SURVEYING ENGINEERING, B.S.

Begin Campus: Wilkes-Barre
End Campus: Wilkes-Barre

Program Description
The Surveying Engineering major provides a basic undergraduate education required for private and public service in the profession of surveying. Particular emphasis is placed on fundamental surveying principles required in all areas of surveying. Instruction is provided in the main divisions of surveying, including land surveying, mapping, photogrammetry, satellite imagery, and the global navigation satellite system (GNSS). They also study legal principles related to land surveying, professional ethics, applications for Geographic Information Systems (GIS) in surveying, and data management techniques. Through the use of projects and capstone courses students will design measurement systems, alignments, land information systems, and land development.

What is Surveying Engineering?
Surveying is the science of measuring physical features of Earth to collect spatial information and to establish land boundaries. Surveying engineers learn the elements of surveying as applied to construction, land, topographic, geodetic, city, and photogrammetric surveys.

You Might Like This Program If...
- You enjoy the outdoors.
- You have an interest in math and science.
- You are passionate about robotic, GPS, scanner, GIS, and drone technology.
- You are interested in geographic data and how it is captured, stored, manipulated, analyzed, and managed.

Direct Admission to the Major
Incoming first-year students who meet the program admission requirements are admitted directly into the major. Admission restrictions may apply for change-of-major and/or change-of-campus students.

For more information about the admission process for this major, please send a request to the college, campus, or program contact (listed in the Contact tab).

Degree Requirements
For the Bachelor of Science degree in Surveying Engineering, a minimum of 132 credits is required:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Education</td>
<td>45</td>
</tr>
<tr>
<td>Electives</td>
<td>3-4</td>
</tr>
<tr>
<td>Requirements for the Major</td>
<td>110-111</td>
</tr>
</tbody>
</table>

27 of the 45 credits for General Education are included in the Requirements for the Major. This includes: 9 credits of GWS courses; 6 credits of GQ courses; 9 credits of GN courses; 3 credits of GS courses.

Requirements for the Major
To graduate, a student enrolled in the major must earn a grade of C or better in each course designated by the major as a C-required course, as specified by Senate Policy 82-44 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#82-44).

Code | Title                                                   | Credits |
-----|---------------------------------------------------------|---------|
      | Prescribed Courses                                      |         |
EDSGN 100 | Cornerstone Engineering Design                          | 3       |
MATH 230  | Calculus and Vector Analysis                            | 4       |
MATH 251  | Ordinary and Partial Differential Equations             | 4       |
PHYS 211  | General Physics: Mechanics                              | 4       |
PHYS 212  | General Physics: Electricity and Magnetism              | 4       |
PHYS 214  | General Physics: Wave Motion and Quantum Physics        | 2       |
SUR 212   | Route and Construction Surveying                        | 4       |
SUR 222   | Photogrammetry                                           | 3       |
SUR 262   | Coordinate Systems in Map Projections                   | 2       |
SUR 341   | Adjustment Computations                                 | 3       |
SUR 351   | Geodetic Models                                         | 3       |
SUR 362   | Introduction to Geospatial Information Engineering      | 3       |

SUR 162   | Methods in Large Scale Mapping                          | 3       |
SUR 241   | Surveying Measurement Analysis                          | 3       |
SUR 272   | Cadastral Surveying                                     | 3       |
SUR 372W  | Legal Aspects of Land Surveying                         | 3       |
      | Additional Courses: Require a grade of C Or better      |         |
CE 410    | Sustainable Residential Subdivision Design               | 3       |
or SUR 482| Land Development Design                                 |         |
Select one of the following:                                      |         |
ECON 102  | Introductory Microeconomic Analysis and Policy          |         |
ECON 104  | Introductory Macroeconomic Analysis and Policy          |         |
ECON 14   | Principles of Economics                                 |         |
CAS 100A  | Effective Speech                                        | 3       |
or CAS 100B| Effective Speech                                        |         |
ENGL 15   | Rhetoric and Composition                                | 3       |
or ENGL 30H Honors Rhetoric and Composition
ENGL 202C Effective Writing: Technical Writing
or ENGL 202D Effective Writing: Business Writing

Supporting Courses and Related Areas

Select 6 credits from the following:
CE 300-level courses 1
CE 400-level courses 1
SUR 313 Integrated Surveying
SUR 422 Digital Photogrammetry
SUR 496 Independent Studies
SUR 497 Special Topics

1 These courses are not offered at Wilkes-Barre campus. They are provided to accommodate concurrent degree students in CE and SURE.

