You Might Like This Program If...

• You enjoy combining disciplines such as geology, chemistry, physics, and mathematics to solve complex problems of importance to society.

Petroleum and Natural Gas Engineering, B.S.

Begin Campus: Any Penn State Campus
End Campus: University Park

Program Description

The undergraduate curriculum in Petroleum and Natural Gas Engineering has been designed to equip the student with the fundamentals necessary to achieve lifelong professional growth. Graduates are prepared to enter both the private and public sectors as petroleum and natural gas engineers or to pursue further education at the graduate level.

The courses are structured to serve as a melting pot for theory, application to case studies, and engineering project design. This enables the student to appreciate and understand that a successful engineering design project requires a sound theoretical foundation, experimentation and engineering judgment. The thrust of the program structure emphasizes the fundamentals of mathematics and earth and engineering sciences and integrates them in application to traditional petroleum and natural gas engineering topics. Design projects are required throughout the curriculum. Execution of these projects requires an amalgamation of problem formulation strategies, testing of alternative design methodologies, feasibility studies, and economic and environmental considerations. Graduates of the program are expected to perform in various facets of the petroleum industry including drilling, production, evaluation, transportation, and storage. The petroleum and natural gas engineering faculty and staff are committed to an interactive teaching and learning environment to ensure that the student is an active participant in the learning process. General education opportunities are sufficiently broad and diverse in scope to enable the student to tailor the educational experience to particular interests, background, and expected role in society.

What is Petroleum and Natural Gas Engineering?

Petroleum and Natural Gas Engineering is a field related to extracting hydrocarbon resources from subsurface reservoirs. This engineering discipline is about designing, implementing, and managing solutions for subsurface energy production and storage. Petroleum and natural gas engineers solve crucial problems related to one of the most important resources for society today: energy. They predominantly work in the upstream sector of the oil and energy industries, which comprises exploration, field development, well drilling, production and injection well optimization. Once oil and gas are discovered, petroleum engineers determine optimum drilling and completion methods, monitor and manage production operations, and design reservoir development strategies. They are responsible for providing engineering solutions with global economic, environmental, geopolitical, and societal impacts. They are well-suited to solve complex problems in geothermal energy, geological carbon sequestration, hydrogen and energy storage, wastewater disposal, and environmental remediation of soil, groundwater, and other geologic media.

You Might Like This Program If...

• You want to use science and engineering principles to tackle the challenges of global energy demands.
• You seek a profession that offers domestic and international networking opportunities.
• You enjoy working in the field, performing sophisticated computer simulations, or interpreting geologic and production data.

Entrance to Major

In addition to the minimum grade point average (GPA) requirements described in the University Policies, the Petroleum and Natural Gas Engineering entrance to major requirement must also be completed with a minimum grade of C: CHEM 110, MATH 140, MATH 141, and PHYS 211.

Degree Requirements

For the Bachelor of Science degree in Petroleum and Natural Gas Engineering, a minimum of 129 credits is required:

<table>
<thead>

Prescribed Courses: Require a grade of C or better

- **CHEM 110** Chemical Principles I 3
- **CHEM 112** Chemical Principles II 3
- **EME 301** Thermodynamics in Energy and Mineral Engineering 3
- **EME 303** Fluid Mechanics in Energy and Mineral Engineering 3
- **EMSC 100S** Earth and Mineral Sciences First-Year Seminar 3
- **ENGL 202C** Effective Writing: Technical Writing 3
- **MATH 140** Calculus With Analytic Geometry I 4
- **MATH 141** Calculus With Analytic Geometry II 4
- **PHYS 211** General Physics: Mechanics 4
- **PHYS 212** General Physics: Electricity and Magnetism 4
- **PNG 405** Rock and Fluid Properties 3
- **PNG 406** Rock and Fluid Laboratory 1
- **PNG 410** Applied Reservoir Engineering 3
- **PNG 450** Drilling Engineering 3
- **PNG 451** Drilling Laboratory 1
- **PNG 475** Production and Completions Engineering 3

Additional Courses

Select 3 credits from the following:

- **PHIL 103** Ethics
- **PHIL 106** Business Ethics
- **PHIL 107** Philosophy of Technology
- **PHIL 233** Ethics and the Design of Technology

Additional Courses: Require a grade of C or better

Select 3 credits from the following:

- **ESL 15** ESL Composition for American Academic Communication II
- **ENGL 15** Rhetoric and Composition
- **ENGL 30H** Honors Rhetoric and Composition

Supporting Courses and Related Areas

Select 6 credits in consultation with adviser (students may apply 6 credits of ROTC)

- **CAS 100** First-Year Seminar; colleges and campuses that do not require a First-Year Engagement Plan.
- **EMCH 211** and **EMCH 213**. Students at commonwealth campuses and/or transfer students can substitute the combination of EMCH 211 and EMCH 213.
- **EMSC 100S**. The following substitutions are allowed for students attending campuses where the indicated course is not offered: CAS 100 can be substituted for EMSC 100S.

