain understanding of a relationship between the physical Earth, its biosphere, and the rest of the observable Universe – examine in some detail a contemporary problem of scientific investigation: the astrophysical evidence for planets around stars other than the Sun – assess the scientific significance of searches for extraterrestrial life including technological civilizations. The course material is conveyed, analyzed and discussed through lectures, invited talks, reading, essay writing, homework assignments and oral presentations. Lectures systematically cover the topics listed in the course outline at a level appropriate for non-science students, although Science and Engineering majors do take the course and perform at a higher technical level. While general understanding of astronomy from the prerequisite course is expected, the necessary physical and astrophysical concepts are reintroduced to assure a logical and coherent flow of information throughout the course. Videos are used to illustrate a number of topics, such as the search for extraterrestrial intelligence, physical conditions on planets of the Solar System, the detection of planets around a neutron star, and to evaluate the scientific content of science fiction movies. Invited talks by faculty from other departments enrich the course material with in-depth presentations of subjects such as habitable zones around
stars, the basics and perspectives of space flight and the foundations of biological evolution. There has been some experimentation with activity and assessment strategies for the course. Some of the work involves quantitative analysis while other work requires qualitative synthesis of classroom experience with readings. Group presentations give students a chance to study selected, often controversial topics and present them to the class in a disciplined, scientific manner.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

ASTRO 401: Fundamentals of Planetary Science and Astronomy (4 Credits)
Old Listing Effective Through Fall 2018:

Overview of the techniques used and results from studies of the Solar System, stars, and galaxies. ASTRO 401 Fundamentals of Planetary Science and Astronomy (3) This course will focus in core content areas in planetary science and astronomy. Students will explore the fundamentals in robotic exploration of the Solar System, how astronomers map and navigate the night sky, our understanding of the nature and evolution of stars, and the nature and evolution of galaxies. Students will engage with real data from Solar System missions as well as ground-based and space-based telescopes. Through the use of many databases and data archives from missions and observatories, the students will become familiar with the census of astronomical objects in various categories. A particular emphasis will be placed on examples of qualitative and quantitative problem solving in these content areas. In addition, students will explore how scientists communicate their results to the public, and they will get hands-on experience, such as planning and executing a planetarium show.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

ASTRO 410: Computational Astrophysics (3 Credits)
Old Listing Effective Through Fall 2018:

Applications of numerical methods and computer programming to astrophysics, including stellar physics and cosmology.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

ASTRO 494H: Honors Thesis (1-6 Credits: Maximum of 6 Credits) (H)
Old Listing Effective Through Fall 2018:

Investigation of an original research problem, including a literature search. Preparation of a formal thesis is optional

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

BIOL 1: Preparation Skills for Success in Biology and Life Sciences (1 Credit)
Old Listing Effective Through Fall 2018:

Description: A foundation course that emphasizes study skills and reviews basic biological, chemistry and mathematical principles. BIOL 001 Biology of Success (1) This course is designed to facilitate success in the required science courses for allied health majors. Many students are challenged by their lack of basic skills and knowledge in one or more of the following areas: biology, chemistry, mathematics, and study skills. Thus, this course addresses these issues and positions the student for success. During the semester equal time is given to the following topics: study skills, which includes learning styles, goals, test taking strategies and organizational skills; terminology, which includes practice with prefixes, roots, and suffixes; basic math skills, which includes the metric system and practice with work problems; chemistry, which covers atoms, ions, and basic anabolic and catabolic reactions; cell structure and functioning; and body basics, which is an overview of the anatomy and functioning of body systems. Students are given a diversity of assignments and projects relevant to the various topics that will allow them to review and develop a basic level of competency in these areas in preparation for required science courses.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

BIOL 3: Peer Learning in Biology (1 Credit)
Old Listing Effective Through Fall 2018:

Group and learning skills to facilitate the understanding of complex biological processes. BIOL 003 BIOL 003 Peer Learning in Biology (1) The study of Biology is complicated by the myriad pathways and processes that must be mastered in a way that interrelationship become apparent. A major stumbling block in a student’s progress is learning how best to organize one’s study so that both the details of these processes can be learned, along with how these processes fit together (i.e. integration). The second hurdle is learning how to use this information in a way that can solve real life problems and to communicate this process to others. This course is designed for students who would like to improve their ability to organize their learning strategies in order to maximize their understanding of the complexities of life’s process. The course will be organized using peer learning groups which are posited on the assertion that every student can improve their performance with the proper environment and direction. Group leaders (enrolled in BIOL 251) will play an integral role in the program in that they are the connection between participant and course instructors. The group leaders will learn how to pass their skills on to other students in such a way as to encourage ownership of their education. Through regular meetings, the students enrolled in BIOL 003 will learn about time management and study skills, test taking strategies, exam writing, working with others that have divergent learning styles, and how to be multicultural competent such that they are able to work with a diverse population.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

BIOL 220M: Honors Biology: Populations and Communities (4 Credits) (H) (WF) (BA) (GN)
Old Listing Effective Through Fall 2018:

Honors study of the major physical, chemical, and biological factors constituting environment and their dynamic interaction with organisms forming ecosystems. BIOL 220M Honors Biology: Populations and Communities (4) (GN)(BA) This course meets the Bachelor of Arts degree requirements. BIOL 220M is an introductory course in ecology. It introduces students to the fundamental ecological principles, concepts, patterns, and processes regarding populations, communities, and ecosystems. This course provides students with a foundation of ecological science, as well demonstrating linkages between ecology, population genetics, and evolution. The course objectives are the
same as those described in the parent course proposal and are to provide students with a fundamental understanding of: 1) genetic processes within populations of living things; 2) evolutionary processes involved in speciation; 3) dynamic interactions of organisms within and among populations, especially pertaining to energy cycles, various biogeochemical cycles, predator-prey interactions, and the like, and; 4) distribution patterns of living organisms and the need to conserve the resources of the earth. Evaluation methods in the lecture part of the course include two to three "mid-term" exams and a comprehensive final exam. Evaluation methods in the lab portion of the course include in-class quizzes, one or more formal lab reports on experiments or data analysis conducted in lab sessions, and short write-ups of existing data sets or relevant ecological issues. Points earned on lecture exams comprise between 65-75% of the total points, whereas points earned in lab comprise about 25-35% of the total points earned in the course. The Honor's version of the course will differ in a number of ways from the parent BIOL 220W course. First, there are more opportunities to discuss current applications of the information. In addition, a unique project (either in lab and/or lecture) will allow students to explore a specific area of the course in more detail (e.g., students can select a species or specific habitat and develop a plan for its restoration). Where appropriate, students will be exposed to current research in specific areas. The evaluation for the course will be modified from that of the parent course in accordance with the changes in assignments.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 220W: Biology: Populations and Communities (4 Credits) (WF) (BA) (GN)

Old Listing Effective Through Fall 2018:

A study of the structures and functions of organismic interactions from simple populations to complex ecosystems. (BIOL 220W, BIOL 230W, and BIOL 240W each carry only 1 credit of "writing"; all three courses must be taken to meet the writing requirement.) BIOL 220W Biology: Populations and Communities (4) (GN)(BA) This course meets the Bachelor of Arts degree requirements. BIOL 220W is an introductory course in ecology. It introduces students to the fundamental ecological principles, concepts, patterns, and processes regarding populations, communities, and ecosystems. This course provides students with a foundation of ecological science, as well demonstrating linkages between ecology, population genetics, and evolution. The course objectives are the same as those described in the original course proposal and are to provide students with a fundamental understanding of: 1) genetic processes within populations of living things, 2) evolutionary processes involved in speciation, 3) dynamic interactions of organisms within and among populations, especially pertaining to energy cycles, various biogeochemical cycles, predator-prey interactions, and the like, and 4) distribution patterns of living organisms and the need to conserve the resources of the earth. Evaluation methods in the lecture part of the course include two to three "mid-term" exams and a comprehensive final exam. Evaluation methods in the lab portion of the course include in-class quizzes, one or more formal lab reports on experiments or data analysis conducted in lab sessions, and short write-ups of existing data sets or relevant ecological issues. Points earned on lecture exams comprise between 65 – 75% of the total points, whereas points earned in lab comprise about 25 – 35% of the total points earned in the course.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 222: Genetics (3 Credits)

Old Listing Effective Through Fall 2018:

Variation and heredity in bacteria, plants, and animals; relationships of genetic knowledge to evolution and breeding practices. This course is for students in life sciences majors that are not Biology, Genetics and Development and Biochemistry and Molecular Biology. Students should have at least 3 credits of biological sciences before scheduling this course. In this course, we will discuss chromosome structure; mitosis and meiosis, in particular their application of the transmission of DNA; principles of Mendelian inheritance; structure and function of DNA, RNA, and proteins; gene expression; DNA mutations and chromosome changes; genomics; population genetics and the intersection of genetics and society. The course will include multimedia presentations, textbook readings, problem-solving and homework, in-class activities and discussions of science and society.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 230M: Honors Biology: Molecules and Cells (4 Credits) (H) (WF) (BA) (GN)

Old Listing Effective Through Fall 2018:

This four credit course with lecture and laboratory components provides an understanding of the major unifying principles of life as they apply to the study of the molecular mechanisms underpinning the function of living organisms. Through the lab, students are expected to become proficient in the interpretation and presentation of experimental results through written and oral reports. Taken together with the other honors core courses in the biology curriculum (BIOL 110H, BIOL 220M, BIOL 240M), BIOL 230M will help students to integrate concepts ranging from molecular and cellular events through principles governing entire populations and ecosystems. Further, BIOL 230M provides the foundation on which students further their study of molecular genetics – a discipline integral to a number of the biological sciences. Through this class, and the other core course, students will develop a number of the skills outlined in the General Education mission. BIOL 230M serves a number of majors and colleges. The laboratory portion of the course requires a fully equipped laboratory room, as well as a classroom for recitation meetings. The Honor's version of the course will differ in a number of ways from the parent BIOL 230W course. First, there are more opportunities to discuss current applications of the information. In addition, a unique project (either in lab and/or in lecture) will allow students to explore a specific area of the course in more detail (e.g., take a paper from the primary literature and present the data, and its significance, to the class). Where appropriate, students will be exposed to current research in specific areas. In addition, the laboratory component will have opportunities for students to do more in depth exercises where, to some degree, they could pose their own questions.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 230W: Biology: Molecules and Cells (4 Credits) (WF) (BA) (GN)

Old Listing Effective Through Fall 2018:
BIOL 230W is a four credit course with lecture and laboratory components. (BIOL 220W, BIOL 230W, and BIOL 240W each carry only 1 credit of "writing"; all three courses must be taken to meet the writing requirement.) The goal of this course is to provide an understanding of the major unifying principles of life as they apply to the study of the molecular mechanisms underpinning the function of living organisms. Through the lab, students are expected to become proficient in the interpretation and presentation of experimental results through written and oral reports. Taken together with the other core courses in the biology curriculum (BIOL 110, BIOL 220W, BIOL 240W), BIOL 230W will help students to integrate concepts ranging from molecular and cellular events through principles governing entire populations and ecosystems. Further, BIOL 230W provides the foundation on which students further their study of molecular genetics – a discipline integral to a number of the biological sciences.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 240M: Honors Biology: Function and Development of Organisms (4 Credits) (H) (WF) (GN)

Old Listing Effective Through Fall 2018:

Honors study of development and physiological processes at the organismic level. (BIOL 220W, BIOL 230W, and BIOL 240W each carry only 1 credit of "writing"; all three courses must be taken to meet the writing requirement.) BIOL 240M Honors Biology: Function and Development of Organisms (4) (GN)(BA) This course meets the Bachelor of Arts degree requirements. This course provides an understanding of the major unifying principles as they apply to the study of the development and physiological mechanisms utilized by organisms from both animals and plants. In lecture a comparative approach will be taken in the examination of reproduction, development, and physiology primarily at the organismal level. In laboratory, experimental investigations of both animal and plant systems will reinforce the concepts covered in lecture. Through the lab, students are expected to become proficient in the interpretation and presentation of experimental results through written and oral reports. Taken together with the other core courses in the biology curriculum (BIOL 110, BIOL 220W, BIOL 230W), BIOL 240W will help students to integrate concepts ranging from molecular and cellular events through principles governing entire populations and ecosystems. Further, BIOL 240M provides the foundation on which students further their study of animal physiology and development – two of the largest options in the biology majors curriculum. Through this class, and the other core course, students will develop skills integral to the General Education mission. BIOL 240W serves from a number of majors and colleges and typically enrolls ca. 500 students at University Park and an equal number at campuses throughout the Penn State system. Given the large size of the class, the facilities requirements are substantial. Currently room 100 Thomas is used for lectures, and provides an excellent opportunity to incorporate multimedia presentations in a relatively intimate format. The laboratory portion of the course requires several fully equipped laboratory rooms, as well as classrooms for recitation meetings. For this purpose, two wet lab rooms in Muller Lab (105 and 108) are designated and are shared with another core course offered currently. Finally, a designated preparatory facility (room 107 Mueller) is used exclusively in the core courses.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 251: Peer Leadership in Biology (1 Credit)

Old Listing Effective Through Fall 2018:

Leadership training in guiding others to learn, communicate, and apply biological principles. BIOL 251 BIOL 251 Peer Leadership in Biology (1) The study of Biology is complicated by the myriad pathways and processes that must be mastered in a way that interrelationship become apparent. A major stumbling block in a student’s progress is learning how best to organize one’s study so that both the details of these processes can be learned, along with how these processes fit together (i.e. integration). The second hurdle is learning how to
Students must choose and apply appropriate statistical techniques to demonstrate competence in the use of SAS, a statistics package. These activities constitute 75% of the final grade. Lectures are used to review statistics and "how tos" (e.g., proposal preparation). Case histories are used to address ethics, statistical decision-making, and design. Students are expected to challenge what they learn, and the notion that scientists must acknowledge and guard against bias in their work is emphasized. Intellectual honesty and the ability to give and receive constructive criticism are demanded. This course is required in two of the six options in biology (ecology and general), and it can be taken by students in the other options. The course is required of students who have not fulfilled the WAC requirement at the 200-level (transfer students).

**Changes Effective Spring 2019:**

- Prerequisite/Corequisite/Concurrent Courses

**BIOL 404: Cellular Mechanisms in Vertebrate Physiology (3 Credits)**

Old Listing Effective Through Fall 2018:

This course considers cellular mechanisms governing physiological aspects of vertebrate cell signaling and their adaptation to particular organismal functions.

**Changes Effective Spring 2019:**

- Prerequisite/Corequisite/Concurrent Courses
- Description

**BIOL 405: Molecular Evolution (3 Credits)**

Old Listing Effective Through Spring 2019:

This course is designed to introduce the concepts of evolution from a molecular point of view and the basic techniques of analysis of molecular sequence data. The class will include a mixture of lecture-based and student activity-based instruction that addresses various topics in molecular evolution, as well as in-class and extracurricular work on the computer to learn how to use online bioinformatics tools for sequence analysis. As a result of this course, students will be able to analyze DNA and protein data with a purpose of addressing specific scientific questions of interest. The course embraces applications of computing and statistics to the life sciences.

**Changes Effective Spring 2019:**

- Prerequisite/Corequisite/Concurrent Courses
- Description

**BIOL 406: Symbiosis (3 Credits)**

Old Listing Effective Through Fall 2018:

Mutualisms (interactions between two species that benefit both of them) occur in every habitat on Earth, and nearly every species on the planet is involved directly or indirectly in one or more of these interactions. The influence of mutualisms transcends levels of biological organization from cells to populations, communities and ecosystems. Mutualistic associations, such as our microbiome and agricultural symbioses, are critical for human health and welfare. Mutualistic symbioses played a fundamental role on the origin of the eukaryotic cells and the evolution of multicellularity. In addition to the key role played by mutualism in the evolution of complex lifeforms on earth, mutualistic association are instrumental to understand how some important ecosystems such coral reefs and hydrothermal vents function. Mutualistic symbioses are critical for nutrient cycling in the environment and the reproduction and dispersal of numerous plant and animal species. This course will focus on unifying
concepts that cut across different forms of mutualism. We will explain
and tests these concepts analyzing classic examples of mutualisms.
We will define and categorize the diverse array of symbiosis occurring
in nature. We will explore the evolutionary origins and implications
of mutualistic symbiosis, investigate the population, community
and ecosystem ecology of mutualisms and we will assess current
anthropogenic threats to mutualisms, their potential for resilience and
the role of mutualisms in conservation. Finally, we will explore in detail
the metabolic linkages using selected nutritional symbiotic mutualisms
examples. The course combines in-class and online teaching, as well
as a weekly discussion session, in which the students are responsible
for selecting one primary scientific article, prepare a brief presentation
and lead a critical discussion session in front of the class. The course
takes advantage of the technology-rich Bluebox experimental classroom.
This learning space has been designed to support active, collaborative
learning experiences increasing student engagement.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 407: Plant Developmental Anatomy (3 Credits)
Old Listing Effective Through Fall 2018:

The course will provide students with an understanding of the
developmental anatomy of plant organs, tissues and cells throughout
the plant life cycle. When appropriate, the course will discuss genes
involved in the formation and function of these organs and how organ
development is affected by environmental inputs. In laboratory sections,
observational skills will be trained and knowledge gained in lectures
will be applied to the analysis of plant anatomical structures. Plant
developmental adjustments to environmental stresses will be studied
using light microscopy and digital image acquisition. Primary scientific
literature related to the lecture topics will be assigned as reading material
to be discussed in class. Students will learn how to formulate research
hypotheses and, in a written assignment, research a global challenge to
food security and discuss strategies to improve agricultural productivity
by manipulating the biology of plants.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 409: Title: Biology of Aging (3 Credits)
Old Listing Effective Through Fall 2018:

Mechanisms of the aging process, with special reference to man.
Unfavorable progressive changes in molecules, cells, systems, and
organisms.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 411: Medical Embryology (3 Credits)
Old Listing Effective Through Fall 2018:

This course offers an overview of Human Embryology, including
reproductive physiology, infertility, the events and timeframes
characterizing human embryological development, the structure and
function of developing human body systems, and relevant clinical
correlations associated with disease and congenital malformations. This
course features discussions and explanations of topics in developmental
biology that some students might view as controversial including
comparative anatomy and evolution, contraception, assisted reproductive
techniques, cloning, potential medical applications of stem cells, abortion
with respect to developmental time frames, and gender development.
The goal of such discussions will be to educate and give perspectives on
these issues, but not to indoctrinate a particular viewpoint or philosophy.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 412: Ecology of Infectious Diseases (3 Credits)
Old Listing Effective Through Fall 2018:

This course examines how ecological processes impact upon the
of Infectious Diseases (3) The course will examine the population
dynamics of disease and takes an ecological perspective on how
pathogens and parasites flow through host populations to identify
possible means of predicting and controlling pathogens. The approach
is one of population dynamics, examining changes in disease patterns
in time and space. We construct mathematical models to capture
the patterns observed, make predictions and identify the means of
reducing disease spread. This is an ecological approach, applying the
techniques of population biology to an understanding of Parasitology
to develop a different perspective on epidemiology. At the same time,
the course brings aspects of evolutionary biology into the course and
will examine some of the current issues in disease biology including
disease emergence, bioterrorism, agro-terrorism and the role of humans
as disease reservoirs for wildlife etc. Upon completion of this course,
students will obtain insight into the dynamics of disease spread. They will
understand how to construct models and how to apply generic models to
specific disease systems and make predictions about controlling disease.
They will grasp some major concepts in Parasitology and population
dynamics including the role of the disease basic reproductive number
(R0), when diseases show a density dependent patterns of transmission
or a frequency dependent pattern, non-linear dynamics and the processes
that generate heterogeneities in exposure and susceptibility. The course
will provide an excellent course for pre-Med students, biologists and
students interested in ecology.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 413: Cell Signaling and Regulation (3 Credits)
Old Listing Effective Through Fall 2018:

Introduction to the molecular mechanisms by which cells send, receive,
regulate, and respond to signals. Through review of primary literature,
students will explore the variety of mechanism by which endocrine,
paracrine, and juxtacrine signal molecules exert their effects on target
cells. Subject matter will include ligand/receptor families, second
messenger systems, G-proteins, kinase cascades, and effector proteins
that regulate cytoskeleton dynamics, metabolism, and gene expression.

Changes Effective Spring 2019:
• Prerequisite/Corequisite/Concurrent Courses
• Description

**Biol 414: Taxonomy of Seed Plants (3 Credits)**
Old Listing Effective Through Fall 2018:

This course provides an introduction to modern plant systematics as exemplified by the wide diversity of living plants growing in central PA. By the end of the course, students will be able to: 1) use the technical vocabulary that describes plant structures necessary for their identification, 2) characterize the major groups and families of flowering plants and gymnosperms, 3) recognize on sight 60 of the most important plant families in our region and be able to describe and contrast their major features, 4) use and write identification keys to identify and study living plants as represented in the local flora, and 5) discuss current concepts of plant systematics and phylogenetics and their applications to plant classification and the study of the evolution of and relationships among families of flowering plants.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

**Biol 415: Ecotoxicology (3 Credits)**
Old Listing Effective Through Fall 2018:

MAJOR CONCEPTS AND CONTROVERSIES IN THE INTERDISCIPLINARY FIELD OF ECOLOGICAL TOXICOLOGY, TOXICITY ANALYSIS, REMEDIATION, AND CASE STUDIES OF ENVIRONMENTAL POLLUTION.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

**Biol 416: Biology of Cancer (3 Credits)**
Old Listing Effective Through Fall 2018:

Biology of Cancer introduces basic biological aspects of cancer development with an emphasis on molecular and cellular mechanisms of tumorigenesis. It discusses how molecular genetic approaches can be used to reveal fundamental processes of carcinogenesis.

Through this course, students will learn genetic, cellular and biochemical basis of cancer development and understand how such information can be instrumental in devising strategies for prevention, detection, and treatment of cancer. As a 400 level class, students are expected to have a background in molecular biology and genetics.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

**Biol 419: Ecological and Environmental Problem Solving (3 Credits)**
Old Listing Effective Through Fall 2018:

Overview of processes involved in solving environmental problems. Provides students with toolkit for understanding ecological and environmental problems. BIOL 419 Ecological and Environmental Problem Solving (3) The course will provide a general overview of the process involved in studying a variety of ecological and environmental problems. It will provide a toolbox of techniques for understanding ecological

and environmental problems, and discuss how they can be used to address questions and generate testable predictions. It will examine connections between individuals and populations and communities as well as between theory and data. The focus will be on theoretical and computer modeling approaches, while maintaining a strong link to data and real systems. After an introduction to modeling, students will learn to develop and use simple and stochastic optimization models for individual organisms, as well as applying basic game theory to interactions between individuals. Many of the class meetings will be held in computer laboratories where they will be actively engaged in working on applying these models. They will explore a sequence of population demographic models of increasing complexity, ranging from unlimited, unstructured population growth to density-dependent, structured population growth, in non-spatial and spatial contexts, culminating in individual-based models for population dynamics. The students will then apply these models to interacting species, learning about mutualistic, competitive and host-natural enemy interactions. Finally, we will explore theory for communities of species in space and time. Applied problems will be drawn from all areas of conservation, harvesting, pest control and epidemiology. This course will be one of several ecology courses that are available to students in the ecology and general option in the biology program along with the biology minor.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

**Biol 421: Comparative Anatomy of Vertebrates (4 Credits)**
Old Listing Effective Through Fall 2018:

Biol 421 / VBSC 421 Comparative Anatomy of Vertebrates Students will study vertebrate anatomy from an evolutionary and developmental perspective. They will become familiar with important structures, terminology and function; a basic requirement of the biomedical sciences. Comparisons between representative vertebrate groups (including fish, amphibians, reptiles, birds and mammals) will be used to illustrate structural adaptations of each organ system from an evolutionary perspective. Specific examples comparing ancestral and descendant species will demonstrate the relationships between the lifestyle of an organism and the morphology of homologous structures. A study of early embryonic development, differentiation of primary germ layers and organ formation will provide a basis for understanding organ structure and function. Laboratory activities will involve work with preserved specimens and will focus heavily on anatomic structure identification and function. Topics include anatomic directional terminology, vertebrate classification systems, early embryonic development and a detailed examination of the various organ systems. Specimens are selected to illustrate the anatomy of ancestral vertebrate species, the evolutionary changes observed in descendant species and the association of morphology with lifestyle. Although students will invest the majority of their time becoming familiar with the anatomy of a representative mammal (the cat), multiple species will be examined, and students will be expected to recognize selected anatomic structures in each species studied.

Cross-Listed Courses: VBSC 421

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description
BIOL 422: Advanced Genetics (3 Credits)
Old Listing Effective Through Fall 2018:

Now is an exciting time for evolutionary, quantitative, and disease genetics. Increasingly sophisticated technologies are making it possible to obtain dense genomic data from large numbers of individuals from a variety of taxa. Such data permits the evaluation of processes that have generated genetic variation, providing a rich resource to make inferences about natural selection and population history that have affected the current distribution of genetic diversity. In addition, when correlated with phenotypic traits, such data enables researchers to identify genomic regions underlying trait variation which is of particular importance for identifying genes involved in disease. By the end of the course, students will be able to understand how the genome is organized, learn how to find and assay genetic variation across the genome, and will know how such variation is inherited. They will learn how pedigree analysis, linkage mapping, and autozygosity mapping can be used to identify loci underlying Mendelian traits, and will be exposed to a number of examples from human disease. The students will also learn about the neutral and adaptive processes that shape genetic diversity within and across species, and will understand the basics of sequence alignment, phylogenetic reconstruction, and testing for natural selection from within and between species data. Moreover, students will acquire the fundamentals of quantitative genetics, will understand the essentials of polygenic adaptation, and will learn how to use genome-wide association studies to identify loci underlying complex traits. Finally, students will become familiar with recent advances in individual identification from genetic data, and its relationship to privacy.

Changes Effective Spring 2019:
• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 424: Seeds of Change: The Uses of Plants (3 Credits)
Old Listing Effective Through Fall 2018:

It is not possible to conceive of civilization, or life on earth for that matter, without plants. Through photosynthesis and oxygen production, plants are the major producers of biomass and constitute the base of the food pyramid. Plants also have evolved astounding diversity of forms, sizes, shapes, colors, smells and chemical compounds. This structural, nutritional and chemical flexibility has been put to innumerable uses by people, from hunter gatherers to the scientists in search of a cure for AIDS. Plants are at the core of our everyday necessities (food, clothing, shelter, medicines, beverages), simple pleasures (flower, fragrances) and pervasive problems (energy supply, drug addiction, famine). Plants have changed civilization in dramatic ways in the past. Witness, for example, the spectacular alterations in diet and the increased population growth catalyzed by the Columbian Exchange. In the future we expect that plants will continue to affect people through an increasingly complex interplay between new technologies such as genetic engineering, the pressure on natural resources, and the search for new crops, medicines and biomaterials.

Changes Effective Spring 2019:
• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 425: Biology of Fungi (4 Credits)
Old Listing Effective Through Fall 2018:

BIOL 425 / PPEM 425 (4 cr.) is a lecture and laboratory survey of the diversity of Fungi, consisting of two 75-minute lecture and two 180-minute laboratory/field activity periods per week. The course moves from branch to branch in the Fungal tree of life, covering aspects of ecology, morphology, physiology and life history, as well as current and historical importance to human affairs in medicine, agriculture and industry. Topics covered as students move through the Fungal tree include: 1) Macrofungi seen in the field; 2) Fungal evolution; 3) Fungal reproduction and dispersal; 4) Fungal growth, development and structure; 5) Fungal genetics and genomics; 6) Fungi as mutualistic symbionts of plants, animals and other organisms; 7) Fungal diseases of plants, animals and humans; 8) Fungi as toxin producers; 9) Fungi as sources of food, pharmaceuticals and enzymes; and 10) Fungi as research organisms used to understand basic biological processes. Some laboratory sessions consist of field trips to local forests to observe and collect Fungi for observation in the laboratory.

Cross-Listed Courses: PPEM 425

Changes Effective Spring 2019:
• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 426: Developmental Neurobiology (3 Credits)
Old Listing Effective Through Fall 2018:

This course will provide a general overview of developmental processes as they apply to the central nervous systems. From initial differentiation of neuronal tissue to the aging of human brain, this course will expose students to many hot topics in the current neuroscience research field, including synaptogenesis, axon guidance, neural stem cells, apoptosis, learning and memory, and Alzheimer’s disease. Although one textbook will be assigned as the major reference book, many current research results will be integrated into the lectures so that students can grasp the most recent advancement related to each topic. The course will be divided into four parts. Part I introduces the induction of neural tissue, the polarity and regionalization of the neural tissue, and the generation and function of neural stem cells. Cutting-edge research on neural stem cells will be discussed. Part II deals with various interactions within neuronal system, including neuron-glial interaction, cell adhesion and migration, axon growth and guidance, and target selection. Part III teaches synapse formation and maturation, neurotrophic factors and their distinct functions, and neuronal cell death. Part IV talks about learning and memory from a developmental view, and also neurodegenerative diseases. Current disease research will be discussed. The lectures will be given in PowerPoint presentations. Classical models and front line research will be integrated to stimulate students’ imaginative thinking. Students will be encouraged to read some current research paper and offer their own view on some particular subject, such as neural stem cells and learning and memory.

Changes Effective Spring 2019:
• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 427: Evolution (3 Credits)
Old Listing Effective Through Fall 2018:

This course will study the theory of evolution and the different levels at which biological evolution can be examined ranging from macroevolution and the fossil record to microevolutionary processes at the population level. It will look at how genomes evolve from bacteria to multicellular
organisms as well as the evolution of body plans in plants and animals and the molecular underpinnings of these developmental transitions. These concepts will be used to understand human evolution and learn how the genome revolution has shed light on evolutionary medicine.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 428: Population Genetics (3 Credits)
Old Listing Effective Through Fall 2018:

This is an exciting time for population genetics research. Increasingly sophisticated technologies are making it possible to obtain dense genomic data from large numbers of individuals. Further, advances in population genetics theory are improving our ability to make inferences about the evolutionary forces acting on populations. However, to effectively apply these new techniques to data being generated across populations, it is important to understand how evolutionary processes shape patterns of genetic variation. In this course, students will learn about the mathematical models employed in population genetics, and how these models can be used to make inferences from data. Specifically, this course emphasizes modern population genetic theory through the coalescent process, which provides a direct application to the analysis and understanding of empirical data.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 429: Animal Behavior (3 Credits)
Old Listing Effective Through Fall 2018:

Physiological mechanisms, ecological relevance, and adaptive significance of animal behavior.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 431: Reproductive Biology (3 Credits)
Old Listing Effective Through Fall 2018:

Reproductive Biology is an upper-level undergraduate course. The course will discuss topics in reproductive development and physiology, which can include development of gonads and the germline, sex determination, meiosis, development of gametes, plant reproductive development, effects of environmental factors on reproductive development, cloning and asexual reproduction, infertility and birth defects. In addition to morphological and cellular description of reproductive organs and tissues, there will also be discussion of genetic basis of diseases and molecular analysis of gene functions crucial for reproductive development in human and model organisms. Students will be asked to read original research articles on various aspects of reproductive biology, and work in two-person teams on a powerpoint presentation, which they use to report their understanding of a selected article in class to other students. The lectures and exams focus upon concepts integral to reproductive biology. Exams will be a combination of multiple choice, filling blanks, and true/false questions.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 432: Developmental Genetics (3 Credits)
Old Listing Effective Through Fall 2018:

An advanced course in developmental biology, focusing on the use of genetics techniques to study fundamental questions of animal development. Topics taught in this course include an introduction of popular model organisms, various mutagenesis approaches, complex signaling mechanisms and cellular reprogramming. The goals for this course are 1. To acquire knowledge in advanced genetic tools commonly used to study animal development. 2. To acquire skills in reading and understanding scientific literature in the field of developmental genetics. 3. To acquire skills in applying knowledge and tools to solve basic problems in developmental genetics. 4. To gain an appreciation for the relevance of developmental genetics research to human health and other global issues.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 433: Evolution of Vertebrates (3 Credits)
Old Listing Effective Through Fall 2018:

This course focuses on the evolution of vertebrate animals, beginning with an overview of vertebrate classification and a consideration of early vertebrate evolution. Each group of vertebrates (fishes, amphibians, reptiles, birds and mammals) will be explored, with an emphasis on the history of each group, adaptations (physiological, morphological, behavioral) seen within the group, and relationships among members of the group, including insights from molecular data. Consideration of extant (living) vertebrates will be emphasized, specifically convergent adaptations across taxa (including flight, swimming, and specialization for similar environments, such as arctic or desert). The student will develop a perspective on vertebrate evolution, representative groups, vertebrate classification systems, and different vertebrate body plans and special adaptations. Additionally, a course project will reinforce broader skills of scholarly paper writing, oral presentation techniques, and collaboration. There is a single short field trip associated with this course. Over one weekend, the students will be driven to one of several sites, typically a zoo and a natural history museum. This experience provides students with an opportunity think deeply about how the principles presented in the class shape the diversity of past and current vertebrates. The biology major strives to develop an overall perspective on evolution for our undergraduates, and this course uses an important group, the vertebrates, to fully exemplify and develop that goal. Students in other majors outside our college, including Geology/Paleontology and Wildlife Science may also find interest in this course offering, and could graduate students.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 434: Pathobiology of Emerging Infectious Disease (3 Credits)
Old Listing Effective Through Fall 2018:

This course examines the biology of emerging and reemerging infectious diseases. The course includes viral, bacterial, and eukaryotic pathogens causing serious mortality and morbidity. Major course topics include a
historical perspective on diseases; microbiology and immunology of each class of pathogen; processes of evolutionary change in pathogens; public health efforts to detect, monitor, respond to, and/or eliminate diseases from local to international scales; zoonotic disease and host jumps; and the One Health integration of human, animal and environmental health. Students will complete quizzes, discussions, and a research project based in primary literature reporting on a current or classical infectious disease. Case studies will include, but are not limited to, influenza, HIV/AIDS, smallpox, West Nile virus, polio, dengue, tuberculosis, and malaria. Depending on class size, students may complete additional research projects or scenarios. Students with interests in disease and health from majors in many colleges may wish to take this course.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 437: Histology (4 Credits)
Old Listing Effective Through Fall 2018:

Description: This course develops a visual, conceptual, and functional understanding of histology, the microanatomy of body cells, tissues, and organs. The lecture portion of this course will use diagrams, digital images, and didactic explanations to build a conceptual understanding of histology, stressing form, function, and clinical applications. The laboratory portion of the course emphasizes form, identification, and naming of cells, tissues, and organs at a microscopic level. As such, the lab will use microscopes and digital images to investigate actual histology slides of body tissue, with the goal of visual identification, classification, and naming of body tissues.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 438: Theoretical Population Ecology (3 Credits)
Old Listing Effective Through Fall 2018:

This course a highly quantitative second ecology course. It emphasizes mathematical and theoretical approaches to ecological questions. The course builds on concepts from introductory ecology and requires students to use tools acquired in biostatistics and calculus to solve ecological problems. It can act as an introduction to or as an extension of experimental design. Although it is not a writing-intensive course, students are required to use standard technical writing and public speaking skills throughout the course. The course covers topics that are relevant to, but not addressed in, evolution and evolutionary genetics. In addition, it offers an opportunity for mathematics students interested in application of mathematics to biological problems to apply models covered in mathematical modelling to real situations. Throughout the semester analytical and theoretical thinking will be emphasized, starting with simple descriptions of population phenomena and ending with development of mathematical models and the critical experiments needed to test those models. The emphasis lies on empirical tests of ecological theory and applications of ecological theory to real-world problems. Students will be evaluated by means of essay exams covering theory, mathematical models, and the design of hypothetical experiments, in-class presentations of the primary ecological literature and applications of ecological theory to current environmental problems.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 441: Plant Physiology (3 Credits)
Old Listing Effective Through Fall 2018:

Classical and current concepts in plant constituents, mineral nutrition, water relations, respiration, photosynthesis, photoperiodism, plant growth regulators, growth and development, and responses to the environment. Using these concepts, students will be able to explain how specific processes in a plant integrate with other relevant processes to determine the overall response of the plant to a particular set of conditions; describe how multiple plant biochemical pathways intersect and influence each other; describe how energy affects processes at all levels of biological organization from the molecule and cell to organisms and ecosystems; and be able to explain how plants perceive and respond to their environment, including signal transduction, intercellular communication, and information processing. As part of their work in this course, students will demonstrate an ability to read and discuss the scientific literature on plants and critically analyze current issues in plant physiology including impacts on human health, agricultural biotechnology, and bioenergy.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 443: Evo-devo: Evolution of Developmental Mechanisms (3 Credits)
Old Listing Effective Through Fall 2018:

Evolutionary Developmental Biology (Evo-Devo) is an interdisciplinary field that combines developmental biology, comparative genetics, and evolution to understand how organisms have attained their diversity in form. While the field of developmental biology aims to understand how a given organism develops, Evo-Devo focuses on how form evolves through alteration of these developmental mechanisms. Course instruction involves lectures, discussion, and student presentations/projects and features case studies from the scientific literature across the diversity of life, towards developing a predictive framework for the evolution of form.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOL 446: Physiological Ecology (3 Credits)
Old Listing Effective Through Fall 2018:

This course introduces students to the study of interactions between physiological capabilities of organisms, their ecology and, more broadly, their environment. This course looks at how organisms work and what it is about their environment that has led them to work that way. Both abiotic and biotic components of the environment are considered as sources of important variation to which organisms must adapt. Plants and microbes are covered to some extent, but the primary focus will be on animals (both vertebrates and invertebrates). The primary goal is to gain an appreciation for the flexibility of physiological systems and the powers of evolutionary processes to shape the physiology of an organism in response to its environment.

Changes Effective Spring 2019:
BIOL 448: Ecology of Plant Reproduction (3 Credits)
Old Listing Effective Through Fall 2018:

Analysis of the ecology, evolution, and natural history of plant reproduction. We focus on angiosperms (flowering plants) but also touch on the broader reproductive diversity in plants. Our topics include pollination, fruit-set, dispersal, and relevant plant- animal interactions. This course is highly integrative and draws on basic concepts in ecology, evolutionary biology, and genetics. We also pay special attention to the implications of global environmental change on plant reproduction and plant diversity.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 450W: Experimental Field Biology (3-5 Credits) (WF)
Old Listing Effective Through Fall 2018:

This is a practical introduction to modern design of field studies and experiments in terrestrial and fresh water habitats. This is an outdoor course almost as much as a classroom one. Be prepared to go outside, develop the power of observation, and discover. Emphasis is given to learning scientific skills via active-learning methods. Students will learn to formulate research questions, and develop adequate hypotheses and study designs and experiments to test hypothesis using statistics. Students will be guided step-by- step to perform basic and advanced data analyses: from data tables and frames, to parametric, non-parametric, and multivariate statistical methods used in everyday biology and ecology research driven hypothesis-testing approaches. Each week the class meets in the classroom (Tuesdays) for discussion-format lectures, and on lab day (Thursdays) the class goes out into the field to collect data and perform experiments. Primary scientific literature will be read and discussed in the context of the lectures and field exercises.

Specific Learning activities include the ecology of natural communities including terrestrial and aquatic, seed dispersal and seed ecology, predation, foraging ecology, pollination, fruit-eating mutualisms, and population census methods. Student evaluations are based on participation, engagement, oral presentations, and written reports (no exams given in this class). At least one field trip involves staying overnight in a natural area. Specific topics covered in this class are: asking questions in science, designs of studies and experiments, ecological data collection techniques, data storing methods, statistical analyses (univariate to multivariate), graphical representation of results, oral presentation skills, research ethics, and writing and publication skills and techniques.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 451: Biology of RNA (3 Credits)
Old Listing Effective Through Fall 2018:

Survey of the roles of RNA in biology, emphasizing evolutionary relationships and relevance to human health.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 460: Human Genetics (3 Credits)
Old Listing Effective Through Fall 2018:

The human genome, its variation, origins, and relation to disease and other traits. ANTH 460 / BIOL 460 Human Genetics (3) The course considers many examples derived from the study of the genetics of human disease, and includes most general areas of interest, including simple Mendelian disorders, and complex chronic diseases such as cancer nd cardiovascular disease, and variable special topics including immunogenetics and the genetics of imprinting or other processes: the course usually also touches briefly on the nature of forensic genetics and the problem of making inferences from individual genotypes. Finally, the course considers the bioethical and societal issues involving contemporary human genetics. The study of disease genetics is important for students preparing for graduate work in medicine and other health professions as well as for graduate studies in molecular and evolutionary genetics and related areas, including biological anthropology and bioethics. This course is relevant to requirements or appropriate electives for life science majors and graduate students (check with your academic advisor). Over the years, it has proven to be excellent preparation for subsequent graduate and professional work in these areas. The course is offered most years, in the fall semester. Depending on enrollment and other factors, the course may include graded homework or other components, but evaluation is predominantly based on exams during the semester and a comprehensive final. This course is cross listed as ANTH 460 and BIOL 460, but there is only one course, at the same time and place, for all students no matter how they register. In some years, ANTH 460H / BIOL 460H , a 4-credit Honors version is offered that is identical to 460 but with an additional class period each week involving additional written and presentational assignments and term projects, along with the regular 460 exams, that combine to determine the final grade. Total enrollment is capped at about 100 students.

Cross-Listed Courses: ANTH 460

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 460H: Human Genetics (4 Credits) (H)
Old Listing Effective Through Fall 2018:

Gene mapping in humans; molecular basis of genetic disease; genomic structure; immunogenetics; and genetic evidence for human evolutionary history. ANTH 460H / BIOL 460H Human Genetics (4) Students will explore interesting normal or pathological variation to understand first its biological nature, then its epidemiological distribution, genes and genetic mechanisms associated with the trait, phylogenetic origins or comparison, and the nature of relevant genotype-phenotype relationships. Alternatively, students may explore methods for identifying and characterizing gene action or structure, or historical subjects related to human variation and evolution.

Ethical and societal aspects of these issues will be considered as well. Time will be taken for faculty or students to read and present current important papers appearing in the literature, relevant to the current course topics. As an Honors course, we will have the time, and the students the dedication, to pursue the chosen topic(s) in much greater and more rigorous detail than is possible in the usual lecture or even seminar course format of ANTH 460 / BIOL 460 which, while presenting
material at a sophisticated level, will not have time to explore the more subtle, problematic, or challenging aspects. The students who enroll for this course will be given a description of the approach and the intended general topic, on a course web page or by email when the instructor learns they have registered. The nature of the course will be described including semester-specific themes or focus that will apply (if any). Requisite background reading will be identified so students will know what will be expected of them. Some prior reading will be assigned, so that we can begin the semester with a common basis in background. Students will be evaluated on the quality of their project work, including writing ability, presentation ability, and depth of thought. Several written assignments will be given and graded for content and expression quality.

Although students will take regular ANTH 460 / BIOL 460 lectures, they may be given separate exams (corresponding to those given in the regular course) that will allow more freedom of expression than multiple-choice exams or homework assignments. Depending on the workload in any semester, there may be a separate written take home synthetic essay final exam. The Honors session each week will be highly interactive rather than passive, and students will be graded on attendance, participation and whether they have done assigned work in advance of the class. Students will be expected to have the stipulated background knowledge of biological anthropology, evolutionary biology, statistics and genetics. This course should count as 4 credits toward additional courses in biological anthropology required for the Anthropology major.

Cross-Listed Courses: ANTH 460H

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 461: Contemporary Issues in Science and Medicine (3 Credits)
Old Listing Effective Through Fall 2018:

Current/classical issues relating to health, research, agriculture, environment, and biotechnology. Active exploration of the impact of science on society. BIOL 461 Contemporary Issues in Science and Medicine (3) The aim of this course is to provide students of the biological and biomedical sciences with a framework to recognize, examine, and resolve conflicts which may affect their professional conduct. Current and classical issues relating to human health, scientific and medical research, agriculture, the environment, and biotechnology will be explored. The history, controversies, and current issues related to each topic will be presented by the instructor through lecture, guest presentations, and multimedia presentations. Each topic will be explored by students through a variety of activities, including role playing, case studies (real and hypothetical), mock trials, small- and large-group discussions, writing exercises, and student research projects presented in oral and poster format. Some activities and discussions will involve the entire class simultaneously, while other activities will be structured for very small groups (2-3 students), small groups (5-6 students), or large groups (10-15 students). This course is especially relevant to any student majoring in Biology, as it allows and encourages them to relate information they have learned in other Biology courses to their own professional conduct. Although the course was specifically designed to cover issues that are relevant to students majoring in each of the Biology concentration areas (Genetics and Developmental Biology, Ecology, Plant Biology, and Vertebrate Physiology), it is also relevant to students in colleges other than Science, who may be enrolled in majors with some biological content or applications. This course is designed to be rigorous and very interactive.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 464: Sociobiology (3 Credits)
Old Listing Effective Through Fall 2018:

The study of the adaptive function of social behavior, the comparative analysis of social organization, and the ecology of sociality.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 467: Molecular Basis of Neurological Diseases (3 Credits)
Old Listing Effective Through Fall 2018:

This course provides up-to-date knowledge of and insight into the molecular/cellular/genetic basis of the neurological diseases. The focus will be on neurodegenerative and cognitive disorders with a relative high prevalence as listed below: Neurodegenerative disorders: Alzheimer’s disease, Parkinson’s disease, Huntington’s disease, Ataxia, ALS Cognitive and emotional disorder: Autism spectrum disorders, Mental Retardation, Depression, Bipolar disorder, Schizophrenia, Addiction, Posttraumatic disorder

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 472: Mammalian Physiology (3 Credits)
Old Listing Effective Through Fall 2018:

Mechanisms concerned with normal animal function, with special emphasis on humans.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 474: Astrobiology (3 Credits)
Old Listing Effective Through Fall 2018:

Astrobiology is the study of life in the universe. Astrobiology has become a major focus of scientific research in the United States and a topic often discussed in popular science literature. The recent interest in astrobiology has resulted in the formation of an Astrobiology Institute
at Penn State University. This advanced undergraduate course in astrobiology will cover many topics in the field including, biochemical evolution, the origin and evolution of life on Earth, microbial diversity, protein evolution, and the distribution of life in the universe. This course is intended to provide students of the natural sciences with the opportunity to prepare for a research career in the rapidly expanding field of astrobiology. The course will also present astrobiology as a cross-disciplinary framework that ties together the diverse courses the students have already taken. The students will learn new concepts while having, to draw on their previous knowledge of chemistry, biology, and the geosciences. In summary, this course has the following objectives: (1) to develop the student’s literacy in astrobiology so that they can critically evaluate claims that they encounter well after the course has ended; (2) to present a scientific question that requires the sum of the student’s previous education to solve; (3) to provide a deep background to some of the astrobiological concepts that are often only briefly mentioned in other classes or in the media; (4) to provide a deep background to some of the astrobiological concepts that are often only briefly mentioned in other classes or in the media; (5) to prepare the students for graduate research in astrobiology by giving them a broad background of the field and by demonstrating many of the outstanding problems yet to be solved.

Cross-Listed Courses: GEOSC 474

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 482: Coastal Biology (3-4 Credits)
Old Listing Effective Through Fall 2018:

Marine organisms, their interactions with each other, and their relationships with several coastal habitats.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOL 492: Senior Seminar in Biology (1 Credit)
Old Listing Effective Through Fall 2018:

Discussion of selected topics from recent biological literature; reports on current research or internship experiences.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

BIOL 499A: Tropical Field Ecology (3 Credits: Maximum of 999 Credits) (IL)
Old Listing Effective Through Fall 2018:

An intensive introduction to tropical biodiversity to be taught in Belize, Central America.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOTC 416: Microbial Biotechnology (2 Credits)
Old Listing Effective Through Fall 2018:

Fundamentals of applied biotechnology; the use of microorganisms in the synthesis of biologically-important and industrially-useful products.

Cross-Listed Courses: MICRB 416

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOTC 459: Plant Tissue Culture and Biotechnology (3 Credits)
Old Listing Effective Through Fall 2018:

Principles and techniques for the in vitro culture, propagation, and genetic manipulations of plant cells.

Cross-Listed Courses: BIOL 459, HORT 459

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BIOTC 460: Advances and Applications of Plant Biotechnology (3 Credits)
Old Listing Effective Through Fall 2018:

This course provides a comprehensive overview and current status of plant biotech research. The course provides knowledge of plant systems that fall in the category of GMOs. BIOTC 460 / AGRO 460 Advances and Applications of Plant Biotechnology (3)This course will provide a comprehensive overview and status of current plant biotech research. The focus is on providing knowledge of the biology of plant systems. Consequences of development of a transgenic plant either for food (crops) or as a tool to understand molecular, genetic, and inheritance mechanisms of a trait will be discussed in detail. The course will deliver the current literature and understanding of mechanisms involved in herbicide resistance in transgenic plants. Specific topics that will be of interest to students from various disciplines include disease and insect resistance, quality traits, and secondary metabolites. Molecular biology of different pollination systems will be examined so that students will understand the concept of gene flow from transgenic to non-transgenic crops.

Examples from recent developments on the beneficial use of transgenic plants as producers of modified compounds, starches, antibodies and their use in phytoremediation of toxic and organic pollutants will be discussed from the perspective of genetic and molecular plant systems. Gene expression of transgenic plant traits and the stability of an engineered crop will be discussed. Specific emphasis will be on different modes of inheritance that a transgenic plant can follow after its development and release into the environment. The course also prepares students for understanding the regulatory processes that are required for testing, moving, and environment release of transgenic crops. The laboratory component of the course will introduce students to the common technique of molecular biology that are used to detect expression in transgenic plants. Transgenic maize plants will be grown in a greenhouse and analyzed for expression of introduced genes.

Cross-Listed Courses: AGRO 460

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
BIOTC 479: Methods in Biofermentations (3 Credits)
Old Listing Effective Through Fall 2018:
Bioprocessing principles and development; uses and operation of biofermentors; determination of biomass; problems of scale-up.

Changes Effective Spring 2019:
• Prerequisite/Corequisite/Concurrent Courses
• Description

BIOTC 489: Animal Cell Culture Methods (3 Credits)
Old Listing Effective Through Fall 2018:
An overview of animal cell culture methodology and its practical application in bioprocess technology.

Changes Effective Spring 2019:
• Prerequisite/Corequisite/Concurrent Courses
• Description

BMB 211: Elementary Biochemistry (3 Credits)
Old Listing Effective Through Fall 2018:
An overview of biochemistry that includes properties of biomolecules, bioenergetics, metabolism, nutrition, genetics, and molecular biology. B M B 211 B M B 211 Elementary Biochemistry (3) B M B 211 is an overview of biochemistry that includes: basic properties and biosynthesis of proteins and nucleic acids, chemistry, and metabolism of major carbohydrate, lipid, and amino acid classes, energy production pathways including photosynthesis, biological transport, and principles of enzyme action. The course provides the student with a sufficient knowledge of biochemical processes, cellular molecules and their metabolism to serve as a basis for advanced study of nutrition, genetics, biotechnology, agricultural sciences, or related biological areas that depend on a biochemical foundation. Achievement of course objectives is assessed through multiple written examinations designed to evaluate understanding of biochemical concepts and their applications to biological problems.B M B 211 is related to and a prerequisite for the companion laboratory course B M B 212 (1 credit). B M B 211 also serves as the prerequisite for B M B 221, an exploration of the application of biochemical principles to specific problems in medicine, agriculture, and biotechnology. This course requires some proficiency in organic chemistry and general chemistry; thus, CHEM 012, and 034 or 038 are prerequisites. B M B 211 is part of one of the two series of biochemistry courses that students in the Biotechnology major (either General or Clinical Laboratory Science Options) are required to take for the baccalaureate degree. B M B 211 is required by a number of different majors in the colleges of Agricultural Sciences and Health and Human Development.

Changes Effective Spring 2019:
• Prerequisite/Corequisite/Concurrent Courses
• Description

BMB 251: Molecular and Cell Biology I (3 Credits)
Old Listing Effective Through Fall 2018:
Biomolecules, genetic mechanisms, organization of cells and their organelles, DNA replication, protein synthesis, membranes, the cell nucleus, energy conversion. B M B 251 Molecular and Cell Biology I (3) This course is an introduction to the fundamental principles of molecular and cellular biology, with a primary focus on eukaryotic cells. Topics covered will include elementary biochemistry; structure and function of biological macromolecules, the cell and its organelles; the role of biological membranes in bioenergetics and sub-cellular compartments. There will be a particular emphasis on the molecular mechanism of heredity; the organization and expression of genetic information; experimental methods used in the analysis of gene expression and the relationship between gene/protein structure and function. A key feature of the Honors section is the use of review papers and peer-reviewed journal articles as integral components of the course. The objectives of this component of the Honors section are to: 1) introduce students to the scientific method (the formulation of hypotheses based on observation and the processes underpinning the rigorous test of such hypotheses); and 2) provide the intellectual framework for a critical evaluation of the literature. Students are expected to engage in classroom discussion and will be evaluated by a combination of classroom presentations, multiple choice and short essay exams. Students are expected to develop a “big picture” view of how the various cellular processes are related to each other and also attain a thorough understanding of the molecular details of the individual processes (e.g. the order and molecular details of events leading from transcription to protein localization within a cell). This course is a prerequisite for B M B 252H.

**BMB 252H: Molecular and Cell Biology II (3 Credits) (H)**
Old Listing Effective Through Fall 2018:

Continuation of B M B 251H; cytoskeleton, cell growth, division, adhesion, signaling, germ cells, differentiation, immune system, nervous system, plant cells. B M B 252H Molecular and Cell Biology II (3) This course is the second part of B M B 251H. This section focuses on the internal organization on eukaryotic cells and their organization in multi-cellular organisms. Topics covered include cell communication, the cytoskeleton, cell cycle, fertilization and development of multi-cellular organisms, genesis of tissues, and the molecular mechanisms of cancer and immunity. There will be a particular emphasis on how the basic principles and experimental approaches presented in 251H are employed to address questions related to the topics that will be covered in 252H. As in 251H, a key feature of the Honors section will be the use of review papers and peer-reviewed journal articles as integral components of the course. The objectives of this component of the Honors section are to: 1) introduce students to the scientific method (the formulation of hypotheses based on observation and the processes underpinning the rigorous test of such hypotheses); and 2) provide the intellectual framework for a critical evaluation of the literature. Students are expected to engage in classroom discussion and will be evaluated by a combination of classroom presentations, multiple choice and short essay exams.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

**BMB 400: Molecular Biology of the Gene (2-3 Credits)**
Old Listing Effective Through Fall 2018:

Biochemistry of genetic phenomena, including the structure, replication and dynamics of genes and chromosomes, their expression and regulation. B M B 400 Molecular Biology of the Gene (2-3) Molecular Biology of the Gene examines the flow of information in living things at the molecular level. Topics such as the following are included: 1) DNA replication, repair and recombination, 2) RNA transcription and modification, and 3) protein translation, folding and modification. This class is designed as a one-semester course having the objectives of understanding concepts in molecular biology and gene regulation, and exploring research materials and methods used in the laboratory. Course materials are prepared not only from the textbook but also from the primary literature. Therefore, students who want to take this course should have some familiarity with reading research articles. B M B 400 is for advanced undergraduates who have already taken introductory molecular biology and biochemistry. Knowledge of molecular biology is essential background for pursuit of a career in the life sciences, including academia, medicine, industry, forensic science and science policy.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

**BMB 401: General Biochemistry (3 Credits)**
Old Listing Effective Through Fall 2018:

Principles of the structure and function of biological molecules, including carbohydrates, lipids, membranes, proteins, and enzymes. Students may not receive credit for both CHEM 476 and B M B 401. B M B 401 General Biochemistry (3) BMB 401 is the first course of the honors general biochemistry series, a sequence designed to prepare students for careers and graduate study in the life sciences. Overall, biochemistry describes, in chemical and molecular terms, the structures, mechanisms, and chemical processes at work in all living things, and abstracts organizing principles that underlie life in all its diverse forms. Building upon concepts introduced in molecular and cellular biology and in organic chemistry, students in B M B 401 synthesize and apply this knowledge toward understanding the structure and function of the major classes of cellular constituents: water, and the various macromolecules — amino acids and proteins, sugars, and polysaccharides, nucleotides and nucleic acids, fatty acids and lipids, and membranes and various membrane proteins.

These molecules interact to comprise the next level of multi-and mixed molecular structures and organelles that enable a cell to carry out its many metabolic functions. Students also learn about the technologies used to study cellular components and processes, and current advances in biotechnology that have accelerated the pace of discovery in the field. Having gained familiarity with the molecules found in a cell, students are well-equipped to take on more advanced topics in the exciting, rapidly-evolving fields of the life sciences. An overriding theme in biochemistry is that polymers of living systems, though structurally large and functionally complex, are highly ordered chemical entities, with specific sequences of monomeric subunits giving rise to discrete structures and functions. The course begins with an introduction to proteomics, covering the structural basis of protein functions and then moves on to enzyme kinetics and mechanisms. Next, students explore simple and complex carbohydrates and topics in glycobiology that include energy storage, framework skeleton, and specific molecular recognition. Various classes of lipids, including phospholipids, complex lipids, membrane biology and transport systems, are covered next. Following is an analysis of the biochemical basis of signal transduction describing how specific signals regulate biomolecular activity-within a cell, and between cells-to keep an organism in homeostasis. Lastly, as a transition to intermediary metabolism in B M B 402H, an introduction to bioenergetic principles is included to provide a framework for understanding pathways of carbon and nitrogen metabolism, using glycolytic reactions as an example.
BMB 401H: General Biochemistry (3 Credits) (H)
Old Listing Effective Through Fall 2018:

Principles of the structure and function of biological molecules, including carbohydrates, lipids, membranes, proteins, and enzymes. Students may not receive credit for both CHEM 476 and B M B 401H. B M B 401H General Biochemistry (3)BM B 401H is the first course of the honors general biochemistry series, a sequence designed to prepare students for careers and graduate study in the life sciences. Overall, biochemistry describes, in chemical and molecular terms, the structures, mechanisms, and chemical processes at work in all living things, and abstracts organizing principles that underlie life in all its diverse forms. Building upon concepts introduced in molecular and cellular biology and in organic chemistry, students in B M B 401 synthesize and apply this knowledge toward understanding the structure and function of the major classes of cellular constituents: water, and the various macromolecules — amino acids and proteins, sugars, and polysaccharides, nucleotides and nucleic acids, fatty acids and lipids, and membranes and various membrane proteins. These molecules interact to comprise the next level of multi-and mixed molecular structures and organelles that enable a cell to carry out its many metabolic functions. Students also learn about the technologies used to study cellular components and processes, and current advances in biotechnology that have accelerated the pace of discovery in the field. Having gained familiarity with the molecules found in a cell, students are well-equipped to take on more advanced topics in the exciting, rapidly-evolving fields of the life sciences. An overriding theme in biochemistry is that polymers of living systems, though structurally large and functionally complex, are highly ordered chemical entities, with specific sequences of monomeric subunits giving rise to discrete structures and functions. The course begins with an introduction to proteomics, covering the structural basis of protein functions and then moves on to enzyme kinetics and mechanisms. Next, students explore simple and complex carbohydrates and topics in glycobiology that include energy storage, framework skeleton, and specific molecular recognition. Various classes of lipids, including phospholipids, complex lipids, membrane biology and transport systems, are covered next. Following is an analysis of the biochemical basis of signal transduction describing how specific signals regulate biomolecular activity-within a cell, and between cells-to keep an organism in homeostasis. Lastly, as a transition to intermediary metabolism in B M B 402H, an introduction to bioenergetic principles is included to provide a framework for understanding pathways of carbon and nitrogen metabolism, using glycolytic reactions as an example.

BMB 402: General Biochemistry (3 Credits)
Old Listing Effective Through Fall 2018:

Comprehensive survey of the pathways and regulation of intermediary metabolism. B M B 402 General Biochemistry (3) Most, if not all, of the students taking B M B 402 intend to pursue a Ph.D., M.D. or M.D./Ph.D. degree after graduation. Since biochemistry is an important discipline for advanced studies in life and medical sciences, a major goal of B M B 402 is to prepare students well for their future challenges in graduate study. The textbook used is more advanced than that used in B M B 402, and it is what is typically used in biochemistry courses taught at premier medical schools and graduate schools. The major topics covered include glycolysis, TCA cycle, metabolism of fatty acids, lipids (phospholipids, cholesterol and sphingolipids), amino acids and nucleotides, signal transduction, and human genetic diseases. Since biochemistry is a very rapidly progressing discipline, any new developments not covered by the textbook are introduced in the lectures or via discussion of current scientific papers at an appropriate level. In addition, students must be able to integrate information learned from different but related material. These exams typically take students three hours to complete.

BMB 402H: General Biochemistry (3 Credits) (H)
Old Listing Effective Through Fall 2018:

Comprehensive survey of the pathways and regulation of intermediary metabolism. B M B 402H General Biochemistry (3) Because it has a limited enrollment, B M B 402H provides a more intimate and interactive class environment than does B M B 402. Most, if not all, of the students taking B M B 402H intend to pursue a Ph.D., M.D. or M.D./Ph.D. degree after graduation. Since biochemistry is an important discipline for advanced studies in life and medical sciences, a major goal of B M B 402H is to prepare students well for their future challenges in graduate or medical school. The textbook used is more advanced than that used in B M B 402, and it is what is typically used in biochemistry courses taught at premier medical schools and graduate schools. The textbook used is more advanced than that used in B M B 402H, and it is what is typically used in biochemistry courses taught at premier medical schools and graduate schools. The major topics covered include glycolysis, TCA cycle, metabolism of fatty acids, lipids (phospholipids, cholesterol and sphingolipids), amino acids and nucleotides, signal transduction, and human genetic diseases. Since biochemistry is a very rapidly progressing discipline, any new developments not covered by the textbook are introduced in the lectures or via discussion of current scientific papers at an appropriate level. B M B 402H exams consist of entirely essay and problem-solving type questions, whereas B M B 402 exams typically contain all multiple-choice questions. B M B 402H exams require that students understand all aspects of a particular metabolic pathway under study, including the sequential steps of the pathway, chemical structures of all intermediates, the mechanisms of all key reactions, regulation of the pathway, and the relationships with other pathways. In addition, students must be able to integrate information learned from different but related material. These exams typically take students three hours to complete.

BMB 411: Survey of Biochemistry and Molecular Biology Literature (1 Credit)
Old Listing Effective Through Fall 2018:

An introduction to readings and oral presentations in biochemistry and molecular biology.
Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

**BMB 428: Physical Chemistry with Biological Applications (3 Credits)**

Old Listing Effective Through Fall 2018:

Chemical thermodynamics and kinetics with applications to biological problems.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

**BMB 430: Developmental Biology (3 Credits)**

Old Listing Effective Through Fall 2018:

Molecular and genetic analyses of mechanisms involved in differentiation and determination in biological systems.

Cross-Listed Courses: BIOL 430

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

**BMB 432: Advanced Immunology: Signaling in the Immune System (3 Credits)**

Old Listing Effective Through Fall 2018:

The study of signaling pathways that regulate the immune response. B M B 432 B M B (MICRB/V SC) 432 Advanced Immunology: Signaling in the Immune System (3)This course will use the immune system as a model in which to study how cells communicate in order to coordinate an immune response. We will focus on signaling mechanisms that regulate such immune responses as T cell activation, Th1/Th2 differentiation, macrophage activation, and migration of immune cells to sites of inflammation. All lectures are based on recent reviews by key investigators in each field, as well as primary articles to present students with the most recent advances, techniques, and approaches used. The goal of the course will be to convey a basis understanding of intracellular signaling mechanisms that pertain to all areas of biology, an appreciation for current questions and future directions in the field, and an in depth understanding of the signals that govern immune responses. The material presented will build on the basic concepts learned in B M B 400 and MICRB 410, and will lay the foundation for more advanced courses at the graduate level.

Cross-Listed Courses: MICRB 432, VBSC 432

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

**BMB 433: Molecular and Cellular Toxicology (3 Credits)**

Old Listing Effective Through Fall 2018:

In-depth coverage of processes by which drugs/chemicals interact with biological systems and the experimental approaches used to study these interactions.

Cross-Listed Courses: VBSC 433

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

**BMB 435: Viral Pathogenesis (3 Credits)**

Old Listing Effective Through Fall 2018:

A study of the molecular and pathological aspects of both human and zoonotic viruses that contribute significantly to human disease.

Viral Pathogenesis provides students with a general knowledge of medically relevant viruses, with a specific focus on important human viral pathogens. The course is meant to help students understand how viruses diseases in humans and animals. Lectures and inclass discussions will focus both on the fundamentals of infection and disease mechanisms, and on contemporary virologyrelated topics in the scientific literature. discussed can be divided into two main areas: (1) general concepts related to viral pathogenesis and the control of viral infections; and (2) specific viruses that cause human disease including HIV1, herpes viruses, papillomaviruses, influenza virus, West Nile virus, Ebola virus, and SARS virus. Although prior knowledge virology is not required for taking this course, a working knowledge of molecular biology, cell biology, immunology, and some microbiology is helpful. Thus, MICRB 201 is a prerequisite for this course as well either BIOL 230W or BMB/MICRB 252.

Cross-Listed Courses: MICRB 435, VBSC 435

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

**BMB 442: Laboratory in Proteins, Nucleic Acids, and Molecular Cloning (3 Credits)**

Old Listing Effective Through Fall 2018:

Laboratory in enzyme purifications and assay techniques; nucleic acid isolation and characterization, including plasmid preparation. B M B (MICRB) 442 Laboratory in Proteins, Nucleic Acids, and Molecular Cloning (3)The DNA portion of B M B/MICRB 442 serves as an introduction to fundamental techniques of recombinant DNA technology and as a reinforcement of principles of Molecular Genetics from lecture courses. The central experiment entails all basic procedures necessary to clone a gene, i.e. to make a recombinant molecule comprised of DNA from two sources. Students use restriction enzymes to cut two distinct DNA molecules into smaller fragments. The fragments are mixed and treated with the enzyme Ligase, which randomly combines small fragments intoE. coli cells that initially have no drug resistance. Cells that acquire genes that confer drug resistance, are transformed intoE. coli cells that initially have no drug resistance. Cells that acquire recombinant DNA molecules are identified by selective plating on growth media containing drugs. From the transformed cells, recombinant DNA is isolated and analyzed by agarose gel electrophoresis, completing the array of basic gene cloning techniques. In addition to this central, multi-session experiment, students also do PCR and an investigation of the lac operon, a classic molecular genetic model system. The proteins portion of B M B/MICRB 442 is designed to introduce students to protein biochemistry topics and laboratory techniques typically encountered in academic and commercial settings. Students will learn about buffers, spectroscopy, enzyme purification and characterization
Methods. Specifically, the experiments include preparation of buffers and performing kinetic studies to determine Km and Vmax values. Separation of a mixture of phycobiliproteins using ion-exchange column chromatography is a major experiment that the students will perform to learn protein purification methods. In this experiment they will learn how to pour a column, apply sample, elute it with salt gradient and collect fractions using automated fraction collector. Ammonium sulfate precipitation and dialysis will be part of protein purification procedures. Characterization of the separated proteins will be performed by determining the absorption spectra with a Genesys-5 spectrophotometer and by determining the molecular weights of the subunits of the phycobiliproteins by SDS-polyacrylamide gel electrophoresis.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BMB 443W: Laboratory in Protein Purification and Enzymology (3 Credits) (WF)
Old Listing Effective Through Fall 2018:

Laboratory in protein isolation methodology, enzyme kinetics, and physico-chemical properties of proteins.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BMB 445W: Laboratory in Molecular Genetics I (2 Credits) (WF)
Old Listing Effective Through Fall 2018:

Laboratory in molecular techniques in gene analysis and microbial genetics, emphasizing in vitro methodologies. B M B 445W Laboratory in Molecular Genetics I (2) The objectives of B M B 445W are to provide advanced Biochemistry and Microbiology students with instruction in (1) techniques commonly used in modern research and clinical laboratories in this field, (2) evaluation of the quality of experimental data, including appropriate analysis, and (3) presentation of results of laboratory work in written form. Experiments are focused on key techniques and procedures such as DNA isolation, polymerase chain reaction, Southern hybridization analysis, and DNA sequencing. Students are evaluated via (1) written lab reports organized in the format found in most primary research journals in the field and (2) written examinations that assess the understanding of principles and methodology. B M B 445W is an extension of the nucleic acid section of B M B 342, which is a prerequisite for B M B 445W. The in vitro techniques presented in B M B 445W complement the in vivo techniques in B M B 446, though neither course is prerequisite for the other. B M B 445W is a requirement for the B M B major, and is an elective for other students, most notably Microbiology majors and graduate students in other areas of the life sciences. B M B 445W is taught in a standard biochemistry teaching laboratory facility that houses the required equipment necessary for analysis of DNA (electrophoresis units, centrifuges, thermocyclers, cold room, spectrophotometers).

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BMB 448: Model Systems and Approaches in Cell Biology Inquiry (2 Credits)
Old Listing Effective Through Fall 2018:

Advanced laboratory that uses inquiry-based approaches to the analysis of organelles, genetic mechanisms, and metabolic processes in eukaryotic organisms.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BMB 450: Microbial/Molecular Genetics (2 Credits)
Old Listing Effective Through Fall 2018:

Genetic phenomena, with emphasis on molecular mechanisms: gene transfer, recombination, gene conversion, gene fusion, suppression, transposons.

Cross-Listed Courses: MICRB 450

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BMB 460: Cell Growth and Differentiation (3 Credits)
Old Listing Effective Through Fall 2018:

Mechanisms and regulation of protein trafficking, organelle biosynthesis, cell development, signaling and cell cycle control.

Emphasizes experimental design and analysis. B M B 460 B M B (MICRB) 460 Cell Growth and Differentiation (3) Cell Growth and Differentiation is a unique course that uses the primary literature to teach significant content in advanced cell biology while simultaneously exposing students to the scientific craft of experimental design and analysis. In addition to exploring historical and current cell biology research articles, students will develop two vital scientific skills; critical thinking as applied to experimental data and creative thinking about solving unresolved questions in cell biology. There is no course textbook. As an alternative, we read from journals to explore questions about cell biology and how cell biologists decipher cell functions. Instead of a general survey of cell biology, we delve into specific issues, often looking at “classic” papers describing how a specific phenomenon was first investigated to place current questions in context before progressing to the latest publications exploring how innovative techniques have been applied to deciphering cell function. The course is divided into four units, each of which emphasizes content in a different area. Actual content may vary from year to year as the course is updated to reflect progress in a field of research. We have previously explored the general areas of cell membrane dynamics, intracellular protein trafficking, cell cycle regulation, cell signaling pathways and cancer cell biology.

Finally, the course ends with a unit on stem cells and therapeutic cloning technology. A portion of the final unit is also devoted to discussing the ethical implications of stem cell research with an emphasis on how to make personal decisions about how our society should approach these issues. Reading guides are provided for each assignment to help students find and understand important points in reading assignments. Class periods are devoted to explanations and instructor-led discussions about the readings with an emphasis on understanding the questions, the methods used to approach the questions, the experimental results and the interpretations of the results. Furthermore, periodic class periods...
are dedicated to experimental approach exercises where students work in groups to practice posing new questions as suggested by our readings and proposing experiments to answer these questions. These skills are vital part of what cell biologists do daily, and these exercises provide practice in thinking like a scientist. Students have previously reported that by taking this course they acquired the ability to read and understand the primary literature and have gained an in-depth understanding about how to use various experimental techniques.

Cross-Listed Courses: MICRB 460

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

BMB 464: Molecular Medicine (3 Credits)
Old Listing Effective Through Fall 2018:

An exploration of the impact of advances in molecular biology on understanding disease mechanisms, medical diagnosis, and therapeutics.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

BMB 480: Tumor Viruses and Oncogenes (3 Credits)
Old Listing Effective Through Fall 2018:

Oncogenes, DNA and RNA tumor viruses, and relevant experimental techniques with emphasis on molecular basis of carcinogenesis and gene regulation.

Cross-Listed Courses: MICRB 480

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description
- Title
- Abbreviated Title

BMB 484: Functional Genomics (3 Credits)
Old Listing Effective Through Fall 2018:

Biochemical, genetic and evolutionary approaches to comprehensive discovery of functional DNA segments in genomes, including genes and regulatory sequences. B M B 484 Functional Genomics (3) What in your genomic DNA makes you different from chimpanzees, mice or flies? What sequences in your DNA make it more or less likely that you will develop diabetes or cancer? These are questions of widespread interest, answers to which could play major roles in personalized medicine and in understanding our place in the biosphere. Modern genomic analysis uses powerful technologies and generates massive amounts of data, which are yielding exciting insights into answering these questions. One hallmark of genomic research is that data are released rapidly along with tools for browsing and analyzing it. Thus not only can you learn the major results by reading papers, but you can examine the underlying data and do your own analyses. Discovery is no longer the exclusive domain of the data producers? you can join in!This course will introduce students to ongoing research aimed at identifying functional regions in genomes and encourage them to use web-based bioinformatics tools for exploring the genomic and epigenetic data. Students will develop creative projects that address issues in functional genomics of high interest to them. The course has two phases, the first on the basics of genomics (sequencing, alignment, assembly, resources), and the second on the search for functional elements in genomes. The course will explore ways to find:- Protein- coding genes within genomes- Transcribed regions: How much of the genome is transcribed? Which transcribed regions do not code for proteins? What roles do they play in the cell (regulatory and enzymatic)?- Evolutionary signatures of function: How can you use genome comparisons between species to estimate the amount of functional sequence? and to identify it?- Non-genic functional sequences: How do you map epigenetic features associated with gene regulation, such as histone modifications, DNase hypersensitive sites, and transcription factor occupancy?- Function by phenotype: Given the ability of genetic association to find loci that contribute to complex traits, such as disease susceptibility, how does functional genomics aid in finding basis of these traits?

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

BMB 488: Communities of Practice in Biochemistry and Molecular Biology (2 Credits: Maximum of 16 Credits)
Old Listing Effective Through Fall 2018:

The course combines laboratory research in a community of practice and a seminar on topics in science, ethics, and society

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

CAMS 25: Greek Civilization (3 Credits) (GH) (IL) (BA)
Old Listing Effective Through Fall 2018:

The origin and development of the ancient Greek people; their political and social institutions, public and private life. CAMS 025/CAMS 025 Greek Civilization (3) (GH:IL)(BA) This course meets the Bachelor of Arts degree requirements. Greek Civilization, CAMS 025 GH:Gl, is an interdisciplinary and multimedia introduction to the major features of Greek civilization and its importance to the Western heritage. It shows how the ideals, achievements, but also the failures of ancient Greeks have shaped the values of Western civilization. The course begins with an overview of the geography of the areas around the Mediterranean Sea that were inhabited by Greeks in antiquity, the reasons for the location of major settlements, and an introduction to the precursors of the Hellenic peoples, such as the Minoans, whose cultural achievements preceded and influenced the earliest Greeks. The course then follows the 1,500-year long development of Greek history, literature, philosophy, art and archaeology from its early stages in the second millennium B.C.E. through the Hellenistic period. The course presents the political, social, religious, and economic structures of ancient Greece and issues of gender, slavery, foreigners, colonization, and imperial ambition that reward modern re-evaluation. The course particularly emphasizes the development of the Greek city-state, the polis, the unique political system of democracy, and the tension between the individual and the state through the sixth and fifth centuries B.C.E. that saw its greatest successes and the failures that led to the death of Socrates in 399 B.C.E. In this course students may gain an appreciation for the greatest achievements of Greek culture in the fields of literature and philosophy, in the work of poets from Homer and Hesiod to Aeschylus, Sophocles, and Euripides and from the great Ionian thinkers such as Thales to philosophers such as Plato and Aristotle. Because classical culture constitutes a major influence on modern western civilization, such study enables us to see where various aspects of our own society come from and so better understand
ourselves. This course, then, emphasizes the similarities between the ancient Greeks and the modern world, thereby establishing the relevance of this study, while at the same time pointing out the differences between these two cultures, thereby providing the critical distance necessary for reflecting on ourselves. In this course students prepare group projects and oral presentations and write essays that involve the use of library and Web-based tools such as Perseus, an extensive electronic resource for all aspects of ancient Greek culture. In this course students will read (English translations of) original Greek texts, will view many examples of Greek art, architecture, and artifacts, and will hear examples of music based on literary or mythological themes that originated with the Greeks. Through the readings, lectures, and discussions, students may learn methods for interpreting the historiographical, literary, and material evidence upon which we base our understanding of the ancient Greeks.

Changes Effective Spring 2019:

• Description

CHEM 227: Analytical Chemistry (4 Credits)
Old Listing Effective Through Fall 2018:

The purpose of this course is to provide students with a rigorous and comprehensive exposure to the techniques and methods used in biotech, environmental, forensic, and pharmaceutical industrial and research laboratories. The principles, methodology and practical aspects of both traditional and modern chemical analysis will be discussed. Laboratory and lecture are fully integrated, emphasizing the importance of the laboratory component to achieving mastery of overall course content. Concepts will include acid-base, precipitation, chelation, electrochemistry, UV/Vis spectroscopy, and introductory chromatography, as well as some more advanced topics at the instructor’s discretion. Students will be expected to develop both their chemical problem solving and laboratory skills, and will be evaluated on their ability to speak and write clearly, solve context-based chemical problems, maintain a research style laboratory notebook, and carry out reliable chemical analysis individually as well as part of a team. This course is relevant to any student majoring or minoring in Chemistry or Forensic Science.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

CHEM 400: Chemical Literature (1 Credit)
Old Listing Effective Through Fall 2018:

Description: Instruction in use of the library and of the literature of chemistry. CHEM 400 Chemical Literature (1) CHEM 400 covers an orientation to use the library; sources of organic and inorganic synthesis information; use of relevant indexing and abstracting services; spectral data sources; patent literature; sources related to general chemical information, and properties data. Additional topics may be included as time permits.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

CHEM 406: Nuclear and Radiochemistry (3 Credits)
Old Listing Effective Through Fall 2018:

Theory of radioactive decay processes, nuclear properties and structure, nuclear reactions, interactions of radiation with matter, biological effects of radiation. CHEM 406 CHEM 406 Nuclear and Radiochemistry (3) CHEM 406 provides a basic introduction to many of the important physical phenomena in nuclear and radiochemistry and the theories that describe them. The exposition of both experimental phenomena and theory complements the content of other upper-level courses in physical chemistry such as CHEM 450 and 452. Specifically, the types of radioactive decay are described, and, using this information, the equations that relate the growth and decay, i.e., the kinetics, of radioactive nuclei are derived. In parallel, a variety of types of nuclear reactions, such as neutron capture are introduced and used to develop the equations that governing the kinetics of nuclear reactions, including the concept of cross section. To describe the nature of nuclear matter, the relationships between energy, binding energy, and mass, are developed and augmented with the introduction of related quantities including the nuclear magnetic-dipole moment, total angular momentum of the nucleus, and Fermi-Dirac and Bose-Einstein statistics. A basic introduction to quantum mechanics, including several problems of increasing complexity, namely, the one-dimensional particle-in-a-box, the three-dimensional particle-in-a-cubic-box, and the particle-in-a-spherical box is then provided. The latter problem forms the basis for developing the single-particle shell-model of the nucleus, which is compared to the single-particle shell-model of the atom, namely, the hydrogen-atom problem. The barrier-penetration theory of alpha-decay, Fermi’s phase-space theory of beta-decay, and the selection rules for gamma-ray decay are then presented. Final topics include the interactions of radiation with matter and the biological effects of radiation.

