

BIOBEHAVIORAL HEALTH, B.S. (HEALTH AND HUMAN DEVELOPMENT)

Begin Campus: Any Penn State Campus

End Campus: University Park, World Campus

Program Description

This major provides interdisciplinary training designed to integrate biological, behavioral, and social science approaches to the study of human health and illness. Emphasis is placed on the study of physical health. The goal of this major is to help students gain working familiarity with multiple perspectives, approaches, and methods needed to address and solve problems of human health and illness. Students may select courses in the supporting courses category that will fulfill requirements for admission to graduate and professional programs. This major helps prepare graduates for entry-level jobs in a range of biomedical and health-related areas, including roles as research assistants, laboratory managers, biomedical product representatives, technical support positions in biomedical and health-related fields. This major also will provide excellent preparation for advanced study in natural and social science disciplines and related professional areas such as epidemiology, public health, environmental health and safety, and human services.

What is Biobehavioral Health?

Biobehavioral Health is the integrative scientific study of the many different factors (e.g., biology, psychology, environment) that affect health. The discipline focuses on how these different factors influence health and the development of interventions to improve health outcomes.

You Might Like This Program If...

- You are curious about all aspects of health.
- You want to understand the multiple and layered factors that influence health.
- You like to answer important questions by considering different perspectives, and you like to study information from many disciplines (e.g., biology, psychology, neuroscience, sociology, anthropology).
- You want to pursue a health-related career, whether it be in a laboratory, clinical practice, or consulting capacity.
