Prerequisite: permission of program

HADM 551: Health Care Law
3 Credits
Course on health law for administrators with coverage including hospital governance, taxation, licensure, liability, malpractice, patients’ rights, anti-trust.
Prerequisite: permission of program

HADM 552: Health Delivery Systems
3 Credits
This course discusses design and implementation of health care delivery systems and the pressure and stakeholders which impact those systems. The objective of the course is to increase students’ knowledge of the evolving health care delivery systems. This course functions as an elective course in the MHA program. It builds on core courses that have presented the basics of health systems. Students will be required to take a mid-term and final exam and write a term paper (grade 1/3 each). The content of the course is organized in four areas: (1) traditional delivery systems; (2) managed care concepts and practices; (3) healthy communities approaches; and (4) reform and futures issues.
course will be offered every third semester with an expected enrollment of 20 students.

**Prerequisite:** permission of program

HADM 594: Research Topics

1-15 Credits

Supervised student activities on research projects identified on an individual or small-group basis.

HADM 595: Internship

1-9 Credits/Maximum of 9

Supervised research-oriented off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

HADM 596: Individual Studies

1-9 Credits

Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

HADM 597: Special Topics

1-9 Credits

Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

HADM 897: Special Topics

1-9 Credits/Maximum of 9

Formal courses given on a topical or special interest subject which may be offered infrequently.
