**GRAPHIC DESIGN (GD)**

**GD 1S: First-Year Seminar in Graphic Design**

1 Credits

An orientation to the historical, social, and professional context of design and an exposure to a variety of ethical, philosophical, and topical ideas from the world of design.

**Prerequisite:** admission to the AADES program
First-Year Seminar

**GD 100: Introduction to Graphic Design**

3 Credits

A beginning level graphic design course. Instruction touches on the practice, theories, history and processes of the graphic design industry. GD 100 Introduction to Graphic Design (3) (GA) GD 100 (GA)

INTRODUCTION TO GRAPHIC DESIGN (3) is a beginning level graphic design course. Instruction touches on the practice, history, theories, and analysis of the design industry. This course places emphasis on problem solving and observing design, while developing intuition and creativity. Projects focus on the process of defining the parameters of a design problem, observing examples within the design industry, and critically evaluating examples of effective and ineffective design. The course will help students to: 1. Understand the graphic design industry and the responsibilities of the profession. 2. Develop an appreciation for the practice of design. 3. Begin to develop the ability to define and solve problems. 4. Increase their knowledge of the history of graphic design and typography. 5. Refine their conceptual skills. 6. Learn and understand the vernacular of the industry. Students will be quizzed on terminology and important facts provided in the readings.

General Education: Arts (GA)
GenEd Learning Objective: Effective Communication
GenEd Learning Objective: Crit and Analytical Think

**GD 101: Thinking Creatively: Defining Problems, Solving Problems, and Generating Ideas in Graphic Design**

3 Credits/Maximum of 3

An introduction to the theory and practice of defining problems, developing solutions, and generating ideas in design. GD 101GD

101 Thinking Creatively: Defining Problems, Solving Problems, and Generating Ideas (2) This course is designed to help students learn to think creatively, define problems, and solve those problems by generating good ideas. The first part of the course, Learning to Think Creatively, will cover basic principles and concepts used in thinking creatively. In the second part of the course, Defining Problems, students will learn how to effectively define problems by establishing and refining goals and objectives based on research. The third part of the course, Solving Problems and Generating Ideas, will engage students in practical project-based learning by creating solutions to design problems through teamwork, brainstorming, and a design sequence that fosters new ideas and tests them through prototyping and analysis. Students will learn to approach problems in design by developing skills in creative thinking, applying those skills in defining problems, and working in creative teams to solve problems through the generation of new ideas that can be practically applied.

**Concurrent:** GD 001S

**GD 102: Introductory Design Studio**

3 Credits

A studio course in defining problems, solving problems, and generating ideas. GH 102 Introductory Design Studio (3) This course is designed to build upon the experience of GD 101 Thinking Creatively: Defining Problems, Solving Problems, and Generating Ideas by engaging students in a studio environment where they must arrive at solutions to two design problems, each requiring approximately seven weeks work. Students will define problems and arrive at creative solutions to those problems by generating ideas based on an applied method involving teamwork, brainstorming, and a design sequence that fosters new ideas and tests them through phototyping and analysis. This course is designed for students in the AADES pre-graphic program, although it emphasizes concepts and methodologies applicable to all design fields. Students will learn to approach problems in design by developing skills in creative thinking, applying those skills in defining problems, and working in creative teams to solve problems through the generation of new ideas that can be practically applied. Grading is based on participation (20%), studio project one (40%), and studio project two (40%). GD 102 is only available to students enrolled in AADES or by permission of instructor and carries the prerequisite of GD 1S and GD 101.

**Prerequisite:** GD 001S and GD 101

**GD 110: User Experience Design: Concepts and Principles**

3 Credits/Maximum of 6

Students in this introductory course will study foundational concepts and methodologies in User Experience (UX) design and thinking. User experience (UX) design is the process designers use to create products that provide meaningful and relevant experiences to users and is rooted in the research and discovery of digital audiences, inclusive of enhancing user engagement and loyalty through usability, accessibility, and product satisfaction. GD110 offers practical instruction focused on visual communications perspective, rather than one focused on programming alone. The process of designing user experiences within digital systems and applications will be explored and analyzed, as well as introductory knowledge in constructing design systems for various based on the needs of users. The course will feature iterative design processes to employ basic management techniques in working with product stakeholders for digital planning practices. GD 110 will provide foundation level instruction for concepts and principles that will be applied more broadly in GD 210.