Cross-Listed Courses: NUCE 405

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

CHEM 410: Inorganic Chemistry (3 Credits)
Old Listing Effective Through Fall 2018:

Conceptual and descriptive aspects of nontransition elements, covering structural, thermodynamic, and kinetic features. CHEM 410 CHEM 410 Inorganic Chemistry (3) CHEM 410 covers structure and bonding in inorganic chemistry, including the chemistry of main group elements and selected topics in transition metal chemistry. Theories and models of chemical bonding (valence bond theory, crystal field theory, and molecular orbital theory) are applied to inorganic molecules, coordination compounds, and solids. The course also covers the following topics: periodic trends in the chemistry of the d- and p-block elements, structural solid state chemistry, magnetism of transition metal complexes and inorganic solids, ionic and covalent bonding in solids, electronic properties of metals, alloys, superconductors, and semiconductors, synthesis of inorganic materials, and properties of nanoscale inorganic solids.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

CHEM 412: Transition Metal Chemistry (3 Credits)
Old Listing Effective Through Fall 2018:

Structure and bonding of compounds containing transition metals. CHEM 412 Transition Metal Chemistry (3) CHEM 412 covers the chemistry of the transition metals, and in particular the d-block elements. Major areas of emphasis include coordination chemistry, organometallics, and the role(s) of transition metals in biology. The course covers the following topics: molecular symmetry with applications to bonding and vibrational spectroscopy, coordination chemistry, structural and optical isomers, crystal and ligand field theories, electronic structure
and electronic transitions, spectroscopic methods for probing transition metal complexes, kinetics and thermodynamics of ligand substitution reactions, oxidation-reduction reactions, organometallic complexes and their basic reaction types, homogeneous and heterogeneous organometallic catalysts and their reaction cycles, the interactions of metal ions with biological molecules, the function of transition metal ions in metalloproteins, and medically-important transition metal complexes.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

**CHEM 423W: Chemical Spectroscopy (4 Credits) (WF)**
Old Listing Effective Through Fall 2018:

Modern methods and instruments of spectroscopy and their applications to problems of chemical structure and analysis. CHEM 423W Chemical Spectroscopy (4) This course reviews modern methods and instruments of spectroscopy and their applications to problems of chemical structure and analysis. Topics include electronics, optics, and atomic and molecular spectroscopy (UV-VIS, Fluorescence, FTIR, Raman, liquid- and solid-state NMR). The course thoroughly integrates lecture and laboratory activities. The laboratory component incorporates skill-building exercises with open-ended guided-inquiry laboratory exercises and a semester-long laboratory- and literature-based research project. Students work in small groups (2-3 students) to complete each assignment. Students are required to write research papers during the semester. The reports are linked to the core course topics and the fifth is associated with the semester-long research project. All reports require students to search for and read the relevant published literature. The course is designed to be rigorous and comprehensive in scope. The writing component for this course includes: maintaining a proper laboratory notebook; reports; and an oral poster presentation. All writing elements are reviewed and graded by the instructor and teaching assistants.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

**CHEM 452: Physical Chemistry – Quantum Chemistry (3 Credits)**
Old Listing Effective Through Fall 2018:

Introduction to physical chemistry with primary emphasis on molecular structure, spectroscopy, and chemical kinetics. (Graduate credit not allowed for students majoring in Biochemistry and Molecular Biology, Chemistry, or Chemical Engineering.) CHEM 452 CHEM 452 Physical Chemistry – Quantum Chemistry (3) CHEM 452 is an introductory physical chemistry course that covers quantum chemistry, atomic and molecular spectroscopy, and chemical kinetics. If time permits, other possible topics include statistical thermodynamics, nuclear magnetic resonance, electron spin resonance, structures of solids, X-ray scattering, and processes at surfaces. Quantum chemistry includes: development of wave mechanics, Schrodinger’s equation, particle in a box, in a ring, on a spherical surface, free particle, barrier penetration, harmonic oscillator, postulates, hydrogen atom, helium atom, electron spin, atomic and molecular structure and symmetry. Spectroscopy includes: atomic spectra, microwave, infrared, and visible spectra of molecules. Chemical kinetics includes: rate laws, mechanisms, chain reactions, polymerization reactions, catalysis, molecular reaction dynamics (collision theory and activated complex theory), and nature of potential energy surfaces for reactions.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

**CHNS 424: Confucius and the Great Books of Early China (3 Credits)**
Old Listing Effective Through Fall 2018:

This course familiarizes students with the critical texts and intellectual cultures of Warring States and early imperial China. CHNS 482 (HIST 482, CHNS 424) Confucius and the Great Books of Early China (3) This course exposes students to the key texts, thinkers, and ideas that form the foundation of the Chinese classics and classical period. As the first part of a two-seminar series of courses (HIST 484), it provides an integral foundation for the study of Chinese history, culture, or literature. While the emphasis is on the texts and their main themes, the course will encourage historical engagement with the texts by placing them into a context of competing cultural, social, political trends. Readings may be grouped around categories of teachings such as Confucianism, Buddhism, and Daoism, or around thinkers such as "(Confucian) ritualists," "statesmen," "military strategists," "rebels," "recluses," and "spiritual leaders." Students will learn how each of these types of teachings and thinkers related to each other, as well as how they responded to the emergent, centralized political order of the day. This will help students better understand many of the recurrent intellectual, political, and religious themes that arise in later Chinese history as well.

Prerequisites: Fifth semester standing

Cross-Listed Courses: ASIA 482 HIST 482

Changes Effective Spring 2019:

- Number to 418
- Cross-listed ASIA 482 to 418
- Long Title
- Description
- Prerequisite/Corequisite/Concurrent Courses
- Add B.A. and IL Cultures Designations

**ENGL 300: Honors Course in English (3-12 Credits: Maximum of 12 Credits) (H) (WF) (BA)**
Old Listing Effective Through Fall 2018:

Reading, group discussions, and oral and written reports on various specific authors and literary works.

Changes Effective Spring 2019:

- Number to 406M
- Long Title
- Description
- Prerequisite/Corequisite/Concurrent Courses

**ENGL 302: Honors Seminar in English: Literature After 1800 (3-12 Credits: 12 Credits) (H) (WF) (BA)**
Old Listing Effective Through Fall 2018:

Reading, group discussions, and oral and written reports on various specific authors and literary works.

Prerequisite: ENGL 015 or ENGL 030; approval of the departmental Honors Committee
Changes Effective Spring 2019:

- Number to 408M
- Long Title
- Description
- Prerequisite/Corequisite/Concurrent Courses

ENGL 303: Honors Seminar in English: American Literature & Culture (3-12 Credits: Maximum of 12 Credits) (H) (WF) (BA)
Old Listing Effective Through Fall 2018:

Reading, group discussions, and oral and written reports on various specific authors and literary works.

Prerequisite: ENGL 015 or ENGL 030; approval of the departmental Honors Committee

Changes Effective Spring 2019:

- Number to 464M
- Abbreviated Title
- Long Title
- Description
- Prerequisite/Corequisite/Concurrent Courses

ENGL 411: Honors Seminar in English: Creative Writing (3-12 Credits: Maximum of 12 Credits) (H) (WF) (BA)
Old Listing Effective Through Fall 2018:

Advanced Seminars in Creative Writing focus on a particular genre and/or topic. Genres include poetry, fiction, graphic novel, memoir, creative non-fiction, essay, or drama. Topics vary. Students work as apprentice writers, reading the work of published and expert authors, experimenting within the genre, engaging in structured peer review and group workshops, and preparing texts for publication and contest submission. In a typical three-hour class, a third of the course may be devoted to critical assessment of assigned readings and two-thirds to workshop critique. Students discuss a number of issues relevant to the practice of creative writing and the production of literature, such as innovation and circulation, and numerous techniques, including the establishment of voice, creation of character, plot development, pacing, and principles of prosody. Students may also consider the responsibilities of literary citizenship and the ethics of artistic representation. The courses offer an intense investigation of creative writing craft. Students develop skills in close, critical reading through the examination of exemplary works of contemporary literature and craft analysis, often reading an entire book per week. They also learn to read analytically and practically in workshop critiques of peer writing. In workshop discussion, students engage in a range of critical and editing tasks from close reading to broad conceptualization; they develop the ability to communicate ideas clearly and extemporaneously, and to negotiate meaning with others. Students experiment with and hone various writing techniques by executing focused exercises and drafting and developing pieces for final submission. They apply critical and analytical reading skills to revise and strengthen their own writing. The final project may include drafts and polished versions of two to three stories or essays, and up to a dozen poems. Students are graded for regular participation, reading of and engagement with assigned texts, generating new creative works, revising drafts, incorporating peer review and professor critiques into revisions, revising and editing, preparing works for publication and contest submission, critical responses to peer writing, and overall improvement of their craft during the course of the semester.

Prerequisite: (ENGL 15 or ENGL 30) OR (ENGL 137 or ENGL 138)

Changes Effective Spring 2019:

FRNSC 410: A Scientific Approach to Crime Scene Investigation (2 Credits)
Old Listing Effective Through Fall 2018:

Principles of crime scene investigation with emphasis on scientific philosophy, concepts, and procedures. FRNSC 410 A Scientific Approach to Crime Scene Investigation (2) In this course, students will learn many of the essential principles and techniques of crime scene investigation. The necessity of a rigorous scientific approach will be stressed. This course uses an intensive, problem-solving style to teach scene management and the recognition, evaluation, enhancement, documentation, control, and collection of physical evidence. Students will be introduced to: * Scene management principles * Search techniques * Techniques to recognize, enhance, document, and collect various types of physical evidence * Communication of procedures and results * Scene reconstruction and its role in a scientific investigation The primary aim of the course is to immerse students in the scientific philosophy, integrity, scene investigation procedures, criminalistics, and role of the criminalist as they relate to crime scene investigation.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

FRNSC 411: Criminalistics: Trace and Impression Evidence (3 Credits)
Old Listing Effective Through Fall 2018:

Laboratory-based examination of forensic evidence; microscopy, classification and identification. FRNSC 411 Criminalistics: Trace and Impression Evidence (3) Laboratory-based examination of physical evidence typically recovered from crime scenes. Examination of physical evidence will occur according to established forensic procedures, including the location of trace evidence and performance of presumptive and confirmatory tests. Students will establish a laboratory notebook to document their findings. Since forensic testing ultimately results in testimony in a courtroom, students will prepare written reports of their findings and learn how to present their findings in a courtroom setting. The course will concentrate on microscopy (stereo, transmitted light, polarized light, and comparison), physical and chemical techniques to classify evidence, and pattern matching techniques to individualize impression evidence. The course is relevant to any student majoring in Forensic Science or who has an interest in obtaining employment in local, state, or federal law enforcement agencies and crime lab facilities.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

JAPNS 120: Japanese Literature in Its Cultural Context (3 Credits) (GH) (IL) (BA)
Old Listing Effective Through Fall 2018:

Japanese literature and film from classical through contemporary times, with attention to changing cultural settings. Taught in English. JAPNS 120 Japanese Literature in Its Cultural Context (3) (GH;IL)(BA) This course meets the Bachelor of Arts degree requirements. This course
is intended to provide an introduction to the literature of Japan from the seventh century to the postmodern era. Prior study of Japan is not required and materials will be available in English. Students will learn about major eras of Japanese literature and culture, such as the age of the Man'yoshu, the age of the Genji monogatari (The Tale of Genji), the age of No and Kyogen, the age of Wit and Learning, the age of Meiji, the age of industrialization, the postwar years, and postmodernity. The readings will include several genres, such as poetry, folktale, short story, and novel, with an emphasis on prose fiction. The course is structured so that students develop a historical/cultural perspective in order to understand the contexts that have inspired the literary works. By examining literature in its cultural contexts, students will investigate such topics as the relation between social institutions and the individual, the traditional patriarchal system, the changing roles of women, westernization, the Emperor system, and postmodern consumer culture, among others. Students will read literature and related materials from different periods, with occasional presentations of films. Class work includes some lecture but emphasizes guided discussions, group discussions, and students' presentations. This participatory approach is intended to deepen students' appreciation of the texts, to help them understand value systems that may differ from, or else be shared with, those predominant in modern Western cultures, and to assist students in developing both analytical and expressive abilities. Evaluation will be through means such as in-class presentations, two midterms, one analytic paper (3-7 pages), and in-class participation and discussion. The course is designed to be suitable for all students generally interested in Japan, or interested in various fields of humanistic study, whether or not they have previously studied the culture of Japan. This course is required for the Japanese major. It is designed to count as General Education and as a B.A. “Other Cultures” course. It will be taught once a year with an enrollment of 40-50. This course will be taught in the active-learning mode, featuring both lecture and discussion, including oral presentations, which provides students abundant opportunity for expressing their opinions. Web-based activities may also be included, depending on the instructor. Specifically: Writing, speaking, self-expression: Students will write reaction papers and comprehensive essays (e.g. take-home essay exams), which require the analysis and comparison of various literary works. Opportunity for information gathering, synthesis and analysis in solving problems; A wide range of texts—synchronous and diachronic terms of time and space—will be comparatively analyzed. Students will use the library as well as electronic resources to research texts and authors for their oral presentations and essays. Application of intercultural/international competence: Students will explore a wide range of texts in Japanese literature and cultures. Students will compare/contrast texts based on cultural and social contexts.

KINES 135: Introduction to Athletic Training (3 Credits)
Old Listing Effective Through Fall 2018:

Foundation of injury recognition and prevention; ethical, legal, and professional issues for the athletic trainer. A laboratory based course. KINES 135 Introduction to Athletic Training (3) Introduction to Athletic Training provides an overview of the field of athletic training exploring the breadth of athletic training terminology, issues, and injuries. After completing the course, the students will be able to describe the roles of the sports medicine team, understand the legal considerations for the athletic trainer as a health care provider, and identify the basics of physical conditioning and nutrition in reference to injury prevention. Students will be able to describe an emergency action plan for injuries, lightning safety, and provide a basic plan for dehydration and fluid replacement. Students will be able to identify basic use of therapeutic modalities and principles of therapeutic exercise programs. Students will gain an understanding of acute vs. chronic injury conditions and be able to describe the related anatomy, etiologies, pathologies, signs and symptoms, and general treatment and management for injuries of the foot, ankle, lower leg, knee, hip/groin, shoulder, elbow, wrist, hand, cervical spine, and head. A weekly taping laboratory is included and students are provided rationale and demonstrations for specific taping techniques for a variety of injuries. Students are also provided an overview of general medical conditions that may occur in the athletic arena. Students are evaluated through three (3) exams, six (6) quizzes, performance in taping lab and practical exam, development of a medical condition fact sheet and class presentation of the medical condition, in-class assignments, class participation, and class attendance. This course is offered every fall and spring semesters with a maximum enrollment of 35.

KINES 202: Functional Human Anatomy (4 Credits)
Old Listing Effective Through Fall 2018:

In-depth examination of the, musculoskeletal, nervous, cardiovascular, and respiratory systems, and their relationship to human movement.

Changes Effective Spring 2019:

• Abbreviation to ATHTR
• Description
• Abbreviated Title
• Add Cross-listing ATHTR 202

KINES 231: Athletic Training Clinical Practice I (3 Credits)
Old Listing Effective Through Fall 2018:

Preparation in basic psychomotor skills required in the clinical practice of athletic training. This is a laboratory fee based course. KINES 231 Athletic Training Clinical Practice I (2) This course is designed to introduce students to basic skills required for the clinical practice of athletic training. The course will teach introductory content and skills related to injury and illness prevention and management. Specific topics include preventing environmental injuries and illnesses, taping and wrapping techniques, protective equipment, preparticipation physical examinations, preparing for emergencies in the athletic setting, and concepts of basic athletic injury management. The course will meet for one hour of lecture and two hours of lab each week. Assessments will include written and practical examinations, homework assignments, and demonstration of practical skills specific to the clinical proficiencies required to sit for the NATABOC exam (must be administered by an NATABOC approved clinical instructor per accreditation guidelines).

KINES 232: Athletic Training Clinical Practice II (3 Credits)
Old Listing Effective Through Fall 2018:

Athletic Training Clinical Practice II provides instruction in supervised practice of the basic skills required in the practice of athletic training. Topics include documentation of medical records, postural screening, assessment and improvement of flexibility, assessment, and improvement of strength, use of functional rehabilitation protocols, use of common therapeutic modalities, and description of the use of medications in sports medicine. Assessments will include written and practical examinations, homework assignments, and demonstration of practical skills specific to the clinical proficiencies required to sit for the NATABOC exam (must be administered by an NATABOC approved clinical instructor per accreditation guidelines). Students will also complete four-hour observations with senior athletic training students. This course provides the student with the opportunity to learn and practice clinical athletic training skills before beginning practicum experiences. The course will meet for 2-hours of lecture and 2-hours of lab each week.

KINES 233: Emergency Care in Athletic Training (3 Credits)
Old Listing Effective Through Fall 2018:

This course prepares students pursuing the athletic training major in the Department of Kinesiology with the knowledge and skills to respond to medical emergencies. Basic skills including rescue breathing, cardiopulmonary resuscitation, and first aid management of injury and illness emergencies are developed. These skills are supplemented with content related to blood borne pathogens and OSHA regulations needed for personal safety and effective management of athletic training services, the causes and prevention of sudden cardiac death in athletics, and training in the use of automated external defibrillators. The second part of the course focuses on the secondary survey and evaluation and management of central nervous system, musculoskeletal injuries, and shock. The final part of the course addresses conditions of the thorax, abdomen, and musculoskeletal system, environmental hazards encountered in athletics; and drug and alcohol overdoses and poisoning. The course will include the opportunity for professional certification in first aid and cardiopulmonary resuscitation. The course will meet for 2-hours of lecture and 2-hours of lab each week. Assessments will include written examinations, CPR certification (written and practical), blood borne pathogens certification (written), and demonstration of practical skills specific to the clinical proficiencies required to sit for the NATABOC exam (must be administered by an NATABOC approved clinical instructor per accreditation guidelines).

KINES 334: Mechanisms and Evaluation of Lower Body Athletic Injuries (3 Credits)
Old Listing Effective Through Fall 2018:

This course will focus on: 1) the etiology of athletic injuries to the lower extremity and lumbosacral spine, and 2) evaluation techniques for assessing athletic injuries to the lower extremity and lumbosacral spine. The objectives of this course include: understanding the mechanisms of athletic injuries to the lower body; demonstrating proficiency in the objective and subjective assessment procedures of lower body athletic injuries; recognizing orthopedic, neurovascular, and medical emergencies associated with lower body athletic injuries; recognizing the normal and abnormal mechanics of the lumbosacral spine and lower extremity including the walking and running gait cycles; and integration of injury mechanisms into the treatment and rehabilitation plan of care for the injured athlete.

KINES 335: Mechanisms and Evaluation of Upper Body Athletic Injuries (3 Credits)
Old Listing Effective Through Fall 2018:

Etiology of athletic injuries with scientific and practical rationales for evaluation of injuries to upper extremity, neck, head, and trunk. KINES 335 Mechanisms and Evaluation of Upper Body Athletic Injuries (3)

This course will focus on: 1) the etiology of athletic injuries to the upper extremity, neck, head, and trunk, and abdomen, and 2) evaluation techniques for assessing athletic injuries to the upper extremity, head, cervical spine, thorax, and abdomen. The objectives of this course include: understanding the mechanisms of athletic injuries to the upper body; demonstrating proficiency in the objective and subjective assessment procedures of upper body athletic injuries; recognizing orthopedic, neurovascular, and medical emergencies associated with upper body athletic injuries; recognizing the normal and abnormal mechanics of the cervical spine and upper extremity including the overhead throwing motion; and integration of injury mechanisms into the treatment and rehabilitation plan of care for the injured athlete. This course includes lectures as well as hands-on laboratory sessions. Assessment is based on student performance on written examinations, practical examinations, and written assignments. A literature review paper detailing the pathoetiology of a specific athletic injury is required. This course is required for students completing the athletic training option within the Kinesiology major. It is designed to be taken concurrently with either KINES 395F or 395G. The course is offered every fall semester.

KINES 336: Medical Aspects of Athletic Training (3 Credits)
Old Listing Effective Through Fall 2018:

Pathology, assessment, and treatment (including pharmacology) of general medical conditions commonly seen in physically active populations. KINES 336 Medical Aspects of Athletic Training (3) This course is designed to instruct students in general medicine content and skills related to the clinical practice of athletic training. Specific topics include pathology; pharmacology; physical examination of head, ears, eyes, nose, throat, pulmonary, cardiovascular, gastrointestinal, renal, genitourinary, and dermatological conditions commonly seen in athletes; exertional heat illness; diabetes and exercise; female athlete triad; injuries in athletes with physical disabilities; and psychosocial aspects of patient-provider relationships. Several lectures will be made by physicians who specialize in sports medicine. Lab activities will include the instruction, practice, and assessment of psychomotor skills related to the course content. The course will meet for three hours per week and will include a balance of both lecture and laboratory activities. Student assessment will include written and practical examinations, homework assignments, and demonstration of practical skills specific to the clinical proficiencies required to sit for the NATABOC exam (must be administered by an NATABOC approved clinical instructor per accreditation guidelines).

KINES 395I: Practicum in Athletic Training (3 Credits: Maximum of 3 Credits)
Old Listing Effective Through Fall 2018:

KINES 395I Practicum in Athletic Training (3) This course is designed to provide students practical experiences in a variety of clinical settings in which certified athletic trainers are commonly employed. This is the third clinical assignment after a student is admitted to the Athletic Training option within the Kinesiology major. Students will complete a minimum of 250-300 clock hours under the supervision of a certified athletic trainer in a variety of clinical settings. These settings include but are not limited to: outpatient sports medicine clinics, interscholastic athletic settings, and intercollegiate athletic settings. The objectives of this course include demonstrating proficiency in: assisting lower level students in developing athletic training skills and mastering level-appropriate competencies; demonstrate proficiency in evaluation and documentation of common athletic injuries; assist in the development and documentation of a plan of care for common athletic injuries; demonstrate proficiency in the development and documentation of clinical progression through a plan of care; participate in the application of therapeutic modalities and therapeutic exercise under the supervision of a certified athletic trainer. In this practical experience, the student is required to demonstrate a practical experiences completed to date and as required by the program option up to the current semester. This practicum has a prerequisite requirement of KINES 395G and is a prerequisite for the subsequent athletic training practicum, KINES 495F. Assessment is based on student performance written examinations, practical examinations, written assignments, and performance assessments by supervising athletic trainer(s). The course is designed to be taken the third semester following admittance to the athletic training option. It is offered every fall and spring semester with an enrollment of 15-20 students.

KINES 395F: Practicum in Athletic Training (3 Credits: Maximum of 3 Credits)
Old Listing Effective Through Fall 2018:

KINES 395F Practicum in Athletic Training (3) This course is designed to give students practical experiences in a variety of clinical settings in which certified athletic trainers are commonly employed. Students will accumulate approximately 100-150 clinical hours learning under the supervision of certified athletic trainers in a variety of clinical settings. These settings include but are not limited to: intramural sports, club sports, outpatient sports medicine clinics, high schools, and intercollegiate athletic training rooms. In addition to clinical experiences there is also a didactic portion of this course which emphasizes students gaining proficiency in important clinical skills. There are also weekly written assignments. The objectives of this course include demonstrating proficiency in: the evaluation of a conscious athlete; the recognition of cerebral concussion and closed head injury; the recognition of acute injury to the cervical spine; the recognition of fractures and dislocations; the assessment of neurovascular function; the recognition, treatment, and prevention of heat illnesses including heat cramps, heat exhaustion, and heat stroke; the use of splints, stretchers and spine boards in the management of injured athletes; the application of taping and wrapping techniques commonly used in the prevention and management of common athletic injuries; and in obtaining a medical history. Assessment is based on student performance on written examinations, practical examinations, written assignments, and performance in students' clinical rotations. This course is required for students completing the athletic training option within the Kinesiology major. It is a prerequisite for more advanced athletic training practicums (KINES 395G, 395I, 495F) and it should be taken concurrently with KINES 334 or 335. It is designed to be taken the first semester following admittance to the athletic training option. This course is offered every fall and spring semester.

KINES 434: Rehabilitation of Injuries to the Lower Extremities (3 Credits)
Old Listing Effective Through Fall 2018:

Theoretical foundation and laboratory experience in manual therapy techniques and therapeutic exercises for the lower extremities. KINES 434 Rehabilitation of Injuries to the Lower Extremities (3) Rehabilitation of Injuries to the Lower Extremities is a 3-credit course offered each fall
semester with an enrollment limit of 40 students. The course provides students who have been accepted into the undergraduate athletic training option in the Department of Kinesiology with the theoretical foundation for application of manual therapy techniques and therapeutic exercises in the treatment of musculoskeletal injuries sustained by physically active individuals. Laboratory instruction and guided practice in performing manual therapy techniques and therapeutic exercises will also be provided. At the end of this course students: 1) can identify five components of a comprehensive plan of care for an injured athlete; 2) have a working knowledge of the effects of therapeutic exercise on tissue repair and return to activity; 3) have a working knowledge of the impact of pain on programs and therapeutic exercise; 4) are able to perform selected manual therapy techniques and integrate them into a comprehensive plan of care; 5) understand the psychological response to injury and therapeutic exercise; 6) can develop a plan of rehabilitation utilizing principles of tissue healing, therapeutic exercise and manual therapy; and 7) instruct patients in home programs of therapeutic exercise. This course will focus on the basic principles of therapeutic exercise and rehabilitation of injuries to the lower extremities. This course will be offered every Fall semester with an anticipated enrollment limit of 25. Evaluation includes quizzes, rehabilitation plan of care, proficiency notebook, mid-term and final practical exams, and written mid-term and final exams.

MATH 201: Problem Solving in Mathematics II (3 Credits) (GQ)
Old Listing Effective Through Fall 2018:

A continuation of MATH 200, this course studies the foundations of elementary school mathematics with an emphasis on problem solving. MATH 201 Problem Solving in Mathematics II (3) (GQ) Problem Solving in Mathematics II studies the foundations of elementary school mathematics with an emphasis on problem solving. Mathematical ways of thinking are integrated throughout the study of probability, statistics, graphing, geometric shapes, and measurement. This course is designed for prospective teachers not only to gain the ability to explain the mathematics in elementary school courses, but also to help them comprehend the underlying mathematical concepts. Gaining a deeper understanding will enable them to assist their young students in the classroom since effective mathematical teaching requires understanding what students know, what they need to learn, and then helping them to learn it well.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATH 210: Calculus with Engineering Technology Applications (3 Credits) (BA) (GQ)
Old Listing Effective Through Fall 2018:

Topics in calculus with an emphasis on applications in engineering technology. MATH 210 Calculus with Engineering Technology Applications (3) is a three-credit course to be taken either after the MATH 81, MATH 82, MATH 83 sequence or after a semester of college-level calculus. The content of the course is geared toward the needs of engineering technology majors and places a large emphasis on technology and applications. The course provides mathematical tools required in the upper division engineering technology courses. A primary goal is to have students use technology to solve more realistic problems than the standard simplistic ones that can be solved by “pencil and paper.” Student evaluation will be performed through exams, quizzes, graded assignments, and a cumulative final exam. It is expected that MTHBD 210 will be offered every semester with an enrollment of 44-80 students.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATH 220: Matrices (2-3 Credits) (BA) (GQ)
Old Listing Effective Through Fall 2018:

Systems of linear equations; matrix algebra; eigenvalues and eigenvectors; linear systems of differential equations. MATH 220 Matrices (2-3) (GQ) (BA) This course meets the Bachelor of Arts degree requirements. Systems of linear equations appear everywhere in mathematics and its applications. MATH 220 will give students the basic tools necessary to analyze and understand such systems.

The initial portion of the course teaches the fundamentals of solving linear systems. This requires the language and notation of matrices and fundamental techniques for working with matrices such as row and column operations, echelon form, and invertibility. The determinant of a matrix is also introduced; it gives a test for invertibility. In the second part of the course the key ideas of eigenvector and eigenvalue are developed. These allow one to analyze a complicated matrix problem into simpler components and appear in many disguises in physical problems. The course also introduces the concept of a vector space, a crucial element in future linear algebra courses. This course is completed by a wide variety of students across the university, including students majoring in engineering programs, the sciences, and mathematics. In case of many of these students, MATH 220 is a required course in their degree program.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATH 220H: Honors Matrices (2-3 Credits) (H) (BA) (GQ)
Old Listing Effective Through Fall 2018:

Honors course in systems of linear equations; matrix algebra; eigenvalues and eigenvectors; linear systems of differential equations.

MATH 220H Honors Matrices (2) (GQ)(BA) This course meets the Bachelor of Arts degree requirements. This course is intended as an introduction to linear algebra with a focus on solving systems for linear equations. Topics include systems of linear equations, row reduction and echelon forms, linear independence, introduction to linear transformations, matrix operations, inverse matrices, dimension and rank, determinants, eigenvalues, eigenvectors, diagonalization, and orthogonality. The typical delivery format for the course is two 50-minute lectures per week, with typical assessment tools including examinations, quizzes, homework, and writing assignments. In contrast to the non-honors version of this course, the honors version is typically more theoretical and will often include more sophisticated problems. Moreover, certain topics are often discussed in more depth and are sometimes expanded to include applications which are not visited in the non-honors version of the course.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATH 230: Calculus and Vector Analysis (4 Credits) (BA)
Old Listing Effective Through Fall 2018:

Three-dimensional analytic geometry; vectors in space; partial differentiation; double and triple integrals; integral vector calculus.

Students who have passed either Math 231 or 232 may not schedule Math 230 or 230H for credit.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATH 230H: Honors Calculus and Vector Analysis (4 Credits) (H) (BA)
Old Listing Effective Through Fall 2018:
Honors course in three-dimensional analytic geometry; vectors in space; partial differentiation; double and triple integrals; integral vector calculus. Students who have passed either MATH 231 or 232 may not schedule MATH 230 or 230H for credit. MATH 230H Honors Calculus and Vector Analysis (4) This course is the third in a sequence of three calculus courses designed for students in engineering, science, and related fields. Topics include vectors in space, dot products, cross products; vector-valued functions, modeling motion, arc length, curvature; functions of several variables, limits, continuity, partial derivatives, directional derivatives, gradient vectors, Lagrange multipliers; double integrals, triple integrals; line integrals, Green’s Theorem, Stokes’ Theorem, the Divergence Theorem. The typical delivery format for the course is four 50-minute lectures per week, with typical assessment tools including examinations, quizzes, homework, and writing assignments. In contrast to the non-honors version of this course, the honors version is typically more theoretical and will often include more sophisticated problems. Moreover, certain topics are often discussed in more depth and are sometimes expanded to include applications which are not visited in the non-honors version of the course.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

MATH 231: Calculus of Several Variables (2 Credits) (BA)
Old Listing Effective Through Fall 2018:

Analytic geometry in space; partial differentiation and applications. Students who have passed MATH 230 or MATH 230H may not schedule this course.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

MATH 231H: Honors Calculus of Several Variables (2 Credits) (H) (BA)
Old Listing Effective Through Fall 2018:

Honors course in analytic geometry in space; partial differentiation and applications. Students who have passed MATH 230 or MATH 230H may not schedule this course. MATH 231H Honors Calculus of Several Variables (2) This course covers a subset of the material found in MATH 230. Topics include vectors in space, dot products, cross products; vector-valued functions, modeling motion, arc length, curvature; functions of several variables, limits, continuity, partial derivatives, directional derivatives, gradient vectors, Lagrange multipliers. The typical delivery format for the course is two 50-minute lectures per week, with typical assessment tools including examinations, quizzes, homework, and writing assignments. In contrast to the non-honors version of this course, the honors version is typically more theoretical and will often include more sophisticated problems. Moreover, certain topics are often discussed in more depth and are sometimes expanded to include applications which are not visited in the non-honors version of the course.

MATH 232: Integral Vector Calculus (2 Credits) (BA)
Old Listing Effective Through Fall 2018:

Multidimensional analytic geometry, double and triple integrals; potential fields; flux; Green’s, divergence and Stokes’ theorems. Students who have passed MATH 230 may not schedule this course for credit.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

MATH 250: Ordinary Differential Equations (3 Credits) (BA)
Old Listing Effective Through Fall 2018:

First- and second-order equations; special functions; Laplace transform solutions; higher order equations. Students who have passed MATH 251 may not schedule this course for credit.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

MATH 251: Ordinary and Partial Differential Equations (4 Credits) (BA)
Old Listing Effective Through Fall 2018:

First- and second-order equations; special functions; Laplace transform solutions; higher order equations; Fourier series; partial differential equations.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

MATH 251H: Honors Ordinary and Partial Differential Equations (4 Credits) (H) (BA)
Old Listing Effective Through Fall 2018:

Honors course in first- and second-order equations; special functions; Laplace transform solutions; higher order equations; Fourier series; partial differential equations. MATH 251H Honors Ordinary and Partial Differential Equations (4) This course serves as an introduction to ordinary and partial differential equations. Topics include various techniques for solving first and second order ordinary differential equations, an introduction to numerical methods, solving systems of two ordinary differential equations, nonlinear differential equations and stability, Laplace transforms, Fourier series, and partial differential equations. The typical delivery format for the course is four 50-minute lectures per week, with typical assessment tools including examinations, quizzes, homework, and writing assignments. In contrast to the non-honors version of this course, the honors version is typically more theoretical and will often include more sophisticated problems. Moreover, certain topics are often discussed in more depth and are sometimes expanded to include applications which are not visited in the non-honors version of the course.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

MATH 310: Elementary Combinatorics (3 Credits) (BA)
Old Listing Effective Through Fall 2018:

Fundamental techniques of enumeration and construction of combinatorial structures, permutations, recurrences, inclusion-exclusion, permanents, 0, 1- matrices, Latin squares, combinatorial designs.
Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATH 310H: Honors Concepts of Combinatorics (3 Credits) (H) (BA)
Old Listing Effective Through Fall 2018:

Description: Honors version of elementary and enumerative combinatorics.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATH 311W: Concepts of Discrete Mathematics (3-4 Credits) (WF) (BA)
Old Listing Effective Through Fall 2018:

Introduction to mathematical proofs; elementary number theory and group theory. Students who have passed CMPSC 360 may not schedule this course for credit.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATH 312: Concepts of Real Analysis (3 Credits) (BA)
Old Listing Effective Through Fall 2018:

An introduction to rigorous analytic proofs involving properties of real numbers, continuity, differentiation, integration, and infinite sequences and series.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATH 312H: Honors Concepts of Real Analysis (3 Credits) (H) (BA)
Old Listing Effective Through Fall 2018:

Basic methods of mathematical thinking and fundamental structures, primarily in the context of infinite sets, real numbers, and metric spaces.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATH 405: Advanced Calculus for Engineers and Scientists I (3 Credits) (BA)
Old Listing Effective Through Fall 2018:

Vector calculus, linear algebra, ordinary and partial differential equations. Students who have passed MATH 411 or 412 may not take this course for credit.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATH 411: Ordinary Differential Equations (3 Credits) (BA)
Old Listing Effective Through Fall 2018:

Linear ordinary differential equations; existence and uniqueness questions; series solutions; special functions; eigenvalue problems; Laplace transforms; additional topics and applications.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATH 412: Fourier Series and Partial Differential Equations (3 Credits) (BA)
Old Listing Effective Through Fall 2018:

Orthogonal systems and Fourier series; derivation and classification of partial differential equations; eigenvalue function method and its applications; additional topics. MATH 412 Fourier Series and Partial Differential Equations (3) (BA) This course meets the Bachelor of Arts degree requirements. The purpose of MATH 412 is to introduce students to the origins, theory, and applications of partial differential equations. Several basic physical phenomena are considered — including flows, vibrations, and diffusions — and used to derive the relevant equations. The fundamentals of the mathematical theory of partial differential equations are motivated and developed for the students through the systematic exploration of these classic physical systems and their corresponding equations: the Laplace, wave, and heat equations. In addition to treating the physical origins of the equations, this course focuses on solving evolution equations as initial value problems on unbounded domains (the Cauchy problem), and also on solving partial differential equations on bounded domains (boundary value problems). There is not one but many techniques for solving these equations, and the course presents some aspect of the expansion in orthogonal functions (including Fourier series), eigenvalue theory, functional analysis, and the use of separation of variables, Fourier transforms, and Laplace transforms to solve PDEs by converting them to ordinary differential equations. This course currently serves a cross-section of students at the university with interests or the need for this advanced subject mathematics, including students majoring in the engineering program, meteorology, physics, and mathematics. This typically includes the most advanced physics, engineering, and meteorology students, as well as mathematics majors with interests in applied mathematics.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATH 416: Stochastic Modeling (3 Credits)
Old Listing Effective Through Fall 2018:

Review of distribution models, probability generating functions, transforms, convolutions, Markov chains, equilibrium distributions, Poisson process, birth and death processes, estimation.

Cross-Listed Courses: STAT 416

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATH 417: Qualitative Theory of Differential Equations (3 Credits) (BA)
Old Listing Effective Through Fall 2018:

Linear differential equations, stability of stationary solutions, ordinary bifurcation, exchange of stability, Hopf bifurcation, stability of periodic solutions, applications. MATH 417 Qualitative Theory of Differential Equations (3) (BA) This course meets the Bachelor of Arts degree requirements. The main objective of the course is the qualitative theory of ordinary differential equations such as existence and uniqueness of solutions, dependence on initial data and parameters, and basic stability of solutions for both linear and nonlinear equations. It is designed to introduce students to modern concepts including the bifurcation theory, intermittent (transitional) and chaotic behavior of solutions.
and dynamical system approach to differential equations. Along the way, a number of applications are discussed and students get familiar with some basic examples illustrating main principles of the theory, such as Lorenz attractor, predator-prey models, etc. The course is completed by students majoring in engineering programs, the sciences, and mathematics.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

MATH 421: Complex Analysis (3 Credits) (BA)
Old Listing Effective Through Fall 2018:

Infinite sequences and series; algebra and geometry of complex numbers; analytic functions; integration; power series; residue calculus; conformal mapping, applications.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

MATH 437: Algebraic Geometry (3 Credits) (BA)
Old Listing Effective Through Fall 2018:

Study of curves in the plane defined by polynomial equations p(x,y)= 0. Projective equivalence, singular points, classification of cubics. MATH 437 Algebraic Geometry (3)(BA) This course meets the Bachelor of Arts degree requirements. The geometric study of algebraic equations is one of the oldest and deepest parts of mathematics, and it lies at the heart of modern developments in geometry, algebra, number theory and physics. Students completing MATH 437 will understand many new algebraic and geometric ideas by studying examples of curves defined by equations of degrees 2 and 3 in the plane. First come conics (given by equations of degree 2 in two variables). Rigid motions, similarities, and affine transformations give different classifications of them. New ideas then show how to get a conic through any five points and prove Pascal’s theorem about six points on a conic. Special cases suggest extension of the usual plane to the projective plane, with “points at infinity,” homogeneous coordinates, and projective transformations. The main part of the course turns to equations of degree 3 and their singularities, flex points, tangents, and degeneracies. Several new ideas, both algebraic and analytic, are brought in to prove the existence of complex flex points on singular cubics and then real flex points on nonsingular real cubics. There is then a classification on complex projective cubics by a single parameter and finally a full classification of all real projective cubics. As time permits, relations to further topics are sketched: addition of points on a nonsingular cubic, Mordell’s theorem, doubly periodic functions, and Fermat’s last theorem. The course is typically taken by mathematics majors.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

MATH 448: Mathematics of Finance (3 Credits)
Old Listing Effective Through Fall 2018:

The course provides a foundational knowledge of the mathematics and mathematical models of finance, primarily of option pricing, hedging, and portfolio optimization. The topics include the definition of various financial securities and instruments (e.g. bonds, stocks, forward contracts, and options), the theory of interest, the No-Arbitrage Principle, measures of return and volatility, the Markowitz model of portfolio theory, the Capital Asset Pricing Model, the pricing of forward contracts, option trading strategies, the pricing of options via binomial models and the Black-Scholes model, and principles of hedging.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

MATH 468: Mathematical Coding Theory (3 Credits) (BA)
Old Listing Effective Through Fall 2018:

Shannon’s theorem, block codes, linear codes, Hamming codes, Hadamard codes, Golay codes, Reed-Muller codes, bounds on codes, cyclic codes.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

MATH 484: Linear Programs and Related Problems (3 Credits) (BA)
Old Listing Effective Through Fall 2018:

Introduction to theory and applications of linear programming; the simplex algorithm and newer methods of solution; duality theory.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

MICRB 201: Introductory Microbiology (3 Credits)
Old Listing Effective Through Fall 2018:

Elementary principles of microbial and viral structure, reproduction, genetics and physiology; relationship to food, water, soil, industrial and disease processes. MICRB 201 Introductory Microbiology (3) MICRB 201, Introductory Microbiology, is a survey course that touches on the full range of topics generally considered to fall within the scope of microbiology. After a short overview of the origins of microbiology and the ways in which forms of life too small to be seen with the naked eye can be studied, the course launches into the following basic topics: 1) structure and function of the bacterial cell as compared with plant and animal cells 2) care, feeding, and controlling the growth of bacteria 3) how bacteria acquire and use energy 4) how energy and nutrients are used to make cell components and carry out life processes 5) how bacteria organize, replicate and control the expression of genetic information 6) how viruses differ organizationally and reproductively from bacteria, and finally 7) how bacteria are classified and why various classification schemes are important. The remainder of the course is concerned with specific roles bacteria and viruses play in nature. Issues addressed include: 1) role of bacteria in the cycling of elements in the terrestrial environment 2) importance of bacteria in aquatic environments, including the safety of drinking water and treatment of waste water 3) the role of bacteria and viruses in human health and disease Bacteria existed long before higher life forms, so animals, including humans, evolved means to protect themselves from harmful bacteria while forming relationships with bacteria that are beneficial. These harmful and beneficial relationships are intimately connected to immunology, a field that has long been included in the study of microbiology. The study of disease-causing microbes includes the topics of how these organisms are spread and how they can be controlled using anti-bacterial and anti-viral agents. Selected diseases are used to explain the various mechanisms by which microbes are able to cause illness. Finally, the course also covers the role microorganisms play in the spoilage of foods and, more importantly, the myriad ways in which bacteria, yeast and fungi are used to manufacture such popular foods as breads, cheeses, wines, beers and many other fermented food and
dairy products. At some point in the course, there is discussion of how microbes are used in the rapidly-expanding area of biotechnology. Bacteria have, by far, the greatest genetic diversity of all living things, so their potential for yielding products of benefit to agriculture and humankind is enormous. This topic also treats the controversial issues connected with biotechnology, including ethical, theoretical and practical issues that are or will eventually need to be addressed by society.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

MICRB 201H: Introductory Microbiology (3 Credits) (H)
Old Listing Effective Through Fall 2018:

Elementary principles of microbial and viral structure, reproduction, genetics and physiology; relationship to food, water, soil, industrial and disease processes. MICRB 201H Introductory Microbiology (3) MICRB 201H, Introductory Honors Microbiology, is a survey course that touches on the full range of topics generally considered to fall within the scope of microbiology. After a short overview of the origins of microbiology as a science and the ways in which forms of life too small to be seen with the naked eye can be studied, the course covers the following basic topics: 1) the tree of life and the position of microbes in the biological world, 2) structure and function of the bacterial cell as compared with plant and animal cells, 3) microbial nutrition and growth, 4) molecular biology and gene regulation in microbes, 5) microbial genetics, 6) an overview of microbial classification and diversity, and 7) the principles of how microbes interact with their environment. Unlike the standard sections of MICRB 201, the honors course then moves on to an integrated description of microbial diversity and ecology in association with topics such as carbon metabolism, energy acquisition and utilization including photosynthesis, and the environmental impacts of microbial utilization of inorganic chemicals. This is followed by a section concerning eukaryotic or non-bacterial microbes, a section concerning the use of microbes in industry, and then a basic overview of viruses and how they work. The last part of the course deals with microbial interactions with other organisms with an emphasis on their interactions with man. This starts with a discussion of how microbial growth can be controlled, and then the various kinds of relationships that can exist between microbes and other organisms are covered. This is followed by a section on immunology or the mechanisms animals possess to defend themselves against potentially harmful microbes. The final section concerning a broad range of microbially-caused diseases is preceded by a description of microbial analysis in the clinical or medical laboratory as well as a discussion of how disease causing microbes are spread in animal populations. MICRB 201H is taught so as to emphasize the impact of microbes on our everyday lives. One way this is accomplished is by class presentations made by small groups of students on topics of current interest in the community at large. Students also write a term paper that can involve any aspect of microbiology using an article from the popular press as their starting point. All students are also required to make a short in-class presentation in which they provide an overview of their term paper. While much of the instruction involves the standard lecture format, classroom discussion is encouraged at all times.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MICRB 202: Introductory Microbiology Laboratory (2 Credits)
Old Listing Effective Through Fall 2018:

Qualitative and quantitative techniques with regard to recognition of bacteria and their processes on a microscopic, colonial, and physiological basis.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

MICRB 401: Microbial Physiology and Structure (3 Credits)
Old Listing Effective Through Fall 2018:

Physiology and structure of bacteria important in microbiological research. Designed for science majors.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Cross-Listed Course
- Description

MICRB 415: General Virology: Bacterial and Animal Viruses (3 Credits)
Old Listing Effective Through Fall 2018:

The interaction of different types of viruses with bacterial and animal cells, including mechanisms of infection and viral synthesis. MICRB 415 General Virology: Bacterial and Animal Viruses covers the interactions of different types of viruses with animal and bacterial cells, emphasizing molecular and genetic concepts of viral infection and viral replication. Students are expected to apply basic concepts of microbiology as well as molecular and cell biology to understanding selected viral life cycles, particularly at the molecular level. Lectures are augmented by in-class discussion and homework assignments. Typically, students are evaluated by two hourlies exams and a final exam that assess their knowledge of virology and their ability to apply basic concepts of gene expression and cell biology to explaining viral life cycles. This course builds on the common requirements of MICRB 201 and B M B (MICRB) 251/252. The instruction expands into the cellular and molecular bases of viral life cycles with regular reference to and comparison with cellular and molecular biology of uninfected cells. The content of this course complements those on the basic mechanisms of gene expression (B M B 400) and prepares the student for understanding the molecular basis of viral pathogenesis covered in B M B/MICRB/V SC 435.
Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

MICRB 421W: Laboratory of General and Applied Microbiology (3 Credits) (WF)
Old Listing Effective Through Fall 2018:

Laboratory exercises demonstrating fundamental techniques and principles of experimentation of general and applied microbiology.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

MICRB 422: Medical Microbiology Laboratory (2 Credits)
Old Listing Effective Through Fall 2018:

Laboratory exercises demonstrating properties and classification of medically important microorganisms and techniques used in their identification.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses
- Description

MICRB 447: Laboratory in Molecular Immunology (1 Credit)
Old Listing Effective Through Fall 2018:

LABORATORY IN MOLECULAR TECHNIQUES TO ASSAY ANTIGENS, ANTIBODIES, AND RECEPTOR SITES.

Changes Effective Spring 2019:

- Credits
- Description

NUTR 495: Advanced Field Experience in Nutrition (1-6 Credits: Maximum of 6 Credits)
Old Listing Effective Through Fall 2018:

Supervised off-campus, non-group instruction including individual field experiences, practicums or internships. Written and oral critique of activity is required.

Changes Effective Spring 2019:

- Credits
- Description
- Prerequisite/Corequisite/Concurrent Courses

PHYS 211H: General Physics: Mechanics (4 Credits) (H) (BA) (GN)
Old Listing Effective Through Fall 2018:

Calculus-based study of the basic concepts of mechanics: motion, force, Newton's laws, energy, collisions, rotation, and oscillations. PHYS 211H General Physics: Mechanics (4) (GN) Calculus-based introduction to classical mechanics, including such topics as: measurement, dimensional analysis, motion in one-dimension, vectors, motion in 2 and 3 dimensions, relative and circular motion, force and dynamics, Newton's Laws, friction, kinetic energy, work, potential energy, energy conservation, systems of particles, center of mass and momentum, elastic and inelastic collisions, rotation (moments of inertia), rolling motion, torque, angular momentum, static equilibrium, gravitational force and Kepler's laws, gravitational potential energy, oscillations, waves (transverse and longitudinal, superposition of waves). In contrast to the non-honors version, PHYS 211H typically makes more frequent use of higher level mathematical concepts and involves the solution of more sophisticated problems. A number of topics are considered in more depth, and these often focus on connections of the material to real-life science or engineering applications.

Changes Effective Spring 2019:

PHYS 212: General Physics: Electricity and Magnetism (4 Credits) (BA) (GN)
Old Listing Effective Through Fall 2018:

Calculus-based study of the basic concepts of electricity and magnetism. PHYS 212 General Physics: Electricity and Magnetism (4) (GN) (BA) This course meets the Bachelor of Arts degree requirements. Calculus-based introduction to classical electricity and magnetism, including such topics as, electric charge and electric fields, Gauss's law, electric potential, capacitance, current, resistance, and circuits, magnetic fields, and fields due to currents, induction and inductance, magnetism of matter, Maxwell's equations, and electromagnetic oscillations. This course is designed to provide students with a working knowledge of the elementary physics principles mentioned above, as well as their applications, and to enhance their conceptual understanding of physical laws.

Students attend two lectures, one recitation session, and one two-hour lab/activity period per week. Use of a combination of computer-based and traditional lab exercises is expected and collaborative learning exercises will be used in both lab and recitation settings. The introduction of data acquisition and analysis methods (often making use of modern computer tools) will be stressed in the laboratory/activity period. Course evaluation is based on a combination of regular homework sets and/or quizzes, reports from the lab/activity period, midterm and final exams and other evaluative tools. The course is an important prerequisite for later work in many science and engineering disciplines.

PHYS 213: General Physics: Fluids and Thermal Physics (2 Credits) (BA) (GN)
Old Listing Effective Through Fall 2018:

Calculus-based study of the basic concepts of electricity and magnetism.
Calculus-based study of the basic concepts of fluids and sound, heat, kinematic theory, and entropy. PHYS 213PHYS 213 General Physics: Fluids and Thermal Physics (2) (GN)(BA) This course meets the Bachelor of Arts degree requirements. Calculus-based introduction to the basic concepts of fluids and sound, heat, kinetic theory, and entropy, including such topics as: fluid mechanics and motion, sound waves: speed, harmonic waves, intensity, temperature and heat, adiabatic expansion, entropy and the Second Law: concept of equilibrium and entropy, heat engines, efficiency of heat engines and refrigerators, introduction to statistical mechanics. This course is designed to provide students with a working knowledge of the elementary physics principles mentioned above, as well as their applications, and to enhance their conceptual understanding of physical laws. Students attend one lecture and one two-hour recitation/lab/activity period per week. Use of a combination of computer-based and traditional lab exercises is expected and collaborative learning exercises will be used in both lab and recitation settings. The introduction of data acquisition and analysis methods (often making use of modern computer tools) will be stressed in the laboratory/activity period. Course evaluation is based on a combination of regular homework sets and/or quizzes, reports from the lab/activity setting, midterm and final exams and other evaluative tools. The course is an important prerequisite for later work in many science and engineering disciplines.

Changes Effective Spring 2019:
- Prerequisite/Corequisite/Concurrent Courses

PHYS 230: Introduction to Relativity (3 Credits)
Old Listing Effective Through Fall 2018:

Introduction to special and general relativity including space-time diagrams and relativistic kinematics, length contraction, time dilation, equivalence principles, curved space and cosmology. PHYS 230

Introduction to Relativity (3) This course is designed for science or engineering students who have successfully completed calculus-based physics courses through electricity and magnetism (PHYS 212), and differential and integral calculus (MATH 140 and 141). Co-requisites of linear algebra (MATH 220) and vector calculus (MATH 230 or 231) are required. This course should provide the student with a mathematical and physical understanding of relativity theory beyond that which one encounters in semi-popular treatments of the subject. The mathematical skills which this course will develop, e.g. tensors and tensor analysis, should be especially useful to students in a wide range of science and engineering fields from computer science to physics and electrical engineering.

Changes Effective Spring 2019:
- Prerequisite/Corequisite/Concurrent Courses

PHYS 250: Introductory Physics I (4 Credits) (BA) (GN)
Old Listing Effective Through Fall 2018:

Selected topics in mechanics, heat, and sound. PHYS 250 Introductory Physics I (4) (GN)(BA) This course meets the Bachelor of Arts degree requirements. Algebra-based introduction to classical mechanics, including such topics as one- and two-dimensional motion, vectors, relative and circular motion, force and dynamics, Newton's laws of motion, work and kinetic energy, potential energy and energy conservation, momentum, rotational motion and angular velocity, static equilibrium and properties of materials, static and moving fluids, vibrations, simple harmonic motion, general properties of waves, sound and human hearing, temperature and kinetic theory, heat and calorimetry, and the basic laws of thermodynamics. This course is designed to provide students with a working knowledge of the elementary physics principles mentioned above, as well as their applications to everyday phenomena and to the life sciences, to enhance their conceptual understanding of physical laws, and to increase their problem solving abilities especially as applied to physical systems. The mathematical prerequisites for this course (and the subsequent PHYS 251) are mathematics at the level of algebra and trigonometry, demonstrated by suitable coursework or demonstration of satisfactory performance on the mathematical proficiency exam. Students attend two lectures, one recitation session, and a two-hour lab/activity per week. Students perform laboratory experiments, discuss their results, and write up their conclusions in weekly lab reports. Course evaluation is based on a combination of homework, quizzes, lab reports, midterm and final exams, and other evaluative tools. The course is a prerequisite for the second semester continuation, PHYS 251.

Changes Effective Spring 2019:
- Prerequisite/Corequisite/Concurrent Courses
- Description
PHYS 251: Introductory Physics II (4 Credits) (BA) (GN)
Old Listing Effective Through Fall 2018:

Selected topics in light, electricity, and magnetism. PHYS 251 Introductory Physics II (4) (GN)(BA) This course meets the Bachelor of Arts degree requirements. Algebra-based introduction to classical electricity and magnetism, optics, and areas of modern physics, including such topics electric charge and fields, electrical potential and energy, electric currents and resistance, direct current (DC) circuits, magnetism, electromagnetic induction and applications to devices, electromagnetic waves, light and geometrical optics, wave nature of light, basic optical instruments (microscopes, telescopes, etc.), basics of quantum mechanics, applications of quantum theory to atoms, molecules, and solids, nuclear physics and radioactivity, applications of nuclear energy and radiation. This course is designed to provide students with a working knowledge of the elementary physics principles mentioned above, as well as their applications to everyday phenomena and to the life sciences, to enhance their conceptual understanding of physical laws, and to increase their problem solving abilities, especially as applied to physical systems. The mathematical prerequisites for this course (and the prerequisite PHYS 250) are mathematics at the level of algebra and trigonometry, demonstrated by suitable course work or demonstration of satisfactory performance on the mathematical proficiency exam. Students attend two lectures, one recitation session, and a two-hour lab/activity per week. Students perform laboratory experiments, discuss their results, and write up their conclusions in weekly lab reports. Course evaluation is based on a combination of homework, quizzes, lab reports, midterm and final exams, and other evaluative tools. The course is a continuation of the first-semester course, the newly renumbered PHYS 250.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

PHYS 400: Intermediate Electricity and Magnetism (3-4 Credits)
Old Listing Effective Through Fall 2018:

Electrostatics and magnetostatics in vacuum; electrical and magnetic properties of matter; electrodynamics, Maxwell's equations, conservation laws, electromagnetic waves and radiation. PHYS 400 Intermediate Electricity and Magnetism I (3-4) A second undergraduate course in electricity and magnetism, required of all physics majors who typically take it in their fifth or sixth semester. The course includes a review of vector calculus, and in-depth discussions of electrostatics, magnetostatics, in vacuum and in matter, time-varying electric and magnetic fields and electrodynamics, leading to Maxwell's equations. Discussions of conservation laws for charge, energy, and momentum, electromagnetic waves (in vacuum and in matter and at boundaries), electromagnetic vector and scalar potentials and fields, and an introduction to radiation are included.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

PHYS 402: Electronics for Scientists (4 Credits)
Old Listing Effective Through Fall 2018:

Circuit and network theory; active devices; amplifiers; introduction to digital electronics; noise theory. PHYS 402 PHYS 402 Electronics for Scientists (4)A junior-senior theory/laboratory course providing a survey of modern electronics from a data acquisition and analysis point of view. One of several possible lab-based courses taken by physics majors in several options to satisfy a lab requirement, typically taken by physics majors in their senior year. This course is very useful for students interested in experimental research work and includes examples such as digital data acquisition, the lab study of various electronic devices, fast Fourier transform methods and other topics.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses
facing, root finding, plotting and data presentation. Physical systems to study can include chaotic pendulum motion, diffusion driven motion, the Ising spin model, and dilute gas molecular dynamics. Students will learn to simulate multiple physical systems, and analyze their simulated data using multiple numerical techniques in order to compare their results to expected theoretical behavior. Students' competency in simulation, analysis and presentation of simulated results will be assessed through independently designed programming projects using learned techniques.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

**PHYS 457: Experimental Physics (1-3 Credits: Maximum of 3 Credits)**

Old Listing Effective Through Fall 2018:

Selected experiments in various fields of physics. PHYS 457 Experimental Physics (1-3) An intermediate laboratory course, required of all Physics majors and taken by other students, typically in their junior/senior years, this course provides an introduction to modern laboratory techniques and instrumentation used in research labs. Typical 'short' experiments include X-ray diffraction, Compton scattering, velocity of light determination, high-temperature superconductors, Raman scattering, Hall effect, scanning tunneling microscopy (STM), and many others, as well as long experiments. This three-credit course also serves as the writing intensive course at the 400-level for most physics majors. One- and two-credit versions of 457 (without the writing-intensive component) are taken by science and education students outside of physics.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

**PHYS 458: Intermediate Optics (4 Credits)**

Old Listing Effective Through Fall 2018:

Geometrical and physical optics: theory of lens systems, aberrations, apertures, interference, diffraction, polarization. PHYS 458 PHYS 458 Intermediate Optics (4) An intermediate optics course which builds on the wave and optics used in the 200-level introductory course, this course (which includes a lab component) focuses on physical and geometrical optics, propagation of light and its interaction with matter, polarization, interference, and diffraction. Optical components such as lenses, mirrors, prisms, fiber optics, spectrometers, and interferometers are discussed and employed. The laboratory component includes a number of 1-2 period experiments designed to illustrate the principles of applied geometrical and physical optics. Longer (5 period) experiments are also included which utilize modern, computer-controlled multi-channel detection systems and are applied to such systems as thin-film optics and the optics of semi-conductors.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

**PHYS 479: Special and General Relativity (3 Credits) (BA)**

Old Listing Effective Through Fall 2018:

Mathematical description, physical concepts, and experimental tests of special and general relativity. MATH (PHYS) 479 Special and General Relativity (3) This course is intended as an elective course (within the undergraduate Physics program) for Physics majors to be taken in their senior year. Intended to be cross-listed with MATH, it can also be used in support of a Mathematics minor and, in some options, within the Math program as a program elective as well. The course significantly expands upon the introduction to Special Relativity (SR) seen in PHYS 237, including discussions of experimental tests of SR and applications to relativistic mechanics. It then introduces students to the mathematical machinery required to understand General Relativity (GR), starting with the description of curved spacetimes and geodesics. It discusses solutions to the Einstein equations and surveys the classic tests which established the validity of General Relativity. It concludes with applications of GR in such areas as black hole physics, the generation and detection of gravitational waves, other topics (such as cosmology, relativistic astrophysics, etc.).

Cross-Listed Courses: MATH 479

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

**PHYS 495: Internship (1-18 Credits: Maximum of 18 Credits)**

Old Listing Effective Through Fall 2018:

Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

**PT 270W: Pathophysiology (3-4 Credits) (WF)**

Old Listing Effective Through Fall 2018:

Introduction medical and post-operative conditions and/or disease states most frequently treated by physical therapy interventions. PT270W Pathophysiology (3) This course is an introduction to the study of diseases and those conditions most often treated by Physical Therapy methods. Basic signs, symptoms, causes, and processes of disease and conditions will be covered. The course is designed to give the PTA student a working knowledge of the physiology of disease states in order to prepare the student to think and speak intelligently with patients and other health professionals regarding diseases and conditions commonly seen in physical therapy and their diagnoses, progression, and treatments. Areas of study in the course may include, but are not limited to, the history of pathophysiology, diagnostic methods, infection and healing, metaplasia, mental health, genetic and congenital disorders, and disorders of the following systems: cardiovascular, respiratory, musculoskeletal, nervous, integumentary, endocrine, blood and lymphatics. The student's knowledge of pathophysiology will be assessed in the course using any or all of the following methods: written examination, student presentations, written term papers, special projects and assignments. This course is a prerequisite for PT 250, PT 260, PT 280, PT 280W, and PT 395E. Prerequisites for this course are a grade of C or better in BIOL 141, BIOL 142 and PT 100 and PT 384 courses. The course is offered once per calendar year at each campus. Expected enrollment is 20-45 students. This is a writing intensive course that will include instructor written evaluation and feedback of student's writing. The student writing will be specific to the Physical Therapy discipline and include multiple and varied assignments. Writing will be a factor in the final grade for this course. Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details, check the specific course syllabus.

PT 280W: Rehabilitation (4-5 Credits) (WF)
Old Listing Effective Through Fall 2018:

This course provides the theoretical basis and clinical practice skills used in the assessment and intervention for patients with neuromuscular, functional, and cognitive impairments. P T 280W Rehabilitation (4) Students will learn and develop skills in the rehabilitation treatment of patients with diseases or conditions frequently seen in physical therapy. Students are expected to be able to recognize normal and abnormal gait patterns of patients diagnosed with the diseases/conditions studied. In the laboratory sessions, students practice mobility skills as they related to the pathologies studied. Students learn to treat patients in the orthopedic and neurological populations. To achieve these objectives, students will be involved in lectures, laboratory activities, audiovisual material, and utilization of information from professional literature. Attainment of educational objectives will be determined via written exams and laboratory practical exams. Basic principles utilized in this course have been learned in P T 100. The anatomical and neurological foundations have been presented in BIOL 129 and P T 270. Instruction of patients in and the performance of rehabilitation activities are a foundation in physical therapy. This is a writing intensive course that will include instructor written evaluation and feedback of student's writing. The student writing will be specific to the Physical Therapy discipline and include multiple and varied assignments. Writing will be a factor in the final grade for this course. Prerequisites for this course are a grade of C or better in BIOL 141, BIOL 142, P T 150, P T 160, P T 270, P T 384, and P T 395. This course is a prerequisite for P T 395F and P T 395G. This course is offered once per calendar year and may be offered in two parts over the course of two semesters. Expected enrollment is 20-45 students, with a limit of 15 students in a given lab section. Class size, frequency of offering, and evaluation methods will vary by location and instructor. For these details, check the specific course syllabus.

SC 401: Basic Science and Disease (1 Credit)
Old Listing Effective Through Fall 2018:

Clinical aspects of various disease and how basic scientific information contributes towards understanding and treating disease. SC 401 Basic Science and Disease (1) The purpose of this course is to provide students with some general background on the symptoms, risk factors, prevention, and treatment of various diseases. Along with the clinical aspects of the diseases, we examine how basic scientific research studies contribute information towards helping to understand the mechanisms underlying disease development and control. This one-credit course is targeted to all students that have a general interest in health and science, and may include students in the following majors: premedicine, science, biology, chemistry, biochemistry and molecular biology, forensic science, biobehavioral health nursing, kinesiology and nutrition. Enrollment priority is given to students with fourth semester or above status. Examples of topics discussed are: Hypertension, Osteoporosis, Infectious Diseases, Asthma, Chronic Obstructive Pulmonary Disease, Cancer, Diabetes, Sickle Cell Anemia, Blood Disorders, Hypercoagulability, Coronary Artery Disease, Alcoholism/Acohol Poisoning, HIV/AIDS, Tuberculosis, Irritable Bowel Syndrome, Hepatitis, Thyroid Disease, Congestive Heart Failure, Parkinson's Disease, and Arthritis This course is structured as a seminar. Most lectures are powerpoint presentations by invited speakers, which usually will be local physicians sometimes paired with Penn State research faculty. The speakers introduce the disease topic by discussing the basic anatomy and physiology of the system or body part most affected by the disease. (e.g. lungs, heart, kidneys, etc.) Once the foundation is established the pathophysiology is discussed. Risk factors and prevention are also highlighted. One important goal of each seminar is to indicate to students how advances in basic science research can impact the understanding and treatment of disease. Students are encouraged to ask questions after the lecture. The speaker(s) remain afterwards to allow students to ask more specific questions about the disease topic. On occasion, speaker physicians also talk about their medical school training and/or life as a practicing physician. The students that enroll in this course receive a letter grade based on attendance (students must attend 9 out of 10 classes), quizzes and a 2-3 page reaction paper on one of the disease topics. Random short-answer quizzes are sometimes administered at the end of a seminar, testing on information presented during the seminar. Also, reading assignments are sometimes given prior to a seminar, or information handout materials are provided during the seminar. If a student needs to miss class due to an evening exam they need to fill out an Excused Absence Form, which can be obtained from the instructor (no other activities are excusable except for athletic competitions for students in varsity sports).

STAT 319: Applied Statistics in Science (3 Credits) (BA)
Old Listing Effective Through Fall 2018:

Statistical inference: principles and methods, estimation and testing hypotheses, regression and correlation analysis, analysis of variance, computer analysis. Students who have passed MATH(STAT) 415 may not schedule this course for credit.

Cross-Listed Courses: MATH 319

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

STAT 380: Data Science Through Statistical Reasoning and Computation (3 Credits)
Old Listing Effective Through Fall 2018:

A case study-based course in the use of computing and statistical reasoning to answer data-intensive questions. STAT 380 Data Science Through Statistical Reasoning and Computation (3) This course addresses the fact that real data are often messy by taking a holistic view of statistical analysis to answer questions of interest. Various case studies will lead students from the computationally intensive process of obtaining and cleaning data, through exploratory techniques, and finally to rudimentary inferential statistics. This process will exploit students’ exposure to introductory statistics as well as the R programming language-hence the required prerequisites-yet novel computing and analytical techniques will also be introduced throughout the course. For the collection of data, students will learn scripting and database querying skills; for their exploration, they will employ R capabilities for graphical and summary statistics; and for their analysis, they will build upon the basic concepts obtained in their introductory statistics course. The varied case studies will elucidate additional statistical topics such as identifying sources of bias and searching for high-dimensional outliers. A possible textbook for this course is Data Science in R: A Case Studies Approach to Computational Reasoning and Problem Solving (2015) by Deborah Nolan and Duncan Temple Lang.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

STAT 415: Introduction to Mathematical Statistics (3 Credits)
Old Listing Effective Through Fall 2018:

A theoretical treatment of statistical inference, including sufficiency, estimation, testing, regression, analysis of variance, and chi-square tests.

Cross-Listed Courses: MATH 415

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

STAT 416: Stochastic Modeling (3 Credits)
Old Listing Effective Through Fall 2018:

Description: Review of distribution models, probability generating functions, transforms, convolutions, Markov chains, equilibrium distributions, Poisson process, birth and death processes, estimation.

Cross-Listed Courses: MATH 416

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

STAT 440: Computational Statistics (3 Credits)
Old Listing Effective Through Fall 2018:

Topics related to computing in statistics, including numerical linear algebra, optimization, simulation, numerical integration, and bootstrapping. STAT 440 Computational Statistics (3)This course introduces many important ideas in statistical computing. Students are expected to possess knowledge of mathematical statistics at the level of STAT 415 and matrices at the level of MATH 220. Students will learn the statistical computing environment called R and use R to implement many of the theoretical computing topics, which include numerical linear algebra, optimization, numerical and Monte Carlo integration, random number generation and simulation, and bootstrapping. Other statistical and mathematical software may be treated briefly, including symbolic mathematics environments like Mathematics and Maple.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

STAT 460: Intermediate Applied Statistics (3 Credits)
Old Listing Effective Through Fall 2018:

Review of hypothesis testing, goodness-of-fit tests, regression, correlation analysis, completely randomized designs, randomized complete block designs, latin squares.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

STAT 461: Analysis of Variance (3 Credits)
Old Listing Effective Through Fall 2018:

Description: Analysis of variance for single and multifactor designs, complete block designs, latin squares.

Changes Effective Spring 2019:

- Prerequisite/Corequisite/Concurrent Courses

STAT 462: Applied Regression Analysis (3 Credits)
Old Listing Effective Through Fall 2018:

Introduction to linear and multiple regression; correlation; choice of models, stepwise regression, nonlinear regression.
Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

STAT 463: Applied Time Series Analysis (3 Credits)
Old Listing Effective Through Fall 2018:

Identification of models for empirical data collected over time; use of models in forecasting. STAT 463 Applied Time Series Analysis (3) This course covers many major topics in time series analysis. Students will learn some theory behind various time series models and apply this theory to multiple examples. An introduction to time series and exploratory data analysis will be followed by a lengthy study of several important models, including autoregressive, moving average, autoregressive moving average (ARMA), autoregression integrated moving average (ARIMA), and seasonal models. For each model methods for parameter estimation, forecasting, and model diagnostics will be covered. Additional topics will include spectral techniques for periodic time series, including power spectra and the Fourier transform, and one or more miscellaneous topics chosen by the instructor, such as forecasting methods, transfer function models, multivariate time series methods, Kalman filtering, and signal extraction and forecasting. The use of statistical software will be a central component of this course, as will the proper interpretation of computer output. Students enrolling for this course are assumed to have taken a semester-long course on regression.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

STAT 464: Applied Nonparametric Statistics (3 Credits)
Old Listing Effective Through Fall 2018:

Tests based on nominal and ordinal data for both related and independent samples. Chi-square tests, correlation.

• Prerequisite/Corequisite/Concurrent Courses

STAT 466: Survey Sampling (3 Credits)
Old Listing Effective Through Fall 2018:

Introduction to design and analysis of sample surveys, including questionnaire design, data collection, sampling methods, and ratio and regression estimation. STAT 466 Survey Sampling (3) This course covers classical sampling design and analysis methods useful for research and management in many fields. Topics include design of questionnaires; methods of data collection; sample-survey designs including simple random sampling, stratified sampling, cluster sampling, and systematic sampling ratio, regression, and difference estimation; two-stage cluster sampling; population size estimation; methods for dealing with nonresponse; and possibly other topics at the discretion of the instructor. Statistical software will be used to apply many of the techniques covered by this course.

Changes Effective Spring 2019:

• Prerequisite/Corequisite/Concurrent Courses

STAT 470: Problem Solving and Communication in Applied Statistics (3 Credits) (WF)
Old Listing Effective Through Fall 2018:

This is a capstone course intended primarily for undergraduate statistics majors in their last semester prior to graduation. The course is designed to reinforce problem solving and communication skills through development of writing ability, interaction with peers and the SCC, statistical consulting center (SCC), and oral presentations. Course objectives are tailored to the needs of each cohort and may include the application of statistical reasoning to real-world problems and case studies, recognition or recommendation of appropriate experimental designs, proficient use of ANOVA & GLMs with understanding of associated modeling assumptions, ability to identify concerns about the use or interpretation of statistical models in context, and both written and verbal communication of statistical findings.

AGBM 101: Economic Principles of Agribusiness Decision Making (3 Credits) (BA) (GS)
Old Listing Effective Through Spring 2019:

Introduction to economic principles and their application to real world examples of agribusiness management issues.

Changes Effective Summer 2019:

• Abbreviated Title
• Description

AGBM 170: Investigating the U.S. Food System: How food moves from field to table (3 Credits) (US)
Old Listing Effective Through Spring 2019:

Our food system is a product of complex interaction of three systems: the natural ecosystem, the managed agricultural system, and the socio-
economic system. Farming, food processing, food distribution, and consumption decisions are all governed by the interaction of these systems. Consequences of these decisions, along with the interactions themselves, have generated a number of overarching scientific and social "hot-button" topics that affect or are affected by the food system: > genetically modified organisms (GMOS), > organic crops and food, > agricultural and food policy, > bio-based energy and biofuels, > environmental implications from agriculture, > food safety, the role of agribusiness, > animal welfare rules and regulations, > food labeling, > diet and health, > agricultural trade and international development, and > food insecurity and food access. Students in this course will investigate and discuss all of these topics by reading both popular press accounts and peer-reviewed academic research, and by hearing guest speakers from a variety of fields and academic disciplines. However, to provide additional relevance, the course will use specific foods or crops to provide a more concrete examination of these topics. For each of these specific foods, the class will explore and answer seven important where, how, and why questions: (i) Where is the crop grown and why? (i) How is it grown, and why is it grown the way it is? (iii) What policies affect production and/or consumption? (iv) How does this food get to consumers? (v) What role do agribusinesses such as food processors and food retailers play? (vi) What role do consumers and consumer groups play? (vii) Are alternative production or marketing systems available? In general, most of these questions will be answered in a social science framework that includes business, economics, and sociology. However, exploring these simple questions will lead to new questions, and the class will have the freedom to explore these questions as deeply as possible. Individual foods or crops examined will include tomatoes, bananas, spinach/lettuce, corn, apples, oranges, poultry/eggs, beef, and pork. These foods or crops represent both fresh and processed foods, as well as both domestically and internationally grown foods. While these foods and crops will be discussed individually, a thorough understanding of the food system will require comparing the answers to the seven questions for multiple foods. Therefore, at least twice during the semester, as understanding builds, the class will pause, and try to evaluate the food system. Finally, when attempting to answer the seven main questions for each of the individual foods and crops, the class will explore the context of current U.S. cultural attitudes and beliefs, and when possible, a cultural history.

**ANSC 100: Introduction to Animal Industries (3 Credits) (GN)**

Old Listing Effective Through Spring 2019:

Students will study the biology, production systems, terminology, and emerging issues of the N. American animal industries. ANSC 100 Introduction to Animal Industries (3) (GN) This course will introduce students to the breadth and scope of animal agriculture in North America with emphasis on food producing animals. Additionally, fiber producing animals, pets, pleasure animals, and alternative livestock will also be studied. Students will be exposed to biological concepts and their relationship to contemporary production systems, economics, terminology and industry issues to enhance understanding of and appreciation for various uses of animals in North America. The course would be available in a web-based format with extensive use of video tours of animal housing facilities, expert interviews, and explanations of the biology behind common production practices and will be offered annually during spring and summer semesters. Student performance will be assessed via unit quizzes, popular press article critiques, and a final paper.

**ANTH 8A: Aztecs, Mayas, and Incas (3 Credits) (IL) (BA) (GS)**

Old Listing Effective Through Spring 2019:

Comparative survey of the development of the pre-Columbian Latin American civilizations. ANTH 8 Aztecs, Mayas, and Incas (3) (GS,IL) (BA) This course meets the Bachelor of Arts degree requirements. ANTH 8 is a general survey of three great New World civilizations the Aztecs and the Maya of Mesoamerica (southern Mexico and northern Central America), and the Incas of the Central Andes of South America. Both the Aztec and the Inka empires were thriving in the 16th century when Europeans arrived, and are known in almost ethnographic detail from oral and written records. Maya civilization matured much earlier —between AD 250-900, and is known primarily through archaeological research, but also through the lens of the New World's only sophisticated writing system. Course information emphasizes the nature of these societies,
analysis and interpretation of their basic institutions, their religions and world views, and their culture histories. Central to the presentation is the degree to which modern Latin American cultures and populations have deep cultural and biological roots in the Precolumbian past, and many ethnographic models are discussed. Within the context of each segment sociological concepts such as “institution”, “household”, “stratification”, “political economy”, “urbanization”, and a host of others are used as organizing features. Issues of gender, ethnicity, and class structure are also discussed. At the end of each semester, time permitting, issues such as the peopling of the Americas, the origins of agriculture, and some of the spectacular pre-Aztec cultures of Mesoamerica are also reviewed. Specific examples of how archaeologists design and carry out research are included, including several in which members of the Anthropology Department have been involved. In addition to lectures, much visual material will be presented, including telecourse programs recently produced under the direction of Anthropology Department faculty. Evaluation will consist of 3-6 museum or web-based writing assignments worth 15-30% of the grade. There will be two mid-term examinations and one final examination worth 70-85% of the grade. Although this is a large course, exams are hand-written and graded, and require a mix of objective and subjective responses. Each exam has an essay component. This course serves as a useful precursor to ANTH 422 (Mesoamerican Ethnography and Archaeology), ANTH 424 (Andean Ethnography and Archaeology), ANTH 456 (Cultural Ecology), and has a companion course on the Old World—ANTH 9—and the two are often taken as a linked pair by students. ANTH 9 is also prepares students for courses in other departments where broad-based comparisons of ancient civilizations or archaeological methods are of concern. This course can fulfill elective credits for anthropology majors and minors. ANTH 8 also may be used to fulfill three credits of General Education in the Social/Behavioral Sciences for the Bachelor of Arts requirement or three credits of Other Cultures in the Social/Behavioral Sciences for the Bachelor of Arts requirement. It can also serve as three credits toward the university requirement for United States and International Cultures Competence.

ANTH 9: Rise of Civilization in the Old World (3 Credits) (IL) (BA) (GS)
Old Listing Effective Through Spring 2019:

Evolution of Old World complex societies, especially the first great civilizations of Mesopotamia, Egypt, China, and the Indus Valley. ANTH 9 Rise of Civilization in the Old World (3) (GS/IL)(BA) This course meets the Bachelor of Arts degree requirements. ANTH 9 is an introductory anthropology course with several major themes and purposes. Most fundamental are the origins and development of the earliest complex human societies – what we conventionally call civilizations – in the Old World, namely those of Mesopotamia, Egypt, the Indus Valley, and China. Course information emphasizes the nature of these societies, analysis and interpretation of their basic institutions, their religions and world views, and their culture histories. Within the context of each segment sociological concepts such as “institution”, “household”, “stratification”, “political economy”, “urbanization”, and a host of others are used as organizing features. Issues of gender, ethnicity, and class structure are also discussed, and much information is presented in weeks 2 and 3 that is pertinent to an understanding of human biological variation and our cultural attitudes toward it, with obvious implications for issues of race. The course is much broader, however, in that it attempts to place the emergence of these ancient civilizations into the overall perspective of the larger evolutionary career of the human species in the Old World, including human biological and cultural evolution during the later stages of the Paleolithic, the origins and spread of early agriculture, etc. During the first part of the course there is also a series of introductory lectures designed to inform students about what archaeology is and how prehistoric archaeologists carry out scientific research to reconstruct and explain what happened in the past. A great deal of emphasis is placed on ideas, concepts, and theories used by anthropological archaeologists to design and interpret their research and to explore not only what happened in the past, but to develop ideas about why things happened as well. Also included are lectures about archaeological finds or issues that have been particularly well publicized and about which students often express considerable curiosity. The main objectives are a) to expose students to a series of historically significant non-modern, non-Western societies and cultures using overtly evolutionary, behavioral, and sociological perspectives; b) to enlighten students concerning the kinds of extant information are available for these societies, how research is designed to acquire new data, and how scholar’s interpret these data, and c) to stress the nature of the agrarian human condition out of which modern societies so recently emerged, and under which people in many developing societies still live. Central to the latter are issues of subsistence agriculture and human demography. Central to ANTH 9 are comparisons among several great Old World civilizations, comparisons with other world civilizations and cultures, and comparisons with modern society. Also inherent in the course are extensive discussions of geographic and ecological variation and human adaptation to both. The very deep time depth exposes students to societies very different from our own, including social and cultural forms that have no direct analogs in the modern world. A final intent is to make students understand basic concepts such as biological and cultural evolution, as well as a host of more restricted ones, such as “institution”, “household”, “stratification”, “political economy”, “urbanization”, and a host of others that are all used to organize presentations. Issues of gender, ethnicity, and class structure are also discussed. Evaluation will consist of 3-6 museum or web-based writing assignments worth 15-30% of the grade. There will be two mid-term examinations and one final examination worth 70-85% of the grade. Although this is a large course, exams are hand-written and graded, and require a mix of objective and subjective responses. Each exam has an essay component. This course parallels ANTH 8, its New World counterpart. It serves as a useful precursor to ANTH 456 (Cultural Ecology), and also for courses in other departments where broad-based comparisons of ancient civilizations or archaeological methods are of concern, or where (as in CAMS) more specialized courses in Egyptian archaeology, etc., are offered.

