ANTHROPOLOGY, B.A.

Begin Campus: Any Penn State Campus
End Campus: University Park

Program Description
Anthropology is a holistic scientific discipline having links to the humanities. Anthropologists document, describe, and explain the physical and cultural differences of societies, both past and present. Anthropology sees the individual as part of a larger social order that both impinges upon and is molded by those who belong to it. Anthropology investigates how cultures interact and relate within specific economic, political, and ecological frameworks over time.

The Bachelor of Arts major focuses on the biological and cultural variations of human populations through archaeology, biological anthropology, and cultural anthropology. In addition to class work, students receive practical training in laboratory and field work.

What is Anthropology?
Anthropology is the study of human diversity – our biology, behavior, cultural complexity, and evolution. Anthropologists study living people across cultures and populations; past people through the fossil, archaeological, and historical records; as well as living and extinct nonhuman primates. Anthropologists document, describe, and seek to understand biological and cultural variation in humans both past and present as a way to understand and explain the human condition. The field is divided into several integrated areas of study. Archaeology focuses on past societies, both ancient and historic, in order to understand and explain culture change over time. Biological Anthropology describes and explains human biological variation today and in the past. Human Ecology or Cultural Anthropology studies contemporary societies and cultures and their interactions with the environment.

You Might Like This Program If...
• You are interested in human cultural and biological variation and you want to understand human behavior and biology.
• You find human diversity fascinating and want to explore and understand the human condition.
• You want to study important questions such as 'what makes us human?' and 'what is the origin and importance of human diversity?'
• You want to pursue a career in anthropological research, museum curation, education, health professions, law, non-governmental organizations, or international relations.
