CIVIL ENGINEERING, B.S. (ENGINEERING)

Begin Campus: Any Penn State Campus

End Campus: University Park

Program Educational Objectives
The educational objectives of our undergraduate program will prepare our graduates to:

• begin and sustain a career in consulting, industry, or state and federal
government agencies, such as the departments of transportation and
departments of environmental protection;
• lead and work in interdisciplinary teams needed to design sustainable
and resilient infrastructure through knowledge and application of
environmental, geotechnical, materials, structural, transportation, and
water resources engineering;
• engage in life-long learning opportunities, including graduate school;
and
• obtain and maintain professional licensure

Student Outcomes
Student outcomes describe what students are expected to know and be
able to do by the time of graduation. The Civil Engineering program is
designed to enable students to:

1. Identify, formulate, and solve complex engineering problems by
applying principles of engineering, science, and mathematics
2. Apply engineering design to produce solutions that meet specified
needs with consideration of public health, safety, and welfare, as well
as global, cultural, social, environmental, and economic factors
3. Communicate effectively with a range of audiences
4. Recognize ethical and professional responsibilities in engineering
situations and make informed judgments, which must consider the
impact of engineering solutions in global, economic, environmental,
and societal contexts
5. Function effectively on a team whose members together provide
leadership, create a collaborative and inclusive environment,
establish goals, plan tasks, and meet objectives
6. Develop and conduct appropriate experimentation, analyze and
interpret data, and use engineering judgment to draw conclusions
7. Acquire and apply new knowledge as needed, using appropriate
learning strategies.
