ETHICS, MINOR

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

Program Description
This interdisciplinary minor, housed in the Department of Philosophy, is designed to provide students with training in ethical reasoning, frameworks, and methods, as well as offer the opportunity to work in various fields of applied ethics. In addition to the requirements for the student’s major department the minor consists of 18 credits selected from a wide range of disciplines (e.g., philosophy, communication, engineering, law, psychology, sociology, anthropology, public policy, international studies, and environmental studies). Courses deal with ethics from various perspectives, for example research ethics, media ethics, environmental ethics, bioethics, and business ethics.

Students in the minor will choose from a broad range of 0-, 100-, and 400-level ethics-related courses offered in the Philosophy Department, and will have the chance to take up to two ethics-related courses outside the department. Some Philosophy ethics-related courses cover prominent and powerful historical and contemporary approaches to ethical decision-making and leadership; others cover specific problems in ethical thinking or applications to concrete areas of life. The minor will be suitable for students in almost any major, especially students going on to further academic work or careers in medicine, teaching and education, communication, business, law, the health or life sciences, health administration, public policy, politics, computer science, or engineering.

What is Ethics?
The interdisciplinary Ethics minor at Penn State University includes fields such as philosophy, communication, engineering, law, psychology, sociology, anthropology, public policy, international studies, and environmental studies. Students will have the opportunity to learn about various ethical perspectives and challenges that relate to research ethics, business ethics, bioethics, media ethics, and more.

You Might Like This Program If...
- You want to learn about ethical frameworks and methods to guide successful execution of both professional and personal endeavors.
- You want to understand ethical issues involved in global situations such as the collapse of the stock market and global financial systems.

Academic Advising

The objectives of the university’s academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of-class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee’s unit of enrollment will provide each advisee with a primary academic adviser, the information needed to plan the chosen program of study, and referrals to other specialized resources.

Opportunities for Graduate Studies

Philosophy students score consistently higher than other majors on LSAT, MCAT, and GMAT exams. The study of philosophy provides students with an outstanding preparation for law school, medical school, and other advanced degrees.