General Education

Connecting career and curiosity, the General Education curriculum provides the opportunity for students to acquire transferable skills necessary to be successful in the future and to thrive while living in interconnected contexts. General Education aids students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. These are requirements for all baccalaureate students and are often partially incorporated into the requirements of a program. For additional information, see the General Education Requirements (https://bulletins.psu.edu/undergraduate/general-education/baccalaureate-degree-general-education-program/) section of the Bulletin and consult your academic adviser.

The keystone symbol appears next to the title of any course that is designated as a General Education course. Program requirements may also satisfy General Education requirements and vary for each program.

Foundations (grade of C or better is required and Inter-Domain courses do not meet this requirement.)

- **Quantification (GQ):** 6 credits
- **Writing and Speaking (GWS):** 9 credits

Breadth in the Knowledge Domains (Inter-Domain courses do not meet this requirement.)

- **Arts (GA):** 3 credits
- **Health and Wellness (GHW):** 3 credits
- **Humanities (GH):** 3 credits
- **Social and Behavioral Sciences (GS):** 3 credits
- **Natural Sciences (GN):** 3 credits

Integrative Studies

- **Inter-Domain Courses (Inter-Domain):** 6 credits

Exploration

- **GA, GH, GN, GS, Inter-Domain courses:** This may include 3 credits of World Language course work beyond the 12th credit level or the requirements for the student’s degree program, whichever is higher: 6 credits

University Degree Requirements

First Year Engagement

All students enrolled in a college or the Division of Undergraduate Studies at University Park, and the World Campus are required to take 1 to 3 credits of the First-Year Seminar, as specified by their college First-Year Engagement Plan.

Other Penn State colleges and campuses may require the First-Year Seminar; colleges and campuses that do not require a First-Year Seminar provide students with a first-year engagement experience.

First-year baccalaureate students entering Penn State should consult their academic adviser for these requirements.

Cultures Requirement

6 credits are required and may satisfy other requirements

- **United States Cultures:** 3 credits
- **International Cultures:** 3 credits

Writing Across the Curriculum

3 credits required from the college of graduation and likely prescribed as part of major requirements.

Total Minimum Credits

A minimum of 120 degree credits must be earned for a baccalaureate degree. The requirements for some programs may exceed 120 credits. Students should consult with their college or department adviser for information on specific credit requirements.

Quality of Work

Candidates must complete the degree requirements for their major and earn at least a 2.00 grade-point average for all courses completed within their degree program.
Limitations on Source and Time for Credit Acquisition
The college dean or campus chancellor and program faculty may require up to 24 credits of course work in the major to be taken at the location or in the college or program where the degree is earned. Credit used toward degree programs may need to be earned from a particular source or within time constraints (see Senate Policy 83-80 (https://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#83-80)). For more information, check the Suggested Academic Plan for your intended program.

Integrated B.S. in Petroleum and Natural Gas Engineering and M.S. in Energy and Mineral Engineering
Requirements for the Integrated B.S. in Petroleum and Natural Gas Engineering and M.S. in Energy and Mineral Engineering can be found in the Graduate Bulletin (https://bulletins.psu.edu/graduate/programs/majors/energy-mineral-engineering/#integratedundergradgradprogramstext).

Program Educational Objectives
1. Our graduates will integrate key science and engineering principles to address the technological challenges of the petroleum and natural gas industry.
2. Our graduates will practice in a broad range of petroleum engineering fields working on teams that create innovative solutions to the most pressing problems of the petroleum and natural gas industry by implementing the ideals of ethical behavior, professionalism, and environmental sensitivity and social awareness.
3. Our graduates will be recognized as critical and independent thinkers and will assume positions of leadership in defining the social, intellectual, business and technical dimensions of the professional organizations they belong to.
4. Our graduates will continue their lifelong learning process and participate in graduate education to remain as effective professionals in the workplace of the future.

Student Outcomes
Student outcomes describe what students are expected to know and be able to do by the time of graduation. The Petroleum and Natural Gas Engineering program is designed to enable students to:

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. Communicate effectively with a range of audiences
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

7. Acquire and apply new knowledge as needed, using appropriate learning strategies.

Academic Advising
The objectives of the university’s academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of-class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee’s unit of enrollment will provide each advisee with a primary academic adviser, the information needed to plan the chosen program of study, and referrals to other specialized resources.

