Risk Management, B.S.

Begin Campus: Any Penn State Campus

End Campus: University Park

Career Paths

Corporations and non-profits have turned to risk management in an effort to protect themselves from the adverse consequences of all of these risks. Risk analysis touches a wide range of systems including management and control of risk and legal, political, economic, and property risk assessment. This rigorous program of study is designed to prepare students for careers in risk management, risk analysis, and government agencies that demand quantitative and qualitative skills needed to meet modern risk assessment requirements.
