COMPUTER ENGINEERING, B.S. (ENGINEERING)

Begin Campus: Any Penn State Campus
End Campus: University Park

Program Description
The mission of the faculty of the undergraduate computer engineering program at Penn State is to provide students with the knowledge and experience needed to pursue a productive lifelong career in industry or to engage in further study at the graduate level. Students participate in a balanced program of instruction covering the basic principles of the design and application of computer systems. The program includes coverage in breadth and depth of basic science, engineering, and abstract concepts of information handling. Students specialize in and are prepared for careers in the design, analysis and use of hardware, software and systems. The program is structured to ensure that graduates have a clear understanding of the design and the applications of computers, as well as the ability to apply this knowledge throughout their professional careers.

What is Computer Engineering?
Computer engineering provides society with the myriad engines that have powered the information age from the smallest sensor motes to the fastest supercomputers and largest data centers, and with the tools and expertise to use the current generation of computers to design the next. With the ubiquitous integration of mobile communications and computational elements in everything from appliances to cars to clothing to the electrical grid, computer engineers are responsible for developing systems and devices that have transformed the capabilities of both individuals and entire economies.

You Might Like This Program If...
You excel in math, physics, chemistry, digital systems and computational theory will enjoy computer engineering.

Entrance to Major
This program currently has administrative enrollment controls. Administrative Enrollment Controls are initiated when limitations of space, faculty, or other resources in a major prevent accommodating all students who request them. Students must follow the administrative enrollment controls that are in effect for the semester that they enter the university.

First-Year Students Entering Summer 2018, Fall 2018, Spring 2019
In order to be eligible for entrance to this major, students must satisfy the following requirements:

- 40-59 cumulative credits (credits completed at Penn State for which a quality letter grade was earned)
- completed with a grade of C or better: CHEM 110, MATH 140, MATH 141, MATH 250 or MATH 251, PHYS 211, and PHYS 212
- earned a minimum of 3.00 cumulative GPA

Students Who Entered Prior to Summer 2018
Students who entered the University prior to the summer 2018 semester should view the administrative enrollment controls for the semester that they entered the university (http://advising.psu.edu/entrance-major-requirements) on the Academic Advising Portal.

Degree Requirements
For the Bachelor of Science degree in Computer Engineering, a minimum of 128 credits is required:

General Education
Connecting career and curiosity, the General Education curriculum provides the opportunity for students to acquire transferable skills necessary to be successful in the future and to thrive while living in interconnected contexts. General Education aids students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. These are requirements for all baccalaureate students and are often partially incorporated into the requirements of a program. For additional information, see the General Education Requirements (http://bulletins.psu.edu/undergraduate/general-education/baccalaureate-degree-general-education-program) section of the Bulletin and consult your academic adviser.

The keystone symbol appears next to the title of any course that is designated as a General Education course. Program requirements may also satisfy General Education requirements and vary for each program.

Foundations (grade of C or better is required.)
- Quantification (GQ): 6 credits
- Writing and Speaking (GWS): 9 credits

Knowledge Domains
- Arts (GA): 6 credits
- Health and Wellness (GHW): 3 credits
- Humanities (GH): 6 credits
- Social and Behavioral Sciences (GS): 6 credits
- Natural Sciences (GN): 9 credits

Integrative Studies (may also complete a Knowledge Domain requirement)
- Inter-Domain or Approved Linked Courses: 6 credits

27 of these 45 credits are included in the Requirements for the Major.

University Degree Requirements
First Year Engagement
All students enrolled in a college or the Division of Undergraduate Studies at University Park, and the World Campus are required to take 1 to 3 credits of the First-Year Seminar, as specified by their college First-Year Engagement Plan.

Other Penn State colleges and campuses may require the First-Year Seminar; colleges and campuses that do not require a First-Year Seminar provide students with a first-year engagement experience.

First-year baccalaureate students entering Penn State should consult their academic adviser for these requirements.

Cultures Requirement
6 credits are required and may satisfy other requirements
Writing Across the Curriculum
3 credits required from the college of graduation and likely prescribed as part of major requirements.

Total Minimum Credits
A minimum of 120 degree credits must be earned for a baccalaureate degree. The requirements for some programs may exceed 120 credits. Students should consult with their college or department adviser for information on specific credit requirements.

Quality of Work
Candidates must complete the degree requirements for their major and earn at least a 2.00 grade-point average for all courses completed within their degree program.

Limitations on Source and Time for Credit Acquisition
The college dean or campus chancellor and program faculty may require up to 24 credits of course work in the major to be taken at the location or in the college or program where the degree is earned. Credit used toward degree programs may need to be earned from a particular source or within time constraints (see Senate Policy 83-80). For more information, check the Suggested Academic Plan for your intended program.

