PLANT BIOLOGY (PLBIO)

PLBIO 512: Plant Resource Acquisition and Utilization
4 Credits
Advanced study of plant resource acquisition and utilization considering molecular, physiological, and whole plant perspectives through lectures and problem solving.

PLBIO 513: Integrative Plant Communication and Growth
4 Credits
Advanced study of plant communication, growth, and development considering molecular, physiological, and whole plant perspectives through lectures and problem solving.

PLBIO 514: Modern Techniques and Concepts in Plant Ecophysiology
2 Credits
An intensive introduction to concepts of plant ecophysiology and modern techniques used in this field.

Prerequisite: BIOL 220W
Cross-listed with: HORT 514

PLBIO 515: Modern Techniques and Concepts in Plant Cell Biology
2 Credits
An intensive introduction to concepts of plant cell biology and modern techniques used in this field.

Prerequisite: introductory course in plant physiology
Cross-Listed

PLBIO 516: Modern Techniques and Concepts in Plant Molecular Biology
2 Credits
An intensive introduction to contemporary molecular biology methods as applied to the study of plants.

Prerequisite: general biology and plant physiology at the undergraduate level
Cross-Listed

PLBIO 590: Colloquium
1-3 Credits/Maximum of 3
Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

PLBIO 596: Individual Studies
1-9 Credits/Maximum of 9
Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
