## Program Description

The Bachelor of Science degree is intended to prepare students for careers in the administration of justice. Two emphases are provided:

2. for students interested in academic or research positions and who may seek graduate education before beginning employment.

## What is Administration of Justice?

As we continue the journey deeper into the twenty-first century, society is facing the serious social problem of effectively addressing crime in a rapidly changing world. Today's students are tomorrow's front line protectors and policy makers who balance the philosophies of crime control and due process. To be successful, practitioners, managers, and administrators in the criminal justice field must demonstrate a mastery of interdisciplinary knowledge and skills. Administration of Justice focuses on the interrelated components of the criminal justice system, public and private sector enforcement and investigation, legal systems, correctional treatment, and community services and on the development of critical thinking, written and verbal communication skills necessary to be successful leaders in this and related careers. Students engage in classroom instruction, research and experiential learning which prepare them for ethical leadership, global citizenship and engaged service.

For additional information, see the General Education Requirements (<http://bulletins.psu.edu/undergraduate/general-education/baccalaureate-degree-general-education-program/>) section of the Bulletin and consult your academic adviser.

## Academic Advising

The objectives of the university's academic advising program are to help advisees identify and achieve their academic goals, to promote their intellectual discovery, and to encourage students to take advantage of both in-and out-of class educational opportunities in order that they become self-directed learners and decision makers.

Both advisers and advisees share responsibility for making the advising relationship succeed. By encouraging their advisees to become engaged in their education, to meet their educational goals, and to develop the habit of learning, advisers assume a significant educational role. The advisee's unit of enrollment will provide each advisee with a primary academic adviser, the information needed to plan the chosen program of study, and referrals to other specialized resources.