General Education

Connecting career and curiosity, the General Education curriculum provides the opportunity for students to acquire transferable skills necessary to be successful in the future and to thrive while living in interconnected contexts. General Education aims students in developing intellectual curiosity, a strengthened ability to think, and a deeper sense of aesthetic appreciation. These are requirements for all baccalaureate students and are often partially incorporated into the requirements of a program. For additional information, see the General Education Requirements (https://bulletins.psu.edu/undergraduate/general-education/baccalaureate-degree-general-education-program/) section of the Bulletin and consult your academic adviser.

The keystone symbol appears next to the title of any course that is designated as a General Education course. Program requirements may also satisfy General Education requirements and vary for each program.

Foundations (grade of C or better is required.)
- Quantification (GQ): 6 credits
- Writing and Speaking (GWS): 9 credits

Knowledge Domains
- Arts (GA): 6 credits
- Health and Wellness (GHW): 3 credits
- Humanities (GH): 6 credits
- Social and Behavioral Sciences (GS): 6 credits
- Natural Sciences (GN): 9 credits

Integrative Studies (may also complete a Knowledge Domain requirement)
- Inter-Domain or Approved Linked Courses: 6 credits

University Degree Requirements

First Year Engagement

All students enrolled in a college or the Division of Undergraduate Studies at University Park, and the World Campus are required to take 1 to 3 credits of the First-Year Seminar, as specified by their college First-Year Engagement Plan.

Other Penn State colleges and campuses may require the First-Year Seminar; colleges and campuses that do not require a First-Year Seminar provide students with a first-year engagement experience.

First-year baccalaureate students entering Penn State should consult their academic adviser for these requirements.

Cultures Requirement
6 credits are required and may satisfy other requirements
- United States Cultures: 3 credits
- International Cultures: 3 credits

Writing Across the Curriculum
3 credits required from the college of graduation and likely prescribed as part of major requirements.

Total Minimum Credits
A minimum of 120 degree credits must be earned for a baccalaureate degree. The requirements for some programs may exceed 120 credits. Students should consult with their college or department adviser for information on specific credit requirements.

Quality of Work
Candidates must complete the degree requirements for their major and earn at least a 2.00 grade-point average for all courses completed within their degree program.

Limitations on Source and Time for Credit Acquisition
The college dean or campus chancellor and program faculty may require up to 24 credits of course work in the major to be taken at the location or in the college or program where the degree is earned. Credit used toward degree programs may need to be earned from a particular source or within time constraints (see Senate Policy 83-80 (http://senate.psu.edu/policies-and-rules-for-undergraduate-students/82-00-and-83-00-degree-requirements/#83-80)). For more information, check the Suggested Academic Plan for your intended program.

Program Educational Objectives

The Surveying Engineering program prepares students with technical and professional skills for the professional practice. Due to their experience in our program, within few years of graduation, we expect our graduates to have the ability to:

1. Proficiently use mathematics, science, measurement methods, and modern surveying tools to collect, analyze, and reduce spatial data in professional applications or advanced study in surveying engineering or a related field.
2. Proficiently apply basic principles of land surveying, professional practice, and professional ethics to design and conduct surveys, and to analyze and interpret data in surveying engineering applications.
3. Effectively convey technical and professional information in written, verbal, and graphic forms, as an individual and as a member of a professional team.
4. Demonstrate their recognition of the importance of professional organizations for advancement toward professional licensure, development of leadership skills, and maintaining a broad understanding of contemporary societal issues by participating in activities of professional organizations in capacities ultimately leading to leadership positions.
5. Demonstrate their recognition of the need for continuous, life-long learning by participating in continuing education as students or as instructors.
**Student Outcomes**

Student outcomes describe what students are expected to know and be able to do by the time of graduation. The Surveying Engineering program is designed to enable students to:

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. Communicate effectively with a range of audiences
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. Acquire and apply new knowledge as needed, using appropriate learning strategies.

**Academic Advising**

The objectives of the university’s academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee’s unit of enrollment will provide each advisee with a primary academic adviser, the information needed to plan the chosen program of study, and referrals to other specialized resources.

**Suggested Academic Plan**

The suggested academic plan(s) listed on this page are the plan(s) that are in effect during the 2022-23 academic year. To access previous years’ suggested academic plans, please visit the archive (https://bulletins.psu.edu/undergraduate/archive/) to view the appropriate Undergraduate Bulletin edition (Note: the archive only contains suggested academic plans beginning with the 2018-19 edition of the Undergraduate Bulletin).

