ONE HEALTH, MINOR

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

Program Description
The minor in One Health will consist of four core courses (12 credits) and nine credits of supporting courses from a variety of disciplines. This course is open to all SCIENCE MAJORS. Students that are accepted in the minor, will consult with the coordinator such that the minor is completed in time. Substitution of supportive courses will be an option as determined by the coordinator to all the students to complete the minor on time.

What is One Health?
One Health is a multidisciplinary approach integrating human medicine, veterinary medicine, and environmental science to optimize the health of people, animals, plants, and ecosystems. Its holistic methodology recognizes that these three areas of study are intimately intertwined. One Health training allows students to think dynamically and globally about how health is affected, diseases are transmitted, and environment plays a role in disease.

You Might Like this Program If...
- You are dedicated to improving the lives of humans and animals
- You are interested in the interdependencies that shape our health and the environment
- You find passion promoting health on a local, national, or global scale
- You value interdisciplinary thinking in solving the world’s big problems

Requirements for the Minor
A grade of C or better is required for all courses in the minor, as specified by Senate Policy 59-10 (https://senate.psu.edu/students/policies-and-rules-for-undergraduate-students/59-00-minors-and-certificates/). In addition, at least six credits of the minor must be unique from the prescribed courses required by a student’s major(s).

Some courses have prerequisites which need to be completed before taking the course.

Supporting Courses and Related Areas
Supporting Courses and Related Areas: Require a grade of C or better

Select 0-9 credits from the following:
- ANSC 419W Applied Animal Welfare
- BBH 302 Diversity and Health
- BMB 464 Molecular Medicine
- BMH 490 Bioethics and Medical Humanities Capstone Course
- BIOL 415 Ecotoxicology
- CED 442 Changing Food Systems: Comparative Perspectives
- ENT 450 Medical Entomology
- ERM 430 Air Pollution Impacts to Terrestrial Ecosystems
- ENVSE 450 Environmental Health and Safety
- FDSC 408 Food Microbiology
- FOR/ WFS REQUIREMENTS FOR THE MINOR 430 Conservation Biology
- GEOG 436 Ecology, Economy, and Society
- GEOSC 420 Paleobotany
- MICRB 412 Medical Microbiology
- NUTR 430 Social Demography

Select 0-3 credits from the following:
- VBSC 403H Principles of Animal Disease Control
- VBSC 402W Biology of Animal Parasites
- VBSC 409 Wildlife Diseases

Select 0-3 credits from the following:
- VBSC 418 Bacterial Pathogenesis
- VBSC 435 Viral Pathogenesis

Select 0-3 credits from the following:
- VBSC 430 Principles of Toxicology
- VBSC 431 Environmental Toxicology

Academic Advising
The objectives of the university’s academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee’s unit of enrollment will provide each advisee with a primary academic adviser, the information needed to plan the chosen program of study, and referrals to other specialized resources.

Careers Paths
The One Health minor offers a new perspective to approach your other fields of study. With this minor, you can build a career that supports the interdependent relationships between humans and animals. You can pursue jobs in fields such as animal science, biology, environmental studies, food science, nursing, nutrition, pandemic prevention and response, public health, toxicology, and veterinary and biomedical sciences.

Opportunities for Graduate Study
The One Health approach is adopted throughout veterinary, human, and environmental graduate curricula. Many graduate opportunities exist: Biomedical and comparative medicine research, veterinary science and medicine, public health, emergency management, public health preparedness, sustainability, and global food security. In addition, Penn State has the One Health Microbiome Center which offers multiple graduate degrees. The Center fosters long-term working relationships while simultaneously providing infrastructure and resources to support transformative, interdisciplinary microbiome scholarship locally, nationally, and worldwide.
