PSYCHOLOGICAL SCIENCE, MINOR

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

Program Description
The Psychology minor is designed to provide undergraduate students with a broad overview of topics and domains within psychology, knowledge and skills related to research methods in psychology, and deeper knowledge of research, theory, and application in one or two specific content domains. Students completing this minor will find a flexible selection of coursework in psychology.

What is Psychological Science?
Psychological science is the study of a broad topics in psychology and human behavior—perception, cognition, attention, emotion, intelligence, motivation, brain function, personality, interpersonal relationships, child development, aging, and the other important functions that make us human.

You Might Like This Program If...
• Human behavior fascinates you.
• You're an engineering student interested in how people interact with machines and technology.
• You're a business student interested in workplace dynamics, leadership, motivation, and consumer behavior.
• You're a student in a health-related program interested in brain functioning related to typical and abnormal behaviors.
• You're an education student and interested in child development, parenting, learning, and motivation.
• You're interested in human diversity in all its forms.