**Surveying Engineering, B.S. at Wilkes-Barre Campus**

The course series listed below provides only one of the many possible ways to move through this curriculum. The University may make changes in policies, procedures, educational offerings, and requirements at any time. This plan should be used in conjunction with your degree audit (accessible in LionPATH as either an Academic Requirements or What If report). Please consult with a Penn State academic adviser on a regular basis to develop and refine an academic plan that is appropriate for you.

If you are starting at a campus other than the one this plan is ending at, please refer here:

### University Requirements and General Education Notes:

US and IL are abbreviations used to designate courses that satisfy University Requirements (United States and International Cultures).

W, M, X, and Y are the suffixes at the end of a course number used to designate courses that satisfy University Writing Across the Curriculum requirement.

GWS, GQ, GHW, GN, GA, GH, and GS are abbreviations used to identify General Education program courses. General Education includes Foundations (GWS and GQ) and Knowledge Domains (GHW, GN, GA, GH, GS, and Integrative Studies). Foundations courses (GWS and GQ) require a grade of ‘C’ or better.

Integrative Studies courses are required for the General Education program. N is the suffix at the end of a course number used to designate an Inter-Domain course and Z is the suffix at the end of a course number used to designate a Linked course.

1 Courses CHEM 110, MATH 140, MATH 141, MATH 251, PHYS 211 and PHYS 212 require a grade of C or better for entrance into the C E major.
2 Courses MATH 140, MATH 141, PHYS 211, SUR 111, SUR 241, SUR 272, SUR 362, and SUR 372W require a C or better for graduation in the SUR E major.
3 Courses CE 321, CE 332, CE 335, CE 336, CE 337, CE 340, CE 360, CE 370, E MCH 211, EMCH 212, EMCH 213 and SUR 111 require a C or better for graduation in the CE major.
4 C E 3xx/4xx electives must be selected from two of three technical areas in the Civil Engineering program – Structures (C E x4x), Hydrosystems (C E x6x), and Environmental (C E x7x).
5 SUR 462, SUR 441, and SUR 455 may be substituted for a C E related areas technical elective if taken at the Wilkes-Barre campus prior to changing assignment to the University Park campus.
6 For those students who complete the ROTC program, three ROTC credits may be used to substitute for E E 211/212 or M E 201 and three ROTC credits may be used to substitute for the GHW requirements.

### Concurrent Degree Request and Acceptance Notes:

- To be eligible for this program, a student must initially enroll in the SURE program at the Wilkes-Barre campus. All SURE majors are
assigned an “entrance-to-major” (ETM) pool semester, even though they are already enrolled in a major.

- Students in the SURE major must make their request for concurrent degree status during their ETM pool semester, which is typically the spring semester of their second year.
- ETM courses of CHEM 110, MATH 140, MATH 141, and PHYS 211 must be completed with a C or better before the request for concurrent degree status will be acted upon.
- To be considered for the concurrent degree option, the applicant must have a cumulative grade-point average of 2.70 or higher at the time of the ETM pool year. However, if the ETM GPA requirement is higher due to enrollment controls in the CE department, the higher GPA will be used for admission to the major.
- Upon acceptance into the CE major, students will remain at the Wilkes-Barre campus to complete their third year of study. During the spring semester of the third year, students will request a change of campus from WB to UP for the fall semester of the fourth year (7th semester).
- Students who wish to change their major to SURE during their first year of study, and who are also in pursuit of the concurrent degree option, should contact the Surveying Engineering program chair to discuss feasibility of completing the option.

**Career Paths**

Graduates from the surveying engineering program work at government agencies and private industry companies and specialize in boundary surveying, geodesy, image analysis (photogrammetry and remote sensing), and geographic information systems.

MORE INFORMATION ABOUT POTENTIAL CAREER OPTIONS FOR GRADUATES OF THE SURVEYING ENGINEERING PROGRAM (http://career.engr.psu.edu/)

**Professional Resources**

- National Society of Professional Engineers (https://www.nsps.us.com/)
- American Society of Civil Engineers (http://www.asce.org)

**Accreditation**

The baccalaureate program in Surveying Engineering is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org/.

MORE INFORMATION ABOUT ABET ACCREDITATION (https://www.abet.org/)

**Professional Licensure/Certification**

Many U.S. states and territories require professional licensure/certification to be employed. If you plan to pursue employment in a licensed profession after completing this program, please visit the Professional Licensure/Certification Disclosures by State (https://psu.edu/state-licensure-disclosures/) interactive map.