- Number to 9N
- Description
- Add B.A. Humanities Designation
- Add General Education Designations GH and Inter-Domain

ANTH 21: Introductory Biological Anthropology (3 Credits) (GN) (BA)
Old Listing Effective Through Spring 2019:

The role of human biology and evolution in culture, society, and behavior. ANTH 21 Introductory Biological Anthropology (3) (GN)(BA) This course meets the Bachelor of Arts degree requirements. *Introduction to
Biological Anthropology” is designed to present to the student the basic principles and findings of human population biology. To that end, the instructors review data on biological variability among contemporary human populations and among the extensive fossils that document human evolution. Comparison between human and nonhuman animals, particularly, the surviving nonhuman primates, provides an essential “Zoological Perspective” by which we can understand the origins and evolution of humankind on this planet. The single unifying concept in biological anthropology is evolution. In this course, the student will be introduced to the mechanisms underlying evolution and their application to past and present human populations. Evolutionary biology emphasizes the similarity between closely related forms, for example, chimpanzees and humans share more traits in common than do dogs and humans, because they have a more recent common ancestor. It also underscores the diversity among individuals in a population, for example, despite being members of the same species, all humans are biologically unique. The process of evolution accounts for both the similarities and the differences within and between populations. It is therefore the theory of evolution that will organize the diverse content of this course. There are two lectures per week. In addition, there is a weekly practicum class where the student explores material presented in lectures as well as learns new information. Exercises and hands-on demonstrations help the student understand the principles and findings of biological anthropology. Brief written practicum exercises often based on team projects foster interactive learning. Grades are based on three examinations and practicum exercises. This course is one of three core-courses required of majors and minors in the Department of Anthropology. The course can be used to fulfill three credits of General Education in the Natural Sciences. Students can expect to acquire a general introduction to the University as an open community of researchers and scholars who attempt to describe accurately, and hence understand, “The Human Condition.” Students in this class will therefore have the opportunity to explore their responsibilities as members of an intellectual community of free inquiry. This course offers the student the opportunity to develop intellectual relationships with faculty, graduate students and fellow classmates who share similar academic interests in biological anthropology and related fields of inquiry.

Changes Effective Summer 2019:

- Description

ANTH 22: Humans as Primates (3 Credits) (GN)
Old Listing Effective Through Spring 2019:

The biological basis of human behavior within the context of primate biology, behavior, and evolution. ANTH 22 Humans as Primates (3) (GN) Humans as Primates is intended to introduce the student to the biological bases of human anatomy and behavior by drawing comparisons to the behavior and biology of our closest living relatives, the non-human primates. The principal goal of the course is to critically evaluate arguments concerning what uniquely makes us human and the role of genetics, environment, and evolutionary history on the development of human behavior and anatomy. The course will draw heavily on studies of living non-human primates as well as evolutionary theory, paleontology, and psychology to addresses issues such as human growth and development, diet, human variation, communication, intelligence, reproduction, aggression, and culture. Humans as Primates is divided into four main thematic units each designed to present a set of related lessons exploring the role of biology in various aspects of human life. The first unit provides the foundation for the course by introducing the place of humans in the natural world. This unit presents a survey of living primates and their relationship to humans as well as an overview of evolutionary processes and human evolution. The other units present topics in human biology, communication, and social behavior focusing specifically on topics of importance to current events and aspects of popular culture and modern life. This course should be of significant interest to students in a diversity of disciplines including the biological and social sciences as well as anyone interested in human behavior. The course will rely on readings from the scientific and popular literature and will present information using a variety of formats including images, movies, and interactive activities. Students will be evaluated with a combination of frequent online quizzes, individual assignments, participation in online discussions. The course can be used to fulfill three credits of General Education in the Natural Sciences. As such this course will help students understand how scientific information from a variety of disciplines can be used to investigate and understand human biology and behavior. The course will introduce the student to methods of data collection and analysis, foster critical thinking skills, and provide a rich background for understanding human diversity, human biology, and behavior. Students will have the opportunity to synthesize information from a broad range of disciplines to develop a fuller understanding of the biological basis of human behavior.

ANTH 45U: Cultural Anthropology (3 Credits) (H) (US) (IL) (GS) (BA)
Old Listing Effective Through Spring 2019:

Beginnings of human culture; economic life, society, government, religion, and art among traditional peoples. ANTH 45U Cultural Anthropology (3) (GS;US;IL) (H) Cultural anthropology is the study of human cultural variation across time and space. This course will be a survey of basic issues, concepts and methods in cultural anthropology. We will consider specific issues such as: the organization of production and distribution; consumption patterns; age and gender relations, family organization, belief systems, social inequality; and cultural change. Throughout, we will be evaluating different approaches to understanding cultural diversity and we will make cross-cultural comparisons to understand cultural behaviors. We will draw examples from around the world to broaden our understanding of cultural experiences and adaptations in different contexts. This honors course will include external case studies and audio-visual materials to complement the readings. Compared to regular introductory anthropology courses, the size of this honors course will allow more opportunities for the students to engage in classroom discussions.

ARTH 130: Art of Africa, Oceania, and the Americas (3 Credits) (US) (IL) (BA) (GA)
Old Listing Effective Through Spring 2019:

A selective overview of the indigenous art of Africa, Oceania, and the Americas. ART H 130 ART H 130 African, Oceanic, and Native American Art (3) (GA; US; IL)(BA) This course meets the Bachelor of Arts degree requirements. Art History 130 provides a selective introduction to major developments and issues in African and Oceanic art. The beginning of this course will concentrate upon the art and architecture of selected regions of Africa, during the pre-colonial, colonial, and post-colonial periods. This will be followed by a discussion of the traditional arts of Oceania in Polynesia, Micronesia, Melanesia, and Australia. The course will conclude with an introduction to the Pre-Columbian art and architecture of the Americas and art from the Eastern Woodlands, Great Plains, the Southwest and Pacific Northwest of North America. Art will be examined within its cultural and social contexts. Special attention will be given to the role that art serves in a culture's religion, rituals, ceremonies, political structure, gender roles, and ethnic identity. The impact of the West upon the art of these regions, both in colonial and post-colonial contexts, will be a reoccurring issue in this course. The actual time devoted to each topic and the sequence of topics will vary from instructor to instructor. The objective of the course is to introduce students to diversity in art. In so doing, negative stereotypes associated with traditional notions of the "primitive" will be challenged. Also, the course emphasizes visual analysis and critical thinking. The course requirements will consist of exams and a paper. As a general education course, this class provides an introduction to African and Oceanic art for students of any major. The course has no prerequisites, and presumes no prior exposure to art history. On the other hand, students majoring in Art History will learn vocabulary, methodology, and theory that is not only basic to the field, but which will also broaden their knowledge of the discipline as a whole.

• Description

ASIA 120: South Asia: A Literary History (3 Credits) (WF) (IL) (BA) (GH)
Old Listing Effective Through Spring 2019:

The course traces the cultural history of South Asia by studying its literary tradition from ancient to modern times. ASIA 120Y South Asia: A Literary History (3) (GH; IL)(BA) This course meets the Bachelor of Arts degree requirements. Asian 120Y provides undergraduate students a taste of the inherent pluralism of South Asian culture and the readings emphasizing the broad idea of plurality. The readings and discussions may include, but not necessarily remain confined to a) architectural b) literacy c) musical etc. traditions, depending on the research interests of the individual faculty members teaching the course. Asian Studies undergraduates should be able to recognize both the richness of diversity, as well as the nature of the continuity of the cultural tradition in South Asia that has fascinated outsiders for centuries.

BA 100: Introduction to Business (3 Credits) (GS)
Old Listing Effective Through Spring 2019:

A comprehensive view of the contemporary environment of business. B A 100 Introduction to Business (3) (GS) This course provides a broad overview of the study of business and its environment, organization, operation, and interrelationships with government and society. Topic areas include: economic systems, forms of business ownership, information, accounting, finance, management, and marketing principles, legal and regulatory environments, business ethics and international business. A student majoring in business will develop a broad basis for further study in a specific area in business, while other majors will
become familiar with the American enterprise system and the functions and issues facing business today.

**CAMS 1: Greek and Roman Literature (3 Credits) (BA) (GH)**

Old Listing Effective Through Spring 2019:

Selected readings within a chronological and thematic context of significant and influential masterworks of Greece and Rome. CAMS 001 Greek and Roman Literature (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course provides an introduction to the most important literary genres of Greek and Roman literature, which form the basis for Western literature. Content and emphasis may vary each time the course is offered, depending on whether the syllabus concentrates on Greek literature, Roman literature, or a combination of the two. Typically the course surveys Greek or Roman literature or examines a general topic in greater depth such as "Homer and the Tragic Vision," "Greek and Roman Drama," "Greek and Roman Epic," "Greek and Roman Prose," or "Love in Roman Literature." The course's primary objective is to promote an understanding of major literary themes and rhetorical conventions, especially within ancient Mediterranean contexts (literary, social, or historical). Students will learn how to read texts critically, by gathering information and developing methods of interpretation. They will become familiar with the different cultural assumptions that underpin ancient Greece and Rome. And they will be asked to demonstrate their newly acquired understanding of Greek and Roman literature through a variety of exercises, which aim to develop their skills in writing and speaking. Evaluation methods may take the form of periodic quizzing or testing, with an emphasis on writing coherent short paragraph answers and longer essays; additionally, students may be evaluated through oral presentations, classroom discussion or participation, the writing of short to medium length papers (1-7 pp.), and group projects that aim at collaborative learning. CAMS 001 is an introductory course that may be credited toward every Classics and Ancient Mediterranean Studies major, option, and minor. CAMS 001 is also a General Education course in the Humanities (GH).

**CAMS 102: Canaan and Israel in Antiquity (3 Credits) (IL) (BA) (GH)**

Old Listing Effective Through Spring 2019:

Political, social, and intellectual history of the land of Canaan/Israel in the Biblical era: Late Bronze and Iron Ages. CAMS (HIST/J ST/RL ST) 102 Canaan and Israel in Antiquity (3) (GH;IL)(BA) This course meets the Bachelor of Arts degree requirements. From the domestication of animals and the dawn of agriculture to the development and socialization of monotheism, the world of the first civilizations led to that of the Bible and ancient Israel. This course, involving a critical view of Biblical texts in light of other ancient sources, archaeology and historical methods, explains the nature and the evolution of society, religion and thought in the Biblical era. Learn how civilization arose, and how the state appropriated religion and applied it for its purposes. How the science of administration developed and deployed ideological tools to further its own ideas of the West developed. This course is deeply subversive, particularly of religious and academic shibboleths. The only authority in this class is that of the most persuasive reader, and doctrines, whether religious or political, will have to be checked at the door. An example of evaluation may be: weekly participation in discussion; mid-term and final essay examinations involving a critical evaluation of ancient text's claims in combination with archaeological evidence; a research essay, where the class or section size is lower than 30; an ability to read critically, bringing
different classes of evidence to bear on issues arising from the texts, and construct coherent and compelling arguments to a particular thesis. The course provides a Near Eastern counterpart to HIST 100, 402 and a Near Eastern aspect to the Jewish Studies major. It complements RL ST 110, by offering historical exploration of the culture under study in that course. Related courses include ANTH 012, HEBR, 010, ENGL 104, RL ST 004, and RL ST 111. The course helps round out the majors in History and Jewish Studies, particularly in ancient history. It also extends the program in Religious Studies (history of religions), and it contributes to the ancient stream of the prospective program in Jewish Studies and History.

CAMS 120: New Testament (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Introduction to the history, literature, and religion of early Christianity in the Jewish-Hellenistic setting. CAMS 120CAMs (J ST/RL ST) 120 New Testament (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course introduces the student to the New Testament (NT), the principal religious text of Christians. As such, it is one of the most significant and most studio texts in human history. Written in Greek between approximately 55 C.E. and 110 C-E the New Testament consists of 27 individual books, each written by a separate author (authors), that were later assembled into the “New Testament.” Because of the growth of Christianity, the NT has influenced every aspect of our world-to-name only a few: history, politics, economics, literature, philosophy, ethics, medicine, science, the arts (music, architecture, the visual arts), gender roles, theater and drama, law, psychology, and sociology. After introducing the student to the academic study of religion and the “historical-critical method,” our study begins by examining the materials from which the NT’s text is reconstructed, and the period in which the NT was authored. This includes exploring other parallel phenomena (such as miraculous hearings, resurrections, and virgin births) in contemporaneous Graeco-Roman religions. After this background is in place, the course turns to an examination of the gospels and their interrelationships, the pictures of Jesus presented (and their relationship to first-century B.C.E. Judaism), variations among Christian understandings of Jesus reflected in the NT and other contemporaneous Christian writings (he was a man, an angel, a lesser divinity), Paul and his life and writings, and the emergence of Christianity from Judaism as a distinct, apocalyptic religion.

Along the way, we examine the manuscript tradition of the NT, changes that have been made to its text, and different interpretations of certain passages in the NT. We also examine the historical-critical tools scholars use to date and sequence passages in the NT (form, redaction, literary, and historical criticism, for example), for one can correlate the evolution of early Christian theology with the evolution of the NT’s text.

CAMS 121: Jesus the Jew (3 Credits) (IL) (BA) (GH)
Old Listing Effective Through Spring 2019:

A historical critical examination of the life of Jesus of Nazareth within the context of first century Palestinian Judaism. CAMS 121 (J ST 112/RL ST 121) Jesus the Jew (3) (GH;IL)(BA) This course meets the Bachelor of Arts degree requirements. This course offers a historical and critical examination of the life of Jesus within the context of first century Palestinian Judaism. Major emphases will include the historical, social, religious, political, and cultural contexts of Jesus’s emergence, including important precursors and Jesus’s biography; the political, institutional, and cultural history of Jesus’s teachings in the aftermath of his death, with attention paid to variant or alternative traditions and to the mechanisms of normalization; the emergence and history of the early church; and critical analysis of key areas of differentiation between Jesus’s teachings and dominant forms of religious practice at the time. Attention will also be paid to how contemporary religious traditions today imagine Jesus.

CAMS 122: Apocalypse and Beyond (3 Credits) (IL) (BA) (GH)
Old Listing Effective Through Spring 2019:

This course surveys apocalyptic literature and apocalyptic movements from the ancient Near East to the modern world. CAMS (J ST/RL ST) 122 Apocalypse and Beyond (3) (GH;IL)(BA) This course meets the Bachelor of Arts degree requirements. This course offers a scholarly survey of apocalyptic literature and apocalyptic imagination about the end of the world, from its beginnings in the ancient Near East and the Bible to some examples from the modern world. The course will cover three areas: 1) the ancient literary genre of apocalypse in the Near East; 2) apocalyptic writings in the Jewish and Christian traditions (especially the books of Daniel and Revelation in the Bible, and the Qumran Dead Sea Scrolls), as well as within Islam, which generated Western apocalyptic thinking throughout the ages; and 3) some historical examples and discussion of the sociological underpinnings of apocalyptic groups in the medieval to modern periods. Additional attention will be paid to the impact that apocalyptic worldviews have had on the secular world, especially in the fine arts and cinema.

CAS 272: Political Communication and Technology (3 Credits) (GH)
Old Listing Effective Through Spring 2019:

This course examines how interactive communication technologies reshape political rhetoric, discursive civic culture, deliberation, and participatory democracy. CAS 272 Political Communication and Technology(3)(GH) This course examines how interactive communication technologies reshape political rhetoric, discursive civic culture, deliberation in the online public sphere, and participatory democracy. It traces the evolution of the public sphere and explores theoretical and empirical issues related to online political discourse (blogs, political discussion fora, viral politics of social networking sites), cyberactivism, smart mobs, networked publics, and peer-to-peer production (You Tube, Wikis). CAS 272 concentrates on online rhetorical and discursive strategies of candidates for public office, and individuals and organizations campaigning on specific issues and causes. It emphasizes civic engagement and includes topical areas such as mechanisms of online public spheres, citizen generated discourse and content, viral politics, connections between social networking sites
and political discourse, and behaviors such as networked activism. It examines how various interactive communication options have affected political discourse, campaign communications and public deliberation. It provides students with hands-on experiences in analyzing the rhetorical and persuasive strategies involved in creating video content, writing blogs, creating wikis and twitter messages. It teaches students how they could use these communication options in working for political campaigns, civic action groups and non-profit institutions. The goal of the course is to help students understand the opportunities and constraints involved in using interactive communication technologies for civic and political actions, and facilitate their development as informed citizens. Class activities focus on identification and critique of rhetorical strategies employed when using interactive communication technologies, and learning to create content such as weblogs, wikis, and mashups. Students will be graded on exams, participation in discussion groups, analyzing and connecting course concepts to real world examples, creating content such as mashups, and analysis of rhetorical strategies of political candidates and activist groups. CAS 272 is highly recommended to students interested in examining the potential of interactive communication technologies for civic and political action.

CHEM 213: Laboratory in Organic Chemistry (2 Credits)
Old Listing Effective Through Spring 2019:
Basic laboratory operations; synthesis and chemical or instrumental analysis. Because of duplication of subject matter, students may not receive credit for both CHEM 203 and CHEM 213. CHEM 213 Laboratory Organic Chemistry (1-2) A strong foundation in organic laboratory skills is provided by this laboratory course. Laboratory work includes learning the basic techniques and recrystallization/melting point determination, distillation, liquid/liquid extraction, thin layer chromatography and column chromatography. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are often provided with hands-on access to instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as IR, NMR, UV/V is spectroscopy, mass spectrometry, polarimetry, HPLC, GC and GC-MS. Chemistry 210 is a prerequisite and CHEM 212 may* a co-requisite for this course, because they provide the theoretical background for the reaction chemistry as well as the spectroscopic characterization of organic molecules. *Note: The number of credits and meeting times vary from location to location. Some locations offer CHEM 213 as two one-credit courses to be taken in sequential semesters, whereas other locations offer CHEM 213 as a single-semester two-credit course. Normally, the latter format involves two 3-hour labs per week in addition to extensive written work outside of the laboratory. The prerequisite / concurrent requirement for CHEM 212 does not apply when CHEM 213 is taken as a 1 credit course.

Prerequisite: CHEM 210. Prerequisite or concurrent: CHEM 212

Changes Effective Summer 2019:

CHNS 121: Chinese Film and New Media (3 Credits) (IL) (BA) (GH)
Old Listing Effective Through Spring 2019:
Survey of Chinese film and new media in the twentieth century and beyond, with attention to changing cultural settings. Taught in English. CHNS 121 Chinese Film and New Media (3) (GH;IL) (BA) This course meets the Bachelor of Arts degree requirements. This is intended to provide an introduction to modern and cutting-edge forms of cultural production in the Chinese-speaking world from the twentieth century to the present day. Prior study of China is not required and materials will be available in English. Students will learn about major technologies and forms of media, including film, TV, and various forms of new media (cell-phone novels, blogs, MMOGs, IM, and Web 2.0 for instance). Readings and screenings will cover several artistic modes including formalism, historiography, documentary, period drama, and experimental works. The course, or individual units within the course, will be structured so that students develop an historical perspective, allowing them to understand the cultural contexts that have inspired the creative works under study. By examining Chinese-language film and new media with attention to changing cultural settings, students will investigate such topics as the relation between social institutions and the individual, the formation and expression of identity, changing gender roles and family structures, the impact of technological and economic trends on social structure, and changing climates of censorship and freedom of expression. In addition, students will learn to think critically about various media’s techniques and aesthetics of representation, and will become more engaged, critical spectators of film and related media. Class work includes some lecture but emphasizes guided discussions, group work, writing exercises, and some student presentations. This participatory approach is intended to
deepen students’ appreciation of the works, to help them understand value systems that may differ from those predominant in western cultures, and to assist students in developing both analytical and expressive abilities. Through critical reading, group discussion and interpretive writing, students will hone skills for evaluating modes of cultural production and consumption in the Chinese-speaking world. Evaluation will be through means such as in-class presentations, short writing assignments, midterms or quizzes, one analytic paper (3-7 pages), and in-class/on-line participation and discussion. The course is designed to be suitable for all students generally interested in China, or interested in various fields of humanistic study, whether or not they have previously studied Chinese culture. It is designed to count as General Education and as a B.A.

CI 280: Introduction to Teaching English Language Learners (3 Credits) (GH)
Old Listing Effective Through Spring 2019:

Introduction to language, culture, instruction, assessment, and professionalism as they relate to teaching English Language Learners in U.S. schools. CI 280 Introduction to Teaching English Language Learners (3) (GH) CI 280 focuses on the development of foundational knowledge to successfully assist English language learners in U.S. school contexts. The basic premise of the course is that teachers play an important role in creating a positive classroom learning environment and bringing school success for English language learners. This course is designed to develop essential dispositions, skills, and knowledge for teacher education students to fulfill their important role. Course objectives are to understand culture, language, learning contexts, and pedagogy. Culture focuses on a) sociocultural characteristics of English language learners, b) how English language learners’ cultural communication and learning styles affect the learning process, c) how English language learners’ cultural values affect their academic achievement and language development, d) negative effect of cultural bias in instruction, materials and assessments, and e) the importance of developing cross-cultural competence in interactions with colleagues, administrators, school and community specialists, students and their families.

CMPEH 472: Microprocessors (4 Credits)
Old Listing Effective Through Spring 2019:

Principles of microprocessors, hardware architecture, assembly language, programming, interfacing, and applications of microprocessors will be studied. CMPEH 472 Microprocessors (4) This course is designed to provide students with strong foundation in microprocessor programming and hardware interfacing both in the classroom and laboratory settings. This course is a required course in the Electrical Engineering BS curriculum and is intended to be taken by students who have completed their digital systems and first electronics course requirements. As such, the course integrates materials from the above undergraduate electrical courses in addition to related math, engineering, and science courses.

Changes Effective Summer 2019:
- Prerequisite/Corequisite/Concurrent Courses

CMPEN 270: Digital Design: Theory and Practice (4 Credits)
Old Listing Effective Through Spring 2019:

Description: Introduction to digital systems and their design. Topics include combinational and sequential devices and circuits, modern design tools and design practices. Students may take only one course for credit for CMPEN 270 or 271 and CMPEN 270 or 275. CMPEN 270 Digital Design: Theory and Practice (4) CMPEN 270 is a first course in digital systems and digital system's design. It lays the groundwork for many later courses in computer organization and architecture and switching theory. The course includes both a lecture component to introduce important concepts, principles, methodologies and theories and a laboratory component in which the lecture material can be applied and practiced. The course introduces the theoretical foundation for digital systems including number systems, a variety of commonly used codes and Boolean algebra. Combinational devices, logic gates, and sequential devices, latches and flip-flops are introduced along with design techniques, methods and tools. Design criteria and objectives are considered and design trade-offs are examined. Higher level design elements are also examined such as decoders, multiplexers, counters, and registers, and their use in system design. Students are exposed to a variety of design tools and implementation techniques, including schematic capture tools, simulation tools, Hardware Description Languages (HDL) and HDL design tools. Laboratory work includes the design, construction and debugging of a variety of digital circuits, and the use of standard laboratory tools such as the oscilloscope and logic analyzer, and various software design tools.

CMPSC 430: Database Design (3 Credits)
Old Listing Effective Through Spring 2019:

Relational database model, query languages, integrity, reliability, normal forms for design.

CMPSC 430CMPSC 430 Database Design I (3) The main goal of this course is to explore the relational database model, with special emphasis on the design and querying of relational databases. Secondary goals include exploration of the mathematical basis for relational databases and exploration of the relationship of database to the rest of computer science. Study of these topics should improve student skills in programming, modeling the structure of data and using and administering databases. Grades will be based on midterm and final exams totaling 250 points, and 10 - 12 homework assignments totaling approximately 200 points. Grades will be based directly on percentage of the total points received from those listed. This course is an elective for students in the BS COMP program and is required for admission into the MS COMP program. The course builds on concepts learned in earlier programming, data structure and discrete mathematics courses. No special facilities are required for this course. This course will be offered once per year, with an expected enrollment of 60 - 70 students.

CSD 100: Preventing Vocal Abuse, Misuse, and Disorders (3 Credits)

Old Listing Effective Through Spring 2019:

Principles of the voice mechanisms, preventing vocal abuse, and
promoting vocal health across the life span. CSD 100 Preventing Vocal
Abuse, Misuse, and Disorders (3)(GHA;US) CSD 100, Preventing Vocal
Abuse, Misuse, and Disorders is a 3 credit course intended to be the first
course for all University students exploring communication sciences
and disorders as a possible major, and students interested in learning
specifically about vocal hygiene, voice use, vocal abuse and voice
disorders. Principles of the voice mechanisms, preventing vocal abuse,
and promoting vocal health across the life span are core principles of
the course. The focus of this course is on preventing voice disorders
and promoting activities that contribute to healthy vocal habits across
the life span. The course is designed to integrate theoretical knowledge,
practice-based, and measurement-focused activities to assist learners
in understanding, achieving, maintaining, and promoting a lifetime
of healthy vocal activities. Learning activities include: mini-lectures,
power point presentations, information/research gathered via library
and Internet resources and specialized computer instrumentation for
analyzing voice qualities. The educational objectives of the course are
to: 1) develop a basic understanding of the normal and disordered vocal
mechanism; 2) understand the need for maintaining and promoting
lifetime wellness in your vocal activities and habits for any occupational
choice; 3) learn about the prevention of vocal disorders across the
life span from vocal nodules to laryngeal cancer; 4) understand the
subjective and objective measures of vocal qualities to assist in changing
and altering vocal abuses and misuses while improving and enhancing
good vocal habits, and 5) developing an understanding of how vocal
behaviors influence social behaviors, employment, and quality of life.
The course includes an overview of the anatomy and physiology of the
respiratory and vocal mechanisms, physics of voice production,
development of vocal abuses and resulting pathologies, disorders
including vocal growths, paralysis, voice disorders associated with cleft
lip and cleft palate, syndromes, neurodegenerative disorders, aging
and head and neck cancer. Students are required to complete readings
from web-based texts, internet sites (e.g. NIH, National Voice Academy,
American Speech-Language Hearing Association, National Cancer
Institute), multiple choice and true false tests and one written research-
topractice assignment.

ECON 102: Introductory Microeconomic Analysis and Policy (3 Credits) (BA) (GS)
Old Listing Effective Through Spring 2019:

Methods of economic analysis and their use; price determination; theory of the firm; distribution. ECON 102 Introductory Microeconomic Analysis and Policy (3)(GS)(BA) This course meets the Bachelor of Arts degree requirements. Economics is the study of how people satisfy their wants in the face of limited resources. One way to think about economics is that it is a consistent set of methods and tools that is valuable in analyzing certain types of problems related to decision-making, resource allocation, and the production and distribution of goods and services. There are two main branches of economics, microeconomics, and macroeconomics. Microeconomics deals with the behavior of individual households and firms and how government influences that behavior; it is the subject of this course. More specifically, ECON 102 is an introduction to microeconomic analysis and policy. The principal objective of the course is to enable students to analyze major microeconomic issues clearly and critically. Students will be introduced to the methods and tools of economic analysis, and these analytical tools will be applied to questions of current policy interest. Learning these methods and tools and applying them to interesting policy questions and issues is sometimes called “thinking like an economist.” An important goal of this course is to take each student as far down the road of “thinking like an economist” as possible. A variety of mechanisms are used to assess student performance. These evaluation methods typically include exams, quizzes, homework assignments, and group projects. ECON 102 is an introductory course in economics and as such, serves as a prerequisite for several microeconomics-oriented 300-level courses. It is also a required course for all majors and minors in economics, and meets requirements for a General Education (GS) or Bachelor of Arts social science course.

Changes Effective Summer 2019:

• Abbreviated Title
• Description

ECON 104: Introductory Macroeconomic Analysis and Policy (3 Credits) (BA) (GS)
Old Listing Effective Through Spring 2019:

National income measurement; aggregate economic models; money and income, policy problems. ECON 104 Introductory Macroeconomic Analysis and Policy (3)(GS)(BA) This course meets the Bachelor of Arts degree requirements. Economics is the study of how people satisfy their wants in the face of limited resources. One way to think about economics is that it is a consistent set of methods and tools that is valuable in analyzing certain types of problems related to decision-making, resource allocation, and the production and distribution of goods and services. There are two main branches of economics, microeconomics, and macroeconomics. Microeconomics deals with the behavior of individual households and firms and how that behavior is influenced by government.

Macroeconomics is concerned with economy-wide factors such as inflation, unemployment, and overall economic growth; it is the subject of this course. More specifically, ECON 104 is an introduction to macroeconomic analysis and policy. The principal objective of the course is to enable students to analyze major macroeconomic issues clearly and critically. Students will be introduced to the methods and tools of economic analysis, and these analytical tools will be applied to questions of current policy interest. Broadly, the course focuses on the determination of national income, on unemployment, inflation, and economic growth in the context of a global economy, and on how monetary and fiscal policy, in particular, influence the economy. Learning the methods and tools of economics and applying them to interesting policy questions and issues is sometimes called “thinking like an economist.” An important goal of this course is to take each student as far down the road of “thinking like an economist” as possible. A variety of methods is used to assess student performance. These evaluation methods typically include exams, quizzes, homework assignments, and group projects. ECON 104 is an introductory course in economics, and as such, serves as a prerequisite for 300-level courses in intermediate macroeconomic analysis, international economics, and money and banking. It is also a required course for all majors and minors in economics, and meets requirements for a General Education or Bachelor of Arts Social Science (GS) course.

EET 311: Alternating Current Circuits (4 Credits)
Old Listing Effective Through Spring 2019:

Circuit analysis including controlled sources, op amps, and ideal transformers, and calculus relationships; one/two port networks; three-phase and industrial loads. EET 311 Alternating Current Circuits (4)E E T 311 is intended to provide competency in analysis of circuits and application of basic electrical principles including equivalent circuits and models, power and energy, and signal/energy transfer. The course will introduce ideal amplifier models, ideal op-amps and ideal transformers as circuit elements and one-port networks (Thevenin, Norton, and driving point impedance), and two-port networks (Z, Y, H, G, T, and T/I) as equivalent circuits. Since this is the first required course taken by all upper division electrical engineering technology students, ethics and professionalism will be discussed by and expected of the students. Grades will be based on four or five exams including a final exam (65%), laboratory work (20%), computer projects requiring the use of circuit simulation software, spreadsheets, and math packages (10%), and student professionalism (5%). The IEEE code of ethics and the Penn State policy on academic integrity will be applied in the instructors judgment of student professionalism. This course requires calculus through integral and differential calculus of transcendental functions. It provides the circuit analysis skills required in almost every other E E T course and is a specific prerequisite for analysis of signals and systems (E E T 312) and understanding semiconductor models and electronic circuits (E E T 330).

Changes Effective Summer 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

EET 312: Electric Transients (4 Credits)
Old Listing Effective Through Spring 2019:

Applied differential equations; in-depth study of transient electricity using Laplace, Fourier transforms, and state-space methods; Bode plots and application. EET 312 Electric Transients (4) This course is designed to provide students with a strong foundation in transient circuit analysis in addition to introduction to signals and systems. The primary objective of the course is to reinforce continuous-time system fundamentals in order to prepare the students for more advanced work in a broad range of areas including communications, control, signal processing and image processing. The topics covered in this course include: 1. Applied differential equations. 2. Transient analysis of RC, RL, and RLC circuits, using differential equations. 3. Complex frequency. 4. Network functions. 5. Bode plots and frequency response. 6. Filter networks and resonant circuits. 7. Laplace transform pairs, and their applications in circuit analysis. 8. Fourier analysis techniques; Fourier series, transform pairs, and their applications in circuit analysis. 9. State-variable circuit analysis. This course is a required course in the Electrical Engineering Technology BS curriculum and is intended to be taken by students who have completed their first circuits course requirements. As such, the course integrates materials from the above undergraduate course in addition to related math, engineering technology, and science courses.

Changes Effective Summer 2019:

• Prerequisite/Corequisite/Concurrent Courses

EET 409: Power System Analysis I (4 Credits)
Old Listing Effective Through Spring 2019:

Analysis and applications study of power utility electrical equipment such as: synchronous machines, transformers, capacitors and transmission lines.

Changes Effective Summer 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

EET 410: Power System Analysis II (4 Credits)
Old Listing Effective Through Spring 2019:

Principles of load studies, fault analysis, stability and protection of the public electrical power system.

Changes Effective Summer 2019:

• Prerequisite/Corequisite/Concurrent Courses
• Description

EET 413: Optoelectronics (4 Credits)
Old Listing Effective Through Spring 2019:
Principles and applications of optoelectronics including sources, detectors, imagers, transmitters, fiber optics, systems and integrated optics.

Changes Effective Summer 2019:

ENGL 2: The Great Traditions in English Literature (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Major works of fiction, drama, and poetry from the Middle Ages to the twentieth century expressing enduring issues and values. ENGL 002 The Great Traditions in English Literature (3)(GH)(BA) This course meets the Bachelor of Arts degree requirements. Students are expected to learn fundamental skills of close textual analysis in the context of established literary texts of English and Irish fiction, drama, and poetry from the Middle Ages to the twentieth century that address large questions of ethical and social value. They are also expected to learn to talk and write clearly about the issues and ideas generated by the texts that they are directed to read. ENGL 002 will fulfill the writing component of the Active Learning Elements by requiring a minimum of three writing assignments. These assignments will be drawn from the following kinds of writing: essay, essay exam, or a semester-long reading journal. ENGL 002 will require all students to confront the major interpretive problems found in their assigned readings and to participate actively in the various forms of critical thinking required to comprehend and resolve those problems. ENGL 002 will require all students to participate in an assessment of the social behavior and other values, both communal and scholarly, relevant to the texts being read and discussed in the course. This course fulfills a General Education humanities requirement or a Bachelor of Arts humanities requirement. This course will be offered once a year with a limit of 60 seats.

Changes Effective Summer 2019:

ENGL 50: Introduction to Creative Writing (3 Credits) (BA) (GA)
Old Listing Effective Through Spring 2019:

Practice and criticism in the reading, analysis and composition of fiction, nonfiction and poetry writing. ENGL 050 Introduction to Creative Writing (3) (GA)(BA) This course meets the Bachelor of Arts degree requirements. If you believe that the heart of a poet beats inside you anyway—or if you simply enjoy writing to express yourself creatively—you will be at home in this course. You will also be at home here if you are an avid reader of fiction, poetry, and nonfiction, but have never tried your hand at writing it. In English 050 you will explore the genres of nonfiction, fiction, and poetry by reading published essays, short stories, and poems and by writing personal essays, sketches, scenes, and poems. We’ll discuss the relationship between the genres and also discuss what makes each a distinct art form. You’ll hand in weekly writing assignments in addition to completing longer writing projects. You’ll make copies of some of your creative work to distribute and discuss in class.

Changes Effective Summer 2019:

ENGL 88: Australian/New Zealand Cultural Perspectives (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Australian and New Zealand cultural and social perspectives, with emphasis on the historical development of intellectual, aesthetic, and humanistic values. ENGL 088 Australian/New Zealand Cultural Perspectives (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. Students are expected to learn fundamental skills of close textual analysis in the context of the study of a variety of works by authors from Australia and New Zealand. Studying a range of novels, poems, plays, and works of non-fiction, students will discuss the development of Australian and New Zealander literatures in historical context and gain understanding of the historical development of societal values in nations other than the U.S.A. The course aspires to relate geography and history to emerging social and cultural developments as the state and status of the two countries changed during the nineteenth and twentieth centuries, and to track their increasing separation from the “Mother Country” (i.e. Great Britain) as they developed a sense of themselves as different and separate from European societies. The process was neither comfortable nor easy, nor steadily progressive, but the record of it is an often fascinating story of human endeavor and struggle, very frequently against great odds and disappointments, which in turn affected the development of national character if such a thing can be said to exist. The literatures reflect some of the attitudes and qualities that emerged as the two societies were coming into being and forging their own unique identities.

Changes Effective Summer 2019:

ENGL 103: The Great Traditions in American Literature (3 Credits) (US) (BA) (GH)
Old Listing Effective Through Spring 2019:

Major works of fiction, drama, and poetry from the colonial to the modern periods expressing enduring issues and values.

Changes Effective Summer 2019:

ENGL 104: The Bible as Literature (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Study of the English Bible as a literary and cultural document. ENGL 104 The Bible as Literature (3) (GH) (BA) This course meets the Bachelor of Arts degree requirements. The purpose of this course is to acquaint students with the literature of the Bible, particularly in the King James translation, the translation that has been most influential in the English-speaking world. Throughout this course, students will examine the language, thought, images, and structures of the book that has arguably proved the central text of Western literature. Students will also actively explore the ways in which the Bible has shaped the literature of English-speaking cultures. Students will read substantial portions of the Old and New Testaments, including the Book of Genesis, the Book of Job, and selections from the histories, the prophets, the Book of Psalms, the Gospel of John, the Gospel of Matthew, and the Book of Revelation. Students will learn to read the Bible critically and interpret the book as they would any other literary text. They will also learn about the historical construction of the Bible and contemplate the competing versions of existing Biblical texts. Students will be asked to complete at least three
writing assignments drawn from the following kinds of writing: essay, essay exam, or semester-long reading journal. This course will prepare students for additional college-level literature courses by helping them to develop the analytical skills necessary to analyze complex written texts. This course fulfills a General Education Humanities requirement or a Bachelor of Arts requirement. It will be offered twice a year and is capped at 35 students.

Changes Effective Summer 2019:

• Description

ENGL 129: Shakespeare (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

A selection of the major plays studied to determine the sources of their permanent appeal. Intended for non-majors. ENGL 129 Shakespeare (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. ENGL 129 constitutes a broad introduction to Shakespeare’s dramatic works from a variety of thematic, historical, formal, and/or generic vantages. Approaches taken to the plays will vary from class to class, but may include a chronological introduction to the development of Shakespeare’s plays, a consideration of a principal Shakespearean theme or themes through a number of plays from across Shakespeare’s career, a consideration of Shakespeare’s protagonists through a number of plays from across Shakespeare’s career, or a consideration of a number of Shakespeare’s plays in historical context. Time allotted for the discussion of each play will vary, but students should expect to read, on average, a play a week. This class will prepare students for advanced courses in early modern literature as well as other academic courses that engage in the verbal and written analysis of complex written texts. Students will be evaluated by means of essays written in and out of class, essay exams, and term-long reading journals, and class participation. Students should expect to complete a minimum of three written assignments in the course of the term. The course will be offered three times a year with 60 seats per offering. The course will be offered once a year as an honors course–ENGL 129H.

Changes Effective Summer 2019:

• Description

ENGL 129H: Shakespeare (3 Credits) (H) (BA) (GH)
Old Listing Effective Through Spring 2019:

A selection of the major plays studied to determine the sources of their permanent appeal. Intended for non-majors. ENGL 129H Shakespeare (3) (GH) In ENGL 129H, students will read a selection of up to ten of Shakespeare’s major plays, in four different categories: history plays, comedies, tragedies, and romances. Selections may include Othello, King Lear, The Winter’s Tale, The Taming of the Shrew, Much Ado about Nothing, As You Like It, Henry IV Part 1 and Part 2, and Henry V, plus a supplemental text such as The Bedford Companion to Shakespeare

Changes Effective Summer 2019:

• Description

ENGL 133: Modern American Literature to World War II (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

This course meets the Bachelor of Arts degree requirements. English 133 will constitute a wide ranging study of modernist American literature, including novels, short stories, poems, plays, and prose, written roughly between the turn of the 19th century and the end of the Second World War. The class will approach this literature from a variety of thematic, historical, and/or generic vantages. Topics under consideration will vary from class to class, but may include a chronological introduction to the development of modernist American literature, a consideration of a principle theme or themes common to modernist American literature through a number of works from across the period, a consideration of a number of modernist works in the context of historical events central to the period, such as the American participation in the First World War and/or the effect on American literature of the ensuing world-wide depression. Time allotted for the study of the works under consideration will vary. This class will prepare students for advanced courses in modernist literatures as well as other academic courses that engage in the verbal and written analysis of complex written texts. Students will be evaluated by means of essays written in and out of class, essay exams, term-long reading journals, and class participation. Students should expect to complete a minimum of three written assignments in the course of the term. The course may be used as English Major elective credit or as credit towards the English Minor. Non-English majors may use this course to fulfill a general education or Bachelor of Arts/Humanities. English 133 will be offered once a year with 60 seats per offering.

Changes Effective Summer 2019:

• Description

ENGL 136: The Graphic Novel (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

The graphic novel as a literary and visual form (produced primarily in English). ENGL 136 The Graphic Novel (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course considers the graphic novel as a literary medium which joins text and image. The course explores the aesthetic of sequential narrative, its methods of production and consumption, and its place in contemporary culture. I. Introduction A basic outline of the medium, its generic range, and its reception in the United States. II. History of Comics An overview of the history of comics in the United States, with some discussion of Japan and Europe. The unit covers the development of comics in the United States during the twentieth century: newspaper strips, the comics boom of 1930s and 40s, the 1950s Senate hearings on the “corrupting influence” of comics, and the abiding perception of comics as juvenile fare. This component also considers questions of marketing, reception, and gender across various genres. III. Formal Analysis of Comics Introduction to critical terminology and methods for the critique of the medium: panel layout, interplay between text and image, visual vocabulary and icons, and narrative techniques. This component will provide students with language and concepts necessary for critical analysis of graphic novels. IV. Graphic Novels This unit presents graphic novels primarily from the United States, all single volume works and nearly all the work of a single creator. The course primarily focuses on works originally written in English. The unit targets texts that have established an abiding influence in the medium (Maus) or received critical esteem (Fun Home, Jimmy Corrigan). Students will conduct close reading and analysis of specific texts using terms and concepts learned in the “Formal Analysis of Comics” unit. This course uses readings, images, lectures, and discussion to introduce
students to the medium of graphic novels. * Students will analyze formal techniques of the medium and understand its development as a popular form in the modern era. * Students will encounter a range of perspectives and consider the challenges of representing history through an artistic medium. * Students will learn to think critically about issues of identity, ethnicity, sexuality, history, and religion. Individual instructors may vary their evaluation methods. One option might be: Class participation: 20% take-home exam: 20% analytical papers: 40% Presentation of secondary research: 10% Book review: 10% Students will gain a sense of the development of the medium across time, as well as an understanding of the place graphic novels hold in contemporary culture. This course would be most effective in a technology classroom. The unit on formal analysis in particular demands projection capabilities.

ENGL 221: British Literature to 1798 (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Introduction to literary history and analysis; Beowulf and writers such as Chaucer, Shakespeare, Donne, Milton, Swift, Pope, and Fielding. ENGL 221 British Literature to 1798 (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. Focusing on major writers and their cultural contexts, English 221 surveys British literature to 1798. A remarkable amount of important work was produced over this period. Students will read major texts like Beowulf, Romeo and Juliet, and Tom Jones; learn about renowned authors such as Chaucer, Shakespeare, and Fielding; and be introduced to influential literary forms, such as the epic, the revenge tragedy, and the picaresque novel. The tradition of British literature evolved over periods of significant upheaval and change. Students will also learn about the shifting historical and ethical orientations that energized this tradition, from rising industrialization and changing class relations to Romanticism, Modernism, and Postmodernism. As an introductory survey of British literature, English 222 welcomes non majors: no previous course in literature is required. By reading and discussing some of the best-known works in British literature, students will sharpen their skills of interpretation while surveying an important literary tradition.

Changes Effective Summer 2019:

- Prerequisite/Corequisite/Concurrent Courses

ENGL 222: British Literature from 1798 (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Introduction to literary history and analysis; writers such as Austen, Wordsworth, Keats, Browning, Dickens, The Brontes, Yeats, Joyce, and Woolf. ENGL 222 British Literature from 1798 (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. Focusing on major writers and their cultural contexts, English 222 surveys British literature from 1798 to the present. A remarkable amount of important literature was produced during this period. Students will read major texts like Pride and Prejudice, Hard Times and Jane Eyre; learn about renowned authors such as William Blake, Charles Dickens, and Virginia Woolf; and be introduced to influential literary forms, such as the dramatic monologue, the gothic novel, the and stream-of-consciousness narrative. The tradition of British literature since 1798 evolved over periods of significant upheaval and change. Students will also learn about the shifting historical and ethical orientations that energized this tradition, from rising industrialization and changing class relations to Romanticism, Modernism, and Postmodernism. As an introductory survey of British literature, English 222 welcomes non majors: no previous course in literature is required. By reading and discussing some of the best-known works in British literature, students will sharpen their skills of interpretation while surveying an important literary tradition.

Changes Effective Summer 2019:

- Add IL Designation

ENGL 227: Introduction to Culture and Sexuality (3 Credits) (US) (IL) (GH)
Old Listing Effective Through Spring 2019:

A course addressing the relationships between sexuality, literature, and culture. ENGL 227 Introduction to Sexuality Studies (3) (GH;US;IL) This course focuses primarily on queer literature, theory, and culture in the post-Stonewall (1969) decades in the United States and Britain. The course will interrogate sexual norms and their deviations, with a particular focus on the relationships between sexuality, imagination, and ethics in the making of sexual communities and in the fostering of sexual activism. We will focus on how class, race, and gender have been shaped, historically, through the production of sexuality, and the resistances offered to the formation and sedimentation of rigidly sexed bodies. We will examine the relationships of memory, temporality, and spatial location in contemporary queer culture and theory. We will explore
the relationships between sexuality and ethics, and how both shape the history of queer activism. Above all, we will study the connections between fantasy, imagination, and sexuality in shaping the literary and visual cultures of the U.S. and Britain. We will focus on the ways marginalization, shame, and criminalization are transformed, in the history, culture, and theory of queer people, into visionary acts of “world-making” that have changed contemporary understandings of bodies, identities, social formations, and literary and cultural forms.

ENGL 231: American Literature to 1865 (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Introduction to literary history and analysis; writers such as Bradstreet, Franklin, Emerson, Hawthorne, Douglass, Thoreau, Fuller, Melville, Whitman, and Dickinson. ENGL 231 American Literature to 1865 (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. Focusing on major writers and their cultural contexts, English 231 surveys American literature to 1865. A remarkable amount of important literature was produced during this period. Students will read major texts like The Scarlet Letter, Leaves of Grass, and Narrative of the Life of Frederick Douglass; learn about renowned authors such as Benjamin Franklin, Henry David Thoreau, and Emily Dickinson; and be introduced to influential literary forms, from Native American oral forms to the short story and free verse. The tradition of American literature to 1865 evolved over periods of significant upheaval and change. Students will also learn about the shifting historical and ethical orientations that energized this tradition from pre-colonial times to periods of Republicanism and Romanticism. As an introductory survey of American literature, English 231 welcomes non-majors: no previous course in literature is required. By reading and discussing some of the most important works in American literature, students will sharpen their skills of interpretation while surveying an important literary tradition.

ENGL 233: Chemistry and Literature (3 Credits) (BA) (GN) (GH)
Old Listing Effective Through Spring 2019:

Exploration of key concepts of chemistry, the reciprocal influence of chemistry and literature through history, and the relationship of science to society, culture, and values. ENGL (CHEM) 233 Chemistry and Literature (3) (GN or GH) ENGL/CHEM 233 is a pedagogically innovative course that will be team taught by an instructor from the English department and one from the Chemistry department. Both instructors will be present in the classroom throughout the semester, providing joint presentations and leading discussions. Students may earn either GH or GN credit for the course, but not both. This course teaches both basic concepts of chemistry and their cultural elaboration in literature. It seeks to provide students with a nuanced understanding of how literature and science inform each other and negotiate cultural, religious, and political tensions. The course seeks to explore ways in which our modern world is defined by and dependent on a variety of sciences and technologies. The impact of scientific and technological discoveries continues to dominate discussions of who we are, where we come from, where we are going, and our place in the universe. Understanding how we, as a society, have acquired knowledge is especially important when the ideas, perspectives, and discoveries are perceived to be in conflict with our religious, cultural, or political beliefs. Understanding the origin and development of these ideas, perspectives, and discoveries is an essential component of science and scientific achievement, but too often our methods of teaching science focus almost exclusively on teaching facts and theories at the expense of the historical discovery and development of those facts and theories. This course teaches both the scientific facts and theories and the contexts of their production in order to sharpen students’ abilities at critical evaluation of facts. The literary and scientific focus will vary from class to class, but may include writings by literary authors such as Edward Bulwer-Lytton, Bram Stoker, H. G. Wells, Garrett Serviss, William Butler Yeats, Arthur Machen, D.H. Lawrence, A. E. Waite, Aleister Crowley, Arthur Conan Doyle, and Camille Flammarion, and scientific texts by scientists such as William Crookes, William Ramsay, Frederick Soddy, Ernest Rutherford, Wilhelm Comad Roentgen, Henri Bequerel, J. J. Thomson, Niels Bohr, and Marie Curie. Like many literature courses, ENGL/CHEM 233 interprets history, assesses individual and social behavior, engages philosophical ideas, and expresses ethical and aesthetic values. It is especially useful at exploring cultural and social tensions involving scientific knowledge. For students in science programs, the course will explore the technical and conceptual dimensions of scientific knowledge in historical and cultural context. Political, cultural and personal motivations are integral components of the scientific method and deeply influenced the discovery of many of the fundamental chemical and physical concepts students are expected to master in their science curricula. Students should expect to take two exams consisting of a midterm and a final, to write at least two papers for the course demonstrating their abilities at literary analysis and grappling with the themes of the course, and to make a group presentation to the class. Classroom discussion and general class participation will also be a factor in evaluation. The course can be used as an elective credit toward the English Major and Minor, and can help students in English, Chemistry, or any other major fulfill General Education degree requirements. It will be offered once every other year with 20 seats per offering.

ENGL 245: Introduction to Lesbian and Gay Studies (3 Credits) (US) (GH)
Old Listing Effective Through Spring 2019:

An introduction to the study of homosexual identities across a wide range of disciplines and methodologies. An introduction to the study of homosexual identities across a wide range of disciplines and methodologies, this course explores the history of modern, “western” ideas about sexual identity as manifested in both writing and images. The course examines sexuality not as a “natural” or consistent phenomenon, but as a set of beliefs that have changed over time and manifest themselves differently in different cultural and historical contexts. Starting in the late nineteenth century, scientific and medical authorities began categorizing individuals into sexual types based on their manifestations of gendered characteristics and their erotic attractions and practices. This medical typing corresponded with the development of subcultures associated with deviance from sexual norms; these subcultures produced a rich variety of texts, images, performances, and social forms, many of which are now considered central to both vernacular and high culture. This course explores this rich archive. It investigates constructions of sexual conformity and how sexual nonconformists positioned themselves as a shared group identity. It examines how sexual distinctions between gendered, raced, and classed bodies were historically produced and culturally contested. It considers what commonalities gay identities may or may not share with lesbian identities and how the increasing visibility of bisexuality, transgender, and transsexuality has altered perceptions of sexual identity. The course explores the relationship of the avant-garde to mass-mediated politics of GLBTQ subcultures and the impetus to “normalcy.” Comparative study of issues of sexual mobility beyond and between the borders of the United States expands the course’s critical scope beyond dominant forms of western culture. This course does not propose definitive answers to the questions of identity it addresses. Instead it negotiates the ways sexualities have enabled individuals to articulate and disarticulate themselves within social bodies past and present. This course, therefore, has wide relevance for students interested in how group identities come into being and transform over time in dynamic relation to other historical forces. Exploring a wide variety of texts and images associated with the history of sexual identity as well as a variety of interpretations of that history, this course opens students to an archive with the potential to inform and enrich their understandings of many kinds of challenges to regimes of normativity today.

ESL 15: ESL Composition for American Academic Communication II (3 Credits) (GWS)
Old Listing Effective Through Spring 2019:

For undergraduate students who are intermediate/advanced level non-native speakers of English to develop strategies for reading and writing American academic discourse. ESL 015 ESL/Composition for American Academic Communication II (3) This course is for undergraduate students who are intermediate-advanced level non-native speakers of English. Students will become familiar with the various stages in
the process of writing and develop strategies for reading and writing various models of American academic discourse. Overall, students will be able to use what they have learned in this course to participate successfully in academic reading and writing tasks throughout their university experiences in the United States. Students will participate in a variety of reading and writing tasks that will enable them to: (a) define the subject, purpose, audience, and appropriate organizational structure for written compositions; (b) revise and reshape their writing to improve ideas, organization, language use, vocabulary and mechanics; (c) identify and correct structural and grammatical errors within their written texts; (d) select sources, take notes, and acknowledge sources to support ideas, using the library to conduct library research; and, (e) become better writers in preparation for their college careers.

FDSC 105: Food Facts and Fads (3 Credits) (BA) (GHA)
Old Listing Effective Through Spring 2019:

Impact on society and the individual of modern food technology, food laws, additives, etc.; historical, current, and futuristic aspects. FD SC (S T S) 105 Food Facts and Fads (3) (GHA)(BA) This course meets the Bachelor of Arts degree requirements. Food Facts and Fads is an introductory food course that broadly surveys various aspects of food, agriculture, nutrition, and health. Students in this course explore the components of the food system from producer to consumer; examine issues related to modern food technology, food and nutrition policies, and changes in the food industry; and assess the impact on the food system, consumers, and on society as a whole. Students will assess their own food and nutrition behaviors, become more aware of the environment in which they make food decisions, and devise strategies for improving health through better diet and increased physical activity. Students learn through lectures, videos, guest speakers, discussions, individual and group activities, and optional field trips. This course emphasizes active learning and critical thinking. Students are expected to complete electronic quizzes, write two or more short reflective papers, and complete a project on a food topic of the student’s choosing, for which information must be gathered from several sources in a variety of ways.

GER 189: German Film (3 Credits) (IL) (GH)
Old Listing Effective Through Spring 2019:

A survey of German film from its beginnings to the present, with emphasis on historical, political, and cultural contexts. GER 189 German Film (3) (GH;IL)This course is an introduction to German cinema, broadly defined as any representation of moving images made in Germany, Switzerland, or Austria, or by filmmakers from these countries working in exile. The course will be both an historical survey of the developments in German film, as well as a general introduction to film analysis. Neither prior knowledge of German culture and language nor of film history and terminology is required. All materials will be supplied in English. Students will learn about the technology of film production as well as fundamental concepts for film analysis (shots, angles, sound, lighting, etc.). The course will be structured around different political and cultural contexts, providing students with a concrete historical perspective on Germany from the late nineteenth to the early twenty-first centuries. Screenings will cover several artistic modes, including comedy, melodrama, propaganda film, experimental film, period drama, crime drama, horror film, and documentary. Readings will complement screenings with seminal writings by filmmakers and theorists, as well as texts that provide historical perspective and close analysis. By examining German film with attention to changing cultural settings, students will investigate such topics as the relation of memory and history, the representation of war and genocide, the roles of propaganda and censorship, the formation (and deformation) of national identity, the impact of technological and economic changes on culture, and changing gender roles. In addition, students will learn to think critically about the visual medium of film, becoming more engaged and critical spectators in a world saturated with the moving image. Class work includes some lecture but emphasizes guided discussions, group work, writing exercises, and some student presentations. The course is designed to be suitable for all students generally interested in German, or interested in various fields of humanistic study, whether or not they have previously studied the culture of Germany. This course is designed to count as General Education, as a GH “General Humanities,” and as an IL “International Cultures” course.

GREEK 101: Introductory Ancient Greek (4 Credits) (BA)
Old Listing Effective Through Spring 2019:

Fundamentals of classical Greek grammar, syntax, and vocabulary. GREEK 101 Introductory Ancient Greek (4)(BA) This course meets the Bachelor of Arts degree requirements. The aim of GREEK 101 is to introduce students to the fundamentals of ancient Greek as quickly and thoroughly as possible. The Attic dialect is the basis of Classical Greek grammar, because this is the language of the tragedies of Aeschylus, Sophocles, and Euripides; the comedies of Aristophanes; the histories of Thucydides and Xenophon; the orations of Demosthenes; and the works of Plato. This course focuses primarily on the morphology and syntax of ancient Greek. Drills on each grammar presentation, as well as translation of sentences both from English to Greek and from Greek to English, and of brief passages from ancient authors are the basis of the student’s homework throughout the semester. By the end of the semester, students will be prepared to read short passages of Greek authors. The course will focus on reading and writing rather than speaking, although students will be expected to read Greek aloud regularly in order to master correct pronunciation. GREEK 101 will prepare students to continue with GREEK 102 and then 400-level Greek courses. The course goals, in addition to providing students with a firm grounding in Greek grammar and morphology, include giving students an improved understanding of English grammar and of English vocabulary and word origins. Moreover, while the primary focus will be on mastering forms and syntax, students will also be introduced to the basic aspects of classical Greek culture so that they are able to place the selections they read within a wider cultural context. Students may select to use GREEK 101 to fulfill either a 3-credit requirement for a course in Greek or Roman language, literature, and civilization, or archaeology or the requirement for 9 credits in courses related to Classics and Ancient Mediterranean Studies within the Common Requirements for the Major. Students desiring to fulfill the B.A. requirement for 12th-credit level foreign language in Greek may do so by successfully completing a 400-level course in Greek. Students’
work in the course will be evaluated on a combination of written work, including frequent tests and quizzes; homework completion; and course attendance and participation. GREEK 101 will be offered once per year with 24 seats per offering.

HIST 10: World History I (3 Credits) (IL) (BA) (GH)
Old Listing Effective Through Spring 2019:

Human origins; early civilizations; major political and intellectual developments on all continents; cultural interrelationships to 1500. HIST 010 Non-Western Civilization (3) (GH;IL)(BA) This course meets the Bachelor of Arts degree requirements. History 010 is an introductory survey of ancient history from the emergence of Homo Sapiens to the onset of European exploration (approximately 1500), examining the evolution of the world's various peoples and cultures. The course will focus on the historical processes that led to human diversity, as expressed in varying patterns and systems of government, economics, arts, ideas, belief systems, and social organizations. The course will also treat the growth of agriculture and pastoral nomadism and explore global interactions and linkages, engendered by human migrations, the spread of commerce and disease, wars, and conquests up to 1500. Although the mode of delivery may vary, depending on the semester or session in which a specific section of the course is offered, its campus location, and the instructor's major research specialization, the course will be taught thematically and conceptually. It will include individuals who have played a significant role in influencing the beliefs and institutions of a particular culture, or humanity in general, such as Moses, Confucius, Gautama (the Buddha), Plato, Alexander, Jesus, Muhammad, St. Francis of Assisi, al-Ghazali, Murasaki Shikubu, and Moctezuma. Students will learn about the interrelationships between dominant and nondominant cultures, such as the concepts of Roman imperialism, the tributary relationship between China and its neighbors, the Islamic concept of conquering lands without forcing conversion, the effects of the Mongol conquests, and the beginnings of Portuguese exploration and colonization. The course will make students more aware of the cultural achievements of the ancient Egyptians, Hebrews, Greeks, Romans, Persians, Indians, Chinese, Arabs, Turks, Mayans, and Japanese. Discussion sections (for high-enrollment classes) and essay examinations will promote student facility in written and oral self-expression, analysis, synthesis, comparison and contrast, and cultural empathy. History 010 instructors will, at their discretion, provide opportunities for gathering information from libraries, computerized indexes, and websites. Students will come to understand themselves and their own culture, as well as the background to many other societies and cultures in today's world, through intellectual confrontation with the peoples and cultures of antiquity. Instructors will address issues related to civility, the individual's role within the larger community, and academic honesty.

HIST 11: World History II (3 Credits) (IL) (BA) (GH)
Old Listing Effective Through Spring 2019:

Social, economic, and political evolution of societies and cultures from 1500 to the present. HIST 011HIST 011 World History II (3) (GH;IL)(BA) This course meets the Bachelor of Arts degree requirements. History 011 is an introductory survey of modern history from approximately 1500 to the present, viewing the world and its various peoples and cultures as a whole. This course will focus on the historical processes that have led to modernization, such as exploration, contacts among peoples and cultures, voluntary and forced migrations, the growth of technology and science, industrialization, urbanization, and other trends that have shaped the world since 1500. It will help students to develop facility in speaking and writing about continuity, change, causation, similarities and differences among cultures, universal and particular values, and conceptualization of modernity, through weekly discussion sections, essay examinations, short writing assignments, and selected readings. Its content is intrinsically international and intercultural, addressing overarching themes of ethnicity, race, religion, gender, and especially global perspectives. Approximately one-half of its content

HIST 20: American Civilization to 1877 (3 Credits) (US) (BA) (GH)
Old Listing Effective Through Spring 2019:

An historical survey of the American experience from its colonial beginnings through the Civil War and Reconstruction. HIST 020 American Civilization to 1877 (3) (GH;US)(BA) This course meets the Bachelor of Arts degree requirements. HIST 020 is designed to introduce students to the main events and themes of American history before 1877. This course is not intended to simply acquaint the student with facts, but to teach them how to analyze those facts so that they can understand why historical events in America unfolded as they did. A larger goal of the course is to teach them how to think “historically” and to perceive the relevance of the past to the present. It is impossible to understand either yourself or your society if you cannot identify the role, which your individual and collective past plays in the construction of your actions and thoughts today. The course provides the student with a basic background in American History prior to 1877. HIST 021 chronologically follows this course by providing the student with a background in American History from 1877 to the present. HIST 020 is a prerequisite for upper-division courses in American History, and is a required course for the History major. The course grade will be determined by an in-class midterm exam, an in-class final exam (each containing essay and short-answer sections), a five-page paper based on the analysis of a primary source, and participation in discussion sections. This course will be offered twice per year with 150 seats per offering.

Changes Effective Summer 2019:

- Description
HIST 21: American Civilization Since 1877 (3 Credits) (US) (BA) (GH)
Old Listing Effective Through Spring 2019:

An historical survey of the American experience from the emergence of urban-industrial society in the late nineteenth century to the present. HIST 021 American Civilization Since 1877 (3) (GH;US)(BA) This course meets the Bachelor of Arts degree requirements. History 021 is designed as the second half of a two-term survey of American history, covering the period from 1877 to the present. (History 20 covers the period from 1607 to 1877.) The course uses a lecture format; larger versions have weekly discussion sections as well, led by graduate assistants. In terms of historical knowledge, History 021 seeks to introduce students to salient events, developments, and themes of American history since 1877. Chief among the topics covered are Reconstruction, Westward expansion and the decline of the Native American, the industrial revolution, urbanization, immigration, Gilded Age culture and politics, the labor movement, the New South, Populism, imperialism, Progressivism, segregation and African-American response, the women's movement, World War I, politics and culture in the 'Twenties, the Great Depression and New Deal, World War II, post-war prosperity, the Cold War, the Civil Rights movement, the Vietnam War, the disillusionment of the 'Seventies, the Reagan revolution, and America in the post-Cold War era. The social and ideological diversity of the American experience is a prominent theme of History 021. A survey textbook selected by the instructor is used, in conjunction with lectures, to provide a comprehensive overview. The textbook is supplemented by a blend of specialized historical works and primary readings. Students are evaluated on the basis of their performance on papers, exams, quizzes, and class participation and attendance. While History 021 instructors vary in the content and mix of work they assign (and the relative weight they give papers, exams, quizzes, and participation in the course grade), all versions share certain underlying objectives: to expose students to essential events and trends in American history; to develop their capacity to identify and analyze key themes and issues from the past; to give them some experience in the critical assessment of primary sources; and, to sharpen their skills in marshaling data and concepts from readings and lectures, and discussing them cogently both in section meetings and in writing. Increasingly, instructors are integrating multi-media components into their lectures. History 21 is the second half of a two-course survey of American history. History 020 is the first half; the year 1877 marks the dividing point between these two courses. Like History 020, History 021 provides a foundation (and is in fact a prerequisite) for many of the more advanced courses in American history. History 021 is a requirement for the major. Non-majors may use this course to satisfy a general education humanities selection. This course is offered three times a year with 140 seats per offering.

Changes Effective Summer 2019:

- Description

HIST 110: Nature and History (3 Credits) (IL) (BA) (GH)
Old Listing Effective Through Spring 2019:

A broad introduction to the history of human relationships with nature throughout the world. HIST 110 Nature and History (3) (GH;IL)(BA) This course meets the Bachelor of Arts degree requirements. The human relationship with the natural environment—the world of plants, animals, and microbes, of air, water, and land—is an important historical subject. History 110 provides a broad, thematic description and analysis of major global trends and shifts, with an emphasis on contemporary issues and problem solving. The most important goal of the course is to provide students with the historical context necessary to construct a thoughtful appreciation of the environmental dilemmas of our time. History 110 encourages students to break down the barriers that often divide the humanities and the sciences.

This course utilizes environmental science to demonstrate and explain specific human tendencies. Finally, this course is any in world history—is structured to at least diminish students’ American-centered view of both the past and environmental concerns.

Particularly in relation to contemporary environmental issues, we hope History 110 will make clear that many environmental problems are local in neither their construction nor impact. Ecology has contributed a great deal to historical understanding in terms of specific examples or case studies; however, it has also begun to reconstruct the overall structure of the history that we teach. History 110 seeks to exploit this new paradigm by following a topical organization that is structured around human modes of interaction with the environment. In Unit 1 the course borrows its structure from geography and the natural sciences. Students will be able to consider a wide range of human activity as well as to better comprehend similarities in ideas, ethics and concepts from around the world and throughout history. In Unit 2 the course steps out of chronological limitations to embrace two topics that span human history. By studying such topics, of course, students may see change over time.
engage actively and critically with the texts by writing short reading responses, longer essays, and participating in classroom discussion and presentations, all of which will serve as the basis for their evaluation. This course complements offerings in Religious Studies, Jewish Studies and History. It provides a foundation for an already existing upper-level seminar in American Judaism (listed in Jewish Studies and Religious Studies). In addition, the course strengthens the History department’s offerings in American history, serving as a basis for students interested in immigration, ethnicity and religious history. Students who are interested in modern Jewish history will also find this course a worthwhile addition to their program of study, since, unlike other courses, it deals primarily with the story of Jewish life in the United States.

HIST 122: History of Science I (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

A history of science and culture from pre-history until the Scientific Revolution. HIST 122 History of Science I (3) HIST 122 examines scientific endeavor from pre-history until the Scientific Revolution. Topics include ancient Babylonian and Egyptian conceptions of the universe and its relationship to human society, early Greek methods of understanding their world, and the development of science in the Western world and in other cultures. The course examines a range of theoretical and applied disciplines, including medicine and engineering. Along with key discoveries, the course emphasizes the role of cultural, political, and social forces in determining what human societies have valued as truth and knowledge and the standards and methods by which humans have offered proof of scientific knowledge.

HIST 130: Introduction to the Civil War Era, 1848 through 1877 (3 Credits) (US) (BA) (GH)

Old Listing Effective Through Spring 2019:

Survey of causes and consequences of American Civil War, end of Mexican War in 1848 through end of Reconstruction, 1877. HIST 130 Introduction to the Civil War Era, 1848 through 1877 (3) (GH; US) BA -
This course meets the Bachelor of Arts degree requirements. HIST 130 is a general survey of the American Civil War Era that satisfies the Gen Ed GH requirement. Course content features the cause of the war, the conflict itself, and the consequences for the meaning of freedom in the United States. Chronologically, the course spans from 1848 through 1877, or from the Mexican War through Reconstruction. Students will become familiar with American slavery; northern and southern social, cultural, political, and economic composition; the military progress of the war; problems on the home front; the struggle for emancipation; and the creation of a new nation based on free labor. Lectures are supplemented with discussion days in which students react to readings. Grading stresses the use of analytical and writing skills, as well as the ability to think historically and analyze documents critically.

**HIST 159: History of the FBI (3 Credits) (US) (GH)**
Old Listing Effective Through Spring 2019:

Survey of the FBI's history with special emphasis on civil rights and liberties and bureaucratic development. CRIMJ 159 / HIST 159 History of the FBI (3) (GH;US) The History of the FBI introduces students to the 100-plus years history of the Federal Bureau of Investigation. With such a long history, studying the FBI engages students with each of the various historical time periods from the late 19th century to the present, including Reconstruction, the Gilded Age, Progressive Era, First World War, the New Era, the Great Depression, the Second World War, the Cold War, post-Cold War, Age of Terrorism, and contemporary history. Students will understand the evolution of Federal law enforcement, bureaucracy, the increasing power of the Executive branch, the targeting of various minority groups, civil rights and civil liberties issues, and the growth of a national security role for the federal government over time. In its long history the FBI has intersected with a wide variety of groups and issues, and this reality will further expose students to the histories of African Americans, gays and lesbians, women's groups, Latinos, Native Americans, war protestors, students, various political dissenters, immigrants, targeting of morality, obscenity, and labor organizing. Because the FBI is responsive to both the political and policy interests of presidents and the influences of American society, students will come to appreciate the influences that politics has on bureaucracy and law enforcement, as well as the different social, political, economic, and cultural influences that each historical time period have exerted on the FBI to help shape its priorities and structure.

Old Listing Effective Through Spring 2019:

An introduction to South Asian history from early modern to contemporary times. ASIA (HIST) 171 Introduction to South Asian History 2: Early Modern to Contemporary (3) (GH;IL) (BA) This course meets the Bachelor of Arts degree requirements. This course will offer students a general introduction to the cultures and societies of the South Asian subcontinent from the early modern to the contemporary, following processes of modernization and social transformation through both colonial and postcolonial periods. It covers the rise of British power, and the various responses to it from collaboration to mutiny; the development of competing nationalisms and anticolonialisms, including secular, socialist, Hindu and Muslim variations; accompanying social reform visions including caste abolition and feminism; the turbulent paths toward partition and independence, resulting in the postcolonial states of India, Pakistan, Bangladesh, Nepal, Sri Lanka, and Afghanistan. It then follows the continuing trajectories of these countries after independence, from the Nehruvian years to the neoliberal shift, with attention to emerging social movements and issues including caste and gender relations; religious and separatist politics; struggles around land and development; urbanization, and labor migration; leading into the 21st century.

HIST 173: Vietnam in War and Peace (3 Credits) (IL) (BA) (GH)
Old Listing Effective Through Spring 2019:

Rise of nationalism and communism; origins of conflict; United States involvement; impact on postwar regional and international politics; contemporary Vietnam. HIST 173 Vietnam in War and Peace (3) (GH;IL) (BA) This course meets the Bachelor of Arts degree requirements. The small Southeast Asian nation of Vietnam remained an obscure and exotic land, relatively unknown to the rest of the world until the mid-twentieth century when it became the scene of a military and political struggle with important global implications. History 173 examines two interrelated topics: 1) the long history and unique culture of Vietnam and its peoples, extending from prehistory to the present; and 2) Vietnam’s constant struggle over several millennia to secure its independence in the face of continual military, political, social, and economic pressure from outsiders, especially the Chinese, the French, and the Americans. The course includes special focus on the physical geography of Vietnam; the anthropological origins of its people; the evolution of its unique culture, folklore, and legends; its long-term struggle against Chinese military and cultural aggression; its role as a colony in the French global empire; the rise of nationalism and communism in Vietnam; the origins of global conflict in Vietnam in the post-World War II and Cold War world; the conduct of military, political, diplomatic, and economic affairs of France, the United States, North and South Vietnam, and other nations during the wars of 1945-1975; the response of civilian populations and governments to that military conflict; and post-1975 Vietnam. Evaluation methods include map-based examinations to familiarize students with the geography of the region and to underscore how geography and history intersect. Examinations include both essay and objective questions that require students to integrate information from lecture and from readings drawn from both primary and secondary sources that examine Vietnam’s struggles from different viewpoints. Also required is a research/writing project that explores some specific dimension of the American or Vietnamese homefront experience during 1965-1973, the peak years of the U.S. military effort. This course deepens knowledge about Asian cultures introduced in History 010 and 011 (World History). It supports both the interdisciplinary East Asian studies major and Asian Area Studies minor. This course is accepted for the Military Studies minor. History 173 satisfies both General Education and Bachelor of Arts degree requirements for Humanities.

Old Listing Effective Through Spring 2019:

Origin, political growth, international relations, and economic status of the Latin-American republics, with emphasis upon present-day conditions. HIST 179 Latin-American History since 1820 (3) (GH;IL) (BA) This course meets the Bachelor of Arts degree requirements. This course focuses on Latin America (with limited coverage of the Caribbean) from the early 1800′s through the present. For the colonial period (c.1500-c.1820), it is easy to see why Latin America has a “common history”, as most of it was ruled by two quite similar countries, Spain and Portugal. But after the colonial system collapsed, giving rise to over a dozen independent countries by the 1830s, the issue becomes more complicated. What do these dependence upon markets in developed countries for their economic prosperity? How can we explain the continuing similarities between these countries, without losing sight of their diversity? The approach of this course is broadly chronological, but for each period we will focus on one or more countries that illustrate (however imperfectly) the trends of the period. The goal of the course is not to provide an encyclopedic knowledge of Latin America, but rather to provide a framework for understanding how current issues are rooted in...
past historical processes, and to offer a better sense of how key historical themes are "lived" by ordinary people in Latin American society. A related goal of the course is to acquaint students with the historiography of Latin American: the different approaches that historians have used to understand the region. Students will be evaluated on two sets of essay exams and a paper, as well as participating in classroom discussion. HIST 178 and 179 are both requirements for the Latin American Studies Major and Minor, as well as satisfying general credit requirements for the History Major.

HM 330: Food Production and Service Management (2 Credits)
Old Listing Effective Through Spring 2019:

Food service management laboratory stressing the integration of purchasing, menu planning, and costing in quantity production of quality food. HM 330 Food Production and Service Management (2) This course is designed as the application of foodservice production and service management stressing the integration of management modules with training in employee positions for the quantity production of quality food. The course draws from the students' theoretical background in accounting, management, nutrition, food production and sanitation, and thus integrates these areas into the daily operation of a campus foodservice facility as a living laboratory. Students, working as a management team, coordinate and manage all aspects of the food service laboratory. Students also experience a number of employee work positions in the laboratory. Main topics typically include: critical management decisions in a foodservice operation; evaluation of manager and employee performance, interpersonal and time management skills; procedures to prevent sanitation and safety hazards in a foodservice operation; food production, service, sanitation, and quality assurance techniques typical to foodservice operations; technical responsibilities in the development, production and evaluation of a food service system including sales, recipe production and service, cost control, purchasing, facilities management, personnel management, and financial management; critical thinking and leadership skills; and interaction with guests and accurate evaluation of the guests' dining experience. This foodservice practicum is the second course in the foods sequence. Students enroll in this course after completing the introductory course in food production and service and a Nutrition course in food preparation. The course is a prerequisite for the advanced food production course.

HM 350: Hospitality Decision Making and Information Systems (3 Credits) (GQ)
Old Listing Effective Through Spring 2019:
Application of decision theory and models to solve qualitative and quantitative problems using Hospitality Information Systems and Computer Applications. HM 350 Hospitality Decision Making and Information Systems (3) This course provides students with the opportunity to apply analytical techniques, Excel-based models, and simulation to the management of operations in the hospitality industry. The overriding goal is to provide students with the skills needed to make effective, data-driven decisions. Key topics include: decision making under uncertainty and risk, total quality management, process analysis and design, capacity planning, process strategy, project management, principles of revenue management, and forecasting for operations management.

HPA 57: Consumer Choices in Health Care (3 Credits) (GHA)
Old Listing Effective Through Spring 2019:

Introduction to consumers’ role in health-care decisions, including health benefits, physician and hospital choice, and end-of-life choices. H P A 057 Consumer Choices in Health Care (3) (GHA) H P A 057 is designed to provide students with an understanding of the consumer’s role in health care decisions. The growth in health care information resources, the expansion of for-profit medical care, the consumer revolution, and increasing cost pressure mean consumers must be aware of the critical issues involved in health care decisions. Consumer knowledge and decision-making affect the cost and quality of health care received. The main goal of this course is to educate students to become knowledgeable health care consumers. H P A 057 (GHA) can be used as a General Education course for all Penn State students. It focuses on all 4 aspects of General Education in Health and Physical Activity and several of the overall General Education criteria. It helps students learn how to gather information about health and health care and synthesize and analyze that information to make good choices that will enable them to achieve and maintain good health, including making healthful lifestyle choices. H P A 057 emphasizes that students must develop consumer skills, attitudes, and habits that will enable them to make the choices expected of consumers in today’s health care system. Active learning is a critical component of H P A 057, as students must actively gather information and use it to make decisions. H P A 057 also addresses the issue of intercultural competence, by addressing different cultural views of health and information on how culture influences interactions between patients and others in health care settings. It requires students to write and speak about the choices they make through assignments that demonstrate their understanding of the information resources and the reasoning underlying their choices. Finally, several in-class and out-of-class assignments employ collaborative learning and teamwork as students gather and synthesize information. Study of individual satisfaction and performance in hospitality organizations. Topics include cultural diversity, motivation, communication, group behavior, and leadership.

INTEGRITY 130: Italian Culture and Civilization (3 Credits) (IL) (BA) (GH)
Old Listing Effective Through Spring 2019:

Italian life from antiquity to the present; literature, film, the arts, and contemporary problems in historical perspective. IT 130 Italian Culture and Civilization (3) (GH;IL)(BA) This course meets the Bachelor of Arts degree requirements. The course aims to develop critical and analytical skills of undergraduate students. It is an Intercultural/International Competence course dealing thoroughly with ethnicity, religion, and global perspective as it pertains to Italian culture and civilization. The course traces, among other themes, the importance of the Roman Empire, the Catholic Church, the Renaissance, presence and contributions of the Roman Catholic Church, the Italian Renaissance, and Italian migration, artistic patrimony, and culinary contributions. Historical texts used will emphasize the social history of Italians that portrays the continuous processes of adaptations through the ages. Consideration will be given to the various representative Italians such as Dante, Da Vinci, Machiavelli, St. Francis, St. Clare, Fellini, and Fermi. We will read novels and analyze films that depict aspects of Italian thought and culture from religion to politics.

Old Listing Effective Through Spring 2019:
Italian-American experience from the late 19th century to present. Socio-
political issues seen through cinema and through literary and other
readings. IT 131 Italian American Culture and Civilization (3) (GH;US)(BA)
This course meets the Bachelor of Arts degree requirements. Between
1870 and 1920 over five million Italians immigrated to the United States.
They were mainly men, and they came primarily to strike it rich. Of
those who came, about one-third returned to Italy. Those who remained,
often joined by their families, left an indelible mark on the American
cultural, political, artistic, educational and social landscape. This course
investigates the fascinating story of Italian immigration to the United
States, a story that many students' great-grandparents and grandparents
actually lived and bequeathed in memory via their personal stories. Our
inquiry will be interdisciplinary. We will study historical texts, literature
and film, which address the historical and sociological conditions of
19th Century Italy, the odyssey of immigration to and assimilation in the
United States, and life in the ethnic neighborhood. We will also explore
the Mafia, forms of prejudice, and ways Italians uniquely manifested their
social values in labor unions, religion and education. Upon successfully
completing this course, students will have a solid grasp of how Italians,
in becoming Americans, contributed to the rich fabric of life in the
United States.Evaluation will be done through limited class participation,
examinations, and quizzes. There will be eight multiple-choice exams
with one essay question, and four quizzes based upon the novel readings.
IT 131 will provide an Italian American equivalent to IT 130 (Italian
Culture and Civilization). It should fulfill Humanities Breadth and Cultural
Diversity requirements. The course will not count toward the minor or
major in Italian because it is given in English; nonetheless, it will be
complementary in so far as it will give our students a more rounded
education concerning Italy and its legacy. IT 131 will be offered once a
year with 50 seats per offering.
Changes Effective Summer 2019:

KINES 29: Golf I (1-1.5 Credits) (GHA)
Old Listing Effective Through Spring 2019:
A course designed to give students an understanding of and a proficiency
in golf skills, rules, and etiquette. KINES 029 Golf I (1.0-1.5) (GHA)
Kinesiology 029 is a course designed to give students the understanding,
knowledge and skills to begin an exploration of the game of golf. While
the courses main area of emphasis is on golf's short game (putting,
chipping and pitching) students will be educated about full swing
fundamentals and proficiencies will be developed in short and mid-
irons.Perhaps the most unique feature of Golf I is the weekly on course
practice. Each week during this course, students will get a chance to
apply the skills they have learned during the week on an actual golf
course. This practice time is in a situation where only the students from
the class are on the course. This situation creates an ideal practice area
for the student golfer to be come acquainted situational application of
golf skills. Students who enroll in Kinesiology 029 will find, in the
game of golf, a unique form of self-expression. The daily “movement
problems” that students will encounter offers a new type of information
collecting process accompanied by unusual opportunities to synthesis
that information into a “golfing personality”. The development of motor
skills will complement students oral and written capabilities. The active
lifestyle requires that the participant be able to gather, synthesis and
analyze information. Students in Kinesiology 029 will be asked to
involve themselves in Web and CD-ROM based assignments to gather,
synthesis and analyze valuable information about golf's rules and
etiquette, equipment, and travel planning. Students will be evaluated by
a combination of (but not limited to) evaluation techniques. Examples
of those techniques are written examinations, skills testing, written
papers and subjective evaluation of skill level and game performance. The
student, who successfully completes Kinesiology 029-Golf I will possess
a command of basic golf rules, golfs terminology and golf etiquette.
These basic fundamentals will ease the transition from golf student to
political and social discrimination. But hatred of Jews did not disappear,
despite widespread acceptance in Western culture of political liberalism.
The class explores these trends in Europe, the Americas, and Israel. It
begins by looking at the fragile freedom of nineteenth-century Jews. In
the twentieth century, Jewish experience has often been characterized
by open conflict: in the Holocaust, the formation of Israel, contemporary
black-Jewish relations in the United States, and Jewish-Muslim relations
in the Middle East. The course concludes with these recent struggles.
Course readings include personal narratives (reminiscences or letters)
and works of fiction (a short story, play, and novel). The class is primarily
a discussion class, using writing assignments as the principal method
of evaluation. The course requires three graded essays and an ungraded
proposal. Students are also asked to keep a journal of commentary on
course readings. Class attendance and participation are components
of the final grade. The course serves as an introduction to modern
Judaism as a religion and culture. It prepares undergraduate students
for advanced work in European and American Judaism, as well as Israeli
history and culture. These advanced courses are found in the Religious
Studies and Jewish Studies programs and in the Departments of History
and Comparative Literature. It may be used to complete the major or
minor requirements in Religious Studies and Jewish Studies. The class
fulfills the humanities requirement for non majors. The course is normally
offered once every two years, and the enrollment is 40 students.

