VETERINARY AND BIO MEDICAL SCIENCES, B.S.

Begin Campus: Any Penn State Campus
End Campus: University Park

Program Description
This major provides a strong background in those biological and physical sciences underlying contemporary veterinary science and establishes a sound foundation for graduate-level study in veterinary and related biomedical disciplines. The curriculum provides students with a deep understanding of the foundational sciences while also highlighting the science of animal and human health. Students have the option to focus their area of study through the selection of 400-level supporting courses in a variety of rigorous scientific areas including but not limited to animal health, human and comparative studies, biology, biochemistry, neurobiology, immunology, toxicology, and wildlife science.

The mission of the Veterinary and Biomedical Sciences major is to prepare students for admission to veterinary school and/or entry into graduate programs. The major can also prepare students for post-baccalaureate employment in many science related fields including biomedical research and development. Students may prepare for employment or matriculation into graduate programs in disciplines such as bioinformatics, genomics, genetics, animal nutrition, animal reproduction, microbiology, animal health, human health, physiology, biochemistry, agriculture, pharmaceuticals, biotechnology, and comparative medicine.

What is Veterinary and Biomedical Sciences?
Veterinary and Biomedical Sciences major provides a hands-on, science-heavy preparation for veterinary school and other careers in the research and allied health professions like lab and field research, industry, pharmacovigilance, pharmaceuticals, biomedical development and sales, and beyond. The Penn State Veterinary and Biomedical Sciences major resides in a small, tight-knit community united by a fascination with animal health and well-being. The major has board-certified and clinically experienced veterinarians on faculty who are experienced in various fields of clinical medicine, research, and specialties who guide, instruct, and advise VBSC students. The program also boasts world-class researchers studying topics like cancer, infectious diseases, parasitic diseases, and metabolic diseases.

You Might Like this Program If...
- an aspiring veterinarian, physician, biomedical researcher, or other biomedical professional
- interested in One Health, public health, veterinary public health, or animal health
- passionate about science and animal health
- fascinated with applying scientific principles to real-life situations and case-based study
- focused on issues like emerging infectious diseases, food and agricultural safety and production, and control and prevention of animal diseases

Entrance to Major
In order to be eligible for entrance to the Veterinary and Biomedical Sciences major a student must have:
1. attained a cumulative grade point average of at least a 2.0 and
2. completed BIOL 110, CHEM 110, CHEM 111 and earned a grade of C or better in each of these courses.
3. attained third-semester classification

Degree Requirements
For the Bachelor of Science degree in Veterinary and Biomedical Sciences, a minimum of 123 credits is required:

</table>

Requirements for the Major
To graduate, a student enrolled in the major must earn a grade of C or better in each course designated by the major as a C-required course, as specified by Senate Policy 82-44 (https://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#82-44).

Code   Title                                    Credits
Prescribed Courses
CHEM 112 Chemical Principles II                    3
CHEM 113 Experimental Chemistry II                 1
MICRB 202 Introductory Microbiology Laboratory    2
PHYS 250 Introductory Physics I                     4
PHYS 251 Introductory Physics II                    4
VBSC 211 The Immune System and Disease             3
VBSC/BIOLREQUIREME† FOR THE MAJOR421
Prescribed Courses: Require a grade of C or better
ANSC 201 Animal Science                             4
ANSC 301 Principles of Animal Nutrition             3
CHEM 110 Chemical Principles I                      3
CHEM 111 Experimental Chemistry I                   1
Additional Courses
ANSC 423 Comparative Physiology of Domestic Animals 3
or BIOL 472 Human Physiology
MICRB 201 Introductory Microbiology                 3
or MICRB 201H Introductory Microbiology
STAT 200 Elementary Statistics                      3-4
or STAT 250 Introduction to Biostatistics
Select 3 credits from the following:
AGBM 101 Economic Principles of Agribusiness Decision Making
General Education

Connecting career and curiosity, the General Education curriculum provides the opportunity for students to acquire transferable skills necessary to be successful in the future and to thrive while living in interconnected contexts. General Education aids students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. These are requirements for all baccalaureate students and are often partially incorporated into the requirements of a program. For additional information, see the General Education Requirements (https://bulletins.psu.edu/undergraduate/general-education/baccalaureate-degree-general-education-program/) section of the Bulletin and consult your academic adviser.

The keystone symbol appears next to the title of any course that is designated as a General Education course. Program requirements may also satisfy General Education requirements and vary for each program.

Foundations (grade of C or better is required and Inter-Domain courses do not meet this requirement.)
  • Quantification (GQ): 6 credits
  • Writing and Speaking (GWS): 9 credits

Breadth in the Knowledge Domains (Inter-Domain courses do not meet this requirement.)
  • Arts (GA): 3 credits
  • Health and Wellness (GHW): 3 credits
  • Humanities (GH): 3 credits
  • Social and Behavioral Sciences (GS): 3 credits
  • Natural Sciences (GN): 3 credits

Integrative Studies
  • Inter-Domain Courses (Inter-Domain): 6 credits

Exploration
  • GN, may be completed with Inter-Domain courses: 3 credits
  • GA, GH, GN, GS, Inter-Domain courses. This may include 3 credits of World Language course work beyond the 12th credit level or the requirements for the student's degree program, whichever is higher: 6 credits

University Degree Requirements

First Year Engagement
All students enrolled in a college or the Division of Undergraduate Studies at University Park, and the World Campus are required to take 1 to 3 credits of the First-Year Seminar, as specified by their college First-Year Engagement Plan.

