ENGINEERING LEADERSHIP DEVELOPMENT, MINOR

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

Program Description
This interdisciplinary minor is designed to provide engineering students with critical principles and skills. Engineering graduates must demonstrate the ability to assume leadership roles in a competitive technologically complex global society. There are increasing demands for engineers to be able to deal effectively with other people, including the ability to work in teams and to interact with customers and other organizations on both national and international levels. Students will employ engineering case studies in active and collaborative classroom settings to develop these skills. The minor consists of 18 semester hours. Students in all engineering majors are eligible.

What is Engineering Leadership Development?
The Engineering Leadership Development (ELD) program focuses on providing a challenging, relevant, and dynamic world-class program that further engages students in their education while preparing them for leadership roles in a technical work environment. Courses in engineering leadership provide you with the understanding of individual, team, and organizational leadership; business acumen, global competencies and multicultural awareness; and innovation and management. Skill sets of effective leaders are practiced in local and virtual international teams aimed at designing and building practical solutions.

You Might Like This Program If...
• You are interested in developing your leadership potential and business acumen.
• You would like to increase your multicultural awareness and global competencies.
• You would like to enhance your innovation and management skills.

Entrance to Minor
For admission to the minor, students must have completed ENGR 408. Students should apply during their sophomore year.

Additional Courses: Require a grade of C or better
Select two courses from this group:
- ENGR 405 Project Management for Professionals
- ENGR 409 Leadership in Organizations
- ENGR 422 Leadership of International Virtual Engineering Teams
- ENGR 496 Independent Studies

Supporting Courses and Related Areas: Require a grade of C or better
Select 6 credits in consultation with the coordinator of the Engineering Leadership Development Minor

Academic Advising
The objectives of the university’s academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee’s unit of enrollment will provide each advisee with a primary academic adviser, the information needed to plan the chosen program of study, and referrals to other specialized resources.

Career Paths

Careers
Penn State students with a minor in Engineering Leadership Development have been successful in establishing careers as team leaders, managers,
and entrepreneurs, in a wide variety of engineering, research, and education fields.