Old Listing Effective Through Spring 2019:
Trends in Jewish life and thought since the French revolution; Judaism's
responses to the challenge of modernity. J ST (RL ST) 114 Modern
Judaism (3) (GH;US;IL)(BA) This course meets the Bachelor of Arts
degree requirements. The course explores the opportunities and
problems of Jews around the world from the late eighteenth century —
the “age of emancipation” — to the present time. Commercial, political,
and intellectual revolutions in the 1700s, giving rise to modern capitalism,
republicanism, and an emphasis on reason, combined to induce political
states to grant Jews unprecedented freedom. Emancipation introduced
new elements into Jewish life: religious change, personal choice, and
internal disagreements. In practical ways, life improved for Jews, as they
became more prosperous and assimilated. But freedom also increased
the chances for loss of identity, as liberals discarded some rituals as old-
fashioned and many individuals chose to give up traditional practices.
In addition, anti-Semitism persisted, although it was now, at times, more
difficult to detect. Traditional forms of hostility to Jews, such as heresy
trials and political expulsions, were replaced by subtle expressions of

KINES 44: Racquetball I (1-1.5 Credits: Maximum of 1.5 Credits) (GHA)
Old Listing Effective Through Spring 2019:

The course promotes health, fitness, and enjoyment of the game of racquetball. KINES 044 Racquetball I (1-1.5) (GHA) Kinesiology 044 is a course designed to give the student a comprehensive involvement in the game of racquetball. The basic fundamentals, rules, and strategies will be taught in a drill/modified game format until the student has developed skills and understanding sufficient to compete successfully. It is through the competition where the socialization, fitness, and enjoyment of the game will be enhanced. Hopefully, the desire to continue racquetball as a lifelong activity will result. Successful completion of Racquetball I will allow the student to choose an advanced level of this course if he/she desires. Students will be evaluated by a combination of written examinations/quizzes, skills testing, tournament performance, and subjective evaluation of skill development and game performance.

KINES 48: Tennis I (1.5 Credits) (GHA)
Old Listing Effective Through Spring 2019:

Description: A course designed to give students an appreciation of and proficiency in the skills, rules, and regulations of tennis. KINES 048 Tennis I (1.5) (GHA) Kinesiology 048 is a course designed to introduce students to the basic skills of Tennis. The initial focus will be twofold: stroke development and acquiring an understanding of the rules, regulations, and terminology of the game. Subsequent effort will emphasize the development of movement skills and a progression from hitting to rallying. In turn, students will learn to apply the above to live-game situations (both singles and doubles). Students will emerge from this course with beginning-level tennis skills as well as an appreciation for the requirements of higher-level tennis participation. Students will be evaluated by (but not limited to) a combination of techniques: written examinations, skills testing, performance standards, and subjective evaluation of skill level.

Changes Effective Summer 2019:

KINES 62: Introduction to Cardiovascular Activities (1.5 Credits) (GHA)
Old Listing Effective Through Spring 2019:

A course designed to give students an introduction to various types of cardiovascular training. KINES 062 Introduction to Cardiovascular Activities (1.5) (GHA) Kinesiology 062 has been designed to help students become acquainted with and proficient in many types of cardiovascular activities that can be used as part of a lifelong exercise program. Students should expect to participate in a variety of activities such as, but not limited to, walking/jogging, cycling, aquatics, aerobic dance, and cardiovascular exercise machine use. Additionally, students will have an opportunity to learn skills necessary to create safe cardiovascular exercise programs while considering safety and injury prevention. Kinesiology 062 is taught in a modular format including three to five separate types of cardiovascular exercise being chosen for the course content for the semester. Students will know which courses have been selected by listings in the semester Directory of Classes. Kinesiology 062 will provide a unique balance of training guidelines that can be applied to the various activities one pursues throughout life. Fundamental guidelines for safe exercise, progression, self-monitoring, etiquette, and injury prevention will be introduced throughout the course. Cardiovascular activities serves as a stepping stone to lifetime physical fitness and disease prevention. Self and group-paced activity will allow for each individual to maximize the benefits of exercise. Various evaluation techniques will be used to assess progress in Kinesiology 062. These techniques will include, but are not limited to, written examinations, performance assessments, and improvement-based evaluations of cardiovascular endurance and strength.

Changes Effective Summer 2019:

• Abbreviated Title

KINES 65: Jogging (1.5 Credits) (GHA)
Old Listing Effective Through Spring 2019:

A course designed to give students an understanding of and the ability to establish an exercise program involving jogging. KINES 065 Jogging (1.5) (GHA) Kinesiology 065 introduces students to the performance of jogging as a lifelong activity that helps maintain and enhance physical fitness and overall wellness. This course provides the information that the student needs to understand, organize, plan and implement a physical fitness program that features jogging as a primary activity. The centerpiece of this course is a progression of individually-paced jogs of varying lengths that are conducted over various terrains. Past activities have included 1.5-mile timed runs, 2 through 6 mile runs, interval runs, hill runs, and runs to various locations of interest. Locations include Beaver Stadium, the deer research pens, Sunset Park, and various other landmarks around campus and in the community. These activities are complemented by a series of classroom lectures on such topics as the physiology of exercise, jogging safety; goal-setting for personal health; principles and concept of physical fitness; training methods to address different jogging goals; and nutrition and weight control. Students also participate in team-based projects such as group-designed scavenger hunts, “landmark jogs,” and different team games and events that build group interaction skills. As a final project, each student is asked to define a measurable fitness goal and design a fitness jogging program to realize that goal. As part of this assignment, students assemble data to indicate that they have achieved their goal, and then identify and analyze the factors that contributed to their success. Students also have the opportunity to monitor their performance throughout the course using a variety of personal assessment inventories and instruments, such as logs and heart rate monitors. When a student completes Kinesiology 065, he or she will be able to identify the components of an effective physical fitness program and explain how jogging contributes to the success of this program; develop realistic fitness goals and design a jogging program to meet these goals; perform a variety of fitness jogging techniques; and understand how jogging promotes psychological well-being. Frequency of Enrollment: Ten to twelve sections every fall and spring semesters with a maximum of 30 students per section.
A course designed to identify the factors that contribute to student stress and develop strategies that will manage these factors. Students who receive credit for KINES 083 will not receive credit for KINES 082. KINES 083 Exercise for Stress Management (1.5) (GHA) Kinesiology 083 is a course designed to give the Penn State student an introductory understanding of the fundamental principles of stress management. This course will provide pertinent information the student needs to understand, organize, plan, and implement a preliminary stress management program. In this course, the Penn State student will follow a four-part concept of stress management that encourages the student to identify the factors that contribute to their stress and to develop strategies that will allow the student to manage these factors more effectively. In the first part of the course, material is presented that relates to the importance of knowing oneself and then establishing vehicles for placing oneself in relationships, environments, and situations that consistently support that “self.” In the second part of the course, the student is introduced to the elements of fitness and the research data available to date that supports the idea of fitness prescriptions to enhance the relaxation response and/or produce relevant changes in hormone levels. In conjunction with this knowledge and application of such knowledge, the students learn nutritional facts that allow them to understand the chemicals that foods possess that can produce a calming or increased energy effect. Combining this knowledge, the students develop a personal program to incorporate these fitness and nutritional goals into their own lives. In the third part of the course, students are introduced to Eastern literature that indicates that a mind needs to be trained in order to provide a calming effect, increased concentration, and efficiency. Students practice these skills to train their mind and be able to fully depend on their mind to perform more efficiently in time of stress. In the final part of the course, the students are introduced to the most current definitions of spirituality and are able to appreciate how their own spirituality is demonstrated in their lives. The course is taught through a variety of teaching methods which include lecture, workbook activities, and the repeated use of stress techniques demonstrated by the instructor and practiced by the students in class. This learning is supplemented and reinforced by listening to stress management audio tapes. The students reflect on specific stress concepts by writing self-reflection papers that allow them to reflect on how each concept is “showing up” in their own lives at the present time.

KINES 202: Functional Human Anatomy (4 Credits)
Old Listing Effective Through Spring 2019:

This course is designed to provide students a didactic and laboratory experience in functional human anatomy. Upon course completion, students should be able to comprehend and apply standard anatomical nomenclature pertaining to human movement science; comprehend structure and function of the musculoskeletal, neurological, respiratory, cardiovascular, lymphatic, gastrointestinal and endocrine systems pertaining to human movement science; comprehend the classification, structure and function of human anatomical articulations (joints) pertaining to human movement science; and comprehend the classification, structure, and function of human biological tissues (epithelium, connective, muscle and nervous) pertaining to human movement science. In the laboratory portion of the course students will learn to identify bone and capsuloligamentous tissues as well as their respective landmarks pertaining to human movement science; identify origins, insertions, actions and innervations of skeletal muscles pertaining to human movement science; and identify biomechanical characteristics and neuromuscular activity of human anatomy during the execution of active, passive as well as resistive movements. The laboratory portion of this course will use three-dimensional bone models, joint models, ligament models and cadaveric models to apply concepts covered in lecture.

KINES 350: Exercise Physiology (3 Credits)
Old Listing Effective Through Spring 2019:

Structure and function of the human body as applied to health, wellness, exercise, and sports. KINES 350 Exercise Physiology is a mid-to upper division course that will appeal to students with an interest in human biological adaptation. The course has two primary goals: First, students develop an understanding of the physiological adaptations that occur during and after endurance and resistance exercise. Second, students improve their comprehension of the differences between the acute exercise response and the changes that occur with chronic physical activity (exercise training). A major emphasis is placed on physiological systems as they relate to physical activity, exercise and health, and environmental stress; including, but not limited to, cardiovascular, respiratory, musculoskeletal, renal, neural, and metabolic. These systems are considered singly and in combination with regard to both exercise intensity and exercise duration. The depth of inquiry can range from molecular to organizational (whole-body). In addition, the mechanisms underlying the preventive and protective effects of exercise on human health and performance are discussed. The ability to apply concepts and principles of physiology to situations involving exercise, exercise training and decreased physical activity are highlighted, improving students’ abilities to develop and differentiate between paradigms that utilize exercise to improve athletic performance and those that utilize physical activity to promote health. Special topics of applied study may include aging; development; gender; body composition; disease and environmental extremes such as heat, cold, diving and altitude. Students are required to demonstrate via assessment, knowledge and understanding of the acute physiological response to exercise and physiological adaptations to programs of chronic resistance and endurance exercise. Quantitative and analytical skills are emphasized, especially as they pertain to exercise testing and exercise program evaluation. The ability to interpret scientific data as they pertain to exercise physiology is required. Background knowledge in biology, chemistry, physics, and exercise science represent the knowledge base from which the class is built and contributes to the mastery of concepts presented. This course is required for Athletic Training and Kinesiology majors.

Changes Effective Summer 2019:

- Prerequisite/Corequisite/Concurrent Courses

KINES 360: The Neurobiology of Motor Control and Development (3 Credits)
Old Listing Effective Through Spring 2019:

This 3 credit lecture course provides a rigorous presentation of the neuroscientific foundations of human movement control and coordination. This course introduces students to the cellular basis of neurophysiology, while emphasizing the contributions of both sensory and motor systems to motor control, coordination, and development. The course provides an in-depth presentation of systems neuroscience, with a special emphasis on the spinal, brainstem, and cortical contributions to movement. The course introduces the physiology and functional anatomy of the major sensory systems, motor systems, and sensorimotor integration networks, of the spinal cord, brainstem, and hemispheric structures in the central nervous system. These include spinal circuitry underlying reflexes and central pattern generators, basal ganglia organization and functional networks, cerebellar organization and functional networks, primary, secondary, and tertiary cortical areas associated with sensory and motor functions, neural tracts associated with ascending and descending sensory and motor systems, and cortical-subcortical loops. Students are introduced to dysfunction in these systems from both disease and traumatic processes, due to development disabilities such as cerebral palsy, degenerative processes including Parkinson's Disease, vascular disease including stroke, as well as traumatic brain injury. The overall objective of this course is to prepare Kinesiology students with a foundational level preparation in neuroscience, as required for understanding control of human movement, motor coordination, motor development and dysfunctions in these processes. This course forms one of four 300-level core courses that provide the basic science foundations that underlie the study of human movement, including exercise physiology, biomechanics, and the psychology of movement behavior. Neuroscience represents the fourth foundational discipline that contributes to human movement science. This course is presented from a hierarchical perspective, that introduces the cellular basis of neural communication, as well as cortical, brainstem, and spinal systems that underlie sensorimotor functions. It provides a thorough introduction to the central nervous system, focusing on a systems level approach to sensory and motor physiology and its impact on motor control and coordination, as well as both developmental, degenerative, and traumatic disorders in these processes. Considerations of applications of the material to the fields of athletics and rehabilitation medicine are often provided.
Developing progressions of exercises across the lifespan. The students throughout the course will work on acquiring skills for individual fitness exercises and activities from the foundation of the client management skills, various fitness environments, and specific lifespan (children, young adults, adults, and older adults). Understanding individuals in fitness improvement exercises and activities across the lifespan. The purpose of this course is to teach students how to effectively communicate, motivate, and engage individuals in fitness improvement exercises and activities across the lifespan (children, young adults, adults, and older adults). Understanding client management skills, various fitness environments, and specific individual fitness exercises and activities from the foundation of the course. Initially, students will learn appropriate and effective client management skills and will explore different instructional environments. Throughout the course, students will work on acquiring skills for developing progressions of exercises across the lifespan. The students will become familiar with contemporary fitness practices and exposed to a variety of exercises. Students will learn the associated execution cues and how to demonstrate the exercise. Students will apply content knowledge to instructing individuals how to properly engage in fitness exercises and activities that contribute to one's overall wellness. Students will be able to organize and execute a developmentally appropriate fitness program for a client that targets one or more of the components of fitness including: cardiovascular, muscular strength, agility, power, coordination, and flexibility. The primary objectives of the course are to develop an understanding of how to create an individualized fitness program that is appropriate for the individual and how to interact with the individual to promote engagement in regular exercise and activity and successful achievement of goals. Students will examine how the age and developmental level of the individual relates to ability and individual fitness programming. Students will learn the correct form of exercise execution and progressions of exercises. Content knowledge is integrated with application of skills in fitness exercise and instruction and will be put to use in a learning laboratory setting which students will have the opportunity to engage in hands-on instructional experiences.

Prerequisites: KINES 200, KINES 201

Changes Effective Summer 2019:

- Prerequisite/Corequisite/Concurrent Courses

KINES 367: Games and Sports Instruction Across the Lifespan (1 Credit)

Old Listing Effective Through Spring 2019:

How to understand, perform and deliver individual and team games and sports across the lifespan. This course is designed to provide students with the opportunity to research, experience, and reflect upon the content knowledge necessary to successfully instruct and coach a variety of individual and team games and sports across the lifespan. Students will gain experience in at least one activity from each of the four games classification groups (net and wall, invasion, striking and fielding, and target games). Students will develop the knowledge and skills necessary to instruct and coach various lifetime individual and team games and sports. The games and sports chosen for this course (basketball, soccer, golf, softball, and tennis) have been specifically selected for three reasons related to lifespan development and participation. First, they are consistently included in preschool through 12th grade school physical education curriculums. Second, they are popular extra-curricular activities, which are heavily attended by young people and adolescents. Finally, they represent popular adult recreational (pick-up games) and competitive activities (adult leagues) that are often continued over the lifespan. Emphasis is placed on the student’s competency in being able to effectively instruct and perform across multiple individual and team games and sports. Students will be expected to practically demonstrate a range of psychomotor techniques and skills for each given game and sport to a high level. Students will also need to display competence in a range of cognitive, affective and behavioral domain skills. This includes the ability to make appropriate game play decisions, communicate with teammates, understand and adhere to governing body rules/regulations and creating strategies to promote lifelong participation. Students will be assessed on their ability to instruct and coach the associated psychomotor skills, principles of play, and the official rules and regulations operated by each game or sport’s governing body in a peer-to-peer instructional setting. Practical activity learning experiences are designed to provide students with a sound knowledge of the concepts associated with skill acquisition including the class/team/client structure and organization, teaching and coaching techniques, and developmentally appropriate activities. Peer to peer instructing and coaching sessions will be used as an instructional strategy.

Prerequisite Courses: KINES 267

Changes Effective Summer 2019:

KINES 395G: Practicum in Athletic Training (3 Credits: Maximum of 3 Credits)

Old Listing Effective Through Spring 2019:

KINES 395G Practicum in Athletic Training (3) This course is designed to provide students didactic and practical clinical experiences in a variety of practice settings in which certified athletic trainers are commonly employed. This is the second clinical assignment after a student is admitted to the Athletic Training option within the Kinesiology major. Students will complete a minimum of 200-250 clock hours under the supervision of a certified athletic trainer in a variety of clinical settings. These settings include but are not limited to: outpatient sports medicine clinics, interscholastic athletic settings, and intercollegiate athletic settings. The objectives of this course include demonstrating proficiency in: assisting lower level students in developing athletic training skills and mastering level-appropriate competencies; demonstrate proficiency in evaluation and documentation of common athletic injuries; assist in the development and documentation of a plan of care for common athletic injuries; demonstrate proficiency in the development and documentation of clinical progression through a plan of care; participate in the application of therapeutic modalities and therapeutic exercise under the supervision of a certified athletic trainer. In this practical experience, the student is required to demonstrate an understanding of the classroom experiences completed to date and as required by the program option up to the current semester. This practicum has a prerequisite requirement of KINES 395F and is a prerequisite for the subsequent athletic training practicum, KINES 395I. Assessment is based on student performance written examinations, practical examinations, written assignments, and performance assessments by supervising athletic trainer(s). The course is designed to be taken the second semester following admittance to the athletic training option. It is offered every fall and spring semester with an enrollment of 15-20 students.

KINES 438: Administration and Issues in Athletic Training (3 Credits) (WF)
Old Listing Effective Through Spring 2019:

Theoretical and practical aspects for management of an Athletic Training professional practice and identifying contemporary issues related to the profession. KINES 438W Administration and Issues in Athletic Training (3) This course is designed to instruct students in the concepts and skills required for successful administration of an athletic training program and to understand and discuss contemporary professional issues attendant to the Athletic Training profession. General topics to be covered include theoretical basis of management, program management, human resource management, financial resource management, facility design and planning, information management, athletic injury insurance, legal aspects of sports medicine, ethical considerations in sports medicine, preparticipation physical and drug-testing, professional preparation issues, professional practice issues, and clinical practice issues. Experts from the community are brought in to lecture on several of the topics. The course meets for three hours per week and utilizes both lecture and discussion formats. Student assessment includes written examinations, written homework assignments, class participation and debates. This is a writing intensive course. Writing will be used to facilitate critical thinking about course material.

Written assignments are based on the technical writing requirements of an athletic training administrator and are graded on both their content and quality.

KINES 455: Physiological Basis of Exercise as Medicine (3 Credits)
Old Listing Effective Through Spring 2019:

Reviews the physiological basis of exercise for enhancing health and protecting against chronic diseases. KINES 455 Physiological Basis of Exercise as Medicine (3) This course is designed for students interested in developing a deeper understanding of the physiological mechanisms behind exercise as medicine. Course content will consist of a mixture of selected book chapters as well as contemporary review and primary research articles. This course begins with an overview of the current exercise deficiency problem, including the societal, behavioral, and economic changes of the past century which have contributed to the modern day epidemic of chronic inactivity-related disease. After developing an appreciation for the scope of these problems, students will be introduced to the "tools" needed to critically evaluate the association between exercise and/or inactivity on health and the mechanisms by which these associations may occur, including: basic principles of epidemiology, searching/reviewing scientific literature, and experimental design. The remainder of the course will be focused on how exercise/physical activity modifies molecular/tissue-level and integrative physiological function, and describes the extent to which these modifications confer either preventative or therapeutic benefit. This will be accomplished through a combination of lectures, in-class/take-home assignments, as well as student-led discussions. Students will also use the "tools" that they learned at the beginning of the semester to demonstrate and share knowledge with others; integration of this information may include a thorough analysis of a chronic condition including the pathophysiology, strength of evidence for exercise is medicine, and physiological actions of exercise in prevention or treatment. Students may also be given the opportunity to translate their knowledge from this course into educational materials (e.g., flyers, pamphlets, screensavers, fitness center displays, social media, etc) for use during “Exercise is Medicine” week.

LARCH 60: History of Design on the Land (3 Credits) (US) (IL) (BA) (GA)
Old Listing Effective Through Spring 2019:

A survey of the historical development of outdoor space in relationship to allied arts from early beginnings to this century. LARCH 060 History of Landscape Architecture (3) (GA)(BA) This course meets the Bachelor of Arts degree requirements. LARCH 060 is an introductory survey course of the historical development of designed outdoor space in relationship to the allied arts from early beginnings to present day. Although the profession of architecture was not named until 1858, with the award-winning design of Central Park by Frederick Law Olmsted and Calvert Vaux, the art of design on the land has been practiced since the beginning of time. It is the creation of human environments, inevitably expressing the creator’s perception of the relationship between humanity and nature. As with all art, the design of outdoor spaces reveals a culture's beliefs, values, and aspirations. If one studies design in different cultures and time periods, one can learn a great deal about that society. One can also begin to see history holistically, to detect trends, to relate yesterday to today, and to question the present and future. In the course we explore the outdoor spatial designs of history, with emphasis upon what these designs reveal about cultural attitudes toward nature, humanity and art. While we will address middle and far-eastern landscapes, the course focuses upon western civilizations with the second half focusing on American landscapes. The objective of this course is to present a concise analysis of the design of outdoor space with special emphasis on American design from 1800 to date. It is hoped that students will gain an increased awareness of landscape architecture as an art, and of their own built environment as a product of cultural values. Grades are based upon three examinations: two during the course and one during final exam period. Each examination is worth 33 1/3% of your final grade. Each exam will consist mostly of multiple-choice questions some of which may be based on slides; there may also be short answer questions. The specific format will be announced prior to each exam. Both lecture content and reading packet material will be covered on the exams. Computer tutorials are available and designed to aid in your understanding of the reading packet. As well, the lectures are taped and are available for review through the University’s Classroom Recording unit. To further aid you in understanding course content, a study guide will be posted every week at the web address.

LER 201: Employment Relationship: Law and Policy (3 Credits) (BA) (GS)
Old Listing Effective Through Spring 2019:

An examination of basic legal principles underlying the employment relationship and their social, political, and economic bases. LER 201 LER 201 Employment Relationship: Law and Policy (3) (GS)(BA) This course meets the Bachelor of Arts degree requirements. LER 201 provides students with an overview of the employment law relationship in the United States. The course begins with a study of the legal principles which affect the creation, development, and implementation of employment law. Several of the most fundamental employment law principles, such as the Master/Servant relationship and the theory of Agency, are adopted from the English common law. Students review the United States Constitution and the constitutional principles necessary to understand employment laws are examined. Students will study several federal and state statutes, including Worker's Compensation laws (with an emphasis on the Pennsylvania Worker's Compensation statutes), the Social Security Act, the Fair Labor Standards Act, the National Labor Relations Act, and Equal Employment Opportunity laws. As appropriate, the history, politics, and policies underlying these statutes are discussed. The necessity of understanding not only the legalities of EEO laws but also the societal need to eliminate discrimination results in a thorough study of Title VII of the Civil Rights Act of 1964, the Age Discrimination in Employment Act, the Civil Rights Act of 1991, and the Americans with Disabilities Act. Successful completion of this course equips students with a competency in employment law, transferable to an entry-level human resources or management position. Students write reviews of various involving different employment laws, including case law and precedents, evidence and interpretation. The course content naturally lends itself to gathering and analyzing information. Students analyze the application of law to various cases, judging the logical consistency between the principle of the law and the case to which it is applied. Library resources are an essential component; on-line resources increasingly are used. The course deals exclusively with laws regulating employment practices and relations among employees in the U.S. workplace. It concentrates on discrimination, equity, due process, social and civil conduct.

Changes Effective Summer 2019:

LER 460: Human Resources Ethics (3 Credits) (BA)
Old Listing Effective Through Spring 2019:

Ethics of human resources management. LER 460 LER 460 Human Resource Ethics (3)(BA) This course meets the Bachelor of Arts degree requirements. This course is designed for students who have received an introduction to human resources management and would like to spend some time thinking about the ethics of using various human resources practices. Students will devise their own personal codes of ethics, review the codes of others, and apply them to human resources situations. The course has limited enrollment to ensure participation in class discussions. Course work involves class discussion and presentations, outside reading, written in-class and out-of-class assignments, group and individual projects. All students are required to have completed a human resources or personnel management course, because the course assumes knowledge of this material for the students to be able to evaluate the ethical implications of human resources management decisions.

MATSE 201: Introduction to Materials Science (3 Credits)
Old Listing Effective Through Spring 2019:

Concepts of relationships between structure and thermal, optical, magnetic, electrical, and mechanical properties of metals, ceramics, glasses, and polymers.
Prerequisites: MATH 231 or CHEM 112

Changes Effective Summer 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATSE 402: Materials Process Kinetics (3 Credits)
Old Listing Effective Through Spring 2019:

A treatment of process kinetics including chemical reaction kinetics and momentum, energy and mass transport.

Changes Effective Summer 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATSE 402: Materials Process Kinetics (3 Credits)
Old Listing Effective Through Spring 2019:

Principles of crystal chemistry applied to structures, structural defects and properties of organic, inorganic, intermetallic, and metallic crystals.

Changes Effective Summer 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATSE 419: Computational Materials Science and Engineering (3 Credits)
Old Listing Effective Through Spring 2019:

Introduction to computational material science and engineering. Overview of the computational methods for materials, from atomistic to the continuum scale. MATSE 419 Computational Materials Science and Engineering (3) Modeling is a critically important tool in the field of materials. This course is designed to inform students about all areas of materials modeling, and to explore the use of modeling in different research areas. This is a hands-on undergraduate level course, mandatory for all MATSE students, covering current methods for modeling soft and hard matter, at the atomistic, meso and continuum scale levels. It consists of an overview of individual techniques of modeling from atomistic molecular dynamics and Monte Carlo, coarse-grained molecular dynamics, and multiscale modeling, to the continuum (e.g. SAFT, CALPHAD). It also includes a computer laboratory component with hands-on exercises. At the conclusion of the course, students will understand the physical basis and basic procedures of each technique.
Students will be able to understand the general literature in modeling and its connection with experimental work, as well as to communicate with experts in the field. From the laboratory practices, they will learn how the individual modeling techniques contribute to knowledge in each area, and to interconnect them with experimental information.

Prerequisites: CMPSC 200

Changes Effective Summer 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATSE 436: Mechanical Properties of Materials (3 Credits)
Old Listing Effective Through Spring 2019:

Fundamental relationships between structure and mechanical behavior of materials. MATSE 436 Mechanical Properties of Materials (3) The topics covered in this course are essential to students in the Materials Science and Engineering options, and these are also required for materials engineering courses nationally accredited by the professional societies. The course is taught at the 400 level because it requires the fundamental courses in mathematics and physics to be completed. The course also requires completion of an introductory course in materials science. This new course typically fits into the junior or senior year, when students in the major are understanding how the properties of materials can be changed by controlling the structure of materials. The course has also been designed such that students in other engineering majors can take this course as a technical elective. Some of the information in this course is used in laboratory courses for the major. The course is not required as a prerequisite for other courses.

Prerequisites: MATH 231, MATH 250 or MATH 251, MATSE201 or MATSE259, PHYS 211 or E SC 314

Changes Effective Summer 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATSE 441: Polymeric Materials I (3 Credits)
Old Listing Effective Through Spring 2019:

Manufacture of industrially significant polymers together with discussion of their major chemical, physical, and mechanical properties. MATSE 441 Polymeric Materials I (3) This 3-credit course focuses on about 40 commercially most important polymers together with the discussion of synthesis routes, industrial production processes, processing methods, physical and chemical properties, and applications.

Prerequisite: CHEM 210, MATH 231

Changes Effective Summer 2019:

- Description, Prerequisite/Corequisite/Concurrent Courses

MATSE 468: Ceramic processing and powder characteristics (3 Credits)
Old Listing Effective Through Spring 2019:

MATSE 468 Ceramics Laboratory III (1) This course will demonstrate to students the experimental techniques by which the key powder characteristics and powder processes are determined, how to analyze the data from the measurements, and to reveal the interaction between properties, processing and structure. The course concentrates on the importance of powder characterization, forming techniques, sintering and microstructure characterization in the processing of ceramics.

PreRequisite: MATSE462

Changes Effective Summer 2019:

- Prerequisite/Corequisite/Concurrent Courses

MATSE 471: Metallurgy Laboratory I (1 Credit)
Old Listing Effective Through Spring 2019:

A laboratory integrating experimental aspects of material contained in MATSE 402, 413, and 410, e.g. phase diagram determination, solidification micro-structures, etc. MATSE 471 Metallurgy Laboratory I (1) This course is largely an introduction to basic laboratory characterization techniques (optical microscopy, scanning electron microscopy, image analysis, hardness testing, thermal analysis). However, it also applies those characterization techniques in the context of Design of Experiments. This laboratory class also contains significant drills in technical writing.

Prerequisites: MATSE 430

Changes Effective Summer 2019:

- Prerequisite/Corequisite/Concurrent Courses

ME 456: Industrial Robot Applications (3 Credits)
Old Listing Effective Through Spring 2019:

Introduction to robotics, with emphasis on robot selection, programming, and economic justification for manufacturing applications. I E (M E) 456 Industrial Robot Applications (3) This course is a technical elective, and is normally taken by students in their Senior years. In this course, students learn about present and future status of robot applications, and are required to apply fundamental knowledge of physics and mathematics to develop software to analyze and control robots. The course deals with mechanics and control of robot manipulators and wheeled mobile robots. First, students are taught to analyze 3-D kinematics, statics and dynamics of robot manipulators. Then, control algorithms for robot manipulators are presented. Sensors, actuators and softwares used in industrial robots are discussed. In the end, kinematics and control of wheeled mobile robots are presented. During this course, application of computer, particularly Matlab, is emphasized as much as possible.

- Description

NURS 200M: Understanding and Applying Nursing Research – Honors Section (3 Credits) (H) (WF)
Old Listing Effective Through Spring 2019:
Introduction to methods and philosophy of empirical inquiry as applied to research in nursing and application to practice. NURS 200M Understanding and Applying Nursing Research – Honors Section (3) As an introductory research course NURS 200M will offer a broad survey of nursing research using multiple, active learning strategies. Students will be expected to come to class having completed the required readings so that they are ready for deeper intellectual engagement with the topics. Students will work individually and in cooperative learning groups on weekly projects inside and outside of class time, complete reflective journaling to enhance meta-cognition, and be expected to analyze and discuss nursing research from multiple viewpoints with a focus on integrity, global perspectives, and leadership in nursing research. To guide the student towards greater personal responsibility for their learning, NURS 200M will use a “blended” format of live and web-based course work. During the semester, each Honors student will identify an evidence based practice topic that could potentially lead to an undergraduate thesis to study in depth. For the rest of the semester, every in-class and out-of-class assignment will be tailored to their topic. The students will be taught how to conduct a peer review and then will practice this in formative review sessions on their peer’s projects. NURS 200M will culminate with the development of evidenced based practice paper which will be delivered to their peers as they would at a scientific meeting. This paper will also serve as the first draft of their thesis proposal.

NUTR 371: Dietetic Internship Application Development (1 Credit)
Old Listing Effective Through Spring 2019:
Provides Dietetic Option majors with techniques and information to specify and implement post-graduate educational and career plans in dietetics. NUTR 371 Dietetic Internship Application Development (1) This course is designed to assist students with the critical thinking skills required to prepare and implement post-graduate educational plans required to progress in the field of nutrition and dietetics. Students wishing to become dietitians must apply to and be selected for a professional practice experience also known as a dietetic internship following graduation. The process is competitive, complex and requires self awareness of professional strengths and weaknesses as well as
knowledge of the individual characteristics and objectives of specific dietetic internships. Through group lecture and discussion, this course will introduce students to this process and help them with the research skills needed to clarify their goals. Students will then meet individually with faculty to discuss their goals and objectives and the internships they would like to apply to.

Students will complete an internship application for at least one of the internships they plan to apply to. They will develop a professional portfolio to assist them in presenting their skills and expertise to potential employers or internship directors. These portfolios are expected by most internship directors during interviews for internship positions. Students will develop a personal statement or letter of intent appropriate for at least one of the internships the student is planning to apply to. Through individual meetings with faculty the student will clarify the message of professional accomplishments and goals in the statement. The student will be assisted with preparation for the interview process. Students will also become familiar with alternative career options should they not receive a match as anticipated.

NUTR 391: Introduction to Professional Nutrition Experience (1 Credit)
Old Listing Effective Through Spring 2019:

Provides dietetics students with an introduction to the skills necessary to obtain and complete an advanced field experience in nutrition. NUTR 391 Introduction to Professional Nutrition Experience (1) This course is designed to assist Nutritional Science students in the dietetics option with the development and procurement of a 400 hour professional experience in the field of nutrition and dietetics. To facilitate this process, students will develop a job specific resume, research various appropriate organizations, and develop a detailed organization research report. Students will write professional cover letters. Students will then conduct an occupational interview with a potential preceptor from the organization to ascertain whether this is an appropriate learning environment for their goals. When a field experience site is identified they will complete all of the required agreement documents needed to begin the experience for NUTR 495 credits the following summer or semester. Students in the dietetics option of Nutritional Sciences must also fulfill specific competencies required by the professional accrediting agency ACEND (the Accreditation Council for Education in Nutrition and Dietetics). In additional to preparing for a field experience, students completing NUTR 391 will fulfill three specific learning outcomes: demonstrate assertiveness, advocacy and negotiation skills appropriate to the situation; locate, understand and apply established guidelines to a professional practice setting; and identify and describe the roles of others with whom the Registered Dietitian (or nutrition professional) collaborates in the delivery of food and nutrition services.

NUTR 452: Nutritional Aspects of Disease (3 Credits)
Old Listing Effective Through Spring 2019:
Disturbances in metabolism related to human disease processes; principles of nutrition in therapy.
Prerequisites: NUTR 446
Changes Effective Summer 2019:

NUTR 456: Community Nutrition (3 Credits) (US)
Old Listing Effective Through Spring 2019:
Programs and policies of nutrition-related activities of community agencies; factors pertinent to nutrition education; relationship of cultural and social identity to foods and nutrition. NUTR 456 Community Nutrition (3) (US) Programs and policies of nutrition-related activities of community agencies; factors pertinent to nutrition education; theory and practice of community nutrition within the dietetics, nutritional sciences, and public health nutrition professions; emphasis on differences in United States values, traditions, attitudes, beliefs and customs and United States social identities in relation to one another within a community-based framework. This course provides knowledge in the content area of community nutrition which is tested on the national registration examination for registered dietitians. Students are evaluated based assessments designed to increase personal cultural awareness and sensitivity, literacy level of nutrition education materials, credible resources for nutrition information, community needs assessment and community nutrition intervention programming and assessment. In particular, the assessment of a community’s nutritional needs and the design of a nutrition intervention serve to highlight the cultural diversity within the United States and increase the student’s ability to locate and evaluate information about nutrition and food practices of diverse groups living in the United States. Students will focus on immigrant groups, ethnically-or racially-diverse groups, Native American tribes or loosely affiliated groups of people who have common socioeconomic status or food practices or food patterns (e.g., poverty, food insecure with/without hunger, vegans, vegetarians, Kosher). Community nutritional needs assessment and interventions assignments also serve to assess whether the United States cultures objectives of this course are successfully met. In addition, each assignment requires that students consider cultural and socioeconomic factors as determinants of diet, nutritional status and health status.
Changes Effective Summer 2019:

PHIL 1H: Basic Problems of Philosophy (3 Credits) (GH) (H) (BA)
Old Listing Effective Through Spring 2019:
Introduction to central philosophical themes, including the mind/body problem, the existence of God, ethical problems, the nature of reality.
Changes Effective Summer 2019:

PHIL 8: Philosophy and Feminism (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:
Explores diverse feminist philosophies of culture and knowledge, and examines gender’s role in accounts of reality, truth, morality, and justice. PHIL (WMNST) 008 Philosophy and Feminism (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course familiarizes students with concepts and problems of feminist philosophies. It seeks to examine the feminist critique of theories of knowledge and power, as well as the cultural, political, and linguistic implications of this critique. Students will be expected to evaluate existing epistemological assumptions, social organization, the character of power, and language from the vantage of contemporary feminism and its historical context. Students will be graded on participation, case study analyses, a group presentation and response, and a final paper. WMST/PHIL 008 satisfies the GH requirement and is geared towards non-Philosophy majors. It may be used to fulfill the minor requirement in philosophy. This course is offered once a year with an enrollment of 25-200 students.
Cross-Listed Courses: WMNST 8
Changes Effective Summer 2019:

PHIL 10: Critical Thinking (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:
Discussion of the validity, soundness, and fallacies of everyday language use and reasoning; informal logic; and manipulative arguments and propaganda. PHIL 010 Critical Thinking (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course is designed to bring students to a critical awareness of the function of argumentation in the various forms it takes, both in the academic realm of logic, as well as the everyday world of television, newspapers, and other forms of communication. Students will examine how arguments are constructed and the means that are used to make an argument convincing. They will learn to critically analyze arguments in order to detect careless language use and fallacies. They will also learn various types of arguments. Students will be graded on weekly problem-solving homework assignments and re-writes, collaborative fallacy presentations, a midterm exam, and a comprehensive final exam. PHIL 010 satisfies the

NUTR 490: Nutrition Seminar (3 Credits) (WF)

**PHIL 13: Philosophy, Nature, and the Environment (3 Credits) (BA) (GH)**

Old Listing Effective Through Spring 2019:

Studies competing historical and contemporary conceptions of nature, their philosophical foundations, and their implications for environmental problems and public policy. PHIL 13 Philosophy, Nature, and the Environment (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course familiarizes students with concepts regarding the central and very old philosophical problem of describing and understanding nature and the place of human beings in it. This philosophical discourse has evolved in the past 25 years into a firm sub-discipline of philosophy itself, usually under the title of "Environmental Philosophy" or "Philosophy of nature." The discipline addresses a complex of crucial problems of contemporary society, politics, and ethics revolving around the relation of human beings and the environment. Students will learn the various and conflicting views on nature and the environment, and they will develop the ability to critically navigate these various positions as well as the assumptions underlying the contemporary environmental debate. Students will be graded on participation, case study analyses, a group presentation and response, and a final paper. PHIL 13 satisfies the GH requirement and is geared towards non-Philosophy majors. It may be used to fulfill minor requirements in philosophy. This course is offered once a year with an enrollment of 50-200 students.

**Changes Effective Summer 2019:**

**PHIL 100: The Meaning of Human Existence (3 Credits) (BA) (GH)**

Old Listing Effective Through Spring 2019:

Explores differing views of the significance of human life, the meaning of freedom, and the way to a meaningful life. PHIL 100 The Meaning of Human Existence (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. The course is primarily for non-Philosophy majors and for students considering a major in Philosophy. It is designed to evoke disciplined reflection on basic philosophical questions which are often raised in an unmethodical and uninformed way. It will attempt to approach philosophical thinking from the perspective of everyday concerns, rather than from the various readings which will be done for the course. The general question of the meaning of human existence will furnish a rubric under which philosophical ideas and evaluations enter into ordinary life. The course will offer the opportunity to look at a variety of ways in which human beings have addressed the issues involved in the question of the meaning of life. The philosophical figures whose works will be examined include de Beauvoir, Freud, Marcel, Marcuse, Jaspers, and Sartre. Students will be graded on participation, comparison/contrast papers, a position paper, a collaborative presentation, and a comprehensive final exam. PHIL100 satisfies the GH requirement and it may be used to fulfill the major and/or minor requirements in philosophy. This course is offered once a year with an enrollment of 35-50 students.

**Changes Effective Summer 2019:**

- Description
- Title
- Abbreviated Title

**PHIL 14H: Philosophy of Love and Sex (3 Credits: Maximum of 3 Credits) (H) (BA) (GH)**

Old Listing Effective Through Spring 2019:

Critical introduction to philosophical issues in ethics, social and political theory, religion, art, metaphysics, and epistemology. PHIL 083S First-Year Seminar in Philosophy (3) (GH;FYS)(BA) This course meets the Bachelor of Arts degree requirements. First-Year Seminars in Philosophy provide critical introductions to fundamental philosophical issues and problems. Each first-year seminar develops a broad overview of historical and contemporary thought through readings, discussions, and student writings. In this way, students will gain an understanding of important figures, ideas, problems, and theories that have shaped and have continued to influence thought and practice around the world. Students will examine diverse viewpoints that will allow them to understand a wide range of views and challenge them to defend their own positions. First-year seminars involve active use of writing, speaking, and group projects. They provide opportunities for gathering information, analyzing problems, and synthesizing diverse perspectives. Finally, each first year seminar in philosophy allows students to link theory to their own lives.

**PHIL 101: Pragmatism and American Philosophy (3 Credits) (BA) (GH)**

Old Listing Effective Through Spring 2019:

An introduction to American thought and its relation to American culture, with a focus on the development of pragmatism. PHIL 101 Pragmatism and American Philosophy (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course, as with other 100-level philosophy department courses, is intended for Liberal Arts majors and others likely to take philosophy courses rather than for philosophy majors. (The analogous course for majors is PHIL 401.) Ph101 is designed to familiarize students with introductory concepts, problems, and history of the American philosophical tradition. The course will explore basic themes in American thought such as nature, God, experience, democracy, progress and process, truth and meaning, focusing especially on the pragmatist philosophers. The course will examine the ways in which
American philosophy develops its unique paths as distinct from the European tradition and what this legacy means today. Students will be expected to critically evaluate the problems raised by these philosophers as well as their influences on American society, politics, and culture. One of the principal goals is to enable students to understand better this rich philosophical tradition – for many students, their own heritage – and its place as both formative of and critical of the contemporary American philosophical, social, moral, religious, and aesthetic landscape. Students will be graded on participation, comparison/contrast papers, a position paper, a collaborative presentation, and a comprehensive final exam. PHIL 101 satisfies the GH requirement and it may be used to fulfill major and/or minor requirements in philosophy. This course will be offered once a year with an enrollment of 35 to 50 students.

PHIL 102: Existentialism and European Philosophy (3 Credits) (BA) (GH)

*Old Listing Effective Through Spring 2019:*

Introduction to European philosophy and issues of life, death, meaning, and absurdity, with a focus on existentialism and its development. PHIL 102 Existentialism and European Philosophy (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course, as with other 100-level philosophy department courses, is intended for Liberal Arts majors and others likely to take philosophy courses rather than for philosophy majors. (The analogous course for majors is PHIL 402.) PHIL 102 introduces students to European philosophy over the past two hundred years. The course begins with the overview of major philosophical themes and developments, and then examines these developments in existentialism, philosophical literature, and postmodernism. The course will focus on metaphysical, moral, and social issues concerning the nature of reality, the nature of the self, the basis of values, and the relations between individuality and community. Students will critically consider these issues in required comparison/contrast papers, a position paper, a collaborative project, and a comprehensive final exam. This course serves as an introduction to the discipline and prepares students for further study in the history of philosophy. PHIL 102 satisfies the GH requirement and it may be used to fulfill major and/or minor requirements in philosophy. It is offered once a year with an enrollment of 35-50 students.

PHIL 105: Title: Introduction to Philosophy of Law and Legal Ethics (3 Credits) (BA) (GH)

*Old Listing Effective Through Spring 2019:*

Description: Historical and contemporary philosophies of law; concepts of responsibility, property, rights, and justice; and ethical issues in legal practice. PHIL 105 Introduction to Philosophy of Law and Legal Ethics (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course, as with other 100-level philosophy department courses, is intended for Liberal Arts majors and others likely to take philosophy courses rather than for philosophy majors. (The analogous course for majors is PHIL 405: Philosophy of Law.) PHIL 105 will provide students with a critical overview of central positions and figures in philosophy of law and teach students interpretative and critically evaluative methods for distinguishing and attempting to resolve philosophical problems within these positions. This course will investigate the history of philosophy of law and the diverse views of human nature inherent to central philosophical positions. The course will examine the relations between human values, ethics, and law as well as how these relations affect the organization of broader social, political, and religious institutions. Students will be graded on participation, case study analyses, a group presentation and response, and a final paper. PHIL 105 satisfies the GH requirement and it may be used to fulfill major and/or minor requirements in philosophy. This course is offered once a year with an enrollment of 25 to 100 students.

PHIL 105H: Introduction to Philosophy of Law and Legal Ethics (3 Credits) (H) (BA) (GH)

*Old Listing Effective Through Spring 2019:*

Historical and contemporary philosophies of law; concepts of responsibility, property, rights, and justice; and ethical issues in legal practice.

**Changes Effective Summer 2019:**
PHIL 106: Introduction to Business Ethics (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Studies ethical foundations of business and ethical problems in business practices such as advertising, international trade, labor relations, and marketing. PHIL 106 Introduction to Business Ethics (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course, as with other 100-level philosophy department courses, is intended for Liberal Arts majors and others likely to take philosophy courses rather than for philosophy majors. (The analogous course for majors is PHIL 406: Business Ethics). PHIL 106 will teach students central philosophical and ethical problems in the history of business practices. It will investigate the nature of business and business practices, their relation to the human condition more generally, and their relation to and effect on human values. The course will develop a student’s critical skills in evaluating both the assumptions and the philosophical foundations and justifications for business and economic systems, the relation between morality and specific business practices, and central positions and figures in the history of philosophical analysis of these questions. Historical figures will include Aristotle, Hume, Adam Smith, Mill, Marx, Hayek, and Keynes. The course will investigate business as a central feature of modern society and culture, how it evolved, and the philosophical implications for contemporary society and human values. Students will be graded on participation, case study analyses, a group presentation and response, and a final paper. PHIL 106 satisfies the GH requirement and it may be used to fulfill the major and/or minor requirements in Philosophy. This course is offered once a year with an enrollment of 35-50 students.

PHIL 107: Introduction to Philosophy of Technology (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

The character of technology; its relation to human values; philosophical assumptions in its development; and how it transforms the world. PHIL (S T S) 107 Introduction to Philosophy of Technology (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. Introduction to the Philosophy of Technology surveys a number of recent thinkers on the meaning of technology, its role in our and other societies, and critiques of its effects. Through readings of classic works on philosophy of technology as well as investigations of contemporary media reports and representations of technology, the course will engage your thought about what technology “means” to you and the values embedded in it. This course meets the broad general education needs of students from the humanities, social sciences, engineering, agriculture, as well as professional tracks such as business and pre-law. As technology is increasingly fundamental to our modern way of life in all its aspects, this course gets students asking question about why we do what we do with technology and how it affects us, others around us, and the environment. Required readings typically include collections of essays ranging in reading level from popular journalism to mass-market fiction to historical analyses of technological change and indepth philosophical investigations of the concept of technology. Classroom time will be organized around lecture, regular classroom discussion, and a number of student-led debates. Evaluation will be based upon short writings, a small research paper, a midterm, and a final. The course meets the requirement for General Education in the Humanities (GH). Crosslisted with both S T S and PHIL it compliments other S T S courses (notably, S T S 101 and 233) and is a pre-requisite for S T S/ Phil 407. The course is offered biannually and is capped at 40 students.

PHIL 108: Introduction to Social and Political Philosophy (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Critical introduction to political authority, rights, justice, community, inequality, power, pluralism, and other contemporary, social, and political issues. PHIL 108 Introduction to Social and Political Philosophy (3) (GH) (BA) This course meets the Bachelor of Arts degree requirements. This course, as with other 100-level philosophy department courses, is intended for Liberal Arts majors and others likely to take philosophy courses rather than for Philosophy majors. (The analogous course for majors is PHIL 408: Social and Political Philosophy.) PHIL 108 will critically examine central philosophical positions, ideologies, and figures in the history of social and political philosophy, their relation to contemporary society, politics, and culture, and the significance of social and political philosophy for human values. The course will investigate the nature of political and social philosophies and systems of social and political practice towards providing students with a greater critical understanding of the nature of social and political organization, their effects on human values, and the traditional philosophical problem of what constitutes the good society. Students will be graded on participation, comparison/contrast papers, a position paper, a collaborative presentation, and a comprehensive final exam. PHIL 108 satisfies the GH requirement and it may be used to fulfill major and/or minor requirements in Philosophy. This course will be offered once a year with an enrollment of 35 to 50 students.

Critical introduction to political authority, rights, justice, community, inequality, power, pluralism, and other contemporary, social, and political issues.

Changes Effective Summer 2019:
PHIL 113: Introduction to Philosophy of Literature (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Examines philosophical ideas in literature, literary forms in philosophies, style and genre, and relation of philosophy, literature, writing, and culture. PHIL 113 Introduction to Philosophy of Literature (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course, as with other 100-level philosophy department courses, is intended for Liberal Arts majors and others likely to take philosophy courses rather than for Philosophy majors. (The analogous course for majors is PHIL 413.) PHIL 113 will provide a critical overview of the relation between philosophy and literature, philosophical literature, and literary philosophy, discussing specific historical figures, movements, and theories on the topic. The course will seek to provide students with an understanding of the nature of philosophical aesthetic values in literary expression, as well as ideological expressions within literature. It will investigate the nature of philosophical writing and of literary writing in order to critically interpret and assess their differences and similarities as representative of the nature of the human values and the human condition. Students will be graded on participation, comparison/contrast papers, a position paper, a collaborative presentation, and a comprehensive final exam. PHIL 113 satisfies the GH requirement and it may be used to fulfill the major and/or minor requirements. This course will be offered once a year with an enrollment of 35 to 50 students.

PHIL 115: Introduction to Philosophy and Education (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Examines the nature and goals of education, the philosophical foundations of educational theories, and their economic, political, and cultural implications. PHIL 115 Introduction to Philosophy and Education (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course, as with other 100-level philosophy department courses, is intended for Liberal Arts majors and others likely to take philosophy courses rather than for Philosophy majors. (The analogous course for majors is PHIL 415: Philosophy of Education.) PHIL 115 provides students with a critical survey of philosophies of education and philosophical conceptions of the relations between knowledge, truth, experience, and human values. The course will consider the historical contexts from which philosophical theories about education have arisen and their ideological political, social, and economic implications. In addition, it will develop a student's critical skills regarding self-education and the development of education in contemporary society towards a greater understanding of the philosophical problems that underlie differing philosophical views of education. Students will be graded on a collaborative annotated bibliography project, a collaborative position paper, evaluations of peer papers, and a comprehensive final exam. PHIL 115 satisfies the GH requirement and it may be used to fulfill major and/or minor requirements in Philosophy. This course is offered once a year with an enrollment of 35-50 students.

PHIL 124: Introduction to Philosophy of Religion (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Explores the meaning of religious belief and experience, the existence of God, ideas of spirituality, and the question of immortality. PHIL 124 Introduction to Philosophy of Religion (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course, as with other 100-level philosophy department courses, is intended for Liberal Arts majors and others likely to take philosophy courses. (The analogous course for majors is PHIL 424: Philosophy of Religion). PHIL 124 is designed to give students a coherent overview of the various dimensions of religion elucidated when religion is examined from a philosophical perspective. Topics explored in class will include religious belief, religious experience and spirituality, arguments for the existence of God, contemporary philosophical problems in their relation to religion, religion and science, as well as religion and the future. The class will also examine the differences between Western, Eastern, and other conceptions of religion and spirituality. Major historical authors and their works will be examined, including Anselm, Aquinas, Confucius, Descartes, Lao Tse, and Peirce. Students will be required to compare and contrast differing perspectives towards religion, as well as to critically evaluate these positions. The class will also be oriented towards making relevant connections between historical and contemporary views and issues. Students will be graded on participation, comparison/contrast papers, a position paper, a collaborative presentation, and a comprehensive final exam. PHIL 124 satisfies the GH requirement and it may be used to fulfill major and/or minor requirements in Philosophy. This course is offered every other year with an enrollment of 35-50 students.

PHIL 125: Introduction to Theories of Knowledge (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Historical and contemporary views on the foundations and conditions of knowledge, belief, justification, and truth, conception, perception, and interpretation. PHIL 125 Introduction to Theories of Knowledge (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course, as with other 100-level philosophy department courses,
is intended for Liberal Arts majors and others likely to take philosophy courses rather than for Philosophy majors. (The analogous course for majors is PHIL 425) PHIL 125 will provide a critical survey of key concepts, problems, and figures in the history of epistemology and in contemporary studies in theory of knowledge. The course will develop the student's analytical and critical skills through studying the foundations and justifications of knowledge, knowledge claims, and the very nature of knowledge and belief fundamental to all human endeavor. This class develops a broad, coherent overview of fundamental issues of belief, knowledge, truth, justification, and inquiry. It emphasizes the thought of major, influential figures and their works, such as Plato, Aristotle, Descartes, Spinoza, Locke, Kant, Kierkegaard, Wiftgenstein, Peirce, and Heidegger. Students will be graded on quizzes, re-writing and expanding quizzes, a collaborative research project and paper, and a comprehensive final exam. PHIL 125 satisfies the GH requirement and it may be used to fulfill major and/or minor requirements in Philosophy. This course is offered once a year with an enrollment of 35-50 students.

PHIL 126: Introduction to Metaphysics (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Explores the nature of being and reality, the problem of free will and the mind/body problem, identity, and causality. PHIL 126 Introduction to Metaphysics (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course, as with other 100-level philosophy department courses, is intended for Liberal Arts majors and others likely to take philosophy courses rather than for Philosophy majors. [The analogous course for majors is PHIL 426]. PHIL 126 will provide a critical survey of key concepts, problems, and figures in the history of metaphysics and in contemporary studies in metaphysics and anti-metaphysical views. The course will develop the student’s analytical and critical skills through studying the foundations of accepted belief regarding the nature of reality, being, life, mind, and God, and different philosophical arguments regarding the nature of these metaphysical questions. The thought of major, influential figures and their works will be emphasized, such as Plato, Aristotle, Aquinas, Ockham, Descartes, Locke, Kant, Hegel, Kierkegaard, Jams, Husserl, and Merleau-Ponty. Students will be encouraged to articulate their own views in response to diverse metaphysical positions as well as life itself. Students will be graded on quizzes, re-writing and expanding quizzes, a collaborative research project and paper, and a comprehensive final exam. PHIL 126 fulfills the GH requirement and it may be used to fulfill major and/or minor requirements in Philosophy. This course is offered once a year with an enrollment of 35-50 students.

PHIL 127: Introduction to Philosophy of Mind (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Problems and concepts of mind and consciousness including mind-brain identification, the nature of subjectivity, identity, and artificial intelligence. PHIL 127 Introduction to Philosophy of Mind (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. The course will provide a critical survey of key concepts, problems, and figures in the history of philosophy of mind and in contemporary studies in philosophy of mind. The course will develop analytical and critical skills through study of basic principles and logical evaluation of arguments in philosophy of mind. As a general education humanities course, this class develops a broad, coherent overview of the nature of mind, the relation of the mental to the physical, and the relations between scientific and philosophical approaches to the nature of mind; emphasizes the thought of major, influential figures and their works, such as Descartes, Locke, Kant, Hegel, Dewey, Heidegger, Wiftgenstein, Ryle, Searle, Armstrong, and Denneft; develops competence in interpretation and critical assessment of human values and their place in human subjectivity, self-identity, and intentional experience, and considers the relation of these values to cognitive experience and structures. Students will be graded on participation, three comparison/contrast papers, a position paper, a collaborative presentation, and a comprehensive final exam. PHIL 127 satisfies the GH requirement and it may be used to fulfill major and/or minor requirements in Philosophy. This course is offered once a year with an enrollment of 35-50 students.

PHIL 129: Introduction to Philosophy of Language (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:

Studies the nature of meaning in language, how we acquire language, communication, signs, and language as descriptive of reality. PHIL 129 Introduction to Philosophy of Language (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. This course, as with other 100-level philosophy department courses, is intended for Liberal Arts majors and others likely to take philosophy courses rather
than for Philosophy majors. (The analogous course for majors is PHIL 429.) PHIL 129 will provide a critical survey of key concepts, problems, and figures in the history of philosophy of language and in contemporary studies in linguistic philosophy. The course will develop the student’s analytical and critical skills through study of the philosophical and logical foundations of language systems and the role of language problems in relation to philosophical problems. Students will be encouraged to use the linguistic and logical tools they study in the course in evaluating the content of the arguments presented. As a general education humanities course, this class develops a broad, coherent overview of the nature of language, the philosophical assumptions and methodological commitments involved in theories of language, and the relation of language to reality. The class emphasizes the thought of major, influential figures and their works, such as Plato, Aristotle, Locke, Berkeley, Herder, Cassirer, Peirce, Carnap, Wittgenstein, Austin, Searle, and Rorty. Students will be graded on participation, three comparison/contrast papers, a position paper, a collaborative presentation, and a comprehensive final exam. PHIL 129 satisfies the GH requirement and it may be used to fulfill major and/or minor requirements in Philosophy. This course is offered every other year with an enrollment of 35-50 students.

PHIL 200: Ancient Philosophy (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:
Examines the thought and influence of major Western thinkers from the pre-Socratics to the neo-Platonists, emphasizing Plato and Aristotle. PHIL (CAMS) 200 Ancient Philosophy (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. PHIL (CAMS) 200 satisfies the GH requirement. As part of the history of philosophy sequence required of undergraduate philosophy majors, this course is designed to present students with a survey of ancient Western philosophy beginning with the pre-Socratics, continuing with Plato (Socrates), Aristotle, and the post-Aristotelians, and concluding with neo-Platonists and early Christians. Emphasis will be placed on Plato and Aristotle. The class will examine the historical and cultural foundations from which ancient Western philosophy grew, and will explore issues which were focal points of ancient philosophy, such as the nature of reality, change, permanence, truth, form, and matter. Students will critically consider these issues in required comparison/contrast papers, a position paper, a collaborative project, and a comprehensive final exam. Students will also be evaluated on class participation. The course is prerequisite to Philosophy 400-level courses and it will be offered once a year with an enrollment of 35 students. For students studying ancient languages, particularly Greek, this course will offer an important exposure to the interpretation of philosophical text. For Classical and Ancient Mediterranean Studies majors, PHIL/CAMS fulfills the requirement under Supporting Courses for three credits in Greek or Roman literature and language, civilization, or archaeology; and it also fulfills the requirement for six credits for study at any level from an approved list in the general field of Classics and Ancient Mediterranean Studies.

Cross-Listed Courses: CAMS 200

PHIL 202: Modern Philosophy (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:
Examines the thought and influence of major Western thinkers from Descartes to Kant, emphasizing rationalism and empiricism, and critical philosophy. PHIL 202 Modern Philosophy (3) (GH)(BA) This course meets the Bachelor of Arts degree requirements. As part of the history of philosophy sequence required of undergraduate philosophy majors, this course is designed to examine the thought and influence of the major Western thinkers of Modern Philosophy: Hobbes, Descartes, Leibniz, Spinoza, Locke, Hume, and Kant. The historical, philosophical, and political foundations of this philosophical era will be examined, as well as topics that were prominent intellectually during this time, such as causality, the relation between mind and body, how we come to know things and the degree of certainty we can attribute to our knowledge, and whether or not we can prove God’s existence. Students will be required to critically analyze the texts of the philosophers studied in class, as well as to compare, contrast, and critically evaluate the ideas of these thinkers. They will be graded on participation, comparison/contrast papers, a position paper, a collaborative presentation, and a comprehensive final exam. PHIL 202 satisfies the GH requirement, it may be used to fulfill the minor requirements in Philosophy, and it is a prerequisite to the 400-level courses. This course will be offered once a year with an enrollment of 35 students.

PHIL 204: Twentieth Century Philosophy (3 Credits) (BA) (GH)
Old Listing Effective Through Spring 2019:
Examines the thought and influence of major Western thinkers of the century, including pragmatists, phenomenologists, existentialists, critical theorists, and feminists. PHIL 204 20th Century Philosophy (3) (GH) (BA) This course meets the Bachelor of Arts degree requirements. As part of the history of philosophy sequence required of undergraduate philosophy majors, this course provides an overview of the central currents of 20th-century philosophy. This course in combination with the others of the sequence allows a consistent approach to history of philosophy. This historical sequence will comprise the core, of all philosophy major options. As a general education humanities course, this class: 1) develops a broad, coherent overview of the historical development of western philosophy in the 20th century, and the philosophical problems, methods, and results of this developments; 2) emphasizes the thought of major, influential figures and their works, such as Peirce, James, Dewey, Frege, Moore, Russell, Carney, Wittgenstein, Husserl, Heidegger, Sartre, Merleau-Ponty, debeauvoir, Addams, Stanton, Rich, Chodorow, MacKinnon, Irigaray, Horikeimer, Adorno, Habermas; 3) develops competence in interpretation and critical assessment of human values and their place in theory and practice as set forth in philosophically and historically central views that span all areas of philosophical thought; 4) leads the students to appreciate and think critically about the ends of human action and final, non-instrumental, aesthetic values in moral, political, and aesthetic experience (including attention to the metaphysical and epistemological foundations of this experience) as set forth in the work of major philosophers of the 19th century; 5) teaches students how to communicate clearly, think logically, and evaluate critically by providing them a critical survey of philosophical theories that are both important in the historical development of western thought and important for understanding continuing and contemporary philosophical issues today; and, 6) meets fully all its stated humanities

PHOTO 101: Culture of Photography (3 Credits)
Old Listing Effective Through Spring 2019:

This is a non-technical introductory photography course where students photographically and intellectually examine the role of photography in modern culture. PHOTO 101 expands students2 depth of appreciation, knowledge, and understanding of the medium by providing them with a creative and intellectual background to realize its broad cultural scope. The course accomplishes this through photographic and written explorations of social, political and ethical issues relevant to photography. Photography wielded unprecedented influence as a primary visual medium and students constantly use photography in their personal lives as both a communications tool and as a creative outlet. The ubiquitous smart phones with built in cameras are responsible for much of this explosive popularity with social media providing appealing venues for publicly displaying photography. Over the first decade of the new millennium, social media sites saw the volume of photo uploads increase dramatically, eventually exceeding 10 billion per month. In light of photography being a key medium students use to share and communicate information about themselves to the world at large, the course is designed to help them to think critically and ethically about the photographs they take, share, view and use. The major course teaching topics will address a broad range of contemporary issues relevant to how photography and culture affect one another. Students will become aware of photography as a constantly evolving medium, whose relatively short historical trajectory has culminated in the development of an easily accessible egalitarian art form that bridged the digital divide to interact intimately with personal computing, cell phone communications, the Internet, and social media. In the course, students will take photographs to fulfill photographic assignments, share them with peer audiences, and then engage in critical conversations regarding the aesthetic and communicative meaning and effectiveness of the photos. They will also engage in written assignments where the course presents them with case studies regarding current issues in photography such as, the impact of technological developments in the medium, ethical uses of photography, photography as free speech, and photography as social media. Students will conduct research on the topics and develop informed written position statements, which they will share with their classmates for peer evaluation and feedback. In addition, students will engage with selected readings regarding aspects of photography addressed in the major teaching topics.

Changes Effective Summer 2019:

PHYS 1: The Science of Physics (3 Credits) (BA) (GN)
Old Listing Effective Through Spring 2019:

Historical development and significance of major concepts, with emphasis on the nature of physics and its role in modern life. (For students in non-mathematical fields.) PHYS 001 The Science of Physics (3) (GN)(BA) This course meets the Bachelor of Arts degree requirements. Introduction to the basic concepts of physics at a conceptual level for students in non-technical majors. Provides a broad survey of the history, concepts, and applications of physics including topics such as classical mechanics in one- and two-dimensions, Newton's laws of motion, work and energy, momentum, rotational motion, vibration, sound, and waves, heat and the laws of thermodynamics, electricity and magnetism, including simple electrical circuits, and topics in 20th century physics, including relativity and quantum mechanics. Course objectives include the development of an understanding of the scientific method, its application to physics problems of historical interest, as well as to modern applications; providing an appreciation of the historical role played by physics in the development of modern science, its role in important cultural and societal issues, and in understanding the basic laws of nature, as applied to everyday experience, natural phenomena, or applications technologies (old and new); the development of scientific literacy, to help motivate the many connections of physics to other
fundamental scientific fields and applications disciplines; providing experience in problem solving and the conceptual understanding of physics, and emphasizing the recurring role of a few important concepts, cutting across many scientific disciplines, such as the fundamental laws of classical mechanics, the basic laws of thermodynamics (including conservation of energy), as well as applications of modern quantum theory.

**PHYS 211: General Physics: Mechanics (4 Credits) (BA) (GN)**

Old Listing Effective Through Spring 2019:

Calculus-based study of the basic concepts of mechanics: motion, force, Newton's laws, energy, collisions, and rotation. PHYS 211PHYS 211 General Physics: Mechanics (4) (GN)(BA) This course meets the Bachelor of Arts degree requirements. Calculus-based introduction to classical mechanics, including such topics as: measurement, dimensional analysis, motion in one-dimension, vectors, motion in 2 and 3 dimensions, relative and circular motion, force and dynamics, Newton's Laws, friction, kinetic energy, work, potential energy, energy conservation, systems of particles, center of mass and momentum, elastic and inelastic collisions, rotation (moments of inertia), rolling motion, torque, angular momentum, static equilibrium, gravitational force and Kepler's laws, gravitational potential energy, oscillations, waves (transverse and longitudinal, superposition of waves). This course is designed to provide students with a working knowledge of the elementary physics principles mentioned above, as well as their applications, and to enhance their conceptual understanding of physical laws. Students attend two lectures, one recitation session, and one two-hour lab/activity period per week. Use of a combination of computer-based and traditional lab exercises is expected and collaborative learning exercises will be used in both lab and recitation settings. The introduction of data acquisition and analysis methods (often making use of modern computer tools) will be stressed in the laboratory/activity period. Course evaluation is based on a combination of regular homework sets and/or quizzes, reports from the lab/activity period, midterm and final exams and other evaluative tools. The course is an important prerequisite for later work in many science and engineering disciplines.

Changes Effective Summer 2019:

- Description
- Prerequisite/Corequisite/Concurrent Courses

**PLANT 220: Gardening for Fun and Profit (3 Credits) (GN)**

Old Listing Effective Through Spring 2019:

Fundamentals of designing, planting and maintaining residential landscapes and edible gardens for students with minimal/intermediate horticulture knowledge. PLANT 220 Gardening for Fun and Profit (3) (GN) The objective of PLANT 220 (GN), Gardening for Fun and Profit is to provide students with science-based fundamentals of establishing and maintaining residential landscapes and edible gardens. The course provides information that is especially useful to those with minimal to intermediate knowledge of horticultural plants. A background in gardening or landscaping is not needed. Class topics are presented by guest speakers who are scientists and experts in the topic area. Major topics include proper plant selection, soil preparation for establishing plantings, the basics of seedling, growing transplants and planting, the basics of planting and maintaining trees and shrubs, avoiding common mistakes in the garden and landscape, gardening resources, storage and processing fruits and vegetables for home use and ideas for making profit from gardening activities. This course includes a weekly laboratory session where students gain practical skills needed for developing and maintaining residential landscapes and edible gardens through hands-on activities and field trips.

**PLSC 10: Scientific Study of Politics (3 Credits) (GS)**

Old Listing Effective Through Spring 2019:

This course introduces students to both the scientific study of politics and the way that study advances our understanding of political actors, events, processes, and institutions. PL SC 010 Scientific Study of Politics (3) (GS) This course introduces students to both the scientific study of politics, and the way that study advances our understanding of political actors, events, processes, and institutions. It provides information about the elements of scientific reasoning, and introduces systematic approaches to studying politics through the lens of important puzzles and questions about international relations, comparative politics, and American politics. Students learn about relevant data sources, as well as how to interpret data appearing in graphs and tables. The course consists of three parts. The first part of the course offers an overview of the elements of scientific inquiry including causal explanation, empirical verification, theories and hypotheses, and dependent and independent variables. The second part of the course examines dominant approaches to studying politics including experiments, observational methods such as surveys and elite interviewing, formal models, archival research, and computational methods including text analysis. Each approach will be presented using a similar format. Students will be introduced to the approach through a combination of lectures and assigned readings. They will then look at and learn about data sources suited to and consider questions or puzzles that can be addressed by each approach. Careers that make use of the analytic skills associated with each approach also will be discussed. The final part of the course considers the benefits of scientific approaches over less systematic analysis and the challenges inherent in trying to explain complex political behavior, institutions, and events. By the end of the course, students will understand what it means to political science: i.e., to ask questions about political phenomena, form theories related to those questions, collect data, pick an approach to analyze the data, and draw inferences from the analysis.

Changes Effective Summer 2019:

- Description

**PLSC 177: Politics and Government in Washington DC (1-3 Credits) (BA) (GH)**

Old Listing Effective Through Spring 2019:

The course centers on a Spring Break trip to Washington DC, with students meeting on campus before and after the trip. PL SC 177 Politics and Government in Washington DC (1-3) This course centers on a Spring Break trip to Washington DC, where students will meet with their members of Congress, get briefings at foreign embassies and international organizations, meet with leaders of federal government agencies, participate in seminars led by interest groups and political party officials and consultants, and tour government offices and facilities. The class will meet before the trip to discuss the history, culture, and context of politics and government in the capital city of the United States and will
continue to meet after the trip so that students can analyze what they have learned about politics and government in Washington as a result of their experiences during the trip. The course is open to and appropriate for students in all majors.

**Changes Effective Summer 2019:**
- Number to 177N
- Description
- Add General Education Designations GH and Inter-Domain
- Add B.A. Humanities Designation

**PPEM 120: The Fungal Jungle: A Mycological Safari From Truffles to Slime Molds (3 Credits) (GN)**  
**Old Listing Effective Through Spring 2019:**

This course is an introduction to the world of fungi and their impact on humans and the environment around us. PPEM 120 The Fungal Jungle: A Mycological Safari From Truffles to Slime Molds (3) Fungi are a fascinating group of organisms that we encounter in everyday life. Apart from the mushrooms on our pizza or mold in our bathtub, fungi are important plant pathogens that severely interfere with agricultural production, cause diseases in humans and insects, and have a major role in ecosystems. The aim of this course is to introduce students to the world of fungi and review the important functions of fungi in human society, to educate students in basic concepts of fungal biology that are scientifically interesting and important to human society, and to train students to understand both basic and current topics in science. Topics to be covered include the structure and classification of fungi, the ways in which fungi interact with other organisms as pathogens or beneficial partners, the contributions fungi make to ecosystem functioning, and the ways in which humans use fungi and products derived from them. We will discuss examples that students are familiar with and encounter in their everyday life. The course also has an informal lab section that includes several class activities and visits. Class activities are designed to be done in small teams and promote team-work learning, problem solving and critical thinking skills. Students will learn how to isolate, grow and identify fungi, among other activities, culminating in a fungal feast. For example, students will keep a journal on fungi, take quizzes, and deliver a presentation of their favorite fungus, among other assignments. This course is intended to be an introductory science course to non-science majors and will provide important general science knowledge as well as specific details about fungal biology.

**Changes Effective Summer 2019:**
- Description

**PPEM 300: Horticultural Crop Diseases (3 Credits) (GN)**  
**Old Listing Effective Through Spring 2019:**

Diseases of horticultural crops are examined stressing their cause, diagnosis, management and national and international importance. PPEM 300 Horticultural Crop Diseases (3) Diseases of horticultural crops are examined stressing their cause, diagnosis, management and understanding the roles they play in national and international trade and bio-security concerns. The biology of plant diseases involving a broad range of biotic and abiotic plant pathogens will be discussed. The objectives are that the student completing the course will 1) be able to describe the causes of plant diseases in general and horticultural crop diseases in particular; 2) be able to explain the interactions that occur among the plant, the environment, and biotic and abiotic agents during disease development; 3) have the ability to diagnose and explain the management of key diseases of horticultural crops; and 4) be able to describe the economic and social impact that plant diseases have on horticultural crops, including how the world trade of these crops can result in the global spread of pathogens important to other agricultural crops and native plants in the environment. The course is recommended for majors in horticulture and urban forestry but is appropriate for everyone interested in growing plants for enjoyment or profit or in maintaining the health of horticultural crops. This course provides an introduction to plant pathology in general and can be followed by more in-depth courses in plant-microbe interactions, mycology, nematology, phytophysiology, air pollution impacts on terrestrial ecology, or forest pathology.

- Description

**SOC 3H: Honors Introduction to Social Psychology (3 Credits) (H)**  
**BA**  
**Old Listing Effective Through Spring 2019:**

This course is an honors course that enables students to learn, apply, and evaluate basic social psychology concepts, theories, and research. SOC 003H Honors Introduction to Social Psychology (3) Social Psychology is the scientific study of human minds and behaviors. It focuses on human development, social interaction between individuals, group influences on individuals, and interaction between groups. Social Psychology is an interdisciplinary area of study that bridges sociology and psychology. However, sociological contributions to this field will be emphasized. This course is especially appropriate for students in the Schreyer Honors College and Paterno Fellows.

**Changes Effective Summer 2019:**
- Description

**SOC 30: Sociology of the Family (3 Credits) (BA) (GS)**  
**Old Listing Effective Through Spring 2019:**

Family structure and interaction; functions of the family as an institution; cross-cultural comparisons. Students may take only one course for General Education credit from SOC 030 or HD FS 129. SOC 030 Sociology of the Family (3) (GS)(BA) This course meets the Bachelor of Arts degree requirements. Family, in all of its forms, is one of the most fundamental and enduring of social institutions. Because almost everyone grows up in a family, we are accustomed to thinking about the ways in which our values, personalities, and goals have been shaped by family experiences. In this course, however, we will examine families and family relationships from a sociological perspective. In particular, we will consider how our private, taken-for-granted family experiences are related to social factors such as gender, race, ethnicity, social class, the economy, and cultural attitudes and values. Through this course, students will (1) gain a better understanding of current U.S. family patterns and trends, based on empirical research, (2) be able to analyze and interpret family patterns and trends using sociological concepts and theories, (3) evaluate family-related information from multiple perspectives, (4) develop a greater appreciation of the diversity and choices in family life today, and (5) clarify their own values with respect to marriage and family life. The instructors encourage discussion and questions in all sections. Assessment is based on objective tests taken in class and writing assignments. These assignments may include library and Internet research, original empirical research, or a journal in which students describe their developing ideas about marriage and family life. This course meets a general education requirement in the social and
behavioral sciences. Students may take only one course for General Education credit from SOC 030 or HD FS 129.

SPAN 315: Spanish and Spanish-speakers in the U.S. (3 Credits)  
(US) (GH)

Old Listing Effective Through Spring 2019:

In this course, we investigate various aspects of the language(s) and language behaviors of U.S. Latinos. SPAN (LTNST) 315 Spanish and Spanish-speakers in the U.S. (3) (GH;US) The course is premised on the idea that language is a crucial component in the formation of identity. To understand Latina/o identity formation in the U.S., then, one must analyze what role languages—Spanish and English—have played in identity formation. The class commences with a brief historical assessment of the various U.S. Latino communities, including Mexican-American, Cuban-American, and Puerto Rican communities. Such a historical purview proves significant in the study of the cultural traditions that persist in these communities, chief among these, the Spanish language. In exploring the Spanish language in U.S. Latino communities, we consider several major sets of questions, among them the following: In what ways do the languages of U.S. Latino communities differ from those of monolingual Spanish- (and English-) speaking communities? What factors contribute to the maintenance and loss of Spanish in these communities? How does language contribute to the creation of individual and societal identity? How is language exploited in the representation of other U.S. Latino cultural traditions? We consider these questions across a variety of genres: poetry, prose (autobiography in particular), film, art, television, and music. These texts reveal how social environments determine language use as well as how artists have used language to reshape social environments, through, for example, the development of new language practices such as Spanish-English code switching. The course also connects these cultural practices to debates on Spanish in public life and policy.

- **Prerequisite/Corequisite/Concurrent Courses**

TURF 425: Turfgrass Cultural Systems (3 Credits)

Old Listing Effective Through Spring 2019:

A study of turfgrass maintenance practices and how their interrelationships can be utilized to develop management systems. TURF 425 Turfgrass Cultural Systems (3) TURF 425 is offered to students that are in their final year of the turfgrass science major. They are expected to use the information provided in the course and previously learned agronomic principles and concepts, to develop management and problem solving skills. More in depth information pertaining to various management systems are presented which expands upon prerequisite course content Students am expected to be able to integrate different turfgrass maintenance practices into sound management strategies that lead to the production of high quality turfgrass areas. The management compromise between aesthetic quality and Functionality is stressed and students are challenged to recognize those cultural practices that influence the balance between the two. There are three 100 point exams during the semester. The majority of the content in each exam will come from the information provided since the previous one. Several unannounced quizzes will be given throughout the semester (usually 12 to 13 with only the 10 best counting toward the grade). A soil testing exercise is also included whereby the student is expected to take an appropriate sample from a site of their choosing submit it to the soil testing tab, interpret the soil test results, and make a written recommendation based upon the results. The course will help the student better understand how the maintenance practices and pest control programs learned in other courses inter-relate in the overall management scheme for a given turfgrass site. It will also prepare them for TURF 436 (Case Studies) where they will be expected to work in teams in problem solving situations. The facilities provided in ASI building, associated greenhouses, and the turfgrass field research plots as well as the campus grounds provide ample support for the effective delivery of the course.

Program Changes

Advertising/Public Relations, B.A. (ADPR_BA)  
Effective April 12, 2018:

- **Strategic Communications Option Placed on Enrollment Hold: Not Accepting New Students.**

Agribusiness Management, B.S. (AGBM_BS)  
Effective Summer 2018:

- **Moved MIS 204 from Prescribed Courses to Additional Courses.**

- **Added AGBM 170, IST 110, and SRA 111 to Additional Courses.**

Anthropology, B.A. (ANTH_BA)  
Effective Fall 2018:

- **Revised Additional Courses Area.**

- **Increased Electives.**

- **Changed Requirements for the Major to 37 credits.**

Archaeological Science, B.S. (ARSCI_BS)  
Effective April 12, 2018:

- **Program Placed on Enrollment Hold: Not Accepting New Students.**

Athletic Training, B.S. (ATHTR_BS)  
Effective Fall 2018:

- **Revised Entrance to Major Requirements.**

• Removed KINES 141 from Additional Courses.

**Biological Anthropology, B.S. (BANTH_BS)**
Effective April 12, 2018:
• Program Placed on Enrollment Hold: Not Accepting New Students.

**Computer Engineering, B.S. (Engineering) (CMPPEN_BS)**
Effective Summer 2018:
• Moved CMPSC 121 and CMPSC 122 from Prescribed Courses to Additional Courses.
• Removed EBF 200 from Additional Courses.
• Added CMPSC 131 and 132 to Additional Courses.

**Corporate Innovation and Entrepreneurship, B.S. (CIENT_BS)**
Effective Summer 2018:
• Revised Entrance-to-Major Requirements.
• Revised Degree Completion Requirements.
• Revised Program Description.
• Removed MGMT 451 from Prescribed Courses.
• Added MGMT 427W to Prescribed Courses.
• Added MGMT 365, MGMT 420, MGMT 480, MGMT 485, and MGMT 486 to Additional Courses.