Other Penn State colleges and campuses may require the First-Year Seminar; colleges and campuses that do not require a First-Year Seminar provide students with a first-year engagement experience.

First-year baccalaureate students entering Penn State should consult their academic adviser for these requirements.

Cultures Requirement
6 credits are required and may satisfy other requirements
  • United States Cultures: 3 credits
  • International Cultures: 3 credits

Writing Across the Curriculum
3 credits required from the college of graduation and likely prescribed as part of major requirements.

Total Minimum Credits
A minimum of 120 degree credits must be earned for a baccalaureate degree. The requirements for some programs may exceed 120 credits. Students should consult with their college or department adviser for information on specific credit requirements.

Quality of Work
Candidates must complete the degree requirements for their major and earn at least a 2.00 grade-point average for all courses completed within their degree program.

Limitations on Source and Time for Credit Acquisition
The college dean or campus chancellor and program faculty may require up to 24 credits of course work in the major to be taken at the location or in the college or program where the degree is earned. Credit used toward degree programs may need to be earned from a particular source or
within time constraints (see Senate Policy 83-80 [https://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#83-80]). For more information, check the Suggested Academic Plan for your intended program.

Program Learning Objectives

- **Critical Review of Literature:** Students will be able to search, critically evaluate, and discuss the scientific literature and popular press articles in the field of Veterinary and Biomedical Sciences.
- **Life & Physical Science Competency:** Students will exhibit competency in the physical and life sciences, including anatomy, physiology, chemistry, cell biology, microbiology, and immunology.
- **Application of Data and Knowledge:** Students will be able to apply research data and their knowledge from the physical and life sciences toward the management of health and diseases of animals.
- **Effective Communication:** Students will demonstrate effective oral and written communication to both professional and lay audiences.
- **Career Development:** Students will know career options within the Veterinary and Biomedical Sciences and be prepared to succeed in postgraduate jobs and in professional or graduate schools.

Academic Advising

The objectives of the university’s academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and-out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee’s unit of enrollment will provide each advisee with a primary advisor who will guide the advisee through the curriculum and college policies, and referrals to other specialized resources.

Suggested Academic Plan

The suggested academic plan(s) listed on this page are the plan(s) that are in effect during the 2024-25 academic year. To access previous years’ suggested academic plans, please visit the archive [https://bulletins.psu.edu/undergraduate/archive/] to view the appropriate Undergraduate Bulletin edition.

Veterinary and Biomedical Sciences, B.S. at University Park Campus

The course series listed below provides **only one** of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

* Course requires a grade of C or better for the major
† Course requires a grade of C or better for General Education
# Course is an Entrance to Major requirement
‡ Course satisfies General Education and degree requirement

1 Selected from BA 100, ECON 14, ECON 102, ECON 104, or AGBM 101
Entrance-to-Major Requirements:
- a cumulative GPA of at least a 2.0
- earn a minimum of 29.1 credits
- completed BIOL 110, CHEM 110, CHEM 111 with a C or better

ENGL 202C is strongly recommended. Graduate and professional schools may require technical writing.

University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy Cultural Diversity Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

General Education includes Foundations (GWS and GQ), Knowledge Domains (GHW, GN, GA, GH, GS) and Integrative Studies (Inter-domain) requirements. N or Q (Honors) is the suffix at the end of a course number used to help identify an Inter-domain course, but the inter-domain attribute is used to fill audit requirements. Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

All incoming Schreyer Honors College first-year students at University Park will take ENGL 137H/CAS 137H in the fall semester and ENGL 138T/CAS 138T in the spring semester. These courses carry the GWS designation and satisfy a portion of that General Education requirement. If the student’s program prescribes GWS these courses will replace both ENGL 15/ENGL 30H and CAS 100A/CAS 100B/CAS 100C. Each course is 3 credits.

Advising Notes:
- Courses with 497 numbers and 500 level courses MAY be eligible for substitution for the above list. Consult your adviser and the program coordinator concerning substitution prior to registration in the course.
- BMB selection follows Organic Chemistry selection. Students enrolled in CHEM 202, 203 must select BMB 211/212/221. Students cannot receive credit for both BMB 211 and BMB 401.
- Students wishing to attend veterinary or graduate school are encouraged to select courses required for matriculation at their future institutions.
Veterinary and Biomedical Sciences, B.S. at Commonwealth Campuses

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

Advising Notes:
- Students should consult with an academic adviser regarding selection of CHEM 202 and CHEM 203 versus CHEM 210, CHEM 212, and CHEM 213.
- If completing CHEM 212, CHEM 213 must also be completed.
- The BMB selection should be based on the student’s Organic Chemistry selection. In most cases, students enrolled in CHEM 202 and 203 course select BMB 211, BMB 212, and BMB 221.
- Students cannot receive credit for both BMB 211 and BMB 401.
- Students that desire to attend veterinary school or graduate school are strongly encouraged to select additional animal biology courses in their elective selections.
- Students should consult with an academic adviser regarding the appropriate selection of supporting courses. Supporting courses must be selected from an approved list.
- Students should work with an academic adviser in the development of their plan as some courses are not taught every semester.

Career Paths

The major provides a high-science education that opens doors for careers in pharmaceuticals, industry, human health fields, laboratory medicine, and research. Student often develop new interests through exposure to fields they never knew. This broad science curriculum supports career flexibility within the science field!

Opportunities for Graduate Study

Grads thrive at top veterinary, medical, and other biomedical programs, and are recruited to work, teach, and conduct biomedical research across numerous STEM and animal health industries. The VBSC department also offers graduate study in various disciplines.
