INFORMATION SCIENCES AND TECHNOLOGY, A.S. (UNIVERSITY COLLEGE)

Begin Campus: DuBois, Greater Allegheny, Hazleton, Mont Alto, Wilkes-Barre, Scranton, York

End Campus: DuBois, Greater Allegheny, Hazleton, Mont Alto, Wilkes-Barre, Scranton, York

DuBois Campus

• Know the System Development Lifecycle (SDLC): Demonstrate knowledge of the SDLC by applying its methods to information systems projects and lab exercises.
• Know Information Systems and Industry Methods: Demonstrate ability to apply various industry standards in system development, system maintenance, and ISO/IEC/IEEE standards.
• Use Information Sciences Theory/Practice: Use management theory and information technology processes in managing information systems, which include best practices for system design, development, and implementation.
• Manage Information Systems: Demonstrate knowledge and execution of designing and managing various information systems.
• Know Security Risk Factors: Demonstrate knowledge of security risk factors impacting on various system components; understand the impact of those risk factors on the larger information system; and demonstrate the ability to design, develop, and implement secure information systems, using the latest industry standards and best practices, (i.e., securing hardware, software compliance, etc.).
• Use Communication Skills: Apply written, oral, and graphic communication effectively in both technical and nontechnical environments, and use appropriate technical literature.
• Use Team Membership Skills: Function effectively as a member of a technical team.

Hazleton and York Campuses

• Knowledge/Application: Understand and apply the interdisciplinary, theoretical knowledge of the information sciences or security science
  • Define and explain the core concepts, principles, processes, and theories within the academic majors of IST and/or SRA
  • Apply the core concepts of the academic majors of IST and/or SRA to real-world problems
• Problem-Solving: Understand, apply and adapt various problem solving strategies, using appropriate technology and methods
  • Identify information problems and/or opportunities in terms of the human, informational and technology dimensions
  • Analyze issues surrounding the problem and/or opportunity in terms of the human, informational, and technology dimensions; and determine the requirements appropriate to understanding the situation
  • Design systems, architectures, processes, components, or programs to meet desired needs of the human context at varying levels of analysis (e.g., individual, group, organization, society, and/or world)
  • Deploy up-to-date and appropriate techniques, methodologies, and/or tools necessary for understanding opportunities and constraints and/or the optimal design, implementation and continuance of an information based solution
• Communication (Individual and Team): Communicate and work effectively (both individually and in teams) with a range of perspectives and audiences through a variety of media
  • Participate effectively on teams in order to accomplish a common goal
  • Communicate effectively with a range of audiences, formally or informally, through writing and the spoken word
  • Seek out, analyze, and incorporate diverse ideas and broader perspectives represented in the diversity of people
  • Make respectful and inclusive choices in interacting with customers, peers, supervisors, and/or subordinates with a diversity of identity characteristics (e.g., age, ancestry, color, disability or handicap, national origin, race, religious creed, sex, sexual orientation, gender identity, or veteran status)
• Professional Responsibilities: Understand professional responsibilities in terms of the ethical, legal, security and social aspects of any given problem and its solution
  • Demonstrate an understanding of the cognitive, social, legal, ethical, diversity, and security perspectives surrounding a given problem
  • Assess the impact of information, computing and technology on individuals, groups, organizations, society, and the world for the purpose of making informed decisions from a sociological, governmental, legal, and/or security perspective.
• Lifelong Learning: Commit to the continuous acquisition of relevant knowledge for professional development by self-teaching and/or ongoing education and learning
  • Employ information-seeking strategies and self-directed learning in pursuit of current knowledge
  • Enroll in professional development and tutoring opportunities

Mont Alto Campus

• Knowledge/Application: Understand and apply the interdisciplinary, theoretical knowledge of the information sciences or security sciences
  • Define and explain the core concepts, principles, processes, and theories within the academic majors of IST and/or SRA
  • Apply the core concepts of the academic majors of IST and/or SRA to real-world problems
• Problem-Solving: Understand, apply and adapt various problem solving strategies, using appropriate technology and methods
  • Identify information problems and/or opportunities in terms of the human, informational and technology dimensions
  • Analyze issues surrounding the problem and/or opportunity in terms of the human, informational, and technology dimensions; and determine the requirements appropriate to understanding the situation
• Communication (Individual and Team): Communicate and work effectively (both individually and in teams) with a range of perspectives and audiences through a variety of media
  • Participate effectively on teams in order to accomplish a common goal

Information Sciences and Technology, A.S. (University College)
• Communicate effectively with a range of audiences, formally or informally, through writing and the spoken word
• Seek out, analyze, and incorporate diverse ideas and broader perspectives represented in the diversity of people
• Make respectful and inclusive choices in interacting with customers, peers, supervisors, and/or subordinates with a diversity of identity characteristics (e.g., age, ancestry, color, disability or handicap, national origin, race, religious creed, sex, sexual orientation, gender identify, or veteran status)

**Professional Responsibilities:** Understand professional responsibilities in terms of the ethical, legal, security and social aspects of any given problem and its solution
• Demonstrate an understanding of the cognitive, social, legal, ethical, diversity, and security perspectives surrounding a given problem
• Assess the impact of information, computing and technology on individuals, groups, organizations, society, and the world for the purpose of making informed decisions from a sociological, governmental, legal, and/or security perspective.

**Lifelong Learning:** Commit to the continuous acquisition of relevant knowledge for professional development by self-teaching and/or ongoing education and learning
• Employ information-seeking strategies and self-directed learning in pursuit of current knowledge
• Enroll in professional development and tutoring opportunities

**Scranton Campus**
• **Communication:** Communicate and work effectively (both individually and in teams) with a range of perspectives and audiences through a variety of media.
• **Knowledge/Application:** Understand and apply the interdisciplinary, theoretical knowledge of the information sciences or security sciences
• **Lifelong Learning:** Commit to the continuous acquisition of relevant knowledge for professional development by self-teaching and/or ongoing education and learning.
• **Problem-solving:** Understand, apply and adapt various problem solving strategies, using appropriate technology and methods.
• **Professional Responsibilities:** Understand professional responsibilities in terms of the ethical, legal, security and social aspects of any given problem and its solution.

**Wilkes-Barre Campus**
• Apply the core concepts of the academic majors of IST to real-world problems.
• Identify information problems and/or opportunities in terms of the human, informational and technology dimensions.
• Analyze issues surrounding the problem and/or opportunity in terms of the human, informational, and technology dimensions; and determine the requirements appropriate to understanding the situation.
• Design systems, architectures, processes, components, or programs to meet desired needs of the human context at varying levels of analysis (e.g., individual, group, organization, society, and/or world).