Requirements for the Major
This includes 27 credits of General Education courses: 9 credits of GN courses; 6 credits of GQ courses; 3 credits of GS courses; 9 credits of GWS courses.

To graduate, a student enrolled in the major must earn a grade of C or better in each course designated by the major as a C-required course, as specified by Senate Policy 82-44 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#82-44). For more information, check the Suggested Academic Plan for your intended program.

Program Educational Objectives
In particular, within a few years after graduation, graduates in computer engineering should be able to:

1. **Computer Organization And Design**
   - EE 210: Circuits and Devices
   - EE 310: Electronic Circuit Design I
   - EE 353: Signals and Systems: Continuous and Discrete-Time

2. **Calculus With Analytic Geometry**
   - MATH 140: Calculus With Analytic Geometry I
   - MATH 141: Calculus With Analytic Geometry II

3. **General Physics: Mechanics**
   - PHYS 211: General Physics: Mechanics
   - PHYS 212: General Physics: Electricity and Magnetism

Additional Courses
Select 1 credit of First-Year Seminar
- CAS 100A: Effective Speech
- or CAS 100B: Effective Speech

CMPSC 121: Introduction to Programming Techniques
- or CMPSC 131: Programming and Computation I: Fundamentals

CMPSC 122: Intermediate Programming
- or CMPSC 132: Programming and Computation II: Data Structures

ENGL 15: Rhetoric and Composition
- or ENGL 30: Honors Freshman Composition

Select 3 credits of the following:
- ECON 14: Principles of Economics
- ECON 102: Introductory Microeconomic Analysis and Policy
- ECON 104: Introductory Macroeconomic Analysis and Policy

Select 6 credits of the following:
- CMPEN 411: VLSI Digital Circuits
- CMPEN 416: Digital Integrated Circuits
- CMPEN 417: Digital Design Using Field Programmable Devices
- CMPEN 454: Fundamentals of Computer Vision
- CMPEN 455: An Introduction to Digital Image Processing
- CMPEN 471: Logical Design of Digital Systems
- CMPEN 472: Microprocessors and Embedded Systems
- CMPEN 473: Microcomputer Laboratory
- CMPEN 475: Functional Verification
- EE 453: Fundamentals of Digital Signal Processing
- EE 456: Introduction to Neural Networks

Select 6 credits from any 400-level CMPEN or CMPSC course

Additional Courses: Require a grade of C or better
Select 4 credits of the following:
- CMPEN 270: Digital Design: Theory and Practice
- CMPEN 271: Introduction to Digital Systems & CMPEN 275: Digital Design Laboratory

Supporting Courses and Related Areas
Select 6 credits from department list

1. CMPEN 275 does not require a grade of C or better.

2. Students may apply up to 3 credits of Co-op. Students who complete ROTC may apply up to 3 credits of ROTC as department list credits and 3 credits of ROTC as GHW credits.
1. Work in industry or government producing or evaluating components of computer hardware and/or software systems.
2. Work in teams to design, implement, and/or maintain components of computer hardware and/or software systems.
3. Stay current through professional conferences, certificate programs, post-baccalaureate degree programs, or other professional educational activities.

Student Outcomes
Student outcomes describe what students are expected to know and be able to do by the time of graduation. The Computer Engineering program is designed to enable students to:

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. Communicate effectively with a range of audiences
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. Acquire and apply new knowledge as needed, using appropriate learning strategies.

Academic Advising
The objectives of the university’s academic advising program are to help advisese identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee’s unit of enrollment will provide each advisee with a primary academic adviser, the information need to plan the chosen program of study, and referrals to other specialized resources.

Suggested Academic Plan
Computer Engineering - Ending at University Park Campus
The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

If you are starting at a campus other than the one this plan is ending at, please refer here:
http://advising.engr.psu.edu/degree-requirements/academic-plans-by-major.aspx

First Year
Fall | Credits | Spring | Credits
--- | --- | --- | ---
CHEM 110 (GQ)† | 3 | CMPSC 131 or 121 (GQ)† | 3

General Education Course† | 3 | General Education Course† | 3
 Able to design solutions to complex problems. Every advance in computer hardware relies on computer engineers to understand how they work and how to leverage their power and capabilities.

**Careers**

System software and application developers; embedded system designers; network architects; digital designers; and computer architects.

**Opportunities for Graduate Studies**

Broaden educational credentials and improve your marketability in the global workplace.

**Professional Resources**

- Association of Women in Computing (http://www.awc.cse.psu.edu)
- Association for Computing Machinery Student Chapter (http://acm.psu.edu)

**Accreditation**

The baccalaureate program in Computer Engineering is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).
