PHYSICS, B.S. (BEHREND)

Begin Campus: Any Penn State Campus

End Campus: Erie

Program Learning Objectives

• Core Knowledge: Learn, integrate, and apply knowledge and methodological approaches from the basic core areas of electricity and magnetism, thermodynamics, optics, and quantum mechanics.

• Mathematical Models: Build a conceptual understanding of the connections between our mathematical models and the nature of the universe.

• Critical Thinking: Use critical thinking to formulate and solve quantitative physical problems by applying theory, mathematical, and computational methods.

• Scientific Inquiry: Apply the methods of scientific inquiry in designing and performing experiments and using data analysis for laboratory and research projects.

• Communication: Effectively communicate their course work and research through organized, logical, and scientifically sound oral and written reports.
