AEROSPACE ENGINEERING, B.S.

Begin Campus: Any Penn State Campus
End Campus: University Park

Program Description
This major emphasizes the analysis, design, and operation of aircraft and spacecraft. Students learn the theories and practices in the fundamental subjects of aeronautics, astronautics, aerodynamics and fluid dynamics, aerospace materials and structures, dynamics and automatic control, aircraft stability and control and/or orbital and attitude dynamics and control, air-breathing and rocket propulsion, aircraft systems design and/or spacecraft systems design. All of these place significant weight on the development and use of teamwork and communications skills for effective problem-solving. Graduates in aerospace engineering find employment in the customary settings such as government laboratories, large and small aerospace firms, and in nontraditional positions that also require the use of systems-engineering approaches to problem-solving; they can also pursue graduate study in aerospace engineering and related fields.

What is Aerospace Engineering?
Aerospace engineering is the primary field of engineering concerned with the design, development, testing, and production of aircraft, spacecraft, and related systems and equipment. The field has traditionally focused on problems related to atmospheric and space flight, with two major and overlapping branches: aeronautical engineering and astronautical engineering. Aerospace engineers develop leading-edge technologies and integrate them into aerospace vehicle systems used for transportation, communications, exploration, and defense applications. This involves the design and manufacturing of aircraft, spacecraft, propulsion systems, satellites, and missiles, as well as the design and testing of aircraft and aerospace products, components, and subassemblies. Successful aerospace engineers possess in-depth skills in, and an understanding of, aerodynamics, materials and structures, propulsion, vehicle dynamics and control, and software.

You Might Like This Program If...
- You are interested in developing leading-edge technologies and integrating them into aerospace vehicle systems used for transportation, communications, exploration, and defense applications.
- You want to obtain a solid understanding of the foundations of aerospace systems: aerodynamics, structures, propulsion, dynamics and controls, and software, as well as unmanned air vehicles (UAVs), nano-materials, autonomous systems, and wind energy.
- You want to develop professional excellence, engineering thinking, and gain deep technical knowledge in the core disciplines and integrative systems of aerospace engineering through an innovative curriculum and world-class instruction.
- You want to make a significant global impact.

Entrance to Major
This program currently has administrative enrollment controls. Administrative Enrollment Controls are initiated when limitations of space, faculty, or other resources in a major prevent accommodating all students who request them. Students must follow the administrative enrollment controls that are in effect for the semester that they enter the university.

First-Year Students Entering Summer 2021, Fall 2021, Spring 2022
In order to be eligible for entrance to this major, students must satisfy the following requirements:
- 29-55 graded Penn State credits (excludes transfer and AP credits)
- completed with a grade of C or better: CHEM 110, EDSGN 100, MATH 140, MATH 141, PHYS 211
- earned a minimum cumulative grade-point average (GPA) of 3.10

Students Who Entered Prior to Summer 2021
Students who entered the University from Summer 2018 through Spring 2021 should view the administrative enrollment controls in the appropriate Undergraduate Bulletin archive (https://bulletins.psu.edu/undergraduate/archive/). Students who entered the University prior to the summer 2018 semester should view the administrative enrollment controls for the semester that they entered the university (https://advising.psu.edu/entrance-major-requirements/) on the Academic Advising Portal.

Degree Requirements
For the Bachelor of Science degree in Aerospace Engineering, a minimum of 131 credits is required:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Education</td>
<td>45</td>
</tr>
<tr>
<td>Requirements for the Major</td>
<td>111-117</td>
</tr>
</tbody>
</table>

27 of the 45 credits for General Education are included in the Requirements for the Major. This includes: 9 credits of GN courses; 6 credits of QG courses; 3 credits of GS courses; 9 credits of GWS courses.

The first two years of study are similar to those in other engineering majors and provide students with a basic education for the engineering profession. Students need to complete EMCH 212, CMPSC 121, CMPSC 131, CMPSC 200, and CMPSC 201, MATH 220, MATH 230, and MATH 250 or MATH 251 prior to the start of the junior year in order to meet graduation requirements in the following two years. Six of the nine technical-elective credits taken in the senior year must be aerospace engineering courses.

General Education
Connecting career and curiosity, the General Education curriculum provides the opportunity for students to acquire transferable skills necessary to be successful in the future and to thrive while living in interconnected contexts. General Education aids students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. These are requirements for all baccalaureate students and are often partially incorporated into the requirements of a program. For additional information, see the General Education Requirements (https://bulletins.psu.edu/undergraduate/general-education/baccalaureate-degree-general-education-program/) section of the Bulletin and consult your academic adviser.
Academic Plan for your intended program.