**Dance, B.S. (DANCE_BS)**
Effective June 12, 2018:
• Program Placed on Enrollment Hold: Not Accepting New Students.

**Deafness and Hearing Studies, Minor (DHS_UMNR)**
Effective Fall 2018:
• Removed CSD 495B from Supporting Courses and Related Areas.
• Added SPLED 403A and 403B to Supporting Courses and Related Areas.

**Enterprise Resource Planning with SAP, Certificate (SAPBC_UCT)**
Effective Fall 2018:
• Revised Program Description.
• Removed SCM 465 and MIS 304 from Required Courses.
• Added MIS 404 to Required Courses.

**Japanese Language, Minor (JAPNS_UMNR)**
Effective Spring 2019:
• Increased the Requirements for the Minor from 18 to 18-20 credits.
• Removed JAPNS 296, 297, 421, 422, 423, 424, 425, 426, and 450 from Additional Courses.
• Added JAPNS 430, 431, 432, 433, and 434 to Additional Courses.

**Information Sciences and Technology/Finance, Minor (ISFIN_UMNR)**
Effective Fall 2018:
• Removed FIN 302, 406, 407, 408, 409, 427, 456, 496, and 497 from Additional Courses.
• Added RPTM 101, 325, and 330 to Prescribed Courses for the Outdoor Recreation Management Option.
• Added CAS 283 and CMPSC 203 to Additional Courses for the Outdoor Recreation Management Option.

Science, B.S. (Altoona) (SCIAL_BS)
Effective May 11, 2018:
• Program Placed on Enrollment Hold: Not Accepting New Students.

Security and Risk Analysis, B.S. (SRA_BS, SRAAL_BS, SRABK_BS, SRA_CA_BS)
Effective Summer 2018:
• Revised Program Description.
• Moved SRA 311 from Prescribed Courses for the Major to Prescribed Courses for the Information and Cyber Security Option.
• Moved CMPSC 101 from Prescribed Courses to Additional Courses for the Major.
• Added ECON 104, GEOG 128, IST 140, CMPSC 121, MATH 22, 26, 40, 41, 110 and 140 to Additional Courses for the Major.
• Removed GEOG 40 from Additional Courses for the Major.
• Removed Supporting Courses Area for the Major.
• Moved IST 440 from Prescribed Courses for the Major to Additional Courses for the Information and Cyber Security Option.
• Added SRA 440W to Additional Courses for the Information and Cyber Security Option.
• Added SRA 268, 311W, IST 452 and SRA 440W to Prescribed Courses for the Intelligence Analysis and Modeling Option.
• Removed ECON 302 from Prescribed Courses for the Intelligence Analysis and Modeling Option.

FAQs
1. Where can I find a list of General Education courses and information about requirements?
   • For information about General Education requirements, please see the General Education (p. 2640) section in this Bulletin.

2. The General Education requirements have changed. Do the new requirements apply to me?
   • The new General Education requirements apply to students who start at Penn State in Summer 2018 and later. Requirements have not changed for students who began at Penn State before this semester. The older set of requirements can be found in the Archives page. Additional information is available on the Office of General Education website (https://gened.psu.edu).

3. What does the blue keystone symbol mean?
   • The keystone indicates that the course is designated as a General Education course. See the degree requirements for your program to identify the General Education courses that are required. Not all courses marked with the keystone count as meeting General Education requirements when required within your program. See the program requirements and speak to an adviser regarding General Education courses that count or do not count toward the General Education requirements.

4. Where can I find bachelor of arts degree requirements?
   • Bachelor of arts degree requirements are included in the program requirements section for B.A. programs. You may also see the B.A. requirements in the Academic Information (p. 2615) section.

5. Where can I find a list of courses and course descriptions?
   • You may find courses and descriptions several different ways within the Bulletin. You may navigate to the full listing of courses and descriptions from the Courses (p. 2735) link in the top navigation menu. You may also scroll over any course number within the Bulletin to see the course description in a course bubble. Search for specific courses through the search option on the homepage or in the search functions throughout the Bulletin.

6. What does a red box around a credit number mean?
   • Updates to courses and programs may become effective at various times throughout the year. A red box indicates that a change to the course may have occurred and/or a program update is in progress. You must speak with your adviser regarding the amendments to learn how this affects your academic plan.

7. Which Undergraduate Bulletin should I use?
   • Your official record of General Education (p. 2640) requirements are found in the Bulletin that matches the semester in which you enrolled at Penn State. The program requirements are found in the Bulletin year for the semester in which you were admitted into the major program. See the Archive (p. 15) page to find past Bulletins.

8. Where can I find past Bulletins?
   • Past Bulletins can be found on the Archive (p. 2640) page, which can be accessed from any page in the Bulletin's top navigation menu.

9. When will the Undergraduate Bulletin be updated?
   • The Bulletin will be updated at the beginning of each semester (fall, spring, and summer). Changes that occur between updates are identified on the Changes (p. 2520) page.

10. Why are there some courses listed in the Bulletin that I can't schedule?
    • The Bulletin Course Description section displays all courses that are currently active at Penn State. Not all of these courses are taught every academic semester or year. To view courses that are available for enrollment by semester, please view the LionPATH Class Search (https://www.lionpath.psu.edu/psc/CSPRD/EMPLOYEE/HRMS/c/SA_LEARNER_SERVICES.CLASS_SEARCH.GBL?Page=SSR_CLSRCH_ENTRY&Action=U).

11. Where can I find information about minors?
    • Minors are a specific type of program and may be found through the search process by filtering by minor (http://bulletins.psu.edu/programs/#filter=filter_24).

12. Where can I find the Graduate Bulletin?
    • The Graduate Bulletin is located at bulletins.psu.edu/graduate (http://bulletins.psu.edu/graduate).

Have a question we didn’t include? Please let us know by emailing bulletins@psu.edu.

Academic Information
Degree and Program Types
Baccalaureate Degrees
An award signifying a rank or level of educational attainment. Particular types of baccalaureate degrees identify educational programs having common objectives and requirements. Degree programs may provide academic, preprofessional, or professional experiences and preparation. Majors lead to a baccalaureate degree. Each student must select a major within a baccalaureate degree type. If options are offered within a major,
a student selects one. The student may also elect to enroll in a minor to supplement the major. Alternatively, the student may seek to enroll in multiple majors within the same type of baccalaureate degree or to enroll in a simultaneous degree program. A baccalaureate program of study shall consist of no less than 120 credits. Students may elect to take courses beyond the minimum requirements of a degree program.

Filter by DEGREE to view baccalaureate degree options.

**Major**

A plan of study in a field of concentration within a type of baccalaureate degree. Colleges and other degree-granting units may have common requirements for all of their majors. Each major may have requirements identified in Prescribed, Additional, and Supporting Courses and Related Areas categories. Elective credits are not considered part of the major.

READ SENATE RECORD: 1/23/90, Appendix IV (http://senate.psu.edu/curriculum/guide-to-curricular-procedures/glossary)

**Option**

A specialization within a major that should involve at least one-third of the course work credits required for the major, but need not be more than 18 credits. All options within a major must have in common at least one-fourth of the required course work credits in the major. A student can only be enrolled in an option within his/her own major.

**Minor**

A minor is defined as an academic program of at least 18 credits that supplements a major. A minor program may consist of course work in a single area or from several disciplines, with at least 6 but ordinarily not more than half of the credits at the 400 course level. Total requirements are to be specified and generally limited to 18 to 21 credits. Entrance to some minors may require the completion of a number of prerequisites, including courses, portfolios, auditions, or other forms of documentation that are not included in the total requirements for the minor. All courses for a minor require a grade of C or above.

When a student graduates, completion of a minor is recorded on his/her transcript by the Registrar, and the student receives an official certificate certifying completion of the minor. (The certificate is given with the diploma.)

**Concurrent Majors/Sequential Majors**

At the baccalaureate or associate degree level, students may be approved for admission to more than one major under the Concurrent Majors program. A Concurrent Majors program is one in which students take courses to concurrently meet the requirements of at least two majors, with graduation for all majors in the program occurring during the same semester. Concurrent majors must all be at the baccalaureate or associate degree level. Under the Sequential Majors program, upon graduation from an associate or baccalaureate degree program, a student may apply for re-enrollment in another undergraduate degree program.

Any student requesting more than one major program shall, for each major, meet the same acceptance standards and graduation requirements as met by all other students. Colleges and departments may identify and should publish any combinations of majors that would not be approved for more than one major program. In general, an undergraduate student may not combine a general major with a departmental major within the same college.

READ SENATE POLICY 60-00: Completing More Than One Undergraduate Major Program (Concurrent Majors and Sequential Majors) (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/60-00-completing-more-than-one-undergraduate-program/#60-00)

READ SENATE POLICY 60-10: Concurrent Majors Program (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/60-00-completing-more-than-one-undergraduate-program/#60-10)

READ SENATE POLICY 60-20: Sequential Majors Program (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/60-00-completing-more-than-one-undergraduate-program/#60-20)

**Associate Degrees**

Majors that lead to two-year associate degrees are available at most of Penn State's undergraduate locations. These majors provide concentrated instruction to prepare graduates for specialized occupational assignments, except for the Letters, Arts, and Sciences major, which provides graduates with a general education and some specialization in their fields of interest.

More than twenty associate degree majors lead to either the Associate in Arts degree, the Associate in Engineering Technology degree, or the Associate in Science degree. Credits received for Penn State associate degree program courses may be applicable to a particular baccalaureate degree program at the discretion of the appropriate college and department. World Campus also offers two-year degrees.

Filter by DEGREE to view associate degree options.

**Certificates**

Undergraduate certificates, formal awards showing the satisfactory completion of a postsecondary educational curriculum, are designed primarily for students who are beyond the compulsory age for high school. Penn State offers credit or noncredit certificates, which are awarded in academic, vocational, and continuing professional education. Certificates often reflect emerging academic areas, necessary professional development requirements, or requirements that do not constitute degree programs. They may be supplements or enhancements to existing degree programs or may be stand-alone. For-credit certificates often provide "step-up" opportunities to degree programs allowing for milestones of progress. Certificates are not certifications, which are awarded by governmental and professional agencies.

A certificate consists of a group of courses, typically 9-15 credits, developed, supervised, and evaluated by the offering academic unit(s). Students must earn at least two-thirds (2/3) of the credits used to complete a certificate at Penn State. All credit courses for a certificate require a grade of ‘C’ or higher. For students enrolled in degree programs, at least six (6) credits of the certificate must be unique from the Prescribed Courses required in the major. Noncredit courses require satisfactory completion as defined by the unit offering the certificate. Requirements for a certificate may be completed at any campus location offering the specified courses for the certificate.

All students enrolling in certificates must be defined as Penn State students. New students enrolling in undergraduate credit certificates must enroll as non-degree regular students.

For certificates earned in conjunction with a major, students must declare the intent to earn the certificate prior to being awarded their associate or baccalaureate degrees. Students completing independent certificates should declare their intent to earn the certificate during the final semester of course work. Certificates cannot be awarded retroactively.
READ POLICY M-12: GUIDELINES FOR UNDERGRADUATE CREDIT CERTIFICATES (http://undergrad.psu.edu/aappm/M-12-guidelines-undergraduate-credit-certificates.html)

Degree Requirements

All programs have specific requirements described on the program page. Some common requirements that apply broadly across the university are described here.

General Education

General Education is the heart of the undergraduate experience. From the sciences to the arts and humanities, General Education at Penn State prepares students to thrive personally and professionally in our diverse global society. Through General Education, students acquire skills, knowledge, and experiences for living in interconnected contexts, making life better for themselves, others, and the larger world. As professions become more dynamic and career paths less predictable, the ability to place information into context through critical thinking and the ability to develop solutions to complex problems and make ethical decisions become essential skills for a resilient workforce. Creative and analytical practice prepares students of all disciplines to be resourceful in the application of their knowledge towards complex problem solving, and to communicate that knowledge in a variety of forms.

MORE INFORMATION ABOUT GENERAL EDUCATION (p. 2640)

Bachelor of Arts Degree Requirements (9-24 credits)

Courses with a Bachelor of Arts attribute satisfy these requirements.

Foreign Language (0-12 credits)

Student must attain 12th credit level of proficiency in one foreign language. See the Placement Policy for Penn State Foreign Language Courses (p. 2636).

B.A. Fields (9 credits)

Humanities, Social and Behavioral Sciences, Arts, Foreign Languages, Natural Sciences, Quantification (may not be taken in the area of the student's primary major; foreign language credits in this category must be in a second foreign language or beyond the 12th credit level of proficiency in the first language).

Other Cultures (0-3 credits)

Select 3 credits from approved list. Students may count courses in this category in order to meet other major, minor, elective, or General Education requirements, except for the General Education US/IL requirement.

Other University Requirements

The First Year Engagement, Cultural Diversity and Writing Across the Curriculum requirements can be found on the Other University Requirements page.

MORE INFORMATION ABOUT OTHER UNIVERSITY REQUIREMENTS (p. 2646)

Total Minimum Credits

A minimum of 120 degree credits must be earned for a baccalaureate degree. The requirements for some programs may exceed 120 credits. Students should consult with their college or department adviser for information on specific credit requirements.

READ SENATE POLICY 82-20: GENERAL REQUIREMENTS (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#82-20)

Quality of Work

Candidates must complete the degree requirements for their major and earn at least a 2.00 grade-point average for all courses completed within their degree program.

READ SENATE POLICY 82-40: CUMULATIVE GRADE-POINT AVERAGE REQUIREMENTS (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#82-40)

Limitations on Source and Time for Credit Acquisition

The college dean or campus chancellor and program faculty may require up to 24 credits of course work in the major to be taken at the location or in the college or program where the degree is earned. Credit used toward degree programs may need to be earned from a particular source or within time constraints. For more information, check the Suggested Academic Plan for your intended program.

READ SENATE POLICY 83-80: LIMITATIONS ON SOURCE AND TIME FOR CREDIT ACQUISITION (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#83-80a)

Opportunities for Credit Acquisition

Credits are awarded on the semester-hour basis. The distribution of time between class activities and outside preparation varies from course to course; for the average student, however, at least forty-five hours of work per semester planned and arranged by the University faculty are required to gain 1 credit.

Course credits may be acquired: 1) by instruction as defined in Policy 42-23 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-23); 2) by examination as defined in Policy 42-50 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-50); 3) by transfer from other regionally accredited colleges and universities defined in Policy 42-82 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-82); 4) by transfer from colleges and universities outside the United States as defined in Policy 42-84 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-84); 5) by validation from colleges and universities that are not regionally accredited but award associate degrees or higher as defined in Policies 42-81 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-81) and 42-86 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-86); 6) by educational experiences in the Armed Services as defined in Policy 42-98 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-98); 7) by educational credit for Training Programs in Non-collegiate Organizations as defined in Policy 42-99 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-99); 8) by the Advanced Placement program of the College Board as defined by Policy 42-92 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-92); 9) by the College-Level Examination of the College Board as defined in Policy 42-94 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-94); 10) by International Secondary Schooling as defined in Policy 42-96 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-96).
credential requirements: to enter a major once they have satisfied the following minimum academic requirements by their college and major. Additional information about credit acquisition can be obtained by contacting the Undergraduate Admissions Office, The Pennsylvania State University, 201 Shields Building, Box 3000, University Park, PA 16804-3000; 814-865-5471, or by contacting an admissions officer at any University location.

SUPPORTING COURSES AND RELATED AREAS

Select 1 course each from four different major/program offerings: 12

A&A, AMST, ART H, CAMS, COMM, CMILT, ENGL, HIST, INART, MUSIC, PHIL, RL ST, THEA, or courses from the School of Humanities (Penn State Harrisburg, the Capital College) approved list

Total Credits: 18

Bachelor of Philosophy

The Bachelor of Philosophy degree is the only one not offered through any college or school but rather on a University-wide basis. This degree allows students to plan their own programs, in conjunction with a faculty preceptor, within the framework of the academic program of the University. A description of this degree is found in the Intercollege-Undergraduate Programs section of this bulletin.

Entrance to Major

When first-semester baccalaureate degree students are admitted to the University, most are enrolled in either a specific college that offers majors of interest or in the Division of Undergraduate Studies. Typically, students do not enter a specific major within the college until sometime between their third and fifth semesters.

All Penn State majors have entrance requirements. Students are eligible to enter a major once they have satisfied the following minimum academic requirements:

1. Meet the admissions entrance requirements of the college the student wishes to enter.
2. Demonstrate at least a C (2.00) cumulative average for all courses taken at the University subject to the conditions of Senate Policy 51-50 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/51-00-grade-point-average/#51-50).
3. Satisfy any additional academic requirements that have been proposed by the college or the major and approved by the dean of the college and the University Faculty Senate Committee on Undergraduate Education and/or the Central Enrollment Management Group.
4. Apply no more than 91 credits of previous work toward a degree in the new college.

Please note, some majors have more restrictive academic requirements and/or administrative enrollment controls (http://undergraduate.bulletins.psu.edu/undergraduate/general-information/academic-information/#administrativeenrollmentcontrolstext). The criteria students must meet for entry to all majors are available on the "How to Get In" tab of each program in the Undergraduate Bulletin.

Students who meet the entry-to-major criteria for their choice of major can apply for entrance to that major by using LionPATH (http://lionpath.psu.edu) "Update Academics."

MORE INFORMATION ABOUT ENTRANCE TO MAJOR

Criteria

Entrance-to-Major Criteria are determined for every entering class within an academic year (summer, fall, and spring). Students who meet a major’s entry criteria are guaranteed entry to the major. The criteria students must meet for entry to all majors are available at Entrance to Major Requirements on each program page. When deemed academically appropriate, the dean of the college may approve exceptions for individual students. For additional information, contact the appropriate advising center (https://dus.psu.edu/advising-centers).

Procedures

Students who meet entry-to-major criteria may apply using LionPATH’s "Update Academics" function. A student who wishes to enter a major with Administrative Enrollment Controls (http://undergraduate.bulletins.psu.edu/undergraduate/general-information/academic-information/#administrativeenrollmentcontrolstext) will use LionPATH’s "Update Academics" to request entrance to the major. To participate in this process, students will actively request entrance to administratively controlled majors when they are within an established credit window, have completed specified courses, and have earned the stated grade-point average.

Students with questions about entering a major should contact the appropriate advising center (https://dus.psu.edu/advising-centers).

READ SENATE POLICY 37-30: ENTRANCE TO AND CHANGES IN MAJOR PROGRAMS OF STUDY

READ SENATE POLICY 54-56: DROPS BY COLLEGE

Administrative Enrollment Controls

Administrative Enrollment Controls are initiated when limitations of space, faculty, or other resources in a major prevent accommodating all students who request them. Due to changing resources and demands, administrative enrollment controls (http://advising.psu.edu/administrative-enrollment-controls) are approved annually by the Office of Undergraduate Education. Examples include Accounting and Advertising/Public Relations. Entrance-to-Major Criteria must be met and Entrance-
to-Major Procedures must be followed, as described in the following two paragraphs.

READ SENATE POLICY 37-30: ENTRANCE TO AND CHANGES IN MAJOR PROGRAMS OF STUDY (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/37-00-entrance-to-a-college-or-major/#37-30)

Entrance to Majors with Administrative Controls

Course Work

Certain courses may be required for entry to a major with administrative controls. A specific grade-point average may be required in some or all of these courses. Generally, students must complete specified courses by the end of their fourth semester of enrollment.

Performance

Applicants are considered for entrance to a controlled major on the basis of their cumulative Penn State grade-point average (GPA) at the end of the fall semester prior to their pool semester (typically the spring semester of their sophomore year). Generally, students who have a cumulative grade-point average of 3.00 or higher cannot be denied entry to the major provided that all of the other requirements for entrance have been met. However, certain controlled majors have approval for higher GPA guarantees. After all of these students have been accommodated, if there is still space, selections are made from the remaining students in the pool of applicants, starting with the highest GPA, until the approved maximum number of students to enter the major is reached. No student with less than a 2.00 cumulative GPA is accepted.

College of Enrollment

Students who apply for entrance to a controlled major must be enrolled in the college offering that major or in the Division of Undergraduate Studies (DUS). Students who want to be considered for controlled majors in more than one college should enroll in DUS to be eligible for consideration.

Exceptions

Exceptions may be considered based on the individual student’s situation. Students who have concerns about entry to a major should speak to an adviser in the appropriate college or campus academic advising and information center.

Enrollment Process

If accepted for a major, the student is enrolled in that major; no additional processing is required. If rejected from all the choices that were listed on the application to major form, the student must explore other alternatives. For assistance in this process, the student may confer with advisers in appropriate academic advising centers (https://dus.psu.edu/advising-centers) or the Division of Undergraduate Studies. (https://dus.psu.edu)

Graduation

Declare Intent to Graduate

To graduate, you must satisfy all the University, college, and major requirements that were in effect at the time of your most recent admission, or re-enrollment, as a degree candidate to the University.

Process

1. It is your responsibility to notify the University of your intent to graduate.
2. Confirm the activation period on the Academic Calendar (http://www.registrar.psu.edu/academic_calendar/calendar) for the dates when you can activate your intent to graduate.
3. Using the "Apply for Graduation" link within the My Academics page in the LionPATH Student Center (http://launch.lionpath.psu.edu), you can set your intent to graduate.
   a. View LionPATH Video Tutorial on How to Apply for Graduation (https://tutorials.lionpath.psu.edu/public/S_ApplyGrad).
   b. Download LionPATH Tutorial in Microsoft Word on How to Apply for Graduation (https://tutorials.lionpath.psu.edu/public/Docs/S_ApplyGraduation.docx).
4. After the activation period expires you must contact the appropriate college office to activate or remove your intent to graduate.

Unofficial programs are distributed at the commencement ceremony. If your intent to graduate is activated after the student information has been sent to the publisher, your name will not appear in the program. For fall and spring ceremonies the data is sent during the tenth week of the semester. For the summer ceremony the data is sent during the fifth week.

READ SENATE POLICY 86-00: CANDIDATE RESPONSIBILITIES AND OPTIONS (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/86-00-candidate-responsibilities-and-options)

Graduation Requirements

At the start of the semester in which a student expects to complete the degree requirements listed below, they should follow graduation procedures.

1. A student must satisfy all University degree requirements (https://handbook.psu.edu/content/degree-requirements) that were in effect when the student first scheduled a class after their admission or most recent re-entry as a degree candidate. Requirements for a program (such as major, minor, option, honors) are those in effect at the time the student most recently entered that program. The degree audit provides students with a summary of progress toward meeting the requirements of their degree program. The audit indicates the graduation requirements that have been completed as well as those requirements that still must be satisfied.
2. Every candidate for a degree must earn a specified number of credits as a degree candidate in courses offered by the University or in approved cooperative programs established by the University Faculty Senate. For a baccalaureate degree, the minimum is 36 of a student’s last 60 credits; for an associate degree, the minimum is 18 of a student’s last 30 credits.
3. The last 60 credits required for a candidate’s first baccalaureate degree must be earned within five calendar years. An extension of time is granted for intervening military service.
4. If a student takes course(s) at another institution prior to graduating, an official transcript listing the grades and credits earned must be received by Undergraduate Admissions, 201 Shields Building, University Park, PA 16802-1294, before commencement.
5. Cumulative grade-point average must be at least a C (2.00) or better.
6. Students must complete their courses; students with Deferred Grades (DF) or No Grades (NG) will not be allowed to graduate.
7. A student must earn at least a C grade in each course designated as a C-required course in their major.

MORE INFORMATION ABOUT GRADUATION REQUIREMENTS (https://handbook.psu.edu/content/graduation-procedures)
Course Substitution

A student is expected to satisfy all University degree requirements (such as General Education (p. 2640), First-Year Seminar and Engagement (p. 2646), United States Cultures and International Cultures (p. 2646), Writing Across the Curriculum (p. 2646)) that were in effect when the student first scheduled a class after their admission or most recent re-enrollment as a degree candidate. Requirements for a program (such as major, minor, option, honors) are those in effect at the time of the student’s admission or most recent re-enrollment into that program.

A student wishing permission to deviate in any way from program requirements must have permission from the appropriate college dean.

Guidelines for Considering Course Substitution Requests

1. The course to be substituted should be in the same area as the required course or in a closely related area.
2. Substitution of a course for a previously failed required course is seldom granted.
3. Failure to schedule a required course is not sufficient reason for granting permission for a course substitution.

Student Action

1. When working on your academic plans, discuss the possibility of a substitution with an adviser. Ideally, permission for a substitution should be obtained before you enroll in the course you wish to substitute.
2. Schedule the course to be substituted. After scheduling it, obtain pertinent forms and directions in the appropriate college dean’s office to request the substitution. A course must be scheduled or completed before the substitution can be officially approved and entered on your degree audit.
3. When a substitution is approved, check your audit to verify that the substitution has been made.

MORE INFORMATION ABOUT COURSE SUBSTITUTION (https://handbook.psu.edu/content/course-substitution)

Classification of Undergraduate Students

Nondegree Students

A person enrolled in a course who is not a degree candidate or provisional student is classified as a nondegree student. A nondegree student must either hold a high school diploma or its equivalent to take undergraduate courses. Exceptions may be made by the Undergraduate Admissions Office for students currently enrolled in high school (dual-enrollment students).

A nondegree student who has not been dropped from degree or provisional status by this University or any other college or university for unsatisfactory scholarship will be listed as a nondegree regular student and may enroll in a maximum of 12 credits per semester if criteria 1, 2, 3, and 4 (on the following list) are met.

1. The student has completed the prerequisite for the courses to be scheduled or has obtained permission from the instructor to schedule the course.
2. Space is available after degree candidates and provisional students have been accommodated.
3. The student has not been dismissed or suspended for nonacademic reasons from any college or university. An applicant not in good standing at another college or university for disciplinary reasons must consult the director of the Office of Judicial Affairs for admission clearance.
4. The student has obtained academic advising/counseling from an adviser/counselor designated by the academic unit to which admission, or reinstatement and re-enrollment, is desired.

Limitations to Enrollment as a Nondegree Student

A student in nondegree status (regular or conditional) may remain in that status for a maximum of 30 credits, at which time the student must be accepted into a degree program to continue taking credit courses. Nondegree conditional students must achieve a semester grade point average of 2.01 or higher every semester or will be dismissed from the University and may only re-enter through the academic renewal process. Students in nondegree status who are not eligible for a degree program after completing 30 credits may continue to take credit courses provided a semester grade-point average of more than 2.00 continues to be earned and they have written support from their intended major. Students who do not meet these provisions will be dropped and may only reenter Penn State through the academic renewal process. Nondegree regular students who are in good academic standing and do not intend to earn a degree may continue taking credit courses as long as a cumulative grade point average of 2.00 is maintained.

NOTE: A student must be admitted, or reinstated and re-enrolled, as a degree candidate to apply the credits earned as a nondegree student toward fulfilling the requirements for a degree. The dean of the college or school of enrollment shall decide which credits may be used to fulfill the degree requirements.

Obtaining an Application

A nondegree application can be obtained from the Office of the University Registrar (http://www.registrar.psu.edu) or by contacting the Registrar’s office at any University location.

Admission of Nondegree Student as a Degree Candidate

A nondegree student may apply for admission as a baccalaureate degree candidate with advanced standing to a college or school of the University, or to the Division of Undergraduate Studies, upon completion of at least 18 credits earned at this University with at least a 2.00 cumulative grade-point average. An applicant who has completed at least the equivalent of two years of baccalaureate degree work before applying for admission as a baccalaureate degree candidate must have the approval of either the dean of the college or school in which enrollment is desired or of the director of the Division of Undergraduate Studies if the student wants to enroll in that division. To be eligible for degree admission, the nondegree student must meet the academic requirements of the University and the college or school in effect at the time of application.

Provisional Students (Degree Seeking)

An applicant seeking to pursue a degree program and holding a high school diploma or its equivalent but without the criteria required for
admission as a degree candidate may be accepted as a provisional student and enroll in credit courses, if space is available, to pursue a program leading to either a baccalaureate or associate degree if the following criteria are met:

1. The student is making satisfactory progress toward admission as a degree candidate. Progress is satisfactory if a student has completed 18 credits with a minimum cumulative grade-point average of 2.00 (on a 4.0 scale). If a student has completed 18 credits with less than a 2.00, then he or she is given a warning. A student who has completed 27 credits with a cumulative grade-point average of less than 2.00 will not be permitted to enroll as a provisional student in any subsequent semester unless the student has earned more than a 2.0 grade-point average in the most recently completed semester. No student, regardless of cumulative grade-point average, who has completed 36 credits will be permitted to enroll as a provisional student in any subsequent semester.

2. There is space available after degree candidates have been accommodated.

3. The student has not been dropped for unsatisfactory scholarship from any college or university previously attended. If a provisional applicant attended another college or university and attempted 18 or more semester credits within the last four calendar years, the applicant must have at least a 2.0 (on a 4.0 scale) cumulative collegiate average. However, if it has been four or more calendar years since the applicant attended the other college or university and the cumulative grade-point average is less than 2.0, the applicant is eligible for provisional admission consideration.

4. The student has not been dismissed or suspended for nonacademic reasons from any college or university. An applicant not in good standing at another accredited college or university for disciplinary reasons must consult with the director of the Office of Judicial Affairs for admissions clearance.

NOTE: An applicant holding a baccalaureate degree or higher is not eligible to enroll as a provisional student. The applicant is referred to the graduate nondegree program.

Admission of Provisional Student as a Degree Candidate
A provisional student may apply for admission as a baccalaureate degree candidate with advanced standing to a college or school of the University, or to the Division of Undergraduate Studies, upon completion of at least 18 credits with at least a 2.00 cumulative grade-point average. All these credits must be earned at this University. To be eligible for admission, the provisional student must satisfy the academic requirements of the University and the college of enrollment.

Academic Progress

Academic Progress
To graduate, a degree candidate must complete the requirements for the candidate’s major and earn at least a C (2.00) average for all courses taken at this University as stated in 82-40, subject to the conditions of 51-00. When a student fails to make adequate progress towards meeting and maintaining this 2.00 grade-point average, various academic progress statuses are used to serve as notification of such failure and to assist the student in correcting his/her academic difficulties. These statuses include academic warning (54-20) and academic suspension (54-40).

Good Standing
A student must have a cumulative grade-point average of 2.00 or higher to be considered in good standing to declare a major and to graduate from the University. A student will receive notification at the end of each semester when his/her semester grade-point average drops below a 2.00.

Academic Warning
Academic warning serves as official notification that the student has failed to earn a 2.00 cumulative grade-point average. A student placed on academic warning will have a hold placed on registration and will be required to meet with an academic adviser in order for this registration hold to be removed.

Academic Suspension
Academic suspension is an official notification that a student has earned a semester grade-point average of less than 2.00 while on academic warning. A student who has been academically suspended may not schedule courses at the University for two consecutive semesters (Note: Summer session is equal to one semester and includes all courses offered after Spring semester and before Fall semester). A student returning from academic suspension must apply for re-enrollment as defined in policy 58-00 (or admission, if he/she is a degree-seeking student conditionally enrolled in DUS) and returns to the University in warning status, with his/her former cumulative grade-point average, and with a hold placed on the registration. The student must receive written support obtained in the college/major (or DUS) the student intends to pursue.

A student can be academically suspended from the University two times. If, after two suspensions the student fails to achieve at least a 2.00 semester GPA, the student is subject to academic dismissal (54-50). A student may apply for academic renewal four years after academic dismissal.

Academic Dismissal
A student who has been placed on academic suspension two times and fails to achieve at least a 2.00 semester GPA is subject to academic dismissal and is no longer permitted to take courses at the University. After a period of four calendar years, a student who has been
academically dismissed from the University may seek re-enrollment to the University by requesting academic renewal (54-90).

READ SENATE POLICY 54-50: ACADEMIC DISMISSAL (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/54-00-academic-progress/#54-50)

Drops by Colleges
1. The dean of the college, subject to the review of the faculty of the college, may require that a candidate be disenrolled from a major in the college or from the college for failure to meet academic retention standards of the major or the college. Academic retention standards applicable to any student shall be those in effect at the time of the student’s most recent admission to the major or college. A student required to disenroll from a major may transfer directly to another major subject to Section (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/37-00-entrance-to-a-college-or-major) 37-00 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/37-00-entrance-to-a-college-or-major) or may be admitted to the Division of Undergraduate Studies subject to Section 39-00 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/39-00-division-of-undergraduate-studies), expecting transfer to another major later. If not accepted for enrollment in another major or in the Division of Undergraduate Studies, the candidate will be dropped from degree status. A candidate who is disenrolled from a major and who previously has completed the allowed enrollment time limit of the Division of Undergraduate Studies, as specified in Section 39-50 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/39-00-division-of-undergraduate-studies/#39-50), may be allowed one additional semester of enrollment in that division. Failure to relocate into another major in the specified time will cause the candidate to be dropped from degree candidacy under Section 39-80 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/39-00-division-of-undergraduate-studies/#39-80) unless Section 54-52 applies.

2. The dean of the college, subject to the review of the faculty of the college, may at any time recommend to the President that a candidate enrolled in that college be dropped as a degree candidate at the University if the candidate is, in the opinion of the faculty, not adaptive to the work of the college.

READ SENATE POLICY 54-56: DROPS BY COLLEGE (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/54-00-academic-progress/#54-56)

Academic Renewal
Students, including those who have been academically warned, suspended, or dismissed, may request approval for Academic Renewal and Re-enrollment if:

• They have a cumulative grade-point average less than 2.00 and
• They have been absent from Penn State for at least four calendar years during which they have not been enrolled in any Penn State credit courses.

If Academic Renewal is granted:

• The student’s cumulative average will start over at 0.00.
• All prior courses and grades remain unchanged on the student’s academic record.
• The notation of Academic Renewal will be recorded on the student’s transcript.

• Courses passed with a grade of “C” or better during the earlier enrollment and approved by the dean of the college may be used to fulfill graduation requirements.
• Courses taken prior to Academic Renewal will not count towards the repeated courses limit as specified in Policy 47-80.

READ SENATE POLICY 54-90: ACADEMIC RENEWAL (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/54-00-academic-progress/#54-90)

Options for Undergraduate Study
The undergraduate degree programs of the University provide students with opportunities to increase their knowledge and understanding of the world and to grow in their individual skills and capabilities for learning, analyzing, creating, communicating, and forming good judgments. All undergraduate degree programs and courses offered by the colleges and other degree-granting units of the University are under the academic sponsorship of a faculty committed to scholarship and are implemented under the academic policies and student rules established by the University Faculty Senate. They are intended to be flexible in accommodating students interested in learning, whether through traditional or nontraditional offerings, while enrolled on either a part-time or a full-time basis. The degree programs and courses of the colleges and other degree-granting units are offered through resident or distance education. Credit courses are available to degree candidates on University campuses as well as through off-campus credit-granting activities such as internships, practicums, field trips, and foreign studies, as well as via continuing and distance education mechanisms, such as the World Campus. Students not formally admitted to degree candidacy (including provisional and nondegree students) may participate in resident offerings as time and space permit, as well as in continuing and distance education.

Special Academic Programs
Environmental Emphasis Programs
The University offers a wide range of opportunities in undergraduate programs with an environmental emphasis. Programs with an emphasis on the natural world include:

• Agriculture (various fields)
• Biology (various fields)
• Earth Sciences
• Environmental Engineering
• Environmental Systems Engineering
• Geography
• Geosciences
• Meteorology

Programs stressing human use of and impact on the natural world include:

• College of Agricultural Sciences
  • Agricultural and Extension Education, Environmental Science option
  • Agroecosystems Science
  • Environmental and Renewable Resource Economics
  • Environmental Resource Management
  • Environmental Soil Science

Administrative Enrollment Controls

Administrative Enrollment Controls are initiated when limitations of space, faculty, or other resources in a major prevent accommodating all students who request them. Students must follow the administrative enrollment controls that are in effect for the semester that they enter the university.

Below are the Administrative Enrollment Controls for first-year students entering Summer 2018, Fall 2018, and Spring 2019. Students who entered the University prior to the summer 2018 semester should view the administrative enrollment controls for the semester that they entered the university (http://advising.psu.edu/entrance-major-requirements) on the Academic Advising Portal.

Classification of Students by Semester

Semester classification (i.e., semester standing) is determined by a student's total credits earned. It is used by the University to establish how early a student may register, assign classes with a prerequisite semester classification, determine eligibility for change of campus, calculate tuition, and eligibility for parking on campus.

A degree candidate's semester classification is based upon the following table of total credits earned:

<table>
<thead>
<tr>
<th>Total Credits Earned</th>
<th>Semester Classification</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>14.0 or fewer</td>

</table>

Cumulative Credits/Total Credits

Total credits earned are used to determine a student’s semester classification. Cumulative credits are used to calculate a student’s grade points when grade-point average is determined. Total credits and cumulative credits are calculated every semester and reported on the student’s grade report and transcript. Academic renewal requires a student’s total credits and cumulative credits to be recalculated.

Total Credits

Total credits earned include Penn State credits successfully completed and indicated on the student’s record by letter grades A, A-, B+, B, B-, C+, C, or D; as well as courses satisfactorily completed under the satisfactory/unsatisfactory grading system, credits earned by examination, and research credits. Total credits also include credits accepted at Penn State that have been earned in other ways, for example, credits transferred to Penn State from another institution and credits earned through the Advanced Placement Program of the College Board.

Total credits exclude courses in which a grade of F was earned and audited courses.

Cumulative Credits

Cumulative credits include the number of credits taken at Penn State and retained on the student’s schedule for a letter grade, even if a grade of F was earned.

Cumulative credits exclude credits earned by other means, for example, courses that were scheduled for satisfactory/unsatisfactory grading, credits earned by examination, credits earned with a research grade, credits earned at any other institution and transferred to Penn State, credits earned through the Advanced Placement Program of the College Board, and audited courses.

READ SENATE POLICY 37-70: ENTRANCE TO AND CHANGES IN MAJOR PROGRAM OF STUDY (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/37-00-entrance-to-a-college-or-major/#37-70)

READ SENATE POLICY 51-00: GRADE-POINT AVERAGE (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/51-00-grade-point-average)

Registration Process

Registration Timetable

The Registration Timetable provides a schedule of when students can begin registering for classes for a specific semester. The timetable provides a chart with the minimum credits and the corresponding first date to register for each student level (e.g., undergraduate, graduate, law, nondegree). Students can determine their “minimum credits to register” by adding their total credits earned to the number of credits for which they are currently enrolled. Enrollment appointments are set in LionPATH when shopping carts open for a given semester and are not adjusted after that date.

MORE INFORMATION (http://www.registrar.psu.edu/Reg_Timetable/RegTimetable_Main.cfm)

Academic Registration Holds

When other means of communication with a student have failed, an academic registration hold may be activated to ensure the student is in communication with the appropriate person/office regarding his/her academic decisions. A hold can be placed when a student is violating a University or college policy or if the student’s academic decisions appear to be counterproductive to his/her academic success. In addition, a hold can be used to support the operation and well-being of the academic community as a whole.

Along with not allowing students to use the registration system, an academic hold also prevents any requests for an official transcript to be processed by the Office of the University Registrar.

Types of Holds

- Academic (College, enrollment unit, or campus designate) to help students fully understand the implications of their academic decisions and help them resolve outstanding academic issues.
(Academic registration holds are activated as soon as a student is in academic warning or suspension.)

- **Conduct** (Office of Student Conduct) as a consequence of a disciplinary proceeding and failure on the student’s part to follow through with required actions for resolving an incident.
- **Financial** (Office of the Bursar, Housing) as a result of outstanding financial obligations with the university.
- **Global Programs** (International Students and Study Abroad) for an international student to ensure that proper immigration documents are completed and filed with the office as required by Department of Homeland Security regulations.
- **Medical** (University Health Services) due to health-related issues including insurance.

READ SENATE POLICY 34-30: ACADEMIC REGISTRATION HOLD (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/34-00-course-scheduling/#34-30)

**Schedule of Courses**

Registration is a continuous process at Penn State, beginning with the student’s first day to register and continuing until the first day of classes for the semester. Prior to the beginning of a new registration period, the University will release the Schedule of Courses for the upcoming semester. Students and view course offerings using the LionPATH Search. (https://public.lionpath.psu.edu/psp/CSPRD/EMPLOYEE/HRMS/h/?tab=PE_PT_NVT_PUBLIC_HOME)

MORE INFORMATION (http://www.registrar.psu.edu/soc)

**Registering for Courses**

Prior to the beginning of each semester’s registration period, students are required to complete the Pre-Registration Activity Guide in the LionPATH Student Center in order to be able to register for courses. The Activity Guide includes verification of emergency contact information as well as the Financial Responsibility Agreement (FRA), which confirms the student’s commitment and understanding to pay all tuition charges and fees associated with registering for courses. An FRA hold will remain on a student’s account and prevent him/her from registering for classes until he/she completes the Pre-Registration Activity Guide.

Once the Schedule of Courses for the upcoming semester is released, students can begin viewing the available courses using the LionPATH Class Search (https://public.lionpath.psu.edu/psp/CSPRD/EMPLOYEE/HRMS/h/?tab=PE_PT_NVT_PUBLIC_HOME). Students can find their first day to register for a given semester by using the Registration Timetable (http://www.registrar.psu.edu/Reg_Timetable/RegTimetable_Main.cfm) or viewing their Enrollment Appointment Date in the LionPATH Student Center. Before registering for courses in LionPATH, students are encouraged to meet with their academic adviser to review their plan of study and progress toward fulfilling all graduation requirements.

**Courses and Credits**

**Course-Numbering System**

These course descriptions are arranged alphabetically. If any course cannot be located readily, refer to the index. Courses are numbered as follows:

**Undergraduate Courses (1 to 399):** General courses accepted in fulfillment of requirements for the bachelor’s degrees.

**Advanced Undergraduate Courses (400 to 499):** Courses open to graduate students and to juniors and seniors and, with the special written permission of the head of the department or the chair of the program sponsoring the course, to qualified students in earlier semesters.

**Graduate Courses (500 to 699; 800 to 899):** Courses restricted to students registered in the Graduate School, seniors with an average of at least 3.50 (500- and 800-level only; excludes 600-level), and other students who have been granted permission to enroll by the dean of the Graduate School. These courses are described in the Penn State Graduate Degree Programs Bulletin.

**Medical Courses (700-799):** Courses restricted to students registered in the College of Medicine. These courses are described in the Penn State College of Medicine Programs Bulletin.

**Law Courses (900-999):** Courses restricted to students registered in Penn State Law and Dickinson Law. These courses are described in the Penn State Law and Dickinson Law Programs Bulletins.

**Common Course Numbers**

The following course numbers for which students may register have been set up for common use by major programs, with University Senate approval, to encourage innovation and provide flexibility in designing programs, but in no case may a course be scheduled for 0 credits.

**First-Year Seminar 187.** Listed under some liberal art-related academic headings, this course has prerequisites of first-semester standing and enrollment in the College of the Liberal Arts.

**Research Project Courses 294, 494.** 1-12 credits. Supervised student activities on research projects identified on an individual or small-group basis. A specific title may be used in each instance and will be entered on the student’s transcript.

**Internship 295, 395, 495.** 1-18 credits. Supervised off-campus, non-group instruction including field experiences, practica, or internships. Written and oral critique of activity required. A specific title may be used in each instance and will be entered on the student’s transcript.

**Independent Studies 296, 496.** 1-18 credits. Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. A specific title may be used in each instance and will be entered on the student’s transcript.

**Special Topics 97, 197, 297, 397, 497; 98, 198, 298, 398, 498.** 1-9 credits. Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Several different topics may be taught in one year or semester. A specific title may be used in each instance and will be entered on the student’s transcript.

**Foreign Studies 99, 199, 299, 399, 499.** 1-12 credits. Courses offered in foreign countries by individual or group instruction. A specific title may be used in each instance and will be entered on the student’s transcript. These courses typically carry the International Cultures (IL) attribute.

**Course Attributes and Suffixes**

Attributes and attribute values are course designations that are used to define specific characteristics for courses. The search for specific types of courses uses attributes and attributes are the most important notation for a course to satisfy a given requirement.

Suffixes are letters that follow a course number and allow for easier identification of a course’s characteristics. Not all attributes and characteristics are captured in available suffixes and suffixes are not...
the feature used to determine if a course satisfies a requirement. The degree audit and what-if reports use attributes, not suffixes, to determine applicability of a course to a requirement.

**Bachelor of Arts**

**Attributes**
- BA: Arts
- BA: Humanities
- BA: Natural Science
- BA: Other Cultures
- BA: Quantification
- BA: Social and Behavioral Sci
- World Lang (12th unit)
- World Language (all)

**Cultural Diversity**

**Attributes**
- International Cultures (IL)
- United States Cultures (US)

**Suffixes**
- U: United States Cultures and/or International Cultures and Honors
- Y: United States Cultures and/or International Cultures and Writing Across the Curriculum

**General Education**

**Attributes**
- GenEd: Writing/Speaking (GWS)
- GenEd: Quantification (GQ)
- GenEd: Arts (GA)
- GenEd: Health Wellness (GHW)
- GenEd: Humanities (GH)
- GenEd: Natural Sciences (GN)
- GenEd: Social & Beh Sci (GS)
- GenEd Integrative: Interdomain
- GenEd Integrative: Linked

**Suffixes**
- N: Inter-Domain
- Q: Inter-Domain and Honors
- Z: Linked Course. Approved Linked Course pairs must be confirmed by the Linked Course search feature in LionPATH.

**First-Year Engagement Program**

**Attribute**
- First Year Seminar

**Course Subject**
- PSU: First-Year Seminar

**Suffixes**
- S: First-Year Seminar
- T: First-Year Seminar and Honors
- X: First-Year Seminar and Writing Across the Curriculum

**Writing Across the Curriculum**

**Attribute**
- Writing Across the Curriculum

**Suffixes**
- M: Writing Across the Curriculum and Honors
- W: Writing Across the Curriculum
- X: Writing Across the Curriculum and First-Year Seminar
- Y: Writing Across the Curriculum and United States Cultures and/or International Cultures

**Honors Courses**

**Attribute**
- Honors

**Suffixes**
- H: Honors
- M: Writing Across the Curriculum and Honors
- Q: Inter-Domain and Honors
- T: First-Year Seminar and Honors
- U: United States Cultures and/or International Cultures and Honors

**Repeatable and Variable Credit Courses**

If a course may be repeated, the words "per semester" follow the number of credits—for example (3 credits per semester). These courses may be repeated indefinitely unless the credits are followed by the maximum number of credits allowed, such as (3 per semester, maximum of 12).

Courses may have variable credits, such as (1-3), (2-6), or (3-10). Here, the larger number signifies the total credits that can be accumulated for the course over an indefinite number of semesters, unless otherwise specified. For example, a course listed with (1-6) could be taken six semesters for 1 credit each semester, or two semesters for 3 credits each semester, or once for 6 credits, etc.

In some courses with variable credits, students may be permitted to accumulate more than the larger number shown. Such courses will be listed as, for example, (1-3 per semester, maximum of 12).

**Prerequisites, Concurrent Courses, Co-Requisite Courses, and Recommended Preparation**

Prerequisites, concurrent courses, and co-requisite courses approximate the necessary specific coursework or general academic knowledge, background, or semester classification required to succeed academically in a given course.

- Prerequisites are courses or other requirements that must be completed prior to the start of a given course.
- Concurrent Courses are similar to prerequisites except that they may be taken prior to, or in the same semester as, the given course.
- Co-requisite Courses are pairs of courses required to be taken together in the same semester.

Registration in a given course is limited to students who have satisfied the stated prerequisite, concurrent, or co-requisite requirements. The course instructor has the right to permit students to take the course without having the stated prerequisite, concurrent, or co-requisite requirements if the student demonstrates mastery of the material through some other means.

Recommended Preparation relates to preparatory skills or companion courses deemed useful, but not necessary, for successful completion of a course. Recommended preparation has no bearing on registration in a given course.
Combined Section Classes

Multiple departments sometimes offer the same course; in LionPATH this is called a combined section class. These classes appear with the following note in the LionPATH Class Search: "This is a combined section class" and are listed with all of the departments offering the class. When a student is fulfilling the requirements of a major or a minor, a course that is cross-listed with a course required for the academic program will satisfy the requirement. A student majoring in an area of Natural Sciences, Arts, Humanities, or Social and Behavioral Sciences may not use a course in these areas that is combined with a course offered by his/her major department to satisfy a General Education requirement. A student earning a Bachelor of Arts degree may not use a course that is combined with a course offered by the department of his/her major to satisfy a B.A. requirement.

Auditing and Visiting Courses

Auditing

If a student wishes to audit a course officially and to have this fact appear on the academic record, that course must be entered on the student's schedule with the symbol AU shown under "credits." When a student audits a course, the credits become part of that semester's credit load but are not used in the determination of full-time status (section 34-52). In addition, tuition must be paid for the audit. Audits are not considered in the determination of the credit standard for financial aid. No course may be added for audit if dropped for credit, or vice versa, after the add period. A student enrolled for official audit may be required to participate in class discussion, do practicum work, submit written work, and take examinations. See also Section 48-80, symbols for Course Audit.

Visiting

Students who wish to visit a course may do so, even though they are not officially enrolled for credit or audit in that course. To visit a course, currently registered full-time students must obtain permission in advance from the course instructor. No tuition is paid for a visit. Course credits do not become part of the semester's credit load and are not entered on the student's academic record. Paragraph 1 relating to official audit is not applicable to the student who visits a course.

Credit and Credit Load

Definition of a Credit

For the typical student, a total of forty-five (45) hours of work is required to earn one credit. Course credits are earned in a variety of educational experiences. Course credit by instruction may be achieved by a variety of educational experiences that allow the student to work toward mastery of the course objectives. The Federal definition of a credit hour (used for awarding Federal student aid) provides minimum requirements that should be consistent for all credit earned by instruction regardless of delivery method. More than the minimum may be required for mastery of course objectives.

The distribution of time between class activities and outside preparation varies from course to course regardless of the type of instruction (in person, electronic, pre-recorded content delivered through resident, online, or hybrid).

Enrollment Status (Semester Credit Load)

A student's credit load is one factor that determines his/her tuition costs. The Tuition and College Cost Estimator (https://cce.ais.psu.edu/tuition-calculator-ui/) can be used to determine tuition based on a student's credit load (as well as other factors: residency, semester/session, campus, college, major, and credits achieved).

Definition of Full-Time Credit Load

The University considers a student full-time if he/she schedules a total of 12 or more credits, excluding course audits (https://handbook.psu.edu/content/auditing-a-course), from any combination of credit courses through resident instruction, Continuing Education, or World Campus. However, different programs and agencies may have different definitions of full-time status. Students should check with the appropriate office(s) for information on their policies.

Definition and Implications of a Part-Time Credit Load

A student is considered part-time if he/she schedules less than 12 credits per semester. When considering part-time enrollment, students should be aware that a full-time credit load may be required by certain programs and agencies. Before scheduling less than 12 credits, students should check with the appropriate office(s) (e.g., Student Aid, Intercollegiate Athletics, International Students, Schreyer Honors College, etc.), for information on their policies.

Credit Overload, more than 19 Credits

To schedule more than 19 credits, a student must add the overload (https://handbook.psu.edu/content/schedule-adjustment/#overload) credits during the drop/add period (https://handbook.psu.edu/content/schedule-adjustment/#dropadd). No additional tuition is charged. When determining an overload, the Office of the University Registrar counts audit credits (https://handbook.psu.edu/content/auditing-a-course) as part of a semester credit load.

Prior Learning Assessment, Opportunities for Earning Penn State Credit

In addition to taking Penn State course work, students with prior college-level learning—at another college or university, in the military, in the workplace, through self-study, or in high school—may earn credits that may be applicable to their degree requirements.

Credits are awarded on the semester-hour basis. The distribution of time between class activities and outside preparation varies from course to course; for the average student, however, at least forty-five hours of work per semester planned and arranged by the University faculty are required to gain 1 credit.
Examinations are as follows:

Limitations of credit earned through the Advanced Placement (AP) at the University.

- Instruction, as defined in Policy 42-23 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-23)
- Examination, as defined in Policy 42-50 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-50) and discussed below
- Portolio Assessment, as defined in Policy 42-97 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-97) and discussed below
- Transfer from other regionally accredited colleges and universities as defined in Policy 42-82 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-82) and as discussed under the heading Admission with Advanced Standing
- Transfer from colleges and universities outside the United States as defined in Policy 42-84 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-84)
- Validation from colleges and universities that are not regionally accredited but award associate degrees or higher as defined in Policy 42-86 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-86)
- Educational experiences in the Armed Services as defined in Policy 42-98 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-98)
- Educational credit for Training Programs in Non-collegiate Organizations as defined in Policy 42-99 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-99)

Additional information about earning credit can be obtained at Undergraduate Admissions Office (https://admissions.psu.edu) or Prior Learning Assessment (http://priorlearning.psu.edu).

Advanced Placement Program of the College Entrance Examination Board

The University cooperates with the College Board in this program. Credit may be awarded for Advanced Placement Examinations depending upon the grade earned on the examination and other factors as indicated in the following paragraphs.

A student who does advanced work in high school may take Advanced Placement Examinations that are based on college-level studies. For some examinations, the amount of credit awarded varies with an earned grade of three, four, or five. If credit is awarded, a student's University record will carry a notation of credit, but no grade will be recorded. Credit acquired in this manner does not affect a student's grade-point average.

General credit may be awarded for an AP examination covering material that is not the substantial equivalent of material covered in a specific University course. General credits may be used to fulfill degree requirements in any area; their use is not necessarily limited to general education or elective requirements. General credits are applied to a student's program of study in accordance with the procedures established by the college or other degree-granting unit of enrollment. Information about the use of general credits or specific course credits earned by AP examinations in individual programs of study may be obtained from a student's academic adviser or from the office of the dean of a student's college.

Undergraduate students interested in receiving credit for AP examinations should arrange for their official grade reports to be sent directly from Educational Testing Service (ETS) to the Undergraduate Admissions Office, The Pennsylvania State University, 201 Shields Building, Box 3000, University Park PA 16804-3000; which is responsible for evaluating such reports and awarding credit.

The schedule of credit awarded for AP examinations may be revised as a result of a periodic review by the faculty.

Current information about AP credit awarded by Penn State can be obtained from the Undergraduate Admissions Office (https://admissions.psu.edu), advanced placement opportunities (http://admissions.psu.edu/academics/credit/ap), and test credit for prior learning (http://priorlearning.psu.edu/first-year-students).

The College-Level Examination Program of the College Board

The University cooperates with the College Board in this program, referred to as CLEP. Credit may be awarded for the CLEP examinations depending upon the score earned on the examination and other factors as indicated in the following paragraphs.

An undergraduate student who is a candidate for a degree at the University and who has earned a score equivalent to the fiftieth percentile or higher for performance on a CLEP examination, taken before or after admission to degree candidacy, may receive credit as indicated in the schedule of credits linked below. If credit is awarded, a student's University record will carry notation of credit, but no grade will be recorded. Credit acquired in this manner does not affect a student's grade-point average at the University.

Limitations of credit earned through the CLEP examinations are as follows:

1. Degree programs determine whether the credits earned may be used to meet degree requirements.
2. A student who has earned credit for a particular course through CLEP examinations may elect to take the same course at Penn State (unless restricted by placement policies of the unit offering the course), but the duplicate credit cannot be used to meet any additional degree requirements. However, the grade earned in the Penn State course will count towards the student's grade point average.

Penn State course will count towards the student's grade point average.

3. Credit(s) will be posted to the student's record but will not appear on the student's official transcript until the student has completed a credit-bearing course at Penn State.

General credit may be awarded for an AP examination covering material that is not the substantial equivalent of material covered in a specific University course. General credits may be used to fulfill degree requirements in any area; their use is not necessarily limited to general education or elective requirements. General credits are applied to a student's program of study in accordance with the procedures established by the college or other degree-granting unit of enrollment. Information about the use of general credits or specific course credits earned by AP examinations in individual programs of study may be obtained from a student's academic adviser or from the office of the dean of a student's college.

Undergraduate students interested in receiving credit for AP examinations should arrange for their official grade reports to be sent directly from Educational Testing Service (ETS) to the Undergraduate Admissions Office, The Pennsylvania State University, 201 Shields Building, Box 3000, University Park PA 16804-3000; which is responsible for evaluating such reports and awarding credit.

The schedule of credit awarded for AP examinations may be revised as a result of a periodic review by the faculty.

Current information about AP credit awarded by Penn State can be obtained from the Undergraduate Admissions Office (https://admissions.psu.edu), advanced placement opportunities (http://admissions.psu.edu/academics/credit/ap), and test credit for prior learning (http://priorlearning.psu.edu/first-year-students).
3. Credit(s) will be posted to the student’s record but will not appear on the student’s official transcript until the student has completed a credit-bearing course at Penn State.

4. The total number of credits that may be awarded from CLEP examinations is limited to 60 credits.

General credit may be awarded for a CLEP examination covering material that is not the substantial equivalent of material covered in a specific University course. General credits may be used to fulfill degree requirements in any area; their use is not necessarily limited to General Education or elective requirements. General credits are applied to a student’s program of study in accordance with the procedure established by the college or school of enrollment. Information about the use of general credits or specific course credits earned by CLEP examinations in individual programs of study can be obtained from a student’s academic adviser or from the office of the dean of a student’s college or school.

Undergraduate students interested in receiving credit for CLEP examinations should arrange for their official score reports to be sent directly from Educational Testing Service (ETS) to the Undergraduate Admissions Office, The Pennsylvania State University, 201 Shields Building, Box 3000, University Park, PA 16804-3000, which is responsible for evaluating such reports and awarding credit.

The schedule of credit awarded for CLEP examinations may be revised as a result of periodic review by the faculty.

Current information about CLEP credit awarded by Penn State can be obtained from the Undergraduate Admissions Office (https://admissions.psu.edu). The schedule of credit awarded for CLEP examinations also can be obtained from College-Level Examination Placement (http://admissions.psu.edu/academics/credit/clep) and test credit for prior learning (http://priorlearning.psu.edu/earn-credit/testing).

**International Secondary Schooling and International Baccalaureate**

International Secondary Schooling—A student who does advanced work in a secondary school in another country may receive consideration for transfer credit when the examinations taken are based on college-level studies. Credit may be awarded for advanced work in international secondary schools. The World Education Series, published by the American Association of Collegiate Registrars and Admissions Officers, shall be used as a guide in making decisions on the awarding of credit for course work completed at an advanced level in international secondary schools. The number of credits awarded will reflect the introductory sequence in that subject at Penn State. If credit is awarded, a student’s University record will carry notation of credit, but no grade will be recorded. Credit acquired in this manner does not affect a student’s grade-point average at the University.

Limitations of credit earned through review of advanced-level international secondary schooling are as follows:

1. Degree programs determine whether the credits earned may be used to meet degree requirements.
2. A student who has earned credit for a particular course through International Baccalaureate examinations may elect to take the same course at Penn State (unless restricted by placement policies of the unit offering the course), but the duplicate credit cannot be used to meet any additional degree requirements. However, the grade earned in the Penn State course will count towards the student’s grade point average. Credit(s) will be posted to the student’s record but will not appear on the student’s official transcript until the student has completed a credit-bearing course at Penn State.

A student interested in receiving credit for advanced-level international secondary schooling should arrange for an official grade report to be sent directly from the secondary school or the examining board to the Undergraduate Admissions Office. The Undergraduate Admissions Office is responsible for evaluating such reports and awarding credit.

International Baccalaureate—A student who does work based on college-level studies in an International Baccalaureate program in a secondary school may take the Higher Level examinations. Credit may be awarded for Higher Level examinations of the International Baccalaureate depending upon the grades earned on the examination. Subjects examined at the Higher Level with an earned grade of 5 or higher will be considered for transfer credit. The number of credits awarded will reflect the introductory sequence in that subject at Penn State. If credit is awarded, a student’s University record will carry notation of credit, but no grade will be recorded. Credit acquired in this manner does not affect a student’s grade-point average at the University.

Limitations of credit earned through the Higher Level examinations are as follows:

1. Degree programs determine whether the credits earned may be used to meet degree requirements.
2. A student who has earned credit for a particular course through International Baccalaureate examinations may elect to take the same course at Penn State (unless restricted by placement policies of the unit offering the course), but the duplicate credit cannot be used to meet any additional degree requirements. However, the grade earned in the Penn State course will count towards the student’s grade point average.

A student interested in receiving credit for the Higher Level examinations of the International Baccalaureate program should arrange for an official grade report to be sent directly from the secondary school to the Undergraduate Admissions Office. The Undergraduate Admissions Office is responsible for evaluating such reports and awarding credit.

Current information about Advanced-Level exam credit or International Baccalaureate credit awarded by Penn State can be obtained from the Undergraduate Admissions Office (https://admissions.psu.edu), credit awarded by A-Level exam (http://admissions.psu.edu/academics/credit/a-levels), credit awarded by IB exam (http://admissions.psu.edu/academics/credit/ib), and test credit for prior learning (http://priorlearning.psu.edu/first-year-students).

**Credit by Examination**

If students have acquired substantial knowledge in a specific subject area, in some circumstances credits may be earned through successful completion of comprehensive examinations made available by the Penn State academic units that offer particular courses.

When such an examination serves as a substitute for completing all the usual requirements of a Penn State course, the credits received are described as “Credit by Examination” and are accepted as fulfilling degree requirements. Students may initiate a request for Credit by Examination for a course, although the academic department or program offering the
Current information about credit by examination credit awarded by Penn State can be obtained at earning test credit (http://priorlearning.psu.edu/earn-credit/testing).

Credit by Portfolio Assessment
A currently enrolled student who can document college-level learning acquired in a non-collegiate setting may be able to petition for undergraduate credit through portfolio assessment. Not all academic units offer portfolio assessment for credit. Students interested in determining whether to pursue credit by portfolio assessment opportunities should contact the academic department responsible for the relevant course.

Criteria for earning credit via portfolio include the following:

1. Credit is granted for the demonstration of college-level learning obtained during work or other experience, but not for the experience itself. Learning must be documented and must represent college-level achievement. Advisers will provide guidance on the steps necessary to construct a portfolio providing evidence of prior learning that meets academic quality expectations.
2. Credit by portfolio assessment does not carry a grade.
3. Credit by portfolio assessment may be awarded to enrolled students at the undergraduate level only.
4. Credit may not duplicate other course work that the student has already completed. A student may not enroll in and earn credit for a course for which credit already has been granted via portfolio assessment.
5. Credit may be awarded following an evaluation of the portfolio by an individual faculty member or by a team of faculty members and/or other selected personnel who represent the academic unit in which the subject matter is to be evaluated.
6. Credit earned via portfolio is designated on the transcript in the same manner as transfer credit.
7. Credit(s) will be posted to the student’s record but will not appear on the student’s official transcript until the student has completed a credit-bearing course at Penn State.
8. A fee is assessed to recover portfolio evaluation costs.
9. A maximum of 6 credits may be earned for a single portfolio (course). Associate degree candidates may be awarded a maximum of 16 credits. Baccalaureate degree candidates are limited to a maximum of 30 credits earned by portfolio assessment.

Current information about credit by examination credit awarded by Penn State can be obtained at earning portfolio credit (http://priorlearning.psu.edu/earn-credit/portfolio).

Penn State students may elect to schedule courses at another institution and transfer the credits to Penn State in order to meet degree requirements. Before a student schedules course work at another institution, he/she should have the credits approved for transfer and should work with an adviser to determine how the credits will apply to their academic program.

MORE INFORMATION (http://senate.psu.edu/policies-and-rules-for-graduate-students/42-00-acquisition-of-credit/#42-80)

READ SENATE POLICY 42-00: ACQUISITION OF CREDIT (http://senate.psu.edu/policies-and-rules-for-graduate-students/42-00-acquisition-of-credit)

Grading System

Grades for undergraduate and graduate students are reported by the following letters: A, A-, B, B+, B-, C+, C, D, or F. In addition, the symbols of SA (Satisfactory) and UN ( Unsatisfactory) may be recorded on a student's transcript in accordance with Senate Policy 49-60 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/47-00-48-00-and-49-00-grades/#47-60). Courses that do not carry credit shall be graded NCP if passed and NCF if failed. The symbols of W, LD (Late Drop), R (Research) (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/47-00-48-00-and-49-00-grades/#48-80), DF (Deferred Grade) (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/47-00-48-00-and-49-00-grades/#48-80), AUS (Audited, Regular/ Satisfactory Attendance) (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/47-00-48-00-and-49-00-grades/#48-80), AUI (Audited, Unsatisfactory Attendance) (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/47-00-48-00-and-49-00-grades/#48-80), and CRX (Credit by Examination) (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-50) also may be recorded in place of grades. Note that CRX does not apply to graduate students.

READ SENATE POLICY 47-40: GRADING SYSTEM (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/47-00-48-00-and-49-00-grades/#47-40)

Grades and Grade Points

Grades are assigned to individual students on the basis of the instructor’s professional judgment of the student’s scholastic achievement. Instructors should provide written (paper or electronic form) notification of the basis for grades to students on or before the first class meeting.

MORE INFORMATION (http://www.registrar.psu.edu/grades/grading_system.cfm)

READ SENATE POLICIES 47-00, 48-00, AND 49-00: GRADES (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/47-00-48-00-and-49-00-grades/#47-20%20&
Calculations.

In an emergency situation in which the instructor is not available, a deferred grade may be requested by the student and granted by the instructor before the beginning of the final exam period of the semester in which the course is taken; and 2) approval must be given by the instructor of the course.

Deferred Grades

If, for reasons beyond the student’s control, a student is prevented from completing a course within the prescribed amount of time, it is possible to have the grade for that course deferred for completion at a later date. In order to receive a deferred grade: 1) permission must be requested by the student and granted by the instructor before the beginning of the final exam period of the semester in which the course is taken; and 2) approval must be given by the instructor of the course. In an emergency situation in which the instructor is not available, a student may obtain authorization for a deferred grade from the dean of the college in which the student is enrolled.

If permission for a deferred grade is granted, the symbol DF will appear on the student’s transcript until the course has been completed. Courses with a deferred grade will not be included in the grade-point average calculations.

MORE INFORMATION (http://www.registrar.psu.edu/grades/no_grade_reported.cfm)

No Grade

If an instructor does not submit a grade for a student by the grade-reporting deadline and a deferred grade was not requested and approved, the symbol NG (no grade) appears on the student’s transcript until a grade is submitted. If a student receives an “NG” in place of a permanent grade, the grade-point average is calculated and appears with the letter “I” (incomplete) printed next to the course on the grade report and transcript. Students should contact their instructor (or the department offering the course) as soon as possible to determine what needs to be done so that a grade can be assigned.

The NG must be reconciled within five weeks following the grade reporting deadline. If a grade is not forthcoming by that deadline, the Office of the University Registrar will automatically change the NG to an F.

A NG grade that is automatically converted to an F can later be corrected in accordance with Senate Policy 48-30 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/47-00-48-00-and-49-00-grades/#48-30). Students with NG on their transcripts will not be allowed to graduate.

MORE INFORMATION (http://www.registrar.psu.edu/grades/no_grade_reported.cfm)

Distinction and Honors

Distinction at graduation is awarded to baccalaureate degree candidates who are in the top 12 percent of their college’s graduating class, have achieved a minimum cumulative grade-point average of 3.50, and have earned at least 60 credits at the University.

Distinction at graduation is awarded to associate degree candidates who are in the top 12 percent of their college’s graduating class, have achieved a minimum cumulative grade-point average of 3.50, and have earned at least 30 credits at the University.
The 12 percent should be divided into 2 percent Summa cum Laude, 4 percent Magna cum Laude, and 6 percent Cum Laude.

The distinction table is created each September for the coming fall/spring semesters and summer session, based on the grade-point average information of previous graduates.

CURRENT DISTINCTION TABLE (http://www.registrar.psu.edu/graduation/distinction.cfm)

READ SENATE POLICY 88-00: DISTINCTION AND HONORS (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/88-00-distinction-and-honors)

Examinations

General Examination Policy

Periodic examination of student accomplishments is essential for both teaching/learning and evaluation purposes. Examinations may include traditional written examinations, whether in-class or take-home; oral examinations; term papers; laboratory or project reports; or studio projects. The faculty teaching and coordinating a course are responsible for both the method and substance of examinations used in each course, including the final examination or other integrating evaluative instrument.

READ SENATE POLICY 44-00: EXAMINATIONS (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/44-00-examinations)

Final Examination Policy

Final examinations fulfill two important academic objectives; student integration of instructional material and end-of-semester evaluation of student achievement. However, valid means other than the final examination exist for accomplishing these objectives (e.g., term paper, final project report, take-home examinations, etc.). Course instructors determine which of these methods is most appropriate and effective in each undergraduate credit course taught.

MORE INFORMATION (http://www.registrar.psu.edu/exams/final.cfm)

Re-Enrollment

The University recognizes that a student’s progress toward an undergraduate degree may be interrupted for a variety of reasons. A student who was once admitted or enrolled as a degree candidate and wants to resume study is required to apply for re-enrollment consideration. Re-enrollment is appropriate for students who:

- withdrew from the University;
- interrupted continuous degree enrollment during fall/spring semester;
- were dismissed or suspended for non-academic reasons;
- invalidated a leave of absence;
- plan to return for a second associate or baccalaureate degree;
- plan to return for graduation;
- voluntarily changed your enrollment status to nondegree.

To apply for re-enrollment, students should visit the Office of the University Registrar website to complete and submit the Undergraduate Re-Enrollment Form (http://www.registrar.psu.edu/returning_university/re_enrollment.cfm). Students who left in good standing and who are re-enrolling in their previous major (providing the major is not controlled) will be approved to re-enroll. Every re-enrollment request will be reviewed and a decision letter will be sent to the student.

The deadline to submit a re-enrollment application for a given semester is 5:00 p.m. on the Friday before the first day of classes of that semester.

MORE INFORMATION (http://www.registrar.psu.edu/returning_university/re_enrollment.cfm)

READ SENATE POLICY 58-00: RE-ENROLLMENT AS A CANDIDATE (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/58-00-re-enrollment-as-a-degree-candidate)

Withdrawal

A student who is unable to complete a schedule of courses for a given semester may withdraw from enrollment in all courses at the University. Students may withdraw any time up to and including the last day of classes, before the final examination period begins. Withdrawal will terminate enrollment in credit courses for current and future semesters except in the use of summer-only withdrawal. Withdrawal results in the symbol W being recorded as the course grade on a student's official transcript.

If a student is a degree candidate, then at the time of withdrawal from enrollment in courses the student also withdraws from the university as a degree candidate. Thus, to enroll in courses at a later time as a degree candidate, a request for re-enrollment as a degree candidate must be made in accordance with the policies and procedures for re-enrollment (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/58-00-re-enrollment-as-a-degree-candidate). If the person is a nondegree student who wishes to enroll in courses at a later time, the policies and procedures given in Senate Policy 14-00 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/14-00-non-degree-students) must be followed. It is important to note that withdrawals will delay normal degree progress and may have financial implications. Students are encouraged to contact their academic adviser to discuss alternatives.

To initiate a withdrawal, students should visit the Office of the University Registrar website, and complete and submit the Withdrawal Form (http://www.registrar.psu.edu/leaving_university/withdrawal.cfm).

Summer-Only Withdrawal

If a student wants to withdraw from summer classes but retain his/her fall class schedule, then the student should enter “Summer Only” as the effective semester on the Withdrawal Form. Re-enrollment is not required following a summer-only withdrawal. Please note, a summer-only withdrawal is not available for newly admitted undergraduate students during their summer of admission. New summer admits must process a regular withdrawal as outlined above.

MORE INFORMATION (http://www.registrar.psu.edu/leaving_university/withdrawal.cfm)

Military Withdrawal

Military withdrawal only is available to students who:

1. are actively serving members (Active Duty and Reserve Duty Components) of the U.S. armed services (not a contractor or civilian working for the military), and
2. are ordered to relocate and, as a result, are unable to meet class attendance and other participation requirements, including web-based activities.

Students called to active duty during a semester or session should initiate a military withdrawal. Students should contact the campus Registrar and present a copy of the military orders with formal correspondence on unit letterhead signed by the commander requesting military withdrawal from Penn State due to orders. The formal correspondence must include the Unit commander contact information and verification of the duration and location of the pending assignment.

Students who process a military withdrawal:

- will not be charged tuition for the semester of withdrawal.
- will be charged a housing assessment to cover expenses already incurred in university housing.
- will have unused meal plan points refunded.
- are eligible for "military re-enrollment" to the University, assuring the student access to the same major and location as was assigned at the time of withdrawal.
- will have the re-enrollment fee waived if they are an undergraduate student. There is no re-enrollment fee for graduate students.
- will have a notation placed in the Special Actions and Notes section of their transcript indicating a "military" withdrawal.

MORE INFORMATION (http://www.registrar.psu.edu/leaving_university/withdrawal.cfm)

Transcripts

Official Transcripts

Issued by the Office of the University Registrar, an official transcript is the University's certified statement of a student's academic record. The official paper transcript is printed on security sensitive paper and contains the University seal and signature of the University Registrar. The official electronic transcript is a PDF secured by a digital certificate which is displayed at the top of the transcript along with a blue ribbon. The University Registrar will not release an official transcript without the student's signature.

Transcripts can be ordered online through LionPATH or in-person at 112 Shields Building on the University Park campus.

MORE INFORMATION (http://www.registrar.psu.edu/transcripts.cfm)

Academic Advising Transcripts

Currently enrolled students may print academic advising transcripts directly from LionPATH for the purpose of on-campus academic advising. Academic advising transcripts are not certified by the University Registrar as a complete and accurate record of the University and will not be mailed by the Office of the University Registrar to any third party regardless of permission from a student.

MORE INFORMATION (http://www.registrar.psu.edu/transcripts/academic_advising_transcripts.cfm)

Academic Advising

An integral part of student success, academic advising is provided to all undergraduate students. The intention of academic advising is to engage students in meaningful conversations about learning, academic opportunities, and the ways that all aspects of the University curriculum serve to shape a meaningful education for students at Penn State. Academic advisers also are uniquely positioned to help students understand the policies and procedures that govern undergraduate degree completion and to refer students to other appropriate resources across Penn State that are intended to promote student learning and success. While academic advisers are available to help a student schedule each semester's courses, their primary role is to discuss with the student the broad meaning of their University education and to collaboratively plan for reaching the student’s academic goals. Each student is assigned a primary academic adviser in their college, school, or the Division of Undergraduate Studies. Students can find their adviser’s name and contact information using Starfish.

Planning a Degree Program

Though Penn State has a vested interest in student success and takes active steps to build a positive learning environment, the primary responsibility for successful completion of a degree program lies with the student. The key to meeting this responsibility is personal involvement in academic planning. To plan a program of study that will best meet individual goals and interests, students must know the requirements and restrictions of the department, college or other degree-granting unit, and the University; know the sources of academic information, especially the Undergraduate Bulletin; and work consistently with an academic adviser in examining programs and course requirements and alternatives.

For most degree programs at Penn State, a student may begin their studies at any campus. More than 160 baccalaureate majors, more than 25 associate degree majors, and more than 7,000 undergraduate courses are offered by the University. Though each campus cannot offer every academic program or every course, academic advisers can help students to understand their options for completing degree programs across the University. In some instances, admission to some academic programs is restricted, and students must meet specific requirements once at Penn State to gain entrance. In other cases, admission to certain academic programs must be approved when a first-year student first enters the University; transfer into these programs at a later point in a student’s career is not possible. For these reasons, it is imperative that a student understands both program and course limitations at the campus of enrollment.

Though many programs at Penn State allow varying degrees of flexibility, it is important for students to engage academic advising on a regular basis to discuss their academic plan. An early decision to pursue a highly structured program enables the student to complete the program in the optimum length of time by taking the required courses in a sequence that allows the smoothest progression from one level to the next. Even the most regulated programs, however, allow choices within given boundaries. Other programs allow a considerable range of choices in the completion of the requirements. Students should be aware of possible difficulties in transferring from a flexible program to a more highly structured program. Whether a program is highly structured or quite flexible, it is extremely important that the student understand program requirements when enrolling in the University.

New Student Orientation

Penn State provides all new students the opportunity to attend a comprehensive orientation program, which is organized by the Office for Student Orientation and Transition Programs (SOTP). SOTP partners with the Division of Undergraduate Studies and other units to offer new students a thorough introduction to life on campus, an overview of General Education requirements, and the opportunity to actively discuss
individual academic plans with an academic adviser. In addition to providing students an opportunity to register for appropriate classes, the overall objective of New Student Orientation (http://orientation.psu.edu) is to establish the academic expectations and community standards that shape and inform the learning environment at Penn State.

**Information for New Students**

The Office for Student Orientation and Transition Programs provides first-year students, advanced standing, and change-of-campus students at the University Park campus with comprehensive information regarding the essential academic and student development opportunities of the campus and the University in general beginning with a new student's acceptance to a campus and continuing through completion of their first semester.

Through programs offered in cooperation with the colleges' academic units and various student service operations, new students are introduced to the intellectual and scholarly expectations of the University, to the skills needed for advanced study and lifelong learning, and to the student development opportunities with academic merit. In addition, this office helps inform students of the required procedures for matriculation and offers a perspective on college life, including practical information about important dates, times, and locations (e.g., arrival day, first day of classes, course drop/add).

During Welcome Week each semester, new students receive instruction and advice about their courses of study, including help with registration and class schedule adjustments, and they participate in special activities.

**Course Placements**

**Placement in Mathematics, Chemistry, and English**

During New Student Orientation (NSO), academic advisers assist new students in evaluating their educational plans by providing them, prior to initial registration, with a review of placement test results along with individualized educational planning and academic advising. The testing component of NSO is used for educational planning and academic advising purposes, to determine a student's appropriate starting levels in mathematics and chemistry course sequences. English composition course placement is determined by the SAT-W score.

All students admitted to Penn State have demonstrated the ability to succeed academically. Academic success depends on students developing new study skills, refining time management strategies, and actively use learning resources. In addition to these factors, students are more successful in collegiate-level mathematics, chemistry, and English courses when they begin in courses that match their readiness.

Entering first-year students plan their first-semester schedules as part of NSO, with assistance from academic advisers in their unit of enrollment. Course selections are guided by a student’s academic goals, their prior academic experiences, highest SAT-Evidence-Based Reading score, and highest ALEKS Math Assessment score.

**Mathematics Placement**

As part of General Education, all Penn State baccalaureate degree programs require a minimum of six credits in quantification; associate degree programs require a minimum of three credits. General Education quantification courses have the suffix "GQ." GQ courses are available in mathematics, statistics, computer science, and philosophy.

When choosing GQ courses, students should consider their interests, background in mathematics, the focus of majors being considered, and the results of mathematics assessment. Most science/engineering programs require MATH 140, while some liberal arts/professional programs (particularly business-focused programs) require MATH 110.

All new first-year students are required to take a web-based, artificially intelligent mathematics assessment called ALEKS as part of their preparation for NSO. If a student has not yet earned college credit for the pre-requisite course, the ALEKS score is used to determine placement in calculus-sequence MATH courses. Students who wish to improve their placement can use ALEKS prior to the start of their first semester to complete online learning modules and re-test. Students are not permitted to take a course that is above their demonstrated readiness level.

The chart below shows the required ALEKS placement for GQ courses. Decisions about appropriate quantification (GQ) courses should be discussed with an academic adviser.

</tr>
</tbody>
</table>

*Course not offered at all Penn State campuses.

For courses not listed above, choose any appropriate GQ course for your intended major and for which you have met the pre-requisite.

**Chemistry Placement**

Many science, engineering, and health-focused programs require CHEM 110. CHEM 110 is a rigorous course involving significant mathematical manipulation and algebra proficiency. Success in CHEM 110 depends on a student’s chemistry experience and algebra proficiency. Therefore, placement into introductory chemistry courses is based on a student’s prior background in chemistry and results of the mathematics placement test as indicated by their ALEKS score. Additional evaluation may be done during the beginning of the semester.
### What courses might you take?

