MARKETING, MINOR

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

What is Marketing?

Marketing is a broad field that seeks to understand consumer, firm, and societal behaviors and subsequently identify ideas, products, services, and methodological approaches that deliver value. According to the American Marketing Association, Marketing involves “the set of institutions and processes for creating, communicating, delivering, and exchanging offerings valuable to customers, clients, partners, and society at large. Not only does marketing guide firms’ managerial decisions in the marketplace, but it also offers insights into consumer awareness, public policy making, and non-commercial exchange of value (e.g., altruistic giving).”

Academic Advising

The objectives of the university’s academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee’s unit of enrollment will provide each advisee with a primary academic adviser, the information needed to plan the chosen program of study, and referrals to other specialized resources.