**GD 115N: Visualizing Information**

3 Credits

The world is awash with complex, dynamic information. With the development of powerful technologies capturing vast amounts of data, the art of visually representing information in ways that increase understanding of complex data and models will become a critical skill. Effective representations can communicate information in ways that maximize comprehension, analysis, exploration, and understanding of the underlying data. Knowing how to read and interpret visual data is essential to navigating this ocean of information. Those who know how to present data visually employ a powerful communication tool. In this class, you will become an effective reader and creator of visual representations of data. Through critical assessment of examples,
interactions with peers, and the generation of your own projects, you
will generate visualizations of data and create works using a common
visual language to help people analyze and understand the information
at hand. Good visualizations not only present a visual interpretation of
data, but also do so by improving comprehension, communication, and
decision-making. Effectively functional visualizations can offer insights
that reveal evidence and truths that may be difficult to otherwise observe.
They can often empower readers to explore both the norms that give
meaning to the data and the exceptions that convey its complexity or
uncertainty. Visualized information can assist in revealing: - Distributions
and frequency over time - Changes and trends - Relationships and
correlations - Spatial and mapping information Regardless of your major
field of study, the ability to effectively visualize information represents a
significant and essential skill for effective communication. Whether you
are creating representation of your work for your company's leadership
board, a general public audience, or a meeting of your peers, the ability to
craft a visual display that offers an accurate and insightful interpretation
of data is a key capability in the workplace. No prior experience in design
or statistics is required for success in this course.

General Education: Arts (GA)
General Education: Humanities (GH)
General Education - Integrative: Interdomain
GenEd Learning Objective: Effective Communication
GenEd Learning Objective: Crit and Analytical Think
GenEd Learning Objective: Integrative Thinking
GenEd Learning Objective: Key Literacies

GD 200: Graphic Design Studio I

3 Credits

A beginning graphic design studio course. Instruction focuses on the
practical and analytical process of creating graphic designs and their
critical evaluation. GD 200/GD 201 Graphic Design Studio I (3) This course
is a beginning graphic design studio course. Instruction focuses on the
practical and analytical process of creating graphic designs and their
critical evaluation. Emphasis is on problem solving and technical training
while, at the same time, nurturing intuition and creativity. The course
will help students to: 1. Develop skills and techniques applicable to
graphic design. 2. Become familiar with appropriate computer hardware
and software. 3. Develop the ability to define and solve problems. 4.
Develop an understanding of graphic design as a profession. 5. Refine
their conceptual skills. 6. Develop the work habits and attitudes of design
professionals. Grading: 1. Work will be evaluated on the relevance and
originality of the design idea, the suitability of the design approach in
serving the client's needs, the effectiveness of the design in reading
its intended audience, and all pertinent functional parameters. 2.
Professional attitude and the development of professional work habits
will be evaluated. Students are expected to think for themselves, budget
their time, meet deadlines, and adhere to production schedules. 3.
Attendance is required. In the case of illness or an emergency, students
are required to contact the professor just as they would contact an
employer. Three unexcused absences will result in the final semester
grade being lowered one full letter grade. 4. Neatness, craft and attention
to detail will be considered in the final grade. 5. Visual, verbal and written
communication skills will also be part of the evaluation. GD 200 carries
the prerequisite of GD 102.

Prerequisite: GD 102

GD 201: Typography

3 Credits

A consideration of the word in relation to visual organization and its
application to communication. GD 201

Prerequisite: GD 200

Bachelor of Arts: Arts

GD 202W: The History of Graphic Design

3 Credits

A survey of graphic design, especially emphasizing influential
movements, innovative designers and technological advances relevant
to contemporary visual communication. GD 202 The History of Graphic
Design (3) The History of Graphic Design course provides an overview
of design as a vehicle of visual communication. The primary focus of
the coursework is on images and styles of image-making as well as on
language as a visual, typographic form. The application of images and
typography is the basis of design, and its history ranges from Sumerian
clay tablets to 21st century digital tablets. Special emphasis is given to
periods of innovation and inspiration, including the late Roman period,
the Renaissance, the Industrial Era, the rise of Modernism in Europe and
America, and the digital revolution. Graphic design is a discipline which
embraces its production and delivery technology; therefore, attention is
also focused on the evolution of that technology—from the letterpress and
metal typography, through the camera and photomechanical reproduction
era, to current computer and digital production processes.

