ENTOMOLOGY, MINOR

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

Program Description

Through the Department of Entomology, the minor in Entomology is primarily designed for (but not restricted to) students in the Agricultural and Biological Science majors seeking additional studies in entomological sciences. Successful completion of this minor area of study will help prepare students for graduate studies in entomology and related fields.

A minor in Entomology requires 18 credits in approved courses in addition to the major requirements of the student's choice. Appropriate course substitutions may be considered with minor adviser approval.

What is Entomology?

Entomology is the scientific study of insects (and terrestrial arthropods such as arachnids, centipedes, millipedes, and springtails) and their relationships to humans and the environment. Entomology contributes to a diverse array of disciplines, including agriculture, biodiversity, ecology, epidemiology, forensic science, genetics, human and veterinary medicine, molecular biology, pollination biology, chemical ecology, parasitology, and toxicology.

You Might Like This Program If...

- · You are passionate about biodiversity and fascinated with insects.
- You are interested in human or animal diseases, such as malaria, that are transmitted by insects.
- You are concerned about pollinators and their relationships to ecosystems and food supply.
- You are interested in invasive species and their impact on ecosystems and agriculture.
- · You enjoy basic science and/or applied science.
- You want to teach, conduct research, or have a career in agriculture, environmental science, or biology.

Requirements for the Minor

A grade of C or better is required for all courses in the minor, as specified by Senate Policy 59-10 (https://senate.psu.edu/students/policies-and-rules-for-undergraduate-students/59-00-minors-and-certificates/). In addition, at least six credits of the minor must be unique from the prescribed courses required by a student's major(s).

Code	Title	Credits
Prescribed Co	ourses	
Prescribed Co	urses: Require a grade of C or better	
ENT 496	Independent Studies	3
Additional Co	urses	
Additional Courses: Require a grade of C or better		

Select 3 credits f	rom the following:	3
ENT 313	Introduction to Entomology	
& ENT 314	and Management of Insect Pests of Ornamentals	
ENT 313	Introduction to Entomology	
& ENT 316	and Field Crops Entomology	
ENT 317	Turfgrass Insect Pest Management	
Select 3 credits f	rom the following:	3
AGECO 201	Introductory Agroecology	
ANSC 419W	Applied Animal Welfare	
BIOL 222	Genetics	
BIOL 406	Symbiosis	
BIOL 412	Ecology of Infectious Diseases	
BIOL 417	Invertebrate Zoology	
BIOL 427	Evolution	
BIOL 429	Animal Behavior	
BIOL 446	Physiological Ecology	
BIOL 464	Sociobiology	
HORT 445	Plant Ecology	
PPEM 300	Horticultural Crop Diseases	
PPEM 405	Microbe-Plant Interactions: Plant Disease and	
	Biological Control	
SOILS 412W	Soil Ecology	
WFS 460	Wildlife Behavior	
Select 9 credits f	rom the following:	9
ENT/VBSC	Biology of Animal Parasites	
402W		
ENT 410	Insect Structure and Function	
ENT 419W	Pesticide Science	
ENT 424	Sensory Biology of Insects	
ENT 450	Medical Entomology	
ENT/AGECO 457	Principles of Integrated Pest Management	
ENT 484	Insect Behavior	

Academic Advising

The objectives of the university's academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee's unit of enrollment will provide each advisee with a primary academic adviser, the information needed to plan the chosen program of study, and referrals to other specialized resources.

Career Paths

Careers

Students with a minor in Entomology have been successful in establishing careers in a diverse number of fields, including agriculture, pest management, biology, environmental science, and human and veterinary medicine, and in governmental regulatory and policy positions.

Opportunities for Graduate Studies

Students with entomology minors have gone on to graduate school in entomology, other agricultural sciences, or life and biological sciences to study basic or applied issues. During their undergraduate program at Penn State, students enrolled in the Entomology minor are strongly encouraged to conduct research in the lab of one or more entomology faculty; such experiences will help students determine if they would like to be involved in research for graduate school.
