TELECOMMUNICATIONS AND MEDIA INDUSTRIES, B.A.

Begin Campus: Any Penn State Campus
End Campus: University Park

Program Description
The Telecommunications and Media Industries program seeks to prepare informed, responsible professionals for leadership roles in the electronic communication and information industries. The program stresses the social, cultural and economic impact of electronic media, including radio, television, videogames, telephones and the Internet.

Students can choose an emphasis in programming and production, management and entrepreneurship, law and policy.

Graduates go on to careers at local radio and television stations; broadcast, cable and satellite networks; Internet content and service providers; wired and wireless telephone companies; and other related media and entertainment industries. The major emphasizes the business and legal parameters of telecommunications, making it an excellent preparation for law school or graduate school and careers in government policy and the entertainment field.

What is Telecommunications and Media Industries?
Telecommunications and Media Industries is the array of electronic media industries that make up the global communications ecosystem. This comprises radio, television, telephones and the internet. Telecommunications includes traditional broadcast, cable, satellite and telephone companies, such as radio and TV stations and networks and music and film companies, as well as internet businesses involved in audio and video production, video games, social media, the Internet of Things, and more. This includes internet service providers, cloud computing, mobile telephones, and more. Students learn current industry practices and essential technological, economic, and legal concepts to develop the skills necessary to become successful leaders in all forms of electronic media and related industries throughout the world.

You Might Like This Program If...
• You are creative and like to produce audio or video content.
