INFORMATION SYSTEMS AND STATISTICAL ANALYSIS, MINOR

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

Program Description

This minor focuses on the use of information systems and statistical methods for solution of human problems. This minor is applicable to any major throughout the University and enhances the student’s preparedness for graduate, research, and career opportunities.

What is Information Systems and Statistical Analysis?

The ISSA minor focuses on the use of information systems and statistical methods for the solution of human problems. This minor is applicable to any major throughout the University and enhances the student’s preparedness for graduate, research and career opportunities. Students in this minor will develop skills in information management and productivity systems, Internet-based information and communication services, and statistical analysis and interpretation. Upon completion of this minor, the student should have a firm grounding in the use of these technologies and their application to practical problems involving the management and utilization of information.