**Total Credits 129**

* Course requires a grade of C or better for the major
† Course requires a grade of C or better for General Education
‡ Course is an Entrance to Major requirement
# Course is an Entrance to Major requirement
†† Course satisfies General Education and degree requirement

**University Requirements and General Education Notes:**

US and IL are abbreviations used to designate courses that satisfy Cultural Diversity Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

General Education includes Foundations (GWS and GQ), Knowledge Domains (GHW, GN, GA, GH, GS) and Integrative Studies (Inter-domain) requirements. N or Q (Honors) is the suffix at the end of a course number used to help identify an Inter-domain course, but the inter-domain attribute is used to fill audit requirements. Foundations courses (GWS and GQ) require a grade of 'C' or better.

All incoming Schreyer Honors College first-year students at University Park will take ENGL 137H/CAS 137H in the fall semester and ENGL 138T/CAS 138T in the spring semester. These courses carry the GWS designation and satisfy a portion of that General Education requirement. If the student's program prescribes GWS these courses will replace both ENGL 15/ENGL 30H and CAS 100A/CAS 100B/CAS 100C. Each course is 3 credits.

1 Students who begin their studies at non-UP locations and/or join the college after their first year should substitute CAS 100A, CAS 100B, or CAS 100C (GWS) for EMSC 100S (GWS). EMSC 100S Earth and Mineral Sciences First year Seminar (3) is a required course only for students who begin their studies at UP in the College of Earth and Mineral Sciences.

2 Approved Technical Electives for the PNGE major can be found at the department web site: http://www.eme.psu.edu/pnge/techelectives Students may use up to 6 credits of ROTC as technical electives.

**Advising Notes:**

Only students who are enrolled in EMSC or DUS are eligible to apply to PNGE.

Courses required for the major may be offered fall semester only, spring semester only, or both fall and spring semesters. Consult with your adviser and department to discuss your academic progress and course sequencing.

The PNGE program strongly recommends that students have summer internships, as many companies will only consider hiring PNGE graduates who have had at least one internship.

College and Department Notes: Pursuant to Senate Policy 83-80.5, the Petroleum and Natural Gas Engineering program at Penn State requires that at least 24 credits of course work within the department sponsoring the major be completed in residence at University Park under the instruction of College of Earth and Mineral Sciences faculty. External transfer credit requests should follow the Transfer Credit procedure at Penn State Admissions, which may involve evaluation of the external course by faculty for approval.
Petroleum and Natural Gas Engineering, B.S. at Commonwealth Campuses

Penn State Admissions, which may involve evaluation of the external course by faculty for approval.

**Career Paths**

Graduates of this program find rewarding careers across the globe as engineers for governmental and regulatory bodies, oil and gas producing companies, and other independent and service companies in the energy sector.

**Careers**

Our graduates may be candidates for careers in a wide range of industries in both the private and public sector including major oil and gas production companies, large and small independents and service companies and government agencies. The oil and gas industry is a global industry, and both U.S. domestic and international careers are commonly pursued by PNGE graduates.

MORE INFORMATION ABOUT POTENTIAL CAREER OPTIONS FOR GRADUATES OF THE PETROLEUM AND NATURAL GAS ENGINEERING PROGRAM (https://www.eme.psu.edu/recruiting-careers/)

**Opportunities for Graduate Studies**

Graduates may be well suited to pursue graduate-level studies. Further study toward an M.S. or Ph.D. can lead to research, university, or management positions.

MORE INFORMATION ABOUT OPPORTUNITIES FOR GRADUATE STUDIES (https://www.eme.psu.edu/graduate/)

**Professional Resources**

- Society of Petroleum Engineers Penn State Student Chapter (https://sites.psu.edu/spepennstate/positive-energy/)
- American Association of Drilling Engineers Penn State Student Chapter (https://orgcentral.psu.edu/organization/aade/)
- Positive Energy (https://sites.psu.edu/spepennstate/positive-energy/)
- International Society of Explosives Engineers Penn State Student Chapter (https://www.eme.psu.edu/undergraduate/undergraduate-resources/student-organizations/)

**Accreditation**

The Bachelor of Science in Petroleum and Natural Gas Engineering at University Park is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the commission’s General Criteria and Program Criteria for Petroleum and Similarly Named Engineering Programs.

**Professional Licensure/Certification**

Many U.S. states and territories require professional licensure/certification to be employed. If you plan to pursue employment in a licensed profession after completing this program, please visit the Professional Licensure/Certification Disclosures by State (https://opair.psu.edu/plc/dashboard/) interactive map.
