

MECHATRONICS TECHNOLOGY, MINOR

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

Program Description

Mechatronics is an interdisciplinary technical discipline that combines mechanical, electrical, electronics, control and computer engineering technology. The field deals with the design, development, control, and application of advanced electro-mechanical systems. Such systems will include sensors, actuators, microprocessors, controllers, software, computer, and mechanical hardware components. The purpose of the mechatronics technology minor is to provide undergraduate students an opportunity to take relevant courses that will sequentially build on their knowledge and understanding of mechatronic systems and to provide recognition to those who do so.

What is Mechatronics Technology?

Mechatronics Technology is a multidisciplinary field of engineering and technology that includes a combination of mechanical, electronics, computer, systems, and controls technology, and focuses on real-world application of these areas. The field deals with the design, development, control, and application of advanced electro-mechanical systems. Such systems will include sensors, actuators, microprocessors, controllers, software, computer, and mechanical hardware components. The applications of mechatronics technology include medical, defense, manufacturing, robotics, automotive, and distributed systems and smart consumer products. Mechatronics engineers and technologists develop new solutions to industrial problems using mechanical and electronic systems and computer technology in addition to designing and building completely new products by integrating various technologies. They may also develop and test factory production lines by integrating automation to improve existing process.

You Might Like This Program If...

- You like hands-on and creative problem-solving.
- You like understanding how robotics or automation work.
- You are interested in working with technology as it relates to manufacturing and systems engineering. You work well within collaborative, multidisciplinary teams.
- You are interested in a career as a hands-on technologist or test engineer.
- You are interested in the synergy of electrical, computer and mechanical systems.

Program Requirements

Requirement	Credits
Requirements for the Minor	18-23

Requirements for the Minor

A grade of C or better is required for all courses in the minor, as specified by Senate Policy 59-10 (<https://senate.psu.edu/students/policies-and-rules-for-undergraduate-students/59-00-minors-and-certificates/>).

In addition, at least six credits of the minor must be unique from the prescribed courses required by a student's major(s).

Code	Title	Credits
Additional Courses		
<i>Additional Courses: Require a grade of C or better</i>		
EET 311	Alternating Current Circuits	3-4
or EET 315	Linear and Discrete System Analysis	
Select one of the following:		3
EMCH 211	Statics	
ET 300	Mechanics I: Statics	
MET 111	Mechanics for Technology: Statics	
Supporting Courses and Related Areas		
<i>Supporting Courses and Related Areas: Require a grade of C or better</i>		
Select 6-8 credits of the following: ¹		6-8
<i>Group A</i>		
EE 310	Electronic Circuit Design I	
or EET 212W	Op Amp and Integrated Circuit Electronics	
Select one of the following sequences:		
CM PEN 271 & CM PEN 275	Introduction to Digital Systems and Digital Design Laboratory	
CM PET 117 & CM PET 120	Digital Electronics and Digital Electronics Laboratory	
<i>Group B</i>		
Select one of the following:		
EET 341	Measurements and Instrumentation	
EMET 330	Measurement Theory and Instrumentation	
ME 345	Instrumentation, Measurements, and Statistics	
ME 345W	Instrumentation, Measurements, and Statistics	
MET 341	Mechanical Measurements and Instrumentation	
Select one of the following:		
EMCH 212	Dynamics	
ET 321	Dynamics	
MET 206	Dynamics	
Select one course each from the following categories:		6-8
<i>Category I</i>		
CMPEH 472	Microcontrollers	
EE 485	Energy Systems and Conversion	
<i>Category II</i>		
EET 433	Control System Analysis and Design	
EET 440	Applied Feedback Controls	
EMET 410	Automated Control Systems	
MET 454	Automatic Controls	
MET 455		

¹ Students graduating with an MET major should take 8 credits from Group A; students graduating with an EET major should take 6-7 credits from Group B; all other students should take one course from each group, totaling 7-8 credits.

Academic Advising

The objectives of the university's academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of

both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee's unit of enrollment will provide each advisee with a primary academic adviser, the information needed to plan the chosen program of study, and referrals to other specialized resources.