Prerequisite: GD 001S, GD 100, GD 101; Concurrent: GD 102

Writing Across the Curriculum

GD 203: Advanced Typography

3 Credits/Maximum of 3

Continues students' knowledge of foundational typographic systems and
investigates the communicative potential of emerging methodologies
on language systems in visual culture. Advanced Typography satisfies
institutional and professional demand for future design practitioners to
be versed in a robust knowledge of typography, the skillful techniques
of organizing visible language. Building upon foundational knowledge
gained from Typography GD201, this course excels student syntactic
and semantic proficiencies and applies them towards crafting distinctive
visual communications for print and digital platforms. Primarily,
students will organize complex message systems of text, icons and
image matter in the design of artifacts that address contemporary
communication paradigms. They will explore the changing notion of
the published form and create innovative content delivery solutions,
which anticipate unique reader interpretation. Through investigation and
analysis students will also determine efficacy of emerging technologies
in visual culture such as screens, devices, and open source programming.
Coursework manifests in several forms. Typeface design converges
social, culture, linguistic, and semiotic systems to form a useable
alphanumeric character set. Voluminous publications require students
to develop solutions for narrative structure with large quantities of
text and image. Environmental applications such as way finding and
experience-based installations use visible language to navigate, explain
or entertain in public settings. Visual communication in their printed
form is the arrangement of poetic and visual content addressing material
and physical variables. In digital form this content may also address
technology, virtual interactions and sequential time-based media.
Students will continue to develop core professional competencies in their mastery of industry tools and techniques for actual and virtual domains. Students should also expect introduction to newly available tools.

**Prerequisite:** GD 201

**GD 210: User Interface Design and Prototyping**

3 Credits/Maximum of 6

Students in this course will apply knowledge in User Interface (UI) design and practice designing and prototyping compelling visual interfaces for multiple platforms - from websites to physical spaces to the nuanced interactions in mobile and wearable environments. The relationship of context to concept will be evaluated and applied, with emphasis placed upon designing for desktop and mobile environments through project-based learning and critique. Knowledge acquired in GD 110: User Experience Design: Concepts & Principals will allow students to understand user behavior while applying technical knowledge in learning design systems and standards for desktop and mobile devices. Students will learn user interface design software to increase design capabilities, as well as prototyping software to further interaction design skill sets.

**Prerequisite:** GD 110

**GD 295: Internship**

1-18 Credits/Maximum of 18

Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

**GD 296: Independent Study**

1-18 Credits/Maximum of 18

Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

**GD 297: Special Topics**

1-9 Credits/Maximum of 9

Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

**GD 299: Foreign Studies**

1-12 Credits/Maximum of 12

Courses offered in foreign countries by individual or group instruction.

International Cultures (IL)

**GD 300: Design Photography**

4 Credits

An investigation of graphic photography processes and how print technology affects the final appearance of a photograph. GD 300

**Prerequisite:** GD 201 and successful portfolio review

Bachelor of Arts: Arts

**GD 301: Experience Design Process + Methods**

4 Credits/Maximum of 4

Experience design process and methods for graphic design majors. GD 301 is an advanced graphic design studio class that provides graphic design students with an in-depth study of the intricate relationship between the professional graphic designer and digital technology. Students will advance their knowledge of design software applications and will be introduced to programing languages that will assist them throughout the design process. From research and ideation to the creation of comprehensive studies and final designs, students will be given the tools that are critical to the completion of a variety of graphic design projects. The course will help students to: 1. Gain proficiency in appropriate hardware, software and programing languages. 2. Apply the students’ existing digital knowledge to design methodology for interfaces, user behavior and experiences. 3. Develop an understanding of the graphic designer as a digital communicator. 4. Refine their digital craft. 5. Develop the work habits and attitudes of professional designers.

**Prerequisite:** GD 201

**GD 302: Applied Communication**

4 Credits

Definition and concentrated involvement in problem/audience analysis, with emphasis on understanding symbol and image in evoking audience response. GD 302

**Prerequisite:** GD 300, GD 301

Bachelor of Arts: Arts

**GD 303: Applied Experience Design**

4 Credits/Maximum of 4

Interaction design and user experience for graphic design. This class introduces the concepts, technologies, and languages used to design and build modern interactive experiences. GD303 will explore the visual aspects and structural flow of interface design. Through projects, lectures, and workshops students will explore design strategies for web and mobile devices. Students will design screen-based experiences through research and empathy to achieve their user's end-goals and objectives. Core concepts might include content strategy, personas, sitemaps, user flows, wireframes, information architecture, and usability principles. The objectives for this course are to give graphic design students experience in the complexities of digital visual communication in emerging mediums and to provide students with the opportunity to work with software packages that facilitate digital communication. Students will receive instruction regarding the graphic designer's role in complex, collaborative digital communications.

