BIOBEHAVIORAL HEALTH, B.S. (HEALTH AND HUMAN DEVELOPMENT)

Begin Campus: Any Penn State Campus
End Campus: University Park, World Campus

Program Learning Objectives

• Critical Evaluation of Research: Critically evaluate current empirical research on health and disease, explaining implications and limitations to the lay public.

• Disparity Mechanisms: Explain how the fundamental processes underlying health and disease can interact to produce individual differences in health, and health disparities among groups.

• Ethics: Understand and apply ethical principles in the conduct of research and professional practice and in the analyses in implementations of health-related policies and programs.

• Health Factors: Describe and understand the fundamental biological, behavioral, social, cultural and environmental processes that influence health and disease.

• Promotion/Prevention: Plan, implement, and evaluate health promotion/disease prevention programs for diverse populations.