Total Minimum Credits
A minimum of 120 degree credits must be earned for a baccalaureate
degree. The requirements for some programs may exceed 120 credits.
Students should consult with their college or department adviser for
information on specific credit requirements.

Total Minimum Credits
A minimum of 120 degree credits must be earned for a baccalaureate
degree. The requirements for some programs may exceed 120 credits.
Students should consult with their college or department adviser for
information on specific credit requirements.

Quality of Work
Candidates must complete the degree requirements for their major and
earn at least a 2.00 grade-point average for all courses completed within
their degree program.

Limitations on Source and Time for Credit Acquisition
The college dean or campus chancellor and program faculty may require
up to 24 credits of course work in the major to be taken at the location or
in the college or program where the degree is earned. Credit used toward
degree programs may need to be earned from a particular source or
within time constraints (see Senate Policy 83-80 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#82-44)). For more information, check the Suggested Academic Plan for your intended program.

Requirements for the Major
To graduate, a student enrolled in the major must earn a grade of C or
better in each course designated by the major as a C-required course, as
specified by Senate Policy 82-44 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#82-44).

Prescribed Courses: Require a grade of C or better
AERSP 301  Aerospace Structures  3
AERSP 306  Aeronautics  3
AERSP 309  Astronautics  3
AERSP 311  Aerodynamics I  3
AERSP 313  Aerospace Analysis  3
CHEM 110  Chemical Principles I  3
EDSGN 100  Cornerstone Engineering Design  3
EMCH 212  Dynamics  3
ENGL 202C  Effective Writing: Technical Writing  3
MATH 140  Calculus With Analytic Geometry I  4
MATH 141  Calculus with Analytic Geometry II  4
PHYS 211  General Physics: Mechanics  4
PHYS 212  General Physics: Electricity and Magnetism  4

Additional Courses
Select 1 credit of First-Year Seminar  1
AERSP 413  Stability and Control of Aircraft  3
or AERSP 450  Orbit and Attitude Control of spacecraft  3
Select 3 credits from the following:  3
CMPS 121  Introduction to Programming Techniques  2
CMPS 131  Programming and Computation I: Fundamentals  3
CMPS 200  Programming for Engineers with MATLAB  3
CMPS 201  Programming for Engineers with C++  3
Select 3 credits from the following:  3
ECON 102  Introductory Microeconomic Analysis and Policy  3
ECON 104  Introductory Macroeconomic Analysis and Policy  3
ECON 14  Principles of Economics  3
Select 5-6 credits of the following:  5-6
EMCH 210  Statics and Strength of Materials  3
EMCH 211  Statics  3
& EMCH 213  and Strength of Materials  3
Select one of the following sequences:  5
Aerospace Engineering, B.S. 3

AERSP 401A  Spacecraft Design--Preliminary & AERSP 401B and Spacecraft Design--Detailed
AERSP 402A  Aircraft Design--Preliminary & AERSP 402B and Aircraft Design--Detailed
Select 3-4 credits from the following:  3-4
AERSP 424  Advanced Computer Programming
EE 210  Circuits and Devices
EE 212  Introduction to Electronic Measuring Systems
Additional Courses: Require a grade of C or better
CAS 100A  Effective Speech  3
or CAS 100B  Effective Speech
ENGL 15  Rhetoric and Composition  3
or ENGL 30H  Honors Rhetoric and Composition
MATH 250  Ordinary Differential Equations  3-4
or MATH 251  Ordinary and Partial Differential Equations
Supporting Courses and Related Areas
Select 6 credits of Aerospace Technical Elective (ATE) courses from department list  6
Select 3 credits of General Technical Elective (GTE) courses from department list  3
Select 3 credits of Limited Elective (LE) courses from department list  3

1 Students who complete Basic ROTC may substitute 6 of the ROTC credits for 3 credits of LE and 3 credits of GHW.

Program Educational Objectives
Within a few years after graduation, we expect graduates of our program will be:

• Engaged in careers in the discipline of aerospace engineering, and in related disciplines where aerospace engineering knowledge and skills are beneficial, that applies the knowledge and skills for precise engineering analysis and open-ended problem solving and design.
• Pursuing continued professional development through multiple pathways including graduate programs in aerospace engineering, and in related disciplines where aerospace engineering knowledge and skills bring a useful perspective, with the skills needed for engineering research and more advanced studies.
• Acting as professionals representing aerospace engineering concerns with effective communication and teamwork skills, awareness of current issues, and ethical decision making.