**GD 304: Practical Communications**

3 Credits

Practical design experience for students through design/publicity problems from the University and community non-profit organizations. GD 304

**Prerequisite:** Prerequisite or concurrent GD 300, GD 301

Bachelor of Arts: Arts
GD 310: Studio Apprenticeship
3-6 Credits/Maximum of 6

Direct involvement in the creative process of the artist-teacher in the studio environment. GD 310

**Prerequisite:** Junior or senior standing in Graphic Design. Prior approval of proposed assignment by instructor.
Bachelor of Arts: Arts

GD 395: Internship
1-18 Credits/Maximum of 18

Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

GD 397: Special Topics
1-9 Credits/Maximum of 9

Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

GD 400: Time and Sequence
4 Credits

Development of visual sequence as replies to graphic design problems.
GD 400

**Prerequisite:** GD 302
Bachelor of Arts: Arts

GD 401: Package Design
3 Credits

Orientation to packaging designs as it relates to the consumer, client, and to societal and environmental concerns. GD 401

**Prerequisite:** GD 302
Bachelor of Arts: Arts

GD 402: Senior Problems
4 Credits

Development of visual replies to graphic design problems. GD 402GD 402 Senior Problems (4)(BA) This course meets the Bachelor of Arts degree requirements. This course is an in-depth course that explores the essential relation of the verbal and visual elements of design to advanced graphic design problems. The class is divided into two parts: 1) Each student submits a written proposal for a hypothetical magazine. In the proposal he or she describes the publication's subject, content and editorial point-of-view, along with the intended audience, must be described in the proposal. Additionally, the functional parameters surrounding editorial design and a discussion of similar publications in the marketplace should be touched upon in the paper. The proposal drives the design of the publication. Each student is required to develop an appropriate title for their magazine, design a masthead, two covers, a table of contents, and a minimum of three articles. The minimum length for each article is two spreads (four pages). All sections of the magazine will be bound together with one of the covers for final presentation. Additionally, each student must apply his or her masthead design to letterhead, envelope and business card. 2) Each student prepares for graduation and the beginning of his or her career by putting together their final portfolios, resumes, letters and job search strategies. The course will help students to: 1. Perform as editorial designers. 2. Prepare for the real working environment they will confront in the professional arena after graduation. 3. Thoroughly examine the design process and learn to clearly define the problem, in order to worklogically towards an appropriate solution. 4. Develop the work habits and attitudes of professional designers. 5. Polish visual, verbal and written presentation skills. 6. Practice positive behavior, and conflict avoidance/resolution in the workplace. 7. Prepare designers for realistic working environment expectations. 8. Foster an appreciation of good typography. Grading: 1. Work will be evaluated based on the relevance and originality of the idea and the appropriateness of the design approach to the idea, the intended audience, and all pertinent functional parameters. 2. Professional attitude and the development of professional work habits will be evaluated. Students are expected to think for themselves, budget their time, meet deadlines, and adhere to production schedules. 3. Attendance is required. In the case of illness or an emergency, students are required to contact the professor just as they would contact an employer. Three unexcused absences will result in the final semester grade being lowered one full letter grade. 4. Neatness, craft and attention to detail will be considered in the final grade. 5. There will be a review at the end of the semester, which will include all work from the class. Each piece will be evaluated for quality and presentation. 6. Visual, verbal and written communication skills will be a part of the evaluation. GD 400 and 401 are prerequisites to GD 402. GD 402 will be offered spring semesters.

**Prerequisite:** GD 400, GD 401
Bachelor of Arts: Arts

GD 403W: Graphic Design Seminar
3 Credits

A seminar on subjects which relate to the field of graphic design. GD 403W GD 403W Graphic Design Seminar (3)(BA) This course meets the Bachelor of Arts degree requirements. This is an advanced course covering the history and contemporary theory and criticism of graphic design. Topics include: the invention of writing and alphabets, medieval manuscripts books, the origin of printing and typography, Renaissance graphic design, the Arts and Crafts movement, Victorian and Art Nouveau graphics, modernist influences on graphic design, visual identity and conceptual images, postmodern design, the computer graphics revolution, new media design, ethics and professional practice, and contemporary issues relating to design theory and criticism. The course is intended to: 1. Provide a firm understanding of the history of graphic design. 2. Develop the capacity to discuss the articulate current issues in graphic design. 3. Promote writing and speaking abilities through class assignments. 4. Help students to develop the work habits and attitudes of professional designers. Grading: 1. Class projects as well as class participation will be evaluated. 2. Written assignments, including short synopses of readings and additional essays, and the quality of writing will be a part of the grade evaluation. 3. Professional attitude and the development of professional work habits will be evaluated. Students are expected to think for themselves, budget their time, meet deadlines, and adhere to production schedules. 4. Attendance is required. In the case of illnesses or an emergency, students are required to contact the professor just as they would contact an employer. Three unexcused absences will result in the final semester grade being lowered one full letter grade. 5. Visual and verbal as well as written communication skills will be a part of the evaluation. GD 320 is the prerequisite to GD 403W. GD 403W will be offered spring semester.
**Prerequisite:** GD 302
Bachelor of Arts: Arts
Writing Across the Curriculum

