FOOD SCIENCE

Learning Outcomes

Master of Science (M.S.)

- 1. Know. Graduates will develop a deep conceptual understanding of food chemistry, microbiology, engineering, nutrition.
- 2. Critical thinking. Graduates will be able to solve practical problems in the Food Science field.
- Research. Graduates will demonstrate the ability to design scientific approaches to solve practical problems and to select appropriate methods of data analysis.
- Communicate. Graduates will be able to accurately report the results of research data in field of food science through written and oral presentations.
- 5. Professional practice. Graduates will conduct themselves in an ethical and professional manner.

Doctor of Philosophy (Ph.D.)

- 1. Know. Graduates will develop a deep conceptual understanding of food chemistry, microbiology, engineering, nutrition.
- 2. Critical thinking. Graduates will be able to apply their knowledge to independently identify and define original research problems.
- Research. Graduates will demonstrate the ability to design scientific approaches to solve unanswered question and to select appropriate methods of data analysis.
- Communicate. Graduates will be able to accurately report the results of research data in field of food science through written and oral presentations.
- 5. Professional practice. Graduates will conduct themselves in an ethical and professional manner.