Student Outcomes
Student outcomes describe what students are expected to know and be able to do by the time of graduation. The Aerospace Engineering program is designed to enable students to:

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. Communicate effectively with a range of audiences
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. Acquire and apply new knowledge as needed, using appropriate learning strategies.

Academic Advising
The objectives of the university's academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee's unit of enrollment will provide each advisee with a primary academic adviser, the information needed to plan the chosen program of study, and referrals to other specialized resources.

* Course requires a grade of C or better for the major
† Course requires a grade of C or better for General Education
# Course is an Entrance to Major requirement
†† Course satisfies General Education and degree requirement

College Notes:

- AERSP 401A/AERSP 401B and AERSP 402A/AERSP 402B: Students may schedule either the spacecraft design sequence (AERSP 401A and AERSP 401B) or the aircraft design sequence (AERSP 402A and AERSP 402B). The appropriate control course (AERSP 413 or AERSP 450) should be scheduled accordingly.
- AERSP Technical Elective: Select from department list. Students who complete the Cooperative Education Program may substitute 3 co-op credits for a Technical Elective and 3 co-op credits for a Limited Elective.
- Health and Physical Activity Elective (GHW): Students who complete the ROTC Program may substitute 3 ROTC credits for the GHW requirement and 3 ROTC credits for a Limited Elective.
- Limited Elective: Select from department list. Students who complete the ROTC Program may substitute 3 ROTC credits for the GHW requirement and 3 ROTC credits for a Limited Elective. Students who complete the Cooperative Education Program may substitute 3 co-op credits for a Technical Elective and 3 co-op credits for a Limited Elective.
- These courses offered at University Park in fall semester only:
  - AERSP 301
  - AERSP 309
  - AERSP 311
  - AERSP 313
  - AERSP 401A
  - AERSP 402A
  - AERSP 410
  - AERSP 413
  - AERSP 450
- These courses offered at University Park in spring semester only:
  - AERSP 304
  - AERSP 306
  - AERSP 312
  - AERSP 401B
  - AERSP 402B
- These courses offered at University Park in fall and spring semesters:
Aerospace Engineering, B.S.

• AERSP 305W
• AERSP 424

Career Paths
Aerospace engineers work primarily in the aerospace industry, at systems and software suppliers, corporate labs, government labs, and universities. Their skill set is extremely broad and multidisciplinary, and the experience of aerospace engineers as systems architects and engineers allows them to make contributions in many diverse sectors. Our graduate programs provide outstanding research opportunities across a broad spectrum of topics, and encompass both computational and experimental research approaches. Students may embrace traditional fields like aerodynamics, propulsion, flight science, vehicle dynamics, aeroacoustics, and rotorcraft engineering, as well as leading-edge research areas such as UAVs, commercial space, nanomanufacturing, and wind energy.

Careers
The industries that employed the most aerospace engineers are:

• Aerospace product and parts manufacturing.
• Engineering services.
• Federal government, excluding postal service.
• Research and development in the physical, engineering, and life sciences.
• Navigational, measuring, electromedical, and control instruments manufacturing.

MORE INFORMATION ABOUT POTENTIAL CAREER OPTIONS FOR GRADUATES OF THE AEROSPACE ENGINEERING PROGRAM (http://career.engr.psu.edu/)

Opportunities for Graduate Studies
The aerospace engineering department offers the following graduate degree options: "Master of Engineering (M.Eng.)" Master of Science (M.S.)" Doctor of Philosophy (Ph.D.) Students may also earn a graduate minor in computational science and/or a graduate certificate in wind energy.

MORE INFORMATION ABOUT OPPORTUNITIES FOR GRADUATE STUDIES (http://www.aero.psu.edu/academics/graduate/prospective-students.aspx)

Professional Resources
• AHS International (https://vtol.org/)
• American Institute of Aeronautics and Astronautics (https://www.aiaa.org/)
• American Astronautical Society (http://astronautical.org/)

Accreditation
The baccalaureate program in Aerospace Engineering is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org/.

MORE INFORMATION ABOUT ABET ACCREDITATION (https://www.abet.org/)

Professional Licensure/Certification
Many U.S. states and territories require professional licensure/certification to be employed. If you plan to pursue employment in a licensed profession after completing this program, please visit the
