The Master of Engineering Management (MEM) is a 33-credit interdisciplinary graduate professional degree program that aims to prepare students the skills to manage complex, heterogeneous engineering projects, products, and services with the theoretical understanding to become leaders in technical organizations. The program offers experience in the analytical approaches to solving technical and sociotechnical problems, leading technical people and fostering effective teams, and managing technical projects in the presence of uncertainty and risk.

The program is offered at Penn State Great Valley and online through Penn State World Campus.