**ALEKS score**

<table>
<thead>
<tr>
<th>No high school chemistry course</th>
<th>Chemistry in 9th or 10th grade or chemistry more than two years ago</th>
<th>Chemistry in 11th or 12th grade, Honors chemistry, or AP chemistry</th>
</tr>
</thead>
<tbody>
<tr>
<td>60% or less</td>
<td>CHEM 101, then MATH 22, then CHEM 110</td>
<td>MATH 22, then CHEM 110</td>
</tr>
<tr>
<td>61% or higher</td>
<td>CHEM 101, then CHEM 110</td>
<td>CHEM 110</td>
</tr>
</tbody>
</table>

*Any students who feel their chemistry preparation may be weak should consider also scheduling CHEM 108.

### English Placement

All majors require a first-year English composition course. ENGL 15 (Rhetoric and Composition), ESL 15 (Composition for American Academic Communication II), ENGL 30 (Honors Rhetoric and Composition), or ENGL/CAS 137H (Rhetoric and Civic Life I) all satisfy that requirement.

Initial English composition placement is based on the SAT-Evidence-Based Reading exam score and may be adjusted after a conversation with an academic adviser. Most students will take ENGL 15. Students with strong writing preparation may choose an honors composition course. Students whose SAT-READ scores suggest gaps may need some extra support to be successful in ENGL 15.

### Guide to Course Selection

to help students choose the most appropriate English composition course

<table>
<thead>
<tr>
<th>Questions for Students</th>
<th>ENGL 4 or ENGL 15</th>
<th>ENGL 15</th>
<th>ENGL 30</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. What English courses did you take in your junior and senior years of high school?</td>
<td>Fewer than two years of AP or college preparatory English</td>
<td>Two years of AP or college preparatory English</td>
<td>Two years of advanced or AP English</td>
</tr>
<tr>
<td>2. What type of writing did you do in your high school English classes?</td>
<td>Infrequently wrote essays of more than one paragraph with little feedback from the teacher</td>
<td>Frequently wrote essays of more than one paragraph in length with feedback from the teacher</td>
<td>Frequently wrote essays that required substantial amounts of writing with feedback from the teacher</td>
</tr>
<tr>
<td>3. What were your grades in English in your junior and senior years of high school?</td>
<td>Mostly C or less</td>
<td>Mostly between C and B-</td>
<td>C Mostly B or higher</td>
</tr>
<tr>
<td>4. To what extent are you familiar with basic writing tasks such as planning, editing, composing, and revising?</td>
<td>I am unfamiliar with these tasks or not confident</td>
<td>I can perform these tasks with a fair degree of competence</td>
<td>I possess the skills needed to perform these tasks with competence</td>
</tr>
<tr>
<td>5. If you had a job that required writing, how successful were your writing efforts?</td>
<td>Need substantial improvements</td>
<td>Moderately successful</td>
<td>Highly successful</td>
</tr>
<tr>
<td>6. Do you consider yourself a confident and competent writer?</td>
<td>No</td>
<td>Yes</td>
<td>Very much so</td>
</tr>
</tbody>
</table>

**ENGL 4 is not available at University Park campus. In place of ENGL 4, University Park students should schedule ENGL 15 Enhanced or may consider scheduling ENGL 15 and ENGL 5.**

### Placement Policy for World Language Courses

<table>
<thead>
<tr>
<th>Placement Policy</th>
</tr>
</thead>
</table>
| Students who have studied a world language within four years immediately before admission to Penn State may enroll in that language for credit based on the number of Carnegie units prior to admission. (A Carnegie "unit" refers to one course level of a world language — French 1, French 2, French 3, etc. — equivalent to one year of study and accredited as such by the school.) If a period of four or more years has elapsed
between a student’s graduation from high school and admission to college, he/she may be eligible to enroll in level 1 of the language studied in high school.

### Units of Study Prior to Admission to Penn State Language Level

<table>
<thead>
<tr>
<th>Units of Study Before Admission to Penn State</th>
<th>Register in Penn State Language Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fewer than two</td>
<td>Course Level 001 (4 cr.)</td>
</tr>
<tr>
<td>Two or three</td>
<td>Course Level 002 (4 cr.)</td>
</tr>
<tr>
<td>Four or more</td>
<td>Course Level 003 (4 cr.)</td>
</tr>
</tbody>
</table>

Students may choose to audit a lower-level course but may not receive credit for it. Students who feel they are qualified for a more advanced course, or students seeking proficiency certification or credit by examination, if available, should contact the appropriate language department for details. For more information, see College of the Liberal Arts policies (http://sll.la.psu.edu/language-portal).

### Non-Course Work Knowledge of World Languages

Students who have acquired a knowledge of a world language by means other than course work (e.g., family background, travel or study in a foreign country, participation in noncredit summer language programs, etc.) may enroll in elementary and intermediate courses in that language only with permission of the course coordinator or department head. Once students have been placed in a skills course, they may not receive credit for a lower-level skills course.

Students whose native language is not English may not receive credit (through course work or examination) for elementary and intermediate courses in their native language. Enrollment in skills courses beyond intermediate level (e.g., conversation, composition) must be approved by the department head.

### Accelerated and Intensive Courses

Students may choose to enroll in accelerated courses such as French 111 and 112, German 11 and 12, or in Penn State’s Summer Intensive Language Institute courses. Because the objectives of these courses are somewhat different, students may schedule them for full credit even if they have studied the language previously.

Credit by examination (fee charged), when available, is offered to the extent allowed by the placement policy. For example, a student who has two units of secondary school foreign language and chooses to begin study of that language at the third level instead of the second (Course Level 003, 4 cr.), may receive credits for the second level (Course Level 002, 4 cr.), but not for the first level (Course Level 001, 4 cr.). See the appropriate department for details.

### QUESTIONS

Questions should be addressed to the course coordinator or department head of the particular language department concerned.

### First-Year Seminars and Engagement Plan Rules/Regulations

A student’s campus of enrollment determines whether or not he/she is required to complete a first-year seminar (FYS). Campuses that do not require an FYS provide students with a first-year engagement experience. If a student changes their campus location, the student’s degree audit will be changed to indicate whether the student needs to fulfill this requirement based on established criteria.

View Approved First-Year and Campus Engagement Plans (http://senate.psu.edu/faculty/resources-for-first-year-engagement-plans/approved-first-year-engagement-plans).

MORE INFORMATION ABOUT FIRST-YEAR SEMINARS AND ENGAGEMENT PLAN RULES/REGULATIONS (http://handbook.psu.edu/content/first-year-seminars-and-engagement-plans)

### Degree Audit

A degree audit is an analysis that enables the student and their adviser to assess the student’s academic progress and unfulfilled baccalaureate, associate degree, or minor requirements. The audit is a valuable tool for academic planning and course selection because it matches the courses that the student has taken with the requirements of their degree program or anticipated program.

### Academic Integrity

**Definitions and Expectations**

Academic integrity is the pursuit of scholarly activity in an open, honest and responsible manner. Academic integrity is a basic guiding principle for all academic activity at The Pennsylvania State University, and all members of the University community are expected to act in accordance with this principle. Consistent with this expectation, the University’s Code of Conduct states that all students should act with personal integrity, respect other students’ dignity, rights and property, and help create and maintain an environment in which all can succeed through the fruits of their efforts.

Academic integrity includes a commitment by all members of the University community not to engage in or tolerate acts of falsification, misrepresentation or deception. Such acts of dishonesty violate the fundamental ethical principles of the University community and compromise the worth of work completed by others.

To protect the rights and maintain the trust of honest students and support appropriate behavior, faculty and administrators should regularly communicate high standards of integrity and reinforce them by taking reasonable steps to anticipate and deter acts of dishonesty in all assignments. At the beginning of each course, it is the responsibility of the instructor to provide students with a statement clarifying the application of University and College academic integrity policies to that course.

READ SENATE POLICY 49-20: ACADEMIC INTEGRITY (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/47-00-48-00-and-49-00-grades/#49-20)

### Confidentiality of Student Records

The Federal Family Educational Rights and Privacy Act (FERPA (http://www2.ed.gov/policy/gen/guid/fpco/ferpa)) is a federal regulation enacted in 1974 that protects the privacy and confidentiality of student education records. Under FERPA, institutions may not release a student's education record without prior consent of the student, except in limited circumstances. FERPA applies to all schools that receive funds under an applicable program of the U.S. Department of Education.

At Penn State, educational records are kept by University offices to facilitate the educational development of students. Faculty and staff members may also keep informal records relating to their functional responsibilities with individual students.
Student Rights under FERPA

FERPA (https://www2.ed.gov/policy/gen/guid/fpco/ferpa) affords students certain rights with respect to their educational records (https://policy.psu.edu/policies/AD11/#C). These rights include:

- The right to inspect and review the student’s educational records. A student should submit to the University Registrar a written request that identifies the record(s) the student wishes to inspect. The University Registrar will make arrangements for access and notify the student of the time and place where the records may be inspected.

If the records are not maintained by the University Registrar, the University Registrar will advise the student of the correct official to whom the request should be addressed.

- The right to request the amendment of the student’s educational records that the student believes are inaccurate, misleading, or otherwise in violation of the student’s privacy rights under FERPA.

If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

- The right to provide written consent before the University discloses personally identifiable information from the student’s educational records, except to the extent that FERPA authorizes disclosure without consent.

One exception which permits disclosure without consent, is the disclosure to University officials with legitimate educational interests. University officials (https://policy.psu.edu/policies/AD11/#B) are University employees with general or specific responsibility for promoting the educational objectives of the University or third parties under contract with the University to provide professional, business and similar administrative services related to the University’s educational mission. Legitimate educational interests (https://policy.psu.edu/policies/AD11/#B) are defined as interests that are essential to the general process of higher education prescribed by the body of policy adopted by the governing board.

A student who wishes to ask the University to amend a record should write the University official responsible for the record, clearly identify the part of the record the student wants to be changed, and specify why it should be changed.

Another exception which permits disclosure without written consent is the disclosure of education records to University employees with general or specific responsibility for promoting the educational objectives of the University or third parties under contract with the University to provide professional, business and similar administrative services related to the University’s educational mission. Legitimate educational interests are defined as interests that are essential to the general process of higher education prescribed by the body of policy adopted by the governing board.

OTHER EXCEPTIONS (http://www.registrar.psu.edu/confidentiality/other_exceptions.cfm)

The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA. The name and address of the Office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5901

Parents Rights Relating to Educational Records

When a student reaches the age of 18 or begins attending a postsecondary institution, regardless of age, FERPA (http://www2.ed.gov/policy/gen/guid/fpco/ferpa) rights transfer from the parent to the student. This means that parents may not obtain any of their student’s education records without the written consent of the student.

Since student grades are part of the education record, they are protected under FERPA (http://www2.ed.gov/policy/gen/guid/fpco/ferpa) and, therefore, may not be released to parents. Students may provide consent for their parent to view grades and other portions of their education record by setting up LionPATH Delegated Access (https://www.registrar.psu.edu/confidentiality/parent_rights.cfm).

It is important to note that Penn State does not have a means for students to unilaterally waive their FERPA rights. Penn State’s procedure requires each release of any portion of the student’s education record to a person or entity outside of the University to be individually approved by the student by working with the releasing department.

MORE INFORMATION FROM THE OFFICE OF THE UNIVERSITY REGISTRAR (http://www.registrar.psu.edu/confidentiality/confidentiality.cfm)

READ POLICY AD 11: UNIVERSITY POLICY ON CONFIDENTIALITY OF STUDENT RECORDS (https://policy.psu.edu/policies/AD11)

Nondiscrimination Statement

The University is committed to equal access to programs, facilities, admission, and employment for all persons. It is the policy of the University to maintain an environment free of harassment and free of discrimination against any person because of age, race, color, ancestry, national origin, religion, creed, service in the uniformed services (as defined in state and federal law), veteran status, sex, sexual orientation, marital or family status, pregnancy, pregnancy-related conditions, physical or mental disability, gender, perceived gender, gender identity, genetic information, or political ideas. Discriminatory conduct and harassment, as well as sexual misconduct and relationship violence, violates the dignity of individuals, impedes the realization of the University’s educational mission, and will not be tolerated. Direct all inquiries regarding the nondiscrimination policy to the Affirmative Action Office, The Pennsylvania State University, 328 Boucke Building, University Park, PA 16802-5901; Email: kfl2@psu.edu; Tel 814-863-0471.

Penn State encourages qualified persons with disabilities to participate in its programs and activities. If you anticipate needing any type of accommodation or have questions about the physical access provided, please contact the Office for Disability Services, 814-863-1807, in advance of your participation or visit.

Code of Conduct

The Code of Conduct outlines the standard procedures and practices of the University conduct process. To be fully aware of their individual and organizational rights and responsibilities in this process, individuals and student organizations are encouraged to review the Student Code of Conduct (https://studentaffairs.psu.edu/support-safety-conduct/student-conduct/code-conduct).

General Education

General Education is the heart of the undergraduate experience. From the sciences to the arts and humanities, General Education at Penn State prepares students to thrive personally and professionally in our diverse global society. Through General Education, students acquire skills, knowledge, and experiences for living in interconnected contexts, making life better for themselves, others, and the world. As professions become more dynamic and career paths less predictable, the ability to
place information into context through critical thinking, develop solutions to complex problems, and make ethical decisions become essential skills for a resilient workforce. Creative and analytical practice prepares students of all disciplines to be resourceful in the application of their knowledge towards complex problem solving and to communicate that knowledge in a variety of forms.

MORE INFORMATION (http://gened.psu.edu)

We invite students to challenge themselves in General Education and encourage them to make intentional course decisions that create:

**Strong Foundations**
Develop and improve upon the skills that enable you to achieve your goals.

**Transformative Exploration**
Explore unfamiliar and challenging topics and viewpoints to prepare yourself for a dynamic future.

**Integrative Learning**
Identify meaningful and useful connections to generate new ideas.

**General Education Learning Objectives**
The General Education curriculum will enable students to acquire skills, knowledge, and experiences for living in interconnected contexts, so they can contribute to making life better for others, themselves, and the world. General Education encompasses the breadth of knowledge involving the major intellectual and aesthetic skills and achievements of humanity. This must include understanding and appreciation of the pluralistic nature of knowledge epitomized by the natural sciences, quantitative skills, social and behavioral sciences, humanities, and arts. To achieve and share such an understanding and appreciation, skills in self-expression, quantitative analysis, information literacy, and collaborative interaction are necessary. General Education aids students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. General Education, in essence, aims to cultivate a knowledgeable, informed, literate human being.

An effective General Education curriculum shall facilitate teaching and learning through seven key objectives:

**Effective Communication**
The ability to exchange information and ideas in oral, written, and visual form in ways that allow for informed and persuasive discourse that builds trust and respect among those engaged in that exchange, and helps create environments where creative ideas and problem-solving flourish.

**Key Literacies**
The ability to identify, interpret, create, communicate, and compute using materials in a variety of media and contexts. Literacy acquired in multiple areas, such as textual, quantitative, information/technology, health, intercultural, historical, aesthetic, linguistic (world languages), and scientific, enables individuals to achieve their goals, to develop their knowledge and potential, to lead healthy and productive lives, and to participate fully in their community and wider society.

**Critical and Analytical Thinking**
The habit of mind characterized by comprehensive exploration of issues, ideas, artifacts, and events before accepting or formulating a conclusion. It is the intellectually disciplined process of conceptualizing, applying, analyzing, synthesizing, and/or evaluating information gathered from, or generated by, observation, experience, reflection, reasoning, or communication, as a guide to belief and action.

**Integrative Thinking**
The ability to synthesize knowledge across multiple domains, modes of inquiry, historical periods, and perspectives, as well as the ability to identify linkages between existing knowledge and new information. Individuals who engage in integrative thinking are able to transfer knowledge within and beyond their current contexts.

**Creative Thinking**
The capacity to synthesize existing ideas, images, or expertise in original ways and the experience of performing, making, thinking, or acting in an imaginative way that may be characterized by innovation, divergent thinking, and intellectual risk taking.

**Global Learning**
The intellectually disciplined abilities to analyze similarities and differences among cultures; evaluate natural, physical, social, cultural, historical, and economic legacies and hierarchies; and engage as community members and leaders who will continue to deal with the intricacies of an ever-changing world. Individuals should acquire the ability to analyze power, identify and critique interdependent global, regional, and local cultures and systems; and evaluate the implications for people's lives.

**Social Responsibility and Ethical Reasoning**
The ability to assess one's own values within the social context of problems, recognize ethical issues in a variety of settings, describe how different perspectives might be applied to ethical dilemmas, and consider the ramifications of alternative actions. Individuals should acquire the self-knowledge and leadership skills needed to play a role in creating and maintaining healthy, civil, safe, and thriving communities.

**Associate Degree General Education Requirements**
The associate degree General Education program consists of 21 credits that are distributed among two General Education components:

- Foundations courses in writing, speaking, and quantification (6 credits)
- Knowledge Domains in the Arts, Humanities, Natural Sciences, and Social and Behavioral Sciences (15 credits).

A summary of the applicable attributes to determine if a course satisfies a requirement is available on the University Course Description (p. 2735) page. The keystone symbol appears by the title of any course that is designated as a General Education course. Program requirements that may also satisfy General Education requirements vary for each program and are detailed on each degree requirements page.
A restriction is placed on students in majors that are closely linked to the Knowledge Domains areas of Natural Sciences, Arts, Humanities, and Social and Behavioral Sciences, in order to ensure that they participate in the full breadth of General Education. These students may not use a course in their academic major to satisfy one of the Knowledge Domains area requirements. For example, an ECON major may not use an ECON course to fulfill their social and behavioral sciences requirement.

The General Education requirements for students who enrolled at Penn State prior to Summer 2018 can be found in the Archive (p. 15).

A General Education course selected from: GWS, GQ, GN, GA, GH, or GS, and may include Integrative Studies (Inter-domain or Linked) courses

**Flexibility of the Associate Degree Requirements**

The General Education program extends the concept of flexibility to all aspects of the degree program. Penn State wants students to use General Education as an opportunity to experiment and explore, to take academic risks, to discover things they did not know before, and to learn to do things they have not done before.

To these ends, students may, with the permission of their adviser and dean's representative, substitute a 200- to 499-level course for an Arts, Humanities, Natural Sciences, or Social and Behavioral Sciences course found on the General Education list. For example, a student may take a 400-level course in history and use it to meet the General Education requirement satisfied by a comparable lower level history course.

**Additional University Requirements**

These requirements may be completed by designated courses that also complete other degree or General Education requirements.

Total 6 credits

**Baccalaureate Degree General Education Requirements**

The baccalaureate degree General Education program consists of 45 credits that are distributed among three General Education components:

- foundations courses in writing, speaking and quantification (15 credits)
- knowledge Domains in the Arts, Humanities, Natural Sciences, Social and Behavioral Sciences, and Health and Wellness (30 credits)
- integrative Studies that bridges commonality and intersections between the Knowledge Domains

A summary of the applicable attributes to determine if a course satisfies a requirement is available on the University Course Description (p. 2735) page. The keystone symbol appears by the title of any course that is designated as a General Education course. Program requirements that may also satisfy General Education requirements vary for each program and is detailed on each degree requirements page.

A restriction is placed on students in majors that are closely linked to the Knowledge Domains of Natural Sciences, Arts, Humanities, and Social and Behavioral Sciences to ensure that they participate in the full breadth of General Education. These students may not use a course in their academic major to satisfy one of the Knowledge Domains requirements. For example, an Economics major may not use an economics course to fulfill their social and behavioral sciences requirement. Also, students may not count courses cross-listed with courses in their major to fulfill one of the General Education Knowledge Domain, e.g., a Theatre major may not register for THEA 208/Workshop: Theatre in Diverse Cultures (AFAM 208) and have it count in the Arts requirement.

The General Education requirements for students who enrolled at Penn State prior to Summer 2018 can be found in the Archive (p. 15).

† Students may, with the permission of their adviser and dean's representative, meet the United States Cultures (US) and International Cultures (IL) requirement through completion of an experiential learning program or practicum (one-semester or year long) approved by their college dean's Office. Approved Penn State Education Abroad Programs may be used to satisfy the International Cultures (IL) requirement.
Flexibility of the Baccalaureate Degree Requirements

Penn State wants students to use General Education to experiment and explore, to take academic risks, to discover things they did not know before, and to learn to do things they have not done before. To that end, the General Education program extends the concept of flexibility to all aspects of the degree program.

Students may, with the permission of their adviser and dean’s representative:

1. Substitute a 200- to 499-level course in an area of General Education for a course found on the General Education list. For example, a student may take a 400-level course in history and use it to meet the General Education requirement satisfied by a comparable lower-level history course.

2. Substitute a world language at the twelfth credit level of proficiency, as measured by the Penn State foreign language offerings, for 3 credits in any of the categories of General Education. Baccalaureate degree students may substitute study in a world/second language at the twelfth credit level of proficiency or higher for any 3 credits in any of the categories of General Education only if those 3 credits are in language study beyond their degree requirements.

3. Substitute a course in one of the Knowledge Domains areas of Arts, Humanities, or Social and Behavioral Sciences, Natural Sciences, or Health and Wellness for a course in one of the other areas. For example, a student might take three courses in the Arts, and only one course in the Social and Behavioral Sciences. In another example, a student might take two courses in the Natural Sciences and two courses in Health and Wellness; or a student might take two courses in the Natural Sciences and three courses in the Humanities. This substitution is referred to as the Move 3 substitution.

4. The use of these substitutions (No. 2 and No. 3 above), either alone or in combination, may not lead to the complete elimination of any area in the Foundations or Knowledge Domains categories in the student’s general education program, nor may they be applied to reduction of credits in the same domain.

Additional University Requirements

These requirements may be completed by designated courses that also complete other degree or General Education requirements.

† May include a First-Year Seminar; a student’s campus of enrollment determines whether or not a First-Year Seminar is required. Students at the University Park campus are required to complete at least 1 credit of first-year seminar and meet any other first-year requirements specified by their home college. Students at the Commonwealth campuses are required to complete the first-year experiences specified by their campus. First-year baccalaureate students entering Penn State should consult their enrollment home for these requirements.

‡ Students may, with the permission of their adviser and dean’s representative, meet the United States Cultures (US) and International Cultures (IL) requirement through completion of an experiential learning program or practicum (one-semester or year long) approved by their College Dean’s Office. Approved Penn State Education Abroad Programs may be used to satisfy the International Cultures (IL) requirement.

Descriptions and learning criteria for each of the Foundation and Knowledge Domain areas within General Education are listed here.

Foundations

Writing and Speaking (GWS)

In Writing and Speaking (GWS) courses, students do more than improve their abilities to communicate information clearly. They learn to set forth arguments persuasively and well, both orally and in writing. Students should emerge from their GWS courses as more accomplished writers and speakers, competent in a wide variety of settings.

To help students achieve GWS goals, the University provides GWS courses and an appropriate learning environment that will:

- provide opportunities for students to become increasingly effective communicators as they enter new contexts and address new audiences;
- provide opportunities for students to become increasingly accomplished in written, oral, digital, and visual communication.

GWS Student Learning Criteria

Upon successful completion of the General Education Writing and Speaking requirements, students will have increased their abilities to:

- demonstrate rhetorical and analytical skills as they explore, compose, interpret, and present a variety of texts;
- communicate effectively and persuasively to a range of audiences;
- demonstrate capacities for critical thinking, listening, and generating ideas;
• demonstrate proficiency in composing processes;
• employ the conventions of both spoken and written communication with sensitivity to context and venue.

Quantification (GQ)
In Quantification (GQ) fields, students practice and master basic mathematical and statistical skills of lifelong value in solving real-world problems. Students should learn to apply mathematical skills appropriate to solve such problems.

To help students achieve GQ goals and master foundational quantification skills, the university provides GQ coursework and an appropriate learning environment that will:

• provide experience in assessing and interpreting quantitative data and information;
• guide students to recognize patterns, establish relations, exercise conceptual thinking, develop problem-solving skills, and think logically and critically;
• support students in their efforts to draw accurate and useful conclusions; make informed decisions based on quantitative analysis; and use basic mathematical and statistical skills to solve conceptual problems.

GQ Student Learning Criteria
Upon successful completion of the General Education Quantification (GQ) requirement, students should have increased their abilities to:

• use mathematical, statistical, or computational models, principles, and processes to integrate, synthesize, generalize, or make judgments about real-world problems;
• recognize patterns, establish mathematical relations, apply problem-solving skills, and think logically and critically;
• develop, explore, analyze, and reason about multi-variable relationships using quantitative tools;
• use probability to reason and make judgments based on data that exhibit variability;
• communicate and explain mathematical and statistical ideas.

Knowledge Domains
Arts (GA)
In Arts fields (GA), students focus on exploring or creating works of art. Students should become familiar with the importance of significant creative works, the traditions and history associated with those works, and the important role that the arts play as expressions of the cultural values of society and the human condition.

To help students achieve GA goals, the University provides GA courses and an appropriate learning environment with purposeful engagement with the arts and creative works for students to:

• encounter and become conversant with the terminologies, techniques, practices, knowledge, and skills employed by the arts;
• gain a comprehension of the role that the arts play as expressions of the cultural values of society and the human condition;
• expand their knowledge of the variety of expressions and experiences that are provided through the arts;
• develop competencies in interpreting and critically evaluating diverse expressions in the arts.

GA Student Learning Criteria
Upon successful completion of the General Education Arts (GA) requirement, students should be able to:

• explain the methods of inquiry in arts fields and describe how the contributions of these fields complement inquiry in other areas;
• demonstrate expanded knowledge and comprehension of the role that the arts play in various aspects of human endeavor;
• demonstrate competence in the creation of works of art and design;
• demonstrate competence in analysis, critical thinking and interpretive reasoning through the exploration of creative works;
• identify and explain the aesthetic, historical, social, and cultural significance of important works of art and critically assess creative works, their own or others’, through evaluative processes of analysis and interpretation.

Humanities (GH)
In Humanities (GH) fields, students focus on exploring important works of literature, history, religion, philosophy, and other closely related forms of cultural expression, thereby broadening their understanding of diverse ways of seeing, thinking about, and experiencing the self and society. Students will enlarge their intellectual horizons and knowledge of the world through encountering humanistic representations of both lived experiences and imaginative or speculative constructions, past or present. Students thus become increasingly prepared to live as thoughtfully engaged members of multiple communities, whether local, regional, or global.

To help students achieve GH goals, the University provides GH courses and an appropriate learning environment for students to:

• engage in the qualitative study of the humanities;
• expand their knowledge of the variety of human experiences;
• gain access to various intellectual traditions and their changes through time;
• probe the foundations of communication and thought and become aware of the scope and limitations of human communication;
• encounter concepts and traditions that attempt to bring sense to human existence;
• develop their competency in interpreting and critically evaluating diverse ways of life, traditions, and shared or individual values, including their own.

GH Student Learning Criteria
Upon successful completion of the General Education Humanities (GH) requirement, students should have increased their abilities to:

• explain the methods of inquiry in humanities fields and describe how the contributions of these fields complement inquiry in other areas;
• demonstrate competence in critical thinking about topics and texts in the humanities through clear and well-reasoned responses;
• critically evaluate texts in the humanities — whether verbal, visual, or digital — and identify and explain moral or ethical dimensions within the disciplines of the humanities;
• demonstrate knowledge of major cultural currents, issues, and developments through time, including evidence of exposure to unfamiliar material that challenges their curiosity and stretches their intellectual range;
• become familiar with groups, individuals, ideas, or events that have influenced the experiences and values of different communities.
Health and Wellness (GHW)

In Health and Wellness (GHW) fields, students focus on the physical and psychosocial well-being of individuals and communities. They expand their theoretical and practical knowledge about health and wellness — concepts that are multidimensional and culturally defined. The University provides opportunities for students to study such diverse topics as nutrition, physical activity, stress, sleep, healthy leisure, alcohol, tobacco, and other substance use, sexual health, and safety — all useful in maintaining lifelong health and wellness and in creating healthy work and community environments.

To help students achieve GHW goals, the University provides GHW courses and an appropriate learning environment for students to:

• Identify and practice skills, attitudes, and behaviors that should enable them to better maintain health and wellness across their lifespans
• Identify wellness as a positive state of well-being, not merely the absence of disease or illness
• Recognize the importance of social, emotional, and physical health and wellness for communities as well as for individuals.

GHW Student Learning Criteria

Upon successful completion of the General Education Health and Wellness (GHW) requirement, students should have increased their abilities to:

• explain the methods of inquiry in Health and Wellness fields and describe how the contributions of these fields complement inquiry in other areas;
• describe multiple perceptions and dimensions of health and wellness (emotional, spiritual, environmental, physical, social, intellectual, and occupational);
• identify and explain ways individuals and/or communities can achieve and maintain health and wellness;
• describe health-related risk factors and explain changes in knowledge, attitudes, behaviors, activities or skills that have the potential of improving health and wellness;
• disseminate knowledge about health and wellness and demonstrate behavioral practices needed to engage in healthy living across the lifespan.

Natural Sciences (GN)

In Natural Science (GN) fields, students develop the skills necessary to make informed judgments about scientific information and arguments. Along with building knowledge of foundational scientific principles, students expand their understanding of how and why science works, why it is an effective tool for knowledge generation, and how it can address contemporary questions and challenges.

To help students achieve GN goals and develop this scientific literacy, the University provides GN courses and an appropriate learning environment for students to:

• encounter the order, diversity, and beauty of nature;
• sample some of the ways which science offers additional lens through which to view the human condition;
• engage with scientific material through discussion, exploration, data analysis, and experimentation;
• gain practice in recognizing the nature of scientific process and discovery, in identifying what science can and cannot achieve, and analyzing why scientific arguments may lead to different conclusions than other forms of intellectual discourse.

GN Student Learning Criteria

Upon successful completion of the General Education (GN) requirement, students should have increased their abilities to:

• explain the methods of inquiry in the natural science fields and describe how the contributions of these fields complement inquiry in other areas;
• construct evidence-based explanations of natural phenomena;
• demonstrate informed understandings of scientific claims and their applications;
• evaluate the quality of the data, methods, and inferences used to generate scientific knowledge;
• identify societal or philosophical implications of discoveries in the natural sciences, as well as their potential to address contemporary problems.

Social and Behavioral Sciences (GS)

In Social and Behavioral Science (GS) fields, students focus on analyzing the forces that influence behaviors, values, habits, attitudes, and institutions. GS courses allow students to explore the multiple perspectives and methodologies useful in analyzing and addressing complex social issues.

To help students achieve GS goals, the university provides GS courses and an appropriate learning environment for students to:

• explore the interrelationships of the many factors that shape behavior;
• be introduced to methodological analyses of the forms, practices, and theories of politics, economics, and social institutions;
• develop comprehensive, integrated, reasoned, and theoretical views of their contemporary and emerging social worlds;
• expand their understanding of how social, political, and economic influences and trends affect individual, group, organizational, local, national, and global contexts.

GS Student Learning Criteria

Upon successful completion of the General Education Social and Behavioral Sciences (GS) requirement, students should have increased their abilities to:

• explain the various methods of inquiry used in the social and behavioral sciences and describe how the contributions of these fields complement inquiry in other areas;
• identify and explain major foundational theories and bodies of work in a particular area of social and behavioral sciences;
• describe the ways in which many different factors may interact to influence behaviors and/or institutions in historical or contemporary settings;
• explain how social and behavioral science researchers use concepts, theoretical models, and data to better understand and address world problems;
• recognize social, cultural, political and/or ethical implications of work in the social and behavioral sciences.
Integrative Studies

Integrative Studies courses have a distinctive intellectual dimension. Because these courses ask the student to consider a topic from the perspective of two different General Education Knowledge Domains, they aim to advance the student’s ability to comprehend things from multiple perspectives, to see connections, and to grasp the concept that one must employ different modes of thinking, different epistemologies to understand more adequately the nature of things; one domain is not fully equal to the task of understanding the world around us. Each Linked Course provides sustained focus on a single Knowledge Domain, with connections to another course in a different Knowledge Domain; while each Inter-Domain course provides the immediacy of incorporating two Knowledge Domains in the same course.

Inter-Domain Courses

Inter-Domain courses each demonstrate how two Knowledge Domains speak to one another and how knowledge in one Domain relates to knowledge in another. Inter-Domain courses are each approved for two Knowledge Domains and demonstrate consistently how knowledge is integrated across these two Domains. Each Inter-Domain course integrates and meets the criteria of two Knowledge Domains (GA, GH, GHW, GN, GS).

Students must complete 6 credits of Inter-Domain coursework in order to fulfill the Integrative Studies requirement, if they select this pathway. Because these courses integrate two Knowledge Domains, and need time to do so, they will each carry at least 3 credits. Although students will usually take two 3-credit courses to fulfill this Pathway, students can also use Inter-Domain courses carrying more than 3 credits, if available. Each of the two Knowledge Domains in an Inter-Domain course will receive approximately equal attention (in course topics, assignments, or other course components). Although each Inter-Domain course will satisfy a Domain requirement in both of the Knowledge Domains for which it is approved, the number of credits it contributes towards the total of 30 credits required in the Knowledge Domains is not doubled. For example, a 3-credit course approved as both Natural Science and Social Science will satisfy a Domain requirement in both of those categories; however, this course will contribute 3 credits, not 6, to the total of 30 needed.

Linked Courses

Linked Courses, each approved for a single Knowledge Domain, demonstrate how the various disciplines within the General Education Knowledge Domains speak to one another and how knowledge in one Domain relates to knowledge in another. Courses are usually linked purposefully by subject matter, but they may be linked by some other common interest, such as an engaged scholarship project, shared assignments, shared readings, etc. Linkages must include courses from different General Education Knowledge Domains (GA, GH, GHW, GN, GS).

Students need to take 6 credits from the same Linkage (which may include more than two courses), in different Knowledge Domains, to fulfill the requirement, if they select this pathway. A single course alone does not count for the Linked Courses in the Integrative Studies requirement even if that course has been approved to be part of a Linkage. However, because each Linked Course satisfies a Knowledge Domain requirement, the student can use it within that Domain (or perhaps elsewhere in the student’s program) whether or not the Linkage is completed. Although students will usually fulfill the 6-credit Linked Courses Pathway by taking two 3-credit courses, students may also use courses carrying anywhere from 1 to 5 credits towards the total of 6 Linked Courses credits. Approved Linked Course pairs will be listed in the LionPATH Linked Course table (coming soon).

Other University Requirements

There are several university-level requirements that are designed to help students succeed both academically and professionally. These requirements may be completed by designated courses that also complete other degree or General Education requirements (e.g. a single course may satisfy a cultural diversity requirement as well as a General Education requirement).

First-Year Engagement Program

The First-Year Engagement Programs are designed to actively involve students in learning, acquaint them with the learning tools and resources available at Penn State and orient them to the scholarly community from the outset of their undergraduate studies in a way that will bridge to later experiences in their chosen majors. In addition, the First-Year Engagement Programs facilitate students’ adjustment to the high expectations, demanding workload, increased academic liberties, and other aspects of the transition to college life and introduce them to their responsibilities as members of the University community.

All incoming first-year baccalaureate students are required to complete a First-Year Engagement Program, with a student’s campus of enrollment determining whether or not this includes a First-Year Seminar (FYS). All students enrolled in a University Park college, the Division of Undergraduate Studies at University Park, and the World Campus are required to take 1 to 3 credits of the First-Year Seminar, as specified by their college First-Year Engagement Plan. Other campuses may require the First-Year Seminar; campuses that no longer require a First-Year Seminar provide students with a first-year engagement experience. First-year baccalaureate students entering Penn State should consult their enrollment home for these requirements.

Courses that have the First-Year Seminar attribute satisfy this requirement. Some courses may also have an identifying suffix (S or T) after the course number. The degree audit and what-if reports in LionPATH use attributes, not suffixes, to determine the applicability of a course to a requirement.

Cultural Diversity

Baccalaureate students are required to complete 3 credits each in United States and International Cultures.

Associate degree students are required to complete 3 credits in United States or International Cultures

United States Cultures

A course that fulfills the United States Cultures requirement must strive to increase students’ understanding of contemporary United States society. Such a course need not focus exclusively on the present and may concern a historical subject.

Courses with the United States Cultures designation will include two or more of the following components and will include those components in the graded evaluation of student performance:

1. cultivate student knowledge of issues of social identity such as ethnicity, race, class, religion, gender, physical/mental disability, age, or sexual orientation;
2. convey to students knowledge of different United States values, traditions, beliefs, and customs;
3. increase student knowledge of the range of United States cultural achievements and human conditions through time;
4. increase student knowledge of United States social identities not in isolation, but in relation to one another (for example, the interaction of race or gender with socioeconomic status);
5. introduce students to interpersonal communication and interaction issues among United States cultures;
6. increase student understanding of the nature of societal justice, and equity in the United States at the societal, institutional, and individual levels.

Courses with the United States Cultures attribute satisfy this requirement. It is also common to abbreviate this course designation as U.S.

**International Cultures**

A course that fulfills the International Cultures requirement must strive to increase student knowledge of the variety of international societies and may deal to some extent with U.S. culture in its international connections. It need not focus exclusively on the present and may, indeed, be a historical subject. Courses with the International Cultures designation will do two or more of the following:

1. cultivate student knowledge of the similarities and differences among international cultures;
2. convey to students knowledge of other nations' cultural values, traditions, beliefs, and customs;
3. increase students' knowledge of the range of international cultural achievements and human conditions through time;
4. increase students' knowledge of nations and cultures not in isolation, but in relation to one another;
5. introduce students to interpersonal communication and interaction issues among international cultures.
6. increase student understanding of the nature of societal justice, and equity in international nations at the societal, institutional, and individual levels.

Courses with the International Cultures attribute satisfy this requirement. It is also common to abbreviate this course designation as IL.

**Writing Across the Curriculum**

Developing the skill to communicate by means of the written word is extremely important. Courses other than General Education English Composition courses emphasize the ability of students to write. Colleges and/or departments have established Writing Across the Curriculum courses in specific programs. Students are required to complete at least 3 credits of writing-intensive courses offered within their major or college of enrollment.

Typically, Writing Across the Curriculum courses include writing assignments that relate clearly to the course objectives and serve as effective instruments for learning the subject matter of the course. In writing-intensive courses, assignments are designed to help students investigate the course subject matter, gain experience in interpreting data or the results of research, shape writing for a particular audience, or practice the type of writing associated with a given profession or discipline.

Opportunities for students to receive written feedback from the instructor and to apply the instructor's feedback to their future writing are built into the writing courses. A writing-intensive course may also include peer review of written work, tutorial assistance, instructor conferences, group writing projects, the use of writing or learning centers, teaching assistant feedback, and classroom discussions of assigned readings about writing.

Courses with the Writing Across the Curriculum attribute satisfy this requirement. Some courses may also have an identifying suffix (W, M, X, or Y) after the course number. The degree audit and what-if reports in LionPATH use attributes, not suffixes, to determine the applicability of a course to a requirement. Both baccalaureate and associate degree students complete 3 credits in this area.

**Course Lists**

**General Education**

**Foundations and Knowledge Domains**

- Arts Courses (p. 2647)
- Health and Wellness Courses (p. 2681)
- Humanities Courses (p. 2682)
- Natural Sciences Courses (p. 2703)
- Quantification Courses (p. 2705)
- Social and Behavioral Sciences Courses (p. 2706)
- Writing and Speaking Courses (p. 2719)

**Integrative Studies**

- Inter-Domain Courses (p. 2688)
- Linked Courses (p. 2690)

**Bachelor of Arts**

- Arts Courses (p. 2650)
- Humanities Courses (p. 2655)
- Natural Sciences Courses (p. 2667)
- Other Cultures Courses (p. 2668)
- Quantification Courses (p. 2670)
- Social and Behavioral Sciences Courses (p. 2672)
- World Language (12th Unit) Courses (p. 2678)
- World Language (All) Courses (p. 2678)

**Other UNIVERSITY Requirements**

- First-Year Seminar (p. 2679)
- International Cultures (IL) (p. 2690)
- United States Cultures (US) (p. 2709)
- Writing Across the Curriculum (p. 2714)

**Arts Courses**

These courses have been approved as General Education Arts courses. This course list is updated periodically. Descriptions and learning criteria for General Education Arts courses can be found in the Foundation and Knowledge Domains section (p. 2643).

**About Penn State**

This is Penn State

Penn State is in the top 1 percent of universities worldwide and has the largest alumni network in the nation. Founded in 1855, the University combines academic rigor with a vibrant campus life as it carries out its mission of teaching, research, and service with pride and focuses on the future throughout Pennsylvania and the world. Granted the highest rating for research universities by the Carnegie Foundation, Penn State teaches students to be leaders with a global perspective.

Our leadership in administration, faculty, and staff make our mission come alive every day. The Board of Trustees reviews and approves the budget of the University and guides general goals, policies, and procedures from a big-picture perspective. The President's office ensures that all aspects of the University are running smoothly and promotes overall principles that students, faculty, and staff abide by for the long term. The University Faculty Senate represents the Penn State faculty with legislative authority on all matters regarding the University's educational interests.

Penn State strives to celebrate diversity in all aspects of its educational and operational activities and the University's strategic plans are designed to result in ongoing improvements that help prepare future generations of leaders.
Board of Trustees

The Board of Trustees of The Pennsylvania State University is the corporate body established by the charter with complete responsibility for the government and welfare of the University and all the interests pertaining thereto including students, faculty, staff, and alumni.

In the exercise of this responsibility, the Board is guided by the following policies:

1. The authority for day-to-day management and control of the University, and the establishment of policies and procedures for the educational program and other operations of the University, shall be delegated to the President, and by him/her, either by delegation or consultation with the faculty and the student body in accordance with a general directive of the Board.

This delegation of authority requires that the Board rely on the judgment and decisions of those who operate under its authority. However, this reliance of the Board must be based upon its continuing awareness of the operations of the University. Therefore, the Board shall receive and consider thorough and forthright reports on the affairs of the University by the President or those designated by the President. It has a continuing obligation to require information or answers on any University matter with which it is concerned.

Finally, upon request, the Board shall advise the President on any University matter of concern to him/her.

2. The Board of Trustees shall carry out certain responsibilities as a Board, without delegation. These responsibilities are:
   a. The selection of the President of the University
   b. The determination of the major goals of the University and the approval of the policies and procedures for implementation of such goals.
   c. The review and approval of the operating and capital budget of the University.
   d. Such other responsibilities as law, governmental directives, or custom require the Board to act upon.

3. The Board of Trustees shall inform the citizens of the Commonwealth of Pennsylvania of the University's performance of its role in the education of the youth of Pennsylvania.

4. The Board of Trustees shall assist the President in the development of effective relationships between the University and the various agencies of the Commonwealth of Pennsylvania and the United States of America which provide to the University assistance and direction.

MORE INFORMATION (http://www.psu.edu/this-is-penn-state/leadership-and-mission/our-administration)

Mission

The Pennsylvania State University is a multi-campus, land-grant, public research University that educates students from around the world, and supports individuals and communities through integrated programs of teaching, research, and service.

Our instructional mission includes undergraduate, graduate, professional, continuing, and extension education, offered through both resident instruction and distance learning. Our educational programs are enriched by the talent, knowledge, diversity, creativity, and teaching and research acumen of our faculty, students, and staff.

Our discovery-oriented, collaborative, and interdisciplinary research and scholarship promote human and economic development, global understanding, and advancement in professional practice through the expansion of knowledge and its applications in the natural and applied sciences, social and behavioral sciences, engineering, technology, arts and humanities, and myriad professions.

As Pennsylvania’s land-grant university, we provide unparalleled access to education and public service to support the citizens of the Commonwealth and beyond. We engage in collaborative activities with private sector, educational, and governmental partners worldwide to generate, integrate, apply, and disseminate knowledge that is valuable to society.
History
As Pennsylvania’s only land-grant university, Penn State has a broad mission of teaching, research, and public service. But that mission was not so grandly conceived in 1855, when the Commonwealth chartered it as one of the nation’s first colleges of agricultural science, with a goal to apply scientific principles to farming.

Centre County became the site of the new college in response to a gift of 200 acres from gentleman farmer and ironmaster James Irvin of Bellefonte. Founding President Evan Pugh drew on the scientific education he had received in Europe to plan a curriculum that combined theoretical studies with practical applications.

Pugh and similar visionaries in other states championed Congressional passage of the Morrill Land-Grant Act in 1862. The act enabled states to sell federal land, invest the proceeds, and use the income to support colleges “where the leading object shall be, without excluding scientific and classical studies ... to teach agriculture and the mechanic arts [engineering] ... in order to promote the liberal and practical education of the industrial classes in all the pursuits and professions of life.”

The state legislature designated Penn State the land-grant institution of Pennsylvania.

But not until the 1880s, under the leadership of President George W. Atherton, did the college expand its curriculum to match the Land-Grant Act’s broad mandate. From that time onward, curricula in engineering, the sciences, the liberal arts, and more began to flourish. In the early 1900s, Penn State introduced cooperative extension and additional outreach programming, extending the reach of its academic mission.

An even greater segment of the Commonwealth’s population had opportunities for engagement in the 1930s when Penn State established a series of undergraduate branch campuses, primarily to meet the needs of students who were location-bound during the Great Depression. Those campuses were predecessors of today’s system of 24 Penn State campuses located throughout the Commonwealth.

Penn State began offering systematic advanced-degree work in 1922 with the formation of the Graduate School. Graduate education and research evolved hand in hand. By 1950 the University had won international distinction for investigations in dairy science, building insulation, diesel engines, and acoustics, and other specialized fields.

A college of medicine and teaching hospital were established in 1967 with a $50 million gift from the charitable trusts of renowned chocolate magnate Milton S. Hershey. In 1989 the Pennsylvania College of Technology in Williamsport became an affiliate of the University. Penn State’s online World Campus graduated its first students in 2000 and now enrolls more than 12,000. Also in 2000, Penn State and the Dickinson School of Law merged. In 2015, two Penn State law schools, Dickinson Law (in Carlisle, Pennsylvania) and Penn State Law (on University Park campus) were established.

Research
The Office of the Vice President for Research is responsible for facilitating the $863-million-per-year research enterprise at Penn State by working with a broad range of units across the University.

The mission of the Office of the Vice President for Research is to support a rigorous program of faculty and student research and creative accomplishment by enhancing the environment for scholarly and artistic endeavors, encouraging the highest standards of quality, and fostering ethical conduct in research.

The office is responsible for:
- the effective administration of sponsored programs which provide the financial support for a substantial share of the research activity at the University;
- serving as the University’s advocate and spokesperson on research issues, and as a representative in activities that may produce major new programs and facilities for research;
- facilitating strong programs for interdisciplinary research.

University Structure
Campuses
Penn State has more than twenty campuses across Pennsylvania that serve students and communities through teaching, research, and service. Through its network of undergraduate campuses and World Campus, Penn State provides students the opportunity to begin and complete a Penn State degree at one campus, transition to complete a degree at
another campus or complete a program completely online—this is the hallmark of Penn State’s unique one University concept.

The University Park campus, the administrative and research hub of the University is the largest of Penn State’s campuses. Across Pennsylvania, Penn State campuses play a critical role in the land-grant mission of the University, by providing access and opportunity—a commitment that remains at the core of each campus’s mission. In addition to providing the first two years of more than 160 Penn State majors, campuses confer some 5,000 Penn State degrees annually to students who complete their academic programs at a Penn State campus.

MORE INFORMATION (p. 16)

Colleges

Penn State’s majors are divided among academic colleges, which are the units from which students receive their degrees. Examples of colleges are Arts and Architecture, Eberly College of Science, and Education, among others. In addition to the 12 academic colleges at the University Park campus, Penn State has six academic colleges across Pennsylvania that allow students to finish their degrees at a campus other than University Park.

With the exception of a few specialized programs, students interested in majors offered by the above academic colleges can start their education at any Penn State campus and then transition to University Park following their second year to complete their degree as part of the 2+2 Plan.

In addition, the Pennsylvania College of Technology in Williamsport offers enrollments in selected degree programs.

For a list of academic colleges, enrollment units, and special academic programs visit the Undergraduate Bulletin Colleges (p. 19) page.

Academic Colleges at Campuses

Six Penn State colleges, located throughout the state, offer majors that are typically completed at campuses other than University Park. These colleges are:

- Abington College, at the Penn State Abington campus
- Altoona College, at the Penn State Altoona campus
- Behrend College, at the Penn State Erie campus
- Berks College, at the Penn State Berks campus
- Capital College, at the Penn State Harrisburg campus
- University College, is comprised of the following 14 campuses:
  - Penn State Beaver
  - Penn State Brandywine
  - Penn State DuBois
  - Penn State Fayette, The Eberly Campus
  - Penn State Greater Allegheny
  - Penn State Hazleton
  - Penn State Lehigh Valley
  - Penn State Mont Alto
  - Penn State New Kensington
  - Penn State Schuylkill
  - Penn State Shenango
  - Penn State Wilkes-Barre
  - Penn State Scranton
  - Penn State York

Students interested in majors offered by these colleges can typically start at one campus and finish at another through the 2+2 plan, or they can choose to stay at one campus for all four years if their campus of choice offers the major they want. To see the specific majors available at each campus, search majors by campus.

Student Services and Programs

Penn State offers thousands of resources to support students, faculty, staff, and alumni both locally and around the world. This partial list of centers, offices, and programs was developed based on past inquiries from Bulletins users.

To discover additional services explore Penn State’s home page (http://www.psu.edu), the Office of Student Affairs (https://studentaffairs.psu.edu), and the Office of Undergraduate Education (http://undergrad.psu.edu).

Admissions
Admission to Penn State
Penn State’s tradition of academic excellence, investment in student success, and commitment to providing unrivaled opportunities make the University a great place to study, but it is the dedication of our students, faculty, and staff that make it truly exceptional.

We are looking for students that want to share in the passions and talents of our Penn State community. Discover how your Penn State years will not only shape your academic and career pursuits, but will broaden your perspective, establish lifelong connections, and set the stage for your future.

Find your place at Penn State.

Steps to Apply
Learn the first steps to apply to Penn State and more about the University on the Undergraduate Admissions (https://admissions.psu.edu) website.

Statement of Basic Academic Admission Policies
Admission to credit courses or degree candidacy at Penn State is governed by policies established by the University Faculty Senate. Although specific applications of these policies may vary from year to year, from location to location, and from program to program, University admissions are governed by the following general policies:

1. As an institution of higher education, Penn State is committed to making post-high school education available to all who possess a high school diploma or its equivalent without regard to personal characteristics not related to ability, performance, or qualifications. Penn State does not discriminate against any person because of age, ancestry, color, disability, national origin, race, religious creed, sex, sexual orientation, or veteran status.

2. The primary responsibility of the University is to residents of the Commonwealth of Pennsylvania. Consequently, within limits expressed from time to time by the Board of Trustees of the University, preference shall be given to Pennsylvania residents in the various admissions processes.

3. In order to meet the variety of goals and objectives of the population, the spectrum of offerings is designed to enable persons with a variety of objectives—both degree and non-degree—to receive a higher education. Although access to educational opportunities of the University is open to all, courses offered for credit are available to those holding a high school diploma or its equivalent. Policies governing admission to degree candidacy are established by the University Faculty Senate (with a delegation of policies governing admissions to graduate programs to the Graduate Faculty of the University) under a general policy of offering admission to those whose past academic performance indicates a reasonable probability of success.

4. Undergraduate students are admitted to either baccalaureate degree candidacy or associate degree candidacy. To be admitted to degree candidacy, the individual must present an academic performance record that indicates a reasonable probability of their success in their chosen program. In the case of first-year student admission to undergraduate degree candidacy, performance is measured through a holistic assessment. In the case of advanced standing admission, performance is measured either through success in non-degree programs and courses of the University or by success at some other institution of higher education.

5. Within the space available in particular programs and at particular locations, admission shall be offered preferentially to those whose performance record indicates the highest probability of success in the chosen program—with this process continuing until all available spaces are filled. Although exceptions to this policy may be made from time to time (for example, recipients of scholarships with restricting qualifications), these exceptions may be made only for applicants who meet at least the minimum admission and entrance requirements.

6. If a college or school requires restrictions on its baccalaureate admissions, the priorities or targets established must include provisions to consider qualified students in each of these groups:

   - Admissions Group I - First-Year Admissions: Applicants who hold a high school diploma or equivalent, who present fewer than 18 semester credits of baccalaureate work (from Penn State or another regionally accredited institution), who meet college or school entrance requirements, and who meet minimum college or school admission standards.

   - Admissions Group II - Penn State Advanced Standing Admissions: Applicants who (1) request baccalaureate degree re-enrollment, presenting 18 or more semester credits; (2) request a change from Penn State associate degree to baccalaureate degree status, presenting 18 or more applicable semester credits; (3) request a change from Penn State provisional degree to baccalaureate degree status, presenting 18 or more applicable semester credits; or (4) request a change from Penn State non-degree to baccalaureate degree status, presenting 18 or more applicable semester credits. In all advanced standing admissions at Penn State, the student must have a grade-point average of at least 2.00 and must meet the minimum entrance and advanced standing requirements of the college or school. However, a Penn State student who has had an interruption in enrollment of no fewer than four calendar years and whose cumulative grade-point average is less than 2.00 may petition for re-enrollment with academic renewal in accordance with Senate Policy 57-00.

   - Admissions Group III - Other Advanced Standing Admissions: Applicants who have not been students at Penn State and request baccalaureate degree status at Penn State, presenting 18 or more applicable semester credits from a regionally accredited institution. In all advanced standing admissions, it is understood that the applicant must have a cumulative grade-point average of 2.00 as computed at Penn State and meet the minimum entrance and advanced standing requirements of the college or school. However, a student who has not met the entrance requirements or achieved a cumulative grade-point average of 2.00 (on a 4.00 scale) for all graded courses taken at all institutions previously attended, and who has had a four-calendar-year absence from the institution(s), may apply to enroll in credit courses as a provisional student in accordance with Senate Policy 10-00. An applicant who has had an absence from the institution(s) of fewer than four calendar years, and who has not met the entrance requirements or has achieved a cumulative grade-point average of less than 2.00, may apply to enroll in credit courses as a non-degree student in accordance with Senate Policy 14-00.

   - Within these three groups, no special consideration will be given to any group; applicants will be admitted to the college or school
on the basis of academic competition (e.g., SAT I scores, grade-point averages, grades in required courses in the college or other degree-granting units, and other evidence predictive of baccalaureate degree performance where available, valid, and reliable).

7. To ensure a proper educational mix of students and to further broaden the educational opportunities offered by the University, the University Faculty Senate and the University administration from time to time may authorize various specialized programs. These programs may permit applicants who do not meet the basic qualifications for admission to degree candidacy to be admitted to such candidacy. These programs may also permit, in selected situations, exceptional students who have not earned a high school diploma or its equivalent to enroll in University credit courses. Such specialized programs may include up to 10 percent of the total admissions group for the University in any one year and up to the maximum of 15 percent of the admissions to any geographic location of the University.

8. Within this general policy, the colleges and school of the University, with the concurrence of the University Faculty Senate, may impose certain educational background requirements (Carnegie Units) that must be completed by an individual before being admitted to degree candidacy.

Admission Requirements

Minimum Requirements for Admission to Degree Candidacy

To be eligible for admission consideration to the University as a degree candidate, either as a beginning student or as a student with advanced standing, an applicant must meet the following minimum requirements:

1. Graduation from an accredited secondary school. Penn State requires proof of graduation or a GED for admission to four-year degree programs.
2. Completion of the required units of preparatory work as indicated under the heading Minimum Carnegie Units.

A secondary school diploma issued by the Pennsylvania Department of Education, or appropriate authority in another state, may be accepted as equivalent to graduation from an accredited secondary school and as equivalent to the minimum secondary school units required for admission, as indicated under the Minimum Carnegie Units heading, with the exception of math and world language.

The University accepts the definition of a secondary school unit as established by the Carnegie Foundation. A unit represents a year of work in a subject in a preparatory school or secondary school, provided that the work done in that subject is approximately one-fourth of the total amount of work regularly required in a year in the school.

The University reserves the right to deny admission to any applicant for admission for any reason the University determines to be material to the applicant’s qualifications to pursue higher education.

Admission to degree candidacy is specified in terms of enrollment in a college or school of the University or in the Division of Undergraduate Studies. Entrance to a baccalaureate major is a subsequent step that normally occurs near the end of the second year of study. Both for admission to a college or school and for entrance to a major, a student must satisfy the requirements of the University, of the particular college or school, and of the major area. In special circumstances, the University may need to further restrict admissions to a college or school and entrance to majors because of space limitations.

Baccalaureate and Associate Degree Programs

Review the basic requirements for two-year and four-year degrees, as well as the additional requirements for special programs.

See the minimum number of secondary school units required for admission consideration to a baccalaureate degree program on the Admission Requirements page (https://admissions.psu.edu/apply/requirements/4year).

See the minimum number of secondary school units required for admission consideration to an associate degree program on the Admission Requirements page (https://admissions.psu.edu/apply/requirements/2year).

First-Year Admission

An applicant for admission as a beginning student in the first-year class must meet the minimum requirements for admission to degree candidacy prior to the time of matriculation. All offers of admission are conditional until these requirements have been met.

Each applicant is evaluated on the basis of a holistic assessment. Admission decisions are made on the basis of this holistic assessment in relation to the requested area of enrollment (academic program), space availability, the quality of the credentials presented by other applicants, and such other academically relevant information deemed appropriate by the Undergraduate Admissions Office and approved by the Senate Committee on Admission, Records, Scheduling, and Student Aid.

When openings at the requested location or in the requested program of the University are filled, qualified applicants will be offered admission to their alternate choice of program or location or notified of campuses where openings still exist.

College Entrance Tests

Applicants for first-year admission to the University are required to submit scores of the Scholastic Assessment Test (SAT) of the College Entrance Examination Board or the American College Test (ACT). SAT or ACT results of the junior-year testing periods are recommended. Exceptions to the requirement for scholastic assessment test scores will be granted to adult learners who have been out of high school for five or more years or are veterans with four or more years of service. Exceptions to the required courses completed also may be granted. Adults may be requested to submit a statement of personal goals or to participate in an interview.

Selection of the Area of Enrollment

It is necessary for an applicant to indicate one of the academic units of the University in which they want to study. If an applicant is undecided about the choice of an academic unit, they may seek enrollment in the Division of Undergraduate Studies.

Changing the Area of Enrollment

An applicant who has been admitted to an academic college or unit of the University may not change to another without satisfying entrance requirements of the college or other academic unit of the University.

Previous Attendance at Another College

An applicant must state on their application whether they have ever attended any other college or university. Failure to indicate, at the time
Advanced Standing (Transfer) Admission

An applicant who has attended any regionally accredited college or institution on the college level and attempted 18 or more semester credits subsequent to high school graduation may be considered for admission with advanced standing. Attendance at any and all other institutions must be reported at the time of application. Failure to indicate, at the time of application, previous registration at another college or university can result in refusal or cancellation of admission.

An applicant for admission with advanced standing must meet the minimum secondary school requirements for admission to degree candidacy prior to the time of matriculation. Advanced standing applicants are considered for admission on the basis of the applicant’s requested academic program, space availability, and the academic quality of their work at the previously attended institution(s). A minimum cumulative grade-point average of at least 2.00 (C out of 4.00, as computed for Penn State students, is required, although certain areas of study may have additional requirements. In addition, an applicant must be in good academic and nonacademic standing. An applicant whose overall grade-point average is less than 2.00 (on a 4.00 scale) but has a grade-point average of at least 2.00 (on a 4.00 scale) at all institutions attended in the four years prior to the requested enrollment semester may apply for admission as an advanced standing student with forgiveness. An applicant who has not attempted any collegiate level course work four years prior to the requested enrollment semester may also apply for advanced standing with forgiveness. An applicant who does not meet the minimum requirement of a grade-point average of at least 2.00 and does not meet the criteria for advanced standing with forgiveness may enroll in credit courses as a non-degree student in accordance with applicable policies and procedures.

Advanced standing credits may be awarded for college-level work taken at regionally accredited institutions provided Penn State offers a similar class and the course grade earned is equivalent to a grade of A, B, or C at this University. The credits also must be usable to the student’s program of study. An academic adviser determines which of the transferable credits are applicable to the program of study at Penn State. Credits are transferred, but grades and grade-point average are not. Advanced standing students enter the University without an average and their average begins with the completion of their first semester of study at Penn State.

Under certain circumstances, the University may need to restrict advanced standing admissions to a particular college or school because of space limitations.

Entrance to a Major

An advanced standing degree candidate may be admitted to a college or school of the University. To be eligible for entrance to a major, a student must meet the entrance-to-major requirements of the University, of the college or school, and of the program area. Under certain circumstances, further restrictions or exceptions on entrance to majors may be required because of space limitations. Students are expected to work with advisers and to utilize current information about entrance requirements and restrictions when exploring academic program alternatives and making program and course selections.

Changing the Area of Enrollment

An applicant who has been admitted to an academic college, school, or major of the University may not change to another without satisfying entrance requirements of the college/school and major to which they want to transfer.

Provisional Students (Degree Seeking)

An applicant seeking to pursue a degree program and holding a high school diploma or its equivalent but without the criteria required for admission as a degree candidate may be accepted as a provisional student and enroll in credit courses, if space is available, to pursue a program leading to either a baccalaureate or associate degree if the following criteria are met:

1. The student is making satisfactory progress toward admission as a degree candidate. Progress is satisfactory if a student has completed 18 credits with a minimum cumulative grade-point average of 2.00 (on a 4.00 scale). If a student has completed 18 credits with less than a 2.00, then they are given a warning. A student who has completed 27 credits with a cumulative grade-point average of less than 2.00 will not be permitted to enroll as a provisional student in any subsequent semester unless the student has earned more than a 2.00 grade-point average in the most recently completed semester. No student regardless of cumulative grade-point average, who has completed 36 credits will be permitted to enroll as a provisional student in any subsequent semester.

2. There is space available after degree candidates have been accommodated.

3. The student has not been dropped for unsatisfactory scholarship from any college or university previously attended. If a provisional applicant attended another college or university and attempted 18 or more semester credits within the last four calendar years, the applicant must have at least a 2.00 (on a 4.00 scale) cumulative collegiate average. However, if it has been four or more calendar years since the applicant attended the other college or university and

Application Procedure

In all cases where work has been taken at other institutions, an official transcript from each place of attendance must be submitted directly to the Undergraduate Admissions Office by the registrar of the institution attended. An applicant currently attending another institution also must provide a schedule of courses in progress or to be completed before enrollment at Penn State, including course name, number, description, and number of credits. The applicant’s secondary school record must be submitted directly to the Undergraduate Admissions Office by the secondary school. The Undergraduate Admissions Office may require the applicant to send a description of the courses that they have taken at the college previously attended. All credentials become part of the permanent records of the University.
A student in nondegree status (regular or conditional) may remain in nondegree status for a maximum of 30 credits, at which time the student must meet criterion 4 (on the following list) are met. Students who have changed from degree candidates to nondegree regular or nondegree students who intend to become degree candidates must also meet criterion 4.

A nondegree student who has been dropped from degree or provisional status by this University or any other college or university for unsatisfactory scholarship will be listed as a nondegree regular student and may enroll in any number of credits, not to exceed the typical credit load of a full-time student per semester if criteria 1, 2, and 3 below are met. Students who have changed from degree candidates to nondegree regular or nondegree students who intend to become degree candidates must also meet criterion 4.

A nondegree student who has been dropped from degree or provisional status by this University or any other college or university because of unsatisfactory scholarship will be listed as a nondegree-conditional student and may enroll in a maximum of 12 credits per semester if criteria 1, 2, 3, and 4 (on the following list) are met.

1. The student has completed the prerequisite for the courses to be scheduled or has obtained permission from the instructor to schedule the course.
2. Space is available after degree candidates and provisional students have been accommodated.
3. The student has not been dismissed or suspended for nonacademic reasons from any college or university. An applicant not in good standing at another accredited college or university for disciplinary reasons must consult the director of the Office of Judicial Affairs for admissions clearance.
4. The student has obtained academic advising/counseling from an adviser/counselor designated by the academic unit to which admission, or reinstatement and re-enrollment, is desired.

Nondegree Students
A person enrolled in a course who is not a degree candidate or provisional student is classified as a nondegree student. A nondegree student must either hold a high school diploma or its equivalent to take undergraduate courses. Exceptions may be made by the Undergraduate Admissions Office for students currently enrolled in high school (dual-enrollment students).

A nondegree student who has not been dropped from degree or provisional status by this University or any other college or university for unsatisfactory scholarship will be listed as a nondegree regular student and may enroll in any number of credits, not to exceed the typical credit load of a full-time student per semester if criteria 1, 2, and 3 below are met. Students who have changed from degree candidates to nondegree regular or nondegree students who intend to become degree candidates must also meet criterion 4.

A nondegree student who has been dropped from degree or provisional status by this University or any other college or university for unsatisfactory scholarship will be listed as a nondegree-conditional student and may enroll in a maximum of 12 credits per semester if criteria 1, 2, 3, and 4 (on the following list) are met.

1. The student has completed the prerequisite for the courses to be scheduled or has obtained permission from the instructor to schedule the course.
2. Space is available after degree candidates and provisional students have been accommodated.
3. The student has not been dismissed or suspended for nonacademic reasons from any college or university. An applicant not in good standing at another college or university for disciplinary reasons must consult the director of the Office of Judicial Affairs for admission clearance.
4. The student has obtained academic advising/counseling from an adviser/counselor designated by the academic unit to which admission, or reinstatement and re-enrollment, is desired.

Limitations to Enrollment as a Nondegree Student
A student in nondegree status (regular or conditional) may remain in that status for a maximum of 30 credits, at which time the student must be accepted into a degree program to continue taking credit courses. Nondegree conditional students must achieve a semester grade point average of 2.01 or higher every semester or will be dismissed from the University and may only re-enter through the academic renewal process. Students in nondegree status who are not eligible for a degree program after completing 30 credits may continue to take credit courses provided a semester grade-point average of more than 2.00 continues to be earned and they have written support from their intended major. Students who do not meet these provisions will be dropped and may only reenter Penn State through the academic renewal process. Nondegree regular students who are in good academic standing and do not intend to earn a degree may continue taking credit courses as long as a cumulative grade point average of 2.00 is maintained.

A student must be admitted, or reinstated and re-enrolled, as a degree candidate to apply the credits earned as a non-degree student toward fulfilling the requirements for a degree. The dean of the college or school of enrollment shall decide which credits may be used to fulfill the degree requirements.

A non-degree application can be obtained at registrar.psu.edu (http://registrar.psu.edu).

Admission of Provisional Student as a Degree Candidate
A provisional student may apply for admission as a baccalaureate degree candidate with advanced standing to a college or school of the University, or to the Division of Undergraduate Studies, upon completion of at least 18 credits with at least a 2.00 cumulative grade-point average. All these credits must be earned at this University. To be eligible for admission, the provisional student must satisfy the academic requirements of the University and the college of enrollment.

A nondegree student who has been dropped from degree or provisional status by this University or any other college or university for unsatisfactory scholarship will be listed as a nondegree regular student and may enroll in any number of credits, not to exceed the typical credit load of a full-time student per semester if criteria 1, 2, and 3 below are met. Students who have changed from degree candidates to nondegree regular or nondegree students who intend to become degree candidates must also meet criterion 4.

A nondegree student who has been dropped from degree or provisional status by this University or any other college or university for unsatisfactory scholarship will be listed as a nondegree-conditional student and may enroll in a maximum of 12 credits per semester if criteria 1, 2, 3, and 4 (on the following list) are met.

1. The student has completed the prerequisite for the courses to be scheduled or has obtained permission from the instructor to schedule the course.
2. Space is available after degree candidates and provisional students have been accommodated.
3. The student has not been dismissed or suspended for nonacademic reasons from any college or university. An applicant not in good standing at another college or university for disciplinary reasons must consult the director of the Office of Judicial Affairs for admission clearance.
4. The student has obtained academic advising/counseling from an adviser/counselor designated by the academic unit to which admission, or reinstatement and re-enrollment, is desired.

Admission of Nondegree Student as a Degree Candidate
A nondegree student may apply for admission as a baccalaureate degree candidate with advanced standing to a college or school of the University, or to the Division of Undergraduate Studies, upon completion of at least 18 credits earned at this University with at least a 2.00 cumulative grade-point average. An applicant who has completed at least the equivalent of two years of baccalaureate degree work before applying for admission as a baccalaureate degree candidate must have the approval of either the dean of the college or school in which enrollment is desired or of the director of the Division of Undergraduate Studies if the student wants to enroll in that division. To be eligible for degree admission, the nondegree student must meet the academic requirements of the University and the college or school in effect at the time of application.

Tuition and Financial Aid
Introduction
Penn State participates in the major federal and state grant, loan and work-study programs. These funding sources make up the majority of all student aid funding with education loans the largest program. Eligibility is determined based on information on the Free Application for Federal Student Aid (FAFSA) (https://fafsa.gov). Student aid funds are awarded based on each applicant’s relative financial need until all funds are exhausted. Program regulations limit the University’s ability to make exceptions to the eligibility criteria.

Student Aid and Scholarships Policy
As a public university, Penn State receives limited support from the state.

Undergraduate enrollment across all Penn State campuses exceeds 90,000 a year. An outstanding academic experience for our students comes at a cost, and the University recognizes that Penn State may not be affordable to all who wish to enroll.

While Penn State continues to build its scholarship endowment, available funds do not yet reach all deserving students. Student aid, including education loans, can help defray some costs, but students and parents...
have the primary responsibility of paying educational expenses. Students and their families are encouraged to devise a financial plan for this important investment and to determine the level of education loan debt that both student and families are willing to incur.

Tuition and Costs
To view the most current costs for attending Penn State, including tuition and associated expenses, visit the Office of Student Aid (https://studentaid.psu.edu) website.

MORE INFORMATION (https://studentaid.psu.edu/tuition-costs)

Residency Classification for Tuition Purposes
Effective May 22, 2018

Pennsylvania Classification
A student shall be classified as a Pennsylvania resident for tuition purposes if that student has a Pennsylvania domicile and that student’s presence in Pennsylvania is not primarily for educational purposes. Domicile is a person’s existing and intended fixed, permanent, and principal place of residence. A student whose presence in Pennsylvania is primarily for educational purposes shall be presumed to be a non-Pennsylvania resident for tuition purposes. Thus, most students who come to Pennsylvania for the primary purpose of attending the University will ordinarily continue to be classified as non-residents for purposes of tuition throughout their attendance at the University. The following are considerations that may be used by the University in determining whether a student is a Pennsylvania resident for tuition purposes:

1. An undergraduate student under the age of 24 is presumed to have the domicile of his/her parent(s) or legal guardian(s). An undergraduate student may rebut this presumption with clear and convincing evidence that they are financially emancipated from their parent(s) or legal guardian(s).
2. A student who has continuously resided in Pennsylvania for purposes other than education for at least 12 consecutive months immediately preceding his/her initial enrollment at the University or an institution of higher education is presumed to have a Pennsylvania domicile for purposes of tuition. A student who has not continuously resided in Pennsylvania for at least 12 consecutive months immediately preceding his/her initial enrollment at the University or another institution of higher education is presumed not to be a resident of Pennsylvania for purposes of tuition but may rebut this presumption by clear and convincing evidence.
3. Students who are not United States citizens, and have nonimmigrant visas or lack visas, are presumed not to be domiciled in Pennsylvania but they may rebut this presumption by clear and convincing evidence.
4. A United States government employee or member of the armed forces who was domiciled in Pennsylvania immediately preceding his/her entry into government service and who has continuously maintained Pennsylvania as his/her legal residence will be presumed to have a Pennsylvania domicile.
5. Military personnel and their dependents who are assigned to an active duty station in Pennsylvania and who reside in Pennsylvania shall be deemed Pennsylvania residents for purposes of tuition.
6. Veterans and their dependents may be eligible for in-state tuition regardless of residency status. The Office of Veterans Programs (http://equity.psu.edu/veterans) should be contacted regarding eligibility.
7. A student receiving a scholarship, guaranteed loan, grant, or other form of financial assistance dependent upon maintaining domicile in a state other than Pennsylvania is presumed not to be a Pennsylvania resident for tuition purposes.

Reclassification as Pennsylvania Resident
A student requesting reclassification as a Pennsylvania resident for tuition purposes must demonstrate by clear and convincing evidence that his/her domicile is in Pennsylvania, and that his/her presence in Pennsylvania is not primarily for educational purposes. Each request shall be decided individually on the basis of all facts submitted by the petitioner. Accordingly, it is not possible to list a specific combination of factors or set of circumstances which, if met, would ensure reclassification for tuition purposes.

Residency Reclassification Procedure

Review of Classification
A student may request a review of their residency classification by submitting a written request, including all necessary documentation to support classification as a Pennsylvania resident for purposes of tuition. Each case will be decided on the basis of an evaluation of all relevant facts and documentation submitted. Although not conclusive, the factors listed below may be given weight that the University may assign to them under the circumstances of each case. The University will consider the quality of evidence, rather than merely the quantity. A student is not required to establish a specific number of factors or a specific combination of factors for Pennsylvania domicile. Further, providing some or all of the documentation suggested or requested by the University will not necessarily result in being classified as a resident.

The following factors may be considered by the University in determining whether a student is domiciled in Pennsylvania:

1. Lease or purchase of a permanent, independent residence in Pennsylvania;
   - Note: A copy of the real estate listing or sales agreement to the previous domicile in the previous state of residence should also be sent, if applicable.
2. Payment of applicable state and local taxes and the filing of appropriate returns for such taxes;
   - Note: Returns should demonstrate an adequate level of income to support an independent domicile in the Commonwealth of PA.
3. Transfer of bank accounts, stock(s), automobile(s) and other registered property to Pennsylvania;
4. Pennsylvania driver’s license;
5. Registration to vote in Pennsylvania;
6. Acceptance of an offer of permanent full-time employment in Pennsylvania, as well as evidence that job has been started, documented through the employer (generally applicable for adult students);
7. Continuous presence in Pennsylvania during significant periods while not enrolled as a student;
8. Membership in Pennsylvania social, athletic, civic, political and/or religious organizations which require residency as a membership requirement; and
9. For undergraduate students under age 24 claiming independence, evidence that the student is not a dependent. Such evidence may include copies of the tax returns of the student and/or his/her
If you (or your parent, if a dependent) are presently in the military and stationed in Pennsylvania, submit your Active Duty Military Orders. If you (or your parent, if a dependent), are stationed outside of Pennsylvania, but have maintained Pennsylvania residency, submit your current Leave and Earnings Statement (LES). If you (or your parent, if a dependent) have been discharged from the military, submit your DD-214.

Effective beginning summer 2015, all eligible veterans and dependents receiving Chapter 33, Chapter 35 or Fry Scholarship benefits will be eligible for in-state tuition regardless of residency. If you are a veteran and you are not using GI bill benefits, please contact your campus Certifying Official to determine requirements to establish eligibility for the in-state rate.

Requests for review must be submitted by the student (requests from parents will not be considered) and no review will be entertained unless provided in writing.

Students requesting a review of their residency classification prior to the first day of the student’s first semester at the University need to submit the written request to the following office:

- **Undergraduate Students:**
  
  Undergraduate Admissions Office  
  The Pennsylvania State University  
  201 Shields Building  
  University Park, PA 16802  
  **ATTN:** Residency Review Officer for Undergraduate Admissions

- **Graduate Students:**
  
  Office of the Bursar  
  The Pennsylvania State University  
  103 Shields Building  
  University Park, PA 16802  
  **ATTN:** Residency Review Officer for the Bursar’s Office

Students requesting a review of their residency classification after the first day of the student’s first semester at the University must submit the written request to:

- **Undergraduate and Graduate Students:**
  
  Office of the Bursar  
  The Pennsylvania State University  
  103 Shields Building  
  University Park, PA 16802  
  **ATTN:** Residency Review Officer for the Bursar’s Office

The review will be conducted based on the documentation submitted by the student to support reclassification. All review of classification decisions will be made in writing addressed to the student. Students may only request a review of the initial classification if they believe it was wrongly determined, or if during the course of their enrollment, their circumstances change and the student can present information demonstrating residency in Pennsylvania for purposes other than education.

**Appeal of Classification**

A student may challenge the review of classification decision by filing a written appeal to the University Appeals Committee on Residency Classification. Appeals must be submitted to the Committee within 30 days of the date of the written decision issued by the reviewing office. Contact information for the University Appeals Committee on Residency Classification will be included in the review of classification decision.

Appeals must set forth an explanation for why the student believes the reviewing officer’s decision is incorrect and should include documentation supporting their claims. All materials relating to a student’s appeal must be submitted at the time they submit the request for appeal. Materials submitted as part of the initial review will be provided to the Committee by the reviewing officer. Upon review of the appeal, if the Committee determines it needs additional information, the student will be notified.

While supporting letters from parents or guardians can be included in the appeal for the Committee’s review, absent extraordinary circumstances, the student must be the individual to submit the request for appeal. The University will not entertain appeals submitted by a parent or legal guardian.

The student will be notified in writing of the Committee’s decision and the Committee’s decision is considered final.

**Effective Date for Reclassification**

It is each student’s responsibility to request reviews and any related appeals in a timely manner. Any reclassification of a student’s residency resulting from a student’s request for review or appeal shall be effective as of the first day of the semester or session during which the request for review was received by the University or the first day of the following semester or session. The decision as to which semester or session becomes the effective date shall rest with the unit rendering the decision on reclassification.

Where it is deemed appropriate based upon the circumstances, the University, within its sole discretion, may reclassify a student’s residency classification prior to the date in which the student submitted their request for review, but under no circumstances will reclassification occur more than one year prior to the semester in which the request for review was originally received.

**TIME LIMIT:** A request for review for reclassification will not be considered if submitted after the student has graduated from the University.

**Notifications and Adjustments**

1. The University reserves the right to require transcripts of tax filings from the Internal Revenue Service or Commonwealth of Pennsylvania rather than taxpayers’ copies of those returns.

2. A student who changes his/her domicile from Pennsylvania to another state is required to give prompt written notice of this change to the Residency Review Officer in the Bursar’s Office. The student shall be reclassified as of the date of such change. Students must also inform the Residency Review Officer in the Bursar’s Office of any changes in the student’s circumstances which might affect his/her residency status to determine whether reclassification of residency is necessary.

3. A dependent undergraduate student whose parent(s) or legal guardian(s) move outside of Pennsylvania may remain a Pennsylvania resident for tuition purposes if he/she maintains a
separate domicile within Pennsylvania and remains continuously enrolled at the University.

4. The University reserves the right to conduct audits regarding Pennsylvania resident classification and make any appropriate adjustments in the residency classifications of all students.

False Statements
Any student who provides false or misleading information or deliberately conceals or omits relevant facts in connection with a residency application or appeal will be subject to disciplinary action. In addition, such students will be subject to retroactive reclassification as a non-resident and will be responsible for the payment of non-resident tuition and fees for the period during which he/she was classified as a resident.

PLEASE NOTE: A page of frequently asked questions concerning residency classification for tuition purposes can be found at http://www.bursar.psu.edu/faq.cfm (Opens New Window).

How to Apply for Financial Aid
Submission of the Free Application for Federal Student Aid (FAFSA) (https://fafsa.ed.gov) is the only action required to apply for most financial aid at Penn State, however, some private scholarships and Penn State scholarships require separate applications.
SPECIAL ACADEMIC PROGRAMS

- Joint Service ROTC
- Schreyer Honors College

Joint Service ROTC

About Joint Service ROTC
Richard Scott Young, Joint Service Coordinator, ROTC

The ROTC Programs were established to develop cadets and midshipmen mentally, morally, and physically and to imbue them with the highest ideals of duty and loyalty, in order to commission college graduates as officers of character who possess a basic professional background and are motivated toward careers in military service.

Registering for Courses
Air Force ROTC students attending Penn State Altoona should visit the Air Force ROTC website (http://www.airforce.psu.edu/registering-for-afrotc-courses) for instructions on registering for AFROTC courses.

Military Studies Minor
This interdisciplinary minor is designed for all students with special interests in military and national security affairs. Military emphasis is provided in one of three areas: Aerospace Studies, Military Science, or Naval Science. American military forces have played an important role in our domestic and international history and will continue to have significant involvement in policy arenas relating to national security and international relations. Students elect one military service branch for their prescribed courses and select two additional courses from appropriate history and political science courses emphasizing national security policy. At least 6 credits must be taken at the 400 level.

