LANDSCAPE CONTRACTING, B.S.

Begin Campus: Any Penn State Campus

End Campus: University Park

Program Learning Objectives

- **Create Site Solutions**: Students will use quantitative, artistic, and environmental knowledge to create workable site solutions. Students will work individually, collaboratively, and cooperatively.

- **Concept Communications**: Students will communicate complex design concepts to clients and industry professionals using 2-D and 3-D computer generated documents.

- **Landscape Management Plans**: Students will develop landscape management plans that reflect their knowledge of plants and their cultural requirements, biology, and the surrounding environment.

- **Business Management Skills**: Students will employ business management skills to analyze landscape project inputs and to develop comprehensive pricing proposals.
