PSYCHOLOGY, B.A. (BEHREND)

Begin Campus: Any Penn State Campus

End Campus: Erie

Program Learning Objectives

- **Career-Related Skills:**
  - Demonstrate knowledge of professional options and required training for careers in the major subfields of psychology.
  - Demonstrate the ability to identify personally-relevant career options to implement their psychological knowledge, skills, and values in occupational pursuits in a variety of settings.

- **Communication Skills:**
  - Communicate effectively (in writing and/or orally) the results of a project or internship.
  - Demonstrate the ability to effectively extract central points and summarize psychological research literature and to write in the format of psychological research.

- **Content Knowledge:**
  - Demonstrate knowledge of major psychological concepts, theories, and empirical findings.
  - Demonstrate the ability to apply psychological concepts and theories to research and real life situations.

- **Diversity and Ethical Considerations:**
  - Show evidence of knowledge and appreciation for cultural diversity and relativity in human experience and for the complexity of human behavior and interactions.
  - Demonstrate knowledge, and the application of, basic principles of scientific and professional ethics.
  - Demonstrate sensitivity to ethical concerns and professionalism (including cultural considerations) in settings where applications of psychology and/or psychological research occur.

- **Research Skills:**
  - Differentiate among the research methods used in psychology and apply the designs in evaluation or development of a research study.
  - Demonstrate the ability to analyze and interpret quantitative psychological data using statistics, graphs, and data tables.
  - Use technology for studying concepts and conducting research.

- **Thinking Skills:**
  - Use critical and creative thinking, skeptical inquiry, and the scientific approach to solve problems related to behavior and mental processes.
  - Demonstrate critical thinking in the analysis, evaluation, and interpretation of information in the scientific literature to distinguish the scientific literature from other sources.
