AGRICULTURAL SCIENCES

About the College
Richard Roush, Dean, College of Agricultural Sciences

The College of Agricultural Sciences was the first college established at Penn State and awarded the nation’s first baccalaureate degrees in agriculture in 1861. The college offers 17 undergraduate majors, 23 minors, three two-year programs and two certificate programs. Students can earn degrees related to animal and plant sciences; ecosystems and the environment; food and fuel; human and veterinary health and medicine; business, government, and nonprofits; teaching and extension; engineering; and more. Over 3,000 undergraduate students across the commonwealth call the college home. 80 percent are from non-agricultural backgrounds. Each year, the college invests $97 million into research and graduate study and $2.5 million into student scholarships. Penn State Extension, which fulfills the University’s responsibility as Pennsylvania’s designated land-grant institution, is administered through the college. Penn State Extension disseminates University expertise and resources to address the social, educational, and physical needs of citizens in each of the state’s 67 counties.

Mission and Goals
The mission of Penn State’s College of Agricultural Sciences is to discover, integrate, translate, and disseminate knowledge to enhance the food and agricultural system, natural resources and environmental stewardship, and economic and social well-being, thereby improving the lives of people in Pennsylvania, the nation, and the world. Our goal is to assert leadership and foster innovation through organizational improvement and change. By strategic investment of resources, we aim to address the changing needs of the Commonwealth.

Departments and Schools
Department of Agricultural and Biological Engineering
Founded in 1930, the Department of Agricultural and Biological Engineering in Penn State’s Colleges of Agricultural Sciences and Engineering, provides high quality engineering education, research, and outreach. Our mission is to advance the engineering sciences, business, and technical management of biological and agricultural systems by promoting scholarship and engaging our students and stakeholders.

MORE INFORMATION ABOUT THE DEPARTMENT OF AGRICULTURAL AND BIOLOGICAL ENGINEERING (http://abe.psu.edu)

Department of Agricultural Economics, Sociology, and Education
The scholarship in AESE is related to people, society, and economic systems grounded in theory and methods from the social, behavioral and economic sciences. We develop and employ approaches to discover fundamental and applied principles that advance science and improve the health, prosperity and welfare of people in Pennsylvania and beyond.

MORE INFORMATION ABOUT THE DEPARTMENT OF AGRICULTURAL ECONOMICS, SOCIOLOGY, AND EDUCATION (http://aese.psu.edu)

Department of Animal Science
The Department of Dairy and Animal Science originated in 1887, when Henry Armsby became director of the Agricultural Experiment Station. Today the department encompasses all food production animals and companion animals. We offer world-class teaching, research, and extension programs in a variety of key areas in animal agriculture and the food system.

MORE INFORMATION ABOUT THE DEPARTMENT OF ANIMAL SCIENCE (http://animalscience.psu.edu)

Department of Ecosystem Science and Management
The Department of Ecosystem Science and Management is Pennsylvania’s leader in preparing students for careers in sustainable management of natural resources. We conduct research to create new knowledge about forests, wildlife and fisheries, soils, and watersheds, and disseminate that knowledge through the classroom and extension education programs serving various stakeholders.

MORE INFORMATION ABOUT THE DEPARTMENT OF ECOSYSTEM SCIENCE AND MANAGEMENT (http://ecosystems.psu.edu)

Department of Entomology
The diverse members of the Department of Entomology investigate fundamental and applied biological questions from the level of the molecule to population and community. Our mission is to conduct outstanding research on insect science that will improve human health, quality of life, and the sustainability of our food and ecosystems.

MORE INFORMATION ABOUT THE DEPARTMENT OF ENTOMOLOGY (http://ento.psu.edu)

Department of Food Science
The Department of Food Science at Penn State is one of the premier food science departments in the country. Our undergraduate food science major offers students hands-on science dealing with real-world applications; small, friendly atmosphere; world-class internship experiences; excellent scholarship opportunities, and near-100% job placement.

MORE INFORMATION ABOUT THE DEPARTMENT OF FOOD SCIENCE (http://foodscience.psu.edu)

Department of Plant Pathology and Environmental Microbiology
The Department of Plant Pathology provides students with top-ranked educational and research opportunities in a collegial and friendly atmosphere. A major goal of our department is to support growth of healthy plants in order to beautify our living spaces, sustain our food supply, and maintain an inhabitable ecosystem.

MORE INFORMATION ABOUT THE DEPARTMENT OF PLANT PATHOLOGY AND ENVIRONMENTAL MICROBIOLOGY (http://plantpath.psu.edu)

Department of Plant Science
The Department of Plant Sciences encompasses horticulture, agronomy and crops and soils sciences. Our mission is to enhance our understanding and management of agronomic and horticultural crops and managed landscapes that are the foundation for managed
ecosystems, food and fiber production, landscapes and environmental quality to enhance human environments.