ROTC Programs
- Air Force ROTC
- Army ROTC
- Naval Science/Naval Reserve Officer Training Corps (NROTC)

Resources

Project GO!
The Project Global Officers’ (Project GO!) goal is to develop future military officers within all of the U.S. Armed Forces with the necessary linguistic and cross-cultural communication skills required for effective leadership in the 21st century operational environment. Any member, scholarship/contracted or not, can apply to attend.

Military Honor Cords
Undergraduate and graduate students who have honorably served, are serving, or are commissioned to serve in the U.S. military will be awarded an honor cord to wear at their commencement ceremony in recognition of their duty and sacrifice. The red, white and blue cords will be given to eligible graduating students, including associate degree recipients, in the following groups: active duty, reserve and National Guard service members; veterans; and graduates receiving a commission through Reserve Officers’ Training Corps (ROTC) and official U.S. Armed Forces recruiting programs. Penn State faculty members who meet the eligibility criteria also may receive a military honor cord.

Contact
NAVAL ROTC
315 Wagner Building
The Air Force ROTC program trains qualified young men and women for service as commissioned officers in the United States Air Force. The program is offered at the University Park campus and by special arrangement as follows: students attending Penn State Scranton, Penn State Hazleton, or Penn State Wilkes-Barre may complete freshman and sophomore requirements at Wilkes College, Wilkes-Barre, Pa.; students attending Penn State Abington or Penn State Brandywine may complete freshman and sophomore requirements at St. Joseph’s University, Philadelphia, Pa.; students attending Penn State Altoona may complete freshman and sophomore requirements at the University Park campus. The junior and senior requirements may then be completed upon relocation to University Park campus.

Four-, three-, two-, and one-year (limited) scholarships are available to selected applicants. These scholarships provide $250-$400 per month along with full tuition and textbook allowance. Also, all cadets in the junior and senior courses are paid at the rate of $350 to $400 per month (tax free), respectively, even if not on scholarship. Uniforms and ROTC textbooks are provided for free by the Air Force.

What is the Air Force ROTC?
The Air Force ROTC is a 4-year program that inspires, develops, and trains future officers of the United States Air Force. AFROTC is a pathway to grow mentally and physically as you acquire leadership skills. The opportunity to pay for school is available through scholarships. Plus, you’ll have a position waiting for you after graduation at one of the world’s top high-tech organizations: the U.S. Air Force.

Academic Advising
University Park
Beth Neumann
Air Force ROTC Administrative Assistant
109 Wagner Building
University Park, PA 16802
814-865-5453
airforce@psu.edu

Career Paths
AFROTC commissions Penn State graduates as Second Lieutenants for every AF officer career field in every part of the world.

Careers
- Aircraft: pilot, navigator, maintenance
- Space and Missiles: operations, maintenance, ground support
- Intelligence: Office of Special Investigations, Foreign Area Officer
- Engineering: research, development or technical management in virtually all fields of engineering
- Scientific: mathematics, nuclear physics, meteorology
- Computer Science: cyberwarfare operations, development, programming systems analysis
- Management: personnel, intelligence, communications and electronics, public relations, logistics, finance, security forces, information, munitions, air traffic control

Opportunities for Graduate Studies
All students graduating on or before September 30, 2020 and interested in participating in the program are welcome to apply. Minimum requirements are four semesters as a full-time student (bachelors or graduate work), a 2.0 GPA, passing fitness and medical standards, and good character. Graduating before that date or already have your
bachelors degree? You can begin your masters while you train and earn Tuition Assistance to aid in its completion after entering active duty!

Army ROTC
Program Description
The Army Reserve Officers’ Training Corps (Army ROTC) is an elective program of instruction and training that offers qualified students the opportunity to earn a commission as an officer (Second Lieutenant) and to serve in the United States Army, Army National Guard, or United States Army Reserve while working toward a baccalaureate degree as a full-time student. The program emphasizes student learning and participation in applied leadership, leadership theory, decision making, management skills, time management, and military knowledge and skills. The four-year program is conducted in two successive phases—the Basic Course and Advanced Course (20 total credits). At least 6 Army ROTC credits may be applied toward baccalaureate degree requirements in all majors, usually as elective credits. Course subjects and credits appear under ROTC course descriptions in this Bulletin.

Penn State Army ROTC is one of the largest and most successful ROTC programs in the United States. Army ROTC is offered at the following campuses: Abington, Altoona, Hazleton, and University Park. However, only the University Park campus offers the complete four-year program within the Penn State Army ROTC system. Army ROTC is also available at most other campuses through cross-enrollment agreements with other colleges and universities. For additional information on Army ROTC, see the enrollment officer at 212 Wagner Building on the University Park campus or call 814-863-0368 (toll free: 1-866-558-3513) or visit our the Penn State ROTC website. (http://www.psu.edu/dept/armyrotc)

What is the Army ROTC?
Army ROTC’s mission is to educate, train, develop and inspire participants to become officers and leaders of character for the United States Army and the Nation. A large majority of Penn State Army ROTC graduates obtain a full-tuition scholarship, prior to graduation.

MORE INFORMATION

You Might Like This Program If...
- You want to acquire professional flexibility and proven leadership skills that every industry desperately seeks.
- You seek an organization willing to invest risk in your potential, while setting the conditions for your success.
- You enjoy being a member or leader of a team with a common goal.
- You’re looking for the best version of yourself.
- You want more, and aren’t afraid of the challenge it takes to get it.

MORE INFORMATIO (https://www.goarmy.com/rotc)

Program Requirements
The Basic Course is a four-course series, usually taken in the freshman and sophomore years. Freshman and sophomore courses are 2 credits each. The Basic Course trains the student in a variety of topics, including the national defense structure, leadership theory and principles, land navigation, small-unit operations and tactics, military history, and basic military skills and knowledge. The student incurs no military service obligation while enrolled in the Basic Course, and may dis-enroll at any time (except for sophomores on Army ROTC scholarships). Enrollment in the Basic Course is open to all Penn State full-time students. Also, uniforms, textbooks, and most equipment are furnished at no charge by the government to all enrolled students.

The Army ROTC program is much more than just taking classes. Each semester, the Army ROTC program consists of five activity segments: classroom lectures (one or two fifty-minute classes per week), a 100-minute Leadership Laboratory, Physical Training sessions, day trips and field training exercises, and extracurricular activities that include numerous clubs and social events. While the latter three activities are generally optional for enrolled Basic Course students, most students become progressively involved to enhance their training, develop esprit de corps, and take part for the social and fun aspects of the program.

The Advanced Course consists of a series of four courses, each for 3 credits. The Advanced Course instructs and evaluates in such areas as leadership and management, tactical operations, strategy, personnel administration, logistics, military justice, and ethics. Advanced Course students incur a service obligation when contracted, after which they receive a cash stipend of up to $400 per month (tax free) up to $4,000 per academic year. Normally, in the summer between the junior and senior years, students attend a five- to six-week National Advanced Leader’s Course, for which salary and travel expenses are paid for the student. National Advanced Leader’s Course is a critical hurdle that students must pass to receive a commission. In addition, students must complete at least one University course in each of five areas prior to commissioning: written communications, human behavior, computer literacy, mathematical reasoning, and American military history. These courses may also fulfill the student’s General Education or academic major curriculum requirements.

Three-year Army ROTC scholarships are available to students on a competitive basis. These merit scholarships pay full tuition, a book allowance ($600 per year), and a tax-free subsistence stipend of up to $400 per month up to $4,000 per academic year. Four-year scholarships are available only through competition in the high school senior year. Army ROTC scholarships are awarded in five major categories: engineering, analytic/physical sciences, nursing, technical/management, and generalists (all other majors except theology). In particular, Army ROTC has a strong program for Nursing majors with numerous scholarship and enrollment options.

Entrance to Army ROTC
Students may enter Army ROTC during their baccalaureate studies up until the start of their junior year via several lateral entry methods. These methods include compressing the Basic Course into one year (for sophomores), attending a four-week summer training program called Army ROTC Leader’s Training Course, or by receiving constructive credit.
for prior military service. Entry after this time is possible only when an enrolling student will be continuing his/her education after baccalaureate graduation. Contracted students who wish to continue their education at a graduate level may request an education delay before starting their service obligation.

**Career Paths**

Army ROTC Cadets compete to serve on Active Duty, or elect to serve part-time in the US Army Reserve (USAR) or Army National Guard (ARNG). Career fields are wide ranging, including: Administrative Support, Intelligence/Combat Support, Arts/Media, Legal/Law Enforcement, Combat, Mechanics, Computers/Technology, Medical/Emergency, Construction/Engineering and Transportation/Aviation. Nearly any civilian professional career has an equivalent in the US Army. Graduates’ salaries are above the national average for college grads, with regular raises and promotions in the first few years of service. Life and Health insurance are provided or available for both Active Duty and the Reserve Components (USAR/ARNG).

MORE INFORMATION (https://www.goarmy.com/rotc/careers)

**Opportunities for Graduate Studies**

Army ROTC Cadets pursuing graduate degrees in certain professional fields (medical, legal) can seek an ‘Educational Delay’ to complete their subsequent education. Upon completion, those individuals practice their respective career fields as US Army Officers. Additional scholarship funding may be available through the US Army Health Professions Scholarship Program (HPSP).

**Naval Science/Naval Reserve Officer Training Corps (NROTC)**

**Program Description**

The Naval ROTC trains qualified young men and women at the University Park campus for service as commissioned officers in the Navy, the Navy Nurse Corps, or the Marine Corps. Entering freshmen may be accepted into the Naval ROTC through the Four-Year College Program or in the Four-Year Scholarship Program. Freshmen who are not on scholarship may join NROTC and be eligible to compete for the Scholarship Program. Qualified sophomores either in attendance or planning to commence studies at University Park Campus with their junior year, or who have applied for transfer to Penn State from another institution, may compete for the special Two-Year College Program and the Two-Year Scholarship Program. Navy, Nurse, and Marine Corps scholarships provide full tuition, book allotment, laboratory and instructional fees, and a $250-350 per month subsistence allowance. In addition, Nurse scholarship students are issued special equipment required by the BSN curriculum.

Students who receive the baccalaureate degree and complete the NROTC program receive commissions as ensigns or second lieutenants. College Program commissionees are required to serve at least three years of active duty. Scholarship Program commissionees are committed to four years of active duty.

**What is Naval Science?**

Naval Science is a field of study that offers university students an introduction to the operations, technology and culture of the United States Navy and Marine Corps. Naval Science courses are available for all university students but are designed to operate in tandem with the Pennsylvania State University Naval Reserve Officer Training Corps (NROTC) unit. The Naval ROTC unit trains qualified young men and women at the University Park campus for service as commissioned officers in the Navy, the Navy Nurse Corps, or the Marine Corps. Naval Science courses can also be utilized to fulfill prescribed course requirements for the Military Studies minor.

**You Might Like This Program If...**

- You are enrolled in the NROTC program at Penn State (Required).
- You are enrolled or considering enrolling in the Military Studies minor at Penn State.
- You are interested in learning about Naval operations, technology and culture.

MORE INFORMATION (http://nrotc.psu.edu)

**Program Requirements**

All students must complete at least 18 credits of Naval Science (NAVSC) courses; subjects and credits appear under course descriptions (ROTC/NAVSC) later in this bulletin. College Program students must participate in one active duty training period (cruise) during the summer between junior and senior years. Scholarship students are required to participate in either two (Nurse) or three (Navy and Marine Corps) summer cruises prior to commissioning.

In addition, all Navy scholarship students must complete University courses in calculus, physics, national security policy, and American military affairs. Requirements for Nurse and Marine Corps scholarship students are somewhat less. College Program students must complete University courses in national security policy and American military affairs.

**Career Paths**

Students who receive their baccalaureate degree and complete the NROTC Program are commissioned as either Navy Ensigns or Marine Corps Second Lieutenants. Post-commission career paths for Navy option students include Surface Warfare Officer, Submarine Warfare
Officer, Naval Aviator, Naval Flight Officer, or Special Operations Warfare Officer. Marine Corps option students can serve as either Ground or Aviation Marine Corps Officers. All students are obligated to serve a minimum of four years of active duty, though select career paths may require a greater minimum service time.

Schreyer Honors College

About the College
Peggy A. Johnson, Dean, Schreyer Honors College

The Schreyer Honors College, regarded as one of the nation's top programs of its kind, promotes achieving academic excellence with integrity, building a global perspective, and creating opportunities for leadership and civic engagement. Schreyer Scholars, including Gateway Scholars admitted after their first or second year of enrollment, are a diverse and motivated group of approximately 2,000 students at University Park and 20 Commonwealth campuses. The College strives to educate students who will have an important and ethical influence in the world, to improve educational practice, and to continue to be recognized as a leading force in honors education nationwide.

MORE INFORMATION (http://www.shc.psu.edu)

College Procedures

Academic Warning
Failure to attain a GPA of at least 3.40 in one full-time semester places a student in warning status for the following semester and removes them from good academic standing in the College. Students on Academic Warning will continue to receive honors scholarships but will not be eligible for grants.

MORE INFORMATION (https://www.shc.psu.edu/academic/resources/handbook)

Honors Courses
First-year and sophomore students should expect to fulfill most or all of their honors requirements via honors courses, with limited exceptions by major and campus. A grade of C or higher is required for an honors course to meet honors credit requirements. With approval of the instructor and their honors adviser, students may take honors option courses that are typically not honors courses. A list of honors courses can be found via LionPATH (https://lionpath.psu.edu).

Resources

Academic
The College's Academic Team holds various events throughout the year to help Scholars with their theses. Scholars may also schedule one-on-one appointments with the College's academic staff. Weekly digital newsletters help keep Scholars up-to-date on important academic deadlines.

MORE INFORMATION (https://www.shc.psu.edu/academic/resources)

Study Abroad
Scholars’ options to study abroad include signature travel programs; international service learning; Schreyer Ambassador Travel Grants; and International Thesis Research Grants. Travel grant funding is available only to Scholars in good standing.

MORE INFORMATION (https://www.shc.psu.edu/academic/abroad)

Honors Advising
Honors advisers serve as principal resources for students for helping them choose majors, which enrichment and professional development opportunities should be pursued in addition to their coursework, and thesis preparation. Advisers can be faculty members or full-time academic advisers, depending on the academic college.

MORE INFORMATION (https://www.shc.psu.edu/academic/resources/advising.cfm)

Career Services
Schreyer Scholars interact with alumni or other university guests in seminars and career information sessions on campus, join mentoring programs that pair them with alumni, and travel to cities like New York and Washington, D.C., to meet with Scholar alumni.

UNIVERSITY COURSE DESCRIPTIONS

Definitions for various components of a course description.

Course-Numbering System

These course descriptions are arranged alphabetically. If any course cannot be located readily, refer to the index. Courses are numbered as follows:

Undergraduate Courses (1 to 399): General courses accepted in fulfillment of requirements for the bachelor’s degrees. These courses are described in the Undergraduate Courses section (p. 2738).

Advanced Undergraduate Courses (400 to 499): Courses open to graduate students and to juniors and seniors and, with the special written permission of the head of the department or the chair of the program sponsoring the course, to qualified students in earlier semesters. These courses are described in the Graduate Courses section (p. 2738).

Graduate Courses (500 to 699; 800 to 899): Courses restricted to students registered in the Graduate School, seniors with an average of at least 3.50 (500- and 800-level only; excludes 600-level), and other students who have been granted permission to enroll by the dean of the Graduate School. These courses are described in the Graduate Courses section (http://bulletins.psu.edu/university-course-descriptions/graduate).

Medical Courses (700-799): Courses restricted to students registered in the College of Medicine. These courses are described in the College of Medicine Courses section (http://bulletins.psu.edu/university-course-descriptions/medicine).

Law Courses (900-999): Courses restricted to students registered in Penn State Law and Dickinson Law. These courses are described in the Penn State Law Courses section (http://bulletins.psu.edu/university-course-descriptions/pennstatelaw) and Dickinson Law Courses section (http://bulletins.psu.edu/university-course-descriptions/dickinsonlaw).

Common Course Numbers

The following course numbers for which students may register have been set up for common use by major programs, with University Senate approval, to encourage innovation and provide flexibility in designing programs, but in no case may a course be scheduled for 0 credits.

First-Year Seminar 187. Listed under some liberal art-related academic headings, this course has prerequisites of first-semester standing and enrollment in the College of the Liberal Arts.

Research Project Courses 294, 294R. 1-12 credits. Supervised student activities on research projects identified on an individual or small-group basis. A specific title may be used in each instance and will be entered on the student's transcript.

Internship 295, 395, 495. 1-18 credits. Supervised off-campus, non-group instruction including field experiences, practica, or internships. Written and oral critique of activity required. A specific title may be used in each instance and will be entered on the student’s transcript.

Independent Studies 296, 496. 1-18 credits. Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses. A specific title may be used in each instance and will be entered on the student’s transcript.

Special Topics 97, 197, 297, 397, 497; 98, 198, 298, 398, 498. 1-9 credits. Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. Several different topics may be taught in one year or semester. A specific title may be used in each instance and will be entered on the student’s transcript.

Foreign Studies 99, 199, 299, 399, 499. 1-12 credits. Courses offered in foreign countries by individual or group instruction. A specific title may be used in each instance and will be entered on the student’s transcript. These courses typically carry the International Cultures (IL) attribute.

Graduate Common Courses

Colloquium 590. Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Research Topics 594. Supervised student activities on research projects identified on an individual or small-group basis.

Internship 595. Supervised, research-oriented, off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Individual Studies 596. Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Special Topics 597, 598. Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Foreign Studies 599. Courses offered in foreign countries by individual or group instruction.

Thesis Research 600, 610. In registering for thesis research, a student uses the appropriate number (600, 610) preceded by the abbreviation designating the major field. The numbers 600 (on campus) and 610 (off campus) are available for credit in thesis research in all graduate major programs. The bursar assesses charges for these courses at the current rate of tuition, according to the student’s status at the time of registration.

Ph.D. Dissertation 601, 611. The numbers 601 and 611, with associated special fees, are available to Ph.D. degree candidates who have passed the comprehensive examination and met the two-semester residence requirement. They may be used for dissertation preparation work during its later stages, when the academic activity of the candidate consists partly (611) or solely (601) of work on the completion of research and writing of the dissertation.

SUBJ 601 and SUBJ 611 do not carry academic credit. They are entered on the academic transcript to indicate the registration and the nature of the candidate’s academic activity. A candidate registered for SUBJ 601 is classified as a full-time student, while one registered for SUBJ 611 is classified as a part-time student.

The numbers 600, 601, 610, and 611 may not appear in the Schedule of Courses for each semester.

Supervised Experience in College Teaching 602. May be offered by any graduate program in a department that also offers undergraduate courses. A graduate program with no counterpart undergraduate program may offer SUBJ 602 when cooperative arrangements are made with an
administrative unit that does not offer graduate degrees but that uses graduate assistants in its teaching. SUBJ 602 may be offered in any semester and is subject to the following restrictions:

1. SUBJ 602 will not be counted in fulfilling any specific credit requirement for an advanced degree.
2. SUBJ 602 will be graded (A, B, C, D, F). The grade will appear on the student's transcript.
3. SUBJ 602 will not be used in calculating grade-point averages.
4. SUBJ 602 shall be offered only in those graduate programs that want to provide opportunity for supervised and graded teaching experience. Enrollment will be restricted to students for whom the major program is prepared to provide such experience.
5. SUBJ 602 will be counted as a part of the student's credit load unless the program specifies otherwise.

Foreign Academic Experience SUBJ 603. Foreign study and/or research approved by the graduate program for students enrolled in a foreign university constituting progress toward the degree.

Colloquium 890. Continuing, professionally oriented seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Capstone Experience 894. Supervised, professionally oriented student activities that constitute the culminating experience for the program.

Internship 895. Supervised, professionally oriented, off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Individual Studies 896. Creative projects with a professional orientation, including nont Thesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Special Topics 897, 898. Formal courses given on a topical or special interest subject with a professional orientation that may be offered infrequently; several different topics may be taught in one year or semester. A specific title may be used in each instance and may be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

Foreign Studies 899. Courses with a professional orientation offered in foreign countries by individual or group instruction.

Course Attributes and Suffixes
Attributes and attribute values are course designations that are used to define specific characteristics for courses. The search for specific types of courses uses attributes and attributes are the most important notation for a course to satisfy a given requirement.

Suffixes are letters that follow a course number and allow for easier identification of a course's characteristics. Not all attributes and characteristics are captured in available suffixes and suffixes are not the feature used to determine if a course satisfies a requirement. The degree audit and what-if reports use attributes, not suffixes, to determine applicability of a course to a requirement.

BACHELOR OF ARTS
Attributes
- BA: Arts
- BA: Humanities

• BA: Natural Science
• BA: Other Cultures
• BA: Quantification
• BA: Social and Behavioral Sci
• World Lang (12th unit)
• World Language (all)

CULTURAL DIVERSITY
Attributes
- International Cultures (IL)
- United States Cultures (US)

Suffixes
- U: United States Cultures and/or International Cultures and Honors
- V: United States Cultures and/or International Cultures and Writing Across the Curriculum

General Education
Attributes
- GenEd: Writing/Speaking (GWS)
- GenEd: Quantification (GQ)
- GenEd: Arts (GA)
- GenEd: Health Wellness (GHW)
- GenEd: Humanities (GH)
- GenEd: Natural Sciences (GN)
- GenEd: Social & Beh Sci (GS)
- GenEd Integrative: Interdomain
- GenEd Integrative: Linked

Suffixes
- N: Inter-Domain
- Q: Inter-Domain and Honors
- Z: Linked Course. Approved Linked Course pairs must be confirmed by the Linked Course search feature in LionPATH.

FIRST-YEAR ENGAGEMENT PROGRAM
Attribute
- First Year Seminar

Course Subject
- PSU: First-Year Seminar

Suffixes
- S: First-Year Seminar
- T: First-Year Seminar and Honors
- X: First-Year Seminar and Writing Across the Curriculum

WRITING ACROSS THE CURRICULUM
Attribute
- Writing Across the Curriculum

Suffixes
- M: Writing Across the Curriculum and Honors
- W: Writing Across the Curriculum
- X: Writing Across the Curriculum and First-Year Seminar
- Y: Writing Across the Curriculum and United States Cultures and/or International Cultures
Honors Courses
Attribute
• Honors

Suffixes
• H: Honors
• M: Writing Across the Curriculum and Honors
• Q: Inter-Domain and Honors
• T: First-Year Seminar and Honors
• U: United States Cultures and/or International Cultures and Honors

Course Credits
In accordance with Senate Policy 42-23 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/42-00-acquisition-of-credit/#42-20), for the typical student, a total of forty-five (45) hours of work planned and arranged by the University faculty is required to gain 1 credit. While the distribution of time varies from course to course, generally one-third of the time is devoted to formal instruction and two-thirds of the time to outside preparation. Course credit by instruction may be achieved by a variety of educational experiences that allow the student to work toward mastery of the course objectives. With the acknowledged goal of educational excellence, more than the minimum established here may be required for mastery of course objectives.

The number of credits for each course is indicated in parentheses and can be earned with classroom, practicum, or laboratory work as designated in LionPATH.

A department may schedule an entire section in an undergraduate course for fewer credits than the maximum authorized. In 400-level courses, a department may schedule an individual student for fewer credits than the maximum authorized. In no case, however, may the course be scheduled for 0 credit, or may the total credits scheduled for any student exceed the maximum number authorized for the course.

Repeatable and Variable Credit Courses
Some courses are designated as repeatable; they may be taken more than once for credit. These courses may be repeated indefinitely unless the department stipulates a maximum number of credits allowed. These courses appear with the maximum number of credits allowed following the number of credits for the course—for example (1.5 credits/maximum of 3).

Courses may have variable credits, such as (1-3), (2-6), or (3-10). Here, the larger number signifies the total credits that can be accumulated for the course over an indefinite number of semesters, unless otherwise specified. For example, a course listed with (1-6) could be taken six semesters for 1 credit each semester, or two semesters for 3 credits each semester, or once for 6 credits, etc.

In some courses with variable credits, students may be permitted to accumulate more than the larger number shown. Such courses will be listed as, for example, (1-3 per semester, maximum of 12).

Any special departmental limitations are indicated by footnotes.

Prerequisites, Concurrent Courses, Co-requisite Courses, and Recommended Preparation
See also: Senate Policy 34-60 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/34-00-course-scheduling/#34-60).

Prerequisites, concurrent courses, and co-requisite courses approximate the necessary specific coursework or general academic knowledge, background, or semester classification required to succeed academically in a given course.

• Prerequisites are courses or other requirements that must be completed prior to the start of a given course.
• Concurrent Courses are similar to prerequisites except that they may be taken prior to, or in the same semester as, the given course.
• Co-requisite Courses are pairs of courses required to be taken together in the same semester.

Registration in a given course is limited to students who have satisfied the stated prerequisite, concurrent, or co-requisite requirements. The course instructor has the right to permit students to take the course without having the stated prerequisite, concurrent, or co-requisite requirements, if the student demonstrates mastery of the material through some other means.

Recommended Preparation relates to preparatory skills or companion courses deemed useful, but not necessary, for successful completion of a course. Recommended preparation has no bearing on registration in a given course.
## UNDERGRADUATE COURSES

### A
- Accounting (ACCTG) (p. 2740)
- Aerospace Engineering (AERSP) (p. 2746)
- African American Studies (AFAM) (p. 2752)
- African Studies (AFR) (p. 2763)
- Agribusiness Management (AGBM) (p. 2768)
- Agricultural and Extension Education (AEE) (p. 2772)
- Agricultural Science (AGSC) (p. 2775)
- Agricultural Systems Management (ASM) (p. 2776)
- Agriculture (AG) (p. 2777)
- Agroecology (AGECO) (p. 2778)
- Agronomy (AGRO) (p. 2781)
- Air Force (AIR) (p. 2782)
- American Studies (AMST) (p. 2783)
- Animal Science (ANSC) (p. 2791)
- Anthropology (ANTH) (p. 2800)
- Applied Linguistics (APLNG) (p. 2819)
- Applied Youth, Family and Community Education (AYFCE) (p. 2822)
- Arabic (ARAB) (p. 2823)
- Architectural Engineering (AE) (p. 2826)
- Architectural Engineering Technology (AET) (p. 2835)

Accounting (ACCTG)

ACCTG 151: Introductory Financial Accounting I
3 Credits
Basic concepts, principles, and practices for the recording, summarizing, and interpreting of accounting data.

ACCTG 152: Introductory Financial Accounting II
3 Credits
Accounting for partnerships, corporations, cash flows, certain liabilities and assets, and the analysis of financial statements.

Prerequisite: ACCTG 151

ACCTG 199: Foreign Studies
1-12 Credits/Maximum of 12
Courses offered in foreign countries by individual or group instruction.

International Cultures (IL)

ACCTG 211: Financial and Managerial Accounting for Decision Making
4 Credits
Introduction to the role of accounting numbers in the process of managing a business and in investor decision making. ACCTG 211
Financial and Managerial Accounting for Decision Making (4) The objective of this course is to introduce students to the discipline of accounting through an introduction to two of accounting's sub-disciplines, financial and managerial accounting. The more specific purpose is to provide students a basic understanding of the role of financial and managerial accounting information in the decisions of capital market participants external to a business enterprise (e.g., stockholders, banks, financial analysts, prospective stockholders), and in the decisions of those who manage business enterprises. Accounting information has an important role in the resource allocation process in our socio-economic system as a whole, as well as in each individual business enterprise. This course provides students an understanding of (1) the nature of the accounting function, and (2) how the information in accounting reports are used by various decision makers in their resource allocation decisions. In this course students will develop an understanding of (a) the five activity dimensions of accounting (the collection, recording, analysis, interpretation and reporting of information to decision makers for (mainly) their investment decisions), (b) the issues surrounding the five activity dimensions, (c) the environment in which accounting is practiced, and (d) what information is used in a number of specific decision situations, and how such information is used in such decision situations. The analysis, interpretation and decision-making orientation of this course includes a study of the procedural (mechanical and processing) aspects of the recording activity dimension which is an important means to the end —where the end is the analysis and interpretation of the information, and the reports produced by the recording/processing part of accounting. Through this focus on the recording activity dimension, students will obtain an understanding of (a) the nature and quality (strengths and weaknesses) of accounting information, (b) how to proceed in analyzing and interpreting accounting information, and (c) numerous other aspects of financial and managerial accounting. This course is an important background course for all business majors, as well as for numerous non-business majors. For accounting majors it is a prerequisite for ACCTG 405, 404, and 471. The course format consists of lectures, outside reading, class discussion, projects and homework assignments. The semester grade for this course will be determined by a weighted average of performance on mainly exams, quizzes, projects and participation.

Prerequisite: MATH 021 or 1.5 units of high school algebra

ACCTG 211H: Financial and Managerial Accounting for Decision Making

4 Credits

Introduction to the role of accounting numbers in the process of managing a business and in investor decision making. ACCTG 211H Financial and Managerial Accounting for Decision Making (4) The objective of this course is to introduce students to the discipline of accounting through an introduction to two of accounting's sub-disciplines, financial and managerial accounting. The more specific purpose is to provide students a basic understanding of the role of financial and managerial accounting information in the decisions of capital market participants external to a business enterprise (e.g., stockholders, banks, financial analysts, prospective stockholders), and in the decisions of those who manage business enterprises. Accounting information has an important role in the resource allocation process in our socio-economic system as a whole, as well as in each individual business enterprise. This course provides students an understanding of (1) the nature of the accounting function, and (2) how the information in accounting reports are used by various decision makers in their resource allocation decisions. In this course students will develop an understanding of (a) the five activity dimensions of accounting (the collection, recording, analysis, interpretation and reporting of information to decision makers for (mainly) their investment decisions), (b) the issues surrounding the five activity dimensions, (c) the environment in which accounting is practiced, and (d) what information is used in a number of specific decision situations, and how such information is used in such decision situations. The analysis, interpretation and decision-making orientation of this course includes a study of the procedural (mechanical and processing) aspects of the recording activity dimension which is an important means to the end —where the end is the analysis and interpretation of the information, and the reports produced by the recording/processing part of accounting. Through this focus on the recording activity dimension, students will obtain an understanding of (a) the nature and quality (strengths and weaknesses) of accounting information, (b) how to proceed in analyzing and interpreting accounting information, and (c) numerous other aspects of financial and managerial accounting. This course is an important background course for all business majors, as well as for numerous non-business majors. For accounting majors it is a prerequisite for ACCTG 405, 404, and 471. The course format consists of lectures, outside reading, class discussion, projects and homework assignments. The semester grade for this course will be determined by a weighted average of performance on mainly exams, quizzes, projects and participation.

Prerequisite: MATH 021 or 1.5 units of high school algebra

Honors

ACCTG 296: Independent Studies

1-18 Credits/Maximum of 18

Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

ACCTG 297: Special Topics

1-9 Credits/Maximum of 9

Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

ACCTG 305: Financial Statements and Management Decisions

4 Credits

Impact of management's financing, investing, and operating decisions on GAAP-based financial statements. Students who have passed ACCTG 310 or 311 may not take this course for credit. ACCTG 305 ACCTG 305 Financial Statements and Management Decisions (4) This course is a one-semester alternative to the traditional two-semester intermediate accounting sequence (ACCTG 371 and 472) intended for the non-accounting major. Students who have passed ACCTG 371 or 472 may not take this course for credit. It is a required course for the Finance major. It will also substitute for ACCTG 371 in meeting the requirements for an Accounting minor, and serve as a business supporting course for students in other School of Business majors. Students will gain a fundamental understanding of the information conveyed in the financial statements and, as a result, develop an appreciation for its usefulness and limitations in decision making. They will also develop the prerequisite knowledge base necessary to conduct financial statement analysis as required in Level I of the Chartered Financial Analyst (CFA) exam. A financial statement user decision-making perspective, rather than the accountant/preparer approach found in the traditional intermediate accounting course, is emphasized. Student success in meeting the learning objectives will be assessed through a combination of exams, homework problems, and assignments. The comprehensive final exam will test the student's comprehension of the relevant material. Faculty Members Proposing Course: Timothy R. Smaby and David T. Doran

Prerequisite: ACCTG211, FIN 301
ACCTG 310: Federal Taxation I

3 Credits

Study of income determination concepts for individuals and corporations, impact of taxation on decisions, elementary research techniques, and ethical standards. ACCTG 310 Principles of Taxation (3) This course is directed to the study of concepts relative to: (a) the determination of taxable income and tax liability, (b) the influence of tax considerations on the decisions of taxpayers, and (c) elementary tax research techniques. Primary emphasis is given to concepts that are fundamental to the federal taxation of income with respect to business entities. Also, basic aspects of the taxation of individuals are introduced. The objectives of this course are to enable students to do the following: 1) apply basic tax rules and regulations to compute the taxable income and federal income tax liability for corporate and individual taxpayers, 2) incorporate tax costs and tax benefits into calculations of the net present value of cash inflows and outflows from taxable activities, 3) recognize tax planning opportunities or problems inherent in common transactions, and 4) appreciate the impact of the basis of accounting on both tax and financial reporting. Typical topics include sources of authority, structure of an income tax, property transactions, choice of entity, distribution of income, selection of jurisdiction, means of financing, and taxation of individuals. Students should be familiar with basic accounting concepts, understand the nature of financial instruments, and should be able to apply the concept of present value and future value in estimating cash inflows and outflows. This is a required course for accounting majors and, for many of them, the only tax course that they take. Other students who meet the prerequisite requirements may take this course as an elective. Also, this principles course in taxation is a prerequisite requirement for an advanced course in taxation. Evaluation is based primarily on periodic examinations. No special facilities are required. However, students have on-line access to tax laws and regulations, tax cases, and administrative guidance. This course is generally offered every semester with enrollments of twenty to thirty students per section.

Prerequisite: ACCTG211 or FIN 301

ACCTG 311: Accounting Systems and Control

3 Credits

Introduction to accounting procedures to gather, to aggregate, and to report accounting data to managers and to external readers. ACCTG 311 Accounting Information Systems (3) This course pertains to the study of accounting information systems as an important part of a firm’s total information systems. The accounting cycle, as the key process providing financial information to management, is thoroughly reviewed and documented. Emphasis is given to the importance of computer-based accounting information systems in supporting internal controls and improving financial reporting, asset security and efficiency and effectiveness of performance. Course objectives: 1) to understand the accounting model and specifically, the accounting cycle within a business entity; 2) to process business and accounting transactions and complete the accounting cycle within a computer-based accounting information system; 3) to analyze accounting information and related internal controls within a computer-based accounting information system; 4) to examine relevant ethical issues; 5) to gain an appreciation for evolving technology advancements, such as ERP’s and e-commerce, and their impact on the accounting cycle and internal controls. This is a prescribed course for majors in Accounting and it serves as a foundation and prerequisite for most 300-level and 400-level accounting courses. Students will be evaluated based on performance on exams, computer-based accounting system project, and periodic homework assignments. Typically, 50% or more of student’s grade is based on performance on exams. Course will be taught in either a technology classroom with computers for all students or periodic sessions in the computer lab. [Students will require consistent access to a computer to complete computer-based accounting system project].

Prerequisite: ACCTG211

ACCTG 312: Accounting Technology Lab

3 Credits

Hands-on course to teach accounting software, applications of spreadsheets and databases in accounting, and surveying of underlying database theory. ACCTG 312 Accounting Technology Lab (3) This is a hands-on course to teach accounting software, applications of spreadsheets and databases in accounting, and surveying of underlying database theory.

Prerequisite: ACCTG305 or ACCTG371

ACCTG 340: Cost Accounting

3 Credits

Accounting for manufacturing concerns; actual and standard cost systems, and managerial uses of cost data.

Prerequisite: ACCTG211 or ACCTG311

ACCTG 371: Intermediate Accounting I

4 Credits

Financial accounting methods, theory and concepts; analysis of problems in applying concepts to financial statements and asset accounts.

Prerequisite: ACCTG211

ACCTG 399: Foreign Studies

1-12 Credits/Maximum of 12

Courses offered in foreign countries by individual or group instruction. International Cultures (IL)

ACCTG 403: Auditing

3 Credits

Financial compliance, internal, and operational audits; standards and procedures; sampling; EDP auditing; professional issues; application of concepts through written responses. ACCTG 403 Auditing (3) Financial statement, regulatory and contract compliance, internal and operational audits, professional standards and ethical conduct; statistical and judgmental sampling; the audit-impact of information technology; audit risk and internal control structure evaluation; application of procedures in transaction cycles; audit reporting; professional issues.

Prerequisite: ACCTG371 or ACCTG471
Prerequisite: The course will rely on lectures and discussion of case studies.

Honors Writing Across the Curriculum

ACCTG 403W: Auditing
3 Credits

Financial, compliance, internal, and operational audits; standards and procedures; sampling; EDP auditing; professional issues; application of concepts through written responses. ACCTG 403W Auditing (3) Financial statement, regulatory and contract compliance, internal and operational audits, professional standards and ethical conduct; statistical and judgmental sampling; the audit-impact of information technology; audit risk and internal control structure evaluation; application of procedures in transaction cycles; audit reporting; professional issues.

Prerequisite: ACCTG371 or ACCTG471
Writing Across the Curriculum

ACCTG 404: Managerial Accounting: Economic Perspective
3 Credits

Accounting techniques as planning, control, and motivating devices in business and other organizations; accounting data for decision making and performance evaluation. ACCTG 404 Managerial Accounting (3) This course emphasizes the use of accounting information for internal purposes as opposed to the external disclosure focus of the financial accounting course. The cost covers the vocabulary and mechanics of cost accounting and the design of management accounting systems for planning and controlling operations, and for motivating personnel. The course integrates accounting with ideas from data analysis, decision analysis, finance, microeconomics, and operations management. The themes stressed throughout the course will be the notion that information is costly; the circumstances that necessitate cost allocation, the idea that different costs and different allocation schemes apply for different purposes; and fundamentals of incentive and compensation plans. Among the topics covered are cost behavior, cost-volume analysis, relevant costs, and the use of cost information for decision making. The course will rely on lectures and discussion of case studies.

Prerequisite: ACCTG 211, SCM 200 or STAT 200, ECON 102

ACCTG 405: Principles of Taxation I
3 Credits

Elements of tax policy and tax-planning concepts for personal and business decision making; with emphasis on taxation of individuals. ACCTG 405 Principles of Taxation (3) Introduction to Taxation, is the first course that undergraduate accounting majors take that is devoted entirely to taxation. Although the course is intended for accounting majors, the content is relevant to finance majors seeking elective courses. The objective of the course is to provide students with a basic understanding of the concepts, terminology, and decision-making skills specific to the discipline of taxation that are germane to the professional development of those preparing for a career in accounting. Although the course surveys the many forms of taxation that are found in industrialized societies, and the comparisons thereof, the main focus is on the federal income taxation of individuals. However, coverage is provided regarding the manner in which the taxation of individuals relates to corporate and partnership entities. ACCTG 405 is related to other accounting courses through its coverage of income concepts, and micro-economic principles. The former compares differences in the measurement of financial accounting income with the manner in which income is determined according to the tax laws. The latter emphasizes business decision-making principles that are important in the managerial portion of the accounting program. The course covers topics that illustrate fundamental tax strategies and how such enable taxpayers to achieve business and personal economic objectives. The assessment process in ACCTG 405 incorporates examinations, homework assignments, and individual and group projects. The exams are combinations of objective questions and open-ended problems. Exams are often given in the evening. Course learning aids include a text book, on-line tax research services, spreadsheet software, and a packet of handouts prepared by instructors to keep the classes updated on the many changes in the tax laws that occur each year.

Prerequisite: ACCTG211; B A 301 or FIN 301

ACCTG 406: Principles of Taxation II
3 Credits

Impact of federal tax structure on business decisions, research methodology, tax planning; ethical considerations of tax practice.

Prerequisite: ACCTG405

ACCTG 410: Federal Taxation II
3 Credits

An examination of the rules and forms used to compute the federal tax liability of corporations and partners.

Prerequisite: ACCTG310

ACCTG 411: Accounting Practicum: VITA
3 Credits

Introduces students to practical aspects of tax preparation through the IRS' VITA program and completion of a tax research project.

Prerequisite: ACCTG310

ACCTG 417: Corporate and Managerial Communication
2-3 Credits

Developing student's expertise in interpreting and communicating accounting and financial information to business professionals. ACCTG 417 Corporate and Managerial Communication (2-3) This course provides an opportunity for business students to develop oral, graphic, and written communication skills essential to success in a corporate environment, with emphasis on corporate accounting, finance, and/or consulting contexts. The course provides a framework for understanding the characteristics of effective business communication. It further provides guidelines for the successful development and delivery of professional messages. This course employs individual and team activities designed to strengthen skills in the development and delivery of corporate messages. Participants will gain experience analyzing and discussing financial and accounting data, evaluate and prepare
professional responses to corporate problems/opportunities, and develop strategies for conversing with multiple business audiences. Specific selection of topics will evolve to reflect current issues in business, finance, and accounting.

**Prerequisite:** CAS 100 and ACCTG211

ACCTG 422: Accounting Systems

3 Credits

Understanding flow and documentation of accounting information and internal controls in the context of accounting cycles. ACCTG 422 Accounting Systems (3) This course primarily investigates accounting transactions cycles-processes and procedures by which an organization’s financial information is recorded, processed, reported, and disposed of. The processes covered in this course range from manual to fully automated and Web-enabled systems. The documentation and analysis of the accounting cycles for the revenue, expenditure, conversion, and managerial reporting areas are explored via flowcharts and narrative descriptions. The concepts of files, transaction updates, editing, and reporting in the automated accounting systems are explored. The course also covers internal controls in the manual and automated systems. Additional topics may include fraud examination, applicable laws and regulations, and computerized auditing.

**Prerequisite:** ACCTG312

ACCTG 426: Financial Statement Analysis

3 Credits

The exploration of conventional and advanced methods of analyzing financial statements, including the assessment of earnings quality. ACCTG 426 Financial Statement Analysis (3) The objective of this course is to explore conventional and advanced analytical methods of analyzing financial statements. Expanding on the material covered in the principles of accounting and principles of finance courses and using actual financial statements, students: review and apply the traditional methods for analyzing financial statements, such as ratio analysis, trend analysis, and common-size analysis, apply advanced tools for analyzing financial statements, such as financial distress prediction models and earning manipulation prediction models, and evaluate accounting policies and disclosures and their impact on the financial statements through the assessment of earnings quality.

**Prerequisite:** FIN 301

ACCTG 431: Advanced Auditing

3 Credits

Examination of legal liability, EDP, statistical sampling, SEC reporting, internal control, and financial reporting in specialized industries.

**Prerequisite:** ACCTG403 or ACCTG403W

ACCTG 432: Accounting Information Systems

3 Credits

Systems analysis tools and techniques; internal control concepts; development of computer control procedures. ACCTG 432 Accounting Information Systems (3) Accounting data are utilized as information in making decisions and as a control mechanism. The focus of this course, however, will be upon the actual production of accounting data. The purpose of the course is to learn how accountants collect relevant data and transform them into reports appropriate for managers and external readers. Procedural details will focus first on the traditional accounting cycle and the journal entries for business transactions and events. Then we shall examine in detail the principle accounting cycles: sales cycle, cash receipts cycle, purchases cycle, cash disbursements cycle, payroll cycle, facilities cycle, general ledger cycle, production cycle.For each cycle, you should be able to explain the relation of the accounting process to the business enterprise, the basic journal entries, the basic internal control features, and the document flow.

**Prerequisite:** ACCTG371 or ACCTG471 , MIS 204

ACCTG 440: Advanced Management Accounting

3 Credits

Management accounting topics such as decision models, quantitative techniques, variance analysis, and their use in accounting. ACCTG 440 Advanced Management Accounting (3) An in-depth examination of accounting techniques used within modern organizations. The course is designed for students interested in pursuing careers in corporate accounting or financial management. The portfolio of managerial accounting procedures, including cost measurement and allocation, budgeting practices, transfer pricing, and variance analyses appropriate to an organization’s unique circumstances are derived. The student will learn to apply psychological and sociological theories of behavior to practical problems of control and to apply quantitative methods and models to managerial decision-making. Other topics covered by the course may include, financial management of working capital, long-term assets and liabilities; techniques for managing inventory; and strategic cost management including inter-organizational cost management.

**Prerequisite:** ACCTG340 or ACCTG404

ACCTG 450: Advanced Accounting

3 Credits

Accounting theory and practice for business combinations, branches, international operations, partnerships, consolidated financial statements, corporate liquidations, nonprofit organizations, estates, and trusts.

**Prerequisite:** ACCTG472

ACCTG 461: International Accounting

3 Credits

Study of international accounting issues with emphasis on need, use, and interpretation of financial accounting required in global business environment.

**Prerequisite:** ACCTG471 and ACCTG472

International Cultures (IL)

ACCTG 462: Governmental and Not-for-Profit Accounting

3 Credits

Provides an understanding of governmental and not-for-profit accounting theory, procedures, and financial statements.

**Prerequisite:** ACCTG311 or ACCTG471
3 Credits

Theory and practice issues in income concepts and value measurement; GAAP; revenues, costs, assets, liabilities, and equities. ACCTG 471 Intermediate Accounting I (3) This course provides students with an understanding of generally accepted accounting principles and procedures so that they properly account for and present information in financial statements prepared for external users. The student should acquire a complete understanding of the accounting issues relating to cash, receivables, inventory, plant assets, natural resources, and intangibles. The student should be able to evaluate alternative accounting methods and choose the methods which will best convey the financial information related to the above areas. The student should be able to apply appropriate generally accepted accounting principles and procedures to account for transactions related to the above asset areas. The student should be able to demonstrate an understanding of the transaction analysis, recording, classification, summarization, and reporting procedures in the accounting cycle, and an understanding of the information contained in the financial statements. Finally, student should be able to demonstrate written communication skills required of accountants.

**Prerequisite:** ACCTG211 or ACCTG311

ACCTG 472: Intermediate Financial Accounting II
3 Credits

Off-balance-sheet financing; special issues in cost capitalization, liabilities, and equities; matching; funds flow statements; statement analysis; inflation accounting.

**Prerequisite:** ACCTG371 or ACCTG471

ACCTG 473: Advanced Financial Accounting
3 Credits

Reporting for multi-corporate enterprises, business combinations, quasi- reorganizations, and selected contemporary reporting problems. ACCTG 473 Advanced Financial Accounting (3) This course explores four major topics: accounting for business combinations, introduction to derivatives and special purpose entities, accounting for foreign currency transactions and consolidating foreign subsidiaries, and ethics and policy issues for the profession.

**Prerequisite:** ACCTG472

ACCTG 481: Financial Statement Analysis: Accounting Based Evaluation and Decision Making
3 Credits

An accounting based evaluation and decision making approach to analyzing financial statements by studying business and firm valuation. ACCTG 481 Financial Statement Analysis (3) The proposed course in financial statement analysis is structured to improve the student’s ability to extract and interpret information from actual financial statements and to expose the student to how financial statement information is integrated into equity valuation and credit analysis. The course would not only rely upon textbook-based and lecture-based learning, but also emphasize case-based learning. The course will consist of two main sections. The first will deal with accounting and business analysis. This part will explore the types of financial information data typically available for publicly traded companies and introduce a model of the economic drivers of company performance. It would incorporate some technical accounting as well as some standards business economics/strategy concepts. Students will be forced to recast financial statements that they believe do not reflect the underlying economic state of the company. Financial reporting issues relating to revenue and expense recognition, leases and consolidations will be discussed. The other section of the course will deal with firm valuation. Students would be exposed to some standard approaches to equity valuation and the analysis activities underlying these approaches. Aspects of valuation that would be covered in this section of the course are financial ratio analysis, forecasting, pro-forma statements, cost of capital and valuation methods. The course will rely on lectures and extensive use of case studies.

**Prerequisite:** or concurrent: ACCTG472

ACCTG 483: Forensic Accounting
3 Credits

Study of investigative accounting, consulting and litigation support activities undertaken in forensic accounting engagements. ACCTG 483 Forensic Accounting (3) ACCTG 483 is the exploration of the broad discipline known as “forensic accounting” which includes a variety of investigative accounting, valuation, damage assessment and litigation support services. Forensic accounting is an evolving discipline which is distinguished from assurance services in that it does not involve reporting on the fairness of financial statements. It generally involves the investigation and analysis of financial data for some specific purpose - obtaining an in-depth understanding of information that enables the forensic accountant to prove, disprove or at least confidently speculate about allegations related to the information and to report those findings objectively. Forensic accountants are involved in presenting analyses that might be valuable for such things as settling legal disputes, calculating economic damages, valuing intellectual property, determining the extent of damage or loss due to fraud, or tracing elusive assets or revenue sources. A forensic accountant might also participate in pro-active engagements such as the development of systems and procedures to prevent fraud. The first part of the course deals with the technical and ethical framework of forensic accounting and focuses on the understanding of forensic and investigative accounting including investigation methodology, the nature of fraud, fraud risk factors, financial statement fraud, litigation support and dispute resolution services and development of the skills needed in those professional activities. These skills include the ability to integrate knowledge of accounting, finance, economics, business law and other business disciplines in gathering, analyzing and evaluating evidence and drawing conclusions. The second part of the course focuses on forensic accounting investigation and analysis of financial information in connection with litigation, dispute resolution, estimation of economic damages, or other specific objectives, and the preparation of comprehensive, objective reports of findings and conclusions.

**Prerequisite:** or concurrent: ACCTG472; ACCTG403 or ACCTG403W

ACCTG 489: Seminar in Accounting
3 Credits

New trends and concepts in accounting: applications and impact on problem solving and decision making.

**Prerequisite:** permission of program
ACCTG 494: Research Project
1-12 Credits/Maximum of 12
Supervised student activities on research projects identified on an individual or small-group basis.

ACCTG 494H: Research Project
1-6 Credits/Maximum of 6
Supervised student activities on research projects identified on an individual or small-group basis. ACCTG 494H, Senior Honors Thesis in Accounting - Investigation of an original problem area associated with accounting, including literature review. A thesis topic must be approved and a thesis supervisor must be identified before the course may be scheduled. Students sign up for three credits in each of their last two semesters for a total of six credits.

Honors

ACCTG 495: Internship
1-18 Credits/Maximum of 18
Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required. Prerequisite: prior approval of proposed assignment by instructor

Full-Time Equivalent Course

ACCTG 496: Independent Studies
1-18 Credits/Maximum of 18
Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

ACCTG 497: Special Topics
1-9 Credits/Maximum of 9
Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

AERSP 97: Special Topics
1-9 Credits/Maximum of 9
Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

ACCTG 499: Foreign Studies
1-12 Credits/Maximum of 12
Courses offered in foreign countries by individual or group instruction.

International Cultures (IL)

Aerospace Engineering (AERSP)

AERSP 1: Aerospace Explorer–First-Year Seminar
1 Credits
First-Year Seminar explores aerodynamics, structural mechanics, flight mechanics, rotorcraft systems, high performance computers, air/space propulsion, and space systems. AERSP 1 Aerospace Explorer–First-Year Seminar (1) (FYS)Aerospace Engineering deals with vehicles that fly – airplanes, sailplanes, jets, helicopters, rockets, satellites, the space shuttle, space stations, etc. Students with an interest in these subjects can learn more about the variety of challenges and opportunities in the aerospace field through the small-class environment of the Aerospace Explorer First-Year Seminar. An introduction to both the academic major and career paths in Aerospace Engineering, this seminar deals with the design, analysis and operation of aircraft and space vehicles. Students will learn about aerodynamics, structural mechanics, flight mechanics, rotorcraft systems, high performance computers, air-breathing propulsion, space propulsion, and space systems. The classes will include presentations by the Aerospace Engineering faculty, tours of the Aerospace Engineering laboratories, and presentations by student officers in the Penn State chapters of the American Institute of Aeronautics and Astronautics (AIAA) and the American Helicopter Society (AHS), as well as introductions to the use of scientific plotting, graphing, and analysis software.

First-Year Seminar

AERSP 55: Space Science and Technology
3 Credits
The science and technology of space exploration and exploitation; physical principles; research and development; history, space policy, and social implications.

Cross-listed with: STS 55
Bachelor of Arts: Natural Sciences
Bachelor of Arts: Social and Behavioral Sciences
General Education: Natural Sciences (GN)

AERSP 97: Special Topics
1-9 Credits/Maximum of 9
Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

AERSP 204: Flight Vehicle Design and Fabrication I
2 Credits/Maximum of 8
Integrated project management, design, fabrication, testing, and flight evaluation of an advanced composite flight vehicle.

Honors

AERSP 301: Aerospace Structures
3 Credits
Aerospace structural design concepts, flight safety. Stiffness, strength, stability of thin-walled structures under combined loads. Energy methods, finite element analysis. AERSP 301 Aerospace Structures (3) AERSP 301 covers essential topics in aerospace structures. The objectives of the course are to help students: 1) appreciate the roles that structures and structural materials play in aerospace vehicles; 2) understand general design concepts for aerospace structures: vehicles, components, and materials; 3) develop the analysis tools and skills needed to analyze the performance of aerospace structures; and 4) gain experience identifying, formulating, and solving aerospace structural engineering problems. AERSP 301 builds on structural mechanics topics covered in PHYS 211, EMCH 11 & EMCH 13 (or EMCH 210), and EMCH 215 & EMCH
It prepares students for study of advanced topics such as plates and shells, composites, structural stability, finite element analysis, structural dynamics, and aeroelasticity. It also provides students with the basic background needed to contribute effectively to multidisciplinary trade studies in vehicle design activities. AERSP 301 begins with an overview of the general features of flight vehicle structures, with emphasis on thin-walled members and advanced materials. Then, the implications of assured safety of flight for structural design are explored, leading to coverage of: load cases, flight envelopes, load factors, factors of safety, kinds of structural failures, and margins of safety. Topics in structural analysis proceed from an initial review of topics in elasticity, structural materials, and beam bending. Then, the deflection and stress responses of thin-walled beams under transverse shear and torsional loading are addressed. More than a third of the course is devoted to energy principles and the development of the finite element method of structural analysis. The course finishes with a treatment of the structural stability of beams and panels, a key topic with respect to the behavior of thin-walled aerospace structures.

**Prerequisite:** E MCH210 or E MCH213. Prerequisite or concurrent: AERSP313

AERSP 301H: Aerospace Structures I

3 Credits

Analysis of thin-walled beams subjected to combined loads, including bending, torsion, and shear; elastic stability; work and energy principles.

Honors

AERSP 304: Dynamics and Control of Aerospace Systems

3 Credits

Vibrations of single, multiple, and infinite degree-of-freedom systems; operational methods applied to aerospace vehicles; design of controllers.

**Prerequisite:** AERSP313, E MCH212

AERSP 305: Aerospace Technology Laboratory

3 Credits

Experiments in measurement systems, aerodynamics, aerospace structures, dynamics and control, and propulsion, technical report writing and presentations. AERSP 305 Aerospace Technology Laboratory (3) AERSP 305 is a junior-level experimental laboratory course in Aerospace Engineering. The purpose of this course is to expose students to the key principles and methods of experimentation as related to the field of aerospace engineering. Students learn the fundamentals of measurement techniques to determine quantities such as temperature, force, pressure, displacement, velocity, acceleration and strain in various laboratory situations. The course employs weekly "set-up" experiments that provide an opportunity for students to familiarize themselves with modern measurement techniques and gain valuable experience regarding the calibration and use of aerospace engineering research equipment. Students are expected to apply their knowledge of mathematics, science, and engineering in order to complete successfully the experiments encountered in the laboratory. The subsequent interpretation and analysis of the laboratory data requires the use of standard engineering tools and practices. Students work in lab groups to process data and then identify, formulate, and solve engineering questions associated with the experimental results. Throughout the semester, students communicate their knowledge and understanding of the course material through a series of class assignments, written technical reports, and one final exam. Because writing and revising laboratory reports significantly enhances the understanding and interpretation of the research data, this course is "writing-intensive." As such, students are expected to improve their writing skills as they gain experience writing abstracts, informal reports and formal reports. Peer review of reports helps students to recognize good writing, and to learn how to provide constructive criticism. The course instructor provides written feedback for revised formal reports, and the quality of writing is a factor in determining final grades.

**Prerequisite:** Prerequisite or concurrent: AERSP301, AERSP311, ENGL 202C

Writing Across the Curriculum

AERSP 306: Aeronautics

3 Credits

Lift and drag characteristics of aircraft; propulsion systems; airplane performance; introduction to stability and control.

**Prerequisite:** AERSP311, AERSP313

AERSP 308: Mechanics of Fluids

3 Credits

Kinetics and dynamics of fluids; perfect fluid theory using complex variables; introduction to viscous flow theory; fundamentals of compressible flow.

**Prerequisite:** E MCH212 or E MCH212H; MATH 251

AERSP 309: Astronautics

3 Credits

Introduction to space and space flight; laws of particle mechanics; orbits and trajectories; space vehicles and propulsion. AERSP 309 Astronautics (3) This course, required for aerospace engineering majors, focuses primarily on the dynamics of spaceflight, including both orbital and attitude (orientation) motion of spacecraft. Topics include: three-dimensional rotational kinematics (direction cosine matrices, vector components in different coordinate systems, Euler angles, the angular velocity vector, and velocity and acceleration in different reference frames), three-dimensional particle dynamics (Newton's laws of particle motion, energy, angular momentum, and systems of particles), two-body orbital mechanics (Newton's law of universal gravitation, the orbit equation, conic sections and orbit terminology, Kepler's equation, classical orbital elements, and representations of satellite position and velocity), orbital maneuvers and transfers (impulsive maneuvers, Hohmann transfers, simple inclination changes, and relative motion between spacecraft), rigid-body dynamics (angular momentum and energy, the inertia matrix, principal-axis system, Euler's equations of rigid-body motion, torque-free motion, and effects of external torques), rocket performance (the rocket equation, specific impulse, estimating propellant requirements for a mission, and a survey of propulsion technology), and the space environment (standard atmosphere, simple radiative heat-transfer analysis, the Van Allen radiation belts, meteors and debris hazards). The course relies upon a sound understanding of mechanics, matrix algebra and vector calculus. Assignments include analytical and numerical problems, some of which require computer programming.

**Prerequisite:** E MCH212, MATH 250; CMPSC201 or CMPSC202
AERSP 309H: Astronautics
3 Credits
Introduction to space and space flight; laws of particle mechanics; orbits and trajectories; space vehicles and propulsion.
Honors
AERSP 311: Aerodynamics I
3 Credits
Fluid statics and kinematics; fluid dynamics of inviscid and viscous flows; Navier-Stokes equations; introduction to boundary layers. AERSP 311 Aerodynamics I (3) This is a first course in incompressible inviscid and viscous flows. It includes an introduction to fluids, fluid statics and hydrostatics. Fluid kinematics, including Eulerian versus Lagrangian viewpoint, steady versus unsteady flows, volume and mass flow rates, vorticity and circulation, and streamlines are described. Derivation of the governing equations for the conservation of mass, momentum and energy is presented. Dimensional analysis is covered. Potential flow with and without the effects of viscosity is analyzed. A derivation and exact solutions of the Navier-Stokes equations are given and boundary layers are introduced. This is the first of a two course sequence in aerodynamics, where both courses are required for senior-year propulsion and design courses. Evaluation of student performance will be by two midterms exams worth approximately 25% each, a final exam worth approximately 35% and weekly homework assignments worth approximately 15%.
Prerequisite: E MCH212, MATH 250, CMPSC201 or CMPSC202
AERSP 312: Aerodynamics II
3 Credits
Fluid mechanics of viscous and compressible flows, laminar boundary layers, turbulent flows, isentropic flows, shock waves, supersonic life and drag. AERSP 312 Aerodynamics II (3) Exact solutions of the Navier-Stokes equations for unsteady flow. Boundary layers solved by the methods of Blasius, Falkner-Skan and Thwaites. Boundary layer stability and transition to turbulence. Turbulent flow and solution methods. Fluid flow measurement techniques and numerical methods. Derivation of the governing equations for the conservation of mass, momentum and energy for compressible flow. Steady one-dimensional isentropic flow. Normal, traveling and oblique shock waves. Compressible flow with area change and converging-diverging nozzle flows. Prandtl-Meyer expansions and supersonic life and drag. One-dimensional flow with friction or heat transfer. Unsteady and linearized compressible flow. Introduction to the method of characteristics. This is the second of a two course sequence in aerodynamics and is a prerequisite for senior level courses in propulsion and design. Evaluation of student performance will be by two midterms exams worth approximately 25% each, a final exam worth approximately 35% and weekly homework assignments worth approximately 15%.
Prerequisite: AERSP311, AERSP313, M E 201
AERSP 313: Aerospace Analysis
3 Credits
Mathematical methods applied to aerospace engineering: Fourier series, ordinary and partial differential equations, complex variables, numerical methods, data analysis. AERSP 313 Aerospace Analysis (3) This course is designed to reinforce the mathematical concepts learned in the prerequisite mathematics and computer science courses and to present new mathematical material that is necessary for aeronautics, astronautics, dynamics and control, and fluid dynamics analysis. In practice, analytical and numerical approaches to problems solving are complementary, hence, this course will emphasize a combined analytical and numerical treatment.
Prerequisite: MATH 220, MATH 230, MATH 250; CMPSC201 or CMPSC202
AERSP 397: Special Topics
1-18 Credits/Maximum of 18
Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
AERSP 399: Foreign Studies
1-12 Credits/Maximum of 12
Courses offered in foreign countries by individual or group instruction.
International Cultures (IL)
AERSP 401A: Spacecraft Design--Preliminary
3 Credits
Conceptual and preliminary design of a spacecraft, its constituent subsystems, and related systems, to satisfy a given set of specifications. AERSP 401A Spacecraft Design - Preliminary (3) AERSP 401A is the first of a two-semester sequence of senior capstone design courses. In this course, students will begin to learn the design process, complete a conceptual design, and to begin a preliminary design of a spacecraft, working in teams. This process is inherently multidisciplinary, requiring the use of engineering practices in such subjects as structures, dynamics, electrical and thermal systems, propulsion, controls, and information systems. In addition to the technical design content, this course seeks to enhance students' skills in verbal and written communications, ethical thinking, and the team approach to design, which is widely used in industry and government. Classes (115 minutes each, twice weekly) include lecture and time for team meetings. Students are evaluated on the technical merit of the designs (presented in written and oral reports), as well as their ability to function on a team.
Prerequisite: AERSP309. Prerequisite or concurrent: AERSP450
AERSP 401B: Spacecraft Design--Detailed
2 Credits
Detailed design of the constituent subsystems and related support systems for a spacecraft. AERSP 401B Spacecraft Design -- Detailed (2) AERSP 401B is the second of a two-semester sequence of senior capstone design courses. In this course, students work in teams, continuing the design process begun in AERSP 401A. This process is inherently multidisciplinary, requiring the use of engineering practices in such subjects as structures, dynamics, electrical and thermal systems, propulsion, controls, and information systems. In addition to the technical design content, this course seeks to enhance students' skills in verbal and written communications, and the team approach to design, which is widely used in industry and government. Classes (115 minutes each, twice weekly) include lecture and time for team meetings.
AERSP 402A: Aircraft Design -- Preliminary

3 Credits

Conceptual and preliminary design of an aircraft, its constituent subsystems, and related systems, to satisfy a given set of specifications. AERSP 402A Aircraft Design -- Preliminary (3) AERSP 402A is the first of a two-semester sequence of senior capstone design courses. In this course, students will complete the preliminary design for an aircraft such that it satisfies the assigned specifications. Students completing this course will have the ability to design a system, component, or process to meet desired needs in aircraft systems; they will have the ability to function on multi-disciplinary teams; and they will have the ability to identify, formulate, and solve engineering problems. In addition, students will have the background to help determine what the ethical responsibilities are to themselves, to employers, and to society. Classes (115 minutes each, twice weekly) include lecture and time for team meetings.

Prerequisite: AERSP 306. Prerequisite or concurrent: AERSP 413

AERSP 402B: Aircraft Design -- Detailed

2 Credits

Detailed design of the constituent subsystems and related support systems for an aircraft. AERSP 402B Aircraft Design - Detailed (2) AERSP 402B is the second of a two-semester sequence of senior capstone design courses. In this course, students will complete the detailed design for an aircraft, and all of its constituent and related support systems, such that it satisfies the assigned specifications. Students completing this course will have the ability to design a system, component, or process to meet desired needs in aircraft systems; they will have the ability to function on multi-disciplinary teams; and they will have the ability to identify, formulate, and solve the associated engineering problems. Classes (115 minutes each, twice weekly) include lecture and time for team meetings.

Prerequisite: AERSP 301, AERSP 402A

AERSP 404: Flight Vehicle Design and Fabrication II

3 Credits/Maximum of 12

Project management, design, fabrication, aerodynamic and structural testing, and flight evaluation of an advanced composite flight vehicle.

Prerequisite: AERSP 204H Honors

AERSP 405: Experimental Methods and Projects

3 Credits

Experimental methods involving a variety of aerospace engineering topics; teams of students focus on advanced measurement techniques and project engineering. AERSP 405 Experimental Methods and Projects (3) This is a senior-level elective laboratory course that builds on AERSP 305 "Aerospace Technology Laboratory." The first part of AERSP 405 addresses the engineering of typical data acquisition systems through a series of lectures and laboratory experiments. Data acquisition and processing are covered as they relate to a broad range of engineering experiments. Several sessions in the laboratory provide students with hands-on experience with data acquisition, followed by computer program exercises to complete the assignments. Initially the lectures are twice a week (75 minutes each). This activity comprises approximately 20% of the total course. The major portion of the course introduces students to "real-world" projects in engineering and laboratory research. Students work in teams to identify, formulate, plan and solve engineering problems associated with a design or system, the completion of an experiment, or an extensive computational simulation requiring a team of students. Teams of 2 to 4 students are assigned, following student input on preferences from a list of proposed projects. Students learn, through practice, the methodology of team project engineering. The teams each develop goals for the semester's project, performed following a careful work breakdown analysis with realistic time estimations and scheduling. Many of the projects involve the design and completion of an experiment. As part of the project, students will assemble, analyze and interpret relevant data, and prepare progress and final reports (written and oral). The reports should contain graphs that go with the text to provide the necessary data interpretation. The topics in the projects have application to a variety of research programs currently underway at Penn State. At the initiation of the project activity, lectures on principles of project planning including Gantt chart preparation, work breakdown structures and critical path considerations are presented. Common best practices for the preparation of project proposals, reports, presentations and general record keeping are discussed. Overall meetings with the course instructor become bi-weekly once the projects are underway. Many of the projects also have knowledgeable graduate student or faculty consultants to assist with project planning and implementation. Project consultants conduct occasional individual review meetings with each team. Much of the project coordination work is undertaken within the regularly scheduled hours for the course. The class meetings include a combination of informal presentations by the students and, occasionally, the instructor on important technical issues. Considerable class time is spent discussing the goals and progress of individual tasks, and each student gives several brief oral presentations.

Prerequisite: AERSP 305W

AERSP 407: Aerodynamics of V/STOL Aircraft

3 Credits

Rotary wing aircraft; VTOL and STOL performance; propeller-wing combinations; jet flap; high lift devices.

Prerequisite: AERSP 312

AERSP 410: Aerospace Propulsion

3 Credits

Prerequisite: AERSP 312

AERSP 410H: Aerospace Propulsion

3 Credits

Analysis and performance characteristics of reciprocating engine, turbo-jet, turbo-prop, turbo-fan, ram-jets, and chemical rockets. Aerothermodynamics of inlets, combustors, and turbomachinery. Honors
AERSP 412: Turbulent Flow
3 Credits
Homogeneous turbulence; spectral transfer of energy, viscous dissipation; turbulent shear flow: mixing-length theory, eddy viscosity, scaling laws, energy budget.

Prerequisite: one course in fluid mechanics

AERSP 413: Stability and Control of Aircraft
3 Credits
Static and dynamic stability and control of aircraft; open and closed loop systems.

Prerequisite: AERSP304, AERSP306

AERSP 420: Principles of Flight Testing
3 Credits
In-flight and analytical studies of airplane performance, stability, and control; reduction of data; instrumentation; flight test techniques.

Prerequisite: AERSP306

AERSP 423: Introduction to Numerical Methods in Fluid Dynamics
3 Credits
Finite difference methods applied to solving viscous/inviscid fluid dynamics problems, error control, numerical stability.

Prerequisite: AERSP312 or M E 320; MATH 250 or MATH 251; CMPSC201 or CMPSC202

AERSP 424: Advanced Computer Programming
3 Credits
Engineering and scientific programming topics: object oriented programming, parallel programming, and various modern languages (e.g. C++, Java, and Ada). AERSP 424 Advanced Computer Programming (3) This course presents an advanced view of computer programming, mainly using Java, C++, and Ada95. The use of current operating systems (e.g. Linus and Unix) and compilers (e.g. gcc) will also be presented. Object Oriented Programming will also be discussed in detail. Object Oriented Programming is quite different than functional or procedural programming, and it is difficult to learn on your own. The differences and similarities between Java and C++ and Ada95 will also be discussed. Hands-on programming will be a key part of the course. This course is one of the Core Courses for the Graduate Minor in High Performance Computing, and will also be a technical elective in Aerospace Engineering.

Prerequisite: CMPSC201 or CMPSC202; MATH 220

AERSP 425: Theory of Flight
3 Credits
Advanced wing and airfoil theory, conformal mapping, slender body theory.

Prerequisite: AERSP306

AERSP 430: Space Propulsion and Power Systems
3 Credits
Analysis and performance of chemical and nuclear rockets, electric propulsion systems. Introduction to solar, chemical, thermoelectric, and nuclear power sources.

Prerequisite: AERSP410 or M E 432

AERSP 440: Introduction to Software Engineering for Aerospace Engineers
3 Credits
Software engineering for safety- and mission-critical systems, including requirements, management, processes, designs, programming, validation/ verification, and other aspects of software development. AERSP 440 Introduction to Software Engineering for Aerospace Engineers (3) This course is an introduction to software engineering. Software engineering includes all aspects of professional software production, and is especially important for safety-critical and mission-critical software. It includes documentation, management, processes, requirements, design models, computer programs, validation, verification, and other aspects of the development process. Aerospace systems, including aircraft, spacecraft, onboard avionics, ground-based systems, flight simulators, and air transportation systems, rely heavily on software. Software is a major cost of all aerospace systems. For example, the Boeing 777 has more than 1000 onboard processors and more than 4 million lines of software which is primarily written in Ada. The F/A-22 fighter has more than 2 million lives of software onboard, and much of this is Ada also. Aerospace systems also demand a level of reliability far beyond that of most other systems, which means the software must be designed using rigorous mission-critical and safety-critical procedures, which makes the software quite unique compared to most other software. The FAA and DOD are both involved in certifying aircraft software, for example, through the DO-178B and DOD-2168 standards. This course is required option in Aerospace Engineering (take one of AERSP 440, EE 305, or EE 210). If not taken to satisfy that requirement, it can be used as a technical elective. This course is a required option in Aerospace Engineering (take one of AERSP 440, EE 305, or EE 210). If not taken to satisfy that requirement, it can be used as a technical elective.

Prerequisite: CMPSC201 or CMPSC202

AERSP 450: Orbit and Attitude Control of Spacecraft
3 Credits
Principles of mechanics and vector analysis applied to basic concepts of satellite motion and control, rocket ballistics, and gyroscopic instruments.

Prerequisite: AERSP304, AERSP309

AERSP 450H: Orbit and Attitude Control of Spacecraft
3 Credits
Principles of mechanics and vector analysis applied to basic concepts of satellite motion and control, rocket ballistics, and gyroscopic instruments.

Honors
AERSP 460: Aerospace Control Systems

3 Credits

Design and analysis of feedback control systems for aerospace applications; stability, root locus, time- and frequency-domain, state-space methods. AERSP 460 Aerospace Control Systems (3) This course is an introduction to the design and analysis of feedback control systems as applied to aerospace systems. The course covers control theory that is commonly used in the aerospace industry and presents practical applications of this theory to aerospace systems. The course does not emphasize rigorous mathematical derivation, but instead emphasizes the application of control theory. It provides a comprehensive overview of classical control theory and single-input/single-output (SISO) design methods. The course also presents an introduction to modern control theory and multi-input/multi-output (MIMO) design methods. Aerospace examples and applications are emphasized throughout the course. The course builds upon a required junior-level course in system dynamics and controls (AERSP 304), which provides students with basic dynamic system theory and a brief introduction to feedback control. The course also supplements required senior-level courses in either aircraft or spacecraft dynamics (AERSP 413 and 450) which provide background on vehicle dynamics. AERSP 460 provides an additional level of depth in dynamics and control theory, and prepares students for entry-level work or graduate studies involving the design of automatic control systems for aircraft and spacecraft.

Prerequisite: AERSP304

AERSP 470: Advanced Aerospace Structures

3 Credits

Design and analysis of aerospace structures. Plates and sandwich panels; composite materials; structural dynamics; aeroelasticity; damage tolerance. AERSP 470 Advanced Aerospace Structures (3) AERSP 470 covers important topics in aerospace structures beyond basic stress and deflection analysis of thin-walled beams. The objectives of the course are to help students: 1) appreciate the roles that structures and structural materials play in aerospace vehicles; 2) understand general design concepts for aerospace structures: vehicles, components, and materials; 3) develop the analysis tools and skills needed to analyze the static and dynamic performance of aerospace structures; and 4) gain experience identifying, formulating, and solving aerospace structural engineering problems. AERSP 470 builds on structural, dynamics, and aerodynamics topics covered in PHYS 211, EMCH 11 & EMCH 13 (or EMCH 210), EMCH 215 & EMCH 216, AERSP 301, AERSP 306, and AERSP 304. It prepares students for entry-level work or graduate study in the analysis and design of aerospace structures. It also provides students with the strong background needed to contribute effectively to multidisciplinary trade studies in vehicle design activities. AERSP 417 begins with a review of the general features of flight vehicle structures and aerospace structural design concepts. Then, the deflection and stress responses of flat plates and sandwich panels under lateral and in-plane loading are addressed. About a third of the course is devoted to the behavior of advanced composite panels, and another third to structural dynamics and aeroelasticity. The course finishes with treatments of joining and damage tolerance, both key topics with respect to the design of aerospace structures.

Prerequisite: AERSP301. Prerequisite or concurrent: AERSP304, EMCH315

AERSP 473: Composites Processing

3 Credits

An introduction to the principles of mechanics governing manufacturing, computer-aided design, and testing of composite materials and structures.

Prerequisite: EMCH471

Cross-listed with: EMCH 473

AERSP 490: Introduction to Plasmas

3 Credits

Plasma oscillations; collisional phenomena; transport properties; orbit theory; typical electric discharge phenomena.

Prerequisite: E E 330 or PHYS 467

Cross-listed with: EE 471, NUCE 490

AERSP 492: Space Astronomy and Introduction to Space Science

3 Credits

The physical nature of the objects in the solar system; the earth's atmosphere, ionosphere, radiation belts, magnetosphere, and orbital mechanics.

Prerequisite: E E 330 or PHYS 400

Cross-listed with: EE 472

AERSP 494: Aerospace Undergraduate Thesis

1-12 Credits/Maximum of 12

Individual problem investigations reported in written thesis and seminar lectures. Cooperative research with faculty guidance on topics of current interest.

Prerequisite: seventh-semester standing

AERSP 494H: Aerospace Undergraduate Thesis

1-3 Credits/Maximum of 6

Individual problem investigations reported in written thesis and seminar lectures. Cooperative research with faculty guidance on topics of current interest.

Prerequisite: seventh-semester standing Honors

AERSP 496: Independent Studies

1-18 Credits/Maximum of 18

Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

AERSP 496H: Independent Studies

1-18 Credits/Maximum of 18

Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Honors
African American Studies (AFAM)

AFAM 3: Scholarship and Community
1 Credits

Introduction to college life for new students in a designated residential community to help them optimize their Penn State experience.

Prerequisite: students must be participating in the Pennypacker Experience to take this course.

AFAM 83: First-Year Seminar in African American Studies
3 Credits

Cultural, philosophical, economic, political, and global dynamics of the Black experience in the United States and the Diaspora.

Bachelor of Arts: Humanities
International Cultures (IL)
United States Cultures (US)
First-Year Seminar
General Education: Humanities (GH)

AFAM 100: Living While Black: Themes in African American Thought and Experience
3 Credits

What it means to be Black in America by engaging with questions about identity and authenticity, freedom and unfreedom, radicalism and reform, gender and sexuality, and the role of music in African American life.

AFAM 100 Living While Black: Themes in African American Thought and Experience (3) This course introduces some of the major themes that have emerged from the experiences, expressions, and reflections of African-descended peoples in the Americas. Exploring these themes will reveal that black life is a distinctive phenomenon within the context of the larger historical and cultural narrative of the Americas. The course will use texts from major African American intellectuals and artists to uncover the major issues that have shaped black life in the Americas. Some of the themes and writers explored include "identity and authenticity" as illustrated in the works of W.E.B. DuBois and Audre Lorde; "freedom and unfreedom" using the works of Frederick Douglass and Angela Davis; "radicalism or reform" as expressed in the works of Booker T. Washington, Bayard Rustin, David Walker, and Claudia Jones; "gender and sexuality" as expressed in the work of John Oliver Killens, bell hooks, and Francis Ellen Watkins Harper; "songs in the key of black life" as seen in the work of Ralph Ellison, Farah Jasmine Griffin, Amiri Baraka, and Tricia Rose; "love, the spirit, and the word;" in the works of James Cone, Toni Morrison, Nikki Giovanni, and James Baldwin; and "the black planet," as described in the writings of Langston Hughes, Marcus Garvey, and Lorraine Hansberry. These authors represent the key debates in African American life and thought and illustrate the wide range of intellectual, cultural, political, and artistic expression that has defined black life in modern America. This course provides a beginning foundation for understanding the various meanings of the lived experiences of Black people in the Americas in the twentieth century.

Bachelor of Arts: Social and Behavioral Sciences
United States Cultures (US)
General Education: Social and Behavioral Sciences (GS)

AFAM 101: The African American Woman
3 Credits

The sociological, historical, and political experiences of African American women, their roles and contributions to society.

Bachelor of Arts: Humanities
United States Cultures (US)
General Education: Humanities (GH)

AFAM 102: Women of Color: Cross-Cultural Perspective
3 Credits

Global examination of value systems of women of color; attention to minority ethnic groups in the United States and developing countries.

Cross-listed with: WMNST 102
International Cultures (IL)
General Education: Humanities (GH)

AFAM 103: Racism and Sexism
3 Credits

Critical analysis of the structure of race and gender in the contemporary United States.

Cross-listed with: SOC 103, WMNST 103
Bachelor of Arts: Social and Behavioral Sciences
United States Cultures (US)

AFAM 105N: Afro-Latin America: Race and Revolution
3 Credits

Too often the history of race in the Americas is overly defined by concepts of racial identity and race relations in the United States. When examined quantitatively, fewer than five percent of the approximately 10 million slaves who survived the Middle Passage arrived in what we know as the United States of America. This course will examine the impact of slavery throughout the Americas, from the establishment of the plantation in Brazil through the impact of Black migration throughout...
the Americas today. Through lecture and discussion, we will identify patterns of racial identity and participation in the formation of the Latin American nation state that will give us a more nuanced understanding of both race and nation in the Americas. We will examine the development of the modern plantation from the sixteenth to the nineteenth century as well as the role of urban slavery in this era throughout Latin America. We will study the various paths to abolition with a particular focus on the Haitian Revolution and the common practice of military service among slave populations during the early nineteenth century struggles for Latin American independence. Additionally, we will look at the comparative abolition of slavery in the United States and Latin America, the role of slaves and free blacks in Central America, as well the role of race in the tensions between Haitians and Dominicans on the island of Hispaniola. The second half of the course will move to an examination of contemporary black politics, patterns of anti-black racism and state violence, and the emergence of new social movements for racial, gender, and economic justice in the Americas. This course meets the criteria for General Education designation in the B.A. fields of Humanities (GH), Social and Behavioral Sciences (GS), and International Cultures (IL).

Bachelor of Arts: Humanities
Bachelor of Arts: Other Cultures

AFAM 110: Introduction to African American Studies

3 Credits

An introductory survey of African American Studies practice and scholarship, focused on the major methods, figures, texts, and debates that define the field.

