

MEDICAL PLASTICS, CERTIFICATE

Requirements for an undergraduate certificate may be completed at any campus location offering the specified courses for the certificate.

Certificate Learning Objectives

- Students will, through application, demonstrate the ability to set up and qualify a manufacturing process for medical devices.
- Students will understand the requirements of polymers used in medical devices. This includes considering the needs of the product, manufacturing, and regulations.
- Students will demonstrate an understanding of the regulatory environment in which medical devices are designed, developed, and manufactured.
