ENERGY BUSINESS AND
FINANCE, B.S.

Begin Campus: Any Penn State Campus
End Campus: University Park

Career Paths
Energy Business and Finance provides equally good preparation for a
career or for further graduate study. EBF graduates pursue a wide variety
of career options, most of which are in the energy or environmental
sector. Many also pursue graduate study, especially when the EBF major
is paired with a quantitative minor or concurrent major at Penn State.

Careers
There are hundreds of EBF alumni now working for oil and gas firms;
electric utilities or power generation companies; consulting firms,
banks, and insurance companies; or in the public and nonprofit sector.
Common career roles for Energy Business and Finance majors include
analyst positions, commodities trading and marketing, energy delivery
scheduling, and project finance analysts. Energy Business and Finance
students are also competitive for rotational programs with major energy
firms.

Opportunities for Graduate Studies
Graduates from the Energy Business and Finance program are well
positioned for professional graduate study in economics, business,
finance, and law. Students with strong research interests should consider
the M.S. or Ph.D. programs in Energy and Mineral Engineering or Energy,
Environmental and Food Economics.