United States Cultures (US)
General Education: Humanities (GH)

AFAM 114N: Race, Gender and Sport

3 Credits

In 1969, sociologist Harry Edwards declared that a surge of protest among African American athletes marked "the newest phase of the black liberation movement in America." Nearly five decades later, athletes such as Richard Sherman, Serena Williams, and Michael Sam proved that the relationship between race, gender, and sport remains complicated, and that athletes continue to offer meaningful contributions to a variety of struggles for liberation. This course addresses the race, gender and sport relationship from two complementary angles. First, we will examine the ways that sport gives meaning to racial and gender identity. As concepts that shift over time, race and gender derive their influence from prevailing forms of scientific reason, social attitudes, and cultural mythologies. From Jack Johnson to Serena Williams, sport has found and intervened itself in each of these contexts, particularly as society and culture produce marginal or subordinate identities. We will consider, for example, how and why sport posits the differences between men and women according to assumptions about physical strength, and how and why sport reinforces dubious assumptions regarding the physical superiority and cognitive inferiority of black athletes. Second, we will examine the ways that sport works as a setting in which political struggles around race and gender are imagined and expressed. From the 1968 stand by black track and field Olympians, to Billie Jean King’s 1973 famous "Battle of the Sexes," to tennis player Venus Williams’ achievement of gender pay equity in 2007, to sports figures protesting on behalf of the Movement for Black Lives in 2016, athletes have long placed their social identities at the center of political speech. Finally, we will consider the historical trajectory of a narrative about the "activist athlete," which once held that athletes had abdicated political obligations in pursuit of wealth, but which now seems to herald athletes’ return to the nation’s political scene in examples like LeBron James and Colin Kaepernick. This course will address sport’s potential to rethink, resist, or challenge race and gender relations and other social hierarchies.

AFAM 126: The Popular Arts in America: The History of Hip-Hop

3 Credits

An examination of the roots, development, and significance of hip-hop in our culture.

Cross-listed with: INART 126
United States Cultures (US)
General Education: Arts (GA)

AFAM 132: Afro-Hispanic Civilization

3 Credits

A general introduction to human and cultural elements of African origin in Spanish- and Portuguese-speaking countries of Latin America. SPAN 132 / AFR 132 / AFAM 132 Afro-Hispanic Civilization (3) (IL) (BA) This course meets the Bachelor of Arts degree requirements. The nations and peoples of Latin America have a unique, interesting history and cultural heritage that are rooted in the traditions, beliefs, experiences, values, and struggles of Native American, European, African and other populations. This course focuses on the presence and participation of African peoples and their descendants in the formation and development of societies and cultures in representative areas of the Caribbean, South America, and Central America and on the evolution, diversity, and richness of the African heritage therein. Course content includes the African background, the experience and impact of slavery, the social, cultural, and economic heritage of slavery, the role of race in Latin America, and Afro-Hispanic intellectual, literary, and artistic developments (e.g., aspects of folklore, music). The course aims to provide students with a general introduction to human and cultural elements of African origin within the Spanish- and Portuguese-speaking nations of the Americas so that they may be more knowledgeable of the meaning, significance and widespread influence of the African diaspora. It proposes to provide the student with a better understanding of Africa’s contribution to Latin American identity, diversity, culture, and development, to promote
appreciation for the values and practices of other cultures, and greater awareness of the relations between the nations of the region and the United States.

Cross-listed with: AFR 132, SPAN 132
Bachelor of Arts: Humanities
International Cultures (IL)

AFAM 139: African American Literature

3 Credits

This course offers an introduction to African American literature from the early writings of slavery and freedom to the works of present-day African American authors. We will explore the major themes, literary traditions and narrative strategies that merge and shape this body of literature, considering, for example, the influence of double-consciousness, questions of authenticity and performance, representations of blackness and whiteness, the significance of place, and the persistent presence of folklore and vernacular traditions. Our analyses of texts will be attentive to the intersections of race, class, gender, and sexuality, and by the end of the course you will be able to discuss fluently several literary techniques and strategies including irony, satire, narration, voice, characterization, imagery, style and setting. We will situate texts in their various historical and cultural contexts, and you will be introduced to key literary concepts and terms that should inform your reading and writing about these texts. You will learn how to analyze literature, do close and careful readings of texts and write persuasively about literary works. Students will engage in thoughtful, creative and open-minded class discussions, analyze literature and do close and careful readings of texts.

AFAM 141N: African American Read-In Engaged Learning Experience

1-3 Credits/Maximum of 6

This course will allow students to study African American literature, culture, history, and arts in connection with an annual public event, the African American Read-In (AARI). The AARI, promoting literacy and appreciation of African American literature, is a national event established in 1990 under the auspices of the National Council of Teachers of English. It has become a regular feature of Black History Month celebrated by community, neighborhood, and church groups as well as schools and institutions of higher education throughout the United States and elsewhere on a given Sunday and Monday in February, attracting more than a million participants annually. This course offers students an engaged learning experience in which they will produce original intellectual and artistic content to be presented publicly at an AARI event on campus. Students will study texts from a range of historical periods and/or genres, and thus gain a solid introduction to the African American literary tradition. At the same time, the primary organizing principle of the course will be a particular theme that both allows a broad and coherent overview of a significant cultural or historical topic and engages issues of cultural diversity in the United States. The specific theme, thus, will bring the study of African American literature into a broader interdisciplinary context that intersects with African American culture, history, identity, and the struggle for equality. Students will study texts that relate to this annual theme and participate in a relevant field trip (museum, theater, cultural site, library, etc.) to deepen their understanding of the significance and contexts of social, historical, cultural, artistic of these materials and this theme. They will then develop this knowledge through creative and critical engagements into exhibitions, presentations, or performances to communicate their insights about a particular author, text, or topic in the African American literary tradition. As shapers of the AARI program on their campus, class members will also have a voice in designing and planning the AARI as well as a stake in its overall success. As this course necessarily spans semesters, students who enroll in the Fall course will be expected to enroll in the Spring course in order to present their projects at the AARI in February. Only students who were enrolled in the Fall course will be permitted to enroll in the Spring, as it is the culmination of the same course.

AFAM 145: African American Religions and Spirituality

3 Credits

History and significance of the religious dimension of the Black American struggle for equality from enslavement to the contemporary period.

Cross-listed with: RLST 146
Bachelor of Arts: Humanities
International Cultures (IL)
United States Cultures (US)
General Education: Humanities (GH)

AFAM 146: The Life and Thought of Martin Luther King, Jr.

3 Credits

A survey of the civil rights leader including his religious beliefs, intellectual development, and philosophy for social change.

Cross-listed with: RLST 146
Bachelor of Arts: Humanities
United States Cultures (US)
General Education: Humanities (GH)

AFAM 147: The Life and Thought of Malcolm X

3 Credits

The life of Malcolm X/El Hajj Malik El Shabazz (1925-1965) and his social, political, economic, and moral thought. AFAM 147 / RLST 147 The Life and Thought of Malcolm X (3) (GH:US)(BA) This course meets the Bachelor of Arts degree requirements. This course will examine in-depth the life, speeches, and thoughts of Malcolm X/El Hajj Malik El Shabazz. While the Autobiography will be a major source, we will also use other sources to develop an understanding of the philosophy and thought of Malcolm X. We will explore the social, economic, political,
cultural, religious, moral, and spiritual context of America in general and of African Americans in particular. We will examine Malcolm X's influence on the period in which he lived and since his assassination. We will compare and contrast his view on issues of race, culture, politics, education, crime, human rights, civil rights, morality, and economics with those of other African American leaders and with the prevailing views of most Americans on those subjects. We will devote a large portion of the course to the examination of the social movements that impacted on Malcolm and those that he influenced. The speeches of Malcolm X and the writings about Malcolm X are instructive and will be utilized along with other documents. Videotapes and audiotapes will also be employed as instructional materials. Students are expected to be active participants in the learning/teaching experience. Students are required to participate in class discussions centered on the readings and related topics. There will be a written midterm examination and a written final examination. Students are expected to complete an individual research project related to the course and write a paper on that research as well as to participate in a collaborative group project of their choosing on a subject related to the class. This course will count in the supporting courses category of the major and minors in African/African American studies. It will also fulfill credits in the Religious Studies Program. It may also be used to fill GH and US requirements.

AFAM 197: Special Topics

1-9 Credits/Maximum of 9

Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

AFAM 207N: Jazz and the African American Experience

3 Credits

The history and evolution of jazz is a significant cultural manifestation of the African American experience. The music and its artists provide a lens through which to examine questions surrounding the African American experience and what it means to be Black in America, engaging with questions about identity, authenticity, freedom, activism, gender, and sexuality, as well as the role of music in African American life. Drawing upon curricular elements from MUSIC 7, Evolution of Jazz, and AFAM 100, Living While Black: Themes in African American Thought and Experience, this course traces the history of jazz through an examination of the lives and art of thirty great jazz artists, juxtaposed with an examination of seminal writings of twenty African American poets, playwrights, novelists, critics, activists, philosophers, and scholars. Preliminary objectives will include basic musical information associated with tonality and with jazz. The main objectives of the course are: to explore the antecedents of jazz and the social-historical contexts in which they developed; to explore the pioneering artistry of selected twentieth-century jazz musicians, tracing the evolution of jazz styles in the process; to delve into the lives of these jazz artists and the social-historical contexts in which they lived; to explore the writings of historically contemporary African Americans, which articulate many of the major issues that have shaped black life in America; to enhance appreciation for the art of jazz and for the musical and literary contributions of African Americans; to encourage reflection, empathy, and a greater understanding of the cultural-historical circumstances that have informed the lives and art of African Americans. The narrowing of scope allows for a more detailed examination of the selected jazz artists, their music, and their lives. Similarly, the selected writings will allow students to reflect on the relationships and connections between these writings and the artistry and life experiences of the selected jazz artists. These objectives will be met by utilizing an interactive, multimedia online curriculum, including demonstration videos, a virtual keyboard, music notation files (e.g., Sibelius), audio recordings, audio-video recordings, selected readings, open forums, and discussion boards. Evaluation methods will include quizzes, tests, open forums, discussion boards, and reflection papers. Students will receive GA and GS credit for this course, as well as US designation. The course will not satisfy any requirements for the major or minor in music. All pieces, excerpts, examples, videos, and texts will be made available to students online.

AFAM 208: Workshop: Theatre in Diverse Cultures

3 Credits

A performance-oriented class which explores the historic and contemporary theatrical works of various culturally diverse peoples. THEA 208 / AFAM 208 Theatre Workshop in Diverse Cultures (3) (GA;US;IL) (BA) This course meets the Bachelor of Arts degree requirements. Theatre Workshop in Diverse Cultures is a performance-oriented class that aims to introduce students to the broad cultural diversity that exists in artistic expression. The class will focus on several plays throughout the semester that will represent cultural, ethnic, and gender diversity as well as different literary styles. Students will be exposed to various cultures by working on plays created by artists from those cultures. The course will concentrate on a specific playwright, culture, or region, such as plays from the Caribbean. Students will be required to read, study, analyze, and perform plays from the genre. For example, the class may focus on the works, life, and philosophy of August Wilson and read Joe Turner's Come and Gone, Seven Guitars, Piano Lesson, and Fences. The class may explore Asian styles such as Noh Theatre and Asian American works by D. H. Hwang or work by Nigerian playwright and Nobel Prize winner Wole Soyinka. The presentation of these plays will be a principle part of the class, but the reading and
discussion of the material will be as important. Students will participate in some capacity with the production of these plays in areas such as stage management, dramaturgy, sets and props, lights, sound, costumes, house management, publicity, and acting. These pieces will be performed in class, in workshop, and occasionally for the general public. Students will work as an ensemble and become acquainted with basic acting and theatre techniques. The course objectives are: 1) to develop and enhance students' appreciation for the discipline and commitment required for multicultural theatrical presentations 2) to help to sensitize all students to the broad cultural diversity in artistic expression 3) to provide students with an introductory engagement with drama. THEA 208 / AFAM 208 serves as a primary selection for students pursuing the Theatre minor.

AFAM 210: Freedom's First Generation: African American Life and Work, 1865 to World War II

3 Credits
The course will explore the context and events that shaped African American life over the period 1896-1932. AFAM 210 / HIST 210 Freedom's First Generation: African American Life and Work, 1865 to World War II (3) (GH;US;IL)(BA) This course meets the Bachelor of Arts degree requirements. This course focuses on the emergence of the Atlantic World Black Diaspora from the 15th through the 19th centuries with the United States as its central focus. We begin with a brief discussion of African societies at the beginning of the Transatlantic Slave trade, discussing the various ethnicities, cultures, societies, and states. We then discuss the emergence of the TST and its consequences for the forging of the modern world and its centrality to the rise of modern capitalism. The forced migration of over 10 million people of African descent resulted in a massive dispersal of various cultures, ideas, religious systems, foods, crops, and ideologies—all of which formed the Black Diaspora. We look at the centrality of these various cultures and ideas to the successful rise of the American colonies, including the skills that Africans brought to the emerging staple crop economies, the knowledge of plants, foods, crops, and healing practices. We look at both the evolution of African slave societies in the North and the South, as well as the rise of Free Black communities. We use documents and readings to understand the multiple contributions of African Americans to science, literature, and music. Of major importance is the formation of slave communities, kinship networks, the rise of an African American religion, and various forms of resistance to slavery that included running away, daily forms of resistance, and actual slave revolts. We also discuss the rise of a special form of "slave politics" that shapes evolving notions of freedom. In addition to discussions of southern and northern slave society, we also look at the role of free blacks in the antebellum reform movements, especially the abolitionist movement. The course concludes with the coming of the Civil War and a discussion of the multiple ways that African Americans played a role in accelerating the road to war and in facilitating their own emancipation.

AFAM 211: Slavery and Freedom in the Black Atlantic

3 Credits
The course will explore the history and role of African and African-descent people in Africa, the Americas, and Europe. AFAM 211 / HIST 211 Slavery and Freedom in the Black Atlantic (3) (GH;US;IL)(BA) This course meets the Bachelor of Arts degree requirements. This course focuses on the emergence of the Atlantic World Black Diaspora from the 15th through the 19th centuries with the United States as its central focus. We begin with a brief discussion of African societies at the beginning of the Transatlantic Slave trade, discussing the various ethnicities, cultures, societies, and states. We then discuss the emergence of the TST and its consequences for the forging of the modern world and its centrality to the rise of modern capitalism. The forced migration of over 10 million people of African descent resulted in a massive dispersal of various cultures, ideas, religious systems, foods, crops, and ideologies—all of which formed the Black Diaspora. We look at the centrality of these various cultures and ideas to the successful rise of the American colonies, including the skills that Africans brought to the emerging staple crop economies, the knowledge of plants, foods, crops, and healing practices. We look at both the evolution of African slave societies in the North and the South, as well as the rise of Free Black communities. We use documents and readings to understand the multiple contributions of African Americans to science, literature, and music. Of major importance is the formation of slave communities, kinship networks, the rise of an African American religion, and various forms of resistance to slavery that included running away, daily forms of resistance, and actual slave revolts. We also discuss the rise of a special form of "slave politics" that shapes evolving notions of freedom. In addition to discussions of southern and northern slave society, we also look at the role of free blacks in the antebellum reform movements, especially the abolitionist movement. The course concludes with the coming of the Civil War and a discussion of the multiple ways that African Americans played a role in accelerating the road to war and in facilitating their own emancipation.

Prerequisite: AFAM 100 or HIST 003 or HIST 020 or HIST 021 or HIST 152
Cross-listed with: HIST 211
Bachelor of Arts: Humanities
International Cultures (IL)
United States Cultures (US)
General Education: Humanities (GH)
Republican Party pursued a new state’s rights philosophy that fused with a growing libertarianism that rejected a strong federal government and was hostile to any efforts to address social justice issues in American society. We discuss the efforts of the New Right Republicans and the newly formed Democratic Leadership Conference of the Democratic Party to dismantle many of the achievements of the Civil Rights Movement, focusing on welfare reform, new sentencing laws, the privatization of the prison system and public education, all changes that forged a New Jim Crow society. We look at the role of black elected officials in this process, discussing the various differences between black members of the Democratic Leadership Conference, and those of the Progressive Black political groups. There were major political achievements in terms of more black elected officials, the Jesse Jackson Presidential Campaign, and the election of Barack Obama. However, the late 20th and early 21st Centuries were marked by growing class and racial inequality, perhaps made most visible by Hurricane Katrina when the entire world saw the consequences of decades of conservative policies that favored the rich over the poor. We discuss the popular notion of a post-racial and color blind society and the contradictions it embodies. The course ends with a discussion of newly emerging grassroots efforts to address issues such as environmental racism, school inequality and the schoolhouse to jailhouse track, police brutality, and the prison industrial complex. We discuss how African Americans today may build on the struggles and insights from the past to forge a stronger and more just future.

AFAM 213: African American Women’s History

3 Credits

This course examines the social, political, and economic history of African American women in the United States from slavery to the present.

Cross-listed with: HIST 213, WMNST 213

United States Cultures (US)

General Education: Humanities (GH)

Writing Across the Curriculum

AFAM 226N: Critical Approaches to Hip-Hop

3 Credits

This course will examine the politics of hip-hop art and culture. To do so, we will place hip-hop in broad historical context and trace its aesthetic and cultural roots from Africa to Jamaica to 1970s New York City and then forward to 1980s gangsta rap and former President Barack Obama’s iPod. We will think through the implications of hip-hop’s addiction to Italian-American mobsters, bling, and all-things keepin’ it real. We will also search for hip-hop’s political foundations in funk records, 1960s community organizing, and poetry of the Harlem Renaissance. All the while, we will analyze the varieties of hip-hop politics by paying close attention to how hip-hoppers vie for authenticity, recognition, and power through cultural practices—b-boying/girling, graffiti art, emceeing, djing, e.g.—at odds with the State, inequality, and injustice. We will also situate hip-hop politics within the ongoing history of American social movements. To avoid over-romanticizing, we will equally examine hip-hop’s appetite for conspicuous consumption, misogyny, homophobia, trappin’, and criminality. A deep understanding of hip-hop politics, then, requires examining its contradictions as well as the ways race, class, gender, sexuality, and geography shape hip-hop—and therefore American-culture, art, and identity. To get at these and other ideas, we will read, listen, and think broadly about why a full understanding of hip-hop truly matters.

Recommended Preparations: AMST 100; AFAM 126; INART 126

General Education: Arts (GA)

General Education: Humanities (GH)

GenEd Learning Objective: Effective Communication

GenEd Learning Objective: Integrative Thinking

AFAM 235: From Folk Shouts and Songs to Hip Hop Poetry

3 Credits

This course will examine the politics of hip-hop art and culture. To do so, we will place hip-hop in broad historical context and trace its aesthetic and cultural roots from Africa to Jamaica to 1970s New York City and then forward to 1980s gangsta rap and former President Barack Obama’s iPod. We will think through the implications of hip-hop’s addiction to Italian-American mobsters, bling, and all-things keepin’ it real. We will also search for hip-hop’s political foundations in funk records, 1960s community organizing, and poetry of the Harlem Renaissance and Black Arts Movement to contemporary Hip-Hop and Spoken Word, including Def Poetry Jam recordings. Background readings will include important essays (such as James Weldon Johnson’s “Preface to the Book of Negro Poetry” and Langston Hughes’s “The Negro Artist and the Racial Mountain”) that reveal the kinds of aesthetic issues African American artists faced in crafting their art in the face of a dominant culture that consistently questioned their capacity for artistic production. Students will listen as Margaret Walker reads her famous poem, “For My People,” and they will consider the importance of the Black Arts Movement, its poets and critics to the development of contemporary hip-hop and spoken word poetry. Other course materials will include videotaped interviews and poetry readings. Readings would come from an appropriate anthology and/or a combination of other appropriate texts selected by the instructor.

Prerequisite: ENGL 015 or ENGL 030

Cross-listed with: ENGL 235

Bachelor of Arts: Humanities

United States Cultures (US)

AFAM 250: Introduction to the Modern Caribbean

3 Credits

A survey course which explores the historical evolution and emergence of the modern Caribbean. AFAM 250 / HIST 250 Introduction to the Modern Caribbean (3) (GH; IL)(BA) This course meets the Bachelor of Arts degree requirements. This course will explore the evolution of the Caribbean region from the eve of the arrival of Columbus to the 20th century. It will explore the emergence, migration, and evolution of Amerindian societies in the Caribbean islands prior to the arrival of Columbus. It will then explore the European-Amerindian interactions that
lead to the disappearance of these indigenous peoples from the region and the consolidation of European colonial empires. The course will then explore the various forms of coercive labor systems that emerged in the region including indentureship, enslavement, transportation of European prisoners and other social outcasts, African slavery, and the establishment of the plantation system that defined the region until the 20th century using both free and unfree labor to maintain its dominance in these island societies until the late 20th century. The course will also cover the issue of slave resistance, the Haitian revolution, the formation of maroon communities, and the role of abolitionist politics as a factor in bringing an end to slavery. It will also look at the re-emergence of indentureship of Asians as a response to the crisis of labor and the growth of peasant agriculture in the 19th century Caribbean. The course will also explore the emergence of nationalist sentiment in the region, especially the way in which the decay of Spanish colonial authority and the rise of American imperial ambitions helped to set the stage for the nationalist awakening that defined the course of the 20th century in the region. This is the course that will complement and expand upon issues raised in AFAM 211 / HIST 211 - The Emergence and Evolution of the Black Diaspora in the Atlantic World. It will also serve as an introduction to the 400-level course on the Caribbean in the 20th century that will be proposed simultaneously. The course will be required for students interested in pursuing the African Diaspora minor. It may be used to fulfill general education and diversity requirements. It can also be used as a course to meet non-Western history requirements in the History major. Evaluation will be based upon a book review, a mid-term, a research paper, and class discussion/participation.

Cross-listed with: HIST 250
Bachelor of Arts: Humanities
International Cultures (IL)
General Education: Humanities (GH)

AFAM 280: Historical Ethnography of Freedom
3 Credits

Studies the Underground Railroad movement to guide slaves to freedom, and public heritage surrounding this institution. Students use ethnographic approaches. AFAM 280 Historical Ethnography of Freedom (3) (GH; US) The course will introduce students to the origins, impact, and changing public interpretations of Underground Railroad. The Underground Railroad was a movement to secretly rescue slaves and send them to places of freedom in the northern states and territories, and Canada. Students will learn about the origins, leaders, and locales of this multi-racial movement. The course assignments will include scholarly readings, as well as research locating historic materials that shed light on the Underground Railroad. Course text and research materials will include historical studies, as well as newspapers, census materials, church records, and rare books that shed facts on the Underground Railroad. Students will be challenged to weigh stereotypical views about the Underground Railroad in scholarship and public life against the literature, historical documents, and places they discover that were actually associated with local and national Underground Railroad activities.

United States Cultures (US)
General Education: Humanities (GH)

AFAM 297: Special Topics
1-9 Credits/Maximum of 9

Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

AFAM 299: Foreign Studies
1-12 Credits/Maximum of 12

Courses offered in foreign countries by individual or group instruction.

AFAM 302: Diversity and Health
3 Credits

Exam the relationship of diverse personal and sociocultural factors to health, like socioeconomic class, race-ethnicity, gender, age, and sexual orientation. BBH 302 / AFAM 302 Diversity and Health (3) (US) is an introduction to an interdisciplinary study of the impact of diversity on health in America and across nations. The course is designed to provide an understanding of the complex interaction between concepts of diversity including but not limited to race, ethnicity, culture, gender, age, socioeconomic status, and sexual orientation. The course will also consider and critique the methods used in the study of these concepts and issues related to the measurement of health among diverse groups. The ultimate goal of this examination is to assist students in developing an appreciation of the current diversity and the impact diversity has on assessments and study of health, health status, and health promotion in America and other nations. The course is also designed to integrate different sources of information about diversity by utilizing critical thinking skills for the consumption of health information. The educational objectives will be to enable students to: 1) Consider the implications of race, ethnicity, gender, age, socioeconomic status and sexual orientation on health/social policies in light of research findings, 2) Understand the legacies and historical events that have impacted our view, the status, and treatment of diverse populations, 3) Appreciate the importance of understanding the origins of different health behaviors that impact biological processes, as well as the impact of biological processes in the context of social, environmental, and cultural influences when examining health issues. To achieve these objectives, the course will involve open class discussions, small break-out group discussions, written assignments, and a presentation (e.g., poster or other media presentation) requiring the acquisition and utilization of information/research from library and internet resources.

Prerequisite: PSYCH100 or SOC 001
Cross-listed with: BBH 302
United States Cultures (US)

AFAM 303: Race and Gender in the Americas: Latin American and Caribbean Cultures
3 Credits

Utilizing a theoretical framework of intersectionality, this course examines historical and cultural constructions of race and gender in Latin America and the Caribbean. AFAM 303 / ANTH 303 / WMNST 303 Race and Gender in the Americas: Latin American and Caribbean Cultures (3) (GS; IL) Utilizing a theoretical framework of intersectionality, this course examines how racial, gender, sexual, and class identities are constructed in Latin American/Caribbean societies. The course applies an anthropological perspective to a wide range of countries
in the region to reflect on how historical events such as the conquest, colonization, slavery, and independence movements are relevant to understanding the region today, as well as how race, gender, and sexuality inform contemporary themes of empire, nation-building, imperialism, neo-colonialism, revolution, violence, militarization, social movements, religion, neoliberalism, U.S. involvement/relations, and popular culture. The course addresses issues of power, culture, racial formation, and citizenship by incorporating interdisciplinary material beyond ethnography such as newspapers, grassroots media, biographies, films, music, novels, personal testimonies, etc. Rooted in feminist anthropological scholarship, this course emphasizes how power (from above and below) and culture mediate relationships between individual/community agency and institutions/structures. As an effort to encourage students to think about Anthropology and culture beyond superficial or romanticizing celebrations of multiculturalism, food, and music, the course stresses the theoretical importance of situating power and privilege amidst difference. We conceptualize culture not only as socially transmitted patterns of behavior and ideas/meanings, but as a complex and dynamic process/medium grounded in unequal relations in which power is constituted and resisted. The ethnographic emphasis of the course centers on the complex lived realities and voices of people, encouraging students to learn, understand, and respect cultural difference. The course offers students a broad sense of how power is central in the production of knowledge (particularly within the disciplines of Anthropology and History). Students will critically engage an array of topical issues in Latin America beyond dichotomous thinking. Discussion of course material includes contemplating issues of ethics, subjectivity, bias, and privilege. Conversations regarding processes of "Othering" and traditional "us vs. them" debates that often occur when discussing developing countries will prompt students to situate their own power/privilege and challenge our assumptions and preconceived notions of Latin America. Moreover, this course teaches Latin American Cultures within a global context of racialization. As such it also stresses the historical and contemporary social, economic, cultural and political significance of the U.S. in Latin America, to demonstrate how we are connected and responsible to what happens "over there." In order to promote service learning, a core tenant of feminist pedagogy, this course also offers students the opportunity to participate in an optional embedded program entitled "Cuba: Identity, Diversity and Popular Culture." This two week course in Havana, Cuba promotes interactive learning in and outside the classroom with international study. This course component successfully combines academic classes, hands-on activities, and service learning.

Cross-listed with: ANTH 303, WMNST 303
International Cultures (IL)
General Education: Social and Behavioral Scien (GS)

AFAM 364: Black & White Sexuality

3 Credits

This course explains how narrow ways of thinking limit our understanding of the diverse expressions of human sexuality.

Cross-listed with: WMNST 364

General Education: Social and Behavioral Scien (GS)

AFAM 395: Internship

1-18 Credits/Maximum of 18

Supervised off-campus, nongroup instruction including field experiences, practica, or internships.

AFAM 397: Special Topics

1-9 Credits/Maximum of 9

Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

AFAM 401: Afro-American Studies Seminar

3 Credits

A seminar examining theoretical and methodological issues in Afro-American Studies.

Prerequisite: AFAM 100, AFAM 101

AFAM 409: Racial and Ethnic Inequality in America

3 Credits

The impact of inequality and discrimination on individual and group identity among various racial and ethnic groups. SOC 409 / AFAM 409 Racial and Ethnic Inequality in America (3) (US) (BA) This course meets the Bachelor of Arts degree requirements. This course explores the impact of inequality and discrimination on individual and group identity for a wide range of social groups with special focus on racial and ethnic majorities and minorities. Using an extensive list of readings, writing assignments, small group activities, and journals (for personal reflection and scholarly critique) the students join the instructor in exploring the effects of inequality and discrimination. While emphasis is given to the inequality and discrimination experienced by local and national populations, a significant portion of the class will address issues rooted in international structures and institutions. Students are evaluated on quizzes, reaction papers, and analysis journals. AFAM 409 / SOC 409 is not a required course in Sociology; it is, however, an optional 400-level course for all majors and minors that fulfills one of their upper-level course requirements. AFAM 409 / SOC 409 is not required for the major or minor, but it is one of several optional courses from which they can choose to fulfill major and minor requirements.

Prerequisite: 3 credits in Sociology
Cross-listed with: SOC 409
Bachelor of Arts: Social and Behavioral Sciences
United States Cultures (US)

AFAM 410: Spirit, Space, Survival: Contemporary Black Women

3 Credits

How recent Black women have used spirit and space to survive.

Prerequisite: AF AM101

AFAM 412: African American Theatre

3 Credits

Exploration of the development of African American theatre from its roots in Africa through the diaspora, to the present time. THEA 412 / AFAM 412 African American Theatre (3) (US;IL) (BA) This course...
AFAM 416: Race, Gender and Science
3 Credits
The class will focus on race and gender as products of science, and how societal values shape scientific activity.
Cross-listed with: STS 416
International Cultures (IL)
United States Cultures (US)

AFAM 422: Contemporary African American Communication
3 Credits
A focused study on the continuities between African and African American culture and communication. CAS 422 / AFAM 422
Contemporary African American Communication (3) (US)(BA) This course meets the Bachelor of Arts degree requirements. At least once a year, this multidisciplinary course is designed to serve both Speech Communication and African and African American Studies. It is concerned with the relationship between a people's culture and world view and their systems of rhetoric/communication. It also provides a focus on the continuities between African and African American culture and communication. Specifically, it offers an approach to ascertaining the salient features of African and African American communication for community development. Special emphasis is given to the development and rhetoric of the Civil Rights Movement. The course utilizes videos, guest lectures, tapes of speeches, etc. to clarify objectives and stimulate classroom discussion. Students will be evaluated on two exams, one oral report, a final paper and class participation. Even though students need 400-level courses for their major and minor, this course is not required for Speech Communication majors. However, it does meet the Intercultural and International Competency requirement because it focuses on the communication of African Americans and how that communication has affected all Americans. The course will accommodate ten students in Speech Communication and ten students in African and African American Studies to ensure active discussion of issues.

Prerequisite: CAS 100
Cross-listed with: CAS 422
Bachelor of Arts: Humanities

AFAM 432: Between Nation and Empire: The Caribbean in the 20th Century
3 Credits
An exploration of the political evolution of the Caribbean Region over the course of the 20th Century. HIST 432 / AFAM 432 Between Nation and Empire: The Caribbean in the 20th Century (3) (IL)(BA) This course requires knowledge in American political science; or 3 credits in American political science
Cross-listed with: HIST 431
Bachelor of Arts: Humanities

United States Cultures (US)

AFAM 431: Black Liberation and American Foreign Policy
3 Credits
This course deals with American foreign policy and Black liberation in Africa since 1945. AFAM 431 / HIST 431 Black Liberation and American Foreign Policy (3) (US;IL)(BA) This course meets the Bachelor of Arts degree requirements. Black Liberation and American Foreign Policy in Africa since 1945 presents an interdisciplinary approach to the study of American foreign policy in Africa. Course readings will consist of both secondary and primary sources to explore the evolution of American policy toward the continent over the last half-century, and the meaning of the American engagement with Africa for American politics and society. The course will also examine the reasons that Africa has served as a focus of concern among African Americans both prior to, and, over the period 1945 to the present. Of particular concern will be the ways in which American policy has reflected pressures from African Americans as a constituency in foreign policy. The focus of the course will be student-centered written research and discussion. Students will be required to select topics from the course outline for presentation in class with the instructor serving as the moderator of discussion and guide to relevant research materials. Students will be encouraged to use both primary and secondary sources for their research. Students will be expected to prepare two individual written presentations which will serve as the basis for class discussion (30% of the grade), a book review (10% of the grade), and a research paper of 15 pages (40% of the grade) on a topic drawn from the areas identified in the course outline. The final 20% of the grade will be awarded for participation in class discussion.

Prerequisite: 3 credits in African history; 3 credits in African political science; or 3 credits in American political science
Cross-listed with: HIST 431
Bachelor of Arts: Humanities
International Cultures (IL)
United States Cultures (US)
class participation. The course will be required for students pursuing the African Diaspora minor and for those seeking to broaden their diversity requirements. It can be used to meet non-Western history requirements in the History major.

International Cultures (IL)

AFAM 445Y: Politics of Affirmative Action

3 Credits

Examines history, politics, and economics of the use of special programs to advance racial interests in the U.S. PLSC 445Y / AFAM 445Y / LER 445Y Politics of Affirmative Action (3) (US)(BA) This course meets the Bachelor of Arts degree requirements. The objectives of this course are to introduce students to the relationship between affirmative action and other policies purportedly designed to end racial inequality in the U.S. This course approaches the study of affirmative action in the context of the historic racial discrimination and inequality that Black Americans have faced since the founding of the Nation. The purpose of this course is to help students think about how contemporary and historic affirmative action policies relate to race, concepts racial inequality, the historic and continuing causes for racial inequality, public opinion, American politics and economic thought. The course materials will lead students through scholarly and popular articles, books and video presentations on the topic. It is hoped that students will become familiar with the history of affirmative action from its conception. Students will gain an intimate understanding of affirmative action economic and social outcomes on various racial groups. No prior knowledge is assumed, however a knowledge of civil rights history, quantitative methods, and constitutional law will be useful. The Politics of Affirmative Action satisfies the requirements for major and minor electives for the African American Studies, and major and minor electives for Political Science, and Labor Studies and Industrial Relations. Students are evaluated on the basis of an examination, term paper, class participation and class presentations of papers.

**Prerequisite:** AAA S 100 level course and PL SC001 or PL SC007
Cross-listed with: LER 445Y, PLSC 445Y

AFAM 465: The Post-World War II Civil Rights Movement

3 Credits

The civil rights struggle and its impact upon American politics.
AFAM 465 / HIST 465 The Post-World War II Civil Rights Movement (3) (US) This course focuses on the post-World War II Civil Rights Movement. It begins with a discussion of the "Long Civil Rights Movement," briefly looking at the roots of the movement in the labor movement and social struggles of the Great Depression and World War II. We then turn to the impact of World War II on African Americans, the growing militancy during the war, the struggles over segregation in the military, the growing role of blacks in the labor movement, and the growing link between African Americans and the rising anti-imperial movements that accelerated after the war. We discuss the role of African Americans in the Cold War and the struggles over the role of Communism and Socialism in the emerging Civil Rights Movement. The course is broken down into key topics of the movement years: the rise of localized grassroots movements all over the United States that were led by local people who sought to challenge school segregation, political disfranchisement, poor housing conditions, police brutality, and job discrimination. While legal disfranchisement and segregation existed solely in the southern states, the entire country practiced both and black people suffered the consequences universally. Much time is spent on the more famous southern civil rights movement, with discussions of the Emmett Till Murder of 1955; the Montgomery Bus Boycott and the rise of Martin Luther King, Jr. and the Southern Christian Leadership Conference; and the Little Rock Crisis of 1957. The beginning of the 1960s saw the creation of the Student Non-Violent Coordinating Committee and the emergence of key women leaders in the struggle such as Mrs. Ella Baker, Mrs. Fannie Lou Hamer, Mrs. Rosa Parks, and Mrs. Septima Clark, to name only a few. We discuss key moments in the 1960s, beginning with SNCC and CORE and the Freedom Rides, the SCLC in Birmingham and Albany; the March on Washington, the 1964 Mississippi Freedom Summer and the murders of Chaney, Goodman, Schwerner, and Medgar Evers; the 1965 Selma to Montgomery March, and the final passage of the 1964 Civil Rights Act and the 1965 Voting Rights Act. The emphasis on the southern struggle is on the local, ordinary people who achieved extraordinary things.

**Prerequisite:** AF AM100, HIST 021, HIST 152, PL SC001, or PL SC002
Cross-listed with: HIST 465
Bachelor of Arts: Humanities
United States Cultures (US)

AFAM 466: African American Novel I

3 Credits

This course examines the origins of the African American novel and follows the genre's evolution into the early twentieth century, outlining the relationships among the texts that form the body of African American narrative as well as the relationships of those texts to the constantly shifting cultural and political realities surrounding their writing. From the earliest novels, written during the period of slavery, through the Reconstruction era, the nadir of Black Codes and Jim Crow Supreme Court decisions, and into the Renaissance heralded by Alain Locke and others, course readings encompass a broad range of styles and genres, from early proto-documentary modes, through the realism and naturalism of a later time. The course takes up Robert S. Levine's claim that "the history of the early African American novel is not fixed or stable" by mapping the genre's early history and by developing an understanding of the novel as genre according to both early African American authors and later scholars. It addresses the fact that this history continues to be updated and that some texts whether in part or in whole remain lost. Authors covered in the course might include William Wells Brown, Frederick Douglass, Frank J. Webb, Julia C. Collins, Hannah Crafts, Martin Delany, Frances Ellen Watkins Harper, Charles Chesnutt, Pauline Hopkins, Paul Laurence Dunbar, Sutton Griggs, James Weldon Johnson, Oscar Micheaux, Nella Larsen, Jessye Fauset, and others. Scholarly
readings accompany primary texts in order to give students a sense of the critical work that has gone into and continues to go on in the study of African American literature. Course topics may include the issue of firsts; the challenges of publication and the attendant realities of early African American print cultures; questions of tradition and influence; and the political, social, religious, and philosophical aims of early African American novels. Readings and discussions also attend to questions of form, specifically regarding intertextuality and generic blurring and hybridity. The study of early African American novels necessarily includes attention to issues of race, identity, nation, diaspora, and the question of authenticity, and each is taken up in turn. Course assignments and discussions engage students in critical work that demands careful attention to both content and context in order that all students might strengthen their close reading capabilities and engage with course figures and materials within their historical milieus.

**Prerequisite:** ENGL 015 or ENGL 030
Cross-listed with: ENGL 466
Bachelor of Arts: Humanities
United States Cultures (US)

AFAM 467: African American Novel II

3 Credits

This course examines the African American novel, its forms, and its traditions starting during the Harlem Renaissance. It follows the genre's evolution into the twenty-first century, outlining the relationships among the texts that form the body of African American narrative as well as the relationships of those texts to the constantly shifting cultural and political realities surrounding their writing. From the Renaissance heralded by Alain Locke, through the Civil Rights and Black Power Movements - and their attendant Black Arts Movement - and into the era of the Movement for Black Lives, course readings encompass a broad range of styles and genres, from realism, naturalism, and naturalist primitivism, through the experimental forms, magical realism, and "postrace aesthetics" of later times. The course invites students to think critically about the African American novel as a socially and politically engaged form, and to identify and analyze the long tradition of resistance that variously informs its development. Authors covered in the course might include major figures such as Claude McKay, Zora Neale Hurston, Nella Larsen, Wallace Thurman, Richard Wright, Ralph Ellison, Ann Petry, James Baldwin, Ishmael Reed, Earnest Gaines, Alice Walker, Toni Morrison, Toni Cade Bambara, Octavia Butler, Gayle Jones, Samuel Delany, Charles Johnson, John Edgar Wideman, Colson Whitehead, and others. Still, the course gives due attention to lesser known/studied materials from the period, including graphic novels, satire, speculative fiction, performance novels, and various other experimental forms. Course readings and instruction give particular attention to how African American novels of the twentieth and twenty-first centuries variously engage social identity categories, like race, gender, class, and sexuality, and how they engage and resist various literary conventions associated with naturalism, modernism, and postmodernism. The course also traces the development of new thematic and aesthetic interests in a generation of writers whose fiction has been influenced by the explosion of interest in the graphic novel, the popularity of cultural forms such as hip hop, and the ascendency of the digital age. Scholarly readings accompany primary texts to give students a sense of the critical work that has gone into and continues to go on in the study of African American poetry. Assignments and discussions are designed such that students may engage with course figures and materials within their historical milieus.

**Prerequisite:** ENGL 015 or ENGL 030
Cross-listed with: ENGL 467
Bachelor of Arts: Humanities
United States Cultures (US)

AFAM 468: African American Poetry

3 Credits

Meta duEwa Jones argues, "We cannot afford to continue to treat black poetry and poetics as loose change among the more highly valued paper currency of fiction and nonfiction prose. . . . The myriad aesthetic forms and concomitant political functions of black poetry and poetics should be seriously considered as grounds for broader and more nuanced theoretical and sociocultural claims." This course takes as its subject matter these aesthetic forms and political functions of the poetry of black America. It surveys the broad history of African American poetry and poetics, tracing the evolution of formal structures and aesthetics, but also taking a critical view of the reception of African American verse. Whether reading Phillis Wheatley or the contemporary poet Ed Roberson, all the poets included in this course have contended within the writing itself with the racially striated nature of the literary spaces they occupy. Course readings may come from poets including Wheatley, Frances Ellen Watkins Harper, Paul Laurence Dunbar, Alice Dunbar Nelson, Claude McKay, Langston Hughes, Robert Hayden, Melvin Tolson, Gwendolyn Brooks, Amiri Baraka, John Coltrane, Ishmael Reed, Nathaniel Mackey, Rita Dove, Maya Angelou, Audre Lorde, Natasha Trethewey, Sonia Sanchez, Nikki Giovanni, Nikky Finney, Roberson, Claudia Rankine, and others. The course addresses works by many of the key figures of this American literary tradition so that students may develop an understanding of the various contributions and legacies of musical, cultural, critical, political aspects of African American poetry from the eighteenth century to today. Scholarly readings accompanying primary texts give students a sense of the critical work that has gone into and continues to go on in the study of African American poetry and poetics. The course surveys early African American poetry through works from the Harlem Renaissance and the Black Arts Movement, and through contemporary movements and formations. Topics will cover a range of thematic and formal issues relevant to individual poets, to major movements and periods, to regions, and to various smaller organizations and collectives. Course assignments, lectures, and discussions engage students in critical work that requires careful attention to form, content, and context such that all students might strengthen their explicatory skills and approach course figures and texts from an informed, analytical perspective.

**Prerequisites:** ENGL 15 OR ENGL 30 OR ( ENGL 137 AND ENGL 138 )
Cross-listed with: ENGL 468
Bachelor of Arts: Humanities
United States Cultures (US)

AFAM 469: Slavery and the Literary Imagination

3 Credits

The impact of slavery on the petitions, poetry, slave narratives, autobiographies, and novels of African Americans. ENGL 469 / AFAM 469 Slavery and the Literary Imagination (3) (US)(BA) This course meets the Bachelor of Arts degree requirements. ENGL 469 / AFAM 469 provides an opportunity for undergraduate students to examine African American petitions, poetry, slave narratives, autobiographies, and novels as literary works.
AFAM 492 / CI 492 / EDTHP 492 Identities, Power and Perceptual Pedagogies in Teaching and Learning (3) In this course, students will perform inquires into the intersections of identities, power, and pedagogical formations in relation to urban teaching/learning contexts. AFAM 492 / CI 492 / EDTHP 492 Identities, Power and Perceptual Pedagogies in Teaching and Learning (3) In this course, students will perform inquires into the intersections of identities, power, and pedagogical, particularly as these phenomena pertain to methods of teaching and learning in urban contexts. To develop new knowledge and analytic skills, students will be introduced to perceptual and conceptual frameworks that assist deep engagements with youth- and teacher-centered case studies. These cases will depict actual lived experiences among racially and economically diverse students and teachers in urban contexts.

Prerequisite: 5th semester standing
Cross-listed with: CI 492, EDTHP 492

AFAM 494: Research Project

1-12 Credits/Maximum of 12

Supervised student activities on research projects identified on an individual or small-group basis.

AFAM 494H: Research Project

1-12 Credits/Maximum of 12

Supervised student activities on research projects identified on an individual or small-group basis.

African Studies (AFR)

AFR 105: Environments of Africa: Geology and Climate Change

3 Credits

Significant natural features of Africa as related to human endeavor; case studies include the Nile, climate change, and natural resources. AFR 105 Environments of Africa: Geology and Climate History (3) (GN;IL)(BA) This course meets the Bachelor of Arts degree requirements. "Environments of African: Geology and Climate History" investigates the interrelationships between geology, hydrology, land use and human development in several areas of Africa. We focus primarily on regions north of the equator, although there is a brief segment on South Africa mining. Specific topics include the Nile River (sources of the Nile, agricultural practices, effects of damming the Nile, hydropolitics), the Sahara and Sahel (salt mines, climate change, drought, water resources), and natural resources and their role in politics (gold, diamonds, oil, and gas). The theme of climate change cuts across the entire semester. The quantitative and analytical components of the course involve working through a combination of map exercises and data manipulations (flood stage, groundwater age, rainfall and temperature records). Writing exercises are conducted both individually (essays, analysis of readings) and in collaborative teams (climate change analysis). Readings for the course come from the popular scientific literature; current refereed research journals, and transcribed oral histories of African people. Faculty lectures will comprise ~30% of the course, and student presentations ~20%, with the remainder of the time devoted to in-class collaborative exercises. There are no prerequisites for this course. It will be offered annually with a maximum enrollment of 100 students. The goals of the course are to (1) introduce the scientific study of Africa; (2) develop quantitative and scientific reasoning skills; (3) explore the relationship between human society and the natural world. The topics that we explore (e.g., global climate change, allocation of limited water resources) are important political issues that affect people in developed and developing countries throughout the world. It is crucial that the next generation of citizens be informed.
as to how scientific data is obtained, presented, and interpreted by scientists as well as politicians. Students will work individually and (more commonly) in teams to analyze real data from natural African systems, and will then report their findings to the class both orally and in writing. Examples of the data sets include 100-year records of monthly rainfall and temperature from stations throughout the continent, fossil suites from ancient lake cores in the modern Sahara, and historical writings of Nile flood levels from pre-Biblical times. Through these exercises students will gain an appreciation of the scope of geological time and change, and will be able to incorporate this new long-term perspective into identification and resolution of modern questions.

Bachelor of Arts: Natural Sciences
International Cultures (IL)
General Education: Natural Sciences (GN)

AFR 110: Introduction to Contemporary Africa
3 Credits

Consideration of influences and forces shaping modern African society; analysis of current local and global problems and issues facing Africa.

Bachelor of Arts: Other Cultures
Bachelor of Arts: Social and Behavioral Sciences
International Cultures (IL)
General Education: Social and Behavioral Sciences (GS)

AFR 132: Afro-Hispanic Civilization
3 Credits

A general introduction to human and cultural elements of African origin in Spanish- and Portuguese-speaking countries of Latin America. SPAN 132 / AFR 132 / AFAM 132 Afro-Hispanic Civilization (3) (IL) (BA) This course meets the Bachelor of Arts degree requirements. The nations and peoples of Latin America have a unique, interesting history and cultural heritage that are rooted in the traditions, beliefs, experiences, values, and struggles of Native American, European, African and other populations. This course focuses on the presence and participation of African peoples and their descendants in the formation and development of societies and cultures in representative areas of the Caribbean, South America, and Central America and on the evolution, diversity, and richness of the African heritage therein. Course content includes the African background, the experience and impact of slavery, the social, cultural, and economic heritage of slavery, the role of race in Latin America, and Afro-Hispanic intellectual, literary, and artistic developments (e.g., aspects of folklore, music). The course aims to provide students with a general introduction to human and cultural elements of African origin within the Spanish- and Portuguese-speaking nations of the Americas so that they may be more knowledgeable of the meaning, significance, and widespread influence of the African diaspora. It proposes to provide the student with a better understanding of Africa’s contribution to Latin American identity, diversity, culture, and development; to promote appreciation for the values and practices of other cultures, and greater awareness of the relationships between the nations of the region and the United States.

Cross-listed with: AFAM 132, SPAN 132
Bachelor of Arts: Humanities
International Cultures (IL)

AFR 150: Africa in Cinema
3 Credits

The study of the image of Africa as seen in fiction and non-fictional feature length films, ethnographic and documentary films.

International Cultures (IL)
General Education: Humanities (GH)

AFR 191: Early African History
3 Credits

Explores important economic and cultural transformations in the making of early African empires from 1 MBC to 1750. HIST 191 / AFR 191 Early African History (3) (GH; IL) (BA) This course meets the Bachelor of Arts degree requirements. The course is an introduction to the history of Africa south of the Sahara from the origins of humankind to roughly 1750. Since it is not possible to undertake a systematic survey of the period – the continent is too vast and our data too sparse – we will focus on a number of common themes in the cultural and historical development of African societies. We will start with an introduction to African cultures and the problems in studying them, move on to examine the evidence for the early origins of humans on the African continent, the agricultural revolution, and ancient African kingdoms, empires and civilizations (including Egypt). We will then explore three interrelated themes in the history of Africa from the 16th-18th centuries: trade, state formation, and the spread of Islam. Finally, we will turn to an examination of the slave trade and its impact on Africa and the Americas. This is also a course in historical reconstruction and analysis. There are few documentary sources for this period and much of the data we have is fragmentary. The resulting history consists largely of long-term social changes rather than detailed narrative. We must thus learn to reconstruct history from what evidence is available, using general principles of African social, economic, and political organization that we will develop in class. Typically, students will be evaluated on the basis of a map quiz, short papers, exams that have both an identification and essay component, and participation in class discussions and debates. HIST 191 / AFR 191 provides an excellent foundation for both AFR 192 / HIST 192 (Modern African History) and HIST 479 (Imperialism and Nationalism in Africa). In addition to satisfying the GI requirement, AFR 192 / HIST 192 satisfies general credit requirements for the history major or minor, including the “non-western” component of the major. Non-majors may use this course to satisfy a general education humanities selection. The course also may be used to fulfill requirements for the African and African-American Studies major and the African Studies minor.

Cross-listed with: HIST 191

AFR 192: Modern African History
3 Credits

Impact of the slave trade, expansion of Islam, colonial conquest, social and cultural transformations, resistance, nationalism, and independence.

Cross-listed with: HIST 192
AFR 192H: Modern African History
3 Credits

This Honors course offers an overview of the history of Africa from 1750 to the present. The course introduces students to the diversity of Africa's geography, demography, and history and investigates the experience of modern history through specific, regionally distinct, examples. Students will learn about structures of power, society, and economy in the colonial and post-colonial era in comparative terms, and about a variety of cultural forms and expressions. The honors course takes time to go into greater depth in a few selected topics, with attention to primary sources, historical method, and historiographic trends.

Cross-listed with: HIST 192H
Bachelor of Arts: Humanities

1-12 Credits/Maximum of 12

Courses offered in foreign countries by individual or group instruction.
International Cultures (IL)

AFR 202N: Women, Gender, and Feminisms in Africa
3 Credits

This introductory course provides students with a broad interdisciplinary overview of scholarly research and theory related to women and gender studies in Africa, using both historical and contemporary examples from across the continent. We will explore the complex, and oftentimes contradictory, meanings attached to gender and sexuality in various African contexts. For example, what does it mean to be a “good” woman in Uganda today? How does this definition change (or not) if she comes out as a lesbian? What if s/he identifies as a transgender man or rejects gender binaries altogether? What if gender did not matter, or even, did not exist? In addition to exploring these types of questions, we will also examine African feminist thought, paying close attention to the ways in which African feminisms are similar to and/or different from other forms of feminism worldwide. We will also consider what these movements looked like in practice. What strategies did African feminists utilize to promote social change? What challenges did they face? What victories resulted from their efforts? Although topics may vary from semester to semester, key themes include environmental activism, anti-war/peace activism, political activism, sex worker rights activism, activism to support peoples living with HIV/AIDS, and activism against harmful traditional practices. Finally, we will examine the ways in which African feminists have contributed to global debates and initiatives on women’s rights and gender equity. Students in this course can expect to engage with diverse texts from the humanities (esp. history, literature, film studies, and philosophy), as well as from the social and behavioral sciences (esp. anthropology, geography, sociology, and political science).

International Cultures (IL)

AFR 310: Language Rights, Policy, and Planning
3 Credits

This is a course on language rights, policy, and planning from individual, group, inter-ethnic, and national perspectives. Linguistic minorities are a consequence of colonization by European powers in different regions of the globe. Other effects of colonization and political conflicts include mass movement, migration, and the emergence of nationalism. In such contexts, minorities have made demands for language rights and used language policy and planning as strategies to realize demands for social justice. This course will examine how linguistic minorities secure opportunities to use their own languages and have them accommodated in official legislation as mother tongue, second, or foreign languages.
The course will adopt a global perspective and analyze language rights as well as language policy and planning in diverse regions of the globe, including but not restricted to, Africa, Asia, and South America. Analysis will primarily focus on how language policies can be carried out from different perspectives (e.g., literary, linguistic, and political) in different geographical regions. After examining how language policies operate in and influence society, the course will use sociopolitical ideologies to explore the nature of the relationship between language policies and language rights and the ways this relationship enables one to achieve an expanded understanding of the impact of language policies and language rights on local language practices.

AFR 335: African Art
3 Credits

Introduction to the visual arts of Africa, including contemporary African art and the influence of African art outside Africa. ARTH 335 / AFR 335 African Art (3)(GA;IL)(BA) This course meets the Bachelor of Arts degree requirements. The course will examine the arts of various African peoples in historical, religious, sociological and geographic contexts, providing an introduction to the many visual art forms of Africa including masquerade, costume, and indigenous architecture. While many of the arts in this field of study are from west and central Africa, the course will also include materials from southern and eastern Africa. Contemporary African art, African Diaspora arts, and the influence of African art on European art are important topics that may be included. In addition to the traditional format of a geographic organization of the material, students will explore thematic approaches. Each of the assignments requires completion of essays which draw upon the multiple course texts and readings. Exams include image identification and short essays.

1-12 Credits/Maximum of 12

Courses offered in foreign countries by individual or group instruction.

International Cultures (IL)

AFR 403: South Africa Today
3 Credits

A course examining the South African government's policy of apartheid: its history, why it exists, how it works, and the prospects for change.

Prerequisite: AAA S110

AFR 405: African Studies Methodologies
3 Credits

Multidisciplinary research techniques for studying in and about Africa.

AFR 434: War and Development in Africa
3 Credits

This course will examine the relationship between war and development in sub-Saharan Africa in the post colonial era. PLSC 434 / AFR 434 War and Development in Africa (3)(IL) This course will examine the relationship between development and war in sub-Saharan Africa in the modern era. Specifically, it will analyze the extent to which the processes of state building, nation building, and international intervention have contributed to the incidence of both civil war and international conflict in Africa. We will begin with a review of several theoretical arguments on the causes of warfare in Africa and then turn to a discussion of these on African political development. This course complements present offerings in international relations and comparative politics in the PLSC department and can serve as an advanced undergraduate offering in the African Studies concentration in AFR. The course directly complements our present offerings in international conflict given that we don;'t have a regularly offered course that focuses on conflict in a specific region. In addition, it will augment our comparative politics offerings with an examination of prominent issues in comparative politics such as political development, democracy, and modernization. The course will fulfill the IL requirement and encourage students understanding of the historical background as well as the political, economic, and cultural factors that influence African politics. African conflicts are often viewed as "ethnic conflicts" and in this class students have an opportunity to assess the extent to which ethnic, linguistic, or religious factors influence the likelihood of conflict and contribute to development in African states. Students will also be required to write essays evaluating the contribution of a range of theoretical arguments on African; s conflicts in order to assess the degree to which cultural more than political or economic factors contribute to their onset. Students will then have the opportunity to conduct more extensive research on a specific African case to develop their analyses further. These exercises will often require that students reevaluate their beliefs about social identities such as race (e.g. in Rwanda the difference between Tutsi and Hutu is often viewed as a "racial" difference between black Africans, which is at odds with most Western conceptions of race). They also require students to challenge stereotypes regarding the subordination of African values in conflicts to a simple concern with "tribe". Students will gain a broader knowledge and appreciation of the different values, traditions, and cultures evident in Africa and understand how these can both exacerbate and mitigate conflict. Evaluation in the course will consist largely of examination of the students' brief expository essays and larger case studies for which students will be encouraged to conduct original research. The course should be offered biannually with a class limit of about 40 students.

Prerequisite: PL SC014 , PL SC003 , AFR 110
Cross-listed with: PLSC 434
Bachelor of Arts: Social and Behavioral Sciences
International Cultures (IL)
AFR 440: Globalization and Its Implications

3 Credits

This course explores the socioeconomic implications of globalization.

AFR 444: African Resources and Development

3 Credits

Ecological and cultural factors in the geography of Africa; natural resources and development. GEOG 444 / AFR 444 African Resources and Development (3) (BA) This course meets the Bachelor of Arts degree requirements. This course is designed to analyze the ecological, economic, political and cultural factors, which influence development in sub-Saharan Africa. The traditional system, colonialism, modernization, post-colonial philosophies are four conceptual artifacts used to address some of these issues. Within these broad frameworks, the course focuses on existing debates surrounding key development ideologies and narratives in the region, including, poverty, conservation, population, debt, food security, land reform, foreign intervention and global politics. The topics and texts for the course are chosen carefully to provide general factual material as well as exposure to the major discourses surrounding the region's development. The views of many Americans concerning Africa are often both unitary (Africa is a country) and unidimensional (Africa is a place of conflict, poverty, corruption and crisis). Assuming that a number of students are likely to join the class with this general background, the main objectives of the course will be: (i) to provide a broad geographic and historical tutorial to dispel myths and stereotypes about the region; (ii) to explore the literature, which analyzes the historical, geographic and political factors that underlie the region's present status in the global economy; and (iii) to gain insights into the intellectual and ideological dimensions of the "raging" debates surrounding issues like environment, conservation, population, corruption, and poverty in the region. By the end of the semester, students should have acquired the skills to accomplish the following goals: *develop a "mental map" of the broad physiographic, ecological, economic and political zones (blocks) in the region; *be able to discriminate between stereotype and reality on information pertaining to the region; *be able to interpret and analyze the internal (national, regional) dynamics of the region's development; *be able to interpret and analyze the global factors, which influence the environment, economy, and politics of the region; *develop an informed background on the ideological narratives that guide policy in the region, for example, population, sustainable development, post-colonialism, "empire" (whether, American, European, Indian, Chinese, South African?).

Prerequisite: GEOG 010 or GEOG 020 or GEOG 030 or GEOG 123 or GEOG 124 or GEOG 130 or EARTH105 or AFR 105 or AFR 110
Cross-listed with: GEOG 444

Bachelor of Arts: Arts
Bachelor of Arts: Other Cultures
International Cultures (IL)

AFR 454: Government and Politics of Africa

3 Credits

Contemporary African politics, institutions, and ideologies; patterns of change, social forces, and nation building in selected African states. PLSC 454 / AFR 454 Government and Politics of Africa (3) (IL) (BA) This course meets the Bachelor of Arts degree requirements. In this course, we will discuss the current democratization trend in Africa by focusing on the experiences of African countries. The course is divided into three sections. Part One considers a range of factors that affect politics in Africa. We will discuss in depth the following factors: colonialism, nationalism, the relationship between state and society, ruler- ship, the military, political parties, and economic development. Then, we will consider the experiences of our four cases, to gain a historical background. In part two, we will focus on democratic transitions. We will discuss the factors that enable transitions to occur, as well as the process that transitions follow. Then, we will consider four transitions: two that resulted in the installation of a democratic government (Nigeria in 1979, Sudan in 1986) and two that ended in continued authoritarianism (Angola in 1992, Kenya in 1978). Part three considers the prospects of democracy. We will discuss the probability of a democratic transition occurring in the near future. The goals of this class are four fold. First, students will gain detailed knowledge about four African countries. Second, we will learn how to compare countries. Third, students will have a better understanding of the democratization process in general, and will be able to explain or predict democratization beyond the four cases discussed in this class. Finally, the experiences of these four countries offer a deeper understanding of what democracy is and provide students with greater flexibility to fulfill requirements in either the African and African American Studies major or the Political Science/International Politics major. PLSC 454 / AFR 454 will be offered once per year with 35-50 seats per offering.

**Agribusiness Management (AGBM)**

**AGBM 101: Economic Principles of Agribusiness Decision Making**  
3 Credits  
This course introduces students to microeconomic principles in the context of food and agriculture. More specifically, the course examines market supply and market demand in various food and agricultural products, then examines how consumers make decisions about food to maximize their utility subject to a budget constraint, then examines profit-maximizing decisions by farms and food industry firms, and finally looks at special topics related to food and agriculture. By the end of the course, students will have key literacies on economic modeling and decision making as well as the food and agricultural sectors of the U.S. economy.  
Bachelor of Arts: Social and Behavioral Sciences  
General Education: Social and Behavioral Scien (GS)  
GenEd Learning Objective: Crit and Analytical Think  
GenEd Learning Objective: Key Literacies  

**AGBM 102: Economics of the Food System**  
3 Credits  
Introduction to topics designed to develop an understanding of how the food production, processing, and marketing system works and evolves.  

**AGBM 106: Agribusiness Problem Solving**  
3 Credits  
Development of quantitative problem solving skills applied to specific examples of agribusiness management problems, using EXCEL spreadsheets. AGBM 106 Agribusiness Problem Solving (3) The goal of this course is to develop agribusiness problem solving skills. These skills include optimization, marginal analysis, time discounting, and measuring efficiency. Examples will be implemented using Microsoft EXCEL spreadsheets rather than algebra, calculus and abstract mathematics. This course, then, plays an important role by building skills for use in later agribusiness management courses as well as teaching important problem solving skills to non-majors who want to learn quantitative economics problem-solving skills in the context of agribusiness management. Material will be organized according to the course topics areas: optimization, marginal analysis, time discounting, and efficiently measurement. Each topic area presentation will rely on specific examples of agribusiness management problems. The first lecture of each week will be a standard lecture emphasizing concepts, presented in a passive learning format. The second lecture of each week will be presented in a technology classroom with spreadsheet examples being worked out by the professor in front of the class, who will guide the students. The third lecture of each week will be taught in a computer laboratory, with students solving the problems actively, but with supervision. Problem solving skills will be reinforced by assigning problem sets for students to do on their own after the computer laboratory experience. It is permitted for students to submit identical labs but problem sets should not be identical.  
**Prerequisite:** AG BM101
AGBM 170: Investigating the U.S. Food System: How food moves from field to table

3 Credits

Our food system is a product of complex interaction of three systems: the natural ecosystem, the managed agricultural system, and the socio-economic system. Farming, food processing, food distribution, and consumption decisions are all governed by the interaction of these systems. Consequences of these decisions, along with the interactions themselves, have generated a number of overarching scientific and social "hot-button" topics that affect or are affected by the food system such as genetically modified organisms (GMOs), organic crops and food, agricultural and food policy, environmental implications from agriculture food safety, food safety, diet and health, agricultural trade and international development, and food insecurity and food access.

GenEd Learning Objective: Integrative Thinking

AGBM 200: Introduction to Agricultural Business Management

3 Credits

Application of management principles and processes to agricultural business firms in their planning and operating in domestic and international markets. AGBM 200 Introduction to Agricultural Business Management (3) AGBM 200 is the course for people who wish to combine a technical minor with an interest in the business management of agricultural and food based businesses. This is the combination of skills that employers most desire when they look for potential employees. Examples from a variety of industries in agribusiness are used to present the principles of business management. In addition, emphasis is also given to exploring the institutions, and issues such as food safety and biotechnology that are unique to managers in the agribusiness sector. The presentation of the material in an agricultural and food context enhances your chances for learning so you can become more "employer ready." Regardless of your major, most people will find themselves as business managers some time during their careers because they will have to manage time, money and people. The material you will learn in this class focuses on the principles of agribusiness management. Principles endure and are always applicable regardless of when and where you apply them. When you have completed AGBM 200 successfully you will have a firm grasp of the critical agribusiness management skills you will need to successfully handle just about any management situation you might face. NO PRIOR BUSINESS EXPERIENCE IS REQUIRED OR EXPECTED OF THOSE TAKING THIS COURSE. AGBM 200 deals primarily with the principles of agribusiness management. I will not be teaching you the material in the book. Classroom time will be spent discussing and applying the reading material and decision cases that were assigned for that day. This approach will allow us to cover more material in greater depth. It should enhance your learning because it will engage your higher level thinking skills.

AGBM 220: Agribusiness Sales and Marketing

3 Credits

Principles underlying the sales process and practical application for selling situations in agribusiness. Role of selling in the total marketing process. AGBM 220 Agribusiness Sales and Marketing (3) Students take an applied approach in this course, to fulfill the course objective of learning skills in sales and marketing. The topics presented in the course are organized as they would appear in a corporate sales training program. Class activities include discussing and solving selected case situations that illustrate or amplify assigned text readings. Lectures and audio-visual presentations cover specific aspects of the selling process, from prospective new customers to the servicing of customers after the sale. A major focus is on role-playing exercises, trying to convince another student acting as a buyer to undertake a particular course of action. Each student is expected to take an active part in the role-playing exercises. During the course students participate in as both buyer and seller. A student peer evaluation comprises a portion of the grade on each role-playing exercise which is videotaped for purposes of critique.

AGBM 296: Independent Studies

1-18 Credits/Maximum of 18

Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

AGBM 302: Food Product Marketing

3 Credits

Analysis of economic and psychological determinants of the demand for food; marketing decisions in an increasingly consumer-driven food system.

Prerequisite: AGBM 101, AGBM 102, AGBM 106

AGBM 308: Strategic Decision Making in Agribusiness

3 Credits

Utilize case studies to investigate strategic decision making among agribusiness firms, highlighting how information and market power shape strategies. AGBM 308 Strategic Decision Making in Agribusiness (3) This course is designed to analyze strategic decision making among agribusiness firms and other economic agents in a market environment characterized by imperfect information and market power. The course draws upon game theory and other strategic decision tools to analyze four broad types of strategic decisions, each of which corresponds with the four main parts of the course: 1) Strategic Decisions Between Rival Firms: Focusing on firm decisions made between rivals with full information, part one includes the following topics and strategies: limit pricing, entry deterrence, predatory pricing, excess capacity, wars of attrition, strategic commitment, tit-for-tat pricing, and retaliation. 2) Strategic Firm Decisions in an Uncertain World: Focusing on firm decisions made with incomplete information, part two, includes topics on probabilities, expected value and expected utility, learning curves, investment decisions, flexibility, and option value. 3) Strategic Decisions Between Unequal Partners: Focusing on firm decisions made between unequal partners with asymmetric information, part three includes topics on vertical coordination, incentive compensation, franchising, and auctions. 4) Cooperation and Strategic Alliances: Part four investigates how firms can overcome informational problems described above through the use of strategic partnerships. This writing,
intensive course will rely on both class lectures and a substantial amount of class discussion. The course content will feature eight to ten industry applications and case studies of individual companies to reinforce economic theory. Learning Objectives: Students will: Classify practical agribusiness problems by the type of available information - full, incomplete, or imperfect and by the nature of market power in an industry. Construct and analyze game trees and other representative models of strategic decisions facing businesses and employees. Solve strategic business problems using economic models based on game theory and other economic principles. Write business-style memos and reports that summarize a business decision, plan, or solution that is supported by economic analysis.

**Prerequisite:** AG BM101, AG BM102, AG BM106

Writing Across the Curriculum

AGBM 320: Markets and Prices: Analysis and Forecasting

3 Credits

Understand how prices are determined; develop the skill to analyze and forecast how prices change as the underlying conditions change. AGBM 320 Markets and Prices: Analysis and Forecasting (3) In AGBM 320, Markets and Prices: Analysis and Forecasting, students learn how prices are determined and learn how to analyze and forecast how prices change as the underlying conditions change. This involves learning those tools that are used to analyze and understand how commodity markets work and how prices are determined. The class mixes theory with practical knowledge and examples, and aims to create a balanced representation of the tools used in market analysis. The students learn how to find data, manipulate it and analyze and apply these skills to test the validity of simple economic models, to forecast commodity prices, to understand market trends and learn the use of derivative instruments to manage price risk. One objective of this class is to improve the understanding of economic modeling and to increase the familiarity of students when applying statistical functions and regression analysis to solve applied problems. These core competencies rely on previous knowledge of basic statistic tools and data manipulation. In the process, students will learn to analyze market fundamentals and better understand those forces that affect prices. This will also help them better understand supply and demand and the ability of market participants to adjust to changing conditions.

**Prerequisite:** AG BM101, AG BM102 and AG BM106; SCM 200 or STAT 200

AGBM 338: Agribusiness in the Global Economy

3 Credits

Managing agribusinesses in the global food industry, international food product marketing, key public institution and policies affecting food trade.

**Prerequisite:** AG BM101, AG BM102, AG BM106

International Cultures (IL)

AGBM 407: Farm Planning and Financial Management

3 Credits

Economic principles applied to the management of farms, with particular emphasis on the financial aspects of management.

**Prerequisite:** AG BM101, AG BM106

AGBM 408: Financial Decision Making for Agribusiness

3 Credits

Develop financial management and business analysis skills, integrating previous course work and finance training; principles of financial management, planning, control.

**Prerequisite:** AG BM308W, B A 301

AGBM 420: Agribusiness Markets & Prices

3 Credits

Understand and forecast price level and volatility for commodities, differentiated products, services. Why markets work and why they may not.

**Prerequisite:** 6 credits in Agribusiness Management, Business Administration, Agricultural Economics, and/or Economics

AGBM 440: Food Product Innovation Management

3 Credits

A problem-based course designed to enhance decision-making skills in the context of industry’s approach to developing new food products.

**Prerequisite:** AG BM302 or junior/senior standing in Food Science

AGBM 445: AgTech Entrepreneurship

3 Credits/Maximum of 6

Recommended Preparations: Completion of AGBM 308 or Completion of MGMT 215 or ENGR 310 New firm creation and venture funding within food, agriculture and biorenewables (AgTech) is occurring at a record pace. Venture capitalist have invested billions of dollars in business start-ups that address pressing needs in food, agriculture and biorenewables. New firm formation and venture funding are expected to significantly increase over the coming decades. Numerous stakeholders recognize the transformative power of entrepreneurship and innovation in agriculture. AgTech entrepreneurs are viewed as powerful change agents for our next innovative age in agriculture as we seek to provide for humanity and our ecosystem while addressing the constraints of population growth and resource scarcity. The proposed course will provide students with an introductory overview of entrepreneurship opportunities in AgTech, basic understanding of entrepreneurial concepts and address whether an entrepreneurial career suits their interests. Students will be guided through several self-evaluation exercises to identify their professional strengths, weaknesses and interests. In addition students will develop their business research, evaluation, writing, presentation and critical thinking skills. In order to simulate a realistic preview of entrepreneurship this course will allow students to practice self-organization skills for opportunity effectuation where few guidelines are provided. Several core entrepreneurial concepts will be reviewed in this course and contextualized within AgTech when possible. Topics are founder/team dynamics, value proposition, business models, market research, financial analysis, funding sources/considerations, business ethics and intellectual property. Each topic will be presented in a summative format with access to additional resources for better in-depth understanding. After completing the course students will have improved general business knowledge that is contextualized for new firm creation. The course utilizes a blend of lecture content, student discussion, interaction and hands on exercises that help build student comfort with ambiguity, uncertainty and complex problem solving.
Students will also be required to work on projects in teams. Student teams will conduct a start-up due diligence project and lead one class discussion on an AgTech subsector topic of their interest. Students will also be required to prepare a formal eight-minute business idea pitch with accompanying investor prospectus brief.

**Prerequisite:** AGBM 308W; MGMT 215; ENGR 310

AGBM 455: Retail Horticulture Business Management  
3 Credits

The nature, operation, and management of retail garden centers, winery tasting rooms, and independent food retailers. Overview of retail marketing principles and practices as they pertaining to horticultural retail businesses. Lectures, discussions, and projects focus on: selecting and pricing goods and services, understanding how retailers effectively use traditional promotion avenues and social media networks to achieve sales objectives and how to develop a relevant brand, cause marketing effort, and loyalty program; knowledge about retail layout and display strategies; that each consumer segment has different abilities to obtain goods and services, and about effective employee management.

**Prerequisite:** HORT 101; AG BM 101  
Cross-listed with: HORT 455

AGBM 460: Managing the Food System  
3 Credits

Firm management in the food system; coordination with suppliers and customers, including supply chain management, strategic thinking, risk management.

**Prerequisite:** AG BM 320, AG BM 338

AGBM 470A: Comparing Agricultural and Food Systems in the US and France: Lecture  
2.5 Credits

Explore key differences and similarities in the food and agricultural systems of the United States and France. INTAG 470A / AGBM 470A Comparing Agricultural and Food Systems in the US and France: Lecture (2.5) This course is designed to explore key similarities and differences in the food and agricultural systems of the United States and France. It introduces students to a number of overarching food and agricultural topics that pertain to both countries, and students explore and analyze these key issues from both countries' perspective. These overarching topics include the structure of agricultural and environmental policies, the use agricultural land for biofuel production, organic agriculture, food safety, attitudes and policies surrounding the use of genetically modified crops, the role of large agribusiness firms, attitudes towards diet and health, and several others important topics. Students conduct background reading on these topics, hear lectures – sometimes from guest presenters – that frame the topics from both the U.S. and France's perspective, and write reports on specific crops or foods that expose key similarities and differences between the two food systems. Finally, students pick one crop or food for an oral presentation that contains background information on how that crop fits into the two food systems, U.S. and France, and analyzes the key issues that relate to the overarching topics already identified. This course has two components that must be taken in partnership: 470A (FOOD SYS US/FRANCE I) and 470B (FOOD SYS US/FRANCE II). The first is a classroom-based course, and meets regularly during the semester. The second is a two-week component that takes place after the end of the semester. In this second component, after traveling to France, students hear presentations from the French perspective on the overarching topics identified earlier and also explore the topics first hand via field trips to farms, wholesale markets, retail markets, and other places relevant to the French food system. This component is organized by a host university, AgroParisTech. For these two weeks, students live in dorms within the city of Paris. Knowledge of French is not required.

**Prerequisite:** INTAG470A or 3 credits in social or behavioral sciences  
Cross-listed with: INTAG 470B

AGBM 470B: Comparing Agricultural and Food Systems in the United States and France: Travel  
0.5 Credits

Explore key differences and similarities in the food and agricultural systems of the United States and France. INTAG 470B / AGBM 470B Comparing Agricultural and Food Systems in the US and France: Travel  
0.5 Credits

**Prerequisite:** INTAG470A or AG BM470A  
Cross-listed with: INTAG 470B

AGBM 494: Undergraduate Research  
1-12 Credits/Maximum of 12

Supervised student activities on research projects identified on an individual or small group basis.

AGBM 494H: Honors Thesis  
1-6 Credits/Maximum of 6

Independent study directed by a faculty supervisor that culminates in the production of Agribusiness Management honors thesis.
Prerequisite: junior or senior standing in the Schreyer Honors College and permission of the Agribusiness Management honors advisor
Honors

AGBM 495A: Internship in Agribusiness and Rural Development
1-6 Credits/Maximum of 6
Supervised field experience in an agribusiness or rural development setting.

Prerequisite: prior approval by department
Full-Time Equivalent Course

AGBM 495B: Internship in International Agribusiness
6 Credits/Maximum of 6
Supervised field experience related to student’s major, minor, or option.

Prerequisite: prior approval by department
Full-Time Equivalent Course

AGBM 496: Independent Studies
1-18 Credits/Maximum of 18
Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

AGBM 497: Special Topics
1-9 Credits/Maximum of 9
Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

AGBM 499: Foreign Studies - Agribusiness Management
1-12 Credits/Maximum of 12
Study in selected countries of agricultural economic institutions and current agricultural economic problems.

International Cultures (IL)

Agricultural and Extension Education (AEE)

AEE 100: Agricultural Education Orientation
3 Credits
Examination of agricultural and extension education; exploration of aptitude and interest in teaching, including early clinical practicum. AEE 100 Agricultural Education Orientation (3) The purpose of the course is to allow students to explore the profession of teaching in both formal and non-formal settings. Students are provided opportunities, through class activities, projects, and on-site observation of teaching and learning situations, to explore the various aspects of teaching and learning. Through individual and group-work techniques students are provided the opportunity to investigate their potential interest in becoming a future educator of agriculture. Students study the history and philosophies associated with agricultural education within the state and nation. A cornerstone of the course includes instruction that allows students to understand the requirements to become certified in the state of Pennsylvania to teach Agricultural Education. This certification allows individuals to teach Agriculture in the public school system. Along with certification requirements for teaching, students investigate what it means to join the professional ranks of teachers, and the responsibilities associated with educating today’s youth. Students also learn the many techniques for teaching in, and about, agriculture in today’s society through actual teaching scenarios with their peers. Students plan and implement lessons related to the many areas of agriculture including, but not limited to horticulture, agricultural mechanics, animal science, plant science, forestry, wildlife, and biotechnology. During the course of the semester, students visit various agricultural education settings for observational purposes. The students investigate what is happening in the local agricultural education program related to the three major components of an agricultural education program; Classroom/ laboratory instruction, FFA, and Supervised Agricultural Experience. These observation hours may be counted towards the Entrance to Major requirements for the Agricultural and Extension Education major certification requirements.

AEE 201: Interpersonal Skills for Tomorrow’s Leaders
3 Credits
Study of concepts of self identity, values and interpersonal relations as related to professional and personal life. AEE 201 Interpersonal Skills for Tomorrow’s Leaders (3) (GS) The purpose of the course is to aid students in becoming competent in conducting interpersonal relationships in their daily life, and to help students acquire skills basic to becoming a leader in their personal life. The following topics will be addressed. A framework for interpersonal skill development sets the stage for improving one’s interpersonal skill. Understanding individual differences addresses information that is the foundation of effective interpersonal relations. Interpersonal communications deals with skills in sending and receiving messages. Developing teamwork skills sensitizes the student to a vital set of skills in the workplace as well as organizations. Group problem-solving and decision making provides additional skill in collaborative efforts. Cross-cultural relations and diversity develops cross-cultural skills in the classroom, community organizations and the workplace. Resolving conflicts develops skills in finding constructive solutions to differences of opinion and disputes with others. Becoming an effective leader addresses: 1) exercising effective leadership in clubs, organizations and the workplace, 2) motivating and helping others to develop and grow through coaching, counseling and teaching, 3) using power and influence for constructive purposes, and 4) translating ethical behaviors into usable skills. Each class meeting will focus on one or more concepts related to leadership and interpersonal skill development. Students will be provided a number of experiential activities that help them practice a particular set of skills. In addition, students will be required to complete a service learning project applying their leadership and interpersonal skills with individuals in the community who are in need of their help.

General Education: Social and Behavioral Sci (GS)

AEE 216: Practical Parliamentary Procedure
3 Credits
Practice in presiding over and participating in meetings conducted under rules of order.

Cross-listed with: CAS 216
AEE 295: Observation of Teaching in Agriculture and Environmental Science
1-3 Credits/Maximum of 3
Supervised observation of teacher and student activities in a selected high school; appraisal of related responsibilities of teachers of agriculture.

AEE 296: Independent Studies
1-12 Credits/Maximum of 12
Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

AEE 297: Special Topics
0.5-9 Credits/Maximum of 9
Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

AEE 311: Developing Youth Leadership through Organization and Program Structure
3 Credits
An orientation on how adolescents develop and emerge as leaders in their families, schools, organizations, and communities. AEE 311 Developing Youth Leadership through Organization and Program Structure (3) An orientation on how adolescents develop and emerge as leaders in their families, schools, organizations, and communities. Content will focus on the FFA organization and supervised agricultural experiences as well as 4-H & other non-formal youth organizations. While the course will be grounded in traditional and contemporary youth leadership philosophies and practices it will emphasize youth leadership development in the food, agriculture, and natural resource sciences.

AEE 313: School-Based Program Planning and Instructional Development
2 Credits
Planning and developing courses of study, summer programs, advisory committees, and facilities for vocational agriculture.

Prerequisite: AEE 100, AEE 295, AEE 311

AEE 330: Communication in Agricultural and Natural Resource Careers
3 Credits
The course explores the conventions of writing and speaking found in agricultural professions through the use of case studies.

Prerequisite: ENGL 015
Writing Across the Curriculum

AEE 349: Shop Processes for Agricultural Educators
3 Credits
