KINESIOLOGY, MINOR

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

What is Kinesiology?

Kinesiology refers to the study of human movement. This interdisciplinary field of study focuses on physical activity and includes specialized areas of study that include the arts, humanities, sciences and professional disciplines. These areas include biomechanics, psychology of physical activity, exercise physiology, history and philosophy of physical activity, motor development, as well as sports medicine and physical education pedagogy. This multi-disciplinary approach is useful for addressing health and wellness in a complex society.

You Might Like This Program If...

You enjoy working with people, have a passion for health and wellness, and are open to approaching problems with interdisciplinary strategies. As you learn about the human body as a whole, you will also have the opportunity to understand how you can apply your knowledge and skills to develop solutions that can help others in a number of ways, whether in a rehabilitation facility, with a professional sports team, or in a corporate office.

Exclude:
- EMT Courses - KINES 303, KINES 304, KINES 403, KINES 404.
- Internship Courses – KINES 495A, KINES 495B, KINES 495C, and KINES 495D and KINES 203, KINES 296 and KINES 496.

Academic Advising

The objectives of the university's academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee's unit of enrollment will provide each advisee with a primary academic adviser, the information needed to plan the chosen program of study, and referrals to other specialized resources.

Career Paths

Careers

Students with a Kinesiology minor have many career options after graduation. Discussion with an adviser, Kinesiology faculty, or professionals in the field can provide additional insight. Many students use their Penn State Kinesiology minor in allied health and wellness fields, working with a wide range of populations in many different settings. Our applied options give students hands-on experience to work with children and adults to promote health and wellness. Kinesiology minor students are valuable employees, with their strong scientific background that they can apply to solving problems related to human movement.

MORE INFORMATION ABOUT POTENTIAL CAREER OPTIONS FOR GRADUATES WITH A MINOR IN KINESIOLOGY (http://hhd.psu.edu/kines/undergraduate/career)

Opportunities for Graduate Studies

Many students in the Kinesiology minor are looking to attend graduate or professional school after they complete their undergraduate program. Kinesiology minor students are often interested in careers in physical therapy, occupational therapy, physician's assistant, medical school, dentistry, nursing, or chiropractic school. The Kinesiology undergraduate minor program can include a strong scientific foundation for further study in these fields.