Department of Veterinary and Biomedical Sciences

The Department of Veterinary and Biomedical Sciences at Penn State achieves excellence in research, teaching, and outreach in biomedical sciences and veterinary medicine. Our Department offers three undergraduate degrees at Penn State: Immunology and Infectious Disease, Toxicology, and Veterinary and Biomedical Sciences.

Baccalaureate Degrees

- Agribusiness Management, B.S.
- Agricultural and Extension Education, B.S.
- Agricultural Science, B.S.
- Animal Science, B.S.
- BioRenewable Systems, B.S.
- Community, Environment, and Development, B.S.
- Environmental Resource Management, B.S.
- Food Science, B.S.
- Forest Ecosystem Management, B.S.
- Immunology and Infectious Disease, B.S.
- Landscape Contracting, B.S.
- Pharmacology and Toxicology, B.S.
- Plant Sciences, B.S.
- Turfgrass Science, B.S.
- Veterinary and Biomedical Sciences, B.S.
- Wildlife and Fisheries Science, B.S.

Associate Degrees

- Forest Technology, A.S.
- Turfgrass Science and Management, A.S.
- Wildlife Technology, A.S.

Minors

- Agribusiness Management, Minor
- Agricultural Systems Management, Minor
- Agronomy, Minor
- Animal Science, Minor
- Arboriculture, Minor
- Entomology, Minor
- Environmental and Renewable Resource Economics, Minor
- Environmental Resource Management, Minor
- Environmental Soil Science, Minor
- Equine Science, Minor
- Food Systems, Minor
- Forest Ecosystems, Minor
- Horticulture, Minor
- International Agriculture, Minor
- Leadership Development, Minor
- Mushroom Science and Technology, Minor
- Off-Road Equipment, Minor
- One Health, Minor
- Plant Pathology, Minor
- Poultry and Avian Science, Minor
- Wildlife and Fisheries Science, Minor

Certificates

- Agricultural Stewardship and Conservation, Certificate
- Community Forestry, Certificate
- Turfgrass Management, Advanced, Certificate
- Turfgrass Management, Basic, Certificate

College Procedures

Change of Campus

All students who begin their studies at one of the Penn State campuses are expected to complete their first two years at that campus. Students may request a temporary or permanent change of campus via LionPATH. More information about the change-of-campus process can be found at our website.

MORE INFORMATION ABOUT CHANGE OF CAMPUS (http://www.agsci.psu.edu/students/commonwealth-campuses/change-of-campus-policies-and-procedures/)

Concurrent Majors

A Concurrent Majors Program is one in which students take courses to concurrently meet the requirements of at least two majors, with graduation for all majors in the program occurring during the same semester.

To add a concurrent major in the College of Agricultural Sciences, students must:

1. Initiate the “Add Major” function in LionPATH (Update Academics)
2. Complete both paper forms (the university form and the college form)
3. Once the forms are completed and submitted, the LionPATH approval can take place.

MORE INFORMATION ABOUT CONCURRENT MAJORS (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/60-00-completing-more-than-one-undergraduate-program/#60-00)

READ SENATE POLICY 60-00: COMPLETING MORE THAN ONE UNDERGRADUATE MAJOR PROGRAM (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/60-00-completing-more-than-one-undergraduate-program/#60-00)

Academic Warning

A student who fails to earn a 2.00 cumulative grade-point average will be placed on academic warning. A student placed on academic warning will have a hold placed on registration and will be required to meet with an academic adviser in order for this registration hold to be removed. To remove academic warning, the cumulative grade-point average must be 2.00 or higher.

Students in Academic Warning should work closely with their assigned academic adviser or the College of Agricultural Sciences Advising Center to identify and address issues impacting their academic success.
Academic Suspension

A student in academic warning who fails to maintain a semester grade-point average of 2.00 or higher will be academically suspended. A student who has been academically suspended may not schedule courses at the University for two consecutive semesters. (Note: Summer session is equal to one semester.)

Students who are academically suspended should work closely with their assigned academic adviser or the College of Agricultural Sciences Advising Center to develop a success plan that will be implemented during suspension. At the conclusion of suspension, students must apply for re-enrollment and submit the required materials for college review.

Resources

Career Services and Experiential Learning

Students in the College of Agricultural Sciences are encouraged to seek out opportunities that will enrich their academic experience, outside of the classroom. The College of Agricultural Sciences offers programs and support for career readiness, including internship and job placement, undergraduate research opportunities, and professional growth and development.

Honors Programs

Schreyer Honors College

The Schreyer Honors College, regarded as one of the nation’s top programs of its kind, promotes achieving academic excellence with integrity, building a global perspective, and creating opportunities for leadership and civic engagement. Schreyer Scholars, including those admitted after their first or second year of enrollment, are a diverse and motivated group of approximately 2,000 students at University Park and 20 Commonwealth campuses. The College strives to educate students who will have an important and ethical influence in the world, to improve educational practice, and to continue to be recognized as a leading force in honors education nationwide.