**GD 404: Book Design**

3 Credits

Writing, designing, illustrating and production (printing) of a book. GD 404/405: Book Design (3)(BA) This course meets the Bachelor of Arts degree requirements. This is an advanced course that explores the relationship of the written and visual elements in the design of a book. Each student (or student team) will select a topic, create the text and give visual form to an original book, which will have a minimum length of 16 pages. The intrinsic qualities of the book medium such as typography, sequence, imagery, paper, dye-cuts, fold-outs, pop-ups, and binding will be investigated in relation to how each affects the overall communication of the book's meaning to a specific audience. The course is intended to: 1. Foster an appreciation for good typography. 2. Allow students to investigate the sequential relationships between the visual and verbal aspects of a book and their synergistic interaction in the communication of the book's meaning to a particular audience. 3. Introduce the appropriate use of illustrations in book design. 4. Help students develop the work habits and attitudes of professional designers. 5. Help students to examine the design process to learn to define the problem and work logically towards an appropriate solution. 6. Develop the ability to work as a member of a team. 7. Gain a deeper understanding of graphic design aesthetically, critically, and technically. Grading: 1. Each of the two copies of the book that are submitted at the end of the semester should be identical, with flawless execution and craft. 2. The book will be evaluated on the originality of the idea and the appropriateness of the design approach to the idea, the intended audience and all pertinent functional parameters. 3. Professional attitude and the development of professional work habits will be evaluated. Students are expected to think for themselves, budget their time, meet deadlines, and adhere to production schedules. 4. Visual, verbal and written communication skills will be evaluated. GD 404 will be offered fall or spring semesters.

**Prerequisite:** GD 302
Bachelor of Arts: Arts

**GD 405: Minor Advanced Studio**

3 Credits/Maximum of 3

This class introduces the concepts, technologies, and languages used to design and build publications, objects, and complex collaborative digital communications. GD405 provides Graphic Design Minors with an advanced-level design studio, appropriate in rigor, and in keeping with the expectations of the Minor in Graphic Design degree. This will prepare the successful student for the self-guided thesis environment of the Minor in Graphic Design Capstone Course (GD406). Within this advanced studio course, students will continue to develop core professional competencies in their quest for mastery of industry tools and techniques for actual and virtual domains. It will apply the student’s existing knowledge of design methodology to the completion of project-based studio coursework. Through research, ideation, and the creation of final designs, students will be given continued experiences in printed mediums, be introduced to the design of physical artifacts, and exposed to the complexities of digital visual communication in emerging mediums. These may include complex long-format publications, commercial product packaging, websites, and digital interfaces. Students will develop an understanding of the graphic designer as a professional communicator, and develop the work habits and attitudes found within this design profession.

**Prerequisite:** GD 200, GD 201

**GD 406: Minor Capstone Studio**

3 Credits/Maximum of 3

A structured studio for Minors in Graphic Design culminating into a final self-authored project on a topic that engages each student’s declared major. The Minor Capstone Studio applies each student’s accumulated knowledge of graphic design towards the development of a self-authored project on a topic that engages his or her declared major. Each project will exercise the student’s capacity to synthesize visual form and written components through the application of design methodology, and culminate their findings into a completed, presented thesis. Coursework will also include an introduction to communication theory, contemporary communication paradigms, the changing notion of audience and context, and formal research methodology.

**Prerequisite:** GD 405

**GD 494: Research Project**

1-12 Credits/Maximum of 12

Supervised student activities on research projects identified on an individual or small-group basis.

**GD 494H: Research Project**

1-12 Credits/Maximum of 12

Supervised student activities on research projects identified on an individual or small-group basis.

Honors

**GD 495: Internship**

1-18 Credits/Maximum of 18

Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

**GD 496: Independent Study**

1-18 Credits/Maximum of 18

Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

**GD 497: Special Topics**

1-9 Credits/Maximum of 9

Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
